This course is a continuation course for BMB 616. It covers essentially the same topics as BMB 616 but at a more advanced level. It brings the student to the forefront of research in Molecular Biology. The course material is discussed exclusively in the form of original research papers. Based on this experience, students are required to propose experimental approaches to biological problems and defend them.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BMB 710. Advanced Topics in Biochemistry and Molecular Biology. 1-5 Credit Hours.

This course is offered by various faculty members in the department on a rotating basis depending upon their expertise. For example, an advanced topic course in Nanomedicine offered by Dr. Deo and Dr. Dhar covers these topics through lectures.

Components: DIL.

Grading: GRD.

Typically Offered: Fall.

BMB 711. Best Practices in BMB Instruction. 1-3 Credit Hours.

Graduate students in the basic sciences will explore different approaches to science course development, implementation and assessment. This includes identifying gaps in the curriculum, creating classroom structure that reflects the content and execution of classroom activities, identifying and gathering appropriate material from the primary research literature, instructing undergraduates in how to become highly interactive self-directed learners, providing formative feedback to improve student achievement throughout a course, proper design and implementation of assessment tools, student communication, classroom management and ethics.

Components: DIS.

Grading: GRD.

Typically Offered: Fall & Spring.

BMB 714. Molecular Genetics. 4 Credit Hours.

This course deals with mechanisms and fundamental concepts of genetic inheritance. The first part of the course is devoted to the genetics of bacteria and bacteriophages. Topics include genetic implementation, recombination, suppression, transposition, conjugation, transformation, transaction, and regulation of prokaryotic gene expression. The second part of the course covers selected topics in eukaryotic genetics (including molecular genetics of yeast, mitochondria, *Drosophila*, mice and humans). Problem solving is emphasized in homework and exams. The objective of the course is to provide students with an appreciation of the value of molecular genetics as a tool they can use to solve a wide variety of problems in bio-medical research.

Components: DIL.

Grading: GRD.

Typically Offered: Spring.

BMB 715. Structural Biology and Applications to Drug Discovery. 2 Credit Hours.

This course focuses on the relationships between structure and function in biological macromolecules, and how this knowledge has led to the discoveries of new drugs.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BMB 716. Bioinformatics of Gene Regulation and Protein Function. 3 Credit Hours.

Among the skills required to become a successful interdisciplinary life scientist is the ability to navigate biological databases to better understand gene and protein function. Genome sequences contain the signals that guide differential gene expression and encode structural RNAs, regulatory RNAs and proteins. This course will introduce the tools, databases and evolutionary considerations that help us understand the regulation of gene expression and predict protein function. The biochemical and regulatory functions encoded in genomic DNA sequences will be explored using bioinformatics techniques including gene finding, BLAST searches, PubMed searches, high-throughput dataset mining, multiple alignments, phylogenetic analysis, identification of conserved functional domains and motifs, assessment of protein-protein and protein-ligand interactions, gene context and co-occurrence analysis. Secondary and tertiary structural analysis, metabolic and cellular modeling, and phenotypic analysis. The databases, tools and tutorials available at websites developed by the National Center for Biotechnology Information, EMBL-EBI, the Protein Data Bank, and others will be used as supporting course materials. Each week will have a set of online videos and instructions to complete before the weekly live lecture. The live lecture consist of a one hour slide presentation and one half-hour of Q&A discussions. Competency in bioinformatics will be assessed by a midterm and a final exam.

Components: DIL.

Grading: GRD.

Typically Offered: Fall.

BMB 717. Nutrients, Enzymes, and Metabolic Flux. 3 Credit Hours.

Students learn how macronutrients (carbohydrates, protein, and lipids) and (ii) micronutrients (vitamins and minerals) are obtained in the diet, digested, absorbed, and assimilated. Then, students learn to formulate mechanisms of enzyme catalysis and inhibition. Such analytical skills are then used to more rigorously examine enzymes that control specific points of metabolic flux. Students finish this course with thorough mechanistic understanding of (i) macronutrient composition, intake, and energy production and (ii) requirements of micronutrients and hormones in controlling metabolic balance.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BMB 719. Fundamentals of Epigenetics. 3 Credit Hours.

The influence of nutrition on gene expression through modification of DNA and proteins in chromatin is described (i.e., epigenetics). Also, genetic variations, as well as the influence of bacterial flora of the digestive tract, are considered with respect to abilities to metabolize various dietary components. Students learn how to gather information about course topics and present their findings

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BMB 720. Research in Residence. 0 Credit Hours.

Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in BMB 710 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BMB 731. Special Work. 1-3 Credit Hours.

Special work, lecture, or laboratory or a combination of these, as determined by advisor in accord with student's individual interest.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BMB 810. Master's Thesis. 1-6 Credit Hours.

The student working on his/her master's thesis enrolls for this credit. In most departments not to exceed six credits, as determined by his/her advisor.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

BMB 830. Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of BMB 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

BMB 840. Doctoral Dissertation- Post Candidacy. 1-12 Credit Hours.

Required for all PhD candidates. The student will enroll for credits as determined by the Office of Graduate and Postdoctoral Studies.

Components: DIL.

Grading: SUS.

Typically Offered: Fall & Summer.

BMB 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THE.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Biology (BIL)

BIL 101. Introductory Biological Science. 3 Credit Hours.

An introduction to life sciences for the non-major. Students with credit in BIL 150 may NOT take this course to fulfill the natural science requirement. Not for credit in the biology major or minor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BIL 102. Elementary Biotechnology. 3 Credit Hours.

Major aspects of the biotechnology field for the non-science major. Food biotechnology, enzymes, environmental biotechnology, transgenic animals and plants, analytical biotechnology and more. Not for credit in the biology major or minor.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 103. Introduction to Ecology. 3 Credit Hours.

Overview of ecological and evolutionary principles; relationships of organisms to living and non-living aspects of the environment; human impact on ecosystems. Not for credit in the biology major or minor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BIL 104. Genetics and Society. 3 Credit Hours.

Genetics for non-science majors. The basics of DNA, genes, gene function, genomes and inheritance. Application of genetics to real-world issues, both personal and societal, from the history of life to challenges and opportunities we face in the modern times at the molecular level.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BIL 105. Biology of Plants. 3 Credit Hours.

Evolution and diversity of the plant kingdom; economic and cultural importance of plants to humans. Not for credit in the biology major or minor.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 106. Biology of Animals. 3 Credit Hours.

Evolution and diversity of the animal kingdom and the relationship between humans and other animals. Not for credit in the biology major or minor.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 107. Introduction to Evolution. 3 Credit Hours.

Processes and mechanisms of evolution. A scientific approach to the study of evolution by natural selection, concepts of fitness and adaptation, genetic and developmental bases of evolutionary change, how new species arise, major trends in evolution, extinction and human evolution. Not for credit in the biology major or minor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BIL 108. Molecular Journey to Being Human. 3 Credit Hours.

With a focus on the human species, students will explore the nature of DNA and proteins, the origin of life, RNA World hypothesis, the origins of human ancestors and modern humans, the recently-completed Human Genome Project, the genetic basis human diversity, and the ethics of using genetic knowledge to improve the quality of human life.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 109. Human Biology. 3 Credit Hours.

Structure and function of the human body, and the relationship of our species to its environment and other species. Not for credit in the biology major or minor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BIL 112. Human Hereditary Disease. 3 Credit Hours.

An overview of genetics, emphasizing human traits and disorders and their effects on individuals, families, and society. Discover the beauty of human nature, and our knowledge of it, as you develop an understanding of human genetics.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 113. General Biology Honors Seminar. 1 Credit Hour.

Special topics in biology correlated with BIL 150.

Corequisite: BIL 150.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

BIL 114. General Biology Honors Seminar. 1 Credit Hour.

Special topics in biology correlated with BIL 160.

Components: DIS.

Grading: GRD.

Typically Offered: Spring.

BIL 149. First Year Information. 1.00 Credit Hour.

First year seminar for incoming Biology majors. Facilitation and encouragement of development of critical thinking skills, proficiency in oral and written expression, and an ability to solve problems by integrating knowledge from different disciplines in Biology.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

BIL 150. General Biology. 4 Credit Hours.

Principles of biology at the cellular, genetic, and organismal levels of organization. Cell structure and function, energy transduction, biological information transfer, genetics, physiology.

Pre/Corequisite: ENG 105 or ENG 106 or ENG 107 Or AP ENG COMP =>5 Or SAT 700 or higher Evidence Base Read and Write Or 32 or higher ACT ENG And ALEKS MTH =>55 Or AP Cal AB score =>3 Or AP Cal BC score =>3 Or SAT Math Section Score 600 or higher.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BIL 151. General Biology Laboratory. 1 Credit Hour.

A laboratory approach to applying the scientific method. Experimental design and hypothesis testing at the cellular and molecular level.

Corequisite: BIL 150.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Summer.

BIL 152. HHMI General Biology Laboratory.. 1 Credit Hour.

Laboratory exercises to accompany BIL 150. Students teams engage in two inquiry -based laboratory research projects, each lasting six weeks, per semester.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

BIL 153. Introductory Biology/Chemistry Laboratory I. 1 Credit Hour.

Integrated biology and chemistry laboratory exercises for first year students.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

BIL 160. Evolution and Biodiversity. 4 Credit Hours.

Evolution and ecology of life on Earth. Systematics, biodiversity, evolutionary theory and mechanisms, with emphasis on the morphological, ecological, and behavioral adaptations of the diversity of life.

Prerequisite: BIL 150.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BIL 161. Evolution and Biodiversity Laboratory. 1 Credit Hour.

A laboratory approach to applying the scientific method. Experimental design and hypothesis testing at the organismal and ecological level.

Corequisite: BIL 160.

Components: LAB.

Grading: GRD.

Typically Offered: Spring & Summer.

BIL 162. HHMI Evolution and Biodiversity Laboratory.. 1 Credit Hour.

Laboratory exercises to accompany BIL 160. Student teams engage in two inquiry -based laboratory research projects, each lasting six weeks, per semester.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

BIL 163. Introductory Biology/Chemistry Laboratory II. 1 Credit Hour.

Integrated biology and chemistry laboratory exercises for first year students.

Corequisite: BIL 160 and CHM 112 or CHM 221.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

BIL 190. Studies in Biology. 1-5 Credit Hours.

Special topics taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

BIL 194. Studies in Biology. 1-5 Credit Hours.

Special topics taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

BIL 195. Studies in Biology. 1-5 Credit Hours.

Special topics taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

BIL 213. HIV and Emerging Diseases: Sex, Science, and Society. 3 Credit Hours.

The importance and value of science in ameliorating human suffering. Students will hear from virologists, immunologists, cell biologistst behavioral scientists, primary care physicians, health care providers, drug discoverers) policy makers, vaccinologists, and HIV-infected individuals aiming to inspire and encourage students to be enthusiastic about science and scientific research on emerging diseases.

Prerequisite: BIL 150 and BIL 151 or BIL 101.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BIL 220. Evolution and Disease. 3 Credit Hours.

Evolutionary perspectives on genetic disorders, cancer, virulence, drug resistance and diet. The role of biodiversity in understanding pathogens and parasites, emerging disease, natural products and drug discovery. How diseases have shaped human evolution.

Prerequisite: BIL 150 and BIL 160.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BIL 223. Plants and People. 3 Credit Hours.

A multi-disciplinary survey of ethnobotany and economic botany, emphasizing the ecosystem services that plants provide to humans.

(BIL150/151) OR (BIL160/161) OR (BIL101 or BIL105).

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BIL 226. General Botany. 3 Credit Hours.

Survey of the plant kingdom, including evolution, plant diversity, reproduction, structure, function and ecology.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BIL 227. General Botany Laboratory. 1 Credit Hour.

Laboratory exercises to accompany BIL 226.

Pre/Corequisite: BIL 226.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 228. Medical Botany. 3 Credit Hours.

History of medical botany, approaches to health by different cultures, separation and identification of secondary compounds and mechanisms of action. Molecular and physiological action of different secondary compounds in the treatment of common western ailments. In vivo identification of local medicinal plants.

Prerequisite: BIL150 and BIL151 AND BIL160 and BIL161 for Biology Majors or Minors.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 230. Introduction to Marine Biology. 3 Credit Hours.

The sea as an environment. Marine life, its special problems and adaptations. Emphasis on Caribbean organisms. Lecture, 3 hours. Identical to Marine Science 230.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BIL 231. Introduction to Marine Biology Laboratory. 1 Credit Hour.

Experimental laboratory exploring ecology, physiology and behavior of marine organisms in southern Florida marine habitats. Exercises cover laboratory techniques in behavior, functional morphology, productivity, fisheries research, osmoregulation and community ecology.

Pre/Corequisite: BIL 230.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

BIL 244. Hormones and Behavior. 3 Credit Hours.

A comparative approach to the relationship between hormonal mechanisms and behavior in both animal model systems and humans. An introduction to the endocrine system, sex differences in behavior, parental behavior, hormones and social behavior, learning and memory, stress and affective disorders, interactions between brain, hormones and behavior from a historical perspective viewing the emergence of key theories.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 250. Genetics. 3 Credit Hours.

The nature, organization, replication, expression, and evolution of the genetic materials.

Prerequisite: BIL 150 and BIL 160. BIL 151 or BIL 152 or BIL 153. BIL 161 or BIL 162 or BIL 163.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BIL 251. Genetics Laboratory. 2 Credit Hours.

Laboratory exercises in genetics.

Pre/Corequisite: BIL 250.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 255. Cellular and Molecular Biology. 3 Credit Hours.

Structure, molecules, and functions of cells.

Prerequisite: BIL 150 and BIL 160. BIL 151 or BIL 152 or BIL 153. BIL 161 or BIL 162 or BIL 163.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BIL 256. Cellular and Molecular Biology Laboratory. 2 Credit Hours.

Laboratory exercises in cellular and organismal biology involving current research techniques and applications.

Prerequisite: BIL 255 Or BIL 559.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

BIL 258. Core Laboratory Techniques. 2 Credit Hours.

Conceptual and applied "methods" course in modern analytical techniques. It will expose students to the Department of Biology's three best-developed core laboratory facilities for imaging, molecular biology, and element analysis.

Components: LAB.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 261. High Altitude Biology and Medicine. 3 Credit Hours.

Mechanisms of hypoxia resistance influencing the requirement to match oxygen supply and demand throughout the oxygen cascade. Topics drawn from genomics, integrated physiology, population genetics, biochemistry, gene expression, evolution, and alpine medicine. Taxonomic examples from the literature will include humans, other mammals, birds, reptiles, amphibians, and fish.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 267. Science Documentary: Autism. 3 Credit Hours.

This course brings together students in both science and communication to collaborate on content intended to reach audiences on multiple platforms. Students will be exposed to both history and cutting edge research surrounding Autism Spectrum Disorders. Students will connect with people in the local community, and collaborate on short documentary films as well as audio exercises.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BIL 268. Neurobiology. 3 Credit Hours.

Neurons, organization of the nervous system, electrical properties of neurons, neurotransmitters, receptors, synaptic transmission, sensory and motor system, and complex brain functions.

Prerequisite: BIL 150 and BIL 160 and BIL 151 or BIL 152 or BIL 153 and BIL 161 or BIL 162.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 280. Writing in Biology. 0 Credit Hours.

Writing instruction by faculty using biological topics in BIL courses offered at the 200 level.

Components: IND.

Grading: SUS.

Typically Offered: Fall & Spring.

BIL 281. Undergraduate Learning Internship in Biology. 1 Credit Hour.

Undergraduate Learning Intern in Biology Students serve as peer mentors in a laboratory setting, assisting a graduate laboratory instructor in teaching basic biological concepts to first year undergraduates in BIL 151 and BIL 161.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 284. Special Laboratory Topics in Biology. 1-4 Credit Hours.

Topics relevant to the biological sciences, listed as subtitle. May be combined/co-listed with other departments or programs.

Prerequisite: BIL 150 and BIL 151 and BIL 160.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 285. Special Topics in Biology. 3 Credit Hours.

Topics relevant to the biological sciences, co-listed with other departments or programs.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 286. Clinical Medicine I. 3 Credit Hours.

Bi-weekly clinical rotations with physicians at Miller School of Medicine and simulation labs at the Gordon Center.

BIL 150 and BIL 160 AND CHM 111 or 121 AND CHM 113 and CHM 112 or CHM 221 AND CHM 114.

Components: PRA.

Grading: SUS.

BIL 287. Clinical Medicine II. 3 Credit Hours.

A continuation of Clinical Medicine I; bi-weekly clinical rotations with physicians at Miller School of Medicine and simulation labs at the Gordon Center.

Prerequisite: BIL 286.

Components: PRA.

Grading: SUS.

Typically Offered: Spring.

BIL 299. Seminar in Research Problems. 1 Credit Hour.

Discussion of current research of the Biology Faculty.

Prerequisite: BIL 150 and BIL 151 or BIL 152 or BIL 153 and BIL 160 and BIL 161 or BIL 161 or BIL 162 or BIL 163.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 315. Marine Biota and Biogeochemical Cycles. 3 Credit Hours.

The diverse sources, transformations, and sinks of chemical constituents in the sea; distribution of dissolved and particulate materials in the sea. Role of marine organisms in marine biogeochemical cycling and the marine carbon cycle and its interaction with the terrestrial biosphere and atmosphere.

Prerequisite: MSC 320.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BIL 316. Global Primary Production. 3 Credit Hours.

Photosynthesis supports the vast majority of life on planet earth. Although terrestrial and aquatic photoautotrophs share the same basic photosynthetic mechanisms, the physical environment and the fate of primary product on differ on land versus in the sea. This course reviews the magnitude and processes that shape primary production in terrestrial, oceanic, and freshwater habitats. It includes the fate of primary production in the earth's biomes, and the role of terrestrial and aquatic productivity in regulating, and responding to, variable climate.

Prerequisite: BIL 160.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 321. Invertebrate Zoology. 4 Credit Hours.

Biology of invertebrates, with emphasis on tropical and subtropical marine forms. Field work and combined lecture-laboratory sessions.

Prerequisite: BIL 250 or BIL 255.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 324. The Biology of Fishes. 3 Credit Hours.

Selected topics on the ecology and physiology of fishes. Lectures on reproduction, respiration, osmoregulation, sense systems, hormonal control.

Prerequisite: BIL 255 and BIL 360.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 328. Biology of Birds. 4 Credit Hours.

General biology of birds. Lectures emphasizing avian behavior, evolution, ecology, and conservation. Field trips and laboratory emphasizing identification and systematics of South Florida birds. Lecture 3 hours, Laboratory one hour. Six weekend field trips, 6 hours each.

Prerequisite: At least one BIL course at the 200 - level.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BIL 329. Marine Vertebrate Zoology. 3 Credit Hours.

The form and function of the vertebrate lineage of marine animals from early chordates to the evolution of cartilaginous and bony fish and the emergence of tetrapods, those that evolved from marine ancestors and have since returned to the seas. A comparative point of view will be used to assess the anatomy and physiology of each taxonomic group as well as behavioral and ecological adaptations related to their life history. Topics will include the emergence of the vertebrate body plan and the evolution of fish from agnathans through modern teleosts, as well as the tetrapod lineage of marine reptiles, marine birds, and marine mammals. Discussion of critical points in vertebrate evolution where genome-wide duplication events occurred as well as instances of convergent evolution in various lineages.

Prerequisite: MSC 230.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BIL 330. Ecology. 3 Credit Hours.

The interactions of living organisms with each other and with their abiotic environment.

Prerequisite: BIL 250. or BIL 255. Calculus strongly recommended.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 331. Ecology Laboratory. 2 Credit Hours.

Lab and field exercises in ecology. Some Saturday field trips required.

Pre/Corequisite: BIL 330.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 332. Tropical Ecology. 3 Credit Hours.

Tropical ecosystem including world distribution of tropical climate biogeographical regions, deserts and environmental factors, grassland and primary production, savannah population dynamics, energy flow, biogeochemical cycling, succession, and biodiversity of tropical ecosystem.

Prerequisite: BIL 250 or BIL 255.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 333. Conservation Biology. 3 Credit Hours.

The challenges facing conservation practitioners and the toolkit that has been developed to face these threats. Examination of important conservation cases and how endangered species and ecosystems are distributed across the globe; common threats to biodiversity and methods that have been developed to face these threats at both species and landscape scales; government implementation of conservation strategies. Students will read papers from the primary literature on a weekly basis that provide examples of how conservation tools are developed and implemented. Biology 330 (Ecology) is recommended.

Prerequisite: BIL 150 and BIL 151 and BIL 160 and BIL 161. BIL 330 recommended.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BIL 334. Biogeography and Conservation. 3 Credit Hours.

The modern science of biogeography and its implications for the design of spatial strategies to conserve biodiversity and ecosystem services. Examination of the history of biogeography and its geographical and ecological foundations. Study of the fundamental biogeographic processes and uses them to investigate the evolution of biotas and explain the current biogeographic patterns. Exploration of the emerging field of conservation biogeography and its applications.

Pre/Corequisite: BIL 330.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BIL 335. Tropical Field Biology. 3 Credit Hours.

Intensive field study in the Costa Rican rainforest conducted during semester recesses with additional pre-trip lectures. Requires payment of trip costs.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 337. Coastal Ecology. 3 Credit Hours.

Unprecedented pressure from population growth, tourism, and resource exploitation of coastal ecosystems provides a theme for an overview of current coastal ecology, especially within a conservation and management framework. Hands-on learning in ecohydrology, coastal oceanography, integration of biological communities, and coastal wetland classification for tropical Florida and the insular Caribbean. Students will review and actively participate in water quality and environmental monitoring.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 343. Animal Communication. 3 Credit Hours.

How communication evolves and functions across species, from invertebrates to humans, through a range of acoustic, visual, and chemical signals. How physical constraints shape animal signals, how animals convey information through signaling, and how honesty is maintained in communication systems. Signaling in a variety of contexts, including mate attraction, competition, and predation.

Prerequisite: At Least 3 Credits of BIL 200 Level or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BIL 348. Climate Change and Public Health. 3 Credit Hours.

The mechanisms by which climate change adversely affects human health, and the policy options for mitigating our exposure.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 350. Survey of Marine Mammals. 3 Credit Hours.

The evolution and ecology of the cetaceans, pinnipeds, manatees, and allies: Natural history, zoo geography, physiology, husbandry, and biomedical aspects.

Prerequisite: BIL 150 and MSC 230.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 352. Techniques in Scanning Electron Microscopy. 3 Credit Hours.

Tissue preparation, use of the scanning electron microscope, photography, and analysis and manipulation of digital images. Lecture 1 hour; laboratory 5 hours.

Components: LAB.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 353. Projects in Scanning Electron Microscopy. 2 Credit Hours.

Individual research projects in scanning electron microscopy. Six hours of laboratory.

Prerequisite: BIL 352.

Components: PRA.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 360. Comparative Physiology. 3 Credit Hours.

How animals work and the physiological processes that allow for animal life. Fundamental aspects of physiology, such as homeostasis, metabolism, function of the nervous system, endocrine function, movement, gas and water transport. The relationship between structure and function through comparisons across diverse animal taxa. Emphasis on critical thinking and application of the scientific method.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 365. Endocrinology. 3 Credit Hours.

The endocrine glands and the chemistry, mechanisms of action, and physiological effects of hormones. Emphasis on vertebrate hormones, including clinical aspects of human endocrinology.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 367. Biology of Cancer. 3 Credit Hours.

A multifaceted exploration of human cancer biology from molecular, cellular, genetic, and histological perspectives, highlighting cellular homeostasis as a precarious life-and-death balancing act.

Prerequisite: BIL 250 or BIL 255.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 369. Fundamentals of the Biology of Aging. 3 Credit Hours.

How and why we age. The biology of aging at the molecular, cellular, and organismal levels in a comparative and evolutionary context.

Prerequisite: BIL 250 or BIL 255.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 371. Readings in Biology. 1 Credit Hour.

Independent readings on selected topics in biology under the supervision of individual faculty.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 372. Readings in Biology. 1 Credit Hour.

Independent readings on selected topics in biology under the supervision of individual faculty.

Components: IND.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 374. Seminar in Biology. 1 Credit Hour.

Seminar in selected topics in biology.

Prerequisite: BIL150 and BIL160 and BIL151 or BIL152, or BIL153 and BIL161 or BIL162 or BIL163.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 375. Seminar in Biology. 1 Credit Hour.

Seminar on selected topics in biology.

Prerequisite: BIL150 and BIL160 and BIL151 or BIL152, or BIL153 and BIL161 or BIL162 or BIL163.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 376. Complementary and Integrative Medicine. 2 Credit Hours.

Almost 40% of Americans use health care approaches outside of mainstream Western medicine. These non-traditional approaches include acupuncture, meditation, massage therapy, reiki, yoga, hypnotherapy, chiropractic manipulation, and herbal medicine. Some of these approaches seem to hold promise in the healing process, while others have had little research to date. In this course, we will examine scientific evidence for the efficacy of these different approaches.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 380. Writing in Biology. 0 Credit Hours.

Writing instruction by faculty using biological topics in BIL courses offered at the 300 level.

Components: IND.

Grading: SUS.

Typically Offered: Fall & Spring.

BIL 381. Workshop Leaders in Biology I. 1.00 Credit Hour.

Peer-led Team Teaching of workshops for groups of BIL 150 students. May be taken once only for credit in the BIL major, but may be taken additional times for a general education credit. Students may serve as workshop leaders for a second time for a stipend if they (1) have taken the course once before and (2) are graduating seniors.

Components: DIS.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 382. Workshop Leaders in Biology II. 1.00 Credit Hour.

Peer-led Team Teaching of workshops for groups of BIL 160 students. May be taken once only for credit in the biology major, but may be taken additional times for general education credit. Students may serve as workshop leaders for a second time for a stipend if they (1) have taken the course once before and (2) are graduating seniors.

Components: DIS.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 384. Special Laboratory/Field Topics in Biology. 1-4 Credit Hours.

Topics relevant to the biological sciences, listed as subtitle. Maybe combined/co-listed with other departments or programs.

Prerequisite: BIL 150 and BIL 151 and BIL 160 and BIL 161.

Components: LAB.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 385. Special Topics in Biology. 2-6 Credit Hours.

Topics relevant to the biological sciences, listed as subtitle. May be co-listed with other departments or programs.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 386. Science Made Sensible Teaching Internship. 3 Credit Hours.

A teaching internship in which students spend at least 60 hours in Miami Dade County Public Schools assisting teachers with science education.

Contributions to bimonthly workshops and group meetings, creation of lesson plans following Sunshine State Guidelines.

One BIL course at the 200 level or higher.

Components: PRA.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 389. Nonacademic Career in Biology. 2 Credit Hours.

Speakers recruited from local biotech companies, conservation organizations, science museums, the National Park Service, and Customs as well as invasive species specialists, medical dosimetrists, principals of schools seeking biology teachers, and others will give weekly seminars about their practice of science in their occupations. Following each seminar, students will meet with speakers in an informal setting to discuss the particulars and or prospects of the career in question. The express purpose of this course is to provide students with an idea of the utility of their biology degree in the workplace. Papers or writings that pertain to a particular career will be assigned prior to the seminar so that students will be ready with questions for the speaker.

Prerequisite: 1 Course in BIL 200 or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 390. Studies in Biology. 1-5 Credit Hours.

Special topics taken at other institutions with no direct equivalents.

Components: SEM.

Grading: GRD.

BIL 395. Studies in Biology. 1-5 Credit Hours.

Special topics taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

BIL 399. DNA and the Changing World. 1 Credit Hour.

This is an online course, not intended for biology majors. It covers in-depth knowledge of DNA, gene, gene function, genome and inheritance with the focus on applying the knowledge to real-world issues; both personal and societal, from the history of life to challenges and opportunities in the modern times at the molecular level. Does not count towards a Biology major or minor.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 402. Seminar in Biology. 1 Credit Hour.

Seminar on selected topics in Biology.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 403. Neuroscience Laboratory. 4 Credit Hours.

Research methods and laboratory experiments in contemporary neuroscience from individual cells to behavior. Scientific writing and computer applications in experimental design and analysis. Combined lecture and laboratory.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BIL 415. Coral Reef Science and Management. 3 Credit Hours.

Coral reefs as biophysical and socioeconomic systems. Coral reef typology, geomorphology; biotic and abiotic components of coral reef ecosystems. Prerequisite: BIL 250 or BIL 255.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 426. Native and Introduced Plants of the Galapagos. 3 Credit Hours.

The unique vegetation and introduced flora of the Galapagos Islands in Ecuador. Current conservation measures used to control the threats affecting native flora, and future prospects for conserving indigenous plants and for ensuring their rational utilization. Taught in the Galapagos as part of the UGalapagos semester.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 432. Ecology in the Galapagos. 3 Credit Hours.

Organisms in relation to their environment, with focus on interactive, hands-on learning that connects empirical nature with abstract thinking.

Lectures, discussion and fieldwork on ecosystem ecology, plant dispersal and colonization; organisms' responses to spatial and temporal variability in their environments, plant/animal interactions. Origins and effects of invasive species and actions of bio-control agents. Taught in the Galapagos as part of the UGalapagos semester.

Prerequisite: BIL 332.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BIL 433. Conservation in Practice. 3 Credit Hours.

Intersection between economic development, science and conservation in one of the world's most pristine and fragile ecosystems, the Galapagos Islands. Exploration of how tourism offers an alternative to unsustainable fisheries that once drove the local economy, yet has created a new set of pressures on the people and the environment. Mitigation efforts, science, and international conservation mesh with an understanding of local politics, customs and cultures. Taught in the Galapagos as part of the UGalapagos semester.

Prerequisite: BIL 432.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BIL 434. Behavioral Ecology of the Galapagos. 3 Credit Hours.

Functional aspects of animal behavior, including topics such as animal communication, optimal foraging, mating systems, sexual selection, and the evolution of cooperation. Studies of the behavior of Galapagos organisms are emphasized.

Prerequisite: BIL 150 and BIL 151 or BIL 152 or BIL 153 and BIL 160 and BIL 161 or BIL 161 or BIL 162 or BIL 163.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BIL 435. Origins, Ecology and Conservation of Insular Diversity. 1-3 Credit Hours.

Three-week field course in the Solomon Islands. Ecological and evolutionary processes that maintain and create biological diversity in tropical islands. Natural selection, island biogeography, phylogenetics, community assembly, predator-prey interactions, sexual reproduction, mating systems, and social behavior. On-site field surveys and experiments. Combined lecture and laboratory/field course.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Summer.

BIL 436. Stable Isotope Ecology. 3 Credit Hours.

Stable isotopes of essential elements (Oxygen, Carbon, Nitrogen, Hydrogen and Sulfur) as natural tracers of ecological processes. Principles of Chemistry, Physics and Biology will be integrated to allow interpretation, via these tracers, of how fundamental elements are cycled through the biosphere.

Prerequisite: BIL 330.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 441. Animal Behavior. 3 Credit Hours.

Mechanistic and evolutionary aspects of animal behavior. A survey of systems that illustrate the control, development and function of behavior in a variety of animals.

Prerequisite: BIL 150 and BIL 160.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 442. Animal Behavior Laboratory. 2 Credit Hours.

An exploration of the amazing behaviors of animals from an explicitly evolutionary perspective. The study of the diversity of behavior in nature as shaped by natural and sexual selection. Topics will include: resource acquisition and defense, predator avoidance, mate choice and competition for mates, and cooperative behavior. Labs are inquiry based, with students designing, conducting and analyzing experiments to test hypotheses. Students will develop their scientific communication skills throughout the semester by gaining experience in oral presentations and writing manuscripts. Note that this course will involve two required field trips off campus.

Prerequisite: BIL 150 and BIL 160.

Components: LAB.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 452. Evolution and Conservation Genetics. 3 Credit Hours.

Integration of evolutionary theory and genetics to address conservation problems and their solutions. Theory and empirical information pertaining to evolution on islands and the impact of humans on endemic species. Natural selection, sexual selection, population genetics, niches, diversity, and conservation in the context of the Galapagos Islands.

Prerequisite: BIL 150 and BIL 151 or BIL 152 or BIL 153 and BIL 160 and BIL 161 or BIL 161 or BIL 162 or BIL 163.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BIL 454. Biological Core Concepts Through Medical Case Studies. 3 Credit Hours.

A capstone course in which students will complete a series of medically-oriented case studies. Knowledge of biology, chemistry, math, and physics will be applied to real-world issues. Critical thinking will be used to solve basic medical problems, and facilitate understanding of the interdisciplinary nature of medicine.

Requisite: BIL 150 And BIL 151 And BIL 160 And BIL 161 Or equivalent And one BIL 200 level or higher course.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 455. Developmental Biology. 3 Credit Hours.

Principles of differentiation, morphogenesis and development. Critical analysis of the methods used to study these problems.

Prerequisite: BIL 250 or BIL 255.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BIL 456. Developmental Biology Laboratory. 2 Credit Hours.

Exploration of developmental genetics by exposing students to a variety of developmental biology experiments using microscopy, molecular biology, genetics and immunohistochemical techniques in three distinct model animals. Following a short series of introductory labs and lectures, students will develop a research proposal with the instructors and spend the remaining weeks of the semester working to complete their proposal under the guidance of the instructors. This class is restricted to students that have taken cell and molecular biology, developmental biology AND genetics.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 468. Developmental Neuroscience. 3 Credit Hours.

Molecular, cellular, and physiological mechanisms controlling the proper development and function of neurons and neural circuits. Signaling mechanisms that regulate cell determination, proliferation, and differentiation. Neural migration and outgrowth, synaptic connectivity and plasticity, and neural basis of animal behavior.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BIL 480. Writing in Biology. 0 Credit Hours.

Writing instruction by faculty using biological topics in BIL courses offered at the 400 level.

Components: IND.

Grading: SUS.

Typically Offered: Fall & Spring.

BIL 481. Undergraduate Teaching Assistant Training in Biology. 1-3 Credit Hours.

Training and teaching assistance for undergraduate workshops or laboratories, under the direct supervision of faculty. Specific topic is indicated by course subtitle. This course may be taken no more than twice for credit in the Biology major or minor, and if taken twice, teaching assistance must be for two different BIL courses. May be taken multiple times for general elective credit only.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 482. PRISM Teaching Fellow. 2 Credit Hours.

Undergraduate mentors to PRISM students, and teaching fellows to PRISM course instructors in biology.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 484. Special Laboratory Topics in Biology. 1-4 Credit Hours.

Topics relevant to the biological sciences, listed as subtitle. May be combined/co-listed with other departments or programs.

Prerequisite: BIL 200 or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 485. Special Topics in Biology. 2-6 Credit Hours.

Topics relevant to the biological sciences, co-listed with other departments or programs.

Components: DIS.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 486. Advanced Science Made Sensible Teaching Internship. 3 Credit Hours.

A teaching internship in which students spend at least 60 hours in Miami Dade County Public Schools assisting teachers with science education.

Contributions to bimonthly workshops and group meetings, development of problem-based lesson plans to promote critical thinking.

Prerequisite: BIL 386.

Components: PRA.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 491. Departmental Seminar in Biology. 1 Credit Hour.

Research seminars by distinguished biologists.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

BIL 492. Departmental Seminar in Biology. 1 Credit Hour.

Research seminars by distinguished biologists.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

BIL 495. Projects in Biology. 2 Credit Hours.

Individual, original laboratory or field research supervised by a member of the department faculty and concluded by a formal written report.

Components: PRA.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 496. Projects in Biology. 2 Credit Hours.

Individual, original laboratory or field research supervised by a member of the department faculty and concluded by a formal written report.

Components: PRA.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 497. Projects in Biology. 2 Credit Hours.

Individual, original laboratory or field research supervised by a member of the department faculty and concluded by a formal written report.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 498. Senior Thesis. 2 Credit Hours.

Formal thesis preparation supervised by a member of the departmental faculty including a public oral defense and submission of the written document to the department.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 499. Research Colloquium. 1 Credit Hour.

Discussion of current research done by undergraduate students.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 511. Advanced Biostatistics. 4 Credit Hours.

Statistical analyses needed to understand, present, and publish biological research. Examples will primarily be drawn from the biomedical and ecological fields. The course will begin with a review of descriptive statistics, probability theory, and univariate distributions, followed by an overview of experimental design and analysis of categorical data using contingency tables. This will be followed by a unit on parametric analysis of univariate data including both simple and multiple linear regression, model selection, and analysis of variance. The final unit will cover non-parametric versions of these analyses and more advanced multivariate statistical methods. Lectures will be accompanied by a computer lab in which students learn hands-on statistical analysis in SAS JMP.

Prerequisite: At least one BIL course at the 300 level.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BIL 515. Object-Oriented Programming and Agent-Based Modelling. 3 Credit Hours.

Hands-on training in object-oriented programming using Java, including Java statistical packages, and in the development of agent-based and individual-based simulation models for ecological, physiological, social, economic and physical sciences. Introductions to cellular automata and modes based on social and behavioral networks. No prior programming experience required.

Prerequisite: At least one BIL course at the 200 level.

Components: LEC.

Grading: GRD.

BIL 520. Evolution. 3 Credit Hours.

Evidence for evolution; microevolution including natural selection, kin selection, genetic drift, gene flow, mutation, and evolutionary game theory; macroevolution including speciation, adaptation, phylogenetics, origin of life, and extinction.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 521. Phylogenetics. 3 Credit Hours.

Concepts and methods in phylogenetic systematics. The importance of phylogenetic trees in biology. Use of phylogenies in taxonomy, trait evolution (including homology, adaptations and key innovations), biogeography, speciation, diversification rates, molecular evolution, molecular clocks, and gene duplication.

Prerequisite: BIL 250.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 523. Advanced Biology of Marine Invertebrates. 4 Credit Hours.

Detailed study of major phyla of marine invertebrates. Special emphasis on taxa found in waters off southern Florida. Field course. Lectures, laboratory, special projects, and seminars.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 525. Herpetology. 3 Credit Hours.

Systematics, biogeography, and evolutionary biology of amphibians and reptiles, with emphasis on modern families. Combined lecture and laboratory.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 531. Advanced Field Ecology. 5 Credit Hours.

Principles of and practical experience in quantitative sampling of community structure, plant and animal populations, and animal activities. Emphasis on individual projects. Lecture, 3 hours; laboratory/field, 10 hours on alternate Saturdays, plus research projects.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 535. Molecular Ecology. 3 Credit Hours.

Molecular markers and analyses, and their applications to different problems in biology. Appropriate sampling, methods for assessing genetic diversity and differentiation. Approaches to studying gene flow, tools for behavioral ecology, remote sampling, tracking individuals, and paternity analysis, hybridization and speciation, DNA bar codes, and gene expression from a population biological perspective.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 536. Molecular Ecology Laboratory. 1 Credit Hour.

Laboratory techniques, molecular tools, applications, and analysis methods commonly used by researchers in the areas of molecular ecology and population genetics.

Components: LAB.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 537. Ecosystem Ecology. 3 Credit Hours.

Concepts and models of energy and nutrient flow, food webs, successional processes, human influences and effects of spatial heterogeneity.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 539. Conservation and Protected Areas. 3 Credit Hours.

The science and policy of park planning and management will be explored through four case studies. The case studies will explore key concepts in ecology and population biology relating to loss of habitat, habitat fragmentation, invasive species, pollution and declines in population size.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 551. Population Genetics and Genomics. 3 Credit Hours.

Introduction to population genetics, which examines the evolutionary processes that affect the genetic composition of natural populations: mutation, genetic drift, natural selection, and gene flow. Theoretical and empirical aspects will be examined via mathematical models, methods of measuring genetic variation, and readings of published case studies. Taxonomic focus will be broad and will include both model organisms (e.g., *Drosophila*), and non-model organisms.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 552. Bioinformatics Tools. 3 Credit Hours.

Databases and tools of bioinformatics as relevant to research in genomics and molecular biology. Bioinformatics applications. Information retrieval, analytical tools, BLAST searches, promoter analysis, protein structure- function analysis and various applications.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 553. Biomedical Data Science. 3 Credit Hours.

Computational skills for analysis of genomic data sets. Basics of using a command line interface (text editor, Unix/Linux/iOSX), and logging into and getting started on Pegasus2. Python will be used to write scripts for downloading, manipulating, and analyzing data. File sharing and version control using github will be introduced at this stage, which will include RCR training. Analysis, interpretation, and presentation of Next Generation Sequencing data set (RNAseq, exome, or whole genome; public or their own. Interpreting and presenting results, to enable students to extract information from the data rather than just statistically analyze it.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 554. Electron Microscopy. 4 Credit Hours.

Techniques in transmission electron microscopy (TEM) including tissue preparation, use of the electron microscope, photography, and interpretation of micrographs. Lecture, 1 hour; laboratory, 6 hours.

Components: LAB.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 555. Projects in Electron Microscopy. 2 Credit Hours.

Individual research projects in transmission electron microscopy, 6 hours.

Components: PRA.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 556. Ecological and Evolutionary Genomics. 3 Credit Hours.

The evolution of genomes, and the ecological interactions that drive their evolution.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 559. Life in the Cell. 3 Credit Hours.

A comprehensive, advanced overview of the molecular biology of the cell, cells, and genomes.

Prerequisite: BIL 255.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 565. Evolution and Development. 3 Credit Hours.

Exploration of the relationship between common descent and biological diversity, principally changes in organismal development through time.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 568. Evolution and development of Nervous Systems. 3 Credit Hours.

Mechanisms/pathways/modules underlying formation of the nervous system during embryo development. How some properties of nervous systems have resisted change while others have diverged dramatically during evolution.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 575. Advanced Special Studies in Biology. 1-6 Credit Hours.

Content of course will vary by semester. Content in any semester will be indicated via subtitle in the class schedule.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 580. Writing in Biology. 0 Credit Hours.

Writing instruction by faculty using biological topics in BIL courses offered at the 500 level.

Components: IND.

Grading: SUS.

Typically Offered: Fall & Spring.

BIL 591. Studies in Biology. 1-5 Credit Hours.

Special topics taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

BIL 592. Studies in Biology. 1-5 Credit Hours.

Special topics taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

BIL 610. Lab Group Meeting. 1 Credit Hour.

Weekly seminar meeting for discussion of research projects and other academic issues in graduate faculty research laboratories. (Fall semesters)

Components: DIS.

Grading: GRD.

Typically Offered: Fall.

BIL 611. Lab Group Meeting. 1 Credit Hour.

Weekly seminar meeting for discussion of research projects and other academic issues in graduate faculty research laboratories. (Spring semesters)

Components: DIS.

Grading: SUS.

Typically Offered: Spring.

BIL 612. Graduate Core I. 3 Credit Hours.

Foundations of genome structure and how the information encoded in genomes is regulated by intrinsic and extrinsic factors during development and evolution. Major topics include genome structure, gene regulation, cells, development, physiology and EvoDevo.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BIL 613. Graduate Core II. 3 Credit Hours.

Foundations of key ecological and evolutionary theory. Major topics in Ecology include population, community, physiological and ecosystem ecology. Major topics in Evolution include principles of natural selection, speciation, biodiversity, population genetics, neutral theory, molecular evolution, phylogenetics, and systematics.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BIL 614. Professional Writing and Grantsmanship. 3 Credit Hours.

Elements of argumentative writing, reader-oriented writing strategies, fundability of submitted grants, and techniques for mastering presentation venues such as posters and talks.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 615. Object-Oriented Programming and Agent-Based Modelling. 3 Credit Hours.

Hands-on training in object-oriented programming using Java, including Java statistical packages, and in the development of agent-based and individual-based simulation models for ecological, physiological, social, economic and physical sciences. Course includes introductions to cellular automata and models based on social and behavioral networks. No prior programming experience required.

Prerequisite: At least one BIL course at the 200 level.

Components: LEC.

Grading: GRD.

BIL 618. Advanced Biostatistics. 4 Credit Hours.

This course will provide an overview of statistical analyses needed to understand, present, and publish biological research. Examples will primarily be drawn from the biomedical and ecological fields. The course will begin with a review of descriptive statistics, probability theory, and univariate distributions, followed by an overview of experimental design and analysis of categorical data using contingency tables. This will be followed by a unit on parametric analysis of univariate data including both simple and multiple linear regression, model selection, and analysis of variance. The final unit will cover non-parametric versions of these analyses and more advanced multivariate statistical methods. Lectures will be accompanied by a computer lab in which students learn hands-on statistical analysis in SAS JMP.

Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 620. Evolution. 3 Credit Hours.

Evidence for evolution; microevolution including natural selection, kin selection, genetic drift, gene flow, mutation, and evolutionary game theory; macroevolution including speciation, adaptation, phylogenetics, origin of life, and extinction.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BIL 621. Phylogenetics. 3 Credit Hours.

Concepts and methods in phylogenetic systematics. The importance of phylogenetic trees in biology. Use of phylogenies in taxonomy, trait evolution (including homology, adaptations and key innovations), biogeography, speciation, diversification rates, molecular evolution, molecular clocks, and gene duplication.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 622. Plant Identification in an Evolutionary Context. 3 Credit Hours.

An exploration of the plants in the on-campus Gifford Arboretum as well as other plants that students interact with in their daily environment (foods, beauty products, fibers, medicines, poisons, etc.)

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 623. Advanced Biology of Marine Invertebrates. 4 Credit Hours.

Detailed study of major phyla of marine invertebrates. Special emphasis on taxa found in waters off southern Florida. Field course. Lectures, laboratory, special projects, and seminars.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 625. Advanced Herpetology. 3 Credit Hours.

Systematics, biogeography, and evolutionary biology of amphibians and reptiles, with emphasis on modern families. Combined lecture and laboratory.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 630. Population and Community Ecology: Theory. 3 Credit Hours.

Classical and contemporary theory in population and community ecology including population dynamics, matrix models, life tables, predator-prey models and food webs.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 631. Advanced Field Ecology. 5 Credit Hours.

Principles of and practical experience in quantitative sampling of community structure, plant and animal populations, and animal activities. Emphasis on individual projects. Lecture, 3 hours; laboratory/field, 10 hours on alternate Saturdays, plus research projects.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 632. Population and Community Ecology: Theory II. 3 Credit Hours.

Classical and contemporary theory in population and community ecology including population dynamics, matrix models, life tables, predator-prey models and food webs.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 633. Conservation Biology. 3 Credit Hours.

Challenges facing conservation practitioners and the toolkit that has been developed to face them. Distribution and value of biodiversity, threats to biodiversity, and methods that have been developed to face these threats at both species and landscape levels. Government implementation of conservation strategies.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 634. Stable Isotope Ecology. 3 Credit Hours.

Stable isotope analysis applied to ecological questions such as nutrient cycling, photosynthesis and trophic level studies.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 635. Molecular Ecology. 3 Credit Hours.

Molecular markers and analyses, and their applications to different problems in biology. Appropriate sampling, methods for assessing genetic diversity and differentiation. Approaches to studying gene flow, tools for behavioral ecology, remote sampling, tracking individuals, and paternity analysis, hybridization and speciation, DNA bar codes, and gene expression from a population biological perspective.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 636. Tropical Biology: An Ecological Approach. 8 Credit Hours.

The tropical environment and biota; ecologic relations, communities and evolution in the tropics. Conducted in Costa Rica under the Organization for Tropical Studies. Lecture, laboratory, and fieldwork.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 637. Ecologia de Poblaciones. 7 Credit Hours.

Theory and practice in field study of plant and animal populations in tropical ecosystems. Given in Spanish in Costa Rica under the Organization for Tropical Studies.

Components: DIS.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 638. Tropical Managed Ecosystems. 8 Credit Hours.

Application of ecological principles to problems in agriculture, forestry, conservation and natural resource management in the tropics. Conducted in Costa Rica under the Organization for Tropical Studies.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 639. Ecosystem Ecology. 3 Credit Hours.

Concepts and models of energy and nutrient flow, food webs, successional processes, human influences and effects of spatial heterogeneity.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 641. Animal Behavior. 3 Credit Hours.

Amazing behaviors of animals from an evolutionary perspective, including how the diversity of behavior in nature is shaped by natural and sexual selection.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 649. Seminar in Behavior. 1 Credit Hour.

Discussion of current literature in animal behavior. This course may be repeated for credit.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 651. Population Genetics and Genomics. 3 Credit Hours.

Population genetics, which examines the evolutionary processes that affect the genetic composition of natural populations: mutation, genetic drift, natural selection, and gene flow. Theoretical and empirical aspects will be examined via mathematical models, methods of measuring genetic variation, and readings of published case studies. Taxonomic focus will be broad and will include both model organisms (e.g., *Drosophila*), and non-model organisms.

Prerequisite: BIL 250 and BIL 255.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 652. Bioinformatics Tools. 3 Credit Hours.

Databases and tools of bioinformatics as relevant to research in genomics and molecular biology. Bioinformatics applications. Information retrieval, analytical tools, BLAST searches, promoter analysis, protein structure- function analysis and various applications.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 653. Bioinformatics Algorithms. 3 Credit Hours.

The complexity of bioinformatics computations. Introduction to Perl and Bioperl. Pattern matching and sequence homology. Genome assembly. Transcription factor binding site recognition and motif finding, gene prediction, phylogeny, micro array analysis, RNA folding, gene design and synthesis.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 654. Electron Microscopy. 4 Credit Hours.

Techniques in transmission electron microscopy (TEM) including tissue preparation, use of the electron microscope, photography, and interpretation of micrographs. Lecture, 1 hour; laboratory, 6 hours.

Components: LAB.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 655. Techniques in Scanning Electron Microscopy. 3 Credit Hours.

Tissue preparation, use of the scanning electron microscope (SEM), photography, and analysis and manipulation of digital images. Lecture 1 hour; laboratory 5 hours.

Components: LAB.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 656. Ecological and Evolutionary Genomics. 3 Credit Hours.

The evolution of genomes, and the ecological interactions that drive their evolution.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 661. High Altitude Biology and Medicine. 3 Credit Hours.

High altitude biology and medicine: Mechanisms of hypoxia resistance influencing the requirement to match oxygen supply and demand throughout the oxygen cascade. Topics draw from genomics, integrated physiology, population genetics, biochemistry, gene expression, evolution, and alpine medicine. Taxonomic examples from the literature will include humans, other mammals, birds, reptiles, amphibians, and fish.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 665. Evolution and Development. 3 Credit Hours.

Exploration of the relationship between common descent and biological diversity, principally changes in organismal development through time.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 668. Evolution and development of Nervous Systems. 3 Credit Hours.

Mechanisms/pathways/modules underlying formation of the nervous system during embryo development. How some properties of nervous systems have resisted change while others have diverged dramatically during evolution.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 675. Advanced Study in Plant or Animal Sciences. 1-6 Credit Hours.

Content of course will vary by semester. Content in any semester will be expressed as course subtitle.

Components: SEM.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BIL 678. Current Topics in Biological Research - DVP. 1 Credit Hour.

Content will vary by semester. Readings and discussions with eminent scholars temporarily resident in the department's Distinguished Visiting Professor program.

Components: SEM.

Grading: SUS.

Typically Offered: Offered by Announcement Only.

BIL 680. Research Ethics. 0 Credit Hours.

An interdisciplinary graduate course in compliance with The NIH Guide for Grants and Contracts, Vol. 18. No. 45, Dec. 22, 1989. A program in the principles of scientific integrity that forms an integral part of the proposed research training effort.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 689. Nonacademic Careers in Biology. 2 Credit Hours.

Speakers recruited from local biotech companies, conservation organizations, science museums, the National Park Service and Customs as well as invasive species specialists, medical dosimetrists, principals of schools seeking biology teachers, and others will give weekly seminars about their practice of science in their occupations. Following each seminar, students will meet with speakers in an informal setting to discuss the particulars and or prospects of the career in question. The express purpose of this course is to provide students with an idea of the utility of their biology degree in the workplace. Papers or writings that pertain to a particular career will be assigned prior to the seminar so that students will be ready with questions for the speaker.

Prerequisite: BIL 200 or Higher.

Components: DIS.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 711. Advanced Biostatistics. 4 Credit Hours.

Statistical analyses needed to understand, present, and publish biological research. Examples will primarily be drawn from the biomedical and ecological fields. The course will begin with a review of descriptive statistics, probability theory, and univariate distributions, followed by an overview of experimental design and analysis of categorical data using contingency tables. This will be followed by a unit on parametric analysis of univariate data including both simple and multiple linear regression, model selection, and analysis of variance. The final unit will cover nonparametric versions of these analyses and more advanced multivariate statistical methods. Lectures will be accompanied by a computer lab in which students learn hands-on statistical analysis in SAS JMP.

Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BIL 810. Master's Thesis. 1-6 Credit Hours.

The student working on their Master's thesis enrolls for credit, in most departments not to exceed six, as determined by the student's advisor. May be regarded as full time residence.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

BIL 820. Research in Residence - Master's Thesis. 1 Credit Hour.

Used to establish research in residence for the thesis for the Master's degree after the student has enrolled for the permissible cumulative total in BIL810 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BIL 830. Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ph.D. The student will enroll for credit as determined by their advisor. Not more than 12 credits of BIL830 may be taken in a regular semester, nor more than six credits in a summer session. May be regarded as full time residence.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

BIL 840. Post-Candidacy Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ph.D. who have advanced to candidacy. The student will enroll for credit as determined by their advisor. Not more than 12 credits of BIL840 may be taken in a regular semester, nor more than six credits in a summer session. May be regarded as full time residence.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

BIL 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. May be regarded as full time residence.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Biomedical Engineering (BME)

BME 100. Introduction to Biomedical Engineering for Summer Scholars. 3 Credit Hours.

This introductory course is designed to expose high school students to biomedical engineering. The program is designed for the exemplary high school student interested in applied mathematics and science. The students will be provided with an understanding and some hands-on experience on topics relative to the discipline of Biomedical Engineering. The course content changes throughout the 3-week duration and includes topics on lasers, medical imaging, biomaterials, bioelectricity and biomechanics. The students will be able to understand the challenges associated with the design, testing and FDA clearance of biomedical devices and the importance of the scientific methods in engineering. The laboratory and field trip experiences will deal with the design and testing of a bioelectric device. Summer Scholar Students only.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

BME 111. Introduction to Engineering I. 3 Credit Hours.

Use of engineering tools for problem solving are discussed. Topics include the use of computer techniques for data acquisition, analysis, presentation, software design, computer aided drafting, and development of design skills through several design and building competitions. Introduction to professional ethics and intellectual property rights, the use of MATLAB, AutoCAD, and programming in C++.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 112. Introduction to Biomedical Engineering. 2 Credit Hours.

Introduction to Engineering II provides an introduction to biomedical engineering analysis, design, and manufacturing processes. Ethics, Regulatory Factors, and Biomedical Design Tools (mechanical, electrical, and computer tools) are introduced. Students will also be given lectures from both Biomedical Engineering researchers and industrial professionals concerning their experiences and the current trends within the field. Hands on experience is provided.

Prerequisite: BME 111.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BME 211. Introduction to Programming for Biomedical Engineers. 3 Credit Hours.

This course will provide a comprehensive introduction to programming using MATLAB. The students will learn MATLAB functions for importing, analyzing, visualizing and exporting data, numerical computation, modeling and solving biomedical engineering problems.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 265. Medical Systems Physiology. 3 Credit Hours.

Human physiological processes from a bioengineering and medical point of view. Pertinent aspects of anatomy, biophysics, biochemistry, and disease mechanisms are also included.

Prerequisite: BIL 150. And CHM 111.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BME 266. Human Physiology Laboratory. 1 Credit Hour.

This course provides a series of laboratory experiments to assist students to learn human physiology through noninvasive measurements by using the Powerlab Physiology Data Acquisition station. Following introductory lectures in the lab, students will assemble measurement probes, connect different devices, collect data under normal and stimulating conditions, and perform data analysis. Lab report is required for each experiment.

Prerequisite: Or Corequisite: BME 265.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 302. Cellular Engineering. 3 Credit Hours.

Cellular engineering addresses issues related to understanding and manipulating cell structure-function relationships. This course is intended to bridge between cell biologists and engineers, to understand quantitatively cell biological aspects. Central to biomaterial and tissue engineering is our use of cells and our understanding of their interactions with their environment. It is important to understand how cells respond to external signals from their substrata or their milieu, how they move, and what they need in order to perform their desired function. Students are provided with an introduction to engineering principles and modeling at the cellular level. Of particular interest are cytomechanics, receptor/ligand binding, genetic engineering, enzyme kinetics, and metabolic pathway engineering.

Prerequisite: BIL 150. And CHM 111.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 303. Cell Engineering Lab. 1 Credit Hour.

The principles of cell engineering will be presented in a hands-on laboratory experience. General techniques learned will include sterile methods, cell culture techniques, cell imaging, DNA cloning and cell transfection, microcontact printing. Cell engineering topics include cell cycle/metabolism, adhesion, signal transduction, and assessment and fabrication of 2D culture substrates.

Prerequisite: BIL 150 and BIL 151.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 305. Biomedical Technology. 3 Credit Hours.

Non-mathematical introduction to technical and clinical aspects of biomedical engineering. Biomedical signals and instrumentation, sensors, transducers, physiological measurements, laboratory instrumentation, implants, cardiac assist devices, radiology, ultrasound, CT, MRI, transmission, and scanning electron microscopy. Field trips to clinical and research laboratories are included. Open only to non-BME students.

Prerequisite: BIL 150 and CHM 111.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BME 310. Mathematical Analysis in Biomedical Engineering. 3 Credit Hours.

Mathematical modeling of physiological and other biomedical engineering systems and devices. Basic engineering principles and mathematical tools are covered for rigorous understanding of physiological regulation and control in biosystems.

Prerequisite: MTH 311.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 311. MATLAB for Biomedical Engineers. 1 Credit Hour.

Laboratory course for applications of Matlab in biomedical engineering. Upon the completion of this course, students will be able to write Matlab scripts to solve engineering problems and perform basic analysis and processing of biomedical signals. The course includes Matlab programming environment; Matlab variables; FOR, IF and WHILE statements, plotting and advance graphics, user defined functions, symbolic computation, data file management and graphical user interfaces. The course concludes with a final project focused in biomedical applications.

Prerequisites: ECE 118 and BME 310. Or Corequisite: BME 310.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 312. Biomedical Statistics and Data Analysis. 3 Credit Hours.

The course will provide a comprehensive introduction to biostatistical models and methods, with applications in clinical trials research, observational studies, physiology, genomics and public health. Various examples will be solved using MATLAB and the results will be compared and discussed. A brief introduction to R will be provided.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 320. The Evolution of Technology. 3 Credit Hours.

Organized and taught by an interdisciplinary team, this innovative course is designed for juniors and seniors. An experimental elective, the course uses multimedia to explore the ways in which innovation is driven by the needs of society and individuals, and nurtured by improvements in tools and production. Five broad subject areas will receive special attention: survival, communication, transportation, entertainment and medicine.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BME 330. Foundations of Medical Imaging. 3 Credit Hours.

Physical and biological principles of medical imaging, including ultrasound, X-ray, nuclear, magnetic resonance, electrical impedance and optical imaging. Propagation and interaction of ultrasonic waves, light waves, X-ray photons, and nuclear radiation in hard and soft biological tissue.

Corequisite: BME 310.

Prerequisite: PHY 206. And PHY 207. Or Pre/Corequisite: BME 310.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 335. Biomaterials. 3 Credit Hours.

Introduction to the field of Biomaterials. Review of materials science for four main types of biomaterials: ceramics, metals, polymers, and composites. Lectures on special topics given by guest lecturers who are active in their specific areas, under supervision of the instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 375. Fundamentals of Biomechanics. 3 Credit Hours.

Application of solid and fluid mechanics to describe the mechanical behavior of human motion, mechanical behavior of soft and hard biological tissues, cells and biofluids. Review of fundamental concepts and techniques of mechanics (stress, strain, constitutive relations). Focus on mechanical properties of specific tissues, including tendon, skin, smooth muscle, heart muscle, cartilage, and bone. Cellular and biofluid mechanics will be presented.

Prerequisite: MTH 311. And PHY 205.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 395. Undergraduate Research in Biomedical Engineering. 1-3 Credit Hours.

Research and/or design projects consisting of an individual investigation of current problems. Offered by special arrangement only.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BME 399. Cooperative Education. 1 Credit Hour.

Practical application of classroom theory through alternating semester or summer employment with firms offering positions consistent with the student's field of study. May be repeated.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BME 401. Biomedical Design. 3 Credit Hours.

Introduction to the clinical problem-based design for undergraduate biomedical engineering students. Focus will be on need identification, concept generation, prototype development and testing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 402. Senior Design I. 2 Credit Hours.

This course deals with the introduction phase of an individual or group project for seniors. Need identification, screening, technical and economic feasibility, proof of concept development and killer experiment will be performed by students working on teams. Scheduled individual or group report presentations are required.

Prerequisite: BME 401.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 403. Senior Design II. 1 Credit Hour.

This course deals with the completion phase of an individual or group project for seniors. Concepts on projects related to the hypotheses/testing protocols, design limitations (constraints), and validation of the design in Biomedical Engineering will be discussed. Scheduled individual or group report presentations are required.

Prerequisite: BME 402.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 440. Biomedical Measurements. 4.00 Credit Hours.

Introduction to the principles of measurements in physiological and biological systems, as well as a discussion of measurable parameters, transducers, sensors, signal conditioning, and processing. Laboratory experiments are conducted in parallel with the course.

Prerequisite: ECE 201. And ECE 204.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 450. Biomedical Transport Phenomena. 3 Credit Hours.

Fundamentals of transport phenomena in biological systems including diffusion, osmosis, convection, electrophoresis, and transport with binding. Applications to cell electrophysiology and drug delivery. Introduction to physiological fluid flow in tissues.

Prerequisite: BME 310.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 460. Introduction to Physiological Fluid Mechanics. 3 Credit Hours.

The role of transport processes in biological systems, mathematical modeling of physiological fluid transport, conservation of mass and momentum rheology of blood flow in large and small vessels, approximation methods for the analysis of complex physiological flow, fluid flow in the circulation and tissue. Basic engineering principles and mathematical tools are covered for rigorous understanding of physiological fluid flow.

Prerequisite: BME 310 and PHY 206.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BME 470. Biomedical Signal Analysis. 3 Credit Hours.

Time and frequency description, analysis and processing of biophysical and physiological signals. This course covers analytical and computational tools for measuring, manipulating and interpreting signals fundamental to biomedical engineering. Fourier analysis, Fourier transform, data acquisition, averaging, digital filter design, discrete Fourier transform, correlation, convolution, coherence are discussed.

Prerequisite: BME 211.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 480. Biomedical Instrumentation. 3 Credit Hours.

Analysis and design of systems and electronic circuits in biomedical instrumentation including modeling and simulation of dynamic measurement systems and implementation of analog signal processing. The functional principles, operation, clinical context and technological trends of medical instrumentation systems used in clinical and research applications will be discussed.

Prerequisite Or Corequisite: BME 440.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 506. Computer Aided Design in Biomedical Engineering. 1 Credit Hour.

Laboratory course for computer based two and three dimensional drawing and design based on ProEngineer. Parametric design, parts, features, assemblies for complex modeling. Applications in biomedical engineering design.

Prerequisite: BME 112. And BME 211.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 507. LabView Applications for Biomedical Engineering. 1 Credit Hour.

Laboratory course for computer based instrumentation and design based on Labview. Virtual instrumentation, data acquisition and display, GPIB instrument control, biomedical applications in biosignal recording, and monitoring are discussed.

Prerequisite: BME 112. And BME 211.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 510. Introduction to Medical Robotics. 3 Credit Hours.

This course will discuss the basic principles of robotics and focus on its medical applications. The course integrates previously learned math, programming and imaging knowledge into an application platform to enable students to understand fundamentals of robotics methods in biology and medicine and to train students to build a robotics prototype through hands-on projects.

Prerequisite: BME 211. And BME 310. And BME 330.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BME 512. Regulatory Control of Biomedical Devices. 3 Credit Hours.

Regulatory agencies and requirements, Food and Drug Administration, 510(k) and premarket approval (PMA), international regulatory requirements, ISO 9000 series, CE, UL, product and process validation, quality engineering, quality improvement programs, rapid prototyping, packaging and sterilization, and project management are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BME 513. Biomedical Systems Engineering. 3 Credit Hours.

This course provides students with an understanding and appreciation of Biomedical Systems Engineering with emphasis on current day industrial project management and product development processes. The components of Systems Engineering to be presented include: functional system analysis, requirements analysis, translation of functions and requirements into a system and product architecture, and, finally, testing methods to verify the biomedical product meets all design requirements. Decision methodology, alternative concept analysis, trade-off studies, integration of human factors, manufacturability, reliability, maintainability, feasibility demonstration, and safety are all addressed as part of the product design system. The entire product development life cycle will be analyzed with relevant concepts from initial market evaluation, to requirement development, through final product manufacturing and product launch. The regulatory environment for biomedical devices will also be presented for both US FDA and international compliance. The lectures will provide detailed notes on the subjects; other articles as handouts or additional readings will also be assigned.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BME 520. Medical Imaging System. 3 Credit Hours.

Engineering and scientific principles of medical imaging systems. The concepts of instrumentation and diagnostic applications of different techniques and systems are presented. Demonstrations or exhibitions of medical systems are given in the visits to clinic and research laboratories. Topics include digital image and image processing fundamentals, radiographic (X-ray, CT), magnetic resonance (MRI) and radio-isotopic (PET) systems, and associated image reconstruction techniques. Basic concepts and simulation of imaging systems are emphasized.

Prerequisite: ECE 201. And BME 211. And BME 330. Or Corequisite: BME 470.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BME 521. Medical Imaging Applications. 3 Credit Hours.

Medical applications of imaging systems and image processing techniques. Topics include image fundamentals (resolution, format, and storage), image processing fundamentals (transformation, compression, enhancement, segmentation, registration, and reconstruction), and image analysis fundamentals (calibration, quantification, correlation, linearity and depiction). Course includes dedicated computer laboratory projects and demonstrations given in clinical and research laboratories at the medical campus. Corequisite: BME 570 or equivalent.

Prerequisite: BME 211. And BME 330. Or Corequisite: BME 470.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BME 522. Scanning Electron Microscopy for Engineers. 3 Credit Hours.

Physics of transmission and scanning electron microscopy including x-ray spectroscopic analysis. Students will learn to independently operate and use the SEM for imaging in its role in research and engineering. Each student will be responsible for several imaging assignments and an independent research project related to their field of interest.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

BME 525. Special Problems. 1-3 Credit Hours.

Research and/or design projects consisting of an individual investigation of current problems. Offered by special arrangement only.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BME 526. Special Problems. 1-3 Credit Hours.

Research and/or design projects consisting of an individual investigation of current problems. Offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 535. Advanced Biomaterials. 3 Credit Hours.

Applications of biomaterials in different tissue and organ systems. Relationship between physical and chemical structure of materials and biological system response are discussed as well as choosing, fabricating, and modifying materials for specific biomedical applications.

Prerequisite: BME 335.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BME 540. Microcomputer-Based Medical Instrumentation. 3 Credit Hours.

Principles and design of microcomputer-based biomedical instruments, analog and digital signal conversion, microcomputer hardware and software design, algorithm development for medical applications, medical signal processing with microcomputers, software safety in life support systems, and current applications are discussed.

Prerequisite: ECE 315. And ECE 304. Or ECE 211.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BME 541. Medical Electronic Systems Laboratory. 2 Credit Hours.

Laboratory course for BME 540/640. Design of medical instruments integrated with microcomputers and telemetry devices.

Pre/Corequisite: BME 540. Or BME 640.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

BME 545. Biomedical Optical Instruments. 3 Credit Hours.

Introduction to geometrical optics, light sources, detectors, and fiber optics with an emphasis on engineering aspects and medical applications. Fiber-optic delivery systems for medical applications, optics of the eye and visual instruments, and optical instruments used in medicine (microscopes, endoscopes, ophthalmic instruments) are discussed. Hands-on sessions in the laboratory are included.

Prerequisite: PHY 206. And PHY 207. And MTH 311.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BME 546. Medical Applications of Lasers. 3 Credit Hours.

Review of geometrical optics, fiber optics, wave optics, laser physics, and technology. Medical laser systems, optical properties of tissue, light propagation in tissue, laser-tissue interactions, and surgical applications of lasers are also covered. Hands-on sessions in the laboratory are included.

Prerequisite: PHY 206. And PHY 207. And MTH 311.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BME 555. Fundamentals of Computational Neuroscience. 3 Credit Hours.

Major concepts include neural signaling and communication from the single neuron to system of neural ensembles and the role of neural computation in engineering applications. Theory and principles of information processing in the brain are presented. Experimental data and computer simulations are used to provide real examples for students experimentation.

Prerequisite: BME 265 and Corequisite: BME 470.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BME 565. Principles of Cellular and Tissue Engineering. 3 Credit Hours.

Introduction to cellular and tissue engineering. Current therapeutic approaches for lost/damaged tissue or organ function, tissue engineering strategies to replace/repair tissue or function: infusion of cells, production and delivery of tissue-inducing substances, cells placed on or within biomaterial scaffolds, examples of tissue engineering applications: skin, heart muscle, blood vessels, and blood.

Prerequisite: BME 302. And BME 335.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BME 566. Cell and Tissue Engineering Laboratory. 1 Credit Hour.

The principles of cell and tissue engineering will be presented in a hands-on laboratory experience. General techniques learned will include sterile methods, cell culture techniques and integration of cells within biomaterials. Cell engineering topics include cell cycle/metabolism, adhesion, signal transduction, and assessment. Tissue engineering topics include fabrication, biomaterials/scaffolds and cell integration, and functional assessment. Pre/Corequisite: BME 565 Or BME 302.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 567. Tissue Engineering Lab. 1 Credit Hour.

The principles of tissue engineering will be presented in a hands-on laboratory experience. General techniques learned will include hydrogel spectroscopy analysis, swelling tests, permeability tests, rheological tests, cell culture techniques, cell imaging, cell culture in hydrogels. Cell & Tissue engineering topics include cell cycle/metabolism, adhesion, biomaterials synthesis and characterization, biocompatibility.

Prerequisite: BME 302 and BME 303. And Corequisite: BME 335 or BME 565.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 570. Advanced Biomedical Signal Processing. 3 Credit Hours.

This course provides an overview of advanced topics in biomedical signal processing with an emphasis on practical applications. Topics include quantitative description, analysis, on-line and real-time processing of biophysical and physiological signals (cardiovascular, neural, sensory, muscular, respiratory and other) using adaptive, learning, pattern recognition and data dimension reduction methods.

Prerequisite: BME 470.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BME 571. Introduction to Biosignal Processing Lab. 1 Credit Hour.

Laboratory course in conjunction with BME 570 course. Corequisite: BME 570.

Prerequisite: BME 570. Or Corequisite: BME 570.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 575. Biomechanics II. 3 Credit Hours.

Applications of linear and nonlinear viscoelastic concepts to the biomedical characteristics of biological tissues and structures at small and large deformations of blood flow, experimental methods of analysis, artificial organs, and life-support systems.

Prerequisite: BME 375. And BME 310.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BME 581. Radiation Biology and Physics. 3 Credit Hours.

The principles, methods, and results of radiation biology with physics applications in radiation therapy will be introduced in the course. The course will focus on mechanisms of radiation and biological system interaction, biological aspects of the foundation of radiation therapy, and mathematical models for radiobiological analysis.

Prerequisite: BME 265.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BME 582. Radiation Therapy Physics. 3 Credit Hours.

The principles and instrumentation of radiation dosimetry with focus on the applications in radiation therapy will be introduced in this course. The course will emphasize radiation dose computation algorithms and applications in treatment dose planning. The course will also cover a categorized dosimetric analysis of radiation therapy to different clinical conditions.

Prerequisite: BME 310. Or Pre/Corequisite: BME 581.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BME 583. Radiation Protection. 3 Credit Hours.

This course covers radiation safety principles for all areas of clinical medical physics, including regulatory requirements for personnel, equipment and facilities and detailed structural shielding design requirements for medical facilities. The student will become proficient in practical aspects of radiation safety objectives and regulatory requirements in clinical practice, including those for patients, members of the general public and staff. Students will learn the principles for designing and installing structural shielding in clinical facilities that satisfies both regulatory requirements and clinical needs.

Prerequisite: BME 581. Or Pre/Corequisite: BME 582.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BME 587. Finite Element Analysis for Engineers. 3 Credit Hours.

Introduction to the finite-element method. Hands-on applications of FEMLAB software to the analysis of structural, thermal, chemical, electromagnetic, optical, and fluid flow problems.

Prerequisite: MTH 311.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 599. Cooperative Education.. 1 Credit Hour.

Practical application of classroom theory through alternating semester or summer employment with firms offering positions consistent with the student's field of study. Course may be repeated. Periodic reports and conferences are required.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BME 601. Unified Medical Sciences I. 3 Credit Hours.

Treatment of the basic biological and medical elements in physiological systems. The anatomy, physiology, biophysics, biochemistry and certain aspects of clinical medicine are unified with an emphasis on cellular and subcellular systems. Not open to BME undergraduates.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BME 602. Unified Medical Sciences II. 3 Credit Hours.

Treatment of the basic biological and medical elements in physiological systems. The anatomy, physiology, biophysics, biochemistry, and certain aspects of clinical medicine are unified with an emphasis on cardiovascular, renal, digestive, endocrine, and reproductive systems. Not open to BME undergraduates.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BME 603. Unified Medical Science III. 3 Credit Hours.

Treatment of the basic biological and medical elements in physiological systems. The anatomy, physiology, biophysics, biochemistry, and certain aspects of clinical medicine are unified with an emphasis on neural, sensory, and muscular systems. Not open to BME undergraduates.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BME 606. Computer Aided Design in Biomedical Engineering. 1 Credit Hour.

Laboratory course for computer based two and three dimensional drawing and design based on ProEngineer. Parametric design, parts, features, assemblies for complex modeling. Applications in biomedical engineering design.

Prerequisite: BME 112. And BME 211.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 607. LabView Applications for Biomedical Engineering. 1 Credit Hour.

Laboratory course for computer based instrumentation and design based on Labview. Virtual instrumentation, data acquisition and display, GPIB instrument control, biomedical applications in biosignal recording, and monitoring are discussed.

Prerequisite: BME 112. And BME 211.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 610. Introduction to Medical Robotics. 3 Credit Hours.

This course will discuss the basic principles of robotics and focus on its medical applications. The course integrates previously learned math, programming and imaging knowledge into an application platform to enable students to understand fundamentals of robotics methods in biology and medicine and to train students to build a robotics prototype through hands-on projects.

Prerequisite: BME 211. And BME 310. And BME 330.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BME 612. Regulatory Control of Biomedical Devices. 3 Credit Hours.

Regulatory agencies and requirements, Food and Drug Administration, 510(k) and premarket approval (PMA), international regulatory requirements, ISO 9000 series, CE, UL, product and process validation, quality engineering, quality improvement programs, rapid prototyping, packaging and sterilization, and project management are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BME 613. Biomedical Systems Engineering. 3 Credit Hours.

This course provides students with an understanding and appreciation of Biomedical Systems Engineering with emphasis on current day industrial project management and product development processes. The components of Systems Engineering to be presented include: functional system analysis, requirements analysis, translation of functions and requirements into a system and product architecture, and, finally, testing methods to verify the biomedical product meets all design requirements. Decision methodology, alternative concept analysis, trade-off studies, integration of human factors, manufacturability, reliability, maintainability, feasibility demonstration, and safety are all addressed as part of the product design system. The entire product development life cycle will be analyzed with relevant concepts from initial market evaluation, to requirement development, through final product manufacturing and product launch. The regulatory environment for biomedical devices will also be presented for both US FDA and international compliance. The lectures will provide detailed notes on the subjects; other articles as handouts or additional readings will also be assigned.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BME 620. Medical Imaging System. 3 Credit Hours.

Engineering and scientific principles of medical imaging systems. The concepts of instrumentation and diagnostic applications of different techniques and systems are presented. Demonstrations or exhibitions of medical systems are given in the visits to clinic and research laboratories. Topics include digital image and image processing fundamentals, radiographic (X-ray, CT), magnetic resonance (MRI) and radio-isotopic (PET) systems, and associated image reconstruction techniques. Basic concepts and simulation of imaging systems are emphasized.

Prerequisite: ECE 201. And BME 211. And BME 330. Or Corequisite: BME 470.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BME 621. Medical Imaging Applications. 3 Credit Hours.

Medical applications of imaging systems and image processing techniques. Topics include image fundamentals (resolution, format, and storage), image processing fundamentals (transformation, compression, enhancement, segmentation, registration, and reconstruction), and image analysis fundamentals (calibration, quantification, correlation, linearity and depiction). Course includes dedicated computer laboratory projects and demonstrations given in clinical and research laboratories at the medical campus. Corequisite: BME 570 or equivalent.

Prerequisite: BME 211. And BME 330. Or Corequisite: BME 470.

Components: LEC.

Grading: GRD.

BME 622. Scanning Electron Microscopy for Engineers. 3 Credit Hours.

Physics and operating principles of scanning electron microscope (SEM), transmission electron microscope (TEM), and optical light microscope. Biological tissue preparation, storage, fixation and digital image storage. Each student will learn to use the SEM in the design and/or analysis of a biomedical device.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

BME 625. Special Problems. 1-3 Credit Hours.

Research and/or design projects consisting of an individual investigation of current problems. Offered by special arrangement only.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BME 626. Special Problems. 1-3 Credit Hours.

Research and/or design projects consisting of an individual investigation of current problems. Offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 635. Advanced Biomaterials. 3 Credit Hours.

Applications of biomaterials in different tissue and organ systems. Relationship between physical and chemical structure of materials and biological system response are discussed as well as choosing, fabricating, and modifying materials for specific biomedical applications.

Prerequisite: BME 335.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BME 640. Microcomputer-Based Medical Instrumentation. 3 Credit Hours.

Principles and design of microcomputer-based biomedical instruments, analog and digital signal conversion, microcomputer hardware and software design, algorithm development for medical applications, medical signal processing with microcomputers, software safety in life support systems, and current applications are discussed.

Prerequisite: ECE 315. And ECE 304. Or ECE 211.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BME 641. Medical Electronic Systems Laboratory. 2 Credit Hours.

Laboratory course for BME 540. Design of medical instruments integrated with microcomputers and telemetry devices.

Pre/Corequisite: BME 540. Or BME 640.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

BME 645. Biomedical Optical Instruments. 3 Credit Hours.

Introduction to geometrical optics, light sources, detectors, and fiber optics with an emphasis on engineering aspects and medical applications. Fiber-optic delivery systems for medical applications, optics of the eye and visual instruments, and optical instruments used in medicine (microscopes, endoscopes, ophthalmic instruments) are discussed. Hands-on sessions in the laboratory are included.

Prerequisite: PHY 206. And PHY 207. And MTH 311.

Components: LEC.

Grading: GRD.

BME 646. Medical Applications of Lasers. 3 Credit Hours.

Review of geometrical optics, fiber optics, wave optics, laser physics, and technology. Medical laser systems, optical properties of tissue, light propagation in tissue, laser-tissue interactions, and surgical applications of lasers are also covered. Hands-on sessions in the laboratory are included.

Prerequisite: PHY 206. And PHY 207. And MTH 311.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BME 655. Fundamentals of Computational Neuroscience. 3 Credit Hours.

Major concepts include neural signaling and communication from the single neuron to system of neural ensembles and the role of neural computation in engineering applications. Theory and principles of information processing in the brain are presented. Experimental data and computer simulations are used to provide real examples for students experimentation.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BME 665. Principles of Cellular and Tissue Engineering. 3 Credit Hours.

Introduction to cellular and tissue engineering. Current therapeutic approaches for lost/damaged tissue or organ function, tissue engineering strategies to replace/repair tissue or function: infusion of cells, production and delivery of tissue-inducing substances, cells placed on or within biomaterial scaffolds, examples of tissue engineering applications: skin, heart muscle, blood vessels, and blood.

Prerequisite: BME 302. And BME 335.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BME 666. Cell and Tissue Engineering Laboratory. 1 Credit Hour.

The principles of cell and tissue engineering will be presented in a hands-on laboratory experience. General techniques learned will include sterile methods, cell culture techniques and integration of cells within biomaterials. Cell engineering topics include cell cycle/metabolism, adhesion, signal transduction, and assessment. Tissue engineering topics include fabrication, biomaterials/scaffolds and cell integration, and functional assessment. Pre/Corequisite: BME 565. Or BME 665. Or BME 302.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BME 667. Tissue Engineering Lab. 1 Credit Hour.

The principles of tissue engineering will be presented in a hands-on laboratory experience. General techniques learned will include hydrogel spectroscopy analysis, swelling tests, permeability tests, rheological tests, cell culture techniques, cell imaging, cell culture in hydrogels. Cell & Tissue engineering topics include cell cycle/metabolism, adhesion, biomaterials synthesis and characterization, biocompatibility.

Co-requisite: BME 635 or BME 665.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 670. Advanced Biomedical Signal Processing. 3 Credit Hours.

This course provides an overview of advanced topics in biomedical signal processing with an emphasis on practical applications. Topics include quantitative description, analysis, on-line and real-time processing of biophysical and physiological signals (cardiovascular, neural, sensory, muscular, respiratory and other) using adaptive, learning, pattern recognition and data dimension reduction methods.

Prerequisite: BME 470.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BME 671. Introduction to Biosignal Processing Lab. 1 Credit Hour.

Laboratory course in conjunction with BME 570 course. Corequisite: BME 570.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 675. Biomechanics II. 3 Credit Hours.

Applications of linear and nonlinear viscoelastic concepts to the biomedical characteristics of biological tissues and structures at small and large deformations of blood flow, experimental methods of analysis, artificial organs, and life-support systems.

Prerequisite: BME 375. And BME 310.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BME 681. Radiation Biology and Physics. 3 Credit Hours.

The principles, methods, and results of radiation biology with physics applications in radiation therapy will be introduced in the course. The course will focus on mechanisms of radiation and biological system interaction, biological aspects of the foundation of radiation therapy, and mathematical models for radiobiological analysis. Corequisite or prerequisite: BME 502 or permission of instructor.

Corequisite: BME 602.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BME 682. Radiation Therapy Physics. 3 Credit Hours.

The principles and instrumentation of radiation dosimetry with focus on the applications in radiation therapy will be introduced in this course. The course will emphasize radiation dose computation algorithms and applications in treatment dose planning. The course will also cover a categorized dosimetric analysis of radiation therapy to different clinical conditions.

Prerequisite: BME 310. Or Pre/Corequisite: BME 681.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BME 683. Radiation Protection. 3 Credit Hours.

This course covers radiation safety principles for all areas of clinical medical physics, including regulatory requirements for personnel, equipment and facilities and detailed structural shielding design requirements for medical facilities. The student will become proficient in practical aspects of radiation safety objectives and regulatory requirements in clinical practice, including those for patients, members of the general public and staff. Students will learn the principles for designing and installing structural shielding in clinical facilities that satisfies both regulatory requirements and clinical needs.

Prerequisite: BME 681. Or Pre/Corequisite: BME 682.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BME 687. Finite Element Analysis for Engineers. 3 Credit Hours.

Introduction to the finite-element method. Hands-on applications of FEMLAB software to the analysis of structural, thermal, chemical, electromagnetic, optical, and fluid flow problems.

Prerequisite: MTH 311.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 699. Cooperative Education.. 1 Credit Hour.

Practical application of classroom theory through alternating semester or summer employment with firms offering positions consistent with the student's field of study. Course may be repeated. Periodic reports and conferences are required.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BME 702. Organs on Chips. 3 Credit Hours.

This course provides a comprehensive introduction to engineering the living and non-living components of cellular systems in a dish. The first part of the course will focus on cell source, with an emphasis on human stem cell acquisition and differentiation. The second part of the course will focus on biomaterials and methods for engineering tissues. The final portion of the course will be a survey of tissue engineering in the clinic today and existing "Organ on Chip" platforms. Throughout the course, laboratory principles will be discussed, including cell culture and gene editing. Most of the assigned reading will be recent primary literature articles.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BME 705. Master's Design Project I. 3 Credit Hours.

Comprehensive M.S. design project in biomedical engineering. Open to students in the BS/MS and MS programs.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BME 706. Master's Design Project II. 3 Credit Hours.

Comprehensive M.S. design project in biomedical engineering. Open to students in the BS/MS.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BME 711. Accelerated Basic Science Curriculum. 1-9 Credit Hours.

Beginning in the latter part of June each year, extending to the middle of February of the ensuing year, the following accelerated and intensive complete basic science medical curriculum is offered: Embryology, Gross Anatomy, Histology, Biochemistry, Neuroanatomy, Biophysics and Neurophysiology, Systematic Physiology, Pathology, Medical Microbiology, and Pharmacology. A single grade will be entered on the graduate transcript for this course. MD-PhD Students Only

Components: LEC.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

BME 713. Application of Computers in Medicine. 3 Credit Hours.

Applications in the clinical and medical research laboratories for physiological data acquisition, analysis, and management of patient records. Differences among computer systems and languages for clinical and research activities are also covered.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BME 722. Scanning Electron Microscopy Special Projects. 3 Credit Hours.

An advanced course for graduate students with basic skills in SEM. Course is open only to masters or Ph.D. students. Students will have an opportunity to do independent research under supervision of the instructor on special projects of interest that may be related to their field of study as long as it is not part of their thesis or dissertation.

Prerequisite: BME 522 Or BME 622.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BME 723. Neurosensory Engineering. 3 Credit Hours.

Biophysics of neural communication, quantitative electroencephalography and evoked potentials, sleep, seizure, anesthesia and intraoperative monitoring, neural stimulation, artificial and biological neural networks, cochlear and visual implants, brain and muscle stimulation.

Prerequisite: BME 603. And BME 570. Or BME 670.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BME 724. Neuromotor Engineering. 3 Credit Hours.

Advances in Neural Engineering have led to improved medical-device designs with novel functions. This course focuses on the engineering approaches, R&D advances, and the technical principles of NeuroMotor medical implants. Neural Engineering theory and applications from the perspectives of electronics design, neural signal analysis, and neurophysiology will be covered.

Prerequisite: BME 603.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BME 725. Special Problems. 1-3 Credit Hours.

Research and/or design projects through an individual investigation of current problems. Offered by special arrangement only.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BME 726. Special Problems. 1-3 Credit Hours.

Research and/or design projects through an individual investigation of current problems. Offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 728. Advanced Topics. 1-3 Credit Hours.

Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 729. Advanced Medical Imaging. 3 Credit Hours.

Analysis of contemporary medical imaging systems and the associated technologies. The course focuses on principles of advanced medical imaging systems. Topics include multimodality imaging, three-dimensional image reconstruction and visualization, clinical and research applications, and derivation and comparison of algorithms.

Prerequisite: BME 620.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BME 731. Advanced Topics. 1-3 Credit Hours.

Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics."

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 732. Advanced Topics. 1-3 Credit Hours.

Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics."

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 735. Auditory and Visual Neural Systems. 3 Credit Hours.

Design and application of auditory and visual neural systems and devices for medical purposes. Methodologies and instrumentation using electrophysiological, psychophysical and other measurements are explored focusing on diagnostic and therapeutic applications.

Prerequisite: BME 603.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BME 740. Implantable Biomedical Devices. 3 Credit Hours.

Development and advances in implantable materials and devices especially those used as electrically driven prostheses. Topics include pacemakers, defibrillators, catheters, neurological stimulators, heart assist, bone repair, and other diagnostic and therapeutic devices. The historical, medical significance, business, economic, and technical aspects of these devices and the associated instruments for monitoring are discussed. Fundamentals of electrochemical corrosion and stimulation as well the technology of implantable power sources are reviewed.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BME 745. Biomedical Optical Imaging and Diagnostics. 3 Credit Hours.

Review of geometrical optics, fiber optics, and tissue optics. Introduction to physical optics: interference, diffraction, and polarization; optical imaging resolution limits, super-resolution imaging, advanced optical microscopy, and optical coherence tomography (OCT). Imaging through scattering tissue, imaging and diagnostics with polarized light, fluorescence, infrared, and Raman spectroscopy and applications are also discussed. Optical diagnostics using scattered light: laser Doppler flowmetry, and dynamic light scattering; and opto-chemical and evanescent wave sensors are also covered.

Prerequisite: BME 310.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BME 760. Stem Cell-Based Tissue Engineering. 3 Credit Hours.

Principles and advanced topics on cellular and tissue engineering. Topics include biodegradable and non-biodegradable biomaterials, cytokines, the traditional and stem cell-based tissue engineering approaches, bioreactors and special topics such as bone, cartilage and other tissues.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BME 761. Stem Cell Design. 3 Credit Hours.

Stem cell engineering is a relatively new field of research that focuses on using stem cells and tissue derived products to repair damaged or diseased tissues. This course will examine through the most recent publications the role of stem cells and tissue derived donors for tissue repair, wound healing, and as well as regeneration/repair. In addition, we will highlight the use of engineered products developed from tissue banks associated with the different type of cells for clinical application. The course will use a mix of lectures/article presentations and discussion format to effectively present relevant information.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BME 779. Biomedical Engineering Seminar Series. 1 Credit Hour.

A course for Biomedical Engineering doctoral students. Students will attend lectures and roundtable discussions with leading experts from both academia and industry.

Components: SEM.

Grading: SUS.

Typically Offered: Fall & Spring.

BME 780. Graduate Scholarship in Biomedical Engineering. 3 Credit Hours.

A course for Biomedical Engineering doctoral students. Students will learn to critically review scientific journal articles as well as NIH research proposals (i.e. R01, R03, F30/31 and R21). Students will also learn how to read federal grant application guidelines and determine what is required for a highly competitive written application. The students will have the opportunity to prepare their own research proposal in the form of an F31 NIH application on a biomedical engineering topic of interest. Students will also learn how to prepare and present their research findings at conferences.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BME 781. Radiation Dosimetry and Physics. 3 Credit Hours.

Application of radiation physics in the field of radiation therapy. The course will cover the relevant subjects of modern physics, the basic modalities and basic instrumentations of radiation therapy, the principles of particle transport and radiation dose computation and quality assurance of radiation therapy instruments. The subject of radiation protection will also be discussed.

Prerequisite: BME 582. Or BME 682.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BME 783. Radiation Therapy Physics Clinical Rotation. 3 Credit Hours.

Students will observe clinical activities at a designated radiation therapy center for ten hours per week. Rotation includes observation of daily treatment, simulation, dose planning, physics quality assurance and routine physics support activities (special physics consultation, weekly physics chart check, monitoring radiation safety activities, support of brachytherapy procedures). Students will meet with the course instructor one and a half hours/week to discuss the schedule and the progress of the rotation activities. Students need to submit reports on each radiation therapy category.

Prerequisite: BME 682. And BME 781.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BME 784. Medical Physics Journal Club. 1 Credit Hour.

The course aims to keep track of recent developments in the field of Medical Physics for therapeutic and diagnostic purposes in oncology through reading, discussion and presentation of identified scientific papers from the major journals of Medical Physics among enrolled students.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BME 810. Master's Thesis. 1-6 Credit Hours.

The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

BME 820. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in BME 710 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BME 825. Continuous Registration--Master's Study. 1 Credit Hour.

To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BME 830. Pre-candidacy Doctoral Dissertation. 1-12 Credit Hours.

Doctoral dissertation credits taken prior to Ph.D. student's candidacy. The student will enroll for credit as determined by his/her advisor. Not more than 12 hours of BME 730 may be taken in a regular semester, nor more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

BME 840. Post-Candidacy Doctoral Dissertation. 1-13 Credit Hours.

Doctoral dissertation credits taken after Ph.D. student has been admitted to candidacy. The student will enroll for credit as determined by his/her advisor. Not more than 12 credits in BME 740 may be taken in a regular semester, nor more than six credits in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

BME 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Biostatistics (BST)

BST 605. Statistical Principles of Clinical Trials. 3 Credit Hours.

This course is designed for individuals interested in the statistical aspects of clinical trials. Topics include types of clinical research, study design, treatment allocation, randomization and stratification, quality control, sample size requirements, patient consent, and interpretation of results. This course will additionally cover strengths and limitations of alternative study designs such as quasi-experiments and observational studies. Common sources of bias in these alternative study designs will be described along with design approaches to minimize bias.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BST 610. Introduction to Statistical Collaboration. 3 Credit Hours.

This course gives students exposure to issues arising in biostatistics consulting and collaboration. Students will learn how to identify the scientific objectives of a study and to develop a statistical strategy appropriate for those objectives. The student will become familiar with problems arising in consulting situations, specifically relating to identification of study objectives and framing of research questions, study design, power and sample size determination and choice of analytical approach. The student will learn to communicate through presentation of oral and written reports, and through student and faculty critiques of these reports.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

BST 625. Survey of Statistical Computing. 3 Credit Hours.

This three credit course aims to familiarize students with the basic use of SAS and R for routine statistical analysis and prepare them for more advanced courses and/or thesis research. Statistical computation will be illustrated with examples in medical research, biological study and business. The focus of the course is on the computing environment, therefore a thorough discussion of statistical theories will not be provided. It is expected that students will already be prepared statistically.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BST 630. Longitudinal and Multilevel Data. 3 Credit Hours.

This course offers students an introduction to linear and generalized linear models for the analysis of multi-level and longitudinal biomedical data. The course will also provide students with the opportunity to develop the skills necessary to perform analysis of these types of data using statistical software packages.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BST 640. Modern Numerical Multivariate Methods. 3 Credit Hours.

This course covers multivariate topics from both a classical as well as modern perspective. Topics to include: Multivariate Normal Distribution; Spectral Decomposition; Principal Component Analysis; Canonical Correlation Analysis; Newton's Method; Steepest Descent; Gradient Boosting; Coordinate Descent Algorithms; Trees; Forests; Discriminant Analysis. The R programming language (<http://www.r-project.org>) will be used extensively throughout the course for computation and statistical analysis.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BST 649. Advanced Individual Study. 1-3 Credit Hours.

Individual work on a special project under faculty guidance.

Components: IND.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

BST 650. Topics in Biostatistical Research. 1 Credit Hour.

The course consists of a series of research level presentations in contemporary biostatistics research (broadly defined) by diverse outside speakers as well as faculty in the Division of Statistics or in other units on campus who are hosting presentations in biostatistics research. The emphasis will be on new methodologies and new developments in existing methodologies. However, recent developments on the implementation and comparison of methodology and on data types may also be included.

Components: LEC.

Grading: SUS.

Typically Offered: Fall & Spring.

BST 660. Spatial Statistics. 3 Credit Hours.

Spatial data commonly arise from many fields including business, ecological, and health studies. This course will cover advanced techniques to tackle the spatial correlation. Topics include variogram estimation, spatial prediction, spatial point pattern analysis, estimating function based methods and others. Real data examples will be used to motivate and illustrate the use of the methods.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BST 665. Design and Analysis of Clinical Trials. 3 Credit Hours.

This first part of this course is an advanced treatment of the key ideas undergirding the design and analysis of contemporary clinical trials. By the end of the course, students will have learned the statistical foundations of Phase I, II, and III trials from the standpoint of classical Frequentist, Bayesian, and adaptive designs. In addition, students will learn the usual mechanisms for preparing a clinical trial protocol, data safety and monitoring, interim analysis, and proper close out of a trial.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BST 670. Bayes Data Analysis: Theory and Computing. 3 Credit Hours.

This first part of this course is an advanced and comprehensive treatment of the foundations of Bayesian theory. Beginning with the Bayesian alternative to sampling theory, the course covers Savage's axioms, the standard Bayesian inference procedure, subjective Bayes interpretation and prior selection, the minimax and complete class theorems, a variety of Bayesian principles (likelihood, stopping time etc.), and a selection of standard parametric and non-parametric examples. The second part focuses on the computational implementation of Bayesian inference, namely Gibbs sampling, Metropolis-Hastings, and other Markov-Chain-Monte Carlo techniques for obtaining the posterior and posterior quantities. Computational examples will be illustrated using R and WinBUGS. Special topics will include approximate Bayes computing (ABC) and particle methods.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BST 675. Intermediate Probability. 3 Credit Hours.

This course covers the basic foundations of probability to limit theorems at an intermediate level. Topics to include are events, random variables and their distributions, discrete and continuous random variables, generating functions, markov chains and convergence.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BST 676. Introduction to Generalized Linear Models. 3 Credit Hours.

This course provides a unifying framework for formulation, estimation and inference using generalized linear models and towards the end examines some modern day extensions. Throughout the course, real data applications from medicine will be used and extensive use will be made of the R programming language.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BST 680. Advanced Statistical Theory. 3 Credit Hours.

The first part of this course is a searching treatment of many of the key ideas undergirding hypothesis testing and estimation. In particular, several of the main theorems in mathematical statistics will be stated and proved in full detail. By the end of the course, students will have acquired enough background material for the treatment of a special topic, through a mix of lectures and assignments. Topics will include asymptotic expansions, information theory and non-parametrics.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BST 690. Theory of Survival Analysis. 3 Credit Hours.

Survival analysis is an important tool of statistic with many applications. In this course, without losing sight of such applications, we will give special emphasis to the probabilistic foundations, in terms of counting processes and martingales. Topics include: Failure time models, inference in parametric models, Cox models, counting processes and martingales, likelihood, competing risks and analysis of recurrent event data. The R programming language will be used.

Prerequisite: MTH 524, MTH 525, and BST 680.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BST 691. High Dimensional and Complex Data. 3 Credit Hours.

This course will cover some salient topics in high dimensional data analysis focusing on the uniqueness of the problem and discussing various analyses including error rate control methods, model based shrinkage, prediction, set analysis, cluster analysis, bump hunting and (if time permits), graphical models.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BST 692. Case Studies in Biostatistics. 3 Credit Hours.

This course will demonstrate cases where commonly used statistical methods break down. It will give students the opportunity to apply new tweaks to common statistical methods and/or use entirely new techniques to address real applied biostatistics problems. Students will be presented with data that the UM faculty are working on, they will be asked to apply statistical methods that they have learned in previous classes and then they will study and apply new methods to handle complexities that are not well handled by the common techniques. The goal of the class is to give students the opportunity to apply their existing skills, study methods for identifying problems and then learn new methods to deal with complexities.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

BST 695. Special Topics. 3 Credit Hours.

The course is designed to allow the listing of special topics within the Division of Biostatistics degree programs and cross list topics with other department's offerings.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BST 830. Doctoral Dissertation (pre-candidacy). 1-12 Credit Hours.

Required of all candidates for the PhD. The student will enroll for credit as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of BST 730 may be taken in regular semester, nor more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

BST 840. Doctoral Dissertation (Post-Candidacy). 1-12 Credit Hours.

Required of all candidates for the PhD. The student will enroll for credits as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of BST 740 may be taken in regular semester, nor more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

BST 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the PhD. after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Business (BUS)

BUS 100. Fundamentals in Business. 3 Credit Hours.

We will expose students to the fundamental activities of the functional areas of business.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BUS 101. First Step: Freshman Integrity, Responsibility, and Success through Teamwork. 3 Credit Hours.

This course is designed to provide entering freshman business majors an enriched curriculum that examines key issues in the global business environment and emphasizes the importance of ethical business practices. The course culminates with a team project that encourages students to address real world problems and encourages a lifelong commitment to civic engagement.

Requisite: Business School.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 150. Business Analytics. 3 Credit Hours.

The primary purpose of this course is to build skills in learning and using software technologies to support business-oriented problem solving and decision making. Specifically, you will develop the ability to solve problems, to organize and analyze data using spreadsheet and database software, and to learn to distribute information to others through the effective use of collaborative technologies and the Web. Case problems will cover areas such as accounting, finance, marketing, statistics and operations management. Professors from several business school departments will discuss how their disciplines use spreadsheets to solve problems.

Requisite: Business School.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 155. Exploration of Faculty Research in SBA. 1 Credit Hour.

Students will be exposed to some of the SBA's top faculty researchers to learn more about research opportunities and styles of research methodologies within business.

Components: LEC.

Grading: CNC.

Typically Offered: Offered by Announcement Only.

BUS 156. Global Business Studies Introductory Seminar. 1 Credit Hour.

The honors seminar provides an experiential introduction to culture, history, and geography of the region, as well as economic challenges and successes of business in the region. Course involves social interaction among Global Business Studies cohort through cultural visits and workshops/talks, both on and off campus. Travel component is designed to showcase key sectors of a regional economy, and includes case-study and presentation activities.

Requisite: Global Business Studies and Corequisite: INS 584.

Components: THI.

Grading: GRD.

Typically Offered: Spring.

BUS 200. Introduction to Business. 3 Credit Hours.

Businesses today operate in an exceedingly complex environment. Such factors as commodity prices, labor and capital markets, as well as trends in tastes and preferences are constantly changing. This course will explore many of the key issues facing business decision makers in the contemporary environment, including an introduction to business ethics and corporate social responsibility. The course will take an interdisciplinary perspective, touching on essentially all of the business functions including economics, finance, accounting, marketing, management, and business communications. Using approaches from different business disciplines, students will gain insight into the structures and systems of business, as well as the strategies that firms use to compete effectively in the global business environment. BUS200 serves as the foundational course for the Business Cognate in People & Society, and it is offered for Gen Ed credit only.

Requisite: Non Business Majors.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 201. Money. 3 Credit Hours.

Financial decisions are at the heart of success in today's economy. Thus, financial literacy and the ability to manage personal finances is increasingly important. This GENERAL EDUCATION course delivers a comprehensive introduction to savings and borrowing, investments, and insurance, including such topics as budgeting, banking and consumer credit, the purchase of residential real estate, planning for retirement, starting a business, and understanding basic financial statements. Not for credit toward any business major or minor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 202. Introduction to the Legal Environment of Business. 3 Credit Hours.

This GEN ED course provides an overview of legal principles impacting business. Students will explore fundamental features of the U.S. judicial system, conflict resolution, the domestic system of property rights, the U.S. Constitution, and the regulatory process as they related to the business firm or business as a societal actor. Topical areas may include environmental regulation, consumer protection, employment discrimination laws, privacy concerns, the law of competition, and business ethics.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 203. Managing Effectively: A Skills Development Approach. 3 Credit Hours.

This Business Cognate course focuses on the seven core skills used by successful managers in their day to day work. Students will explore these skills, how they are applied and practiced in organizational settings, how they enable organizational success, and how they fit with the students' own capabilities. The course uses an action-based learning format that makes students participants in the process whereby they assess, practice, and enhance their own managerial skills.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 206. Principles of International Business. 3 Credit Hours.

This course is designed to provide nonbusiness students with an understanding of what global business is, in particular how international business is conducted across countries with different sets of formal and informal institutions. It also addresses the issues facing multi-national corporations and the factors influencing their success or failure globally.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 255. Business and Society: Inquiry and Discourse. 1-3 Credit Hours.

This course will explore the relationships between business firms and their regulatory, ethical, political, cultural, and social environments. Students will be exposed to a wide range of source materials and academic activities, with the objective of developing their capacity for principled professionalism.

Requisite: Foote Fellow AND Business School.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

BUS 256. Global Business Studies Seminar II. 1 Credit Hour.

This honors seminar introduces the key political movements and concepts that have shaped society in the region studied.

Requisite: Global Business Studies co-major AND Corequisite: BSL 212 in Spanish.

Components: THI.

Grading: GRD.

Typically Offered: Fall.

BUS 300. Critical Thinking and Persuasion for Business. 3 Credit Hours.

The modern businessperson faces a constantly evolving environment and must be able to confront and respond to an array of business issues. At the heart of an effective response is a critical, comprehensive analysis coupled with the ability to meaningfully and persuasively communicate that assessment and recommendations to a variety of constituencies. This course prepares business students for this by exposing them to a three-step process of problem solving in which they critically analyze the problem, and then communicate their analysis both in writing and orally.

Prerequisite: ENG 106 with a C- or better AND Requisite: Business School.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 356. Global Business Studies Seminar III. 1 Credit Hour.

This honors seminar facilitates understanding of economic challenges faced by business communities, connecting regional studies work with business curriculum. May be conducted in language of the region.

Global Business Studies co-major AND Corequisite: MGT 371.

Components: THI.

Grading: GRD.

Typically Offered: Spring.

BUS 400. Senior Experience for Business Students. 0 Credit Hours.

The Miami Business School Senior Experience (SBX) is a virtual, self-paced, credit/no credit course specially designed to assist business seniors in successfully navigating the final year at the University of Miami Business School. The course collects the various tasks required of business seniors under a single LMS-enhanced umbrella, making it easier for students to track completion of mandated assignments within established deadlines. SBX also serves as a hub for peer networking and for access to relevant resources for senior-level students, related to professional life, graduate study, and young alumnus leadership opportunities. Videos, power points, blogs, threaded discussions, as well as detailed instructions and web-links for required activities for graduating seniors are only a click away.

Requisite: Business School and Senior Standing.

Components: DIL.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

BUS 456. Global Business Studies Seminar IV. 1 Credit Hour.

The honors seminar is designed to introduce students to research methods and structuring a thesis question/argument.

Requisite: Global Business Studies co-major.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 496. Directed Studies in Business. 1-3 Credit Hours.

Supervised readings, individual research project, or independent investigation of selected non-STEM related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BUS 497. Directed Studies in Business. 1-3 Credit Hours.

Supervised readings, individual research project or independent investigation of selected STEM-related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BUS 498. Special Topics in Business. 1-3 Credit Hours.

Special topics in selected non-STEM areas of Business.

Requisite: Sophomore Standing or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BUS 499. Special Topics in Business. 1-3 Credit Hours.

Special topics in selected STEM areas of Business.

Requisite: Sophomore Standing or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BUS 555. Business Departmental Honors Research Project. 3 Credit Hours.

Research project to fulfill requirements for Departmental Honors in Business.

Components: THI.

Grading: SUS.

Typically Offered: Offered by Announcement Only.

BUS 556. Global Business Studies Seminar V. 1 Credit Hour.

This directed study course provides individual supervision in thesis writing.

Requisite: Global Business Studies co-major.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 557. Global Business Studies Thesis Defense. 1 Credit Hour.

This honors seminar is designed for completion of the thesis writing and individualized preparation for thesis defense.

Requisite: Global Business Studies co-major.

Components: THI.

Grading: GRD.

Typically Offered: Spring.

BUS 600. Fundamentals of Critical Thinking and Effective Writing. 1 Credit Hour.

Critical thinking skills are developed by studying questions that transcend any single business discipline. Utilizing a variety of written formats, students hone analytic and persuasive skills, with emphasis on identifying critical issues, developing reasoned positions, and making compelling written arguments.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BUS 601. MBA Math Module. 3.00 Credit Hours.

This course provides the student with the necessary mathematical skills to progress toward an MBA degree. The course begins with a review of algebra and continues with the fundamentals of differential and integral calculus. The focus is on applying these concepts in solving business problems.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BUS 602. Critical Thinking and Effective Writing. 1 Credit Hour.

Critical thinking skills are developed by studying questions that transcend any single business discipline. Utilizing a variety of written formats, students hone analytic and persuasive skills, with emphasis on identifying critical questions, developing reasoned positions, and making compelling written arguments.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BUS 603. Critical Thinking and Effective Speaking. 1 Credit Hour.

Builds on critical thinking and writing skills acquired in BUS 602. Topics include oral persuasion, prepared and impromptu speeches and dealing with the media, defending one's view before adversarial audiences, display of data, and effective use of visual aids.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 604. Career Development and Enrichment. 1.00 Credit Hour.

This course will expose students to a variety of academic and industry career lectures, events, and workshops to enhance their MBA experience. The focus is to establish added-value to an MBA student through real world and relevant access to information and resources beyond the traditional curriculum.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

BUS 605. Residential Session Abroad. 1-6 Credit Hours.

One two-week session of the Global Executive MBA program is held abroad. During this corporate and international experience students attend lectures and institutional visits. This experience exposes students to other cultures and different perspectives on business issues, and widens international networking opportunities.

Components: LEC.

Grading: SUS.

Typically Offered: Fall.

BUS 610. Critical Thinking and Persuasion for Business. 2 Credit Hours.

The modern businessperson faces a constantly evolving environment and must be able to confront and respond to an array of business issues. At the heart of an effective response is a critical, comprehensive analysis coupled with the ability to meaningfully and persuasively communicate that assessment and recommendations to a variety of constituencies. This course prepares business students for this by exposing them to a three-step process of problem solving in which they critically analyze the problem, and then communicate their analysis both in writing and orally. The critical thinking and communication elements of the course are supplemented with additional practical applications relating to career readiness, job search and job procurement.

Components: LEC.

Grading: GRD.

BUS 620. Exchange Program: IE Business School-Madrid Spain. 1-16 Credit Hours.

Components: LEC.

Grading: SUS.

Typically Offered: Fall.

BUS 622. Global Business Consulting. 1-6 Credit Hours.

The Global Business Consulting (GBC) project is a collaborative course offered by participating CIBER schools to their Graduate Students. Students in related disciplines work in teams both virtually and in person on real business issues with multinational and local businesses and not-for-profits. Project supervision and final grade provided by Faculty Advisor.

Components: PRA.

Grading: GRD.

Typically Offered: Spring.

BUS 624. Asian/Pacific Business Environment- International Trip. 1-4 Credit Hours.

Course content, dates and location will vary from semester to semester at selected universities.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 625. Latin America Business Environment - International Trip. 1-4 Credit Hours.

Course content, dates and location will vary from semester to semester at selected universities.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 628. Multidisciplinary Action Projects. 2-4 Credit Hours.

The Multidisciplinary Action Projects core course (MAP) places students with organizations throughout the world to address pressing organizational challenges. Students work in teams with guidance from faculty advisors to develop actionable and valuable recommendations for sponsors. For students, MAP provides an opportunity to augment and integrate knowledge of fundamental business concepts and tools learned in classroom settings. MAP also offers opportunities to develop and test both critical thinking and leadership skills through practical experience with real business challenges. For sponsoring organizations, MAP offers access to a high-caliber team of 4-6 students, the latest business concepts and tools, an external viewpoint, and rapid turnaround. The ultimate deliverable to the sponsor from a MAP project is a set of actionable, data-driven recommendations. MAP projects are based on sponsor needs and address a wide range of business issues – from identifying new processes and improving existing operations to launching new products and targeting new growth opportunities. Sponsors come from many different industries – from alternative energy to business process outsourcing to consumer products to financial services to healthcare to real estate to telecom. Sponsoring organizations may be large corporations, small entrepreneurial start-ups, or non-profit organizations. While each MAP project is different in context, all have essential features in common. All confront students with a real business challenge of significant importance and no existing solution. All require applying concepts and tools from multiple disciplines to successfully complete. All require dynamic sense-making, fact-based decisions, and high-performance teamwork. All unfold in unpredictable ways. All conclude with teams presenting actionable recommendations to project sponsors and faculty advisors.

Components: EXP.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BUS 629. Graduate Business Exchange Program. 1-16 Credit Hours.

Components: LEC.

Grading: SUS.

Typically Offered: Fall & Spring.

BUS 630. Fundamentals of Economics, Accounting, and Finance. 4 Credit Hours.

This course provides an overview of business economics, accounting, and finance. Economic themes primarily focus on microeconomic topics such as demand, supply, elasticity, and forms of competition. Accounting concepts include corporate financial statements, cost-volume-profit analysis, and traditional and activity-based cost accounting. Finance topics include time value of money, capital budgeting basics, foreign exchange, risk and return, modern portfolio theory, and financial markets. The course includes an integration of many of these concepts through an exposure to business plan development.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BUS 631. Business Analytics and Operational Excellence. 4 Credit Hours.

This course combines three disciplines that form the basis of a modern analytical approach to business management: statistics, optimization, and operations management. Many of the concepts covered are cross-disciplinary and can be applied to a variety of business functions and situations. Although specific examples will be used during the course to illustrate each concept, instruction will focus on the general applicability of the material. Topics to be covered include: numerical and categorical data, population/sample, parameter/statistic, introduction to excel, frequency distributions, histograms, pie charts, measures of variability, pivot tables, measures of association, random variables and distributions, sampling, types of hypothesis and of statistical errors, linear programming, network models, sensitivity analysis, integer and goal programming, forecasting, inventory management and location analysis.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BUS 632. Introduction to Strategy, Market, and Management. 4 Credit Hours.

This integrated course focuses on the external environment in which business firms operate and on the management techniques through which managers organize and motivate human resources to support strategic initiatives. It emphasizes in particular three critical sets of actors: customers, competitors, and employees. The purpose of the course is to introduce the student to basic conceptual frameworks and analytic models that managers use to a) identify and understand the customer segments that make up a marketplace, b) formulate strategies that achieve a competitive advantage within that marketplace, and c) lead and motivate employees in the execution of competitive strategies.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BUS 633. Business Plan Fundamentals and Communications. 4 Credit Hours.

This course provides students with the fundamentals in the development and preparation of a business plan, as well as of oral and written business communications. Students, after exploring new venture opportunities, will develop a comprehensive business plan, including its functional components (marketing, finance, operational, human and intellectual capital plans), the support with which to secure the needed financial and human resources, and the organization to manage the new venture. Students will also enhance their communication skills with which to identify critical issues, develop reasoned positions, display data, use visual aids effectively, state persuasive and compelling arguments for written documents as well as prepared and impromptu speeches, and deal with the media.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BUS 634. Research Project. 1-6 Credit Hours.

Individually supervised research project in selected field. Scope of work must be approved by supervision instructor prior to registration. Total enrollment may not exceed six credits.

Components: LEC.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

BUS 635. Research Project. 1-6 Credit Hours.

BUS 636. United States Business Environment - Domestic Trip. 1-4 Credit Hours.

Course content, dates and location will vary from semester to semester at selected universities.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BUS 640. Quantitative and Analytical Fundamentals for Finance. 1-4 Credit Hours.

This four-credit course provides graduate students with an intensive review of the fundamentals of financial accounting and finance, and as well as microeconomic concepts and quantitative skills, needed as appropriate foundation to pursue the Master of Science in Finance degree or other master degrees that entail taking an elective course in finance. Topics include: Math concept review (functions, exponents, notation, weighted average, derivatives as applied to maximization/minimization); Measures of central location, variability, and association; Supply and demand curves, elasticity; Profit maximization; Markets: perfect competition, monopoly, oligopoly; Economic role of Government (monetary and fiscal policy, regulation, taxation); Basic financial statements (income statement, balance sheet, statement of cash flow, statement of changes in shareholders' equity); Working capital, noncurrent liabilities and owners' equity, investments and long-lived assets; Common size and ratio analysis; Principles in finance; Time value of money; Valuation (including bonds and stocks); Fixed income securities; Term structure of interest rates; Interest rate risk and duration; Capital markets, how securities trade, intermediaries; Capital market efficiency, arbitrage; Risk and return, portfolio math; Diversifiable vs. non-diversifiable risk; Asset Pricing Models (CAPM, beta, Fama-French); Capital structure; Capital budgeting; Cost of capital; Foreign exchange and global investing; Introduction to derivatives. The course will be taught over a two-week period, primarily in lecture, homework, and test format.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

BUS 641. Business Analytics Capstone Project. 2 Credit Hours.

including data collection and analysis. The description of the problem in question, the approach used to address it, and the findings obtained by the group are to be described in formal written reports. The reports will be evaluated both on their quantitative value and on the quality of the writing.

Prerequisites: MAS 631 and MAS 632, and MAS 637, and MAS 639.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 650. Introduction to the Miami EMBA for the Americas. 1 Credit Hour.

This course provides incoming Executive MBA students an orientation to program tools and resources central to program success. Students will receive training in Blackboard, learn to access e-materials and navigate the business fundamental virtual modules, and increase their knowledge of business networking and influence. Students will also be introduced to business information resources and research strategies that they will use throughout the program. They will partake in Case Study preparation and receive an overview of the Integrated Project from Global Management, Global Enterprise, and Global Strategic Marketing perspectives. Students will also receive guidance on operating in teams both virtually and during the residency components of the program. Students will also participate in a corporate visit. This orientation also helps build a sense of affiliation among students and with the University.

Components: LEC.

Grading: SUS.

Typically Offered: Fall.

BUS 651. Global Strategic Marketing. 4 Credit Hours.

The purpose of this course is to acquaint the student with the theories and practice of strategic marketing management in the Americas. This course will enable the student to understand markets, develop strategies to capture value, and develop marketing plans based on the nature of national as well as international markets. Specifically, the issues of strategic marketing in the context of firm level strategy will be addressed, as well as issues of value capture and delivery, customer life-time value, pricing, distribution, branding and communication in markets.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BUS 652. Global Strategy. 2 Credit Hours.

The purpose of this course is to change how the strategic environment is viewed, how students think about their own organizations and other others, and how strategy and its execution is viewed. This course will help the student: understand organizations as complex systems embedded in a set of evolving cooperative and competitive economic relationships; identify the distinct resources and capabilities that form the foundation of an organization's competitive advantage; formulate business strategies that anticipate imitation and competitor response; evaluate the relationship between a firm's competitive advantage and its growth opportunities; understand the role of the corporate center in supporting and enhancing the competitive success of operating divisions; and see the interplay of organizational structures, systems, networks, and influence centers that form the basis of effective strategy implementation.

Components: LEC.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

BUS 653. Global Institutions, Infrastructure, and Environment. 4 Credit Hours.

This course considers how a country's legal and economic institutional arrangements influence managerial strategy involving goods, services and financial flows across nations. The course addresses how economic problems are dealt with by institutional arrangements in different ways around the world. Discussions will emphasize the influence that these institutional arrangements have on managerial project strategy when firms operate across borders. Specific emphasis will be placed on legal, economic and financial institutions in the Americas.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BUS 654. Corporate Financing and Investing. 4 Credit Hours.

This course considers financing and investing within the corporation. As such, it will consider the theoretical structure of the problem, the boundaries that management faces and how these decisions are made by management. The inter-residency portion will focus on the theoretical development and computational aspects of solving the problems. The residency portion will emphasize case discussion and simulation to demonstrate the practical implementation as well as integrating these concepts into the overall management picture. The objective of the course is to develop your understanding of the principles that define financial decision making in the firm. These topics are an important component of the strategic planning and top-level management of the firm. The course will guide you through the theory and computational aspects applying the theory, then through application to situations that will enhance and cement your understanding. Finance theory is universal and therefore does not apply to any given country or system. All of the applications will be international, multinational, or global in context. A central theme of the course is decision making. Specifically we will focus on the financial aspects of major strategic decisions. We will build on previous courses to understand how institutions, accounting, legal structures and more, affect these decisions.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 655. Public Policy and Health. 3 Credit Hours.

Development of public policy at the federal, state and local level. Policy process, models of policy analysis, policy development in several government service areas, and plans for policy change. Special emphasis on health policy formulation, implementation and the use of epidemiological tools in health policy analysis.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

BUS 656. Integrated Business Project. 1-6 Credit Hours.

The Integrated Project course (IP) requires students to formulate, develop and implement three business projects that address pressing organizational challenge, over the 17-month duration of the EMBA for the Americas. Students may work in teams or individually to develop actionable and valuable recommendations for their chosen organization and present project outcomes to faculty advisors during the February, June and October residencies. For students, IP provides an opportunity to augment and integrate knowledge of fundamental business concepts and tools learned in classroom settings. IP also offers opportunities to develop and test both critical thinking and leadership skills through practical experience with real business challenges.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 657. Optimizing Human Capital. 4 Credit Hours.

The 21st century workplace has often been characterized as the “Age of Intellectual Capital,” a time in which competitive advantage is linked intricately to optimizing human resources in distinctive ways. In this dynamic, global marketplace, Darwin rules. To survive, organizations must provide the best products, the best services with the best labor or risk extinction. Contextual factors including changing demographics; global social, economic, and regulatory issues; and technological innovations have created major challenges for organizational sustainability. In a recent publication based on survey results from 94 countries, talent acquisition, retention, management, and engagement were viewed as “urgent” global trends for the 21st century. Utilizing a variety of pedagogical approaches, this course will focus on the ways in which human capital can be leveraged to create sustainability as well as work environments that engage the minds and hearts of participants to achieve strategic initiatives.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BUS 658. Business Analytics. 4 Credit Hours.

One of the strengths of Business Analytics is its broad applicability. The skills learned in this module can be used in virtually any context of business, including but not limited to: finance, marketing, strategy, operations, logistics, transportation, health care, real estate, sports, manufacturing, etc. For that reason, rather than focusing on a single central theme, as do other modules in the MEMBAA program, the Business Analytics module touches on a variety of themes that illustrate its potential.

Components: LEC.

Grading: SUS.

Typically Offered: Fall & Spring.

BUS 660. High Performance Leadership. 4 Credit Hours.

The High Performance Leadership course was developed to help executives build a high-performance work environment and effectively operate in the multi-cultural environment of the Americas and the World. The course is divided into two parts. The first part, the inter-residency will concentrate on the facets of high-performance leadership. It will explore the fundamentals of leadership; investigate the major leadership theoretical concepts; explore a wide-range of leadership research; convey practical leadership implications; and share lessons in conquering self-leadership. This section will be taught online through readings, discussion boards, and case and leader analyses. The emphasis will be on building a sound grasp of good practice, and on developing the ability to apply such knowledge to actual business problems. The theories will be applied to specific situations. The second part of the course, the residency concentrates on the cross-cultural environment of the Americas (and global markets) and addresses four main topics. The first session focuses on Cross-Cultural Communication in Business and allows executives to understand culturally-specific communication patterns, negotiation styles, expectations, cues, and norms. The second session addresses Leadership Issues in Organizational Control and participants will explore ethical and moral dilemmas, and external communications by senior executives. The third session focusses on Cross Cultural Issues in Leadership and examines effective leadership across cultures. The final session addresses Guanxi and Doing Business in China. China is currently or will soon become the world's largest economy (PPP basis) and is increasingly becoming important to the Americas. This session addresses critical thinking, cultural understanding, solutions to problems, and evaluating different options when doing business with China.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 661. Enhancing Global Operations. 4 Credit Hours.

This course focusses on how to manage more complicated global networks; how to optimize service and quality levels of performance; and, how to minimize risks yet maintain required capacities. Operational transformation requires commitment and expertise in strategy and execution to achieve lasting improvements. This course draws on research and real world issues confronting manufacturing and service companies today, providing strategic frameworks to enable executives to make smart choices so that their firms can deliver the products and services they are committed to providing their customers.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 662. Decision Making in Global Environment. 4 Credit Hours.

This course provides students with a systematic way to carefully think about decisions to arrive at more informed choices while doing business globally and specifically in the Americas. The course covers structuring decisions, creating alternatives, making tradeoffs among conflicting objectives, accounting for uncertainties and risk tolerance, and analyzing and evaluating alternatives. The course is intended to make participants aware of decision making issues surrounding global business, the dynamic issues surrounding their context, and how these affect managerial strategy. An objective of the course is to increase participants' competence in managerial decision making related to globalization, institutions, incentives, corporate governance, regulation, business law, international finance and accounting, organizations and management (including culture), and international trade.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 663. Entrepreneurship and Innovation. 4 Credit Hours.

This course considers entrepreneurship and innovation within the Americas, together with a special emphasis on the Latin American context. The course covers the building blocks of the entrepreneurial process and pays special attention to the family business model where ownership is closely held. The objective of the course is to develop an understanding of the venture formulation process within the Americas and the processes that surround this. The topics of innovation; venture capital; venture formulation; human capital; market dynamics; technological readiness; role of government, regulation, and culture will be assessed. An objective of the course is to consider new models for venture design such as the agile model of development and the creation of the business canvases, a lean version of the traditional business plan.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 698. Selected Topics. 1-6 Credit Hours.

Topics in selected areas of business.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 801. Introduction to Commercial Real Estate: Analysis and Field Experience. 3 Credit Hours.

Students enrolled in the Accelerated MBA in Real Estate program are required to participate in a one-week, four module, on-campus class followed by a full-time internship at a local Commercial Real Estate Institution during the first summer of the program. Module I: Students are introduced to the complexities of commercial construction techniques used in South Florida and the important links between architectural plans and economic value to owners and tenants. Module II: Students are introduced to the terminology and financial analysis of commercial real estate. Module III: Students are introduced to the application of real estate finance and valuation principles using ARGUS Valuation – DCF. Module IV: Students participate in a required internship at a local Commercial Real Estate Institution. Regarded as a full-time student.

Components: THI.

Grading: GRD.

Typically Offered: Summer.

BUS 802. Commercial Real Estate Field Experience. 3 Credit Hours.

Students enrolled in the Accelerated MBA in Real Estate program are required to participate in a full-time internship at a local Commercial Real Estate Institution during the first fall semester of the program. This internship is subsequent to their previous summer internship (BUS 700). Regarded as a full-time student.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

Business Law (BSL)

BSL 212. Introduction to Business Law. 3 Credit Hours.

Introduction to business law and ethics for the undergraduate student. Topics include business ethics, contracts (the nature and requisites, formation, interpretation, performance and breach, and remedies), and sales (Uniform Commercial Code, Convention on the International Sale of Goods, transfer of title, warranties, and rights and remedies of buyers and sellers).

Requisite: Business School or Business Law minor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BSL 304. Corporate Law. 3 Credit Hours.

Introduction to the law and regulation of corporations and other business entities. Topics include: tort and other business liabilities, agency and fiduciary duty, partnerships, limited liability companies, corporations (including the legal relationships underpinning their financial structure, director and officer liability, and laws relative to change of control), securities regulation, and antitrust law.

Prerequisite: BSL 212 or equivalent or BUS 202.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BSL 305. Legal and Social Aspects of Business Regulation. 3 Credit Hours.

An introduction to the legal and ethical issues arising out of business and the regulatory environment. Topics include business ethics and subjects as environmental law antitrust, securities, administrative process, consumer protection, and employment regulation.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BSL 306. Introduction to Corporate Sustainability. 3 Credit Hours.

This course introduces students to issues associated with business and sustainability, through the lens of corporate governance and corporate citizenship. Readings, lectures, class discussion, and student projects are designed to instill in students a practical understanding of key corporate sustainability frameworks, challenges and opportunities, institutions, and actors in the global corporate context. Students will learn to apply alternative decision making models to current business activities. BSL 304 recommended as a prerequisite, but not required.

Requisite: Sophomore Standing or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BSL 324. Negotiation. 3 Credit Hours.

This experiential course is designed to introduce undergraduate business students to the theory and practice of negotiation. The lectures and readings will discuss negotiation theory, equipping students with the concepts and terminology to prepare and execute value-creating, interest-based negotiations. Negotiation exercises will provide the student with an opportunity to apply the theoretical elements of the course in live, simulated negotiations. Extensive review of these simulated negotiations through classroom discussion and film analysis will assist students in cementing their understanding of the use of negotiation theory in practice. Although negotiation theory is applicable to a wide variety of academic contexts, this course focuses on negotiations in the practice of law and business.

Requisite: Business School or Business Law minor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BSL 333. Legal Aspects of Real Estate Transactions. 3 Credit Hours.

Legal principles controlling the acquisition, ownership, financing, and development of real property. Topics include nature and acquisition of rights in real property, theory of estates, co-ownership, fixtures, easements, legal descriptions, evidence of title, title insurance, deeds, mortgages, closing the sales and mortgage transactions, condominiums and cooperatives, brokers, and land use.

Prerequisite: BSL 212 or equivalent or BUS 202.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BSL 401. The Law of Financial Transactions. 3 Credit Hours.

Overview of the law of commercial finance as it relates to existing and emergent payment systems, secured credit, and bankruptcy. Topics include: negotiable instruments, bank deposits and collections, secured transactions, personal and commercial bankruptcies, and accountant liability.

Prerequisite: BSL 212 or equivalent or BUS 202.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BSL 412. International Business Law. 3 Credit Hours.

International law and organizations, international sales, credits and commercial transactions, U.S. trade law, and the regulation of the international market place are discussed.

Prerequisite: BSL 212 or equivalent or BUS 202.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BSL 424. Intellectual Property Law. 3 Credit Hours.

This course is designed to acquaint the business student with the general framework of laws that regulate innovation, marketing, competition, and business development in the U.S. Special emphasis will be placed on discussion of ethical issues in information property, unfair competition, and management of intellectual property across various industries.

Prerequisite: BSL 212 or equivalent or BUS 202.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BSL 435. Law of Entrepreneurship. 3 Credit Hours.

Overview of the legal aspects of entrepreneurship and business management. Special emphasis on entity formation, intellectual property protection, capital formation, securities, tax planning, and risk management.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BSL 460. Health Care Law and Ethics. 3 Credit Hours.

This course is designed to offer students an appreciation of the legal foundations and ethical considerations in healthcare administration in the U.S. The readings and classroom discussion assist the student in (1) understanding the legal framework of relationships and institutions in healthcare, and (2) appreciating some of the particularly delicate ethical implications of decision-making in this field. Case study will promote the ability to analyze both. Special emphasis is placed on discussion of ethical issues in healthcare administration, including access to care, allocation of scarce resources and privacy.

Prerequisite: BSL 212 or equivalent or BUS 202 AND Business School or Business Law minor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BSL 476. The Law of Risk. 3 Credit Hours.

This course offering will analyze risk in business and examine the tools that the law offers to identify danger and risk in the workplace and shift and minimize potential losses. This highly interactive course will first examine the various sources of legal risk, from criminal liability to employment discrimination to personal injury claims and toxic tort exposures. It will then examine the ways business and law pool, shift, and minimize risk. This seminar-style course will also include a significant experiential, hands-on component. Students will also practice contract construction and interpretation in a workshop environment.

Prerequisite: BSL 212 or equivalent or BUS 202.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BSL 485. Managing the Legal Factor. 3 Credit Hours.

This course offers the business manager a frank and analytical view of law and legal practice as they affect business decision-making. It addresses both the issues of cost containment and relationships between counsel and the company with the objective of achieving a more effective management of the legal function in business.

Prerequisite: BSL 212 or equivalent AND Requisite: Senior Status and Legal Studies major or Business Law minor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BSL 496. Directed Studies in Business Law. 1-3 Credit Hours.

Supervised readings, individual research project, or independent investigation of selected non-STEM related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.

Components: THE.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BSL 497. Directed Studies in Business Law. 1-3 Credit Hours.

Supervised readings, individual research project or independent investigation of selected STEM-related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BSL 498. Special Topics in Business Law. 3 Credit Hours.

Special topics in selected non-STEM areas of Business Law.

Requisite: Sophomore Standing or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BSL 499. Special Topics in Business Law. 3 Credit Hours.

Special topics in selected STEM areas of Business Law.

Requisite: Sophomore Standing or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BSL 555. Business Law Departmental Honors Research Project.. 3 Credit Hours.

Research project to fulfill requirements for Departmental Honors in Business Law.

Components: THI.

Grading: SUS.

Typically Offered: Offered by Announcement Only.

BSL 612. Legal Aspects of International Business. 3 Credit Hours.

International legal framework, transactional legal issues in finance, marketing, management, distribution, and a review of theory and practice of negotiations. Case studies on such topics as legal implications of GATT, European Competition, C.I.S.G., and Export Import Rules are also included.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BSL 624. Negotiation: Theory and Practice. 2-3 Credit Hours.

This experiential course is designed to introduce graduate business students to the theory and practice of negotiation. The lectures and readings will discuss negotiation theory, equipping students with the concepts and terminology to prepare and execute value-creating, interest-based negotiations. Negotiation exercises will provide the student with an opportunity to apply the theoretical elements of the course in live, simulated negotiations. Extensive review of these simulated negotiations through classroom discussion and film analysis will assist students in cementing their understanding of the use of negotiation theory in practice. Although negotiation theory is applicable to a wide variety of academic contexts, this course focuses on negotiations in the practice of law and business.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BSL 675. Advanced Business Law. 2 Credit Hours.

Advanced Business Law focuses on the following substantive subject areas commonly encountered by Certified Public Accountants and tested on the Uniform Certified Public Accountancy Examination: business ethics, contracts (including formation, performance, breach, and remedies), commercial transactions under UCC Article 2, commercial paper, agency principles, and secured transactions. Special attention is given to the areas tested on Regulation section of the Uniform CPA Exam.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BSL 685. Legal Aspects of Health Administration. 2-3 Credit Hours.

Derivation of rule of law governing health providers, vicarious liability of administrative and medical personnel, informed consent, and other related problems are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BSL 690. Legal and Ethical Implications of Business Decision Making. 2 Credit Hours.

The course provides an introduction to our legal and governmental regulatory system, as well as a review of constitutional considerations for businesses. Morality and ethics are defined and distinguished. Applied philosophy is then introduced, to give the student a foundation upon which to analyze the ethical dimensions of common business questions. The relationship between the letter and the spirit of the law is examined. Specific business topics and their legal and ethical aspects are then addressed. This includes, but is not limited to, discussion of the following areas:

consumer relationships; business organizations; the balancing of corporate vs. individual power (employee rights and responsibilities, employment discrimination); and the emerging ethic of a global economy.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BSL 691. The Public Corporation: Legal Perspectives. 2 Credit Hours.

The Public Corporation: Legal Perspectives reviews the laws governing the formation, operation, regulation, and governance of the public corporation with the objective of providing the graduate business student a sophisticated examination of the legal and social aspects of managing the money of others. Further, the course examines the rules and regulations governing the raising of capital from the public through the sale of securities for the development of and investment in a private enterprise.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BSL 692. Legal Implications of International Business Transactions. 2 Credit Hours.

International legal framework, transactional legal issues in finance, marketing, management, and distribution. Case studies in substantive international legal topics such as international sales contracts, international documentary sale, international terms of trade, legal implications and substantive rules governing international finance, collections, payments, and letter of credit, the resolution of international disputes with a particular emphasis and examination upon the management of litigation, enforcement of foreign judgments, and alternative dispute resolution are also included.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BSL 694. Real Estate Law. 2 Credit Hours.

Real Estate Law focuses on the U.S. legal system as it relates to the buying, selling, and financing of real property. In addition to traditional text material, the analysis of U.S. court cases is used to detail the legal factors of ownership rights and liabilities, specific interests in real property, contracting issues related to the purchase and sale of real property, as well as financing and closing the real estate transaction. The course provides a problem-solving experience, which is intended to develop graduate students' critical thinking process as well as their skills in oral and written communication.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BSL 695. Legal Implications in Executive Decision Making. 3 Credit Hours.

Law and legal process are examined as they mix with the politics and ethics of business, including the weight given to legal implications in the executive decision-making process.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BSL 696. Legal and Ethical Implications in Executive Decision Making. 3 Credit Hours.

Business and public administration cases requiring identification of the legal, ethical, and social elements as well as the determination of the weight such elements should have in setting policy are discussed. Integration of law and ethics with public and business administration is also included.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BSL 698. Selected Topics. 1-3 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

Business Technology (BTE)

BTE 120. Introduction to Business Technology and Programming. 3 Credit Hours.

This Course covers the fundamentals of technology focusing on programming logic and structured programming principles including problem solving, algorithm design, and program development using Python. The course introduces the student to object-oriented programming through a study of the concepts of program specification and design, algorithm development, and coding and testing using a modern software development environment. Students learn how to write programs in an object-oriented high-level programming language (Python). Topics covered include fundamentals of algorithms, flowcharts, problem solving, programming concepts, classes and methods, control structures, arrays, and strings, data structures and object oriented programming. Throughout the semester, problem-solving skills will be stressed and applied to solving computing problems. Weekly assignments will provide hands-on experience in topics covered in this course.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 210. Fundamentals of Business Technology and Innovation. 3 Credit Hours.

This course covers the fundamental technologies used in business today. Topics include information technology platforms; enterprise technology concepts; network infrastructure; enterprise resource planning; information security; technology architectures; internet; cloud, mobile, and web platforms; analytical technologies; business intelligence; expert systems, and Big Data. Students work on an innovation project to create a specification/business canvas for a new technology product.

Requisite: Business School.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BTE 320. Introduction to Programming. 3 Credit Hours.

This course covers the fundamentals of programming logic and structured programming principles—including problem solving, algorithm design, and program development—using a high level programming language. Topics covered include fundamentals of algorithms, flowcharts, problem solving, programming concepts, classes and methods, control structures, arrays, and strings, pointers, and data structures.

Requisite: Miami Business School or BTE Minor or CSC Major or Minor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BTE 324. Object-Oriented Programming. 3 Credit Hours.

This course introduces the concepts and fundamental techniques of object-oriented programming. Topics include: data abstraction, encapsulation, inheritance, polymorphism, class library, graphics/GUI, exception handling, multithreading, multimedia, files and streams, Internet applets, application development, integrated development environment, interactive program debugging and the eXtensible Markup Language (XML).

Prerequisite: BTE 320 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BTE 360. Systems Analysis and Design. 3 Credit Hours.

This course introduces the techniques of systems analysis and design. Topics include: the Software Development Life Cycle (SDLC), Agile Programming, Extreme Programming, lean software development, Universal Modeling Language (UML), requirements modeling, data modeling, user interface design, data design, normalization, systems architectures, implementation methods, and testing methodologies.

Prerequisite: BTE 320 or CSC 120 or ECE 118 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BTE 361. Design of Information Systems. 3 Credit Hours.

Continuation of BTE 360. Topics include concepts, tools, and techniques of systems design, prototyping, file/database design, and physical process modeling. Students work in groups to design an application system for a business related problem.

Prerequisite: BTE 360.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 389. Launching HighTechnology Ventures. 3 Credit Hours.

This course develops an understanding of the entrepreneurial processes as they apply to new technology ventures. Topics include: venture formation, venture and angle investments, innovation and creativity, business plan creation, human capital, ethics, and intellectual property.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BTE 400. Web-Mobile-Cloud. 3 Credit Hours.

This course introduces the basics of the cloud computing paradigm and examines how to implement different algorithms for different web and mobile applications in the cloud. The course covers the principles, systems, and applications of cloud computing that integrate web applications, smart phones, and tablets with cloud computing infrastructure. The student will be introduced to the basics of Infrastructure, Platform, and Software as a Service (IaaS/PaaS/SaaS), as well as to cloud platforms such as Google App Engine, Microsoft Azure, and Amazon Web Services (AWS).

Prerequisite: BTE 320.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BTE 401. Computers in an Inter-Networked Society. 3 Credit Hours.

This course provides students with fundamental knowledge of the technology and tools that integrate big data, cloud, and mobile computing within a business and social context. Students will study these technologies and their impact on socioeconomic, political, organizational, and personal environments. The course covers the cultural components of a social media society and examines the systems and processes that need to be developed for effective management of that environment.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 412. Foundations of Business Enterprise Technologies. 3 Credit Hours.

This course provides an understanding of the foundations of enterprise technologies. Topics include: making the business case for technology, distributed architectures, customer relationship management systems (CRM), enterprise resource planning systems (ERP), requirements modeling and design for enterprise systems, software development and outsourcing for the enterprise, enterprise productivity technologies (RFID, internet of things, machine data), 3D-design technologies, cloud technologies, and technologies for the global enterprise.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BTE 413. Big Data Strategy. 3 Credit Hours.

This course provides an introduction to the area of business intelligence termed Big Data. The concepts of high volume, velocity, and variety data are examined. The course examines how big data can be used to create business intelligence strategies in the areas of marketing, product development, systems deployment, and innovation. The course utilizes business intelligence software and Structured Query Languages (SQL) to analyze data. Other Big Data topics covered include the ethics, security, streaming data, sourcing, emergent technologies, and international data regulations.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BTE 417. Fundamentals of Tech Project Management. 3 Credit Hours.

This course is designed to provide the fundamental project management knowledge necessary for a business manager, consultant, project manager, IT professional, and/or team member to successfully initiate and plan IT and other business projects. It is structured to provide principles, methodology, and practical information through a combination of lectures, group collaboration and hands-on exercises. Emphasis is placed on the importance of standardization and best practices as defined by the PMI's Project Management Body-of-Knowledge (PMBOK®).

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BTE 420. Analysis of Information Systems. 3 Credit Hours.

Overview of the systems development life cycle (SDLC). Topics include concepts, tools, and techniques of systems analysis; data modeling; process modeling; CA SE tools; and the role of the systems analyst in the organization. Students will work in groups to analyze an application system for a business related problem. Prerequisite: Knowledge of a high level programming language.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 421. Design of Information Systems. 3 Credit Hours.

Continuation of BTE 420. Topics include concepts, tools, and techniques of systems design; prototyping; file/database design; and physical process modeling. Students will work in groups to design an application system for a business related problem.

Prerequisite: BTE 420.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 423. Database Management Systems. 3 Credit Hours.

This course covers the foundations of database management systems (DBMS). Topics include: database systems design, SQL, the relational model, entity-relationship modeling, distributed DBMS, object DBMS, web technology and DBMS, semi-structured data, XML, business intelligence, data warehousing, data warehousing design, introduction to OLAP, and a brief overview of data mining. Students will engage in hands-on exercises for the design and implementation of database business applications.

Prerequisite: BTE 320.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BTE 430. Business Networks. 3 Credit Hours.

In this course, students will learn the underlying concepts and technologies in the field of business networks with specific focus on their applications in businesses. Topics covered include: network types, networking standards, protocols, and architectures; the characteristics of physical and logical networking components and technologies; the security issues that affect network systems and their implications on business applications; the technical and organizational issues concerning wireless networks; emerging networking technologies and software tools for designing and troubleshooting various aspects of networks.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 450. Introduction to Health Informatics. 3 Credit Hours.

The course develops an understanding of the role of information systems and technology within a healthcare organization. It examines the business and technical issues associated with the selection, deployment and use of health informatics, both in the clinical and back office areas. Health informatics, for the purpose of the course, is defined as the convergence of information technology, information management, and health care, at various levels, ranging from simple data gathering, to the design and implementation of new health care information systems.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BTE 465. Web Application Development. 3 Credit Hours.

This course will explore Internet and mobile application development methodologies. Topics include: HTML 5, CSS3, scripting languages (JavaScript); jQuery, AJAX, web services, Web Servers (IIS and Apache) and relational databases (MySQL/Apache Derby/Java DB)—all the skills and tools needed to create dynamic Web-based and mobile applications. The coverage will be both on the client side and the server side of Web-based applications, and the course will provide instruction on building rich Internet applications that enhance the presentation of online content and give web applications the look and feel of desktop applications. Students in the course will build Web-based, client/server, database-intensive, multi-tier, and mobile business applications.

Prerequisite: BTE 320.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 496. Directed Studies in Business Technology. 1-3 Credit Hours.

Supervised readings, individual research project, or independent investigation of selected non-STEM related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 497. Directed Studies in Business Technology. 1-3 Credit Hours.

Supervised readings, individual research project, or independent investigation of selected STEM related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 498. Special Topics in Business Technology. 3 Credit Hours.

Special topics in selected non-STEM areas of Business Technology.

Requisite: Sophomore Standing or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 499. Special Topics in Business Technology. 3 Credit Hours.

Special topics in selected STEM areas of Business Technology.

Requisite: Sophomore Standing or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 523. Big Data Development. 3 Credit Hours.

This course covers foundational techniques and tools required for data science and big data analytics. The course delivers a thorough overview of and hands-on experience with Big Data technologies, including: Hadoop, Mapreduce, Association rules, Large scale supervised machine learning, Data streams, Clustering, NoSQL systems (Cadenra, Pig, Hive), and applications, including recommendation systems, Web, and security. Students will also examine current research and publications in Data Science/Big Data Analytics, with emphasis on systems and algorithms for large-scale advanced data analysis.

Prerequisite: BTE 320.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 524. Mobile Apps Development. 3 Credit Hours.

This course covers the fundamentals of programming logic and structured programming principles—including problem solving, algorithm design, and program development for mobile environments—with a focus the Android Platform. The course introduces the requirements and methodologies for developing dedicated and client-server applications that target smartphones, tablet computers, and other mobile devices. Topics include: memory management, communications, power systems, APIs, and among others. The techniques studied are applicable to and can be transitioned to the iOS or Windows 8 platforms.

Prerequisite: BTE 320 and BTE 324.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 535. Information Security. 3 Credit Hours.

This course introduces the principles of computer security. Information is an important strategic and operational corporate asset that needs to be protected from data breaches. This course investigates some of the security measures that can be employed to safeguard information and explores some of the tools and techniques used in designing these measures. Students will examine how system designs, network protocols, and software engineering practices can result in vulnerabilities. They will also explore how to detect and mitigate vulnerabilities in existing systems and, so, how to design and implement better future systems. Additional topics include ethical hacking, social engineering strategies, and other approaches to managing vulnerabilities.

Prerequisite: BTE 320.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 550. Business Technology Internship. 1-3 Credit Hours.

Student is individually assigned to operating business firm or other organization to gain insight in information technology practice in the area of career interest. Periodic reports and conferences are required.

Components: THI.

Grading: SUS.

Typically Offered: Offered by Announcement Only.

BTE 555. Business Technology Departmental Honors Research Project. 3 Credit Hours.

Research project to fulfill requirements for Departmental Honors in Business Technology.

Components: THI.

Grading: SUS.

Typically Offered: Offered by Announcement Only.

BTE 565. Mobile to Cloud: Developing Distributed Applications. 3 Credit Hours.

This course introduces students to the basics of the emerging cloud computing paradigm. It also examines how to implement different algorithms for different applications in the cloud and how to deploy mobile applications in the cloud. The course covers the principles, systems, and applications of mobile cloud computing that integrates smart phones and tablets with virtualized distributed computing infrastructure. Students will learn the fundamentals of a variety of systems such as virtual machines, the principles and practices of client/server architectures, the concepts and practices of Infrastructure, Platform, and Software as a Service (IaaS/PaaS/SaaS), cloud platforms such as Google App Engine, Microsoft Azure, and Amazon Web Services(AWS), as well as security issues.

Prerequisite: BTE 320 and BTE 324.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 571. AI Programming for Business Management. 3 Credit Hours.

Overview of AI programming languages and technologies. Topics include: Functional Programming, Logical Programming, Software methodologies for development of AI systems and software.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 601. Programming for Distributed Systems. 2 Credit Hours.

This course covers the fundamentals of programming logic and structured programming principles including problem solving, algorithm design, and program development using Python. The course introduces the student to object-oriented programming through a study of the concepts of program specification and design, algorithm development, and coding and testing using a modern software development environment. Students learn how to write programs in an object-oriented high-level programming language Python. Topics covered include fundamentals of algorithms, flowcharts, problem solving, programming concepts, classes and methods, control structures, strings, and data structures. Throughout the semester, problem solving skills will be stressed and applied to solving computing problems. Weekly assignments will provide hands-on experience in topics covered in this course.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BTE 610. Foundations of Management Information Systems. 2 Credit Hours.

Course is designed to provide the foundations in management information systems information systems required to understand and effectively use an enterprise wide information system. Topics include the role of the CIO, managing Information Technology (IT) as a strategic resource, business process reengineering, IT planning, IT governance and communication, the Internet, and eBusiness.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BTE 612. Enterprise Technologies. 2 Credit Hours.

Course addresses the needs of business students who wish to expand their understanding of information technology fundamentals. Focusing upon their use in today's enterprises, the course aims to provide students with knowledge of a variety of technological concepts commonly used in the IT Organization's systems development initiatives and enables students to understand the implications of deploying such technologies within the enterprise.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 613. Business Intelligence Technologies. 2 Credit Hours.

Course facilitates business decision makers in their understanding of data analysis tools that operate over data warehouses and 'data marts' more commonly referred to as Business Intelligence. Course focuses upon using technologies to drive effective data driven decision making through effective mining of corporate data warehouses, thus improving operational efficiency and ultimately increasing profitability. Students are exposed to the concepts, analysis techniques, data cubes, and manipulation of information extracted from a data warehouse that enables the formulation and execution of business strategies. Data analysis case studies are used to reinforce students' understanding and strategic use of results to accomplish business objectives.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 617. Information Technology Project Management. 2 Credit Hours.

Course covers the identification and development of information technology plans for projects supporting the organization's business objectives and all activities required in the initiating, planning, executing, controlling, and closing phases of the project's lifecycle. Course is intended to provide the body of knowledge and best practices necessary for a new Consultant, Business Analyst or Project Manager to successfully perform his/her responsibilities on a wide variety of IT enterprise projects.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BTE 620. Database Development for High Performance Computing. 2 Credit Hours.

Course enables software developers to understand the fundamental database concepts, practice, and emerging trends in relational database design and implementation for high performance computing. Formal query languages are covered including SQL, No SQL and relational object-orientated databases are examined. Other topics include database performance tuning and query optimization, distributed database systems, administration and security.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BTE 621. Management Information Systems. 3 Credit Hours.

Course is designed to give prospective managers a foundation in MIS sufficient to understand and effectively use information systems. Topics include types of information systems, role of MIS in organizations, CIO issues, ERP systems, and electronic commerce.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 622. High Performance Computing. 2 Credit Hours.

The course is designed to introduce HPC and Big Data Compute environments. Topics include: Cloud concepts, container concepts, distributed file systems, dockers, fundamentals of the ETL process, introduction to the Hadoop environment, Pig, Hive and JAQL, BigSQL, and SQL.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BTE 623. Database Management Systems. 3 Credit Hours.

Course covers the fundamental concepts of database management systems using the Oracle DBMS. Topics include database theory and terminology, logical modeling, normalization, SQL language, database design and implementation, database administration, data security, database transaction/concurrency, and data backup.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BTE 624. Mobile Apps Development. 3 Credit Hours.

The course covers the programming languages associated with the iPhone application. Topics include the development platform, the libraries used, memory management, communication and power systems, APIs and tools associated with application development for the mobile environment.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BTE 630. Fundamentals of Local and Wide Area Networks. 3 Credit Hours.

Course provides the graduate student the necessary knowledge to understand the design, integration, technologies, and services of local and wide area networks (LANs and WANs) in the business environment. Topics include signal transmission and propagation, standards and protocols, data communications media and devices, layered/encapsulated communications based on the hybrid TCP/IP-OSI standards, small and large-site PC LANs, Frame Relay, ATM, Virtual Private Networking (VPN), Telephony, Internet technologies, and network security.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 631. Computer and Network Security. 3 Credit Hours.

Protection of computers and networks against unauthorized access, access control, encryption, firewalls, proxy, digital certificates, and software security are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 635. Comp Communication Security. 3 Credit Hours.

The course covers technical and managerial aspects associated with the deployment of mobile communication platforms such as phones and tablets. The course investigates and introduces some of the security measures that can be employed to safeguard these devices and explores some of the tools used in designing these measures. Topics includes: Ethical Hacking, social engineering strategies, and other approaches to managing these vulnerabilities.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BTE 640. Data Communications and Networking. 3 Credit Hours.

Course addresses advanced topics in computer networks from the perspective of a business decision-maker. The course begins with a focus on signal propagation, media characteristics, and digital and analog encoding techniques. It continues with a study of datalink, network, and transport layer functions as defined by the OSI and TCP/IP models. The architecture of the Internet is explored and routing algorithms for wired, wireless, and peer-to-peer networks are introduced. Course concludes with a high-level overview of the top OSI layers. After taking the class the students should be able to critically evaluate network solutions based on the capabilities and limitations of the equipment.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 646. IT Planning and Project Management. 3 Credit Hours.

Course covers the development of information technology strategic and tactical plans for projects supporting the organization's business objectives and project management as applied to planning, implementing, controlling networking, information systems and e-commerce projects. Course is intended to provide a body of knowledge necessary for a new Consultant or Project Manager to successfully initiate, plan, manage, control, and report on a variety of project types. People skills required in the areas of team selection, structure, conflict resolution, and leadership is also covered.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 650. Introduction to Health Informatics. 3 Credit Hours.

The course develops an understanding of the role of information systems and technology within a healthcare organization. It examines the business and technical issues associated with the selection, deployment and use of health informatics, both in the clinical and back office areas. Health informatics, for the purpose of the course, is defined as the convergence of information technology, information management, and health care, at various levels, ranging from simple data gathering, to the design and implementation of new health care information systems.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BTE 665. Applied Software Project Development. 3 Credit Hours.

Advanced concepts and techniques in application project development. Topics include project management, program testing, documentation, application installation, and application maintenance. Students will work on a group project to sharpen their implementation skills. Prerequisite: CIS 223 or 226 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BTE 680. Topics in Business Technology. 3 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 682. Topics in Business Technology. 3 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 684. Topics in Business Technology. 3 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 685. Topics in Business Technology. 3 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 686. Topics in Business Technology. 3 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 687. Topics in Business Technology. 3 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 688. Topics in Business Technology. 3 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 689. Topics in Business Technology. 1-3 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 690. Directed Study in Business Technology. 1-3 Credit Hours.

Investigation and research in special areas of interest. Offered by special arrangement.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 691. Directed Study in Business Technology. 1-3 Credit Hours.

Investigation and research in special areas of interest. Offered by special arrangement.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 699. Directed Study in Business Technology. 1-3 Credit Hours.

Offered by special arrangement.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

Cancer Biology (CAB)

CAB 701. CAB Student Seminar. 1 Credit Hour.

This course (required of 2nd and 3rd year students) offers instruction on the fundamental elements of scientific speaking. The ability to communicate effectively is essential for scientists. All CAB students are required to present their research each year as a 25 min (2nd year students) or 55 min seminar (3rd year and above). Students who are 4th year+ give seminars but are not enrolled.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CAB 705. Translational to Clinical Research. 1.00 Credit Hour.

Beginning in the fall of their second year, students participate in "Translational to Clinical Research", which spans years two through four of the program. Students are introduced to clinical trials, pathology reviews, tumor boards, the protocol review process and have an opportunity to interact with physicians who care for cancer patients and conduct clinical trials. The student's Physician Mentor advises and directs the student in the most relevant activities to attend and discusses the student's experience with them every semester. Students are required to attend 2 meetings each semester for a total of 12 meetings in addition to discussion with their Physician Mentors. A short written report of each review meeting of the student's experience is required. Didactic seminars are not accepted.

Components: DIS.

Grading: SUS.

Typically Offered: Fall.

CAB 710. Cancer Biochemistry and Molecular Biology. 3 Credit Hours.

This is an entry-level lecture course designed to introduce students to the major concepts and principles of cell growth deregulation in cancer with a major emphasis on molecular mechanisms. Topics include: oncogenes, tumor suppressors, mechanisms of uncontrolled cell growth, receptors and intracellular signal transduction pathways.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAB 712. Special Topics in Cancer Research - Viral Oncology and Tumor Immunology Module. 2 Credit Hours.

This module emphasized state of the art knowledge of each discipline, student participation in a problem based learning context. Topics include viral carcinogenesis and epidemiology, Hepatitis, Herpes, Epstein Barr and Human Papilloma Viruses, Kaposi's Sarcoma, viral induced lymphomas, viral oncolysis, and mechanisms of anti-tumor immunity.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAB 713. Special Topics in Cancer Research - Molecular Cancer Therapeutics Module. 2 Credit Hours.

This module explores the signal transduction pathways critical for cancer cell proliferation and survival that may provide new therapeutic targets, approaches for identification and validation of molecular targets within these pathways. Students are introduced to the strategies used in the discovery and design of biological and drug based therapies, and the implementation of clinical trials.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAB 714. Cancer Epidemiology, Prevention and Biobehavioral Oncology. 2 Credit Hours.

The overall philosophy of this module is to introduce students to the basic principles of biobehavioral oncology and cancer epidemiology and cancer prevention and control. The course will explore cancer epidemiology approaches used to identify the molecular and genetic mechanisms of cancer risk and progression and how these are used to develop predictive models in treatment response. Methods for identifying social, environmental, and biological reasons for cancer disparities among different populations will also be covered. Sections on bio-behavioral oncology include: health behavior change processes in persons at risk for and diagnosed with cancer; methods to improve adaptation to cancer diagnosis and treatment, psychosocial intervention research techniques and bio-behavioral processes explaining their effects on health and quality of life (QOL), translation of behavioral and psychosocial intervention to the community, symptom/treatment side effects management approaches, predictors of late effects of cancer treatment and development of preventative interventions.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAB 715. Special Topics in Cancer Research - Breast and Genitourinary Cancers Module. 2 Credit Hours.

This module highlights key aspects of the cellular and molecular mechanisms of breast, prostate, renal and bladder cancers as well as providing an overview of cancer detection, diagnosis, and therapy. Emerging research opportunities are identified. Topics include estrogen receptor and androgen receptor signaling, cancer progression, endocrine therapies and resistance. Key signaling pathways and the biology of metastasis will be discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAB 720. Dialogues with Cancer Clinicians (PIBS Module). 1 Credit Hour.

This module features physician mentors of the Cancer Biology Graduate Program who will discuss clinical aspects of cancer treatment with an emphasis on continuity of care of newly diagnosed patients between disciplines and will articulate unmet clinical needs and research. Mentors will provide clinical perspectives on their areas of specialization as it relates to patient care including diagnosis, staging, therapy, and outcomes.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAB 731. Special Work. 1-3 Credit Hours.

Independent, faculty assigned study.

Components: IND.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

CAB 750. Logic and Reasoning in Translational Cancer Research: Bench to Bedside Part 1. 3 Credit Hours.

An important facet of the Cancer Biology Ph.D. Program is the training of students in the interrelationships between basic research and clinical medicine, i.e., translational research. The goal of this advanced course is to expose students to the scientific reasoning and logic underlying problem solving in clinical cancer research. This course is designed to help students integrate information and develop the thought processes necessary to critically evaluate information in the literature and experimental approaches, conceptualize problems in the field and identify areas for scientific exploration. Students learn how the knowledge obtained from basic research laboratories is applied to clinical problems including prevention, diagnosis, prognosis, and therapeutic treatment of cancer. Specific examples of translational research, i.e., laboratory to clinic are emphasized. Students also learn the key role of clinical observation in identifying basic research problems.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAB 810. Master's Thesis. 1-6 Credit Hours.

The student working on his/her Master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

CAB 820. Master's Research in Residence. 1 Credit Hour.

Students must be registered in the semester they plan to defend. Used to establish research in residence for the Master's degree, after the student has been enrolled for the permissible cumulative total in appropriate Master's research. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

CAB 830. Dissertation Research - Pre Candidacy. 2 Credit Hours.

Required of all candidates for the Ph.D. The student will enroll for credits as determined by the Office of Graduate Studies but not less than a total of 24. Not more than six in the summer. If a student has a) passed qualifying exam(s) and (b) is engaged in an assistantship, he/she may still take the maximum allowable credits.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

CAB 840. Doctoral Dissertation- Post Candidacy. 1-12 Credit Hours.

Required for all Ph.D. candidates. Grade will remain IP until student dissertation is accepted by Graduate School.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

CAB 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit is not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Chemistry (CHM)

CHM 099. Preparatory Chemistry I. 3 Credit Hours.

A description of atoms and periodicity, structure of the atom, atomic orbital, the Aufbau principle, combining atoms to make molecules, bonding-covalent and ionic. Naming compounds and compound ions. Writing balanced chemical equations. Empirical and molecular formulas. Stoichiometry. Limiting Reactants. Yields. Percent Yields. Percent Composition.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CHM 101. Chemistry and Society. 3 Credit Hours.

The basic principles of chemistry for the non-science major with an emphasis on understanding the chemistry of the world around us, especially as it pertains to the choices we make as consumers and as a society. Integrated themes include energy, the environment, food and nutrition, health and personal care, and other contemporary societal issues.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CHM 102. Fundamentals of Chemistry II. 3 Credit Hours.

A continuation of Chemistry 101.

Prerequisite: CHM 101.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 103. Chemistry for Life Sciences I (Lecture). 3 Credit Hours.

Essentials of inorganic chemistry as it applies to biological systems. Designed for (but not limited to) those planning health-related careers. Lecture, 3 hours.

Corequisite: CHM 105.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CHM 104. Chemistry for Life Sciences II (Lecture). 3 Credit Hours.

A continuation of CHM 103, with emphasis on organic and biological chemistry, including biochemical processes and metabolism. Lecture, 3 hours.

Prerequisite: CHM 103.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CHM 105. Chemistry for Life Sciences I (Laboratory). 1 Credit Hour.

Designed for those students in CHM 103 requiring a laboratory course. Laboratory, 3 hours.

Pre/Corequisite: CHM 103.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

CHM 106. Chemistry for Life Sciences II (Laboratory). 1 Credit Hour.

Designed for those students in CHM 104 requiring a laboratory course. Laboratory, 3 hours.

Pre/Corequisite: CHM 104.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

CHM 110. Chemical Problem Solving. 3 Credit Hours.

Chemical problem solving strategies to prepare students for more advanced studies in the sciences. Focusing on basic concepts in chemistry, chemical problem solving, and mathematical preparation for future studies.

Components: LEC.

Grading: GRD.

CHM 111. Principles of Chemistry I. 3 Credit Hours.

Fundamental principles of chemical science.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CHM 112. Principles of Chemistry II. 3 Credit Hours.

Continuation of CHM 111. Lecture, 3 hours.

Prerequisite: CHM 111.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CHM 113. Chemistry Laboratory I. 1 Credit Hour.

Laboratory techniques of chemistry. To accompany CHM 111. Laboratory, 3 hours.

Corequisite: CHM 111 or CHM 121.

Components: LAB.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CHM 114. Chemistry Laboratory II. 1 Credit Hour.

Continuation of CHM 113. Intermediate laboratory techniques and quantitative analysis. To accompany CHM 112. Laboratory, 3 hours.

Corequisite: CHM 112. or CHM 221.

Components: LAB.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CHM 121. Chemistry for the Biosciences I. 4 Credit Hours.

This is the first course in a three course sequence designed to meet the needs of Life Science students interested in pursuing professional education in the health sciences. Topics to be covered in this course include: basic atomic structure, reaction stoichiometry, gases, chemical equilibrium, acids and bases, thermodynamics, and chemical kinetics. Co-registration with a separate recitation section is required.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CHM 151. Chemistry for Engineers. 3 Credit Hours.

Fundamental principles of chemistry for engineering students. Not recommended for students that plan to enter Medical School. Lecture, 3 hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CHM 153. Chemistry Laboratory for Engineers. 1 Credit Hour.

An introductory laboratory course to accompany CHM 151. The techniques of chemistry for engineering students.

Pre/Corequisite: CHM 151.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

CHM 201. Organic Chemistry I (Lecture). 3 Credit Hours.

The chemistry of carbon compounds. Required of chemistry majors, and premedical students; recommended for majors in life sciences. Lecture, 3 hours.

Prerequisite: CHM 112 or CHM 221.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CHM 202. Organic Chemistry II (Lecture). 3 Credit Hours.

Continuation of CHM 201. Lecture, 3 hours.

Prerequisite: CHM 201.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CHM 205. Organic Chemistry Laboratory I. 1 Credit Hour.

Introduction to techniques of organic chemistry. Laboratory, 3 hours.

Corequisite: CHM 201 or CHM 222.

Components: LAB.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CHM 206. Organic Chemistry Laboratory II. 1 Credit Hour.

Continuation of CHM 205. Laboratory, 3 hours.

Prerequisite: CHM 205. and Corequisite: CHM 202 or CHM 222.

Components: LAB.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CHM 214. Quantitative Analytical Chemistry. 3 Credit Hours.

Prerequisite: CHM 202. and MTH 162. or MTH 172.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CHM 221. CHM211 Chemistry for the Biosciences II. 4 Credit Hours.

This is the second course in a three course sequence designed to meet the needs of Life Science students interested in pursuing professional education in the health sciences. Topics to be covered in this course include: electronic atomic structure, basic quantum mechanics, molecular geometry, identification of organic molecules, and interpretation of chemical structures via spectroscopic methods. Co-registration with a separate recitation section is required.

Prerequisite: CHM 121.

Components: LEC.

Grading: GRD.

CHM 222. CHM212 Chemistry for the Biosciences III. 4 Credit Hours.

This is the third course in a three course sequence designed to meet the needs of Life Science students interested in pursuing professional education in the health sciences. Topics to be covered in this course include: organic chemical reactivity, reaction prediction analysis, organic reaction mechanisms, electronic interactions, energy states, and reactivity of biomolecules. Co-registration with a separate recitation section is required.

Prerequisite: CHM 221.

Components: LEC.

Grading: GRD.

CHM 304. Structural Identification of Organic Compounds. 3 Credit Hours.

The fundamental principles of ultraviolet/visible, infrared, nuclear magnetic resonance and mass spectrometry. How the combination of these sophisticated analytical techniques can be used to elucidate the structures of organic compounds.

Prerequisite: CHM 202 and CHM 206.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CHM 316. Instrumental Analytical Chemistry. 3 Credit Hours.

Modern methods of quantitative analysis. Lecture, 3 hours.

Prerequisite: CHM 360 and CHM 214 or CHM 360 and CHM 304.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CHM 317. The Chemistry of Food and Taste.. 3 Credit Hours.

The chemical compositions of the raw materials and end products, and a survey of the changes that these undergo when exposed to human manipulations.

Prerequisite: CHM 202 or CHM 222.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CHM 320. Instrumental Methods in Chemistry and Biochemistry. 2 Credit Hours.

Instrumental methods in modern chemistry and biochemistry, including spectrometric, electrochemical, and chromatographic (separation) Laboratory, 8 hours. Satisfies writing requirement.

Prerequisite: CHM 214 or CHM 304 and Corequisite: CHM 316.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

CHM 331. Physical Chemistry for Premedical Students. 3 Credit Hours.

Fundamentals of thermodynamics as applied to gases, liquids and solutions; chemical kinetics and other selected topics. Lecture, 3 hours.

Prerequisite: CHM 112 and MTH 161 and PHY 102.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CHM 360. Physical Chemistry I (Lecture). 3 Credit Hours.

Introduction to physical chemistry including thermodynamics, gaseous and liquid states, solutions, homogeneous and heterogeneous equilibrium. Lecture, 3 hours.

Prerequisite: CHM 112 and MTH 162 or MTH 172. Requisite: One Semester of Physics.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CHM 364. Physical Chemistry (Laboratory I). 1 Credit Hour.

Representative experiments in physical chemistry. Laboratory, 4 hours.

Pre/Corequisite: CHM 360 or CHM 331.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

CHM 365. Physical Chemistry II (Lecture). 3 Credit Hours.

Chemical kinetics, introductory quantum chemistry, molecular spectroscopy.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CHM 381. Workshop Leaders in Chemistry I. 1 Credit Hour.

Students engaged in Peer-Led Team Teaching of workshops for groups of CHM 111 and/or CHM 112 students may enroll for this course. May be repeated.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

CHM 382. Workshop Leaders in Chemistry II. 1 Credit Hour.

Students engaged in Peer-Led Team Teaching of workshops for groups of CHM 111 and/or CHM 112 students may enroll for this course. May be repeated.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

CHM 391. Chemistry Internship for Credit. 1-3 Credit Hours.

Provides chemistry majors with an opportunity to apply skills learned in coursework within settings outside the university. For example students can work in local schools, assisting instructors and mentoring students. They can also work in companies or government agencies for a defined period of time with clearly delineated goals to expand their expertise and practical knowledge of chemistry. Each enrolled student will be closely mentored by a faculty member.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CHM 401. Environmental Chemistry. 3 Credit Hours.

Major environmental features of the earth; Role of natural and synthetic chemicals in the environment; Atmospheric and aquatic pollution; Application of acid-base theory and oxidation-reduction to environmental problems.

Prerequisite: CHM 201 or CHM 222.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CHM 441. Inorganic Chemistry (Lecture). 3 Credit Hours.

The relation of atomic and molecular structure to chemical and physical properties; introduction to nonaqueous solvents, coordination compounds, solid state chemistry and nuclear reactions. Lecture, 3 hours. Prerequisite: CHM 365.

Prerequisite: CHM 365.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CHM 442. Inorganic Chemistry (Laboratory). 1 Credit Hour.

Synthesis of inorganic compounds and determination of their physical and chemical properties. CHM 541 is a co-requisite for ACS chemistry majors. Laboratory, 3 hours.

Prerequisite: CHM 365 and CHM 541.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

CHM 464. Physical Chemistry (Laboratory II). 1 Credit Hour.

Continuation of CHM 364. Laboratory, 4 hours.

Prerequisite: CHM 365.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

CHM 488. Undergraduate Research. 1-3 Credit Hours.

Laboratory research under the direction of a member of the chemistry faculty. Thesis optional. Course may be repeated for credit.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CHM 490. Honors Research. 1-3 Credit Hours.

Laboratory research under the direction of a member of the Chemistry faculty. Thesis required. Course may be repeated for credit.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CHM 515. Makings of a Scientist. 3 Credit Hours.

By analyzing achievements and advise of few successful scientists, chemists in particular will highlight what qualities are needed to be a successful scientist. Importance of motivation, perseverance, communication skills, adhering to ethical guidelines and ability to deal with colleagues and co-workers will be brought out. Career options available for a trained chemist and how different each one is will be pointed out. Overall this is a course in multi-mentoring of graduate students who are aiming for a career in science and hope to be successful researchers in science, particularly in chemistry.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CHM 520. Physical Organic Chemistry. 3 Credit Hours.

Aspects of chemical bonding, acids and bases, stereochemistry, aromaticity, pericyclic reactions, linear free energy relationships, transition state theory, excited state chemistry, reactive intermediaries, mechanisms of uni- and bi-molecular reactions.

Prerequisite: CHM 202 and CHM 360.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CHM 522. Synthetic Organic Chemistry. 3 Credit Hours.

Functional group transformations, Synthons approach. Retro-synthetic analyses, multistep syntheses.

Prerequisite: CHM 202.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CHM 524. Supramolecular Chemistry. 3 Credit Hours.

Complexation, recognition, and catalysis as applied to bio-organic chemistry. Steric, polar, and lipophilic interactions as well as proximity effects in the design of synthetic enzyme mimics, cationic transport species, etc.

Prerequisite: CHM 365 and CHM 520.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 525. Structural Organic Chemistry. 3 Credit Hours.

Use of electronic and vibrational spectroscopy in structure elucidation. Structure elucidation by modern NMR; EI, CI, MALDI and Electrospray mass spectrometry. Assignment of absolute configuration of chiral centers.

Prerequisite: CHM 202.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CHM 526. CHM523 Medicinal Chemistry. 3 Credit Hours.

Medicinal chemistry is primarily concerned with the development of drug molecules, and the interpretation of their mode of action at the molecular level, with an emphasis on chemical synthesis.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CHM 530. Fluorescence Spectroscopy and Microscopy. 3 Credit Hours.

The photophysical properties of organic compounds that illustrates the fundamental principles of fluorescence. It also explains how fluorescence spectra and images can be recorded and how these powerful analytical techniques can be used to address significant problems in biology and medicine.

Prerequisite: CHM 304 and CHM 360.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CHM 535. Molecular and Supramolecular Photochemistry. 3 Credit Hours.

Generation of a model that will help rationalize/predict excited state reactions. A brief background on physical aspects of photochemistry will be given. Exploring and understanding of reactions that are triggered by light. Importance of light in life will be highlighted.

Prerequisite: CHM 201 and CHM 202.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 541. Principles of Bonding and Reactivity in Inorganic Chemistry. 3 Credit Hours.

Bonding principles necessary to understand the structure, stability, and fundamental reactivity of main group and transition metal inorganic compounds.

Prerequisite: CHM 365.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CHM 553. Modern Quantum Chemistry. 3 Credit Hours.

Many-electron wave functions and operators. Hartree-Fock approximation, density functional theory, configuration interaction, and many-body perturbation theory.

Prerequisite: CHM 365.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 565. Principles of Spectroscopic Techniques. 3 Credit Hours.

Spectroscopic techniques: nuclear magnetic resonance (NMR), mass spectra (MS), ultraviolet (UV), visible infrared (IR), fluorescence, and other specialized spectroscopic techniques.

Prerequisite: CHM 365.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 575. Principles of Nuclear Magnetic Resonance and Multidimensional Spectroscopy. 3 Credit Hours.

Theory of nuclear magnetic resonance; Bloch equations; relaxation theory; time- domain versus frequency domain spectroscopies, and principles of multidimensional spectroscopy.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 581. Advanced Analytical Chemistry. 3 Credit Hours.

Provides a strong foundation in the most important concepts in advanced analytical chemistry, including electrochemistry, chemical separations, and bioanalytical chemistry, and in the different classes of instrumental analytical techniques available to current chemists.

Prerequisite: CHM 214 and CHM 316.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CHM 591. Topics in Chemistry. 1-3 Credit Hours.

Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule following the title, "Topics in Chemistry".

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 592. Topics in Chemistry. 1-3 Credit Hours.

Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule following the title, "Topics in Chemistry."

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 593. Readings in Chemistry. 1-3 Credit Hours.

Supervised readings on special topics. Offered by special arrangement. May be repeated for credit.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 594. Readings in Chemistry. 1-3 Credit Hours.

Supervised readings on special topics. Offered by special arrangement. May be repeated for credit.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 615. Makings of a Scientist. 3 Credit Hours.

By analyzing achievements and advise of few successful scientists, chemists in particular, will highlight what qualities are needed to be a successful scientist. Importance of motivation, perseverance, communication skills, adhering to ethical guidelines and ability to deal with colleagues and co-workers will be brought out. Career options available for a trained chemist and how different each one is will be pointed out. Overall this is a course in multi-mentoring of graduate students who are aiming for a career in science and hope to become successful researchers in science, particularly in chemistry.

Prerequisite: CHM 202.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CHM 620. Physical Organic Chemistry. 3 Credit Hours.

Aspects of chemical bonding, acids and bases, stereochemistry, aromaticity, pericyclic reactions, linear free energy relationships, transition state theory, excited state chemistry, reactive intermediaries, mechanisms of uni- and bi-molecular reactions.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CHM 622. Synthetic Organic Chemistry. 3 Credit Hours.

Functional group transformations, Synthon approach. Retro-synthetic analyses, multistep syntheses.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CHM 624. Supramolecular Chemistry. 3 Credit Hours.

Complexation, recognition, and catalysis as applied to bio-organic chemistry. Steric, polar, and lipophilic interactions as well as proximity effects in the design of synthetic enzyme mimics, cationic transport species, etc.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 625. Structural Organic Chemistry. 3 Credit Hours.

Use of electronic and vibrational spectroscopy in structure elucidation. Structure elucidation by modern NMR; EI, CI, MALDI and Electrospray mass spectrometry. Assignment of absolute configuration of chiral centers.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CHM 626. Structural Organic Chemistry. 3 Credit Hours.

Use of electronic and vibrational spectroscopy in structure elucidation. Structure elucidation by modern NMR; EI, CI, MALDI and Electrospray mass spectrometry. Assignment of absolute configuration of chiral centers.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CHM 630. Fluorescence Spectroscopy and Microscopy. 3 Credit Hours.

The photophysical properties of organic compounds that illustrates the fundamental principles of fluorescence. It also explains how fluorescence spectra and images can be recorded and how these powerful analytical techniques can be used to address significant problems in biology and medicine.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CHM 635. Molecular and Supramolecular Photochemistry. 3 Credit Hours.

Generation of a model that will help rationalize/predict excited state reactions. A brief background on physical aspects of photochemistry will be given. Exploring and understanding of reactions that are triggered by light. Importance of light in life will be highlighted.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 641. Principles of Bonding and Reactivity in Inorganic Chemistry. 3 Credit Hours.

Bonding principles necessary to understand the structure, stability, and fundamental reactivity of main group and transition metal inorganic compounds.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CHM 653. Modern Quantum Chemistry. 3 Credit Hours.

Many-electron wave functions and operators. Hartree-Fock approximation, density functional theory, configuration interaction, and many-body perturbation theory.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 655. Electrochemistry. 3 Credit Hours.

Modern electrochemical techniques including voltammetry, chronocoulometry, rotating disk electrode, and ultramicroelectrodes.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 665. Principles of Spectroscopic Techniques. 3 Credit Hours.

Spectroscopic techniques: nuclear magnetic resonance (NMR), mass spectra (MS), ultraviolet (UV), visible infrared (IR), fluorescence, and other specialized spectroscopic techniques.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 675. Principles of Nuclear Magnetic Resonance and Multidimensional Spectroscopy. 3 Credit Hours.

Theory of nuclear magnetic resonance; Bloch equations; relaxation theory; time- domain versus frequency domain spectroscopies, and principles of multidimensional spectroscopy.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 681. Advanced Analytical Chemistry. 3 Credit Hours.

Provides a strong foundation in the most important concepts in advanced analytical chemistry, including electrochemistry, chemical separations, and bioanalytical chemistry, and in the different classes of instrumental analytical techniques available to current chemists.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CHM 691. Topics in Chemistry. 1-3 Credit Hours.

Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule following the title, "Topics in Chemistry".

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 692. Topics in Chemistry. 1-3 Credit Hours.

Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule following the title, "Topics in Chemistry."

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 693. Readings in Chemistry. 1-3 Credit Hours.

Supervised readings on special topics. Offered by special arrangement. May be repeated for credit.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 694. Readings in Chemistry. 1-3 Credit Hours.

Supervised readings on special topics. Offered by special arrangement. May be repeated for credit.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 779. Chemistry Seminar. 1 Credit Hour.

Participation in the departmental seminar program. Required each semester the student is in residence and not enrolled in CHM 680 (excluding summer sessions).

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

CHM 780. Chemistry Seminar. 1 Credit Hour.

Participation in the chemistry department seminar program, including an oral presentation of special topics.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

CHM 785. Introduction to Research. 2 Credit Hours.

Research principles and practices, independent study in selected subject areas, and/or oral presentation of a proposed research topic. Open only to graduate students working toward the M.S. or Ph.D. in chemistry.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 788. Problems in Research Planning. 2 Credit Hours.

Formulation of a research program for investigating an original problem not related to the candidate's major laboratory research. A brief written summary and an oral defense of the plan will be required.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 805. Research Practices. 1-3 Credit Hours.

Research experiences in special techniques. For students electing the non-thesis M.S. option. May be repeated for a total not to exceed six credits.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

CHM 810. Master's Thesis. 1-6 Credit Hours.

The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

CHM 820. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in CHM 710 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CHM 830. Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor, but for not less than a total of 12 hours. Up to 12 hours may be taken in a regular semester, but not more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

CHM 840. Post-candidacy Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ph.D. who have advanced to candidacy. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Up to 12 hours may be taken in a regular semester, but not more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

CHM 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the Ph.D. and D.A., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

CHM 851. Research in Residence. 0 Credit Hours.

Components: THI.

Grading: GRD.

CHM 880. Doctoral Dissertation Seminar. 1 Credit Hour.

Required of all candidates for the Ph.D. degree when defending their doctoral dissertation during their final term. A written dissertation and an oral defense of the Ph.D. dissertation will be required.

Prerequisite: CHM 830 and CHM 840.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

Chinese (CHI)

CHI 101. Elementary Chinese (Mandarin). 3 Credit Hours.

Conversation, grammar, reading, elementary composition.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CHI 102. Elementary Chinese (Mandarin). 3 Credit Hours.

Continuation of CHI 101, conversation, grammar, reading, elementary composition.

Prerequisite: CHI 101.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CHI 195. Transfer Credit. 1-3 Credit Hours.

Awarded for 100-level course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: CNC.

Typically Offered: Fall, Spring, & Summer.

CHI 201. Intermediate Chinese I. 3 Credit Hours.

Expanding further on language skills (grammar, composition and reading) while introducing students to aspects of Chinese customs, history and culture. Closed to native speakers.

Prerequisite: CHI 102.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CHI 202. Intermediate Chinese II. 3 Credit Hours.

Continuation of CHI 201. Further development of reading, writing, speaking and listening skills in Mandarin Chinese. CLOSED TO NATIVE SPEAKERS.

Prerequisite: CHI 201.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CHI 203. Advanced Chinese. 3 Credit Hours.

This course is designed to develop students' ability to use Chinese in a more advanced way. The course emphasizes accurate comprehension, expansion of vocabulary, and development of the ability to use increasing complex grammatical and sentence structures. In addition to improving their language abilities, students will also be exposed to different areas of Chinese culture.

Prerequisite: CHI 202.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHI 204. Advanced Chinese II. 3 Credit Hours.

The course aims to develop students' ability to use Chinese in a more advanced way by continuing Chinese 203's emphasis on accurate comprehension, expansion of vocabulary, and development of the ability to use increasing complex grammatical and sentence structures. In addition to improving their language abilities, students will also be exposed to different areas of Chinese culture.

Prerequisite: CHI 203.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CHI 210. Experiencing Chinese Culture through Art and Design. 3 Credit Hours.

A broad exposure on both traditional and modern Chinese arts, crafts, designs, architectures, and other cultural elements. Through discussions, hands on art projects, and cultural excursions, students will examine how traditional and contemporary Chinese values and beliefs are expressed in Chinese arts, crafts, designs, and architecture. An opportunity to truly immerse in Chinese culture. Students will visit historical and cultural sites. Local Chinese artists and scholars will co-teach certain sessions. Students will be guided to conduct cultural interviews and presentations to develop their own understanding on Chinese values and perspectives. This course takes place in Beijing during summer term. And it will be taught primarily in English.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

CHI 295. Transfer Credit. 1-3 Credit Hours.

Awarded for 200-level course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: CNC.

Typically Offered: Fall, Spring, & Summer.

CHI 301. Advanced Reading and Diction Chinese. 3 Credit Hours.

Use of Chinese in a more advanced way to achieve greater fluency in a variety of written and spoken genres. Course materials incorporate authentic Chinese materials in genres including formal speech, short story, debate, op-ed essay, and newspaper. The course emphasizes accurate comprehension, expansion of vocabulary, and development of the ability to use increasing complex grammatical and sentence structures, in particular, formal speech and written language. In addition to improving their language abilities, course materials are also geared towards deepening students understanding of many different areas of Chinese culture.

Prerequisite: CHI 204.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CHI 310. The Esoteric and the Mundane in the Chinese Literary Tradition. 3 Credit Hours.

Introduction to a variety of important genres and themes in the Chinese literary tradition through the close reading of texts spanning three millennia.

Particular attention is paid to notions of humanity, divinity, and monstrosity.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CHI 311. Comparative Literature in East Asia. 3 Credit Hours.

An introduction to the East Asian literary tradition (in China, Japan, and Korea) while introducing the methods of and issues surrounding comparative literary study. The course is structured thematically, according to particular motifs and themes that become central in Chinese, Japanese, and Korean literature. Themes to be studied include the non-human bride; romantic ideals and the romance narrative; the otherworldly journey; the dream; and the modern nation. It also seeks to challenge pre-conceived notions about East Asian literature and culture to instill a nuanced understanding of East Asian literary traditions.

Prerequisite: ENG 106.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CHI 322. Cultural Topics. 3 Credit Hours.

A variety of important genres, issues, and themes related to Chinese culture through the close reading and analysis of texts. Topics may include film, religion, gender, epistemology, visual arts, immigration, travels, the preternatural. Note: Students will complete all readings and written assignments in Chinese. Course is open only to students with native or native-level fluency in Chinese.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CHI 330. The Powerful Women of Medieval China in History, Fiction, and Modern Media. 3 Credit Hours.

An interdisciplinary examination of the portrayals of ruling-class women who lived during the medieval period in China and who have become a part of the Chinese literary-historical tradition. Works to be examined include short stories, novels, plays, films, and television.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CHI 394. Internship. 1-3 Credit Hours.

Internships are intended to provide the student with an opportunity to apply analytical, interpretive, expressive, and creative skills developed in coursework. Internships ordinarily take place outside the University. They involve UM-faculty supervision as well as supervised on-site experience in a Chinese-speaking cultural, business, or not-for-profit organization. Student needs to fill out the internship application form. Normally, 40 internship hours are required per credit earned (the host will supply documentary evidence of hours worked). Permission of a faculty member in CHI required.

Prerequisite: CHI 204.

Components: PRA.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CHI 395. Transfer Credit. 1-3 Credit Hours.

Awarded for 300-level course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: CNC.

Typically Offered: Fall, Spring, & Summer.

CHI 495. Transfer Credit. 1-3 Credit Hours.

Awarded for 400-level course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: CNC.

Typically Offered: Fall, Spring, & Summer.

CHI 591. Directed Readings. 1-3 Credit Hours.

Provides Directed Readings in Chinese.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

CHI 641. Elementary CHI I for Graduate Students. 0 Credit Hours.

Designed to develop graduate students' communicative abilities in speaking, reading, writing, and comprehending Chinese, as well as to provide an introduction to Chinese Studies.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CHI 642. Elementary CHI II for Graduate Students. 0 Credit Hours.

Continuation of CHI 641. Designed to develop graduate students' communicative abilities in speaking, reading, writing, comprehending Chinese, and continued engagement in Chinese Studies.

Prerequisite: CHI 641.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CHI 651. Intermediate CHI I for Graduate Research. 0 Credit Hours.

For graduate students with previous study of elementary-level Chinese. Designed to enhance graduate students' communication skills in the Chinese language at the intermediate level. Intended principally for students who will carry out research in Chinese Studies.

Prerequisite: CHI 642.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CHI 652. Intermediate Chinese II for Graduate Research. 0 Credit Hours.

For student with previous study of Chinese at the intermediate level. Designed to enhance graduate students' communication skills in the Chinese language at the high-intermediate level. Intended principally for students who will carry out research in Chinese Studies.

Prerequisite: CHI 651.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CHI 653. Advanced Chinese I for Graduate Research. 0 Credit Hours.

Designed to enhance graduate students' communication skills in the Chinese language at the advanced-low level. Intended principally for students who will carry out research in Chinese Studies.

Prerequisite: CHI 652.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CHI 654. Advanced Chinese II for Graduate Research. 0 Credit Hours.

Designed to enhance graduate students' communication skills in Chinese language at the advanced-intermediate level. Intended principally for students who will carry out research in Chinese Studies.

Prerequisite: CHI 653.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CHI 692. Directed Readings. 1-3 Credit Hours.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

Cinema and Interactive Media (CIM)

CIM 103. Survey of Motion Pictures. 3 Credit Hours.

Examination of the aesthetic, social, and economic aspects of the motion picture industry. Concentration on the present state of the medium with particular emphasis on future trends.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CIM 111. Web Lab. 3 Credit Hours.

This course is a practical introduction to web design and marketing. Students will learn how to produce and market dynamic websites using modern content management systems.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 113. Documentary Approaches. 3 Credit Hours.

Students will explore the varied forms and narrative approaches used in contemporary documentary filmmaking to understand the position of the filmmaker as a storyteller.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 120. Internet, Media, and Society. 3 Credit Hours.

Internet, Media, and Society is a foundational course intended to give perspectives on the continuing progression of technology through the lens of media and popular culture. Students will learn about the historical roots of the internet and early tech pioneers, including the various technologies, trends, and subcultures that bubbles up along the way, creating our current media and technological landscapes. From this perspective, students will gain an appreciation and greater understanding of how things came to be, especially the Internet's role in shaping society and their everyday lives.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 126. Introduction to Screenwriting. 3 Credit Hours.

Creation and formatting of narrative material for motion pictures. Emphasis on writing the short film.

Components: DIL.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CIM 151. Introduction to Digital Filmmaking. 3 Credit Hours.

Lectures and laboratory work to acquaint the student with the basic techniques of motion pictures. Students make short films using digital equipment to develop an understanding of the motion picture as a creative tool of communication and expression.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CIM 206. History of International Cinema. 3 Credit Hours.

This course is an examination of the origin and history of the motion picture. Narrative and non-fiction genres, in the American and World Cinemas, from 1890 to the present are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CIM 211. Interaction Design. 3 Credit Hours.

In this class students will familiarize themselves with the disciplines of user experience (UX) and interaction design (IxD) by understanding and learning how to apply creative and abstract thinking skills to facilitate communication through the design of interfaces that connect information, products, services, and space. Students will be taught to prototype rich interactive experiences and to assess ease of use, utility, perception of the value of the system, and efficiency in performing tasks.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 215. 2D Character Design. 3 Credit Hours.

This is a comprehensive course devoted to the development of skills in creating characters for 2D animation and games. Students will develop an understanding of how shape language relates to the characters personality through the creation of weekly exercises. The course will be delivered in the form of studio projects, individual and class critiques, lectures, discussions, workshops and readings.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

CIM 251. Motion Picture Workshop: Storytelling. 3 Credit Hours.

The practice of the grammar of cinematic language including shot selection, composition, pacing, story clarity, performance, pre-visualization and pre-planning for the creation of short narrative projects. Through critiques, students encounter and interact with an audience of their peers. This course requires students to master contemporary technology in use in the profession.

Prerequisites: CIM 103, CIM 151.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CIM 310. Introduction to Game Design. 3 Credit Hours.

This is an introductory course about game design, theory, and development, and how games align themselves as a lens of study for all interactive media.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 326. Intermediate Screenwriting. 3 Credit Hours.

Study of, and practice in, writing feature length, narrative motion pictures. Development of story line in treatment form, attention to cinematic structure, the development of character, and its presentation on screen is discussed.

Prerequisite: CIM 126.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CIM 329. Writing for Series Television. 3 Credit Hours.

An introduction to the structures and techniques of writing situation-comedy and dramatic series television.

Prerequisite: CIM 126.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 351. Intermediate Filmmaking. 3 Credit Hours.

This course is an introduction to intermediate level techniques and methodologies for digital production of all contemporary media genres including narrative, documentary, experimental and music performance. Students will work in crews, collaboratively, with specific assigned roles throughout the production work flow.

Prerequisite: CIM 206 and CIM 251.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 353. Post Production Sound Editing and Design. 3 Credit Hours.

Post production sound editing and design is a seminar/workshop that provides a practical and theoretical introduction to sound and its function in the narrative moving image process. The course explores the process from production recording through the final mix.

Requisite: Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 355. Essentials of Documentary Film. 3 Credit Hours.

This course is designed to teach students how to tell compelling cinematic documentary stories with a clear and effective point-of-view. We will compare and analyze various styles of documentary storytelling and use these methods in creating effective documentaries films. An emphasis will be put on the various styles of documentary filmmaking.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 356. Cinematography. 3 Credit Hours.

An overview of the cinematographer's process from script to screen. Working with camera, lighting, and grip equipment on exercises and projects is discussed.

Prerequisite: CIM 251.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 357. Editing. 3 Credit Hours.

Introduction to the theory and practice of motion picture editing. Short editing assignments are designed to develop students' understanding of aesthetic, and technical considerations in the art of dramatic editing.

Prerequisite: CIM 251.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 360. 360 Immersive Storytelling. 3 Credit Hours.

This course introduces the student to immersive storytelling techniques. This hands on course is designed for students who want to develop the necessary skills to make immersive projects, this course sets out the tools used tell visually effective and interactive stories. Through a wide selection of immersive material including film, games, articles, and interviews, students will also analyze immersive storytelling techniques, technologies, narrative strategies, and film theories used across media. The student will be required not only to create immersive experiences using the new technologies but to also write about new ways to think about immersive stories, moving images, interactivity, and how they affect audiences and new distribution outlets.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 364. Business of Motion Pictures. 3 Credit Hours.

Students will get an overview of how content is created and who the players are. They will practice synthesizing information and translating it into a strategic plan for a business or individual career path in the entertainment industry.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 386. Writing the Feature Film-Online. 3 Credit Hours.

The student will prepare and complete the first act of a feature-length screenplay or the student will prepare and commence the rewrite of an existing screenplay.

Prerequisite: CIM 126.

Components: DIL.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CIM 394. Special Topics in Motion Pictures. 3 Credit Hours.

This course subject matter varies according to announced special topic. See class schedule for details.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 395. Directing Techniques I. 3 Credit Hours.

To teach the craft of directing through exercises, screen work, and readings.

Prerequisite: CIM 251.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 401. Nonfiction Film and Digital Media. 3 Credit Hours.

An examination of American and world nonfiction films and media.

Requisite: Junior Standing or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 402. Global Issues and Filmmaking: An Interdisciplinary Approach. 3 Credit Hours.

We will study U.S. foreign aid policies and programs with efforts to stimulate international development, encourage humanitarian engagement, elicit diplomacy and/or promote international and national security. Case studies will focus on global health aid programs, along with other important aid initiatives. Written and oral assignments will be complemented by short analytical film created and produced by students. This will include an historical analysis on the type and purpose of foreign aid, existing online news media sources about the foreign aid programs, expert video interviews, and the coverage and editing of a class debate to fully capture the theoretical and practical foundations of international aid in the twenty-first century.

Requisite: Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 403. Film Directors. 3 Credit Hours.

The study of the film authorship through a focus on specific directors.

Requisite: Junior Standing or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 404. Aspects of Contemporary Cinema. 3 Credit Hours.

Study of contemporary movements in American and world cinemas.

Requisite: Junior Standing or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 405. Representations of Sport in Popular Culture. 3 Credit Hours.

This course presents approaches to understanding and contextualizing representations of sports in cinema, television, and digital media. Students gain valuable skills in critical thinking, analysis, and evaluation as they learn to reflect on the various ways sports are portrayed in selected media and popular culture.

Requisite: Junior Standing or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 406. Genres. 3 Credit Hours.

Study of selected genres from a variety of critical perspectives. Issues pertaining to methodologies of defining and categorizing film are discussed.

Requisite: Junior Standing or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 407. National Cinemas. 3 Credit Hours.

Selected films from Europe, Asia, Africa and Latin America will be studied in relation to their diverse social, political and cultural contexts.

Requisite: Junior Standing or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 408. Women, Media, and Popular Culture. 3 Credit Hours.

Examination of film, media, and gender representation from the perspective of feminist theory and cultural studies. Students explore the many ways that women have been portrayed, and how they have portrayed themselves, within popular culture.

Requisite: Junior Standing or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 409. Legal Aspects of Motion Pictures. 3 Credit Hours.

The law, contracts, and negotiating techniques of the business affairs aspects of the production of motion pictures.

Requisite: Junior Status or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 413. Mobile Application Development. 3 Credit Hours.

This course will provide students the ability to conceptualize, design, and develop a mobile application of their choosing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 416. Building Virtual Worlds. 3 Credit Hours.

The purpose of this course is to explore the construction of virtual environments. Students will learn the principles of constructing interactive 3D environments using a game engine. Students will be responsible for creating a world that can be interacted with on various platforms, including virtual and mixed reality.

Prerequisite: CIM 540 or CSC 120 or ECE 118.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

CIM 424. Augmented Reality. 3 Credit Hours.

This course will provide students the ability to design and develop augmented reality apps. It covers various approaches to designing and programming augmented reality apps using the latest technologies and devices. Students will be given hands-on programming assignments and learn about the key advantages in each of the approaches via in-class discussions.

Prerequisite: CIM 540 or CSC 120 or ECE 118.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

CIM 426. Advanced Screenwriting. 3 Credit Hours.

A continuation of CIM 326. Study of, and practice in, writing feature length, narrative motion picture scripts. Attention is given to cinematic structure, the development of character, and its presentation on screen. Emphasis is placed on bringing the script to a completed draft.

Prerequisite: CIM 326.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 429. Advanced Television Writing. 3 Credit Hours.

This course explores how to create, format, and write the original Television Pilot and treatment. The class will cover TV pilot format, length, structure as well as techniques in creating TV characters and situations for both comedy and dramatic episodic TV.

Prerequisite: CIM 329.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 431. Human Computer Interaction. 3 Credit Hours.

This course will teach students about the importance human computer interaction (HCI) in the design, implementation, and evaluation of interactive computing systems for human use. The course will provide both practical application and theoretical knowledge of HCI, with practical concerns balanced by discussion of relevant theory from the literature of computer science, human factors, and interaction design.

Prerequisite: CIM 211.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

CIM 439. Front End Fundamentals. 3 Credit Hours.

This course focuses on the job-ready skills and production workflow techniques in highest demand for front end web developers. Students will learn, practice and demonstrate the skills and principles needed to make effective use of these technologies.

Prerequisite: CIM 111 or JMM 341.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 444. Internet and Media Activism. 3 Credit Hours.

In this course, students will examine the role of media in shaping social reform to document social issues such as poverty, human rights, social inequities, the environment, and powerless groups. We will review the philosophy and history of media as activism ranging from photography, documentary, cinema, the Internet, social media and newer forms of media. Emphasis is placed on developing a critical understanding of current media advocacy practices with a conscious goal; awareness, change minds, to affect policy, and action. At the end of the semester, students will have a fully developed project concept.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 451. Advanced Filmmaking Workshop. 3 Credit Hours.

The theory and practice of motion pictures production from script to screen. Lecture and laboratory. Students will develop and produce a narrative, a documentary, or an experimental work of their choice.

Prerequisite: CIM 351.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 455. Science Documentary: Autism. 3 Credit Hours.

This course brings together student citizens across science, communication, and education to collaborate on content intended to reach audiences on multiple platforms. Students will be exposed to both history and cutting edge research surrounding Autism Spectrum Disorder. In addition to learning the neuroscience and genetics that underlie autism spectrum disorders, students will connect with people in the local community - to lend these issues a face and context. Students will gather information from readings, experts at the University of Miami, and the larger South Florida Community. Students will work in teams to share expertise from their fields of study to generate content for community consumption.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 456. Advanced Cinematography. 3 Credit Hours.

Advanced work with camera, lighting, and grip equipment on exercises and projects.

Prerequisite: CIM 356. Or Requisite: Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 457. Advanced Editing. 3 Credit Hours.

Advanced concepts in aesthetics and theories of picture and sound editing, mixing, color correction, and finishing techniques.

Prerequisite: CIM 357. Or Requisite: Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 458. Documentary Production. 3 Credit Hours.

Students produce two short digital documentaries and explore various approaches to the documentary film.

Prerequisite: CIM 151.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CIM 462. Motion Picture Marketing and Distribution. 3 Credit Hours.

Economic and marketing considerations in the production and distribution of motion pictures.

Prerequisite: CIM 364.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 465. Creative Producing. 3 Credit Hours.

Students will discover what their creative voice is as a producer; sharpen their communication skills (networking, pitching, coverage & notes); and will learn the nuts and bolts of what a producer does.

Prerequisite: CIM 364.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 471. Social Impact Games. 3 Credit Hours.

Students will explore the use of games as a communication tool for social good and will create their own game-based interventions.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 489. Projects in Screenwriting. 3 Credit Hours.

Individual study. This course and CIM 499 cannot count for more than three credits towards a Communication major or minor.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 494. Internship in Cinema and Interactive Media. 1-3 Credit Hours.

Prescribed study and supervised work with practitioners in motion pictures.

Requisite: Sophomore Status, cumulative GPA of 2.5, and Permission of Instructor.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CIM 499. Projects and Directed Research. 1-3 Credit Hours.

Individual study. No more than three credits may be counted toward a Communication major or minor.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CIM 501. Principles of Aesthetics and Analysis. 3 Credit Hours.

Provides graduate students with introductory immersion in aesthetics, analysis, and history of film and media.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 510. Foundation of Screenwriting. 3 Credit Hours.

This course explores the fundamental skill set necessary to manipulate the basic elements of cinematic writing. The course will investigate common dramatic elements found in all screenplays as well as teach format principles of feature, TV and emerging media scripts.

Prerequisite: CIM 126.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 511. Writing the Short Film. 3 Credit Hours.

A course in the fundamentals of screenwriting focused on the creation of a 15-30 page screenplay suitable for an MFA project film. Study of and practice in writing short narrative motion picture scripts. Focus is placed on concept, content, cinematic story structure and presentation of character.

Prerequisite: CIM 510.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 513. UX Research Methods. 3 Credit Hours.

This course provides a comprehensive overview of User Experience research methods and how they are incorporated into the product development lifecycle. Students will learn about user-centered design and will conduct a wide range of research methods including ethnography, questionnaires, online studies, and usability testing. There will be considerable focus on practicing research skills and reporting findings from these activities.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 514. Motion Picture Studio. 3 Credit Hours.

This course allows students the time to enhance and exhibit their knowledge and skills in Motion Picture. Students will fine-tune their final film projects, polishing their final cuts for film festival submission to film festivals and professional consideration.

Motion Picture Major and Senior Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 515. Interactive Media Studio. 3 Credit Hours.

The Interactive Media Studio is designed to allow a student to enhance his or her accumulated knowledge and skills in interactive Media. This course prepares students to gain employment in the field by creating and producing a professional design portfolio and resume. Students will also gain knowledge about how to set up, prepare for, and conduct themselves during professional interviews.

Requisite: Senior Standing and Interactive Media Majors.

Components: STU.

Grading: GRD.

Typically Offered: Spring.

CIM 518. Seminar in Documentary Film History: Cinéma-vérité. 3 Credit Hours.

The primary focus of this course will be on the half-century old school or tradition of documentary filmmaking associated with the terms “Cinéma-vérité” and “direct cinema”. Through close analysis of selected classic and contemporary documentaries, the class will explore their historical significance, their aspirations and achievements as films, and their ways of addressing the aesthetic, epistemological, political and moral issues that inevitably arise when filmmakers take their sync-sound camera into the world and undertake to film life as it is really lived.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 519. Seminar in Documentary Production. 3 Credit Hours.

The Seminar in Documentary Production is the capstone production class within the documentary track of the Cinema and Interactive Media Department. Students are entered into the course based on a proposal that outlines their documentary project.

Prerequisites: CIM 255, CIM 458 or JMM 541.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 523. Advanced 3D Character Design and Motion Capture. 3 Credit Hours.

Theory and practice of the entire game art development pipeline, from 3D modeling, texturing, rigging and animation to motion capture, and special effects.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 526. Adaptation. 3 Credit Hours.

This course will examine the craft and techniques of adapting sources such as novels, short stories, plays, articles, comic books, Shakespeare to the screen.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 529. Nonfiction Film. 3 Credit Hours.

An examination of American and world nonfiction films.

Prerequisites: CIM 204 or CIM 205.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 535. Human Centered Design. 3 Credit Hours.

This course takes a comprehensive look at human limitations and abilities and how they are key to interaction design and a great user experience. Students will learn about human behavior and how to apply UX guidelines to the design of digital interfaces. Students will also learn how to produce design deliverables for real world practice

Prerequisite: CIM 211.

Components: PRA.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 540. Intro to Creative Coding. 3 Credit Hours.

This course will introduce students to the building blocks of creative coding within the visual and media environment.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 541. Technology Trends. 3 Credit Hours.

Trends is a foundation course intended to promote a dialogue about the current state of business, art, health, culture, and innovation.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 542. Physical Computing. 3 Credit Hours.

This seminar will examine the differences and opportunities present, between a series of physical computing techniques and rapid prototyping.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 543. Designing Innovation. 3 Credit Hours.

Students will explore the process of creating a dialogue between individuals or groups of people and a product, service, or system.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 545. Managing Interactive Media Projects. 3 Credit Hours.

This course takes a comprehensive look at managing interactive media projects from inception to implementation and maintenance.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 550. Motion Graphics and Compositing. 3 Credit Hours.

Methods, techniques and aesthetics of 2D computer animation and compositing including animated text, title design, and green screen.

Prerequisite CIM 206.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 551. Advanced Motion Graphics and Compositing. 3 Credit Hours.

Extend the 2D skills of students who have taken CIM 550 to 3D motion graphics and animation. Emphasis on title design and animation.

Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 552. Motion Picture Marketing and Distribution. 3 Credit Hours.

Economic and marketing considerations in the production and distribution of motion pictures.

Prerequisite CIM 206.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 553. Advanced Motion Picture Marketing. 3 Credit Hours.

Advanced marketing considerations in the distribution of motion pictures.

Prerequisite: CIM 552.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 560. Directing the Actor. 3 Credit Hours.

The purpose of this course is to teach and practice the craft of directing, including text analysis, characterization, visualization, design, intention and rehearsal: to train students to articulate their ideas to actors and film crew.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 566. Character and Dialogue. 3 Credit Hours.

An examination of the craft and techniques of creating original characters and dialogue.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 590. Prototyping Techniques. 3 Credit Hours.

This course covers accepted prototyping techniques introducing students to a wide variety of approaches for different kinds of user experience design problems and platforms. Students will learn to develop preliminary iterations of a solution to a design problem in order to communicate the essence of their idea without committing to a costly implementation.

Prerequisite: CIM 111.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 591. Advanced Systems: Designing Playful Experiences. 3 Credit Hours.

Building on their systems foundation from the Intro to Systems course, students will continue to play and analyze the games along with designing games in order to build a more extensive vocabulary and toolkit to both understand and design interactive systems. Students will be exposed to a range of popular game prototyping technologies (for example: Twine, GameSalad, ARIS) and will create several mini projects as well as one final game project created using the platform of their choice. Students will explore a different core game mechanic with each prototyping tool thus broadening their ability to create targeted meaning within a playful experience.

Prerequisite: CIM 211 or CIM 310.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 593. Dynamic Data. 3 Credit Hours.

This course teaches data analysis through the development of interactive web applications. The course focuses on communicating through computer programming. Students will learn to build and use databases as a primary source and explore data as content. For this course students will be required to build custom software solutions through web programming languages that utilize third party APIs to interpret, analyze and manipulate data.

Prerequisites: JMM 341 or CIM 111.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 594. Special Topics in Cinema and Interactive Media. 3 Credit Hours.

This course subject matter varies according to announced special topic. See class schedule for details.

Requisite: Junior Status.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 595. Directing Techniques. 3 Credit Hours.

To build a more advanced set of professional skills and practices through scene work, shooting, and collaboration.

Prerequisite: CIM 251. Or Requisite: Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 599. Advanced Projects and Directed Research. 1-6 Credit Hours.

Individual study. May be repeated for a maximum of six credits.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CIM 601. Principles of Aesthetics and Analysis. 3 Credit Hours.

Provides graduate students with introductory immersion in aesthetics, analysis, and history of film and media.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 602. Global Issues and Filmmaking. 3 Credit Hours.

We will study U.S. foreign aid policies and programs with efforts to stimulate international development, encourage humanitarian engagement, elicit diplomacy and/or promote international and national security. Case studies will focus on global health aid programs, along with other important aid initiatives. Written and oral assignments will be complemented by short analytical film created and produced by students. This will include a historical analysis on the type and purpose of foreign aid, existing online news media sources about the foreign aid programs, existing online news media sources about the foreign aid programs, expert video interviews, and the coverage and editing of a class debate to fully capture the theoretical and practical foundations of international aid in the twenty-first century.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 603. Film Directors. 3 Credit Hours.

This course will address the conditions of authorship in film through an intensive study of the films of two or more directors, whose careers will serve as case studies. These directors will be historically important and their work will represent significant achievements in the art of film.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 604. Aspects of Contemporary Cinema. 3 Credit Hours.

The study of the ways in which film communicates. Intensive analysis and criticism of cinematic techniques exemplified through particular films.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 606. Genres. 3 Credit Hours.

A study of selected movie genres from a variety of critical perspectives. Issues pertaining to selfhood, sexual difference, and other concerns of present-day film criticism will be examined.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 608. National Cinemas. 3 Credit Hours.

Selected films from Europe, Asia, Africa and Latin America will be studied in relation to their diverse social/political and cultural contexts.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 609. Legal Aspects of Motion Pictures. 3 Credit Hours.

The law, contracts, and negotiating techniques of the business affairs aspects of the production of motion pictures.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 610. Foundation of Screenwriting. 3 Credit Hours.

This course explores the fundamental skill set necessary to manipulate the basic elements of cinematic writing. The course will investigate common dramatic elements found in all screenplays as well as teach format principles of feature, TV and emerging media scripts.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 611. Writing the Short Film. 3 Credit Hours.

A course in the fundamentals of screenwriting focused on the creation of a 15-30 page screenplay suitable for an MFA project film. Study of and practice in writing short narrative motion picture scripts. Focus is placed on concept, content, cinematic story structure and presentation of character.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 612. Writing for Episodic Television. 3 Credit Hours.

The course will explore the art and craft required to write a "spec" Television episode. The course will explore how TV writing differs from feature writing and how the TV writer/producer business model works. By the end of the course the student will have finished an hour-long "spec" script for an existing TV show or a two-part sitcom teleplay.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 613. Mobile Application Development. 3 Credit Hours.

This course will provide students the ability to conceptualize, design, and develop a mobile application of their choosing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 615. 2D Character Design. 3 Credit Hours.

This is a comprehensive course devoted to the development of skills in creating characters for 2D animation and games. Students will develop an understanding of how shape language relates to the characters personality through the creation of weekly exercises. The course will be delivered in the form of studio projects, individual and class critiques, lectures, discussions, workshops and readings.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

CIM 616. Building Virtual Worlds. 3 Credit Hours.

The purpose of this course is to explore the construction of virtual environments. Students will learn the principles of constructing interactive 3D environments using a game engine. Students will be responsible for creating a world that can be interacted with on various platforms, including virtual and mixed reality.

Prerequisite: CIM 640 or CSC 120 or ECE 118.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

CIM 618. Seminar in Documentary Film History: Cinéma-vérité. 3 Credit Hours.

The primary focus of this course will be on the half-century old school or tradition of documentary filmmaking associated with the terms "Cinéma-vérité" and "direct cinema". Through close analysis of selected classic and contemporary documentaries, the class will explore their historical significance, their aspirations and achievements as films, and their ways of addressing the aesthetic, epistemological, political and moral issues that inevitably arise when filmmakers take their sync-sound camera into the world and undertake to film life as it is really lived.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 619. Seminar in Documentary Production. 3 Credit Hours.

The Seminar in Documentary Production is the capstone production class within the documentary track of the Cinema and Interactive Media Department. Students are entered into the course based on a proposal that outlines their documentary project.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 620. Cinematography. 3 Credit Hours.

This hands-on course provides students with the aesthetic and technical aspects of professional concepts and techniques in film and digital media cinematography.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 621. Narrative Production. 3 Credit Hours.

An introduction to film and digital production techniques on narrative projects. Emphasis on collaboration, group process and social purpose. Students will be expected to produce a short film abroad as part of this course.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 622. UX Research. 3 Credit Hours.

The course provides a comprehensive overview of User Experience research methods and how they are incorporated into the product development lifecycle. Students will learn about user-centered design and will conduct a wide range of research methods including ethnography, questionnaires, online studies, and usability testing. There will be considerable focus on practicing research skills and reporting findings from these activities.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 623. Advanced 3D Character Design. 3 Credit Hours.

Theory and practice of the entire game art development pipeline, from 3D modeling, texturing, rigging and animation to motion capture, and special effects.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 624. Augmented Reality. 3 Credit Hours.

This course will provide students the ability to design and develop augmented reality apps. It covers various approaches to designing and programming augmented reality apps using the latest technologies and devices. Students will be given hands-on programming assignments and learn about the key advantages in each of the approaches via in-class discussions.

Prerequisite: CIM 640 or CSC 120 or ECE 118.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

CIM 626. Adaptation. 3 Credit Hours.

This course will examine the craft and techniques of adapting sources such as novels, short stories, plays, articles comic books, and public domain material such as Shakespeare to the screen.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 629. Nonfiction Film. 3 Credit Hours.

An examination of American and world nonfiction films.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 630. Introduction to Editing. 3 Credit Hours.

Introduction to the theory and practice of motion picture editing. Short editing assignments are designed to develop students' understanding of aesthetic, and technical considerations in the art of dramatic editing.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 631. Human Computer Interaction. 3 Credit Hours.

This course will teach students about the importance human computer interaction (HCI) in the design, implementation, and evaluation of interactive computing systems for human use. The course will provide both practical application and theoretical knowledge of HCI, with practical concerns balanced by discussion of relevant theory from the literature of computer science, human factors, and interaction design.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

CIM 635. Human Centered Design. 3 Credit Hours.

This course takes a comprehensive look at human limitations and abilities and how they are key to interaction design and a great user experience. Students will learn about human behavior and how to apply UX gridlines to the design of digital interfaces. Students will also learn how to produce design deliverables for real world practice.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 636. Collaborative Innovation Laboratory. 3 Credit Hours.

In this collaboration studio course, students will form small teams and undertake real-world projects with a partnering organization. Students will be provided a design brief outlining project objectives identified by the partnering organization. Over the course of the semester, students will research, brainstorm, design, and test innovative interactive solutions for this core objective, including proposing ideas and presenting prototypes to the partnering organization. Projects that satisfy the partner's needs may result in on-going work for full implementation and exposure for students' work.

Components: LAB.

Grading: GRD.

CIM 639. Front End Fundamentals. 3 Credit Hours.

This course focuses on the job-ready skills and production workflow techniques in highest demand for front end web developers. Students will learn, practice and demonstrate the skills and principles needed to make effective use of these technologies.

Prerequisite: CIM 111 or JMM 341.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 640. Intro to Creative Coding. 3 Credit Hours.

This course will introduce students to the building blocks of creative coding within the visual and media environment.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 641. Technology Trends. 3 Credit Hours.

Trends is a foundation course intended to promote a dialogue about the current state of business, art, health, culture, and innovation.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 642. Physical Computing. 3 Credit Hours.

This seminar will examine the differences and opportunities present, between a series of physical computing techniques and rapid prototyping.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 643. Designing Innovation. 3 Credit Hours.

In this course, students will learn methods for investigating problems, prioritizing resolutions, and designing practical solutions. Students will be exposed to current technology trends and innovative projects and will critique them as a means for understanding their affordances and their possible limitations. Students will learn brainstorming techniques to fuel their creation of innovative products and will present these for feedback and further ideation.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 644. Internet and Media Activism. 3 Credit Hours.

In this course, students will examine the role of media in shaping social reform to document social issues such as poverty, human rights, social inequities, the environment, and powerless groups. We will review the philosophy and history of media as activism ranging from photography, documentary, cinema, the Internet, social media and newer forms of media. Emphasis is placed on developing a critical understanding of current media advocacy practices with a conscious goal; awareness, change minds, to affect policy, and action. At the end of the semester, students will have a fully developed project concept.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 645. Managing Interactive Media Projects. 3 Credit Hours.

This course takes a comprehensive look at managing interactive media projects from inception to implementation and maintenance.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 651. Motion Graphics and Compositing. 3 Credit Hours.

Methods, techniques and aesthetics of 2D computer animation and compositing including animated text, title design, and green screen.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 654. Advanced Motion Graphics and Compositing. 3 Credit Hours.

Extend the 2D skills of students who have taken CMP 550 to 3D motion graphics and animation. Emphasis on title design and animation.

Prerequisite: CIM 651.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 655. Science Documentary: Autism. 3 Credit Hours.

This course brings together student citizens across science, communication, and education to collaborate on content intended to reach audiences on multiple platforms. Students will be exposed to both history and cutting edge research surrounding Autism Spectrum Disorder. In addition to learning the neuroscience and genetics that underlie autism spectrum disorders, students will connect with people in the local community - to lend these issues a face and context. Students will gather information from readings, experts at the University of Miami, and the larger South Florida Community. Students will work in teams to share expertise from their fields of study to generate content for community consumption.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 658. Documentary Production. 3 Credit Hours.

An introduction to the documentary genre including the production of a documentary from start to finish.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 660. Directing the Actor. 3 Credit Hours.

The purpose of this course is to teach and practice the craft of directing, including text analysis, characterization, visualization, design, intention and rehearsal: to train students to articulate their ideas to actors and film crew.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 661. 360 Immersive Storytelling. 3 Credit Hours.

This course introduces the student to immersive storytelling techniques. This hands-on course is designed for students who want to develop the necessary skills to make immersive projects, this course sets out the tools used to tell visually effective and interactive stories. Through a wide selection of immersive material including film, games, articles, and interviews, students will also analyze immersive storytelling techniques, technologies, narrative strategies, and film theories used across media. The student will be required not only to create immersive experiences using the new technologies but to also write about new ways to think about immersive stories, moving images, interactivity, and how they affect audiences and new distribution outlets.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 666. Character and Dialogue. 3 Credit Hours.

An examination of the craft and techniques of creating original characters and dialogue.

Prerequisite: CIM 610.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 670. The Independent Producer. 3 Credit Hours.

Beyond covering the role of the producer, this hands-on class offers students a place to workshop their thesis projects. Students will brand themselves or their company and leave with a packaged project ready to take to market.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 686. Online Screenwriting. 3 Credit Hours.

The student will prepare and complete the first act of a feature-length screenplay or the student will prepare and commence the rewrite of an existing screenplay.

Components: DIL.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CIM 690. Prototyping Techniques. 3 Credit Hours.

This course covers accepted prototyping techniques introducing students to a wide variety of approaches for different kinds of user experience design problems and platforms. Students will learn to develop preliminary iteration of a solution to a design problem in order to communicate the essence of their idea without committing to a costly implementation.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 691. Capstone. 3 Credit Hours.

The capstone seminar is designed to demonstrate a student's accumulated training in Interactive Media in a single original project of their choice, subject to the instructor's approval and under the additional supervision of a faculty mentor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 692. Advanced Systems: Designing Playful Experiences. 3 Credit Hours.

Building on their systems foundation from the Intro to Systems course, students will continue to play and analyze the games along with designing games in order to build a more extensive vocabulary and toolkit to both understand and design interactive systems. Students will be exposed to a range of popular game prototyping technologies (for example: Twine, GameSalad, ARIS) and will create several mini projects as well as one final game project created using the platform of their choice. Students will explore a different core game mechanic with each prototyping tool thus broadening their ability to create targeted meaning within a playful experience.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 693. Dynamic Data. 3 Credit Hours.

This course teaches data analysis through the development of interactive web applications. The course focuses on communicating through computer programming. Students will learn to build and use databases as a primary source and explore data as content. For this course students will be required to build custom software solutions through web programming languages that utilize third party APIs to interpret, analyze and manipulate data.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 694. Motion Picture Marketing and Distribution. 3 Credit Hours.

Economic and marketing considerations in the production and distribution of motion pictures.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 695. Advanced Motion Picture Marketing. 3 Credit Hours.

Advanced marketing considerations in the distribution of motion pictures.

Prerequisite: CIM 694.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 696. Directing Techniques. 3 Credit Hours.

To build a more advanced set of professional skills and practices through scene work, shooting, and collaboration.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 697. Topics in Film Analysis. 3 Credit Hours.

Content varies by semester. Topics such as Film Directors, National Cinemas, Silent Film, Contemporary Cinema. Course may be repeated for credit if content varies.

Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 705. Production Management. 3 Credit Hours.

A comprehensive examination of the skills and techniques employed by line producers and production managers in the preproduction, production, and post-production of motion pictures.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 707. Pedagogy and Film. 3 Credit Hours.

This course covers a range of traditions in pedagogy, including history, theory, and practical applications. Intended for those who are currently teaching—or who intend to teach—at the college level, the course provides grounding in foundational approaches as well as a familiarity with recent research advancements in pedagogy.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 710. Writing the Feature-Length Screenplay. 3 Credit Hours.

Study of and practice in writing feature-length, narrative motion picture scripts. Focus is placed on cinematic structure and presentation of character. Classes will generally be conducted as follows: a discussion of screenplay craft, an in-depth analysis of various films from the writer's POV, and a critique of the various stages of your fellow student screenplays as they evolve throughout the semester.

Prerequisite: CIM 510.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 721. Game Development Studio. 3 Credit Hours.

Game Dev Studio is a project-based course devoted to developing a game. In groups, students will start with a concept and create prototypes that will be refined through multiple iterations and playtests. Your final game will either be a well-polished 2D or 3D digital game.

Components: LEC.

Grading: CNC.

Typically Offered: Fall.

CIM 727. Scriptwriting. 3 Credit Hours.

Study of and practice in writing feature-length, narrative motion picture scripts. Focus is placed on cinematic structure and presentation of character.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 730. Advanced Editing. 3 Credit Hours.

An examination of the art and techniques of post-production designed for students completing advanced motion picture projects. Lectures, group discussions and screenings. Emphasis on rhythm, dramatic moments, character arcs, symbolic vs. thematic editing, elements of sound editing, sound design, and professional mastering standards. This class is designed to develop editorial skills that will prepare students for professional careers in editing. In-depth examination of effects and sound palettes of the Avid Media Composer, as well as a discussion of how to integrate visual effects from external applications. Finishing and mastering techniques for a variety of mediums as well as a reel building will be covered.

Prerequisite: CIM 630.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 738. Writing the Short Film. 3 Credit Hours.

A course in the fundamentals of screenwriting focused on the creation of a 15-30 page screenplay suitable for an MFA project film.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 740. Sound Design. 3 Credit Hours.

Sound Design through seminar and workshop provides a practical and theoretical introduction to sound and its function in the narrative moving image process. The course utilizes professional environments to instruct in the basics of sound editing, studio recording and mixing as it is practiced in the film industry. It will also present the aesthetic use of sound and its integral part in the moving image narrative process.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 750. From Script to Screen. 3 Credit Hours.

Advanced production concepts and techniques explored in a variety of media. Students will produce an approved film or script. The class will explore the language of motion picture and how this language is utilized in the story telling process. Knowledge of both the practical and aesthetic aspects of film will be stressed at all times.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 752. Advanced Cinematography. 3 Credit Hours.

Advanced technical and photographic principles begun in CMP 651. Preparation for the filming of the MFA project film.

Prerequisite: CIM 620.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 756. Motion Picture Post-Production Procedures. 3 Credit Hours.

An examination of the esthetics of editing, recording, re-recording, and laboratory procedures following completion of principal photography.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 761. Directing the Camera. 3 Credit Hours.

An introduction to directing actors in low budget, independent films utilizing traditional, modern and evolving directorial techniques used by independent and traditional film makers: analyzing and orchestrating scripted material, developing a directorial concept, creating indelible characterizations, building a visual image, auditioning and casting the talent, blocking and directing the untrained amateur or highly skilled professional actor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 794. Motion Picture Internship. 1-3 Credit Hours.

Prescribed study and supervised work with practitioners in motion pictures.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CIM 795. Special Topics in Cinema and Interactive Media. 3 Credit Hours.

This course subject matter varies according to announced special topic. See class schedule for details.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 799. Advanced Projects and Directed Research. 1-6 Credit Hours.

Individual study, involving a project, paper or a program of research designed in consultation with a supervising faculty member. No more than six credits may be counted toward the degree.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 815. MFA Thesis. 1-6 Credit Hours.

The focus is on completing the culminating thesis project, in consultation with the student's selected committee and thesis chair.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

Civil, Architectural, and Environmental Engineering (CAE)

CAE 100. Introduction to Civil, Architectural, and Environmental Engineering. 3 Credit Hours.

This introductory course is designed to expose high school students to a variety of specific disciplines within the civil engineering arena to assist them in making informed decisions about possible college majors. The program is designed for the exemplary high school student interested in applied mathematics and science. All students enrolled in this course will gain experience in problem solving, engineering mechanics, computer simulation, and laboratory activity. The course content changes throughout the 3-week duration and includes topics on civil engineering, environmental engineering, and architectural engineering. The students will be provided with an understanding and some hands-on experience on topics relative to the disciplines of civil, architectural, and environmental engineering. Via an introduction to several case histories, the students will be able to understand the challenges associated with the design and construction and importance of the scientific methods in engineering. The laboratory and field trip experiences will deal with bridge building, material testing, water purification, and building systems.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

CAE 111. Introduction to Engineering I. 3 Credit Hours.

Use of engineering tools for problem solving. Computer techniques for data acquisition, analysis and presentation, software design, and computer aided drafting are covered. Development of design skills is achieved through several design and building competitions. Introduction to professional ethics and intellectual property rights, MATLAB, AutoCAD, and programming in C++ is also included.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CAE 112. Introduction to Engineering II. 2 Credit Hours.

Hands-on applications of various surveying instruments for leveling, angles and distance measurements, and other engineering applications. Hands on application of Geographic Information Systems, including ArcView and extensions.

Prerequisite: CAE 111.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 114. Introduction to Engineering II (GIS). 1 Credit Hour.

Fundamentals of Geographic Information Systems (GIS). Hands on application of GIS using ArcGIS and extensions.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 115. Introduction to Engineering II (Surveying). 1 Credit Hour.

Hands on application of various surveying instruments. Leveling, angles and distance measurements.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 210. Mechanics of Solids I. 3 Credit Hours.

Vectors, force systems, equilibrium, analysis of frames, machines, trusses for internal forces, friction, centroids, moment of inertia, and shear and bending moment diagrams are discussed.

Prerequisite: Engineering Program - PHY 205 And MTH 151 Or 161 Or 171. Non-Engineering Program - PHY 101 Or 103 Or 160 Or 201 And MTH 130 Or 141 Or 161 Or 171.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CAE 211. Mechanics of Solids II. 3 Credit Hours.

Fundamental material behavior including stresses, strains, and deformations associated with axial, bearing, flexural, shear, thermal, and torsional loading. Composite beams, elastic buckling of columns, combined loading, Mohr's Circle, and statically indeterminate analysis of axial members is also included.

Prerequisite: CAE 210.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CAE 212. Structural Laboratory. 1 Credit Hour.

Laboratory techniques, tests for tension, compression, shear, bending, and torsion are discussed. Models, similitudes, buckling of columns, and review of current research are also included. Laboratory 3 hours.

Prerequisite: IEN 311. Or Corequisite: IEN 311 or CAE 211.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

CAE 213. Behavior of Structural Systems I. 3 Credit Hours.

The course begins with a review of basic structural principles. From this basis, analysis and design of simple axial loaded structural systems and members is covered. Through the use of project based learning the students are introduced to the principles of statics using both graphical and calculated methods. Concurrent and non-concurrent systems are defined and analysis of concurrent systems is covered in this course. Structural systems based on concurrent forces are covered including cable suspension structures, concrete shells, trusses, fan like structures and membrane structures. The requirements of building codes are included in the lectures. The class concludes with discussion of structural materials and failure modes accompanied with a visit to the Civil/Architectural Engineering Laboratory.

Prerequisite: ARC 231.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CAE 240. Environmental Pollution. 3 Credit Hours.

Exploration of contemporary environmental issues. Introduction to engineering approaches for protecting and cleaning up the environment, techniques for assessing the impact of human activity on the environment, strategies for pollution control and implementation of environmental mitigation measures.

Requisite: Sophomore Standing or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 310. Structural Analysis. 3 Credit Hours.

Analysis of statically determinate and indeterminate structures for internal forces, external reactions, displacements, including influence lines.

Prerequisite: CAE 211.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CAE 313. Behavior of Structural Systems II. 3 Credit Hours.

Upon completion the students will understand the application of fundamental methods of structural frame systems and their place in architectural design. The bending action of beams, including shear and moment diagrams and shear and bending stress calculations are covered. Structural material design for steel, concrete, wood and masonry are covered as separate topics. They will also understand the integration of basic elements into structural systems that resist both gravity and lateral loads. The course allows students to develop foundation and framing systems.

Prerequisite: CAE 213.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 320. Concrete Structures. 3 Credit Hours.

Course topics include design of concrete beams, columns, structural systems one-way slabs, and isolated footings by ultimate design methods.

Pre or Corequisite: CAE 310.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CAE 321. Steel Structures. 3 Credit Hours.

Design of tension, compression, flexural members, and beam columns using load and resistance factor design are discussed. Introduction to design and detailing of welded and bolted connections is also included.

Pre or Corequisite: CAE 310.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 330. Fluid Mechanics. 3 Credit Hours.

Properties of fluids, gas systems, pressure distribution in static fluids, and hydrostatic forces on plane and curved surfaces are discussed. Kinematics and dynamics of fluid motion, dimensional analysis and similitude, flow in closed conduits, pumps, design of water distribution systems, and an introduction to flow in open channels is also included.

Prerequisite: CAE 211. And PHY 206.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CAE 340. Introduction to Environmental Engineering. 3 Credit Hours.

Environmental mass and energy balances, introduction to environmental chemistry, air pollution, water pollution, sustainable solid waste management, risk assessment, and global atmospheric change are discussed.

Prerequisite: MTH 162, and CHM 111 or CHM 151.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CAE 345. Environmental Laboratory and Analysis. 3 Credit Hours.

Laboratory-based course focusing on the analysis of environmental samples including water, wastewater, air, and solids. Basic analytical techniques and quality control are also included as well as an introduction to advanced analytical measurements.

Prerequisite: CHM 112 And CAE 340.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 350. Transportation Engineering I. 3 Credit Hours.

Transportation systems and organizations. Characteristics of driver, vehicles and roads. Basic probability and statistics. Traffic studies and data collection. Signal timing design, basic capacity and analysis. Basic geometric design and route surveying. Highway safety. Sustainable transportation systems.

Prerequisite: MTH 211 and Requisite: Junior Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CAE 370. Geotechnical Engineering I. 3 Credit Hours.

Soil composition and classification, excavation, grading, fill compaction, stress distribution in soils, one-dimensional flow of water through soil, laboratory, and field permeability, effective stress concept, calculation of consolidation, field settlement, bearing capacity, and design and analysis of shallow foundations are discussed.

Prerequisite: CAE 211. And Corequisite: CAE 371.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 371. Geotechnical Laboratory. 1 Credit Hour.

Evaluation of physical and mechanical properties of soils, and preparation of reports. Three hours.

Prerequisite: ENG 107. And IEN 311. And Corequisite: CAE 370.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CAE 380. Electrical and Illumination Systems for Buildings. 3 Credit Hours.

Typical electrical systems for buildings including electrical circuits, protective devices and code requirements. Illumination and lighting design.

Prerequisite: PHY 207.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 381. Building Mechanical Systems I: Hvac Fundamentals. 3 Credit Hours.

Moist air properties and psychrometric chart. Indoor air quality and thermal comfort. Air conditioning systems and processes. Heat transfer in buildings. Solar radiation. Space load analysis and calculation.

Prerequisite: MAE 303 and Corequisite: CAE 330.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 395. Undergraduate Research. 1-3 Credit Hours.

Designed for the undergraduate student who wishes to engage in research. Not for graduate credit or for baccalaureate graduation credit. Subject and credit to be arranged with the instructor.

Components: THI.

Grading: GRD.

Typically Offered: Spring.

CAE 399. Internship. 1 Credit Hour.

Practical application of classroom theory through employment with firms offering positions consistent with the student's field of study. Courses may be repeated.

Components: IND.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

CAE 400. Preparation for FE Exam. 1 Credit Hour.

Review of material in preparation for the Fundamentals of Engineering (FE) examination. For credit only.

Requisite: Senior Status.

Components: LEC.

Grading: CNC.

Typically Offered: Offered by Announcement Only.

CAE 402. Professional Engineering Practice. 3 Credit Hours.

Principles of engineering economics and economic evaluation of engineering projects. A discussion of professional practice issues including the philosophy and methodology of engineering, professional licensure and ethics. Discussion of the business aspects of engineering including business organization, management, contracts and legal issues. Engineering leadership in the formulation of public policy.

Requisite: Senior Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CAE 403. Senior Design Project I - Engineering Design. 3 Credit Hours.

A two semester comprehensive design project applying the knowledge acquired during earlier coursework and implementing the pedagogy of life-long learning. Team projects incorporate interdisciplinary design skills, engineering standards and realistic constraints. The faculty coordinator working with practicing design professionals provide consultation, guidance and recommendations on aspects such as problem definition, evaluation of design alternatives and approaches. The course progresses along the customary design sequence of pre-design, schematic design and design development phases established in Civil, Architectural and Environmental Engineering practice.

Requisite: Senior Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CAE 404. Senior Design Project II - Construction Documents. 3 Credit Hours.

The second semester of a two semester comprehensive design project applying the knowledge acquired during earlier coursework and implementing the pedagogy of life-long learning. Team projects incorporating interdisciplinary design skills, engineering standards and realistic constraints.

The faculty coordinator working with several practicing design professionals provide consultation, guidance, and recommendations on aspects of preparing the construction documents required for project procurement and construction. Using the designs produced in CAE 403 the course develops the drawings, specifications and calculations required for a comprehensive construction documents package.

Prerequisite: CAE 403.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 421. Timber Structural Systems. 3 Credit Hours.

Engineering properties of timber, design of tension, compression, and flexural members are covered. The design and detail of connections and hardware, and the design of timber systems and heavy timber construction is also included. Prerequisite: CAE 310.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 430. Water-Resources Engineering I. 3 Credit Hours.

Basic principles of open channel flow. Computation of water surface profiles. Design of hydraulic structures, design of lined and unlined open channels, and design of sanitary sewer systems. Introduction to hydrology and analysis of hydrologic data. Rainfall characteristics and peak runoff models.

Prerequisite: CAE 330.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 440. Water Quality Control Systems. 3 Credit Hours.

Physical, Chemical and Biological Transformations; Water and Wastewater Treatment Processes; Water Treatment Plant Design; Wastewater Treatment Plant Design; Case Studies

Prerequisite: CAE 330. And CAE 340.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 450. Transportation Engineering II. 3 Credit Hours.

Transportation system planning and design. Advanced geometric design for highway and railway/transit. Human, vehicle, and environmental factors affecting the design, operation, and safety of transportation systems. Planning and design of both landside/airside aspects of airport facilities. Water port and multi-modal facilities design.

Prerequisite: CAE 350.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 460. Construction Management. 3 Credit Hours.

An introduction to the management of construction projects including legal considerations as well as the techniques of management science applied to construction. The course includes engineering methods of cost and time estimating, and exercises in applications of engineering economics, network planning techniques, including CPM and PERT are introduced. The management principles of time and cost control are also explored. Computer application of project management tools are included.

Requisite: Senior Status.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 470. Foundations and Earth Retaining Systems. 3 Credit Hours.

Natural soil deposits and subsoil exploration. Geotechnical analysis and design of shallow and deep foundations. Theories of lateral earth pressure. Design and analysis of earth-filled retaining systems.

Prerequisite: CAE 330. And CAE 370. And CAE 371.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CAE 480. Plumbing and Life Safety for Buildings. 3 Credit Hours.

Design of Building environmental systems including domestic cold and hot water systems, sanitary storm and special waste systems, fuel gas systems, building life safety systems and architectural acoustics.

Prerequisite: CAE 330.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CAE 481. Building Mechanical Systems II: HVAC Systems. 3 Credit Hours.

Applies engineering principles to the design of heating, ventilating, and air conditioning (HVAC) systems for buildings. Covers air distribution systems, air handling units, coils and heat exchangers, water distribution systems, and primary systems.

Prerequisite: CAE 381. And CAE 330.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CAE 510. Structural Mechanics. 3 Credit Hours.

Analysis of stress and deformation of solids. Application to systems in the elastic and inelastic range. Topics include beams of special geometry and support, stress concentrations, stresses in elastic foundations, torsion, energy methods, failure theories, and brittle fracture.

Prerequisite: CAE 211. And CAE 310.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 511. Advanced Structural Analysis. 3 Credit Hours.

General methods of indeterminate analysis. Elements of energy method in indeterminate analysis of axial, flexural torsional, and composite members. Basic flexural and stiffness methods and matrix development are also included.

Prerequisite: CAE 211. And CAE 310.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 520. Advanced Design of Concrete Structures. 3 Credit Hours.

Analysis and design of reinforced concrete elements in the context of the current ACI Building Code; beams subjected to combined loading, flat plates, flat slabs, slender columns, connections, and concrete building systems are included.

Prerequisite: CAE 310. And CAE 320.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 521. Advanced Design of Steel Structures. 3 Credit Hours.

Steel framing systems, design of members and connections of braced and rigid frames, design for torsion, and design of steel-concrete composite members are discussed.

Prerequisite: CAE 310. And CAE 321.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CAE 522. Design of Prestressed Concrete Structures. 3 Credit Hours.

Materials and systems for prestressing, design of prestressed concrete members for flexure and shear, camber, deflection, and crack control are discussed. Design of continuous beams, compression members, two-way concrete floor systems, and the loss of prestress are also included.

Prerequisite: CAE 310. And CAE 320.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 523. Design of Masonry Structures. 3 Credit Hours.

Masonry construction. Design of flexural and compression members, bearing walls, shear walls, diaphragms, and connections of masonry structures. Arches, vaults, and buttresses are also included.

Prerequisite: CAE 310. And CAE 320.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 525. Timber Structural Systems. 3 Credit Hours.

Engineering properties of timber, design of tension, compression, and flexural members are covered. The design and detail of connections and hardware, and the design of timber systems and heavy timber construction is also included.

Prerequisite: CAE 310.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 530. Water Resources Engineering II. 3 Credit Hours.

Runoff models, routing models, water-quality models, and evapotranspiration models. Design of storm water management systems. Principles of groundwater flow. Design of wells and wellfields for public water supply. Legal regulatory, and economic components of water-resources management systems. Comprehensive design project.

Prerequisite: CAE 430.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CAE 531. Surface-Water Hydrology. 3 Credit Hours.

Rainwater characteristics, abstraction processes, surface-runoff, routing, and water-quality models. Design of stormwater-management systems, evapotranspiration, and regional water-management is also included as well as case studies.

Prerequisite: CAE 430.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 532. Ground-Water Hydrology. 3 Credit Hours.

Governing equations of ground-water flow. Numerical modeling of ground-water flow. Analytic and semi-analytic solutions to the flow equations. Principle of superposition and method of images. Saltwater intrusion. Ground-water flow in the unsaturated zone. Engineered systems. Introduction to contaminant fate and transport in ground water.

Prerequisite: CAE 430.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 533. Water-Quality Control in Natural Systems. 3 Credit Hours.

Water quality regulations, fate and transport processes, water-quality control in rivers, lakes, wetlands, oceans, and ground water.

Pre or Corequisite: CAE 430. And CAE 440.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 540. Environmental Chemistry. 3 Credit Hours.

Kinetics, equilibrium, acid-base, oxidation-reduction, and reaction chemistry applied to water and wastewater engineering.

Prerequisite: CHM 112.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 541. Engineering Systems for Disease Control and Bioremediation. 3 Credit Hours.

Classification of microorganisms. Microbial agents of infectious diseases and modes of disease transmission. Control of pathogens through water and waste treatment, food protection, and insect control. Microbial ecology and bioremediation systems. Laboratory exercises in microbiology.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 542. Solid and Hazardous Waste Engineering. 3 Credit Hours.

Solid-waste characteristics, recycling, incineration, hazardous waste characteristics, prevention, and physical and chemical treatment are covered. Design projects are also included.

Prerequisite: CAE 340.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 543. Air Pollution Control Engineering. 3 Credit Hours.

Fundamentals of air pollution and air quality; properties and control of particulates, volatile organic compounds, carbon monoxide, sulfur oxides, and nitrogen oxides; motor vehicle emissions; health and aesthetic effects (acid rain, visibility), laws and regulations, meteorology and pollutant transport in the atmosphere; indoor air pollution.

Prerequisite: MAE 303. And CAE 330. Or MAE 309.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 560. Sustainable Construction. 3 Credit Hours.

Drivers and foundations of sustainable construction. Principles of sustainable construction: integrated planning and design, life-cycle view of projects, resource selection and optimization, protection of the natural environment, toxics and pollutants elimination, durability and quality. Green building assessment initiatives, green building policies, and code impacts. Evaluation of the environmental impacts of construction operations. Innovative design and construction practices. Economic viability. Subtropical and coastal issue and opportunities. Case studies.

Pre or Corequisite: CAE 403. Or CAE 404.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 561. Computer Aided Architectural Engineering Design. 3 Credit Hours.

The course prepares students to utilize Building Information Modeling (BIM) and Building Performance Analysis (BPA) in a coordinated, integrated and consistent approach in the Architecture, Engineering and Construction (AEC) Industry. The basics of high-quality 5 dimensional BIM modeling are covering including 3D modeling of buildings and building components, imbedded cost-estimating and the phasing the construction process. Basics of REVIT Structure and MEP are also covered. BPAC components covered include climate analysis, daylighting, wind and airflow analysis, solar radiation analysis and whole building energy analysis. Upon completion student will receive a PBA certification from Autodesk.

Requisite: Junior Status or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CAE 570. Advanced Foundation Engineering. 3 Credit Hours.

Rock and soil formation. Subsurface exploration. Advanced design and analysis of shallow and deep foundations. Design and analysis of cofferdams.

Prerequisite: CAE 470.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 581. Energy-Efficient Building Design. 3 Credit Hours.

Concepts and methods of energy-efficient building design and sustainable performance. Topics cover building envelope, mechanical, power and lighting, and service water heating systems. Computer-based energy simulation methods and building energy standards are emphasized.

Prerequisite: CAE 481.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 582. Building Energy Modeling and Simulation. 3 Credit Hours.

Modeling and analysis of building energy performance using state-of-art whole building energy simulation programs. Topics include dynamic simulation of heating and cooling loads in buildings, modeling of building equipment and control system, and integrated simulation of equipment and building loads.

Pre-Co-requisite: CAE 581.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 590. Special Topics. 1-3 Credit Hours.

Sub-titles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Special Topics."

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 595. Special Problems. 1-3 Credit Hours.

Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.

Components: IND.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 604. Master's Design Project. 3 Credit Hours.

Course is taken in place of CAE 404 for students accepted to the Bachelor to Master (4+ 1) degree program in the CAE Department. A project elaborating on a topic from the students Senior Design Project is the basis of the course. See CAE 403 and CAE 404 for the description of the Senior Design Project.

Prerequisite: CAE 403.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 610. Structural Mechanics. 3 Credit Hours.

Analysis of stress and deformation of solids. Application to systems in the elastic and inelastic range. Topics include beams of special geometry and support, stress concentrations, stresses in elastic foundations, torsion, energy methods, failure theories, and brittle fracture.

Prerequisite: CAE 211. And CAE 310.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 611. Advanced Structural Analysis. 3 Credit Hours.

General methods of indeterminate analysis. Elements of energy method in indeterminate analysis of axial, flexural torsional, and composite members. Basic flexural and stiffness methods and matrix development are also included.

Prerequisite: CAE 211. And CAE 310.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 620. Advanced Design of Concrete Structures. 3 Credit Hours.

Analysis and design of reinforced concrete elements in the context of the current ACI Building Code; beams subjected to combined loading, flat plates, flat slabs, slender columns, connections, and concrete building systems are included.

Prerequisite: CAE 310. And CAE 320.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 621. Advanced Design of Steel Structures. 3 Credit Hours.

Steel framing systems, design of members and connections of braced and rigid frames, design for torsion, and design of steel-concrete composite members are discussed.

Prerequisite: CAE 310. And CAE 321.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CAE 622. Design of Prestressed Concrete Structures. 3 Credit Hours.

Materials and systems for prestressing, design of prestressed concrete members for flexure and shear, camber, deflection, and crack control are discussed. Design of continuous beams, compression members, two-way concrete floor systems, and the loss of prestress are also included.

Prerequisite: CAE 310. And CAE 320.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 623. Design of Masonry Structures. 3 Credit Hours.

Masonry construction. Design of flexural and compression members, bearing walls, shear walls, diaphragms, and connections of masonry structures. Arches, vaults, and buttresses are also included.

Prerequisite: CAE 310. And CAE 320.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 625. Timber Structural Systems. 3 Credit Hours.

Engineering properties of timber, design of tension, compression, and flexural members are covered. The design and detail of connections and hardware, and the design of timber systems and heavy timber construction is also included.

Prerequisite: CAE 310.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 630. Water Resources Engineering II. 3 Credit Hours.

Runoff models, routing models, water-quality models, and evapotranspiration models. Design of storm water management systems. Principles of groundwater flow. Design of wells and wellfields for public water supply. Legal regulatory, and economic components of water-resources management systems. Comprehensive design project.

Prerequisite: CAE 430.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CAE 631. Surface-Water Hydrology. 3 Credit Hours.

Rainwater characteristics, abstraction processes, surface-runoff, routing, and water-quality models. Design of stormwater-management systems, evapotranspiration, and regional water-management is also included as well as case studies.

Prerequisite: CAE 430.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 632. Ground-Water Hydrology. 3 Credit Hours.

Governing equations of ground-water flow. Numerical modeling of ground-water flow. Analytic and semi-analytic solutions to the flow equations. Principle of superposition and method of images. Saltwater intrusion. Ground-water flow in the unsaturated zone. Engineered systems. Introduction to contaminant fate and transport in ground water.

Prerequisite: CAE 430.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 633. Water-Quality Control in Natural Systems. 3 Credit Hours.

Water quality regulations, fate and transport processes, water-quality control in rivers, lakes, wetlands, oceans, and ground water.

Pre or Corequisite: CAE 430. And CAE 440.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 640. Environmental Chemistry. 3 Credit Hours.

Kinetics, equilibrium, acid-base, oxidation-reduction, and reaction chemistry applied to water and wastewater engineering.

Prerequisite: CHM 112.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 641. Engineering Systems for Disease Control and Bioremediation. 3 Credit Hours.

Classification of microorganisms. Microbial agents of infectious diseases and modes of disease transmission. Control of pathogens through water and waste treatment, food protection, and insect control. Microbial ecology and bioremediation systems. Laboratory exercises in microbiology.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CAE 642. Solid and Hazardous Waste Engineering. 3 Credit Hours.

Solid-waste characteristics, recycling, incineration, hazardous waste characteristics, prevention, and physical and chemical treatment are covered. Design projects are also included.

Prerequisite: CAE 340.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CAE 643. Air Pollution Control Engineering. 3 Credit Hours.

Fundamentals of air pollution and air quality; properties and control of particulates, volatile organic compounds, carbon monoxide, sulfur oxides, and nitrogen oxides; motor vehicle emissions; health and aesthetic effects (acid rain, visibility), laws and regulations, meteorology and pollutant transport in the atmosphere; indoor air pollution.

Prerequisite: MAE 303. And CAE 330. Or MAE 309.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 660. Sustainable Construction. 3 Credit Hours.

Drivers and foundations of sustainable construction. Principles of sustainable construction: integrated planning and design, life-cycle view of projects, resource selection and optimization, protection of the natural environment, toxics and pollutants elimination, durability and quality. Green building assessment initiatives, green building policies, and code impacts. Evaluation of the environmental impacts of construction operations. Innovative design and construction practices. Economic viability. Subtropical and coastal issue and opportunities. Case studies.

Pre or Corequisite: CAE 403. Or CAE 404.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 661. Computer Aided Architecture Engineering Design. 3 Credit Hours.

The course prepares students to utilize Building Information Modeling (BIM) and Building Performance Analysis (BPA) in a coordinated, integrated and consistent approach in the Architecture, Engineering and Construction (AEC) Industry. The basics of high-quality 5 dimensional BIM modeling are covering including 3D modeling of buildings and building components, embedded cost-estimating and the phasing the construction process. Basics of REVIT Structure and MEP are also covered. BPAC components covered include climate analysis, daylighting, wind and airflow analysis, solar radiation analysis and whole building energy analysis. Upon completion student can receive a PBA certification from Autodesk.

Requisite: Senior Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CAE 670. Advanced Foundation Engineering. 3 Credit Hours.

Rock and soil formation. Subsurface exploration. Advanced design and analysis of shallow and deep foundations. Design and analysis of cofferdams.

Prerequisite: CAE 470.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 681. Energy-Efficient Building Design. 3 Credit Hours.

Concepts and methods of energy-efficient and environmentally-friendly building design. Topics include energy and sustainable design strategies, climate, passive and active solar design, passive cooling systems, day lighting, and computer simulation of energy flows in buildings. A quantitative understanding of energy fundamentals, examples from practice, and design exercises using computer simulation programs are emphasized.

Prerequisite: CAE 481.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 682. Building Energy Modeling and Simulation. 3 Credit Hours.

Modeling and analysis of building energy performance using state-of-art whole building energy simulation programs. Topics include dynamic simulation of heating and cooling loads in buildings, modeling of building equipment and control system, and integrated simulation of equipment and building loads.

Pre-Co-requisite: CAE 581.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 690. Special Topics. 1-3 Credit Hours.

Sub-titles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Special Topics."

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 695. Special Problems. 1-3 Credit Hours.

Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.

Components: IND.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 702. Finite Element Methods. 3 Credit Hours.

Variational principles and their application to finite element methods. Applications to: plane stress and plane strain, three-dimensional stress analysis, bending of plates, and axi-symmetric shells. Lecture, 3 hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 711. Theory of Elasticity. 3 Credit Hours.

Analysis of stress, strain, and displacement in elastic solids. Basic equations of elasticity. Two-dimensional solutions of beams and other problems in rectangular and polar coordinates. Torsion of bars. Energy methods. Selected topics. Lecture, 3 hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 712. Structural Reliability. 3 Credit Hours.

Basic theory and tools of structural reliability including theory of probability, statistical assessments as well as inference and model building. Topics include: review probability theory; descriptive statistics; uncertainty modeling; estimation and model building; structural reliability theory; first and second order reliability methods; Level I methods/code calibration; load combinations; Bayesian decision analysis and reliability updating.

Prerequisite: IEN 311.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 714. Structural Dynamics. 3 Credit Hours.

Elementary structural dynamic analysis covering single degree-of-freedom and multiple degree-of-freedom systems. Topics include: free, damped and forced vibrations; transmissibility and ground motion; arbitrary, step and pulse excitation; numerical evaluation; rigid and flexible bodies; natural frequencies and modes; tuned-mass dampers; responses and spectrum; practical indications as well as an introduction to wind and earthquake engineering.

Prerequisite: CAE 310.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 716. Fracture Mechanics. 3 Credit Hours.

Theory of fracture mechanics for linear elastic and nonlinear material behavior, energy release rate, stress intensity factor, and J-integral with practical application to brittle fracture and fatigue. Case studies involving civil infrastructure such as bridges, buildings, pipelines and ships. Metallurgical aspects of fatigue and fracture.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 730. Environmental Hydrology. 3 Credit Hours.

Principles of ecohydrology, agricultural hydrology, impacts of climate change, fundamentals of remote sensing and geographic information systems for hydrologic applications, statistical applications in hydrology.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 731. Wastewater Treatment and System Design. 3 Credit Hours.

Characterization of domestic wastewater and flows. Sources of wastewater and health considerations. Unit processes for treatment of wastewater including screening, sedimentation, filtration, flocculation floatation, activated sludge, disinfection, sludge digestion, and sludge disposal.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 732. Water Treatment and System Design. 3 Credit Hours.

Drinking water treatment standards, philosophy of setting standards, public health aspects of organic and inorganic contaminants, basis for design of treatment facilities, design of unit processes for aeration, sedimentation, coagulation, filtration, softening, disinfection, and oxidation are covered. Theory of membrane processes, ion exchange, and water treatment plant residuals are also included.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 735. Water and Wastewater Engineering: Treatment and Reuse. 3 Credit Hours.

Physical treatment processes; Chemical unit processes; Advanced biological treatment processes; Sludge treatment and disposal; Industrial water supply and wastewater treatment; Membrane systems for wastewater treatment and case studies; Advanced wastewater treatment and reuse; Environmental nanotechnology.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CAE 743. Risk Analysis. 3 Credit Hours.

Probabilistic risk assessment, Poisson processes, Bayesian methods, fault trees, contaminant transport models, and dose-response relationships for assessment of natural and technological risks.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 744. Risk and Resilience. 3 Credit Hours.

Introduction to Risk Management, and Resilience. Topics include: Hazards Risk Management, Risk Management for the Private Sector, Hazard Risk Management Approach, Mitigation Planning, Forming Partnerships and Involving the Public, Establishing Context for Risk Management, Identifying Hazards. Scope Vulnerability and Understand Capacity, Analyze and Assess Risk, Identify and Assess Risk Reduction Measures, Financing Risk Reduction.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 762. Construction Project Management. 3 Credit Hours.

This course is designed to provide a practical background and working knowledge of how Construction Projects are developed and managed through professional Program Management. Elements consisting of Program Organization, Program and Project conception, Project planning, Scoping, effective project communication strategies, budgeting, scheduling, controls, resource and cost management and behaviors of the Program Manager to lead. The Project Management Body of Knowledge (PM BoK) guide relating to scope, time, cost, quality and other knowledge areas for planning and control of projects throughout their entire lifecycle. This course will also explore various applications that use construction project management software such as Primavera, eBuilder, etc. as interactive platform tools. Key leadership skills and managerial styles needed to effectively build, manage, and lead a successful project team.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CAE 780. Indoor Environmental Modeling. 3 Credit Hours.

Prediction of indoor environment using computational fluid dynamics techniques. Advanced topics in thermal comfort and indoor air quality. Basic concepts of turbulence modeling and numerical methods for natural, forced, and mixed convection and jet flows indoors. Simulation of air velocity, temperature, and contaminant concentrations in buildings. Comparison of the simulated results with measured data.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 781. Advanced Building Energy Modeling and Simulation. 3 Credit Hours.

Equation-based object-oriented building energy modeling. Coupling of different building simulation tools. Applications in rapid prototyping of new building systems, model-based design and evaluation of building control, and building performance evaluation.

Prerequisite: CAE 582. Or CAE 682.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CAE 790. Advanced Topics. 1-3 Credit Hours.

Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 795. Special Problems. 1-3 Credit Hours.

Research and/or design projects. Individual investigation of current problems. Offered by special arrangement only.

Components: IND.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 810. Master's Thesis. 1-6 Credit Hours.

The student working on his/her Master's thesis enrolls for credit as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

CAE 820. Research in Residence. 1-6 Credit Hours.

Used to establish research in residence for the thesis for the Master's degree after the student has enrolled for the permissible cumulative total in CAE 810. Credit not granted. May be regarded as full-time residence.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

CAE 825. Continuous Registration--Master's Study. 1 Credit Hour.

To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full-time residence.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

CAE 830. Pre-Candidacy Doctoral Dissertation. 1-12 Credit Hours.

Doctoral dissertation credits taken prior to the Ph.D. student's candidacy. The student will enroll for credit as determined by his/her advisor. Not more than 12 credit hours of CAE 830 may be taken in a regular semester, nor more than 6 credit hours in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

CAE 840. Post-Candidacy Doctoral Dissertation. 1-12 Credit Hours.

Doctoral dissertation credits taken after the Ph.D. student has been admitted to candidacy. The student will enroll for credit as determined by his/her advisor. Not more than 12 credit hours in CAE 840 may be taken in a regular semester, nor more than 6 credits in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

CAE 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the Ph.D. after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Classics (CLA)

CLA 210. The Greek and Latin Roots of English. 3 Credit Hours.

Equips students with the tools needed to analyze and understand the meanings of English words with Ancient Greek and Latin roots. Special attention will be paid to legal and medical terminology.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CLA 219. Writing on Greek and Roman Mythology. 3 Credit Hours.

A companion writing course for students enrolled in CLA 220, Greek and Roman Mythology.

Prerequisite: CLA 220.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CLA 220. Greek and Roman Mythology. 3 Credit Hours.

The major political, cultural, and social themes that appear in Greek and Roman mythology, examining literary and material evidence.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 221. Sports and Society in the Ancient World. 3 Credit Hours.

The role of sports in ancient Greek and Roman culture. Topics covered include: Mycenaean bull-Jumping; athletic events in Homer; the Olympic games; chariot racing and gladiatorial combat at Rome; and the connection between public athletics and religion. Students learn to interpret literary and iconographic evidence, and study architectural remains such as the stadium at Olympia, the Circus Maximus, and the Colosseum.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CLA 222. Sexuality and Gender in the Ancient World. 3 Credit Hours.

Basic questions of sexuality and gender in ancient Greece and Rome: What does it mean to be male or female? What can we discover about ourselves from the way(s) we have sex? How are all these things related to life, love, power?

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 224. The Heroic Journey. 3 Credit Hours.

The figure of the Hero On a Journey has long captivated the minds of story-tellers and audiences. This motif, known as "The Monomyth," speaks the profoundest hopes and fears of humankind. This course will examine the Monomyth as it occurs particularly in the classical tradition from Gilgamesh to Tolkien.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CLA 225. Magic and the Occult in Antiquity. 3 Credit Hours.

A broad sweep of evidence for magic and the occult in the ancient Mediterranean world. The focus is Graeco-Roman Egypt, renowned in antiquity for occult arts such as divination, daemonology, astrology, and alchemy. The primary sources analyzed are diverse, and include magical formulae, manuals, recipes, curses, philosophical writings, and literary accounts, in particular those by Lucian and Apuleius, purporting to provide true tales of magic.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CLA 226. Greek and Roman Art. 3 Credit Hours.

The course is an introduction to ancient Greek and Roman art within its socio-political and religious context. It includes a survey of stylistic movements, elements of architecture, and a brief historical background for each period outlined in the syllabus.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CLA 231. Sciences in Ancient Greece and Rome. 3 Credit Hours.

The beginnings of scientific investigation in ancient Greece and its development and codification under the Roman Empire.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 232. Topics in Ancient Law, Trials from the Ancient Legal World. 3 Credit Hours.

This course examines selected trials from ancient Greece and Rome both as a way to understand these legal systems in themselves and as a way to explore the cultures, values, and biases that shaped them.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CLA 233. Ancient Medicine. 3 Credit Hours.

Provides a historical survey of evidence, practices, and ideas from the world of ancient medicine.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CLA 241. Greek Civilization. 3 Credit Hours.

This course introduces key concepts, events, and personalities of Greek culture.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CLA 242. Roman Civilization. 3 Credit Hours.

Introduces key concepts, events, and personalities of ancient Roman culture.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CLA 243. The Art of Government in Greece and Rome. 3 Credit Hours.

Introduces key concepts and models of Greek and Roman Statecraft, including the polis democracy, the Republic and the Empire.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CLA 246. Ancient Rhetorical Theory. 3 Credit Hours.

The historical development of, and key topics in, theories of persuasive communication developed by the ancient Greeks and Romans.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 271. Ancient Philosophy. 3 Credit Hours.

What is knowledge, and how can it be known? Why be moral? What is justice? What is the good life? If we really have free will, can there be such a thing as destiny? In what does friendship consist? What exactly is love? What is the meaning of death? These and other questions were addressed powerfully by the ancient Greeks and Romans. This course will explore such crucial philosophical themes, along with the actual method(s) of inquiry that the ancients devised for examining them. Major figures such as Plato and Aristotle will be featured, along with fragments of the Presocratics and selections from other ancient philosophers.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CLA 301. Ancient Greece. 3 Credit Hours.

Greek civilization from the Late Bronze Age to the end of Greek independence at the battle of Chaeronea in 338 B.C.E.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CLA 302. The Hellenistic Age. 3 Credit Hours.

Conquests of Alexander the Great and the spread of Greek culture in the Near East under Alexander's successors until the death of Cleopatra in 31 B.C.E.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CLA 303. The Roman Republic. 3 Credit Hours.

Roman civilization from the establishment of the Republic until the Battle of Actium in 31 B.C.E.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CLA 304. The Roman Empire. 3 Credit Hours.

Roman civilization from the reign of Augustus in 37 B.C.E. to the Fall of Rome in 476 C.E.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CLA 305. What is a Classic?. 3 Credit Hours.

An explanation of what it means to designate a work of art as 'a classic', in our own culture as well as in other times and places. In order to arrive at a more sophisticated understanding of the category, readings will be chosen from a variety of texts, selected from the world's treasury of acknowledged 'classics,' beginning from the canon of ancient Greek and Roman literature that for many centuries has been the touchstone of Western civilization.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CLA 310. Survey of Ancient Greek Literature and Culture. 3 Credit Hours.

Classical Greek culture, paying special attention to Greek literature from Homer to Aristotle. It is intended to lay a foundation for understanding how Hellenic thought and art influenced the development of all subsequent Western culture. All texts will be read in English translation.

Components: SEM.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 311. Survey of Classical Latin Literature and Culture. 3 Credit Hours.

A broad introduction (in English translation) to the literature of the Roman Republic and Empire. The Greek heritage behind Latin literature will be highlighted. Readings will be chosen from authors such as Catullus, Cicero, Vergil, Horace, Ovid, Petronius, Juvenal, Tacitus, and Suetonius, and from genres such as epic and lyric poetry, oratory, history and satire.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 315. The Classical Epic Tradition. 3 Credit Hours.

The course treats the rise and development of the Western epic tradition from Homer, Lucretius, and Virgil in the classical world, through Dante in the Middle Ages, Milton in the Renaissance, and Wordsworth and Eliot in modernity.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 322. Monsters and Fantastical Creatures in Western Antiquity and Other Cultures. 3 Credit Hours.

An explanation of the notion of the "monster" and the "fantastic creature" in a range of literary and visual representations from classical antiquity (the Greek and Roman World) and other cultures from various time periods. Starting with Hesiod's "Catalogue of Monsters" we examine the following questions: Whose mental projection is embodied in a given monster? Are there different categories of monsters? What does the monster represent? What fears does the monster crystallize?

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 323. The Ancient World on Screen. 3 Credit Hours.

How do we represent the ancient Greeks and Romans in modern media? What happens to the books the ancients wrote when these are turned into modern films, TV shows or video games?

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 324. Classical Myth and Contemporary Art. 3 Credit Hours.

The use, adaptation, transformation, and re-figuring of Classical myth in contemporary art. The artwork will range from photographs to installations and videos. We will use theories drawn from both art criticism and literary criticism. Female artists and post-feminist theory will figure prominently as a way to bring a broader perspective to a scrutiny of the marked gender imbalance in Classical myth.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CLA 325. The Vampire in Folklore, Fiction, and Film. 3 Credit Hours.

By pondering the role of vampires and other such monsters, in folklore, fiction, and film, this course attempts to ponder such fundamental questions as "What does it mean to be human?" and "What are the implications of death?" The tradition will be traced from its earliest antecedents in the ancient world to its latest manifestations in current fiction and screen media.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 326. What Does it Mean to be Human. 3 Credit Hours.

Questions of Artificial Intelligence, the Singularity, Superintelligence, and Robotics capture our imaginations (and sometimes stir profound anxiety and fear). But are these technological developments merely phenomena of the 20th and 21st centuries? Or are the key issues entailed already adumbrated in the literatures and cultures of the ancient Greeks and Romans? This course explores the parameters of that most-fundamental question of the Humanities: What does it mean to be human? Is 'human' a discrete category with well-defined boundaries, or have fuzzy logic and the dizzying pace of technological percentage a human body must be organically/naturally produced (as opposed to mechanically/technologically engineered) in order to be considered human. The course will entail reading assignments from the Greek and Roman classics (in English translation); weekly screenings of movies (including television programs); and in-class discussion.

Components: SEM.

Grading: GRD.

CLA 340. Greek Tragedy. 3 Credit Hours.

Readings in English of the tragedies of Aeschylus, Sophocles, and Euripides.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CLA 341. Comedy in Ancient Athens and Rome. 3 Credit Hours.

The comic plays of the ancient Greeks and Romans in English translation. The focus is close reading and analysis of plays by Aristophanes, Menander, Plautus, and Terence, with a view to their socio-political, cultural, and historical milieu. The final weeks are devoted to reception of these works by Shakespeare and Molière.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CLA 360. Women in Greek and Roman Antiquity. 3 Credit Hours.

The lives of women in ancient Greece and Rome. The historical panorama extends from the Mycenaean period ca. 1200 BC to the end of the Roman Empire in the West, 476 AD. The role and influence of Women as mothers and wives in control of the household will be examined in detail. Other themes such as love, death, marriage, divorce, legal and social status, foreign women, spinsters, wise women such as Diotima and Aspasia, Women in the arts and women of power, these will be considered through a close study of historical and literary texts as well as material culture.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CLA 370. Self and Other in the Ancient World. 3 Credit Hours.

The course examines Greek and Roman depictions of outsiders in a wide range of ancient texts and material sources.

Prerequisite: ENG 105 and ENG 106 or ENG 106.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CLA 372. Greek Religion. 3 Credit Hours.

Examines the religious thought and practice of the ancient Greek-speaking world from the Bronze Age to the first century CE. Major topics include ritual, sacrifice, prayer, chthonic and sky deities, oracles, and mystery-cults. Students will learn to interpret primary source material, such as the epic poems of the archaic period, the so-called Homeric Hymns, and objects of material culture.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CLA 373. Religions of Rome. 3 Credit Hours.

The religious practices of ancient Romans. Major topics include the machinery of state cult, the importation of foreign divinities to Rome, the deification of emperors, and Roman attitudes towards the Christians. Students will learn to interpret primary source material, such as the writings of Varro, Cicero, the historians, and St. Augustine, and archeological evidence

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CLA 401. Special Topics in Classics. 3 Credit Hours.

This course will address a specific author, topic or text (appearing as a subtitle). Required readings will be in English. Analogous to REL 404-409 courses.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 402. Special Topics in Classics. 3 Credit Hours.

This course will address a specific author, topic or text (appearing as a subtitle). Required readings will be in English. Analogous to REL 404-409 courses.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 403. Special Topics in Classics. 3 Credit Hours.

This course will address a specific author, topic or text (appearing as a subtitle). Required readings will be in English. Analogous to REL 404-409 courses.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 404. Special Projects in Classics. 3 Credit Hours.

This course will address a specific project in Classics (appearing as a subtitle). Analogous to REL 407-409.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 405. Special Projects in Classics. 3 Credit Hours.

This course will address a specific project in Classics (appearing as a subtitle). Analogous to REL 407-409.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 406. Special Projects in Classics. 3 Credit Hours.

This course will address a specific project in Classics (appearing as a subtitle). Analogous to REL 407-409.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 422. Aristophanes. 3 Credit Hours.

Readings from Aristophanes' plays in the original Ancient Greek.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CLA 491. Directed Reading in Classics. 1-3 Credit Hours.

Content to be determined by faculty member and registering student(s).

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 492. Directed Reading in Classics. 3 Credit Hours.

This course will address a specific author, topic or text (appearing as a subtitle). Analogous to REL 401-403 courses and to (existing)CLA 491.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 493. Directed Reading in Classics. 3 Credit Hours.

This course will address a specific author, topic or text (appearing as a subtitle). Analogous to REL 401-403 courses and to (existing) CLA 491.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 495. Senior Thesis I. 3 Credit Hours.

Components: THE.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 496. Senior Thesis II. 3 Credit Hours.

Part II of the project or thesis normally completed in the senior year.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 505. Seminar in Ancient Studies. 3 Credit Hours.

Topics in Greek and Roman studies.

Components: SEM.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 605. Graduate Seminar in Ancient Studies. 3 Credit Hours.

A graduate-level seminar focused on various topics in Classical history, literature and culture.

Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CLA 691. Direct Readings in Classical Studies for Graduate Students. 3 Credit Hours.

Graduate students will pursue supervised, directed readings on various classical topics.

Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

Clinical and Translational Investigation (CTI)

CTI 602. Writing for Translational and Clinical Science. 2 Credit Hours.

This introductory core course will be taught by the Masters of Science in Clinical and Translational Investigation (MSCTI) Program Directors, as well as various guest lecturers. The focus of the course will be on developing grant and manuscript writing skills in the area of clinical and translational science across the translational science spectrum.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CTI 603. Research Ethics. 3 Credit Hours.

Course focuses on topics related to what is sometimes called the "responsible conduct of research" (RCR). It covers the landscape of "scientific integrity" - both the principles and day-to-day practicalities of research ethics. The course is inter-disciplinary in its approach. Readings and other materials used as part of the course draw on the examples from many academic fields, and are intended to have application to any academic or professional area of study in which research is conducted.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CTI 604. Advanced Independent Study. 1-3 Credit Hours.

Individual work on a special project and/or additional coursework under faculty guidance.

Components: IND.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CTI 605. Introduction to Team Science and Entrepreneurship. 2 Credit Hours.

This introductory core course will introduce students to fundamental topics in translational science related to team science and entrepreneurship. Through a series of lectures, participatory exercises, and guided discussions, students will learn practical strategies for engaging in team science and for developing a translational research project into an entrepreneurial endeavor.

Components: DIS.

Grading: GRD.

Typically Offered: Fall.

CTI 805. Capstone Project / Master's Thesis. 1-6 Credit Hours.

The Capstone Project is an opportunity for MSCTI students to apply the principles and practices of clinical and translational research, and is a vital component in the training of impactful clinical and translational investigators. Students will engage in research, produce publishable content, and advance their research careers.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Communication (COM)

COM 101. Mass Media Communication in Society. 3 Credit Hours.

A survey of the history, development, structure, and effects of mass communication media.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

COM 250. Freedom of Expression and Communication Ethics. 3 Credit Hours.

An examination of the concept of freedom of expression, its philosophical roots, its application of contemporary issues in communication, and of the basics of moral philosophy (ethics) and moral reasoning.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

COM 302. Structured Research and Practice at SoC Consultancy. 1-3 Credit Hours.

Students will engage in structured participation in programmatic research and applied practice through the SoC Consultancy.

Requisite: Sophomore or Higher and Min Cumulative GPA 2.5.

Components: PRA.

Grading: GRD.

Typically Offered: Fall.

COM 395. Honors Seminar in Communication. 3 Credit Hours.

An examination of central issues and topics in the field of Communication.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

COM 401. Honors Communication Colloquium. 3 Credit Hours.

An examination of central issues and topics in the field of Communication.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

COM 406. Special Topics in Communication. 3 Credit Hours.

Course subject matter varies according to announced special topic. See class schedule for details.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COM 499. Senior Honors Project/Thesis. 3 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

COM 601. Theories of Communication. 3 Credit Hours.

Comparison of theories dealing with the processes and effects of communication is discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

COM 602. Methods of Communication Research. 3 Credit Hours.

A comprehensive survey of communication research methods. Qualitative and quantitative approaches will be explained and practiced.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

COM 603. Qualitative Research Methodologies. 3 Credit Hours.

Research methods and theories for participant-observation, phenomenology, symbolic interactionism, ethnomethodology, content analysis, and historical-critical interpretation.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

COM 604. Advanced Communication Research Methods and Statistics. 3 Credit Hours.

Provides an advanced examination of the problems and methods found in quantitative communication research.

Prerequisites: COM 601, COM 602.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COM 605. Theories and Methods for Mass Communication Research. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

COM 606. Visual and Narrative Theories. 3 Credit Hours.

This course surveys theories of film, visual communication, design, game and interactive theory, critical analysis, cultural studies.

Prerequisite: COM 601 and Requisite: Doctoral Standing.

Components: SEM.

Grading: GRD.

Typically Offered: Spring.

COM 607. Survey of Media Production. 3 Credit Hours.

This course gives students an overview on how to produce compelling media stories. Students will learn key concepts and design principles used in modern media production. Students will develop a website and a short film using learned key concepts in creating and effective multimedia experience.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

COM 608. Designing and Producing Messages. 3 Credit Hours.

Drawing on message design theories from areas such as persuasion and discourse studies and using creative and secondary research skills, students design and implement a production such as a public service announcement, short documentary, microsite, game prototype, or data visualization project.

Prerequisite: COM 601 and 602 and 607.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

COM 609. Special Topics in Communication. 3 Credit Hours.

This course subject matter varies according to announced special topic. See class schedule for details.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COM 610. Doctoral Colloquium. 1-3 Credit Hours.

This course will introduce students to the nature and scope of doctoral study. The topics of this course include different aspects of engaging productively with the doctoral program, such as developing a research program, publication, grant writing, and job search dynamics.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

COM 612. Pedagogy. 3 Credit Hours.

This course focuses on the traditions as well as the recent advances in pedagogy, including its historical, theoretical and practical applications with the aim of preparing students to teach at the University level.

Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

COM 615. Social Effects of Mass Communication. 3 Credit Hours.

Roles, functions, and consequences of mass communication in American society.

Prerequisite: COM 601.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

COM 620. Structured Research and Practice in SoC Consultancy. 1-3 Credit Hours.

Students engage in programmatic research and applied practice through structured participation at the SoC Consultancy.

Requisite: Graduate and Min Cumulative 3.0 GPA.

Components: PRA.

Grading: GRD.

Typically Offered: Fall.

COM 672. Seminar in Persuasive Communication. 3 Credit Hours.

This course is designed to provide students with a basic understanding of the role of communication in the persuasion process. This will be achieved by exploring historical and contemporary theories of persuasion as well as examining research that has focused on persuasion.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COM 695. Directed Readings. 1-3 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

COM 698. Independent Research. 3 Credit Hours.

An in-depth, hands-on course in which students conduct a research project using the specified research method. May include experimental design, advanced qualitative methods, content analysis, or survey methods. Repeatable up to 6 credits.

Prerequisites: COM 602, COM 603.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

COM 810. Master's Thesis. 1-6 Credit Hours.

The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

COM 820. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in COM 710 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

COM 825. Continuous Registration--Master's Study. 1 Credit Hour.

To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

COM 830. Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor, but for not less than a total of 12 hours.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

COM 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

Communication Studies (COS)

COS 112. Interpersonal Communication. 3 Credit Hours.

Overview of current theories of interpersonal communication. Consideration is given to impression formation, relationship between self-concept and others, function of language in social interaction, and development and maintenance of relationships.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

COS 120. Exploring Human Communication. 3 Credit Hours.

Students learn to read and interpret quantitative and qualitative research methods. Students develop skills in basic qualitative methods (focus groups, observation) and quantitative methods (surveys, polls, comparisons, basic statistical analysis) for use in daily and professional life.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

COS 210. Writing for Communication Studies. 3 Credit Hours.

Principles of writing, reviewing literature, and synthesizing research for communication studies and the social sciences.

Prerequisite: COS 110.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

COS 211. Public Speaking. 3 Credit Hours.

Introduction to effective audience communication including theory and extensive practice in oral presentations.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

COS 212. Interview Skills. 3 Credit Hours.

Study of interview skills, listening techniques, voice and diction.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 220. Communication Theory. 3 Credit Hours.

Survey of basic communication theories and models. Study of processes, functions, levels, and general principles of human communication.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

COS 304. Intercollegiate Debate Theory and Practice. 1 Credit Hour.

A course designed to teach students how to compete successfully in intercollegiate debate, and to reinforce training through practice and competition.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

COS 311. Advanced Oral Advocacy. 3 Credit Hours.

Advanced presentational speaking to persuade including theory and extensive practice.

Prerequisite: COS 211.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 314. The Power of Dialogue. 3 Credit Hours.

Students learn how to engage in and lead constructive dialogue about sensitive, emotional, and controversial issues in the public and private spheres.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

COS 316. Small Group Communication. 3 Credit Hours.

Techniques of discussion applied to goal-oriented, small group situations. Consideration is given to research methods, leadership, and conflict resolution. Theory is applied to active classroom participation.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

COS 318. Nonverbal Communication. 3 Credit Hours.

Theory and application of selected areas of research in nonverbal communication is addressed. Discussion of environment, space, body movement, posture, eye contact, facial expression, vocal cues, and physical appearance is included.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 324. Health Communication. 3 Credit Hours.

This course is designed to provide a broad introduction to human communication in a health-care context. Emphasis will be on issues of social support, patient-health professional/caregiver interaction, organizational culture, planning health promotion campaigns, and cultural conceptions of health and illness.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

COS 325. Communication in Health Organization. 3 Credit Hours.

This course looks at the dyadic, small group, and institutional communication patterns that can affect health outcomes within and between health organizations including hospitals and other allied health services.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 328. Sports As Communication. 3 Credit Hours.

This is a course which introduces students to the study of spectator and participation sports as communication and to communication within sports.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

COS 330. Conflict Management. 3 Credit Hours.

This course provides an understanding of conflict dynamics and strategies for constructive conflict management.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

COS 333. Business Communication. 3 Credit Hours.

Study and practice in the major forms of spoken and written communication in the context of businesses and other professional organizational settings.

Requisite: Sophomore Standing or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

COS 336. Political Communication. 3 Credit Hours.

A review of the history, strategies, theories and trends in political campaign communication in the United States.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

COS 343. Introduction to Intercultural Communication. 3 Credit Hours.

Introduction to communication among people from diverse cultures. Application of communication theory to intercultural sensitivity and cultural diversity is emphasized.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

COS 347. Advocacy and Action. 3 Credit Hours.

Students will learn a range of communication strategies and tactics to advocate for and effect social change.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 351. Qualitative Research Methods. 3 Credit Hours.

Course is designed to introduce students to a sample of qualitative research methods used in communication.

Prerequisites: COM 110, COS 210.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

COS 352. Critical Research in Communication. 3 Credit Hours.

This is a course in rhetorical criticism. Students will gain an understanding of rhetorical theory as it is applied to the analysis and evaluation of significant public communication events.

Prerequisites: COM 110, COS 210.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

COS 353. Quantitative Communication Research Methods and Analyses. 3 Credit Hours.

Introduction to communication research methods. Application of quantitative measurement techniques and statistical analyses will be discussed as well as the use of microcomputer statistical programs.

Prerequisites: COM 110, COS 210.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

COS 354. Organizing for Action. 3 Credit Hours.

This is a course that will introduce the student to Action Research, with application to communication questions in a variety of settings.

Prerequisites: COM 110, COS 210.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

COS 355. Applied Communication Research Methods. 3 Credit Hours.

Students learn to read and interpret quantitative and qualitative research methods. Students develop skills in basic qualitative methods (focus groups, observation) and quantitative methods (surveys, polls, comparisons, basic statistical analysis) for use in daily and professional life.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

COS 360. Speech Writing. 3 Credit Hours.

This is a course on written speeches, speechwriting, and delivering speeches from manuscripts. Students will write, review and edit their own work, and will work in teams engaging peer review and corporate authorship to produce manuscripts for a variety of types and purposes of speeches employing a broad range of strategies for proof, language, and engagement.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

COS 377. Argumentation and Critical Thinking. 3 Credit Hours.

Argumentation theory and practice are discussed. Rhetorical and philosophical foundations of argumentation and their application in various settings including academic debate are also covered.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

COS 391. Undergraduate Special Topics in Communication Studies. 3 Credit Hours.

Course subject matter varies according to announced special topic. See class schedule for details.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 405. Practicum in Communication Studies. 1-3 Credit Hours.

Structured participation in programmatic research and applied practice in the community.

Requisite: Junior Status.

Components: PRA.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

COS 418. Organizational Communication. 3 Credit Hours.

Introduction to organizational communication theory. Consideration of structure, function, and effects of communication in organizations are analyzed. Emphasis is placed on principles needed for decision making and effective management of organizational communication processes.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

COS 426. Patient-Provider Communication. 3 Credit Hours.

This class focuses on the interpersonal environment of patient-provider interaction. The primary purpose of this course is to describe best practices for coming to shared meaning and decision-making between medical professionals and patients in healthcare settings.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 427. Health Behavior and Risk. 3 Credit Hours.

This course introduces students to different theories and models of health communication that are frequently used to develop persuasive health messages. It draws on health communication messaging theory, as well as literature in public health, psychology, and medicine.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 472. Persuasion. 3 Credit Hours.

A review of theory, research, and practice of the intentional use of symbols to influence attitudes, beliefs, and actions.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

COS 473. Words that Shaped the World. 3 Credit Hours.

A study of great speakers and speeches in important international settings.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

COS 474. Presidential Debates. 3 Credit Hours.

History, impacts, content and strategies of televised presidential campaign debates.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 477. Engaged Communication. 3 Credit Hours.

Capstone course designed for communication studies majors. Provides students opportunities to apply knowledge of communication theory and associated research skills through their personal engagement in community or organizational service and action research.

Prerequisites: COM 110, COS 210, COS 351, COS 354. Requisite: Senior Status or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

COS 479. Capstone for Communication Studies. 3 Credit Hours.

Capstone course designed for communication studies majors. Provides students with the opportunity to apply knowledge of communication theory and research skills through development of capstone project.

Prerequisites: COM 110 and COS 210 and COS 351 and COS 353. Requisite: Senior Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

COS 498. Communication Studies Internship. 1-3 Credit Hours.

Prescribed study and supervised work with practitioners in organizations.

Requisite: Junior Status.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

COS 499. Projects and Directed Research. 1-3 Credit Hours.

Individual study. No more than three credits may be counted toward a Communication major or minor.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

COS 545. Intercultural Communication: International Perspectives. 3 Credit Hours.

Effects of cultural attitudes, beliefs, and attributions on meaning assignment. Effects of language on the structure of thought. Ethics and process of the diffusion of cultural innovations are analyzed.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 546. Intercultural Communication: Domestic Perspectives. 3 Credit Hours.

Effects of cultural attitudes, beliefs, and attributions on meaning assignment. Diffusion of cultural innovations, prejudice, discrimination, and equality are discussed. Emphasis is placed on intercultural interactions within the United States.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 560. The Executive Communicator. 3 Credit Hours.

Audience analysis, speech writing, delivery in professional presentations, theory, and history of great speeches are covered. Detailed critiques of student speaking styles and performances are also included.

Prerequisite: COS 211. Requisite: Junior Status or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

COS 591. Advanced Special Topics in Communication Studies. 3 Credit Hours.

This course subject matter varies according to announced special topic. See class schedule for details.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 599. Advanced Projects and Directed Research. 1-6 Credit Hours.

Individual study. Course may be repeated to a maximum of six credits.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

COS 616. Small Group Processes. 3 Credit Hours.

Techniques of discussion applied to goal-oriented, small group situations. Consideration is given to research methods, leadership, and conflict resolution. Theory is applied to active classroom participation.

Components: LEC.

Grading: GRD.

COS 620. Gender Issues in Leadership. 3 Credit Hours.

This course utilizes case studies of innovative executives to analyze different leadership and communication styles between men and women.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 630. Conflict Management. 3 Credit Hours.

This course provides an understanding of conflict dynamics and strategies for constructive conflict management.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 645. Intercultural Communication: International Perspectives. 3 Credit Hours.

Effects of cultural attitudes, beliefs, and attributions on meaning assignment. Effects of language on the structure of thought. Ethics and process of the diffusion of cultural innovations are analyzed.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 646. Intercultural Communication: Domestic Perspectives. 3 Credit Hours.

Effects of cultural attitudes, beliefs, and attributions on meaning assignment. Diffusion of cultural innovations, prejudice, discrimination, and equality are discussed. Emphasis is placed on intercultural interactions within the United States.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 647. Culture and Organizations. 3 Credit Hours.

This course explores the effects of cultural diversity on communication in organizations. Diffusion of innovations, prejudice, discrimination, and equality are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 651. Survey of Health Communication. 3 Credit Hours.

This course is intended to provide a graduate-level introduction to the study of health communication. Accordingly, it covers a wide range of topic areas informed by an equally diverse range of theories, research paradigms, and applied foci.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 652. Culture and Health. 3 Credit Hours.

This class is designed to give participants an overview of the problems, issues, and processes involved with communicating with people of different cultural and subcultural backgrounds about issues of health and illness.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 653. Organizations, Communication, and Health. 3 Credit Hours.

This class focuses on the organizational, interpersonal and intercultural dimensions of communication in health care settings. It draws on material from the communication discipline as well as work from medical sociology, anthropology, medicine, humanities and discourse studies.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 654. Risk Communication. 3 Credit Hours.

This course will offer a foundational understanding of the psychological and sociological bases of risk perceptions that are necessary for effective risk communication.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 655. Health Communication Interventions. 3 Credit Hours.

This course will focus on the planning, development, and assessment of health communication intervention messages and materials.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 660. The Executive Communicator. 3 Credit Hours.

Audience analysis, speech writing, delivery in professional presentations, theory, and history of great speeches are covered. Detailed critiques of student speaking styles and performances are also included.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 674. Seminar in Interpersonal Communication. 3 Credit Hours.

This course focuses on theoretical approaches to interpersonal communication. Emphasis is placed on current research including fundamentals of relationships, developmental issues, interaction management, and interpersonal competence.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 680. Organizational Training and Development. 3 Credit Hours.

This course is designed to provide an examination of internal organizational communication in order to understand appropriate strategies for training and development of supervisors and employees.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 682. Seminar in Organizational Communication. 3 Credit Hours.

This course explores theoretical perspectives and the impact of communication in organizations. Critical analysis includes management styles, decision-making, group interaction, conflict resolution, and diffusion of innovations.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 690. Communication Studies Practicum. 1-3 Credit Hours.

Prescribed graduate study and supervised work with practitioners in organizations.

Prerequisites: COM 601 and COM 602 and COM 603.

Components: PRA.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

COS 691. Advanced Special Topics in Communication Studies. 3 Credit Hours.

This course subject matter varies according to announced special topic. See class schedule for details.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 699. Advanced Projects and Directed Research. 1-6 Credit Hours.

Individual study. Course may be repeated to a maximum of six credits.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

Computer Science (CSC)

CSC 115. Social and Ethical Issues in Computing. 3 Credit Hours.

History, social context and methods and tools of analysis. Professional and ethical responsibilities. Intellectual property. Privacy and civil liberties.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CSC 116. Cybersecurity: An Introduction to Security in Cyberspace. 3 Credit Hours.

An introduction to cybersecurity. Recent incidents. The Internet. Types of attacks. Tools for defending against attacks on users and networks. Legal, moral, and social aspects.

Components: LEC.

Grading: GRD.

CSC 118. Information Technology and Society. 3 Credit Hours.

A variety of topics on information technology and society through various course activities including research papers, experiments, and by reading articles. The topics covered include but are not limited to: history of computing, hardware mechanisms, algorithms design, software development principles, software tools, security, and artificial intelligence.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Summer.

CSC 119. Computers and Society. 3 Credit Hours.

Basic concepts of computer systems. Installing, configuring, and managing computer software. Internet information retrieval. Application software. HTML, programming for the www in JavaScript. E-commerce, cryptography, computer security. Social, legal, ethical issues and the future.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CSC 120. Computer Programming I. 4 Credit Hours.

History of computing. Fundamental programming constructs. Algorithms and problem solving. Object-oriented programming. Recursion.

Prerequisite: MTH 108. or Corequisite: MTH 140 or Higher or MAS 110.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CSC 210. Computing for Scientists. 3 Credit Hours.

Computing applications in science. Tools and algorithms for applications. Implementation of algorithms. Storage, retrieval analysis and visualization of data in science.

Prerequisite: MTH 141 or MTH 151 or MTH 161 or MTH 171.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CSC 220. Computer Programming II. 4 Credit Hours.

Common APIs including list, priority queue, set, and map, and their efficient implementations in an object-oriented language using fundamental data structures. Sorting and other applications of recursion. Combining asymptotic analysis and experiments to extrapolate running times. Using APIs in a software project.

Prerequisites: CSC 120 or BTE 324 or ECE 218 and MTH 108 or MTH 140 or MTH 141 or MTH 161 or MTH 162 or MTH 171 or MTH 172 or MAS 110.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CSC 314. Computer Organization and Architecture. 3 Credit Hours.

Digital logic and digital systems. Machine level representation of data. Assembly level machine organization. Memory system organization and architecture. Interfacing and communication. Functional organization. Multiprocessing and alternative architectures

Prerequisite: CSC 220. or BTE 324. or ECE 218. and Corequisite: MTH 309.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CSC 317. Data Structures and Algorithm Analysis. 3 Credit Hours.

Basic algorithmic analysis. Algorithmic strategies. Fundamental computing algorithms. Distributed algorithms. Cryptographic algorithms. Geometric algorithms.

Prerequisite: CSC 220 or ECE 318 and MTH 309.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CSC 322. System Programming. 3 Credit Hours.

C programming: Program structure, core language elements, pointers. System tools for C programming. Programming for UNIX: The system call interface, interfaces to the internet. Scripting.

Prerequisite: CSC 220 or ECE 318.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CSC 329. Introduction to Game Programming. 3 Credit Hours.

Fundamental programming issues in game design: Software design; Version control; Basic graphics; GUI programming. Large-scale game project: Team development of a functional game; Graphics and GUI component; Networking component; Core game engine.

Prerequisite: CSC 220 or ECE 318.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CSC 330. Android Programming. 3 Credit Hours.

The android/Eclipse programming environment. The Android execution model. User interfaces. Media. Data storage areas. Sensors and actuators. The Android market.

Prerequisite: CSC 220.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 401. Computer Science Practicum I. 1 Credit Hour.

Implementation of techniques, algorithms, and data structures being taught in a co-requisite computer science course.

Components: PRA.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 402. Computer Science Practicum II. 1 Credit Hour.

Implementation of techniques, algorithms, and data structures being taught in a co-requisite computer science course.

Components: PRA.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 403. Computer Science Practicum III. 1-3 Credit Hours.

Implementation of techniques, algorithms, and data structures being taught in a co-requisite computer science course.

Components: PRA.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 405. Computer Science Seminars. 1 Credit Hour.

A range of topics in Computer Science, as embodied in the seminars hosted by the Department.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

CSC 410. Computer Science Project Planning. 1-3 Credit Hours.

Planning for the implementation of a Computer Science project, including: Problem analysis, System architecture design, Algorithm and data structure selection, User interface design, Verification and validation plan, and Prototyping.

Components: PRA.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 411. Computer Science Project Implementation. 1-3 Credit Hours.

Implementation of a Computer Science project, including: Hardware preparation, Component implementation, System integration, Verification and validation, and Documentation.

Components: PRA.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 412. Computer Science Internship. 1-3 Credit Hours.

A commercial computing environment. Normally 50 internship hours are required per credit earned (the host company must supply documentary evidence of hours worked).

Components: PRA.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 419. Programming Languages. 3 Credit Hours.

Overview of programming languages. Fundamental issues in language design. Virtual machines. Introduction to language translation. Models of execution control. Declaration, modularity, and storage management. Programming language semantics. Programming paradigms.

Prerequisite: CSC 317 or CSC 517.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 421. Principles of Computer Operating Systems. 3 Credit Hours.

Process management. Scheduling and dispatch. Interprocess communication. Memory management. File systems. Device management. Security and protection. System programming for UNIX.

Prerequisite: CSC 314 and CSC 322.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CSC 423. Database Systems. 3 Credit Hours.

Information models and systems. Database systems. Data modeling. Relational databases. Relational database design. Database query languages, Data mining concepts, Web database programming.

Prerequisite: CSC 322 or ECE 322.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 424. Computer Networks. 3 Credit Hours.

Introduction to computer networks and network applications. The protocol stack. Routing, switching and bridging technologies. Models of network computing. Internet standards and protocols.

Prerequisite: CSC 314 and CSC 322.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CSC 427. Theory of Computing. 3 Credit Hours.

Sets, relations, and languages. Automata theory. Basic computability theory. Turing machines. The complexity classes P and NP.

Prerequisite: CSC 220 or ECE 318 and MTH 309.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CSC 431. Introduction to Software Engineering. 3 Credit Hours.

Software processes, requirements and specifications, design, validation, evolution. Project management, tools and environments. Foundations of human-computer interaction. Risks and liabilities of computer-based systems. Intellectual property.

Prerequisite: CSC 317 or CSC 322 or CSC 517.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CSC 481. Teaching Assistant Training in Computer Science. 1-3 Credit Hours.

Training and teaching assistant for a specific course, in computer laboratories. May be taken multiple times, assisting maximally twice for a given course.

Components: PRA.

Grading: GRD.

Typically Offered: Fall & Spring.

CSC 498. Senior Topics in Computer Science. 3 Credit Hours.

Senior Topics in Computer Science - content varies by semester.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 506. Logic. 3 Credit Hours.

Propositional and first order logic: completeness. Computational logic: Robinson's resolution. Formalized theories: arithmetic, Godel's incompleteness theorem, Tarski's theorem on undefinability of truth.

Prerequisite: MTH 230 or PHI 210 or PHI 510.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 507. Data Security and Cryptography. 3 Credit Hours.

Access, information flow, and inference controls. Network security and management. Encryption algorithms. Cryptographic techniques.

Prerequisite: CSC 317 or CSC 427.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CSC 518. Interpreters and Compiler Theory. 3 Credit Hours.

Translation of higher-level languages into machine language. Grammars, parsing, scanners, precedence relations. Run-time storage and symbol table organization. Semantic routines. Chaining and hashing. Code generation and optimization. Macro implementation.

Prerequisite: CSC 419.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 528. Introduction to Parallel Computing. 3 Credit Hours.

Parallel computing systems shared-memory parallel programming, with open MP, distributed-memory parallel programming, software with open MPI software package. Applications: vector and matrix operations, sorting, image processing.

Prerequisite: CSC 317.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 529. Introduction to Computer Graphics. 3 Credit Hours.

Graphic systems. Graphic communication. Geometric modeling (2D and 3D representations). Rendering. Advanced techniques. Display and input devices. Software packages.

Prerequisite: CSC 220. or ECE 318. and MTH 210.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 540. Algorithm Design and Analysis. 3 Credit Hours.

Design techniques include divide-and-conquer, greedy method, dynamic programming, backtracking. Time and space complexity. Sorting, searching, combinatorial and graph algorithms.

Prerequisite: CSC 317.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 545. Introduction to Artificial Intelligence. 3 Credit Hours.

Search and constraint satisfaction. Knowledge representation and reasoning. Natural language processing. Machine learning and neural networks. Game theory. AI programming.

Prerequisite: CSC 317 or ECE 318 and MTH 224 or ECE 310 or IEN 310.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 547. Computational Geometry. 3 Credit Hours.

Algorithms for solving geometric problems arising from application domains including graphics, robotics, and GIS.

Prerequisite: CSC 317.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 548. Bioinformatics Algorithms. 3 Credit Hours.

The complexity of bioinformatics computations. Introduction to perl and bioperl. Pattern matching and sequence homology. Genome assembly. Transcription factor Binding Site recognition and motif finding. Gene prediction. Phylogeny. Micro-array analysis. RNA folding. Gene design and synthesis.

Prerequisite: CSC 120 or CSC 210 and BIL 150 or BIL 104 or BIL 352 or BIL 552 or CSC 552.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CSC 549. Biomedical Data Science. 3 Credit Hours.

The computational skills needed for analysis of genomic and biomedical data sets, including: The basics of a command line interface; programming in (bio-)python; running programs on Pegasus2; writing scripts for downloading, manipulating, and analyzing data; file sharing and version control using github; analyzing a Next Generation Sequencing data set, and interpreting the results; and responsible conduct of Research.

Prerequisite: CSC 120 or BIL 150.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 550. Computational Neuroscience. 3 Credit Hours.

Introduction to computational neuroscience. Analysis and modeling of neural systems. Neurons, populations of neurons, perception, behavior. Connections to machine learning. Tutorials in Matlab.

Prerequisite: MTH 162 and MTH 224.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 552. Bioinformatics Tools. 3 Credit Hours.

Databases and tools of bioinformatics, as relevant to research in genomics and molecular biology. Bioinformatics applications. Information retrieval, analytical tools, BLAST searches, promoter analysis, and protein structure- function analysis, and various applications.

Prerequisite: BIL 250 or BIL 150.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CSC 555. Multimedia Systems. 3 Credit Hours.

Specification and requirements of a multimedia hardware system. Multimedia data technologies. Graphics file formats. Compression and decompression. Multimedia application development.

Prerequisite: CSC 317.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 595. Topics in Computer Science. 1-3 Credit Hours.

Topics in Computer Science - content varies by semester.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 596. Topics in Computer Science. 1-3 Credit Hours.

Topics in Computer Science - content varies by semester.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 597. Topics in Computer Science. 1-3 Credit Hours.

Topics in Computer Science - content varies by semester.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 598. Topics in Computer Science. 1-3 Credit Hours.

Topics in Computer Science - content varies by semester.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 599. Topics in Computer Science. 1-3 Credit Hours.

Topics in Computer Science - content varies by semester.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 607. Logic. 3 Credit Hours.

Propositional and first order logic: completeness. Computational logic: Robinson's resolution. Formalized theories: arithmetic, Godel's incompleteness theorem, Tarski's theorem on undefinability of truth.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 609. Data Security and Cryptography. 3 Credit Hours.

Access, information flow, and inference controls. Network security and management. Encryption algorithms. Cryptographic techniques.

Prerequisite: CSC 317 or CSC 427.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 618. Interpreters and Compiler Theory. 3 Credit Hours.

Translation of higher-level languages into machine language. Grammars, parsing, scanners, precedence relations. Run-time storage and symbol table organization. Semantic routines. Chaining and hashing. Code generation and optimization. Macro implementation.

Prerequisite: CSC 419.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 623. Theory of Relational Databases. 3 Credit Hours.

Relational operators. Functional dependencies. Covers for functional dependencies. Multivalued dependencies. Joint dependencies. Normal Forms, Representation theory. Query systems. Acyclic database schemes.

Prerequisite: CSC 423.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 629. Introduction to Computer Graphics. 3 Credit Hours.

Graphic systems. Graphic communication. Geometric modeling (2D and 3D representations). Rendering. Advanced techniques. Display and input devices. Software packages.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 632. Introduction to Parallel Computing. 3 Credit Hours.

Parallel computing systems shared-memory parallel programming, with open MP, distributed-memory parallel programming, software with open MPI software package. Applications: vector and matrix operations, sorting, image processing.

Prerequisite: CSC 317.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 640. Algorithm Design and Analysis. 3 Credit Hours.

Design techniques include divide-and-conquer, greedy method, dynamic programming, backtracking. Time and space complexity. Sorting, searching, combinatorial and graph algorithms.

Prerequisite: CSC 317.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 645. Introduction to Artificial Intelligence. 3 Credit Hours.

Search and constraint satisfaction. Knowledge representation and reasoning. Natural language processing. Machine learning and neural networks. Game theory. AI programming.

Prerequisite: CSC 545.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 647. Computational Geometry. 3 Credit Hours.

Algorithms for solving geometric problems arising from application domains including graphics, robotics, and GIS.

Prerequisite: CSC 317.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 649. Bioinformatics Algorithms. 3 Credit Hours.

The complexity of bioinformatics computations. Introduction to perl and bioperl. Pattern matching and sequence homology. Genome assembly. Transcription factor Binding Site recognition and motif finding. Gene prediction. Phylogeny. Micro-array analysis. RNA folding. Gene design and synthesis.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CSC 650. Computational Neuroscience. 3 Credit Hours.

Introduction to computational neuroscience. Analysis and modeling of neural systems. Neurons, populations of neurons, perception, behavior. Connections to machine learning. Tutorials in Matlab.

Prerequisite: MTH 162 and MTH 224.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 656. Multimedia Systems. 3 Credit Hours.

Specification and requirements of a multimedia hardware system. Multimedia data technologies. Graphics file formats. Compression and decompression. Multimedia application development.

Prerequisite: CSC 317.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 670. Directed Reading. 2-4 Credit Hours.

Directed reading in Computer Science - content varies by semester.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

CSC 685. Topics in Computer Science. 1-3 Credit Hours.

Topics in Computer Science - content varies by semester.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 686. Topics in Computer Science. 1-3 Credit Hours.

Topics in Computer Science - content varies by semester.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 687. Topics in Computer Science. 1-3 Credit Hours.

Topics in Computer Science - content varies by semester.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 688. Topics in Computer Science. 1-3 Credit Hours.

Topics in Computer Science - content varies by semester.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 689. Topics in Computer Science. 1-3 Credit Hours.

Topics in Computer Science - content varies by semester.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 690. Seminar for Graduate Students I. 1-3 Credit Hours.

Flexible topics of interest to graduate students.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 692. Seminar for Graduate Students II. 1-3 Credit Hours.

Flexible topics of interest to graduate students.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 707. Logic Programming. 3 Credit Hours.

Programming in Prolog, Fix-point semantics, Declarative semantics, Completeness of SLD-resolution, Negation, Implementation of logic programming languages. Deductive databases.

Prerequisite: MTH 506 and CSC 317.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 711. Theory of Computation. 3 Credit Hours.

Recursive functions, Markov algorithms, Turing machines. Unsolvability.

Prerequisite: CSC 317 or CSC 517.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 712. Complexity Theory. 3 Credit Hours.

Models of computations, Blum's axioms, intractability, NP-completeness.

Prerequisite: CSC 427.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 724. Mobile Wireless Systems. 3 Credit Hours.

Cellular Systems, multiple access techniques, wireless networking, mobile IP, power management, user location information management, TDMA, CDMA, and GSM systems, data broadcasting.

Prerequisite: CSC 424.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 732. Parallel Algorithms. 3 Credit Hours.

Parallel computation models; sorting networks; parallel algorithms for sorting, searching, graph problems, prefix computation, pattern matching, and fast Fourier transforms; theory of P-completeness, the class NC.

Prerequisite: CSC 317.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CSC 746. Neural Networks and Deep Learning. 3 Credit Hours.

Fundamentals of artificial neural networks: Perceptrons, Single-layer perceptron classifiers, Multi-Layer feedforward networks, Error back-propagation training. Deep Feedforward Networks: Regularization for deep learning, Optimization for training deep models, Convolution networks. Applications:

Computer vision, speech recognition, Natural language processing.

Prerequisite: CSC 317.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 749. Automated Reasoning. 3 Credit Hours.

Propositional and 1st order logic. Reasoning and resolution. More complex inference rules. Using contemporary ATP systems. Prolog as an ATP system and as a programming language. Applications of ATP in research and industry.

Prerequisite: CSC 317 or CSC 645.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 751. Semantic Web. 3 Credit Hours.

An overview of the underlying semantic web technologies. Ontology construction and implementation using tools and APIs (logic, XML, RDF, RDFS).

Theoretical and practical aspects of knowledge representation (description logic, RDF, RDFS, SPARQL, SROIQ(D)). Designing and debugging ontologies (ontology engineering, entailment tools, project).

Prerequisite: CSC 317 and MTH 309.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 752. Autonomous Robotic Systems. 3 Credit Hours.

Introduction: autonomous systems, autonomous robots, RoboCup, typical components of an autonomous robot. Modeling: perception, noise, modeling, recursive state estimation, Bayes' filter, particle filter, self-localization. Control and motion: PIO-control, calibration of parameters, controlling a wheeled robot, controlling joints, walking motion. Learning (optional, if time permits): overview, different types of learning, reinforcement learning.

Prerequisite: CSC 317 and MTH 210.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 756. Advanced Multimedia Systems. 3 Credit Hours.

Digital-system fundamentals. Digital audio, analog and digital video. Graphics. Data compression algorithms. CD-ROM technology. Implementation of multimedia software development tools. Architecture and issues for distributed multimedia systems. Multimedia communications systems.

Prerequisite: CSC 656.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 785. Advanced Topics in Computer Science. 1-3 Credit Hours.

Advanced Topics in Computer Science

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 786. Advanced Topics in Computer Science. 1-3 Credit Hours.

Advanced Topics in Computer Science

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 787. Advanced Topics in Computer Science. 1-3 Credit Hours.

Advanced Topics in Computer Science

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 788. Advanced Topics in Computer Science. 1-3 Credit Hours.

Advanced Topics in Computer Science

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 789. Advanced Topics in Computer Science. 1-3 Credit Hours.

Advanced Topics in Computer Science

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 793. Research Project. 1-6 Credit Hours.

Supervised research project preceding dissertation research for the Ph.D.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CSC 794. Research Project. 1-6 Credit Hours.

Supervised research project preceding dissertation research for the Ph.D.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CSC 810. Master's Thesis. 1-6 Credit Hours.

The student working on his/her master's thesis enrolls for the number of credit s as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

CSC 825. Continuous Registration--Master's Study. 1 Credit Hour.

To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

CSC 830. Pre-Candidacy DOCTORAL DISSERTATION. 1-12 Credit Hours.

Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor, but for not less than a total of 12 hours. Up to 12 hours may be taken in a regular semester, but not more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

CSC 840. Post-Candidacy Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ph.D. who have advanced to candidacy. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of CSC 740 may be taken in a regular semester, nor more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Spring.

CSC 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for Ph.D. students after the student has enrolled for permissible cumulative total in appropriate doctoral research. Regarded as full-time residence.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Dance (DAN)

DAN 102. Stretching and Body Work. 1 Credit Hour.

Stretching techniques and examination of various body therapy concepts.

Components: LAB.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

DAN 111. Modern Dance, Level One. 2 Credit Hours.

Introduction to the discipline of modern dance designed to develop understanding and skill in the basic vocabulary. Open to all students..

Components: LAB.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

DAN 121. Ballet, Level One. 2 Credit Hours.

Introduction to the discipline of classical ballet designed to develop understanding and skill in the basic vocabulary. Open to all students.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

DAN 130. Orientation to Dance. 2 Credit Hours.

Introduction to dance as an art form for those interested in career opportunities in dance education. Required for prospective dance minors. Open to all students.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

DAN 140. Theatre Dance Forms. 2 Credit Hours.

Introduction to movement skills and stylistic elements of theatrical forms of dance. Open to all students.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

DAN 190. Improvisation. 2 Credit Hours.

Experience in selective and basic processes of movement involvement both individual and group. Open to all students.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

DAN 211. Modern Dance, Level Two. 3 Credit Hours.

Continuing exploration of modern dance basic techniques and theoretical concepts. Open to all students.

Components: LAB.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

DAN 221. Ballet, Level Two. 3 Credit Hours.

Study of ballet designed to extend technical skill and prepare student for intermediate level work. Open to students with formal ballet training or permission

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

DAN 240. Cultural Dance Forms. 2 Credit Hours.

Introduction to movement skills and stylistic elements of dance forms from various cultures. Open to all students.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

DAN 250. World History of the Dance. 3 Credit Hours.

Introductory exploration of dance history in relation to life, thought, and culture.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

DAN 280. Dance Composition Level 2. 3 Credit Hours.

Introduction to choreography through creative problem solving by exploring and experimenting with the basic elements of dance: space, time, energy, and motion. Emphasis is on compositional studies.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

DAN 285. Creative Dance for Children. 2 Credit Hours.

Introduction to theories and methods of teaching dance to children of elementary school age. Open to all students.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

DAN 286. Teaching Dance to Children. 2 Credit Hours.

Theory and practice of teaching dance to preschool and school age children. Open to all students.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

DAN 290. Introduction to Dance-Movement Therapy. 2 Credit Hours.

Introduction to dance-movement therapy theory and practice.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

DAN 291. Dance Movement Therapy. 3 Credit Hours.

This course will provide a continued investigation into the theoretical and experiential techniques and practices of dance therapy as well as career options for students majoring in education and the healing professions.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

DAN 311. Modern Dance, Level Three. 3 Credit Hours.

Intermediate study of modern dance techniques and theoretical concepts.

Components: LAB.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

DAN 321. Ballet Level Three. 3 Credit Hours.

Study of classical ballet at intermediate/advanced level. Open to students with formal ballet training!

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

DAN 380. Dance Composition Level 3. 3 Credit Hours.

Continuation of creative problem solving by exploring, experimenting, and combining the basic elements of dance: space, time, energy and motion. Emphasis is on expansion of ideas for stage productions.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

DAN 385. Methods of Teaching Dance (K-12). 3 Credit Hours.

Content for teaching dance in a variety of settings including public school grades K-12. Required for dance minor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

DAN 411. Modern Dance; Level Four. 3 Credit Hours.

Advanced study of modern dance technique and theatrical concepts.

Components: LAB.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

DAN 421. Ballet, Level Four. 3 Credit Hours.

Study of Classical ballet at an advanced level. Permission of Instructor

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

DAN 450. History of Modern Dance. 3 Credit Hours.

Study of development, philosophies, and theories of American and European modern dance.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

DAN 493. Special Projects in Dance. 1-3 Credit Hours.

Advanced individual instruction pertaining to faculty member's area expertise and student's area of interest. This course includes a culminating project.

Components: IND.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

DAN 494. Special Topics in Dance. 1-3 Credit Hours.

Advanced group/classroom instruction pertaining to faculty to faculty member's expertise and students' areas of interest.

Components: SEM.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

DAN 550. Women in Theatrical Dance. 3 Credit Hours.

Women in Dance; the most prominent dancers and choreographers from the 19th and 20th centuries who helped shape western theatrical dance art.

Components: LEC.

Grading: GRD.

Typically Offered: Spring & Summer.

DAN 585. Methods of Teaching Dance K-12 (Advanced). 3 Credit Hours.

An advanced study of the dance curriculum content in a variety of settings including public schools, grades K-12.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

DAN 593. Special Projects in Dance. 1-3 Credit Hours.

Advanced individual instruction pertaining to faculty member's area expertise and student's area of interest. This course includes a culminating project.

Components: IND.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

DAN 594. Special Topics in Dance. 1-3 Credit Hours.

Advanced group/classroom instruction pertaining to faculty to faculty member's expertise and students' areas of interest.

Components: SEM.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

DAN 650. Women in Theatrical Dance. 3 Credit Hours.

Women in Dance; the most prominent dancers and choreographers from the 19th and 20th centuries who helped shape western theatrical dance art.

Components: STU.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

DAN 693. Special Projects in Dance. 1-3 Credit Hours.

Advanced individual instruction pertaining to faculty member's area of expertise and student's area of interest. This course includes a culminating project.

Components: IND.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

DAN 694. Special Topics in Dance. 1-3 Credit Hours.

Advanced group/classroom instruction pertaining to faculty member's expertise and students' areas of interest.

Components: SEM.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

DAN 793. Special Projects in Dance. 1-3 Credit Hours.

Advanced individual instruction pertaining to faculty member's area of expertise and student's area of interest. This course includes a culminating project.

Components: IND.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

DAN 794. Special Topics in Dance. 1-3 Credit Hours.

Advanced group/classroom instruction pertaining to faculty member's expertise and students' areas of interest.

Components: SEM.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

Economics (ECO)

ECO 211. Principles of Microeconomics. 3 Credit Hours.

Fundamental course devoted to the development and application of basic analytical tools and principles required for an understanding of major economic problems and policy alternatives available for their solution. A particular emphasis is devoted to microeconomic analysis. Topics include the study of markets under varying conditions of competition, including market deficiencies such as pollution, prices, and resource allocation distribution of income, including poverty problems, the economics of the firm and the government, and international economic relations.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECO 212. Principles of Macroeconomics. 3 Credit Hours.

Fundamental course devoted to macroeconomic analysis. Topics include national income and employment analysis, money and banking, economic growth, and comparison of different economic systems, including the problems of developing the less developed world.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECO 300. Microeconomic Theory and Applications. 3 Credit Hours.

Intermediate level analysis of the role of price in resource allocation in markets of varying degrees of competition. It focuses on the process of decision-making by individuals and firms, and the welfare consequences. Special attention is devoted to economic applications.

Prerequisite: ECO 211 and MAS 110, or MTH 130 or MTH 141 or higher.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECO 301. Macroeconomic Theory. 3 Credit Hours.

Intermediate level analysis of the measurement, determination, and control of aggregate economic activity.

Prerequisite: ECO 212, MAS 110, or MTH 130 or MTH 141 or higher.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECO 302. Microeconomic Theory. 3 Credit Hours.

Intermediate level analysis of the role of price in resource allocation in markets of varying degrees of competition, as well as in the determination of wages, rent, interest, profits, and public policy.

Prerequisite: ECO 211 and MTH 141 or higher.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECO 303. Macroeconomic Theory. 3 Credit Hours.

Intermediate level analysis of the measurement, determination, and control of aggregate economic activity.

Prerequisite: ECO 212, MAS 110 or MTH 130 or MTH 141 or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECO 307. Public Finance and Fiscal Policy. 3 Credit Hours.

The role of local, state, and federal government in attaining an efficient allocation of resources and an equitable distribution of income. Emphasis on criteria for the selection and evaluation of public expenditure and tax programs including the problems of coordinating federal, state, and local finance. Special attention is given to current policy issues.

Prerequisite: ECO 300. Or ECO 302.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECO 311. Labor Economics (I). 3 Credit Hours.

Course surveys the structure and functioning of labor markets. Topics include determinants of labor supply and labor demand, economics of wage differentials, economic impact of labor unions, discrimination in labor markets, and the labor market effects of various government policies such as payroll and income taxes, educational subsidies, and minimum wage laws. The central goal of the course is to provide the student with a framework for analyzing diverse issues related to the labor sector of the economy.

Prerequisite: ECO 300. Or ECO 302.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECO 333. Industrial Economics and Public Policy. 3 Credit Hours.

This course surveys several topics in industrial economics, regulation, and antitrust; it is designed to be a link between the theory and several applications. Students will acquire the microeconomic tools and techniques to identify, analyze, and solve industrial economics and government competition policy problems, and will learn to apply the theory to many real-world markets and current economic events. Selected topics: price discrimination; product differentiation; advertising; network effects; consumer search and digital markets; auctions; bargaining; vertical restraints and mergers; collusion and cartels; innovation and intellectual property; natural monopolies and regulation; and antitrust policies. This is an elective class addressed to economics majors, minors, and any student with an interest in the topics.

Requisite: ECO 300 OR ECO 302.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 345. Environmental Economics. 3 Credit Hours.

This course determines the appropriate way to regulate economic activity so as to achieve an optimal balance between competing environmental and economic goals. Economic reasoning is used to evaluate causes and consequences of environmental problems. The course rigorously evaluates various types of environmental regulation, including "cap-and-trade," command and control mandates, and pollution taxes. Other specific topics include public goods, externalities, cost benefit analysis, non-market valuation, and international trade and development and the environment.

ECO 211.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 351. Economics of Development. 3 Credit Hours.

This course studies factors underlying economic development, measures of and goals for development, principles applicable to problems of development, the role of markets and planning in development, social, cultural, and political factors affecting economic development, and comparative rates of progress in different countries.

ECO 211 AND ECO 212.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECO 371. Latin America and the Global Economy. 3 Credit Hours.

An analysis of the historical growth of major Latin American countries, with emphasis on the post World War II period. Topics include industrialization, foreign investment, international trade and regional integration, agrarian reform, inflation, and development strategies and planning within the context of Latin America.

ECO 211 AND ECO 212.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECO 379. The Political Economy of Growth. 3 Credit Hours.

This course studies the causes of economic growth such as geography, culture, institutions, human and physical capital, as well as technology. It examines the role they play in the development process, casting light in their order of importance for growth and into which growth determinants are amenable to policy change.

ECO 211 AND ECO 212.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECO 386. Health Economics. 3 Credit Hours.

The course applies the tools of microeconomic analysis to the health care sector. It examines how models of demand and supply apply to the health care sector in general, and in particular to the health insurance, the hospital, the physicians, and the pharmaceutical sectors. By examining the actors and issues in this market, students are able to discuss policy issues from an economic perspective.

Prerequisite: ECO 300. Or ECO 302.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 403. Monetary Economics. 3 Credit Hours.

Analysis of the role of money in economic affairs. Topics include the determinants of the money supply and interest rates, money and prices, money and stability, and growth. Emphasis is placed on current problems and policies.

Prerequisite: ECO 301 or ECO 303.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECO 420. Economic Growth. 3 Credit Hours.

Course covers selected topics in economic growth. Topics include stylized facts associated with economic growth, the theoretical study of economic growth, and empirical tests of those theories. Course work is supplemented by case studies of individual countries, particularly developing countries.

Prerequisite: ECO 301 or ECO 303.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECO 430. Applied Econometrics. 3 Credit Hours.

This course introduces basic econometric techniques for analyzing economic data. The goal is to make students sophisticated consumers and skilled producers of empirical analysis, which will be attained by extensive work on a variety of real-world data like students' test scores, CEO wages, mortgage applications, cigarette demand, stock market capitalization, inflation, GDP and interest rates. Learning how to use econometric analysis software is an integral part of the course.

Prerequisite: ECO 211 and MAS 110, or MTH 130 or MTH 141 or higher.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECO 441. International Trade Theory. 3 Credit Hours.

Study of the principles of comparative advantage and the gains from international trade. Analysis of tariffs, quotas, and protectionism is included.

Prerequisite: ECO 300. Or ECO 302.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECO 442. International Monetary Economics. 3 Credit Hours.

Analysis of models of the exchange rate, the balance of payments, and monetary policy in an open economy.

Prerequisite: ECO 301 or ECO 303.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECO 443. Economic Analysis of Energy and Commodity Markets. 3 Credit Hours.

This course explores the principles of energy economics, commodity markets and advanced macroeconomics. It discusses the main trends in energy production and consumption, the methods of analysis in energy and commodity markets, and the main challenges in the energy sector. The analysis of oil prices and the economics of oil exporting countries is emphasized.

ECO 211 AND ECO 212.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 444. Game Theory in Economic Applications.. 3 Credit Hours.

This course is an introduction to the techniques and questions of modern microeconomics. The course will expose you to the techniques of game theory, the workhorse of modern microeconomics, and will apply those techniques to the analysis of a variety of economics situations and institutions.

Prerequisite: MAS110 or MTH 130 or MTH 141 or higher.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECO 445. Global Economics: Trade and Currencies. 3 Credit Hours.

In this course, students are exposed to two fundamental topics which are primordial to the understanding of any economic, political and/or social circumstance in any given country at any given time: (1) The evolution and meaning of the business cycle and capitalism, and (2) The effect of international trade and currencies. These two themes have sparked debates for centuries as they have great implications in the development of countries. Also, this course challenges students' critical thinking and analytical skills with a wide range of controversial readings on these two topics. This course is divided into four sections. The first one introduces students to the idea of the business cycle. The second section aims at explaining how capitalism was born and how it has evolved in the 19th and 20th centuries. Then, the course centers on explaining capitalism today and presents criticisms. And finally, students analyze how the business cycle and capitalism has unfolded and affected certain countries in Latin America.

Prerequisite: ECO 301 or ECO 303.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECO 460. Industrial Organization. 3 Credit Hours.

This course shows how microeconomic theory can be used to understand the diverse practices encountered in real-world markets between the extreme cases of perfect competition and monopoly. Topics to be covered include strategic pricing behavior, collusion, advertising and information, vertical integration, vertical restraints, regulation and a review of empirical literature.

Prerequisite: ECO 302.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECO 496. Directed Studies in Economics. 1-3 Credit Hours.

Supervised readings, individual research project, or independent investigation of selected non-STEM related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECO 497. Directed Studies in Economics. 1-3 Credit Hours.

Supervised readings, individual research project or independent investigation of selected STEM-related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECO 498. Special Topics in Economics. 3 Credit Hours.

Special topics in selected non-STEM areas of Economics.

Prerequisite: ECO 300. Or ECO 302.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECO 499. Special Topics in Economics. 3 Credit Hours.

Special topics in selected STEM areas of Economics.

Prerequisite: ECO 302.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECO 510. Mathematical Economics and Applications. 3 Credit Hours.

The course will focus on specific applications of microeconomic theory, which may vary each semester. Topics may include choice under uncertainty, game-theoretic models of insurance markets, principal-agents problems, and basic auction theory. The discussion of each application will be preceded by a discussion of the mathematical tools required. The mathematics topics covered may include basic theory of sets and functions, concave / convex functions and their role in optimization, expectations, conditional probability, Bayes rule, and order statistics.

Prerequisite: ECO 211 and MAS 110, or MTH 130 or MTH 141 or higher.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 511. Empirical Labor Economics. 3 Credit Hours.

A theoretical and empirical analysis of how labor markets operate. A survey of the literature, problems, and methodology of modern labor economics. Human capital analysis, the wage structure, job search and job-matching models, time-allocation models, the economic impact of labor unions, labor market discrimination, the determinants of labor demand and supply, and the factors affecting government policy relating to the labor sector is also included.

ECO 430.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECO 512. Topics in Mathematical Economics. 3 Credit Hours.

This course shows how modern economic techniques can be used to identify optimal managerial decisions and industrial developments. Diverse real-world economic applications are examined.

Prerequisite: ECO 211 and MAS 110, or MTH 130 or MTH 141 or higher.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECO 520. Econometrics. 3 Credit Hours.

Statistical methods of estimating and testing mathematical model of economic relationships.

Prerequisite: ECO 211 and MAS 110, or MTH 130 or MTH 141 or higher.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 521. Advanced Macroeconomic Theory. 3 Credit Hours.

The primary objective of this course is to introduce the student to the mathematical presentation of the major Classical, Neo-classical, Keynesian, and Neo-Keynesian macroeconomic models.

Prerequisite: ECO 301 or ECO 303.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECO 532. History of Economic Thought. 3 Credit Hours.

Historical development of economic doctrines and theory. Topics and individuals discussed include mercantilism, physiocracy, Adam Smith, Thomas Malthus, David Ricardo, J. S. Mill, Karl Marx, marginal analysis, Alfred Marshall, and J. M. Keynes. Special emphasis is placed on the effect of historical insights upon the contemporary core of economic theory.

ECO 211 AND ECO 212.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECO 533. Advanced Microeconomic Theory. 3 Credit Hours.

An introduction to the mathematical approach to microeconomic theory. Topics include consumer/household behavior, the theory of the firm, resource allocation, welfare economics, and uncertainty theory.

Prerequisite: ECO 302.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 555. Economics Departmental Honors Research Project. 3 Credit Hours.

Research project to fulfill requirements for Departmental Honors in Economics.

Components: THI.

Grading: SUS.

Typically Offered: Offered by Announcement Only.

ECO 600. Econometrics. 3 Credit Hours.

Statistical methods for estimating and testing mathematical models of economic relationships.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 601. Graduate Macroeconomic Theory. 3 Credit Hours.

The primary objective of this course is to introduce the student to the mathematical presentation of the major Classical, Neo-classical, Keynesian, and Neo-Keynesian macroeconomic models.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 602. Advanced Microeconomic Theory. 3 Credit Hours.

An introduction to the mathematical approach to microeconomic theory. Topics include consumer/household behavior, the theory of the firm, resource allocation, welfare economics, and uncertainty theory.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 603. Monetary Theory and Policy. 3 Credit Hours.

Current monetary theory and its use and application in fiscal and monetary policymaking. Topics include the rational expectations hypothesis, time inconsistency, and the role of the government budget constraint.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 604. Topics in Applied Macroeconomics. 3 Credit Hours.

Course acquaints students with current substantive issues in macroeconomics. Topics include consumption determination, savings behavior, bequest behavior, fiscal policy effects on interest rates, consumption, real exchange rates, trade balances, and inflation.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECO 610. Mathematical Economics and Applications. 3 Credit Hours.

The course will focus on specific applications of microeconomic theory, which may vary each semester. Topics may include choice under uncertainty, game-theoretic models of insurance markets, principal-agents problems, and basic auction theory. The discussion of each application will be preceded by a discussion of the mathematical tools required. The mathematics topics covered may include basic theory of sets and functions, concave / convex functions and their role in optimization, expectations, conditional probability, Bayes rule, and order statistics.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 611. Labor Economics (III). 3 Credit Hours.

The formulation and testing of models of labor markets. The application of the tools of microeconomics and econometrics to the analysis of labor markets. Leading contributions in the areas of dynamic analysis of labor markets, human capital investment, the determinants of the wage structure, time allocation and search models, dual and internal labor market models, and analysis of government policy are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECO 612. Economic Strategies for Firms and the Industry. 3 Credit Hours.

This course shows how modern economic techniques can be used to identify optimal managerial decisions and industrial developments. Diverse real-world applications are examined.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECO 620. Advanced Econometrics. 3 Credit Hours.

Advanced econometric methods including advanced techniques in multiple regression, Bayesian methods, maximum likelihood estimators, distributed lag models, spectral analysis, and Monte Carlo studies are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECO 621. Advanced Macro Analysis. 3 Credit Hours.

Theory of the determination of national income, employment, and price levels. Course emphasizes mathematical solutions of Classical, Keynesian, and other economic models.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECO 625. Applied Econometrics. 3 Credit Hours.

Practical applications of econometrics are surveyed. Computer packages are used to examine economic data. Topics include the series analysis, limited dependent variable modes, pooling cross section and time series data, model selection, and rational expectations models.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 633. Advanced Micro Analysis. 3 Credit Hours.

Theory of the behavior of firms and households and the determination of prices and resource allocation in a decentralized economy.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECO 634. Advanced Micro Analysis II. 3 Credit Hours.

Continuation of ECO 633. Advanced analysis of theory of the household and firm emphasizing recent approaches. Analysis of decisions over time, duality relationships, advanced demand theory, risk and uncertainty, behavioral theories of the firm, and technological change are covered.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 645. Regulations Economics. 3 Credit Hours.

This course examines public policies for dealing with problems arising in markets in which competitive forces are weak. The focus is on monopolies, oligopolies, cartels, and other environments where market mechanisms are unlikely to produce outcomes that benefit consumers more than the alternatives involving costly government intervention.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 675. Latin America and the Global Economy. 3 Credit Hours.

Analysis of the economic, political, and social forces at work in the changing economies in Latin America.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECO 680. Essentials of Economics. 2 Credit Hours.

This course provides an introduction to the core concepts of economics. Topics include allocation of scarce resources by the laws of supply and demand, use of the market place as the principle organizing and distribution tool of the economy, externalities, and market failure. Pollution of the environment is treated as a needed correction to be done by public regulation through taxation and legislation. The principal forms of firm organization and dissolution are also discussed. Applications of the laws of supply and demand are made to forecasting demand and analyzing cost structure. The entry and exit of firms and the valuation of the firm is also covered.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 685. Managerial Decisions in a Global Economy. 2 Credit Hours.

Modern techniques of economic analysis and decision science are applied to the management of the firm in a global environment. Business planning and the determinants of supply and demand are an integral part of the course. The principal forms of business organization and dissolution are reviewed. The major issues confronted by the firm: Principal-agent problem (or how to motivate managers to act in the best interest of the owners, the shareholders), moral hazard, discounting of free cash flow and terminal value, economies of scale and scope, and strategic management decision making are covered.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 690. Essentials of Economic Theory. 3 Credit Hours.

An economic study of the environment in which the decision making process takes place in management and the functional areas. Structured especially for students without an undergraduate background in economics. Credit not applicable toward 36-credit professional MBA component.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECO 691. Managerial Economics. 3 Credit Hours.

Application of economic analysis to the formulation and solving of management problems and the determination of business policy.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECO 692. Applied Economics. 3 Credit Hours.

This course is to provide practice in applying economic principles for graduate students with a basic understanding of economic theory.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECO 695. Global Economics. 2 Credit Hours.

This is a course in global economics with focus on economic policies and country risk. We study the aggregate behavior of macroeconomics variables that are relevant for business decisions. We take into account the interaction of the national economy with the rest of the world. In other words, we do global economics and study the roles of monetary and fiscal policies in an open economy, foreign direct investment, and the exchange rate.

Components: LEC.

Grading: GRD.

Typically Offered: Spring & Summer.

ECO 698. Selected Topics. 1-3 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECO 699. Directed Study. 1-3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ECO 750. Applied Economics: IO. 3 Credit Hours.

The first part of the course will focus on static analysis of market outcomes. The emphasis will be on empirical work, and there will be a number of places where we take digressions into econometric and computational issues. The second part will focus on related fields (bargaining, auctions and market design), and then move on to dynamic analysis in I.O. (both single and multiple agent dynamic models).

PRE-REQUISITE: ECO 602 AND ECO 633.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECO 830. Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 12. Not more than 12 hours of ECO 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

ECO 860. The Theory of International Trade. 3 Credit Hours.

This course presents rudiments in trade theory and open macroeconomics. International arbitrage as well as determination of the values of currencies and stocks.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

Ecosystem Science and Policy (ECS)

ECS 111. Introduction to the Earth's Ecosystem. 3 Credit Hours.

Earth's ecosystems and the interactions of humans with them. Concepts in ecology, environmental science and policy.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECS 112. Field Problems in Ecosystem Science and Policy. 2 Credit Hours.

Problem solving in ecology and environmental management. Class projects and case studies providing experience in identifying problems, quantifying scientific issues and considering management options and outcomes. Extensive field experience.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECS 113. Introduction to Environmental Policy. 3 Credit Hours.

Theories and case studies from various fields, including anthropology, economics, ethics, geography, political science and psychology, will be used to explore the multiple perspectives that influence group and individual perceptions of environmental issues.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECS 195. Studies in Ecosystem Science and Policy. 1-5 Credit Hours.

Courses taken at other institutions but having no direct equivalents here.

Components: LEC.

Grading: GRD.

ECS 196. Studies in Ecosystem Science and Policy. 1-5 Credit Hours.

Courses taken at other institutions but having no direct equivalents here.

Components: LEC.

Grading: GRD.

ECS 197. Studies in Ecosystem Science and Policy. 1-5 Credit Hours.

Courses taken at other institutions but having no direct equivalents here.

Components: LEC.

Grading: GRD.

ECS 198. Studies in Ecosystem Science and Policy. 1-5 Credit Hours.

Courses taken at other institutions but having no direct equivalents here.

Components: LEC.

Grading: GRD.

ECS 199. Studies in Ecosystem Science and Policy. 1-5 Credit Hours.

Courses taken at other institutions but having no direct equivalents here.

Components: LEC.

Grading: GRD.

ECS 201. Seminar Series in Contemporary Environmental Issues I. 1 Credit Hour.

Current environmental topics involving interaction of science and policy.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

ECS 202. Seminar Series in Contemporary Environmental Issues II. 1 Credit Hour.

Current environmental topics involving interaction of science and policy.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECS 204. Environmental Statistics. 3 Credit Hours.

An overview of parametric and nonparametric statistics with an emphasis on applications in the analysis of environmental data.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECS 215. Introduction to Private Urban and Suburban Green Spaces. 1 Credit Hour.

Faculty supervised research & application projects in indoor, urban, and suburban green spaces. Topics of focus include green walls, roof gardening, edible gardening, permaculture, sustainable gardening, composting & vermiculture, gardening for wildlife, and backyard ecology. No previous ecology or gardening experience required.

Components: FLD.

Grading: GRD.

Typically Offered: Fall & Spring.

ECS 232. Ecological Principles and Environmental Applications. 3 Credit Hours.

Overview of the science of ecology and its basic principles. Covers aspects of organismal ecology (including population genetics, structure, growth and regulation; adaptations and responses to the physical environment and biological communities); community ecology; and ecosystems (including energy flow, biogeochemical cycles, and biomes). Students will learn to apply ecological principles to understand and solve environmental problems.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECS 272. Special Topics in Ecosystem Science and Policy. 1-3 Credit Hours.

Content varies by semester and is indicated in parentheses following course number and title in class schedule.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECS 295. Studies in Ecosystem Science and Policy. 1-5 Credit Hours.

For courses taken at other institutions that have no equivalents here.

Components: LEC.

Grading: GRD.

ECS 296. Studies in Ecosystem Science and Policy. 1-5 Credit Hours.

For courses taken at other institutions that have no equivalents here.

Components: LEC.

Grading: GRD.

ECS 297. Studies in Ecosystem Science and Policy. 1-5 Credit Hours.

For courses taken at other institutions that have no equivalents here.

Components: LEC.

Grading: GRD.

ECS 298. Studies in Ecosystem Science and Policy. 1-5 Credit Hours.

For courses taken at other institutions that have no equivalents here.

Components: LEC.

Grading: GRD.

ECS 299. Studies in Ecosystem Science and Policy. 1-5 Credit Hours.

For courses taken at other institutions that have no equivalents here.

Components: LEC.

Grading: GRD.

ECS 301. Tools for Environmental Decision-Making: The Quantitative Perspective. 3 Credit Hours.

Quantitative decision-making techniques and methodologies.

Prerequisite: ECS 111 and ECS 112. or Requisite: Plan of ECS.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECS 302. Perspectives on Environmental Decision Making. 3 Credit Hours.

Techniques for assessing human impacts on the environment. Covers approaches from law, ethics, anthropology and includes cases involving local, regional and global environmental management issues.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECS 309. Microbes and the Environment. 3 Credit Hours.

This course is designed to provide students in geology, biology and environmental science a fundamental understanding of the role microbes play in shaping the Earth and its environments as well as the basic principles and approaches to studying these interactions in both modern and ancient settings. The metabolic diversity displayed by microbial communities makes them an integral component of global elemental cycles. In this regard, microorganisms have shaped our planet over the past 4 billion years and continue to do so in a very prominent way. The goal of this course is to learn about microbial diversity and metabolism, and the ability of microbes to shape and influence the environment.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECS 310. Sustainable Living. 3 Credit Hours.

Sustainable Living explores ways of living that can be sustained for thousands of years, without further damage to earth, ocean and atmosphere. Topics covered include renewable energy, agricultural practices, water issues, green building, low carbon transportation and healthy living/eating. Students advocate for sustainable practices of their choice in writing and in oral/visual presentations. Frequent field trips.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECS 312. Environment Assessment. 3 Credit Hours.

Execution of environmental due diligence in the context of property transactions and land and water pollution in a technical, regulatory, and legal framework, including how client advocacy and regulatory detail influence project design.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECS 323. Population, Sustainability, and the Media. 3 Credit Hours.

Explores opposing views of population growth and environmental sustainability through the media and cinema: contrasts "Doomsters" who believe population growth and resource consumption threaten human survival and pro-growth "Boomsters" who believe human ingenuity and technology will continue to allow humankind to prosper.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECS 325. Hazards and Disasters: The Nature-Society Interface. 3 Credit Hours.

Borrows from themes in Geography, Urban Planning, Anthropology and Policy Studies to explore how human-environmental interactions determine the distribution, causes and consequences of natural hazards and disasters.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECS 332. Ecology and Land Use in the Galapagos. 3 Credit Hours.

Fundamental principles of ecology manifested on Isla Isabela will be employed to evaluate land usages including subsistence and production agriculture, animal husbandry, fuel wood and timber, and conservation with ecotourism. Habitats, flora, and fauna from the vicinity of Puerto Villamil to the rim of Volcán Sierra Negra; analysis of agricultural practices and problems of the mist zone on this volcano's southeastern flank.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECS 335. Biodiversity in Peru. 3 Credit Hours.

The focus is on developing skills to analyze and value the components of biodiversity, identifying its potentials and the tools to make sustainable use and conservation possible.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECS 337. Latin America and the Environment. 3 Credit Hours.

Theoretical dimensions of current environmental challenges in Latin America and examines their ecological, social, economic, and political dimensions.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECS 342. Decision-Making and the Environment. 3 Credit Hours.

Provides a comprehensive overview of the art and science of decision modeling in natural resources policy management. Students learn to understand and develop basic decision models, interpret the results and communicate them to non-analytical decision makers.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECS 345. Economics of Natural Resources and the Environment. 3 Credit Hours.

A comprehensive overview of the economics of national, international, and global environmental problems. A unifying theme throughout is sustainable development defined as "maximizing the net benefits of economic development while maintaining the services and quality of natural resources over time". We will use economic reasoning to examine causes and consequences of environmental and resource problems, and measures for dealing with them.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECS 352. Environmental Ethics. 3 Credit Hours.

Theoretical and practical issues in the field of environmental ethics.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECS 357. Global Food: A Hands-On Approach. 3 Credit Hours.

Application of principles of permaculture via designing and creating a small "global farm" on campus to grow perennial food crops which are unique to the South Florida environment. We learn by doing, cultivating plants that hold the solution to world hunger problems.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECS 360. Readings in Ecosystem Science and Policy. 1-3 Credit Hours.

Supervised readings on special topics. Offered by special arrangement with a faculty member. May be repeated for credit.

Components: DIS.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECS 361. Readings in Ecosystem Science and Policy. 1-3 Credit Hours.

Supervised readings on special topics. Offered by special arrangement with a faculty member. May be repeated for credit.

Components: DIS.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECS 362. Readings in Ecosystem Science and Policy. 1-3 Credit Hours.

Supervised readings on special topics. Offered by special arrangement with a faculty member. May be repeated for credit.

Components: DIS.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECS 363. Readings in Ecosystem Science and Policy. 1-3 Credit Hours.

Supervised readings on special topics. Offered by special arrangement with a faculty member. May be repeated for credit.

Components: DIS.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECS 371. Readings in Ecosystem Science and Policy. 1-2 Credit Hours.

Supervised readings on special topics. Offered by special arrangement with a faculty member. May be repeated for credit.

Components: DIS.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECS 372. Special Topics in Ecosystem Science and Policy. 3 Credit Hours.

Content varies by semester and is indicated in parentheses following course number and title in class schedule.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECS 373. Topics in Ecosystem Science. 3 Credit Hours.

Content varies by semester and is indicated in parentheses following course number and title in class schedule.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECS 374. Topics in Environmental Policy. 3 Credit Hours.

Content varies by semester and is indicated in parentheses following course number and title in class schedule.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECS 375. Topics in Environment and the Humanities. 3 Credit Hours.

Content varies by semester and is indicated in parentheses following course number and title in class schedule.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECS 376. Topics in Environmental Communication. 3 Credit Hours.

Content varies by semester and is indicated in parentheses following course number and title in class schedule.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECS 377. Topics in Environmental Economics and Development. 3 Credit Hours.

Content varies by semester and is indicated in parentheses following course number and title in class schedule.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECS 379. Special Topics in Ecosystem Science and Policy. 1-4 Credit Hours.

Content varies by semester and is indicated in parentheses following course number and title in class schedule.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECS 380. Field Studies in Ecosystem Science and Policy. 1-4 Credit Hours.

Field course to various U.S. and international regions, focusing on current and historic interactions of humans with the local environment. Includes water, land, and mineral resources as well as impacts on local ecosystems. Emphasis on current management efforts and potential impacts of climate change.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECS 381. Field Studies in Ecosystem Science and Policy. 1-4 Credit Hours.

Field course to various U.S. and international regions, focusing on current and historic interactions of humans with the local environment. Includes water, land, and mineral resources as well as impacts on local ecosystems. Emphasis on current management efforts and potential impacts of climate change.

Components: FLD.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECS 385. Civic Engagement in the Galapagos. 3 Credit Hours.

This course is part of the UGalapagos semester held in the Galapagos and is open only to students who have been accepted by the Department of Biology. This field course offers you a rare chance to examine human interactions in a highly politicized landscape of conservation. You will learn historical development and contemporary issues of Latin America from an interdisciplinary perspective, through the cultural, political and social lens of the Galapagos

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECS 391. Studies in Ecosystem Science and Policy. 1-4 Credit Hours.

(Not offered: transfer credit only) Courses taken at other institutions but having no direct equivalents here.

Components: LEC.

Grading: GRD.

ECS 392. Studies in Ecosystem Science and Policy. 1-4 Credit Hours.

(Not offered: transfer credit only) Courses taken at other institutions but having no direct equivalents here.

Components: LEC.

Grading: GRD.

ECS 393. Studies in Ecosystem Science and Policy. 1-4 Credit Hours.

(Not offered: transfer credit only) Courses taken at other institutions but having no direct equivalents here.

Components: LEC.

Grading: GRD.

ECS 394. Studies in Ecosystem Science and Policy. 1-4 Credit Hours.

(Not offered: transfer credit only) Courses taken at other institutions but having no direct equivalents here.

Components: LEC.

Grading: GRD.

ECS 395. Studies in Ecosystem Science and Policy. 1-4 Credit Hours.

(Not offered: transfer credit only) Courses taken at other institutions but having no direct equivalents here.

Components: LEC.

Grading: GRD.

ECS 401. Internship. 3 Credit Hours.

Students selecting the internship will be required to spend a minimum of 120 contact hours working in an outside firm or agency whose mission is to address environmental issues where science and policy intersect.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECS 402. Thesis. 3 Credit Hours.

Individual, original research of independent study supervised by a UM faculty member and concluded by formal thesis preparation, public oral defense and submission of the thesis.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECS 403. Interdisciplinary Approaches. 3 Credit Hours.

Students with diverse disciplinary backgrounds will design an interdisciplinary study focused on an environmental problem with a major science component and significant societal implications. Students will apply quantitative methods, formulate usable policy, and communicate their results.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECS 405. Applied Research in Ecosystem Science and Policy. 1-3 Credit Hours.

Faculty-mentored applied research in environmental topics. Projects in natural ecosystems, sustainable design and business, and communication of environmental issues.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECS 415. Research in Private Urban and Suburban Green Spaces. 1 Credit Hour.

Faculty supervised research & application projects in indoor, urban, and suburban green spaces. Topics of focus include green walls, roof gardening, edible gardening, permaculture, sustainable gardening, composting & vermiculture, gardening for wildlife, and backyard ecology.

Requisite: ECS Major or ECS Minor or Prerequisite: ECS 215.

Components: FLD.

Grading: GRD.

Typically Offered: Fall & Spring.

ECS 432. Ecology in the Galapagos. 3 Credit Hours.

Organisms in relation to their environment, with a focus on interactive hands-on learning experiences that connect empirical nature with abstract thinking. Lectures, discussion and field work will help students begin to understand ecosystem ecology, plant dispersal and colonization, organisms' responses to spatial and temporal variability in their environments, plant/animal interactions. Origins and effects of invasive species and actions of bio-control agents.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECS 433. Conservation in Practice. 3 Credit Hours.

Intersection between economic development, science and conservation in one of the world's most pristine and fragile ecosystems. Exploration of how tourism offers an alternative to unsustainable fisheries that once drove the local economy, yet has created a new set of pressures on the people and the environment. Mitigation efforts, science, and international conservation mesh with an understanding of local politics, customs, and cultures.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECS 485. Political Ecology of the Galapagos. 3 Credit Hours.

This course is part of the UGalapagos semester held in the Galapagos and is open only to students who have been accepted by the Department of Biology. Throughout the term, you will engage in civic activities identified in consultation with the people, government and public health facilities of the small, rural village of Villamil, the sole habitation on Isla Isabella. A major aim is to nurture the mutual respect and understanding across the cultural divide that is necessary to make a difference in the civic life of a community.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECS 501. Interdisciplinary Environmental Theory. 3 Credit Hours.

Theoretical approaches in environmental and social science fields, including conservation biology, ecology, geography, economics, sociology, anthropology, philosophy, and interdisciplinary approaches. Themes include human ecology, historical ecology, landscape ecology, environmental law and ethics, perception of risk and uncertainty, vulnerability and adaptation, and environmental valuation.

Requisite: Plan of Ecosystem Science and Policy.

Components: DIS.

Grading: GRD.

Typically Offered: Fall.

ECS 503. Interdisciplinary Environmental Methods. 3 Credit Hours.

Environmental methods related to core programmatic themes of Urban Ecology, Global Public Health, Climate and Society, Environment and the Media, Integrated Marine and Terrestrial Management, and Regulatory Regimes. The course focuses on the application of Interdisciplinary approaches and methods for addressing complex environmental problems. Students will learn to design and employ interdisciplinary approaches, using qualitative and quantitative methods and analysis, through lectures, reading assignments, discussion sessions, and assignments.

Requisite: Plan of Ecosystem Science and Policy.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

ECS 507. Interdisciplinary Environmental Decision Analysis. 3 Credit Hours.

Approaches to studying and interpreting human behavior related to a range of decision making at the level of individual, group, and firm.

Multidisciplinary theories and methods informing work in the decision sciences will be covered from fields of psychology, business, economics, political science, and anthropology.

Requisite: Plan of Ecosystem Science and Policy.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECS 515. Private Green Space Management. 3 Credit Hours.

Students plan and manage ongoing and proposed green space projects. Student managers work with supervising faculty; also organize and educate student volunteers and students concurrently enrolled in ECS 215 and 415.

Prerequisite: ECS 415.

Components: FLD.

Grading: GRD.

Typically Offered: Fall & Spring.

ECS 572. Special Topics in ECS. 3.00 Credit Hours.

Content varies by semester and is indicated in parentheses following course number and title in class schedule.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECS 580. Field Studies. 1-4 Credit Hours.

This course will provide participants with the opportunity for intensive field research geared toward an interdisciplinary understanding of environmental issues and conservation concerns.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECS 601. Interdisciplinary Environmental Theory. 3 Credit Hours.

Theoretical approaches in environmental and social science fields, including conservation biology, ecology, geography, economics, sociology, anthropology, philosophy, and interdisciplinary approaches. Themes include human ecology, historical ecology, landscape ecology, environmental law and ethics, perception of risk and uncertainty, vulnerability and adaptation, and environmental valuation.

Requisite: Plan of Ecosystem Science and Policy.

Components: DIS.

Grading: GRD.

Typically Offered: Fall.

ECS 603. Interdisciplinary Environmental Methods. 3 Credit Hours.

Environmental methods related to core programmatic themes of Urban Ecology, Global Public Health, Climate and Society, Environment and the Media, Integrated Marine and Terrestrial Management, and Regulatory Regimes. The course focuses on the application of interdisciplinary approaches and methods for addressing complex environmental problems. Students will learn to design and employ interdisciplinary approaches, using qualitative and quantitative methods and analysis, through lectures, reading assignments, discussion sessions, and assignments.

Requisite: Plan of Ecosystem Science and Policy.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

ECS 605. Interdisciplinary Environmental Law and Policy. 3 Credit Hours.

Analysis of science-based environmental decision-making and policy implementation at the federal and state levels in the United States, with comparative international perspectives, and an introduction to international institutions that fashion and carry out environmental policy. Case studies will cover authorization, appropriations and oversight functions of Congress and state legislatures; the role of the executive, federal and state, in initiating and implementing statutes by regulation and other means; and the role of negotiation, litigation, mediation and consensus-building in resolving disputes and advancing or thwarting environmental policy.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECS 607. Interdisciplinary Environmental Decision Analysis. 3 Credit Hours.

Approaches to studying and interpreting human behavior related to a range of decision making at the level of individual, group, and firm. Multidisciplinary theories and methods informing work in the decision sciences will be covered from fields of psychology, business, economics, political science, and anthropology.

Requisite: Plan of Ecosystem Science and Policy.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECS 608. Interdisciplinary ECS Seminar. 2 Credit Hours.

Seminar centering on research and case studies illustrating cutting edge human-environment research, and including both qualitative and quantitative methods. Intensive reading and writing related to relevant topics in the field.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

ECS 609. Contemporary Representations of the Environment. 3 Credit Hours.

This course will combine media studies, environmental studies, and critical theory to give students a broad introduction to ways in which screen media are used today to represent both the natural world and also environmental issues such as climate change, animal extinction, and natural resource use. From more conventional media such as feature fiction films (e.g. Wall-e, The Day After Tomorrow, Avatar), documentary films (e.g. An Inconvenient Truth, HBO's Gasland), and television news coverage, to more niche formats like Google Earth's global mapping and in-dash monitors that depict miles-per-gallon, screen technology has long been and is increasingly used to mediate our relationship with surrounding ecosystems. Students will look at mainstream television channels (e.g. Discover, National Geographic, and the Weather Channel) alongside the digital campaigns of agencies and institutions directly aimed at conservation efforts, including the ecotourism industry, non-profit environmental groups, and governmental bodies such as the National Parks Service. In addition, this course will investigate the increasing role of interactive media in museums and science centers, as well as the rising power of social media in disseminating news regarding environmental issues.

Components: RSC.

Grading: GRD.

Typically Offered: Fall.

ECS 610. Technology and Human Behavior. 3 Credit Hours.

This course will explore the social aspects of technology use and cultural adaptation through cross-cultural ethnographic research on science and traditional beliefs. From the adoption of chainsaws in Amazonian forestry to the use of smart watches in Japanese cities, technological choice will be examined through psychological theories of behavior, socio-cultural perspectives, and institutional and economic forces. Reflecting the rising social, cultural, scientific, and political importance of emerging digital culture (e.g. virtual reality, smart devices, artificial intelligence), a key focus of the second half of the course will focus on philosophical notions of post-human cyborgism. Students will be introduced to recent research on the cognitive issues of social media use and consumption, including social media addiction and other neurological impacts of chronic screen use. Coursework will connect historical understandings and larger social analysis of digital media use and encourage students to participate in an ongoing exploration of their own technological choices and media practices. Students will also be exposed to multidisciplinary theories and research on risk perception and the psychology and effectiveness of environmental messaging in order to address how various media technologies impact individual and collective thinking and action.

Components: RSC.

Grading: GRD.

Typically Offered: Fall.

ECS 611. Nature, the Anthropocene, and Visual Culture. 3 Credit Hours.

Different cultural and historical contexts have conceived of humanity's relationship to the natural world in vastly different ways, from 'sacred and part of' to 'separate from' and 'steward over.' A culture's techniques of representation, use of imagery, and ways of seeing are a key part of the shaping of its worldview and cognitive framework of shared ideas and beliefs. This course is an opportunity for students to use an anthropologist's eye to actively engage with the human production of knowledge about the natural world through visual culture. Rather than approaching visual anthropology with its usual divide between 'anthropological content' and 'aesthetic composition,' this course will foster both approaches as it examines human perceptions of the environment from prehistoric cave paintings to modern day street art. Key elements of visual anthropology will be introduced, including symbols and symbolism, reflexivity, visual data of everyday life, art analysis, ethics, society-as-text paradigm, urban visual data, and ways of conceiving systems of visual representation. Representations of Other will be analyzed through theories of the exotic, gender, race, post-colonialism, nationalism, and heritage studies.

Components: RSC.

Grading: GRD.

Typically Offered: Spring.

ECS 612. Environmental Communication, New Media, and Policy. 3 Credit Hours.

Facebook and Twitter to the rhetorical film essay documentaries that have waged ideological wars over the past twenty years, screen and new media are an increasingly powerful force in the shaping of policy, political awareness, and popular ideological views of the environment. This course will draw on critical approaches of media theory, rhetoric, and political science to study and interpret the political use of visual media. Just as FDR's WPA used film to propagandize the agricultural importance of public works, and Hollywood has been harnessed for ecological causes from natural conservation to climate change, today screen and digital media (e.g. television commercials, podcasts, social media blasts) are the driving force of PR campaigns for both governmental bodies and private companies that greatly impact environmental understanding and policy. From information to misinformation, viral content streams constantly onto screens across the world, whose apps are also used for activism and citizen science—students will look at what strategies of circulation and rhetoric are used to wage digital campaigns to communicate and shape ecological values and policy.

Components: RSC.

Grading: GRD.

Typically Offered: Spring.

ECS 614. Environment, Culture, and Media Thesis. 3-6 Credit Hours.

This course is for research culminating in a Master's thesis. Students will enroll in 3-6 credits while researching and writing their final project for the ECM Masters of Arts.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

ECS 615. Environment, Culture, and Media Internship. 3-6 Credit Hours.

This course is for hands-on experience and research culminating in a final Master's internship report. Students will enroll in 3-6 credits while completing their internship and researching their final project for the ECM Masters of Professional Science.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

ECS 672. Special Topics in ECS. 3.00 Credit Hours.

Content varies by semester and is indicated in parentheses following course number and title in class schedule.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECS 680. Field Studies. 1-4 Credit Hours.

This course will provide participants with the opportunity for intensive field research geared toward an interdisciplinary understanding of environmental issues and conservation concerns.

Components: LEC.

Grading: GRD.

Typically Offered: Spring & Summer.

ECS 725. Problems in Environmental Science and Policy. 1-6 Credit Hours.

Content and prerequisites announced when offered. Course may be repeated for credit if content varies.

Requisite: Plan of Ecosystem Science and Policy.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECS 790. Directed Readings. 1-3 Credit Hours.

Individually supervised readings on special topics. Offered by arrangement with the instructor. May be retaken for credit.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ECS 820. Master's Research. 9.00 Credit Hours.

Individual study for students exiting the doctoral program without a successful dissertation proposal.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

ECS 830. Pre-Candidacy Research. 1-9 Credit Hours.

Research for ECS Ph.D. students who have not attained candidacy.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECS 840. Doctoral Dissertation. 1-12 Credit Hours.

Required for all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 13 credits total. No more than 12 hours of ECS 730 may be taken in a regular semester, nor more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

ECS 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Educational and Psychological Studies (EPS)

EPS 201. Psychosocial Change and Well-being. 3 Credit Hours.

Introduction to personal and interpersonal approaches to well-being. Includes theoretical, historical, philosophical, and psychological bases of well-being. Emphasis will be placed on real-life applications of theory and practice to the promotion of psychosocial change and well-being.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPS 270. Lifespan Human Development. 3 Credit Hours.

Processes and theories of human development from birth to old age are explored. Areas to be covered include: physical development, cognitive development, social and personality development, moral development, and language development. Emphasis is placed on development as a life-long process and its importance in understanding human behavior.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPS 280. Introduction to Family Studies: Dating, Coupling, Parenting. 3 Credit Hours.

Theory and practice of romantic relationships and parent-child relationships, including discussion and skills building. Research based information on how to maximize the quality of these interpersonal relationships will be examined.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPS 291. Community and Character Development. 3 Credit Hours.

The course covers moral and psychological dimensions pertaining to character development as it occurs in communities. Topics include contemporary theory and research regarding perspectives on virtue and morality, states of character, ethical decision making, and character development. The reciprocal relationships between character and community will be a central theme in exploring ethical issues that arise in working with individuals, institutions, and communities. Theory and research will be linked to relevant applications.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 306. Insanity and Humanity: Mental Illness, Society, Stigma and Services. 3 Credit Hours.

The genesis for this course was the generally poor, inaccurate and stigmatized understanding of mental illness in society based on portrayals in popular media including Hollywood produced films. However, over the past several years the depth and accuracy of awareness and knowledge has changed, as the depiction of mental illness and treatment services in films has improved and the availability of narrative accounts has increased. This course is designed to allow Human and Social Development majors, with a particular interest in wellness and human services, to explore varying portrayals of mental illnesses in popular media. The course will foster critical analysis of narrative and film depictions of illness, as well as connect these depictions to a broader narrative on stigma, social determinants of illness and wellness, prevention and intervention.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

EPS 311. Group Processes and Development. 3 Credit Hours.

Research findings concerning the nature of small groups and patterns of behavior associated with them are explored. Students experience an ongoing group process to which theories and concepts can be applied. Emphasis is placed on learning to be a participant observer of group behavior and processes, learning about one's own behavior in groups, and developing skills to be a more effective member and leader in task groups.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 321. Understanding Human Service Organizations. 3 Credit Hours.

Focus on unique role of community-based human services organizations in society with an overview and history of community organizations, which provide services, support, advocacy, and organizing in today's communities. Review of the systems, cultures, structures, and processes of community organizations with a special emphasis on promoting well-being in communities. This course has a 10 hours field research experience requirement. This course is a designated Upper Level Communication Requirement; advanced written, digital and/or oral communication proficiencies will be emphasized in this course. Credit for ENG 105 and ENG 106 (or equivalent), is required for this course.

Prerequisite: EPS 201 or Co-requisite: EPS 311.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 340. Psychology and Sociology of Sexual Identity. 3 Credit Hours.

History, psychology, and sociology of gay, lesbian, and transgendered populations.

Prerequisite: PSY 110 or SOC 101.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

EPS 351. Introduction to Statistics and Research Design. 3 Credit Hours.

The course will cover basic statistics relevant to the social sciences (e.g., central tendency, variation, t-tests, correlations), with emphasis on real world applications employing commonly used research designs. Students will acquire the tools necessary to interpret elementary statistical analyses and a foundation in the basic analytic methods used in conducting quantitative research in the behavioral sciences.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 360. Educational Psychology. 3 Credit Hours.

A review of basic educational psychology principles including cognitive and language development, personal, social and moral development, learning theories, and motivation. A review of basic concepts that contribute to effective learning and other aspects of education.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

EPS 361. Community Psychology and Development. 3 Credit Hours.

Community psychology is about the prevention of psychosocial problems and the promotion of mental health and well being through the creation of equitable and just social settings, neighborhoods, communities, and societies. Course topics include: stress and social support; oppression and human diversity; primary prevention, social intervention and health promotion; self-help; mediating structures; community mental health; alternative settings; community development and social change.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPS 365. Psychological Study of Children, Families, and the Law. 3 Credit Hours.

This course will introduce students to the psychological research and practice that has a bearing on legal policy and practice. Psychological research (social, clinical, developmental, and community) will be emphasized along with legal rulings, especially from the Supreme Court. Throughout the course, the underlying question will be, "How can psychological research and theory inform the law in matters that relate to children, families, and communities?"

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 371. Applied Social Research Methods. 3 Credit Hours.

The study of the ethics, philosophies, designs, methods and techniques of research in the behavioral and social sciences. This course provides a brief orientation to quantitative, qualitative, mixed-methods, and participatory research designs and approaches used in the collection, analysis and interpretation of social research data. This course is a designated Upper Level Communication Requirement; advanced written, digital and/or oral communication proficiencies will be emphasized in this course. Credit for ENG 105 and ENG 106 (or equivalent), is required for this course.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 411. The Psychology of Diversity. 3 Credit Hours.

This course critically examines how diversity and social justice issues impact everyday life. The focus is on how personal, group, and cultural identities (race, ethnicity, gender, sexual orientation, age, disability, religion, immigration status, and social class), and the intersections of these identities influence individuals' lives and experiences. This is primarily a survey course, designed to introduce major concepts, models, theories, and research that emanate from the literature on diversity and multicultural psychology. This is a critical backdrop to prepare students to be multiculturally responsive in this increasingly global society. Borrowing from history, cultural anthropology, social psychology, indigenous psychology, counseling psychology, and general psychology, the curriculum will engage students in theoretical, research-based, and experiential exercises in order to develop a comprehensive understanding that will lead to culturally responsive and ethical mindsets and practice.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 412. Migration, Well Being, and Human Development. 3 Credit Hours.

This course explores the social and psychological processes involved in migration and issues relevant to well-being of diverse immigrant groups including immigration policies, the psychology of immigration and acculturation, ethnic identities, issues in immigrant families, immigrant communities, educational, health, and mental health issues.

Prerequisite: EPS 201.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 420. Introduction to Counseling and Psychotherapy. 3 Credit Hours.

This course is a survey of the theories and practical applications of counseling and psychotherapy. Students will acquire an understanding of a variety of theories of psychotherapy, the basic requirements and skills for effective, ethical counseling, and an appreciation for the role of values and human differences in counseling and psychotherapy. This course does not prepare students for practice in mental health professions.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPS 440. Listening and Helping Skills.. 3 Credit Hours.

Listening and Helping Skills is an introductory course to the foundational skills used in helping relationships. Through lectures, discussions and role-plays, students will learn the rationale behind basic helping skills and their application to diverse settings and contexts.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 452. Community Program Development and Evaluation. 3 Credit Hours.

This course addresses the theoretical and practical principles of designing, planning, implementing, and evaluating programs in community-based settings. The students will learn about prevention, effective program development, program approaches, program components, program evaluation, and cultural proficiency in program development and evaluation. Students will acquire and practice skills for becoming effective workers and leaders in community-based agencies. The course will consist of readings, presentations, and applied knowledge.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 462. Community Consultation and Leadership. 3 Credit Hours.

This course will cover strength based, preventive, empowering approaches to institutional and community change, and will address related skills, stages, processes and outcomes; Conflict resolution, facilitation, strategic planning, visioning, advocacy, change management, and community mobilization will be studied and practiced in class.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 504. Mentored Research Studies. 1-3 Credit Hours.

Under the guidance of EPS faculty and graduate students, undergraduate students, will have an opportunity to get involved in various components of research study; gain valuable knowledge and research experience; and expand their undergraduate academic experience.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

EPS 533. Organization and Administration of Higher Education I. 3 Credit Hours.

Theoretical approaches from organizational analysis. Applications to problems, processes, and patterns of higher education institutions.

Consideration given to legal status, governance patterns, and external relations. Administrator, faculty, trustee, and student roles are also explored.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 578. Human and Social Development Practicum. 3-6 Credit Hours.

The practicum serves an integrative function: it allows students to apply their academic training, to further develop their career goals, and to hone their skills while gaining experience in real-world settings. Practica are unpaid, supervised experiences. Students choose from a menu of settings that have been approved as HSD practicum sites and spend a minimum of 120 hours (3 credits) or 250 hours (6 credits) at their chosen setting over the course of the semester. Must be taken concurrently with EPS 481.

Components: PRA.

Grading: GRD.

Typically Offered: Spring.

EPS 579. Human and Social Development Practicum Seminar. 3 Credit Hours.

The Practicum Seminar brings theory and research to bear on the student's practicum experiences, and provides a forum for further professional skill development and growth. Students will complete a major project integrating their experiences. This course is a designated Upper Level Communication Requirement; advanced written, digital and/or oral communication proficiencies will be emphasized in this course. Credit for ENG 105 and ENG 106 (or equivalent), is required for this course.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 587. Special Topics in Human and Social Development. 1-3 Credit Hours.

This course is designed for students wishing to focus on a specific area of study within the umbrella of Human and Social Development. Topics will be offered based on current trends in the field as well as student and faculty interest. Students will be given supervision and support in a structured seminar setting.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 589. Individual Study. 1-3 Credit Hours.

Individual work on a special project under faculty guidance.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

EPS 592. Workshop in Education. 1-3 Credit Hours.

Study in special interest areas in education.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

EPS 593. Workshop in Education. 3 Credit Hours.

Study in special interest areas in education.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPS 595. Research Project I. 2 Credit Hours.

This course is restricted to students in the SEHD who have been accepted into the Research Honors Program and are working with a Faculty mentor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPS 596. Research Project II. 2 Credit Hours.

This course is restricted to students in the SEHD who have been accepted into the Research Honors Program and are working with a Faculty mentor.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

EPS 598. Research Project - Seminar. 1 Credit Hour.

This course is restricted to students in the SEHD who have been accepted into the Research Honors Program and are working with a Faculty mentor. Students are required to present at the undergraduate Research, Creativity, and Innovation Forum.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

EPS 599. Individual Study. 1-3 Credit Hours.

Individual work on a special project under faculty guidance.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

EPS 600. Field Exper Edu Res. 2-6 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 601. Field Studies in Education. 1-6 Credit Hours.

Individual study of a school or school system, identifying its strengths and weaknesses, and making positive recommendations.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPS 605. Regression Methods. 3 Credit Hours.

The aim of this course is to provide a solid foundation in the basic concepts of multivariate statistics, and its application to practical research questions. This course extends the content of EPS 671 (ANOVA methods) and EPS 672 (regression methods) to cover methods used when there are multiple dependent variables to be modeled simultaneously. This course focuses on the traditional multivariate methods (as opposed to the contemporary models of structure equation modeling) that see wide use in the behavioral sciences. The general topics covered in the course include, but are not limited to: introductory matrix algebra, multivariate analysis of variance (MANOVA), factorial MANOVA, discriminant function analysis, and exploratory factor analysis. In all cases, this course is intended to provide a solid conceptual background of these topics, as well as a thorough description/practice of the application of these topics to real data scenarios.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 620. Workshop in Education. 3 Credit Hours.

Study in special interest areas in education.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPS 622. Community Well-being and Change: Theory and Practice. 3 Credit Hours.

This course is designed to promote an understanding of the factors associated with healthy communities. It provides a comprehensive overview of the relevant skills and theories including: ecological/systems theory/models; community theories (sense of community, social capital, environmental psychology); and critical social theory, social justice, and social determinants of well-being.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 623. Development and Change in Community Organizations: Theory and Practice. 3 Credit Hours.

This course focuses on the unique role of non-profit, community-based organizations in promoting human and community development. Students will engage in an analysis of the range of functions that organizations serve and the various organizational strategies used in community settings.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 624. Essentials of Research in Social and Behavioral Sciences. 3 Credit Hours.

Study of the standards methods and techniques of research in the behavioral and social sciences. Brief orientation to quantitative and qualitative procedures used in the analysis and interpretation of research data are emphasized.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 625. Program Evaluation. 3 Credit Hours.

Terminology, models, standards, practices, and common problems associated with program evaluation in Educational and Social Service settings.

Prerequisite: EPS 670 and 553 or equivalents.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 626. Multicultural Communities in a Globalized Society. 3 Credit Hours.

This course examines the relationship between multiculturalism and globalization and how these concepts impact education and the world at large.

Topics include dimensions of human diversity, identities and acculturation; race and class; gender and power; children and youth; social inclusion and social justice; health disparities; poverty and work; racism and inequality.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 627. Community Youth Development. 3 Credit Hours.

This course in community youth development (CYD) will focus on the philosophical, sociological, and educational foundations of a youth development perspective that highlights youth as powerful catalysts for change and positive forces in shaping communities. We reflect on how youth development is inextricably linked with family and community development. After reviewing and critiquing traditional adolescent development theories, students will engage with theories and practices of CYD, youth empowerment, youth civic engagement, youth organizing, social justice youth development, youth activism, and critical youth engagement.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

EPS 628. Social Change Praxis. 3 Credit Hours.

In this course, we will explore the meaning of social change and the nature of power, examine past and present social movements, and learn about the strategies and methods groups have used to build community and deploy collective power in their efforts to change minds, systems, institutions, policies, communities, and nations. Together, we will learn more about critical theories of power, collaboration, systems, and social mobilization, and look at real-life cases to see how theory can be applied in practice. The concept of praxis was chosen as the organizing framework because it requires students to develop an intellectual relationship to their activism. Praxis, simply put, means action informed by theory. In addition to reflecting on our own values and assumptions as agents of change, we will develop skills for facilitating engaging discussions, recruiting and motivating community members, developing a shared social analysis, mobilizing resources, and building coalitions for social change. We will identify common strategies used in successful campaigns and analyze the choices groups have made in their pursuit of the collective power necessary to achieve their social change goals.

Prerequisite: EPS 622. And EPS 623. And EPS 624. And EPS 625. And EPS 626.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

EPS 629. Seminar in Community and Social Change. 3 Credit Hours.

This course is a combination of self-directed and guided elements aiming to build your skills as a reflective, theory and science-based practitioner. To this end, the course provides in-depth exploration and application of core readings and theories in community and social change. The purpose of this course is to apply these core concepts to your practicum and provide a space for critical reflection on your practicum experience (student placement in an organization or a foreign culture). Thus, the course includes both didactic and practicum elements throughout the semester. The didactic aspect focuses on intervention theory and method from a community psychology perspective; the student placement represents a structured opportunity to learn about intervention theory as applied to a particular setting.

Components: PRA.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

EPS 635. Special Topics in Educational and Psychological Studies. 1-3 Credit Hours.

Review of emerging policy, practice, empirical research and scholarly writing on important educational issues for which formal course title and syllabus have not been developed and formalized in the UM Bulletin. Allows for experimental instructional formats. This course is designed for students wishing to focus on a specific area of study within the umbrella of Educational and Psychological Studies. Topics will be offered based on current trends in the field as well as student and faculty interest. Students will be given supervision and support.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 667. Professional, Legal and Ethical Issues in Counseling. 3 Credit Hours.

Professional, legal, ethical, and licensing issues in the counseling profession.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

EPS 668. Social and Cultural Diversity and Counseling. 3 Credit Hours.

Interrelationship between psychology and sociology in understanding development of diversity in human social systems. Implications for counseling and therapy.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 669. Psychopathology for Counselors. 3 Credit Hours.

In depth introduction to abnormal human behavior patterns of concern to mental health professionals. Clinical conditions will be examined within the context of currently most viable theory and research relating to etiology, assessment, diagnosis and treatment.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 670. Dynamics of Marriage and Family Systems. 3 Credit Hours.

Introduction to the history and development of marriage and family systems theory as a method for understanding individuals' behavior and functioning. Introduction to several modes of family therapy. Throughout the course, lectures will also be integrated with other topics including race, culture, gender, sexual orientation, ability.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 671. Family Therapy. 3 Credit Hours.

Concentrated study of several approaches to family therapy including systemic and psychosocial perspectives. Theory and techniques of family therapy are taught in lecture, videotape, and simulation.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 672. Therapy for Couples. 3 Credit Hours.

Theory and technique linked to working with couples, in marriage and in other relationships.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

EPS 673. Counseling in Community Settings. 3 Credit Hours.

Exploration of a variety of perspectives on community services relevant to mental health counselors. Topics include: the variety of community settings; community, national, and international diversity in mental health services; diversity of clients (e.g., cultures, religions, GLBT, elderly, social classes, disabilities); mental health funding; the role of politics, policy, advocacy, and research; interviewing across cultures.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 674. Lifestyle and Career Counseling. 3 Credit Hours.

An introductory course in career development and career counseling, focusing on theories of career development, counseling tools, strategies, and sociological, economic, and psychological influences on the American worker.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 675. Therapeutic Group Procedures. 3 Credit Hours.

This course examines both the theory and practice of group counseling. The course covers therapist issues, patient selection criteria, group structuring as well as basic therapeutic techniques. The course prepares students to design structured counseling groups, to prepare group counseling materials, and to lead counseling groups of various types.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

EPS 676. Counseling Process and Practice. 3 Credit Hours.

The development of basic communication and clinical skills necessary for establishing the counseling relationship and conducting therapy.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 677. Assessment Strategies for Counselors I. 3 Credit Hours.

This course places emphasis on diagnosis, appraisal, assessment, and testing for individual and interpersonal disorders. It addresses statistical procedures and psychometric principles necessary for responsible test use and exposes the student to a variety of test and non-test assessment techniques in marriage and family, and mental health counseling.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 678. Counseling Theories and Practice. 3 Credit Hours.

Study of theories and concomitant practices in counseling and therapy.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 679. Lifespan Human Development. 3 Credit Hours.

Theories and research relating to the biophysical, cognitive, and psychosocial domains of human lifespan development.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 680. Theory and Practice with Children and Adolescents. 3 Credit Hours.

Course prepares students to provide preventive and therapeutic interventions with children and adolescents including theory, research, and practice.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

EPS 681. Counseling and Sexuality. 3 Credit Hours.

Emphasis is placed on self-awareness and acceptance of all dimensions of human sexuality. Readings and classroom activities focus on biological aspects of sexuality, an understanding of sexual dysfunctions, and their treatment.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

EPS 682. Practicum in Counseling I. 1-4 Credit Hours.

Supervised Practicum at the Institute for Individual and Family counseling and other appropriated clinical settings relating theoretical formulations to intervention strategies appropriate to specialization.

Corequisite: EPS 619.

Components: PRA.

Grading: GRD.

Typically Offered: Fall & Spring.

EPS 683. Practicum Laboratory I. 1-4 Credit Hours.

Individual, dyad, and small group supervision at approved Practicum sites.

Components: PRA.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

EPS 684. Research and Program Evaluation in Counseling. 3 Credit Hours.

Course focuses on the interpretation and application of research data as applied to clinical practice. Skills in using behavioral research-based literature to identify, evaluate and interpret appropriate interventions are also emphasized.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 685. Substance Abuse and Addictions: Theories and Counseling. 3 Credit Hours.

Theories and research on individual, systemic causes, and outcomes of substance abuse, and concomitant practices in counseling and therapy.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 686. Working with Black Clients: Treatment and Assessment Considerations. 3 Credit Hours.

This course presents three core content areas with respect to the treatment and assessment of Black populations. The first content area addresses historical aspects of the development of Black psychology. Additionally, it will review ethnocentrism, the misuse of Western psychology to marginalize African Americans and reasons for scientific abuses against people of color, such as the Tuskegee Syphilis Study. Lastly the first content area will focus on topics such as the Black family, racism, cultural mistrust, stereotype threat, Black/White relations, and Black mental health. Concomitant aspects of Black culture including; racial identity development, spirituality, sexuality, common misconceptions about Black populations, and within group differences related to gender, class, age, and sexual orientation will be peripherally addressed. The second content area presents a culturally-informed perspective on the psychological assessment and treatment of African Americans. It will focus on topics such as ethnic/racial identity models, cultural variables that may affect DSM 5 diagnoses, epidemiological mental health data across ethno-racial groups, biased measures, culturally specific interventions, and important factors to consider during the delivery of treatment. The third module will focus largely on the infusion and integration of the first two modules in therapeutic practice with Black populations.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 687. Latino Youth and Families. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

EPS 688. Spanish for Mental Health Professionals. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

EPS 689. Psychological Interventions with Hispanic/Latino Populations. 3 Credit Hours.

Explores the diversity of experiences among Hispanics and their implications for therapy. Topics include: racial diversity among Hispanics, sociopolitical factors in mental health, the impact of immigration on mental health, special psychological treatments: trauma treatment, family interventions and bilingual counseling.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 693. Bereavement and Attachment Factors for Children and Families. 1-3 Credit Hours.

This course will focus on attachment and development of factors as they relate to the bereavement and loss experience of children, adolescents, young adults, and families. Effective methodology in the care of these populations will be explored. Content will include the trajectory of grief in childhood development, manifestation of loss and grief, risk factors in the loss experience, attachment issues, types of loss, popular notions of loss and treatment, and best practice in bereavement work.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

EPS 698. Continuous Registration--Master's Study. 1 Credit Hour.

To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

EPS 699. Advanced Individual Study. 1-6 Credit Hours.

Individual work on a special project under faculty guidance.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

EPS 700. Quantitative Methods I. 3 Credit Hours.

This course provides an introduction to data analysis and statistical inference. Students learn to describe data (quantitatively and graphically), to select and compute statistical estimates and hypothesis tests, to use computer packages (SPSS) to accomplish these tasks, and to interpret and write about the results of the estimates and tests. Knowledge of basic algebra is needed. Higher mathematics (e.g., trigonometry, calculus) is not used.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Summer.

EPS 701. Introduction to Research Methods. 3 Credit Hours.

The nature of disciplined inquiry in behavioral and social sciences. Includes philosophy of science, quantitative and qualitative research, basic concepts in sampling and measurement, and systematic searches of the research literature. Students required to complete literature search on a topic of their interest and submit a report of their findings.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 702. Quantitative Methods II. 3 Credit Hours.

This course introduces students to techniques of data analysis and statistical inference based on the General Linear Model (GLM). The major topics covered in this class include simple/multiple regression, one- and two-way Analysis of Variance (ANOVA) followed by multiple comparisons, Analysis of Covariance (ANCOVA), and Repeated Measures ANOVA. This course aims to provide a solid conceptual background of these topics, as well as the analytic skills for conducting educational and psychological research in practice. Knowledge of basic algebra and SPSS is required, as is an understanding of the fundamental principles of descriptive statistics and hypothesis testing (as taught, for example, in EPS 700 or equivalent). Knowledge of calculus is not required. Students will conduct statistical analyses using real datasets.

Prerequisite: EPS 700.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPS 703. Applied Multivariate Statistics. 3 Credit Hours.

This course will provide: (1) a conceptually-oriented introduction to regression methods and (2) opportunities to learn related data-analytic techniques.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 704. Computer Applications in Educational and Behavioral Science Research. 3 Credit Hours.

This course introduces the use of statistical software packages R for acquiring, managing, and preparing datasets that are required to produce reliable and valid statistical inferences. With a special focus on R, the course will cover a broad range of hands-on activities in the data analytic process including data coding, file manipulation tasks, data screening, and statistical analysis, and also provide a brief introduction to R programming.

Components: LSN.

Grading: GRD.

Typically Offered: Summer.

EPS 705. Measurement and Psychometric Theory. 3 Credit Hours.

EPS 705 (Measurement and Psychometric Theory) is a first component of a sequence of classes in order to acquaint students with cutting edge models in test theory and with the application of computer software with which to implement those theories. This sequence of classes provides an introduction to contemporary measurement principles implicated in the design and analysis of scales, tests, and psychological inventories. EPS 705 covers the essentials of classical test theory, factor models of test items, generalizability theory, and a brief introduction of item response theory. After completing the course, students should be provided foundations for further study of measurement theory and be prepared to take a course for item response theory.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 706. Categorical Data Analysis. 3 Credit Hours.

Categorical data is abundant in many different fields such as education, psychology, and marketing. The use of statistical methods for categorical data has increased dramatically in recent years. Categorical data can be numeric or character, but it is always a discrete number of levels. Virtually every research project categorizes some of its observations: male or female, marital status, political or religious affiliation, race of patient, and so on. Prerequisite: EPS 553 and EPS 671.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 707. Item Response Theory. 3 Credit Hours.

The purpose of the course is to provide training in the theory and application of item response theory (IRT) as it pertains to educational and psychological measurements. Focus will be given to discussing IRT as a measurement model used to measure the properties of items and individuals. Particular attention will be given to contrasting the properties of the IRT model to the classical test theory, and the application of IRT to actual data sets.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 708. An Introduction to Structural Equation Modeling for Multivariable Data. 3 Credit Hours.

This course will provide (1) a conceptually-oriented introduction to Structural Equation Modeling for multivariate data and (2) opportunities to learn related data-analytic techniques.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 709. Introduction to Multilevel Modeling. 3 Credit Hours.

This course will provide: (1) a conceptually-oriented introduction to multilevel modeling and (2) opportunities to learn related data-analytic techniques.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 710. Meta-analytic methods for research synthesis.. 3 Credit Hours.

Meta-analysis is the general practice of combining, comparing, and interpreting statistics across a set of studies that investigate the same (or similar) phenomena using a properly motivated theoretical framework. Meta-analysis has become a popular tool in a variety of research disciplines, including the social sciences, education, medicine, and business. This course provides a thorough introduction to the theoretical foundations of meta-analysis, discusses commonly used statistical techniques, and analyzes several examples of the existing meta-analysis. Emphasis is placed on application, so that students are trained to independently perform a meta-analysis, from start to finish, in whatever substantive area interests students the most.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 711. Advanced Topics in Research, Measurement, and Evaluation. 3 Credit Hours.

Review of emerging quantitative methodological advances relevant to educational research for which formal course title and syllabus have not been developed and formalized in the UM Bulletin. Allow for experimental instructional formats. See Course Notes for specific topic.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPS 712. Field Experience in Educational Research. 2-6 Credit Hours.

A total of 125 hours of supervised practical experiences in educational research. Emphasis is placed on actual participation in a wide variety of ongoing research projects through associations with an approved educational R & D center. Normally taken in two or three credit blocks.

Components: PRA.

Grading: GRD.

Typically Offered: Fall & Spring.

EPS 714. Qualitative Methods I. 3 Credit Hours.

An overview of the history, nature, characteristics, strategies, and ethics of qualitative research methods. Critical analysis and evaluation of various types of qualitative studies, including design, sampling, processes of data collection and analysis, and reporting results.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 715. Qualitative Methods II: Case Studies and Grounded Theory. 3 Credit Hours.

Types and designs of case studies, development of protocol, field work, data analysis, and report writing. Practical procedures and techniques for conducting grounded theory studies, including data coding and analysis, and reporting of results.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 716. Qualitative Methods II: Interviews and Content Analysis. 3 Credit Hours.

Sociological and oral history interview methods, including methodological issues, computer-based coding, decoding, and interpreting data. Visual and text based content analysis, scoring schemas, and inter-rated reliability are also covered.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 717. Survey Research Methods. 3 Credit Hours.

Focus on standards and practical strategies for designing different types of survey instruments and conducting survey research. Students are required to develop a proposal for survey research, develop a survey instrument, and conduct small pilot study by collecting, analyzing, and reporting survey data.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 725. Seminar in Community Well-Being. 1-6 Credit Hours.

This course provides an overview of the field of community psychology. We will examine the conceptual and theoretical developments in community psychology since the 1965 Swampscott Conference (the 'birthplace' of community psychology) through reading primary sources—articles, monographs and book chapters—by those who have shaped the field. The readings will include some empirical research studies, but our key focus is the conceptual writings. The goal of this course is to understand and critique different theoretical perspectives in the field of community psychology.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

EPS 731. Theories of Community Research and Action. 3 Credit Hours.

This course provides an overview of theoretical perspectives and how they are applied to social and psychological issues in the field of community psychology. The course examines the conceptual and theoretical developments in community psychology since the 1965 Swampscott Conference (the 'birthplace' of the field) through reading primary sources – articles, monographs and book chapters – by those who have shaped the field. Readings also include empirical articles that illustrate the application of these concepts to research. Class discussions are central to this course. In addition, course assignments include the following: (1) brief reflections on readings 3 times during the course of the semester; (2) an interview with a community psychologist and a short essay based on the interview; (3) the final paper is a systematic critical literature review on the topic of interest to students. In this paper, students critique a body of empirical work using theoretical perspectives in community psychology.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 732. Community Based Participatory Action Research. 3 Credit Hours.

The purpose of this course is to introduce students to several traditions of community based participatory action research (CBP AR). CBP AR is carried out in collaboration between academic researchers and members of communities, and involves an iterative process of developing research questions, designing methods, implementing data collection, interpreting results, and often developing interventions. Students will begin by reviewing different intellectual traditions in participatory research including Community Based Participatory Research (CBPR), Participatory Action Research (PAR), Critical PAR and others. We will also stress the ways that participatory research has developed within the traditions of Community Psychology, such as Ecological Inquiry and Participatory Evaluation. While all these three traditions are related and overlapping, students will be encouraged to critique and contrast these approaches.

Prerequisite: EPS 670.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

EPS 737. Organization and Administration of Higher Education I. 3 Credit Hours.

Theoretical approaches from organizational analysis. Applications to problems, processes, and patterns of higher education institutions. Consideration given to legal status, governance patterns, and external relations. Administrator, faculty, trustee, and student roles are also explored.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 738. Effective Teaching, Learning, Assessment, and Curriculum in Higher Education. 3 Credit Hours.

Provides an overview of current theories, research, and best practices in effective teaching, learning, assessment, and curricular design.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Summer.

EPS 739. The Community College. 3 Credit Hours.

An overview of American community colleges including historical evolution, purposes and functions, characteristics of students and faculty, organization and administration, curricula, current issues, and trends.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

EPS 740. Administration of Student Affairs. 3 Credit Hours.

History and philosophy of student affairs will be addressed as well as principles and organization of student affairs administration, current problems, procedures, and recent developments.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

EPS 741. Basic skills in Counseling and Interviewing. 3 Credit Hours.

Introductory course on essential skills used in counseling and interviewing. Through lectures, discussions, and small group exercises, students will explore their natural style of helping and learn effective listening and communication skills. This course is not intended to train students to become a professional counselor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 742. Higher Education in the United States: From Harvard to Present. 3 Credit Hours.

Broad view of issues and problems in higher education. Fundamental ideas and significant literature are analyzed from historical, philosophical, and societal perspectives.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 743. Psychological Bases of Education. 3 Credit Hours.

Review and extension of basic principles of psychology underlying educational practice. Basic concepts of educational psychology which contribute to effective education will be discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 744. Student Diversity in American Higher Education. 3 Credit Hours.

Emphasis on the diversity of today's undergraduate students. An examination of the sociological context and philosophical orientation of contemporary college students is included.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 745. Organization of Higher Education II: Governance, Leadership and Finance. 3 Credit Hours.

Provides an overview of selected topics in governance, administrative leadership and finance in higher education.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 746. College Student Development: Theory, Research and Practice. 3 Credit Hours.

Emphasis on student growth and development during college and an analysis of the factors which affect development along cognitive and affective dimensions. An in-depth examination of college student development theories is included.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 747. Critical Issues in Student Affairs. 3 Credit Hours.

Emphasis on the most pressing issues facing the profession of student affairs today including diversity, funding, staff retention and the law and student affairs.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

EPS 748. Enrollment Management: Theory and Practice. 3 Credit Hours.

Comprehensive overview of principles and practices of a strategic process that begins with recruitment and continues through graduation.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 749. Advanced Seminar in Enrollment Management. 3 Credit Hours.

In-depth exploration of topics in enrollment management, including market research, market testing, pricing strategies, strategic planning, and development of a future vision.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 750. Seminar in Higher Education/Enrollment Management: Contemporary Issues. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 751. Seminar in Higher Education Administration: Contemporary Issues. 3 Credit Hours.

A review of recent developments, research findings, changing issues, and problems in contemporary American higher education.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 752. Dissertation Seminar. 3 Credit Hours.

The development and analysis of dissertation proposals will be required. Detailed coverage of the research process, proposal elements, dissertation writing and all aspects of doctoral research will be emphasized. Extensive feedback on research ideas and writing is involved.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

EPS 753. Internship in College Teaching. 3 Credit Hours.

A program in observation and supervised teaching in the community junior or liberal arts college. The student spends 15-20 hours per week. Included is a seminar held with the college supervisor which meets several times during the semester.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPS 754. Practicum: Administration of Higher Education. 1-6 Credit Hours.

This course is designed to provide students with an opportunity to develop professional competencies while they apply theory to practice.

Opportunities can be pursued in enrollment management or student affairs related offices either on campus or at other higher education institutions.

Students will contract for the type of experience desired and a formal research paper and presentation will culminate this activity.

Components: PRA.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

EPS 755. Group Dynamics and Communication Skills. 3 Credit Hours.

Emphasis on group dynamics, group procedures and communication skills.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 764. Workshop in Education. 1-3 Credit Hours.

Study in special interest areas in education.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

EPS 765. Workshop in Education. 1-3 Credit Hours.

Study in special interest areas in education.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

EPS 766. Workshop in Education. 3 Credit Hours.

Study in special interest areas in education.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPS 767. Counseling Psychology: Theory, Research and Practice I. 3 Credit Hours.

Orientation to counseling psychology as a discipline including theories, research methodology, contemporary research, lifestyle and career development theory, and professional issues. Required of all first year counseling psychology students. May be taken for 3 or 6 credits to a maximum of 12 credits.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 768. Counseling Psychology: Theory, Research and Practice II. 3 Credit Hours.

Orientation to counseling psychology as a discipline including theories, research methodology, contemporary research, lifestyle and career development theory, and professional issues. Required of all first year counseling psychology students. May be taken for 3 or 6 credits to a maximum of 12 credits.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 770. Psychological Appraisal I. 3 Credit Hours.

Orientation to psychological appraisal with emphasis on development of skill in assessment of intellectual functioning.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

EPS 771. Psychological Appraisal II. 3 Credit Hours.

Orientation to psychological appraisal with emphasis on use of procedures which facilitate preparation for, and evaluation of, intervention efforts in the personality and social-behavioral areas.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 772. Vocational Psychology and Career Development. 3 Credit Hours.

This course is a doctoral level seminar on vocational psychology and career counseling. This course will consist of a critical review of the major approaches to understanding traditional career behavior and development and the empirical support for prevailing theoretical constructs. We will also explore how various aspects of identity may affect career development, including race, ethnicity, age, gender, sexual orientation, disability, religion, and social class. Considerable attention will be devoted as well to the application of work-related issues in psychological practice. The course seeks to integrate research, theory, practice, public policy, and social justice.

Academic Plan Equal Counseling.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

EPS 775. Doctoral Practicum I. 1-9 Credit Hours.

Supervised counseling experiences with clients at the Institute for Individual and Family Counseling. Individual and small group supervision by program faculty.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPS 776. Doctoral Practicum II. 1-9 Credit Hours.

This course is a combination of self-directed and guided elements aiming to build your skills as a reflective, theory and science-based practitioner. To this end, the course provides in-depth exploration and application of core readings and theories in community and social change. The purpose of this course is to apply these core concepts to your practicum and provide a space for critical reflection on your practicum experience (student placement in an organization or a foreign culture). Thus, the course includes both didactic and practicum elements throughout the semester. The didactic aspect focuses on intervention theory and method from a community psychology perspective; the student placement represents a structured opportunity to learn about intervention theory as applied to a particular setting.

Components: PRA.

Grading: GRD.

Typically Offered: Fall & Spring.

EPS 777. Advanced Practicum in Counseling Psychology. 1-9 Credit Hours.

Supervised experience appropriate to the work of the counseling psychologist.

Components: PRA.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

EPS 779. Vocational Psychology and Career Development. 3 Credit Hours.

This course is a doctoral level seminar on vocational psychology and career counseling. This course will consist of a critical review of the major approaches to understanding traditional career behavior and development and the empirical support for prevailing theoretical constructs. We will also explore how various aspects of identity may affect career development, including race, ethnicity, age, gender, sexual orientation, disability, religion, and social class. Considerable attention will be devoted as well to the application of work-related issues in psychological practice. The course seeks to integrate research, theory, practice, public policy, and social justice.

Requisite: Restricted to Doctoral Students in the Counseling Psychology program.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

EPS 780. Cultural Diversity and Mental Health. 3 Credit Hours.

This seminar course provides advanced training in conceptualizing the individual within cultural and sociopolitical contexts. Emphasis is placed on the 'state of the science' on multicultural empirical research as well as on the 'state of the art' in translating scientific findings to applied clinical contexts.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 781. The Social Bases of Human Activity and Flourishing. 3 Credit Hours.

Human beings are the most intensely social animals, and this course explores the evolutionary, developmental, and social domains in which that social nature is expressed. Topics include attachment processes, imitation learning, identity formation, social norms, intergroup processes, aggression, and social hierarchy. The course has an evolutionary framework, and explores developmental and social domains of human behavior. These domains point to what makes it possible for humans to flourish as the social creatures we are

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 782. Supervision in Counseling Psychology. 3 Credit Hours.

This seminar course provides an overview and discussion of theories, research, and practice of supervision and consultation.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 785. Preparing Future Faculty Seminar. 1-3 Credit Hours.

The goal of this course is to introduce you to the larger role of university professor. The class is designed to give you some general sense of university structure and of the breadth of opportunities in higher education, to think through your own vision of "being a professor" particularly the part of that role that focuses on teaching, and to help you on the job search by preparing a professional portfolio that will help you get that first job and, hopefully, set you on a smooth career path. The PFF seminar will provide you with contextual and interdisciplinary knowledge of professoriate. Each seminar will be designed to aid you in your goal to become an outstanding faculty member. PFF will give you an overview of life on the academic job market and the pre-tenure years. It is your responsibility to tailor that information to fit your needs. It is expected that you take the information you learn in PFF and speak with mentors in your discipline to glean further insights into faculty life.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

EPS 789. Special Topics in Counseling Psychology. 3 Credit Hours.

This graduate course will examine research and practice in a specialty area within counseling psychology. Content may vary from term to term. Probable topics include psychopathology and consultation. Readings will include articles, books, and/or book chapters by key scholars who have shaped and/or are shaping the field. A focus will be placed both on empirical research studies and conceptual writings. The goal of this course is for students to gain key counseling psychology competencies in a specialty area within the field.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

EPS 798. Advanced Individual Study. 1-3 Credit Hours.

Individual work on a special project under faculty guidance.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

EPS 799. Advanced Individual Study. 1-3 Credit Hours.

Individual work on a special project under faculty guidance.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

EPS 803. Internship in Counseling Psychology. 1-6 Credit Hours.

Supervised internship in Counseling Psychology in an approved facility.

Components: PRA.

Grading: GRD.

Typically Offered: Fall & Spring.

EPS 810. Master's Thesis. 1-6 Credit Hours.

The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her adviser. Credit is not awarded until the thesis has been accepted.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

EPS 820. Research in Residence. 0 Credit Hours.

Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in EPS 710 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

EPS 825. Continuous Registration Master's Study. 1 Credit Hour.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

EPS 830. Pre-Candidacy Dissertation Research. 1-12 Credit Hours.

Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of EPS 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

EPS 835. Doctor of Education Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ed.D. The student enrolls for credit as determined by his/her advisor. Credit is not awarded until the doctoral project has been accepted. Total enrollment may not exceed 12 credits.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

EPS 840. Post-Candidacy Dissertation Research. 1-12 Credit Hours.

Post-Candidacy Dissertation Research. 1-12 Credit Hours. Doctoral students enrolled for credit as determined by advisor. This course will be graded each term.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

EPS 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the Ph.D. and Ed.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate school.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Electrical & Computer Engineering (ECE)

ECE 100. Introduction to Electrical and Computer Engineering. 3 Credit Hours.

Introduction to Electrical and Computer Engineering (ECE) for high school students interested in science and technology. The course covers important thematic units of the discipline: electronics, digital design, computer programming and signal processing. Emphasis on hands-on experience in the use of laboratory instrumentation, circuit construction and computer simulation.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ECE 110. Introduction to Innovation: Learning About Innovation by Innovating. 3 Credit Hours.

Introduction to diverse methods and tools that promote and nurture student creativity, entrepreneurship, team-work, and skills for creating business plans that consider ethical, global and financial issues. Students will learn to use the Maker Space facility to implement their design ideas.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECE 111. Introduction to Engineering I. 3 Credit Hours.

Use of engineering tools and computer techniques for problem solving, data acquisition, analysis, presentation, software design, and computer aided drafting. Development of design skills through several design and building competitions is included as well as an introduction to professional ethics, intellectual property rights, the use of MATLAB, AutoCAD, and programming in C++.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECE 112. Introduction to Engineering II. 2 Credit Hours.

Course is designed to provide first-year undergraduate students with an introduction to some key electrical and computer engineering concepts and topics by discussing their roles in some of the commonly used electrical and computer engineering systems. Numerical examples, circuit simulations, and computer programming are introduced through the use of MATLAB, microcontroller programming languages, and PSpice. Hands-on experience are provided through a project where the students design, assemble, program, and test a microcontroller-based mobile robot with a variety of sensing devices. Should be taken as a freshman only; otherwise to be replaced by a technical elective.

Prerequisite: ECE 111.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 118. Introduction to Programming. 3 Credit Hours.

Introduction to computing, problem solving, program design, C++ language fundamentals, and software engineering principles. Software design projects are included.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECE 123. Explorations in Engineering. 3 Credit Hours.

Introduction to engineering for non-engineers with emphasis on real-world engineering systems and services which are changing the way we live, communicate, learn, play, and care for ourselves, our communities and our planet. Students will learn how to use modern tools to observe and design simple engineering systems.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 201. Electrical Circuit Theory. 3 Credit Hours.

Fundamentals of DC-AC circuit laws, including steady state and transient analysis. Lecture, 3 hours.

Prerequisite: MTH 162.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECE 202. Electronics I. 3 Credit Hours.

Semiconductor physics and devices. Diodes, bipolar-junction transistors (BJT). Introduction to field-effect transistors (FETs) and Operational Amplifiers. Emphasis on dc and ac analysis of electronic circuits. Use of CAD tools such as PSpice.

Pre-requisite: ECE 201.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECE 203. Electrical Circuits Laboratory. 1 Credit Hour.

Laboratory work employing the techniques of circuit theory to physical components, devices, and circuits. Use of electronic computing techniques to relate analytical and empirical investigations. Laboratory, 3 hours.

Pre-requisite: ECE 201.

Components: LAB.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECE 204. Electrical Circuits Laboratory. 1 Credit Hour.

Laboratory work employing the techniques of circuit theory to physical components, devices, and circuits. Use of electronic computing techniques to relate analytical and empirical investigations. Laboratory, 3 hours.

Prerequisite: ECE 201.

Components: LAB.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECE 205. Principles of Electrical Engineering--I. 3 Credit Hours.

Fundamentals of DC and AC Circuits and a survey of Electrical Machinery and Electronics. Not open to students with credits in ECE 201. Lecture, 3 hours.

Prerequisite: MTH 162.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECE 206. Circuits, Signals, and Systems. 3 Credit Hours.

This course teaches the basics of continuous-time signals and systems with an emphasis on circuits as motivating examples. Topics include signals and linear time-invariant systems, convolution, stability, Laplace Transform, transfer function, poles and zeros, s-domain circuit analysis, feedback control, Fourier Series and Transform, Bode plots, analog filters.

Pre-requisite: ECE 201 And MTH 311.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECE 211. Logic Design. 3 Credit Hours.

Boolean algebra and its applications in analysis and design of logic circuits. Introduction to SSI and MSI circuits as building blocks, memory elements, and analysis and synthesis of synchronous and asynchronous sequential systems are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECE 212. Processors: Hardware, Software, and Interfacing. 3 Credit Hours.

Architecture and operation of modern microprocessor based computer systems and microcontrollers. Assembly language and applications with hands on experience. Lecture, 3 hours; laboratory, 3 hours.

Prerequisite: ECE 118 and ECE 211/304.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECE 218. Data Structures. 3 Credit Hours.

Continuation of Programming with emphasis on C++ and the skills required of a capable programmer. Essential data structures and algorithms, and introducing algorithm analysis. Basic sorting, searching, and data management. Dynamic and static memory management. Object oriented programming.

Prerequisite: ECE 118.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECE 301. Electromagnetic Field Theory. 3 Credit Hours.

Vector analysis, static and time-varying fields, Maxwell's equations, propagation of electromagnetic waves, and transmission line theory and applications are discussed.

Prerequisite: PHY 207 and MTH 210.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 302. Electronics II. 3 Credit Hours.

Continuation of ECE 202. Emphasis on integrated circuits. Field-effect transistors (FETs). Application of operational amplifiers and other integrated circuits. Frequency response of amplifiers. Use of CAD tools as PSpice.

Prerequisite: ECE 305 Or ECE 202.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECE 303. Electronics Laboratory. 1 Credit Hour.

Laboratory course in conjunction with courses ECE 202 and 302.

Prerequisite: ECE 203 or 204. Or Pre/Corequisite: ECE 302 or 306.

Components: LAB.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECE 304. Logic Design. 3 Credit Hours.

Boolean algebra and its applications in analysis and design of logic circuits. Introduction to SSI and MSI circuits as building blocks, memory elements, and analysis and synthesis of synchronous and asynchronous sequential systems are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECE 305. Electronics I. 3 Credit Hours.

Semiconductor physics and devices. Diodes, bipolar-junction transistors (BJT). Introduction to field-effect transistors (FETs) and Operational Amplifiers. Emphasis on dc and ac analysis of electronic circuits. Use of CAD tools such as PSpice.

Pre-requisite: ECE 201.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECE 306. Electronics II. 3 Credit Hours.

Continuation of ECE 305. Emphasis on integrated circuits. Field-effect transistors (FETs). Application of operational amplifiers and other integrated circuits. Frequency response of amplifiers. Use of CAD tools as PSpice.

Prerequisite: ECE 202 or 305.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECE 307. Circuits, Signals, and Systems. 3 Credit Hours.

This course teaches the basics of continuous-time signals and systems with an emphasis on circuits as motivating examples. Topics include signals and linear time-invariant systems, convolution, stability, Laplace Transform, transfer function, poles and zeros, s-domain circuit analysis, feedback control, Fourier Series and Transform, Bode plots, analog filters.

Prerequisite: ECE 201 and MTH 311.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECE 308. Linear Control Systems. 3 Credit Hours.

Introduction to system theory, transfer function and state variable modeling of linear continuous time systems, root locus, Bode plot, Nyquist criterion, analysis and controller design using root locus and frequency domain techniques, proportional-integral-derivative controllers.

Prerequisite: ECE 206/307 and ECE 303/311 and MTH 210.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 310. Introduction to Engineering Probability. 3 Credit Hours.

Axioms of probability, discrete and continuous random variables, probability density functions. Expectation, conditioning, independence, functions of random variables, characteristic functions, multiple random variables. Sums of random variables, limit theorems, probability bounds, convergence concepts. Introduction to statistical analysis, estimation, and hypothesis testing. Cross-listed with IEN 310.

Prerequisite: MTH 162 and Requisite: Junior Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECE 311. Electronics Laboratory. 1 Credit Hour.

Laboratory course in conjunction with courses ECE 305 and 306.

Prerequisite: ECE 203 or 204. Or Pre/Corequisite: ECE 302 or 306.

Components: LAB.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECE 312. Processors: Hardware, Software, and Interfacing. 3 Credit Hours.

Architecture and operation of modern microprocessor based computer systems and microcontrollers. Assembly language and applications with hands on experience. Lecture, 3 hours; laboratory, 3 hours.

Prerequisite: ECE 118 and ECE 211/304.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 315. Digital Design Laboratory. 1 Credit Hour.

Familiarization with properties and use of logic gates, flip-flops, digital standard components, and programmable logic devices. Design and implementation of combinational and synchronous digital systems and Computer Aided Engineering (CAE) tools for design and simulation of digital systems are also included.

Prerequisite: ECE 304 Or ECE 211.

Components: LAB.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECE 316. Structured Digital Design. 1 Credit Hour.

VHDL ((VHSIC (very high speed integrated circuits) hardware description language)) introduction and syntax. Functional and behavioral models of VHDL for design, testing, and simulation of digital circuits and programmable logic devices. Design and implementation of combinational and sequential digital systems using VHDL is also included.

Prerequisite: ECE 315.

Components: LAB.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECE 318. Algorithms. 3 Credit Hours.

Continuation of the programming sequence. Object oriented programming with C++, emphasizing the skills required of a professional programmer.

Essential data structures and algorithms: trees, graphs, hash tables, parsing and text processing. Advanced sorting and data management algorithms. Advanced features of C++; effective programming with C.

Prerequisite: ECE 218.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 322. Systems Programming. 3 Credit Hours.

Practical hands-on experience with UNIX systems programming and administration. Programming using C and shell scripting languages. File systems features, multiprocessing, inter-process communication, and systems programming fundamentals are discussed.

Prerequisite: ECE 218.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 336. Discrete-Time Signals and Systems. 3 Credit Hours.

This course provides the basics connecting continuous-time (CT) and discrete-time (DT) signal processing, and an introduction to discrete-time signals and systems and applications. Topics include communication, sampling, discrete-time linear time-invariant (LTI) signals and systems, difference equations, z Transform, transform domain analysis of DT systems, DT Fourier transform (DTFT), digital filters, applications to audio, and image processing.

Prerequisite: ECE 307 Or ECE 206.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 368. Internet Computing I. 3 Credit Hours.

Principles and practices used in creating interactive Internet sites. Extensive object oriented programming in Java is taught. Use of eXtensible Markup Language (XML) to provide content description. Use of GUI components and graphics to create web based applications.

Prerequisite: ECE 218.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 395. Undergraduate Research in Electrical and Computer Engineering. 1-3 Credit Hours.

Research and/or design projects consisting of an individual investigation of real-world contemporary problems. Offered by special arrangement and under the supervision of a faculty member.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECE 399. Cooperative Education. 1 Credit Hour.

Practical application of classroom theory through alternating semester or summer employment with firms offering positions consistent with the student's field of study. Course may be repeated.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECE 404. Communication Systems. 3 Credit Hours.

Introduction to digital communication, including binary and M-ary baseband and bandpass modulation over additive white Gaussian noise channels. Optimal receivers, pulse shaping for bandlimited channels, synchronization, multiple access.

Prerequisite: ECE 336 and ECE 310 or IEN 310.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 405. Solid-State Electronics. 3 Credit Hours.

Principles of semiconductor electronics, energy bands of semiconductors, Fermi level, carrier distribution, and transport mechanisms are discussed. Application of semiconductor theory to various junction and field effect devices are included.

Prerequisite: ECE 301 and PHY 207.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 412. Software Engineering and Architecture. 3 Credit Hours.

Examination of the building blocks of software systems. Requirements and specifications. Model driven architecture. Architectural and design patterns. Design and analysis for functionality and quality. Computer aided software engineering tools.

Prerequisite: ECE 318.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 413. Software Design and Verification. 3 Credit Hours.

Design for testability. Software testing methods and tools. Formal review techniques. Functional and structured testing methods and test generation. Unit-level testing. Integration, acceptance, regression, performance and stress testing. Verification methods.

Prerequisite: ECE 412/512.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 414. Computer Organization and Design. 3 Credit Hours.

Hardware structure, organization and design of computers. Design of computer arithmetic and control units, data, and instruction paths. Modern hardware description language (HDL) based design methodology. Register transfer level design of computers and digital systems. Algorithmic state machine (ASM) charts, instruction set architecture, control unit implementation, microprogramming, memory organization, pipelining, I/O system organization and high speed arithmetic units are discussed.

Prerequisite: ECE 312 Or ECE 212.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 415. Senior Project I. 1 Credit Hour.

Topics cover tasks in project planning including scheduling, documentation, communication (written and oral), financial constraints, and ethics. Students are required to present project proposals to serve as the basis for the follow-up course, ECE 416.

Requisite: Senior Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECE 416. Senior Project II. 2 Credit Hours.

The capstone design course for Electrical Engineering majors. An electrical system is designed, implemented, and documented.

Prerequisite: ECE 415.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ECE 417. Embedded Microprocessor System Design. 3 Credit Hours.

Study of microcomputer system design, scientific methods for quantifying system performance, embedded controller applications using high level languages, and debugging strategies. Lecture, 1 hour; laboratory, 3 hours.

Prerequisite: ECE 218. And ECE 315. And ECE 414.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 418. Senior Project Planning. 1 Credit Hour.

The creative process of devising a product to meet customers needs including an overview of the design process, analysis of requirements, project planning, scheduling, evaluation, and documentation. Students are required to present project proposals to serve as the basis for the follow-up senior design project.

Requisite: Senior Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECE 419. Senior Project. 2 Credit Hours.

The purpose of this course is to integrate the student's knowledge in hardware, software, and project management. A major digital system is designed, implemented, debugged, and documented.

Prerequisite: ECE 418.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ECE 421. Computer Operating Systems. 3 Credit Hours.

The design and implementation of operating systems. Virtual memory and memory management, resource allocation, device drivers, process creation, control, communications and scheduling, file systems, data protection, security, parallel processing and time-sharing. The class includes a significant operating system implementation project.

Prerequisite: ECE 318.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 436. Digital Signal Processing. 3 Credit Hours.

Topics include finite length transforms (e.g., discrete Fourier transform, discrete sine and cosine transforms) and their fast computation, finite impulse response (FIR) and infinite impulse response (IIR) digital filter design, digital filter structures, finite wordlength effects on filter performance, and multirate signal processing fundamentals.

Prerequisite: ECE 336.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 437. Real-Time Digital Signal Processing Laboratory. 1 Credit Hour.

Digital signal processing hardware for real-time operation, software development tools, instruction set, and DSP experiments with audio and speech application are discussed.

Prerequisite: ECE 436. Or Corequisite: ECE 436.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

ECE 454. Digital System Design and Testing. 3 Credit Hours.

Functional building blocks and concepts of control and timing in digital design. Descriptive techniques for digital systems and design for testability.

Prerequisite: ECE 315 and 316. Corequisite: ECE 455.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 455. Design-for-Testability Laboratory. 1 Credit Hour.

Project laboratory demonstrating the techniques necessary to design, implement, and debug and test a large system. The process is carried through from conceptual design, implementation, integration, simulation, and synthesis on a FPGA chip.

Prerequisite: ECE 454. Or Corequisite: ECE 454.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECE 467. Database Design and Management. 3 Credit Hours.

Database systems design, modeling, implementation, management methodologies, and techniques. Different database systems are addressed including relational, object-oriented, object-relational, and distributed database systems. Internet (WWW) technology, data warehousing, and online analytical processing applications of database management systems and hands-on experience with commercial database systems is also included.

Prerequisite: ECE 322 or CSC 322.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 470. Network Client-Server Programming. 3 Credit Hours.

Introduction to server-client systems and programming. Advanced server-client design and implementation based on distributed component object model in Windows and UNIX.

Prerequisite: ECE 218.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 481. Senior Project I. 1 Credit Hour.

The creative process of devising a product to meet customers' needs including an overview of the design process, analysis of requirements, project planning, scheduling, evaluation, and documentation. Students are required to present project proposals to serve as the basis for the follow-up senior design project.

Requisite: Senior Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECE 482. Senior Project II. 2 Credit Hours.

The capstone design course for Electrical Engineering and Computer Engineering majors. A major electrical and/or computer engineering system is designed, implemented, and documented.

Pre-requisite: ECE 481.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ECE 499. Senior-Junior Cooperative Education. 1-3 Credit Hours.

Analysis and design experience obtained in industry or government. Approved project jointly supervised and assessed by department faculty and external partner. Note: A maximum of three credits could be used to satisfy degree requirement as Technical Elective. See Bulletin for more information.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECE 500. Engineering Analytical Techniques. 3 Credit Hours.

Complex variables, analytic functions, power series, residue theorem, conformal mappings, series solution, Bessel functions, Legendre polynomials. singular value decomposition, vector, and matrix norms are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 502. Engineering Acoustics. 3 Credit Hours.

Introduction to basic principles of acoustics, methods of sound measurement, physiological, psychological acoustics, the acoustics of the major classes of musical instruments and speech, fundamentals of transducers, architectural acoustics, and the effects and control of noise are covered.

Prerequisite: ECE 336.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 503. Laser Communications. 3 Credit Hours.

Principles of optics, optical fibers, electro-optics, light wave propagation in anisotropic and periodic media, guided waves, and integrated optics are discussed. Electro-optic devices including sources and detectors, optical fiber communication, and optics for medical and biomedical applications are also covered.

Prerequisites: PHY 206 and PHY 207 and ECE 301.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 504. Fundamentals of Optical. 3 Credit Hours.

Introduction to optics and fiber communication, light propagation in free space and waveguides, imaging, wave phenomena and diffraction, interferometer, spectrometer, holography, fiber coupling, and fiber communication are covered.

Prerequisites: ECE 301 or BME 545.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 505. Semiconductor Photonic Devices. 3 Credit Hours.

Principles of semiconductor electronics: energy bands of semiconductors; Fermi level; carrier distribution and transport mechanisms. Application of semiconductor theory to various junction and field effect devices.

Prerequisite: ECE 302, 306, 405.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 506. Microfabrication. 3 Credit Hours.

Principles of operation, properties and applications of semiconductor devices, junction, metal-semiconductor, metal-oxide-semiconductor, optoelectronic, bulk-effect, and charge-coupled are covered.

Prerequisite: ECE 505.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 511. Computability, Complexity, and Algorithms. 3 Credit Hours.

Advanced programming techniques: dynamic programming, fast data retrieval and sorting, enumerators, data structures, and data management. The limits of software engineering, computability and models of computation, complexity analysis.

Prerequisite: ECE 318.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 512. Software Engineering and Architecture. 3 Credit Hours.

Examination of the building blocks of software systems. Requirements and specifications. Model driven Architecture. Architectural and Design Patterns. Design and analysis for functionality and quality. Computer Aided Software Engineering tools.

Prerequisite: ECE 318.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 513. Software Design and Verification. 3 Credit Hours.

Design for testability. Software testing methods and tools. Formal review techniques. Functional and structured testing methods and test generation. Unit-level testing. Integration, acceptance, regression, performance and stress testing. Verification methods.

Prerequisite: ECE 412/512.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 514. Computer Architecture. 3 Credit Hours.

Computer data and instruction types, survey of existing architectures, and the interaction between hardware and software sub-systems are discussed. Advanced topics in computer architecture.

Prerequisite: ECE 414.

Components: LEC.

Grading: GRD.

Typically Offered: Spring & Summer.

ECE 519. Design of Computing Languages. 3 Credit Hours.

Major features of modern programming languages with emphasis on design and software efficiency. Interaction between language design and the design of its compiler are included.

Prerequisite: ECE 218.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 521. Computer Operating Systems. 3 Credit Hours.

The design and implementation of operating systems. Virtual memory and memory management, resource allocation, device drivers, process creation, control, communications and scheduling, file systems, data protection, security, parallel processing and time-sharing. The class includes a significant operating system implementation project.

Prerequisite: ECE 318.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 532. VLSI Systems. 3 Credit Hours.

Fundamentals of MOS Technology in VLSI. System data, control flow, structures, design, layout, maskmaking, fabrication, packaging, and testing of VLSI chips are discussed. Highly concurrent Very Large Scale Integration computational systems are also covered.

Prerequisite: ECE 202. Or ECE 305. And ECE 211. Or ECE 304.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 533. Random Signals and Noise. 3 Credit Hours.

Probability models, Bayes' theorem, Limit theorems of Laplace and Poisson, functions of random variables, Central limit theorem, conditional expectation and estimation, Stochastic processes, stationarity and ergodicity, cross-spectral analysis, filtering, and prediction are discussed.

Prerequisite: ECE 310. Or IEN 310.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 534. Communication Networks. 3 Credit Hours.

Principles of digital communications, Local Area Networks (LANs), Wide Area Networks (WANs), Open systems Intercommunication (OSI), Internet reference models, internet architecture and protocols, packet switching and routing, and network performance are discussed.

Prerequisite: ECE 212. Or ECE 312. And ECE 310. Or IEN 310.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 537. Principles of Artificial Intelligence. 3 Credit Hours.

Search techniques, game trees, use of heuristics, logic, representation of knowledge, algorithms for automated reasoning including automated reasoning under imperfect information, some advanced approaches to AI-Problems such as planning.

Prerequisite: ECE 218.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 538. Introduction to Digital Image Processing. 3 Credit Hours.

Digital image representation. Image smoothing, sharpening, and transformations. Color image processing. Encoding of digital images. High level image segmentation and description techniques. Processing of image sequences.

Prerequisite: ECE 206. Or ECE 307. And MTH 210.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 539. Digital Communications. 3 Credit Hours.

Principles for the analysis and design of digital communications systems. Nyquist sampling, signal space representation, digital modulation techniques and optimal receiver design, ISI channels, error control coding, convolutional codes, Viterbi decoder, and wireless applications.

Prerequisite: ECE 404.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 540. Digital Speech and Audio Processing. 3 Credit Hours.

Introduction to human speech production, hearing, and perception. Digital speech and audio signal analysis in time and frequency, speech and audio coding, speech synthesis and recognition, language modeling, design of systems for human-machine interaction are also covered.

Prerequisite: ECE 336.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 542. MEMS: Sensors and Electronics. 3 Credit Hours.

This course will introduce the fundamentals of Microelectromechanical Systems (MEMS). An introductory foundation of MEMS concepts will be established through lectures on sensors, actuators, readout electronics, and noise. Physical principles of electromechanical, piezoresistive, capacitive, and piezoelectric sensing will be introduced. Based on these design and analysis principles the course will focus on commercial applications such as accelerometers, biochemical sensors, RF components, microfluidics, and optical devices. Sensor electronics will be discussed with a focus on integration with Complementary Metal Oxide Semiconductor (CMOS) technology.

Prerequisite: ECE 532.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 543. BioNanotechnology. 3 Credit Hours.

Introduction on the fundamentals of nanotechnology with a focus on Biomedical Applications. A foundation of nanotechnology concepts will be established through lectures on nanometrology with quantum physics basics, nano manufacturing tools, physical, chemical properties of nanomaterials. Application of these principles in electronics, magnetics, mechanics and optics will be discussed. Use of these nanoengineering principles and concepts to focus on biomedical technology applications such as biosensors, biomaterials, biomimetics and therapeutics

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 548. Machine Learning. 3 Credit Hours.

Fundamentals approaches to classifier induction, probabilistic and instance-based approaches, linear and polynomial classifiers, neural networks, decision trees, boosting techniques, performance evaluation, cluster analysis, reinforcement learning, fundamentals of computational learning theory.

Prerequisite: ECE 218. Or MTH 309.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 553. Neural Networks. 3 Credit Hours.

Artificial neural network algorithms and structures, learning process, perceptron, least-mean-square algorithms, multilayer perceptron, error back-propagation, radial-basis function networks, the Hopfield network, and self-organizing systems are discussed.

Prerequisite: ECE 218. Or MTH 309.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 562. Wireless and Cellular Communication. 3 Credit Hours.

Wireless Channel Characterization: path loss, shadowing, fading, frequency-selective channels, Doppler spread, and delay spread. Diversity techniques: frequency, time and space diversity. Multiple Antenna Systems: space-time coding, beamforming and layered space-time system. Digital Modulation: adaptive modulations and Orthogonal Frequency Division Multiplexing (OFDM). Cellular Concept: frequency reuse, co-channel interference and handoff. Multiple Access Methods: Frequency Division Multiple Access (FDMA), Time Division Multiple Access (TDMA), Code Division Multiple Access (CDMA) and random access. CDMA: spreading codes, RAKE receiver, multiuser detection and power control.

Prerequisite: ECE 404.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 563. Wireless Communication Lab. 1 Credit Hour.

Computer simulation of path loss, shadowing and fading in wireless channels, performance of various digital modulation methods in both Gaussian and wireless channels, diversity methods, equalization methods including zero-forcing, minimum mean-square error (MMSE) and decision-feedback equalization (DFE), co-channel interfacing in cellular systems, space-time coding. Orthogonal Frequency Division Multiplexing (OFDM) systems, spreading codes for Code Division Multiple Access (CDMA) systems, and matched-filter receiver and multiuser detector for CDMA systems. Measurement of wireless signals in various environments.

Prerequisite: ECE 562.

Components: LAB.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 564. Wireless Networks. 3 Credit Hours.

Introduction of wireless channels and network. Introduction of medium access control: Frequency Division Multiple Access (FDMA), Time Division Multiple Access (TDMA), Code Division Multiple Access (CDMA) and Carrier Sense Multiple Access. Wireless data networks: IEEE 802.11 (WiFi), IEEE 802.16 (WiMax) and Bluetooth. Wireless network layer: mobile IP and mobile ad-hoc networks. Wireless transport layer: mobile TCP. Wireless Cellular systems: network structure and call processing of GSM and CDMA systems.

Pre or Corequisite: ECE 534.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 567. Database Design and Management. 3 Credit Hours.

Database systems design, modeling, implementation, management methodologies, and techniques. Different database systems are addressed including relational, object-oriented, object-relational, and distributed database systems. Internet (WWW) technology, data warehousing, and online analytical processing applications of database management systems and hands-on experience with commercial database systems is also included.

Prerequisite: ECE 322 or CSC 322.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 570. Network Client-Server Programming. 3 Credit Hours.

Introduction to server-client systems and programming. Advanced server-client design and implementation based on distributed component object model in Windows and UNIX.

Prerequisite: ECE 218.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 572. Object-Oriented and Distributed Database Management Systems. 3 Credit Hours.

Object-Oriented modeling concepts in languages and database systems. Object-Oriented database systems. Semantic data models, nested-relational, object-relational databases. Distributed database system. Federated Databases. Application to engineering design problems.

Prerequisite: ECE 467 Or ECE 567.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 574. Agent Technology. 3 Credit Hours.

Agent definition and applications, agent modeling, theories, agent representation using KIF (Knowledge Interchange Format), agent behavior, ethical and emotional agents, agent communication languages (KQML (Knowledge Query and Manipulation Language)), agent development environments and tools, agent systems (cooperative agents, interface agents, information agents, learning agents, believable agents, agents for workgroups, mobile agents), and agent case studies are covered.

Prerequisite: ECE 537 Or ECE 637.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 576. Internet and Intranet Security. 3 Credit Hours.

Security issues and applications for securing internet and intranet-based information exchange. Secure information models, security tools, security services, security protocols, electronic commerce, virtual private networks, firewalls, and security versus cost tradeoffs are covered.

ECE 218 Or CSC 322 Or Equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 577. Data Mining. 3 Credit Hours.

Introduction to the general principles of inferring useful knowledge from large data sets. Data mining algorithms, including inferring rules, linear regression, decision trees, association rules, and predictive models. Evaluation of data mining algorithms, including training, testing, prediction, comparison, cost, and cross-validation. Data mining applications.

Prerequisite: ECE 467 Or ECE 567.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 579. Mobile Computing. 3 Credit Hours.

Mobile computing and proxy architectures, mobile web protocols, mobile user interfaces, applications, systems-ware adaptations, mobile databases, transactions, data synchronization, privacy, authentication, and security are covered.

Prerequisite: ECE 368.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 581. Special Problems. 1-3 Credit Hours.

Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.

Components: THI.

Grading: GRD.

Typically Offered: Fall.

ECE 582. Special Problems. 1-3 Credit Hours.

Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.

Components: THI.

Grading: GRD.

Typically Offered: Spring.

ECE 583. Special Problems. 1-3 Credit Hours.

Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ECE 584. Special Problems. 1-3 Credit Hours.

Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ECE 590. Special Topics in Information Technology. 1-3 Credit Hours.

Lecture courses in selected areas of specialization within Information Technology.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 591. Special Topics in Information Technology. 1-3 Credit Hours.

Lecture courses in selected areas of specialization within Information Technology.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 594. Special Topics in Computer Engineering. 1-3 Credit Hours.

Lecture courses in selected areas of specialization within Computer Engineering.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 595. Special Topics in Computer Engineering. 1-3 Credit Hours.

Lecture courses in selected areas of specialization within Computer Engineering.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 596. Special Topics in Computer Engineering. 1-3 Credit Hours.

Lecture courses in selected areas of specialization within Computer Engineering.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 597. Special Topics in Electrical Engineering. 1-3 Credit Hours.

Lecture courses in selected areas of specialization within Electrical Engineering.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 598. Special Topics in Electrical Engineering. 1-3 Credit Hours.

Lecture courses in selected areas of specialization within Electrical Engineering.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 599. Special Topics in Electrical Engineering. 1-3 Credit Hours.

Lecture courses in selected areas of specialization within Electrical Engineering.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 600. Engineering Analytical Techniques. 3 Credit Hours.

Complex variables, analytic functions, power series, residue theorem, conformal mappings, series solution, Bessel functions, Legendre polynomials. singular value decomposition, vector, and matrix norms are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 602. Engineering Acoustics. 3 Credit Hours.

Introduction to basic principles of acoustics, methods of sound measurement, physiological, psychological acoustics, the acoustics of the major classes of musical instruments and speech, fundamentals of transducers, architectural acoustics, and the effects and control of noise are covered.

Prerequisite: ECE 336.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 603. Laser Communications. 3 Credit Hours.

Prerequisites: PHY 206 and PHY 207 and ECE 301.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 604. Fundamentals of Optical. 3 Credit Hours.

Prerequisites: ECE 301 or BME 545.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 605. Semiconductor Photonic Devices. 3 Credit Hours.

Principles of semiconductor electronics: energy bands of semiconductors; Fermi level; carrier distribution and transport mechanisms. Application of semiconductor theory to various junction and field effect devices.

Prerequisite: ECE 302, 306, 405.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 606. Microfabrication. 3 Credit Hours.

Principles of operation, properties and applications of semiconductor devices, junction, metal-semiconductor, metal-oxide-semiconductor, optoelectronic, bulk-effect, and charge-coupled are covered

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 632. VLSI Systems. 3 Credit Hours.

Fundamentals of MOS Technology in VLSI. System data, control flow, structures, design, layout, maskmaking, fabrication, packaging, and testing of VLSI chips are discussed. Highly concurrent Very Large Scale Integration computational systems are also covered. * For students who are taking it as ECE 632 there will be a separate advanced final project that will include the use of all digital circuit library that will be developed in the lab exercises and in addition include an analog component to achieve a mixed signal system integration. This will require additional research study as well as comprehension of more advanced topics in VLSI. Supplemental material and additional project instruction will be delivered in the lab.

Prerequisite: ECE 202. Or ECE 305. And ECE 211. Or ECE 304.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 633. Random Signals and Noise. 3 Credit Hours.

Probability models, Bayes' theorem, Limit theorems of Laplace and Poisson, functions of random variables, Central limit theorem, conditional expectation and estimation, Stochastic processes, stationarity and ergodicity, cross-spectral analysis, filtering, and prediction are discussed.

Prerequisite: ECE 310. Or IEN 310.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 634. Communication Networks. 3 Credit Hours.

Principles of digital communications, Local Area Networks (LANs), Wide Area Networks(WANs), Open systems Intercommunication (OSI), Internet reference models, internet architecture and protocols, packet switching and routing, and network performance are discussed. * For students who are taking it as ECE 634 there will be a separate requirement.

Prerequisite: ECE 212. Or ECE 312. And ECE 310. Or IEN 310.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 636. Adaptive Filters and Signal Processing. 3 Credit Hours.

Topics include linear models and estimation, orthogonality principle, Wiener filters, stochastic gradient methods, LMS and RLS algorithms, mean square error and tracking performance and applications.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 637. Principles of Artificial Intelligence. 3 Credit Hours.

Search techniques, game trees, use of heuristics, logic, representation of knowledge, algorithms for automated reasoning including automated reasoning under imperfect information, some advanced approaches to AI-Problems such as planning.

Prerequisite: ECE 218.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 638. Introduction to Digital Image Processing. 3 Credit Hours.

Digital image representation. Image smoothing, sharpening, and transformations. Color image processing. Encoding of digital images. High level image segmentation and description techniques. Processing of image sequences.

Prerequisite: ECE 206. Or ECE 307. And MTH 210.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 639. Digital Communications. 3 Credit Hours.

Principles for the analysis and design of digital communications systems. Nyquist sampling, signal space representation, digital modulation techniques and optimal receiver design, ISI channels, error control coding, convolutional codes, Viterbi decoder, and wireless applications.

Prerequisite: ECE 404.

Components: LEC.

Grading: GRD.

ECE 640. Digital Speech and Audio Processing. 3 Credit Hours.

Introduction to human speech production, hearing, and perception. Digital speech and audio signal analysis in time and frequency, speech and audio coding, speech synthesis and recognition, language modeling, design of systems for human-machine interaction are also covered.

Prerequisite: ECE 336.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 642. MEMS: Sensors and Electronics. 3 Credit Hours.

This course will introduce the fundamentals of Microelectromechanical Systems (MEMS). An introductory foundation of MEMS concepts will be established through lectures on sensors, actuators, readout electronics, and noise. Physical principles of electromechanical, piezoresistive, capacitive, and piezoelectric sensing will be introduced. Based on these design and analysis principles the course will focus on commercial applications such as accelerometers, biochemical sensors, RF components, microfluidics, and optical devices. Sensor electronics will be discussed with a focus on integration with Complementary Metal Oxide Semiconductor (CMOS) technology.

Prerequisite: ECE 532.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 643. BioNanotechnology. 3 Credit Hours.

Introduction on the fundamentals of nanotechnology with a focus on Biomedical Applications. A foundation of nanotechnology concepts will be established through lectures on nanometrology with quantum physics basics, nano manufacturing tools, physical, chemical properties of nanomaterials. Application of these principles in electronics, magnetics, mechanics and optics will be discussed. Use of these nanoengineering principles and concepts to focus on biomedical technology applications such as biosensors, biomaterials, biomimetics and therapeutics

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 646. Reliable Digital System Design. 3 Credit Hours.

Topics include descriptive technique for digital systems, synchronizer failure and metastability estimation, design for testability, and estimating digital system reliability. Computer-Aided Engineering (CAE) tools are also covered. Not open to students with credit in ECE 454. Offered only for Graduate students.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 648. Machine Learning. 3 Credit Hours.

Fundamentals of intelligent system design and strategies of learning capability simulation. Selected case studies of learning systems for engineering applications are included.

Prerequisite: ECE 218. Or MTH 309.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 653. Neural Networks. 3 Credit Hours.

Artificial neural network algorithms and structures, learning process, perceptron, least-mean-square algorithms, multilayer perceptron, error back-propagation, radial-basis function networks, the Hopfield network, and self-organizing systems are discussed.

Prerequisite: ECE 218. Or MTH 309.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 662. Wireless and Cellular Communication. 3 Credit Hours.

Wireless Channel Characterization: path loss, shadowing, fading, frequency-selective channels, Doppler spread, and delay spread. Diversity techniques: frequency, time and space diversity. Multiple Antenna Systems: space-time coding, beamforming and layered space-time system. Digital Modulation: adaptive modulations and Orthogonal Frequency Division Multiplexing (OFDM). Cellular Concept: frequency reuse, co-channel interference and handoff. Multiple Access Methods: Frequency Division Multiple Access (FDMA), Time Division Multiple Access (TDMA), Code Division Multiple Access (CDMA) and random access. CDMA: spreading codes, RAKE receiver, multiuser detection and power control.

Prerequisite: ECE 404.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 664. Wireless Networks. 3 Credit Hours.

Introduction of wireless channels and network. Introduction of medium access control: Frequency Division Multiple Access (FDMA), Time Division Multiple Access (TDMA), Code Division Multiple Access (CDMA) and Carrier Sense Multiple Access. Wireless data networks: IEEE 802.11 (WiFi), IEEE 802.16 (WiMax) and Bluetooth. Wireless network layer: mobile IP and mobile ad-hoc networks. Wireless transport layer: mobile TCP. Wireless Cellular systems: network structure and call processing of GSM and CDMA systems.

Pre or Corequisite: ECE 634.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 672. Object-Oriented and Distributed Database Management Systems. 3 Credit Hours.

Object-Oriented modeling concepts in languages and database systems. Object-Oriented database systems. Semantic data models, nested-relational, object-relational databases. Distributed database system. Federated Databases. Application to engineering design problems.

Prerequisite: ECE 467 Or ECE 567.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 673. Information Assurance. 3 Credit Hours.

Assurance as the basis for believing an information system will behave as expected. Security design fundamentals that help create systems that are fit for their purpose and worthy of being trusted. The concepts of information assurance fundamentals. Vulnerabilities and Risk Management assessment. Security Life-Cycle, Mechanisms, Frameworks and Emerging Threats.

Prerequisite: ECE 634.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 674. Agent Technology. 3 Credit Hours.

Agent definition and applications, agent modeling, theories, agent representation using KIF (Knowledge Interchange Format), agent behavior, ethical and emotional agents, agent communication languages (KQML (Knowledge Query and Manipulation Language)), agent development environments and tools, agent systems (cooperative agents, interface agents, information agents, learning agents, believable agents, agents for workgroups, mobile agents), and agent case studies are covered.

Prerequisite: ECE 537 Or ECE 637.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 675. Digital Forensics. 3 Credit Hours.

The techniques and skills to apply forensics techniques throughout an investigation life cycle while complying with legal requirements. Preservation, identification, extraction and documentation of computer evidence stored on a computer. Application of forensics techniques to investigate and analyze a host in a network, devices including mobile, and techniques to investigate and analyze network traffic.

Prerequisite: ECE 634.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 676. Internet and Intranet Security. 3 Credit Hours.

Security issues and applications for securing internet and Intranet-based information exchange. Secure information models, security tools, security services, security protocols, electronic commerce, virtual private networks, firewalls, and security versus cost tradeoffs are covered.

ECE 218 Or CSC 322 Or Equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 677. Data Mining. 3 Credit Hours.

Introduction to the general principles of inferring useful knowledge from large data sets. Data mining algorithms, including inferring rules, linear regression, decision trees, association rules, and predictive models. Evaluation of data mining algorithms, including training, testing, prediction, comparison, cost, and cross-validation. Data mining applications.

Prerequisite: ECE 467 Or ECE 567.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 678. Network Security. 3 Credit Hours.

Information about the threats that may be present in the cyber realm and the techniques that can be taken to protect a network and communication assets from cyber threats. Threat examination and application of security measures. Implementation of network defense measures and adjustments for cloud and hybrid applications.

Prerequisite: ECE 673 and 676.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 680. Electrical and Computer Engineering Internship. 1-3 Credit Hours.

Analysis, design, and research experience obtained at an operating and recognized industry. Approved project jointly supervised and assessed by departmental faculty and industrial partner.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ECE 681. Special Problems. 1-3 Credit Hours.

Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.

Components: THI.

Grading: GRD.

Typically Offered: Fall.

ECE 682. Special Problems. 1-3 Credit Hours.

Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.

Components: THI.

Grading: GRD.

Typically Offered: Spring.

ECE 683. Special Problems. 1-3 Credit Hours.

Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ECE 684. Special Problems. 1-3 Credit Hours.

Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ECE 694. Special Topics in Computer Engineering. 1-3 Credit Hours.

Lecture courses in selected areas of specialization within Computer Engineering.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 695. Special Topics in Computer Engineering. 1-3 Credit Hours.

Lecture courses in selected areas of specialization within Computer Engineering.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 696. Special Topics in Computer Engineering. 1-3 Credit Hours.

Lecture courses in selected areas of specialization within Computer Engineering.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 697. Special Topics in Electrical Engineering. 1-3 Credit Hours.

Lecture courses in selected areas of specialization within Electrical Engineering.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 698. Special Topics in Electrical Engineering. 1-3 Credit Hours.

Lecture courses in selected areas of specialization within Electrical Engineering.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 699. Special Topics in Electrical Engineering. 1-3 Credit Hours.

Lecture courses in selected areas of specialization within Electrical Engineering.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 715. M.S. Design Project I. 3 Credit Hours.

Comprehensive M.S. design project in electrical or computer engineering. Open only to students in the BS/MS dual-degree program.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ECE 716. M.S. Design Project II. 3 Credit Hours.

Continuation of ECE 715. Open only to students in the BS/MS dual-degree program.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ECE 720. Convex Optimization. 3 Credit Hours.

This course aims to give students the tools and training to recognize convex optimization problems that arise in scientific and engineering applications, presenting the basic theory, and concentrating on modeling aspects and results that are useful in applications. Topics include convex sets, convex functions, optimization problems, optimality condition and duality, and algorithms. Applications to signal processing, machine learning and wireless communications are presented.

Prerequisite: MTH 210.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 725. Statistical Signal Processing. 3 Credit Hours.

Fundamentals of statistical signal processing, focusing on detection and estimation. Detection: hypothesis testing, Neyman-Pearson criterion, Bayes risk, generalized likelihood ratio tests. Estimation: minimum variance, maximum likelihood, maximum a-posteriori, and minimum mean squared error methods, Cramer-Rao and Bayesian bounds, expectation maximization, least squares, Kalman filter, sparse solutions, applications. Students should have completed basic courses on linear algebra and probability prior to taking this course.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 730. Statistical Learning. 3 Credit Hours.

Statistical learning theory, high-dimensional data models, regression, classification, sparse kernel machines, mixture models, graphical models, Markov chain Monte Carlo simulation, model assessment and selection, model inference and combining.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 735. Fundamentals of Network Science. 3 Credit Hours.

Mathematics of networks; network measures and metrics; power laws and scale-free networks; Erdos-Renyi random networks; random networks with general degree distributions; models of network formation, including preferential attachment models.

Prerequisite: MTH 210.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 738. Computer Vision. 3 Credit Hours.

Principles of computer vision. Segmentation, shape and texture analysis, 3D scene analysis, polyhedral scenes, time-varying image analysis, parallel processing algorithms, matching, and recognition are covered.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 753. Pattern Recognition and Neural Networks. 3 Credit Hours.

Statistical pattern classification, feature extraction, cluster analysis, neural net models, Hopfield net, competitive learning, multi-layer perceptron, and the Boltzmann machine are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 756. Information Theory. 3 Credit Hours.

Measure of uncertainty and entropy, two dimensional sources, noisy channels, mutual and transinformation, equivocation, efficiency and channel capacity, minimum redundancy coding, error-detecting, error-correcting codes, continuous channel without memory. Gaussian additive noise, sampling theorem, and vector space are covered.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 781. Advanced Problems. 1-3 Credit Hours.

Research and/or design projects through an individual investigation of current problems. Offered by special arrangement only.

Components: THI.

Grading: GRD.

Typically Offered: Fall.

ECE 782. Advanced Problems. 1-3 Credit Hours.

Research and/or design projects through an individual investigation of of current problems. Offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 783. Advanced Problems. 1-3 Credit Hours.

Research and/or design projects through an individual investigation of of current problems. Offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ECE 784. Advanced Problems. 1-3 Credit Hours.

Research and/or design projects through an individual investigation of current problems. Offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ECE 785. Advanced Problems in CyberSecurity. 3 Credit Hours.

Comprehensive M.S. capstone project in CyberSecurity.

Prerequisite: ECE 678.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 792. Professional Communications Skills for Engineering Grad Students. 0 Credit Hours.

This course covers fundamental areas in professional communication for Engineering graduate students. Topic areas include: presenting research at conferences, writing manuscripts for publication, preparing the dissertation, the PhD comprehensive exams, effective teaching and mentoring, and obtaining positions in academia. Through interactive workshops, in- class exercises, brief presentations and assignments, students will have an opportunity to practice and strengthen necessary communication skills, developing collaborations, and developing effective presentation skills.

Components: MOD.

Grading: SUS.

Typically Offered: Fall & Spring.

ECE 795. Advanced Topics in Computer Engineering. 1-3 Credit Hours.

Subject matter offerings in computer engineering based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 796. Advanced Topics in Computer Engineering. 1-3 Credit Hours.

Subject matter offerings in computer engineering based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 797. Advanced Topics in Electrical Engineering. 1-3 Credit Hours.

Subject matter offerings in electrical engineering based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 798. Advanced Topics in Electrical Engineering. 1-3 Credit Hours.

Subject matter offerings in electrical engineering based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 799. Advanced Topics. 1-3 Credit Hours.

Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 810. Master's Thesis. 1-6 Credit Hours.

The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

ECE 820. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in ECE 810 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ECE 825. Continuous Registration--Master's Study. 1 Credit Hour.

To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECE 830. Pre-Candidacy Doctoral Dissertation. 1-12 Credit Hours.

Doctoral dissertation credits taken prior to Ph.D. student's candidacy. The student will enroll for credit as determined by his/her advisor. No more than 12 hours of ECE 830 may be taken in a regular semester; no more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

ECE 840. Post-Candidacy Doctoral Dissertation. 1-12 Credit Hours.

Doctoral dissertation credits taken after Ph.D. student has been admitted to candidacy. The student will enroll for credit as determined by his/her advisor. No more than 12 credits in ECE 840 may be taken in a regular semester; no more than six credits in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

ECE 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

English (ENG)

ENG 103. Basic Academic Writing. 3 Credit Hours.

Intensive approach to the basics of academic writing with emphasis on building written fluency, using conventions of standard written English, and editing for precision and correctness. Intended for students who need extra preparation before entering ENG 105. Not for credit toward graduation.

Requisite: ACT English score below 18; or SAT Evidence-Based Reading and Writing or Critical Reading score below 430; or TOEFL iBT Writing score below 18.

Components: LEC.

Grading: CNC.

Typically Offered: Fall & Spring.

ENG 105. English Composition I. 3 Credit Hours.

Introduction to written academic argument and inquiry. Not for major or minor. Cannot be taken on credit-only option.

Requisite: ACT English score 18-31; or SAT Evidence-Based Reading and Writing or Critical Reading score 430-690; or TOEFL iBT Writing score 18 or above.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ENG 106. English Composition II. 3 Credit Hours.

Advanced approaches to written academic argument, with emphasis on textual analysis and incorporation of secondary sources. Not for major or minor. Cannot be taken on credit-only option.

Requisite: ENG 105 OR ACT English score 32 or above; or SAT Evidence-Based Reading and Writing or Critical Reading score 700 or above.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ENG 107. English Composition II: Science and Technology. 3 Credit Hours.

Advanced approaches to written academic argument, with emphasis on textual analysis and incorporating source material using readings and approaches connected to science and technology. Alternative to ENG 106. Not for major or minor. Cannot be taken on credit-only option.

Requisite: ACT English score 32 or above; or SAT Evidence-Based Reading and Writing or Critical Reading score 700 or above.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ENG 201. World Literary Masterpieces I. 3 Credit Hours.

Comparative study of literary masterpieces from ancient times through the Renaissance. Satisfies writing requirement.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ENG 202. World Literary Masterpieces II. 3 Credit Hours.

Comparative study of literary masterpieces from the Renaissance to the present. Satisfies writing requirement.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ENG 205. Jewish Literature. 3 Credit Hours.

Selections from the Bible, the Talmud, the Kabbalah, medieval poetry and prose, Yiddish and Sephardic literature, and contemporary American and Israeli writers.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 208. Advanced Academic Writing for Transfer Students. 3 Credit Hours.

Review of research techniques and revision strategies. Completes the university composition requirement for those students who transfer into UM with credit for one composition course from another institution. Open only to transfer students who have received transfer credit for either English 105 or English 106. Not open to students who have taken either English 105 and/or 106 at UM.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ENG 209. Creative Writing. 3 Credit Hours.

Analysis and writing of Short stories and poems. Cannot be taken for credit only.

Components: SEM.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ENG 210. Literary Themes and Topics. 3 Credit Hours.

Literary analysis and practice in critical writing through the study of selected works; themes and topics vary by semester.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 211. English Literature I. 3 Credit Hours.

Selected readings from the middle ages to the late 18th century. Satisfies writing requirement.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ENG 212. English Literature II. 3 Credit Hours.

Selected readings from the late 18th century to the present. Satisfies writing requirement.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ENG 213. American Literature I. 3 Credit Hours.

Selected American authors prior to the Civil War. Satisfies writing requirement.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ENG 214. American Literature II. 3 Credit Hours.

Selected American authors from the Civil War to the present. Satisfies writing requirement.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ENG 215. English and American Literature by Women. 3 Credit Hours.

A survey of women writers from the Middle Ages to the present; explores the female literary tradition and women's relationship to culture and society.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 219. CW Beginning Mixed Genre Workshop. 3 Credit Hours.

A multi-genre workshop that will focus on developing practical issues of craft and technique presented in ENG 209 with an emphasis on form and narrative. Classes feature writing exercises and discussions of both student work and readings from contemporary fiction, poetry and a third genre (e.g., playwriting, nonfiction or screenplay).

ENG 209 may not be taken in the same term with another creative writing course (i.e., ENG 209, ENG 290, ENG 292, ENG 390, ENG 391, ENG 392, ENG 404, ENG 406 Or ENG 408).

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

ENG 220. Introduction to Poetry. 3 Credit Hours.

Introduction to the forms of poetry through the analysis of representative poems.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 221. Introduction to Fiction. 3 Credit Hours.

Forms of prose fiction and the analysis of representative short stories and novels.

Pre/Corequisite: ENG 106.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 230. Advanced Professional Communication. 3 Credit Hours.

Professional writing with critical attention to complex rhetorical situations. Practice in formal and informal written communication styles.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ENG 231. Advanced Writing for Arts and Humanities. 3 Credit Hours.

Advanced instruction in writing for specialist and non-specialist audiences on topics in the Arts and Humanities disciplines, with an emphasis on essay and multimodal forms of communication.

Prerequisite: ENG 106 or ENG 107 or ENG 208.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 232. Advanced Writing for People and Society. 3 Credit Hours.

Advanced instruction in writing for specialist and non-specialist audiences on topics in the People and Society disciplines, with an emphasis on essay and multimodal forms of communication.

Prerequisite: ENG 106 or ENG 107 or ENG 208.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 233. Advanced Writing for STEM. 3 Credit Hours.

Advanced instruction in writing for specialist and non-specialist audiences on topics in the STEM disciplines, with an emphasis on essay and multimodal forms of communication.

Prerequisite: ENG 106 or ENG 107 or ENG 208.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 240. Literature and Medicine. 3 Credit Hours.

Patients, doctors, and disease itself offer writers avenues to explore ultimate questions. In this course we will examine medicine—and these ultimate questions—as represented in fiction, drama, poetry, and non-fiction. We will consider the works in terms of both the implications for medicine and the literary uses to which medicine can be put.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 241. Art of the Con: Con Artists, Tricksters, and Card Sharks in U.S. Literature and Culture. 3 Credit Hours.

Students will read novels, examine archival materials, review graphic novels, and watch films and TV shows about con artists and tricksters in American culture. In addition to writing essays, this course will provide students with the opportunity to learn how to annotate films in multimedia formats. Students will also learn about actual confidence games and frauds that rely upon narrative structures.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 242. Literature and Law. 3 Credit Hours.

In this course we will study literary works, from a number of different historical periods, that focus on law and legal systems as a major theme. We will examine the ways in which authors represent the nature of law, the actual workings of law, and the relationship between law and ideals of justice. We will also consider other intersections between literature and law, such as legal efforts to censor literary works on political or moral grounds, and the connection between legal and literary interpretation. Authors to be studied will include writers such as Sophocles, Plato, Shakespeare, Balzac, Melville, Kafka, and Ginsberg.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 245. The Circle of Knowledge: Science and the Humanities. 3 Credit Hours.

Major works in the debate over the arts and sciences from the classical Greeks and the humanistic Renaissance to the Scientific Revolution, the impact of Darwin, the cognitive revolution in science, and postmodern interdisciplinarity.

Components: LEC.

Grading: CNC.

Typically Offered: Fall.

ENG 250. Studies in English. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ENG 251. Studies in English. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ENG 252. Studies in English. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ENG 253. Studies in English. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ENG 254. Studies in English. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ENG 255. Studies in English. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ENG 257. Studies in English. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ENG 258. Studies in English. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ENG 259. Studies in English. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ENG 260. African-American Literature. 3 Credit Hours.

Selected readings of the eighteenth century to the present.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 261. Literature of the Americas. 3 Credit Hours.

Selected readings from North, Central, and South American, and Caribbean literature from their origins to the present.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 290. Beginning Fiction Workshop. 3 Credit Hours.

Frequent exercises in workshop environment, with readings in contemporary fiction. Attention to tense and points of view; reviews of grammar and punctuation. 30-40 pages of creative writing, including development and revision of one full-length short story (12-20 pages).

Prerequisite: ENG 209. or Requisite: Creative Writing Majors.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

ENG 292. Beginning Poetry Workshop. 3 Credit Hours.

Emphasis of creation and critique of new student poetry in workshop setting; continued reading in genre. Variety of styles and techniques presented, including line, image and metaphor. 12-15 new poems, plus revisions, required.

Prerequisite: ENG 209. or Requisite: Creative Writing Majors.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

ENG 301. The Study of Language. 3 Credit Hours.

Language itself as an object of study; broad linguistic issues of language types, processes of language change, and language variation. Emphasis on language in "real world" applications such as law, folk culture, poetry, education, and computers.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 306. Advanced Composition. 3 Credit Hours.

Composition and analysis of English prose. Topics vary. May be repeated if topics are different.

Prerequisite: ENG 106 or ENG 107.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 310. Literature and Culture in Classical Greece and Rome, I. 3 Credit Hours.

Major pre-classical and classical Greek writers, including Homer, Sappho, Pindar, Aeschylus, Herodotus, and Sophocles, treated by close analysis, and attention to connecting themes; Greek art and archeology in reference to specific texts.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 311. Literature and Culture in Classical Greece and Rome, II. 3 Credit Hours.

Thucydides on the Peloponnesian War; the drama of Euripides and Aristophanes; the dialogues of Plato on Socrates' trial and death; Aristotle's Poetics. Early Roman tradition; Rome and its relation to Greek culture; Livy on Roman history; Cicero, Virgil's Aeneid, Marcus Aurelius.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 312. The European Middle Ages. 3 Credit Hours.

British and continental literature and thought from the 5th through the 15th centuries.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 313. The European Renaissance. 3 Credit Hours.

Major writers of the European Renaissance, such as Petrarch, Machiavelli, Castiglione, Erasmus, More, Rabelais, Montaigne, Marguerite de Navarre.

Prerequisite: ENG 106 or ENG 107.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 314. The European Enlightenment. 3 Credit Hours.

Major writers of the European Enlightenment, such as Locke, Montesquieu, Vico, Hume, Voltaire, Rousseau, Diderot, Lessing, Smith, and Kant.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 315. The Classical Epic Tradition. 3 Credit Hours.

The rise and development of the Western epic tradition from Homer, Lucretius, and Virgil in the classical world, through Dante in the Middle Ages, Milton in the Renaissance, and Wordsworth and Eliot in modernity.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 316. Early Celtic Literature. 3 Credit Hours.

Study in translation of literary, hagiographic, and historiographic sources, principally from Irish, Welsh, and Latin, dating from 800 to 1800, with an introduction to source languages and to Celtic cultures beginning in the prehistoric era.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 319. Shakespeare. 3 Credit Hours.

Representative comedies, histories, tragedies and romances. Not for students who have taken ENG 430 or 431; may not be taken concurrently with ENG 430 or 431.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 321. Major American Novelists. 3 Credit Hours.

Works by selected American novelists.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 323. Major British Novelists. 3 Credit Hours.

Works by selected British novelists.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 325. Major European Novelists. 3 Credit Hours.

Works by selected European novelists.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 331. Legal Writing. 3 Credit Hours.

A study of the composition of legal arguments in court opinions, legal briefs, oral arguments before the Supreme Court, and social-legal documents. Emphasis on analysis of issues, structure and style of legal writing, and the function of logic in persuasion.

Prerequisite: ENG 106 or ENG 107.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 332. Writing for and About Community Service. 3 Credit Hours.

Writing on social issues from sociological and literary sources, supplemented with community service activities (minimum 12 hours per semester).

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 333. Writing the Research Paper. 3 Credit Hours.

Advanced techniques in conducting research and writing the research paper. Use of traditional library resources, on-line searches, the Internet, and other research methods. Strategies for effective presentation of research findings. Students not in the Bachelor of General Studies program need permission of instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 334. Legal Rhetoric. 3 Credit Hours.

Legal texts and the rhetoric of legal discourse.

Prerequisite: ENG 106 or ENG 107.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 340. Forms of the Novel. 3 Credit Hours.

Techniques and esthetics of the novel form; emphasis on major tendencies in the evolution of long prose fiction rather than on chronological development.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 341. Modern British and American Poetry. 3 Credit Hours.

Representative poets and critics of poetry since 1900; attention to the basic principles of poetics.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 342. Lyric Voices and Traditions. 3 Credit Hours.

Major figures and trends in the history of lyric poetry.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 345. Edgar Allan Poe and the U.S. Gothic. 3 Credit Hours.

In this course, we will read most of Edgar Allan Poe's short stories, his only novel, and many of his poems. We will also watch TV shows and films inspired by his gothic vision.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 350. Studies in English. 3 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ENG 351. Studies in English. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ENG 352. Studies in English. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ENG 353. Studies in English. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ENG 354. Studies in English. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ENG 355. Studies in English. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ENG 356. Studies in English. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ENG 357. Studies in English. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ENG 358. Studies in English. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ENG 359. Studies in English. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ENG 360. Comparative Literature of the Black World. 3 Credit Hours.

Oral and written Black literature in Africa, the United States, the Caribbean, and South America.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 361. Caribbean Literature. 3 Credit Hours.

Introduction to twentieth-century literature with special emphasis on the regional preoccupation with a distinctly Caribbean aesthetic.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 363. Jewish American Literature. 3 Credit Hours.

Twentieth-century Jewish writers in the United States such as Singer, Bellow, Roth, Ozick, and Malamud.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ENG 364. Sephardic Literature. 3 Credit Hours.

Judeo-Spanish culture and literature from medieval times to the present.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 365. Literature of the Holocaust. 3 Credit Hours.

Literature relating to the Nazi genocide and its aftermath.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 366. Asian American Literature. 3 Credit Hours.

Literature by Asian immigrants and exiles in the United States.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 368. Representations of Arabs and Jews in Israeli and Palestinian Literature and Film. 3 Credit Hours.

Literary narratives and films, by both Arabs and Jews, discussing the relationship between the portrayal of Arabs and Jews within Israeli and Palestinian society. The core question we will address concerns the writer's emphatic response to the identity and history of the other. Other issues to be examined include the influence of the literary imagination on empathy and the role of dissent and protest in society.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 372. Women Writing: Theory and Practice. 3 Credit Hours.

Women writers, emphasizing the role of gender in literary creation.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 373. Literary Representations of Women. 3 Credit Hours.

The portrayal of women in literature from ancient times to the present.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 374. Women Writers. 3 Credit Hours.

A study of women's writings and feminist criticism from 1930 to the present.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 375. Modern Drama. 3 Credit Hours.

The major dramatists of the modern world: Ibsen, Chekhov, Strindberg, Shaw, Pirandello, and O'Neill.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 376. Contemporary Drama. 3 Credit Hours.

The dramatists of our time: Albee, Miller, Williams, Becket, Sartre, Genet, Pinter, Osborne, Stoppard, Durenmatt, and others.

Prerequisite: ENG 106 or ENG 107.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 378. Animals and Humans in Literature, Art, and Philosophy. 3 Credit Hours.

Investigates the representation of animals and humans from ancient to contemporary times in literature, philosophy, and art, primarily in the West.

Topics may include: the human treatment of animals (as subjects of experimentation, as companions, as food, as entertainment); evidence of animal subjectivity and morality; and continuities between humans and other animals.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 379. Modern Literature. 3 Credit Hours.

Western literature of the modern era. emphasizing roots, traditions, practices.

Prerequisite: ENG 106 or ENG 107.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 380. Contemporary Literature. 3 Credit Hours.

Fiction, drama, and poetry from World War II to the present.

Prerequisite: ENG 106 or ENG 107.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 383. The Literature of Science Fiction. 3 Credit Hours.

A general survey of the literature of science fiction, with emphasis on writings of the twentieth century.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 384. The Bible as Literature. 3 Credit Hours.

Selected readings from the Bible.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 385. Myth and Literature. 3 Credit Hours.

A study of myth and ritual and their relation to literary works, from the early epic to contemporary literature.

Prerequisite: ENG 106 or ENG 107.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 386. King Arthur in Literature. 3 Credit Hours.

King Arthur in literature from the fifteenth to the twentieth century in England and America.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 387. Literature and Imperialism. 3 Credit Hours.

Relationships between empire and literary expression. Works by authors such as Shakespeare, Behn, Defoe, Bronte, Conrad, Kipling, Melville, Yeats, Twain, and Forster.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 388. Literature and Popular Culture. 3 Credit Hours.

Literary forms of popular expression, considered in relation to politics, ideology, gender, or race; comparison to other forms of popular culture in print, music, or the visual media.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 389. The Sixties: Literature, History, and Culture of the 1960s. 3 Credit Hours.

1960s culture in the United States through literature, film, and oral accounts of experience of the period.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 390. Intermediate Fiction Workshop. 3 Credit Hours.

Review of craft issues presented in 290, with emphasis on development of structure and contemporary use of point of view.

Prerequisite: ENG 219 or ENG 290.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

ENG 391. CW Intermediate Mixed-Genre Workshop. 3 Credit Hours.

A multi-genre workshop that will focus on developing practical issues of craft and technique presented in ENG 219 with an emphasis on exploring point of view in fiction, poetry and nonfiction. 12-30 pages of original work will be submitted and revised in workshop. In addition, the student will submit a final craft essay (10-12 pages) on a topic relevant to student's writing interests and challenges.

Prerequisite: ENG 219.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

ENG 392. Intermediate Poetry Workshop. 3 Credit Hours.

Review of craft issues presented in 292, integrating formal strategies with research topics.

ENG 219 Or ENG 292.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

ENG 395. Special Topics. 3 Credit Hours.

Content varies by semester and is indicated in parentheses following course number and title in Class Schedule.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 396. Special Topics. 3 Credit Hours.

Content varies by semester and is indicated in parentheses following course number and title in Class Schedule.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 397. Special Topics. 3 Credit Hours.

Content varies by semester and is indicated in parentheses following course number and title in Class Schedule.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 398. Directed Readings/Directed Research. 3 Credit Hours.

By arrangement with instructor. Content varies.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 401. Senior Seminar in Literature. 3 Credit Hours.

An intensive study of a literary topic or figure.

Components: SEM.

Grading: GRD.

Typically Offered: Spring.

ENG 402. Independent Study. 1 Credit Hour.

An intensive study of a literary topic or figure.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 404. Creative Writing (Prose Fiction). 3 Credit Hours.

Work toward professional standards primarily in prose fiction. Student fiction is considered in workshop sessions with comment by members of the class and instructors.

ENG 390.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 406. Creative Writing (Poetry). 3 Credit Hours.

Work toward professional standards in poetry. Student poetry is considered in workshop sessions with comment by members of the class and by instructor.

ENG 392.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 407. Creative Writing Special Topics, Advanced Workshop. 3 Credit Hours.

Advanced skills and processes essential to producing compelling fiction, poetry, or nonfiction in designated genre and form. A portfolio of writing in specified genre and form to result from broad readings and research.

Prerequisite: ENG 390 or ENG 392. May not be taken in the same term with another Creative Writing course (i.e., ENG 209, ENG 219, ENG 290, ENG 292, ENG 390, ENG 391, ENG 392, ENG 404 Or ENG 406).

Components: WKS.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 408. Writing Autobiography. 3 Credit Hours.

Literary style and method using student autobiography as a resource.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 410. Old English Language and Literature. 3 Credit Hours.

The grammar, syntax, and phonology of Old English language; readings in Old English poetry and prose.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 411. Old English Literature. 3 Credit Hours.

Translation and Close analysis of Beowulf or other major poetic texts of Old English literature.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 420. Chaucer. 3 Credit Hours.

Chaucer's major works.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 430. Shakespeare: The Early Plays. 3 Credit Hours.

Shakespeare's plays from the period 1583-1600. May not be taken concurrently with ENG 319.

MAY NOT BE TAKEN IN THE SAME TERM WITH ENG 319.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 431. Shakespeare: The Later Plays. 3 Credit Hours.

A study of the second half of Shakespeare's canon, read in chronological sequence. The plays will be selected from those composed in the period

1600-1611. May not be taken concurrently with ENG 319.

MAY NOT BE TAKEN IN THE SAME TERM WITH ENG 319.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 432. English Renaissance Poetry and Prose. 3 Credit Hours.

A study of such figures as Wyatt, Sidney, Spenser, Nashe, Marlowe, Shakespeare, Jonson, Donne, Bacon, Milton.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 433. English Renaissance Drama. 3 Credit Hours.

English drama during the sixteenth and seventeenth centuries.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 434. Seventeenth-Century Poetry and Prose. 3 Credit Hours.

Seventeenth-century writers and forms, including work by major and minor writers such as James I, Jonson, Donne, Bacon, Lovelace, Carew, Herrick,

Andrewes, Herbert, Milton, Marvell, Clarendon, Dryden, Rochester, Behn, and Bunyan.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 435. Milton. 3 Credit Hours.

Selected readings in the poetry and prose of John Milton.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 440. Restoration and Eighteenth-Century Literature. 3 Credit Hours.

English poetry and prose, exclusive of the novel, from Dryden to Burns.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 441. 18th-Century British Novel. 3 Credit Hours.

The British novel through the late eighteenth century.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 442. Politics and Literature. 3 Credit Hours.

Relations between political theories and forms of literary expression.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 450. The Early Romantic Period. 3 Credit Hours.

The rise of Romanticism in England and the first generation of writers, Blake, Wordsworth, Coleridge, and their contemporaries.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 451. The Late Romantic Period. 3 Credit Hours.

The second generation of English Romantic writers: Byron, Shelley, Keats, and their contemporaries.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 452. Jane Austen and Literary Criticism. 3 Credit Hours.

Jane Austen is both an influential, critically celebrated novelist and a cult figure. In this discussion course we will read five of Austen's six novels, employing some of the most illuminating criticism and responses to develop our understanding of Austen's work, her place in literature, and her place in popular culture. We will also consider the assumptions and purposes of the criticism and theory we read.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 455. Victorian Poetry and Prose. 3 Credit Hours.

Selected English poetry and prose of the period, exclusive of the novel.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 456. Nineteenth-Century English Novel. 3 Credit Hours.

Studies in the development of the English novel from Scott to Conrad.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 460. Modern British Literature. 3 Credit Hours.

Studies in Edwardian and Modern literature. Modernist theory and techniques will be illustrated by reference to the work of selected major figures since 1900.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 461. Contemporary British Literature. 3 Credit Hours.

British literature from World War II to the present.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 465. Irish Literature. 3 Credit Hours.

Twentieth-century Irish writers such as Yeats, Synge, Joyce, Stephens, O'Casey, Beckett, and Lavin. Consideration of Irish history, mythology, politics, and culture.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 466. Joyce. 3 Credit Hours.

The major works of James Joyce.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 470. Contemporary British and American Poetry. 3 Credit Hours.

The poetry of the contemporary period, 1945 to the present.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 472. Literature and Psychoanalytic Theory. 3 Credit Hours.

A study of the ways in which Literature, Literary Criticism, and Psychoanalytic Theory interact.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 473. Twentieth-Century Literary Theory. 3 Credit Hours.

An introduction to the major theories of the past century (e.g., psychoanalytic, formalist, materialist, feminist, new historicist).

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 479. Storied Pasts: Nineteenth-Century U.S. History and Literature. 3 Credit Hours.

This interdisciplinary course explores 19th-century American intellectual and cultural history through the lens of literature. Analyzing key works of fiction, poetry, and philosophy as both literary texts and historical sources, we will seek to discover how the changing themes and forms of nineteenth-century literature shaped and/or reflected larger intellectual, political, and social currents. Students will read novels by authors such as Hawthorne, Melville, Twain, Jewett, Gilman, James, Wharton, and Crane alongside historical material.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 480. Early American Literature. 3 Credit Hours.

American writing before 1800. Topics such as colonialism, ethnicity, nationalism, and the ideology of individualism.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 482. American Literature: 1800-1865. 3 Credit Hours.

Topics such as individualism, slavery, class and gender relations. Works by Emerson, Poe, Hawthorne, Melville, Douglass, Stowe, and others.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 483. American Literature: 1865-1915. 3 Credit Hours.

The works of such writers as Twain, Howells, James, Dickinson, Robinson, Crane, Norris, London, and Dreiser.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 484. American Literature: 1915 to 1945. 3 Credit Hours.

The works of such writers as Pound, Eliot, H.D., Stein, Frost, Stevens, e.e. cummings, Ransom, Tate, Fitzgerald, Hemingway, Djuna Barnes, Faulkner, O'Neill.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 485. American Literature: 1945 to the Present. 3 Credit Hours.

An intensive inquiry into the works of such writers as Albee, Bellow, Ferlinghetti, Ginsberg, Kerouac, Mailer, Miller, O'Connor, Plath, Welty.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 486. Early African-American Literature. 3 Credit Hours.

African-American literature from the beginnings to the Harlem Renaissance of the nineteen twenties.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 487. Modern African-American Literature. 3 Credit Hours.

African-American literature from the Harlem Renaissance to the present.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 488. Race, Ethnicity, and Literature. 3 Credit Hours.

Topic varies by semester. The Construction of racial and ethnic difference in literature, focusing on the politics of group affiliation and identity.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 489. Queer Sexualities: Literature and Theory. 3 Credit Hours.

This class will examine a wide variety of texts in order to think about how sexuality has been represented in different historical periods, from different cultural locations, and through different literary genres and forms. We will start with the contemporary coming-out narrative of modern Western lesbian and gay identity, and then look at a series of texts that challenge us to think about desire, gender, bodies, family, and language in new ways.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 490. Studies in Women and Literature. 3 Credit Hours.

Content varies by semester. Topics such as women in classical antiquity, women in the middle ages, women in the Renaissance, women in the Restoration and eighteenth century, women in the Romantic and Victorian period.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 491. Russian and Soviet Classics in English. 3 Credit Hours.

Survey of Russian literature in translation from the late 19th century to the present.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 492. Postcolonial Literature and Theory. 3 Credit Hours.

The legacy of colonialism as expressed in the works of Gordimer, Rushdie, Achebe, Walcott, Césaire, Naipaul, Mukherjee, Crow Dog, Menchu, and others. Readings will address theoretical issues such as national formation, cultural hybridity, and globalization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 493. History of Literary Criticism. 3 Credit Hours.

Content varies by semester.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 494. Feminist Literary Theory. 3 Credit Hours.

Examination of women's contributions to literary theory.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 495. Special Topics. 3 Credit Hours.

Content varies by semester and is indicated parenthetically following the title in the class schedule.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 496. Independent Study. 1-3 Credit Hours.

By arrangement with instructor. Content varies by semester. May be used for single semester thesis.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 497. Senior Thesis I. 3 Credit Hours.

Partial requirement for Departmental Honors in English Literature or Creative Writing. Research and preparation for writing senior thesis or creative project. To complete thesis, student must register for ENG 498 in following semester. Student will participate in a series of 3-4 pre-arranged workshops over the course of the two semesters.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 498. Senior Thesis II. 3 Credit Hours.

Partial requirement for Departmental Honors in English Literature or Creative Writing. Writing of either a documented essay on a literary subject or project in prose fiction or poetry, to be written under the direction of a member of the faculty. Student will participate in a series of 3-4 pre-arranged workshops over the course of the two semesters.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 499. Senior Creative Writing Project. 3 Credit Hours.

Partial requirement for Departmental Honors in Creative Writing. Project, in prose fiction or poetry, to be written under the direction of a member of the creative writing faculty.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 504. Form in Poetry. 3 Credit Hours.

Poetic works as literary objects, with attention to poetic trends and the creative process.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 505. Form in Fiction. 3 Credit Hours.

Fictional works as literary objects with attention to individual styles, Fictional Trends and the creative process.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 595. Special Topics. 3 Credit Hours.

Content varies by semester.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 601. Creative Writing: Fiction III. 3-6 Credit Hours.

Advanced M.F.A. workshop in the techniques of writing fiction.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 602. Creative Writing: Poetry II. 3-6 Credit Hours.

Advanced M.F.A. workshop in the techniques of writing poetry.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 604. Form in Poetry. 3 Credit Hours.

Poetic works as literary objects, with attention to poetic trends and the creative process.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 605. Form in Fiction. 3 Credit Hours.

Fictional works as literary objects with attention to individual styles, Fictional Trends and the creative process.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 607. Studies in Renaissance Drama. 3 Credit Hours.

Components: LEC.

Grading: GRD.

ENG 610. Studies in Old English Language and Literature. 3 Credit Hours.

Content varies by semester.

Components: DIS.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 611. Introduction to Digital Humanities. 3 Credit Hours.

An introduction to the theory and practice of the digital humanities from a literary and cultural studies perspective. It introduces major types of digital humanities work and central debates and concerns in the field. The course is taught in English and is open to graduate students from all humanities departments. No experience in the digital humanities or with digital tools or methods is required.

Components: SEM.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ENG 612. Topics in Digital Humanities and Media Studies. 3 Credit Hours.

A survey of Media Studies. Students will approach a broad range of texts in the field, and outline both its historical development and present state, with a particular focus on emerging theories and practices within Media Studies and Digital Humanities in the academy. The course is taught in English and is open to graduate students from all humanities departments.

Components: SEM.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ENG 613. Practicum in Digital Humanities. 3 Credit Hours.

Offers students the possibility to apply their learning in the field of Digital Humanities and move forward on their personal Digital Humanities research project. Students will carry out many practical exercises with programming languages and digital tools, and work towards a final digital project. This course is taught in English and is open to graduate students from all humanities departments.

Components: SEM.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ENG 614. Stu Neocl Poet Prose. 3 Credit Hours.

Components: LEC.

Grading: GRD.

ENG 615. Studies in Chaucer. 3 Credit Hours.

Studies in Chaucer.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 616. Studies in Middle English Language and Literature. 3 Credit Hours.

Studies in Middle English Language & Literature.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 620. Studies in Shakespeare. 3 Credit Hours.

Studies in Shakespeare.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 621. Studies in Elizabethan and Jacobean Drama. 3 Credit Hours.

Studies in Elizabethan and Jacobean Drama.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 622. Studies in 16th Century Literature. 3 Credit Hours.

A survey of predominantly non-dramatic Renaissance literature, with an emphasis on the Sixteenth Century.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 623. Studies in Spenser. 3 Credit Hours.

Studies in Spenser.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 624. Studies in 17th Century Literature. 3 Credit Hours.

Studies in 17th century literature.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 625. Studies in Milton. 3 Credit Hours.

Studies in Milton.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 630. Restoration and 18th-Century Drama. 3 Credit Hours.

Studies in Restoration and 18th Century Drama.

Components: DIS.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 631. Studies in Restoration and 18th Century Literature. 3 Credit Hours.

Special topics in British Literature from 1660-1800.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 633. The Eighteenth-Century British Novel. 3 Credit Hours.

Survey of the British novel from Defoe to Austen.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 640. Studies in Romanticism. 3 Credit Hours.

A study of writers and genres between the late eighteenth and the mid-nineteenth century, through an investigation of questions of canonicity, epistemological orientation, colonialism, and the revolutionary context.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 645. Studies in Victorian Poetry and Prose. 3 Credit Hours.

Victorian poetry and prose exclusive of the novel. Poems by Tennyson, Browning, Arnold, Rossetti, and others. Prose works by writers such as Carlyle, Newman, Mill, Ruskin, and Pater.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 646. Nineteenth-Century British Novel. 3 Credit Hours.

Survey of the British novel from Austen to Conrad.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 648. Studies in the Novel. 3 Credit Hours.

Topics in eighteenth-, nineteenth-, and twentieth-century fiction.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 650. Studies in Modern British Literature. 3 Credit Hours.

Intensive coverage of a limited topic in twentieth-century British or Irish literature.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 651. Studies in Joyce. 3 Credit Hours.

Close readings of *Dubliners*, *A Portrait of the Artist as a Young Man*, *Ulysses*, and *Finnegans Wake*; extensive review of Joyce criticism.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 652. Studies in Irish Literature. 3 Credit Hours.

Intensive coverage of a selected topic in Irish Literature.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 654. Contemporary British Literature. 3 Credit Hours.

Studies in British prose, poetry, and drama since 1939.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 655. Contemporary American Poetry and Poetics. 3 Credit Hours.

Poetry and poetics from 1945 to present, focusing on Black Mountain Poetics, the New York School, the Black Arts Movement, Language Poetry and more recent writers and movements.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 658. Studies in Transatlantic Literature. 3 Credit Hours.

Literature on transatlantic themes and/or by transatlantic writers. Border crossing; ships; sailors; and other travelers; movement of people, things, and ideas in the Atlantic world.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 660. Studies in American Literature: Beginnings to 1800. 3 Credit Hours.

Studies in American Literature: Beginnings to 1800.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 661. Studies in American Literature: 1800-1865. 3 Credit Hours.

Studies in American Literature: 1800-1865.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 662. Studies in American Literature: 1865-1914. 3 Credit Hours.

Studies in American Literature: 1865-1914.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 663. Studies in American Literature: 1914 to 1950. 3 Credit Hours.

Studies in American Literature: 1914-1950.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 664. Studies in American Literature: 1950 to the present. 3 Credit Hours.

Studies in American Literature: 1950 to the present.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 665. Studies in African-American Literature. 3 Credit Hours.

Studies in African-American Literature.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 666. Caribbean Literature. 3 Credit Hours.

Caribbean literature and cultural theory; Caribbean aesthetic.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 667. Caribbean Popular Culture. 3 Credit Hours.

Special topics on the relations among politics, popular culture, and literature in the Caribbean region.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 668. Studies in Race and Diasporic Literatures. 3 Credit Hours.

Analysis of race, ethnicity, immigration, and transnationalism in literature and cultural theory.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 669. Studies in Women's Literature. 3 Credit Hours.

Topic varies by semester. Analysis of gender issues and literary production by women.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 670. The Classical Tradition and English Literature. 3 Credit Hours.

A study of classical authors such as Homer, Aeschylus, Sophocles, Euripides, Virgil, Ovid, Horace, and Catullus, who have been seminal for English writers from the Middle Ages to the present.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 672. Comparative Studies in Renaissance and Baroque Literature. 3 Credit Hours.

Topic varies by semester: e.g., The Renaissance Lyric, The Renaissance Epic, The Rise of Humanism, Baroque Drama.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 673. Eighteenth-Century European Literature. 3 Credit Hours.

Major literary and aesthetic works of the European Enlightenment.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 674. The Romantic Movement in Europe. 3 Credit Hours.

A study of the forces and influences of the Romantic Movement in Europe as these intersect English Romanticism.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 675. European Novel. 3 Credit Hours.

Major authors and trends in the development of the European novel as a unified literary tradition.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 677. Studies in Modern Literature. 3 Credit Hours.

Studies in Modern Literature.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 678. Studies in Contemporary Literature. 3 Credit Hours.

Studies in Contemporary Literature.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 680. History of Literary Criticism. 3 Credit Hours.

A survey of literary criticism and theory from the ancient Greeks to the early twentieth century.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 681. Introduction to Literary Theory. 3 Credit Hours.

Twentieth-century literary theory beginning with the New Criticism and including topics such as semiotics, hermeneutics, deconstruction, feminism, and neopragmatism.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 682. Contemporary Criticism and Theory. 3 Credit Hours.

Topics in recent criticism and theory.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 683. Literature and Psychoanalysis. 3 Credit Hours.

The interrelations between literary theory, textual analysis, and psychoanalytic theory.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 684. Theory of Narrative. 3 Credit Hours.

Analysis of narrative theories, ancient to contemporary.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 685. Feminist Theory. 3 Credit Hours.

Feminist writing and criticism from the nineteenth century to the present. Supplementary readings in anthropological, psychoanalytic, and socio-political criticism, as well as in theories of poetic tradition and the poetic process.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 686. Theories of Gender and Sexuality. 3 Credit Hours.

Queer theory and its relationship with gender studies, critical race studies, and emerging directions in the field.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 687. Studies in Literature and Culture since 1950. 3 Credit Hours.

Studies in Literature and Culture since 1950.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 688. Studies in Latino/a Literatures and Cultures. 3 Credit Hours.

Comparative and interdisciplinary approaches to art, film, music and literature. Topics may include: borderlands, postcolonial and "Americas" methodologies; ethnicity, race and mestizaje; immigration and the "Latinization" of the U.S.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 689. Comparative Americas Studies. 3 Credit Hours.

Comparative, interdisciplinary and transnational approaches to literature and cultures of the Americas.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 691. Graduate Practicum I: Teaching College Writing. 0 Credit Hours.

Methods and problems in teaching English composition and college writing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ENG 692. Graduate Practicum II: Teaching College Literature. 0 Credit Hours.

Methods and problems in teaching introductory literature courses.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ENG 693. Teaching College Composition. 3 Credit Hours.

Rhetorical and literary theory related to composition instruction. Designed primarily for Teaching Assistants in the English Department, but open to all students planning to teach writing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ENG 695. Special Topics. 3 Credit Hours.

Varies by semester.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 696. Directed Readings. 1-3 Credit Hours.

Varies by semester.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ENG 697. Readings for the Qualifying Examination. 1-3 Credit Hours.

Varies by semester.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ENG 810. Master's Thesis. 1-6 Credit Hours.

The student working on his/her master's thesis enrolls for credit in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

ENG 820. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in ENG 710 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ENG 830. Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor, but for not less than a total of 12 hours. Up to 12 hours may be taken in a regular semester, but not more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

ENG 840. Post-Candidacy Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ph.D. who have advanced to candidacy. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of ENG 740 may be taken in a regular semester, nor more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

ENG 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the Ph.D. and D.A., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

Epidemiology and Public Health (EPH)

EPH 600. Introduction to Public Health. 3 Credit Hours.

This introductory course will provide students with the opportunity to explore and analyse contemporary public health issues and provide a history and a context that will allow students to better understand the field of public health, its core disciplines and their role as future public health professionals.

Requisite: Must be in either Program Plan, BSTS, EPID, EPID1, PREV, MDRP.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPH 601. Medical Biostatistics I. 4 Credit Hours.

Introduction to probability and statistics including descriptive statistics, tests of hypothesis, regression analysis, contingency tables, nonparametric tests, and life tables. Students gain hands-on experience in the analysis of medical data using several computer systems and at least one of the different statistical packages such as: BMDP, SAS, PSTAT, SYSTAT, and Minitab.

Requisite: Must be in either Program Plan, BSTS, EPID, EPID1, PREV, MDRP.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPH 602. Biostatistics II. 3 Credit Hours.

Continuation and elaboration of EPH601. Topics include design of factorial experiments, analysis of variance and variance components, multiple linear regression, and life tables.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 603. Medical Biostatistics. 3 Credit Hours.

This course is a hands-on introduction to biomedical research with a focus on collecting and analyzing patient data. Topics covered include: data security, visualization and analysis. Statistical topics include: probability, frequentist and Bayesian thinking, and both parametric and non-parametric statistical methods. Methods covered include: regression, contingency tables, and survival analysis techniques.

Prerequisite: MD/MPH Four Year/Regional Med Camp.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPH 604. Clinical Trials. 3 Credit Hours.

Planning, design, analysis, and data management for clinical therapeutic and prophylactic trials. Illustrations are provided through case examples.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

EPH 607. Interdisciplinary Health Communication. 3 Credit Hours.

Health communication is a critical tool for protecting and improving the health of people and their communities and is most effective when developed collaboratively using expertise from many disciplines. The focus of this course is the development of written, oral, and multimedia communication skills that will enable you to effectively communicate concepts and evidence-based scientific findings to diverse communities and professionals in health and other fields. Class time will largely be devoted to the development of these skills in the context of working effectively in interprofessional teams of approximately 5-6 students. Working collaboratively, students will develop teamwork skills and an awareness for the diversity of expertise that underpins effective interprofessional communication teams.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPH 608. Professional Development. 2 Credit Hours.

This 2-credit seminar will be dedicated to providing students with opportunities to gain experiences with professional skills such as job interviewing, public speaking, preparing budgets, grant proposal writing, and working with community organizations. The course will be interactive, where I will talk about skills that are important in the public health workforce and students will then practice the skills in pairs or groups. There will be no exams or quizzes; rather, students will be graded on public speaking, performance in a mock job interview, ability to write a mock grant application, developing a grant proposal budget, preparation of a CV/resume, and disseminating research findings to community stakeholders. Class will meet every Tuesday from 1 to 3:30 in CRB 989. Students should come ready to participate and to give constructive feedback to their peers. Each topic will be covered across 2 (and sometimes 3) class sessions, so that everyone has sufficient time to practice their skills and receive feedback.

Components: LEC.

Grading: SUS.

Typically Offered: Fall & Spring.

EPH 611. Mindfulness in Public Health and Medicine. 3 Credit Hours.

The stress of modern life can adversely impact physical and mental health functioning which may be ameliorated by the practice of mindfulness. Mindfulness is a mental state achieved by focusing one's awareness on the present moment, while calmly acknowledging and accepting one's feelings, thoughts, and bodily sensations. This practice is derived from Buddhist traditions more than 2,500 years old. In recent decades these practices have been adopted for use in United States and elsewhere and evidence is growing that these practices can reduce psychological symptomatology (e.g., symptoms of depression and anxiety), enhance resiliency in response to stressors, enhanced pain coping ability, and enhanced attentional regulation, among other benefits. The first half of this course will be devoted to the completion of an 8-week Mindfulness-Based Stress Reduction Course (MBSR) that will involve in-class activities and daily at-home mindfulness practice assignments. Students will maintain a journal documenting their "first-person" encounter with the practice of mindfulness. The second half of the course will be organized around a lecture format with weekly brief quizzes. Anonymous questionnaire data will be collected before, during and after completion of the MBSR course. These data will be used by student teams to evaluate the impact of MBSR on multiple outcomes. Groups will prepare a written report and present their findings to the class at the end of the semester.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 612. Global Health. 3 Credit Hours.

This seminar examines current global public health issues, governance and decision-making challenges for the 21st Century across developing, transitioning, and developed countries. Topics of discussion include new actors for world health in the era of globalization; linking human development, poverty and health inequities; social, cultural and ethical considerations for health planning; role of industry, trade and public health; evidence based research for improved global health initiatives; foreign policy and health security challenges associated with emergence and re-emergence of infectious diseases and public and private partnerships in global health. Open only to EPH majors.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 613. Emerging Challenges in Global Health Systems. 2 Credit Hours.

Health systems around the world must respond to an evolving landscape of health risk and disease burden that is increasingly dominated by complex, chronic illness. Contrary to what is often espoused, chronic and non-communicable diseases affect both poor and rich. Yet, access to health services is highly inequitable creating immense divides and equity imperatives that have largely been ignored in global health. This course examines how global and national health systems - particularly in low and middle-income countries – can better face the changing burden of disease with a focus on equity and universal coverage.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 614. Global Outbreak. 3 Credit Hours.

This seminar examines current global public health issues and provides an overview of global outbreak investigations and disease surveillance. Participating in epidemiological/outbreak investigations in international settings provides unique opportunities to learn about health challenges in different ecologic, cultural and resource limited settings. This seminar will also allow students to gather insight into public health surveillance and understand the utility of the ongoing systematic collection, analysis and interpretation of data for use in planning and evaluation of public health intervention programs.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

EPH 616. Global Health and Global Justice. 3 Credit Hours.

Global health has emerged as a field distinct from older visions of international health, by focusing on macro-level problems caused by globalization whose origin and solution must transcend national boundaries. Yet global health has also challenged ethics to develop new accounts of justice in this changing world. This course will analyze global health from the lens of ethics. The course will introduce core theories of public health ethics (e.g. utilitarianism, statism and cosmopolitanism) to make sense of the rise of global justice as a distinct field of ethical inquiry. Armed with this conceptual foundation, we will then examine some of the central problems of global health, as well as proposed solutions to those problems. Such skills in argumentation will be increasingly critical for future public health leaders, yet too few public health students are exposed to ethical analysis. By applying ethical frameworks to analyze global health problems, students will gain critical skills in how to integrate distinct forms of knowledge, how to develop cogent normative arguments, and how to articulate and defend an account of fair decision-making and just policies in global health.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPH 617. Disease Prevention and Health Promotion. 3 Credit Hours.

This course will introduce students to the science of prevention and health promotion. More specifically, through didactic presentations, group discussions, article readings and critiques, and a term project, this course will focus on providing students with an overview of: the top preventable causes of disease in the U.S., the etiology of disease (with a focus on the top preventable causes of disease in the U.S.) across the lifespan, the role of prevention theories in the development of preventive interventions, and the role of methodology in prevention science. The course will also provide an overview of efficacious/effective preventive interventions, including (but not limited to): family community, and school level interventions. Examples from the fields of obesity, drug use, smoking, and HIV will be used to illustrate the course learning objectives detailed below.

Requisite: Must be in either Program Plan, BSTS, EPID, EPID1, PREV, MDRP.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPH 620. Health Education and Behavior. 3 Credit Hours.

Educational processes with special emphasis on the social and cultural determinants of health behavior, health education as a process of social change, and community based health education organizations. Open only to EPH majors.

Requisite: Must be in either Program Plan, BSTS, EPID, EPID1, PREV, MDRP.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 621. Fundamentals of Epidemiology. 3 Credit Hours.

Principles and methods of epidemiology. Descriptive epidemiology, environmental and other risk factors, detection of outbreaks, basic demography, and etiologic studies.

Requisite: Must be in either Program Plan, BSTS, EPID, EPID1, PREV, MDRP.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPH 622. Obesity and Public Health. 3 Credit Hours.

Nearly two thirds of the United States is now considered overweight or obese and the associated medical costs are placing an unsustainable burden on our health care system. However, the issue of overweight/obesity extends beyond behavioral choices and medical costs. This course will take a deeper look at the complex interactions between our environment, behaviors, and policies, and how they jointly contribute to the obesity epidemic. This course will provide an interdisciplinary perspective of the biological, psychosocial, ecological, and economic determinants that contribute to obesity and the resulting pathways to chronic disease and disability. Finally, current evidence-based public health programs currently will be discussed to stimulate critical thinking necessary to implement effective obesity prevention and control programs.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 623. Determinants of Health and Health Disparities Across the Life Course. 3 Credit Hours.

This course builds on the concepts and methods examined in EPH 614, delving further into risk and protective processes related to health outcomes across the life course, from the prenatal period to older adulthood. Class readings and discussions will examine examples of common risk pathways contributing to various diseases, including pathways hypothesized to be related to health inequities and disparities, such as: economic and educational disadvantage, stress, sedentary behavior and poor behavioral regulation, social isolation. Common protective pathways that promote health are also reviewed, such as: positive parenting and family relations, and social support.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

EPH 625. Ethical Issues in Epidemiology. 3 Credit Hours.

The course identifies and analyzes ethical issues in epidemiologic practice and research. Issues include data acquisition and management, confidentiality, valid consent, advocacy, public policy, subgroup stigma, research sponsorship, conflicts of interest, communication of risk, and international and intercultural difference.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 631. Public Health Administration. 3 Credit Hours.

An overview of the historical background, philosophy, and purpose of public health. Relationship between government, law, and public health. Organization, management, and intergovernmental relationships of public health agencies in the United States at the federal, state, and local level. Basic principles of management, decision making, and prioritizing in public health are discussed. Overview of programs and services provided by public health organizations with emphasis on current public health issues and problems are also included. Open only to EPH majors.

Requisite: Must be in either Program Plan, BSTS, EPID, EPID1, PREV, MDRP.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPH 632. U.S. Health Systems. 3 Credit Hours.

This course provides an introduction to the multiple systems that define, describe, and shape the delivery of health care in the United States. Using case studies and presentations of major issues, this course will give the learner an appreciation of the dilemma confronting policy makers, providers, and patients: how to balance cost, quality, and access.

Requisite: Must be in either Program Plan, BSTS, EPID, EPID1, PREV, MDRP.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 639. Ecology and Control of Vector-Borne Diseases. 3 Credit Hours.

The course will provide students with an overview of the epidemiology of major vector-borne diseases in the U.S. (e.g., Lyme Disease, West Nile Virus) and globally (e.g., malaria, dengue, filariasis, leishmaniasis, and other arboviruses), field and lab-based methodologies for vector studies to incriminate vector species and assess transmission dynamics, vector and disease surveillance, and "cutting-edge" vector control technology. A major focus will be on the ecology of vectors in their local environments and how transmission dynamics are affected by changes in land use, urbanization, and climate. Students will learn about new WHO-approved strategies for integrated Vector Management (IVM) and how they are applicable for the prevention and control of all vector-borne diseases.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 640. Urban Environment and Public Health. 3 Credit Hours.

Where we live, where we work, where we go, and how we get there may all impact our behaviors and ultimately our health and well-being. This course examines the urban environment - in particular, those aspects of urban/suburban/semi-rural environments created by humans. This includes how homes, neighborhoods, cities and regions impact public health challenges such as obesity, chronic disease, mental health, infectious disease, and injuries. This course will teach students to translate scientific findings to design healthy communities, and develop interventions to promote urban health. Students will learn how to map neighborhood characteristics such as food outlets, parks and walkability, and to develop recommendations for policymakers.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPH 641. Aspects of Environmental Health. 3 Credit Hours.

Interdisciplinary scope of environmental health problems. Development of a practical, dynamic model for integrating fundamental concepts from a variety of environmental disciplines. Open only to EPH majors.

Requisite: Must be in either Program Plan, BSTS, EPID, EPID1, PREV, MDRP.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPH 643. Introduction to Occupational Health. 3 Credit Hours.

This course offers a general introduction to major concepts and issues in occupational health and safety from local to global, addressing fundamental topics and current controversies. The course covers core topics that prepare students to more fully understand and address occupational health issues: toxicology, exposure assessment, occupational epidemiology, risk assessment/risk management, prevention of workplace injury and disease, health promotion of adults and protection of worker populations from environmental hazards.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 644. Fundamentals of Program Evaluation. 3 Credit Hours.

Fundamentals of Program Evaluation was developed as a survey course directed specifically at providing an overview of the broad area of program evaluation. At its base, program evaluation is the investigator of a program's characteristics and merits. In context of health care, the purpose of program evaluation is to provide information in the effectiveness of programs or interventions so as to optimize the outcomes, efficiency and quality of health care. Evaluation of a program is an essential part of the successful implementation and conduct of any health care project or intervention, and should ideally be designed along with the project itself. Program evaluation activities can use a wide range of methodologies (e.g., qualitative, quantitative), analyze different aspects of a program (e.g., structure, activities, organization), and have a large number of intended outcomes (e.g., achievement or program's goals objectives, extent of program impact, program cost).

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 646. Climate and Health. 3 Credit Hours.

There is an intricate relationship between climate and health. Climate changes directly affect health and well-being but also mediate the effects of socio-physical and biochemical changes in the environment on health and well-being. This course will help students unravel this intricate relationship between climate and health. A range of topics will be covered including: a) the etiology of disease with respect to climate change, b) shifting burden of disease and disability with respect to changing climate and climate-mediated changes in the environment, and c) application areas of climate-health linkages: unintentional injuries and climate change, vector-borne disease and climate change, heat-related mortality, disease of metabolic syndrome and climate change, cardiopulmonary, allergy and immunology disease due to bioaerosols and air pollution.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPH 647. Community Based Participatory Research. 3 Credit Hours.

Community-based participatory research (CBPR) is methodology, increasingly popular in public health and other disciplines, which invites community collaboration throughout the research process from conceptualization of study focus to dissemination of findings. This course will provide an opportunity for medical and graduate students to better understand the process by which community members and academic researchers work collectively to address health disparities and influence social change.

Requisite: Must be in either Program Plan, BSTS, EPID, EPID1, PREV, MDRP.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 648. Climate, Cool Cities, Healthy Communities. 3 Credit Hours.

In the current era of climate change and rapid urbanization, an understanding of the impacts of urban design, planning and policies on climate and human health in urban and suburban areas is critical. Drawing on diverse disciplinary perspectives, including public health, architecture, planning, and public policy and government and non-profit sectors, the course provides students with the ability to comprehend, synthesize, communicate, and apply evidence-based urban design principles in relation to current and future challenges of climate and health. Additionally, in accordance with the adage, "Think globally, act locally," students will have the opportunity to interact with local experts who will share their knowledge of national and international policies and programs in the area of urban design, climate and health – while applying their learning to measure current challenges and inform policies of climate and health in the urban/suburban localities of the South Florida region.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 650. Health Economics for Evaluation and Policy. 3 Credit Hours.

This course centers on a discussion of the criteria used to evaluate the allocation of resources and analyze the behavior of two of the principal actors—consumers and firms. The principles of microeconomics are presented in the context of health care systems and markets. Numerous real-world issues and case studies are used to demonstrate economic decision-making techniques, especially for health care organizations and consumers.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPH 651. Research Methods. 3 Credit Hours.

Purpose of the course is to provide students with a sound understanding of the fundamental concepts and methods for conducting public health research. After a brief introduction to the philosophy of science, the major emphasis in the early portion of the course is on research conceptualization, design and measurement, with a particular focus on the logic of minimizing rival alternative explanations of finding for experimental and quasi-experimental studies.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPH 652. Health Policy. 3 Credit Hours.

Part I will examine seven models encompassing different perspectives on public health: philosophy, political theory and politics, law, economic, science and information culture and religion, and organization and management, including how they relate and their relevance in formulating, implementing, and evaluating public policy. Part II will examine the policy making process including how issues reach the government agenda, how laws are formulated, and how the process affects substance. Part III describes the core elements of policy analysis including: problem definition; background; political, economic, and social landscape; development of policy options; and recommendation. It will also include discussions of how to find and analyze documents and data as well as discuss the financing of health care.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

EPH 653. Leading Changes in Public Health. 3 Credit Hours.

This new transition course at the end of the second year will prepare students for their more advanced experiences in community and public health in the third and fourth years. The objective of this course is to provide students with an opportunity develop essential skills in leading change in public health while linking their academic work in epidemiology and public health for real world application in public health practice. Students will receive didactic presentations on topics such as leading change, interest based negotiation, and leading from the middle as well as lectures on the health disparities and the social determinants of health. These lectures will be integrated with interactive discussions and hands-on small group exercises to explore how practitioners can translate public health and community knowledge into sustainable solutions. Leading Change in Public Health Moving From Talk to Action will provide students with 21st century leadership skills that prepare them to tackle public health issues in our society from the most simple to very complex. Participants will be challenged to think differently on many levels and prepare them to be agents of change for future generations.

Prerequisite: MD/MPH Four Year/Regional Med Camp.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 655. Health Economics and Financing. 3 Credit Hours.

Health economics studies economic principles, methods of decision making, and the allocation of resources within health care systems and markets. This course will provide students with an understanding of the flow of funds and services throughout the U.S. health care system and how the structure and financing of health care impacts population health status. We will use numerous real-world issues and case studies to demonstrate economic decision-making techniques, especially for health care organizations and consumers (patients, providers). Students are not expected to have familiarity with economic concepts and principles prior to taking this course. In addition, students are not expected to use calculus in this course. However, students are expected to have an understanding of basic algebra, and graphical analysis will be used often throughout the class.

Prerequisite: MD/MPH Four Year/Regional Med Camp.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 656. Qualitative Research Methods. 3 Credit Hours.

The purpose of this course is to introduce students to the philosophical underpinnings of qualitative research and its practical application to the field of public health. Students will 1) develop an understanding of the significance and use of qualitative research methods in public health; 2) differentiate between numerous qualitative research approaches, including phenomenology, grounded theory, and ethnography; 3) describe different methods for collecting qualitative data, including interviews and focus groups; 4) develop skills in the collection, analysis and reporting of qualitative data; and 5) develop a basic understanding of how qualitative and quantitative research may be combined in mixed methodological approaches. The course will include a combination of lectures, presentations of applied qualitative research studies by guest experts, student presentations, and assignments designed to foster students' skills in formulating appropriate qualitative research questions, designing qualitative studies, collecting and analyzing qualitative data, and summarizing findings for publication. More specific details on the topics to be covered in this course are provided below.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 660. Public Health Seminar. 3 Credit Hours.

The Public Health Seminar is designed to explore contemporary issues, problems, and controversies in public health through an interdisciplinary perspective. Upon the completion of the course students will be able to: 1) understand key public health problems, their distribution, and prevention strategies, 2) examine the complex tapestry of social, economic, political, and environmental factors that affect public health outcomes, 3) understand the complexities inherent in improving health locally and on a global scale, 4) examine the major determinants of, and responses to, poverty and health, 5) analyze public health disparities through a social justice perspective, 6) understand and analyze the roles and agendas of major stakeholders in local, state, national, and global public health, 7) understand the link between global and local health issues, 8) discuss selected interdisciplinary, cross-cutting issues in public health, 9) explain the interrelationships among the five core areas of public health. This course is only open to MD/MPH students.

Prerequisite: MD/MPH Four Year/Regional Med Camp.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 661. Public Health Nutrition. 3 Credit Hours.

This course provides a dynamic, interactive approach to public health designed to prepare students in basic policy, epidemiology, and health education related to nutrition. Recognizing the multiple social, cultural, environmental, and physiological factors leading to nutritional disease. The course includes experts from a variety of disciplines. Public health nutrition addresses issues germane to the public's health by elucidating their extent, determinants and consequences, and the policies and programs to address them. Open only to EPH majors.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 662. Child Policy. 3 Credit Hours.

This course will focus on U.S. federal child policy. This course has been designed to provide a comprehensive, multi-disciplinary (e.g., public health, public policy and social work), and cross-sector perspective (e.g., government, private and philanthropic sectors) on child and family policies. Sessions will cover varying approaches and include presentations from a wide range of experts.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 663. Hospital Health Care Services and Access: An Interdisciplinary Inquiry. 3 Credit Hours.

Hospitals play a vital role in the health of the communities they serve. Yet, their accessibility and availability to those communities is often unequal, and significant racial and ethnic disparities exist in the utilization of hospital services, quality of care provided, health outcomes and patient experiences. Attention has been increasingly focused on creating sustainable solutions to attenuating these disparities. Initial steps include the examination of community and hospital data to identify inequalities in disease distribution, as well as utilization of care. Such data provides evidence to define critical areas of concern and provides a starting point for engagement with the community. The real work begins when hospitals work with community partners to engage in authentic and collaborative partnerships to address the needs and the health of the local citizens. This process, known as Community-Based Participatory Research (CBPR), can harness resources and build capacity to address health issues relevant to the community. This course will discuss the change that hospitals can achieve when they facilitate community-academic partnerships that bring together knowledge, expertise and interest of community partners with the research and training of clinicians and academic researchers.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 671. Maternal and Child Health. 3 Credit Hours.

Preventative and therapeutic concepts pertinent to the reduction of morbidity and mortality among mothers and their children.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 679. Learning Collaboratory. 3 Credit Hours.

This course is the first semester of a 4- semester program titled the "Public Health Learning Collaboratory". The mission of this Department of Public Health Sciences (DPHS) program is to transform the learning experience of master of public health students by providing opportunities to develop core skills necessary for effective public health practice, while completing their capstone or thesis in the community. Organized in small groups around 4 thematic areas, students learn about substantive areas (e.g., prevention with children and families, access to health care, urban health, health in Latin America), while building competencies to successfully develop and implement projects in collaboration with community health organizations (e.g., community engagement, needs and capacity assessments, researching evidence based practices, teamwork and problem-solving skills, project planning, development and implementation skills).

Components: LEC.

Grading: SUS.

Typically Offered: Fall.

EPH 680. Practical Field Experience. 3 Credit Hours.

Practical field experience requirement for MPH students. Students are placed in health-related settings (local, national, and international) to work on projects of mutual interest to both the field organization and the student.

Components: FLD.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

EPH 681. Capstone Experience Project. 3 Credit Hours.

The capstone project is intended to build upon EPH 680 field work and will provide students with an opportunity to apply public health academic theory and acquired skills to community health problems.

Components: LEC.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

EPH 684. Special Topics. 1-3 Credit Hours.

This course is designed to allow the listing of special topics within the Department of Epidemiology and Public Health and cross-list topics with other departments' offerings.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

EPH 698. MSPH Thesis Proposal. 3 Credit Hours.

This is an independent study course. Students in the MSPH track may register for this course with an approval from the Capstone Manager and the Faculty Advisor. The purpose of this course is to develop the MSPH Thesis Proposal, form a thesis committee with at least two members: 1st reader (an expert in the field) and 2nd reader (the faculty advisor) and obtain proposal approval from the committee members. This MHPH Thesis Proposal is required and must be approved prior to start data collection and analysis.

Components: THE.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

EPH 699. MSPH Thesis. 3 Credit Hours.

This is an independent study course. Students in the MSPH track may register for this course with an approval from the Capstone Manager and faculty advisor. The purpose of this course is to collect and analyze the data per thesis proposal, to prepare and write the thesis and deliver an oral presentation.

Components: LEC.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

EPH 700. Professional Development Seminar. 1 Credit Hour.

This course covers fundamental topic areas in professional development for PhD students in the public health sciences. Topic areas include: presenting research at conferences, writing manuscripts for publication, preparing the dissertation, the PhD comprehensive exams, effective teaching and mentoring, and getting a job in academia. Through interactive workshops, in-class exercises, brief presentations and assignments, students will have an opportunity to practice and strengthen necessary skills, including effective communication (oral and written), conflict resolution, and developing collaborations.

Requisite: Academic Program Plan:BSTS, EPID, PREV.

Components: LEC.

Grading: SUS.

Typically Offered: Fall & Spring.

EPH 701. Innovations in Prevention Science Methodology. 1 Credit Hour.

This course is a part of series "Innovations in Prevention Science Methodology" which covers specialized topics in prevention science that have been identified as innovating the field. This course section addresses cross-sectional and longitudinal data analyses related to finite mixture models. In general, we will cover various types of mixture distributions. Topics in finite mixture modeling include latent class (profile) analysis (with continuous and categorical variables), univariate and multivariate growth mixture analysis (with continuous and categorical variables), and model evaluations for these analytic methods. Mplus statistical software will be used. Students are expected to attend all classes and to complete all assignments.

Prerequisite: PSY 633 with a B or Higher. and Requisite: Plan BSTS or EPID or EPID1 or PREV or MDRP.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPH 703. Advanced Statistical Methods I. 4 Credit Hours.

Advanced statistical methods used in analyzing data from epidemiologic investigations. Topics include Mantel-Haenszel chi-square, interaction, standardization of rates, incidence density, logistics regression, and other special topics.

Prerequisite: EPH 601.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPH 705. Advanced Statistical Methods II. 3 Credit Hours.

Continuation and elaboration of EPH 703. Advanced statistical methods used in analyzing data from epidemiologic investigations. Topics include Kappa statistics, life tables, survival analyses, logistic regression, Poisson regression, log linear models, clusters, meta-analysis, and other special topics.

Prerequisite: EPH 703.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 711. Cancer Epidemiology. 3 Credit Hours.

This course covers the basic epidemiology of cancer. Major sites and exposures are stressed, highlighting descriptive, etiologic and preventive aspects. A major course project and one final exam are included.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPH 717. Integrating Behavior Health Theories and Models. 3 Credit Hours.

This course is designed to provide an opportunity for synthesis and integration of knowledge regarding the phenomenon of health behavior. The focus is on critical examination of theoretical and empirical work in the area of health behavior from a public health perspective.

Prerequisite: EPH 617 or EPH 620.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPH 720. Cardiovascular Disease Epidemiology and Prevention. 3 Credit Hours.

Course aims to teach and train MPH students in the epidemiology and prevention of cardiovascular and cerebrovascular diseases which are the leading causes of morbidity and mortality among the adult U.S. population. Essential knowledge for those working in the area of public health is emphasized.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 723. Epidemiology and Public Health Aspects of Diabetes Mellitus. 3 Credit Hours.

This course presents an overview of the epidemiology and public health impact of an important chronic disease, diabetes mellitus (DM). Topics include the classification and descriptive epidemiology of DM and associated health complications, disease screening, evaluation of risk factors, methodological issues associated with DM research, DM among special populations, and the public health impact of DM in the U.S.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 724. Molecular and Genetic Epidemiology. 3 Credit Hours.

This course covers the theoretical concepts and practical issues involved in conducting molecular and genetic epidemiology research involving human populations. Specifically, students will learn about: molecular and genetic technology; evaluating disease-associated genes, and their interaction with environmental factors; clinical research; and data mining techniques. Ultimately, students will develop a framework for study design, statistical power and sample consideration, assay evaluation and validation, and data interpretation using molecular and genetic epidemiology tools in their research.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 727. Climate, Environment, and Health: Data Integration and Management. 3 Credit Hours.

The course will introduce: a) different research designs needed to understand the linkages between climate/weather and health, and b) sources and types of data needed for different research designs. The course will train students in: a) the integration and management of weather/climate, environment and health data sets that have different spatiotemporal scales, b) assessment of errors and uncertainty in the collocation of these data sets, and c) visualization, interpretation and presentation of these data sets, including covariance structure in these data sets.

Prerequisite: EPH 601.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 728. Social Epidemiology. 3 Credit Hours.

This course provides an overview and understanding of key concepts and theoretical frameworks relevant to the study of social determinants of population health and health disparities. The interdisciplinary course will cover methodological considerations and methods relevant to the field of social epidemiology, such as lifecourse epidemiology and multilevel determinants of health. A major emphasis will be on biological pathways by which social factors "get under the skin", and the role of social policies in improving population health. The course will involve lectures, presentation of epidemiologic research by faculty researchers, class discussions, and class projects.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 731. Developing, Adapting and Evaluating Interventions. 3 Credit Hours.

This course builds on the substantive and methodological competencies acquired in preceding prevention science courses by preparing students to develop and adapt preventive interventions.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPH 732. Introduction to Dissemination and Implementation Science. 3 Credit Hours.

This course provides an introduction to the theory and practice of Dissemination and Implementation (D&I) Sciences. Topics include the importance and language of D&I science; designs, methods and measures; differences and similarities across clinical, public health, and policy settings; selected tools for D&I research and practice; and future issues. The focus of this course will be on implementing prevention programs, strategies and policies that are ready for application, testing and scale up, rather than developing interventions from scratch.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 740. Basic Pathology and Patho-physiology. 3 Credit Hours.

The course emphasizes basic patho-physiological mechanisms and diseases of particular interest to students of public health. Students obtain an understanding of basic pathological processes, nomenclature of pathological findings, and common natural and unnatural diseases affecting various body systems. Observations of autopsies and the gross pathology of selected organs are also incorporated in the course.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPH 751. Survival Analysis in Clinical Trials. 3 Credit Hours.

Statistical methods for analysis and interpretation of survival data arising from clinical trials. Topics include survival curves, estimation of sample size, survival curves, proportional-hazard models, time dependent variables, and prognostic indices.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 752. Advanced Research Methods. 3 Credit Hours.

This is a survey course in advanced quantitative methods for research and evaluation in prevention science. The course will provide students with an introduction to research methodology, matching research questions to specific methods, applying methods to real world data, and presenting the application of a method to a broader audience.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPH 774. Epidemiologic Methods and Reasonings. 3 Credit Hours.

This course will discuss epidemiological methods (e.g., study designs) and concepts (e.g., confounding, bias, interaction, random error) required to evaluate the totality of evidence in etiologic research. It will also discuss theoretical models of etiologic research and techniques for quantifying the magnitude of disease or other health indicators as well as the magnitude of study errors specific to study designs.

Prerequisite: EPH 601 and 621. And pre or corequisite: EPH 602.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPH 776. Methods in Epidemiology. 3 Credit Hours.

This course will discuss principles of epidemiologic methods. Introduction to causal inference and advanced epidemiologic topics will be covered.

This course will be theoretical and quantitative and will include, when applicable, illustrative data examples using various statistical softwares.

Prerequisite: EPH 601 and 621. And pre or corequisite: EPH 602.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 782. Advanced Individual Study. 1-3 Credit Hours.

Individual work on a special project under faculty guidance.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

EPH 825. Continuous Registration--Master's Study. 1 Credit Hour.

To establish residence for MPH students who are preparing for project presentation. Credit not granted. Regarded as full time residence.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

EPH 830. Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the PhD. The student will enroll for credit as determined by his/her advisor.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

EPH 840. Doctoral Dissertation- Post Candidacy. 1-12 Credit Hours.

Required of all candidates for the PhD. The student will enroll for credit as determined by his/her advisor.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

EPH 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the PhD, after the student has been enrolled for the permissible cumulative total in appropriate doctoral research.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Estate Planning

EPL 901. Elderlaw. 1 Credit Hour.

Requisite: Plan of Estate Planning or JD/ LLM EP.

Components: LEC.

Grading: GRD.

EPL 903. Ethical and Practical Aspects of Estate Planning. 1 Credit Hour.

Requisite: Plan of Estate Planning or JD/ LLM EP.

Components: LEC.

Grading: GRD.

EPL 904. Fiduciary Administration. 1 Credit Hour.

Requisite: Plan of Estate Planning or JD/ LLM EP.

Components: LEC.

Grading: GRD.

EPL 905. Asset Protection. 1 Credit Hour.

Requisite: Plan of Estate Planning or JD/ LLM EP.

Components: LEC.

Grading: GRD.

EPL 908. Marital Deduction Planning. 1 Credit Hour.

Requisite: Plan of Estate Planning or JD/ LLM EP.

Components: LEC.

Grading: GRD.

EPL 909. Multinational Estate Planning. 1 Credit Hour.

Requisite: Plan of Estate Planning or JD/ LLM EP.

Components: LEC.

Grading: GRD.

EPL 910. Federal Income Tax, Trusts, and Estates. 3 Credit Hours.

Requisite: Plan of Estate Planning or JD/ LLM EP.

Components: LEC.

Grading: GRD.

EPL 911. Corporate Tax. 2 Credit Hours.

Requisite: Plan of Estate Planning or JD/ LLM EP.

Components: LEC.

Grading: GRD.

EPL 912. Charitable Gifts and Foundations. 1 Credit Hour.

Requisite: Plan of Estate Planning or JD/ LLM EP.

Components: LEC.

Grading: GRD.

EPL 913. Tax Procedure. 1 Credit Hour.

Requisite: Plan of Estate Planning or JD/ LLM EP.

Components: LEC.

Grading: GRD.

EPL 915. Chapter 14. 1 Credit Hour.

Requisite: Plan of Estate Planning or JD/ LLM EP.

Components: LEC.

Grading: GRD.

EPL 920. Valuation. 1 Credit Hour.

Requisite: Plan of Estate Planning or JD/ LLM EP.

Components: LEC.

Grading: GRD.

EPL 924. Planning for the Family Business. 1 Credit Hour.

Requisite: Plan of Estate Planning or JD/ LLM EP.

Components: LEC.

Grading: GRD.

EPL 925. Drafting for Estate Planners. 1-2 Credit Hours.

Requisite: Plan of Estate Planning or JD/ LLM EP.

Components: LEC.

Grading: GRD.

EPL 926. Generation-Skipping Transfer Tax. 1 Credit Hour.

Requisite: Plan of Estate Planning or JD/ LLM EP.

Components: LEC.

Grading: GRD.

EPL 928. Introduction to the Probate Process. 1 Credit Hour.

Requisite: Plan of Estate Planning or JD/ LLM EP.

Components: LEC.

Grading: GRD.

EPL 929. Life Insurance. 1 Credit Hour.

Requisite: Plan of Estate Planning or JD/ LLM EP.

Components: LEC.

Grading: GRD.

EPL 930. Planning for Distributions from Qualified Plans, IRAs, and Non-Qualified Plans. 1 Credit Hour.

Requisite: Plan of Estate Planning or JD/ LLM EP.

Components: LEC.

Requisite: Plan of Estate Planning or JD/ LLM EP.

Components: LEC.

Grading: GRD.

Executive and Special Programs (ESP)

ESP 500. Review Module. 0 Credit Hours.

A non-credit review session to provide students with the skills necessary to prepare for the successful completion of the common body of knowledge courses.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ESP 560. Fundamentals of Marketing. 3 Credit Hours.

Marketing problems experienced by top executives are examined. Fundamental problem-solving concepts are developed. Students consider problems of consumer needs, product planning, promotion, distribution, and pricing. The discovery and application of marketing management skills are developed through the use of cases and a major planning project.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

Finance Business Administration (FIN)

FIN 300. Fundamentals of Finance for Non-Finance Majors. 3 Credit Hours.

This course provides an overview of modern finance for non-business majors. Topics include: how financial markets work, understanding financial pages in newspapers and the Internet, how stock and bond prices are determined, how investment portfolios are structured, concepts of risk and return, how companies manage their cash and investments and international finance. Not for credit for business students.

Requisite: Non Business Majors.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 302. Fundamentals of Finance. 3 Credit Hours.

Introduction to the basic tools and concepts in finance. This is the core class in finance for our undergraduate program. Topics include the financial framework of a business entity, taxes, the time value of money, capital market theory, financial risk measures, and capital budgeting. Note: to be eligible to major in finance, a student must earn a grade of B or higher in this class (a grade of B- does not qualify).

Prerequisite: ECO 211 and ACC 211 and MAS 201 or MAS 311 or MTH 224 or IEN 311 or IEN 310 or PSY 292.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FIN 303. Intermediate Financial Management. 3 Credit Hours.

This course provides an overview of financial decision-making by corporations. Building on topics covered in the introductory finance classes, this course develops the foundations of optimal financial policy and applies these principles to corporate financial decision-making including capital structure, capital budgeting, dividend policy, leasing, securities issuance and the role of investment banks, and mergers and acquisitions. Note: a student must have obtained a B or higher grade in FIN302 to major in Finance. Earning an A in this class or any other class or classes does not eliminate that requirement.

Prerequisite: FIN 302.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 308. Intermediate Financial Management for Entrepreneurs. 3 Credit Hours.

This course is primarily for students majoring in entrepreneurship. It provides an overview of financial decision-making by entrepreneurs. Building on topics covered in the introductory finance classes, this course develops the foundations of optimal financial policy and applies these principles to entrepreneurial financial decision-making involved with such things as capital structure, working capital budgeting, leasing, hedging and risk management, securities issuance and the role of investment banks, and mergers and acquisitions. Note: Students cannot take both FIN 308 and FIN 303, so this class is not open to students who have taken FIN 303.

Prerequisite: FIN 302.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

FIN 320. Investment and Security Markets. 3 Credit Hours.

This course introduces students to both practical and theoretical aspects of investment with an emphasis on financial markets. Topics include valuation of financial securities such as stocks, bonds and options; modern portfolio theory; the process and institutional characteristics of investing. Note that this course does not address the details of individual security valuation and selection, i.e., this course is not about stock picking or about how to get rich by investing in the markets. Instead, this course attempts to help you develop a lasting conceptual framework in which to view the investment process and to analyze future ideas and changes in investment environment. This class is essential to any student considering a finance concentration. Note: A student must have obtained a B or higher in FIN302 to major in Finance. Earning an A in this class or any other class or classes does not eliminate this requirement.

Prerequisite: FIN 302.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FIN 330. International Finance. 3 Credit Hours.

This course applies the principles of finance to international business decisions. Topics include the analysis of foreign exchange rates, balance of payments, characteristics and use of international financial institutions and instruments, the analysis and management of financial risk in the international environment, and financing multinational corporations. Note: a student must have a B or higher in FIN 302 to major in International Finance and Marketing (or Finance). Earning an A in this class or any other class or classes does not eliminate this requirement.

Prerequisite: FIN 302.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FIN 340. Real Estate Principles. 3 Credit Hours.

This course provides an introduction to basic principles and fundamental practices in the real estate industry. Students learn how to apply the principles of finance to the real estate industry. Topics include common institutional aspects, brokerage, contracting, financing, ownership, management, valuation, appraisal, and investment analysis.

Prerequisites: FIN 302 or FIN 300.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 344. Real Estate Investment Analysis. 3 Credit Hours.

This course introduces the theoretical concepts and analytical techniques used to make a decision to purchase an ownership interest in a commercial real estate project. There is heavy reliance on Excel applications. Each student will complete a written evaluation and investment analysis of an existing or proposed commercial real estate project in Miami-Dade, Broward or Monroe County.

Prerequisite: FIN 302 and FIN 320 or FIN 303 OR Co-requisite: FIN 320 or FIN 303.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FIN 347. Introduction to ARGUS. 1 Credit Hour.

ARGUS software is used extensively in the development, financing and management of commercial real estate, especially in the office, industrial and retail sectors. The introduction to ARGUS class exposes the student to the basic concepts and terminology in the commercial real estate market and to the typical inflows and outflows an owner who invests in real estate faces over the life of the investment.

Prerequisite: FIN 302.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 348. Advanced ARGUS. 1 Credit Hour.

At the end of the Advanced ARGUS class the student will be able to assess the viability of detailed rent and operating expense assumptions, make decisions about the impact of financing on investor returns and critically evaluate the investment potential of leveraged office and retail property.

Prerequisites: FIN 302 and FIN 347.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

FIN 355. Smif Fund Analyst I. 1 Credit Hour.

The course is designed to introduce the student to the investment management process, including valuation of publicly traded equities. The course is one credit and meets once a week each semester; students must commit to and enroll in the follow-up class. Admission to the course is through a competitive application process.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 356. Smif Fund Analyst II. 1 Credit Hour.

This course is designed to introduce the student to the investment management process, including valuation of publicly traded equities. The course is one credit and meets once a week each semester. Enrollment in the course is limited.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 404. Applications in Corporate Finance. 3 Credit Hours.

An application of the concepts and tools of corporate finance. Primary emphasis on analyzing real-world cases dealing with liquidity issues, capital budgeting, firm valuation, advanced corporate financing, hedging with options and futures, corporate financial strategy, and other current issues in corporate finance.

Prerequisites: FIN 302, FIN 303.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

FIN 405. Financial Modeling. 3 Credit Hours.

This course takes a variety of finance topics, which have been covered in the prerequisite courses, and implements them using practical spreadsheet models. Students will use the internet and financial databases to obtain input data for their models. Students will use Visual Basic for Applications (VBA) and design functions and macros to enhance their models. Students must have a solid working knowledge of Windows and Excel, as well as a good understanding of the material taught in the prerequisite finance classes. Students must have a mobile (lap-top) computer with the capability to run Windows-based software.

Prerequisites: FIN 302, FIN 303, FIN 320.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 408. Introduction to Mergers and Acquisitions. 3 Credit Hours.

This course introduces students to the world of mergers and acquisitions (M&A). More specifically, the course is designed to develop an understanding of (i) the economic, financial, and strategic issues involved in the acquisition of a (public or private) company; (ii) the analytical tools used to value an acquisition target; and (iii) academic research that reports results from large samples of M&A deals. Students will apply their understanding of these issues by analyzing various actual and potential acquisitions.

Prerequisites: FIN 302, FIN 303.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FIN 409. Introduction to Private Equity and Venture Capital. 3 Credit Hours.

In this course, you will learn about the private equity (PE) industry, composed of both venture capital (VC) and buyouts (BO). The focus is on how PE investors evaluate, select, value, and structure deals. This course has several goals. First, the course will deepen your current understanding of corporate finance by applying key concepts and tools to a new and increasingly important industry. Second, the course seeks to introduce you to the institutions of the PE industry. This involves examining, for example, how funds are raised and how term sheets are structured. Finally, a goal is to understand the valuation process used by PE investors.

Prerequisites: FIN 302 and FIN 303 or FIN 308.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

FIN 410. Financial Institutions and Markets. 3 Credit Hours.

This course examines financial institutions, such as banks (commercial, investment, mortgage, savings), credit unions, insurance companies, pension funds, and mutual funds and the money markets in which they operate, and focuses on why they exist and how to manage them. Topics include financial intermediation and transmutation, monetary theory and policy, Federal Reserve management of the money supply, velocity of money, fiscal theory and policy, interest rates, and immunization.

Prerequisites: FIN 302 and FIN 320.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 411. Commercial Bank Management. 3 Credit Hours.

This course introduces the theory and practice of asset-liability management by large publicly traded commercial banks, including the fundamental principles of structuring loans into balance sheets. A major objective of this class is to provide students sufficient background to enter the credit department in the executive development program of major money center bank.

Prerequisites: FIN 302 and FIN 320.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 412. Financial Planning and Wealth Management. 3 Credit Hours.

This course examines the investment and financial issues arising from financial planning and personal wealth management activities. It covers various topics required for the construction of a comprehensive financial plan including the identification of client financial status and goals, asset allocation, securities trading, managed funds, tax planning, risk management and insurance, and estate planning.

Prerequisites: FIN 302 and FIN 320.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 415. Trading and Markets. 3 Credit Hours.

This course provides an introduction to the functioning of financial markets and the fast changing field of market microstructure. On the equity trading side, the course covers major exchanges such as NYSE Euronext and Nasdaq OMX, and new players such as BATS and Direct Edge/ISE. Students also learn about dark pools, options and futures exchanges, electronic bond trading platforms, and currency trading systems. In addition, the course provides a summary of different market structures, the role of market participants, different order types, trading strategies, and trading externalities. The course draws on theories and tools from economics and behavioral finance, current institutional practices and market regulation.

Prerequisites: FIN 302 and FIN 320.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FIN 421. Investment Portfolio Management. 3 Credit Hours.

This course provides an introduction to quantitative active management of equity portfolios. The course begins with a discussion on the sources of stock market inefficiencies. The course then covers the five key dimensions of the quantitative portfolio management process: forecasting relative stock returns using quantitative signals, measuring portfolio risk relative to a benchmark, portfolio optimization, controlling transaction costs, and measuring and evaluating portfolio returns. The course focuses on practical application and relies heavily on experiential learning and Excel spreadsheets.

Prerequisites: FIN 302 and FIN 320.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

FIN 422. Speculative Markets and Derivatives. 3 Credit Hours.

This course is an introduction to derivative securities, and examines the nature of derivatives and applications of such instruments in investment and corporate settings. The emphasis is on derivatives of equity-based securities (such as stocks and stock indices), but coverage includes derivatives of debt-based securities (such as Treasury and Eurodollar securities). Topics include options, futures, forwards, and other derivatives, such as options on futures, foreign currency derivatives, swaps, exotic options, real options, as well as financial engineering using derivatives.

Prerequisites: FIN 302, FIN 303, FIN 320.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 423. Introduction to Alternative Investment. 3 Credit Hours.

The objective of this course is to provide an introduction to alternative financial instruments and how capital market participants utilize them. The course covers a large set of investment choices, with a specific focus on fixed income and alternative instruments, such as commodities, interest rates and currency. While covering each instrument, the course also examines with how macro-economic, technological, labor market, taxes and regulatory issues affect specific investment decisions.

Prerequisites: FIN 302 and FIN 320.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

FIN 425. Business and Security Valuation. 3 Credit Hours.

Applications of finance theory to the problem of valuing public and non-public companies. Multiplier models, discounted cash flow analysis, and the strengths and weaknesses of traditional security valuation methods are addressed in detail. Financial spreadsheet programs and data sources are an integral part of the course.

Prerequisites: FIN 302 and FIN 320.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 427. Fixed Income Markets and Analysis. 3 Credit Hours.

This course examines financial markets that trade fixed income securities. A fixed income security is based primarily on a debt contract, such as a bond, debenture, note or Treasury bill. Topics include the valuation, computation of return, and computation of various measures of risk for fixed income securities, as well as the analysis of the term structure of interest rates and various option features commonly included in debt contracts and fixed income securities. Students must have a solid working knowledge of Excel to take this class.

Prerequisites: FIN 302 and FIN 320.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 431. International Financial Management. 3 Credit Hours.

This is an advanced class in international finance from the viewpoint of multi-national organizations, including corporations, investment banks, and commercial banks. Topics include managing the various sources of risk, such as economic, political, and currency; cash receivables, inventory, and payables management; financing; transfer pricing; taxation; currency netting; capital budgeting; and hedging.

Prerequisites: FIN 302, FIN 320, FIN 330.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 444. Real Estate Investment Analysis. 3 Credit Hours.

This course introduces the theoretical concepts and analytical techniques used to make a decision to purchase an ownership interest in a commercial real estate project. There is heavy reliance on Excel applications and the use of the Argus database that is a standard resource in the commercial real estate market. Each student will complete a written evaluation and investment analysis of an existing or proposed commercial real estate project in Miami-Dade, Broward or Monroe County.

Prerequisites: FIN 302, FIN 303 or FIN 320.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 445. Real Estate Finance. 3 Credit Hours.

This course introduces the theoretical concepts and analytical techniques used to make a decision to finance the purchase or development of a commercial real estate project. There is heavy reliance on Excel applications and the use of the Argus database that is a standard resource in the commercial real estate market. Students are also encouraged to use their semester projects to apply for one of the numerous case competitions.

Prerequisite: FIN 344.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

FIN 446. Real Estate Market Analysis. 3 Credit Hours.

This course is an introduction to the fundamental concepts of real estate market analysis. The major topics to be covered include site analysis, economic-demographic, supply and demand analyses. This course shall also include a global perspective of real estate market analysis. This shall be accomplished by means of conducting portions of a market analysis for foreign cities of your individual choosing.

Prerequisite: Or Corequisite: FIN 344.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 456. Behavioral Finance. 3 Credit Hours.

The goal of this course is to expose you to selected topics from the upcoming field of behavioral finance. This will include a discussion of prospect theory and different types of behavioral biases such as representativeness, disposition effect, overconfidence, narrow framing, familiarity bias, and the house-money effect. In addition, the course will cover the implications of behavioral biases for asset pricing, corporate finance, and the overall macro-economy. Simple experiments will be conducted in class to illustrate some key behavioral concepts.

Prerequisites: FIN 302, FIN 303, FIN 320.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FIN 457. Smif Fund Portfolio of Instructor. 1 Credit Hour.

The course is designed to introduce the student to the investment management process, including the tools used to compose a diversified portfolio that covers each of the major industrial sectors. The course is one credit and meets once a week each semester. Enrollment in the course is limited.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 458. Smif Fund Portfolio Manager II. 1 Credit Hour.

The course is designed to introduce the student to the investment management process, including the management of an investment organization and the evaluation of portfolio performance. The course is one credit and meets once a week. Enrollment in the course is limited.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 496. Directed Studies in Finance. 1-3 Credit Hours.

Supervised readings, individual research project, or independent investigation of selected non-STEM related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 497. Directed Studies in Finance. 1-3 Credit Hours.

Supervised readings, individual research project or independent investigation of selected STEM-related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.

Components: THE.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 498. Special Topics in Finance. 3 Credit Hours.

Special topics in selected non-STEM areas of Finance.

Requisite: Sophomore Standing or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 499. Special Topics in Finance. 3 Credit Hours.

Special topics in selected STEM areas of Finance.

Requisite: Sophomore Standing or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 555. Finance Departmental Honors Research Project. 3 Credit Hours.

Research project to fulfill requirements for Departmental Honors in Finance.

Components: THI.

Grading: SUS.

Typically Offered: Offered by Announcement Only.

FIN 602. Fundamentals of Finance. 3 Credit Hours.

This is a core MBA course in our executive MBA program, devoted primarily to the area of finance. No prior background in finances is assumed. The course objective is to provide students with a conceptual framework for appreciating and understanding the problems facing the financial manager.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FIN 603. Advanced Corporate Finance. 3 Credit Hours.

Applications in corporate finance. This class builds on the core MBA courses in our executive MBA program, especially Fundamentals of Finance (Finance 602). Topics include working capital management, financial planning, basic option valuation, agency theory, capital structure management, mergers and acquisitions, liabilities management and leasing. Note: required for Finance concentration.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FIN 613. Intermediate Corporate Finance and Investments. 4 Credit Hours.

Prerequisite: BUS 640.

Components: DIL.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FIN 614. International Finance, Valuation, and Financial Statement Analysis. 4 Credit Hours.

Prerequisites: BUS 640 and FIN 613.

Components: DIL.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FIN 615. Financial Decision Making. 4 Credit Hours.

Prerequisites: BUS 640 and BUS 613 and FIN 614.

Components: DIL.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FIN 616. Advanced Corporate Finance. 4 Credit Hours.

Prerequisites: BUS 640 and BUS 613 and FIN 614.

Components: DIL.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FIN 617. Derivatives and Financial Modeling. 4 Credit Hours.

Prerequisites: BUS 640 and BUS 613 and FIN 614.

Components: DIL.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FIN 618. Quantitative Finance and Microstructure. 4 Credit Hours.

Prerequisites: FIN 613 and FIN 614.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FIN 619. Advanced Portfolio Management and Alternative Investments. 4 Credit Hours.

Prerequisites: FIN 613 and FIN 614.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FIN 620. Investment Analysis. 3 Credit Hours.

This course deals with theory and application of investment analysis. Topics include general stock trading, portfolio and risk-return theory, models of stock valuation, portfolio diversification, market efficiency, options and futures, bond valuation and bond portfolio strategy, general commodity investing, and personal financial planning.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FIN 621. Portfolio Construction and Management. 3 Credit Hours.

The evolution of portfolio theory and practice and its role in modern investment management. Individual constraint models within the general capital market theory are included as well as empirical evidence, theoretical discussion, and practical exercises.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 622. Financial Options and Futures. 3 Credit Hours.

Study of the theoretical development of models for pricing contingent claims in the field of finance. Application of theoretical results to the hedging of current and future assets and liabilities and to speculative strategies for the risk-averse, profit-maximizing entity are included.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 630. International Finance. 3 Credit Hours.

The financing of international trade and capital placements. Restrictions on capital retrieval and problems of international liquidity related to the U.S. and non-U.S. firms is discussed as well as current developments in international banking, theory, and policy. Cases involving foreign capital commitments and transactions, especially Latin America are also included.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 631. International Financial Management. 3 Credit Hours.

Sources and uses of long and short term capital for international business applications and foreign currency markets. Financial decisions associated with international cash and capital budgeting, capital repatriation and taxation strategies, capital exposure and coverage, and multinational firm financial strategies are discussed. Lectures and cases are included.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 641. Valuation and Financial Decision Making. 2 Credit Hours.

Basic financial valuation. This is one of the core classes in finance for our regular MBA program. Topics include the financial environment; the time value of money; capital market efficiency; basic security valuation; risk, return and asset pricing; cost of capital; and an introduction to capital budgeting.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 642. The Financial Environment. 2 Credit Hours.

A continuation of FIN641, with an emphasis on important issues faced by corporate financial managers responsible for financing and investment decisions. Core topics include capital structure, payout policy, advanced capital budgeting, basic derivative and real option valuation, leasing, and investment banking. Specialized topics, such as behavioral finance, international finance, mergers and acquisitions, and risk management may also be introduced as the course progresses.

Prerequisite: FIN 641.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 643. Quantitative Finance and Market Microstructure. 2 Credit Hours.

This course aims to give simple yet useful quantitative finance tools, and a broad overview of the functioning of modern financial markets, to students wishing to broaden their knowledge of finance. The first part of the course exposes students to the microstructure of financial markets. We will learn about different trading mechanisms encountered in financial markets today, how information affects prices and liquidity, what algorithms practitioners use to implement their trading strategies, and some basic models of how dealers react to information. The second part of the course introduces students to statistical models commonly encountered in quantitative finance. We'll have a hands-on approach, and learn how to estimate the models with real financial data using Excel and the statistical software R.

Prerequisite: FIN 642 or FIN 602.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FIN 644. Real Estate Investment and Appraisal. 2 Credit Hours.

This course will introduce students to the theoretical concepts and analytical techniques used to make a decision to purchase an ownership interest in a commercial real estate project. There is heavy reliance on Excel applications and the use of the ARGUS software that is a standard resource in the commercial real estate market.

Prerequisite: FIN 641.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FIN 645. Real Estate Finance. 2-3 Credit Hours.

This course will introduce students to the theoretical concepts and analytical techniques used to make a decision to loan money for the purchase or development of a commercial real estate project. Students will complete projects that require them to evaluate the financing and investment potential of a small commercial site of their choice and to evaluate a lease vs. buy decision using a plot of land in Miami-Dade County from the perspective of a publicly-traded corporation.

Prerequisite: FIN 641.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

FIN 646. Real Estate Market Analysis. 2 Credit Hours.

The course aims to provide students with an understanding of the functioning of markets for urban space, and their role in real estate investment decisions. The course first treats urban-economic processes involved in the determination of prices for space, in a theoretical and empirical context. This economic understanding is then put to use on several case studies of market- and site- analysis for various land uses.

Prerequisite: FIN 641.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

FIN 647. Introduction to ARGUS. 1 Credit Hour.

ARGUS software is used extensively in the development, financing and management of commercial real estate, especially in the office, industrial and retail sectors. The introduction to ARGUS class exposes the student to the basic concepts and terminology in the commercial real estate market and to the typical inflows and outflows an owner who invests in real estate faces over the life of the investment.

Requisite: Limited to Accelerated Real Estate MBA Students.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 648. Advanced ARGUS. 1 Credit Hour.

At the end of the Advanced ARGUS class the student will be able to assess the viability of detailed rent and operating expense assumptions, make decisions about the impact of financing on investor returns and critically evaluate the investment potential of leveraged office and retail property.

Prerequisite: FIN 647.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

FIN 649. Non-Profit Consulting Project. 1-4 Credit Hours.

This course is designed for students completing the Accelerated MBA in Real Estate. The course allows graduate students in real estate to synthesize and apply the concepts learned in real estate coursework to a real-life problem where the results will benefit a local organization in the non-profit sector. The supervising professor guides the students' efforts but the course topics and resources are driven by client needs and students skills.

Requisite: Limited to Accelerated Real Estate MBA Students.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FIN 650. Financial Investment. 2 Credit Hours.

This course builds on FIN 641 and FIN 642 to provide a more advanced knowledge of the field of investments, particularly important statistical concepts for investments, portfolio construction, asset pricing, and behavioral biases affecting financial decisions. The course is quantitative and introduces students to Excel as a tool to form and rebalance portfolios.

Prerequisite: FIN 642 or FIN 602.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 651. Advanced Topics in Investments. 2 Credit Hours.

The course provides an introduction to quantitative active management of equity portfolios. The course begins with a discussion of market (in)efficiency, then covers the five key dimensions of the quantitative portfolio management process: using signals ("factors") to forecast returns; measuring risk; portfolio optimization; controlling costs; and performance evaluation.

Prerequisite: FIN 650.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 652. Fixed Income Securities. 2 Credit Hours.

This course builds on FIN641/642 (or BUS640) and FIN650 and covers trading and valuation of a wide variety of fixed income securities including corporate, municipal, and Treasury pure discount bonds, coupon bonds, floating rate notes, bond embedded options, mortgages, interest rate swaps, currency swaps, equity swaps, and interest rate options. The course focuses on analytic tools used in bond portfolio management and interest rate risk management. These tools include spot rates, forward rates, credit spreads, duration and convexity, yield curve construction, and term structure models.

Prerequisite: FIN 642 or FIN 602 or FIN 650.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

FIN 653. Alternative Investments. 2 Credit Hours.

The course provides an advanced theoretical and practical understanding of various alternative investment strategies, with a specific focus on currency markets, derivatives (e.g., interest rate and credit derivatives), venture capital and private equity investments, and real estate investments. The course also examines how macro-economic, technological, labor market, taxes and regulatory issues affect specific investment decisions. In addition, the students learn about valuation, investment and risk management strategies of sophisticated investors and recent chronology of events that affect market participants.

Prerequisites: FIN 641 and FIN 642 and FIN 650.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

FIN 655. Smif Fund Analyst I. 1 Credit Hour.**Components:** LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.**FIN 656. Smif Fund Analyst II. 1 Credit Hour.****Components:** LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.**FIN 657. Smif Fund Portfolio Manager I. 1 Credit Hour.****Components:** LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.**FIN 658. Smif Fund Manager II. 1 Credit Hour.****Components:** LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.**FIN 660. International Finance. 2 Credit Hours.**

This course builds on FIN 641 and 642, and introduces students to the concepts that are important in today's dramatically changing global economy. The course covers the international monetary system; the interrelationship between national economies through the balance of payments; the economic relationships that determine a currency's value relative to other currencies and influence international trade and cross-border investment; the foreign exchange market structure and instruments; and the international debt and equity markets.

Prerequisite: FIN 642 or FIN 602 or BUS 630.**Components:** LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.**FIN 661. Advanced Topics in International Finance. 2 Credit Hours.**

This course builds directly on FIN 660 using a variety of techniques, including group projects and class discussion. A number of special topics are covered such as financing the multinational firm, currency swaps, international portfolio investment, international asset pricing, multinational capital budgeting and cross-border investment, and measuring and managing the many additional risk exposures faced by a multinational enterprise.

Prerequisite: FIN 660.**Components:** LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.**FIN 663. Ad Corporation Fin. 3 Credit Hours.****Components:** LEC.**Grading:** GRD.**FIN 668. Wealth Management and Financial Planning. 1-4 Credit Hours.**

This course examines the investment and financial issues arising from financial planning and personal wealth management activities. It covers various topics required for the construction of a comprehensive financial plan including the identification of client financial status and goals, asset allocation, securities trading, managed funds, tax planning, risk management and insurance, and estate planning.

Prerequisite: FIN 641 and FIN 642.**Components:** LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.**FIN 670. Corporate Finance. 2 Credit Hours.**

The course serves as a complement and supplement to 641 and 642 and builds up to more advanced topics in corporate finance. The course will quickly review some basic concepts like net present value and build up to special topics like real options, valuation, mergers and acquisitions and corporate governance. The main objective of the class is that students understand basic corporate finance concepts as well as develop a good understanding of how complicated firm level decisions are made.

Prerequisite: FIN 642 or FIN 602 or BUS 630.**Components:** LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.

FIN 671. Advanced Topics in Corporate Finance. 2 Credit Hours.

This course builds directly on FIN 670 and on the MBA core classes, FIN 641 and FIN 642, and relies mainly on the analysis and vigorous class discussion of a variety of real-world cases. The cases cover a broad range of topics, including short-and long-term financing, capital budgeting decisions, corporate valuation, hedging with options and futures, dividend policy and share repurchases, corporate financial strategy, IPOs, environmental considerations, and other current issues in corporate finance.

Prerequisite: FIN 670.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 674. Financial Analysis of Mergers and Acquisitions. 2 Credit Hours.

This course is designed to develop an understanding of (1) the economic and financial issues involved in the acquisition of a company; (2) the analytical valuation tools used to evaluate an acquisition; and (3) potential and empirical stock market reaction to an acquisition. Students are then asked to apply their understanding of the issues to analyze cases involving various aspects of acquisition.

Prerequisite: FIN 670.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

FIN 679. Private Equity and Venture Capital. 2 Credit Hours.

This course will cover the private equity (PE) industry, composed of both venture capital (VC) and buyouts (BO). The course will provide students with an understanding of corporate finance by applying central concepts and tools to a new and increasingly important industry. The course will also introduce students to the institutions of the PE industry and the valuation process used by PE investors.

Prerequisite: FIN 670.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

FIN 680. FinTech. 2-3 Credit Hours.

This course introduces students to Fintech, the emerging world of applications, concepts, developments, business models, and companies at the interface of Finance and Technology. The course format is a mixture of lecture and seminar-style student presentations. It covers the main Fintech areas like Peer-to-Peer-Lending, Crowdfunding, Mobile Payment Systems, Cryptocurrencies and ICOs, Robo Advising, Insurtech (insurance technology), and RegTech (regulatory technology). A special emphasis is given to how and by whom these emerging technologies are currently used, and how they may potentially change the landscape of finance and financial services in the future.

Prerequisite: BUS 640.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 681. Financial Institutions. 2 Credit Hours.

This course focuses on the management of financial institutions, such as mutual funds, banks, hedge funds, and finance office of large corporations. Topics include risk management, deposits and deposit insurance, liquidity, reserve requirements, capital adequacy, liability management, investment interest rate risk, and current issues connected with financial institutions.

Prerequisite: FIN 642 or FIN 602 or BUS 630.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 683. Financial Modeling. 2 Credit Hours.

This course takes a variety of finance topics and implements them using practical spreadsheet models. Students are presumed to have a working knowledge of Windows and Excel, as well as a good understanding the material taught in the core finance classes. Topics include Time Value of Money, Capital Budgeting, Pro-Forma Financial Statements, Bond Analysis, and Portfolio Construction and Optimization. This course will meet in a "computer lab" (a classroom) for hands-on instruction. The course is structured as a "flipped" classroom, so lectures and learning materials are online and practice an application are done in the classroom. It is therefore extremely important that students are prepared for class each meeting day.

Prerequisite: FIN 642 or FIN 602 or BUS 630.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FIN 685. Mathematics of Financial Derivatives. 2 Credit Hours.

This course builds on Finance 650 and 670. This course provides an in-depth mathematical treatment of derivatives and is divided into three parts: (1) options; (2) futures and forwards; and (3) other derivative instruments, which include options on futures, foreign currency derivatives, swaps, exotic options, and financial engineering. The emphasis is placed on equity instruments, although there is also some coverage of short- and long-term interest bearing instruments.

Prerequisite: FIN 650. and FIN 670.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 686. Financial Decision Making. 2 Credit Hours.

The goal of this course is to use decision-making theory to better understand why investors, money managers, and corporate managers often make suboptimal economic and financial decisions. The first part of the course focuses on the basic techniques and models that a manager or an investor can use to make effective financial decisions. The second part of the course focuses on the psychological, social, and cultural determinants of suboptimal investor and managerial behavior. In addition, the course examines the impact of those mistakes for financial markets (e.g., price bubbles) and the overall economy. The course should be useful to individuals who work in a corporate setting or at a money management firm (mutual funds, hedge funds, pension funds, etc.).

Prerequisite: FIN 650. and FIN 670.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FIN 698. Selected Topics in Finance. 1-3 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 699. Directed Readings and Study. 1-3 Credit Hours.

Individually supervised research or reading projects in selected fields. Evaluation of project and subject by the supervising professor is required at the time of registration.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 705. Financial Economics I. 3 Credit Hours.

This course is an introductory Ph.D. level course on the fundamental theories of asset pricing. Specifically, it consists of three parts. The first part focuses on individual choice under uncertainty. The second part develops equilibrium asset pricing theories, which include mean variance efficiency and the Capital Asset Pricing Model (CAPM), as well as the Arbitrage Pricing Theory (APT). The third part reviews recent development in asset pricing by introducing some stylized facts and new theories.

Requisite: Limited to Business PhD Students.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 706. Theory of Corporate Finance. 3 Credit Hours.

The aim of this course is to expose students to some of the important papers that constitute the theoretical foundations of corporate finance. The course will try to give students a working understanding of the key papers and give them a flavor of the techniques for setting up and solving models, which they could possibly apply in their own research. The course will cover classic Corporate Finance papers and recent contributions in the areas of financial contracting control and corporate governance. The later part of the course leans more towards empirical work and discusses the connections and gaps between theoretical and empirical corporate literature.

Prerequisite: FIN 705.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 707. Empirical Methods in Finance. 3 Credit Hours.

The objective of this course is to give you an introduction to empirical research in finance. This class is not designed like an econometrics class where the emphasis is the statistical specification of tests and the derivation of underlying asymptotics. The focus in this class is the understanding of the technique and the actual implementation in finance. The goal is to provide you with a toolbox of techniques that you can use to answer empirical questions in corporate finance and asset pricing.

Prerequisite: FIN 705.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 708. Financial Economics II. 3 Credit Hours.

This is a second course on asset pricing. The class is divided in two independent modules. The first module covers discrete time asset pricing models with frictions. These frictions include, among others, asymmetric information, slow-moving capital, delegated portfolio management, and short-sale constraints. The second module is an introduction to continuous time finance. Topics include introduction to stochastic calculus, derivative pricing and hedging, optimal portfolio choice, and equilibrium asset pricing.

Prerequisite: FIN 705.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 709. Behavioral Finance. 3 Credit Hours.

The aim of this course is to expose students to some of the important papers that constitute the theoretical foundations of corporate finance. The course will try to give students a working understanding of the key papers and give them a flavor of the techniques for setting up and solving models, which they could possibly apply in their own research. The course will cover classic Corporate Finance papers and recent contributions in the areas of financial contracting control and corporate governance. The later part of the course leans more towards empirical work and discusses the connections and gaps between theoretical and empirical corporate literature.

Prerequisite: FIN 705.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 715. Pe-Seminar Doctoral Students Workshop in Finance. 1 Credit Hour.

This course provides Finance PhD students an opportunity to i) discuss influential and well-cited research papers in financial economics, ii) incorporate contemporary finance research into their knowledge base, and iii) improve their research presentation skills.

Prerequisite: FIN 705.

Components: RSC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 825. Comprehensive Test Preparation. 1-3 Credit Hours.

Doctoral students who are preparing for their qualifying examinations may use this course designation. Enrolled students must develop, with the approval of their advisor, a "Plan of Study" for these credits.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

FIN 830. Pre-Dissertation Research. 1-6 Credit Hours.

For Finance PhD students currently writing their dissertation.

Requisite: Finance PhD Student.

Components: RSC.

Grading: SUS.

Typically Offered: Offered by Announcement Only.

First-Year Seminar Fine Arts (FFA)

FFA 190. First-Year Seminars in Arts. 3 Credit Hours.

Seminars designed to introduce up to 25 freshmen to the Fine Arts. Topics will vary from year to year, as will faculty teaching the seminars.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FFA 191. First-Year Seminars in Arts. 3 Credit Hours.

Seminars designed to introduce up to 25 freshmen to the Fine Arts. Topics will vary from year to year, as will faculty teaching the seminars.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FFA 192. First-Year Seminars in Arts. 3 Credit Hours.

Seminars designed to introduce up to 25 freshmen to the Fine Arts. Topics will vary from year to year, as will faculty teaching the seminars.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

First-Year Seminar Literature (FLT)

FLT 190. First-Year Seminars in Literature. 3 Credit Hours.

Seminars designed to introduce up to 25 freshmen to Literature. Topics will vary from year to year, as will faculty teaching the seminars.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FLT 191. First-Year Seminars in Literature. 3 Credit Hours.

Seminars designed to introduce up to 25 freshmen to Literature. Topics will vary from year to year, as will faculty teaching the seminars.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FLT 192. First-Year Seminars in Literature. 3 Credit Hours.

Seminars designed to introduce up to 25 freshmen to Literature. Topics will vary from year to year, as will faculty teaching the seminars.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FLT 193. First-Year Seminars in Literature. 3 Credit Hours.

Seminars designed to introduce up to 25 freshmen to Literature. Topics will vary from year to year, as will faculty teaching the seminars.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FLT 194. First-Year Seminars in Literature. 3 Credit Hours.

Seminars designed to introduce up to 25 freshmen to Literature. Topics will vary from year to year, as will faculty teaching the seminars.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FLT 195. First-Year Seminars in Literature. 3 Credit Hours.

Seminars designed to introduce up to 25 freshmen to Literature. Topics will vary from year to year, as will faculty teaching the seminars.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FLT 196. First-Year Seminars in Literature. 3 Credit Hours.

Seminars designed to introduce up to 25 freshmen to Literature. Topics will vary from year to year, as will faculty teaching the seminars.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FLT 199. First-Year Seminars in Literature. 3 Credit Hours.

Seminars designed to introduce up to 25 freshmen to Literature. Topics will vary from year to year, as will faculty teaching the seminars.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

First-Year Seminar Natural Science (FNS)

FNS 190. First-Year Seminars in Natural Science. 3 Credit Hours.

Seminars designed to introduce up to 25 freshmen to the Natural Sciences. Topics will vary from year to year, as will faculty teaching the seminars.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FNS 191. First-Year Seminars in Natural Science. 3 Credit Hours.

Seminars designed to introduce up to 25 freshmen to the Natural Sciences. Topics will vary from year to year, as will faculty teaching the seminars.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FNS 192. First-Year Seminars in Natural Science. 3 Credit Hours.

Seminars designed to introduce up to 25 freshmen to the Natural Sciences. Topics will vary from year to year, as will faculty teaching the seminars.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FNS 193. First-Year Seminars in Natural Science. 3 Credit Hours.

Seminars designed to introduce up to 25 freshmen to the Natural Sciences. Topics will vary from year to year, as will faculty teaching the seminars.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FNS 194. First-Year Seminars in Natural Science. 3 Credit Hours.

Seminars designed to introduce up to 25 freshmen to the Natural Sciences. Topics will vary from year to year, as will faculty teaching the seminars.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FNS 195. First-Year Seminars in Natural Science. 3 Credit Hours.

Seminars designed to introduce up to 25 freshmen to the Natural Sciences. Topics will vary from year to year, as will faculty teaching the seminars.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FNS 196. First-Year Seminars in Natural Science. 3 Credit Hours.

Seminars designed to introduce up to 25 freshmen to the Natural Sciences. Topics will vary from year to year, as will faculty teaching the seminars.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FNS 197. First-Year Seminars in Natural Science. 3 Credit Hours.

Seminars designed to introduce up to 25 freshmen to the Natural Sciences. Topics will vary from year to year, as will faculty teaching the seminars.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FNS 199. First-Year Seminars in Natural Science. 3 Credit Hours.

Seminars designed to introduce up to 25 freshmen to the Natural Sciences. Topics will vary from year to year, as will faculty teaching the seminars.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

First-Year Seminar Philosophy and Religion (FPR)

FPR 190. First-Year Seminars in Philosophy/Religion. 3 Credit Hours.

Seminars designed to introduce up to 25 freshmen to Philosophy and/or Religion. Topics will vary from year to year, as will faculty teaching the seminars.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FPR 191. First-Year Seminars in Philosophy/Religion. 3 Credit Hours.

Seminars designed to introduce up to 25 freshmen to Philosophy and/or Religion. Topics will vary from year to year, as will faculty teaching the seminars.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FPR 192. First-Year Seminars in Philosophy/Religion. 3 Credit Hours.

Seminars designed to introduce up to 25 freshmen to Philosophy and/or Religion. Topics will vary from year to year, as will faculty teaching the seminars.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FPR 199. First-Year Seminars in Philosophy/Religion. 3 Credit Hours.

Seminars designed to introduce up to 25 freshmen to Philosophy and/or Religion. Topics will vary from year to year, as will faculty teaching the seminars.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

First-Year Seminars Social Science (FSS)

FSS 190. First-Year Seminars in Social Sciences. 3 Credit Hours.

Seminars designed to introduce up to 25 freshmen to the Social Sciences. Topics will vary from year to year, as will faculty teaching the seminars.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FSS 191. First-Year Seminars in Social Sciences. 3 Credit Hours.

Seminars designed to introduce up to 25 freshmen to the Social Sciences. Topics will vary from year to year, as will faculty teaching the seminars.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FSS 192. First-Year Seminars in Social Sciences. 3 Credit Hours.

Seminars designed to introduce up to 25 freshmen to the Social Sciences. Topics will vary from year to year, as will faculty teaching the seminars.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FSS 193. First-Year Seminars in Social Sciences. 3 Credit Hours.

Seminars designed to introduce up to 25 freshmen to the Social Sciences. Topics will vary from year to year, as will faculty teaching the seminars.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FSS 195. First-Year Seminars in Social Sciences. 3 Credit Hours.

Seminars designed to introduce up to 25 freshmen to the Social Sciences. Topics will vary from year to year, as will faculty teaching the seminars.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FSS 197. First-Year Seminars in Social Sciences. 3 Credit Hours.

Seminars designed to introduce up to 25 freshmen to the Social Sciences. Topics will vary from year to year, as will faculty teaching the seminars.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FSS 199. First-Year Seminars in Social Sciences. 3 Credit Hours.

Especially designed for Foote Fellows, the BOOKS THAT MATTER seminar offers an opportunity to study major works of non-fiction in a seminar-style setting, under the guidance of faculty members from across the University. We examine important works which, by means of their strong, connected argumentation, challenge the way we respond to, interpret, and shape reality. Emphasis in the course falls mainly on the logical structure embedded deep within the text, and less on content per se, so that a student's effort is not directed towards a reading of "great books" but rather the discovery of "significant arguments." Our rationale is to address a fundamental need in education too often lost in the midst of other demands, interests, and requirements: by learning to read, question, and enjoy important intellectual studies of the past and present, students will be able to read, question, and enjoy what will be the influential books of non-fiction published in their lifetime, whether in public affairs, science, social science, economics, history, film and media studies, philosophy, psychology, etc. The course provides standards of measurement and value by which students can gauge how and why books succeed or fail on hard logical grounds.

Requisite: Hammond or Foote Fellow.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

French (FRE)

FRE 101. Elementary French I. 3 Credit Hours.

For students with no background or previous study of French. The focus of FRE 101 is the development of communicative abilities in speaking, reading, writing, and comprehension of French and an introduction to the cultural practices of the Francophone world. Themes on: university life, family, leisure activities, home and community. Includes both oral and written assessment of grammatical structures and vocabulary introduced, informal and formal writing. Conducted entirely in French. Not open to students who have completed 2 or more years of high school French. Closed to heritage or native speakers of French.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FRE 102. Elementary French II. 3 Credit Hours.

Continuation of FRE 101. The development of communicative abilities in speaking, reading, writing and comprehension of French and an introduction to the cultural practices of the Francophone world. Themes on: childhood and adolescence, food and lifestyle, university life and professions. Includes both oral and written assessments of grammatical structures and vocabulary introduced, informal and formal writing. Conducted entirely in French.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FRE 105. Accelerated Elementary French. 3 Credit Hours.

For students with previous study of French desiring to review material covered in FRE 101 and 102 in preparation for continued study of French at the intermediate level. The focus of FRE 105 is the continued development of communicative abilities in speaking, reading, writing, and comprehension of French and an introduction to the cultural practices of the Francophone world. Themes on: family, leisure activities, home, and community, childhood and adolescence, food and lifestyle, university life and professions. Includes both oral and written assessments of grammatical structures and vocabulary introduced, informal and formal writing. Conducted entirely in French.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FRE 195. Transfer Credit. 1-3 Credit Hours.

Awarded for 100-level course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: CNC.

Typically Offered: Fall, Spring, & Summer.

FRE 201. Intermediate French I. 3 Credit Hours.

For students with previous study of elementary-level French. The continued development of communicative abilities in speaking, reading, writing, and comprehension of French and an introduction to the cultural practices of the Francophone world. Themes on: travel, technological innovations, the evolution of family values, and social and environmental issues. Includes both oral and written assessments of grammatical structures and vocabulary introduced, informal and formal writing. Conducted entirely in French.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FRE 202. Intermediate French II. 3 Credit Hours.

For students with some previous study of French at the intermediate level, who are familiar with all the tenses and with vocabulary related to the topics covered in FRE 101-201. FRE 202 is the first semester of a two-semester sequence ending with FRE 203. The continued development of skills in reading, writing, speaking, and listening in French, with an additional emphasis on cultural competence in the French-speaking world. Themes on: relationships, cultural values, different historical perspectives, and current politics. These themes will be explored through articles, films and literary texts. The course will develop writing and reading strategies, providing them with the tools to think, read, and write critically and analytically in papers of 1-3 pages. Progress will also be assessed through quizzes and exams. Course conducted entirely in French.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FRE 203. Advanced French. 3 Credit Hours.

Continuation of FRE 202. This course will prepare students for advanced literature, linguistic, and culture courses. The class will use films, literary works, and other cultural texts. Students will write analytic essays of 3-5 pages to develop style, vocabulary, and syntax. Course conducted entirely in French.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FRE 280. French Culture and Conservation. 3 Credit Hours.

The major social, historical and political factors that have shaped contemporary and traditional French culture and society. This cultural approach to language-learning is set in the small towns and villages of the Sete region, rich and vibrant with a centuries-old history of intellectual advances and social tolerance. The historical and social evolution of French culture will be studied through film, literature and art with visits to relevant historical sites and museums.

Prerequisite: FRE 102 or FRE 105.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 295. Transfer Credit. 1-3 Credit Hours.

Awarded for 200-level course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: CNC.

Typically Offered: Fall, Spring, & Summer.

FRE 301. Introduction to French and Francophone Studies. 3 Credit Hours.

Tools for the interpretation and analysis of cultural materials from the French-speaking world. Acquisition of terminology and methodology for advanced study in French and Francophone Studies. Emphasis on historical, literary, and geographical breadth of French-speaking cultures as well as on critical writing skills.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FRE 302. The Cultures of France. 3 Credit Hours.

Historical survey of French intellectual, artistic, and popular culture.

Prerequisite: FRE 301.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 303. The Cultures of Francophone Africa, Canada, and/or the Caribbean. 3 Credit Hours.

Historical survey of the intellectual, artistic, and popular culture of the French-speaking communities in Africa, Canada and the Caribbean.

Prerequisite: FRE 301.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 310. Topics in French and Francophone Studies in Translation. 3 Credit Hours.

Topics in the literature and/or cultures of the French-speaking world. Readings and discussion in English. Development of critical reading and writing skills. Fulfills humanities literature requirement. Does not fulfill foreign language requirement. May be repeated when the topic varies. May be used toward the French major in accordance with Department of Modern Languages and Literature stipulations.

Prerequisite: ENG 106 or ENG 107.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 321. Literary Topics. 3 Credit Hours.

The study of literature, film and/or the arts through a specific topic. Maybe repeated for credit if topic is different.

Prerequisite: FRE 301.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 322. Topics in Global French Culture. 3 Credit Hours.

Issues centered on the culture of France and/or regions where French is spoken. Topics such as film, Caribbean history, journalism, translations, migration. May be repeated for credit if topic is different.

Prerequisite: FRE 301.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 325. Topics in French-Language Cinema. 3 Credit Hours.

Topics in the cinema of the French-speaking world. Analysis of films in their cultural context. May be repeated for credit if topics vary.

Prerequisite: FRE 301.

Components: LEC.

Grading: GRD.

FRE 330. Topics in Gender and Sexuality. 3 Credit Hours.

Topics in gender and sexuality in the context of the French-speaking world, through literary and/or cultural studies. May be repeated if topics vary.

Prerequisite: FRE 301.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 340. Migration in Literary and Cultural Studies. 3 Credit Hours.

Study of migration to or from France, French-speaking Canada and America, Africa and/or the Caribbean. May be repeated for credit if topics vary.

Prerequisite: FRE 301.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 345. Franco-Maghrebian Studies. 3 Credit Hours.

The study of major historical, social, cultural and literary issues related to the Franco-Maghrebian interface. May be repeated for credit if topics vary.

Prerequisite: FRE 301.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 346. African Studies. 3 Credit Hours.

Topics in the literary and/or cultural study of French-speaking Africa. May be repeated for credit if topics vary.

Prerequisite: FRE 301.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 360. The Caribbean through Literary and Cultural Studies. 3 Credit Hours.

Literary and cultural readings on the Caribbean. May be repeated for credit if topics vary.

Prerequisite: FRE 301.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 363. Medieval and Renaissance Topics in French. 3 Credit Hours.

Topics within French literature from the 12th century to the end of the 16th century.

Prerequisite: FRE 301.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 364. Early Modern Topics in French. 3 Credit Hours.

Topics within French literature from the 17th and 18th centuries.

Prerequisite: FRE 301.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 365. 19th Century Topics in French. 3 Credit Hours.

Topics within French literature from the 19th and 20th centuries.

Prerequisite: FRE 301.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

FRE 366. 20th and 21st Century Topics in French. 3 Credit Hours.

Study of currents, themes, and movements that define and run the course of 20th and 21st century French literature and culture. Course materials may encompass a diverse array of sources, including art, film, literature, theatre, aesthetics, political cultures and theoretical debates. May be repeated if the topic changes substantially.

Prerequisite: FRE 301.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FRE 394. French Internship. 1-3 Credit Hours.

The internship is intended to provide the student with an opportunity to apply analytical, interpretive, expressive, and creative skills developed in coursework. Internships ordinarily take place outside the University. They involve UM-faculty supervision as well as supervised on-site experience in an French-speaking cultural, business, or not-for-profit organization. Student needs to fill out the internship application form. Normally 40 internship hours are required per credit earned (the host will supply documentary evidence of hours worked).

Components: PRA.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FRE 395. Transfer Credits. 1-3 Credit Hours.

Awarded for course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: GRD.

FRE 396. Transfer Credits. 1-3 Credit Hours.

Awarded for course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: GRD.

FRE 397. Transfer Credits. 1-3 Credit Hours.

Awarded for course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: GRD.

FRE 398. Transfer Credits. 1-3 Credit Hours.

Awarded for course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: GRD.

FRE 399. Transfer Credits. 1-3 Credit Hours.

Awarded for course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: GRD.

FRE 432. French for Global Business. 3 Credit Hours.

The language and culture tools needed to work and conduct business in French anywhere it is spoken around the world.

Prerequisite: FRE 203.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FRE 442. Advanced writing workshop in French. 3 Credit Hours.

Intensive writing of various genres based on the discussion of readings.

Prerequisite: FRE 301.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 446. Debating Cultures and Societies in French. 3 Credit Hours.

This course is designed to improve student's conversational skills cultivating formal academic speaking competencies, and to develop their critical thinking skills and analytical expression in French in order to help students achieve global literacy. In addition, this course seeks to build students' oral proficiency at the advanced level while increasing their awareness of Francophone cultures through active, responsible participation in discussions, debates and oral presentations in class. The class is conducted in French.

Prerequisite: FRE 203.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

FRE 495. Transfer Credits. 1-3 Credit Hours.

Awarded for 400-level course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: GRD.

FRE 501. Capstone. 3 Credit Hours.

Course with a broad-based topic designed to integrate high-level linguistic, critical and analytical skills with the body of knowledge acquired during the course of study toward the major. Topics vary. Open only to undergraduates in the last semester of their French major. Course is writing intensive.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FRE 591. Directed Readings. 1-3 Credit Hours.

May be repeated for credit if topic is different.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 592. Directed Readings. 1-3 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 593. Directed Readings. 1-3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 594. Senior honors Thesis I. 3 Credit Hours.

Directed research for honors thesis.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

FRE 595. Senior Honors Thesis II. 3 Credit Hours.

Directed writing of honors thesis.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

FRE 625. Elementary French for Graduate Research. 0 Credit Hours.

Grammatical structuring, verb tenses, and word families necessary for reading text with minimal use of a dictionary. May fulfill the Foreign Language Reading Competency Requirement (consult your graduate advisor).

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 641. Elementary FRE I for Graduate Students. 0 Credit Hours.

Designed to develop graduate students' communicative abilities speaking, reading, writing, and comprehending French and to provide an introduction to the Francophone world.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FRE 642. Elementary FRE II for Graduate Students. 0 Credit Hours.

Prerequisite: FRE 641.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FRE 645. Accelerated Elementary FRE for Graduate Students. 0 Credit Hours.

For graduate students with previous study of French desiring to review material covered in FRE641 and FRE642 in preparation for study of French at the intermediate level. Designed to develop graduate students' communicative abilities in speaking, reading, writing, and comprehending French and continued engagement with the Francophone world.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FRE 651. Intermediate FRE I for Graduate Research. 0 Credit Hours.

Prerequisite: FRE 642.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FRE 652. Intermediate FRE II for Graduate Research. 0 Credit Hours.

For graduate students with previous study of French at the intermediate level. Designed to enhance graduate students' communication skills in both written and spoken French at the high-intermediate level. Intended primarily for students who will carry out research in the Francophone world.

Prerequisite: FRE 651.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FRE 653. Advanced FRE I for Graduate Research. 0 Credit Hours.

For graduate students with previous study of French at the high-intermediate. Designed to enhance graduate students' communication skills in French at the advanced-low level. Intended primarily for students who will carry out research in the Francophone world.

Prerequisite: FRE 652.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FRE 711. Topics in French Medieval Literature. 3 Credit Hours.

Recent topics: exile, the epic, orientalism, imperialism, monsters.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 712. Topics in French Renaissance Literature. 3 Credit Hours.

Specific genres, works, authors, and movements. Possible topics: Melancholy and Madness; Montaigne; Rabelais; Marguerite de Navarre; lyric poetry.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 713. Topics in 17th Century French Literature. 3 Credit Hours.

Recent topics: Racine, Moliere, Corneille; Pascal and the Moralistic tradition, the birth of the psychological novel, love and war.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 714. Topics in 18th Century French Literature. 3 Credit Hours.

Recent topics: Diderot, Rousseau, Sade; exoticism as related to political theory; the epistolary novel; the Enlightenment and post-colonial theory.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 715. Topics in 19th Century French Literature. 3 Credit Hours.

Recent topics: Balzac, Stendhal, Flaubert; Dandyism and Decadence; the Symbolist movement.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 716. Topics in 20th-21st Century French Literature. 3 Credit Hours.

Recent topics: Paris 1913; Surrealism; Artaud, Beckett, Ionesco, Genet; the Nouveau Roman.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 721. Special Topics in French Studies. 3 Credit Hours.

Special Topics in French Studies.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 775. Topics in Francophone Studies. 3 Credit Hours.

Recent topics: travel narratives, literary historiography, discourses of race, colonialism, multilingualism and literacy, nationalism and culture.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 791. Writing Practicum. 1 Credit Hour.

The writing of a publishable research paper under faculty guidance.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 792. Directed Readings. 1-3 Credit Hours.

Directed Readings at the grad level.

Components: IND.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 830. Pre-Candidacy Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ph.D. Prior to admission to candidacy, the student will enroll for credit as determined by his/her advisor. Not more than 12 hours of FRE 730 may be taken in a regular semester, nor more than six in a summer session. Students who have not passed their qualifying examinations yet, but are not taking any courses, may enroll in FRE 730.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

FRE 840. Post-Candidacy Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ph.D. After admission to candidacy, the student will enroll for credit as determined by his/her advisor. Not more than 12 hours of FRE 740 may be taken in a regular semester, nor more than six in a summer session. Students who have passed their qualifying examinations, but are not taking courses any more, may enroll in FRE 740. Where a student has passed his /her(a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

FRE 850. Research in Residence. 1 Credit Hour.

Used to establish residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined the Dean of the Graduate School.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

General Business Management and Organization (GBM)

GBM 100. Fundamentals of Ethics and Leadership. 3 Credit Hours.

This is a comprehensive course specifically designed to assist students focus on building a proper foundation to prepare for college and then law school or graduate school in the future. The course creates opportunities for students to hone their ethical, business and legal skills. Students will be exposed to the functional areas of business: management, legal studies, and marketing. GBM 100 is a blend of academics, leadership, networking and teamwork that are at the core of a successful transition from high school to college to graduate school.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

GBM 101. Fundamentals of Business. 3 Credit Hours.

This course is designed to provide a broad introduction to the various fields of business knowledge that are essential for successful decision making in the global marketplace. Students will be exposed to the functional areas of business: economics, accounting, finance, and management. The curriculum will require students to engage in hands-on activities that will help to familiarize them with the different business fields and decide if a career in business is right for them.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

GBM 102. Global Business. 3 Credit Hours.

Miami's strategic location at the crossroads of the Americas provides an exciting setting to explore global business. This course introduces students to practices followed by organizations and individuals doing business in a global environment. It will start with an overview of the recent globalization phenomenon - why has it flourished as such? It will address key differences that characterized the various countries involved in the global economy. Students will review trends, as well as rewards and challenges, affecting the global trade and investment environment and of critical importance what are common strategy and structure of international business.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

Genomic Medicine (GNM)

GNM 602. Clinical Applications of Genomic Medicine II. 3 Credit Hours.

The Clinical Applications of Genomic Medicine series provides genomic medicine case studies and systems-based learning. Topics covered in the fall include cardiovascular, respiratory, renal/urinary, gastrointestinal/nutritional systems.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GNM 605. Research Ethics. 1 Credit Hour.

This course introduces foundational concepts in research ethics in preparation for conducting the genomic medicine practicum. Online Human Subjects Research and Responsible Conduct of Research training through the CITI program website will be supplemented with three hours of in-person discussion sessions.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GNM 610. Clinical Applications of Genomic Medicine I. 3 Credit Hours.

This course provides introductory background for understanding genomics, genomic techniques as well as provides genomic medicine case studies and systems-based learning. Initial topics include basic concepts of genomic medicine, genomic techniques involved in clinical applications, integration of genomic medicine into clinical setting, importance of translational research, benefits for patient and physician, transitioning with the medical curriculum into case studies. This course is focused on complex genetic disorders, and use of web-based tools to use in clinical work.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GNM 630. Clinical Applications of Genomic Medicine III. 4 Credit Hours.

The primary objective of this course is to prepare students to evaluate the clinical utility of a genetic test and apply that information in a clinical setting. Illustrations of these concepts are drawn from the systems-based curriculum spanning December (ophthalmology and dermatology) and spring (rheumatology, infection & immunity, hematology & oncology, diabetes & metabolism, endocrinology & reproductive medicine). The class will meet once each week (2 hours each session), for literature-based discussion sessions and case-based learning.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GNM 631. Genomic Medicine Laboratory. 3 Credit Hours.

Students will rotate in the molecular genetics and biochemical genetics diagnostic laboratories, gaining experience with genomic testing in a clinical setting and interpretation and communication of results.

Components: LAB.

Grading: CNC.

Typically Offered: Spring.

GNM 660. Computational Methods for Genomic Medicine. 3 Credit Hours.

The objective of this course is to gain a working knowledge of computational methods utilized in primary and secondary analysis of genomic technologies and apply these to a clinical setting. This will prepare students to perform practical data analysis in the GNM 631 course offered in Spring.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GNM 680. Genomic Ethics and Public Policy. 3 Credit Hours.

This course provides an introduction to the scientific, socio-ethical and policy issues arising in the context of genomic medicine. It is designed to improve your critical thinking and give you the tools to evaluate the wide range of challenges that genomic medicine brings to individuals and societies alike. We will cover a broad spectrum of topics, from the history of eugenics, to genetic testing and screening through the life cycle (i.e. pre-implantation and pre-natal testing, newborn, population and carrier screening, direct-to-consumer genetic testing), as well as bioethical (i.e., informed consent, privacy, confidentiality, etc.), policy (i.e., professional duties, patents, discrimination, etc.), and societal issues (i.e. health disparities).

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GNM 690. MSGM Capstone. 6-12 Credit Hours.

The purpose of the Capstone Segment is to provide the research and clinical application aspects of training. It can be initiated at any point after admission to the MSGM Program, and results in 6 credits earned in Spring of Year 4. All components (case reports, mentored research project, genomic medicine education) will be summarized in a portfolio of work and presented at the end of the Capstone.

Components: LAB.

Grading: SUS.

Typically Offered: Spring.

Geography (GEG)

GEG 101. Digital Earth. 3 Credit Hours.

Explores various geospatial technologies and the societal implications of our digital world with particular emphasis locational services, mapping, imagery, and other capabilities.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GEG 105. World Regional Geography. 3 Credit Hours.

An introduction to geography's basic concepts within the framework of a comprehensive survey of the world's major regions.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GEG 110. Introduction to Human Geography. 3 Credit Hours.

An introduction to the sub-fields of human geography by an examination of patterns and process in the international system.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GEG 120. Physical Geography. 3 Credit Hours.

The Earth system (atmosphere; hydrosphere; biosphere; lithosphere) emphasizing the interrelationships among its constituent subsystems; human-environmental interactions and geographic dimensions of these four subsystems.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GEG 198. Geographic Information System for Engineers. 1 Credit Hour.

The fundamentals of Geographic Information Systems (GIS). A GIS is a set of hardware and software tools that allow people to work with data that are tied to a particular location. In this course students will learn how to import, analyze and display answers to spatial research questions using GIS software. By the end of the semester students should have a solid understanding of the various applications of Geographic Information Systems in numerous spheres of everyday life. No prior experience with GIS software is required for this course. This course is for College of Engineering students only.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GEG 199. Geographic Information Systems for Engineers. 1 Credit Hour.

The fundamentals of Geographic Information Systems (GIS). A GIS is a set of hardware and software tools that allow people to work with data that are tied to a particular location. In this course students will learn how to import, analyze and display answers to spatial research questions using GIS software. By the end of the semester students should have a solid understanding of the various applications of Geographic Information Systems in numerous spheres of everyday life. No prior experience with GIS software is required for this course.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GEG 201. Topics in Geography. 1-3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GEG 231. Environmental Geography and Planetary Health. 3 Credit Hours.

Designed to encourage students to think deeply, critically, and coherently about the interaction between human societies and nature from a geographical perspective. Explores the societal dependence on natural ecosystems. Assess the magnitude and impacts of the environmental changes caused by human activities in the biosphere and evaluates the hypothesis that the earth has moved into in a new geologic epoch. Explores the concept of sustainable development and how countries are implementing it.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GEG 241. Health and Medical Geography. 3 Credit Hours.

Integrates public health and medicine with human and environmental geography using three approaches: ecological (the interaction of disease and our natural/built environments), social (the behavioral effects of culture, poverty, and politics), and spatial (using geospatial technology to better understand and improve health services and outcomes).

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GEG 266. Metropolitan Miami. 3 Credit Hours.

This course provides interdisciplinary perspectives on the urbanization of South Florida and on Miami's urban milieu. The course uses the case of Metropolitan Miami to introduce and illustrate a range of basic concepts in urban studies.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GEG 281. Economic Geography. 3 Credit Hours.

Explores processes driving spatial patterns of economic activity at the global, national, regional, and local scales. Topic areas include economic globalization, spatial distribution of industrial sectors, multinational corporations, international trade, regional economic development, and illegal economic activities. Examines the development of the global marketplace in both the developed and the developing world.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 305. Spatial Data Analysis I. 3 Credit Hours.

The use of basic methods or quantitative analysis for spatial data, including basic descriptive and inferential statistics and special techniques for spatial data.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GEG 306. Geographic Research Methods. 3 Credit Hours.

The fundamentals of social science research, such as research design, hypothesis formulation, and field data collection, with particular emphasis on quantitative and qualitative geographic analytical methods.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GEG 310. Geographic Information Systems I. 3 Credit Hours.

The fundamentals of Geographic Information Systems (GIS). GIS is a set of hardware and software tools that allow people to work with data that are tied to a particular location. In this course students will learn how to import, analyze and display answers to spatial research questions using GIS software. By the end of the semester students should have a solid understanding of the various applications of Geographic Information Systems in numerous spheres of everyday life. No prior experience with GIS software is required for this course. CIVIC designation: This section of the course is taught with the principles of civic engagement and service learning in mind. To satisfy these principles, students will be paired with a community organization in need of mapping, and will complete their final project in partnership with the community organization. For more information on civic engagement and academic service earning please visit <http://civic.miami.edu/>.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GEG 315. Digital Cartography. 3 Credit Hours.

An introduction to cartographic methods, interpretation and history. Students learn basic principles of visual representation, how to map qualitative and quantitative data, and how to prepare maps for publication and the web.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GEG 321. Remote Sensing of the Environment. 3 Credit Hours.

Theory and techniques of environmental remote sensing and imagery interpretation for earth resources monitoring and management.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GEG 331. Sustainable Development. 3 Credit Hours.

Explores the emerging field of sustainable production-consumption systems with special emphasis on the agriculture, extractive, and infrastructure sectors. A geographic perspective is used to evaluate the environmental impacts of these sectors. Reviews the mechanisms that governments and the private sector are establishing to make these economic sectors more sustainable.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GEG 332. Climatology and Extreme Weather. 3 Credit Hours.

Covers introductory information about Earth's atmosphere, weather development, and extreme weather events. Introduces basic concepts of the science of weather and climate, and current scientific developments in areas such as extreme weather forecasting and global climate change.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 334. Biogeography and Conservation. 3 Credit Hours.

Explores the modern science of biogeography and its implications for the design of spatial strategies to conserve biodiversity and ecosystem services. Examines the history of biogeography and its geographical and ecological foundations. Discusses the fundamental biogeographical processes and uses them to investigate the evolution of biotas and explain the current biogeographic patterns. Explores the emerging field of conservation biogeography and its applications.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 335. Sustainable Food Systems. 3 Credit Hours.

A sustainable food system sustains environmental health and local economies, and is socially just. We will explore the intricacies of global geographies of major food systems and how these systems have come to be. We will identify where major food types are produced, why and where the major demand centers are. Further, we will seek answers to fundamental food-related questions, including: in an age of plenty, why do people still starve, and what can be done about it? How do we explain malnutrition in some parts of the world and obesity in others? Can there really be such a thing as a "sustainable global food systems?" Finally, we will examine what the future implication for food is through exploratio1 and evaluation of a range of visions for a safe, sustainable food system.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GEG 336. Hazards and Disasters: The Nature-Society Interface. 3 Credit Hours.

Explores how human-environment interactions determine the distribution, causes and consequences of natural hazards and disasters.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GEG 341. Population, Health, and Environment. 3 Credit Hours.

Global human population dynamics and implications for environmental sustainability; topics include population growth and structure, mortality and fertility patterns, migration, urbanization, aging, and household composition.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GEG 343. Population, Sustainability, and the Media. 3 Credit Hours.

Explores opposing views of population growth and environmental sustainability through the media and cinema: contrasts "Doomsters" who believe population growth and resource consumption threaten human survival and pro-growth "Boomsters" who believe human ingenuity and technology will continue to allow humankind to prosper.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GEG 345. Drinking Water: Past, Present, and Future. 3 Credit Hours.

Traces the past, present, and future of human drinking water supplies through a social science lens. Examines drinking water as a physical, social, economic, and political resource, and how the integration of these views affects the management of global drinking water supplies.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GEG 346. Immigrant and Refugee Health. 3 Credit Hours.

A theoretical background essential for understanding the complex interaction of migration and health. Students will gain a basic understanding of the theories surrounding the movement of people within and across political boundaries. Emphasis will be placed on the health issues experienced by displaced populations including refugees, migrants, and internally displaced persons. We will explore some of the difficulties that receiving communities face in addressing the health needs of migrants, the roles of actors involved in working with displaced populations and how emigration of a large segment of the population, either abruptly or over time, affects sending communities as well. Much of the class will consist of guest speakers and case studies presented by different healthcare professionals working with migrant communities, with examples of the problems faced and solutions achieved in addressing issues of immigrant and refugee health drawn for both national and international experience.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GEG 348. Climate Change and Public Health. 3 Credit Hours.

The mechanisms by which climate change adversely affects human health, and the policy options for mitigating our exposure.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 351. Geopolitics and Peacebuilding. 3 Credit Hours.

Explores the political and legal responses, both national and international, to violations of Human Rights associated with conflicts and totalitarian regimes around the world, with emphasis on the peace building process in diverse geographical locations.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GEG 352. Crime and the City. 3 Credit Hours.

Explores why there is so much violent crime in certain cities of the Americas and why there are such marked spatial differences between, and within, these cities. Contrasts and discusses specific issues (and myths) of crime, punishment, and policing in the Americas using a variety of academic and institutional research on violent crime.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 353. United States National Security. 3 Credit Hours.

Examines a broad spectrum of such challenges to US national security, simulating the role of policy makers and strategists for the Office of the President.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GEG 354. Global Human Rights. 3 Credit Hours.

Equips students with a broad perspective to think critically about the global issues surrounding the foundations of Human Rights together with questions about its universality, reach, and enforceability.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GEG 355. Global Political Economy. 3 Credit Hours.

Explores the relationship between the global economy and politics, as governments seek both to shape it and to respond effectively to the constraints and opportunities it provides.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GEG 356. Latin American Political Economy. 3 Credit Hours.

Examines Latin America's economic development, analyzing different developmental strategies, resource endowment, institutional framework, and other related variables.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GEG 362. World Urban Geography. 3 Credit Hours.

An introduction to the principles and methods that apply to the geographic study of cities and urbanization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 366. Cities in Time and Space. 3 Credit Hours.

Interdisciplinary perspectives on the city, urbanity, and urbanization through a series of wide-ranging historical-geographical contexts. Field excursions are incorporated into the course.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GEG 381. Geography and Development in Africa. 3 Credit Hours.

A survey of the geography of Africa south of the Sahara, with particular emphasis on development and the role of African states in the international system.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GEG 382. Political Geography of the Middle East. 3 Credit Hours.

Geography of the Middle East with emphasis on current political topics.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 383. Geography and Development in South America. 3 Credit Hours.

An introduction to the geography of South America. Explores the interface between societies and nature in this diverse and complex world region. Covers the major challenges that the countries of the continent are facing to improve their socio-economic indicators as well as protect their unique natural ecosystems.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 384. Geography of South Florida. 3 Credit Hours.

Human and physical geography of South Florida.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 385. Jewish Geography. 3 Credit Hours.

Facts of Jewish history, geography, and demography both in the world and the United States. Basic geographic concepts that help us to understand the Jewish world and provide a basis for understanding the various ways that Jewish communities have adapted to different geographic circumstances.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 390. Topics in Geography. 3 Credit Hours.

Content and prerequisites announced when offered. Course may be repeated for credit if content varies.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 398. Independent Research. 6.00 Credit Hours.

Independent research conducted one on one with a faculty member.

Components: SEM.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GEG 399. Independent Study. 6.00 Credit Hours.

Independent study.

Components: SEM.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GEG 402. Geographic Thought and Analysis. 3 Credit Hours.

An introduction to the history of geographic thought and geographic analysis, and to some important sub-disciplines of Geography. At the end of the semester, students will have a better understanding of the history of Geography, of its place in the academy, and important theoretical and methodological debates and themes within the discipline. Our purpose in this seminar is to create a dynamic and focused intellectual environment in which learning is a collective process. To achieve that we will analyze, critique, question and debate the weekly readings. There will be little formal lecturing on my part. Instead, class time will be spent in open discussion and hands-on projects completed individually or in teams. Throughout the semester, we will also host guest speakers, who will give you insights into their scholarship and give you further exposure to the discipline of Geography. Be ready to read and write a lot, and come to class prepared to discuss!

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GEG 405. Spatial Data Analysis II. 3 Credit Hours.

Social and environmental science applications of spatial statistical analysis illustrated with data and numerical (simulation experiments) examples employing interactive software. This course's focus is on spatial autocorrelation.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 406. Survey Research Methods. 3 Credit Hours.

The use of survey research including the choice of a survey mechanism, sampling, questionnaire design, survey logistics, survey analysis, and reporting of results.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GEG 410. Geographic Information Systems II. 3 Credit Hours.

An introduction to spatial analysis, which consists of techniques for analyzing patterns of and interrelationships between spatial data. Topics include vector polygon editing and topology, integration of raster and vector data, surface analysis and 3D analysis, suitability mapping, spatial modeling, and multi-criteria evaluations.

Prerequisite: GEG 310.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GEG 412. GIS for Health and Environment. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 414. Crime Mapping and Analysis. 3 Credit Hours.

Provides a basic understanding of the spatial analysis of issues related to criminal justice and crime mapping using state-of-the-art GIS software.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 415. Web GIS. 3 Credit Hours.

Map serving technologies and internet map design, focusing on the programming concepts needed to construct and implement high-quality web mapping applications. Lab exercises will make use of both the commonly used open source GIS and related programming tools for customizing web-based mapping applications, as well as the leading proprietary web mapping capabilities provided in ESRI's ArcGIS Server. Students build their own on-line interactive, customizable maps and will learn the basics of client/server architecture and processing, JavaScript programming, and XML/HTML basics.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 421. GIS and Environmental Modeling. 3 Credit Hours.

Space-time modeling in a GIS environment with emphasis on raster-based models of land cover change, urban expansion, species distribution, wildfire propagation, and other environmental issues.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 435. Geography of Wine. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 490. Topics in Geography. 3.00 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 501. Capstone Research Seminar. 3 Credit Hours.

Project-based fundamentals of social science research; emphasizes research conceptualization and design, application of methods, data management, scientific writing, multi-modal presentation of findings, and professional development skills.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GEG 505. Seminar in Methods of Analysis. 3 Credit Hours.

The use of advanced quantitative, qualitative, and mixed methods in the solution of geographic research problems.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 506. Field Studies in Geography. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 507. Seminar in Field Methods. 3 Credit Hours.

With a focus on geospatial applications, this methods course introduces students to field research addressing complex socio-environmental issues. The course includes exercises with GPS data collection; geo-tagged photography; ground truthing; spatial survey design; and distributed GIS. Various research areas and cognate field methods including environmental demography, community surveying, cultural mapping, and multi-sited ethnography.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 519. Immigration to the United States. 3 Credit Hours.

A description and analysis of current immigration patterns in the United States.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GEG 530. Seminar in Sustainability. 3 Credit Hours.

Examines the relations between human society and material nature from within a broad theoretical perspective, relating questions of science, culture, and technology to the politics and economics of natural resources, focusing particularly on water, food, and petroleum.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 532. Seminar in Biogeography and Conservation. 3 Credit Hours.

Explores the human dimensions of global environmental change using an interdisciplinary approach. The course is reading and writing intensive. Special attention is given to the central role that land-use/cover change plays in the larger realm of global environmental change.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 561. Seminar in International Development. 3 Credit Hours.

Topics in the study of development. Content and prerequisites vary.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 562. Seminar in Urban Management. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 563. Seminar in Urban Geography. 3 Credit Hours.

Topics in the study of urban geography. Content and prerequisites vary.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 580. Introductory Quantitative Methods for Geographical Analysis.. 3 Credit Hours.

Basic quantitative methods for geographic analysis.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GEG 590. Advanced Topics in Geography. 1-6 Credit Hours.

Content and prerequisites vary by semester.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 597. Internship in Geography. 6.00 Credit Hours.

Components: FLD.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

GEG 598. Advanced Independent Research. 6.00 Credit Hours.

Independent research conducted one on one with a faculty member.

Components: SEM.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GEG 599. Advanced Independent Study. 6.00 Credit Hours.

Independent study.

Components: SEM.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GEG 602. Geographic Thought and Analysis. 3 Credit Hours.

Seminar for Graduate and senior undergraduate students about geographic thought and geographical traditions.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GEG 603. Research Design in Geography. 3 Credit Hours.

Designing and proposing geographic research projects based upon a critical reading of the geographical literature. Students will prepare a master's thesis (master's students) or dissertation (doctoral students) project proposal.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GEG 610. Survey Research Methods. 3 Credit Hours.

The use of survey research including the choice of a survey mechanism, sampling, questionnaire design, survey logistics, survey analysis, and reporting of results.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GEG 613. Advanced Cartography. 3 Credit Hours.

Cartographic research techniques, cognitive mapping, distortion, transformations and cartograms. Prerequisite: GEG 280 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 619. Immigration to the United States. 3 Credit Hours.

A description and analysis of current immigration patterns in the United States.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GEG 622. Urbanization in the Developing World. 3 Credit Hours.

Patterns and processes in large cities in the developing world are examined.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GEG 623. Seminar in Urban Management. 3 Credit Hours.

Identification of and responses to urban problems in large cities in European and Latin American metropolitan areas. Emphasis is on demographic, cultural/ethnic, service-provision, environmental, transportation, and land-use problems. Approach is via case studies, theory applications, and planning practicalities.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GEG 625. Advanced Independent Study in Geography I. 1-6 Credit Hours.

Advanced independent study for Two-Paper Option for first paper.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GEG 632. Seminar in Environmental Geography and Planetary Health. 3 Credit Hours.

Advanced topics in Environmental Geography from a systems approach.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 635. Internship in Geography. 1-4 Credit Hours.

Students are assigned to work for a local public or private agency.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

GEG 637. Development Studies. 3 Credit Hours.

Advanced seminar on issues in contemporary development studies.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 643. Population, Sustainability and the Media. 3 Credit Hours.

Explores opposing views of population growth and environmental sustainability through the media and cinema: contrasts "Doomsters" who believe population growth and resource consumption threaten human survival, and pro-growth "Boomsters" who believe human ingenuity and technology will continue to allow humankind to prosper.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GEG 645. Advanced Independent Study in Geography II. 1-6 Credit Hours.

Advanced independent study for Two-Paper Option for second paper.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GEG 648. Climate Change and Public Health. 3 Credit Hours.

The mechanisms by which climate change adversely affects human health and the policy options for mitigating our exposure.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 652. Seminar on the Geography of South Florida. 3 Credit Hours.

Human and physical geography of South Florida.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 655. Field Methods and Geospatial Analysis. 3 Credit Hours.

With a focus on geospatial applications, this methods course introduces students to field research addressing complex socio-environmental issues. The course includes exercises with GPS data collection; geo-tagged photography; ground truthing; spatial survey design; and distributed GIS. Various research areas and cognate field methods including environmental demography, community surveying, cultural mapping, and multi-sited ethnography.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GEG 656. Interdisciplinary Issues in Latin American and Caribbean Studies. 3 Credit Hours.

Political, economic, social, and cultural issues of Latin American and Caribbean area Studies.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 658. Seminar in Comparative Politics I. 3 Credit Hours.

Comparative political analysis within and across nations. Debates on state formation, democracy and development, democratization, and the role of ideas, interests, and institutions.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 661. Urban Geography I. 3 Credit Hours.

An introduction to the essential elements about the growth and development of cities. Review of the challenges of urbanization and urban sustainability in the contemporary period.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 663. Urban Geography II. 3 Credit Hours.

Analysis of the spatial structure of urban centers, the development of and interaction between functional zones, and the movement of goods and people in urban areas.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 680. Spatial Data Analysis I. 3 Credit Hours.

The use of basic methods or quantitative analysis for spatial data, including basic descriptive and inferential statistics and special techniques for spatial data.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 681. Spatial Data Analysis II. 3 Credit Hours.

Social and environmental science applications of spatial statistical analysis illustrated with data and numerical (simulation experiments) examples employing interactive software. This course's focus is on spatial auto correlation.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 685. Digital Cartography. 3 Credit Hours.

Introduction to cartographic methods, interpretation, and history. Basic principles of visual representation, how to map qualitative and quantitative data, and how to prepare maps for publication and the web.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 691. Geographic Information Systems I. 3 Credit Hours.

An introduction to fundamental concepts in Geographic Information Systems (GIS) and related geographic technologies. Students are exposed to leading GIS software tools used in the industry.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 692. Remote Sensing of the Environment. 3 Credit Hours.

Theory and techniques of environmental remote sensing and imagery interpretation for earth resources monitoring and management.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 693. Geographic Information Systems II. 3 Credit Hours.

An introduction to spatial analysis, which consists of techniques for analyzing patterns of and interrelationships between spatial data. Topics include vector polygon editing and topology, integration of raster and vector data, surface analysis and 3D analysis, suitability mapping, spatial modeling and multi-criteria evaluations.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 695. Web GIS. 3 Credit Hours.

Map serving technologies and internet map design, focusing on the programming concepts needed to construct and implement high-quality web mapping applications.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 758. Seminar in Comparative Politics II. 3 Credit Hours.

Theoretical approaches and methodological debates in Comparative Politics.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 810. Master's Thesis. 1-6 Credit Hours.

The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

GEG 820. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in GEG 710 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GEG 825. Continuous Registration--Master's Study. 0 Credit Hours.

To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

Geological Sciences (GSC)

GSC 101. Origin and Evolution of Planet Earth. 3 Credit Hours.

The origin of the elements and the evolution of the universe. The formation and early evolution of the solar system. The differentiation of the earth into core, mantle, and crust. Origin of the oceans and atmosphere.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GSC 102. Evolution of the Biosphere. 3 Credit Hours.

The physical basis of life. The origin, early evolution, history of life on Earth. Emphasis on major crises and innovations, including the evolution of modern man.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GSC 103. Evolution of the Modern Earth's Environment. 3 Credit Hours.

The earth's crust: composition and morphology. Ocean and atmosphere: radiation balance and dynamics. Climatology and paleoclimatology. The ice ages and the evolution of the modern environment. The relationships between the geological environment and human activities.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GSC 105. The Global Environment. 3 Credit Hours.

Anthropogenic effects on the Earth's environment compared to analogous natural events.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GSC 106. Geological Influences on Society. 3 Credit Hours.

Impact of geological processes on daily human activities and decision-making. Geological hazards and human habitation. Economic geology and exploration of natural resources. Influences of geology on other disciplines.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GSC 107. Natural Disasters: Hollywood vs. Reality. 3 Credit Hours.

This course will explore the causes, effects and societal responses to disasters. We will look at a variety of natural hazards and related disasters including flooding, volcanoes, landslides, earthquakes, hurricanes, tsunami and drought. Using excerpted segments of "disaster films" in conjunction with scientific treatments, we can identify the causes, frequency, consequences, risks, and public perceptions of natural hazards.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GSC 108. The Geologic Record. 3 Credit Hours.

Analysis of the rock record to determine the geologic history using knowledge of rocks, minerals, fossils, and stratigraphy.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GSC 110. The Earth System. 3 Credit Hours.

Interactions among the major components of the Earth System - the geosphere, the hydrosphere, the atmosphere, and the biosphere. To be taken concurrently with GSC 114 lab section.

Corequisite: GSC 114.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GSC 111. Earth System History. 4 Credit Hours.

Earth History, beginning with earliest origins and surveying major steps in the evolution of the geosphere, atmosphere, hydrosphere, and biosphere.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GSC 114. Earth Processes Lab. 2 Credit Hours.

Minerals, rocks, sediments, maps, imagery, fossils and paleoenvironmental reconstruction methods. Current frontiers of knowledge and field introduction to marine geology. Co-requisite: GSC 110.

Corequisite: GSC 110.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

GSC 204. Environmental Statistics. 3 Credit Hours.

This introductory course provides an overview of parametric and nonparametric statistics with an emphasis on applications in the analysis of environmental data.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GSC 230. Reef Systems Through Time. 3 Credit Hours.

Interacting geological, physical, chemical, biological, and climatic processes that define a reefal setting and system. Field trips included.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GSC 231. Field Study of Reef Systems Through Time. 2 Credit Hours.

Fossil reef systems of the Paleozoic age in west Texas and New Mexico. Components, fabrics, and facies relationships. Field Methods. Visit to the Permian reef complex at Alamogordo. Carlsbad and Mississippian, Pennsylvanian and Permian reef mounds near Alamogordo. Fee required.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GSC 240. Introduction to Marine Geology. 3 Credit Hours.

Learn about the origin, structure and evolution of the ocean basins and their margins, including interpretation of the paleo-archives hidden on the seafloor. The course material is necessarily broad, covering marine geography, plate tectonics, active and passive margins, coastal and ocean processes, sediment processes, continental margin and seafloor resources, and climate and ocean history and interactions. Our approach will be interdisciplinary, requiring integration of chemical, physical and biological systems, as well as geologic processes. A special emphasis will be placed on learning to read the sediment record as an archive of information on biologic and climate evolution.

Prerequisite: GSC 110 and GSC 114 or GSC 111.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GSC 260. Earth Materials. 4 Credit Hours.

Physical and optical properties of common rock-forming minerals and their occurrence in igneous, metamorphic, sedimentary rocks, and ore deposits. Lecture, 3 hours; laboratory, 4 hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GSC 309. Microbes and the Environment. 3 Credit Hours.

This course is designed to provide students in geology, biology and environmental science a fundamental understanding of the role microbes play in shaping the Earth and its environments as well as the basic principles and approaches to studying these interactions in both modern and ancient settings. The metabolic diversity displayed by microbial communities makes them an integral component of global elemental cycles. In this regard, microorganisms have shaped our planet over the past 4 billion years and continue to do so in a very prominent way. The goal of this course is to learn about microbial diversity and metabolism, and the ability of microbes to shape and influence the environment.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GSC 311. Field Study of Volcanoes and Society. 2 Credit Hours.

Field trip to Popocatepetl and surrounding sites near Mexico City. Nature and impact of explosive volcanic eruptions on prehistoric civilizations. Fee required.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GSC 360. Depositional and Diagenetic Systems. 4 Credit Hours.

Sedimentary processes, sedimentology, and sedimentary diagenesis. Physical, biological and chemical sedimentation in Earth's surficial environments. Paleoenvironmental and diagenetic history reconstruction using petrologic, hand specimen, and field methods. Cyclicality in sedimentary systems. Lecture, 3 hours; field/ laboratory, 3 hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GSC 380. Paleontology and Stratigraphy. 4 Credit Hours.

Biostratigraphy, paleoecology, taphonomy, micro- and macro-evolutionary processes, and physical and chemical methods used for stratigraphic correlation. Major groups of invertebrate phyla comprising the bulk of the fossil record. Lecture, 3 hours; laboratory, 2 hours.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GSC 401. Senior Internship. 3 Credit Hours.

Field and laboratory studies conducted in conjunction with an approved academic environmental or industrial research laboratory or agency.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GSC 410. Environmental Geochemistry. 3 Credit Hours.

Natural distribution of the elements on earth, and how this is being changed. Radioactivity and energy, greenhouse warming and ozone depletion, water and waste and other environmental problems.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GSC 420. Geophysics. 3 Credit Hours.

The earth's gravitational field. Geomagnetism and paleomagnetism. Seismology. Heat flow. Plate tectonics. Lecture, 3 hours; laboratory, 2 hours.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GSC 424. Origin and Geology of the Galapagos Islands. 3 Credit Hours.

This course explores the origin and geology of volcanic oceanic islands, using the Galapagos Islands as a natural laboratory. Though all share a common origin in plate tectonic theory, each island presents a host of environments that originate in the processes of volcanic action, erosion and hydrology. Individual islands therefore develop distinctive ecosystems within which organisms interact and evolve. The emphasis of this course will be to lay out the underlying geological processes that have led to the formation of the islands and to their present state, and to explore through daily field excursions a wide suite of volcanic features displayed on Isabela Island.

Prerequisite: GSC 110.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GSC 440. Igneous and Metamorphic Petrology. 4 Credit Hours.

Genesis and classification of igneous and metamorphic rocks, field relationships of rock assemblages, and results of recent laboratory investigations. Identification of common rock types in hand specimens and by thin-section and X-ray diffraction techniques. Lecture, 3 hours; laboratory, 3 hours.

Prerequisite: GSC 260.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GSC 462. Earth's Ancient Atmospheres, Climates, and Sea Levels. 3 Credit Hours.

The Earth's atmospheres, climates, and sea level from the early Pre-Cambrian to present. Focus is placed on how the study of Earth's past is relevant to both modern and future climate change.

Prerequisite: GSC 110 and GSC 111.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GSC 480. Structural Geology. 4 Credit Hours.

Behavior of rock materials; analysis, description and classification of geologic folds, faults, joints; analysis of rock fabrics; tectonic and geologic history of continents and continental margins. Lecture, 2 hours; laboratory, 2 hours.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GSC 482. Field Methods. 2 Credit Hours.

Field and laboratory exercises in mapping. Interpretation of aerial and satellite photographs; coring and laboratory meets two hours/week. Field portion is on alternate Saturdays plus four day trip to Appalachians or Caribbean.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

GSC 490. Senior Thesis. 3 Credit Hours.

Individual, original research of independent study supervised by a member of the Departmental faculty and concluded by formal thesis preparation, public oral defense and submission of the thesis to the Department.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GSC 491. Senior Thesis. 3 Credit Hours.

Individual, original research of independent study supervised by a member of the Departmental faculty and concluded by formal thesis preparation, public oral defense and submission of the thesis to the Department.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GSC 550. Hydrogeology. 3 Credit Hours.

Movement of subterraneous water. The mechanical, chemical and thermal interaction of water with porous solids, and the transport of energy and chemical constituents. The origin of porosity and permeability. The controls exerted on aquifers by the lithology, stratigraphy and structure of geologic deposits and formations.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GSC 560. Colloquium - Current Topics in the Geosciences. 1 Credit Hour.

Weekly presentations and discussions. Written and oral presentations required.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GSC 561. Colloquium - Current Topics in the Geosciences. 1 Credit Hour.

Weekly presentations and discussions. Written and oral presentations required.

Components: DIS.

Grading: GRD.

Typically Offered: Spring.

GSC 574. Special Studies. 1-4 Credit Hours.

Students engaged in approved field and/or laboratory activities, such as work at sea or in the laboratory under supervision, may register for credit.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GSC 575. Special Studies. 1-4 Credit Hours.

Students engaged in approved field and/or laboratory activities, such as work at sea or in the laboratory under supervision, may register for credit.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GSC 576. Special Studies. 1-4 Credit Hours.

Students engaged in approved field and/or laboratory activities, such as work at sea or in the laboratory under supervision, may register for credit.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GSC 580. Summer Field Geology. 4 Credit Hours.

An intensive four-week summer field laboratory study of modern geological processes and ancient rock sequences. Mapping, description and interpretation of rock and structural sequences, paleoenvironmental reconstruction, interpretation of tectonic history. Reports required. Touring course. Travel fee required.

Components: LEC.

Grading: GRD.

Typically Offered: Spring & Summer.

GSC 581. Summer Field Environmental Geology. 2 Credit Hours.

Field evaluation of environmental geology problems in marine, coastal, wetland and terrestrial environments. Effects of human alteration of landscape, natural hazards, pollution of ground water, surface water and soils. Role of climate change on surficial environments. Reports required. Touring course. Travel fee required. Co-requisite: GSC 580.

Components: LEC.

Grading: GRD.

Typically Offered: Spring & Summer.

GSC 582. Field Studies. 1-4 Credit Hours.

Conducted field trips to selected geological sites in the United States and abroad. Report required.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GSC 596. Research in Geology. 1-4 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

German (GER)

GER 101. Elementary German I. 3 Credit Hours.

Fundamental grammatical principles; exercises to develop a foundation for skills of listening, speaking, reading, and writing; introduction to German culture. Closed to native speakers.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GER 102. Elementary German II. 3 Credit Hours.

Continuation of GER 101. Building upon fundamental grammatical principles; exercises to develop a foundation for skills of listening, speaking, reading, and writing; introduction to German culture. Closed to native speakers.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GER 195. Transfer Credit. 1-3 Credit Hours.

Awarded for 100-level course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: CNC.

Typically Offered: Fall, Spring, & Summer.

GER 201. Intermediate German I. 3 Credit Hours.

Continuation of GER 102, with special emphasis on essay writing.

Components: LEC.

Grading: GRD.

GER 202. Intermediate German II. 3 Credit Hours.

Integrated grammar, writing, and conversation via content-based instruction. Diverse selection of readings: stories, plays, essays, interviews, other materials. Development of skills in a workshop format.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GER 295. Transfer Credit. 1-3 Credit Hours.

Awarded for 200-level course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: CNC.

Typically Offered: Fall, Spring, & Summer.

GER 301. Interpreting Literary and Cultural Texts in German. 3 Credit Hours.

Tools for the interpretation and analysis of literary and cultural materials from the German-speaking world. Acquisition of terminology and theories through the study of the main literary genres (prose, poetry, and drama) and a complementary genre of cultural analysis (e.g., film studies, cultural studies, etc.). Emphasis on critical writing skills.

Prerequisite: GER 202.

Components: SEM.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GER 302. The Cultures of the German-Speaking World. 3 Credit Hours.

Historical survey of cultures in areas of the world where German is spoken: arts, letters, science, political and social institutions. Conducted in German. Collateral readings and reports.

Prerequisite: GER 202.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GER 310. German Studies in Translation. 3 Credit Hours.

Topics in German literature, philosophy, history, etc. Readings and discussion in English. Development of critical reading and writing skills. Fulfills humanities literature requirement. Does not fulfill foreign language requirement. May not be used for German minor credit.

Prerequisite: ENG 106 or ENG 107.

Components: SEM.

Grading: GRD.

Typically Offered: Spring.

GER 321. Special Topics in German Studies. 3 Credit Hours.

Intensive study of a special topic. May be repeated for credit when topic varies. May be used to fulfill the humanities literature requirement.

Prerequisite: GER 301.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GER 365. Twentieth-Century German Studies. 3 Credit Hours.

The second empire and the third Reich, the Weimar Republic, and the two Germanies. Examination of the arts, sciences, letters, and political and social institutions of twentieth-century Germanophone areas. May be used to fulfill the humanities literature requirement.

Prerequisite: GER 301.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GER 370. The Holocaust in History, Film, and Memorial Culture. 3 Credit Hours.

The course examines the representation of the Holocaust in historiography, film, and memorial culture. Readings will include texts by historians and writers such as Primo Levi, Raul Hilberg, Daniel Goldhagen, James Young and others; films will include, among others, Alain Resnais's NIGHT AND FOG, Claude Lanzmann's SHOAH, and Steven Spielberg's SCHINDLER'S LIST. Reading-and writing-intensive course with reading and discussions in English. In addition to daily/weekly homework assignments, an in-class midterm exam and a final, cumulative take-home exam, students will also complete an extended analytical term paper. Students will also be required to watch films outside of regularly scheduled class hours.

Prerequisite: ENG 106.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GER 394. German Internship. 1-3 Credit Hours.

The internship is intended to provide the student with an opportunity to apply analytical, interpretive, expressive, and creative skills developed in coursework. Internships ordinarily take place outside the University. They involve UM-faculty supervision as well as supervised on-site experience in an German-speaking cultural, business, or not-for-profit organization. Student needs to fill out the internship application form. Normally 40 internship hours are required per credit earned (the host will supply documentary evidence of hours worked).

Components: PRA.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GER 395. Transfer Credit. 1-3 Credit Hours.

Awarded for 300-level course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: CNC.

Typically Offered: Fall, Spring, & Summer.

GER 396. Transfer Credits. 1-3 Credit Hours.

Awarded for course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: GRD.

GER 397. Transfer Credits. 1-3 Credit Hours.

Awarded for course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: GRD.

GER 398. Transfer Credits. 1-3 Credit Hours.

Awarded for course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: GRD.

GER 399. Transfer Credits. 1-3 Credit Hours.

Awarded for course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: GRD.

GER 442. Advanced Stylistics and Composition. 3 Credit Hours.

Analysis of grammar and style. Discussion of readings. Intensive writing.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GER 495. Transfer Credit. 1-3 Credit Hours.

Awarded for 400-level course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: CNC.

Typically Offered: Fall, Spring, & Summer.

GER 592. Directed Readings. 1-3 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GER 594. Senior Honors Thesis I. 3 Credit Hours.

Directed research for honors thesis.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

GER 595. Senior Honors Thesis II. 3 Credit Hours.

Directed writing of honors thesis.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

GER 625. German for Graduate Research. 0 Credit Hours.

Grammatical structuring, verb tenses, and word families necessary for reading text with minimal use of a dictionary. May fulfill the Foreign Language Reading Competency Requirement (consult your graduate advisor.)

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GER 641. Elementary GER I for Graduate Students. 0 Credit Hours.

Designed to develop graduate students' communicative abilities in speaking, reading, writing, and comprehension of German and provide an introduction to the German-speaking world.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GER 642. Elementary GER II for Graduate Students. 0 Credit Hours.

Continuation of GER 641. Designed to develop graduate students' communicative abilities in speaking, reading, writing, and comprehending German, as well as knowledge of the German-speaking world.

Prerequisite: GER 641.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GER 651. Intermediate GER I for Graduate Research. 0 Credit Hours.

For graduate students with previous study of elementary-level German. Designed to enhance graduate students' communication skills in the German language at the intermediate level. Intended principally for students who will carry out research in the German-speaking world.

Prerequisite: GER 642.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GER 652. Intermediate GER II for Graduate Research. 0 Credit Hours.

For students with previous study of German at the intermediate level. Designed to enhance graduate students' communication skills in the German language at the high-intermediate level. Intended principally for students who will carry out research in the German-speaking world.

Prerequisite: GER 651.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GER 691. Directed Readings. 1-3 Credit Hours.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GER 692. Directed Readings. 1-3 Credit Hours.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

Graduate School (GRD)

GRD 600. Graduate Student Training: Preventing Sexual Harassment and Sexual Violence. 0 Credit Hours.

Graduate student training offered by the Graduate School in collaboration with campus committees on the Violence Against Women Act (VAWA) and Title IX to increase awareness, and education on preventing sexual harassment and sexual violence in our community. This mandatory online session identifies roles, responsibilities and resources in preventing sexual harassment, and sexual violence in the academic environment.

Components: DIL.

Grading: NON.

Typically Offered: Fall, Spring, & Summer.

GRD 601. Graduate Student Training: Graduate Teaching Assistant Orientation. 0 Credit Hours.

Graduate Teaching Assistant orientation offered by the Graduate School and the Instructional Advancement Center focuses on University policies, procedures, and resources with which graduate students need to be familiar. This course is required for all first time doctoral students, and all graduate students who will have Teaching Assistant responsibilities.

Components: DIL.

Grading: NON.

Typically Offered: Fall, Spring, & Summer.

GRD 602. Responsible Conduct of Research Training. 0 Credit Hours.

Responsible Conduct of Research (RCR) is a critical component of research training, and is therefore an essential part of training for all graduate students conducting research. This course introduces students to basic principles of RCR and covers a series of topics including the mentor/mentee relationship, data acquisition and management, publications and authorship, ethics, and scientific misconduct, among others. The course consists of online content as well as in-person workshops and seminars.

Components: DIL.

Grading: NON.

Typically Offered: Fall & Spring.

GRD 607. Conceptos Fundamentales de la Salud Publica. 0 Credit Hours.

Las disciplinas académicas requieren de una base conceptual que guíe su desarrollo. En este curso se discuten los conceptos fundamentales de la salud pública. Como punto de partida, se analizan las diferencias y puntos de integración entre la biomedicina, la medicina clínica y la salud pública. Se identifica a la salud pública como un campo interdisciplinario que estudia los fenómenos de salud/enfermedad en poblaciones –sus determinantes, naturaleza y distribución– y la manera en que las sociedades se organizan para responder a ellos. También se examina el concepto de salud global. El curso incluye discusiones sobre la medición de las necesidades de salud, la transición epidemiológica y las formas en que los sistemas de salud han evolucionado, tanto a nivel nacional como a nivel global. English Version- Academic disciplines require a conceptual basis to guide their development. This course discusses the fundamental concepts of public health. As a starting point, we analyze the differences and points of integration between biomedicine, clinical medicine and public health. Public health is identified as an interdisciplinary field that studies health / disease phenomena in populations - their determinants, nature and distribution - and how societies organize to respond to them. The concept of global health is also examined. The course includes discussions on the measurement of health needs, the epidemiological transition, and the ways in which health systems have evolved, both nationally and globally.

Components: DIL.

Grading: NON.

Typically Offered: Fall.

Greek (GRE)

GRE 101. Elementary Ancient Greek I. 3 Credit Hours.

Alphabet, pronunciation, accentuation, vocabulary, grammar, reading exercises, and written exercises.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GRE 102. Elementary Ancient Greek II. 3 Credit Hours.

Continuation of GRE 101.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GRE 103. Intensive Greek for the New Testament. 3 Credit Hours.

An intensive introduction to the Koine dialect of the New Testament and Septuagint. The course is intended for students with little to no background in Ancient Greek, and covers material similar to that found in the GRE 101 and GRE 102 sequence for Attic Greek. Students leave GRE 103 prepared for GRE 201 and capable of reading extended passages from the New Testament.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GRE 201. Intermediate Ancient Greek I. 3 Credit Hours.

Reading from classical and Hellenistic authors. Building on their knowledge of elementary Greek grammar, students move toward real fluency in reading ancient Greek, and the pleasure of encountering these great authors in their original language.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GRE 202. Intermediate Ancient Greek II. 3 Credit Hours.

Reading Ancient Greek poetry. Students will read selections from Homer's *Odyssey* and *Iliad*, with emphasis on the Homeric dialect, meter, and the oral tradition of these epics. Greek 202 prepares students for 300- and 400-level Ancient Greek poetry courses.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GRE 311. Plato. 3 Credit Hours.

Reading of Plato's dialogues and letters with a view to syntax, the acquisition of vocabulary, and Plato's prose style and philosophical thought.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GRE 321. Euripides. 3 Credit Hours.

Readings in the plays of Euripides, with an emphasis on syntax, vocabulary, dramaturgy, and the social role of tragedy in ancient Athenian culture.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GRE 401. Special Topics in Greek Literature. 3 Credit Hours.

This course will address a specific author, topic, or text (appearing as a subtitle) Analogous to REL 404-409 courses. [This will vary each time the course is offered]

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GRE 402. Special Topics in Greek Literature. 3 Credit Hours.

This course will address a specific author, topic, or text (appearing as a subtitle) Analogous to REL 404-409 courses. [this will vary each time the course is offered]

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GRE 403. Special Topics in Greek Literature. 3 Credit Hours.

This course will address a specific author, topic, or text (appearing as a subtitle) Analogous to REL 404-409 courses. [this will vary each time the course is offered]

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GRE 404. Special Projects in Ancient Greek Literature and Culture. 3 Credit Hours.

This course will address a specific project in Classics (appearing as a subtitle) Analogous to REL 407-409 [this will vary each time the course is offered]

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GRE 405. Special Projects in Ancient Greek Literature and Culture. 3 Credit Hours.

This course will address a specific project in Classics (appearing as a subtitle). Analogous to REL 407-409.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GRE 406. Special Projects in Ancient Greek Literature and Culture. 3 Credit Hours.

This course will address a specific project in Classics (appearing as a subtitle). Analogous to REL 407-409.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GRE 408. Supervised Reading in Classical Greek. 3 Credit Hours.

Variable subject matter determined by instructor and student. Analogous to REL 401-403.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GRE 409. Supervised Reading in Classical Greek. 3 Credit Hours.

Variable subject matter determined by instructor and student. Analogous to REL 401-403.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GRE 411. Homer. 3 Credit Hours.

Readings from the Iliad and/or Odyssey.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GRE 421. Greek Orators. 3 Credit Hours.

Readings from Lysias and Demosthenes.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GRE 422. Aristophanes. 3 Credit Hours.

Readings from Aristophanes' plays in the original Ancient Greek.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GRE 431. Herodotus. 3 Credit Hours.

Readings in ancient Greek from Herodotus, the "father of history."

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GRE 491. Directed Readings. 1-3 Credit Hours.

Content to be determined by faculty member and registering student(s).

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GRE 691. Directed Readings in Greek for Graduate Students. 3.00 Credit Hours.

Independent study in Ancient Greek, thought, literature, and culture.

Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

Haitian Creole (HAI)

HAI 101. Elementary Haitian Creole I. 3 Credit Hours.

Development of basic listening, speaking, reading and writing skills; focus on conversation and the grammatical fundamentals of Haitian Creole.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HAI 102. Elementary Haitian Creole II. 3 Credit Hours.

Basic listening, speaking, reading and writing skills developed in Elementary Haitian Creole 101. Students will produce more complex grammatical structures in oral and written presentations, and focus on improvement of pronunciation.

Prerequisite: HAI 101.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HAI 195. Transfer Credit. 1-3 Credit Hours.

Awarded for 100-level course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: CNC.

Typically Offered: Fall, Spring, & Summer.

HAI 201. Intermediate Haitian Creole I. 3 Credit Hours.

Basic listening, speaking, reading and writing skills developed in Elementary Haitian Creole 102. Continued development of communicative abilities and introduction to the cultural practices, family values, and social and environmental issues of Haiti. Include both oral and written components.

Prerequisite: HAI 102.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HAI 202. Intermediate Haitian Creole II. 3 Credit Hours.

Emphasis will be on speaking, listening, reading, and writing activities. In addition to the instruction of Haitian Creole, students will have a better understanding of the Haitian culture, society, and beliefs, which are an important part of this class experience. Furthermore, to help students understand the relationship between the spoken and the written forms of the language, the course will be taught entirely in Haitian Creole. While gaining an understanding of the Haitian culture and its people, students in HAI 202 will learn how to avoid cross-cultural conflicts by developing awareness for common cultural issues and beliefs associated with healthcare, education, environment, religion.

Prerequisite: HAI 201.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HAI 295. Transfer Credit. 1-3 Credit Hours.

Awarded for 200-level course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: CNC.

Typically Offered: Fall, Spring, & Summer.

HAI 395. Transfer Credit. 1-3 Credit Hours.

Awarded for 300-level course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: CNC.

Typically Offered: Fall, Spring, & Summer.

HAI 495. Transfer Credit. 1-3 Credit Hours.

Awarded for 400-level course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: CNC.

Typically Offered: Fall, Spring, & Summer.

HAI 625. Haitian Creole for Graduate Research I. 0 Credit Hours.

Basic listening, speaking, reading, and writing skills; focus on conversation and the grammatical fundamentals of Haitian Creole.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

HAI 626. Haitian Creole for Graduate Research II. 0 Credit Hours.

Continuation of 625 listening, speaking, reading, and writing skills; focus on conversation and the grammatical fundamentals of Haitian Creole.

Prerequisite: HAI 625.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HAI 641. Elementary HAI I for Graduate Students. 0 Credit Hours.

Designed to develop graduate students' communicative abilities in speaking, reading, writing, and comprehending Haitian Creole, and to provide an introduction to Haitian Studies.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

HAI 642. Elementary HAI II for Graduate Students. 0 Credit Hours.

Continuation of HAI 641. Designed to develop graduate students' communicative abilities in speaking, reading, writing, and comprehending Haitian Creole, and continued engagement with Haitian Studies.

Prerequisite: HAI 641.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

HAI 651. Intermediate HAI I for Graduate Research. 0 Credit Hours.

For graduate students with some previous study of Haitian Creole at the elementary level. Designed to enhance graduate students' communication skills in Haitian Creole at the intermediate level. Intended primarily for students who will carry out research in Haiti.

Prerequisite: HAI 642.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

HAI 652. Intermediate HAI II for Graduate Research. 0 Credit Hours.

For graduate students with some previous study of Haitian Creole at the intermediate level. Designed to enhance graduate students' communication skills in Haitian Creole at the high-intermediate level. Intended primarily for students who will carry out research in Haiti.

Prerequisite: HAI 651.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

Health Sector Management

HSM 270. Introduction to Health Sector Management and Policy. 3 Credit Hours.

This course develops a basic understanding of the elements of the health services industry in the United States. It examines the history of the components of our health care system and moves on to current and potential future system dynamics. Sectors include physician services, hospital and hospital systems, long-term care providers, mental health services, and pharmaceutical services. Basic concepts associated with the financing of health services are examined as well as indemnity insurance, capitation, and the role of managed care, consumer driven health care and integrated delivery systems in theory and practice. The role of government is explored as well.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

HSM 310. Population Health. 3 Credit Hours.

Population health is emerging as a field of study of health determinants, a concept of health, and a goal of achieving measurable improvements in the health of a defined population. These populations can encompass geographic regions, such as communities, states, or nations, but can also be groups, including groups based on need, employees, ethnicity, members of Accountable Care Organizations, and other populations with relevance to policymakers. In this course, students will gain an understanding of the determinants of population health, health outcomes of the population, and policies and interventions that link the determinants and outcomes.

Prerequisite: HSM 270 Or MGT 270.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HSM 320. Health Care Demand and Supply. 3 Credit Hours.

This course will introduce students to the fundamental concepts of health economics, and cover the principles of microeconomic theory as they relate to health care. No previous background in economics is assumed. The basic framework of this course is to introduce students to individual behavior (demand), firm behavior (supply), and how these forces interact to determine market prices that allocate scarce health care resources. Students will learn how policies, such as the Affordable Care Act of 2010, can be viewed via the lens of health economics.

Prerequisite: HSM 270.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HSM 350. Production and Consumption of Health and Health Care. 3 Credit Hours.

All societies must deal with the allocation of scarce resources. In our society, primary reliance is placed on markets and prices. This course will introduce students to the application of economic principles and production and consumption of health and health care. Some of the major topics include the production of and demand for health, demand for and supply of medical care, uncertainty and insurance, models of physician and hospital behavior, externalities and market failure, the role of government in health and medical care, and economic evaluation of health care services and interventions. Health economics concepts will be linked to current policy debates at the state and federal levels. Numerous real-world applications and case studies will be presented to demonstrate decision-making techniques for health care organizations and consumers.

Prerequisite: HSM 270 Or MGT 270 And ECO 211 And ECO 212.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HSM 388. Health Care Marketing. 3 Credit Hours.

This course is devoted to the study of healthcare marketing and the healthcare system involved with the task of marketing products and services. As healthcare reform continues to evolve current market conditions transform existing organizations into new practices, this course will focus on the how managed care providers, hospitals, physicians, federal government, device and pharmaceutical companies will embrace the new patient centered market in their marketing strategies.

Non-Business students AND Health Sector Management and Policy minors AND Sophomore Standing or higher.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HSM 460. Health Care Law and Ethics. 3 Credit Hours.

This course is designed to offer students an appreciation of the legal foundations and ethical considerations in healthcare administration in the U.S. The readings and classroom discussion assist the student in (1) understanding the legal framework of relationships and institutions in healthcare, and (2) appreciating some of the particularly delicate ethical implications of decision-making in this field. Case study will promote the ability to analyze both. Special emphasis is placed on discussion of ethical issues in healthcare administration, including access to care, allocation of scarce resources and privacy.

Non-Business students AND Health Sector Management and Policy minors AND Sophomore Standing or higher.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HSM 496. Directed Studies in Health Sector Management and Policy. 1-3 Credit Hours.

Supervised readings, individual research project, or independent investigation of selected non-STEM related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HSM 497. Directed Studies in Health Sector Management and Policy. 1-3 Credit Hours.

Supervised readings, individual research project or independent investigation of selected STEM-related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HSM 498. Special Topics in Health Sector Management and Policy. 3 Credit Hours.

Special topics in selected non-STEM areas of Health Management and Policy.

Requisite: Sophomore Standing or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HSM 499. Special Topics in Health Sector Management and Policy. 3 Credit Hours.

Special topics in selected STEM areas of Health Management and Policy.

Requisite: Sophomore Standing or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HSM 555. Health Management and Policy Departmental Honors Research. 3 Credit Hours.

Research project to fulfill requirements for Departmental Honors in Health Management and Policy.

Components: THI.

Grading: SUS.

Typically Offered: Offered by Announcement Only.

HSM 601. Essentials of Health Care Administration. 1-4 Credit Hours.

The goal of this course is to develop an understanding of the basic elements of the health services industry in the United States. A systems approach will be used utilizing a historical perspective as a basis and moving on to current and potential future system dynamics. This course will allow the student to understand the health care system, including physician services, hospital and hospital systems, long-term care providers, mental health services, and pharmaceutical services. Health care labor markets will be examined. Various elements associated with the financing of health services will be analyzed as well including indemnity insurance, capitation, and the role of managed care, accountable care organizations, and consumer driven health care in theory and practice. The role of government and its impact on our health care system will be understood as well. Alternative health care systems looked at from a global perspective will be analyzed, and possible application to the U.S. health care system will be evaluated.

Components: LEC.

Grading: GRD.

HSM 610. Management and Economics of Healthcare. 3 Credit Hours.

The purpose of this course is to provide the student insight into organizational and economic aspects of the various sectors and agents within the health care industry. Exploration will allow us to understand how such aspects in turn affect performance measured in terms of managerial, economic and ethical criteria. The course will explore issues associated with scarce resource allocation and distributional justice. We will examine the organizational structure, behavior, interactions between structure and behavior, and the resultant performance of the various sectors of the health care industry, including models of hospital management behavior, operations of alternative services markets, and the market for physicians and physician service as well as the market for nurses. Aspects of risk will be examined and the impact of governance on economic behavior and performance in the marketplace.

Components: LEC.

Grading: GRD.

HSM 620. Population Health. 1-4 Credit Hours.

Role of public and private institution in health promotion, health care delivery, and health insurance. Explains how and why government and society attempt to influence health-related behaviors and the resulting effects on individuals' lives.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HSM 640. Health and Medical Decision Making. 1-4 Credit Hours.

Population health is emerging as a field of study of health determinants, a concept of health, and a goal of achieving measurable improvements in the health of a defined population. In this course, students will gain an understanding of the determinants of population health, health outcomes of the population, and policies and interventions that link the determinants and outcomes while exploring the business case for health.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HSM 655. Public Policy and Health. 1-4 Credit Hours.

Role of public and private institution in health promotion, health care delivery, and health insurance. Explains how and why government and society attempt to influence health-related behaviors and the resulting effects on individuals' lives.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HSM 683. Professional Skills Development. 2-4 Credit Hours.

This seminar immerses students in experiences designed to enhance their professional skills. The course incorporates presentations by health care administrators including lectures on current topics in health care administration and health services research, facilitates faculty and student interaction via discussion of relevant peer-reviewed journal articles, and includes site visits to health care facilities.

Components: LEC.

Grading: GRD.

HSM 684. Analysis of Health Care Delivery and Policy. 2-3 Credit Hours.

All societies must deal with the allocation of scarce resources. In our society, primary reliance is placed on markets and prices. Since most students are unfamiliar with the methods of decision-making from a manager's perspective, we will discuss criteria to evaluate the allocation of resources and analyze the behavior of two of the principal actors – consumers and firms. A careful analysis of the choices made by individuals, organizations, and governments will demonstrate that sensible "choice architecture" can successfully nudge people toward better decisions without restricting their freedom of choice. The principles of economic and management decision-making will be presented in the context of health care systems and markets. We will use numerous real-world issues and case studies to demonstrate decision-making techniques, especially for health care organizations and consumers.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HSM 687. Health Care Organization, Economics, and Ethics. 3 Credit Hours.

The course will allow understanding and analysis of issues associated with scarce resource allocation and the evolutionary movement from patient focused to population focused to patient centered care including Accountable Care Organizations and the concept of value vs. volume. Students will understand and analyze the organizational structure, behavior, interactions between structure and behavior, and the resultant performance of the various sectors of the health care industry, including models of hospital management behavior, operations of alternative services markets, physicians as small businesses, group practices and employees, the market for physician services, the market for nurses, the issue of risk and risk sharing, and the impact of government on organization, behavior and performance in the market place. Principles of medical ethics will be learned and understood and application, analysis and creative resolution of ethical dilemmas will be undertaken. The relationships between organization, incentives, and ethical performance will be analyzed using modern issues and cases that health care managers, policy makers and providers face in the industry today. The interrelationships between managerial and system goals, economic parameters, and moral and ethical considerations will be applied and analyzed as well.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HSM 699. Health Care Administration Internship. 2-4 Credit Hours.

The internship is an integral part of the Health Care Administration curriculum and will be planned in terms of the intern's abilities, needs, and interests. The internship experience is strengthened by the relationships with the SBA's Health Advisory Board, Executive MBA in Health Sector Management and Policy program alumni, and the University of Miami Hospital. Students preparing for an internship experience must be active in planning their internship by seeking advice and assistance from their faculty advisor.

Components: IND.

Grading: GRD.

Typically Offered: Spring.

Healthcare Sciences (HCS)

HCS 200. Summer Scholars Program. 3 Credit Hours.

This course focuses on current health care issues and the health care system as well as the future direction of health care.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

HCS 202. Introductory Statistics in Health Care. 3 Credit Hours.

Application of descriptive and inferential statistics. Principles and methods of summarizing data including tables, graphs, percentile ranks, central tendency, variability, normal distribution. Basic concepts of probability, hypothesis testing, and analysis of variance. Examples and problems from nursing, health sciences and public health.

Corequisite: MTH 101. Or Requisite: ALEKS > or = 55 or SAT Score > or = 630 or ACT > or = 28.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

HCS 207. Introduction to Pharmacology. 3 Credit Hours.

Introduction to the basic principles of therapeutic pharmacology. Special consideration of cultural beliefs and folk medicine included. Emphasis is on the understanding of the different classes of drugs and their application in various health care settings.

Prerequisites: BIL 150 and CHM 103 or 111 or 121 and HCS 212/215.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HCS 212. Human Anatomy. 3 Credit Hours.

Emphasis is on the understanding of the anatomical compartments of the human body and the ability to identify the bony skeleton, musculatures, blood vessels and internal organs of each compartment.

Prerequisite: BIL 150.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

HCS 213. Human Anatomy Laboratory. 1 Credit Hour.

Laboratory to accompany HCS 212.

Pre or Corequisite: HCS 212.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

HCS 215. Principles of Systemic Physiology. 3 Credit Hours.

Emphasis is on the understanding of the Physiology and selected Pathophysiology of various organs and systems.

Prerequisite: HCS 212. And Pre or Corequisite: CHM 111 or CHM 121 or CHM 103 and CHM 113 or CHM 105.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

HCS 216. Principles of Systemic Physiology Laboratory. 1 Credit Hour.

Laboratory to accompany HCS 215

Pre or Corequisite: HCS 215.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

HCS 217. Medical Terminology. 1 Credit Hour.

This course will assist the student in understanding the principles of medical word building in order to develop the extensive medical vocabulary used in health care professions. Students receive a thorough grounding in basic medical terminology through the study of root words, prefixes and suffixes. The course emphasizes correct pronunciation, spelling and use of medical terms.

Prerequisite: BIL 150.

Components: CLN.

Grading: GRD.

Typically Offered: Fall.

HCS 352. Biological Principles of Public Health. 3 Credit Hours.

This course examines the biological basis and pathogenesis of diseases from a public health perspective and describes the impact on populations. This course also presents the basic scientific and biomedical concepts of modern public health problems and explores in depth mechanisms and models of the major categories of disease. The biologic principles presented in this course are foundations to developing and implementing public health disease prevention, control, or management programs.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HCS 355. Global Nutrition. 3 Credit Hours.

This course examines nutrition related public health issues in the global setting. Nutrition related morbidity and mortality, etiologic factors, and population-focused strategies to address these issues are covered. Food relief and nutrition policies and programs at the local, national and international levels are examined. Current scientific research in international nutrition is reviewed from an epidemiological perspective.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HCS 402. Global Health Disparities Research. 3 Credit Hours.

This is a 4 week intensive educational experience that prepares students to be successful conducting supervised health disparities research as part of the MHIRT program at a foreign institution, disseminating findings, and applying to graduate school. The training program is broken into a preparation phase (3 weeks prior to leaving to their host country), and a dissemination phase (1 week after they return). Students will be working as a research assistant at a foreign site for eight weeks in between the preparation and dissemination phases of this training program. Students will learn about the influence of culture and healthcare policy on health and health disparities, research design, statistics, communicating research findings and careers in health disparities research.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HCS 461. Health Disparities Research Practicum. 1-4 Credit Hours.

This course is designed to provide opportunities for students across all levels of higher education to participate in health disparities research. Students will be mentored by a health disparities researcher with an active research project. Objectives will be established by the research mentor and the student according to educational level, interests and opportunities. Students will be incorporated into the research team and expected to attend project meetings. They will also be expected to participate in scholarly work that could contribute to the success of the project. Examples of scholarly work include co-authoring research papers and presentations, developing recruitment materials, assisting in compiling/developing data collection measures, or any other product deemed appropriate by the mentor.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HCS 465. Public Health Statistics and Data Management. 3 Credit Hours.

This course is designed to give students an opportunity to apply basic principles of statistics and data management in public health. Students will learn to use statistical techniques to answer questions relating to the morbidity and mortality of health conditions and the efficacy and effectiveness of public health interventions.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HCS 487. Global Health Practicum. 3 Credit Hours.

Collaborative clinical venture between UM/SON and an International School of Nursing. Students will exchange supervised western clinical experiences, knowledge and skills for the care of clients and families in specialty areas, including MedSurg, Surgery, ICU and/or Emergency nursing units. Students will apply and synthesize basic science knowledge and skills that foster ethical, legal and culturally specific health care.

Components: PRA.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HCS 499. Selected Topics. 6.00 Credit Hours.

A selected topics course is offered as needed in order to present emerging issues or specialized topics that are not part of the regular curriculum.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HCS 600. Public Health Information. 3 Credit Hours.

This course will provide an overview of important health issues as they relate to public health and epidemiology. Principles and methods of public health surveillance and epidemiology will also be presented. Through hands-on assignments students will learn how patient databases and computer information systems and technologies may be utilized to address important issues in public health.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

HCS 601. Legal, Ethical and Regulatory Issues in Health Informatics. 3 Credit Hours.

This course will address the legal, social, ethical and regulatory issues that impact the use health information systems and computerized technology for health care delivery. In addition to an in-depth examination of the legal and regulatory standards that govern health informatics, emphasis will be placed on ethical decision-making and the importance of mitigating liability through the application of various risk-management strategies. Case studies will be used extensively to afford students an opportunity to apply the information they have learned in the course.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HCS 603. Healthcare Databases: Design, Development and Clinical Application. 3 Credit Hours.

This course focuses database systems, development, design, and implementation within the context of health care. Special emphasis is placed on the role of database applications for continuous quality improvement and regulatory compliance. Students will design a relational database applicable to informatics leadership responsibilities.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HCS 604. System Life Cycle/Project Management. 3 Credit Hours.

This course covers the identification and development of information technology plans for projects supporting the health care organization's business objectives and all activities required in the initiating, planning, executing, controlling, and closing phases of the project's life cycle. This course is intended to provide the body of knowledge and best practices necessary for a new Consultant, Business Analyst or Project Manager to successfully perform his/her responsibilities on an IT enterprise project.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HCS 605. Health Information Exchange. 3 Credit Hours.

This course is designed to introduce the informatics professional to the basic principles of Health Information Exchange. The focus will be on interoperability between ambulatory clinics, acute care facilities and long-term care; electronic health records; electronic prescribing systems and consumer health care informatics. Special emphasis is placed on the role of HIE in the American Recovery and Reinvestment Act.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HCS 608. Information Security. 3 Credit Hours.

This course will emphasize the importance of information security and discuss strategies and legal requirements for restricting data access and ensuring privacy. Such strategies will include discussion of industry standards for physical security, as well as hardware and software safeguards. The challenges that new and emerging technologies will present with regards to data integrity and security will also be emphasized.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HCS 609. Research Methods and Applications for Health Informatics. 3 Credit Hours.

In this course students will be introduced to basic research methodology and design for health sciences and medicine as well as role informatics can play in research related to medicine, public health and biomedical sciences. Students will also be exposed to bioinformatics, a discipline of informatics concerned with the acquisition, storage, and application of use of information for biomedical research. The course will include research seminars given by guest speakers who are conducting research using health informatics.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

HCS 610. Elective in Health Informatics. 3 Credit Hours.

The elective course is designed to expose students to various aspects of health informatics and its many applications.

Components: DIL.

Grading: GRD.

Typically Offered: Summer.

HCS 611. Capstone in Health Informatics. 3 Credit Hours.

In the capstone course students will assimilate and apply the knowledge and skills they have acquired from their course work in the program. Students will complete a non-thesis capstone project that requires them to critically analyze and solve a problem they might realistically encounter in health informatics using their skills in data acquisition, project management, data presentation, and risk management. Students will also develop and submit an electronic portfolio that contains key examples of work they have generated during their time in the program along with a self-reflection of that work.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HCS 658. Structure and Processes in Health Care Organization and Health Care Policy. 3 Credit Hours.

An exploration of health care organizations and health care policy, and how change is affected in both. Health care policy and planning to address health care disparities at the local, state, and federal levels will be explored. Organizational diagnosis, organizational change, and ethical dimension of public policy formulations and implementation will be highlighted.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HCS 685. Introduction to Health Informatics. 3 Credit Hours.

The course develops an understanding of the role of information systems and technology within a healthcare organization. It examines the business and technical issues associated with the selection, deployment and use of health informatics, both in the clinical and back office areas. Health informatics, for the purpose of the course, is defined as the convergence of information technology, information management, and health care, at various levels, ranging from simple data gathering, to the design and implementation of new health care information systems.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

Hebrew (HEB)

HEB 101. Elementary Hebrew I. 3 Credit Hours.

Grammatical principles: reading for comprehension and conversation; oral and written exercises. Normally, closed to students who have completed two years of high school Hebrew. Closed to native speakers.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HEB 102. Elementary Hebrew II. 3 Credit Hours.

Continuation of HEB 101. Closed to native speakers.

Prerequisite: HEB 101.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HEB 195. Transfer Credit. 1-3 Credit Hours.

Awarded for 100-level course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: CNC.

Typically Offered: Fall, Spring, & Summer.

HEB 201. Intermediate Hebrew I. 3 Credit Hours.

Integrated grammar review. Diverse selection of readings: stories, plays, essays, interviews. Practice in speaking and in writing. Class conducted in Hebrew. Closed to native speakers.

Prerequisite: HEB 102.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HEB 202. Intermediate Hebrew II. 3 Credit Hours.

Continuation of 201 with oral presentations, compositions, and grammar review. Class conducted in Hebrew. Closed to native speakers.

Prerequisite: HEB 201.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HEB 295. Transfer Credit. 1-3 Credit Hours.

Awarded for 200-level course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: CNC.

Typically Offered: Fall, Spring, & Summer.

HEB 395. Transfer Credit. 1-3 Credit Hours.

Awarded for 300-level course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: CNC.

Typically Offered: Fall, Spring, & Summer.

HEB 495. Transfer Credit. 1-3 Credit Hours.

Awarded for 400-level course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: CNC.

Typically Offered: Fall, Spring, & Summer.

HEB 641. Elementary HEB I for Graduate Students. 0 Credit Hours.

Designed to develop graduate students' communicative abilities in speaking, reading, writing, and comprehending Hebrew, and to provide an introduction to the Hebrew-speaking world.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

HEB 642. Elementary Heb II for Graduate Students. 0 Credit Hours.

Continuation of HEB 641. Designed to develop graduate students' communicative abilities in speaking, reading, writing, and comprehending Hebrew, and continued study of the Hebrew-speaking world.

Prerequisite: HEB 641.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

HEB 651. Intermediate HEB I for Graduate Research. 0 Credit Hours.

For graduate students with previous study of elementary-level Hebrew. Designed to enhance graduate students' communication skills in the Hebrew language at the intermediate level. Intended principally for students who will carry out research in Judaic Studies or related to the Hebrew-speaking world.

Prerequisite: HAI 642.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

HEB 652. Intermediate HEB II for Graduate Research. 0 Credit Hours.

For students with previous study of Hebrew at the intermediate level. Designed to enhance graduate students' communication skills in the Hebrew language at the high-intermediate level. Intended principally for students who will carry out research in Judaic Studies or related to the Hebrew-speaking world.

Prerequisite: HEB 651.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

History (HIS)

HIS 101. History of the United States, I (to 1877). 3 Credit Hours.

Political, social, and economic development of the United States through Reconstruction.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

HIS 102. History of the United States, II (since 1877). 3 Credit Hours.

Political, social, and economic development of the United States since Reconstruction.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

HIS 121. Emperors, Shoguns, and Concubines: East Asia, Origins-1800. 3 Credit Hours.

Examines the history of East Asia to 1800.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 122. The Dragon and the Rising Sun: East Asia, 1800-Present. 3 Credit Hours.

Examines the history of East Asia since 1800.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 131. Development of Western Civilization, I. 3 Credit Hours.

A survey of the development of the West from the emergence of the earliest civilizations in Mesopotamia and Egypt to the formation of modern European nation states in the sixteenth and seventeenth centuries, emphasizing the ideas, values, events, and institutions that have influenced the present.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

HIS 132. The Birth of Modernity: Europe 1648 to the Present. 3 Credit Hours.

A survey of the development of the West from the formation of modern European nation states in the sixteenth and seventeenth centuries to the present, emphasizing the rivalry of European powers, the impact of European expansion, the effect of industrialism and revolution upon Western society, and the role of the New World.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

HIS 161. History of Latin America, I (to 1824). 3 Credit Hours.

A survey of Spanish and Portuguese America from the pre-Columbian era through the end of the colonial period.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HIS 162. History of Modern Latin America (1800-present). 3 Credit Hours.

A survey of the national period in Latin American history, emphasizing the political and social issues in the transition from colonialism to nationhood.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HIS 192. Studies in History. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

HIS 193. Studies in History. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

HIS 194. Studies in History. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

HIS 201. History of Africa I (to 1800). 3 Credit Hours.

History of Africa before the Colonial period, emphasizing sources for the study of African history, African political and social institutions, the slave trade, and "legitimate" trade and markets.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 202. History of Africa, II (since 1800). 3 Credit Hours.

The emergence of modern Africa from about 1800 to the present, emphasizing the European conquest of Africa, African responses to colonialism, independence and the post-independence period.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HIS 203. The African Diaspora in South Florida. 3 Credit Hours.

The African Diaspora in South Florida through a close analyses of three junctures in the history of the Black experience: The slave trade, abolition and emancipation; the migration of various African-descended peoples from the Caribbean and Latin America to South Florida; and the more recent arrival of people from the Africa.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HIS 209. African-American History to 1877. 3 Credit Hours.

History of people of African descent in the United States from African roots to 1877.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HIS 210. African-American History, 1877-PRESENT. 3 Credit Hours.

History of people of African descent in the United States from 1877 to present.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HIS 211. Epics, Gods, Kings: Pre-Mofern India 2500 B.C.E. to 1600 A.D.. 3 Credit Hours.

This course will explore the history, culture and political economy of India tracing it thematically from 2500 B.C.E. to 1600 A.D.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HIS 212. The Mughals and the British (1526-1947). 3 Credit Hours.

A survey of historical India, covering the modern states of India, Pakistan, and Bangladesh, that highlights social and religious identities, modernization, nationalism, the "women question," partition, and independence.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 220. History of European Sexuality. 3 Credit Hours.

The history of European sexuality from the Greeks to the present day.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

HIS 223. Medicine and Society: From the Ancient World to the 21st Century. 3 Credit Hours.

Medicine and society presents a historical survey of the development of western medicine and public health from the earliest times to the present.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 225. History of the Modern Business Enterprise. 3 Credit Hours.

This course examines the history of big business in the nineteenth and twentieth centuries. Drawing often on individual firm histories, its focus will be a comparative study of the big business experience in America, Europe, Asia, and the imperial world.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 227. Nationalism: Love thy Brother, Hate thy Neighbor?. 3 Credit Hours.

This lower-division lecture course will offer an introductory thematic overview to the ideas and politics of nationalism throughout the globe.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

HIS 228. Holy War and Toleration in Western Religious Traditions. 3 Credit Hours.

An exploration of concepts of Holy War and Just War and of traditions of tolerance and intolerance in Judaism, Christianity, and Islam, from ancient times to the present.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HIS 229. Consumer Society: A Global History. 3 Credit Hours.

In the United States we are surrounded today with a seemingly limitless variety of consumer goods, and we are offered constant reminders of the increasingly globalized nature of modern life. Too often, however, such commentary reflects a shocking lack of perspective about the origins and evolution of these trends. This course encourages a deeper understanding by exploring the history of how consumer societies emerged across the world. Spanning an arc from the eighteenth century to the present, the course looks at the social and cultural impact of global consumables (ranging from food to automobiles) in the Americas, Europe, Asia, and other regions. The readings and lectures consider the social, ethical, and environmental problems associated with the rise of global consumption.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HIS 246. Origins and History of the Russian Revolution. 3 Credit Hours.

The background and events of the Russian Revolution.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 253. History of Mexico: Guns and Tortillas, or, How Mexico Became Mexican. 3 Credit Hours.

Culture and ideology of the Mexican Revolution.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 254. History of the Cold War in the Americas.. 3 Credit Hours.

Focusing on the late 1940s to late 1980s, this course examines the origins, evolution, and enduring consequences of the Cold War in the Americas. It explores key issues such as the emergence of new nationalist currents, the impact of U.S. intervention, competing visions of revolution and counter-revolution, and shifting definitions of democracy.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HIS 261. Women's America I (Nineteenth Century). 3 Credit Hours.

An introduction to the major currents in American women's history during the Nineteenth Century.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HIS 262. Women's America II (Twentieth Century). 3 Credit Hours.

An introduction to the major currents in American women's history during the Twentieth Century.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HIS 266. The Founders: Fact and Fiction. 3 Credit Hours.

Explores the history of the American founders.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 267. Making History. 3 Credit Hours.

Focus is on a series of topics that allow students to deepen their understanding of the worlds we have often lost or about which we know little by approaching them in innovative historical ways. Topics will include Material Culture in Early America, Oral History and the Making of the Modern World, Caribbean Rituals, Law and Society in the Americas, as well as Early Modern Religious Cultures, among others. Recommended for potential History majors and minors, as students will benefit from limited class sizes, receive one-on-one attention from professors, and much emphasis is placed on learning researching and writing skills.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

HIS 271. American Political History Since 1960: Policy , Public History, and Modern Media. 3 Credit Hours.

Explores selective elements of modern American politics, policy studies, media, and public history, predominantly since 1960.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 282. The History of Zionism. 3 Credit Hours.

The religious, cultural, historical, political and social underpinnings of the development of Zionism that led to the creation of the State of Israel. Through readings, analysis of speeches and essays, exploration of films and the internet, the class will move through time from the origins of the Zionist idea to the present.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 284. The Second World War.. 3 Credit Hours.

The Second World War: Analysis of its origins, the military and political course of events, and its consequences, such as the cold war.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 285. The origins and history of the Third Reich.. 3 Credit Hours.

This lecture course offers a comprehensive survey of the history of Nazi Germany from early pre-fascist movements before World War I to the final ignominious collapse of the Nazi regime in 1945.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 290. The Beach: The Beach as Place, Space, and Event in World Historical Context. 3 Credit Hours.

History of the beach as a particular geographic place and space in human history in comparative world context. Themes and issues include tourism, socio-economic factors in beach access, beach-related industries, immigration, cultural contact, exploration, "beach life," surfing, ethnicity, segregation, and politics of real estate.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HIS 291. The Sea in History. 3 Credit Hours.

Human relations with the sea from prehistoric times to the present and across the globe. It will look at the spread of peoples, ideas, religions, and goods across the seas, and the role of networks, empires, and navies in this history.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HIS 292. Transfer Credits. 1-5 Credit Hours.

Courses for which there is no direct equivalent.

Components: LEC.

Grading: GRD.

HIS 293. Transfer Credits. 1-5 Credit Hours.

Courses for which there is no direct equivalent.

Components: LEC.

Grading: GRD.

HIS 294. Transfer Credits. 1-5 Credit Hours.

Courses for which there is no direct equivalent.

Components: LEC.

Grading: GRD.

HIS 296. Special Topics. 3 Credit Hours.

Content varies by semester and is indicated parenthetically following course title in class schedules.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

HIS 297. History Internship. 3 Credit Hours.

Provides history students with the opportunity to obtain credit for an internship with the approval and under the close supervision of a faculty member.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 301. Miami Engagement: History, Media, and Social Change. 3 Credit Hours.

This seminar-style course will examine the history, theory, and practice of civic engagement, community history, and social change in the United States. We will look at four overlapping areas of interest: the meanings of civic engagement in American history; the roles of history and memory in shaping place and community; the role of the media in structuring stories about history and community; and grass-roots activism and its role in reinvigorating and reshaping public spheres in America. We will pay particular attention to the factors that have promoted inclusion and engagement, as well as those that have led to disenfranchisement and alienation. We will look at efforts by local, national, and even global activists to connect to communities large and small. And we will ask how the issues of memory, place, community, civil society, and global citizenship form a matrix around which to understand and shape broad-based collaboration among students, faculty, community residents, and civic organizations.

Components: SEM.

Grading: GRD.

Typically Offered: Spring.

HIS 302. History on Trial: Law and American Society. 3 Credit Hours.

The relationship between social history, the law, and politics in American society. More than legal history, this is a problem-based, interdisciplinary course that bridges history, political science, legal studies, and sociology to understand the historical context that informs major lawsuits that shaped American Jurisprudence.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HIS 304. Slavery and Cinema: Commodifying History in Hollywood. 3 Credit Hours.

Spanning a century of films, slavery is a topic that attracts filmmakers and audiences alike, creating some of the most acclaimed blockbusters and the most disparaged films in the industry. Within this broad sweep, the course will engage two animating questions: 1) in what ways, and why, have depictions of slavery changed over a century and 2) what is at stake when mass culture commodifies history?

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HIS 306. The Modern Near East. 3 Credit Hours.

The Near East since 1453, emphasizing the Ottoman Empire, Arab nationalism and Zionism, the Mandate System, and the Arab-Israeli conflict.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 308. West Africa since 1000 A.D.. 3 Credit Hours.

The Sudanic empires, the spread of Islam, the slave and legitimate trades, the establishment of European colonies, and the struggle for independence.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 309. History of Southern Africa. 3 Credit Hours.

The establishment of the Dutch settlements and the apartheid system, African responses to European domination, and the collapse of apartheid and the emergence of a multi-racial South Africa.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 310. Africa in Cuba/Cuba in Africa: Slave Trade to Cuban Internationalist Missions in Africa.. 3 Credit Hours.

The relationship between Cuba and Africa from the period of the slave trade to the late 1990s.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 311. Gandhi and the making of Modern India. 3 Credit Hours.

This course will study Gandhi's practice of civil disobedience and non-violent movement against the British Empire, as well as his theories and praxis regarding moral discipline, critique of modernity and alternative vision of civil society and policy.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HIS 312. Femininity, Masculinity, and Sexual Politics in Indian History. 3 Credit Hours.

A thematic study of gender and sex in ancient, medieval, and modern India, focusing on social constructions of identity, sexual politics, social and religious gender roles, and contested histories of womanhood.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 313. Bollywood and Beyond: Religion, Gender and Politics in South Asian Film. 3 Credit Hours.

Themes in Indian society through the lens of Indian cinema - both Bollywood and the regional film industry. The important themes covered are: the complex narratives of caste, myth, politics, gender, sexuality, and the challenges of modernity in India.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

HIS 315. Imperial China. 3 Credit Hours.

History of China from the origins of Chinese civilization to 1798.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 316. Modern China. 3 Credit Hours.

Rise of a Superpower.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 317. History of the Caribbean, I. 3 Credit Hours.

Caribbean history major topics, debates, and themes from the fifteenth to early nineteenth centuries; the centrality of the Caribbean to larger world histories of conquest, colonialism, slavery and emancipation, capitalism, migration, religious transformation, republicanism, and nation-state formation.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 318. Modern Caribbean History. 3 Credit Hours.

Major topics, debates, and themes in Caribbean history from the late eighteenth century to the present.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

HIS 325. The Early Middle Ages: Europe, 450-1095. 3 Credit Hours.

Western historical development from the collapse of the classical ancient world to Europe's emergence as a distinct and viable civilization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 326. The High and Late Middle Ages: Europe 1095-1500. 3 Credit Hours.

The mature medieval civilization and its transformation.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 327. The Renaissance in Italy. 3 Credit Hours.

Cultural, social, economic, religious and political life in Renaissance Italy.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 328. Reformation Europe. 3 Credit Hours.

The history of the 16th-century religious revolution known as the Reformation. Course focuses on its causes, development, and especially its political, social, and cultural consequences.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 330. The Scientific Revolution. 3 Credit Hours.

Transition between medieval science and Newtonian physics, focusing on sixteenth- and seventeenth-century developments in medicine, cosmology, physics, and scientific method.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 331. England to the Accession of the Tudor Dynasty (to 1485). 3 Credit Hours.

The Creation of England and its development during the medieval period.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 332. England, 1485-1688. 3 Credit Hours.

England under the Tudors and Stuarts. Topics include: the monarchs and the monarchy; relations between England, Ireland, and Scotland; Henry VIII and the English Reformation; puritanism and society; popular culture; the city of London; the English Civil War; the "Glorious Revolution" of 1688.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 333. England and the Empire in the Age of Queen Victoria (1815-1901). 3 Credit Hours.

Victorian Britain, emphasizing the manners, politics, and empire building, and the exploitation and humanitarianism of the century of Pax Britannica.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 334. Britain and the Commonwealth in the Twentieth Century. 3 Credit Hours.

The challenges and changes in Britain and its overseas dominions in the century of total war.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 335. The French Revolution and Napoleon (1789-1815). 3 Credit Hours.

An analysis of French history from the Revolution to the collapse of the Napoleonic Empire, stressing the passing of feudalism in France.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 336. Modern French History. 3 Credit Hours.

This course covers the political, social, cultural, economic, and military history of France since 1870. Major themes include power and decline, the weight of historical memories, issues of French identity, and the central role of the French state.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 337. Modern European Jewish History. 3 Credit Hours.

Jewish history in Europe since 1789, emphasizing the effects of the Enlightenment, nationalism and Nazism, Jewish life in Western Europe and in the communist bloc, and the impact of Israel.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 338. The Holocaust in Historical Perspective. 3 Credit Hours.

The evolution and implementation of the theory of racialism in imperial Germany and the Third Reich.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 339. Germany from the Reformation to 1815. 3 Credit Hours.

German history from the Reformation through the reorganization of the German states after the Napoleonic Wars (1815) with emphasis on the federal character of early modern Germany, religion, and topics of social and economic change.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 340. History of Modern Germany since 1815. 3 Credit Hours.

German history since 1815 concentrating on the political and social history of the German Empire, Germany's role in World War I, the Weimar Republic and the rise of Hitler, Nazi Germany, and developments since 1945.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 341. History of the Third Reich. 3 Credit Hours.

A comprehensive survey of the history of Nazi Germany from the pre-fascist movements before World War I to the final collapse of the Nazi regime in 1945.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 343. Ages of Gold and Silver: An Economic and Social History of Europe, 1450-1750. 3 Credit Hours.

Economic and social history of Europe in the early modern period. Writing intensive course.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 346. Imperial Russia. 3 Credit Hours.

Domestic political, social, economic and cultural developments, and foreign affairs in Russia from the beginning of the 19th century to the Russian Revolution of 1917.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 347. Soviet Union and Post-Soviet Russia. 3 Credit Hours.

The Soviet Union from the Russian Revolution (1917) to the disintegration of the USSR (1991), and the post-Soviet period to the present.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 348. Europe in the Age of Hitler and Stalin. 3 Credit Hours.

This course covers European history between 1914 and 1945. Principal topics include the experience of two world wars, the rise of fascism and communism, the challenge of democracy, and the failure to secure a lasting peace.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 349. European Diplomatic History from Bismarck to the Cold War. 3 Credit Hours.

European Diplomatic History from the Revolutions of 1848 to the Cold War period.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 350. Europe and the World in Modern Times. 3 Credit Hours.

This course examines European relations with the wider world over the past several centuries. It combines the perspectives of the history of European exploration and expansion, imperialism and decolonization, global transport and trade, world wars, and globalization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 351. Science and Society. 3 Credit Hours.

The relationships between science and society, historically and in contemporary life.

Components: LEC.

Grading: CNC.

Typically Offered: Offered by Announcement Only.

HIS 352. The Inquisition. 3 Credit Hours.

History of the Inquisition: 1200-1800.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 353. History of Cuba. 3 Credit Hours.

The development of the Cuban nation, emphasizing the nineteenth and twentieth centuries and the Castro revolution. This course will concentrate on studying "Cuba After Castro". We will analyze various scenarios for "change" and what implications these will have for the next administration in Washington DC as well as in other parts of the world.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 354. Latin America's Urban Explosion: 1900-2010. 3 Credit Hours.

Examines major facets of Latin America's urban transformation, 1900-2010. Studies urbanization from the perspectives of multiple disciplines including architecture, photography, art history, music, cultural studies and political science. Major themes include: architectural modernization and cultural change; industrialization and the emergence of professional sports; rural-urban migration and the proliferation of shanty towns; the emergence of mass politics; the expansion of the informal sectors; and the growth of social violence, drugs and crime.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HIS 355. Modern Brazil. 3 Credit Hours.

The history and culture of modern Brazil.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

HIS 356. History of Argentina's Civilization, Barbarism, and Power.. 3 Credit Hours.

How did a country that was supposedly so prosperous and advanced become a land of perennial crisis? Countless observers have posed variations on this question in seeking to make sense of the ?Argentine riddle.? This class will provide students with an introduction to the fascinating history of Argentina. We will reject pat explanations of the ?riddle? to examine instead the array of cultural, political, and economic forces that have shaped Argentine society.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

HIS 357. Social History of Latin America. 3 Credit Hours.

Demographic changes, race and ethnic relations, immigration, and urbanization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 359. Caribbean Intellectual History. 3 Credit Hours.

Nineteenth and twentieth-century Caribbean political and social thought. Connects the history of ideas to the history of social movements in the region. Links international, intellectual, political and artistic currents.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HIS 360. Modern Latin America Through Film. 3 Credit Hours.

Analysis of films with regard to their historical value and their impact on forming historical perceptions about modern Latin America.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

HIS 361. American Colonial History (1607-1763). 3 Credit Hours.

History of the British mainland colonies from the establishment of Jamestown to the end of the French and Indian War.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 362. The American Revolution (1763-1783). 3 Credit Hours.

The political, social, and constitutional issues that culminated in the Declaration of Independence, and the achievement of American nationhood.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 363. The Early Republic (1783-1850). 3 Credit Hours.

A study of the constitutional, political, territorial, economic, and social development of the United States from the end of the American Revolution to the Compromise of 1850.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 364. Civil War and Reconstruction (1850-1877). 3 Credit Hours.

A study of the origins of the American Civil War, emphasizing the economic, political and social, as well as military aspects of the conflict, and the course and consequence of the Reconstruction period.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 365. Emergence of Modern America (1877-1917). 3 Credit Hours.

United States from the end of Reconstruction to the First World War.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 366. America in Crisis (1917-1945). 3 Credit Hours.

The United States from World War I through World War II.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 367. Contemporary America. 3 Credit Hours.

The United States since World War II.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 368. Nature and the Environment in American History. 3 Credit Hours.

Shifting attitudes toward nature and the environment in American history; the rise of environmentalism and changes in public policy related to environmental conservation and preservation.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 369. Introduction to Urban America. 3 Credit Hours.

The changing role of the city in American history. The built environment. The interaction of the built environment and the lives of residents.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 370. Storied Pasts: 19th-Century U.S. History and Literature. 3 Credit Hours.

19th-century American intellectual and cultural history through the lens of literature. Analyzing key works of fiction, poetry and philosophy as both literary texts and historical sources, we will seek to discover how the changing themes and forms of nineteenth-century literature shaped and/or reflected larger intellectual, political and social currents. Students will read novels by authors such as Hawthorne, Melville, Twain, Jewett, Gilman, James, Wharton, and Crane, alongside historical material.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 371. Immigration, Race and Ethnicity in American History. 3 Credit Hours.

Migration and immigration in 19th- and 20th-century in the United States. How Americans have understood themselves as part of a multicultural society, and how ethnic and racial identities have been defined throughout American history.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 372. The Sixties. 3 Credit Hours.

The culture and history of the 1960s in the United States through writings, film, music, and the experience of faculty members who participated in important events during this era of major conflict and change.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 373. The Civil Rights Movement. 3 Credit Hours.

This course explores the modern Civil Rights Movement, one of the most profound occurrences in the history of the United States of America, and examines how it reshaped the nation, from politics and the economy to social relations and cultural values.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 374. History of Feminism. 3 Credit Hours.

History of feminism with a focus on the United States.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 376. American Legal and Constitutional History. 3 Credit Hours.

The development of legal thought and practice in the context of American politics, economy and ideology during the twentieth century. Special consideration will be given to social movements and their treatment under the rule of law.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 377. Sport in American History. 3 Credit Hours.

The role of sport in American culture. Sports relation to urban growth, professionalism, ethnic identity and assimilation, nationalism, and consumption.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 379. History of the Old South (1607-1861). 3 Credit Hours.

The American South from Jamestown to secession, emphasizing the development of plantation society, the rise of internal and external conflict, and the shaping of the idea of the "Old" South.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 380. The New South (since 1877). 3 Credit Hours.

History of the U.S. South from "Redemption" to the present, emphasizing Populism, Progressivism, the idea of a "New" South, and the civil rights movement.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 381. History of Florida. 3 Credit Hours.

Florida from its discovery, exploration, and colonization to the present.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 382. Ideas and Culture in Early American History. 3.00 Credit Hours.

Intellectual and cultural history in America from the colonial period to the Civil War, focusing on developments in religion, philosophy, political and social theory, and the arts.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HIS 383. Ideas and Culture in Modern United States History. 3 Credit Hours.

American Social Movements.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 385. White Man's Burden: Building the US Empire Before 1914. 3 Credit Hours.

American statesmen long asserted they bore a "white man's burden" to "uplift and civilize" the globe. This course explores the ideology of U.S. Empire to understand how the nation went from thirteen colonies to a continental and global power.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HIS 388. The Vietnam War. 3 Credit Hours.

U.S. involvement in Vietnam from 1945 to 1973, emphasizing the diplomatic and military components.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 389. Nineteenth-Century Europe: Barricades, Borders, and Bourgeoisie. 3 Credit Hours.

Survey of 19th-century Europe from the French Revolution to World War I, focusing on political and cultural history.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HIS 390. Europe after Hitler. 3 Credit Hours.

Survey of European History from the end of World War II, focusing on political and cultural developments.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 391. The History of Everyday Life. 3 Credit Hours.

The History of everyday life in early modern Europe (ca. 1500-1700). We will study how Europeans experienced and made sense of their environment, their communities, relationships, time, the self, the stages of life, food, drugs, work, and recreation.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

HIS 392. Transfer Credits. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

HIS 393. Transfer Credits. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

HIS 394. Transfer Credits. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

HIS 395. World War I. 3 Credit Hours.

The military and political history of the First World War (1914-1918), beginning with a survey of military and naval developments in the early 20th Century and the diplomatic background of the war.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 396. Special Topics. 3 Credit Hours.

Content varies by semester and is indicated parenthetically following course title in class schedules.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

HIS 397. History Internship. 3 Credit Hours.

Provides history students with the opportunity to obtain credit for an internship with the approval and under the close supervision of a faculty member.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 401. Directed Readings in African History. 1-3 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

HIS 411. Directed Readings in Asian History. 1-3 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

HIS 412. Mahatma Gandhi and Martin Luther King Jr. A Call to Civic Engagement. 3 Credit Hours.

Selected works of M.K. Gandhi and Martin Luther King Jr. and their legacies and impact on the field of community service and civic engagement. The class will be organized into three modules - 1) academic learning inside the classroom, 2) work on similar themes in the community, 3) reflections of civic engagement before, during, and after conclusion of modules. Through a detailed study of Gandhi and King's writings, speeches, archival and visual materials we will explore their theories and praxis of engaged citizenry, political, social and economic justice. Students will be paired with City Year Miami based in Miami-Dade County that works in areas of education access and closing the gap in marginalized communities.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HIS 421. Directed Readings in European History. 1-3 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

HIS 447. Global History of Communism. 3 Credit Hours.

The evolution of both Marxian theory and communist societies. How are Marxism-Leninism, Stalinism, Maoism, and other schools of thought different from one another and from the writings of Karl Marx and Friedrich Engels? What is the history of the global communist movement in the 20th century, and during the Cold War in particular? We will discuss the Soviet Union, as well as other case studies from around the world to explore the diversity of the socialist world and its cultural, intellectual, economic, and political networks. Students will develop skills in analytical thought, vocal and written expression, and GIS tools that they will use in a StoryMap final assignment.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HIS 451. Directed Readings in Latin-American History. 1-3 Credit Hours.

Grading: GRD.

Typically Offered: Fall & Spring.

HIS 461. Directed Readings in United States History. 1-3 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

HIS 491. Directed Readings in Comparative History. 1-3 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

HIS 501. Studies in African History. 3 Credit Hours.

Selected topics in African history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 511. Studies in Asian History. 3 Credit Hours.

Selected topics in Asian history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 515. Studies in Chinese History. 3 Credit Hours.

Selected topics in Chinese history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 531. Studies in European History. 3 Credit Hours.

Selected topics in European history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 534. Studies in Ancient History. 3 Credit Hours.

Selected topics in Ancient history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 536. Studies in Medieval History. 3 Credit Hours.

Selected topics in Medieval history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 538. Studies in Early Modern European History. 3 Credit Hours.

Selected topics in European history before the French Revolution. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 544. Studies in Modern European History. 3 Credit Hours.

Selected topics in European history after the French Revolution. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 551. Studies in Latin American History. 3 Credit Hours.

Selected topics in Latin-American history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 553. Studies in Colonial Latin American History. 3 Credit Hours.

Selected topics in the colonial period of Latin-American history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 554. Studies in Modern Latin American History. 3 Credit Hours.

Selected topics in Latin-American history before and after Independence. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 561. Studies in United States History. 3 Credit Hours.

Selected topics in United States history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 564. Studies in American Intellectual and Cultural History. 3 Credit Hours.

Selected topics in American intellectual and cultural history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 565. Studies in American Political and Diplomatic History. 3 Credit Hours.

Selected topics in American political and diplomatic history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 569. Studies in African-American History. 3 Credit Hours.

Selected topics in African-American history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 570. Studies in Public History. 3 Credit Hours.

Selected topics in public history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 591. Studies in Comparative History. 3 Credit Hours.

Selected topics in Comparative History. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

HIS 592. Transfer Credits. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

HIS 594. Transfer Credits. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

HIS 595. Studies in Visual History. 3 Credit Hours.

Selected topics in the use of photographs and other visual evidence for historical purposes. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 597. Semester 1 of 2-semester senior honors thesis program. 3 Credit Hours.

A demanding and intellectually exciting two-semester honors track. It affords an opportunity for students to pursue their particular research interest and to engage with a lively cohort of other honors students in an organized seminar format.

Components: SEM.

Grading: GRD.

Typically Offered: Spring.

HIS 598. Second semester in a 2-semester senior honors thesis program. 3 Credit Hours.

The second semester of a demanding and intellectually exciting two-semester honors track. In this the second semester students will focus on interpreting their original research, presenting initial findings in the seminar format, writing a rough draft of the thesis essay, and revising that draft in order to complete and present their final honors thesis essay at the end of the semester.

Components: THI.

Grading: GRD.

Typically Offered: Fall.

HIS 599. Independent Research. 3 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 602. Studies in African History. 3 Credit Hours.

Selected topics in African history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 611. Studies in Asian History. 3 Credit Hours.

Selected topics in Asian history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 632. Studies in Early Modern European History. 3 Credit Hours.

Selected topics in European history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

HIS 633. Seminar in European History. 3 Credit Hours.

Selected topics in European History.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 634. Seminar in Ancient History. 3 Credit Hours.

Selected topics in Ancient History.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 636. Studies in Medieval History. 3 Credit Hours.

Selected topics in Medieval history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 638. Studies in Early Modern European History. 3 Credit Hours.

Selected topics in European history before the French Revolution. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

HIS 641. Field Preparation: Colonial Latin America. 3 Credit Hours.

An introduction to central historical issues and historiographical debates in the field of Colonial Latin America.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 646. Studies in Modern European History. 3 Credit Hours.

Selected topics in European history after the French Revolution. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 652. Studies in Latin American History. 3 Credit Hours.

Selected topics in Latin-American history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 654. Studies in Modern Latin American History. 3 Credit Hours.

Selected topics in Latin-American history before and after Independence. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 655. Studies in Colonial Latin American History. 3 Credit Hours.

Selected topics in the colonial period of Latin-American history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 662. Studies in United States History. 3 Credit Hours.

Selected topics in United States history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

HIS 664. Studies in American Intellectual and Cultural History. 3 Credit Hours.

Selected topics in American intellectual and cultural history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule.

Typically Offered: Offered by Announcement Only.

HIS 711. Nineteenth-Century United States Field Preparation. 3 Credit Hours.

Examination of some of the major themes recent developments and debates in nineteenth-century United States historiography from the Early Republic through Reconstruction. The seminar does not alone constitute sufficient preparation for the comprehensive exam in Modern American history, but it does seek to introduce students to some of the important trends in recent scholarly work.

Components: SEM.

Grading: GRD.

HIS 712. Field Preparation: Modern America. 3 Credit Hours.

An introduction to central historical issues and historiographical debates in the field of Modern America.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 713. Field Preparation: Medieval Europe. 3 Credit Hours.

The central historical issues and historiographical debates in the field of Medieval European History.

Components: SEM.

Grading: GRD.

Typically Offered: Spring.

HIS 714. Field Preparation: Early Modern Europe. 3 Credit Hours.

An introduction to central historical issues and historiographical debates in the field of Early Modern Europe.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 715. Modern Europe Field Preparation. 3 Credit Hours.

This course is designed to prepare students for the Modern European Field Comprehensive Exam by introducing them to leading works and diverse approaches in the study, writing, and interpretation of modern European history. The choice of readings will be selective, but in range and significance they will provide students with a foundation for further command of the field.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 716. Caribbean Field Prep. 3 Credit Hours.

Graduate student preparation for a comprehensive exam area in Caribbean history, centering on the late eighteenth through early twentieth centuries. Students will have the chance to read, discuss, and place in conversation influential works on topics including: Caribbean slavery and anti-slavery; the Haitian Revolution and its reverberations; "second slavery" in Cuba; emancipation in the British Caribbean and across the region; struggles on the parts of formerly enslaved people and their descendants over land, labor, and citizenship; the arrival and experience of Indian, Chinese, and West African indentured workers in pre-and post-emancipation Caribbean societies; the Cuban wars of independence; and the U.S. annexation of Puerto Rico and occupations of Cuba, Haiti, and the Dominican Republic. The course will focus on major themes, debates, and questions in the historiographical literature and is designed to encourage comparative analysis.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

HIS 718. Field Preparation: Modern Latin America. 3 Credit Hours.

An introduction to central historical issues and historiographical debates in the field of Modern Latin America.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 721. Historiography. 3 Credit Hours.

The philosophy, theory, and practice of history.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 722. Dissertation Prospectus Seminar. 3 Credit Hours.

Students will develop a strong dissertation prospectus. This class will operate as a writing workshop, for which each student will write and revise several draft of a prospectus that will be critiqued by the student's advisor, the professor teaching the course, and fellow students. At the end of the semester, students will give oral presentation about their proposed projects to the department.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

HIS 760. Seminar in Latin-American History. 3 Credit Hours.

Selected topics in Latin-American History.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 761. Seminar in United States History. 3 Credit Hours.

Selected topics in United States History.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 762. History as a Profession. 3 Credit Hours.

Practical experience for graduate students in designing courses; preparing lectures, conference papers and scholarly publications; and in applying for jobs and research grants

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

HIS 763. Science, Magic, and Medicine in the Early Modern World. 3 Credit Hours.

To prepare graduate students for their comprehensive examinations in early modern history by introducing them to leading works, diverse approaches, and new methodologies in the history of science, magic, and medicine. The choice of readings will be selective and may change over the course of time, but in any case the course materials will provide students with a good foundation for further exploration of the field.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 810. Master's Thesis. 1-6 Credit Hours.

The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

HIS 820. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in HIS 710 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

HIS 825. Continuous Registration--Master's Study. 1 Credit Hour.

To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

HIS 830. Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor, but for not less than a total of 12 hours. Up to 12 hours may be taken in a regular semester, but not more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

HIS 840. Post-Candidacy Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ph.D. who have advanced to candidacy. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of HIS 740 may be taken in a regular semester, nor more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

HIS 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the Ph.D. and D.A., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

Honors and Academic Enhancement (HON)

HON 323. Topics in Humanities. 1-3 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Fall.

HON 330. Books That Matter. 3 Credit Hours.

Especially designed for Foote Fellows, the BOOKS THAT MATTER seminar offers an opportunity to study major works of non-fiction in a seminar-style setting, under the guidance of faculty members from across the University. We examine important works which, by means of their strong, connected argumentation, challenge the way we respond to, interpret, and shape reality. Emphasis in the course falls mainly on the logical structure embedded deep within the text, and less on content per se, so that a student's effort is not directed towards a reading of "great books" but rather the discovery of "significant arguments." Our rationale is to address a fundamental need in education too often lost in the midst of other demands, interests, and requirements: by learning to read, question, and enjoy important intellectual studies of the past and present, students will be able to read, question, and enjoy what will be the influential books of non-fiction published in their lifetime, whether in public affairs, science, social science, economics, history, film and media studies, philosophy, psychology, etc. The course provides standards of measurement and value by which students can gauge how and why books succeed or fail on hard logical grounds.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

HON 333. Topics in Social Science. 1-3 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Fall.

HON 351. Topics in the Natural Sciences. 1-3 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Fall.

Human Genetics and Genomics (HGG)

HGG 601. Seminar/Journal Club. 1 Credit Hour.

All active HGG students participate in the Seminar/Journal Club each semester. Sessions rotate between seminar, journal club, and research-in-progress. Twice per month, students attend the HGG seminar speaker series. Once per month, students present their own work in short research-in-progress talks. Once per month, students participate in a journal club, featuring student-led discussions of published papers.

Components: SEM.

Grading: SUS.

Typically Offered: Fall & Spring.

HGG 621. Design and Analysis of Human Genomic Studies. 3 Credit Hours.

This course covers study designs and analytic approaches commonly used in human genetic and genomic studies. Major topic areas include 1) study designs for genetic epidemiology; 2) experimental designs for assessing variation in DNA sequence, RNA expression, and epigenetic marks; 3) analytic approaches for genetic association, gene expression, and epigenetic data; 4) evaluation of epistasis, gene-environment interaction, and application of systems biology approaches to high-dimensional genomic data. Class sessions will feature a mixture of lecture, discussion of primary literature, and hands-on computational workshops.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HGG 630. Variation and Disease. 2 Credit Hours.

This course provides an overview of the science of genetics, including historical and modern approaches, with emphasis on the underlying mechanisms of human genomic variation and their relation to human disease. After taking this course the student will be able to list the different types of human genomic variation, explain the mechanism by which each occurs, and discuss the consequences of the variation. Where appropriate, specific examples of human disorders will be related to the variation. Topics include: chromosomal, biochemical, and DNA sequence variation, mitochondrial genome variation and epigenetic effects. The course structure consists of a combination of lectures and discussion of primary literature.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HGG 631. Genes in Populations. 3 Credit Hours.

The course explores the relevant history and principals governing the behavior of genes in human populations. Topics include Hardy-Weinberg equilibrium; Mendelian, complex and quantitative traits; principals of selection and change in populations, neutral theory; and molecular evolution of gene families. The course is lecture based with supplemental readings.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

HGG 640. Family Studies and Genetic Analysis. 2 Credit Hours.

This course will cover the analysis of genetic data in family based data sets. Topics include: heritability, segregation analysis and linkage analysis. This course includes a computer lab component in which students will learn to use the relevant analytic programs.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HGG 650. Advanced Topics in Molecular Genetics. 3 Credit Hours.

Topics include human microRNAs, the neurobiology of aging, structural variation, modern genome technology, among others. The course structure consists of discussions and analysis of primary literature.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HGG 660. Bioinformatics Theory and Practice. 3 Credit Hours.

This course covers a gradient of basic to advanced bioinformatics theory, data mining, and analysis. Each class will include a lecture to explain the concepts, followed by a hands-on lab session with worksheets and exercises. Early lectures will cover in-depth searching of the major databases, alignments, and motif discovery. These themes will recur with the applications of these and other algorithms to gene expression analysis, next generation sequencing data and its analysis, and analysis of variation. Freely available web resources will be used wherever possible, and the students will learn how to use Python for some bioinformatics applications.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HGG 680. Genome Ethics and Public Policy. 3 Credit Hours.

This course will explore current and future applications of human genetics as they pertain to the health and identity of individuals and society. Topics will include the ethical dilemmas facing clinicians, researchers, and the public pertaining to the use of genetic information in healthcare; the role of the media and other extemporaneous factors in influencing the use of human genetic information, and responsible conduct of research specifically with regard to issues unique to genetics. The emphasis will be on real examples and experiences, with a primary goal of helping students explore how their role as a researcher and/or citizen will influence and be influenced by genetic information. The course is largely discussion based, but will include extensive readings from the literature and online videos.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

HGG 681. Human Genetics Clinical Rotation. 1 Credit Hour.

The HGG graduate students participate in medical genetics clinic post clinical rounds, metabolic-sign out and journal clubs. During clinic students observe clinical evaluations and counseling, and participate in weekly didactic sessions with faculty and residents.

Components: CLN.

Grading: SUS.

Typically Offered: Fall & Spring.

HGG 689. Human Genetics and Genomics Teaching Practicum. 1 Credit Hour.

HGG students serve one semester as a teaching assistant for a core course. This experience will include giving at least one lecture, leading small group discussions, and holding regular office hours to discuss student questions. This will generally take place in the student's third or fourth year, and will be graded as a one-credit pass-fail course.

Components: PRA.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

HGG 830. Doctoral Dissertation - Pre-Candidacy. 1-12 Credit Hours.

1-12 credit course for Doctoral candidates working on pre-candidacy dissertation.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

HGG 840. Doctoral Dissertation - Post Candidacy. 1-12 Credit Hours.

1-12 credit course for Doctoral Candidates working on dissertation post candidacy.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

HGG 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for Ph.D. after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Industrial Engineering (IEN)

IEN 111. Introduction to Engineering I. 3 Credit Hours.

Use of engineering tools and computer techniques for problem solving, data acquisition, analysis, presentation, software design, and computer aided drafting. Development of design skills through several design and building competitions. Introduction to professional ethics, intellectual property, ethics, intellectual property rights, and an introduction to use of MATLAB, AutoCAD, and programming in C++.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

IEN 112. Introduction to Engineering II. 2 Credit Hours.

Continuation of IEN 111. An overview of Industrial Engineering concepts and issues important to the design and operation of industrial and service systems. Students will learn the use of software tools developed to enhance the Industrial Engineer's ability such as database management, high level programming languages, electronic spreadsheets, and computer graphics.

Prerequisite: IEN 111.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 201. Methods Analysis and Work Measurement. 3 Credit Hours.

Design of improved methods for doing work based on effective human effort. Time standardization of productive operations by work measurement, predetermined time systems, and activity sampling are discussed. Tools and charts for methods analysis are discussed and use of Microsoft Vision is emphasized and reviewed.

Prerequisite: IEN 112.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

IEN 306. Manufacturing Processes. 3 Credit Hours.

Basic and applied sciences in processing of materials. Effects of processing on the manufactured parts, selection of processing methods, and their relation with material properties. Contemporary and non-traditional processes used in manufacturing are also covered.

Prerequisite: CHM 111 or CHM 151 and PHY 205.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

IEN 310. Introduction to Engineering Probability. 3 Credit Hours.

Axioms of probability, discrete and continuous random variables, probability density functions, cumulative distribution function, expectation, conditioning, independence, functions of random variables, multiple random variables, sums of random variables, introduction to statistical analysis, estimation, and hypothesis testing. Cross-listed with EEN 310.

Prerequisite: MTH 162 and Requisite: Junior Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

IEN 311. Applied Probability and Statistics. 3 Credit Hours.

This course covers fundamental probability concepts, random variables, mathematical expectation, discrete and continuous probability distributions, sampling distributions, point and interval estimation, hypothesis testing, and simple linear regression and correlation. The use of Minitab, a statistical software application, is emphasized. Examples are drawn from various disciplines.

Prerequisite: MTH 162.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

IEN 312. Applied Statistical Methods. 3 Credit Hours.

Linear regression, multiple regression, analysis of variance, and design of experiments are discussed. Cross-listed with MAS 312.

Prerequisite: IEN 310 or ECE 310 or IEN 311 or MAS 311 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 351. Industrial Safety Engineering. 3 Credit Hours.

Basic principles of accident prevention and safety engineering approach to the design of mechanical equipment, facilities, and manufacturing processes. Analysis and design of fire prevention procedures and accident control procedures in industry are included.

Requisite: Junior Status or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

IEN 360. Productivity Engineering. 3 Credit Hours.

Definitions and scope of productivity engineering and management. The productivity cycle. Productivity measurement, evaluation, improvement—discussion and examples. Productivity planning and improvement through the application of industrial and systems engineering techniques. Discussion of individual techniques with examples. Application potential of the course in real life situations.

Prerequisite: MTH 162.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 361. Industrial Cost Analysis. 3 Credit Hours.

Analysis of financial statements and cost factors in manufacturing and service systems. Cost accounting methods, job order costing and process costing approaches. Deterministic and probabilistic estimates of cost.

Prerequisite: MTH 162. And IEN 201.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 363. Project Management for Engineers. 3 Credit Hours.

This course will help students develop a basic understanding of the key concepts, theories, tools, and methodologies of project management. Students will be introduced to the different phases of managing projects from conception to termination with particular emphasis on planning, scheduling, resource allocation, monitoring and control. The course will utilize a case-study-based approach in analyzing the techniques and methods of project management.

Requisite: Junior Status or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 372. Emerging Technologies and the Creation of Technological Innovations. 3 Credit Hours.

A variety of emerging technologies will be discussed (nanotechnology, energy technologies, information technologies, biotechnologies, etc). The process of utilization in innovations will be covered.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

IEN 380. Engineering Economy. 3 Credit Hours.

Engineering Economy Fundamentals. Interest and money-time relationship, methods of making economic decisions, risk and uncertainty, sensitivity analysis, selections among multiple alternatives, depreciation, benefit-cost analysis, replacement studies, minimum cost analysis, and related topics.

Prerequisite: MTH 162.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

IEN 399. Internship. 1 Credit Hour.

Practical application of classroom theory through employment with firms offering positions consistent with the student's field of study. Course may be repeated.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

IEN 406. Computer-Aided Manufacturing. 3 Credit Hours.

A comprehensive view of manufacturing with a focus on design, automation, and the use of computers in manufacturing. The topics include computer-aided design, communications, programmable logic controllers, CNC machining, industrial robots, process planning, and computer-integrated manufacturing. Laboratory projects are an integral part of the course.

Prerequisite: CHM 111 or CHM 151 and PHY 205.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 407. Product Design for Manufacturing. 3 Credit Hours.

The different phases of engineering design process. Guided Iteration Methodology for product design. Topics include design for manufacturing (DFM), best practices of product realization, solid modeling using SolidWorks, quality in design, issues in patents, liability and ethics. Engineering design specifications, evaluation methods for design alternatives.

Prerequisite: IEN 406.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 441. Deterministic Models in Operations Research. 3 Credit Hours.

Introduction to deterministic mathematical models with applications to operational problems. Topics include the methodology of operations research, mathematical programming, game theory, network flow-theory, and dynamic programming. Cross-listed with MAS 441.

Prerequisite: MTH 210.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

IEN 442. Stochastic Models in Operations Research. 3 Credit Hours.

Probabilistic models in operations research. Topics include probabilistic inventory models, queuing theory, Markov chains, and probabilistic dynamic programming. Cross-listed with MAS 442.

Prerequisites: IEN 310 or ECE 310 or IEN 311 or MAS 311 and IEN 441 or MAS 441.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 465. Production and Inventory Control. 3 Credit Hours.

Production and inventory management techniques such as forecasting methods, inventory control subject to both known and uncertain demand, aggregate planning, introduction to scheduling, materials requirement planning (MRP), just-in-time (JIT) manufacturing, and introduction to scheduling are covered.

Prerequisite: IEN 310 or ECE 310 or IEN 311 or MAS 311 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

IEN 494. Senior Project. 3 Credit Hours.

Integration of Industrial Engineering principles and techniques in the design and improvement of production and service systems. Course includes preparation of project proposal, data collection, analysis, reporting, and formal presentations.

Prerequisite: IEN 547. And Requisite: Senior Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

IEN 501. Manufacturing Analysis and Design I. 3 Credit Hours.

Analysis of Production Systems stressing diagnosis of problems associated with work measurement, manufacturing methodologies, and their interaction with cost factors.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

IEN 502. Manufacturing Analysis and Design II. 3 Credit Hours.

Analysis of production systems stressing diagnosis of problems of quality and production control, utilizing quantitative techniques and analytical methods.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

IEN 505. Robotics. 3 Credit Hours.

Fundamentals of robotics including kinematics and dynamics, trajectory planning, sensors and actuators, robotic vision, and case studies. Building your own robot is an integral part of hands-on laboratory exercises. Matlab controltoolbox and image analysis toolbox will be extensively used for design and analysis.

Prerequisite: IEN 406.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

IEN 507. Design of Manufacturing Systems. 3 Credit Hours.

State-of-the-art techniques and tools relevant to the design, analysis, and control of modern manufacturing systems. Topics include modeling of manufacturing systems, tools for manufacturing system analysis, manufacturing system planning and scheduling, and lean manufacturing systems.

Prerequisite: IEN 465.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 509. Automated Assembly. 3 Credit Hours.

Fundamentals of automated assembly including parts transfer systems and feeders, parts orientation and grasping techniques, product design for automated assembly (DFA), assembly robots, and performance and economics of assembly systems.

Prerequisite: IEN 406.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

IEN 512. Statistical Quality Control and Quality Management. 3 Credit Hours.

This course addresses the concepts, theories, tools and methodologies employed in the management and improvement of quality. The course examines many of the advance topics in statistical quality control including control charts and process capability studies, acceptance sampling, as well as Quality Function Deployment (QFD) and introduction to reliability. Also covered in the course are Lean Six Sigma methodology, tools and concepts.

Prerequisite: IEN 311 or MAS 311 or IEN 312 or MAS 312.

Components: THI.

Grading: GRD.

Typically Offered: Spring.

IEN 513. Quality Management in Service Organizations. 3 Credit Hours.

Course examines the issues of quality and productivity management in the service sector. Topics covered include the development and use of questionnaires, service industry applications of quality such as in banking, insurance, healthcare, transportation, government, public utilities, and retail trade.

Requisite: Senior Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

 IEN 516. Introduction to Applied Data Analytics. 3 Credit Hours.

This course focuses on some of the most commonly-used data analytics models and covers the basics of data analytics using the open source software R (which is one of the fastest growing open source software platforms). Specific course topics include Data Preprocessing and Cleaning, Fundamentals of R (for basic data analytics tasks), Regression Analysis, Discriminant Analysis & Classification, Segmentation/Clustering, Model Tuning/Selection, Performance Measurement in Data Analytics, and Decision Making with Data. This course provides hands-on skills to engineering graduate students with performing statistical data analysis and decision-making utilizing common types of data sets.

Prerequisite: IEN 442. And IEN 524.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

 IEN 524. Decision Support Systems in Industrial Engineering. 3 Credit Hours.

Theory and application of decision support systems in industrial engineering. Topics include the study of model-based, data-based, knowledge-based, and communication-based decision support systems. Emphasis is placed on the selection process of the appropriate systems for various decision problems in industrial environments.

Requisite: Senior Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

 IEN 547. Computer Simulation Systems. 3 Credit Hours.

Computer simulation and the development of simulation models. Application of discrete and continuous system simulation languages to systems studies is also included.

Prerequisites: IEN 442 or MAS 442.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

 IEN 548. Games and Decision Making. 3 Credit Hours.

This course covers fundamentals of decision theory and game theory. The course is research oriented and a significant part of the grading will be based on students' research. Topics include optimization with multiple variables, constrained optimization, Lagrange relaxation, utility theory, decision making under uncertainty, simultaneous move (Nash) games, sequential decision making, sequential (Stackelberg) games, games with imperfect information, contracting and coordination, and bargaining. This course is composed of lectures, in-class discussions and problem solving, homework assignments, and research paper assignments.

Prerequisite: IEN 310. And IEN 441.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

 IEN 551. Accident Prevention Systems. 3 Credit Hours.

Introduction to the basic principles of accident prevention and how to apply the safety engineering approach to the design of industrial accident prevention systems.

Prerequisite: IEN 351.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

 IEN 554. Applied Computational Biomechanics. 3 Credit Hours.

Students will become familiarized with current tools in the field of computational biomechanics for applications in ergonomics, sports performance, simulations of occupational activities and human movement in general. Through the presentation of case studies and the completion of assignments, students will gain hands-on experience on full-body simulation environments (e.g., OpenSim), biomechanically oriented finite elements packages (e.g., FEBio), and software for reconstruction of human anatomy from medical images (Seg3D).

Prerequisite: IEN 557. Or BME 375.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 557. Ergonomics and Human Factors Engineering. 3 Credit Hours.

The study of human capacities and limitations with emphasis on human performance in system design. Topics include design of displays and controls, workload, job design, human information processing, anthropometry, workplace design, biomechanics, task analysis, and research techniques in human factors engineering. Lecture, 3 hours.

Prerequisite: IEN 312 or MAS 312.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Summer.

IEN 558. Industrial Hygiene I. 3 Credit Hours.

Recognition of occupational chemical health hazards. Evaluation methods and analytical procedures used to determine level of exposure to chemical and toxic hazards. Control measures and compliance with OSHA requirements with special emphasis on industrial ventilation, and other methods of control are included.

Prerequisite: CHM 111 or CHM 151. Requisite: Senior Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

IEN 559. Industrial Hygiene II. 3 Credit Hours.

Recognition of physical occupational health hazards and evaluation methods and instruments used in measuring exposure levels with special emphasis on physical hazards. Protective measures and compliance with OSHA requirements is also included. Lecture, 3 hours.

Prerequisite: CHM 111 or CHM 151. Requisite: Senior Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 568. Materials Handling and Facilities Planning. 3 Credit Hours.

Analysis and design of production and service facilities, emphasis on material handling requirements. Capacity requirements, facility location, layout, storage systems and warehousing are discussed.

Requisite: Senior Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 570. Engineering Management. 3 Credit Hours.

Integrating engineering discipline into the social and economic considerations of managing systems. Tools and techniques used by engineering managers including engineering project life cycle, role playing, communication, decision-making in engineering management, and managing change in engineering organizations are discussed.

Prerequisite: IEN 311 or MAS 311 or IEN 312 or MAS 312.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 571. Engineering Entrepreneurship. 3 Credit Hours.

The conversion of technological know-how and engineering theories into business enterprises. The role of technology in creating wealth, connecting technology with market, the role and characteristics of entrepreneurs, starting a business and the business plan, innovation, industrial and service organizations, and the new business environment.

Requisite: Senior Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

IEN 572. Management of Technological Innovation. 3 Credit Hours.

Engineering, Science and Management Principles contributing to the development of a successful framework for Managing technology with an organization, nationally or internationally. The process of technological innovations, technological planning and forecasting, and socio-economic changes. Prerequisite: Senior or graduate standing.

Requisite: Senior Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Summer.

IEN 590. Special Topics in Industrial Engineering. 1-3 Credit Hours.

Sub-titles describing the topics are shown in parentheses in the class schedule, following the title "Special Topics".

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

IEN 594. Master's Capstone Design Project. 3.00 Credit Hours.

A capstone design project for students in the five-year BSIE/MSIE program. Integration of Industrial Engineering principles and techniques in the design and improvement of production and service systems is emphasized. Offered for students in this program only.

Prerequisite: IEN 547. Requisite: Senior Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

IEN 595. Special Problems. 1-3 Credit Hours.

Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

IEN 596. Special Problems. 1-3 Credit Hours.

Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

IEN 599. Cooperative Education. 1 Credit Hour.

Practical application of classroom theory through alternating semester or summer employment with industries offering positions consistent with the student's field of study. Course may be repeated. Periodic reports and conferences are required.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

IEN 601. Manufacturing Analysis and Design I. 3 Credit Hours.

Analysis of Production Systems stressing diagnosis of problems associated with work measurement, manufacturing methodologies, and their interaction with cost factors.

Prerequisite: IEN 301.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

IEN 602. Manufacturing Analysis and Design II. 3 Credit Hours.

Analysis of production systems stressing diagnosis of problems of quality and production control, utilizing quantitative techniques and analytical methods.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

IEN 605. Robotics. 3 Credit Hours.

Fundamentals of robotics including kinematics and dynamics, trajectory planning, sensors and actuators, robotic vision, and case studies. Building your own robot is an integral part of hands-on laboratory exercises. Matlab control toolbox and image analysis toolbox will be extensively used for design and analysis.

Components: LEC.

Grading: GRD.

IEN 607. Design of Manufacturing Systems. 3 Credit Hours.

State-of-the-art techniques and tools relevant to the design, analysis, and control of modern manufacturing systems. Topics include modeling of manufacturing systems, tools for manufacturing system analysis, manufacturing system planning and scheduling, and lean manufacturing systems. Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 612. Statistical Quality Control and Quality Management. 3 Credit Hours.

This course addresses the concepts, theories, tools and methodologies employed in the management and improvement of quality. The course examines many of the advanced topics in statistical quality control including control charts and process capability studies, acceptance sampling, as well as Quality Function Deployment (QFD) and introduction to reliability. Also covered in the course are Lean Six Sigma methodology, tools and concepts.

Prerequisite: IEN 311 or MAS 311 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 613. Quality Management in Service Organizations. 3 Credit Hours.

Course examines the issues of quality and productivity management in the service sector. Topics covered include the development and use of questionnaires, service industry applications of quality such as in banking, insurance, healthcare, transportation, government, public utilities, and retail trade.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

IEN 616. Introduction to Applied Data Analytics. 3 Credit Hours.

This course focuses on some of the most commonly-used data analytics models and covers the basics of data analytics using the open source software R (which is one of the fastest growing open source software platforms). Specific course topics include Data Preprocessing and Cleaning, Fundamentals of R (for basic data analytics tasks), Regression Analysis, Discriminant Analysis & Classification, Segmentation/Clustering, Model Tuning/Selection, Performance Measurement in Data Analytics, and Decision Making with Data. This course provides hands-on skills to engineering graduate students with performing statistical data analysis and decision-making utilizing common types of data sets.

Prerequisite: IEN 442. And IEN 524.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 624. Decision Support Systems in Industrial Engineering. 3 Credit Hours.

Theory and application of decision support systems in industrial engineering. Topics include the study of model-based, data-based, knowledge-based, and communication-based decision support systems. Emphasis is placed on the selection process of the appropriate systems for various decision problems in industrial environments.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 647. Computer Simulation Systems. 3 Credit Hours.

Computer simulation and the development of simulation models. Application of discrete and continuous system simulation languages to systems studies is also included.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 648. Games and Decision Making. 3 Credit Hours.

This course covers fundamentals of decision theory and game theory. The course is research oriented and a significant part of the grading will be based on students' research. Topics include optimization with multiple variables, constrained optimization, Lagrange relaxation, utility theory, decision making under uncertainty, simultaneous move (Nash) games, sequential decision making, sequential (Stackelberg) games, games with imperfect information, contracting and coordination, and bargaining. This course is composed of lectures, in-class discussions and problem solving, homework assignments, and research paper assignments.

Prerequisite: IEN 310. And IEN 441.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 651. Accident Prevention Systems. 3 Credit Hours.

Introduction to the basic principles of accident prevention and how to apply the safety engineering approach to the design of industrial accident prevention systems

Prerequisites: IEN 311 and IEN 351.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 654. Applied Computational Biomechanics. 3 Credit Hours.

Students will become familiarized with current tools in the field of computational biomechanics for applications in ergonomics, sports performance, simulations of occupational activities and human movement in general. Through the presentation of case studies and the completion of assignments, students will gain hands-on experience on full-body simulation environments (e.g., OpenSim), biomechanically oriented finite elements packages (e.g., FEBio), and software for reconstruction of human anatomy from medical images (Seg3D).

Prerequisite: IEN 557. Or BME 375.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 657. Ergonomics and Human Factors Engineering. 3 Credit Hours.

The study of human capacities and limitations with emphasis on human performance in system design. Topics include design of displays and controls, workload, job design, human information processing, anthropometry, workplace design, biomechanics, task analysis, and research techniques in human factors engineering. Lecture, 3 hours.

Requisite: Graduate Standing.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Summer.

IEN 658. Industrial Hygiene I. 3 Credit Hours.

Recognition of occupational chemical health hazards. Evaluation methods and analytical procedures used to determine level of exposure to chemical and toxic hazards. Control measures and compliance with OSHA requirements with special emphasis on industrial ventilation, and other methods of control are included.

Prerequisite: IEN 557.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

IEN 668. Materials Handling and Facilities Planning. 3 Credit Hours.

Analysis and design of production and service facilities, emphasis on material handling requirements. Capacity requirements, facility location, layout, storage systems and warehousing are discussed

Components: LEC.

Grading: GRD.

IEN 670. Engineering Management. 3 Credit Hours.

Integrating engineering discipline into the social and economic considerations of managing systems. Tools and techniques used by engineering managers including engineering project life cycle, role playing, communication, decision-making in engineering management, and managing change in engineering organizations are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 671. Engineering Entrepreneurship. 3 Credit Hours.

The conversion of technological know-how and engineering theories into business enterprises. The role of technology in creating wealth, connecting technology with market, the role and characteristics of entrepreneurs, starting a business and the business plan, innovation, industrial and service organizations, and the new business environment.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

IEN 672. Management of Technological Innovation. 3 Credit Hours.

Engineering, Science and Management Principles contributing to the development of a successful framework for Managing technology with an organization, nationally or internationally. The process of technological innovations, technological planning and forecasting, and socio-economic changes. Prerequisite: Senior or graduate standing.

Prerequisite: IEN 572.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Summer.

IEN 690. Special Topics in Industrial Engineering. 3 Credit Hours.

Sub-titles describing the topics are shown in parentheses in the class schedule, following the title "Special Topics".

Components: LEC.

Grading: GRD.

IEN 694. Master's Capstone Design Project. 3 Credit Hours.

A capstone design project for students in the five-year BSIE/MSIE program. Integration of Industrial Engineering principles and techniques in the design and improvement of production and service systems is emphasized. Offered for students in this program only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

IEN 695. Special Problems. 1-3 Credit Hours.

Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

IEN 696. Special Problems. 1-3 Credit Hours.

Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

IEN 699. Cooperative Education. 1 Credit Hour.

Practical application of classroom theory through alternating semester or summer employment with industries offering positions consistent with the student's field of study. Course may be repeated. Periodic reports and conferences are required.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

IEN 712. Design of Experiments. 3 Credit Hours.

Design and analysis of experiments, randomized blocks, Latin Squares, factorials, multiple correlation and regression, and application to response surfaces are discussed. 3 hours.

Prerequisite: IEN 311 or MAS 311 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

IEN 713. Applied Regression Analysis. 3 Credit Hours.

Theory and applications of regression based models. Focus will be on empirical model building, estimation, inference and prediction with emphasis on interpretation of results and understanding model assumptions. Key Topics will be linear regression, panel data and time series analysis.

Prerequisite: IEN 311.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

IEN 715. Quality Through Planned Experimentation. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

IEN 716. Advanced Quality Control. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

IEN 742. Linear Programming and Extensions. 3 Credit Hours.

Formulation, solution, postoptimality analysis of linear programming problems; revised simplex, parametric programming, decomposition of large-scale systems. Use of computer packages. Introduction to integer programming, network flows, and nonlinear programming applications.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

IEN 757. Ergonomics and Occupational Biomechanics. 3 Credit Hours.

Effects of human factors in the improvement of performance of systems. Human capacities, capabilities, and limitations as derived from anatomical, physiological, and psychological principles are applied to the design of tools and equipment. Incorporation of all factors into systems design to achieve better system performance is emphasized

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 758. Ergonomics and Special Populations. 3 Credit Hours.

Ergonomic issues relevant to design for older adults and special populations such as the handicapped. Primary emphasis is placed on work environments, transportation and communication systems, and home environments. Topics include cognitive and physiological characteristics of special populations, workplace design, job and equipment design, rehabilitation engineering, clinical ergonomics, and legislation such as the ADA. Lecture, 3 hours.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 760. Productivity Measurement and Evaluation. 3 Credit Hours.

Basic concepts. Productivity measurement approaches at international, national, industry, and company levels. Latest measurement models for manufacturing companies. Relationships between total and partial productivities, profit and total productivity. Productivity evaluation: theory and methodology.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

 IEN 761. Engineering Cost Management. 3 Credit Hours.

Issues of cost management, including activity based costing of engineering projects. A detailed study of how to separate, identify, understand and manage the major activities performed, and how these activities relate to customer needs. Overall view of costs associated with products, processes, and customers.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

 IEN 763. Project Management Techniques. 3 Credit Hours.

Techniques and Tools in Project Management. Use of network flow techniques including PERT/CPM, planning, systems concepts, time management, conflicts, cost and resource control, tradeoff analysis.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

 IEN 764. Supply Chain Management. 3 Credit Hours.

Supply Chain Management focuses on the flow of products, information, and money throughout the supply chain. An overview of issues, opportunities, tools, and approaches is provided. Emphasis is placed on business processes, system dynamics, control, design and re-engineering, and on the relationship between the supply chain and the company's strategic position relative to its clients and its competition. The dimensions of inter- corporate relationships with partners, including decision-making, incentives, and risk are also covered.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

 IEN 765. Advanced Production Systems. 3 Credit Hours.

Quantitative, heuristic and computer methods applied to problems of production planning, work force balancing and capacity expansion. Sequencing and scheduling models. Advanced Material Requirements Planning (MRP II). Just In Time production systems (JIT). Master Production Scheduling (MPS). Optimize Production Technology (OPT). KANBAN production planning system. Learning curve theory. Advanced forecasting and time-series analysis.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

 IEN 772. Strategic Management of Technological Innovation.. 3 Credit Hours.

Advanced topics in the management of technology emphasizing the relationship between technology and competitiveness in the global marketplace. Technology development in the U.S., Japan, and Europe, industrial R & D, strategic technological planning, and conditions for successful implementations. Case studies are used with individual and group assignments. Prerequisite: IEN 572 - Management of Technology or permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

 IEN 791. Industrial Engineering Seminar. 0 Credit Hours.

Oral presentation and discussion of current topics in Industrial Engineering.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

 IEN 792. Professional Communications Skills for Engineering Grad Students. 0 Credit Hours.

This course covers fundamental areas in professional communication for Engineering graduate students. Topic areas include: presenting research at conferences, writing manuscripts for publication, preparing the dissertation, the PhD comprehensive exams, effective teaching and mentoring, and obtaining positions in academia. Through interactive workshops, in- class exercises, brief presentations and assignments, students will have an opportunity to practice and strengthen necessary communication skills, developing collaborations, and developing effective presentation skills.

Components: MOD.

Grading: SUS.

Typically Offered: Fall & Spring.

IEN 794. Master's Project. 3 Credit Hours.

A capstone project for M.S. students in the non-thesis option.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

IEN 795. Special Problems. 1-3 Credit Hours.

Research and/or design projects through an individual investigation of current problems. Offered by special arrangement only.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

IEN 796. Special Problems. 1-3 Credit Hours.

Research and/or design projects through an individual investigation. of current problems. Offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

IEN 799. Advanced Topics. 1-3 Credit Hours.

Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

IEN 810. Master's Thesis. 1-6 Credit Hours.

The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

IEN 820. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in IEN 710 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

IEN 825. Continuous Registration--Master's Study. 1 Credit Hour.

To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

IEN 830. Pre-Candidacy Doctoral Dissertation. 1-12 Credit Hours.

Doctoral dissertation credits taken prior to Ph.D. student's candidacy. The student will enroll for credit as determined by his/her advisor. Not more than 12 hours of IEN 730 may be taken in a regular semester, nor more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

IEN 840. Post-Candidacy Doctoral Dissertation. 1-12 Credit Hours.

Doctoral dissertation credits taken after Ph.D. student has been admitted to candidacy. The student will enroll for credit as determined by his/her advisor. Not more than 12 credits in IEN 740 may be taken in a regular semester, nor more than six credits in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

IEN 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the Ph.D. and D.A., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Instrumental Performance (MIP)

MIP 0B1. Oboe. 2 Credit Hours.

1-hour lesson and 50 minute studio class for oboe students. Technical Requirements: Scales, arpeggios, trills. Appropriate technical exercises. Etudes by Bozza (Gillet, Prestini). Repertoire: Mozart, Telemann, Bach, Poulenc, Vaughan Williams.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 0B3. Oboe. 2 Credit Hours.

1-hour lesson and 50 minute studio class for oboe students. Technical Requirements: Scales, arpeggios, trills. Appropriate technical exercises. Etudes by Bozza (Gillet, Prestini). Repertoire: Mozart, Telemann, Bach, Poulenc, Vaughan Williams.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 0B5. Oboe. 1-4 Credit Hours.

Mastery of technical aspects of oboe performance. Preparation of Masters recital(s) and Oral Defense. Preparation of audition repertoire for further study or professional placement. Related areas such as reed making, specific individualized studies, instrument maintenance, chamber music and orchestral excerpts are also part of the curriculum.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 0B6. Oboe. 1-2 Credit Hours.

Mastery of technical aspects of oboe performance. Preparation of Masters recital(s) and Oral Defense. Preparation of audition repertoire for further study or professional placement. Related areas such as reed making, specific individualized studies, instrument maintenance, chamber music and orchestral excerpts are also part of the curriculum.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 0B7. Oboe. 1-2 Credit Hours.

Continue mastery of technical aspects of oboe performance. Preparation of DMA recitals and Oral Defense. Preparation of audition repertoire for professional placement. An overview of pedagogy materials for performance and teaching use will also be explored.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 1. Brass Forum. 0 Credit Hours.

An informal recital setting and performance class for brass principals and majors with guest and faculty presentations.

Components: FOR.

Grading: CNC.

Typically Offered: Fall & Spring.

MIP 101. Classical Large Ensemble Placeholder. 1 Credit Hour.

Ensemble placeholder course for new students to enroll in before ensemble placement auditions during Frost Orientation. Please note, you will have to drop this course and enroll in your correct ensemble when receive your official ensemble placement from your studio professor or Dr. Rob Carnochan.

Components: ENS.

Grading: GRD.

Typically Offered: Fall.

MIP 102. Classical Chamber Ensemble Placeholder. 1 Credit Hour.

Ensemble placeholder course for new students to enroll in before ensemble placement auditions during Frost Orientation. Please note, you will have to drop this course and enroll in your correct ensemble when receive your official ensemble placement from your studio professor.

Components: ENS.

Grading: GRD.

Typically Offered: Fall.

MIP 120. Class Guitar I for Non-Music Majors. 1 Credit Hour.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 121. Class Guitar I for Jazz Majors. 1 Credit Hour.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 130. Afro-Caribbean Hand Drumming, Level I. 1 Credit Hour.

The study of hand drumming techniques used to perform the music of Africa and the new world African music that originated in the islands of the Caribbean and the countries of Central and Latin America. This class is taught in a workshop format.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 131. Afro-Caribbean Hand Drumming, Level II. 1 Credit Hour.

The study of hand drumming techniques used to perform the music of Africa and the new world African music that originated in the islands of the Caribbean and the countries of Central and Latin America. Level II is a performance ensemble.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 135. Percussion Contemporary Chamber Music. 1 Credit Hour.

Mandatory for all classical percussionists, this course focuses on the contemporary uncondacted chamber music repertoire. The goal is for students to develop and use an advanced listening/communicating skill set, while playing music with others. This course also targets to improve students' capabilities in contemporary music interpretation and performance.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 138. Trombone Choir. 1 Credit Hour.

The study and performance of literature for small and large trombone ensembles.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 139. Brass Chamber Music. 1 Credit Hour.

The study and performance of literature for small ensembles of similar or mixed brass instruments.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 140. Flute Choir. 1 Credit Hour.

Reading, rehearsing, and performing the flute choir repertoire (duets, trios, quartets, quintets).

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 141. Saxophone Ensemble. 1 Credit Hour.

The study and performance of classical and jazz literature for small saxophone ensembles.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 143. Woodwind Chamber Music. 1 Credit Hour.

Exploring the woodwind chamber music repertoire as represented by various combinations of instruments.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 144. Woodwind Chamber Ensemble. 1 Credit Hour.

Woodwind chamber ensemble is designed to give students knowledge of the most important literature for woodwinds through practice, rehearsal, and performance of major works for woodwind chamber ensemble.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 145. String-Keyboard Chamber Music. 1 Credit Hour.

The study and performance of literature from the Baroque Period through the 20th Century for two or more players for string instrumentalists and strings with keyboard.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 169. Band of the Hour Pep Band. 1 Credit Hour.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 170. Marching Band. 1 Credit Hour.

The "Band of the Hour" Marching Band is open to all qualified undergraduate and graduate students, regardless of major. The band performs at all home Miami Hurricane football games and selected away games.

Components: ENS.

Grading: GRD.

Typically Offered: Fall.

MIP 171. Symphonic Winds. 1 Credit Hour.

Symphonic Band is a large wind band that performs significant repertoire for wind and percussion instruments. It is open to all qualified undergraduate and graduate students, regardless of major.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 172. University Band. 1 Credit Hour.

University Band is a large ensemble offering students the opportunity to play standard repertoire of the wind band. This group is open to all wind and percussion players throughout the university, regardless of major.

Components: SEM.

Grading: GRD.

Typically Offered: Spring.

MIP 174. Brass Choir. 1 Credit Hour.

Major works for Brass Choir are studied. Special emphasis is given to orchestral repertoire.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 176. Wind Ensemble. 1 Credit Hour.

This course offers performance opportunities for qualified wind and percussion players. Repertoire includes significant literature written for the small and large wind band.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 180. Symphony Orchestra. 1 Credit Hour.

The Symphony Orchestra performs significant repertoire for large orchestra. It is open to all qualified undergraduate students by audition.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 181. Instrumental Conducting I. 2 Credit Hours.

This course provides practical procedures and materials for beginning instrumental conducting students. Students demonstrate basic conducting patterns, preparations, and releases in all meters.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

MIP 182. Instrumental Conducting II. 2 Credit Hours.

This course provides practical procedures and materials for advancing instrumental conducting students. Students demonstrate refined skill in conducting musical styles and independence of gestures.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MIP 191. Tuba Ensemble. 1 Credit Hour.

The study and performance of compositions and/or transcriptions written for an ensemble of tubas and/or euphoniums.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 192. Classical Guitar Ensemble. 1 Credit Hour.

This course focuses on sightreading, rhythm recognition, and ensemble performance through the study of exercises, scales, and diverse repertoire.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 2. Guitar Forum. 0 Credit Hours.

An informal recital setting and performance class for guitar principals and majors with guest and faculty presentations.

Components: FOR.

Grading: CNC.

Typically Offered: Fall & Spring.

MIP 220. Class Guitar II for Non-music Majors. 1 Credit Hour.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 270. Leadership and Instructional Strategies for Marching Band. 1 Credit Hour.

Prerequisite: MIP 170.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MIP 281. Instrumental Conducting III. 1 Credit Hour.

This course provides a synthesis of the skills demonstrated in Instrumental Conducting I and II while developing error detection skills in common performance errors.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

MIP 282. Instrumental Conducting IV. 1 Credit Hour.

Students demonstrate knowledge of instruments, instrumentation of the wind band and orchestra, and analyze scores for conception, interpretation, rehearsal, and performance.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MIP 307. Skills Lab V: Classical Improvisation. 2 Credit Hours.

Introduce students to the process of improvisation in all styles of classical music.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 308. Skills Lab VI: Composition as Applied Improvisation. 2 Credit Hours.

Moving from the world of improvisation to composition, this course re-focuses musical expression into written form encompassing pre-tonal, tonal and post-tonal techniques through analysis, written improvisation, and model-composition.

Prerequisite: MTC 211 or MTC 240.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

MIP 399. Junior Recital. 1 Credit Hour.

A public recital of one half-hour or more. Course is required of all instrumental performance majors.

Components: PRA.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 407. Skills Lab VII: Basic Conducting/Arranging. 2 Credit Hours.

This course in basic conducting and arranging is designed to acquaint the student by application, with the basic beat, patterns (symmetrical and asymmetrical), preparatory beats, releases, dynamics, fermati, tempo changes, elementary score study and rehearsal techniques. Elements of practical arranging will be explored as students arrange excerpts for their specific skills ensemble that address areas of conducting technique.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

MIP 408. Skills Lab VIII: Culminating Project. 2 Credit Hours.

In this class students will create, perform, and produce a culminating concert event that will incorporate all the various skills they have acquired over the course of the Experiential Music Curriculum. The music for this performance will be written (or arranged), played, and conducted by the students in the skills ensemble, and it will require skills in improvisation, technology, and promotion that have been learned in the previous Skills Ensemble classes. The instructor will work in a consultative and guidance role to help the students develop and produce this performance.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

MIP 493. Special Projects in Instrumental Performance or Conducting. 1-3 Credit Hours.

Advanced individual instruction pertaining to faculty member's area of expertise and student's area of interest. This course includes a culminating project.

Components: IND.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MIP 494. Special Topics in Instrumental Performance or Conducting. 1-3 Credit Hours.

Advanced group/classroom instruction pertaining to faculty member's expertise and students' areas of interest.

Components: SEM.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MIP 499. Senior Recital. 1 Credit Hour.

A public recital of one hour or more. Required of all performance majors.

Components: PRA.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 5. Percussion Forum. 0 Credit Hours.

An informal recital setting and performance class for Percussion principals and majors with guest and faculty presentations.

Components: FOR.

Grading: CNC.

Typically Offered: Fall & Spring.

MIP 540. Reed Making and Maintenance for Oboe and Bassoon. 0 Credit Hours.

One Hour weekly class detailing and experiencing the processing of cane and making if reeds for oboe and bassoon, and the maintenance of those instruments.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 541. Bassoon Repertoire and Pedagogy. 1-2 Credit Hours.

Solo and small ensemble literature of the bassoon since 1600.

Requisite: Music Majors, Upperclass Status or Permission of Instructor.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

MIP 542. Clarinet Repertoire and Pedagogy. 1-2 Credit Hours.

Solo and small ensemble literature of the clarinet since 1600.

Requisite: Music Majors, Upperclass Status or Permission of Instructor.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

MIP 543. Flute Repertoire and Pedagogy. 1-2 Credit Hours.

Solo and small ensemble literature of the flute since 1600.

Requisite: Music Majors, Upperclass Status or Permission of Instructor.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

MIP 544. Oboe Repertoire and Pedagogy. 1-2 Credit Hours.

Solo and small ensemble literature of the oboe since 1600.

Requisite: Music Majors, Upperclass Status or Permission of Instructor.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

MIP 545. Brass Repertoire and Pedagogy. 1-2 Credit Hours.

Solo and small ensemble literature of brass instruments since 1600.

Requisite: Music Majors, Upperclass Status or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MIP 546. Percussion Repertoire and Pedagogy. 1-2 Credit Hours.

Solo and small ensemble literature of percussion instruments since 1600.

Requisite: Music Majors, Upperclass Status or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MIP 547. Saxophone Repertoire and Pedagogy. 1-2 Credit Hours.

Solo and small ensemble literature of the saxophone since 1600.

Requisite: Music Majors, Upperclass Status or Permission of Instructor.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

MIP 548. Guitar Repertoire and Pedagogy. 1-2 Credit Hours.

Solo and small ensemble literature of the guitar since 1600.

Requisite: Music Majors, Upperclass Status or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MIP 549. String Repertoire and Pedagogy. 1-2 Credit Hours.

An exploration of teaching string playing. Areas covered include problem-solving and communication techniques, and practical considerations in establishing a teaching studio. Students participate in hands-on teaching opportunities. Prerequisite: Advanced standing in Music and permission of instructor.

Requisite: Music Majors, Upperclass Status or Permission of Instructor.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

MIP 550. Bach Cello Suites. 1 Credit Hour.

The study and performance of the six suites for unaccompanied cello of Johann Sebastian Bach.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MIP 580. Orchestral Audition Preparation. 1 Credit Hour.

The study of the more difficult excerpts from the orchestral literature for violin, viola, violoncello, or double bass. Course may be repeated for credit.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 593. Special Projects in Instrumental Performance or Conducting. 1-3 Credit Hours.

Advanced individual instruction pertaining to faculty member's area of expertise and student's area of interest. This course includes a culminating project.

Components: IND.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MIP 594. Special Topics in Instrumental Performance or Conducting. 1-3 Credit Hours.

Advanced group/classroom instruction pertaining to faculty member's expertise and students' areas of interest.

Components: SEM.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MIP 640. Reed Making and Maintenance for Oboe and Bassoon. 0 Credit Hours.

One hour week class detailing and experiencing the processing of cane and making of reeds for oboe and bassoon, and the maintenance of those instruments.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 641. Bassoon Repertoire and Pedagogy. 1-2 Credit Hours.

Solo and small ensemble literature of the bassoon since 1600.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

MIP 642. Clarinet Repertoire and Pedagogy. 1-2 Credit Hours.

Solo and small ensemble literature of the clarinet since 1600.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

MIP 643. Flute Repertoire and Pedagogy. 1-2 Credit Hours.

Solo and small ensemble literature of the flute since 1600.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

MIP 644. Oboe Repertoire and Pedagogy. 1-2 Credit Hours.

Solo and small ensemble literature of the oboe since 1600.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

MIP 645. Brass Repertoire and Pedagogy. 1-2 Credit Hours.

Solo and small ensemble literature of brass instruments since 1600.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 646. Percussion Repertoire and Pedagogy. 1-2 Credit Hours.

Solo and small ensemble literature of percussion instruments since 1600.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MIP 647. Saxophone Repertoire and Pedagogy. 1-2 Credit Hours.

Solo and small ensemble literature of the saxophone since 1600.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

MIP 648. Guitar Repertoire and Pedagogy. 1-2 Credit Hours.

Solo and small ensemble literature of the guitar since 1600.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MIP 649. String Repertoire and Pedagogy. 1-2 Credit Hours.

An exploration of teaching string playing. Areas covered include problem-solving and communication techniques, and practical considerations in establishing a teaching studio. Students participate in hands-on teaching opportunities. Prerequisite: Advanced standing in Music and permission of instructor.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

MIP 650. Bach Cello Suites. 1 Credit Hour.

The study and performance of the six suites for unaccompanied cello of Johann Sebastian Bach.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MIP 680. Orchestral Audition Preparation. 1 Credit Hour.

The study of the more difficult excerpts from the orchestral literature for violin, viola, violoncello, or double bass. Course may be repeated for credit.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 693. Special Projects in Instrumental Performance or Conducting. 1-3 Credit Hours.

Advanced individual instruction pertaining to faculty member's area of expertise and student's area of interest. This course includes a culminating project.

Components: IND.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MIP 694. Special Topics in Instrumental Performance or Conducting. 1-3 Credit Hours.

Advanced group/classroom instruction pertaining to faculty member's expertise and students' areas of interest.

Components: ENS.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MIP 7. String Forum. 0 Credit Hours.

An informal recital setting and performance class for string principals and majors with guest and faculty presentations.

Components: FOR.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 701. MM Recital Program Notes Preparation. 1 Credit Hour.

Students prepare extensive, original program notes, with bibliography. These notes will be made available to the audience of the second Masters recital. The notes may focus on the historical, analytical and performance aspects of the repertoire for this recital. Required in MM two-recital degree programs.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MIP 710. Graduate Conducting Seminar. 1-2 Credit Hours.

The graduate conducting seminar is an advanced study of conducting and rehearsal techniques combined with score and ensemble topics. Specific topics vary each semester. May be repeated for credit.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 720. Concepts and Processes of Classical Improvisation. 1 Credit Hour.

Concepts and Processes of Improvisation in classical music

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MIP 730. Afro-Caribbean Hand Drumming, Level I. 1 Credit Hour.

The study of hand drumming techniques used to perform the music of Africa and the new world African music that originated in the islands of the Caribbean and the countries of Central and Latin America. Class is taught as a workshop.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 731. Afro-Caribbean Hand Drumming, Level II. 1 Credit Hour.

The study of hand drumming techniques used to perform the music of Africa and the new world African music that originated in the islands of the Caribbean and the countries of Central and Latin America. Level II is a performance ensemble.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 735. Percussion Contemporary Chamber Music. 1 Credit Hour.

Mandatory for all classical percussionists, this course focuses on the contemporary uncondacted chamber music repertoire. The goal is for students to develop and use an advanced listening/communicating skill set, while playing music with others. This course also targets to improve students' capabilities in contemporary music interpretation and performance.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 738. Trombone Choir. 1 Credit Hour.

The study and performance of literature for small and large trombone ensembles.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 739. Brass Chamber Music. 1 Credit Hour.

The study and performance of literature for small ensembles of similar or mixed brass instruments.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 740. Flute Choir. 1 Credit Hour.

Reading, rehearsing, and performing the flute choir repertoire (duets, trios, quartets, quintets).

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 741. Saxophone Ensemble. 1 Credit Hour.

The study and performance of classical and jazz literature for small saxophone ensembles.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 743. Woodwind Chamber Music. 1 Credit Hour.

Exploring the woodwind chamber music repertoire as represented by various combinations of instruments.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 744. Woodwind Chamber Ensemble. 1 Credit Hour.

Woodwind chamber ensemble is designed to give students knowledge of the most important literature for woodwinds through practice, rehearsal, and performance of major works for woodwind chamber ensemble.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 745. String-Keyboard Chamber Music. 1 Credit Hour.

The study and performance of literature from the Baroque Period through the 20th Century for two or more players for string instrumentalists and strings with keyboard.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 755. Seminar in Baroque Performance. 1 Credit Hour.

Students will present research on compositions representative of the Baroque period. Presentations will include interpretation, style, and historical context of both the composer and the work.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MIP 756. Seminar in Classical Performance. 1 Credit Hour.

Students will present research on compositions representative of the classical period. Presentations will include interpretation, style, and historical context of both the composer and the work.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MIP 757. Seminar in Romantic Performance. 1 Credit Hour.

Students will present research on compositions representative of the Romantic period. Presentations will include interpretation, style, and historical context of both the composer and the work.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MIP 758. Seminar in Contemporary Performance. 1 Credit Hour.

Students will present research on compositions representative of the Contemporary music. Presentations will include interpretation, style, and historical context of both the composer and the work.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MIP 770. Marching Band. 1 Credit Hour.

The "Band of the Hour" Marching Band is open to all qualified undergraduate and graduate students, regardless of major. The band performs at all home Miami Hurricane football games and selected away games.

Components: ENS.

Grading: GRD.

Typically Offered: Fall.

MIP 771. Symphonic Winds. 1 Credit Hour.

Symphonic Band is a large wind band that performs significant repertoire for wind and percussion instruments. It is open to all qualified undergraduate and graduate students, regardless of major.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 774. Brass Choir. 1 Credit Hour.

Major works for Brass Choir are studied. Special emphasis is given to orchestral repertoire.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 776. Wind Ensemble. 1 Credit Hour.

This course offers performance opportunities for qualified wind and percussion players. Repertoire includes significant literature written for the small and large wind band.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 780. Symphony Orchestra. 1 Credit Hour.

The Symphony Orchestra performs significant repertoire for large orchestra. It is open to all qualified graduate students by audition.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 781. Instrumental Conducting Workshop. 2 Credit Hours.

This course provides practical procedures and materials for beginning and advancing conducting students. Students enrolled in the four-semester sequence demonstrate basic conducting techniques, demonstration of instruments and instrumentation of the wind band and orchestra, and analyze scores for conception, interpretations, rehearsal, and performance.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

MIP 782. Instrumental Conducting II. 2 Credit Hours.

This course provides practical procedures and materials for advancing instrumental conducting students. Students demonstrate refined skill in conducting musical styles and independence of gestures.

Prerequisites: MIP 781 or MIP 317.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

MIP 791. Tuba Ensemble. 1 Credit Hour.

The study and performance of compositions and/or transcriptions written for an ensemble of tubas and/or euphoniums.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 792. Classical Guitar Ensemble. 1 Credit Hour.

This course focuses on sightreading, rhythm recognition, and ensemble performance through the study of exercise, scales, and diverse repertoire.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 793. Special Projects in Instrumental Performance or Conducting. 1-3 Credit Hours.

Advanced individual instruction pertaining to faculty member's area of expertise and student's area of interest. This course includes a culminating project.

Components: IND.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MIP 794. Special Projects in Instrumental Performance or Conducting. 1-3 Credit Hours.

Advanced group/classroom instruction pertaining to faculty member's expertise and students' areas of interest.

Components: SEM.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MIP 811. Master's Recital Paper. 1-3 Credit Hours.

The student working on his/her master's recital paper enrolls for credit as determined by his/her advisor. Credit is not awarded until the paper has been accepted.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

MIP 812. Master's Recital. 1 Credit Hour.

A masters recital lasting at least 60 minutes that may include some chamber works but consists primarily of solo pieces. Students are required to write Program Notes.

Components: PRA.

Grading: SUS.

Typically Offered: Fall & Spring.

MIP 813. Master's Second Recital. 1 Credit Hour.

The second recital for those taking the two-recital option in the Master of Music in Instrumental Performance degree.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

MIP 814. Artist Diploma Recital. 1 Credit Hour.

The student enrolls for recital credit during the semester in which he/she presents the Artist Diploma Recital.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

MIP 815. Masters Advanced Recital. 2 Credit Hours.

The second recital in the masters degree when students choose Extended Program Notes as the final project.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

MIP 820. Research in Residence. 1 Credit Hour.

Used to establish research in residence and maintain full-time enrollment for the master's degree after the student has completed the required hours of thesis or project credit.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

MIP 831. Doctoral Essay. 1-12 Credit Hours.

Required of all candidates for the D.M.A. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of MIP 731 may be taken in a regular semester, nor more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

MIP 832. Doctoral Recital. 1-2 Credit Hours.

Required of all candidates for the D.M.A.

Components: PRA.

Grading: SUS.

Typically Offered: Fall & Spring.

MIP 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence and maintain full-time enrollment for the DMA after the student has completed the required hours of doctoral essay credit.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

MIP 9. Woodwind Forum. 0 Credit Hours.

An informal recital setting and performance class for woodwind principals and majors with guest and faculty presentations.

Components: FOR.

Grading: CNC.

Typically Offered: Fall & Spring.

MIP BA1. Bassoon. 2 Credit Hours.

1-hour lesson and 50 minute studio class for bassoon students. Technical Requirements: Method Books by Giampieri, Jancourt, Milde (Vol. 1).

Repertoire: Vivaldi Concerto, Bourdeau - Premier solo, Galliard, Handel, Marcello, Nino Rota Procaccini.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP BA3. Bassoon. 2 Credit Hours.

1-hour lesson and 50 minute studio class for bassoon students. Technical Requirements: Method Books by Giampieri, Milde (Vol. 2). Gambaro.

Repertoire: Bach, Bozza, Eigar, Jean Jean, Hindemith, Mozart, Flament.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP BA5. Bassoon. 1-4 Credit Hours.

Mastery of technical aspects of bassoon performance. Preparation of Masters recital(s) and oral defense. Preparation of repertoire for audition for further study or professional placement. Related areas such as reed making, specific individualized studies, instrumental maintenance, and orchestral excerpts are also part of the curriculum.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP BA6. Bassoon. 1-2 Credit Hours.

Mastery of technical aspects of bassoon performance. Preparation of Masters recital(s) and oral defense. Preparation of repertoire for audition for further study or professional placement. Related areas such as reed making, specific individualized studies, instrumental maintenance, and orchestral excerpts are also part of the curriculum.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP BA7. Bassoon. 1-2 Credit Hours.

Continued mastery of technical aspects of bassoon performance. Preparation of DMA recitals and oral defense. Preparation of repertoire for audition for professional placement. An overview of pedagogy materials for performance and teaching use will also be explored.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP BAD. Bassoon. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Method Books by Giampieri, Jancourt, Milde (Vol. 1). Repertoire: Bourdeau - Second Solo, David, Domenico, Dubois, Fasch, Kozeluh, Pierne, Telemann, Vivaldi.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP BAS. Secondary Bassoon. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Method Books by Giampieri, Jancourt, Milde (Vol. 1). Repertoire: Vivaldi Concerto, Bourdeau - Premier solo, Galliard, Handel, Marcello, Nino Rota Procaccini.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CD1. Conducting. 2 Credit Hours.

1-hour lesson and 50 minute studio class for conducting students.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CD3. Conducting. 2 Credit Hours.

1-hour lesson and 50 minute studio class for conducting students.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CD5. Conducting. 1-4 Credit Hours.

Applied lesson and studio class for Artist Diploma students.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CD6. Conducting. 1-2 Credit Hours.

Applied lesson and studio class for Masters students.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CD7. Conducting. 1-2 Credit Hours.

Applied lesson and studio class for Doctoral students.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CDC. Conducting. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CDD. Conducting. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CDF. Conducting. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CDG. Conducting. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CDH. Conducting. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CDS. Secondary Conducting. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CL1. Clarinet. 2 Credit Hours.

1-hour lesson and 50 minute studio class for clarinet students. Technical Requirements: Development of embouchure, breathing, and articulation.

Scale study. Etude books: Rose 32 Etudes, Baermann Method Book 3. Repertoire: Schumann, Saint-Saens, Gade, Arnold. Orchestral excerpts.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CL3. Clarinet. 2 Credit Hours.

1-hour lesson and 50 minute studio class for clarinet students. Technical Requirements: Same as previous semesters as well as Jean Jean 16 or 18

Etudes, and Opperman Advanced Velocity Studies. Repertoire: Poulenc, Stravinsky, Bernstein, Brahms.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CL5. Clarinet. 1-4 Credit Hours.

Applied lesson and studio class for Artist Diploma students.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CL6. Clarinet. 1-2 Credit Hours.

Applied lesson and studio class for Masters students.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CL7. Clarinet. 1-2 Credit Hours.

Applied lesson and studio class for Doctoral students.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CLC. Clarinet. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Same as previous semesters as well as Cavillini Caprices, and Opperman Intermediate Velocity Studies. Repertoire: Weber, Hindemith, Burgmuller.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CLD. Clarinet. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Same as previous semesters as well as Cavillini Caprices, and Opperman Intermediate Velocity Studies. Repertoire: Weber, Hindemith, Burgmuller.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CLF. Clarinet. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Same as previous semesters as well as Jean Jean 16 or 18 Etudes, and Opperman Advanced Velocity Studies. Repertoire: Poulenc, Stravinsky, Bernstein, Brahms.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CLG. Clarinet. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Same as previous semesters as well as Opperman Virtuoso Velocity Studies. Repertoire: Debussy, Rozsa, Muczynski, Berg.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CLH. Clarinet. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Same as previous semesters as well as Opperman Virtuoso Velocity Studies. Repertoire: Debussy, Rozsa, Muczynski, Berg.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CLS. Secondary Clarinet. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Scale study. Etude books: Rose 32 Etudes, Baermann Method Book 3. Repertoire: Schumann, Saint-Saens, Gade, Arnold. Orchestral excerpts.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP DB1. Double Bass. 2 Credit Hours.

1-hour lesson and 50 minute studio class for double bass students.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP DB3. Double Bass. 2 Credit Hours.

1-hour lesson and 50 minute studio class for double bass students.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP DB5. Double Bass. 1-4 Credit Hours.

Advanced study of the double bass. Preparation for Master's recitals, and oral defense, orchestral repertoire, planning auditions, and insights on teaching.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP DB6. Double Bass. 1-2 Credit Hours.

Advanced study of the double bass. Preparation for Master's recitals, and oral defense, orchestral repertoire, planning auditions, and insights on teaching.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP DB7. Double Bass. 1-2 Credit Hours.

Preparation of qualifying and DMA recitals and oral defense. Continuation of advanced orchestral repertoire and methods and audition preparation.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP DBC. Double Bass. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP DBD. Double Bass. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP DBF. Double Bass. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP DBG. Double Bass. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP DBH. Double Bass. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP DBS. Secondary Doubles Bass. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP EU1. Euphonium. 2 Credit Hours.

1-hour lesson and 50 minute studio class for euphonium students. Technical Requirements: Development of embouchure, breathing, and articulation.

Appropriate major and minor scales. Repertoire: Arban, Concone, Schlossberg, Barat, Presser.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP EU3. Euphonium. 2 Credit Hours.

1-hour lesson and 50 minute studio class for euphonium students. Technical Requirements: Development of embouchure, breathing, and articulation.

Appropriate major and minor scales. Repertoire: Arban, Concone, Schlossberg, Barat, Presser.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP EU5. Euphonium. 1-4 Credit Hours.

Applied lesson and studio class for Artist Diploma students.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP EU6. Euphonium. 1-2 Credit Hours.

Applied lesson and studio class for Masters students.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP EU7. Euphonium. 1-2 Credit Hours.

Applied lesson and studio class for Doctoral students.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP EUC. Euphonium. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. ½-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Repertoire: Bordogni-Rochut, Peters, Jones, Vivaldi.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP EUD. Euphonium. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. ½-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Repertoire: Bordogni-Rochut, Peters, Jones, Vivaldi.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP EUF. Euphonium. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. ½-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Repertoire: Fink Stevens, Maxime-Alphones, Jacob, Hartley.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP EUG. Euphonium. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. ½-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Repertoire: Charlier, Bozza, Uber, Horovitz Bellstedt; band and orchestral excerpts.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP EUH. Euphonium. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. ½-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Repertoire: Charlier, Bozza, Uber, Horovitz Bellstedt; band and orchestral excerpts.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP EUS. Secondary Euphonium. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. ½-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Repertoire: Arban, Concone, Schlossberg, Barat, Presser.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FH1. French Horn. 2 Credit Hours.

1-hour lesson and 50 minute studio class for french horn students. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Repertoire: Arban, Concone, Schlossberg, Barat, Presser.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FH3. French Horn. 2 Credit Hours.

1-hour lesson and 50 minute studio class for french horn students. Technical Requirements: Continued transposition study, further skills development, scales and arpeggios. Studies by Bach, Maxime-Alphonse, Gallay; Belloli; orchestral repertoire. Repertoire: Mozart, Strauss, Hindemith, Dukas, Chabier.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FH5. French Horn. 1-4 Credit Hours.

Emphasis will continue to be the advancement of repertoire experience and skill assessment. Preparation and presentation of a solo recital will be the main focus of repertoire study. In-depth study of Orchestral Literature will also begin this semester.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FH6. French Horn. 1-2 Credit Hours.

Emphasis will be on an assessment of students' skills, needs and repertoire experience. Materials will be explored from the standard etude and solo literature that is relevant to the students' level and skill needs. Exploration will begin to choose material for a solo recital in the Spring semester.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FH7. French Horn. 1-2 Credit Hours.

Students' skill s needs will be assessed and a course of study developed for any remedial needs. An in-depth study of appropriate literature for both solo and chamber recitals will be undertaken in preparation for a long-term degree plan. Advanced study of Orchestral Literature will begin, including listening and score study. Repertoire for an initial recital and the Qualifying Recital will be chosen and prepared.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FHC. French Horn. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Continue transposition study. Continue development of embouchure, breathing, and articulation. Appropriate major and minor scales. Studies by Kopprasch, Maxime-Alphonse, Kling; Gallay; orchestral repertoire. Repertoire: Mozart, Strauss, Rachmaninoff, Glazounov.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FHD. French Horn. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Continue transposition study. Continue development of embouchure, breathing, and articulation. Appropriate major and minor scales. Studies by Kopprasch, Maxime-Alphonse, Kling; Gallay; orchestral repertoire. Repertoire: Mozart, Strauss, Rachmaninoff, Glazounov.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FHF. French Horn. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Continued transposition study, further skills development, scales and arpeggios. Studies by Bach, Maxime-Alphonse, Gallay; Belloli; orchestral repertoire. Repertoire: Mozart, Strauss, Hindemith, Dukas, Chabier.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FHG. French Horn. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Further skills development to the highest attainable level. Studies by Reynolds, Hackelman, Neuling, Barboteo, Bach. Orchestral repertoire. Repertoire: Bozza, Gliere, Strauss, Haydn.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FHH. French Horn. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Further skills development to the highest attainable level. Studies by Reynolds, Hackelman, Neuling, Barboteo, Bach. Orchestral repertoire. Repertoire: Bozza, Gliere, Strauss, Haydn.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FHS. Secondary French Horn. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Beginning transposition study. Studies by Shoemaker, Kopprasch, Maxime-Alphonse, Kling; appropriate passages from orchestral works. Repertoire: Mozart, Saint-Saens, F. Strauss, R. Strauss.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FL1. Flute. 2 Credit Hours.

1-hour lesson and 50 minute studio class for flute students. Technical Requirements: Taffanel - Gaubert 17 Daily Exercises, Berbiguer - 18 Etudes, Andersen Little Caprices. All major and minor scales, two octaves; Moyse - De la Sonorite, 24 Petite Melodies Vol. I. Repertoire: Handel Sonatas, Godard Allegretto.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FL3. Flute. 2 Credit Hours.

1-hour lesson and 50-minute studio class for flute students. Technical Requirements: Moyses Daily Exercises, Andersen Op. 15, Op. 63; Moyses de la Sonorite, Tone Development through Interpretation. Repertoire: Mozart G Major Concerto, Hindemith Sonata, Dubussy Syrinx.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FL5. Flute. 1-4 Credit Hours.

Mastery of technical aspects of flute performance. Preparation of Masters recital(s) and oral defense. Preparation of repertoire for audition for further study or professional placement. Related areas such as specific individualized studies, instrumental maintenance, and orchestral excerpts are also part of the curriculum.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FL6. Flute. 1-2 Credit Hours.

Mastery of technical aspects of flute performance. Preparation of Masters recital(s) and oral defense. Preparation of repertoire for audition for further study or professional placement. Related areas such as specific individualized studies, instrumental maintenance, and orchestral excerpts are also part of the curriculum.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FL7. Flute. 1-2 Credit Hours.

Continue mastery of technical aspects of flute performance. Preparation of DMA recitals and oral defense. Preparation of repertoire for audition for professional placement. An overview of pedagogy materials for performance and teaching use will also be explored.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FLC. Flute. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Taffanel - Gaubert 17 Daily Exercises, Andersen, Op. 41; Moyses - De la Sonorite, 25 Petite Melodies Vol. II, Moyses Daily Exercises - major and minor scales, thirds. Repertoire: Telemann Fantasies, CPE Bach Sonata, Faure Fantasie Chaminade Concertino.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FLD. Flute. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Taffanel - Gaubert 17 Daily Exercises, Andersen, Op. 41; Moyses - De la Sonorite, 25 Petite Melodies Vol. II, Moyses Daily Exercises - major and minor scales, thirds. Repertoire: Telemann Fantasies, CPE Bach Sonata, Faure Fantasie Chaminade Concertino.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FLF. Flute. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Moyses Daily Exercises, Andersen Op. 15, Op. 63; Moyses De la Sonorite, Tone Development Through Interpretation. Repertoire: Mozart G Major Concerto, Hindemith Sonata, Dubussy Syrinx.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FLG. Flute. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Moyses Daily Exercises, Andersen Op. 15, Soussmann Etudes; Moyses De la Sonorite, Tone Development Through Interpretation. Repertoire: Poulenc Sonata, Bach Sonatas, Martinu Sonata.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FLH. Flute. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Moyses Daily Exercises, Andersen Op. 15, Soussmann Etudes; Moyses De la Sonorite, Tone Development Through Interpretation. Repertoire: Poulenc Sonata, Bach Sonatas, Martinu Sonata.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FLS. Secondary Flute. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Taffanel - Gaubert 17 Daily Exercises, Berbiguer - 18 Etudes, Andersen Little Caprices. All major and minor scales, two octaves; Moyses - De la Sonorite, 24 Petite Melodies Vol. I. Repertoire: Handel Sonatas, Godard Allegretto.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP GU1. Guitar. 2 Credit Hours.

1-hour lesson and 50 minute studio class for guitar students.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP GU3. Guitar. 2 Credit Hours.

1-hour lesson and 50 minute studio class for guitar students.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP GU5. Guitar. 1-4 Credit Hours.

Applied lesson and studio class for Artist Diploma students.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP GU6. Guitar. 1-2 Credit Hours.

Applied lesson and studio class for Masters students.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP GU7. Guitar. 1-2 Credit Hours.

Applied lesson and studio class for Doctoral students.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP GUC. Guitar. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP GUD. Guitar. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP GUF. Guitar. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP GUG. Guitar. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP GUH. Guitar. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP GUS. Secondary Guitar. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP HA1. Harp. 2 Credit Hours.

1-hour lesson and 50 minute studio class for harp students.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP HA3. Harp. 2 Credit Hours.

1-hour lesson and 50 minute studio class for harp students.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP HA5. Harp. 1-4 Credit Hours.

Advanced study of solo harp literature.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP HA6. Harp. 1-2 Credit Hours.

Advanced study of solo harp literature.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP HA7. Harp. 1-2 Credit Hours.

Advanced study of solo harp literature.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP HAC. Harp. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP HAD. Harp. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP HAF. Harp. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP HAG. Harp. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP HAH. Harp. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP HAS. Secondary Harp. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP OBC. Oboe. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Scales, arpeggios, trills.

Appropriate technical exercises. Etudes by Ferling (Bleuzet, Sellner). Repertoire: Saint-Saens, Hindemith, Vivaldi, Goossens, Francaix.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP OBD. Oboe. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Scales, arpeggios, trills. Appropriate technical exercises. Etudes by Ferling (Bleuzet, Sellner). Repertoire: Saint-Saens, Hindemith, Vivaldi, Goossens, Francaix.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP OBF. Oboe. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Scales, arpeggios, trills. Appropriate technical exercises. Etudes by Bozza (Gillet, Prestini). Repertoire: Mozart, Telemann, Bach, Poulenc, Vaughan Williams.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP OBG. Oboe. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Scales, arpeggios, trills. Appropriate technical exercises. Etudes by Loyon (Gillet). Repertoire: Mozart, Strauss, Martinu, Dutilleux.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP OBH. Oboe. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Scales, arpeggios, trills. Appropriate technical exercises. Etudes by Loyon (Gillet). Repertoire: Mozart, Strauss, Martinu, Dutilleux.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP OBS. Secondary Oboe. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Scales, arpeggios, trills. Appropriate technical exercises. Etudes by Barret (Brod, Luft, Sellner, Ferling). Repertoire: Albinoni, Bach, Hayde, Schumann, Britten.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP PE1. Percussion. 2 Credit Hours.

1-hour lesson and 50 minute studio class for percussion students. Technical Requirements: Development of two mallets technique. Review of basic technique and repertory on snare drum and timpani. Basic multi-percussion etudes. Repertoire: Mallet: G. H. Green, Musser, Creston, Rosauero. Snare Drum: Cirone, Delecluse, Rosauero. Timpani: Hochrainer, Writh, Goodman.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP PE3. Percussion. 2 Credit Hours.

1-hour lesson and 50 minute studio class for percussion students. Technical Requirements: Advanced four mallets technique on marimba and vibraphone. Advanced technique and repertory on snare drum and timpani. Advanced multi-percussion etudes. Orchestral excerpts. Repertoire: Mallet: Abe, Ford, Friedman, Rosauero. Snare Drum: Cirone, Delecluse, Fink, Gautrieux. Timpani: Hochrainer, Writh, Goodman.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP PE5. Percussion. 1-4 Credit Hours.

Second semester of the Masters Degree in percussion performance. The main area of focus is first recital; to be performed this semester. Exploration into solo and ensemble performance needs will continue through this semester.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP PE6. Percussion. 1-2 Credit Hours.

First semester of the Master's Degree in percussion performance. Emphasis on assessment of students' skills needs and repertoire experience. Materials covered to include standard solo and ensemble repertoire and technical work. First recital repertoire chosen from works supplementing students' needs.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP PE7. Percussion. 1-2 Credit Hours.

First of six semesters of study for a DMA in percussion performance. Students' needs assessed, and a course of study devised. Solo and ensemble works studied in-depth accordingly. Works for an initial and qualifying recital chosen.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP PEC. Percussion. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of four mallets technique. Intermediate technique etudes and repertory on snare drum and timpani. Intermediate multi-percussion etudes. Repertoire: Mallet: Gomez, Musser, Peters, Rosauo. Snare Drum: Cirone, Delecluse, Fink, Rosauo. Timpani: Hochrainer, Writh, Goodman.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP PED. Percussion. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of four mallets technique. Intermediate technique etudes and repertory on snare drum and timpani. Intermediate multi-percussion etudes. Repertoire: Mallet: Gomez, Musser, Peters, Rosauo. Snare Drum: Cirone, Delecluse, Fink, Rosauo. Timpani: Hochrainer, Writh, Goodman.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP PEF. Percussion. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Advanced four mallets technique on marimba and vibraphone. Advanced technique and repertory on snare drum and timpani. Advanced multi-percussion etudes. Orchestral excerpts. Repertoire: Mallet: Abe, Ford, Friedman, Rosauo. Snare Drum: Cirone, Delecluse, Fink, Gautrieux. Timpani: Hochrainer, Writh, Goodman.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP PEG. Percussion. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of advanced repertory and preparation for the final recital. Etudes and works on marimba, vibraphone, snare drum, timpani, multi-percussion, and orchestral excerpts. At least one piece at the final concert has to be a concerto-like composition performed with piano or percussion ensemble.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP PEH. Percussion. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of advanced repertory and preparation for the final recital. Etudes and works on marimba, vibraphone, snare drum, timpani, multi-percussion, and orchestral excerpts. At least one piece at the final concert has to be a concerto-like composition performed with piano or percussion ensemble.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP PES. Secondary Percussion. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of two mallets technique. Review of basic technique and repertory on snare drum and timpani. Basic multi-percussion etudes. Repertoire: Mallet: G. H. Green, Musser, Creston, Rosauro. Snare Drum: Cirone, Delecluse, Rosauro. Timpani: Hochrainer, Writh, Goodman.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP SA1. Saxophone. 2 Credit Hours.

1-hour lesson and 50 minute studio class for saxophone students.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP SA3. Saxophone. 2 Credit Hours.

1-hour lesson and 50 minute studio class for saxophone students.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP SA5. Saxophone. 1-4 Credit Hours.

Graduate level private study in classical saxophone is geared toward the individual's needs depending on the ability and skills mastered during the undergraduate level. The student will be required to seek refinement in all areas, including tone, intonation, technique, stylistic interpretation, and advanced forms of saxophone techniques. The student must be thoroughly versed in the pedagogy of the instrument. Study of advanced scales is required along with some jazz studies and advanced literature will be addressed in the private lesson format.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP SA6. Saxophone. 1-2 Credit Hours.

Typically Offered: Fall & Spring.

MIP SAF. Saxophone. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP SAG. Saxophone. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP SAH. Saxophone. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP SAS. Secondary Saxophone. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP TB1. Trombone. 2 Credit Hours.

1-hour lesson and 50 minute studio class for trombone students. Technical Requirements: Development of embouchure, breathing, articulation, sound, and slide technique. Appropriate major and minor scales. Works by Arban, Blazhevich, Pares, Rochut, Tyrell, and others. Solo literature as appropriate for the student's abilities.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP TB3. Trombone. 2 Credit Hours.

1-hour lesson and 50 minute studio class for trombone students. Technical Requirements: Continuation of technical development including upper register, advanced slide technique, and refined articulation. Works as previously listed, followed by Masson and Bitsch. Solo literature as appropriate for the student's abilities, and continuation of selected orchestral excerpts.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP TB5. Trombone. 1-4 Credit Hours.

Advanced progressive study is chosen from the following etude books, Gabriel Masson 12 Various Etudes, Marcel Bitsch 15 Rhythmical Studies, Roger Bountry 12 Etudes for High Perfection, and Brade Edwards Lip-slurs-Exercises for Tone and Technique. Additionally, solo concerto literature and contemporary works are studied and prepared to advance the student's technical and musical mastery of the trombone. Orchestral excerpts are studied to further develop and refine an appropriate sense of orchestral style.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP TB6. Trombone. 1-2 Credit Hours.

Advanced progressive study is chosen from the following etude books, Gabriel Masson 12 Various Etudes, Marcel Bitsch 15 Rhythmical Studies, Roger Bountry 12 Etudes for High Perfection, and Brade Edwards Lip-slurs-Exercises for Tone and Technique. Additionally, solo concerto literature and contemporary works are studied and prepared to advance the student's technical and musical mastery of the trombone. Orchestral excerpts are studied to further develop and refine an appropriate sense of orchestral style.

Requisite: Frost School of Music.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP TBC. Trombone. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Continuation of previous aspects of technical development. Works as previously listed, followed by Blume, and solo literature as appropriate for the student's abilities. Introduction of orchestral excerpts as both literature and as an aid to technical and musical development.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP TBD. Trombone. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Continuation of previous aspects of technical development. Works as previously listed, followed by Blume, and solo literature as appropriate for the student's abilities. Introduction of orchestral excerpts as both literature and as an aid to technical and musical development.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP TBF. Trombone. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Continuation of technical development including upper register, advanced slide technique, and refined articulation. Works as previously listed, followed by Masson and Bitsch. Solo literature as appropriate for the student's abilities, and continuation of selected orchestral excerpts.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP TBG. Trombone. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Further development of all technical aspects of performance. Works by Masson and Bitsch, and solo literature geared towards recital performance.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP TBH. Trombone. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Further development of all technical aspects of performance. Works by Masson and Bitsch, and solo literature geared towards recital performance.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP TBS. Secondary Trombone. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, articulation, sound, and slide technique. Appropriate major and minor scales. Works by Arban, Blazhevich, Pares, Rochut, Tyrell, and others. Solo literature as appropriate for the student's abilities.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP TP1. Trumpet. 2 Credit Hours.

1-hour lesson and 50 minute studio class for trumpet students. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Repertoire: Arban, Clarke, Hering, Schlossberg; orchestral excerpts.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP TP3. Trumpet. 2 Credit Hours.

1-hour lesson and 50 minute studio class for trumpet students.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP TP5. Trumpet. 1-4 Credit Hours.

Applied lesson and studio class for Artist Diploma students.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP TP6. Trumpet. 1-2 Credit Hours.

Applied lesson and studio class for Masters students.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP TP7. Trumpet. 1-2 Credit Hours.

Applied lesson and studio class for Doctoral students.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP TPC. Trumpet. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP TPD. Trumpet. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP TPF. Trumpet. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP TPG. Trumpet. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP TPH. Trumpet. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP TPS. Secondary Trumpet. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Repertoire: Arban, Clarke, Hering, Schlossberg; orchestral excerpts.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP TU1. Tuba. 2 Credit Hours.

1-hour lesson and 50 minute studio class for tuba students. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Repertoire: Concone, Arban, Bordogni, Haddad, Hartley.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP TU3. Tuba. 2 Credit Hours.

1-hour lesson and 50 minute studio class for tuba students. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Repertoire: Bach/Bobo Ostrander, Kotsier, Hindemith, Wilder.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP TU5. Tuba. 1-4 Credit Hours.

Private lessons that focus on development of embouchure, breathing, and articulation, with emphasis on orchestral excerpts on Alphonse, Sear, Kraft, Kelleway, and others.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP TU6. Tuba. 1-2 Credit Hours.

Private lessons that focus on development of embouchure, breathing, and articulation, with emphasis on orchestral excerpts on Alphonse, Sear, Kraft, Kelleway, and others.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP TU7. Tuba. 1-2 Credit Hours.

Private lessons that focus on development of embouchure, breathing, and articulation, with emphasis on orchestral excerpts on Cinema, Snedecor, Wilder, Gould and others.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP TUC. Tuba. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Repertoire: Vasiliev, Kopprash, Gallay, Frankenpohl, Nelhybel, Bernstein.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP TUD. Tuba. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Repertoire: Vasiliev, Kopprash, Gallay, Frankenpohl, Nelhybel, Bernstein. Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP TUF. Tuba. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Repertoire: Bach/Bobo Ostrander, Kotsier, Hindemith, Wilder. Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP TUG. Tuba. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Repertoire: Cimera, Maenz, Broughton, Persichetti, orchestral excerpts. Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP TUH. Tuba. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Repertoire: Cimera, Maenz, Broughton, Persichetti, orchestral excerpts. Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP TUS. Secondary Tuba. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Repertoire: Concone, Arban, Bordogni, Haddad, Hartley. Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP VA1. Viola. 2 Credit Hours.

1-hour lesson and 50 minute studio class for viola students. Technical Requirements: Right hand and left hand position evaluation and adjustment if necessary. Scales and etudes as assigned. Repertoire: Solo literature appropriate for level and major. Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP VA3. Viola. 2 Credit Hours.

1-hour lesson for students enrolled for 2-4 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Scales and etudes as assigned. Repertoire: Solo literature appropriate for level and major. Solo literature appropriate for level and major. Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP VA5. Viola. 1-4 Credit Hours.

Mastery of technical aspects of viola performance. Preparation of Masters recital(s) and oral defense. Preparation of repertoire for audition for further study or professional placement.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP VA6. Viola. 1-2 Credit Hours.

Mastery of technical aspects of viola performance. Preparation of Masters recital(s) and oral defense. Preparation of repertoire for audition for further study or professional placement.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP VA7. Viola. 1-2 Credit Hours.

Continued mastery of technical aspects of viola performance. Preparation of qualifying recital and DMA recitals and oral defense. Preparation of repertoire for audition for further study or professional placement.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP VAC. Viola. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Scales and etudes as assigned. Repertoire: Solo literature appropriate for level and major. Solo literature appropriate for level and major.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP VAD. Viola. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Scales and etudes as assigned. Repertoire: Solo literature appropriate for level and major. Solo literature appropriate for level and major.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP VAF. Viola. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Scales and etudes as assigned. Repertoire: Solo literature appropriate for level and major. Solo literature appropriate for level and major.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP VAG. Viola. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Scales and etudes as assigned. Repertoire: Solo literature appropriate for level and major. Solo literature appropriate for level and major.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP VAH. Viola. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Scales and etudes as assigned. Repertoire: Solo literature appropriate for level and major. Solo literature appropriate for level and major.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP VAS. Secondary Viola. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Right hand and left hand position evaluation and adjustment if necessary. Scales and etudes as assigned. Repertoire: Solo literature appropriate for level and major.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP VC1. Violoncello. 1-2 Credit Hours.

1-hour lesson and 50 minute studio class for violoncello students. Technical Requirements: Development of basic bow strokes, vibrato, and position changes. Appropriate major scales and arpeggios. Etudes as needed. Repertoire: Vivaldi Sonatas, Saint-Saens Concerto, Hayden C Major Concerto, Beethoven Sonata 1 or 2, Bach Suite 1 or 2.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP VC3. Violoncello. 1-2 Credit Hours.

1-hour lesson and 50 minute studio class for violoncello students. Technical Requirements: Popper etudes, Duport etudes. Repertoire: Dvorak Concerto, Hayden D Major Concerto, Shostakovitch Sonata, Bach Suite No. 4.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP VC5. Violoncello. 1-4 Credit Hours.

Applied lesson and studio class for Artist Diploma students.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP VC6. Violoncello. 1-2 Credit Hours.

Applied lesson and studio class for Masters students.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP VC7. Violoncello. 1-2 Credit Hours.

Applied lesson and studio class for Doctoral students.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP VCC. Violoncello. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: All major and minor scales and arpeggios. Etudes as needed. Repertoire: Lalo Concerto, Boccherini B-flat, Beethoven or Brahms Sonatas, Bach Suite No. 3.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP VCD. Violoncello. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: All major and minor scales and arpeggios. Etudes as needed. Repertoire: Lalo Concerto, Boccherini B-flat, Beethoven or Brahms Sonatas, Bach Suite No. 3.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP VCF. Violoncello. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Popper etudes, Duport etudes. Repertoire: Dvorak Concerto, Hayden D Major Concerto, Shostakovitch Sonata, Bach Suite No. 4.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP VCG. Violoncello. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Popper etudes, Piatti etudes. Repertoire: Schumann Concerto, Bach Suites No. 5 or No. 6.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP VCH. Violoncello. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Popper etudes, Piatti etudes. Repertoire: Schumann Concerto, Bach Suites No. 5 or No. 6.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP VCS. Secondary Violoncello. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of basic bow strokes, vibrato, and position changes. Appropriate major scales and arpeggios. Etudes as needed. Repertoire: Vivaldi Sonatas, Saint-Saens Concerto, Hayden C Major Concerto, Beethoven Sonata 1 or 2, Bach Suite 1 or 2.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP VN1. Violin. 2 Credit Hours.

1-hour lesson and 50 minute studio class for violin students. Technical Requirements: Flesch Scale System, Schradieck School of Technic, Sevcik Shifting Studies, Sevcik Trill Studies. Fiorello - 36 Etudes and Caprices, Kreutzer - 42 Etudes. Repertoire: J. S. Bach, Beethoven, Mozart, Haydn, De Beriot.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP VN3. Violin. 2 Credit Hours.

1-hour lesson and 50 minute studio class for violin students. Technical Requirements: Flesch Scale System, Dont 42 Caprices, Gavinies 24 Matinees, Vieuxtemps 12 Studies. Repertoire: J. S. Bach, Beethoven, Brahms, Vaughan Williams, Ravel, Sarasate, Sibelius, Vieuxtemps, Shostakovich.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP VN5. Violin. 1-4 Credit Hours.

Applied lesson and studio class for Artist Diploma students.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP VN6. Violin. 1-2 Credit Hours.

Applied lesson and studio class for Masters students.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP VN7. Violin. 1-2 Credit Hours.

Applied lesson and studio class for Doctoral students.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP VNC. Violin. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Flesch Scale System, Schradieck School of Technic, Sevcik Shifting Studies, Sevcik Trill Studies. Fiorello - 36 Etudes and Caprices, Kreutzer - 42 Etudes, Rode 24 Etudes and Caprices. Rovelli 12 Caprices. Repertoire: J. S. Bach, Beethoven, Vivaldi, Mozart, Bruch, Saint-Saens, Mendelssohn, Vieuxtemps, Tartini-Kreilser, Wieniawski.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP VND. Violin. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Flesch Scale System, Schradieck School of Technic, Sevcik Shifting Studies, Sevcik Trill Studies. Fiorello - 36 Etudes and Caprices, Kreutzer - 42 Etudes, Rode 24 Etudes and Caprices. Rovelli 12 Caprices. Repertoire: J. S. Bach, Beethoven, Vivaldi, Mozart, Bruch, Saint-Saens, Mendelssohn, Vieuxtemps, Tartini-Kreilser, Wieniawski.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP VNF. Violin. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Flesch Scale System, Dont 42 Caprices, Gavinies 24 Matinees, Vieuxtemps 12 Studies. Repertoire: J. S. Bach, Beethoven, Brahms, Vaughan Williams, Ravel, Sarasate, Sibelius, Vieuxtemps, Shostakovich.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP VNG. Violin. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Flesch Scale System, Galamian Contemporary Violin Technique. Paganini 24 Caprices, Wieniawski Ecole Moderne. Repertoire: J. S. Bach, Beethoven, Ysaye, Franck, Faure, Paganini, Brahms, Bartok.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP VNH. Violin. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Flesch Scale System, Galamian Contemporary Violin Technique. Paganini 24 Caprices, Wieniawski Ecole Moderne. Repertoire: J. S. Bach, Beethoven, Ysaye, Franck, Faure, Paganini, Brahms, Bartok.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP VNS. Secondary Violin. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Flesch Scale System, Schradieck School of Technic, Sevcik Shifting Studies, Sevcik Trill Studies. Fiorello - 36 Etudes and Caprices, Kreutzer - 42 Etudes. Repertoire: J. S. Bach, Beethoven, Mozart, Haydn, De Beriot.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

Intensive English Program (IEP)

IEP 1. Level Undetermined. 0 Credit Hours.

Components: LEC.

Grading: GRD.

IEP 11. RW Level Undetermined. 0 Credit Hours.

Reading and Writing class for students whose English level has not been determined.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

IEP 111. Level I - Written Communication. 0 Credit Hours.

Components: LEC.

Grading: GRD.

IEP 112. Level I - Oral Communication. 0 Credit Hours.

Components: LEC.

ST-UM Transition. 0 Credit Hours.**

This course will provide orientation, skills, assistance and support for IEP/UM students as they transition to a full load of credit courses.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall, Spring, & Summer.**IEP 171. LLM and IEP - Reading and Writing. 0 Credit Hours.**

This course focus on reading, writing, and vocabulary skills to assist LLM students to enhance their general, academic, and legal English.

Components: LEC.**Grading:** GRD.**Typically Offered:** Spring.**IEP 172. LLM and IEP - Oral Communication. 0 Credit Hours.**

This course focus on oral communication skills to assist LLM students to enhance their general, academic, and legal English.

Components: LEC.**Grading:** GRD.**Typically Offered:** Spring.

Interdisciplinary Studies (IDS)

IDS 699. Directed Study. 1-6 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

IDS 825. Master Study. 1-6 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Spring & Summer.

IDS 830. Pre-Candidacy Dissertation Research. 1-12 Credit Hours.

Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of IDS 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

IDS 840. Post-Candidacy Dissertation. 1-6 Credit Hours.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

IDS 850. Research and Residence. 1-6 Credit Hours.

Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.

Grading: SUS.

Typically Offered: Fall.

International Studies (INS)

INS 101. Global Perspectives. 3 Credit Hours.

Introduces students to the study of international relations focusing on the continuing threat of national and ethnic conflict; terrorism; environmental and health concerns; globalization; economic interdependence, and poverty. Students are provided an overview of the evolution of international affairs in the modern era and are introduced to the various scholarly approaches for an understanding of international affairs.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

INS 102. Global Economics. 3 Credit Hours.

The international economy. This course develops the analytical tools underlying "the economic way of thinking" and applies them to two main topics: the environment and international trade.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

INS 103. World in Crisis. 3 Credit Hours.

A global overview of critical issues of the world in the 21st century is the primary objective of this course. In an interdisciplinary framework experts from the University's faculty will lecture and participate in panels discussing issues such as globalization, military conflict, proliferation of weapons of mass destruction, transnational terrorism, ethnic conflict, global climate change, global financial issues, global wealth disparities and global poverty, immigration and refugee crises, epidemic diseases. Students will learn about conflict in the Middle East, China, its rising economic and military strength, renewed Russian worldwide assertiveness, failed states, and generally, problems of global governance.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

INS 104. Global Perspectives Discussion Section. 0 Credit Hours.

Components: DIS.

Grading: GRD.

Typically Offered: Fall & Spring.

INS 105. Global Perspectives Discussion Section 2. 0 Credit Hours.**Components:** LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.**INS 201. Globalization and Change in World Politics. 3 Credit Hours.**

The academic and public policy debates regarding the multiple impacts of the globalization of the world economy on the politics of nation-states and on the dynamics of the international system itself.

Prerequisite: INS 101.**Components:** LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.**INS 202. INS Methodology. 3 Credit Hours.**

The approaches, methods and techniques used for designing and conducting international studies research.

Components: LEC.**Grading:** GRD.**Typically Offered:** Spring.**INS 210. INS Topics. 3 Credit Hours.**

Special topics taken at other institutions with no direct equivalents.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall, Spring, & Summer.**INS 310. Advanced Topics in INS. 3 Credit Hours.****Prerequisite:** INS 101 or POL 203.**Components:** LEC.**Grading:** GRD.**Typically Offered:** Fall, Spring, & Summer.**INS 311. Advanced Topics in INS II. 3 Credit Hours.****Prerequisite:** POL 202 or POL 203.**Components:** LEC.**Grading:** GRD.**Typically Offered:** Fall, Spring, & Summer.**INS 319. Empire: Global Legacies. 3 Credit Hours.**

A review of the key features of the Roman, Chinese, Russian, Ottoman, Spanish, and British empires and their global legacies. Different perspectives and conceptualizations on empires. Major characteristics of the empires studied and their enduring resonances in specific regions and globally.

Prerequisite: INS 101.**Components:** LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.**INS 320. Global Economics II. 3 Credit Hours.**

Macroeconomics and its application to the study of the international economy. Measurement of income and level of development; determinants of economic growth; inflation and unemployment; open economy macroeconomics.

Prerequisite: INS 102 or ECO 211 or ECO 212.**Components:** LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**INS 321. Global Political Economy. 3 Credit Hours.**

The implications of the globalization of trade, production, finance, and culture on equity, social welfare and the quality of democratic institutions and practices in both the Global North and the Global South.

Prerequisite: INS 102 or ECO 211 or ECO 212.**Components:** LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**INS 322. Economics of Development and the Environment. 3 Credit Hours.**

Structural changes that accompany economic growth that impact the environment and sustainable development.

Prerequisite: INS 102 or ECO 211 or ECO 212.**Components:** LEC.**Grading:** GRD.**Typically Offered:** Fall.

INS 324. The History of Zionism. 3 Credit Hours.

The religious, cultural, historical, political and social underpinnings of the development of Zionism that led to the creation of the State of Israel. Through readings, analysis of speeches and essays, exploration of films and the internet, the class will move through time from the origins of the Zionist idea to the present.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 325. Israel: The Making of a State. 3 Credit Hours.

An introduction to the creation of the State of Israel in its historical context, emphasizing the period of 1935-55: the struggle for Israel's establishment, the making of the state and the early challenges Israel faced. The class will use documents, texts, testimony, poetry, music and film.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 330. Introduction of Comparative Studies. 3 Credit Hours.

Introduces students to the comparative method and to the theories and concepts required to analyze political transformation of states, societies, economies and culture in a globalization world.

Prerequisite: INS 101 or POL 203.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

INS 335. Democratization. 3 Credit Hours.

A comparative overview of the problems of introducing democratic and market economic institutions into areas where they have not flourished and how to maintain them in established democracies.

Prerequisite: INS 101 or POL 203.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

INS 341. Nationalism, Ethnicity and Conflict. 3 Credit Hours.

Examines theories of ethnic and national conflict focusing on contemporary issues throughout the world.

Prerequisite: INS 101 or POL 203.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

INS 344. Gender and Politics. 3 Credit Hours.

Compares the roles played by men and women in political systems worldwide; examines public policy outcomes with significant gender-based effects, including policies on sexuality and reproductive health, gender-based violence, work and the family, and access to education.

Prerequisite: INS 101 or POL 203.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

INS 352. Panoramic View of the Middle East. 3 Credit Hours.

The Middle East and a basic understanding of the factors, forces and processes shaping developments in the modern and contemporary history of this important world region.

Prerequisite: INS 101 or POL 203.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

INS 357. Global Food: A Hands-On Approach. 3 Credit Hours.

Application of principles of permaculture via designing and creating a small "global farm" on campus to grow perennial food crops which are unique to the South Florida environment. We learn by doing, cultivating plants that hold the solution to world hunger problems.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

INS 367. Foreign Policy Topics. 3 Credit Hours.

Prerequisite: INS 101 or POL 203.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

INS 380. Democracy and Globalization in Latin America. 3 Credit Hours.

The global dimensions of Latin American politics, emphasizing democratization and its discontents; human rights; the emergence of transnational civil society; and the impacts of market reforms on development, equity and social inclusion.

Prerequisite: INS 101 or POL 203.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

INS 385. Latin American Topics. 3 Credit Hours.

Prerequisite: INS 101 or POL 203.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

INS 391. The European Union. 3 Credit Hours.

The course will combine 6 objectives: 1)to investigate the historical development of Europe as a civilization and as an idea through review of some main historical and political factors and ideologies from 1815-present; 2)to survey the main organizations and experiments in European integration before/after World War II; 3)to analyze the historical development of the European communities; 4)to examine major institutions of the European Union; 5)to analyze the main European Union policies and current issues; 6)to reflect upon the future of the nation-state and the idea of a united Europe, the role of transformed ideologies, and the rebirth of nationalism while pondering about future scenarios for European integration.

Prerequisite: INS 101.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

INS 394. European Topics. 3 Credit Hours.

Prerequisite: POL 202 or POL 203.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 410. INS Advanced Seminar. 3 Credit Hours.

Prerequisite: INS 102 or INS 201 or POL 202.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

INS 411. Advanced Seminar. 3 Credit Hours.

Prerequisite: INS 201.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

INS 415. Independent Study. 1-6 Credit Hours.

Individualized research done under the guidance of selected faculty member. Depending upon the requirements established by the instructor, the student will be responsible for a research paper corresponding to the number of credits taken.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

INS 418. Honors Thesis. 3 Credit Hours.

Honors thesis research. This course is required for students seeking magna or summa cum laude and those seeking departmental honors. A thesis committee comprised of three members, two from International Studies and one from the university faculty must be established. The thesis advisor must also be from International Studies.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

INS 419. Honors Thesis II. 3 Credit Hours.

Honors thesis writing.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

INS 420. Global Trade. 3 Credit Hours.

Economic principles in global issues such as comparative advantage; specialization and trade; macroeconomics in the open economy; commercial policy; globalization; inequalities, within and among nations; and governance.

Prerequisite: INS 102.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

INS 421. Poverty and the Environment. 3 Credit Hours.

The processes by which a growing economy creates wealth in the form of goods and services while simultaneously increasing poverty and pollution.

Prerequisite: INS 102.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

INS 430. Comparative Studies Seminar. 3 Credit Hours.

Prerequisite: INS 201.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 450. History of Economic Thought. 3 Credit Hours.

A review of the contributions made by some of the most influential authors and schools of thought to the fields of political economy and economics.

Examination of the links of ideas, theories, and policy approaches on economic phenomena with moral philosophy and other realms of knowledge.

Emphasis is placed on the contributions made by the classics of political economy and their continuities and discontinuities with respect to pre-classical and post-classical ones.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

INS 460. United Nations Seminar. 3 Credit Hours.

The organization and functions of the UN, including its structure, network of agencies, and issues in which it is involved. Emphasis is given to reforms, the Millennium Development Goals, and problematic relationships among the UN member states.

Prerequisite: INS 201.

Components: SEM.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

INS 503. International Relations Topics. 3 Credit Hours.

Selected topics in International Relations Theory. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 504. Int Rel Topics II. 3 Credit Hours.

Selected topics in International Relations Theory. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 509. International Migration and the Health Care System. 3 Credit Hours.

An exposure to one of the most critical aspects of development globally: the migration-development nexus. The centrality of this issue has in current debates on development. Research and policy-making approaches to different aspects of this nexus. Several countries and regions are covered throughout the semester. Development of research skills through systematic participation in specific projects.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

INS 510. Issues in Ins. 3 Credit Hours.

Analysis of current issues of international importance.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 515. Independent Study. 1-6 Credit Hours.

Advanced level research done under the guidance of a selected faculty member. This course can be used as one of the two 500-level requirements for International Studies majors.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

INS 518. Global Migration and Development. 3 Credit Hours.

An examination of the nexus between migration and the health care system. Immigrants as professionals in the medical field; immigrants as people in need to health care services. Many countries have relied on immigration to cover critical shortages of professionals while others suffer from the exodus of professionals. The impact of immigration on these systems through an increase in the demand for medical services and other mechanisms. An examination of research and policy approaches to these issues.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

INS 519. Internship: Knowledge Partnership Civic Engagement. 1-3 Credit Hours.

The Knowledge Partnership Internship and Civic Engagement course offers students the opportunity to apply their academic/theoretical training to a practical internship experience. In addition to the internship component, there is a civic engagement component, and a total of three arranged class sessions held over the course of a semester.

Components: FLD.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

INS 520. Microeconomics for INS. 3 Credit Hours.

Microeconomics for students of international studies. Topics will include rationality, market failure and comparative advantage.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 521. International Economic System Topics II. 3 Credit Hours.

Selected topics in International Economics. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 522. Latin American Political Economy. 3 Credit Hours.

Latin American political economy including analysis of market reform and integration of the region into the world economy.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 524. Int'l Econ Topics II. 3 Credit Hours.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 530. Comparative Analysis. 3 Credit Hours.

Advanced overview of the comparative method. Required for students specializing in Comparative Studies at the graduate level.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 532. Globalization and Human Rights. 3 Credit Hours.

The integration of markets has many concerned for the political and economic rights of the common citizen. This course examines The effect of globalization on the human rights standards throughout the world.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 533. Transnational Social Movements. 3 Credit Hours.

Focuses on global civic activism and contentious politics, with particular attention to transnational non-state actors - NGOs, social movements, environmental protection, and the emergence of a global civil society.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 534. Military, State and Society. 3 Credit Hours.

The role of the military in state formation; questions of military rule, civilian control, and social structures in contemporary world politics.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 536. Comparative Political Regimes. 3 Credit Hours.

Literature concerned with the transition from authoritarianism to democracy in various parts of the world.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 537. Comparative Political Economy. 3 Credit Hours.

Compares how domestic politics and macroeconomic policies interact with globalization. Case studies include welfare states in the U.S. and Europe, East Asian development, post communist transitions and market restructuring in Latin America and Africa.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

INS 540. National Security. 3 Credit Hours.

The central issues concerning European security since World War II, with emphasis on the period since the end of the cold war.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 542. Drug-Trafficking in the Americas. 3 Credit Hours.

The political economy of the U.S.-Latin American drug trade in the 20th Century along with the dynamics of the U.S.-led war on drugs through the first years of the Twenty First Century.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

INS 543. National Security and Foreign Policy. 3 Credit Hours.

Explores alternative conceptualizations of "security" and the new challenges to U.S. national security that have emerged in the Post-Cold War era.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

INS 551. Regional Topics II. 3 Credit Hours.

Selected topics in International Business. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 560. U.S. Foreign Policy. 3 Credit Hours.

The leading approaches to the analysis of American foreign policy. Particular emphasis will be placed on the post-Cold War period and the new challenges to U.S. foreign policy of the 21st century.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

INS 561. Negotiation and Bargaining. 3 Credit Hours.

Examines the nature of diplomatic negotiation through readings and discussion of international negotiation and through the case method, selecting several cases of high-level policy issues in which the United States has been a principal actor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

INS 562. International Peace and Conflict Resolution. 3 Credit Hours.

The major sources of conflict, and what resources are available for making and keeping the peace? This class introduces students to the most fundamental concerns of the field of International Relations (IR), and especially of its sub-field IPCR.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 563. International Organizations. 3 Credit Hours.

The role, function, and impact on states of international governmental and non-governmental organizations in critical areas like peace and security, human rights, economic development, and environmental degradation.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 564. International Law. 3 Credit Hours.

How international law affects the conduct of states. Issues include jurisdiction, diplomatic immunity, the use of armed force, peaceful dispute settlement among states, human rights, and the International Criminal Court.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

INS 565. The World Before European Domination. 3 Credit Hours.

The historical roots of the contemporary international system. Its objective is to question the standard Eurocentric perspective on the rise of the West to a dominant position in the global system.

Components: SEM.

Grading: GRD.

Typically Offered: Spring.

INS 566. U.S.-Latin American Relations. 3 Credit Hours.

Political, economic and strategic aspects of U.S.-Latin American relations; the historical experience and contemporary issues, including the influence of extra-regional parties such as Europe and China.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

INS 570. Globalization and Health. 3 Credit Hours.

Globalization and its benefits and threats to public health; the relationship between global economic, political, social, cultural, environmental and technological changes and their impact on human health.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

INS 571. International Development and Human Welfare. 3 Credit Hours.

Health and development links; macroeconomic policies and their impact on social equity; poverty and structural inequities; and other key issues that influence human development.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

INS 572. Global Health Policy and Ethics. 3 Credit Hours.

National, regional and global health policies with special consideration to ethical and human rights issues; policies and the moral considerations that shape public health policy.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

INS 573. Disasters, Terrorism and Global Public Health. 3 Credit Hours.

The historical processes and present trends of disasters, terrorism, humanitarian emergencies and their impact on human health, safety and security.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

INS 580. Latin American Comparative Politics. 3 Credit Hours.

The major intellectual debates shaping the field of comparative politics including: (1) development, (2) military politics, (3) democratization and (4) the emergence of new social movements.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

INS 581. Politics and Ideology in Latin America. 3 Credit Hours.

The roles played by both "class" and the "new social movements" in the emergence of new modes of political representation.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 584. Latin American Thought. 3 Credit Hours.

The evolution of Latin American thought through political and intellectual history; the classical writings of the main "pensadores", and a comparative analysis of contemporary ideological trends.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

INS 586. Brazil in Transition. 3 Credit Hours.

The social, economic, cultural transformations shaping Brazilian politics. In addition to visiting Rio de Janeiro and Salvador, there will be seminars with Brazilian academics and social and political activists.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 590. European-Latin American Relations. 3 Credit Hours.

This course deals primarily with five main themes: shared history between Europe and Latin America; mutual transfer of ideas (ideologies and political thought), perceptions (images and stereotypes), people (voluntary and slavery), and goods (trade and investment); foreign policies of main European states and the European Community toward Latin America; an analysis of some specific country cases (Spain, especially) and issues (regional integration, among them); and how the above have affected inter-American relations and the hegemonic role of the United States.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 591. The European Union. 3 Credit Hours.

The European Union's history, institutions, policies and contemporary issues.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

INS 592. European Union and the World. 3 Credit Hours.

The European Union's development, its main institutions and policies followed by an analysis of the main features of the European Union's external relations.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

INS 593. European Security. 3 Credit Hours.

Regional security in Europe, focusing on NATO expansion, EU expansion, Russian foreign policy, and related issues.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

INS 594. European Topics. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 595. European Social Movements. 3 Credit Hours.

The major social movements active today throughout Europe including those concerned with the environment, agriculture, poverty, racism, defending social democracy, the rights of workers, minorities, and women.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 596. Post-Soviet Topics. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

INS 599. Special Topics. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 601. IR Theory. 3 Credit Hours.

Introduces students to key historic events, themes, concepts, and theories that have animated the practice and scholarship of international relations.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

INS 603. Dissertation Proposal. 3 Credit Hours.

A workshop designed to assist doctoral students in the preparation of a proposal for their dissertation research projects.

Components: SEM.

Grading: GRD.

Typically Offered: Spring.

INS 604. Int Rel Topics II. 3 Credit Hours.

Selected topics in International Relations Theory. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 605. Int Relations Topics. 3 Credit Hours.

Selected topics in International Relations Theory. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 606. Issues in International Studies. 3 Credit Hours.

Analysis of current issues of international importance.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 607. International Economic System Topics II. 3 Credit Hours.

Selected topics in International Economics. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 608. Intl Econ Topics. 3 Credit Hours.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 609. Globalization and Human Rights. 3 Credit Hours.

The integration of markets has many concerned for the political and economic rights of the common citizen. This course examines The effect of globalization on the human rights standards throughout the world.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 610. Graduate Seminar in INS. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 611. International Relations Methodology II. 3 Credit Hours.

Introduces graduate students to issues of research design and research methods in International Relations. The course will focus on three main methodological approaches in political science: qualitative case study, quantitative research and formal modeling. Apart from examining the principles guiding the choice of methods (and the trade offs involved in that choice), the course will examine how these methods have been applied to the study of three major sub-fields of international relations: international political economy, security studies, and international environmental regimes. It also aims to provide the students with basic knowledge on how to apply these methods to their own research.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

INS 612. Graduate Seminar in Qualitative Research Methods. 3 Credit Hours.

The main goal of this seminar is to enable students to become proficient in qualitative research methods. The seminar covers specific research methods and techniques, their relevance and limitations, their relationships with philosophical perspectives, epistemological and methodological debates, and ethical and practical considerations involved in qualitative research. Ethnographic methods, the use of social network analysis in qualitative research, the logics of inquiry in case study methods, grounded theory, and types of discourse and contents analysis, are amongst the topics covered. This is a hands-on graduate seminar in which the students are encouraged to think creatively on which method(s) could make their research of complex political, social, and cultural phenomena more rigorous and sophisticated by applying methods and techniques learned in class.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

INS 613. Transnational Social Movemen. 3 Credit Hours.

Focuses on global civic activism and contentious politics, with particular attention to transnational non-state actors - NGOs, social movements, environmental protection, and the emergence of a global civil society.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 614. Comparative Political Regimes. 3 Credit Hours.

Literature concerned with the transition from authoritarianism to democracy in various parts of the world.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 616. National Security. 3 Credit Hours.

The central issues concerning European security since World War II, with emphasis on the period since the end of the cold war.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 617. National Security and Foreign Policy. 3 Credit Hours.

Explores alternative conceptualizations of "security" and the new challenges to U.S. national security that have emerged in the Post-Cold War era.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

INS 618. Regional Topics II. 3 Credit Hours.

Selected topics in International Business. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 619. Internship. 1-3 Credit Hours.

A research paper is required for this course. The student works with a selected faculty member who determines the length and scope of the project. The Student is responsible for finding the internship position.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

INS 620. International Migration and the Health Care System. 3 Credit Hours.

Critical aspects of development globally: the migration-development nexus. The centrality this issue has in current debates on development. Research and policy-making approaches to different aspects of this nexus. Several countries and regions are covered throughout the semester. Development of research skills through systematic participation in specific projects.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

INS 622. Advanced Seminar in International Economics. 3 Credit Hours.

This is a seminar in International Economics at the graduate level. The first part consists of a rigorous but nontechnical presentation of international trade theory, followed by a discussion of the main arguments for protection and their validity. The third part of the course analyzes the process of globalization; its meaning, measurement and effects. A final brief section is devoted to the determination of exchange rates and the international monetary system.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 627. Negotiation and Bargaining. 3 Credit Hours.

Examines the nature of diplomatic negotiation through readings and discussion of international negotiation and through the case method, selecting several cases of high-level policy issues in which the United States has been a principal actor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

INS 628. International Peace and Conflict Resolution. 3 Credit Hours.

The major sources of conflict, and what resources are available for making and keeping the peace? This class introduces students to the most fundamental concerns of the field of International Relations (IR), and especially of its sub-field IPCR.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 629. International Organizations. 3 Credit Hours.

The role, function, and impact on states of international governmental and non-governmental organizations in critical areas like peace and security, human rights, economic development, and environmental degradation.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 630. Advanced Seminar in Comparative Studies. 3 Credit Hours.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

INS 637. Comparative Political Economy. 3 Credit Hours.

Compares how domestic politics and macroeconomic policies interact with globalization. Case studies include welfare states in the U.S. and Europe, East Asian development, post communist transitions and market restructuring in Latin America and Africa.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

INS 638. U.S.-Latin American Relations. 3 Credit Hours.

Political, economic and strategic aspects of U.S.-Latin American relations; the historical experience and contemporary issues, including the influence of extra-regional parties such as Europe and China.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

INS 639. Globalization and Health. 3 Credit Hours.

Globalization and its benefits and threats to public health; the relationship between global economic, political, social, cultural, environmental and technological changes and their impact on human health.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

INS 641. Advanced ISC Seminar. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 642. Drug-Trafficking in the Americas. 3 Credit Hours.

The political economy of the U.S.-Latin American drug trade in the 20th Century along with the dynamics of the U.S.-led war on drugs through the first years of the Twenty First Century.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

INS 644. International Development and Human Welfare. 3 Credit Hours.

Health and development links; macroeconomic policies and their impact on social equity; poverty and structural inequities; and other key issues that influence human development.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

INS 645. Disasters, Terrorism and Global Public Health. 3 Credit Hours.

The historical processes and present trends of disasters, terrorism, humanitarian emergencies and their impact on human health, safety and security.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

INS 646. Politics and Ideology in Latin America. 3 Credit Hours.

The roles played by both "class" and the "new social movements" in the emergence of new modes of political representation.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 647. Latin American Thought. 3 Credit Hours.

The evolution of Latin American thought through political and intellectual history; the classical writings of the main "pensadores", and a comparative analysis of contemporary ideological trends.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

INS 648. Brazil in Transition. 3 Credit Hours.

The social, economic, cultural transformations shaping Brazilian politics. In addition to visiting Rio de Janeiro and Salvador, there will be seminars with Brazilian academics and social and political activists.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 649. European-Latin American Relations. 3 Credit Hours.

This course deals primarily with five main themes: shared history between Europe and Latin America; mutual transfer of ideas (ideologies and political thought), perceptions (images and stereotypes), people (voluntary and slavery), and goods (trade and investment); foreign policies of main European states and the European Community toward Latin America; an analysis of some specific country cases (Spain, especially) and issues (regional integration, among them); and how the above have affected inter-American relations and the hegemonic role of the United States.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 650. Advanced Regional Seminar. 3 Credit Hours.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 653. The European Union. 3 Credit Hours.

The European Union's history, institutions, policies and contemporary issues.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

INS 654. European Union and the World. 3 Credit Hours.

The European Union's development, its main institutions and policies followed by an analysis of the main features of the European Union's external relations.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

INS 655. Post-Soviet Topics. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

INS 656. Special Topics. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 657. U.S. Foreign Policy. 3 Credit Hours.

The leading approaches to the analysis of American foreign policy. Particular emphasis will be placed on the post-Cold War period and the new challenges to U.S. foreign policy of the 21st century.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

INS 664. International Law. 3 Credit Hours.

How international law affects the conduct of states. Issues include jurisdiction, diplomatic immunity, the use of armed force, peaceful dispute settlement among states, human rights, and the International Criminal Court.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

INS 665. The World Before European Domination. 3 Credit Hours.

The historical roots of the contemporary international system. Its objective is to question the standard Eurocentric perspective on the rise of the West to a dominant position in the global system.

Components: SEM.

Grading: GRD.

Typically Offered: Spring.

INS 672. Global Health Policy and Ethics. 3 Credit Hours.

National, regional and global health policies with special consideration to ethical and human rights issues; policies and the moral considerations that shape public health policy.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

INS 693. European Security. 3 Credit Hours.

Regional security in Europe, focusing on NATO expansion, EU expansion, Russian foreign policy, and related issues.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

INS 694. European Topics. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 699. Readings in International Studies. 1-3 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

INS 810. Master's Thesis. 1-6 Credit Hours.

The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

INS 820. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in INS 710 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

INS 825. Continuous Registration--Master's Study. 1 Credit Hour.

To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

INS 830. Doctoral Dissertation. 1-12 Credit Hours.

A total of 12 hours of INS 730 is required of all candidates for the Ph.D. Not more than 12 dissertation credits may be taken during the Fall or Spring semesters, nor more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

INS 840. Post-candidacy Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ph.D. who have advanced to candidacy. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of INS 740 may be taken in a regular semester, nor more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

INS 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the Ph.D. and D.A., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Italian (ITA)

ITA 101. Elementary Italian I. 3 Credit Hours.

Drill in pronunciation, grammatical principles, reading and translation, oral and written exercises. Normally closed to students who have completed two years of high school Italian. Closed to native speakers.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ITA 102. Elementary Italian II. 3 Credit Hours.

Continuation of ITA 101. Closed to native speakers.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ITA 106. Elementary Italian for Romance Language Speakers. 3 Credit Hours.

ITA 106 is the first of two courses specifically designed for students who are either heritage learners or native speakers of a Romance language (Spanish, Portuguese, French, and so on). It will draw on students' already existing knowledge of their own language so as to improve and accelerate the Italian learning experience.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ITA 195. Transfer Credit. 1-3 Credit Hours.

Awarded for 100-level course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: CNC.

Typically Offered: Fall, Spring, & Summer.

ITA 201. Intermediate Italian I. 3 Credit Hours.

Integrated grammar review. Diverse selection of readings: stories, plays, essays, interviews. Practice in speaking and in writing. Class conducted in Italian.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ITA 202. Intermediate Italian II. 3 Credit Hours.

Different genres of texts (portraits, descriptions, short stories, film reviews, magazines) are used to explore different ways of writing and to prepare students for 300-level work. Structured in a workshop format, the course also develops conversational skills. Class conducted in Italian. Writing credits. Closed to native speakers.

Prerequisite: ITA 201 or ITA 206.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ITA 206. Intermediate Italian for Romance Language Speakers. 3 Credit Hours.

ITA 206 is the second of two courses created especially for students who speak another Romance language such as Spanish, French, Portuguese, and so on. As with the first level, students will be further exposed to the linguistic parallels between Italian and their own language, with the goal of being able to comprehend and communicate in Italian at increasingly complex levels.

Prerequisite: ITA 106.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ITA 280. 21st Century Italian Cinema, Society and Culture. 3 Credit Hours.

This course studies key cultural, political and societal issues of 21st century Italy through contemporary film. The course is taught in Italy and offers an in-depth experience of Italian culture happening in the "now," both on and off-screen, through class discussions, guest professors, directors, actors, and site-visits. The course is taught primarily in English, with some Italian terminology. Offered only in the summer study abroad program in Italy.

Prerequisite: ENG 106 or ENG 107.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ITA 295. Transfer Credit. 1-3 Credit Hours.

Awarded for 200-level course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: CNC.

Typically Offered: Fall, Spring, & Summer.

ITA 301. Interpreting Literary and Cultural Texts in Italian. 3 Credit Hours.

Tools for the interpretation and analysis of Italian literary and cultural materials. Acquisition of terminology and theories through the study of the main literary genres (prose, poetry, and drama) and a complementary genre of cultural analysis (e.g., film studies, cultural studies, etc.). Emphasis on critical writing skills. Taught in Italian. Closed to native speakers formally educated in Italian.

Prerequisite: ITA 202.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ITA 310. Topics in Italian Studies in Translation. 3 Credit Hours.

Intensive study, in English translation, of a topic, theme, author, period, or literary movement. May be repeated when the topic varies. May be used toward the Italian minor in accordance with Department of Modern Languages and Literatures stipulations.

Prerequisite: ENG 106 or ENG 107.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ITA 312. Italian Civilization. 3 Credit Hours.

The intellectual life of Italy, political and social institution arts, letters, and sciences. Collateral readings and reports.

Prerequisite: ENG 106 or ENG 107.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ITA 314. Topics in Early Modern Italian Literature in Translation. 3 Credit Hours.

AN introduction to one or more aspects of Italian literature of the early/modern Renaissance period in translation: e.g., the courtier, epic poems, the rebirth of classical theater.

Prerequisite: ENG 106 or ENG 107.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ITA 315. Topics in Gender and Sexuality in Translation. 3 Credit Hours.

This course presents issues dealing with gender and sexuality in Italy in a variety of chronological settings, using the appropriate sources for the topic (e.g., films, newsprint and TV ads, novels). This course does not fulfill the foreign language requirement.

Prerequisite: ENG 106 or ENG 107.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ITA 316. Topics in 18th- and 19th-Century Italian Literature in Translation. 3 Credit Hours.

An introduction to one or more aspects of Italian literature of the 18th and 19th centuries in translation: e.g., the role of opera in Italian culture; the literature of the Italian Risorgimento; the historical novel. This course does not fulfill the foreign language requirement.

Prerequisite: ENG 106 or ENG 107.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ITA 317. Topics in 20th Century Italian Literature in Translation. 3 Credit Hours.

An introduction to one or more aspects of Italian literature of the 20th century in translation: e.g., the experience of war, the child narrator in Calvino and Ammaniti, the experimental novels of the 1960s and '70s. This course does not fulfill the foreign language requirement.

Prerequisite: ENG 106 or ENG 107.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ITA 319. Travels Italy. 3 Credit Hours.

Develops an understanding of Italy's contemporary image in the world by, first, presenting some of the earlier representations of Italy and Italians from Dante, through the Renaissance and Baroque periods, to the present; and second, by looking at the various cultures coming into contact with the Italian one. It attempts to come to grips with notions of representation, ethnicity, ethnocentrism, and stereotypes. Taught in English and does not fulfill CAS language requirement.

Prerequisite: ENG 106 or ENG 107.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ITA 321. Special Topics in Italian Literature. 3 Credit Hours.

Literature, film and/or the arts through a specific topic. May be repeated when the topic varies. Taught in Italian.

Prerequisite: ITA 202.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ITA 330. Topics in Gender and Sexuality in Italian Culture. 3 Credit Hours.

Issues dealing with gender and sexuality in Italy in a variety of chronological settings, using the appropriate sources for the topic (e.g., films, newsprint and TV ads, novels). May be repeated when the topic varies. Taught in Italian.

Prerequisite: ITA 202.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ITA 363. Medieval and Renaissance Topics in Italian. 3 Credit Hours.

Italian culture and literature from its earliest document through the Renaissance. Taught in Italian.

Prerequisite: ITA 202.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ITA 364. 17th-19th Century Topics in Italian. 3 Credit Hours.

Italian culture and literature from the Baroque to the nineteenth century. Taught in Italian.

Prerequisite: ITA 202.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ITA 365. 20th-21st Century Topics in Italian. 3 Credit Hours.

Italian culture and literature of the twentieth and twenty-first century. Taught in Italian.

Prerequisite: ITA 202.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ITA 394. Italian Internship. 1-3 Credit Hours.

The internship is intended to provide the student with an opportunity to apply analytical, interpretive, expressive, and creative skills developed in coursework. Internships ordinarily take place outside the University. They involve UM-faculty supervision as well as supervised on-site experience in an Italian-speaking cultural, business, or not-for-profit organization. Student needs to fill out the internship application form. Normally 40 internship hours are required per credit earned (the host will supply documentary evidence of hours worked).

Components: PRA.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ITA 395. Transfer Credits. 1-3 Credit Hours.

Awarded for 300-level course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: CNC.

Typically Offered: Fall, Spring, & Summer.

ITA 396. Transfer Credits. 1-3 Credit Hours.

Awarded for course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: GRD.

ITA 397. Transfer Credits. 1-3 Credit Hours.

Awarded for course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: GRD.

ITA 398. Transfer Credits. 1-3 Credit Hours.

Awarded for course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: GRD.

ITA 399. Transfer Credits. 1-3 Credit Hours.

Awarded for course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: GRD.

ITA 432. Italian for Business and for Business Travelers. 3 Credit Hours.

This course will allow non-native speakers of Italian communicate with native Italian speakers in a business environment by providing students with the basic vocabulary and professional expressions that are most often used in the business arena. Target business areas will be addressed through specific exercises, individual presentations, pair and group work, class discussion, preparing a Portfolio and a Final written Project, while working with authentic materials.

Prerequisite: ITA 212.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ITA 495. Transfer Credit. 1-3 Credit Hours.

Awarded for 400-level course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: CNC.

Typically Offered: Fall, Spring, & Summer.

ITA 592. Directed Readings. 1-3 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ITA 593. Directed Readings. 1-3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ITA 625. Italian for Graduate Research. 0 Credit Hours.

Grammatical structuring, verb tenses, and word families necessary for reading text with minimal use of a dictionary. May fulfill the Foreign Language Reading Competency Requirement (consult your graduate advisor).

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ITA 641. Elementary ITA I for Graduate Students. 1 Credit Hour.

Designed to develop graduate students' communicative abilities in speaking, reading, writing, and comprehending Italian, and to provide an introduction to the Italian-speaking world.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ITA 642. Elementary ITA II for Graduate Research. 1 Credit Hour.

Continuation of ITA 641. Designed to develop graduate students' communicative abilities in speaking, reading, writing, and comprehending Italian, and the continued study of the Italian-speaking world.

Prerequisite: ITA 641.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ITA 651. Intermediate ITA I for Graduate Research. 1 Credit Hour.

For graduate students with previous study of elementary-level Italian. Designed to enhance graduate students' communication skills in the Italian language at the intermediate level. Intended principally for students who will carry out research in areas related to the Italian-speaking world.

Prerequisite: ITA 642.

Components: LEC.

Grading: CNC.

Typically Offered: Fall, Spring, & Summer.

ITA 652. Intermediate ITA II for Graduate Research. 1 Credit Hour.

For students with previous study of intermediate-level Italian. Designed to enhance graduate student's communication skills in the Italian language at the high-intermediate level. Intended principally for students who will carry out research in areas related to the Italian-speaking world.

Prerequisite: ITA 651.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ITA 691. Directed Readings. 1-3 Credit Hours.

Components: IND.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ITA 692. Directed Readings. 1-3 Credit Hours.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

Japanese (JPN)

JPN 101. Elementary Japanese I. 3 Credit Hours.

Basic introduction to conversation, grammar, reading, elementary composition for students with no background in Japanese. The course is designed to develop basic skills in speaking, listening, reading and writing of the modern Japanese language. Hiragana, Katakana (Japanese syllabary), and 48 Kanji (Chinese characters formulated as a Japanese writing system) will be introduced in the course. Closed to native speakers.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JPN 102. Elementary Japanese II. 3 Credit Hours.

Continuation of JPN 101. Further development, language skills in speaking, listening, reading and writing of the modern Japanese language. Japanese culture and customs will be taught by way of media and/or other resources. Closed to native speakers.

Prerequisite: JPN 101.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JPN 195. Transfer Credit. 1-3 Credit Hours.

Awarded for 100-level course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: CNC.

Typically Offered: Fall, Spring, & Summer.

JPN 201. Intermediate Japanese I. 3 Credit Hours.

Further expansion of language skills (grammar, composition and reading) while introducing students to aspects of Japanese customs, history and culture. Closed to native speakers.

Prerequisite: JPN 102.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JPN 202. Intermediate Japanese II. 3 Credit Hours.

Continuation of JPN 201. Further development of reading, writing, listening and speaking skills in Japanese, including honorific and respectful expressions. Closed to native speakers.

Prerequisite: JPN 201.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JPN 203. Advanced Japanese I. 3 Credit Hours.

Continuation of JPN 202. Develops students' ability to use Japanese in a more advanced way. The course emphasizes accurate comprehension, expansion of vocabulary, and development of the ability to use increasing complex grammatical and sentence structures. In addition to improving their language abilities, students will also be exposed to different areas of Japanese culture.

Prerequisite: JPN 202.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JPN 204. Advanced Japanese II. 3 Credit Hours.

Develops students' ability to use Japanese in a more advanced way by continuing Japanese 203's emphasis on accurate comprehension, expansion of vocabulary, and development of the ability to use increasingly complex grammatical and sentence structures. Students will also be exposed to and analyze different areas of Japanese culture.

Prerequisite: JPN 203.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

JPN 210. Introduction to Japanese Culture. 3 Credit Hours.

The major aesthetic, social and political factors that have shaped contemporary and traditional Japanese culture and society. The historical evolution of Japanese culture will be approached through film, literature and art. Students will revisit related historical sites to enhance awareness and understanding of the topics. The course will be taught primarily in English, with some Japanese terminology. Offered only in the summer abroad program in Japan. No language requirement.

Prerequisite: JPN 102.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

JPN 295. Transfer Credit. 1-3 Credit Hours.

Awarded for 200-level course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: CNC.

Typically Offered: Fall, Spring, & Summer.

JPN 394. Internship. 3 Credit Hours.

Internships are intended to provide students with an opportunity to apply analytical and creative skills developed in other coursework. Internships usually take place outside the University. They involve UM-faculty supervision as well as supervised on-site experience in a Japanese-speaking cultural, business, or non-for-profit organizations. Students need to fill out the internship application form. Normally 40 internship hours are required per credit earned (the host will supply documentary evidence of hours worked). Permission of a faculty member in JPN required.

Prerequisite: JPN 204.

Components: PRA.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

JPN 395. Transfer Credit. 1-3 Credit Hours.

Awarded for 300-level course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: CNC.

Typically Offered: Fall, Spring, & Summer.

JPN 432. Business Japanese. 3 Credit Hours.

Designed for students who have completed JPN 202 or two years of Japanese at the college level and are interested in acquiring practical knowledge and communication skills required to deal with real-life business situations. The focus of the course is oral/aural communication skills. In addition, students will read authentic essays and newspaper articles and will also compose a variety of documents that play an important role in running a business.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

JPN 447. Advance Conversation Through Japanese Theatrical Texts. 3 Credit Hours.

Students will develop conversational skills and acquire a better understanding of sociocultural dynamics by practicing Japanese performing arts, such as Rakugo (comic story telling), Manzai (standup comedy), voice-acting for animation of folk stories, and scenes from contemporary Japanese theater. Students will also develop independent study skills and communication skills in different social settings.

Prerequisite: JPN 203.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JPN 495. Transfer Credit. 1-3 Credit Hours.

Awarded for 400-level course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: CNC.

Typically Offered: Fall, Spring, & Summer.

JPN 641. Elementary JPN I for Graduate Students. 0 Credit Hours.

Designed to develop graduate students' communicative abilities in speaking, reading, writing and comprehending Japanese at the elementary level and to provide an introduction to Japanese Studies.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

JPN 642. Elementary JPN II for Graduate Students. 0 Credit Hours.

Prerequisite: JPN 641.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

JPN 651. Intermediate JPN I for Graduate Research. 0 Credit Hours.

Prerequisite: JPN 642.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

JPN 652. Intermediate JPN II for Graduate Research. 0 Credit Hours.

Prerequisite: JPN 651.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

JPN 653. Advanced JPN I for Graduate Research. 0 Credit Hours.

Prerequisite: JPN 652.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

JPN 654. Advanced JPN II for Graduate Research. 1 Credit Hour.

For graduate students with previous study of advanced-low level Japanese. Designed to enhance graduate students' communication skills in the Japanese language at the advanced-intermediate level. Intended principally for students who will carry out research in areas related to Japanese Studies.

Prerequisite: JPN 653.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

Journalism and Media Management (JMM)

JMM 102. Understanding Media and Content in the Digital Age. 3 Credit Hours.

This course examines how traditional and new media industries are economically structured and how various media content influences audiences and culture. Historical, technological, and regulatory issues related to the different media platforms will also be discussed from a comparative perspective.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 106. Visual Design. 3 Credit Hours.

This course is an introduction to the principles of design, typography, color theory, usability and interactivity as they apply to the layout and design of content for print and digital media.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 108. Writing for the Digital Age. 3 Credit Hours.

This course provides students with an understanding of writing styles appropriate for communicating in the digital age, with particular emphasis on grammar, spelling, syntax and clarity. It provides a solid foundation for further practice and specialization in various types of multimedia communication.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 206. Special Topics in Journalism and Media Management I. 3 Credit Hours.

This course subject matter varies according to announced special topics. See class schedule for details.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 208. Fundamentals of Newsgathering. 3 Credit Hours.

Skill development in gathering facts and other material for, and in preparation of, news stories in a variety of genres across platforms. Focus on gathering information from multiple sources, analyzing and organizing information for dissemination, and presenting the most pertinent facts clearly and cohesively to multiple media outlets.

Prerequisites: JMM 111 or JMM 108.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 210. Writing About the Arts. 3 Credit Hours.

The aim of JMM 210 is to help you develop skills in writing and reporting about entertainment and the arts.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 221. Introduction to Documentary Photography. 3 Credit Hours.

Course is designed to develop skills in visual storytelling. Students will learn to produce images and recognize what makes good photographs in terms of content, composition, and technical quality.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 233. Television Performance. 3 Credit Hours.

Introduction to communication concepts and skills involved in on-camera duties such as anchoring, interviewing and live reporting.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 235. Radio Production and Performance. 3 Credit Hours.

Introduction to equipment and procedures of radio. Production of radio programs and formats, editing, announcing, sequencing program elements, and designing program formulas are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

JMM 245. Introduction to Electronic Media Production. 3 Credit Hours.

Introduction to the theory, process, and procedure of electronic media production. Lecture and laboratory are included.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 285. Applied Statistics for Journalism and Media Management. 3 Credit Hours.

This course provides students an introduction to descriptive and bivariate inferential statistics to better understand and use media research and analysis. Computer applications are included.

Prerequisite: MTH 101. Or ALEKS Score 60+ or 630 Math SAT + or 28 Math ACT+.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 300. Journalism Practicum. 1-3 Credit Hours.

Prescribed study and supervised work with faculty and staff of the student news paper or related news media. Students receive first-hand knowledge and experience in a working news environment.

Components: PRA.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 301. Media Research and Analysis. 3 Credit Hours.

Survey of qualitative and quantitative research methods used to collect and analyze data on media audiences. Course also covers metrics used by media industries. Practice in conducting small-scale audience measurement is included.

Pre-requisite: JMM 102.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 302. Electronic Media Law. 3 Credit Hours.

Course provides analysis of laws and other forces that influence broadcasting, cable, and online media operations. Examines the application of the First Amendment to media operations with a focus on press law.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 303. Communication Law and Policy. 3 Credit Hours.

A study of First Amendment law and theories concerning libel, privacy, copyright, advertising, corporate communications, reporter privilege, free-press/fair trial, pornography, access to government information, broadcasting and new communication technologies. Discussion of international perspectives on media regulation

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

JMM 304. Web and Media Analytics. 3 Credit Hours.

This course covers the computations, interpretations, and applications of metrics used to measure media audiences across electronic, print, and online platforms.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 305. Legal Issues in Media Management. 3 Credit Hours.

Examination of the legal environment affecting contemporary media businesses including broadcasting, advertising, public relations, web-based media, and print publications. Focus on U.S. law, with introduction of international and comparative perspectives.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

JMM 306. Special Topics in Journalism and Media Management II. 3 Credit Hours.

This course subject matter varies according to announced special topics. See class schedule for details.

Requisite: Sophomore Standing or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 307. Mobile Journalism. 3 Credit Hours.

This course provides an introduction to the fundamental procedures in the production and development of mobile storytelling.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 309. Data Journalism. 3 Credit Hours.

This course teaches data analysis and interactive deployment of the World Wide Web and other digital platforms. Students will learn to analyze data for journalistic work and will be expected to create and deploy database-driven applications.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 313. Media Sales. 3 Credit Hours.

Operation of sales departments within media outlets. Course includes the preparation and delivery of sales presentations as well as the use of audience reports.

Prerequisite: JMM 102.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 314. Media Programming. 3 Credit Hours.

Course covers categories and sources for selecting program materials used in radio, television, cable television, and other program services. Strategies employed in devising program schedules and understanding audience behaviors are also covered.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 317. Broadcast Journalism. 3 Credit Hours.

Preparation of materials for presentation through the broadcast/cable media with emphasis on news writing for oral presentation by studio anchors and field reporters. Course examines issues facing the profession of broadcast journalism, radio, and TV reporting techniques and news program formats.

Prerequisite: JMM 245.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 319. History of Journalism. 3 Credit Hours.

The development and impact of American journalism.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 331. Information Graphics and Visualization. 3 Credit Hours.

Introduction to informal graphic procedures and practices as they pertain to print and online media. Layout and design typography, mechanical production techniques, and production vocabulary will be an integral part of this course.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 333. Social Media and Journalism. 3 Credit Hours.

Examination of best practices for use of social media for gathering, disseminating, and promoting information.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

JMM 341. Web Design. 3 Credit Hours.

This course covers the basic aspects of interaction design and web development, focusing on production processes. It provides an overview of web design concepts including usability, accessibility, information architecture, basic animation, and graphic design; all discussed in the context of the web environment. This course further offers an introduction to fundamental and emerging web trends.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 345. Intermediate Electronic Media Production. 3 Credit Hours.

Planning and execution of complex field, studio, and multimedia production in a variety of lengths and formats. High level skills in television control room situations and non-linear editing will be used to produce audio, video, and online content.

Prerequisite: JMM 245.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 361. Advanced Documentary Photography. 3 Credit Hours.

Advanced Documentary Photography is a class designed to improve the visual storytelling news gathering, and photographic technical skills introduced in the introductory course.

Prerequisite: JMM 221.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 381. Newspaper Editing and Layout. 3 Credit Hours.

Introduction to electronic editing and development of skills in copy editing, headline writing, picture editing, and newspaper layout.

Prerequisite: JMM 208.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 382. Publication Planning and Editing. 3 Credit Hours.

Introduction to editing and design, with emphasis on the development of skills in editing copy and photos, writing headlines, news judgment, and designing print publications and websites.

Prerequisites: JMM 216 or JMM 208, JMM 106.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 401. Editorial Interpretation of Contemporary Events. 3 Credit Hours.

Critical examination of fundamental issues in public life. Preparation of editorials and interpretive articles for mass media are included.

Prerequisites: JMM 216 or JMM 208.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 402. Strategic Media Management. 3 Credit Hours.

This course focuses on strategy analysis, formulation, implementation, and evaluation in managing media enterprises. Media cases are used to apply and discuss strategies.

Pre-requisite: JMM 102.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 403. Media Industry Trends. 3 Credit Hours.

Economic concepts, practices, and issues as they relate to the mass media industry.

Requisite: Junior Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 404. Latinos and the Media. 3 Credit Hours.

This course examines the history, politics, production and reception of Latino-oriented media. It considers Latino media production processes, as well as Latina/o audiences' immigration, incorporation and media reception patterns. The course takes advantage of Miami as a vibrant immigration media production site through field trips and independent research projects.

Requisite: Sophomore Standing or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

JMM 406. Special Topics in Journalism and Media Management III. 3 Credit Hours.

This course subject matter varies according to announced special topics. See class schedule for details.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 407. Media Entrepreneurship. 3 Credit Hours.

Students generate comprehensive business plans for a proposed media enterprise. Organizational, financial, and marketing aspects of starting a media business are discussed.

Requisite: Senior Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 408. International Electronic Media Systems. 3 Credit Hours.

Seminar on world broadcasting systems and trans-national communication services. Discussion of contemporary issues involving electronic media systems worldwide.

Requisite: Junior Status or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 409. Advanced Feature Design. 3 Credit Hours.

Advanced newspaper, magazine, and electronic design. Students will develop the skills necessary to produce strong visual packages combining type, photography, artwork, and white space. The course will cover advanced design and traditional reproduction techniques for art and copywriting as well as on-line presentations.

Prerequisite: JMM 106. Or STC 202. Or STC 203.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 414. Evolution and Impact of Television Content: The American Sitcom. 3 Credit Hours.

The seminar will examine how social, economic and political factors impacted the development and evolution of the content of sitcoms, as well as the impact such content had on American society.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 417. Advanced Broadcast Journalism. 3 Credit Hours.

This capstone course concentrates on gathering and preparing news stories for presentation in news programs. Includes field reporting, editing, preparation of visual and aural TV elements, writing, producing and performing for on-air presentation. Lecture and laboratory are included.

Prerequisites: JMM 245, JMM 317.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 419. Interactive Storytelling. 3 Credit Hours.

This course explores how storytelling is reinventing itself utilizing the new digital communication tools available. It will cover linear and non-linear storytelling techniques and production processes.

Prerequisites: JMM 106 and JMM 245 and JMM 341. Requisite: Junior Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 422. Programming for Interactivity. 3 Credit Hours.

This course is a multimedia class that will teach the fundamental programming skills required to create compelling online multimedia stories.

Programming taught in this class caters specifically for non-programmers who want to learn how to present their work online in an interactive manner.

Prerequisite: JMM 341.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 427. Television Newscast. 3 Credit Hours.

Studio anchoring, newscast producing, and field reporting for news and public affairs programming.

Prerequisite: JMM 417.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 429. Interactive Data Visualization. 3 Credit Hours.

This course is a seminar designed to introduce interactive data visualization concepts in a web environment. Students will be introduced to code libraries which assist in this task, best practices for interactivity and data visualization. The course will also briefly cover working with data (i.e., how to find sources, cleaning and preparing data for visualizations, etc.).

Prerequisite: JMM 331 and JMM 422.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 434. Media Distribution for Film and Television. 3 Credit Hours.

This course covers the various aspects of the distribution process for films and television programs through conventional and emerging channels.

Requisite: Junior Status or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 435. Media Technology. 3 Credit Hours.

This course examines the deployment, use, and impact of communication technologies in various media contexts from an economic, regulatory, and social perspective.

Requisite: Junior Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 442. Online Journalism. 3 Credit Hours.

A study of the issues, skills and practices related to the online presentation of news and information in a convergent media environment.

Prerequisites: JMM 216 or JMM 208.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 443. Covering the Arts. 3 Credit Hours.

The aim of this course is to help you develop skills in writing and reporting about entertainment and the arts, from covering business and government news related to the arts, to telling the stories of people leaving a mark in the art world, to reviewing and critiquing works. You will report stories, write reviews and maintain a blog in the discipline of your choice.

Prerequisites: JMM 216 or JMM 208.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 444. Public Affairs Reporting. 3 Credit Hours.

Emphasis on reporting, writing and analysis about institutions, issues and actions of local government, and their effects on society.

Prerequisites: JMM 216 or JMM 208.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 445. Advanced Electronic Media Production. 3 Credit Hours.

The integration of the producer's role and the structure of program design as they relate to day-to-day production operations. Lecture and laboratory are included.

Prerequisite: JMM 345.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 446. Travel Writing. 3 Credit Hours.

A study of the major types and styles of travel news and features stories for newspapers, magazines, newsletters, and websites.

Prerequisites: JMM 216 or JMM 208.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 447. In-depth Journalism and Media Convergence. 3 Credit Hours.

A capstone experience that requires students to use effectively their full range of journalistic knowledge, newsgathering, and writing skills to prepare news and information for different media platforms.

Prerequisites: JMM 216 or JMM 208.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 448. Sports and the Media. 3 Credit Hours.

This course examines the relationship between sports and the media, including stakeholders and the financial component of sports and media, sports production and content, and sports media audience. The course provides an understanding of the social and economic relationships between sports and media and the effects those relationships have on sports consumers.

Requisite: Sophomore Standing or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 461. Seminar in News Ethics and Problems. 3 Credit Hours.

Ethical, practical, and professional problems of news communicators in society.

Requisite: Junior Status or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

JMM 495. Internship in Journalism and Media Management. 1-3 Credit Hours.

Prescribed study and supervised work with professionals in Journalism and Media Management.

Requisite: Sophomore Status, cumulative GPA of 2.5, and Permission of Instructor.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

JMM 499. Projects and Directed Research. 1-3 Credit Hours.

Individual study. No more than three credits may be counted toward a Communication major or minor.

Components: IND.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

JMM 510. Comparative Media Systems. 3 Credit Hours.

This course deals with issues in international news gathering and distribution, giving special attention to Latin America and the Caribbean. The class takes a comparative approach, looking at media systems in the United States and other nations.

Requisite: Sophomore Standing or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 511. Global Media. 3 Credit Hours.

An analysis of issues and practices surrounding globalization, regionalization, and global/local as they relate to media industries, journalism, and communication.

Requisite: Sophomore Standing or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 513. Computer-Assisted Reporting. 3 Credit Hours.

Use of computer applications for newsgathering with emphasis on the World Wide Web, commercial online services, and database tools.

Prerequisites: JMM 216 or JMM 208.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 515. Reporting and the Internet. 3 Credit Hours.

Overview of uses of online computer services for newsgathering and distribution with emphasis on the Internet.

Prerequisites: JMM 216 or JMM 208.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 517. Television News Reporting. 3 Credit Hours.

Gathering and preparation of news stories for presentation in news programs. Includes field reporting, editing, preparation of visual and aural elements, writing, producing and performing for on-air presentation.

Prerequisite: JMM 345.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 521. Seminar in Visual Storytelling. 3 Credit Hours.

An advanced seminar class designed to enhance the knowledge and practice of the visual storytelling narrative. This seminar stresses the importance of converging media, still images, video, and sound. Particular emphasis will be placed upon the creation of a multimedia portfolio.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 522. Advance Infographics and Data Visualization. 3 Credit Hours.

This course is an introduction to the visual display of information in digital and interactive media, with a special focus on the encoding of data by means of statistical charts, maps, and diagrams.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 523. Sports Reporting. 3 Credit Hours.

An analysis of sports journalism that will develop students' skills in sports reporting and sports writing. Discussions range across the entire field of sports reporting, including broadcasting, but the greatest emphasis is concentrated on sports reporting and writing for newspapers and magazines.

Prerequisites: JMM 216 or JMM 208.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 527. Television News Producing. 3 Credit Hours.

Studio anchoring, newscast producing and field reporting for news and public affairs programming. Live field reporting and field and studio interviewing techniques are covered.

Prerequisites: JMM 417 or JMM 517.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 531. Database Journalism. 3 Credit Hours.

This course teaches data analysis and interactive deployment of data of the World Wide Web and other digital platforms.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 533. Social Media. 3 Credit Hours.

Examination of best practices for use of social media for gathering, disseminating, and promoting information.

Prerequisite: JMM 208.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

JMM 537. The Business of Modern Journalism. 3 Credit Hours.

Provides an examination of the evolving business models for legacy news organizations as well as discussion of entrepreneurial opportunities for news content in new media and digital platforms.

Prerequisites: JMM 216 or JMM 208.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 541. Advanced Audio Video Narratives. 3 Credit Hours.

This course examines uses of audio and video to communicate journalism. Students learn to investigate, gather content, and produce documentary stories primarily for online distribution.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

JMM 544. Feature Writing. 3 Credit Hours.

Analyzing and writing feature articles for magazines, newspapers, and other news media.

Prerequisites: JMM 216 or JMM 208.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 547. Magazine Planning. 3 Credit Hours.

This course is a magazine planning class where students will create a 32-page print/digital cross-platform niche publication from scratch. It will be based on a business model creating a design and content for a specific audience.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 550. 3D Design and Graphics. 3 Credit Hours.

This course focuses on the use of 3D Design software for communication and how to integrate with other print and digital technologies.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

JMM 551. Advanced Programming. 3 Credit Hours.

This course explores the role of the programmer as journalist. Students will perform the basic tasks of journalism from a programmatic perspective including: gathering, distilling and presenting information. Students will learn how to gather information from public databases and government websites. They will learn how to automate processes for filtering information and learn how to present this information in a visual and interactive news report. Students will also learn how to combine multiple sources of information, to personalize information for the end reader, and account for the relevant permutations of the data. Students will learn to build and query databases as well as mine and visually present the information using programming languages such as PHP and Python. Rapid development frameworks such as Django, Zendand, Symfony will also be covered in the class.

Components: LEC.

Grading: SUS.

Typically Offered: Summer.

JMM 560. Team Multimedia Project. 1-3 Credit Hours.

Students will work in a team to produce a documentary multimedia project in conjunction with one or more partner universities. Students will study the genre of documentary multimedia storytelling, research their assigned topic(s), content-gather, edit, wireframe, design and program the project and produce it on multiple platforms depending on the topic and intended audience. Students will use audio, photographic, video, infographic and text reporting tools in producing the project. They will also study methodologies for evaluating multimedia and beta test the site using established research methodologies.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

JMM 592. Special Topics in Journalism and Media Management. 3 Credit Hours.

This course subject matter varies according to announced special topic. See class schedule for details.

Requisite: Junior Or Senior Or Graduate Status.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 599. Advanced Projects and Directed Research. 1-6 Credit Hours.

Individual study. Course may be repeated to a maximum of six credits.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

JMM 601. Editorial Interpretation of Contemporary Events. 3 Credit Hours.

Critical examination of fundamental issues in public life. Preparation of editorials and interpretive articles for mass media are included.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 605. News Technologies. 3 Credit Hours.

This course emphasizes how television, digital, and multimedia technologies contribute to the storytelling process. Understanding of production theories and news processes will be gained through hands on work with television and multimedia projects.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 606. Multimedia Design. 3 Credit Hours.

This is a project-based course in multimedia design, with emphasis on visual concepts and graphics development. Students will be learning about the various software packages to design and integrate interaction into their projects. Topics covered include preparing existing content for multimedia journalism, animation, layout for interactive media, typography, photography and usability.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 607. Broadcast Journalism. 3 Credit Hours.

Advanced instruction in techniques of news writing and field reporting, including conducting research for stories, preparing complete field packages for newscasts, filing live remotes, and conducting interviews.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

JMM 608. Long-Form Public Affairs Programming. 3 Credit Hours.

Development and production of longer form news, information magazine, and documentary style programming.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

JMM 609. Internship in Journalism and Media Management. 1-3 Credit Hours.

Prescribed study and supervised work with professionals in newspapers, magazines, web sites or related news media.

Components: IND.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

JMM 610. Comparative Media Systems. 3 Credit Hours.

This course deals with issues in international news gathering and distribution, giving special attention to Latin America and the Caribbean. The class takes a comparative approach, looking at media systems in the United States and other nations.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 611. Newswriting and Reporting Seminar. 3 Credit Hours.

Development of newswriting and reporting skills for news media.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 612. History of Journalism Seminar. 3 Credit Hours.

The development and impact of journalism in America traced through industry leaders and events.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 613. Computer-Assisted Reporting. 3 Credit Hours.

Use of computer applications for newsgathering with emphasis on the World Wide Web, commercial online services, and database tools.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 614. Law and Ethics in Journalism and Media Management. 3 Credit Hours.

This course focuses on two critically important areas of the law for both aspiring media professionals and those seeking management opportunities. Principles of free speech, deeply rooted in the First Amendment to the U.S. Constitution, delve into such topics as defamation, privacy, access to information, obscenity, and intellectual property. The course also introduces students to the fundamentals of business law as it pertains to the media industry with an emphasis on employment, workplace management, and business contracts. Ethical issues are addressed throughout the course.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 615. Writing and Reporting Across Platforms. 3 Credit Hours.

An introduction to professional operating practices in multimedia journalism with emphasis on news writing and news production skills.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 616. Evolution and Impact of Television Content: The American Sitcom. 3 Credit Hours.

The seminar will examine how social, economic and political factors impacted the development and evolution of the content of sitcoms, as well as the impact such content had on American society.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 617. Television News Reporting. 3 Credit Hours.

Gathering and preparation of news stories for presentation in news programs. Includes field reporting, editing, preparation of visual and aural elements, writing, producing and performing for on-air presentation.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 618. International Journalism. 3 Credit Hours.

News gathering, transmission, and distribution outside the United States, with emphasis on Latin America.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 619. Interactive Storytelling. 3 Credit Hours.

Digitization allows us to merge several forms of media that were not connected in the past. This course is intended as an exploration of how storytelling is re-inventing itself utilizing the new digital communication tools available to us today. This course will cover linear and non-linear storytelling techniques and production processes.

Prerequisites: JMM 628 and JMM 622 and JMM 630 and CIM 690.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

JMM 620. Reporting and the Internet. 3 Credit Hours.

Overview of uses of online computer services for newsgathering and distribution with emphasis on the Internet.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 621. Global Media. 3 Credit Hours.

An analysis of issues and practices surrounding globalization, regionalization, and global/local as they relate to media industries, journalism, and communication.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 622. Infographics and Data Visualization. 3 Credit Hours.

This course is an introduction to the visual display of information in digital and interactive media, with a special focus on the encoding of data by means of statistical charts, maps, and diagrams.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

JMM 623. Sports Reporting. 3 Credit Hours.

An analysis of sports journalism that will develop students' skills in sports reporting and sports writing. Discussions range across the entire field of sports reporting, including broadcasting, but the greatest emphasis is concentrated on sports reporting and writing for newspapers and magazines.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 624. Seminar in Editing and Design for Print and Websites. 3 Credit Hours.

Theory and practice in news media copy editing, layout, and design.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 625. Advanced Newsgathering and Writing Seminar. 3 Credit Hours.

Refining news writing and reporting skills for the media.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

JMM 626. Specialized Writing and Reporting Seminar. 3 Credit Hours.

Techniques in writing and reporting about specialized and complex subjects for news media.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 627. Television News Producing. 3 Credit Hours.

Studio anchoring, newscast producing and field reporting for news and public affairs programming. Live field reporting and field and studio interviewing techniques are covered.

Components: LAB.

Grading: GRD.

JMM 628. Seminar in Visual Storytelling. 3 Credit Hours.

An advanced seminar class designed to enhance the knowledge and practice of the visual storytelling narrative. This seminar stresses the importance of converging media, still images, video, and sound. Particular emphasis will be placed upon the creation of a multimedia portfolio.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

JMM 629. Interactive Data Visualization. 3 Credit Hours.

This course is a seminar designed to introduce interactive data visualization concepts in a web environment. Students will be introduced to code libraries which assist in this task, best practices for interactivity and data visualization. The course will also briefly cover working with data (i.e., how to find sources, cleaning and preparing data for visualizations, etc.).

Prerequisite: JMM 622 and JMM 630.

Components: LAB.

Grading: GRD.

JMM 630. Programming for Interactivity. 3 Credit Hours.

This course is a multimedia class that will teach the fundamental programming skills required to create compelling online multimedia stories.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 631. Database Journalism. 3 Credit Hours.

This course teaches data analysis and interactive deployment of data of the World Wide Web and other digital platforms.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 632. Current Issues in Media Management. 3 Credit Hours.

This course addresses how recent developments in media technology, regulation, content, and measurement have influenced the structure and economics of the media industry. Given the rapid evolution of the media business across platforms, topics are likely to vary from year to year. Media cases are used to discuss appropriate strategies and decision-making and help students think as media managers.

Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 633. Social Media. 3 Credit Hours.

Examination of best practices for use of social media for gathering, disseminating, and promoting information.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

JMM 634. Media Distribution for Film and Television. 3 Credit Hours.

This course covers the various aspects of the distribution process for films and television programs through conventional and emerging channels.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 635. The Broadcasting, Cable, and Electronic Media Industry. 3 Credit Hours.

Examination of broadcasting, cable, and related electronic media from a business perspective.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

JMM 636. Content Strategy in the Media Industry. 3 Credit Hours.

What distinguishes the media industry from other sectors is the primacy of content. This course examines the practices involved in developing, distributing, scheduling, and monetizing media content, especially in the video space. Programming strategies are discussed across traditional and emergent media platforms.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

JMM 637. The Business of Modern Journalism. 3 Credit Hours.

Provides an examination of the evolving business models for legacy news organizations as well as discussion of entrepreneurial opportunities for news content in new media and digital platforms.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 640. Web Design. 3 Credit Hours.

This course covers the basic aspects of interaction design and web development, focusing on production processes. It provides an overview of web design concepts including usability, accessibility, information architecture, basic animation, and graphic design; all discussed in the context of the web environment. This course further offers an introduction to fundamental and emerging web trends.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 641. Advanced Audio Video Narratives. 3 Credit Hours.

This course examines uses of audio and video to communicate journalism. Students learn to investigate, gather content, and produce documentary stories primarily for online distribution.

Prerequisite: JMM 628.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

JMM 642. Audience Research and Analysis. 3 Credit Hours.

This course covers the primary research methods and metrics used to measure media audiences. Discussion of data collection procedures includes survey research, experimental design, content analysis, focus groups, and the growing use of big data analysis. Media metrics center on broadcast ratings and online exposure measurement. Applications or small-scale projects are conducted for practice.

Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 643. Media Industry Trends. 3 Credit Hours.

Economic concepts, practices, and issues as they relate to the mass media industry.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 644. Feature Writing. 3 Credit Hours.

Analyzing and writing feature articles for magazines, newspapers, and other news media.

Components: LAB.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 646. Travel Writing. 3 Credit Hours.

A study of the major types and styles of travel news and features stories for newspapers, magazines, newsletters, and websites.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 647. Magazine Planning. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 648. Sports and the Media. 3 Credit Hours.

This course examines the relationship between sports and the media, including stakeholders and the financial component of sports and media, sports production and content, and sports media audiences. The course provides an understanding of the social and economic relationships between sports and media and the effects those relationships have on sports consumers.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 649. Team Multimedia Project. 1-3 Credit Hours.

Students will work in a team to produce a documentary multimedia project in conjunction with one or more partner universities. Students will study the genre of documentary multimedia storytelling, research their assigned topic(s), content-gather, edit, wireframe, design and program the project and produce it on multiple platforms depending on the topic and intended audience. Students will use audio, photographic, video, infographic and text reporting tools in producing the project. They will also study methodologies for evaluating multimedia and beta test the site using established research methodologies.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

JMM 650. 3D Design and Graphics. 3 Credit Hours.

This course focuses on the use of 3D Design software for communication and how to integrate with other print and digital technologies.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

JMM 651. Advanced Programming. 3 Credit Hours.

This course explores the role of the programmer as journalist. Students will perform the basic tasks of journalism from a programmatic perspective including: gathering, distilling and presenting information. Students will learn how to gather information from public databases and government websites. They will learn how to automate processes for filtering information and learn how to present this information in a visual and interactive news report. Students will also learn how to combine multiple sources of information, to personalize information for the end reader, and account for the relevant permutations of the data. Students will learn to build and query databases as well as mine and visually present the information using programming languages such as PHP and Python. Rapid development frameworks such as Django, Zend and Symfony will also be covered in the class.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

JMM 653. Practicum in Producing News. 1-3 Credit Hours.

The mechanics of planning and executing professional style newscasts and/or long-form television news program.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 654. Writing for Publication. 1-3 Credit Hours.

This course focuses on writing principles and practices of the news media. It is designed to give the student exposure and practical experience in writing for the print media.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

JMM 655. Media Technology. 3 Credit Hours.

This course examines the deployment, use, and impact of communication technologies in various media contexts from an economic, regulatory, and social perspective.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 657. Media Entrepreneurship. 3 Credit Hours.

Students generate comprehensive business plans for a proposed media enterprise. Organizational, financial, and marketing aspects of starting a media business are discussed.

Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 692. Special Topics in Journalism and Media Management. 3 Credit Hours.

This course subject matter varies according to announced special topic. See class schedule for details.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 695. Special Topics in Journalism. 3 Credit Hours.

This course subject matter varies according to announced special topic. See class schedule for details.

Components: IND.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 696. Special Topics in Visual Journalism. 1-6 Credit Hours.

This course subject matter varies according to announced special topic. See class schedule for details.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 699. Advanced Projects and Directed Research. 1-6 Credit Hours.

Individual study. Course may be repeated to a maximum of six credits.

Components: IND.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

JMM 815. Multimedia Project. 1-6 Credit Hours.

Students, in consultation with program faculty, will complete a final project that reflects in-depth knowledge and analysis of a subject and professional competence in multimedia storytelling. Course may be repeated to a maximum of six credits.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

Judaic Studies (JUS)

JUS 205. Holocaust Survivor Service Internship. 3 Credit Hours.

Interns will gain meaningful experiences that will offer them an opportunity to become involved in service-oriented activities. This will give them a deep insight and unique understanding of the historical significance of the Holocaust while providing valuable services to the survivors of Nazi atrocities.

Components: DIS.

Grading: CNC.

Typically Offered: Fall.

JUS 206. Holocaust Survivor Service Internship. 3 Credit Hours.

Components: SEM.

Grading: CNC.

Typically Offered: Spring.

JUS 231. Jewish Civilization: Society, Culture and Religion. 3 Credit Hours.

Introduction to Jewish civilization from Abraham to present.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JUS 250. The Holocaust Through Film, Memoir and Testimony. 3 Credit Hours.

The purpose of the course is to introduce students to the history of the Holocaust through classroom dialogue, film, and literature analysis. Involving students in major ethical and moral issues raised in the study of the Holocaust by encouraging students to think critically, explore choices, and make decisions based on a code of conduct that reflects a commitment to humanity.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JUS 301. Studies in Judaica. 3 Credit Hours.

Special topics offering at the 300-level for students pursuing a major/minor in Judaic Studies.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JUS 314. The Rise of Judaism. 3 Credit Hours.

The history and literature of early Judaism, covering the period from the fall of Jerusalem in 587/586 BCE to the beginnings of rabbinic Judaism and the formation of the Mishnah (ca.200 CE).

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JUS 324. The History of Zionism. 3 Credit Hours.

The religious, cultural, historical, political and social underpinnings of the development of Zionism that led to the creation of the State of Israel. Through readings, analysis of speeches and essays, exploration of films and the internet, the class will move through time from the origins of the Zionist idea to the present.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JUS 325. Israel: The Making of a State. 3 Credit Hours.

The creation of the state of Israel in its historical context, emphasizing the period of 1945-55: The struggle for Israel's establishment, the making of the state and the early challenges Israel faced. The class will use documents, text, testimony, poetry, music and film.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JUS 338. History of the Holocaust. 3 Credit Hours.

Focus on the roots, events and results of the Nazis' nearly successful annihilation of Jewish men, women, and children living under the Swastika. We will study Hitler's political aims, his Aryan superiority mythology, his domestic and foreign policies, and his conquests. We will also investigate how Germans, admired for their culture, became instruments of mass murder. Also included in this survey are the heroism of Jewish resisters and gentile rescuers who stood in direct opposition to the silence of the Christian churches and inactivity of the nearly all nations in the face of the Jewish disaster.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JUS 340. History of Modern Germany Since 1815. 3 Credit Hours.

German history from the Congress of Vienna in 1815 to the end of the Second World War. The course concentrates on the social, political, and cultural history of Germany between Bismarck and Hitler. The main topics of discussion include: The German states before and during the revolutions of 1848, German unification and Prussian policy during the 1850s and 1860s, Bismarck's foreign policy and the political history of the Empire from 1871 to 1914, the origins and the course of the First World War, the Versailles Treaty and the history of the Weimar Republic, Hitler's rise to power and the politics of Nazi Germany between 1933 and 1939, Germany during the Second World War and the Holocaust. To bring the past to life, lectures will occasionally be supplemented by documentary films.

Components: LEC.

Grading: GRD.

JUS 352. Panoramic View of the Middle East. 3 Credit Hours.

The course is designed to provide a comprehensive introduction to the Middle East and a basic understanding of factors, forces, and processes shaping developments in the modern and contemporary history of this important world region.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JUS 360. Hollywood and Popular Culture: The American Jewish Experience. 3 Credit Hours.

The image of the Jew and the Jewish experience in American Cinema.

Prerequisite: JUS 231 or HIS 102.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JUS 365. Literature of the Holocaust. 3 Credit Hours.

The destruction of European Jewry has generated a substantial body of literature, including survivor accounts, novels, poetry, and theological and philosophical inquiries. Firstly this course will review the history of the Holocaust; then a range of works will be read and discussed in terms of questions associated with the memorialization of victims. Non-literary responses to the Holocaust will also be examined: excerpts will be shown from the films *The Last of the Unjust*, *Shoah*, and *The Quarrel*, and we will listen to Steve Reich's musical composition *Different Trails*.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JUS 375. Religion and Democracy in Israel. 3 Credit Hours.

Israel's evolution as a nation and a society by focusing on how religion impacts ethnicity, culture, and democracy.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JUS 380. Archaeology of Palestine. 3 Credit Hours.

Survey of the major archaeological excavations and surveys of Palestine, how this is used to interpret biblical narrative and give context to the emergence of Judaism and Christianity.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JUS 401. Studies in Judaica. 1-3 Credit Hours.

Designed to enable students interested in some phase of Judaic Studies to study extensively in that field of interest.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JUS 410. Special Topics. 1-3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JUS 411. Special Topics. 1-3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JUS 421. Internship in Judaic Studies. 1-3 Credit Hours.

Prescribed study and supervised work with practitioners in Judaic services.

Components: DIS.

Grading: CNC.

Typically Offered: Fall & Spring.

JUS 498. Senior Thesis. 3 Credit Hours.

Partial requirement for Departmental Honors in Judaic Studies. Thesis to be a documented essay in any area of Judaic Studies written under the direction of a member of the faculty.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

JUS 499. Senior Thesis. 3 Credit Hours.

Partial requirement for Departmental Honors in Judaic Studies. Thesis to be a documented essay in any area of Judaic Studies written under the direction of a member of the faculty.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

Keyboard Performance (MKP)

MKP 0R1. Organ. 2 Credit Hours.

1-hour lesson and 50 minute studio class for organ students. Technical Requirements: Gleason, Method of Organ Playing: selected exercises from Manual Technique and Pedal Technique. Repertoire: Gleason, Method of Organ Playing: Compositions for Manuals, Studies and Compositions for Manuals and Pedal; selected chorale preludes and smaller-scale preludes and fugues by Bach, Buxtehude, Brahms, and others; basics of hymn playing.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 0R3. Organ. 2 Credit Hours.

1-hour lesson and 50 minute studio class for organ students. Technical Requirements: Gleason, Method of Organ Playing: selected exercises from Pedal Scales, Broken Chords, Advanced Exercises. Repertoire: Selected compositions by Bach and representative Baroque, Classical, Romantic, and Modern composers. Hymn playing and organ accompanying techniques.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 0R5. Organ. 1-4 Credit Hours.

Requires successful completion of an undergraduate degree in piano performance, and approval of student's advisor (studio teacher). Course may be taken for 2 credits (1-hour lesson) or 1 credit (30-minute lesson) as part of Artist Diploma. The course covers private instruction on organ-related performance techniques and repertory. The level of repertory will be determined by instructor based on the student's performance level. A jury examination in front of a faculty committee is required each semester for students taking the course for 2 credits.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 0R6. Organ. 1-2 Credit Hours.

Requires successful completion of an undergraduate degree in piano performance, and approval of student's advisor (studio teacher). Course may be taken for 2 credits (1-hour lesson) or 1 credit (30-minute lesson) as part of masters degree. The course covers private instruction on organ-related performance techniques and repertory. The level of repertory will be determined by instructor based on the student's performance level. A jury examination in front of a faculty committee is required each semester for students taking the course for 2 credits.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 0R7. Organ. 1-2 Credit Hours.

Requires successful completion of a graduate degree in piano performance, and approval of student's advisor (studio teacher). Course may be taken for 2 credits (1-hour lesson) or 1 credit (30-minute lesson) as part of doctoral degree. The course covers private instruction on organ-related performance techniques and repertory. The level of repertory will be determined by instructor based on the student's performance level. A jury examination in front of a faculty committee is required each semester for students taking the course for 2 credits.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 111. Non-Major Class Piano I. 1 Credit Hour.

This course is designed for the adult beginner who has an interest in playing keyboard instruments for pleasure. Students with no previous musical or keyboard experience learn the fundamentals of music theory and apply them to playing the keyboard at the beginning level.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 112. Non-Major Class Piano II. 1 Credit Hour.

Designed for the adult beginner who has an interest in playing keyboard instruments for pleasure, this course builds on the concepts introduced in MKP 111. Students continue to learn the fundamentals of music theory and apply them to playing the keyboard.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 140. Keyboard Studies I. 1 Credit Hour.

Major and minor five finger patterns, beginning repertoire, major scales and arpeggios, basic chord progressions, for types of triads, dominant seventh chords, beginning sight reading, harmonization, transposition, and improvisation skills.

Requisite: Frost School of Music.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

MKP 141. Keyboard Studies II. 1 Credit Hour.

Minor scales and arpeggios, modal scales, five types of seventh chords and inversions, and more extensive chord progressions. Study of repertoire and the development of sight-reading, harmonization, transposition, and improvisation skills are continued.

Requisite: Frost School of Music.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

MKP 185. Musical Theatre Accompanying. 1 Credit Hour.

A class designed to improve the skills of pianists with a particular interest in musical theatre piano accompaniment. Students will study in a classroom setting.

Requisite: Frost School of Music.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 186. Vocal Accompanying I. 1 Credit Hour.

Pianists will attend seminars where the principles of accompanying classical and musical theatre singers are addressed. Students are assigned to accompany applied voice lessons and ensembles.

Requisite: Frost School of Music.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 187. Vocal Accompanying II. 1 Credit Hour.

Pianists attend seminars where the principles of accompanying classical and musical theatre singers are addressed. Students are assigned to accompany applied voice lessons and ensembles.

Requisite: Frost School of Music.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 189. Accompanying, Level I. 1 Credit Hour.

Development of sightreading skills and score preparation.

Requisite: Frost School of Music.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 190. Accompanying, Level II. 1 Credit Hour.

Progressive development of individual vocal/instrumental and ensemble accompanying, sightreading, score reading, and improvising from a lead sheet.

Requisite: Frost School of Music.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 191. Accompanying, Level III. 1 Credit Hour.

Progressive development of all types of accompaniment skills including; clef and score reading, transposition, possible recital, opera theater, choral ensemble, and/or orchestral accompanying.

Prerequisite: MKP 190.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 220. Computers, Keyboards, and Music. 2 Credit Hours.

An introduction to basic computing skills for the musician that explores computers, keyboards, and other MIDI- (Musical Instrument Digital Interface) related instruments as tools for the musician. Topics include electronic keyboards, computer hardware and software, MIDI sequencing, computer-assisted musical notation, and teaching strategies using new technologies. Students gain hands-on experience while completing projects in each of the above areas.

Prerequisite: MKP 102.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 240. Keyboard Studies III. 2 Credit Hours.

Dominant seventh arpeggios, secondary dominants, and work more extensively with chord progressions. Students also learn Theme and Variation form, Sonata form, and characteristics of the musical style periods. Study of repertoire and the development of sight-reading, harmonization, and the improvisation skills are continued. Transposition of instrumental music to concert pitch, and beginning choral and instrumental score reading are introduced. Students will continue playing major and minor scales at an increased level of difficulty.

Requisite: Frost School of Music.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

MKP 241. Keyboard Studies IV. 2 Credit Hours.

Diminished seventh arpeggios, augmented, and Neapolitan sixth chords, Three-Part Rondo forms, extended chord structures, and a variety of chord Progressions that modulate. Study of repertoire and the development of sight-reading, harmonization, transposition, and improvisation skills are continued. Choral and instrumental score reading, modal scales, and major and minor scales are performed at an increased level of difficulty.

Requisite: Frost School of Music.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

MKP 399. Junior Recital. 1 Credit Hour.

A public recital of one half-hour or more. Course is required of all performance majors.

Requisite: Frost School of Music.

Components: PRA.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 493. Special Projects in Keyboard Performance or Pedagogy. 1-3 Credit Hours.

Advanced individual instruction pertaining to faculty member's area of expertise and student's area of interest. This course includes a culminating project.

Requisite: Frost School of Music.

Components: IND.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MKP 494. Special Topics in Keyboard Performance or Pedagogy. 1-3 Credit Hours.

Advanced group/classroom instruction pertaining to faculty member's expertise and students' areas of interest.

Components: SEM.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MKP 499. Senior Recital. 1 Credit Hour.

A public recital of one hour or more. Course is required of all performance majors.

Requisite: Frost School of Music.

Components: PRA.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 547. Keyboard Pedagogy. 3 Credit Hours.

Methods and materials for teaching keyboard instruments with a focus on private lesson instruction. Topics include teacher profile, general teaching considerations, the business of teaching, the beginning student, second- and third-year students, teaching materials, and an introduction to new technology in piano teaching.

Requisite: Frost School of Music.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MKP 548. Intermediate to Advanced Repertoire. 3 Credit Hours.

A class dedicated to a survey and discussion of a wide range of teaching materials including teaching exercises, etudes, and performance literature? both well known and under appreciated. Topics include reference literature and web resources, piece assigning considerations and leveling, and detailed discussion of selected materials with specific teaching and remedial strategies. Annotated bibliography with MIDI-file attachments of incipits to be submitted at the end of the semester for a grade.

Requisite: Frost School of Music.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MKP 549. Keyboard Pedagogy II: Keyboard Pedagogy Diagnostics. 3 Credit Hours.

1st class of each week: round-table discussion of private teaching strategies using video taped performance excerpts of students at various levels. 2nd class of each week: a focus on a wide range of teaching repertoire covering intermediate to advanced levels with an emphasis on problem prevention and solving.

Requisite: Frost School of Music.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MKP 550. Keyboard Pedagogy III: Practice Strategies. 3 Credit Hours.

Focus on practice strategy at the keyboard using Philip Johnston's Practice Revolution as a springboard for discussion. Topics also include recent findings and leading researchers in cognitive neuroscience and "brain-based learning," as well as resources available for musician wellness and injury prevention.

Requisite: Frost School of Music.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 589. Keyboard Accompanying Program in Salzburg, Austria. 0 Credit Hours.

Course is conducted at Salzburg College, Austria. Students receive comprehensive and intensive coaching in piano and accompanying from Dr. Posnak and other internationally acclaimed guest artists. Piano students study piano (2 cr.) and accompanying (1 cr.).

Requisite: Frost School of Music.

Components: LEC.

Grading: AUD.

Typically Offered: Spring.

MKP 593. Special Projects in Keyboard Performance or Pedagogy. 1-3 Credit Hours.

Advanced individual instruction pertaining to faculty member's area expertise and student's area of interest. This course includes a culminating project.

Requisite: Frost School of Music.

Components: IND.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MKP 594. Special Topics in Keyboard Performance or Pedagogy. 1-3 Credit Hours.

Advanced group/classroom instruction pertaining to faculty to faculty member's expertise and students' areas of interest.

Components: SEM.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MKP 6. Piano Forum. 0 Credit Hours.

A non-credit performance class for all piano majors and principals. Majors are required to perform once each semester with the approval of the applied teacher.

Requisite: Frost School of Music.

Components: FOR.

Grading: CNC.

Typically Offered: Fall & Spring.

MKP 612. Seminar in Romantic Performance. 1 Credit Hour.

This course is designed as a performance class for graduate piano majors. Class members will be responsible for presentation of major compositions representative of the period. Research will be required for each presentation concentrating on interpretation, stylistic requirements of the period and the historical context of the composers and work.

Requisite: Frost School of Music.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MKP 647. Keyboard Pedagogy. 3 Credit Hours.

Methods and materials for teaching keyboard instruments with a focus on private lesson instruction. Topics include teacher profile, general teaching considerations, the business of teaching, the beginning student, second- and third-year students, teaching materials, and an introduction to new technology in piano teaching.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MKP 648. Intermediate to Advanced Repertoire. 3 Credit Hours.

A class dedicated to a survey and discussion of a wide range of teaching materials including teaching exercises, etudes, and performance literature both well known and under appreciated. Topics include reference literature and web resources, piece assigning considerations and leveling, and detailed discussion of selected materials with specific teaching and remedial strategies. Annotated bibliography with MIDI-file attachments of incipits to be submitted at the end of the semester for a grade.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MKP 649. Keyboard Pedagogy II: Keyboard Pedagogy Diagnostics. 3 Credit Hours.

1st class of each week: round-table discussion of private teaching strategies using video taped performance excerpts of students at various levels. 2nd class of each week: a focus on a wide range of teaching repertoire covering intermediate to advanced levels with an emphasis on problem prevention and solvin

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MKP 650. Keyboard Pedagogy III: Practice Strategies. 3 Credit Hours.

Focus on practice strategy at the keyboard using Philip Johnston's Practice Revolution as a springboard for discussion. Topics also include recent findings and leading researchers in cognitive neuroscience and "brain-based learning," as well as resources available for musician wellness and injury prevention.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 689. Keyboard Accompanying Program in Salzburg, Austria. 0 Credit Hours.

Course is conducted at Salzburg College, Austria. Students receive comprehensive and intensive coaching in piano and accompanying from Dr. Posnak and other internationally acclaimed guest artists. Piano students study piano (2 cr.) and accompanying (1 cr.).

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MKP 693. Special Projects in Keyboard Performance. 1-3 Credit Hours.

Advanced individual instruction pertaining to faculty member's area of expertise and student's area of interest. This course includes a culminating project.

Components: IND.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MKP 694. Special Topics in Keyboard Performance or Pedagogy. 1-3 Credit Hours.

Advanced group/classroom instruction pertaining to faculty member's expertise and students' areas of interest.

Components: SEM.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MKP 710. Seminar in Baroque Performance. 1 Credit Hour.

This course is designed as a performance class for graduate DMA piano majors. Class members will be responsible for presentation of major compositions representative of the period. Research will be required for each presentation concentrating on interpretation, stylistic requirements of the period and the historical context of the composers and work.

Requisite: Frost School of Music.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

MKP 711. Seminar in Classical Performance. 1 Credit Hour.

This course is designed as a performance class for graduate piano majors. Class members will be responsible for presentation of major compositions representative of the period. Research will be required for each presentation concentrating on interpretation, stylistic requirements of the period and the historical context of the composers and work.

Requisite: Frost School of Music.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MKP 712. Seminar in Romantic Performance. 1 Credit Hour.

This course is designed as a performance class for graduate piano majors. Class members will be responsible for presentation of major compositions representative of the period. Research will be required for each presentation concentrating on interpretation, stylistic requirements of the period and the historical context of the composers and work.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MKP 713. Seminar in Contemporary Music. 1 Credit Hour.

This course is designed as a performance class for graduate piano majors. Class members will be responsible for presentation of major compositions representative of the period. Research will be required for each presentation concentrating on interpretation, stylistic requirements of the period and the historical context of the composers and work.

Requisite: Frost School of Music.

Components: SEM.

Grading: GRD.

Typically Offered: Spring.

MKP 747. Seminar in Keyboard Pedagogy. 3 Credit Hours.

Focus on college-level teaching and professional development for a pianist. Topics include group piano teaching materials and strategies, syllabi and exam-objective rubric creation, pedagogy curriculum building, pedagogy text survey, administrative duties overview, preparation for the job market including job search and interview process, and C. V. building avenues such as publication, workshop/lecture presentation, editing teaching repertoire, and training in music technology.

Requisite: Frost School of Music.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MKP 750. Keyboard Pedagogy Research Seminar. 1 Credit Hour.

Research, reading and writing in keyboard pedagogy on topics either historical or current. An in-depth research or project on a topic as approved by KPED faculty culminates in a written paper with annotated bibliography. Course may be repeated for credit.

Requisite: Frost School of Music.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 780. Keyboard Pedagogy Internship. 1 Credit Hour.

The student team-teaches a piano class or a private student with an instructor. The Program Director observes and critiques the student, and the student videotapes lessons and offers critiques of their own teaching following a guideline.

Requisite: Frost School of Music.

Components: PRA.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 785. Musical Theatre Accompanying. 1 Credit Hour.

A class designed to improve the skills of pianists with a particular interest in musical theatre piano accompaniment. Students will study in a classroom setting.

Requisite: Frost School of Music.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 786. Vocal Accompanying I. 1 Credit Hour.

Pianists attend seminars where the principles of accompanying classical and musical theatre singers are addressed. Students are assigned to accompany applied voice lessons and ensembles.

Requisite: Frost School of Music.

Components: ENS.

Grading: GRD.

MKP 787. Vocal Accompanying II. 1 Credit Hour.

Pianists attend seminars where the principles of accompanying classical and musical theatre singers are addressed. Students are assigned to accompany applied voice lessons and ensembles.

Requisite: Frost School of Music.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 788. Graduate Seminar in Accompanying. 1 Credit Hour.

Study and performance of major vocal and chamber music literature as related to the accompanist and chamber musician. Course may be repeated for credit.

Requisite: Frost School of Music.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 789. Accompanying, Level I. 1 Credit Hour.

Development of sightreading skills and score preparation.

Requisite: Frost School of Music.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 790. Accompanying, Level II. 1 Credit Hour.

Progressive development of individual vocal/instrumental and ensemble accompanying, sightreading, score reading, and improvising from a lead sheet.

Requisite: Frost School of Music.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 791. Accompanying, Level III. 1 Credit Hour.

Progressive development of all types of accompaniment skills including clef and score reading, transposition, possible recital, opera theater, choral ensemble, and/or orchestral accompanying.

Requisite: Frost School of Music.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 793. Special Projects in Keyboard Performance or Pedagogy. 1-3 Credit Hours.

Advanced individual instruction pertaining to faculty member's area of expertise and student's area of interest. This course includes a culminating project.

Requisite: Frost School of Music.

Components: IND.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MKP 794. Special Topics in Keyboard Performance or Pedagogy. 1-3 Credit Hours.

Advanced group/classroom instruction pertaining to faculty member's expertise and students' areas of interest.

Requisite: Frost School of Music.

Components: SEM.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MKP 811. Master's Recital Paper. 1-3 Credit Hours.

The student working on his/her master's recital paper enrolls for credit as determined by his/her advisor. Credit is not awarded until the paper has been accepted.

Requisite: Frost School of Music.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

MKP 812. Master's Recital. 1 Credit Hour.

The student enrolls for recital credit during the semester in which he/she presents the master's recital.

Requisite: Frost School of Music.

Components: PRA.

Grading: SUS.

Typically Offered: Fall & Spring.

MKP 813. Master's Pedagogy Project. 1-3 Credit Hours.

The student working on his/her master's pedagogy project enrolls for credit as determined by his/her advisor. Credit is not awarded until the project paper is accepted.

Requisite: Frost School of Music.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

MKP 814. Artist Diploma Recital. 1 Credit Hour.

The student enrolls for recital credit during the semester in which s/he presents the Artist Diploma recital.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

MKP 815. Masters Second Recital. 1 Credit Hour.

The second recital in the masters degree as an elective option as approved by an advisor. The program should consist of memorized solo piano repertoire, with an optional inclusion of representative chamber or concerto repertoire instead of, or in combination with, the solo repertoire.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

MKP 820. Research in Residence. 1 Credit Hour.

Used to establish research in residence and maintain full-time enrollment for the master's degree after the student has completed the required hours of thesis or project credit.

Requisite: Frost School of Music.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

MKP 831. Doctoral Essay. 1-12 Credit Hours.

Required of all candidates for the D.M.A. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of MKP 731 may be taken in a regular semester, nor more than six in a summer session.

Requisite: Frost School of Music.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

MKP 832. Doctoral Recital. 1-2 Credit Hours.

Required of all candidates for the D.M.A.

Requisite: Frost School of Music.

Components: PRA.

Grading: SUS.

Typically Offered: Fall & Spring.

MKP 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence and maintain full-time enrollment for the DMA after the student has completed the required hours of doctoral essay credit.

Requisite: Frost School of Music.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

MKP HC1. Harpsichord. 2 Credit Hours.

1-hour lesson and 50 minute studio class for harpsichord students.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP HC3. Harpsichord. 2 Credit Hours.

1-hour lesson and 50 minute studio class for harpsichord students

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP HC5. Harpsichord. 1-4 Credit Hours.

Requires successful completion of an undergraduate degree in piano performance, and approval of student's advisor (studio teacher). Course may be taken for 2 credits (1-hour lesson) or 1 credit (30-minute lesson) as part of Artist Diploma. The course covers private instruction on harpsichord-related performance techniques and repertory. The level of repertory will be determined by instructor based on the student's performance level. A jury examination in front of a faculty committee is required each semester for students taking the course for 2 credits.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP HC6. Harpsichord. 1-4 Credit Hours.

Requires successful completion of an undergraduate degree in piano performance, and approval of student's advisor (studio teacher). Course may be taken for 2 credits (1-hour lesson) or 1 credit (30-minute lesson) as part of Masters Degree. The course covers private instruction on harpsichord-related performance techniques and repertory. The level of repertory will be determined by instructor based on the student's performance level. A jury examination in front of a faculty committee is required each semester for students taking the course for 2 credits.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP HC7. Harpsichord. 1-2 Credit Hours.

Requires successful completion of a graduate degree in piano performance, and approval of student's advisor (studio teacher). Course may be taken for 2 credits (1-hour lesson) or 1 credit (30-minute lesson) as part of doctoral degree. The course covers private instruction on harpsichord-related performance techniques and repertory. The level of repertory will be determined by instructor based on the student's performance level. A jury examination in front of a faculty committee is required each semester for students taking the course for 2 credits.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP HCC. Harpsichord. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP HCD. Harpsichord. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP HCF. Harpsichord. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP HCG. Harpsichord. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP HCH. Harpsichord. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP HCS. Secondary Harpsichord. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP ORC. Organ. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Gleason, Method of Organ Playing: selected exercises from Manual Technique, Pedal Exercises and Scales. Repertoire: Gleason, Method of Organ Playing: selected Compositions for Manuals and Pedals; intermediate-level works by Bach, Mendelssohn, Franck, and others; Additional hymn playing techniques.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP ORD. Organ. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Gleason, Method of Organ Playing: selected exercises from Manual Technique, Pedal Exercises and Scales. Repertoire: Gleason, Method of Organ Playing: selected Compositions for Manuals and Pedals; intermediate-level works by Bach, Mendelssohn, Franck, and others; Additional hymn playing techniques.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP ORF. Organ. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Gleason, Method of Organ Playing: selected exercises from Pedal Scales, Broken Chords, Advanced Exercises. Repertoire: Selected compositions by Bach and representative Baroque, Classical, Romantic, and Modern composers. Hymn playing and organ accompanying techniques.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP ORG. Organ. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Nilson, A System of Technical Studies in Pedal Playing for the Organ; selected exercises. Repertoire: Selected works by composers from all style periods, with an emphasis on the French Romantic and Modern French schools. Advanced service-playing techniques.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP ORH. Organ. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Nilson, A System of Technical Studies in Pedal Playing for the Organ; selected exercises. Repertoire: Selected works by composers from all style periods, with an emphasis on the French Romantic and Modern French schools. Advanced service-playing techniques.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP ORS. Secondary Organ. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Gleason, Method of Organ Playing; selected exercises from Manual Technique and Pedal Technique. Repertoire: Gleason, Method of Organ Playing: Compositions for Manuals, Studies and Compositions for Manuals and Pedal; selected chorale preludes and smaller-scale preludes and fugues by Bach, Buxtehude, Brahms, and others; basics of hymn playing.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP PI1. Piano. 2 Credit Hours.

1-hour lesson and 50 minute studio class for piano students. Technical Requirements: To show a comprehensive foundation in basic/advanced keyboard skills. Repertoire: Appropriate repertoire as required.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP PI3. Piano. 2 Credit Hours.

1-hour lesson and 50 minute studio class for piano students. Technical Requirements: Complete Junior Recital as required. Repertoire: Appropriate repertoire as required.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP PI5. Piano. 1-4 Credit Hours.

Requires successful completion of an undergraduate degree in piano performance, and approval of student's advisor (studio teacher). Course may be taken for 2 credits (1-hour lesson) or 1 credit (30-minute lesson) as part of Artist Diploma. The course covers private instruction on performance techniques and repertory. The level of repertory will be determined by instructor based on the student's performance level. A jury examination in front of a faculty committee is required each semester for students taking the course for 2 credits.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP PI6. Piano. 1-2 Credit Hours.

Requires successful completion of an undergraduate degree in piano performance, and approval of student's advisor (studio teacher). Course may be taken for 2 credits (1-hour lesson) or 1 credit (30-minute lesson) as part of masters degree. The course covers private instruction on performance techniques and repertory. The level of repertory will be determined by instructor based on the student's performance level. A jury examination in front of a faculty committee is required each semester for students taking the course for 2 credits.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP PI7. Piano. 1-2 Credit Hours.

Requires successful completion of a graduate degree in piano performance, and approval of student's advisor (studio teacher). Course may be taken for 2 credits (1-hour lesson) or 1 credit (30-minute lesson) as part of doctoral degree. The course covers private instruction on performance techniques and repertory. The level of repertory will be determined by instructor based on the student's performance level. A jury examination in front of a faculty committee is required each semester for students taking the course for 2 credits.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP PIC. Piano. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: To show a comprehensive foundation in basic/advanced keyboard skills. Repertoire: Appropriate repertoire as required.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP PID. Piano. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: To show a comprehensive foundation in basic/advanced keyboard skills. Repertoire: Appropriate repertoire as required.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP PIF. Piano. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Complete Junior Recital as required. Repertoire: Appropriate repertoire as required.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP PIG. Piano. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Complete Senior Recital as required. Repertoire: Appropriate repertoire as required.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP PIH. Piano. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Complete Senior Recital as required. Repertoire: Appropriate repertoire as required.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP PIS. Secondary Piano. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: To show a comprehensive foundation in basic/advanced keyboard skills. Repertoire: Appropriate repertoire as required.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

Kinesiology (KIN)

KIN 100. Leadership, Management, and Ethics in Sports. 3 Credit Hours.

Students will gain an understanding of skills and philosophies of leadership, management, and ethic necessary for a position in the sport industry.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

KIN 105. Introduction to Athletic Training and Sports Medicine. 3 Credit Hours.

In this practical, hands-on course, the students will learn to identify basic sport injuries that afflict the major joints of the body, and review basic methods to treat these injuries. The student will also learn how nutrition, improper biomechanics, and poor training can all impact sport performance. Plus, participants will be given the opportunity to learn and practice techniques or procedures (such as athletic taping or bracing) that may be useful in minimizing the incidence of injury.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

KIN 110. Explorations in Sports Medicine. 3 Credit Hours.

This class will consist of an introduction to the field of Sports Medicine and Exercise Science. Basic information relevant to appropriate exercise prescription, proper nutritional habits, implications on health, longevity and performance will be addressed. Hands-on practical experiences will supplement theoretical concepts learned in the classroom setting.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

KIN 137. Introduction to the Theory, Application, and Practice of Yoga. 2 Credit Hours.

A critical examination of theories underlying yoga practice, benefits of different styles, using specific techniques to target practitioners' needs.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

KIN 140. Introduction to Athletic Training. 2 Credit Hours.

Introduction to the profession of athletic training. Introduction to Athletic Training with emphasis on study of the sports medicine team, legal concerns, nutrition, and pre-participation physicals. Course will discuss the basic principles of injury prevention including the role of conditioning, equipment, and protective padding. Emphasis will be familiarization with various community and university agencies, as well as the University of Miami athletic training staff, and policies and procedures used in the clinic/athletic facilities.

Corequisite: KIN 141. Requisite: Athletic Training, Pre-Athletic Training, and Sophomore Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

KIN 141. Introduction to Athletic Training Lab. 1 Credit Hour.

Introduction to clinical athletic training for pre-athletic training major. Hands-on knowledge for the entry level athletic training student. Observation hours in the athletic training room will give the student the opportunity to use the knowledge, skills, and techniques learned in this course. The student must complete 35 clinical observation hours. There is a \$65 lab fee for this class.

Corequisite: KIN 140. Requisite: ATHT, PAT Majors only and a Sophomore Status.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

KIN 145. Responding to Emergencies. 3 Credit Hours.

Students will become familiar with accident, injury, and illness situations, techniques for immediate first aid, and legal parameters involved when administering emergency care. There is a \$45 lab fee for this class.

Requisite: ATHT Majors only and Sophomore Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

KIN 150. General Nutrition for Health and Performance. 3 Credit Hours.

Fundamentals and theories of nutrition with a specific focus on nutrition for both sports and fitness.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 155. Biological Bases for Physical Activity and Health. 3 Credit Hours.

This course serves as an introduction to the field of exercise physiology. Students will learn the biological need for physical activity, discuss specific mechanisms on how physical activity reduces disease risk and understand the relationship between physical activity and chronic diseases such as coronary heart disease, obesity, diabetes, cancer, aging and mental health.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 184. Athletic and Sport Injuries. 3 Credit Hours.

Students will become familiar with athletic injuries in sports that occur over the principal joints in the body and the inclusion of anatomical structures that are frequently damaged. Basic operational treatments and rehabilitation programs after surgery will be discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 200. Survey of Sports Administration. 3 Credit Hours.

Students will examine the employment opportunities and skills needed in professional, collegiate, and amateur sports as well as the health and fitness industry.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

KIN 201. Introduction to Sport Administration. 3 Credit Hours.

Basic overview of the fields of sport management. Majors must receive a grade of C or higher.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 202. Applied Nutrition for Health and Performance. 3 Credit Hours.

The study of nutrition, diet analysis, biochemical processes in energy metabolism, nutrition and health problems, and nutrition as it relates to physical performance. The class will have 3 sections: 1) nutritional links to chronic disease; 2) nutrition before, during and after exercise bout; and 3) nutritional supplements for health and performance.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 203. Introduction to Gaming and Casino Management. 3 Credit Hours.

The course will focus on the management of gaming and casino operations. Gambling has emerged as a major segment of the sport industry, comprising 10% of sport expenditures and injecting over \$20B annually into the economy. Students will be exposed to the managerial requirements and organizational structures of various gaming operations. They will also learn about the history of the gaming industry and its impact on the South Florida and the Caribbean economy. The course will provide an introductory level of knowledge regarding the managerial nuances which make working within the industry unique to the traditional sport business environments.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 206. Sport Facilities and Event Management. 3 Credit Hours.

This course is an overview of the policy and procedures necessary to organize and develop sport events and facilities. In depth review of all programs, functions and procedures necessary for the operation of events and facilities are examined.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 210. Foundations in Athletic Training. 2 Credit Hours.

Students will be introduced to the study of etiology and mechanisms of injury, pathology, and recognition of clinical signs and symptoms of athletic injury. The student must complete 50 clinical observation hours, which are required for the retention process of the Athletic Training Program.

Requisite: Sophomore Standing or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 211. Introduction to Campus Recreation. 3 Credit Hours.

This course is an introductory course and provides a broad overview of campus recreation. It will include information on how to plan, and execute programs such as intramurals, club sports and fitness and wellness. Risk management will be stressed in every aspect in the field along with other important topics such as sponsorships, budgeting, and evaluating programs and employees. Students will gain an understanding of what campus recreation is and its importance to a healthy lifestyle on campus.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 212. Elements of Sports Psychology. 3 Credit Hours.

Introduction to the field of sport and exercise psychology by examination of psychological theories and research related to sport and exercise behavior.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 221. Exercise Physiology: Biochemistry and Skeletal Muscle. 3 Credit Hours.

This course will offer an overview of the biochemistry pertaining to neuroendocrine responses, nutrition, and neuromuscular function; as well as the physiological and biochemical plasticity within skeletal muscle associated with various interventions, diseases, injuries, and aging. Majors must receive a grade of B- or higher.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 222. Exercise Physiology Laboratory Practicum: Neuromuscular. 3 Credit Hours.

This course examines the nature of data collection in exercise physiology. Students will receive information on collection theory and its application to the measurement of a number of physiological systems during exercise. The course is designed to establish a clear linkage between the chronic and acute changes that occur during exercise and the laboratory methods that are used to assess those changes. Co-requisite: KIN 221.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

KIN 230. Medical Terminology and Documentation. 1 Credit Hour.

Terminology, note writing, and documentation techniques in sports medicine. A treatment cycle model will be introduced.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 232. Basic Human Physiology. 3 Credit Hours.

This course presents a general overview of the major systems of the human organism with an examination of how they function in the human body. Majors must receive B- or higher.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 233. Basic Anatomy Lab. 2 Credit Hours.

This course presents a general overview of the anatomy of the major body systems, such as the skeletal, muscular, cardiovascular, nervous, digestive, respiratory and reproductive systems as well as the integumentary system and special senses.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

KIN 234. Functional Human Anatomy. 3 Credit Hours.

The study of human anatomy specifically for the sports medicine practitioner.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 235. Personal and Community Health. 3 Credit Hours.

Overview of current strategies and practices for healthy living, including health maintenance and disease prevention.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 245. Kinesiology. 3 Credit Hours.

Structure and function of Neurology, Osteology, Arthrology and Myology, with emphasis on the mechanics of the movement of the human body.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 250. Orthopedic Assessment: Lower Extremity. 3 Credit Hours.

Common types of orthopedic/sports dysfunctions to the lower extremity will be discussed. Injuries will be discussed from the following viewpoints: etiology and mechanism of injury, pathology, recognition and evaluation techniques, protocols, and prevention.

Corequisite: KIN 251. Requisite: Athletic Training.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

KIN 251. Orthopedic Assessment: Lower Extremity Lab. 1 Credit Hour.

Techniques used to evaluate orthopedic and sports injuries occurring to the lower extremity. The student must complete 100 clinical education hours. Clinical education hours will emphasize lower extremity orthopedic assessment, goniometry, manual muscle testing techniques, and gait evaluations.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

KIN 256. Globalization of Sport. 3 Credit Hours.

This course will address the intertwined relationship between globalization, sport, and development from a critical global perspective. This course highlights the extent to which contemporary sport cultures are the result of an interplay between local and global forces. We will explore the international character of professional and amateur sports including international competitions, league expansions beyond national boundaries, and the movement of athletes. Course topics include international sport organization, international competition, sport governance, international dispute resolution, international sports law, and new media.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 257. Research Experience in Exercise Physiology. 3 Credit Hours.

This course provides students the opportunity to be immersed in the research process within the discipline of exercise physiology. This includes the entire research process starting with conceptualization of the study and proceeding through research design, implementation (assessment and equipment use), data handling, statistical analysis, and culminating in preparation of manuscripts or presentations.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 260. Orthopedic Assessment: Upper Extremity. 3 Credit Hours.

Common types of orthopedic/sports dysfunctions to the upper extremity will be discussed. Injuries will be discussed from the following viewpoints: etiology and mechanism of injury, pathology, recognition and evaluation techniques, protocols, and prevention.

Corequisite: KIN 261. Prerequisite: KIN 251. Requisite: Athletic Training.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 261. Orthopedic Assessment: Upper Extremity Lab. 1 Credit Hour.

Techniques used to evaluate orthopedic and sports injuries occurring to the upper extremity. The student must complete 100 clinical education hours. Clinical education hours will emphasize upper extremity orthopedic assessment, goniometry, and manual muscle testing techniques.

Corequisite: KIN 260.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

KIN 264. General Medical Conditions Evaluation. 2 Credit Hours.

This class is the study of the clinical signs and symptoms of General Medical conditions that will present to the Certified Athletic Trainer. Emphasis will be placed on the techniques and instrumentation used for performing appropriate evaluation procedures.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 297. Practicum in Sport Administration. 1-3 Credit Hours.

A comprehensive program of observation and supervised experience for one semester under the direction of a professional in the sports field.

Supervised by Sport Administration program Internship Director. Course only open to Sport Administration Majors & Minors.

Components: PRA.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 301. Athletic Injuries and Sport First Aid. 3 Credit Hours.

Course will help coaches, camp counselors, teachers, personal trainers, and athletes of all levels to fulfill the role of being a competent first responder to athletic injuries and illnesses. Upon completion of this course, students will have knowledge of basic sport first aid skills, anatomy and sport injury terminology, and knowledge of specific athletic injuries and illnesses. These will include head injuries, sudden illnesses, weather-related problems, upper and lower body musculoskeletal injuries, respiratory emergencies and illnesses, and internal injuries. Students will also learn basic hands-on skills such as splinting, taping, and bracing as it relates to preventing and treating athletic injuries.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 302. Sport Marketing. 3 Credit Hours.

This course is designed as a marketing course that deals exclusively with Sport Marketing. Students are expected to develop comprehensive marketing and sponsorship plans. This course will require moderate to heavy computer knowledge. This course is designed to maximize the practical applications of marketing theory to the sport business environment.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 305. Careers in Sports. 3 Credit Hours.

This course is designed to provide a basic overview of careers in the sports industry. Students will develop an understanding of the foundations of sport administration and various topics related to the professional growth within this field. The course will also provide basic fundamentals and skills to prepare students for potential employment within the sports world.

Components: DIL.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 306. Essential Leadership in Sports and the Professions. 3 Credit Hours.

A variety of leadership and management skills will be examined, including communication, problem solving, conflict management, group dynamics, and leadership theory. Practical application to sport and allied professions will be included. Self-assessment opportunities and exercises will be utilized.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 308. Ethical Decision Making in Sport and the Professions. 3 Credit Hours.

This course will examine ethical dilemmas in decision-making and other contemporary issues in sports management and campus and community environment. Real and hypothetical situations will be utilized. This course is a designated Upper Level Communication Requirement. Advanced written, digital and/or oral communication proficiencies will be emphasized in this course. Credit for ENG 105 and ENG 106 (or equivalent) is required for this course.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 310. Adolescent Growth and Maturation. 3 Credit Hours.

This course is an in-depth study of pediatric exercise physiology with special emphasis on growth, maturation, physical activity, and performance. Topics include a comprehensive summary of biological growth and maturation, processes that impact physical performance. Additionally, students will learn the basis of training pediatric populations.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 321. Introduction to Systemic Exercise Physiology. 3 Credit Hours.

The structure, function, and training of the cardiorespiratory system. Special emphasis on structural changes in the systems with exercise and their influence on cardiovascular performance, body composition, exercise efficiency and health.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 322. Exercise Physiology Laboratory Practicum: Cardiorespiratory. 3 Credit Hours.

This course concentrates on collection of cardiorespiratory data. In addition, the application of these data to exercise prescription for specific athletic and non-athletic populations will be covered. Corequisite: ESS 321.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

KIN 330. Medical Terminology. 3 Credit Hours.

Terminology, note writing, and documentation techniques in sports medicine/athletic training.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

KIN 340. Strength and Conditioning. 3 Credit Hours.

Introduction to Sport Specific Strength Training. Students will learn the practice of Olympic Weight Lifting and related exercise techniques.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

KIN 344. Gross Anatomy for Kinesiology and Sport Sciences. 3 Credit Hours.

Human dissection of the major muscles, arteries and nerves of the body.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 345. Kinesiology. 3 Credit Hours.

Structure and function of the skeletal, joint, and muscular systems, with emphasis on the mechanics of the movement of the human body and its relationship to sport and physical performance.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 365. Exercise Programming. 3 Credit Hours.

This class is the study of the theory and principles behind the development of exercise programs. Students will learn how to accurately evaluate and develop individual exercise prescription based upon sound scientific research. Exercise prescriptions will be developed in accordance with the guidelines set forth by the National Strength and Conditioning Association and the American College of Sports Medicine. This course is a designated Upper Level Communication Requirement; Advanced written, digital and/or oral communication proficiencies will be emphasized in this course. Credit for ENG105 and ENG106 (or equivalent) is required for this course.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 366. Exercise Physiology Laboratory: Assessment. 3 Credit Hours.

This lab course is designed to complement the ESS 365 lecture course (Principles of Exercise Prescription): Cardiovascular. Students will apply practical field assessments for body composition, aerobic capacity, muscular fitness, and joint range of motion, and will employ exercise strategies to improve each of the assessed fitness components. Students will also prescribe exercises to improve performance-based fitness, such as coordination, balance, agility, speed and power while learning proper exercise training techniques. Must be a declared Exercise Physiology (EXPH) major and receive a grade of "C" or better to satisfy requirements.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 370. Sociocultural Aspects of Athletic Training and Sports Medicine. 3 Credit Hours.

Sports Medicine can produce the "perfect storm" of unique medical situations that lead to ethical dilemmas. This class will explore topics of professional and moral behavior, cultural competence, foundational behaviors of professional practice, and ethical decision-making in the fields of Athletic Training and Sports Medicine. Students will be required to read numerous case studies and novels that depict these issues.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 399. Neuromuscular Basis for Training. 3 Credit Hours.

A critical examination of neuromuscular training techniques, their strengths, weaknesses and scientific bases.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 401. Legal Aspects of Sport. 3 Credit Hours.

This course will focus on legal issues applicable to sport administration, including tort law, risk management, negligence, and constitutional law. Relevant legal cases and concepts will be incorporated.

Prerequisite: KIN 201 + Sophomore or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 402. Sport Sponsorship and Promotion. 1-3 Credit Hours.

This course is designed to provide a detailed examination of the relationship between sport and corporate sponsorship. Topics covered will include the theoretical premise of sponsorship, alignment marketing, strategic communication through sponsorship, determining the value of sponsorship, and evaluation of sponsorship activities. Perspectives from the property offering a sponsorship and from the organization functioning as the sponsor will be considered.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

KIN 403. Sport Information Management. 3 Credit Hours.

This course centers upon the development of those skills that are necessary for Sport Information Directors. Specifically, these traditionally include marketing, media, promotion, and public relations. This course hopes to provide detailed knowledge to allow the student to participate in these activities in a professional manner.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

KIN 405. Finance and Budget in Sport Administration. 3 Credit Hours.

This course seeks to develop those financial skills necessary to understand a wide variety of financial concepts that impact sport managers. Such topics would include but not be limited to: Sport franchise value/valuations; economic impact of sport; risk-return models; financial statement analysis, and budgeting.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

KIN 410. Problems and Issues in Sport Administration. 3 Credit Hours.

This course is designed as a seminar course. Topical issues in high school, collegiate and professional sport are presented and discussed in detail. A number of student-centered activities are introduced to aid in the development of the student.

Requisites: SPAD Majors and Senior Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

KIN 412. Psychophysiology. 3 Credit Hours.

The study of the physiological effects of acute vs. chronic training on homeostatic function, musculoskeletal systems, energy system function, cardiovascular system, and the pulmonary system. Students will be able to understand and interpret terminology and research literature published in the field.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 415. Evidence Based Sports Medicine. 3 Credit Hours.

This course will introduce the student to clinical epidemiology and the evaluation of the efficacy of prevention, diagnostic, and treatment strategies in athletic training and sport medicine.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 416. Research Methods in Exercise Physiology. 3 Credit Hours.

This course will introduce the student to clinical epidemiology and the evaluation of the efficacy of prevention, diagnostic, and treatment strategies in exercise physiology and related professions.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 417. Research Methods for the Sport Sciences. 3 Credit Hours.

This course seeks to provide a full introduction to research methods in sport studies.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 421. Advanced Systemic Exercise Physiology. 3 Credit Hours.

This course examines the short and long term physical responses to exercise and provides a general overview of the field of exercise physiology with reference to the latest trends in modern physiological research.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 435. Clinical Biomechanics for Sport Medicine Professionals.. 3 Credit Hours.

A lecture course stressing the biomechanics of joints and pathomechanics of orthopedic injuries.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Summer.

KIN 443. Clinical Athletic Training Lab I. 2 Credit Hours.

The application of athletic training practices in selected clinical education settings. The student must complete 150 hours of documented clinical education hours, which apply toward the graduation requirement of 1000 hours. Clinical education hours will emphasize emergency procedures, first aid, and protective equipment. Prerequisite: Successful completion of the retention process and formal admittance into the clinical portion of the Athletic Training Program. Students are required to return to campus for pre-season orientation prior to the start of the school year.

Requisite: ATHS Majors Only.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 444. Clinical Athletic Training Lab II. 2 Credit Hours.

The application of athletic training practices in selected clinical and educational settings. The student must complete 150 hours of documented clinical education hours, which apply toward the graduation requirement of 1000 hours. Clinical education hours will emphasize general medical conditions, nutritional issues, psychosocial intervention, and injury prevention and risk management. Depending on the student's clinical education rotation, students may be required to start their clinical education hours prior to the start of the semester.

Prerequisite: KIN 443.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

KIN 455. Clinical Athletic Training Lab III. 2 Credit Hours.

The application of athletic training practices in selected clinical and educational settings. The student must complete 150 hours of documented clinical education hours, which apply toward graduation requirement of 1000 hours. Clinical education hours will emphasize acute care of injuries and illnesses, lower extremity orthopedic assessment, and risk management and injury prevention. Students are required to return to campus for pre-season orientation prior to the start of the school year.

Prerequisite: KIN 444.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

KIN 456. Clinical Athletic Training Lab IV. 2 Credit Hours.

The application of athletic training practices in selected clinical and educational settings. The student must complete 150 hours of documented clinical education hour. Clinical education hours will emphasize upper extremity orthopedic assessment, conditioning and rehabilitation, and therapeutic modalities. Depending on the student's clinical education rotation, students may be required to start their clinical education hours prior to the start of the semester.

Prerequisite: KIN 455.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

KIN 457. Practicum in Kinesiology and Sport Sciences. 1-3 Credit Hours.

A comprehensive program of observation and supervised experience under the direction of a professional in the field for one semester. Supervised by University faculty. This course is a designated Upper Level Communication Requirement; Advanced written, digital and/or oral communication proficiencies will be emphasized in this course. Credit for ENG105 and ENG106 (or equivalent) is required for this course.

Components: PRA.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 458. Practicum in Kinesiology and Sport Sciences. 3 Credit Hours.

A comprehensive program of supervised experience conducted under the direction of a professional in the field. Must culminate in research or hands-on experience conducted in the exercise science field.

Components: PRA.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 461. Therapeutic Modalities. 2 Credit Hours.

Students will acquire the theoretical knowledge necessary for the clinical application of therapeutic modalities. Principles of electrophysics and biophysics, specific physiological effects and therapeutic indications and contraindications associated with cyotherapy, paraffin, ultrasound, electrotherapeutic and hydrotherapeutic modalities, intermittent compression, massage, and other contemporary modalities will be discussed.

Corequisite: KIN 462. Requisite: Athletic Training.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

KIN 462. Therapeutic Modalities Laboratory. 1 Credit Hour.

This laboratory will help students apply the techniques and clinical skills related to the application of therapeutic modalities. Clinical education hours will give the student the opportunity to use the knowledge, skills, and techniques learned in this course. Students must complete 50 hours of documented clinical education hours.

Corequisite: KIN 461.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

KIN 463. Therapeutic Rehabilitation. 2 Credit Hours.

Students will acquire the theoretical knowledge for the clinical application of a rehabilitation program, physical examination, principles of therapeutic exercise, open and closed chain exercise, muscle reeducation, and special therapeutic techniques such as aquatic therapy.

Corequisite: KIN 464. Requisite: Athletic Training.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

KIN 464. Therapeutic Rehabilitation Laboratory. 1 Credit Hour.

This laboratory will place emphasis on the techniques and clinical skills relating to the rehabilitation of athletic injuries. Clinical education hours in a therapeutic rehabilitation facility will give the students the opportunity to use the knowledge, skills, and techniques learned in this course. The student must complete 100 hours of documented clinical education hours, which apply toward the clinical education requirement for graduation.

Corequisite: KIN 463.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

KIN 465. Pharmacology. 1 Credit Hour.

Introduction to the basic principles of pharmaceutical intervention and the implications for rehabilitation as related to the Certified Athletic Trainer.

Requisite: ATHS Majors Only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

KIN 470. Administrative Aspects of Athletic Training. 2 Credit Hours.

Basic concepts of legal liability, budget, financial management, inventory control, facilities design and maintenance will be addressed. Additionally, the student will discuss the day to day supervision, scheduling and general administration of the athletic training facility.

Requisite: ATHS Majors Only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

KIN 473. Sports Governance. 3 Credit Hours.

This course provides the students with an examination of the governing organizations of sport at the youth, secondary, intercollegiate, professional, international, sport specific and olympic levels. In addition, policy development in sport management will be explored.

Components: LEC.

Grading: GRD.

KIN 476. Seminar in Athletic training. 2 Credit Hours.

Topics in Athletic Training with discussions covering the NATA competencies and objectives in written and oral practical formats. Students will be required to register and take the BOC exam as a class requirement. Approx. cost \$350.00

Components: SEM.

Grading: GRD.

Typically Offered: Spring.

KIN 477. Advanced Nutrition for Health and Fitness. 3 Credit Hours.

This course is an in-depth study of nutritional concerns of today's athlete. From dehydration to classic carbohydrate loading and from the Female Athlete Triad to ergogenic aids in sports, this course provides state of the art information on the latest nutritional issues for the exercising individual and for the athlete.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 488. Gross Anatomy. 3 Credit Hours.

The essentials of Myology, Osteology, and Arthrology. Major nerves and arteries are also dissected. Many of the dissection areas are major injury sites in sports such as the knee, shoulder, elbow, neck and spinal areas. There is a laboratory fee of \$100 required for this course.

Requisite: ATHS Majors Only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

KIN 490. Special Topics in Kinesiology and Sports Sciences. 3 Credit Hours.

This course is designed for students wishing to focus on a specific area of study within the umbrella of the field of Kinesiology. Students will be given supervision and support in a direction relevant to their needs and interests in a structured setting.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 491. Undergraduate Teaching Assistant Training in KIN. 1-3 Credit Hours.

This course involves training and teaching assistant experience under the supervision of faculty. Students will have the opportunity to assist faculty and/or doctoral students in the teaching of clinical laboratory and/or undergraduate theory courses offered in the KIN department.

Components: PRA.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 492. Undergraduate Teaching Assistant Training in KIN II. 1-3 Credit Hours.

This course involves training and teaching assistant experience under the supervision of faculty. Students will have the opportunity to assist faculty and/or doctoral students in the teaching of clinical laboratory and/or undergraduate theory courses offered in the KIN department.

Components: PRA.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 493. Undergraduate Research Assistant Training in KIN. 1-3 Credit Hours.

This course entails research training for a specific topic in the areas of Kinesiology under the supervision of faculty. It will enable the student to understand the fundamentals of following up on a research question, setting up research design and following up with data collection for the purposes of acquiring clinical training and/or assisting in manuscript preparation.

Components: PRA.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 494. Undergraduate Research Assistant Training in KIN II. 1-3 Credit Hours.

This course entails research training for a specific topic in the areas of Kinesiology under the supervision of faculty. It will enable the student to understand the fundamentals of following up on a research question, setting up research design and following up with data collection for the purposes of acquiring clinical training and/or assisting in manuscript preparation.

Components: PRA.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 495. Individual Study. 1-3 Credit Hours.

The Application for Admission to Advanced Individual Study Form will be required.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 496. Individual Study. 1-3 Credit Hours.

The Application for Admission to Advanced Individual Study Form will be required.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 497. Internship in Sport Administration. 1-9 Credit Hours.

KIN 497: Internship in Sport Administration Filed Experience that requires the student to participate in the work environment (Formally ESS 497).

Requisites: SPAD Majors and Senior Status.

Components: PRA.

Grading: GRD.

Typically Offered: Fall.

KIN 498. Seminar in Sport Administration. 3 Credit Hours.

Professional seminar to accompany internship in sport administration. Students will be required to interact with other internship students and supervisors on a regular basis and additionally, students will be required to submit comprehensive reports regarding their internship experiences. This course is a designated Upper Level Communication Requirement; Advanced written, digital and/or oral communication proficiencies will be emphasized in this course. Credit for ENG105 and ENG106 (or equivalent) is required for this course.

Requisites: SPAD Majors and Senior Status.

Components: PRA.

Grading: GRD.

Typically Offered: Spring.

KIN 502. Sport Sponsorship and Promotion. 1-3 Credit Hours.

This course is designed to provide a detailed examination of the relationship between sport and corporate sponsorship. Topics covered will include the theoretical premise of sponsorship, alignment marketing, strategic communication through sponsorship, sponsorship sales and service, determining the value of sponsorship, and evaluation of the Olympics will be examined in-depth. Objectives, risks, and benefits from the property or platform offering a sponsorship and from the sponsoring organization will be considered.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

KIN 503. Advanced Sport Information Management. 3 Credit Hours.

This course examines the complex fields of sport communication. Students will investigate the unique, symbiotic relationship that exist between sport and the media; examine various theoretical framework (e.g., agenda set, hegemonic, uses and gratification, elaboration likelihood model) that are pertinent to developing an understanding of the sport/media complex.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

KIN 515. Nutrition Diet and Exercise. 3 Credit Hours.

Students will learn the latest concepts in weight management, physical fitness, and healthy eating. They will be able to understand the complex interplay of carbohydrates, protein, fat, water, fiber, vitamins, and minerals in the nourishment of their body and overall well-being. They will also examine serious health issues such as the use/misuse of anabolic steroids, weight control, and eating disorders.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

KIN 520. Cellular Exercise Physiology. 3 Credit Hours.

The course examines Bioenergetics and Muscular Physiology in training and detraining. Topics include the energy systems and their functional application during exercise, muscle structure and function, cellular and sub-cellular modifications of organelles and contractile mechanisms as result of training and physiological bases of training techniques.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 521. Advanced Systemic Exercise Physiology. 3 Credit Hours.

The study of the physiological effects of acute vs. chronic training on homeostatic function, musculoskeletal systems, energy system function, cardiovascular and the pulmonary systems. Students will be able to understand and interpret terminology and research literature published in the field.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

KIN 522. Basic Statistics in Kinesiology and Sport Sciences. 3 Credit Hours.

Introduction to basic statistical techniques commonly used in the Exercise and Sport Sciences. Designed as a prerequisite for KIN 646 (Formally ESS 646).

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Summer.

KIN 523. Athletic Training Techniques - Assessment. 3 Credit Hours.

This course will introduce the basic concepts related to injury evaluation. With this information, and with the development of basic skills, the student should be able to form an impression of the nature of most musculoskeletal injuries.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

KIN 524. Athletic Training Techniques - Rehabilitation. 3 Credit Hours.

This course will introduce theoretical concepts that must be understood in order to be able to rehabilitate a musculoskeletal injury. Regarding actual rehabilitation techniques, the emphasis will be on therapeutic exercise with only a brief introduction to therapeutic modalities.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

KIN 525. Advanced Kinesiology. 3 Credit Hours.

In-depth study of the human skeletal and muscular systems with a focus on the mechanics of movement as related to physical activity, sports, and athletics.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 527. Community and Global Nutrition. 3 Credit Hours.

This course is designed to provide an overview of nutritional issues & related aspects of infectious and chronic disease impacting the health and performance of athletes, individuals & groups domestically & globally. Economic and environmental issues which impact nutritional status and deficiency in the Western societies & third world countries will be addressed. An international and cultural perspective on food, eating behaviors and customs will be explored.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 530. Laboratory Techniques in Functional Evaluation of Skeletal Muscle. 3 Credit Hours.

This course examines the theories of data collection and collection techniques used to evaluate musculo-skeletal and neuromuscular function. The application of both computerized and non-computerized collection systems for performance evaluation is covered. The course is also designed to establish a clear linkage between the acute and chronic musculo-skeletal and neuromuscular changes that occur during exercise and the laboratory methods used to assess those changes. Collection theory, musculoskeletal and neuromuscular function, methods of strength evaluation, anaerobic power testing, electromyography, and a number of other functional parameters will be discussed.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

KIN 531. Laboratory Experiences in Systemic Exercise Physiology. 3 Credit Hours.

This course provides a laboratory assessment of physiological principles and theories learned in the classroom setting. Focus will be on systemic application to exercise as an acute or chronic stressor. Corequisite: ESS 521.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

KIN 532. Sports Injuries: Prevention and Treatment. 3 Credit Hours.

Prevention, diagnosis, treatment and rehabilitation of sports injuries. Anatomical and Kinesiological application to sports injuries.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 534. Integrative and Functional Nutrition. 3 Credit Hours.

This course will discuss integrative and functional medicine and how it emerged. This course will analyze the healthcare models that include personalized care and the whole-person perspective. In this course we will discuss various factors that influence disease including diet and nutrition, stress, activity level, pharmaceuticals and environmental pollutants. Alternative approaches to treatment will also be discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

KIN 535. Clinical Biomechanics for Sport Medicine Professionals. 3 Credit Hours.

A lecture course stressing biomechanics of joints and pathomechanics of orthopedic injuries.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Summer.

KIN 536. Strength and Conditioning I. 3 Credit Hours.

This course serves as the practical/technical foundation for major compound movements and Olympic lifts. It also provides comprehension of movement specific dynamic warm-ups, advanced stretching techniques, methods for identifying movement compensations and underlying issues as well as evaluating Olympic techniques. Due to the practical nature of the course, all the sections of this course are held in the Hecht Athletic Center (HAC).

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 537. Strength and Conditioning II. 3 Credit Hours.

This course is the continuation of Strength and Conditioning I (KIN 536). It provides more advanced Olympic weightlifting techniques and ballistic training, alongside a continued focus on corrective exercises to ensure a reduced risk of injury. The course also provides an introduction to exercise programming including specialized training techniques for athletic development. Due to the practical nature of the course, all sections of this course are held in the Hecht Athletic Center (HAC).

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 538. Nutrition during the Lifecycle. 3 Credit Hours.

This course is designed to examine the changes in nutrition requirements during the life cycle, particularly as related to growth, development and aging. Psychosocial, cultural, and economic issues related to food intake at various life stages will be reviewed.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

KIN 539. Dietary Supplements and Human Performance. 3 Credit Hours.

Evidence-based examination of supplements, food phytochemicals, and their relation to disease & performance.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 540. Exercise Psychobiology. 3 Credit Hours.

This course is designed primarily for graduate level Exercise and Sport science students who are interested in the biochemical basis of personality as affected by exercise and sport. The course involves interdisciplinary integration and comprehensive reviews of ancient and current literature dealing with exercise, stress, emotional, personality, immune system function and neuroendocrine function.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 541. Neurophysiology in Exercise Science. 3 Credit Hours.

Examination of the functions of the central, peripheral, and autonomic nervous systems in regulating exercise homeostasis and the structural and functional modifications to the systems through training. NOTE: This course is a writing intensive course. This means that all examinations and papers include a critical evaluation of the student's ability to convey information using the written word.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 542. Strength and Conditioning. 3 Credit Hours.

A comprehensive overview of strength and conditioning.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 543. Professional Training and Counseling for Integrative Health. 3 Credit Hours.

Students will learn the integrative health care model, theories, behavior change models, approaches & techniques used in nutritional counseling to help athletes, individuals and groups implement and sustain behaviors, lifestyles, and attitudes to achieve optimal health. Lecture & personal application will allow for the development of skills in each of these areas.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

KIN 545. Special Sport Populations. 3 Credit Hours.

This course presents an in-depth examination of chronic conditions and medical problems commonly observed in athletes. Students will learn about the etiology of the medical condition, how exercise affects the condition, and the most recent therapeutic treatments prescribed for the condition.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 546. Elite Conditioning I. 3 Credit Hours.

Elite Conditioning I provides an introduction to evaluation techniques catered specifically to the athletic population including tests for strength, power, speed, agility, balance and stability. The course also provides instruction on how to apply these evaluations to their respective sports/positions. These evaluation techniques provide data that students will use in the process of corrective exercise prescription. Students are taught how to implement corrective strategies to improve athletic performance. Due to the practical nature of the course, all sections of this course are held in the Hecht Athletic Center(HAC).

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 547. Elite Conditioning II. 3 Credit Hours.

Elite Conditioning II is the continuation of Elite Conditioning I (KIN 546). This course provides students with an understanding of the design and implementation of periodized conditioning programs for athletes based on the testing, evaluation, and applications to specific sports learned in Elite Conditioning I. The course focuses on speed agility and quickness for sports. It also includes practical implementation of ballistic, plyometric, speed, and conditioning drills emphasizing evidence based methods and training techniques. Due to the practical nature of the course, all sections of this course are held in Hecht Athletic Center(HAC).

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 549. Nutrition Assessment and Lab. 3 Credit Hours.

Application of the principles of normal and therapeutic nutrition, nutrition assessment, evaluation and intervention as related to sports performance and the management and treatment of disease states. Laboratories will allow for the development of skills in each of these areas.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

KIN 550. Nutrition Biochemistry. 3 Credit Hours.

To learn the fundamental biochemical structure and pathways governing nutrient intake and utilization. Students will learn how major forms of nutrients (macronutrients, vitamins, minerals and trace elements) are processed and utilized by different organs with a particular emphasis on muscle metabolism. Students will also learn how to relate their newly acquired knowledge to health and disease outcomes with focus on lifestyles disease related to metabolism such as diabetes and obesity.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 555. Medical Nutrition Therapy. 3 Credit Hours.

The role of nutrition in the prevention and treatment of various disease states including diabetes, cardiovascular disorders, endocrine and gastrointestinal disorders, enteral feeding, renal disease, cancer and AIDS/HIV, and weight management. This course instructs on the use of the Nutrition Care Process for assessment and documentation.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

KIN 557. Diagnostic Imaging Techniques in Sports Medicine. 3 Credit Hours.

This course is designed as an elective for undergraduate KIN students or graduate students. The basic physics of radiological imaging will be covered including radiology, fluoroscopy, CT scan, ultrasound, MRI, and nuclear medicine including image archiving. Normal anatomy will be compared to the corresponding radiographic anatomy. Common sports injuries will be evaluated by multiple radiographic modalities and will be correlated with the clinical condition. Discussion will include bony pathology as well as soft tissues such as ligaments, tendons, and menisci.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 561. Facility Management. 3 Credit Hours.

Facility management provides students with an understanding of fitness entrepreneurship, giving students a comprehensive understanding of the laws, regulations, policies, and work involved in setting up a fitness facility such as a gym, wellness center, or athletic training center. Students are responsible for developing a viable sports or fitness complex including all aspects of administrative and facility management.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 562. Fiscal Management in Sport Administration. 3 Credit Hours.

Fiscal management as related to athletic sports administration, recreation and leisure sports administration, and physical education.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

KIN 563. Facilities and Event Management. 3 Credit Hours.

This course is designed to introduce students to principles and practices of planning, funding and managing facilities associated with sports participation including professional sport venues, college sports, parks, recreational sport and health/fitness clubs. Students will gain an understanding of promoting, marketing, and maintaining sport facilities.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 564. Principles of Sport Marketing. 3 Credit Hours.

This course will focus on the vast world of sports marketing. The basic principles of marketing and marketing management will be introduced and integrated with application of these principles to sport and sports-related organizations.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 565. Legal Aspects of Sports and Exercise Science. 3 Credit Hours.

Legal liability, personal injury, negligence and other related legal aspects of sports and exercise science.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 566. Organization and Administration of Sports Programs. 3 Credit Hours.

Administrative and organizational procedures and problems specific to athletic administration, recreation and leisure sports administration, and physical education.

Components: DIL.

Grading: GRD.

Typically Offered: Fall.

KIN 567. Elements of Sports Psychology. 3 Credit Hours.

Introduction to the study of sport and exercise psychology including theory, current research and practical application.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 568. Developmental Sports Psychology. 3 Credit Hours.

Examination of the concept of sport psychology which includes but is not limited to performance, enhancement, student performance and academic application.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

KIN 569. The Foundations of Exercise Prescription. 3 Credit Hours.

Students will learn various assessments of Health and Wellness, and discover how to most effectively prescribe exercise strategies to treat the diagnosed needs of an individual.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 570. Advanced Programming. 3 Credit Hours.

Advanced programming allows students to dissect sports by movement, metabolism and limitation. The course investigates current trends and evidenced based applications of specific training techniques for optimal sport performance. Students will perform complete sports analysis and develop periodized programs for major sports.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 571. Sport Industry in South Florida. 3 Credit Hours.

This course will examine the various sport based organizations/events that are part of the sport industry in South Florida. Study of these organizations/events will include (a) products/services produced, (b) organizational structure, (c) economic impact on the local community, (d) key management personnel, (e) physical facilities, and (f) internship/employment opportunities.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 572. Creative Approaches to Problem Solving and Conflict Management. 3 Credit Hours.

This hands-on course will examine the concepts of problem solving and conflict management from both personal and organizational perspectives. Students will have the opportunity to study in-depth both of these concepts (and the relationship between them) through a combination of lecture, theory, individual and group activities, readings, practical exercises, and self-assessment tools.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 574. Ethical Decision Making in Sports and the Professions. 3 Credit Hours.

This course will examine ethical decision-making in a variety of environments with an emphasis on sport professions. Real and hypothetical situations will be utilized, and the course will combine theory with practical application. The case method in sport ethics will be incorporated.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 575. Essential Leadership in Sport and the Professions. 3 Credit Hours.

This course will examine the concept of leadership as it pertains to sports and other professions. Various leadership and management skills will be included with a focus on practical applications in a work environment. Theory and self-assessment strategies will be incorporated.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 576. Practical Approach to Motivation and Ethical Decision Making. 1-3 Credit Hours.

A critical study of practical problems of professionals in Exercise and Sport Sciences.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 577. Advanced Nutrition for Health and Fitness. 3 Credit Hours.

This course presents an in-depth study of the nutritional concerns of today's Recreational and competitive athlete. Topics include dehydration, classic carbohydrate loading, protein needs, ergogenic aids, and more. State-of-the-art research in the field is provided. This is also a writing intensive course. Thus, writing skills will represent an integral part of one's grade.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 578. Pharmacology for Allied Health Professionals. 3 Credit Hours.

The study of drug families and drugs in common use across spectra of age, illness, disease, and disability. Students will understand body systems treated with current pharmaceuticals over-the-counter (OTC) medications, and nutraceuticals. Actions, key adverse effects, and influences on individuals undergoing physical activity will be emphasized.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 579. Principles of Exercise Assessment: Cardiovascular. 3 Credit Hours.

This course presents a comprehensive overview of the physical, physiological and metabolic responses of the human body to exercise testing and training both in health and disease. The successful student will gain an understanding of the process involved in prescribing safe and effective therapeutic exercise in healthy individuals as well as patients with heart and lung disease, diabetes and obesity. An overview of environmental and legal considerations in the prescriptive process will also be discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 580. Principles of exercise Prescription: Neuromuscular. 3 Credit Hours.

An examination of the scientific bases of modern training techniques designed to optimize performance, their functional application and potential impact on performance in sport and everyday activity.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 581. Issues Specific to Women's Health. 3 Credit Hours.

This course focuses upon the physiological effects of exercise on the female athlete as it relates to her performance and health. Physiological differences between males and females will be examined as it impacts the woman's performance capabilities and potential. Gender specific problems regarding the exercising female will be explored.

Prerequisite: KIN 221 and KIN 321 or KIN 421.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 582. Psychosocial Issues in Women's Health. 3 Credit Hours.

This course covers a broad perspective of women and their self-esteem, their femininity, and their role in the family household. Attention will be paid to the historical, cultural, and anthropological development of women and their role in society. The influence of gender will explore several areas which include a) pregnancy, b) menopause, c) menstrual cycle, d) stress and career vs. family, e) depression, and f) body image.

Prerequisite: KIN 212.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 583. Sports Medicine for the Female Athlete. 3 Credit Hours.

This course focuses on the physiological effects of exercise on the female athlete as it relates to her performance and health. Physiological differences between male and female will be examined as it impacts the women's performance capabilities and potential. Gender specific problems regarding the exercising female will be explored.

Prerequisite: KIN 321 or KIN 421.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 584. Energetics of Obesity. 3 Credit Hours.

This course is designed to evaluate dieting, rebound effect, set point theory, brown fat, and adaptive thermogenesis, as they relate to the etiology of obesity. The course will cover a step-by-step approach in the recognition and management of the overweight patient. This includes determination of basal metabolic rate, thyroid function, determination of percent body fat, quantification of adipocyte number and mass, and research on exercise as a therapeutic intervention. Students will learn to design exercise programs for hypothetical obese patients and the impact of both diet and exercise on long-term weight management.

Prerequisite: KIN 221 or KIN 421.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 585. Neurological Mechanisms of Metabolism and Weight Regulation. 3 Credit Hours.

This course is designed to evaluate dieting, rebound effect, set point theory, brown fat, and adaptive thermogenesis as they relate to the etiology of obesity. The course will cover a step-by-step approach in the recognition and management of the overweight patient. The course will also examine adipocyte morphology and the health implications of being overweight and obese. Students will examine the impact of both diet and exercise on long-term weight management.

Requisite: Must have 3.0 in the Exercise Physiology Major and a B- or better in KIN 221 and KIN 232.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 586. Exercise Prescription/Assessment Laboratory. 3 Credit Hours.

This course presents an overview of the laboratory techniques used to assess cardiovascular endurance and general fitness, pulmonary function and anaerobias observed during competition.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

KIN 587. Laboratory Experience in Sports Nutrition. 3 Credit Hours.

This laboratory class provides case study analyses and computerized nutrient analysis systems designed to evaluate nutrition and hydration needs of the recreational and competitive athlete. From urinalysis and blood work, to body composition and computerized nutrient data base systems, this laboratory provides a clinical approach to evaluating the nutrition status of the exercising individual. Corequisite: ESS 577.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 588. Advanced Gross Anatomy in Kinesiology and Sport Sciences. 3 Credit Hours.

Human dissection of the major muscles, arteries and nerves of the body. Course is held at the University of Miami, Medical Campus, cadaver laboratory. Special consideration is given to injury sites in sports such as the knee, shoulder, elbow, neck and spinal areas. Students are required to pay a \$100 laboratory fee for the class. This course is to be taken by undergraduate Athletic Training majors and for the 5- year Sports Medicine with a Concentration in Athletic Training program students only.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 589. Directed Readings in Kinesiology and Sport Sciences. 3 Credit Hours.

Directed Readings focusing on research and contemporary trends in the field.

Components: PRA.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 590. Special Topics in Kinesiology and Sport Sciences. 1-3 Credit Hours.

This course is designed for students wishing to focus on a specific area of study within the umbrella of the Kinesiology and Sport Sciences curriculum. Students will be given supervision and support in a direction relevant to their needs and interests in a structured setting.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 595. Research Honors Project. 2 Credit Hours.

This course has been designed for SEHD students who have been accepted into the Research Honors Program and are working with a faculty mentor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 596. Research Honors Project. 2 Credit Hours.

This course has been designed for SEHD students who have been accepted into the Research Honors Program and are working with a faculty mentor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 597. Research Honors Project - Thesis Writing. 2 Credit Hours.

This course has been designed for SEHD students who have been accepted into the Research Honors Program and are working with a faculty mentor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 598. Research Honors Project - Seminar. 1 Credit Hour.

Seminar section of School of Education & Human Development Research Honors Program. This seminar culminates with the presentation of your research at the Undergraduate Research, Creativity, and Innovation Forum (RCIF).

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 599. Advanced Programming for Endurance Athletes. 3 Credit Hours.

This course provides students with training techniques to improve aerobic capacity, endurance, and lactate threshold for optimal performance. Students will review evidenced based principles of sports nutrition, strategies to ensure proper hydration, thermoregulation, and fuel (substrate) availability during prolonged exercise as well as develop programs for competitive sports including triathlon, marathon, and cycling.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 601. Organization and Administration of Sport Programs. 3 Credit Hours.

Administrative and organizational procedures and problems specific to athletic administration, recreation and leisure sports administration, and physical education.

Components: DIL.

Grading: GRD.

Typically Offered: Fall.

KIN 602. Fiscal Management in Sport Administration. 3 Credit Hours.

Fiscal management as related to athletic sports administration, recreation and leisure sports administration, and physical education.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 603. Principles of Sport Marketing. 3 Credit Hours.

This course will focus on the vast world of sports marketing. The basic principles of marketing and marketing management will be introduced and integrated with application of these principles to sport and sports-related organizations.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 604. Essential Leadership Skills in Sport. 3 Credit Hours.

This course will examine the concept of leadership as it pertains to sports and other professions. Various leadership and management skills will be included with a focus on practical applications in a work environment. Theory and self-assessment strategies will be incorporated.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 605. Sport Sponsorship and Promotion. 3 Credit Hours.

This course is designed to provide a detailed examination of the relationship between sport and corporate sponsorship. Topics covered will include the theoretical premise of sponsorship, alignment marketing, strategic communication through sponsorship, sponsorship sales and service, determining the value of sponsorship, and evaluation of sponsor activities. Individual athlete endorsement and mega-event sponsorship such as the Olympics will be examined in-depth. Objectives, risks, and benefits from the property or platform offering a sponsorship and from the sponsoring organization will be considered.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

KIN 606. Ethical Decision Making in Sports. 3 Credit Hours.

This course will examine ethical decision-making in a variety of environments with an emphasis on sport professions. Real and hypothetical situations will be utilized, and the course will combine theory with practical application. The case method in sport ethics will be incorporated.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 607. Legal Aspects of Sports. 3 Credit Hours.

Legal liability, personal injury, negligence and other related legal aspects of sports and exercise science.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 608. Advanced Globalization in Sport. 3 Credit Hours.

This course will address the intertwined relationship between globalization, sport, and development from a critical global perspective. This course highlights the extent to which contemporary sport cultures are the result of an interplay between local and global forces. We will explore the international character of professional and amateur sports including international competitions, league expansions beyond national boundaries, and the movement of athletes. Course topics include international sport organization, international competition, sport governance, international dispute resolution, international sports law, and new media.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 609. Advanced Sport Information Management. 3 Credit Hours.

This course examines the complex fields of sport communication. Students will investigate the unique, symbiotic relationship that exist between sport and the media; examine various theoretical framework (e.g., agenda set, hegemonic, uses and gratification, elaboration likelihood model) that are pertinent to developing an understanding of the sport/media complex.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

KIN 610. Event Management. 3 Credit Hours.

This course is designed to introduce students to principles and practices of planning, funding and managing facilities associated with sports participation including professional sport venues, college sports, parks, recreational sport and health/fitness clubs. Students will gain an understanding of promoting, marketing, and maintaining sport facilities.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 611. Field Experience in Sport Administration I. 1-3 Credit Hours.

Practical experience not ordinarily available through coursework sequences. Placement in a variety of settings, clinics, public and private voluntary agencies and schools. Supervised by a faculty member of the department.

Components: PRA.

Grading: GRD.

Typically Offered: Fall.

KIN 612. Field Experience in Sport Administration II. 1-3 Credit Hours.

Practical experience not ordinarily available through coursework sequences. Placement in a variety of settings, clinics, public and private voluntary agencies and schools. Supervised by a faculty member of the department.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Summer.

KIN 613. Field Experience in Sport Administration III. 1-3 Credit Hours.

Practical experience not ordinarily available through coursework sequences. Placement in a variety of settings, clinics, public and private voluntary agencies and schools. Supervised by a faculty member of the department.

Components: PRA.

Grading: GRD.

Typically Offered: Summer.

KIN 615. Practical Approach to Motivation and Ethical Decision Making. 1-3 Credit Hours.

A critical study of practical problems of professionals in Exercise and Sport Sciences.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 616. Advanced Sport Governance. 3 Credit Hours.

This course provides the student with an examination of the governing organizations of sport at the youth, secondary, intercollegiate, professional, international, sport specific and Olympic levels. In addition, policy development in sport management will be explored.

Components: LEC.

Grading: GRD.

Typically Offered: Spring & Summer.

KIN 617. Creative Approaches to Problem Solving and Conflict Management. 3 Credit Hours.

This hands-on course will examine the concepts of problem solving and conflict management from both personal and organizational perspectives. Students will have the opportunity to study in-depth both of these concepts (and the relationship between them) through a combination of lecture, theory, individual and group activities, readings, practical exercises, and self-assessment tools.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 620. Contemporary Issues in Sport. 3 Credit Hours.

Problem identification, investigation, analysis, and problem solving approaches in Kinesiology and Sport Sciences.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 621. Advanced Systemic Exercise Physiology. 3 Credit Hours.

The study of the physiological effects of acute vs. chronic training on homeostatic function, musculoskeletal systems, energy system function, cardiovascular and the pulmonary systems. Students will be able to understand and interpret terminology and research literature published in the field.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

KIN 623. Food Science and Management Principles. 3 Credit Hours.

A comprehensive course designed to provide knowledge of food chemistry, safety, service and management.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 624. Athletic Training Techniques - Manual Therapy. 3 Credit Hours.

This course will introduce theoretical concepts and hands-on techniques to mobilize joints and soft tissue in order to modulate pain, facilitate healing, and restore mobility and function.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

KIN 625. Advanced Kinesiology. 3 Credit Hours.

In-depth study of the human skeletal and muscular systems with a focus on the mechanics of movement as related to physical activity, sports, and athletics.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 626. Nutrition Diet and Exercise. 3 Credit Hours.

Students will learn the latest concepts in weight management, physical fitness, and healthy eating. They will be able to understand the complex interplay of carbohydrates, protein, fat, water, fiber, vitamins, and minerals in the nourishment of their body and overall well-being. They will also examine serious health issues such as the use/misuse of anabolic steroids, weight control, and eating disorders.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

KIN 627. Community and Global Nutrition. 3 Credit Hours.

This course is designed to provide an overview of nutritional issues & related aspects of infectious and chronic disease impacting the health and performance of athletes, individuals & groups domestically & globally. Economic and environmental issues which impact nutritional status and deficiency in the Western societies & third world countries will be addressed. An international and cultural perspective on food, eating behaviors and customs will be explored.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 628. Basic Statistics in Kinesiology and Sport Sciences. 3 Credit Hours.

Introduction to basic statistical techniques commonly used in the Exercise and Sport Sciences. Designed as a prerequisite for KIN 646 (Formally ESS 646).

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Summer.

KIN 630. Cellular Exercise Physiology. 3 Credit Hours.

The course examines Bioenergetics and Muscular Physiology in training and detraining. Topics include the energy systems and their functional application during exercise, muscle structure and function, cellular and sub-cellular modifications of organelles and contractile mechanisms as result of training and physiological bases of training techniques.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 631. Laboratory Techniques in Functional Evaluation of Skeletal Muscle. 3 Credit Hours.

This course examines the theories of data collection and collection techniques used to evaluate musculo-skeletal and neuromuscular function. The application of both computerized and non-computerized collection systems for performance evaluation is covered. The course is also designed to establish a clear linkage between the acute and chronic musculo-skeletal and neuromuscular changes that occur during exercise and the laboratory methods used to assess those changes. Collection theory, musculoskeletal and neuromuscular function, methods of strength evaluation, anaerobic power testing, electromyography, and a number of other functional parameters will be discussed.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

KIN 632. Sports Injuries: Prevention and Treatment. 3 Credit Hours.

Prevention, diagnosis, treatment and rehabilitation of sports injuries. Anatomical and Kinesiological application to sports injuries.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 634. Integrative and Functional Nutrition. 3 Credit Hours.

This course will discuss integrative and functional medicine and how it emerged. This course will analyze the healthcare models that include personalized care and the whole-person perspective. In this course we will discuss various factors that influence disease including diet and nutrition, stress, activity level, pharmaceuticals and environmental pollutants. Alternative approaches to treatment will also be discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

KIN 635. Clinical Biomechanics for Sport Medicine Professionals. 3 Credit Hours.

A lecture course stressing biomechanics of joints and pathomechanics of orthopedic injuries.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Summer.

KIN 636. Strength and Conditioning I. 3 Credit Hours.

This course serves as the practical/technical foundation for major compound movements and Olympic lifts. It also provides comprehension of movement specific dynamic warm-ups, advanced stretching techniques, methods for identifying movement compensations and underlying issues as well as evaluating Olympic techniques. Due to the practical nature of the course, all the sections of this course are held in the Hecht Athletic Center (HAC).

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 637. Strength and Conditioning II. 3 Credit Hours.

This course is the continuation of Strength and Conditioning I (KIN 536). It provides more advanced Olympic weightlifting techniques and ballistic training, alongside a continued focus on corrective exercises to ensure a reduced risk of injury. The course also provides an introduction to exercise programming including specialized training techniques for athletic development. Due to the practical nature of the course, all sections of this course are held in the Hecht Athletic Center (HAC).

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 638. Nutrition during the Lifecycle. 3 Credit Hours.

This course is designed to examine the changes in nutrition requirements during the life cycle, particularly as related to growth, development and aging. Psychosocial, cultural, and economic issues related to food intake at various life stages will be reviewed.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

KIN 639. Dietary Supplements and Human Performance. 3 Credit Hours.

Evidence-based examination of supplements, food phytochemicals, and their relation to disease & performance.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 640. Exercise Psychobiology. 3 Credit Hours.

This course is designed primarily for graduate level Exercise and Sport science students who are interested in the biochemical basis of personality as affected by exercise and sport. The course involves interdisciplinary integration and comprehensive reviews of ancient and current literature dealing with exercise, stress, emotional, personality, immune system function and neuroendocrine function.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 641. Neurophysiology in Exercise Science. 3 Credit Hours.

Examination of the functions of the central, peripheral, and autonomic nervous systems in regulating exercise homeostasis and the structural and functional modifications to the systems through training. NOTE: This course is a writing intensive course. This means that all examinations and papers include a critical evaluation of the student's ability to convey information using the written word.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 642. Strength and Conditioning. 3 Credit Hours.

A comprehensive overview of strength and conditioning.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 643. Professional Training and Counseling for Integrative Health. 3 Credit Hours.

Students will learn the integrative health care model, theories, behavior change models, approaches & techniques used in nutritional counseling to help athletes, individuals and groups implement and sustain behaviors, lifestyles, and attitudes to achieve optimal health. Lecture & personal application will allow for the development of skills in each of these areas.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

KIN 645. Therapeutic Lifestyle to Combat Chronic Disease. 3 Credit Hours.

This course presents an in-depth examination of chronic conditions and medical problems commonly observed in athletes. Students will learn about the etiology of the medical condition, how exercise affects the condition, how nutrition affects the condition, and the most recent therapeutic treatments prescribed for the condition.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 646. Elite Conditioning I. 3 Credit Hours.

Elite Conditioning I provides an introduction to evaluation techniques catered specifically to the athletic population including tests for strength, power, speed, agility, balance and stability. The courses also provides instruction on how to apply these evaluations to their respective sports/positions. These evaluation techniques provide data that students will use in the process of corrective exercise prescription. Students are taught how to implement corrective strategies to improve athletic performance. Due to the practical nature of the course, all sections of this course are held in the Hecht Athletic Center(HAC).

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 647. Elite Conditioning II. 3 Credit Hours.

Elite Conditioning II is the continuation of Elite Conditioning I (KIN 546). This course provides students with an understanding of the design and implementation of periodized conditioning programs for athletes based on the testing, evaluation, and applications to specific sports learned in Elite Conditioning I. The course focuses on speed agility and quickness for sports. It also includes practical implementation of ballistic, plyometric, speed, and conditioning drills emphasizing evidence based methods and training techniques. Due to the practical nature of the course, all sections of this course are held in Hecht Athletic Center(HAC).

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 649. Nutrition Assessment and Lab. 3 Credit Hours.

Application of the principles of normal and therapeutic nutrition, nutrition assessment, evaluation and intervention as related to sports performance and the management and treatment of disease states. Laboratories will allow for the development of skills in each of these areas.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

KIN 650. Nutritional Biochemistry. 3 Credit Hours.

To learn the fundamental biochemical structure and pathways governing nutrient intake and utilization. Students will learn how major forms of nutrients (macro-nutrients, vitamins, minerals and trace elements) are processed and utilized by different organs with a particular emphasis on muscle metabolism. Students will also learn how to relate their newly acquired knowledge to health and disease outcomes with focus on lifestyles disease related to metabolism such as diabetes and obesity.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 655. Medical Nutrition Therapy. 3 Credit Hours.

The role of nutrition in the prevention and treatment of various disease states including diabetes, cardiovascular disorders, endocrine and gastrointestinal disorders, enteral feeding, renal disease, cancer and AIDS/HIV, and weight management. This course instructs on the use of the Nutrition Care Process for assessment and documentation.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

KIN 657. Diagnostic Imaging Techniques in Sports Medicine. 3 Credit Hours.

This course is designed as an elective for undergraduate KIN students or graduate students. The basic physics of radiological imaging will be covered including radiology, fluoroscopy, CT scan, ultrasound, MRI, and nuclear medicine including image archiving. Normal anatomy will be compared to the corresponding radiographic anatomy. Common sports injuries will be evaluated by multiple radiographic modalities and will be correlated with the clinical condition. Discussion will include bony pathology as well as soft tissues such as ligaments, tendons, and menisci.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 661. Facility Management. 3 Credit Hours.

Facility management provides students with an understanding of fitness entrepreneurship, giving students a comprehensive understanding of the laws, regulations, policies, and work involved in setting up a fitness facility such as a gym, wellness center, or athletic training center. Students are responsible for developing a viable sports or fitness complex including all aspects of administrative and facility management.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 662. Fitness Facility Management II. 3 Credit Hours.

Fiscal management as related to athletic sports administration, recreation and leisure sports administration, and physical education.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 663. Foundations of Athletic Training. 3 Credit Hours.

This course will cover foundational knowledge in Athletic Training with an emphasis on health promotion and injury and disease prevention. Public Health and Epidemiology, Nutrition Health and Wellness, and basic principles of Exercise Physiology will be covered. Students will be required to complete an IPE service learning project with another health professional to promote health, wellness, or physical activity research, practice, and/or policy on campus or at the community, state, or federal level. Prerequisite: American Heart Association BLS CPR/AED certification for the Health Care Providers (or approved equivalent).

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 664. Orthopedic Assessment 1: Pathophysiology of Injuries. 3 Credit Hours.

This course provides the student with an analysis of the etiology, pathology, and clinical science of muscular and skeletal diseases, disorders, and conditions. An introduction to clinical/laboratory assessment techniques, basic injury management, and knowledge of common imaging and surgical procedures are presented.

Prerequisite: KIN 234.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 665. Orthopedic Assessment 2: Examination of the Musculoskeletal System. 3 Credit Hours.

This course will prepare students to examine a patient with a musculoskeletal condition by obtaining a pertinent history from the patient, performing relevant systems review, and by selecting appropriate diagnostic tests and measures. The student will be able to synthesize examination data to complete the orthopedic evaluation and engage in the diagnostic process.

Prerequisite: KIN 234.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 667. Elements of Sports Psychology. 3 Credit Hours.

Introduction to the study of sport and exercise psychology including theory, current research and practical application.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 668. Developmental Sports Psychology. 3 Credit Hours.

Examination of the concept of sport psychology which includes but is not limited to performance, enhancement, student performance and academic application.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

KIN 669. The Foundations of Exercise Programming. 3 Credit Hours.

Students will learn various assessments of Health and Wellness, and discover how to most effectively prescribe exercise strategies to treat the diagnosed needs of an individual.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 670. Advanced Programming. 3 Credit Hours.

Advance programming allows students to dissect sports by movement, metabolism and limitation. The course investigates current trends and evidenced based applications of specific training techniques for optimal sport performance. Students will perform complete sports analysis and develop periodized programs for major sports.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 671. Sport Industry in South Florida. 3 Credit Hours.

This course will examine the various sport based organizations/events that are part of the sport industry in South Florida. Study of these organizations/events will include (a) products/services produced, (b) organizational structure, (c) economic impact on the local community, (d) key management personnel, (e) physical facilities, and (f) internship/employment opportunities.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 673. Advanced Sport Governance. 3 Credit Hours.

This course provides the student with an examination of the governing organizations of sport at the youth, secondary, intercollegiate, professional, international, sport specific and Olympic levels. In addition, policy development in sport management will be explored.

Components: LEC.

Grading: GRD.

Typically Offered: Spring & Summer.

KIN 677. Advanced Nutrition for Health and Fitness. 3 Credit Hours.

This course presents an in-depth study of the nutritional concerns of today's Recreational and competitive athlete. Topics include dehydration, classic carbohydrate loading, protein needs, ergogenic aids, and more. State-of-the-art research in the field is provided. This is also a writing intensive course. Thus, writing skills will represent an integral part of one's grade.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 678. Pharmacology for Allied Health Professionals. 3 Credit Hours.

The study of drug families and drugs in common use across spectra of age, illness, disease, and disability. Students will understand body systems treated with current pharmaceuticals over-the-counter (OTC) medications, and nutraceuticals. Actions, key adverse effects, and influences on individuals undergoing physical activity will be emphasized.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 679. Principles of Exercise Prescription/Assessment: Cardiovascular. 3 Credit Hours.

This course presents a comprehensive overview of the physical, physiological and metabolic responses of the human body to exercise testing and training both in health and disease. The successful student will gain an understanding of the process involved in prescribing safe and effective therapeutic exercise in healthy individuals as well as patients with heart and lung disease, diabetes and obesity. An overview of environmental and legal considerations in the prescriptive process will also be discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 680. Principles of exercise Prescription: Neuromuscular. 3 Credit Hours.

An examination of the scientific bases of modern training techniques designed to optimize performance, their functional application and potential impact on performance in sport and everyday activity.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 681. Development and Maturation of Athletes.. 3 Credit Hours.

This course is an in-depth study of pediatric exercise physiology with special emphasis on growth, maturation, physical activity, and performance. Topics include a comprehensive summary of biological growth and maturation, processes as it impacts physical performance. Additionally, students will learn the bases of pediatric exercise physiology in order to understand the concepts of motor development, strength, aerobic and anaerobic performance in the pediatric population.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 682. Clinical Pathology and Immediate Primary Care. 3 Credit Hours.

This course will focus on the pathology of non-orthopedic conditions including medical emergencies. Students will be able to recognize common injuries and illnesses, provide immediate treatment interventions, and make medical referrals and transport decisions when necessary. Pre-requisite: KIN663 and Current AHA BLS CPR/AED certification for the Health Care Providers (or approved equivalent as determined by ECC requirements from the BOC).

Prerequisite: KIN 663.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 684. Obesity, Metabolic Disease, and Inflammation. 3 Credit Hours.

The focus of this course is on the integrative neurophysiological functions that regulate and influence obesity, metabolic disease, and inflammation. Students will be able to understand the role that chronic inflammation plays in the pathology of disease. A combination of lecture, critical reading, and group discussion will be utilized to explore the underlying basis for metabolic abnormalities.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 685. Advanced Topics in Kinesiology and Sport Sciences. 3 Credit Hours.

This course will provide a synthesis of essential concepts in specialty subjects relevant to one's field of interest.

Components: THI.

Grading: GRD.

Typically Offered: Spring & Summer.

KIN 686. Exercise Prescription/Assessment Laboratory. 3 Credit Hours.

This course presents an overview of the laboratory techniques used to assess cardiovascular endurance and general fitness, pulmonary function and anaerobias observed during competition.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

KIN 687. Laboratory Experience in Sports Nutrition. 3 Credit Hours.

This laboratory class provides case study analyses and computerized nutrient analysis systems designed to evaluate nutrition and hydration needs of the recreational and competitive athlete. From urinalysis and blood work, to body composition and computerized nutrient data base systems, this laboratory provides a clinical approach to evaluating the nutrition status of the exercising individual. Corequisite: ESS 577.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 688. Advanced Gross Anatomy in Kinesiology and Sport Sciences. 3 Credit Hours.

Human dissection of the major muscles, arteries, and nerves of the body. This course is held at the Medical Campus, cadaver laboratory. Special consideration is given to injury sites in sports such as the knee, shoulder, elbow, neck and spinal areas. Students are required to pay a \$100 laboratory fee for the class. This course is to be taken by Athletic Training majors only.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 689. Directed Readings in Kinesiology and Sport Sciences. 3 Credit Hours.

Directed Readings focusing on research and contemporary trends in the field.

Components: PRA.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 690. Special Topics in Kinesiology and Sport Sciences. 1-3 Credit Hours.

This course is designed for students wishing to focus on a specific area of study within the umbrella of the Kinesiology and Sport Sciences curriculum. Students will be given supervision and support in a direction relevant to their needs and interests in a structured setting.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 698. Professional Training and Counseling for Integrative Health. 3 Credit Hours.

Current research in nutrition and nutritional care, nutrition profession, ethics and roles in food service, clinical and community. Seminars designed to cover state-of-the-art overview of current and emerging topics will be presented by invited outside guest speakers.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

KIN 699. Advanced Programming for Endurance Athletes. 3 Credit Hours.

This course provides students with training techniques to improve aerobic capacity, endurance, and lactate threshold for optimal performance. Students will review evidenced based principles of sports nutrition, strategies to ensure proper hydration, thermoregulation, and fuel (substrate) availability during prolonged exercise as well as develop programs for competitive sports including triathlon, marathon, and cycling.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 702. Athletics in the United States. 3 Credit Hours.

An Assessment of athletics in the United States. Focus on historical perspectives, contemporary issues, interface with international athletics, and future trends.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

KIN 704. Recreation in the United States. 3 Credit Hours.

An assessment of recreation and leisure in the United States. Focus on past, present, and future trends, problems, and issues.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

KIN 710. Advanced Adolescent Growth and Maturation. 3 Credit Hours.

This course is an in-depth study of pediatric exercise physiology with special emphasis on growth, maturation, physical activity, and performance. Topics include a comprehensive summary of biological growth and maturation, processes that impact physical performance. Additionally, students will learn the basis of training pediatric populations.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 712. Applied Sport Psychophysiology. 3 Credit Hours.

The study of the physiological effects of acute vs. chronic training on homeostatic function, musculoskeletal systems, energy system function, cardiovascular system, and the pulmonary system. Students will be able to understand and interpret terminology and research literature published in the field.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

KIN 714. Therapeutic Interventions. 3 Credit Hours.

Students will acquire the theoretical knowledge necessary for the clinical application of therapeutic exercise, modalities, and evidenced based rehabilitation programs. Principles of therapeutic exercise, open and closed chain exercise, muscle re-education, and special therapeutic techniques such as aquatic therapy. In addition, students will apply specific physiological effects, therapeutic indications, and contraindications associated with thermal, mechanical, electromagnetic, and acoustic modalities.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 715. Evidence-Based Sports Medicine and Research Methods. 3 Credit Hours.

The student will learn the systematic approach to creating and answering clinical questions through review and application of existing research. Students will learn how to develop a relevant clinical question using a pre-defined question format, use standard criteria or developed scales to critically appraise the structure, rigor, and overall quality of research studies, and determine the effectiveness and efficacy of an athletic training intervention. Students will also learn the theoretical foundation of clinical outcomes assessment and the standard methods of outcomes assessment in athletic training clinical practice.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 716. Advanced Rehabilitation Techniques in Athletic Training. 3 Credit Hours.

This is an advanced athletic training course designed to enhance the athletic trainer's ability to plan and implement a comprehensive sports injury rehabilitation program based on the sequential events of musculoskeletal tissue healing. Discussion focuses on the development of a conceptual model for sports injury rehabilitation which incorporates rehabilitation phases, intervention goals, and progression criteria. Application of the problem-oriented approach to the management of athletic injuries is a predominant theme throughout this course

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 717. Applied Clinical Techniques in Athletic Training. 3 Credit Hours.

This clinical laboratory course focuses on athletic training skills utilized in the diagnosis and treatment of primary care of patients. Students will become proficient in utilizing diagnostic tools and tests. In addition, students will become proficient in wound care, suturing, initiating and maintaining appropriate intravenous (IV) therapies and the collecting, handling, and processing of blood specimens for analysis.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

KIN 718. Administration and Professional Development. 3 Credit Hours.

Concepts of legal liability, insurance, budget/financial management, human resources, inventory control, facilities design and maintenance will be addressed. This course will enable the student to understand reimbursement guidelines; understand medical delivery systems, health care policy, and legislation in the United States. In addition, students will learn the basics related to accounting, billing, coding, accounts payable, and risk management.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 720. Practicum in Athletic Training. 3 Credit Hours.

Clinical education and field experience in a healthcare setting. Students are assigned to a licensed health care professional who will serve as the student's preceptor. Students will learn alongside their preceptors as they are exposed to the role, and function of a health care provider while practicing clinical skills with a variety of patient populations. In addition, students will meet for scheduled in-services and clinical labs with a focus on emergency preparedness and readiness through Simulation and Interprofessional Education. Prerequisite: KIN 663 Foundations of Athletic Training
Prerequisite: KIN 663.

Components: PRA.

Grading: GRD.

Typically Offered: Fall.

KIN 721. Independent Study 1: Clinical Internship Experience. 3 Credit Hours.

This elective internship course will allow students to seek a professional Athletic Training internship in a particular area of clinical interest under the supervision of a licensed/certified health care clinician.

Components: IND.

Grading: GRD.

Typically Offered: Fall.

KIN 722. Practicum in Athletic Training 2. 3 Credit Hours.

Clinical education and field experience in a healthcare setting. Students are assigned to a licensed athletic trainer who will serve as the student's preceptor. Students will learn alongside their preceptors as they are exposed to the role and function of an athletic trainer while practicing clinical skills with a variety of patient populations. In addition, students will meet for scheduled in-services and clinical labs with a focus on utilizing Interprofessional Education (IPE) and simulation to enhance physical evaluation and assessment skills. Prerequisite: KIN 720 Practicum in Athletic Training 1

Prerequisite: KIN 720.

Components: PRA.

Grading: GRD.

Typically Offered: Spring.

KIN 723. Independent Study 2: Research Experience. 3 Credit Hours.

This elective research experience course will allow students to pursue research in an area of particular interest under the supervision of a faculty member.

Components: IND.

Grading: GRD.

Typically Offered: Spring.

KIN 724. Practicum in Athletic Training III. 3 Credit Hours.

Clinical education and field experience in a healthcare setting. Students are assigned to a licensed health care professional who will serve as the student's preceptor. Students will learn alongside their preceptors as they are exposed to the role, and function of a health care provider while practicing clinical skills with a variety of patient populations. In addition, students will meet for scheduled in-services and clinical labs with a focus on integrating athletic training knowledge and skills through Simulation and Interprofessional Education (IPE). Prerequisite: KIN 722 Practicum in Athletic Training 2

Prerequisite: KIN 722.

Components: PRA.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 725. Independent Study III. 1 Credit Hour.

This course is an advanced study of a particular theme or topic in the athletic training field such as students' research topic, current issues of relevance to certified athletic trainers and other professionals in the sports health care professions. Students will prepare for class discussion by reviewing assigned readings from professional journals and other pertinent sources. Class sessions will consist of lectures, laboratories, and discussion sessions.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 726. Practicum in Athletic Training IV. 3 Credit Hours.

Field experience at the athletic training setting through working with collegiate athletes to expose students to the role and function of athletic training as a certified athletic trainer and clinical instructor as well.

Components: PRA.

Grading: GRD.

Typically Offered: Spring.

KIN 727. Pract in Nutrition. 3 Credit Hours.

Planned supervised practice experience component in dietetic and nutrition practice of up to 900 hours shall provide the applicant with a broad spectrum of experiences in dietetics and Nutrition in clinical, community and food service to meet licensure requirements.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 735. Methods in Biomechanical Analysis. 3 Credit Hours.

Examination of methods of research, instrumentation, and quantitative application of kinematic and kinetic concepts in the biomechanical analysis of human movement.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 740. Neurophysiology in Exercise Science. 3 Credit Hours.

Examination of the functions of the central, peripheral, and autonomic nervous systems in regulating exercise homeostasis and the structural and functional modifications to the systems through training. NOTE: This course is a writing intensive course. This means that all examinations and papers include a critical evaluation of the student's ability to convey information using the written word.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 741. Aging: Physiological Changes and Their Implications of Training. 3 Credit Hours.

The physiological changes that occur due to aging and their impact on fall prevention, independence, and the application of prophylactic exercise prescriptions.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 742. Fundamentals of Cardiology. 3 Credit Hours.

This course represents an in-depth review and evaluation of the field of cardiology. Students must understand the etiology of coronary artery diseases, assessment techniques in the evaluation of cardiac pathologies, the latest risk factors, and most recent trends in treatment and rehabilitation. Phase I through Phase IV review of Cardiac Rehabilitation will be fully examined.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 743. Laboratory Experiences in Cardiac Rehabilitation. 3 Credit Hours.

This class provides hands-on clinical experiences in preparation of patient for testing, assessment of pre-existing medical conditions and risk factors as well as appropriate procedures for stress testing. Student will, in addition, have the opportunity to view Thallium stress tests, echocardiography and cardiac surgical procedures such as angioplasty and bypass surgery.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 744. Interpretation of the Electrocardiogram. 3 Credit Hours.

This class will provide information of the electrophysiology of the heart, medicines used to improve heart function, and critical examination of waveform analyses in interpreting the electrocardiogram. Prerequisite: KIN 642 (Formally ESS 642) or permission of the instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 746. Research Methods in Kinesiology and Sport Sciences. 3 Credit Hours.

This Course reviews the approach and research methods used to evaluate quantitative research questions in the field of Kinesiology and Sport Sciences.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

KIN 747. Analytic Methods in Kinesiology and Sport Sciences. 3 Credit Hours.

Methods of analyzing research data in Kinesiology and Sport Sciences.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 755. Exercise Biochemistry. 3 Credit Hours.

This course presents an in-depth examination of the biochemical basis of exercise. Topics include carbohydrate and lipid metabolism at rest and during exercise, integration of metabolism, the use of stable isotopes in the characterization of substrate kinetics, and metabolic bases of fatigue. Both the instructor and the students will incorporate current peer-reviewed research in the field.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

KIN 763. Seminar and Special Topics in Athletic Training. 3 Credit Hours.

Scenarios and subject matter that will help facilitate the student's transition to practice will be emphasized. There will be a focus on current issues and emerging topics and technologies in the healthcare profession. Students will prepare for class discussion by reviewing assigned readings from professional journals and other pertinent sources. Class sessions will consist of lectures, laboratories, and discussion sessions. Also, career development and responsibility topics such as leaderships, entrepreneurship, ethics, patient values, diversity and cultural competency.

Components: SEM.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 764. Athletic Training Clinical Field Experience. 6 Credit Hours.

This course is an immersive clinical education experience, where Athletic Training students under the supervision of a preceptor will demonstrate the ability to integrate knowledge and skills with clinical problem-solving while assuming professional like roles in various clinical patient care settings. Students will be required to post weekly reflections in an electronic journal and to attend scheduled webinars.

Prerequisite: KIN 722.

Components: PRA.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 765. Teaching Assistant Training in Kinesiology. 3 Credit Hours.

This course involves training and teaching assistant experience under the supervision of faculty. Students will have the opportunity to assist faculty in the teaching of workshops, clinical laboratory and/or undergraduate theory courses offered in the Kinesiology department.

Components: PRA.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 766. Research in Athletic Training. 3 Credit Hours.

This course is an advanced study of a particular theme or topic in the athletic training field including a research topic, current professional issues of relevance to certified athletic trainers and other sports medicine/allied healthcare professionals.

Prerequisite: KIN 715 and KIN 763.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 781. Issues Specific to Women's Health. 3 Credit Hours.

This course focuses upon clinical health issues relevant to women. Students will acquire a body of knowledge concerning the specific biological and physiological changes women experience from birth to maturity, and from the pre- to post menopausal state. Women will learn significant issues related to women's health and be able to make more educated decisions regarding their health and treatment options.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 782. Psychosocial Issues in Women's Health. 3 Credit Hours.

This course covers a broad perspective of women and their self-esteem, their femininity, and their role in family household. Attention will be paid to the historical, cultural, and anthropological development of women and their role in society. The influence of gender will explore several areas which include a) pregnancy, b) menopause, c) menstrual cycle, d) stress and career vs. family, e) depression, and f) body image.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

KIN 783. Sports Medicine for the Female Athlete. 3 Credit Hours.

This course focuses upon the physiological effects of exercise on the female athlete as it relates to her performance and health. Physiological differences between male and female will be examined as it impacts the women's performance capabilities and potential. Gender specific problems regarding the exercising female will be explored.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

KIN 784. Energetics of Obesity. 3 Credit Hours.

This course is designed to evaluate dieting, rebound effect, set point theory, brown fat, and adaptive thermogenesis, as they relate to the etiology of obesity. The course will cover a step-by-step approach in the recognition, and management of the overweight patient. The course will also examine adipocyte morphology and the health implications of being overweight and obese. Students will examine the impact of both diet and exercise on long-term weight management.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 785. Neurological Mechanisms of Weight Regulation. 3 Credit Hours.

This course is designed to evaluate dieting, rebound effect, set point theory, brown fat, and adaptive thermogenesis, as they relate to the etiology of obesity. The course will cover a step-by-step approach in the recognition and management of the overweight patient. The course will also examine adipocyte morphology and the health implications of being overweight and obese. Students will examine the impact of both diet and exercise on long-term weight management.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 790. Strength and Conditioning Independent Study/Project. 3 Credit Hours.

Practical experience not ordinarily available through coursework sequences. Placement in a variety of settings, clinics, public and private voluntary agencies and schools. Supervised by a faculty member of the department.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 791. Practicum in Kinesiology and Sport Sciences/Master's students. 1 Credit Hour.

The course presents graduate students with the theoretical and practical tools necessary for expanding their critical thinking and argumentative skills in order to present their scientific research results in an evaluative, logical and analytical manner. The course consists of weekly presentations of related literature, results, and findings on various Master's projects.

Components: PRA.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 792. Optional Internship-Strength and Conditioning. 1 Credit Hour.

This 1 credit internship allows students to pursue professional internships in the field of strength and conditioning/fitness entrepreneurship. Students will be provided with contact information and a number of opportunities by Dr. Biagioli respective to their interests.

Components: SEM.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

KIN 793. Research Colloquium.. 1-3 Credit Hours.

This course presents graduate students with the theoretical and practical tools necessary for presenting their scientific research in an organized, logical, and analytical manner.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 794. Advanced Individual Study. 1-3 Credit Hours.

The Application for Admission to Individual Study Form will be required.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 795. Graduate/Clinical Field Experience in Kinesiology and Sport Sciences. 1-3 Credit Hours.

Practical experience not ordinarily available through coursework sequences. Placement in a variety of settings, clinics, public and private voluntary agencies and schools. Supervised by a faculty member of the department.

Components: PRA.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 799. Special Project. 1-3 Credit Hours.

This course represents the capstone course in a student's field and should represent a culmination of all information learned in class.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 800. Kinesiology Practicum. 1 Credit Hour.

Students will be engaged in a course of study designed especially for their entry into their field. The student will be supervised by an approved expert (industry professional, clinician, or researcher) for the practical application of previously studied theory. His or her supervised field contact will be approximately 20 hours per week, but can vary based on the nature of the experience and supervisor approval.

Components: PRA.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

KIN 810. Master's Thesis. 1-6 Credit Hours.

The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

KIN 820. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in ESS 710 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: PRA.

Grading: GRD.

Typically Offered: Fall & Spring.

KIN 825. Continuous Registration--Master's Study. 1 Credit Hour.

To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 830. Pre-Candidacy to Dissertation Research. 1-10 Credit Hours.

Admission to doctoral program. Requires approval of advisor and department chair.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

KIN 835. Practicum. 1-2 Credit Hours.

The course presents graduate students with the theoretical and practical tools necessary for expanding their critical thinking and argumentative skills in order to present their scientific research results in an evaluative, logical and analytical manner. The course consists of weekly presentations of related literature, results, and findings on various Doctoral projects.

Components: PRA.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

KIN 840. Post-Candidacy Dissertation Research. 1-12 Credit Hours.

For doctoral students working on their dissertations.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

KIN 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the PH.D. Student, after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate school.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Latin (LAT)

LAT 101. Elementary Latin I. 3 Credit Hours.

Elementary vocabulary, grammar and reading.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

LAT 102. Elementary Latin II. 3 Credit Hours.

Continuation of LAT 101.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

LAT 103. Intensive Elementary Latin. 3 Credit Hours.

The equivalent of LAT 101, LAT 102, and half of LAT 201 in one semester; students are prepared to enter LAT 201 or 300-/400-level courses depending on their performance in the class. Combined with LAT 625. In addition to the three class hours per week, there is one additional hour (TBA) for drills and tests.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

LAT 201. Intermediate Latin I. 3 Credit Hours.

Translation and grammatical analysis of selected texts from Latin authors.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

LAT 202. Intermediate Latin II. 3 Credit Hours.

Introduction to reading Latin poetry. Students will read selections from the Aeneid, with emphasis on Virgil's language and meter, as well as the ancient epic tradition. Latin 202 prepares students for 300- and 400-level Latin poetry courses.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

LAT 203. Ovid's Metamorphoses. 3 Credit Hours.

Readings in Latin from Ovid's Metamorphoses, including Apollo and Daphne, Echo and Narcissus, Midas and more.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

LAT 301. Catullus. 3 Credit Hours.

An advanced Latin course on the works of the Roman poet Catullus. Students will read almost all of the poems in the Catullan corpus, and be introduced to the related secondary literature, covering topics such as ancient sexuality, invective and obscenity, the figure of the mistress in Latin love poetry, the arrangement of poems within a poetic book, meter, and the textual tradition.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

LAT 302. Petronius. 3 Credit Hours.

An advanced Latin prose reading course on Petronius' *Satyricon*, a mysterious and fragmented novel dating from the time of the decadent emperor Nero. Trimalchio's Dinner-Party, the central section of the work, forms the focus of the course. It is an account of a dinner hosted by a wealthy ex-slave, and can be read as a critique of the excesses of the Neronian age.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

LAT 311. Cicero: Orations. 3 Credit Hours.

Readings from the speeches of Cicero, with an emphasis on syntax, vocabulary, rhetorical theory and practice, and the historical situation of the speeches.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

LAT 321. Virgil. 3 Credit Hours.

An advanced reading course in the poems of Virgil.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

LAT 322. Martial Epigrams. 3 Credit Hours.

Examines selected works of the first-century CE poet Martial, the acknowledged master of the verse epigram, considering his writing both as poetry (within the Greek and Roman traditions) and as social and political commentary.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

LAT 323. Seneca. 3 Credit Hours.

Examines in Latin select writings of the Roman philosopher and statesman Lucius Annaeus Seneca.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

LAT 401. Special Topics in Latin Literature. 3 Credit Hours.

The course is designed for the study of individual authors or topics in Roman thought, literature, and culture at an advanced level, not normally covered elsewhere in the course directory.

Prerequisite: LAT 201.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

LAT 402. Special Topics in Latin Literature. 3 Credit Hours.

This course will address a specific author, topic, or text (appearing as a subtitle). Analogous to REL 404-409 courses. [this will vary each time the course is offered]

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

LAT 403. Special Topics in Latin Literature. 3 Credit Hours.

This course will address a specific author, topic, or text (appearing as a subtitle) Analogous to REL 404-409 courses. [this will vary each time the course is offered]

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

LAT 404. Special Projects in the Literature and Culture of Ancient Rome. 3 Credit Hours.

[This course will address a specific project in Classics (appearing as a subtitle) Analogous to REL 407-409 this will vary each time the course is offered]

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

LAT 406. Special Projects in the Literature and Culture of Ancient Rome. 3 Credit Hours.

This course will address a specific project in Classics (appearing as a subtitle). Analogous to REL 407-409.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

LAT 407. Supervised Reading in Classical Latin. 3 Credit Hours.

Variable subject matter determined by instructor and student. Analogous to REL 401-403.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

LAT 408. Supervised Reading in Classical Latin. 3 Credit Hours.

Variable subject matter determined by instructor and student. Analogous to REL 401-403.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

LAT 409. Supervised Reading in Classical Latin. 3 Credit Hours.

Variable subject matter determined by instructor and student. Analogous to REL 401-403.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

LAT 411. Horace. 3 Credit Hours.

Readings in the odes, epodes, satires and epistles of Horace.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

LAT 421. Roman Epic. 3 Credit Hours.

Studies from Roman epic poetry of Lucretius and Virgil to Lucretius and Statius.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

LAT 422. Lucretius. 3 Credit Hours.

Detailed treatment of the Latin philosophical poet Lucretius and his lone surviving poem, *De rerum natura*.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

LAT 431. Livy. 3 Credit Hours.

Readings from the Roman historian Livy.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

LAT 432. Reading from Suetonius "Lives of the Twelve Caesars". 3 Credit Hours.

Readings in Latin from Suetonius' "Lives of the Twelve Caesars," a set of gossipy, sometimes racy, always dramatic biographies of Julius Caesar and the first eleven emperors of ancient Rome.

Prerequisite: LAT 201.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

LAT 491. Directed Readings. 1-3 Credit Hours.

Content to be determined by faculty member and registering student(s).

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

LAT 625. Elementary Latin for Graduate Research. 0 Credit Hours.

Grammatical structures, verb tenses, and word families necessary for reading texts with minimal use of a dictionary. May fulfill the Foreign Language Reading Competency Requirement (consult your graduate advisor).

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

LAT 691. Directed Reading in Latin for Graduate Students. 3 Credit Hours.

Independent study in Roman thought, literature, and culture.

Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

Latin American Studies (LAS)

LAS 101. Introduction to Latin American and Caribbean Studies. 3 Credit Hours.

Course will focus on culture, economy, geography, history, politics, and society of Latin America and the Caribbean, as well as on the ways in which scholars have studied the region. LAS101 replaces LAS201.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

LAS 110. Students in Latin America and the Caribbean. 1-3 Credit Hours.

Latin American and Caribbean Studies Courses taken at other institutions with no direct equivalent.

Components: LEC.

Grading: GRD.

LAS 111. Studies in Latin America and the Caribbean. 1-3 Credit Hours.

Latin American and Caribbean Studies Courses taken at other institutions with no direct equivalent.

Components: LEC.

Grading: GRD.

LAS 112. Studies in Latin America and the Caribbean. 1-3 Credit Hours.

Latin American and Caribbean Studies Courses taken at other institutions with no direct equivalent.

Components: LEC.

Grading: GRD.

LAS 113. Studies in Latin America and the Caribbean. 1-3 Credit Hours.

Latin American and Caribbean Studies Courses taken at other institutions with no direct equivalent.

Components: LEC.

Grading: GRD.

LAS 114. Studies in Latin America and the Caribbean. 1-3 Credit Hours.

Latin American and Caribbean Studies Courses taken at other institutions with no direct equivalent.

Components: LEC.

Grading: GRD.

LAS 115. Studies in Latin America and the Caribbean. 1-3 Credit Hours.

Latin American and Caribbean Studies Courses taken at other institutions with no direct equivalent.

Components: LEC.

Grading: GRD.

LAS 211. Studies in Latin America and the Caribbean. 1-3 Credit Hours.

Latin American and Caribbean Studies Courses taken at other institutions with no direct equivalent.

Components: LEC.

Grading: GRD.

LAS 212. Studies in Latin America and the Caribbean. 1-3 Credit Hours.

Latin American and Caribbean Studies Courses taken at other institutions with no direct equivalent.

Components: LEC.

Grading: GRD.

LAS 213. Studies in Latin America and the Caribbean. 1-3 Credit Hours.

Latin American and Caribbean Studies Courses taken at other institutions with no direct equivalent.

Components: LEC.

Grading: GRD.

LAS 214. Studies in Latin America and the Caribbean. 1-3 Credit Hours.

Latin American and Caribbean Studies Courses taken at other institutions with no direct equivalent.

Components: LEC.

Grading: GRD.

LAS 215. Studies in Latin America and the Caribbean. 1-3 Credit Hours.

Latin American and Caribbean Studies Courses taken at other institutions with no direct equivalent.

Components: LEC.

Grading: GRD.

LAS 301. Interdisciplinary Topics in Latin American and Caribbean Studies. 3 Credit Hours.

Topics vary, Interdisciplinary focus may be thematic (e.g.: revolutions, new social movements, women's rights, Latin Americanism, testimonio, culture industries, etc.) or regional/national (e.g.: Andean Studies, Southern Cone Studies, Caribbean Studies, Mexican Studies, etc.)

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

LAS 302. Interdisciplinary Topics in Latin American and Caribbean Studies-Travel Course. 3 Credit Hours.

Topics vary, Interdisciplinary focus is thematic and regional (i.e. tourism in Yucatan; civil society in Chile, civil society in Haiti, cultural policy in the Caribbean, environmental policy in Panama.). Course involves travel during Spring Break and it has a program fee.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

LAS 311. Studies in Latin America and the Caribbean. 1-3 Credit Hours.

Latin American and Caribbean Studies Courses taken at other institutions with no direct equivalent.

Components: LEC.

Grading: GRD.

LAS 312. Studies in Latin America and the Caribbean. 1-3 Credit Hours.

Latin American and Caribbean Studies Courses taken at other institutions with no direct equivalent.

Components: LEC.

Grading: GRD.

LAS 313. Studies in Latin America and the Caribbean. 1-3 Credit Hours.

Latin American and Caribbean Studies Courses taken at other institutions with no direct equivalent.

Components: LEC.

Grading: GRD.

LAS 314. Studies in Latin America and the Caribbean. 1-3 Credit Hours.

Latin American and Caribbean Studies Courses taken at other institutions with no direct equivalent.

Components: LEC.

Grading: GRD.

LAS 315. Studies in Latin America and the Caribbean. 1-3 Credit Hours.

Latin American and Caribbean Studies Courses taken at other institutions with no direct equivalent.

Components: LEC.

Grading: GRD.

LAS 320. Special Topics in Latin American and Caribbean Environment. 3 Credit Hours.

Topics vary. Interdisciplinary focus on policies and impact on globalization on the environment.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

LAS 321. Latin American Environmental Issues. 3 Credit Hours.

A comprehensive course on Latin American and Caribbean environmental issues in their political, economic, and social dimensions.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

LAS 330. Special Topics in Latin American and Caribbean Religions. 3 Credit Hours.

Topics vary. Interdisciplinary focus may be thematic or regional (eg: Liberation Theology, Latin American and Latino Religions, Caribbean Religions.)

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

LAS 340. Special Topics in Latin American and Caribbean Economics. 3 Credit Hours.

Topics vary. Focus may be thematic or regional, but will address issues in Latin American and Caribbean Economics and Economic Development.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

LAS 350. Special Topics in Latin American and Caribbean Art and Culture. 3 Credit Hours.

Topics vary. Focus may be thematic or regional, but will address issues in Latin American and Caribbean Art and Culture.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

LAS 360. Special Topics in Latin American and Caribbean Politics. 3 Credit Hours.

Topics Vary. Interdisciplinary focus may be thematic or regional (eg: democracy, new social movements, globalization, politics and society.)

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

LAS 362. Drug Trafficking in Latin America and the Caribbean. 3 Credit Hours.

This course introduces students to the study of drug trafficking in Latin America and the Caribbean and its relationship with organized crime, understanding both as important aspects in the dynamics of globalization, international relations, and domestic politics.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

LAS 370. Special Topics in Latin American and Caribbean Media and Communications. 3 Credit Hours.

Topics vary. Focus may be thematic or regional, but will address issues in Latin American and Caribbean Media and Communication.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

LAS 410. Studies in Latin America and the Caribbean. 1-3 Credit Hours.

Latin American and Caribbean Studies Courses taken at other institutions with no direct equivalent.

Components: LEC.

Grading: GRD.

LAS 411. Studies in Latin America and the Caribbean. 1-3 Credit Hours.

Latin American and Caribbean Studies Courses taken at other institutions with no direct equivalent.

Components: LEC.

Grading: GRD.

LAS 412. Studies in Latin America and the Caribbean. 1-3 Credit Hours.

Latin American and Caribbean Studies Courses taken at other institutions with no direct equivalent.

Components: LEC.

Grading: GRD.

LAS 413. Studies in Latin America and the Caribbean. 1-3 Credit Hours.

Latin American and Caribbean Studies Courses taken at other institutions with no direct equivalent.

Components: LEC.

Grading: GRD.

LAS 414. Studies in Latin America and the Caribbean. 1-3 Credit Hours.

Latin American and Caribbean Studies Courses taken at other institutions with no direct equivalent.

Components: LEC.

Grading: GRD.

LAS 415. Studies in Latin America and the Caribbean. 1-3 Credit Hours.

Latin American and Caribbean Studies Courses taken at other institutions with no direct equivalent.

Components: LEC.

Grading: GRD.

LAS 491. Debates on Current Issues in Latin American and Caribbean Studies. 3 Credit Hours.

Content may vary from semester to semester. This is an upper level course to allow debate and discussion on current issues and events affecting Latin America, the Caribbean and Latino communities in the United States.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

LAS 494. Independent Study in Latin American and Caribbean Studies. 1-3 Credit Hours.

Independent study leading to a thesis, original piece of research, or creative project on a Latin American or Caribbean subject.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

LAS 495. Senior Honors Thesis I. 3 Credit Hours.

This course pairs students with a faculty mentor to set and guide a research agenda in preparation for writing the senior honors thesis. Students will study advanced topics in Latin American and Caribbean Studies, according to faculty interests.

Prerequisite: LAS 101.

Components: IND.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

LAS 496. Senior Honors Thesis II. 3 Credit Hours.

This course pairs students with a faculty mentor to guide the writing process for the senior honors thesis. Students will study advanced topics in Latin American and Caribbean Studies, according to faculty interests.

Prerequisite: LAS 101.

Components: IND.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

LAS 501. Interdisciplinary in Latin American and Caribbean. 3 Credit Hours.

Interdisciplinary methods and politics of Latin American and Caribbean area studies.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

LAS 502. Research Design in Latin American Studies. 3 Credit Hours.

Interdisciplinary research methods and skills in Latin American and Caribbean studies.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

LAS 503. Program Seminar in Latin American Studies and Caribbean Studies. 3 Credit Hours.

Content of course will vary by semester.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

LAS 504. Interdisciplinary Topics in Latin American and Caribbean Studies - Travel Course.. 3 Credit Hours.

Topics vary. Interdisciplinary focus is thematic and regional (e.g.: tourism in Yucatan; civil society in Chile, Haiti-Dominican Republic relations, cultural policy in the Caribbean, environmental policy in Panama.) Course involves travel during Spring Break and it has a program fee.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

LAS 505. Internship in Latin American and Caribbean Studies. 1-3 Credit Hours.

On-site experience in business, governmental organization, or non-profit organization dealing with Latin America and/or the Caribbean.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

LAS 506. Civic Engagement in Latin America. 1-3 Credit Hours.

On site experience in a civic engagement project in Latin America or the Caribbean.

Components: IND.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

LAS 520. Interdisciplinary Topics in Latin American and Caribbean Environments. 3 Credit Hours.

Topics vary. Interdisciplinary focus on policies and impact of globalization on the environment.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

LAS 521. Latin American Environmental Issues. 3 Credit Hours.

A comprehensive course on Latin American and Caribbean environmental issues in their full political, economic, and social dimensions.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

LAS 530. Special Topics in Latin American and Caribbean Religions. 3 Credit Hours.

Topics vary. Interdisciplinary focus may be thematic or regional (e.g., Liberation Theology, Latin American and Latino Religions, Caribbean Religions), but will address Latin American and Caribbean religion.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

LAS 540. Special Topics in Latin American and Caribbean Media and Communication. 3 Credit Hours.

Topics vary. Interdisciplinary focus may be thematic or regional (e.g., global media, Spanish- or Portuguese-language television or radio, social media) but will address Latin American and Caribbean media and communication.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

LAS 550. Special Topics in Latin American and Caribbean Art and Culture. 3 Credit Hours.

Topics vary. Interdisciplinary focus may be thematic or regional, but will address Latin American and Caribbean Art & Culture.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

LAS 560. Special Topics in Latin American and Caribbean Politics. 3 Credit Hours.

Topics vary. Interdisciplinary focus may be thematic or regional (e.g., democracy, new social movements, globalization, politics and society), but will address Latin American and Caribbean politics.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

LAS 580. Special Topics in Latin American and Caribbean History. 3 Credit Hours.

Topics vary. Interdisciplinary focus may be thematic or regional, but will address the history of political, social and economic development in Latin America and the Caribbean.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

LAS 591. Debates on Current Issues in Latin American and Caribbean Studies. 3 Credit Hours.

Content may vary from semester to semester. This is a graduate course to allow debate and discussion on current issues and events affecting Latin America, the Caribbean, and Latino communities in the United States.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

LAS 601. Interdisciplinary in Latin American and Caribbean. 3 Credit Hours.

Interdisciplinary methods and politics of Latin American and Caribbean area studies.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

LAS 602. Research Design in Latin American Studies. 3 Credit Hours.

Interdisciplinary research methods and skills in Latin American and Caribbean studies.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

LAS 603. Program Seminar in Latin American Studies and Caribbean Studies. 3 Credit Hours.

Content of course will vary by semester.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

LAS 604. Interdisciplinary Topics in Latin American and Caribbean Studies - Travel Course.. 3 Credit Hours.

Topics vary. Interdisciplinary focus is thematic and regional (e.g.: tourism in Yucatan; civil society in Chile, Haiti-Dominican Republic relations, cultural policy in the Caribbean, environmental policy in Panama.) Course involves travel during Spring Break and it has a program fee.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

LAS 605. Internship in Latin American and Caribbean Studies. 1-3 Credit Hours.

On-site experience in business, governmental organization, or non-profit organization dealing with Latin America and/or the Caribbean.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

LAS 606. Civic Engagement in Latin America. 1-3 Credit Hours.

On site experience in a civic engagement project in Latin America or the Caribbean.

Components: IND.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

LAS 620. Interdisciplinary Topics in Latin American and Caribbean Environments. 3 Credit Hours.

Topics vary. Interdisciplinary focus on policies and impact of globalization on the environment.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

LAS 630. Special Topics in Latin American and Caribbean Religions. 3 Credit Hours.

Topics vary. Interdisciplinary focus may be thematic or religion (e.g., Liberation Theology, Latin American and Latino Religions, Caribbean Religions), but will address Latin American and Caribbean religion.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

LAS 640. Special Topics in Latin American and Caribbean Media and Communication. 3 Credit Hours.

Topics vary. Interdisciplinary focus may be thematic or religion (e.g. Global media, Spanish- or Portuguese- language television or radio, social media), but will address Latin American and Caribbean Media and Communication.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

LAS 650. Special Topics in Latin American and Caribbean Art and Culture. 3 Credit Hours.

Topics vary. Interdisciplinary focus may be thematic or religion, but will address Latin American and Caribbean art and culture.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

LAS 660. Special Topics in Latin American and Caribbean Politics. 3 Credit Hours.

Topics vary. Interdisciplinary focus may be thematic or religion (e.g., democracy, new social movements, globalization, politics and society), but will address Latin American and Caribbean politics.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

LAS 680. Special Topics in Latin American and Caribbean History. 3 Credit Hours.

Topics vary. Interdisciplinary focus may be thematic or religion, but will address the history of political, social and economic development in Latin America and the Caribbean.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

LAS 681. Graduate Seminar on Public Health: Latin America and the Caribbean. 3 Credit Hours.

A variety of contemporary global public health issues and policy challenges confronting Latin America and the Caribbean, considering large and small states. We will explore the broader relationship of global public health topics to the political, economic, social, cultural, ethical, ecological, environmental, and technological factors.

Prerequisite: LAS 501.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

LAS 684. Global Public Health: Harnessing Theoretical Prep with Health Diplomacy and Practical Exper. 3 Credit Hours.

For students with a genuine interest in global public health and a regional focus in Latin America or the Caribbean. Students will have the opportunity to examine global health issues, programs, projects, policies and ethical dilemmas considering different methods used to study the challenges and successes in global public health work. This course will expose students to the integration of western and health care, as well as the economic, political, social, cultural, environmental, ecological and technological components of their lives that directly or indirectly influence public health outcomes at the community level. Furthermore, students will have a unique opportunity to interact with families and community organizations and programs in the remote villages as well as families residing in urban communities. This will provide greater insights into the epidemiologic, nutrition, lifestyle and socio-economic transitions which bring both positive and negative impacts on health and wellbeing. Students will also learn about importance of health diplomacy and health security within a globalized world through interactions with local policy makers and community members while in the country.

Components: FLD.

Grading: GRD.

Typically Offered: Spring & Summer.

LAS 691. Debates on Current Issues in Latin American and Caribbean Studies. 3 Credit Hours.

Content may vary from semester to semester. This is a graduate course to allow debate and discussion on current issues and events affecting Latin America, the Caribbean, and Latino communities in the United States.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

LAS 694. Directed Readings in Latin America and Caribbean. 3 Credit Hours.

Independent Study leading to an original piece of research, or creative project on a Latin American or Caribbean interdisciplinary topic.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

LAS 697. Readings for the Comprehensive Exam. 3 Credit Hours.

Readings for M.A. students who are preparing for comprehensive examinations.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

LAS 810. Pre-candidacy thesis credits. 3 Credit Hours.

The student working on his/her master's thesis enrolls for credit, not to exceed three, before student has been admitted to candidacy. Credit is not awarded until the thesis has been accepted.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

LAS 815. Post-candidacy thesis credits. 3 Credit Hours.

The student working on his/her master's thesis enrolls for credit, not to exceed six, after student has been admitted to candidacy. Credit is not awarded until the thesis has been accepted.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

LAS 820. Research in residence.. 1 Credit Hour.

Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in LAS 710 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

Components: LEC.

Grading: GRD.

LAW 251. Search and Seizure. 3 Credit Hours.

Search and Seizure explores the evolution of the U.S. Supreme Court's Fourth Amendment jurisprudence. The course, open to undergraduate and law students, develops the skills necessary to understand, evaluate, and develop legal arguments. Through the study of the government's use of surveillance tactics over the decades, students will learn to evaluate legal arguments for and against limiting government searches and seizures of people and their property. Materials will include landmark Supreme Court decisions as well as journalistic and videos and articles that place those decisions in historical context. Grades will be based on a series of approximately three 300-to-500-word essays and a final examination.

Management (MGT)

MGT 251. Nature and Foundations of Entrepreneurship. 3 Credit Hours.

This course seeks to understand some of the basic social, legal, cultural, and economic infrastructure that enables and sustains the creation of new enterprises. Although conventional perspectives on entrepreneurship often overlook political or religious activists whose "products" are not "sold" in traditional markets, a more expansive view considers actions that transform ideas into enterprises that generate intellectual, social, cultural, religious, or economic value. Theory, data, and case study will be covered to help students to think both broadly and deeply about what it means - and what it takes - to be an entrepreneur, and what characterizes the entrepreneurial society.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MGT 253. Introduction to Entrepreneurship. 3 Credit Hours.

Focuses on the process of identifying entrepreneurial opportunities and the operations of a small business. Topics include organization, location, financial planning, record-keeping, unit costs, merchandising, credit, and recruitment of personnel. This course is open to SBA students, ENT minors, or MGT minors.

Requisite: Business School or MGMT minor or ENTR minor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 270. Introduction to Health Sector Organization and Management. 3 Credit Hours.

This course provides a basic understanding of the components of the health care sector and their interrelationships. The role of hospitals, ambulatory care (including physicians), long-term care, mental health care, hospice care, and pharmaceuticals will be examined. The role of government financed (Medicare and Medicaid) and private health insurance in affecting decision making by health care consumers and providers will be examined as well. A historical context will be used.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 302. Human Resource Management. 3 Credit Hours.

Theory and practice of modern personnel management related to the other management functions in the conduct of the enterprise. Attention is focused on the needs of the line executive as well as those intending to pursue a staff career.

Requisite: Must be in the Business School or have a MGMT minor plan.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 303. Operations Management. 3 Credit Hours.

Problems and methods of planning the efficient utilization of capital, labor, equipment, and materials. Sales forecasting, production planning, production control, scheduling, routing, dispatching, expediting, materials planning, inventory control, capital budgets, and costing are discussed. The application of quantitative techniques in problem solving and decision making are included as well as case problems.

Prerequisite: MAS 201 or MAS 311 or MTH 224 or IEN 311 or PSY 291 or PSY 292.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 304. Organizational Behavior. 3 Credit Hours.

First professional course in management. Concepts of organization, motivation, leadership, dynamics of the group, personality, organizational development strategies, and other behavioral aspects involved in the effective management of an organization are discussed.

Requisite: Must be in the Business School or have a MGMT minor plan.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 307. Advanced Organizational Behavior. 3 Credit Hours.

Continuation of MGT 304—primarily for, but not limited to, MGMT OR HRMG majors. Through case analysis and other relevant exercises, theories are applied to specific situations in organizational settings.

Requisite: Must be in the Business School or have a MGMT minor plan.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 308. Training and Development. 3 Credit Hours.

An examination of key issues in designing training and development programs. Topics include organizational needs analysis, training design and implementation, evaluation techniques, and understanding of how such programs interact with other human resource functions.

Requisite: Must be in the Business School or have a MGMT minor plan.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MGT 324. Negotiation Strategies. 3 Credit Hours.

A skills-based approach to learning the art and science of negotiation. Course covers preparation, and negotiation skills such as establishing trust and relationship-building. Topics include power, persuasion, creativity, problem-solving, ethics, and cross-cultural negotiation. Skills and self-insight will be acquired through self-assessment, role-play negotiation exercises, and case studies.

Requisite: Must be in the Business School or have a MGMT minor plan.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MGT 349. International Business. 3 Credit Hours.

This course is designed to introduce students to the study of international business. Through discussions and analyses of the unique challenges and opportunities faced by multinational corporations (MNCs) and their managers, students gain an understanding of how to conduct business across different cultural, political, economic, and legal environments, as well as how to function effectively and succeed in MNCs. The course work and usage of teaching methods such as case analyses, experiential learning exercises, and debates seek to help students develop a global mindset and skills for effective global management (e.g., conceptual, analytical, cross-cultural communication, negotiation, and presentation skills).

Requisite: Must be in the Business School or have a MGMT minor plan.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MGT 354. Growing the New Venture. 3 Credit Hours.

Covers the basics of scaling a start-up. Topics include sources of capital, market choices, division of the equity pie, choice of distribution channels, choosing an accountant and a legal advisor, preparation of a business plan, and product design. Teams of students develop business plans to start new enterprises.

Prerequisite: MGT 253.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 357. Entrepreneurship Simulation Experience: Inside the Mind of the Entrepreneurial CEO. 3 Credit Hours.

This course provides students with unique entrepreneurial experiences derived from starting and running businesses through computer simulation. Topics include: opportunity and environment assessment for potential businesses; initiation, organization, administration, and launch of the businesses; operation of the businesses in a competitive environment; responsibilities, functioning, and issues of entrepreneurial teams; evaluation, measurement, and competitive ranking of business success.

Requisite: Must be in the Business School or have a MGMT minor or ENTR minor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 359. Comparative Management. 3 Credit Hours.

Analysis of professional management as affected by the cultural environments in which it operates in major industrial nations. The problems of trans-cultural managers in multinational structures is examined.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MGT 360. Effective Leadership. 3 Credit Hours.

This course covers the key theories, models, and frameworks about the effective leadership of people in organizations. A multimedia approach is taken, using readings, films, lecture, discussion, and case analyses. The emphasis is on building a sound grasp of good practice, and on developing the ability to apply such knowledge to everyday leadership situations.

Prerequisite: MGT 304.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 371. Doing Business in Latin America. 3 Credit Hours.

This elective examines the key local, regional, and global forces affecting the conduct of business in the main Latin American markets of Mexico, Brazil, Venezuela and Chile. These forces include historical, cultural and demographic factors as well as the fast-changing politics and economics of the region. Students will be introduced to the complex relationships between business and government in LatAm as well as the unique advantages and disadvantages of companies based in the region.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MGT 401. Strategic Management. 3 Credit Hours.

An integrative approach to strategy formulation and implementation, from a domestic and international perspective, is the focus of this core capstone course. All the primary areas of business are emphasized using cases and readings. Course is required of all graduating seniors in Business.

Requisite: Business School and Senior Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 422. Leading Teams. 3 Credit Hours.

The objectives of this course are to develop interpersonal communication and conflict management skills necessary to work in teams and exercise leadership in teams. Topics include team development, decision making, and managing conflict.

Requisite: Must be in the Business School or have a MGMT minor plan.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MGT 428. Compensation and Benefits Design. 3 Credit Hours.

Examines techniques and theories related to the design and management of compensation and benefits programs within organizations.

Compensation includes cash compensation, such as base pay, merit pay, seniority pay, individual, group and organization-wide incentive plans, skills-based pay, and pay-for-knowledge. Benefits include health care plans, pension and profit-sharing plans, life and disability plans, and paid time off.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MGT 445. Supply Chain Modeling and Analysis. 3 Credit Hours.

This course will introduce students to managerial decision problems in modern supply chains, and will develop structured mathematical tools to model and solve these problems. Students will also learn to apply these tools through problem-solving exercises, experiential games, and spreadsheet-based case studies.

Prerequisite: MGT 303.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MGT 446. Supply Chain Strategy. 3 Credit Hours.

This course will deal with issues such as inventory management, supply chain design/coordination, revenue management, and sourcing. Each module discusses how a real company practices some aspect of supply chain strategy, and then reviews the concepts behind that practice. Tools are provided to analyze the concepts, distill their principles, and suggest guidelines for implementation and improvement.

Prerequisite: MGT 303.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MGT 450. MGT Internship. 1 Credit Hour.

Student is individually assigned to operating business firm or other organization to gain insight into management practice in area of career interest. Periodic reports and conferences are required. Cannot be used toward major requirements.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MGT 455. Entrepreneurial Consulting. 3 Credit Hours.

Students review techniques, methods, and analytic frameworks of management consultants. Emphasis is on problems of small business, particularly start-ups. Consulting practice is provided through preparation of reports on written cases and guest speakers, as well as hands-on projects in actual business firms or start-ups.

Prerequisite: MGT 253 And MGT 354.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MGT 459. International and Multinational Management. 3 Credit Hours.

Foreign environment for overseas operations with a survey involving economics, political, and social constraints. The effects of overseas investments on foreign economies with emphasis on the emerging managerial structures is included.

Requisite: Must be in the Business School or have a MGMT minor plan.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MGT 480. Organizational Development and Change. 3 Credit Hours.

Course is intended for students who are interested in learning about how to manage, plan, and implement large-scale change efforts within organizations. Part of the course is devoted to organizational analysis techniques and the remainder addresses behavioral intervention strategies (including survey feedback, technostructural interventions, and team building).

Requisite: Must be in the Business School or have a MGMT minor plan.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MGT 496. Directed Studies in Management. 1-3 Credit Hours.

Supervised readings, individual research project, or independent investigation of selected non-STEM related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MGT 497. Directed Studies in Management. 1-3 Credit Hours.

Supervised readings, individual research project or independent investigation of selected STEM-related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.

Components: THE.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MGT 498. Special Topics in Management. 3 Credit Hours.

Special topics in selected non-STEM areas of Management.

Requisite: Sophomore Standing or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MGT 499. Special Topics in Management. 3 Credit Hours.

Special topics in selected STEM areas of Management.

Requisite: Sophomore Standing or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MGT 600. Managing Responsible Behavior in Organizations. 3 Credit Hours.

For Executive MBA students only. Course covers organizational behavior and utilizes cases and lectures to explore topics such as personality, motivation, leadership, group processes, organizational structure/design, and social responsibility.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MGT 602. Human Resource Management. 3 Credit Hours.

Modern personnel administration: job analysis and design, evaluation and appraisal, recruitment and interviewing, training and development, wages and benefits, and health and safety. Unionization, regulation of wages, hours and working conditions, financial security for workers, job anti-discrimination legislation, and manpower planning is also discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 603. Leading Teams. 3 Credit Hours.

The objectives of this course are to develop interpersonal communication and conflict management skills necessary to work in teams and/or exercise leadership in teams. Topics include team development, decision making, and diagnosing team process issues.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 616. Foundations in Organizational Management Consulting. 2 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 617. Leading Across Cultures. 2 Credit Hours.

This course examines what constitutes "effective" leadership across cultures. Skills and behaviors that are perceived as effective leadership in one culture are not necessarily those that will be effective in a different culture. By exploring the ways in which specific cultural values and leadership prototypes are seen across different cultures, students will be prepared for cross-cultural adjustment and effective leadership. These skills may be applied to work assignments in a culture that is not their own or to leading diverse followers in their home country. The goal of the course is to help prepare students for leadership in multicultural environments.

Prerequisites: MGT 600 or MGT 620 or MGT 651.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 618. Leading Change in Organizations. 2 Credit Hours.

Charles Darwin aptly noted, "It is not the strongest species that survive, not the most intelligent, but the ones who are most responsive to change." The primary goal of this course is to help you learn how to lead and manage the challenges associated with organizational change processes. Together we will identify the opportunities that require change programs; discuss ways to overcome the inevitable obstacles to change; learn how to build successful coalitions to support change efforts; analyze strategies for implementing change; and examine ways to consolidate the results of such efforts to ensure that changes are sustainable over time.

Prerequisites: MGT 600 or MGT 620 or MGT 651.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 619. Leading with Power and Influence. 2 Credit Hours.

One of the realities of organizational life is that people continually attempt to control the actions of others and to successfully influence their behavior. This reality leads to a wide array of organizational activities aimed at enhancing one's own or one's group's personal agendas. This course focuses on preparing graduates for the challenges and "realities" they will ultimately face as leaders. Given that most students will eventually be leading the efforts of others, it is essential that they understand how to acquire power and, within ethical bounds, exercise influence.

Prerequisites: MGT 600 or MGT 620 or MGT 651.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 620. Managing Through People. 2 Credit Hours.

This core course in the MBA program introduces students to some of the key behavioral topics necessary to manage oneself and others in organizations. Specifically, the topics covered include individual attributes (personality, perception, motivation, relationship building), group processes (norms, roles, and team basics), leadership views, and organizational culture/change. An understanding of the relationship between each of these areas and organizational outcomes is enhanced through lecture, cases, and interactive exercises.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 621. High Performance Leadership. 2 Credit Hours.

Leadership skills are critical for high performing organizations. Course utilizes lecture, cases, exercises, self-assessments, and contemporary reading materials to present leadership approaches that both motivate and enable employees to perform beyond normal or ordinary expectations. Topics include followership and organizational culture, power, influence, rewards and punishments, path-goal and exchange theories, participation and empowerment, charismatic and transformational leadership, and contingency and cognitive resources theory.

Requisite: Master of Science in Management Studies Students Only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 622. High Performance Teams. 2 Credit Hours.

This elective course highlights how to manage and construct effective teams to achieve strategic goals. Team-based organizations have been created to enhance organizational performance. The benefits of effective team leadership are performance beyond expectations and enhancement of learning for employees. Topics covered include team decision-making, team leadership, diversity in teams, conflict resolution, and team creativity.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 623. Human Resource Systems. 2 Credit Hours.

Leaders must manage their human resource assets effectively to achieve high performance organizations. Course topics include recruitment and selection of high performance employees, designing performance appraisal systems, implementing policies to satisfy legal issues impacting human resources, and instituting training/development systems.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 624. Negotiation Strategies. 2-3 Credit Hours.

This course is a skills-based approach to learning the art and science of negotiation. Negotiation is a core management competency; these skills are increasingly necessary for leaders in business, non-profits, small businesses and other organizations. This course will cover preparation, and negotiation skills such as establishing trust and relationship-building. Topics covered include power, persuasion, creativity and problem-solving, ethics and cross-cultural negotiation. Skills and self-insight will be acquired through self-assessment, role-play negotiation exercises and case studies.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 625. Entrepreneurship: Creating New Ventures. 2 Credit Hours.

This is a two-credit course for MBA students (only). The course is designed to help students understand the basic essentials for creating a new venture. Among some of the topics covered will be: preparation of a business plan, securing sources of capital, choosing and creating appropriate distribution channels, and understanding the complexities of selecting a management team. Students will be required to critique and develop business plans as a key evaluation component for this course.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 628. Global Entrepreneurship. 4 Credit Hours.

This seminar-type course is an advanced elective specially designed for graduate students either interested in starting their own firms or developing the skills with which to submit business plans within the corporate world (i.e., corporate entrepreneurship) in today's global, interdependent economy. Students will learn to assess the new venture opportunities that he/she may have considered and choose the one that seems most attractive and viable and develop a unique business model which enhances the plan's viability in the short term, and ensures the development of sustainable advantages in the long term. Each student will draft a comprehensive business plan after working on its functional components (e.g., marketing, finance, human and intellectual capital plans) to be developed throughout nine classes and several individual meetings along the program's academic calendar. At the end, students will present their business plans to a panel of new venture investors who will assess all projects, give individual feedback, and choose the best project(s).

Components: LEC.

Grading: SUS.

Typically Offered: Fall.

MGT 642. Supply Chain Analytics. 2-3 Credit Hours.

This course studies key decision areas in supply chain design and operation. Students will learn what data are needed and how to use data to measure supply chain performance. They will also learn to apply various tools and methods to analyze trends, extract knowledge and business intelligence, and make decisions. Through the analysis and discussion of case studies, they will get useful insights on how to optimize the value of supply chain processes and operations, to streamline the goals and to design flexible supply chains.

Prerequisite: MAS 632 or MAS 641.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MGT 643. Principles of Operations Management. 2 Credit Hours.

Introduction to operations management, forecasting, process analysis, aggregate planning, capacity management, waiting line management, system design, quality management, and inventory management.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 645. Principles of Supply Chain Management. 2 Credit Hours.

Course introduces students to the business discipline of Supply Chain Management (SCM) which centers on concepts and techniques that enables firms to better coordinate material and information flows, and non-material activities associated with logistical and marketing processes that occur within and across organizations. Course also discusses concepts and recent influential innovations in SCM (e.g., Cross-Docking, Vendor Managed Inventory (VMI), Third-Party Logistics (3PL), Efficient Consumer Response (ECR), and Quick Response (QR)).

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 651. Behavioral and Organizational Systems. 3 Credit Hours.

Exploration of relevant concepts, research findings, and pragmatic implications of the behavioral sciences for the management of complex socio-technical systems.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 653. Operations Management. 3 Credit Hours.

Introduction to major managerial problems and decision processes of operations management. Topics include the design of operations, planning, scheduling, quality control, systems analysis and evaluation, resource allocation, materials requirement planning, and integration of operations management with the other functional areas.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 654. Selected Topics in Oper Management. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 655. Research Methods. 3 Credit Hours.

Course addresses the fundamentals of research in business including exploratory designs, correlational and multivariate designs, experimental and non-experimental studies, measurement theory, internal and external validity considerations, and ethical requirements in conducting organizational research.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MGT 656. Seminar: Organizational Behavior. 3 Credit Hours.

Seminar addresses the current research and theoretical foundations in organizational behavior. Topics include individual attributes, job attitudes, leadership, motivation, and group processes.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MGT 658. Strategic Management. 3 Credit Hours.

The formulation and implementation of strategy, from a domestic and international perspective, is explored through cases, readings, and decision simulation. An integration of all the core areas of business is emphasized. This core course is required of all MBA students.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 659. Management of Multinational Enterprise. 3 Credit Hours.

Analysis of the management tasks confronting managers operating in the international arena presented from both an environmental and an operational perspective. Alternatives for overall corporate policy and strategy that accommodate global operations is also included.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 660. Leadership and Motivation in Organizations. 3 Credit Hours.

Selected topics pertaining to leadership, motivation, and individual processes are surveyed through selected readings, class discussions, and a guided research project. Students' ability to conceptualize, integrate, and apply diverse approaches to the leadership and motivation of people in organizations is emphasized.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MGT 661. Influence, Power and Politics in Organizations. 3 Credit Hours.

One of the basic realities of organizational life is that people continually attempt to control the actions of others and to successfully influence their behavior. This reality leads to a wide array of organizational politics aimed at enhancing one's own or one's group's personal agendas. This course focuses on preparing graduate business students for the challenges and "realities" they will ultimately face as managers. Given that most business students will eventually be leading the efforts of others, it is essential that they understand how to acquire power and exercise power within ethical bounds.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MGT 675. Business Policy and Strategy. 2 Credit Hours.

The objectives of the course are to improve the student's ability to think strategically and to provide an intellectual framework that enhances understanding of the MBA program. The course focuses on relationships among the firm, its strategy, and its environment; why firms choose certain businesses; which business strategies are successful; and how firms can change in response to a dynamic environment. Models for strategic formulation, implementation, and control are developed that facilitate an integrated understanding of the courses that comprise the MBA curriculum. Readings and lectures illustrate strategic management theories and frameworks while case discussions, experiential exercises, and team projects provide opportunities for application.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 677. Corporate Strategy and Organization. 2 Credit Hours.

This capstone course focuses on the perspective and skills of the general manager. Its purpose is to provide practice in diagnosing and identifying realistic solutions to complex strategic and organizational problems. Course builds on previous coursework by providing an opportunity to integrate various functional areas by providing a total business perspective. Since the course focus is on pragmatic, action-oriented general management skills, the course is taught primarily through the case method and requires both written analyses and case presentations.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 679. Merger and Acquisition Strategies. 2.00 Credit Hours.

This course explores the evolving world of mergers & acquisitions (M&A) from the perspective of both buyers and sellers. We will examine the process itself – including the role of advisors, due diligence, and post-closing steps – as well as develop a framework for assessing value and risk. Our primary focus will be on the strategic rationale, or thesis, behind any M&A deal. By the end of the course, students should be comfortable with M&A terminology, analytical tools, valuation methodologies, and the business logic employed by successful buyers and sellers. Our approach will rely heavily on microeconomic analysis and a sophisticated understanding of incentives (and their unintended consequences). As the class progresses, you will learn how to effectively negotiate a deal, craft a strategic plan for either acquisition or sale, and formulate an effective due diligence outline as a buyer.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Summer.

MGT 680. Doing Business in China. 2 Credit Hours.

This course explores various business and management issues faced by international executives who are interested or active in various industries and markets in China, aiming to improve their understanding of this largest emerging market in the world. Several case studies of business organizations and industries are used throughout the course. Emphasis on the course material and class discussions on critical thinking, solutions to problems, and evaluating different options.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 681. Essentials of Health Care Management and Policy. 3 Credit Hours.

This course develops an understanding of the basic elements of the health services industry in the United States. A systems approach will be used utilizing a historical perspective as a basis and moving on to current and potential future system dynamics. The various components of the health care system will be examined, including physician services, hospital and hospital systems, long-term care providers, mental health services, and pharmaceutical services. Various elements associated with the financing of health services will be examined as well as indemnity insurance, capitation, and the role of managed care and consumer driven health care in theory and practice. The role of government and its impact on our health care system will be explored as well.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MGT 682. Issues in Health Care Administration. 3 Credit Hours.

A seminar on current problems and issues in health care administration.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MGT 684. Analysis of Health Care Delivery and Policy. 3 Credit Hours.

This course examines theoretical and operational incentive structures which guide health care consumers, providers and health care organization toward decisions both efficient and inefficient.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

MGT 685. Economic Models in Operations and Supply Chain Management. 3 Credit Hours.

In this course we will study the academic literature that is based on analytical models of supply chain and channel management. In particular we will be concerned with models that capture the economics that govern the interaction among the firms in a supply chain/distribution channel. Since this topic is of interest to both the marketing and operations management communities, we will draw upon readings from both areas. One of our objectives will be to identify opportunities for building bridges between these two bodies of knowledge.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 686. Optimization Models for Operations and Supply Chain Management. 3 Credit Hours.

This course is designed primarily for advanced graduate students who are interested in research on supply chain and operations management, focusing on the study of (deterministic) optimization models to support system design, planning, and operational decisions. The course complements other related doctoral courses such as those on economic models for supply chain and operations management.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MGT 687. Health Care Organization, Economics, and Ethics. 3 Credit Hours.

Course provides the student insight into organizational and behavioral aspects of the various sectors and agents within the health care industry and understanding of how such aspects in turn affect performance measured in terms of both economic and ethical criteria.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MGT 688. Individual and Interpersonal Processes. 3 Credit Hours.

Basic Overview of many topics relevant to studying individuals and dyads in organizations. Course will introduce students to a variety of topics related to individual and interpersonal differences, processes, and behaviors in organizations. Students will begin to see how to link research designs with a theoretical framework for empirical testing.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MGT 689. Doctoral Seminar in Leadership and Group Processes. 3 Credit Hours.

This seminar examines the theory and research that focuses individual leadership and examines implications for individual and group behaviors as well as bridging the micro-macro divide. You will perform a critical in-depth examination of the primary research literature, focusing on appropriateness of design, analysis, interpretation, contribution and future research directions.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MGT 690. Sustainable Business Operations: Value Creation and Environmental Considerations. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MGT 691. International Management. 2 Credit Hours.

Course is designed to provide an overview of management problems and issues for organizations and executives operating internationally. Students learn how multinational enterprises are different, why they behave as they do, and how to apply management principles to problem-solving in such contexts.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 692. Theories in Management and Organization. 3 Credit Hours.

This course provides an in-depth review of major theories in the broad field of management and organization. It covers a multitude of management and organization theories that are derived not only from general management but from economics, sociology, ecology, and the like. The course will use several techniques, including lectures, article presentations and discussions, theory development, research project, and manuscript preparation. By the end of the term, students are expected to understand the central notions of each theory being discussed, comment on various arguments in these theories, improve the skills in applying these theories to their specific research questions, and sharpen their ability to develop theoretical models.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

MGT 693. Theories and Research in Global Strategic Management.. 3 Credit Hours.

This course is designed to provide doctoral students an in-depth review of major theories, paradigms, and perspectives in global strategy and international business. We'll also explore how to apply existing theories and perspectives to new contextual settings, such as emerging markets and outsourcing. Furthermore, we'll do all this while reading and critiquing the major branches and works within the strategic management and international business literature. The course is intended for doctoral students in business or related fields. There are no formal prerequisites for the course although some basic knowledge of global business is expected.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 694. Ph.D Seminar in Strategic Management. 3 Credit Hours.

This course is designed to provide doctoral students an in-depth review of major theories, perspectives, and methods in strategic management. The course is intended for doctoral students in business or related fields.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MGT 695. Ph.D. Seminar in Emerging Market Research. 3 Credit Hours.

This course is designed to provide doctoral students an in-depth review and study of major theories, perspectives, methods, findings, and future research issues in business and management involving emerging economies. It encompasses both macro- (e.g., strategic management, international business, entrepreneurship) and micro- (e.g., culture, human resources management, leadership, and organizational behavior) levels.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

MGT 698. Selected Topics. 1-6 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MGT 699. Directed Study. 6.00 Credit Hours.

Individually supervised research project in selected field of management. Approval of supervising professor of the topic/scope of work/evaluation is required prior to registration.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 825. Comprehensive Test Preparation. 1-3 Credit Hours.

Doctoral students who are preparing for their qualifying examinations may use this course designation. Enrolled students must develop, with the approval of their advisor, a "Plan of Study" for these credits.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

MGT 830. Doctoral Dissertation. 1-12 Credit Hours.

Course is required of all candidates for the Ph.D. The student enrolls for credit as determined by his/her advisor.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Management Science (MAS)

MAS 105. Quantitative Methods in Business I. 3 Credit Hours.

This course provides a background in algebra, linear equations, matrices, quadratic, exponential, and logarithmic functions appropriate for the successful understanding, interpretation, and use of these concepts and their application to business and economics within the Business School curriculum and in career endeavors. The course also provides an introduction to the mathematics of finance, interest rates, discounting of future returns, and linear programming.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MAS 110. Quantitative Applications in Business. 3 Credit Hours.

Review of algebra emphasizing its application to supply and demand functions, market equilibrium, compound interest, and amortization. Differential calculus emphasizing its applications to marginal cost and revenue functions, maximization, taxation in competitive markets, and elasticity of demand are discussed. The application of integral calculus to total cost and profit of demand, to total cost and profit functions, consumer's and producer's surplus, computation of present value, and constrained optimization using partial differentiation are also included.

Requisite: Bus Schl and Prerequisite: ALEKS score ≥ 76 , or SAT MATH score ≥ 700 , or SAT Math Section Score ≥ 730 , or ACT Math score ≥ 31 , or score of 4 AP Calculus (AB), or score of 3 in AP Calculus (BC) or MTH 108, or MTH 107 with a grade of C- or higher.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MAS 201. Introduction to Business Statistics. 3 Credit Hours.

Data analysis and presentation, cross tabulations, descriptive statistical measures, probability, sampling, statistical inference, hypothesis testing for one and two populations, covariance and correlation analysis. Utilization of microcomputer statistical packages is also included.

Prerequisites: MAS 110 or MTH 130 or MTH 141 or MTH 151 or MTH 161 or MTH 171.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MAS 202. Intermediate Business Statistics. 3 Credit Hours.

Chi-squared goodness of fit tests, and contingency tables, analysis of variance, simple linear regression, multiple regression, time series, forecasting, statistical methods of quality. Utilization of microcomputer statistical packages, case analyses, and presentations are also included.

Prerequisite: MAS 201 or MAS 311 or MTH 224 or IEN 311 or PSY 291 or PSY 292.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MAS 311. Applied Probability and Statistics. 3 Credit Hours.

Descriptive statistics, basic probability, probability distributions, distribution theory, point and interval estimation, and single sample hypothesis testing.

Prerequisite: MTH 162 or MTH 172. Or Corequisites: MTH 162 or MTH 172 including equivalents.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MAS 312. Statistical Methods and Quality Control. 3 Credit Hours.

Two sample hypothesis testing, simple and multiple regression, analysis of variance, design of experiments, and statistical quality control.

Prerequisites: MAS 311 or IEN 311 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MAS 332. Data Acquisition, Preparation and Visualization. 3 Credit Hours.

This course provides an in depth view of working with data to extract and present valuable information. Students will learn to collect, clean, manipulate, analyze, and visualize data from various sources correctly and efficiently. Through hands-on application, students will gain an understanding of what problems can occur when dealing with a variety of data and what solutions exist. Computing is a major component of this course, and students will learn a number of in-demand technical skills.

Prerequisite: MAS 202 or MAS 312 or IEN 312 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAS 342. Introduction to Optimization and Decision Making. 3 Credit Hours.

Introduction to deterministic mathematical models with applications to business problems. Topics include the methodology of operations research, linear, integer, and dynamic programming, project management, networks, multi-objective optimization and heuristics. Software packages are used for programming applications. Lecture, 3 hours.

Prerequisite: MTH 162 or MTH 172 AND MAS 201 or MAS 311.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAS 432. Data Analysis. 3 Credit Hours.

This course introduces students to the analysis of various data types, with an emphasis on interpreting and communicating result. The course begins with linear regression modeling of normally distributed outcomes, and extends the concepts to other important data types frequently encountered in practice. Students will gain a firm understanding of a wide range of statistical models, when each is appropriate, and how to implement, interpret, and communicate results.

Prerequisite: MAS 202 or MAS 312 or IEN 312 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MAS 442. Stochastic Models in Operations Research. 3 Credit Hours.

Introduction to probabilistic models and their applications. Topics include inventory theory, stochastic processes (queuing systems, Markov chains), and computer simulation. Lecture, 3 hours.

Prerequisite: MAS 311 or IEN 311 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MAS 496. Directed Studies in Business Analytics. 1-3 Credit Hours.

Supervised readings, individual research project, or independent investigation of selected non-STEM related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MAS 497. Directed Studies in Business Analytics. 1-3 Credit Hours.

Supervised readings, individual research project or independent investigation of selected STEM-related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MAS 498. Special Topics in Business Analytics. 3 Credit Hours.

Special topics in selected non-STEM areas of Business Analytics.

Requisite: Sophomore Standing or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MAS 499. Special Topics in Business Analytics. 3 Credit Hours.

Special topics in selected STEM areas of Business Analytics.

Requisite: Sophomore Standing or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MAS 547. Computer Simulation Systems. 3 Credit Hours.

Introduction to discrete-event computer simulation and hands-on development of simulation models. Topics include introduction to queuing theory, input and output analysis, random number generation, and variance reduction techniques. Students practice their modeling skills using commercial state-of-the-art simulation software. Assigned readings of real-life simulation projects complement the material learned in the classroom. Lecture, 3 hours.

Prerequisite: MAS 311 or IEN 311 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAS 548. Data Mining and Knowledge Acquisition. 3 Credit Hours.

This course provides an introduction to the principles and techniques of data mining. Topics covered include the data mining process, data preprocessing, data mining techniques and data mining evaluation. The course will involve a combination of lectures, labs, projects and case studies.

Prerequisite: MAS 312 or IEN 312 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MAS 550. Management Science Internship. 1-3 Credit Hours.

Student is individually assigned to operating business firm or other organization to gain insight into management practice in area of career interest. Periodic reports and conferences are required. Permission of department chair is required prior to registration.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MAS 555. Management Science Departmental Honors Research Project.. 3 Credit Hours.

Research project to fulfill requirements for Departmental Honors in Management Science.

Components: THI.

Grading: SUS.

Typically Offered: Offered by Announcement Only.

MAS 601. Applied Regression Analysis. 3 Credit Hours.

Theory and practical application of regression modeling and analysis. Understanding the role and responsibility of a statistician is also included.

Prerequisite: MAS 631.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAS 610. Statistical Analysis for Managerial Decision Making. 3 Credit Hours.

Data analysis, probability concepts, distributions, sampling, estimation, hypothesis testing, simple and multiple regression and correlation analysis.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MAS 611. Principles of Quality Management. 3 Credit Hours.

The definition of quality management, its history, and comparison of various schools of thought. An introduction to the theories of systems, variation, knowledge, and psychology as they relate to quality management. Deming's fourteen points for management are studied through examples and cases.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAS 612. Advanced Quantitative Analysis. 3 Credit Hours.

The application of probability theory to the formulation and analysis of mathematical models for decision making. Applications are taken from inventory control, forecasting, waiting lines, quality control, production, and operations management.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MAS 627. Programming for Data Analytics. 2-3 Credit Hours.

This course will provide an introduction to various programming languages useful in data analytics. Topics covered will include cleaning, manipulating, exploring and visualizing data, as well as communicating results and reproducibility. While this course will cover wide range of topics in detail, students are not expected to have prior experience with any languages covered throughout the course.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MAS 628. Introduction to Accounting Analytics. 3 Credit Hours.

This course introduces students to applications of data analytics techniques in accounting which includes: financial reporting, managerial accounting, taxation, and auditing.

Prerequisite: ACC 301. And ACC 402. And ACC 403.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MAS 629. SAS Programming for Business Analytics. 2 Credit Hours.

SAS (Statistical Analysis System) is considered a world leader in business analytics software. This course provides the student with the tools necessary to program in SAS at an intermediate level necessary for data scientists in many Fortune 500 companies in the pharmaceutical, financial, manufacturing and health care industries. The course begins with an introduction to Base SAS software, including the reading, manipulation and transformation of data. Techniques for restructuring data files, merging and concatenating data sets, creating summary reports as well as the utilization of basic statistical procedures will comprise the first half of the course. The middle of the course will focus on intermediate SAS skills for Data Management. The topics include error checking, report generation, date and time processing, PROC SQL, SAS Graph, SAS Macros, and the ODS (Output Delivery System) for production quality output. The last third of the course will include SAS statistical procedures most often utilized by data analysts and covered in the SAS Certified Statistical Business Analyst Credential.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MAS 630. Quality Management in Practice. 3 Credit Hours.

This course presents administrative systems necessary for an organization or an individual to pursue quality management. The course presents a functional model for quality management.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAS 631. Statistics for Managerial Decision Making. 2 Credit Hours.

This course aims to familiarize the student with statistical theory, tools, and methods required for business systems analysis and improvement.

Topics include descriptive methods, elementary probability, random variables and the distributions, hypothesis testing, confidence intervals, statistical modeling, and regression.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAS 632. Management Science Models for Decision Making. 2 Credit Hours.

This course aims to familiarize the student with Management Science tools for business systems analysis and improvement. The coverage includes linear and integer programming models, project management, simulation, queuing, and decision analysis. Some widely used software are illustrated through examples and case studies derived from business applications.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MAS 633. Introduction to Quality Management. 2 Credit Hours.

Introduction to the major elements of Dr. Deming's theory of management, including Dr. Deming's System of Profound Knowledge and Fourteen Points for Management. Additionally, participants are introduced to "Six Sigma" tools and methods. These tools and methods have been adopted with great success by many of the largest organizations in the world, for example, General Electric, Allied Signal, Dupont, American Express, and J.P. Morgan. Additionally, the course is a prerequisite for the "Six Sigma" Green Belt certification examination.

Requisite: Master of Science in Business Analytic Students Only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAS 634. Administrative Systems for Quality Management. 2 Credit Hours.

This course presents a model to pursue quality management (QM). It features administrative systems and structures necessary for Quality Management. The administrative systems and structures presented in this course are required to sit for the Six Sigma Management "Green Belt" certification examination.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAS 635. Design of Experiments. 2 Credit Hours.

This course presents tools and methodology useful in conducting experiments that provide valid answers to questions of interest to the experimenter. The course discusses an overall approach to obtaining and analyzing experimental data, the advantages of using structured multi factor experiments to screen for important factors, ways of minimizing the amount of data points needed to obtain desired information, and how to identify values of experimental factors that optimize the value of measured responses. Factorial designs, fractional factorial designs, screening designs, and response surface designs are presented. Emphasis is placed on the knowledge required for proper application of these methods through many examples in business and quality management.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAS 636. Statistical Process Control and Reliability. 2 Credit Hours.

This course aims to introduce some fundamental concepts of statistical process control and reliability with an emphasis on business applications. The first part of the course focuses on control charts and other tools that are used to monitor and improve business processes. The second part of the course introduces some basic ideas of reliability models and presents methods used in identifying failure modes in products and in business systems.

Prerequisite: MAS 631.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAS 637. Applied Regression Analysis and Forecasting. 2 Credit Hours.

This course aims to familiarize the student with statistical prediction. It covers simple and multiple regression methods as well as time series and forecasting models in business. Instead of theoretical development, the course emphasizes the application of these methods in business systems analysis and improvement.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAS 638. Management Science Consulting. 2 Credit Hours.

The purpose of this course is to enhance students' consulting skills in management science. In addition to skills of modeling and choosing appropriate tools for analysis, these include the communication skills of presenting quantitative and analytical material in business settings. The course is structured around a set of case studies that are based on real applications of management science models and methods discussed in MAS 631 and MAS 632.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MAS 639. Data Acquisition, Preparation, and Visualization. 2 Credit Hours.

This course teaches using statistical computing software to get a better understanding of what problems can occur (and what solutions exist) when dealing with a variety of data types and sources. It will also discuss how to address data visualization and how to leverage current methods and software to best communicate with results and decision with stakeholders.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MAS 640. Applied Time Series Analysis and Forecasting. 2 Credit Hours.

Time series data occur when a single experimental unit or process is observed repeatedly over time. Data of this type are common in finance and economics. Statistical methods that assume independence are inappropriate for time series data. This course will provide the students with the basic theory and tools for the statistical analysis and interpretation of time series data. Broadly, the methods may be categorized into time-domain and frequency-domain methods. Time-domain methods develop explicit models for the evolution of a process over time. Frequency-domain methods equivalently model the correlation structure of the time series. Other topics include methods for model-based estimation, model selection, diagnostics, forecasting, and computing as they relate to time series analysis.

Prerequisites: MAS 637 or MAS 601.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MAS 641. Operations Research Models in Management. 3 Credit Hours.

The application of Operations Research techniques in Management. Topics include linear programming, PERT/CPM, queuing theory, forecasting, inventory models, statistical quality control, decision theory, and Simulation.

Prerequisites: MAS 631 and MAS 632, and MAS 637, and MAS 639.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MAS 642. Supply Chain Analytics. 2-3 Credit Hours.

This course studies key decision areas in supply chain design and operation. Students will learn what data are needed and how to use data to measure supply chain performance. They will also learn to apply various tools and methods to analyze trends, extract knowledge and business intelligence, and make decisions. Through the analysis and discussion of case studies, they will get useful insights on how to optimize the value of supply chain processes and operations, to streamline the goals and to design flexible supply chains.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MAS 646. Generalized Linear Models. 2 Credit Hours.

This is a second course in regression modeling, extending the concept of linear regression for use with non-normal data such as binary, count, or time-to-event data. We will discuss estimation, inference, and model diagnostics with an emphasis on using statistical software to fit models and interpret the results. Topics covered include logistic regression for binary data, various extensions of logistic regression to multinomial data, Poisson regression for count data, and proportional hazards regression for time-to-event or survival data.

Prerequisite: MAS 601. Or MAS 637. With a Grade B or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MAS 647. Computer Simulation Systems. 3 Credit Hours.

Introduction to discrete-event computer simulation and hands-on development of simulation models. Topics include introduction to queuing theory, input and output analysis, random number generation, and variance reduction techniques. Students practice their modeling skills using commercial state-of-the-art simulation software. Assigned readings of real-life simulation projects complement the material learned in the classroom. Lecture, 3 hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAS 648. Data Mining. 2 Credit Hours.

Data Mining encompasses finding meaningful and useful trends in data. The meaningful part depends on the application and even the specific data set you are using. Another definition that can be used is that data mining is the application of statistical machine learning techniques to find these trends. Our focus in this course will be on the development and use of traditional and cutting edge data mining/machine learning techniques and their applications across a spectrum of data sets. The topics we will cover are in supervised learning (regression, classification), unsupervised learning (clustering, principal components analysis, factor analysis, etc), and if time permits semi-supervised learning and recommendation systems.

Prerequisite: MAS 601. Or MAS 637. With a Grade B or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MAS 649. Big Data Analytics. 2 Credit Hours.

As firms have the ability to access and store large amounts of customer and business data, they are faced with the complexities associated with Big Data. Big Data refers to very large data sets that can be analyzed to reveal important patterns, trends, and associations, especially relating to customer behaviors and business processes. This class will discuss the changes that are needed when handling, visualizing, and/or analyzing Big Data to solve business critical questions.

Prerequisite: MAS 601. Or MAS 637. And MAS 639. with a Grade B or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MAS 650. Management Science Internship. 1-3 Credit Hours.

Student is individually assigned to operating business firm or other organization to gain insight into management practice in area of career interest. Periodic reports and conferences are required. Permission of department chair is required prior to registration.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MAS 651. Machine Learning for Data Analytics. 2 Credit Hours.

This course aims to introduce recent advanced analytical techniques developed from the Statistical, Data Mining and Machine Learning communities. These techniques have become widely used by Business Analysts and Data Scientists to address complex decision-making problems in numerous industries. This course is designed to provide students with a practical understanding of some of the most powerful Machine Learning methods used by today's Data Analysts. Specifically, students will become familiar with supervised and unsupervised learning and apply these techniques to the numerous data-driven applications in predictive analytics.

Prerequisite: MAS 648. with a Grade B or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MAS 663. Project Management and Modeling. 2 Credit Hours.

This course considers the various methods, techniques, and software tools of project management and modeling with special emphasis on real estate projects and development. Topics include: project selection and strategy, risk assessment, conflict and negotiation, budgets, costs, and resource allocation, monitoring and information systems, project control and auditing, and project closure. The course is designed to show the integration of the various roles of owners, developers, builders, architects, and engineers in the project management process.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MAS 680. Spatial Statistics. 3 Credit Hours.

Prerequisite: ECO 520.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MAS 681. Statistical Machine Learning. 3 Credit Hours.

This course introduces statistical aspects of machine learning algorithms. The focus is on characterizing the generalization ability of machine learning algorithms in order to quantify their performance on new data. It covers fundamental techniques in statistical theoretical analysis, their applications in supervised and unsupervised learning algorithms, and their applications in statistical and computational tradeoffs in non-convex optimizations.

Prerequisite: ECO 520. And ECO 620. Or MAS 601. with a Grade B or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MAS 691. Topics in Management Science. 1-3 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MAS 692. Topics in Management Science. 1-3 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MAS 693. Directed Study in Operations Research. 1-3 Credit Hours.

Investigation and research in special areas of interest. Offered by special arrangement.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MAS 695. Directed Study in Operations Research. 1-3 Credit Hours.

Investigation and research in special areas of interest. Offered by special arrangement.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MAS 696. Directed Study in Statistics. 1-3 Credit Hours.

Investigation and research in special areas of interest. Offered by special arrangement.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MAS 699. Directed Study. 1-3 Credit Hours.

Offered by special arrangement.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MAS 720. Research in Residence. 0 Credit Hours.

Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in MAS 710 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MAS 725. Continuous Registration--Master's Study. 0 Credit Hours.

To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MAS 810. Master's Thesis. 1-6 Credit Hours.

The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: LEC.

Grading: SUS.

Typically Offered: Offered by Announcement Only.

MAS 830. Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of MAS 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.

Components: LEC.

Grading: SUS.

Typically Offered: Offered by Announcement Only.

MAS 850. Research in Residence. 0 Credit Hours.

Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: LEC.

Grading: SUS.

Typically Offered: Offered by Announcement Only.

Marine Geology and Geophysics (MGG)

MGG 686. Special Topics. 1-4 Credit Hours.

Lectures, research projects or directed readings in special topics related to Marine Geology and Geophysics.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

Marine Science (MSC)

MSC 101. Survey of Oceanography. 3 Credit Hours.

Introduction to the oceans and their significance to mankind, encompassing geological, physical, chemical, and biological processes; man's role in and on the sea, including fisheries, pollution, and ocean management. Not for major or minor.

NOT FOR ANY MSC STUDENT MAJOR OR MINOR.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MSC 102. Introduction to Weather and Climate. 3 Credit Hours.

The structure, physics, dynamics and thermodynamics of the atmosphere. Weather, weather forecasting, climate and climate change. Not for major or minor.

NOT FOR ANY MSC STUDENT MAJOR OR MINOR.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MSC 103. Survey of Modern Meteorology. 3 Credit Hours.

Dynamics and thermodynamics of the atmosphere as they relate to contemporary issues in meteorology. Overview of numerical weather prediction techniques and new technologies for monitoring weather and climate. Open to majors or minors with permission of instructor.

Pre/Corequisite: MTH 108. Or MTH 113. Or MTH 140. Or MTH 141. Or MTH 161. Or MTH 171.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MSC 104. Molecules of Life. 3 Credit Hours.

Molecules of Life explores the modern science of biological molecules, which occurs at the intersection of chemistry, biology, and medicine. We examine the major molecular components of the cell—proteins, nucleic acids, lipids, etc.—and illustrate the role of chemical principles in understanding their structure and function. Not for major or minor.

NOT FOR ANY MSC STUDENT MAJOR OR MINOR.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MSC 107. Life in the Sea. 3 Credit Hours.

Lectures provide an introduction to the plants and animals of the sea, including plankton, nekton and the benthos, with anthropogenic impacts. Not for major or minors.

NOT FOR ANY MSC STUDENT MAJOR OR MINOR.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MSC 108. Environmental Oceanography. 3 Credit Hours.

This course will focus on environmental issues facing the oceans today, including global climate destabilization, the impact of population growth on coastal environments, marine pollution, and the state of marine fisheries. An active learning approach will be adopted, with emphasis on case studies and critical analysis. Marine environmental issues will be presented in self-contained analytical exercises. Basic math needed to quantify environmental issues will be introduced. Information and questions on sustainability will be integrated throughout the course and students will be asked to think critically about these pressing concerns. Not for major or minor.

NOT FOR ANY MSC STUDENT MAJOR OR MINOR.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MSC 111. Introduction to Marine Science. 3 Credit Hours.

Geological, physical, chemical and biological processes of the world's oceans. The role of the oceans in global dynamics and man's role in and on the sea, including fisheries, pollution and ocean management. Enrollment limited to Marine Science/Marine Affairs majors and minors. Lecture and discussion, 3 hours. Field trips.

Requisite: Marine Science Major or Minor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MSC 112. Introduction to Marine Science Lab. 1 Credit Hour.

Laboratory and field exercises to accompany Marine Science.

Pre/Corequisite: MSC 111. And Marine Science Major or Minor.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

MSC 115. Tropical Marine Biology. 3 Credit Hours.

A field and lecture study of selected marine environments around South Florida, with emphasis on the interaction between organisms and the geological, physical, and chemical environment. Summer Scholars Program Only.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

MSC 121. Ocean Currents. 3 Credit Hours.

Ocean Currents will be a comprehensive, multi-disciplinary course on the history, geography, socio-economics, and physics of ocean currents. The importance of ocean currents to socioeconomics, weather, climate, transport of fish larvae and pollutants, distribution of plankton and fish, military operations, and shipping will be illustrated using many examples. The history of ocean current observations, detailed maps of ocean circulation and its variability, and the evolution of instruments, and theories from ancient to modern times will be detailed. The discovery and the most important observations of the major ocean currents will be discussed. There will be also lectures on modern ocean circulation theory. NON-MSC MAJORS ONLY

For non- MSC majors.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MSC 172. Special Topics in Marine Science. 2-6 Credit Hours.

Content varies by semester and is indicated in parentheses following course number and title in class schedule.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MSC 180. Seminar in Marine Science. 1 Credit Hour.

Seminar in current research as conducted by Marine Science faculty and graduate students. This course is intended as an introduction for first year students to contemporary research topics.

Prerequisite: MSC 111.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MSC 190. Studies in Marine Science. 1-5 Credit Hours.

For transfer courses taken at other institutions that have no direct equivalents at UM

Components: LEC.

Grading: GRD.

MSC 191. Studies in Marine Policy. 1-5 Credit Hours.

For transfer courses taken at other institutions that have no direct equivalents at UM.

Components: LEC.

Grading: GRD.

MSC 204. Environmental Statistics. 3 Credit Hours.

This introductory course provides an overview of parametric and nonparametric statistics with an emphasis on applications in the analysis of environmental data. (Not open to students with credit in BIL311 or equivalent).

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MSC 205. Mathematical Methods for Marine Science. 3 Credit Hours.

This course is meant to provide students with the mathematical tools required to pursue advanced topics in Marine Science. Not available for credit for students with major or minor in Mathematics.

Prerequisite: MTH 162 Or MTH 172 And MSC 111.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MSC 215. Chemical Oceanography. 3 Credit Hours.

An introduction to the chemistry of the oceans. Descriptive chemical oceanography of the components of ocean waters (metals, gases, organic compounds and nutrients). Biogeochemical cycles in oceanic systems.

Prerequisite: MSC 111 and CHM 112 or CHM 221.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MSC 216. Chemical Oceanography Laboratory. 1 Credit Hour.

Chemical and physical methods in chemical oceanography. Analytical and instrumental techniques used to determine density, salinity, chlorinity, dissolved oxygen, nutrients and components of the carbonate system. Corequisite: MSC 215.

Pre/Corequisite: MSC 215. and Prerequisite: CHM 114.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

MSC 217. Physical and Chemical Processes in Coastal Ecosystems. 3 Credit Hours.

This course is primarily intended for students enrolled in the Marine Affairs program to serve as an introduction to the role of physical and chemical processes in estuarine and coastal ecosystems in the context of the management of estuarine and coastal waters. Students will provide reviews of case studies in preparation for future management decisions that will require knowledge of coastal physical and chemical processes. Prerequisites: MSC 111 AND MSC 230.

Prerequisite: MSC 111 and MSC 230 and CHM 111 or CHM 121.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MSC 218. Biological Oceanography. 3 Credit Hours.

This course will examine energy flow in marine ecosystems, the biogeochemical cycles that control them, the wide variety of types of communities and ecosystems in different parts of the ocean, and the changes they have undergone over geological timescales.

Prerequisite: MSC 111.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MSC 220. Climate and Global Change. 3 Credit Hours.

The Earth's climate system and the role of natural and anthropogenic processes in shaping climate change.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MSC 222. The Earth's Climate: Past and Future. 3 Credit Hours.

This course will provide undergraduate students majoring in geological sciences, as well as enthusiastic non-majors, with the foundation to better understand climate change on geological to human timescales. The natural processes that control the earth's climate will be discussed, with special attention to the climate of the Holocene, and the potential influence climate may have played on human civilizations. Finally, the expected climate shifts and feedbacks will be discussed based on the outcome of climate models for the next century.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MSC 230. Introduction to Marine Biology. 3 Credit Hours.

The sea as an environment. Marine life, its special problems and adaptations. Emphasis on Caribbean organisms.

Prerequisite: BIL 150 Or BIL 160 and CHM 111.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MSC 232. Introduction to Marine Biology Laboratory. 1 Credit Hour.

Ecology, physiology, and behavior of marine organisms in south Florida marine habitats.

Pre/Corequisite: MSC 230. or BIL 230. and Prerequisite: BIL 151 or BIL 161.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

MSC 240. Introduction to Marine Geology. 3 Credit Hours.

The principal marine geological environments of the world, their substrate, their sediments, their flora and fauna, and their evolution through time.

Prerequisite: GSC 110 Or GSC 111 Or permission of instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MSC 300. Water Resources: History, Management, and Policy. 3 Credit Hours.

An overview of the issues and problems surrounding the management of aquatic resources in the broadest sense including water quality of natural waters, drinking water, water pollution, water quantity and supply issues, watershed management, wetland protection, and coastal management. We will explore the available strategies to wisely manage the various aquatic resources, policy options and their socio-economic aspects, legal frameworks, and institutional arrangements.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MSC 301. Introduction to Physical Oceanography. 3 Credit Hours.

Application of the laws of physics to the study of the properties and circulation of the world's oceans and atmosphere.

Prerequisite: MSC 111. And MTH 162. Or MTH 172.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MSC 302. Introduction to Physical Oceanography Lab. 1 Credit Hour.

Laboratory exercises and field work on basic fluid mechanics applicable to the ocean. These include buoyant convection and double diffusion, methods for measuring flows, gravity wave experiments in the lab and field, diffusion studies and rotating tank investigations as an analog for planetary flows.

Prerequisite: MSC 301 or ATM 405. Or Co-requisite: MSC 301 or ATM 405.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

MSC 310. Living Resources of the Ocean. 3 Credit Hours.

Marine fish and shellfish of major commercial and recreational value: biology, techniques of harvesting, and resource management.

Prerequisite: MSC 230.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MSC 313. Coastal Law. 3 Credit Hours.

Basic doctrines and public policy related to the use and regulation of the United States coastal zone and seabed.

Junior Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MSC 314. Ocean Law. 3 Credit Hours.

The principles of international ocean law regarding ocean management; ocean delimitation and issues of environmental ocean regulation within international legal framework.

Junior Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MSC 316. Global Primary Production. 3 Credit Hours.

Photosynthesis supports the vast majority of life on planet earth. This course reviews the magnitude and the processes that shape primary production in terrestrial, oceanic, and freshwater habitats. It includes the fate of primary production in the earth's biomes, and the role of terrestrial and aquatic productivity in regulating, and responding to, variable climate.

Prerequisite: BIL 160.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MSC 317. Earth's Biogeochemistry. 3 Credit Hours.

Outstanding features of planet Earth, including its vast oceans, climate and atmosphere, are strongly impacted by life. Scientists investigate these impacts, such as ocean acidification, variable atmospheric CO₂ concentrations, coastal anoxia, and permafrost melting, through their biogeochemical dynamics. The first part of the course covers the relevant microbial and chemical reactions that occur in the atmosphere, on land, in freshwaters and in the oceans. The second part links this mechanistic understanding to a large-scale, synthetic view of global biogeochemical cycles. These are considered in the context of global change.

Prerequisite: CHM 112.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MSC 318. Ecological Genetics. 3 Credit Hours.

This course will provide a thorough understanding of genetics (allele frequencies, heritability, recombination, QTL, the effect of migration and demography). Pre-requisites: BIL150/151 AND BIL160/161

Prerequisite: BIL 150 and BIL 160 and BIL 151 or BIL 152 or BIL 153 and BIL 161 or BIL 162.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MSC 319. Research Fundamentals. 1 Credit Hour.

Research Fundamentals will provide an introduction to academic research methods including basic laboratory techniques, data analysis, and scientific communication. Students will read the primary literature and both analyze data and communicate results using multiple formats. The course emphasizes active learning (discussions, working with peers, writing, etc.) and is directed toward early stage undergraduate students interested in pursuing research.

Prerequisite: MSC 204 Or MTH 224.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MSC 321. Scientific Programming in the Atmospheric Sciences. 3 Credit Hours.

An introduction to scientific programming in a linux environment using the FORTRAN 90/95 language with specific applications to Meteorology.

Prerequisite: CSC 120.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MSC 323. Invertebrate Zoology. 4 Credit Hours.

Biology of invertebrates, with emphasis on tropical and subtropical marine forms. Field work and combined lecture-laboratory sessions.

Prerequisite: MSC 230.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MSC 324. Biology of Fishes. 3 Credit Hours.

Selected topics on the ecology and physiology of fishes. Lectures on reproduction, respiration, osmoregulation, sense systems, hormonal control.

Prerequisite: MSC 230.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MSC 325. Biological Oceanographic Techniques. 3 Credit Hours.

Field sampling for plankton biomass and productivity; benthic biomass, and of selected physical parameters. Applications of molecular techniques and remote sensing to oceanographic problems.

Prerequisite: MSC 230.

Components: LAB.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MSC 326. Marine Genomics. 3 Credit Hours.

Intensive Lecture/laboratory course with emphasis on using genomic tools to address an independent research project of importance in the marine sciences.

Corequisite: MSC 463.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

MSC 327. Marine Animal Neurophysiology and Behavior. 3 Credit Hours.

This course will look at neural and endocrine systems in a variety of marine animal invertebrate and vertebrate models and how these systems work together to control elements of physiology, sensation and perception of the environment and behavior.

Prerequisite: BIL 230 or MSC 230, and BIL 255.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MSC 328. Introduction to Aquaculture. 3 Credit Hours.

This course will provide an introduction to the field of aquaculture, which represents one of the fastest growing industries in food production in the worlds and is a field that offers exciting job opportunities in science, business, marketing, resource management, and socioeconomics. This course will provide students with a sound background in aquaculture prior to engaging in higher-level courses in this field.

Prerequisites: MSC 111 and MSC 230 or Co-requisite: MSC 230.

Components: LEC.

Grading: GRD.

MSC 329. Marine Vertebrate Zoology. 3 Credit Hours.

The course will be a comprehensive examination of the form and function of the vertebrate lineage of marine animals from early chordates to the evolution of cartilaginous and bony fish and the emergence of tetrapods, those that evolved from marine ancestors and have since returned to the seas. A comparative point of view will be used to assess the anatomy and physiology of each taxonomic group as well as behavioral and ecological adaptations related to their life history. Specifically, the course will cover the emergence of the vertebrate body plan and the evolution of fish from agnathans through modern teleosts, as well as the tetrapod lineage of marine reptiles, marine birds, and marine mammals. We will examine critical points in vertebrate evolution where genome-wide duplication events occurred as well as instances of convergent evolution in various lineages.

Prerequisite: MSC 230.

Components: LEC.

Grading: GRD.

MSC 333. Ocean Human Health. 3 Credit Hours.

The focus of this course is on the present, future, and potential effects of oceanic processes and marine organisms on human health and wellbeing and on human impacts on the marine environment.

Prerequisite: MSC 230. Or BIL 230.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MSC 340. Ocean Policy. 3 Credit Hours.

Analysis of ocean policy issues in US fisheries, marine conservation and marine protected areas, marine pollution, coastal management and regulation of offshore oil and gas activities.

Prerequisite: MSC 111 and MSC 313 Or MSC 314 and Junior Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MSC 341. Sunken Ships and Submerged Sites: An Introduction to Underwater Archaeology. 3 Credit Hours.

The course serves to provide an overview of underwater archaeology, covering general concepts, methods, field techniques, time periods and their associated unique sites and discoveries, as well as an introduction to professional application in preservation, management, and how popular media plays a role in public education and outreach. Note: There is no SCUBA diving component to this class.

Requisite: MSC 111 AND Junior Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MSC 342. Decision Making and the Environment. 3 Credit Hours.

A basic, critical appreciation of interdisciplinary decision theory as applied to natural resources management. Specific goals include comprehension of: decision making under uncertainty, evolutionary social science, managing common pool resources, and behavioral economics.

Junior Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MSC 345. Economics of Natural Resources and the Environment. 3 Credit Hours.

A comprehensive overview of the economics of national, international, and global environmental problems. A unifying theme throughout is sustainable development defined as "maximizing the net benefits of economic development while maintaining the services and quality of natural resources over time". We will use economic reasoning to examine causes and consequences of environmental and resource problems, and measures for dealing with them.

Prerequisite: ECO 211.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MSC 346. Climate Science and Policy. 3 Credit Hours.

The scientific evidence for, and the projected consequences of, climate change. The political and geo-engineering responses to the problem.

Prerequisite: MSC 111. Or ATM 103. Or ECS 111. And Requisite: Junior Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MSC 347. Polar Science and Policy. 3 Credit Hours.

The course will address the physical, chemical, and biological properties of the polar oceans, atmosphere, and coastal regions. The interactions between ocean, ice, atmosphere, and land will be discussed in detail, not only in terms of local relationships, with cross-disciplinary linkages, but also with emphasis on the influence the Polar Regions exert on the global climate, biogeochemical cycles, ecosystems and local human populations.

Prerequisite: MSC 111 and MSC 230.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MSC 350. Survey of Marine Mammals. 3 Credit Hours.

The biology, physiology, natural history, behavior, and conservation of marine mammals.

Prerequisite: MSC 230. Or BIL 230.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MSC 351. Climate, Oceanography, and Biogeography of the Galapagos. 3 Credit Hours.

This course and its companion describe the climate, oceanography of the Galapagos Islands, and explore the ways the physical environment has influenced biodiversity on the islands. This field intensive course sequence is part of the Galapagos semester abroad program.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MSC 352. Biophysical Dynamics in the Ocean: Biogeography and Evolution of the Galapagos. 3 Credit Hours.

Course expands aspects of bio-physical description of the Galapagos in comparison with other systems. Emphasis on identification of flow regimes in various settings based on winds and buoyancy forcing and characterization of the resulting biological niches. Analysis focuses on scales and components of the resulting biogeography. Biological aspects covered include bioenergetics and reproduction in relation to their role in evolution. This field intensive course sequence is part of the Galapagos semester abroad program.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MSC 355. Limnology. 3 Credit Hours.

This course is an introduction to the physical, chemical, and biological properties of freshwater ecosystems. It is intended as an upper level course for juniors and seniors. It emphasizes the ecological process of lakes, rivers, and to less extent, streams. The role of watershed processes is considered in the context of management of rivers and estuaries. Case studies integrate the scientific understanding of freshwater ecosystem function with management decisions. Applied aspects of freshwater systems are included.

Prerequisite: MSC 230.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MSC 364. Life in Moving Fluids. 3 Credit Hours.

The physical characteristics of air and water are described in relation to various flow phenomena that play a part in life functions. Adaptations of form and function reflect the very different properties of the media (air and water) of terrestrial and aquatic life. Energy conversion and transfer limit form and function and enable a wide variety of survival strategies.

Prerequisite: MSC 230 Or BIL 360.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MSC 365. Tropical Coastal Ecosystems: Lab and Field Methods. 1 Credit Hour.

This course will provide students with the theory and application of field sampling methods used to document status and trends in the health of coral reef, seagrass, and mangrove ecosystems. Students will learn about sampling theory, sampling methods, sampling equipment, and species identifications using a combination of classroom and field activities. This 1-credit course is designed as a companion to MSC 366 where theory detailed in this class is put to practice to design and execute a targeted, small-scale sampling program for the coastal ecosystems found in South Florida. Lectures will be complemented with field activities to be carried out at sites around Key Biscayne and at the UM Broad Key station.

Pre/Corequisite: MSC 366.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

MSC 366. Tropical Coastal Ecosystems. 3 Credit Hours.

This course will provide a comprehensive background on the ecology, conservation, and restoration of the three main tropical coastal ecosystems: Mangroves, Seagrasses, and Coral Reefs. The first part of the course will consist of a review of ecological theory, followed by lectures on the dynamics of the three ecosystems, including diversity, community structure, stress ecology, management tools, and novel restoration paradigms. Classes will be complemented by student presentations, in-class activities, and media-outreach projects. Readings for this class will include a required textbook and papers from the primary literature. Grades will be based on exams, quizzes, in-class projects, and student presentations.

Prerequisite: MSC 230. Or BIL 230.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MSC 370. Current Research in Marine Biology: Seminars and Discussion. 2 Credit Hours.

These discussions and seminars comprising a 2 cr course provide well-prepared undergraduate students interested in marine research with an introduction to graduate student-presented science in the specialization of marine biology.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MSC 371. Readings in Marine Science. 1-3 Credit Hours.

Library research with faculty supervision. Bibliography to be submitted in preparation for laboratory and/or field research project. (No more than 6 credits in total from MSC371, MSC411, and MSC412 can be counted towards the MSC major or minor requirements.)

Permission of Instructor.

Components: DIS.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MSC 372. Special Topics in Marine Science. 1-6 Credit Hours.

Content varies by semester and is indicated in parentheses following course number and title in class schedule.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MSC 373. Writing the GRFP and Graduate School Applications. 1 Credit Hour.

Writing the GRFP (graduate research fellow proposal) and Graduate School Applications is a practical course for undergraduate students interested in applying to graduate school next year or in the future. We will review NSF guidelines for the GRFP and both discuss and implement the steps for this proposal and graduate school applications. Basic tips on writing will be covered. Students will write a two page research statement and three page personal statement for the GRFP and then will modify these statements to use in graduate school applications. Students will be involved in reading and providing constructive criticisms to their fellow classmates. (No more than 3 credits in total from MSC370-level courses can be counted towards the MSC major or minor requirements.)

Requisite: Junior or Senior Standing.

Components: DIS.

Grading: SUS.

Typically Offered: Fall.

MSC 380. Field Studies in Marine and Aquatic Science. 1-4 Credit Hours.

Field course to selected marine, estuarine and/or aquatic sites in the United States and abroad. Travel fee may be required.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MSC 381. Marine Field Ornithology. 1-4 Credit Hours.

Waterbirds such as seabirds, shorebirds, and wading birds are key components of the marine ecosystem, including pelagic, coastal, and estuarine communities. As ecological indicators waterbird abundance provides a proxy for the health of these environments. Waterbirds have also served as important model systems for studies of behavior, evolutionary biology, and ecological theory. This course will provide an introduction to waterbird biology and conservation, including a variety of different field trips to waterbird communities.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MSC 390. Advanced Studies in Marine Science. 1-5 Credit Hours.

For transfer courses taken at other institutions that have no direct equivalents at UM.

Components: LEC.

Grading: GRD.

MSC 391. Advanced Studies in Marine Policy. 1-5 Credit Hours.

For transfer courses taken at other institutions that have no direct equivalents at UM.

Components: LEC.

Grading: GRD.

MSC 403. Marine Environmental Toxicology. 3 Credit Hours.

This course will provide an introduction to the principles of environmental toxicology with an emphasis on marine ecosystems, considering a variety of different classes of toxicants, how they can impact marine organisms, the scientific methods used to assess impacts, and the regulatory frameworks used to monitor and manage their release to the environment.

Prerequisite: BIL 255. And CHM 112.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MSC 404. Marine Organismal and Environmental Health. 1 Credit Hour.

This 1-credit course will complement salt water semester courses. (Must have taken MSC403 or MSC333 and either MSC466 or MSC326 and MSC463). Students will be required to collect and analyze samples, interpret their findings and present them in a formal laboratory report due two weeks after the trip. Students will also be required to give a presentation they have prepared before the trip and attend two seminars on Marine Organismal and Environmental Health topics.

Pre/Corequisite: MSC 403 or MSC 333 or MSC 466 or MSC 326 and MSC 463.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

MSC 410. Marine Conservation Science. 3 Credit Hours.

Nature of marine biodiversity, what threatens it, and what can be done to recover the biological integrity of estuaries, coastal seas, and oceans. Topics include: distinctive aspects of marine populations and ecosystems; threats to marine biological diversity, singly and in combination; place-based management of marine ecosystems; and the human dimensions of marine conservation.

Junior Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MSC 411. Projects in Marine Science. 1-3 Credit Hours.

Individual, independent research projects with faculty supervision. A formal written report is required. (No more than 6 credits in total from MSC371, MSC411, and MSC412 can be counted towards the MSC major or minor requirements.)

Requisite: Junior or Senior Standing.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

MSC 412. Undergraduate Thesis in Marine Science. 1 Credit Hour.

Students will write a formal thesis summarizing the results of independent research carried out under faculty supervision.

MSC 411 AND Senior Standing.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MSC 415. Coral Reef Science and Management. 3 Credit Hours.

The interdisciplinary nature of coral reef science and management: biological, environmental, ecological and socioeconomic aspects of coral reef science, coral reef management problems and approaches at local to global scales, and the implications of climate change for coral reef science and management.

Prerequisite: MSC 230.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MSC 417. Marine Biota and Biogeochemical Cycles. 3 Credit Hours.

The distribution of dissolved particulate materials in the sea is not uniform in time or space. Variability in these reflects the diverse biological sources, transformations, and sinks of chemical constituents in the sea. This course focuses on the role of marine organisms in marine biogeochemical cycling, with particular emphasis on the marine carbon and the nutrients. We visualize and query the ocean system using publicly available global ocean data sets and the application Ocean Data View. The material is presented as a capstone bringing together the physical, chemical and biological dynamics of the ocean as a single system.

Prerequisite: MSC 215.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MSC 418. Climate Law. 3 Credit Hours.

Climate Law evaluates the interactions between climate and the law, with an emphasis on existing laws and the gaps in current legislation related to the climate environment. The course will analyze court cases, domestic and foreign laws, treaties, and international conventions. In addition, the course will examine how climate manipulation requires an international model for the future.

Prerequisite: ATM 220 or MSC 220 and Junior Standing.

Components: LEC.

Grading: GRD.

MSC 420. Political Ecology of the Galapagos. 3 Credit Hours.

This field course in the Galapagos National Park offers a rare chance to examine the human interactions in this highly politicized landscape of conservation. Students practice the political ecology approach for doing ethnographic field work and explore how it can lead to wiser resource management. Part of UGalapagos semester.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MSC 421. Terrestrial Biology and Adaptations of the Galapagos.. 3 Credit Hours.

This course will examine the terrestrial plant and animal life of Isabela Island, discuss the biology and how it adapted to life on Isabela. Through field and laboratory exercises we will explore the power of organisms' DNA in shaping life into unique forms like those famously present in today's Galapagos. Part of UGalapagos semester.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MSC 422. Marine Ecology of the Galapagos. 3 Credit Hours.

This course focuses on marine ecosystems of the Galapagos, emphasizing near-shore environments. Topics will include how the unique location and oceanography of the Galapagos have shaped the species composition of resident and migrant marine animals. The role of genetic drift, local habitat characteristics and natural selection on marine ecosystems will be examined. This is a field intensive course with time spent in intertidal, near-shore and off-shore island environments. Part of UGalapagos semester.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MSC 423. Marine Conservation Biology and Fisheries of the Galapagos. 3 Credit Hours.

The Galápagos are located in a uniquely productive area of the sea, which has allowed the development of rich and unique marine biota. The first week of the course will carry the students through the dynamic, climatic, and oceanographic circumstances that determine the unique character of the Galapagos. The second week will cover scientific evaluation of the threats to the marine biodiversity of the Galapagos, focusing on sharks, penguins, sea turtles and other at-risk species and habitats. Part of UGalapagos semester.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MSC 424. Origin and Geology of the Galapagos Islands.. 3 Credit Hours.

This course will explore the origin and geology of volcanic oceanic islands, using the Galapagos Islands as a natural laboratory. Though all share a common origin in plate tectonic theory, each island presents a host of environments that originate in the processes of volcanic action, erosion and hydrology. Individual islands therefore develop distinctive ecosystems within which organisms interact and evolve. The emphasis of this course will be to lay out the underlying geological processes that have led to the formation of the islands and to their present state, and then to explore the ways the physical environment has influenced adaptation and biodiversity. Part of UGalapagos semester.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MSC 425. Galapagos Community-Based Research and Service. 2 Credit Hours.

Individual, civic engagement activities identified in consultation with the people, national park and local government of Puerto Villamil, Isla Isabela, as part of the marine science semester program in the Galapagos Islands. Student research and service is faculty supervised and concluded by submission of a formal written report. This course may not be counted towards the MSC elective requirement for majors or minors.

Components: PRA.

Grading: CNC.

Typically Offered: Fall & Spring.

MSC 427. Field experience in the Galapagos. 2 Credit Hours.

Three week Summer I field course explores the flora, fauna, geology, and society of the Galapagos Islands.

Prerequisite: MSC 111 or ECS 111 or Permission of Instructor.

Components: PRA.

Grading: GRD.

Typically Offered: Summer.

MSC 432. Comparative Ecology of Terrestrial and Marine Systems. 3 Credit Hours.

A comparison of various biotic and abiotic controls on terrestrial and marine ecosystems is undertaken. The course stresses proximate mechanisms and underlying evolutionary processes. Analysis methods and models of various ecosystems are compared and critiqued. Issues involved in sustainability and conservation of resources are discussed in relation to agriculture, fisheries and forestry. The importance of biodiversity and climate change in the future of ecosystems is stressed.

Prerequisite: MTH 162. And BIL 330. Or ECS 232.

Components: LEC.

Grading: GRD.

MSC 460. Spatial Applications in Marine Science. 3 Credit Hours.

The concepts and marine applications of Geographic Information Systems. Every class period will entail short class lectures and hands on computer based GIS exercise on marine science related issues. Students will learn how to use ArcGIS Desktop or Arc Pro.

Prerequisite: MSC 111 and MSC 112 and Requisite: Junior Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MSC 462. Marine Biomedicine. 3 Credit Hours.

The course will cover diverse bioactive molecules that are derived from marine sources ranging from sponges to sharks. The isolation and characterization of these compounds as well as their potential application in clinical medicine and human health will be reviewed. The class will also cover marine-derived factors used in biotechnology and marine animal models used in biomedical research with an emphasis on marine immunology.

Prerequisite: BIL 255 and CHM 112.

Components: LEC.

Grading: GRD.

MSC 463. Marine Conservation Genetics. 3 Credit Hours.

This course seeks to integrate lectures, fieldwork and laboratory genetics to enhance an understanding of biodiversity, genetic diversity, and current conservation issues.

Corequisite: MSC 326.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MSC 464. Marine Comparative Immunology Lab. 1 Credit Hour.

The laboratory course will cover immunology techniques used in the assessment of immune function and immune reactivity in diverse marine taxa from sponges to fish to mammals.

Prerequisite or Co-requisite: MSC 465.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

MSC 465. Marine Comparative Immunology. 3 Credit Hours.

The course will cover immune function in diverse marine taxa from sponges to fish and the evolution of innate and adaptive immune mechanisms from a comparative point of view, with an emphasis on shark and fish immunology. Adaptations related to living in a microbe-rich marine environment will be highlighted. Potential applications of research findings will be addressed with respect to conservation and aquaculture. The role of invertebrate and vertebrate models in the study of the evolution of the immune system and applications for human health and medicine will be discussed.

Prerequisite: BIL 255.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MSC 466. Environmental Physiology: Oxygen, Water, and Ionoregulatory Stress. 3 Credit Hours.

This is an intensive laboratory course that combines and elaborates on concepts learned in BIL 360. Topics will include homeostasis, interactions with the external environment, and life with limited oxygen and water. Lectures will be highly discussion-based; students will be expected to read primary research articles as suggested by the professor before lecture to foster participation in those discussions and form hypotheses about accompanying laboratory. Each lab will be written up as a formal laboratory report (i.e., Introduction, Materials and Methods, Results and Discussion).

Prerequisite: BIL 255.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

Marketing (MKT)

MKT 201. Foundations of Marketing. 3 Credit Hours.

Understanding and satisfying consumer need through product planning, pricing, promotion, and distribution. Students identify and analyze marketing problems. Discovery and application of marketing skills are developed by marketing planning assignments, computer simulations, and case analysis. Freshman or Sophomore AND Business School.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MKT 301. Marketing Foundations. 3 Credit Hours.

Understanding and satisfying consumer needs through product planning, pricing, promotion, and distribution. Students identify and analyze marketing problems. Discovery and application of marketing skills are developed by marketing planning assignments, computer simulation, and case analysis. Requisite: Sophomore Standing or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MKT 302. Marketing Research and Market Analysis. 3 Credit Hours.

Examination of the process, role, and function of marketing research, including research problem formation, research methods and procedures, data acquisition, sampling theory and practice, data analysis, presentation of results, ethical issues, and application for each of the above.

Prerequisite: MKT 201 or MKT 301 and MAS 202 or MAS 312 and Requisite: Business School.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MKT 310. Consumer Behavior and Marketing Strategy. 3 Credit Hours.

The study of behavioral science research findings, principles, and theories, especially those from psychology and sociology, as they relate to the determinants of consumer buying behavior. The case approach is utilized to stimulate the development of creative marketing strategy.

Prerequisite: MKT 201 or MKT 301.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MKT 320. Retailing. 3 Credit Hours.

Retail store management, location, buying, merchandise control, policies, services, pricing, expenses, profits, training and supervision of retail sales force, and administrative problems are discussed.

Prerequisite: MKT 201 or MKT 301.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MKT 340. Professional Selling. 3 Credit Hours.

Nature of the professional selling function and its relationship and contribution to the marketing strategy of organizations. Special emphasis is placed on broadly applicable principles and effective personal communication skills during the sales process.

Prerequisite: MKT 201 or MKT 301.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MKT 350. Luxury Marketing. 3 Credit Hours.

The course will develop a framework for understanding the essential elements of effective marketing of luxury brands, a 1.36 Trillion dollars market worldwide in 2017 (Bain & Company). Through cases, business visits, and experiential projects the students will distinguish the unique nature of luxury, understand the opportunities and challenges confronted by luxury marketers and apply proven strategies. Students will also work on an actual project created exclusively for the class exposing them to internship opportunities in the luxury market sector.

Prerequisite: MKT 201 or MKT 301.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MKT 360. International Marketing. 3 Credit Hours.

The major current factors affecting international marketing. Course is designed to acquaint students with the growing importance of world marketing in the U.S. and the strategic issues involved.

Prerequisite: MKT 201 or MKT 301.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MKT 380. New Product Development. 3 Credit Hours.

This course enables students to appreciate the systematic approach that goes into the creation and marketing of new products. Practical aspects of developing and marketing new products are inculcated through two assignments and one class project.

Prerequisite: MKT 201 or MKT 301.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MKT 385. Marketing for Entrepreneurs. 3 Credit Hours.

This course is focused on the study and practice of marketing all aspects of an entrepreneurial venture: the new company itself as well as its products or services. Topics will include: branding, pricing and costing, buying behavior, market segmentation, channel management, as well as exploring issues such as intellectual property, customer service, corporate versus product web sites, media exposure and PR, and maintaining an integrated plan for building the venture's brand.

Prerequisite: MKT 201 or MKT 301.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MKT 386. Advertising Management. 3 Credit Hours.

In this course, students learn about the components involved in researching, planning, creating, and executing advertising strategies. The class gives students a better understanding of how advertising can be effectively used in a marketing strategy. Students also learn how advertising both influences and is influenced by cultural trends. Implications of this to both marketers and society as a whole are discussed.

Prerequisite: MKT 201 or MKT 301.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MKT 387. Digital Marketing. 3 Credit Hours.

This course will introduce students to the principles of digital marketing from both perspectives of theory and practice. On the theory side, students will learn foundations and recent research and development of digital marketing. Main contemporary digital marketing issues will be extensively discussed in class, including search engine optimization, search engine marketing, online advertising, web analytics, email marketing, social media marketing, and reputation management. Students will also learn how to form an appropriate strategy for a digital marketing campaign and use quantitative skills to analyze the effectiveness of such a campaign. On the practice side, students will collaborate in teams and participate in applied learning exercises. Students will grasp critical concepts of search engine optimization by working with a local business client, laying out a suitable pre-campaign strategy, implementing and modifying the campaign in real time, and summarizing the campaign results in a meaningful and concise manner when it is over.

Prerequisite: MKT 201 or MKT 301.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MKT 388. Health Care Marketing. 3 Credit Hours.

This course is devoted to the study of healthcare marketing and the healthcare system involved with the task of marketing products and services. As healthcare reform continues to evolve current market conditions and transform existing organization into new practices, this course is focused on how managed care providers, hospitals, physicians, federal government, device and pharmaceutical companies will embrace the new patient centered market in their marketing strategies.

Prerequisite: MKT 201 or MKT 301.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MKT 389. Fundamentals of Digital Marketing Analytics. 3 Credit Hours.

This course introduces the student to the basics of evolving new media business metrics and corresponding forms of audience and competitive marketplace analysis. Students will research and evaluate business models for multiplatform new media products that use any combination of print, radio, television, internet, or mobile technologies. Product evaluations will be set within the context of comparative media economics, new media market dynamics, and advertising revenue projections. The goal will be to evaluate whether an existing or a current media product has the critical mass required for profitable advertiser metrics. Students will be exposed to developing new media usage patterns, cross platform media support strategies, new models of entertainment and news gathering, and corporate media acquisitions and mergers. Local media executives, and entrepreneurs will be invited to class to review current trends and discuss strategies for success.

Prerequisite: MKT 201 or MKT 301.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MKT 403. Marketing Management. 3 Credit Hours.

Marketing Management is a capstone course that examines new concepts and insights regarding marketing management. Through case analysis the course covers important aspects of marketing management. The students also participate in a simulation in which they manage multi-segment markets.

Prerequisite: MKT 201 or MKT 301 and FIN 302 and MKT 302 or Corequisite: MKT 302 and Business School.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MKT 469. International Marketing Management. 3 Credit Hours.

International Marketing Management is a capstone course that examines new concepts and insights regarding international marketing management. Through case analysis the course covers important aspects of international marketing management. The students also participate in a simulation in which they manage multi-country markets.

Prerequisite: MKT 360 and MKT 302 or Corequisite: MKT 302.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MKT 496. Directed Studies in Marketing. 1-3 Credit Hours.

Supervised readings, individual research project, or independent investigation of selected non-STEM related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.

Requisite: Business School.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MKT 497. Directed Studies in Marketing. 1-3 Credit Hours.

Supervised readings, individual research project or independent investigation of selected STEM-related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.

Requisite: Business School.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MKT 498. Special Topics in Marketing. 3 Credit Hours.

Special topics in selected non-STEM areas of Marketing.

Prerequisite: MKT 201 or MKT 301.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MKT 499. Special Topics in Marketing. 3 Credit Hours.

Special topics in selected STEM areas of Marketing.

Prerequisite: MKT 201 or MKT 301.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MKT 555. Marketing Departmental Honors Research Project. 3 Credit Hours.

Research project to fulfill requirements for Departmental Honors in Marketing.

Components: THI.

Grading: SUS.

Typically Offered: Spring.

MKT 639. Marketing Honors Research Project. 3 Credit Hours.

Research project to fulfill requirements for Departmental Honors in Marketing.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MKT 640. Foundations of Marketing Management. 2 Credit Hours.

Course introduces students to the analytical concepts and tools of marketing management. Special emphasis is placed on the relationships between marketing and overall company strategy, the development of a customer orientation, the integration of marketing throughout the organization, and the implementation of systems for planning and controlling the marketing effort. Students consider problems of consumer analysis, product planning, integrated communication, distribution, and pricing. Data and analysis required to make effective marketing decisions are also examined. The discovery and application of marketing management skills are developed through the use of readings, case exercises, and class discussions.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MKT 641. Marketing Research. 2 Credit Hours.

The objective of the course is to allow students to understand functional analysis of consumer and market behaviors utilizing statistical tools. The course will cover topics of secondary sources of data, sampling, questionnaire design, and analysis and interpretation of data. Project and case analysis methods will be used for instruction.

Prerequisite: MKT 640 or MKT 660.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MKT 642. Pricing and Value Management. 2 Credit Hours.

Pricing decisions require a synthesis of economic and marketing principles, an appreciation of legal and ethical constraints, and the ability to use accounting, financial, and market research data. This course is designed to teach students how to price goods and services by providing a framework for understanding pricing strategies and tactics. While pricing strategies are taught under the rubric of many diverse disciplines, we will take an integrative approach, combining strategic, economic, marketing, and psychological considerations. Topics covered include economic value and break-even analysis, price elasticity, markup and profit margin, price bundling, among others.

Prerequisite: MKT 640 or MKT 660.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MKT 643. Health Care Marketing. 2-3 Credit Hours.

This course is devoted to the study of health care marketing and the health care system involved with the task of marketing products and services.

As health care reform continues to evolve current market conditions and transform existing organization into new practices, this course is focused on how managed care providers, hospitals, physicians, federal government, device and pharmaceutical companies will embrace the new patient centered market in their marketing strategies.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MKT 644. Services Marketing. 2 Credit Hours.

Course develops skills necessary to manage companies in an increasingly service-oriented and technology-driven economy and to gain sustainable competitive advantage through delivering superior quality services. Course covers the special marketing challenges posed by the unique characteristics of services and discusses their managerial implications. The need and strategies for synergistic management of operations, systems, and people to satisfy customers in order to achieve marketing excellence and superior financial performance are also included.

Prerequisite: MKT 640 or MKT 660.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MKT 645. International Marketing. 2 Credit Hours.

Course analyzes the theories and practice of international marketing management. Course allows students to understand markets and aid in the development of marketing plans based on the nature of national as well as international markets. Issues of globalization, standardization, intermarket segments, trading blocks, global marketing strategies, local branding, global branding in the context of customer movements, product development, pricing, distribution, communication, and segmentation in global markets are also discussed.

Prerequisite: MKT 640 or MKT 660.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MKT 646. Consumer Behavior. 2 Credit Hours.

This course provides an overview of psychological and normative principles of consumer decision-making and judgment by focusing on underlying behavioral research and theory. How people process information, make decisions involving risk and uncertainty, conflicting objectives, and imperfect information are some of the main topics discussed. The implications of consumer behavior on a marketing strategy are highlighted.

Prerequisite: MKT 640 or MKT 660.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MKT 647. Advertising and Communications Management. 2 Credit Hours.

Billions of dollars are wasted every year on ineffective advertising and communication campaigns. This problem is due to an absence of a compelling strategy to serve as a foundation for developing creative executions and media plans. The course provides a balanced analysis of strategy and execution of integrated marketing communication campaigns. The effectiveness of existing and emerging communication vehicles to attain strategic marketing goals is assessed. Special emphasis is placed on advertising, sales promotions, and social media. Current and historical campaigns are also reviewed. Course requirements include case reports, projects, and class participation.

Prerequisite: MKT 640 or MKT 660.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MKT 648. New Product Development. 2 Credit Hours.

Innovation is one of the key drivers of firm value and new product development is perhaps the most important aspect of firm innovation. Yet few firms are able to develop and sustain their new product development process without mis-steps. Starting with how new products fit into the strategic landscape of a firm this course enables students to appreciate the systematic approach that goes into the creation and marketing of new products. Practical aspects of developing and marketing new products are included through two assignments and one class project.

Prerequisite: MKT 640 or MKT 660.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MKT 649. Strategic Brand Marketing. 2 Credit Hours.

More and more firms have come to realize that their brands are among their most valuable assets. The goal of this course is to teach students the strategic significance of brands in creating shareholder value. Students should develop fluency with the core principles associated with branding including: an understanding of how to develop a brand's positioning; managing total brand experience; how to manage the brand relevancy over time; familiarity with the various qualitative and quantitative methodologies that are used to evaluate brand equity; how to achieve growth through brand extension; brand design and brand messaging. The basic philosophy for this course is to blend theory and practice of brand management. Branding is both an art and a science. Few branding situations have a definitive, unqualified "right" answer as to what is the best approach. However, when armed with relevant and comprehensive theories, appropriate frameworks and models, familiarity with past successful and unsuccessful branding strategies, managers can make better and more informed decisions that are more likely to yield successful implementation.

Prerequisite: MKT 640 or MKT 660.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MKT 650. Strategic Marketing. 2 Credit Hours.

Course develops the skills necessary to strategically manage business-unit level marketing activities in a multi-brand firm. This necessitates examining all marketing mix elements, R&D, financial and production considerations simultaneously in the context of the many markets, products, and services that may concern a typical firm. The emphasis is placed on understanding internal capabilities, market competitors, and customers. Market simulation exercise, cases, and readings are utilized.

Prerequisite: MKT 640 or MKT 660.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MKT 660. Foundations of Marketing Management. 3 Credit Hours.

Marketing problems experienced by top executives are examined and fundamental problem-solving concepts are developed. Students consider problems of consumer needs, product planning, promotion, distribution and pricing. The discovery and application of marketing management skills are developed through the use of cases and a major planning project.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MKT 665. International Marketing. 3 Credit Hours.

Analysis of major U.S. foreign markets, marketing policies, and techniques are discussed.

Prerequisite: MKT 640 or MKT 660.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MKT 672. Services Marketing. 3 Credit Hours.

Course develops the skills necessary to manage services marketing and compete through delivering quality service. The unique characteristics of services and their managerial implications are examined. Importance of the synergistic management of operations, environment, systems and people to satisfy the customer is highlighted.

Prerequisite: MKT 640 or MKT 660.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MKT 675. Marketing Analytics. 2 Credit Hours.

Big data, fast computing and clever algorithms have converged to allow managers to convert data into one of their key strategic assets. In response, managers are collecting large volumes of data from diverse sources such as point-of-sale, online and social media. However, this data deluge does not automatically result in smart actions. To convert data to insights managers must develop the capability to transform data into knowledge through analytics. This has made analytics an important subject for business majors. One area where firms find analytics useful is marketing. Today firms use analytics to identify profitable customers, continuously track brands, and calculate optimal price promotions, test commercials, optimize media budgets across online and offline channels, design sales force allocation and decide the intensity of distribution channels. The goals of this course are to give you hands-on experience with data and analytics, teach you how to draw strategic marketing insights from data and show you how to make marketing decisions with greater precision without merely relying on "gut" decisions. This is not to say that intuition and creativity do not play a role in marketing. It means that analytical approaches combined with intuition makes for better marketing decisions.

Prerequisite: MKT 640 or MKT 660.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MKT 686. Behavioral Decision Theory in Consumer Research.. 3 Credit Hours.

The purpose of this seminar is to provide students with a review of the psychological literature as applied to the study of judgment and decision making with a focus on consumer research. The course will be based on behavioral decision theory and social psychology with an emphasis in generating high quality consumer research ideas. The course complements MKT 688 and MKT 689, which emphasizes information processing aspects of consumer behavior. Each week there will be discussions of a topic of consumer behavior research, drawing primarily upon readings from marketing and psychology. Students will learn how to identify important research problems, ask interesting research questions, develop theories and hypotheses, and design experiments.

Requisite: Must be registered Doctoral Student.

Components: SEM.

Grading: GRD.

Typically Offered: Spring.

MKT 687. Marketing Strategy. 3 Credit Hours.

Marketing Strategy is a vast, exciting and exploding literature that almost defies classification. However, despite this difficulty one common theme unifies and distinguishes this stream of research: it is marketing as seen through the eyes of a manager. Is it worth fighting for market share? How do we analyze competitors? Is it more profitable to introduce a new product or enter a new market? Should we build on existing relationships or seek new customers? Does loyalty management pay? Do consumers understand product quality? Can we quantify the effects of advertising and promotions? What metrics should we use to evaluate the effectiveness of marketing effort? Can we run policy simulations before committing to marketing action? These are some of the questions that marketing managers need to address. Often the questions are very broad and complex, reflecting the bewildering range of techniques that have been used to address those questions. The seminar will try to impart an appreciation of how to define and solve research problems in a marketing strategy.

Requisite: Must be registered Doctoral Student.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

MKT 688. Ph.D. Seminar in Consumer Behavior and Decision Making. 3 Credit Hours.

This course is designed to provide students with a background regarding a wide set of topics in consumer behavior focusing on theoretical models. In addition to developing a knowledge base in several extant consumer behavior literatures, this course has several additional goals. Students will: 1) become familiar with the content and style of consumer behavior research published within the marketing field, 2) develop an understanding of many methodologies and paradigms that can be used to investigate theoretical issues, 3) have several opportunities to explicate research ideas that they will hopefully be able to pursue in the remainder of the program or early in their careers, and 4) learn to critically evaluate the research of others to aid in strengthening their thinking and ultimately their own research activities.

Requisite: Must be registered Doctoral Student.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

MKT 689. Information Processing for Consumer Behavior. 1-3 Credit Hours.

Broadly the study of consumer behavior is divided into two areas - behavioral decision theory and information processing. This course will focus on information-processing aspects of consumer behavior with an emphasis in generating high quality consumer research ideas. We will cover both classic papers that provide the gist of the area covered in each session as well as research that attracted more interest from scholars in the recent years. The course complements MKT688 and MKT686, which provide students with an introduction to topics in consumer behavior and behavioral decision theory, respectively (these three Consumer Behavior PhD seminars can be taken in any sequence). Each week we will discuss a topic of consumer behavior research, drawing primarily upon readings from marketing and psychology. Students are responsible for all primary readings, which will be discussed in a seminar-format in class. Each week, we will discuss 4-5 papers. Students will also be assigned to be the "discussion leader" for individual sessions. Professor will assign these sessions to the students in the first class.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

MKT 695. Topics in Marketing. 3.00 Credit Hours.

Topics in selected areas of Marketing.

Requisite: Must be registered Doctoral Student.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

MKT 696. Topics in Marketing. 1-3 Credit Hours.

Topics in selected areas of Marketing.

Requisite: Must be registered Doctoral Student.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MKT 697. Topics in Marketing. 1-3 Credit Hours.

Topics in selected areas of Marketing.

Requisite: Must be registered Doctoral Student.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MKT 698. Topics in Marketing. 1-3 Credit Hours.

Topics in selected areas of Marketing.

Requisite: Must be registered Doctoral Student.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MKT 699. Directed Study. 1-6 Credit Hours.

Individually supervised readings or research projects. Restricted to students with superior academic records. Approval of supervising professor as to topic and evaluation of project required at time of registration.

Requisite: Must be a registered Doctoral student.

Components: THE.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MKT 830. Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of MKT 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.

Requisite: Must be a registered Doctoral student.

Components: THE.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Master of Arts Liberal Studies (MLS)

MLS 601. Aspects of Creative and Reflective Thought. 3 Credit Hours.

Selected aspects of creative and reflective thought, based on materials from the arts, the humanities, the sciences, the social sciences and history. The focus will be on themes and issues represented in a variety of cultural traditions.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

MLS 602. Perspectives on Human Nature. 3 Credit Hours.

Basic theories of human nature proposed by the humanities, the sciences, and the social sciences. The course deals with fundamental issues regarding the concept of human nature, such as the nature of the self and its relation to society, the impact of culture on self perception and the relation of thought to human action.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

MLS 603. Theories of the Physical Universe. 3 Credit Hours.

Various understandings of the nature of the universe and their impact on human culture. The course will deal with critical issues addressed in the various attempts to understand the physical world, such as fundamental structures and processes, the limitation of human perception, and the interaction between the human species and its environment.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

MLS 611. Studies in the Humanities. 3 Credit Hours.

Interdisciplinary study of selected topics in the Humanities.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

MLS 612. Studies in the Social Sciences. 3 Credit Hours.

Interdisciplinary study of selected topics in the Social Sciences.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MLS 613. Studies in the Sciences. 3 Credit Hours.

Interdisciplinary study of selected topics in the sciences.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MLS 621. Studies in the Humanities. 3 Credit Hours.**Components:** SEM.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**MLS 625. Special Topics. 3 Credit Hours.****Components:** SEM.**Grading:** GRD.**Typically Offered:** Fall & Spring.**MLS 626. Special Topics. 3 Credit Hours.****Components:** LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**MLS 627. Special Topics. 3 Credit Hours.****Components:** SEM.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**MLS 631. Studies in the Humanities. 3 Credit Hours.****Components:** LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**MLS 696. Directed Readings. 1-3 Credit Hours.**

Requisite: Plan of Master of Arts Liberal Studies.

Components: THI.**Grading:** GRD.**Typically Offered:** Fall & Spring.**MLS 697. Directed Readings. 1-3 Credit Hours.**

Requisite: Plan of Master of Arts Liberal Studies.

Components: THI.**Grading:** GRD.**Typically Offered:** Fall & Spring.**MLS 798. Seminar in Liberal Studies. 3 Credit Hours.****Components:** LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**MLS 799. Seminar in Liberal Studies. 3 Credit Hours.****Components:** SEM.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**MLS 810. Master's Thesis. 1-6 Credit Hours.**

The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Requisite: Plan of Master of Arts Liberal Studies.

Components: THI.**Grading:** SUS.**Typically Offered:** Fall & Spring.**MLS 815. MALS Project. 1-6 Credit Hours.**

The student working on his/her MALS project enrolls for credit, not to exceed 6, as determined by his/her advisor. Credit is not awarded until the project has been accepted.

Requisite: Plan of Master of Arts Liberal Studies.

Components: THI.**Grading:** GRD.**Typically Offered:** Fall & Spring.

MLS 820. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in PSY 710 (usually six credits). Credit not granted. May be regarded as full time residence.

Requisite: Plan of Master of Arts Liberal Studies.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

MLS 825. Continuous Registration-Master's Study. 1 Credit Hour.

To establish residence for non-thesis students who are preparing for major examinations. Credit not granted. Regarded as full time residence.

Requisite: Plan of Master of Arts Liberal Studies.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

Mathematics (MTH)

MTH 099. Intermediate Algebra. 3 Credit Hours.

Real number operations, polynomials, factoring, rational numbers and rational expressions. Cannot be used to fulfill the 120 credits required for graduation.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MTH 101. Algebra for College Students. 3 Credit Hours.

Algebraic operations and properties of the real numbers; linear and quadratic equations and inequalities; polynomials and factoring; rational expressions; radical expressions; graphs of lines; systems of linear equations.

Requisite: SAT Math Section Score \geq 550 or Math ACT Score \geq 22 or ALEKS score \geq 40 or passing grade in MTH 099.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MTH 105. Algebra and Trigonometry. 5 Credit Hours.

An intensive course in algebra and trigonometry as covered in MTH 107-108, but without analytic geometry.

Requisite: SAT Math Section Score \geq 600 OR Math ACT Score \geq 25 OR ALEKS score \geq 55 OR passing grade in MTH 101.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MTH 107. Precalculus Mathematics I. 3 Credit Hours.

Algebraic operations; equations and inequalities; complex numbers; functions and their graphs; polynomial, exponential, and logarithmic functions; systems of equations.

Requisite: SAT Math Section Score \geq 600 OR Math ACT Score \geq 25 OR ALEKS score \geq 55 OR passing grade in MTH 101.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MTH 108. Precalculus Mathematics II. 3 Credit Hours.

Rational functions; analytic geometry; trigonometric functions, identities, and equations.

Requisite: SAT Math Section Score \geq 650 OR Math ACT Score \geq 28 OR ALEKS score \geq 65 OR a passing grade in MTH 107.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MTH 113. Finite Mathematics. 3 Credit Hours.

Sets, logic, counting techniques, elementary probability and statistics, mathematics in finance, linear programming, algebraic structures, symmetry. The selection of topics may vary by instructor. Intended for BA students.

Prerequisite: MTH 101 or MTH 107. Or Requisite: ALEKS score \geq 60 or SAT MATH score \geq 630 or SAT MATH Section score \geq 620 or ACT score \geq 28.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MTH 130. Introductory Calculus. 3 Credit Hours.

A one-semester survey of the fundamental principles of calculus, functions, limits, derivatives, definite integrals, applications. Not for students planning further study of calculus beyond this course.

Requisite: ALEKS score ≥ 65 or SAT MATH score ≥ 630 or SAT MATH Section score ≥ 650 or ACT score ≥ 28 or AP Calculus AB score of 3 or passing grade in MTH 107.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MTH 133. Games and Strategies. 3 Credit Hours.

A mathematical introduction to the theory of games, strategies, and optimal responses. Primarily intended for students in a B.A. program.

Prerequisite: MTH 113 or MTH 130.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MTH 140. Calculus Concepts with Foundations A. 4 Credit Hours.

Tools from algebra and trigonometry for calculus. Functions and graphs, limits and continuity, the derivative and applications.

Requisite: ALEKS score ≥ 65 OR SAT MATH ≥ 630 OR SAT MATH SECTION ≥ 650 OR ACT ≥ 28 OR AP Calculus score of 3.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MTH 141. Calculus Concepts with Foundations B. 4 Credit Hours.

Tools from algebra, trigonometry, and analytic geometry for calculus. Further aspects of differentiation. Antiderivatives, definite integrals, and their applications.

Prerequisite: MTH 140. Min Grade C-.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MTH 151. Calculus I for Engineers. 5 Credit Hours.

Analytic geometry, limits and continuity, derivatives, the definite integral, and applications relevant to engineering. Intended for students taking PHY 205 concurrently.

Requisite: SAT Math Section Score ≥ 730 OR Math ACT Score ≥ 31 OR ALEKS score ≥ 76 OR C- or higher in MTH 105 or MTH 108.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MTH 161. Calculus I. 4 Credit Hours.

Limits and continuity, derivatives and applications, the definite integral and applications.

Requisite: ALEKS score ≥ 76 or SAT MATH score ≥ 700 or SAT MATH SECTION ≥ 730 or ACT score ≥ 31 or score of 4 AP Calculus (AB) or score of 3 in AP Calculus (BC) or a C- or higher in MTH 108.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MTH 162. Calculus II. 4 Credit Hours.

Transcendental functions, methods of integration, improper integrals, infinite series, polar coordinates, and introduction to differential equations.

Prerequisite: MTH 141 or MTH 151 or MTH 161 or MTH 171.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MTH 171. Calculus I. 4 Credit Hours.

The theory of limits, the derivative and the definite integral, techniques and applications. The sequence MTH 171-172 is more conceptually-oriented than MTH 161-162.

Requisite: Prism Program.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MTH 172. Calculus II. 4 Credit Hours.

Continuation of MTH 171. Additional topics on the derivative and definite integral, improper integrals, infinite series, and introduction to differential equations.

Prerequisite: MTH 171.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MTH 210. Introduction to Linear Algebra. 3 Credit Hours.

Vectors, matrix algebra, systems of linear equations, and related geometry in Euclidean spaces. Fundamentals of vector spaces, linear transformations, determinants, eigenvalues, and eigenspaces.

Pre/Corequisite: MTH 162 or MTH 172.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MTH 211. Calculus III. 3 Credit Hours.

Vectors in space, partial differentiation, multiple integration.

Prerequisite: MTH 162 or MTH 172. Requisite: Not open to students with credit in MTH 310 or MTH 433 or MTH 533.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MTH 224. Introduction to Probability and Statistics. 3 Credit Hours.

Probability distributions, random variables, expectation and variance, point estimation, interval estimation, testing of hypotheses, analysis of variance.

Pre/Corequisite: MTH 162 or MTH 172.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MTH 230. Introduction to Abstract Mathematics. 3 Credit Hours.

Fundamentals of set theory, logic and methods of mathematical proof.

Pre/Corequisite: MTH 162 or MTH 172.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MTH 309. Discrete Mathematics I. 3 Credit Hours.

Mathematical methods of Computer Science and Computer Engineering. Mathematical reasoning, sets, relations, functions, Boolean algebra, combinatorics, graphs.

Prerequisite: MTH 141 or MTH 151 or MTH 161 or MTH 171.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MTH 310. Multivariable Calculus. 3 Credit Hours.

Equations of curves, surfaces, solids; vector differential calculus; integration of scalar valued functions. Applications. Intended for mathematics majors.

Prerequisite: MTH 210 and MTH 162 or MTH 172. Requisite: Not open to students with credit in MTH 433 OR MTH 533.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MTH 311. Introduction to Ordinary Differential Equations. 3 Credit Hours.

Theory and applications of first-order differential equations. Theory and applications of higher order linear equations and first order linear systems, including matrix methods.

Prerequisite: MTH 162 or MTH 172.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MTH 320. Introduction to Numerical Analysis. 3 Credit Hours.

Interpolation, quadrature, numerical solution of algebraic and transcendental equations, and optimization.

Prerequisite: MTH 210 and MTH 211 or MTH 310.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MTH 359. Mathematical Models in Biology and Medicine. 3 Credit Hours.

Fundamentals of the dynamical systems approach to modeling temporal change in biological systems. An introduction to the analysis of mathematical models in biology and medicine with detailed, concrete examples drawn from ecology, cell biology, neuro-science, and physiology.

Prerequisite: MTH 162 or MTH 172.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MTH 433. Advanced Calculus. 3 Credit Hours.

A rigorous and comprehensive treatment of the theoretical concepts of calculus. The real number system; sequences; series; continuity, differentiation, and integration of functions of one variable.

Prerequisite: MTH 230 and MTH 310 or MTH 211. Not open for Students with Credit in MTH 533.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MTH 461. Survey of Modern Algebra. 3 Credit Hours.

Algebraic systems, equivalence classes, groups, rings, fields, unique factorization domains.

Prerequisite: MTH 210 and MTH 230. Requisite: Not open to students with credit in MTH 561.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MTH 471. Directed Readings. 1-3 Credit Hours.

Topics selected from algebra, geometry, analysis, topology.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MTH 472. Directed Readings. 1-3 Credit Hours.

Topics selected from algebra, geometry, analysis, topology.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MTH 502. History of Mathematics. 3 Credit Hours.

The development of mathematics from its earliest beginnings through the first half of the twentieth century. Numeral systems, geometry, algebra, analysis and set theory.

Prerequisite: 2 Courses in MTH 200 or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MTH 504. Foundations of Geometry. 3 Credit Hours.

Axiom systems and models of Euclidean and Non-Euclidean geometry.

Prerequisite: MTH 230 or MTH 309.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MTH 505. Theory of Numbers. 3 Credit Hours.

Divisibility, primes; congruences, quadratic residues and reciprocity; Diophantine equations. Applications to cryptography.

Prerequisite: MTH 210 or MTH 504.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MTH 506. Mathematical Logic. 3 Credit Hours.

Logics, truth, proof, logical consequence, model theory, formalization, and computation. Meta-theory of first-order logic, computability theory, and Godel's incompleteness theorems. Related results by Church, Turing, and Tarski. Discussion of their philosophical significance.

Prerequisite: MTH 230.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MTH 510. Linear Algebra. 3 Credit Hours.

Abstract vector spaces, bases and dimensions, linear maps, eigenvalues and eigenvectors, inner product spaces, operators, spectral theorems, canonical forms.

Prerequisite: MTH 210 and MTH 230 or MTH 309.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MTH 512. Elementary Complex Analysis. 3 Credit Hours.

Complex variables; conformal mapping, contour integration.

Prerequisite: MTH 310 or MTH 211.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MTH 513. Partial Differential Equations I. 3 Credit Hours.

Derivation, well posedness, and qualitative properties of initial value and boundary value problems for the heat, wave and Laplace equations. Energy methods, causality, maximum principles, heat kernels, Fourier series, and potential theory.

Prerequisite: MTH 210 and MTH 311 and MTH 211 or MTH 310.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MTH 514. Partial Differential Equations II. 3 Credit Hours.

Continuation of MTH 513. Approximations of solutions, distributions and integral transform methods, spectral theory and scattering. Applications to physical problems. Nonlinear equations and phenomena.

Prerequisite: MTH 513.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MTH 515. Ordinary Differential Equations. 3 Credit Hours.

Linear systems, equilibrium and periodic solutions, stability analysis, bifurcation, phase plane analysis, boundary value problems, applications to engineering and physics.

Prerequisite: MTH 311 and MTH 211 or MTH 310.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MTH 516. Dynamics and Bifurcations. 3 Credit Hours.

Bifurcation of equilibrium and periodic solutions, global theory of planar systems, planar maps, nonlinear vibrations, forced oscillations, chaotic solutions, Hamiltonian systems, applications to engineering and physics.

Prerequisite: MTH 515.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MTH 520. Numerical Linear Algebra. 3 Credit Hours.

Topics from numerical linear algebra including solving systems of equations, LU, QR, and SVD factorizations, eigenvalues and eigenvectors, interactive methods, and applications.

Prerequisite: MTH 320.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MTH 521. Numerical Methods in Differential Equations. 3 Credit Hours.

Numerical solution of ordinary and partial differential equations.

Prerequisite: MTH 320 or MTH 520.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MTH 524. Introduction to Probability. 3 Credit Hours.

Probability spaces, random variables, expectation, limit theorems.

Prerequisite: MTH 224 and MTH 211 or MTH 310.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MTH 525. Introduction to Mathematical Statistics. 3 Credit Hours.

Probability distributions, theory of sampling and hypothesis testing.

Prerequisite: MTH 524.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MTH 527. Theory of Computing. 3 Credit Hours.

Sets, relations, and languages. Automata theory. Basic computability theory. Turing machines. The complexity classes P and NP.

Prerequisite: MTH 309 or MTH 461.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MTH 531. Topology I. 3 Credit Hours.

Set theory, topological spaces, compactness, connectedness, separation properties, quotient spaces, Tychonoff Theorem, compactification, Urysohn Lemma and Tietze Extension Theorem, function spaces.

Prerequisite: MTH 230.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MTH 532. Topology II. 3 Credit Hours.

Differential and topological manifolds, classical groups and associated manifolds, tangent and tensor bundles, vector fields, differential forms, transversality, Sard's theorem, Stokes' Theorem.

Prerequisite: MTH 210 and MTH 531.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MTH 533. Introduction to Real Analysis I. 3 Credit Hours.

Sequences and series in Euclidean space; sequences and series of functions; Fourier series; continuity, differentiation, and integration of functions between Euclidean spaces; implicit and inverse function theorems.

Prerequisite: MTH 230 And MTH 211 Or MTH 310.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MTH 534. Introduction to Real Analysis II. 3 Credit Hours.

Continuation of MTH 533.

Prerequisite: MTH 533.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MTH 542. Statistical Analysis. 3 Credit Hours.

Statistical inference about one or two populations from interval, ordinal and categorical data; analysis of variance; simple and multiple linear regression; designing research studies.

Prerequisite: MTH 210 and MTH 224.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MTH 547. Introduction to Mathematical Finance. 3 Credit Hours.

Models of financial markets. Derivative securities: European and American options. Tools of mathematical finance: binomial trees, martingales, stopping times. Concepts of arbitrage and hedging. Risk-neutral valuation of financial derivatives; the Black-Scholes formula and its applications.

Prerequisite: MTH 224 and MTH 211 or MTH 310.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MTH 551. Introduction to Differential Geometry. 3 Credit Hours.

Geometry of curves and surfaces in Euclidean space. Local space curve theory, intrinsic and extrinsic curvature of surfaces, geodesics, parallelism, and differential forms.

Prerequisite: MTH 210 And MTH 211 Or MTH 310.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MTH 561. Abstract Algebra I. 3 Credit Hours.

Groups; rings; linear algebra; modules.

Prerequisite: MTH 210 and MTH 230.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MTH 562. Abstract Algebra II. 3 Credit Hours.

Continuation of MTH 561.

Prerequisite: MTH 561.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MTH 571. Directed Readings in Mathematics. 1-3 Credit Hours.

Readings in special topics.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

MTH 591. Topics in Mathematics. 1-3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MTH 592. Topics in Mathematics. 1-3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MTH 593. Topics in Mathematics. 1-3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MTH 602. History of Mathematics. 3 Credit Hours.

The development of mathematics from its earliest beginnings through the first half of the twentieth century. Numeral systems, geometry, algebra, analysis and set theory.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MTH 604. Foundations of Geometry. 3 Credit Hours.

Axiom systems and models of Euclidean and Non-Euclidean geometry

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MTH 605. Theory of Numbers. 3 Credit Hours.

Divisibility, primes; congruences, quadratic residues and reciprocity; Diophantine equations. Applications to cryptography.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MTH 606. Mathematical Logic. 3 Credit Hours.

Logics, truth, proof, logical consequence, model theory, formalization, and computation. Meta-theory of first-order logic, computability theory, and Godel's incompleteness theorems. Related results by Church, Turing, and Tarski. Discussion of their philosophical significance.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MTH 610. Linear Algebra. 3 Credit Hours.

Abstract vector spaces, bases and dimensions, linear maps, eigenvalues and eigenvectors, inner product spaces, operators, spectral theorems, canonical forms.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MTH 612. Elementary Complex Analysis. 3 Credit Hours.

Complex variables; conformal mapping, contour integration.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MTH 613. Partial Differential Equations I. 3 Credit Hours.

Derivation, well posedness, and qualitative properties of initial value and boundary value problems for the heat, wave and Laplace equations. Energy methods, causality, maximum principles, heat kernels, Fourier series, and potential theory.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MTH 614. Partial Differential Equations II. 3 Credit Hours.

Continuation of MTH 513. Approximations of solutions, distributions and integral transform methods, spectral theory and scattering. Applications to physical problems. Nonlinear equations and phenomena.

Prerequisite: MTH 613.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MTH 615. Ordinary Differential Equations. 3 Credit Hours.

Linear systems, equilibrium and periodic solutions, stability analysis, bifurcation, phase plane analysis, boundary value problems, applications to engineering and physics.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MTH 616. Dynamics and Bifurcations. 3 Credit Hours.

Bifurcation of equilibrium and periodic solutions, global theory of planar systems, planar maps, nonlinear vibrations, forced oscillations, chaotic solutions, Hamiltonian systems, applications to engineering and physics.

Prerequisite: MTH 615.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MTH 620. Numerical Linear Algebra. 3 Credit Hours.

Topics from numerical linear algebra including solving systems of equations, LU, QR, and SVD factorizations, eigenvalues and eigenvectors, interactive methods, and applications.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MTH 621. Numerical Methods in Differential Equations. 3 Credit Hours.

Numerical solution of ordinary and partial differential equations.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MTH 624. Introduction to Probability Theory. 3 Credit Hours.

Probability spaces, random variables, expectation, limit theorems.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MTH 625. Introduction to Mathematical Statistics. 3 Credit Hours.

Probability distributions, theory of sampling and hypothesis testing.

Prerequisite: MTH 624.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MTH 627. Theory of Computing. 0 Credit Hours.

Sets, relations, and languages. Automata theory. Basic computability theory. Turing machines. The complexity classes P and NP.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MTH 631. Topology I. 3 Credit Hours.

Set theory, topological spaces, compactness, connectedness, separation properties, quotient spaces, Tychonoff Theorem, compactification, Urysohn Lemma and Tietze Extension Theorem, function spaces.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MTH 632. Topology II. 3 Credit Hours.

Differential and topological manifolds, classical groups and associated manifolds, tangent and tensor bundles, vector fields, differential forms, transversality, Sard's theorem, Stokes' Theorem.

Prerequisite: MTH 631.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MTH 633. Introduction to Real Analysis I. 3 Credit Hours.

Sequences and series in Euclidean space; sequences and series of functions; Fourier series; continuity, differentiation, and integration of functions between Euclidean spaces; implicit and inverse function theorems.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MTH 634. Introduction to Real Analysis II. 3 Credit Hours.

Continuation of MTH 633.

Prerequisite: MTH 633.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MTH 642. Statistical Analysis. 3 Credit Hours.

Statistical inference about one or two populations from interval, ordinal and categorical data; analysis of variance; simple and multiple linear regression; designing research studies.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MTH 643. Statistical Analysis II with Financial Applications. 3 Credit Hours.

Exploratory data analysis. Designing parametric models and assessing their uncertainty. Techniques for resampling. Using multivariate distributions to model financial data; families of copulas. Analyzing time series, including ARIMA and GARCH models.

Prerequisite: MTH 642 or MTH 542.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MTH 645. Optimization Methods. 3 Credit Hours.

Linear optimization: simplex method and simplex tableaus, sensitivity analysis. Quadratic optimization and its applications in finance: risk modeling and portfolio construction. Integer programming techniques, branch and bound method. Dynamic programming - deterministic and probabilistic techniques. Software tools of optimization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MTH 646. Quantitative Risk Analysis. 3 Credit Hours.

The modeling, measuring, and managing of financial risk using statistical and stochastic methods. Following "Basel Committee on Banking Supervision" risk analysis is now a major issue for the banking Sector. Concepts and methods covered in this course can be applied to managing risk in various areas, but will proceed in the context related to risk analysis and management in finance and insurance.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MTH 647. Introduction to Mathematical Finance. 3 Credit Hours.

Models of financial markets. Derivative securities: European and American options. Tools of mathematical finance: binomial trees, martingales, stopping times. Concepts of arbitrage and hedging. Risk-neutral valuation of financial derivatives; the Black-Scholes formula and its applications.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MTH 648. Stochastic Calculus with Application to Finance. 3 Credit Hours.

Stochastic calculus developing the basic probabilistic techniques necessary to study analytic models of financial markets. Brownian motion and the stochastic integral, stochastic differential equations, the Black-Scholes formula, Girsanov's theorem and applications to option pricing.

Prerequisite: MTH 647.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MTH 649. Computational Methods of Finance. 3 Credit Hours.

Solutions of nonlinear equations, interpolation, Monte Carlo methods, survey of matrix factorizations, numerical integration and differentiation, and introduction to finite difference and finite element methods for PDEs with applications to finance.

Prerequisite: CSC 220 and MTH 643 and MTH 648.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MTH 650. Machine Learning in Quantitative Finance. 3 Credit Hours.

Machine learning techniques for financial applications. Best practices for model selection and construction of big financial data, including regression and classification techniques, and deep learning with application to forecasting financial time series.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MTH 651. Introduction to Differential Geometry. 3 Credit Hours.

Geometry of curves and surfaces in Euclidean space. Local space curve theory, intrinsic and extrinsic curvature of surfaces, geodesics, parallelism, and differential forms.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MTH 661. Abstract Algebra I. 3 Credit Hours.

Groups; rings; linear algebra; modules.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MTH 662. Abstract Algebra II. 3 Credit Hours.

Continuation of MTH 561.

Prerequisite: MTH 661.

Components: LEC.**Grading:** GRD.**Typically Offered:** Spring.**MTH 691. Topics in Mathematics. 1-3 Credit Hours.****Components:** LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**MTH 692. Topics in Mathematics. 1-3 Credit Hours.****Components:** LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**MTH 693. Topics in Mathematics. 1-3 Credit Hours.****Components:** LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**MTH 709. Data Security and Cryptography. 3 Credit Hours.**

Encryption algorithms; cryptographic techniques; access, information flow and inference controls.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**MTH 721. Mathematical Probability. 3 Credit Hours.**

Development of the measure-theoretic approach to probability. Random variables, central limit theory, laws of large numbers, martingales.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**MTH 722. Stochastic Processes. 3 Credit Hours.****Components:** LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**MTH 733. Real Variables. 3 Credit Hours.**First semester of a two semester sequence: General measure theory, Lebesgue measure and integration, L_p spaces, Fourier series in one and many variables, Fourier transforms, distributions, Sobolev spaces, applications to partial differential equations.**Components:** LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**MTH 734. Real Variables. 3 Credit Hours.**Second semester of a two semester sequence: General measure theory, Lebesgue measure and integration, L_p spaces, Fourier series in one and many variables, Fourier transforms, distributions, Sobolev spaces, applications to partial differential equations.**Components:** LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**MTH 735. Complex Variables. 3 Credit Hours.**

First semester of a two semester sequence: Analytic functions, conformality, Cauchy's Theorem, representation theorems, harmonic functions, calculus of residues, Riemann Mapping Theorem, entire and meromorphic functions, analytic continuation, normal families.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**MTH 736. Complex Variables. 3 Credit Hours.**

Second semester of a two semester sequence: Analytic functions, conformality, Cauchy's Theorem, representation theorems, harmonic functions, calculus of residues, Riemann Mapping Theorem, entire and meromorphic functions, analytic continuation, normal families.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.

MTH 741. Algebraic Topology. 3 Credit Hours.

First semester of a two semester sequence: Homotopy and homotopy type, fundamental group, covering spaces, higher homotopy groups, simplicial singular and cellular homology, Eilenberg-Steenrod axioms, cohomology, universal coefficient theorem, products, Kunnetth formula, duality theorems for manifolds, computations and applications.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MTH 742. Algebraic Topology. 3 Credit Hours.

Second semester of a two semester sequence: Homotopy and homotopy type, fundamental group, covering spaces, higher homotopy groups, simplicial singular and cellular homology, Eilenberg-Steenrod axioms, cohomology, universal coefficient theorem, products, Kunnetth formula, duality theorems for manifolds, computations and applications.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MTH 751. Differential Geometry. 3 Credit Hours.

First semester of a two semester sequence.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MTH 752. Differential Geometry. 3 Credit Hours.

Second semester of a two semester sequence.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MTH 757. Lie Groups. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MTH 761. Abstract Algebra I. 3 Credit Hours.

First semester of a two semester sequence: Group theory, ring theory, module theory, linear algebra.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MTH 762. Abstract Algebra II. 3 Credit Hours.

Second semester of a two semester sequence: Group theory, ring theory, module theory, linear algebra.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MTH 770. Directed Readings or Research. 2-4 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MTH 780. Topics in Analysis. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MTH 781. Topics in Analysis. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MTH 782. Topics in Topology. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MTH 783. Topics in Topology. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MTH 785. Topics in Algebra. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MTH 786. Topics in Mathematics. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MTH 787. Topics in Mathematics. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MTH 820. Research in Residence. 1 Credit Hour.

To establish a residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full-time residence.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MTH 830. Pre-Candidacy Doctoral Dissertation. 1-12 Credit Hours.

Credits earned in this course apply towards the 12 credit hour dissertation research requirement of the graduate school. The student will enroll for credit as determined by his/her dissertation advisor. Up to 12 hours may be taken in a regular semester, but not more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

MTH 835. Research Project. 1-6 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MTH 840. Post-Candidacy Doctoral Dissertation. 1-6 Credit Hours.

Credits earned in this course apply towards the 12 credit hour dissertation research requirement of the graduate school. The student will enroll for credit as determined by his/her dissertation advisor. Up to 12 hours may be taken in a regular semester, but not more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

MTH 845. Research in Residence. 1 Credit Hour.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

MTH 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the Ph.D. after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Mechanical and Aerospace Engineering (MAE)

MAE 100. Introduction to Mechanical and Aerospace Engineering. 3 Credit Hours.

Basic principles of automobile engines and engine efficiency. Introduction to robots and controls. Basic concepts of solar engineering and solar energy utilization. Principles of fuel cells and hydrogen energy. Introduction to aerospace engineering including the aspects of aerodynamics, propulsion and flight dynamics. Introduction to Aerodynamics of air planes and rockets.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

MAE 111. Introduction to Engineering I. 3 Credit Hours.

Use of engineering tools and computer techniques for problem solving. Data acquisition, analysis, presentation, software design, and computer aided drafting are covered. Development of design skills through several design and building competitions. Introduction to professional ethics and intellectual property rights. Introduction to use of MATLAB, AutoCAD, and programming in C++.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MAE 112. Introduction to Engineering II. 2 Credit Hours.

Introduction to engineering design and the design process. Course topics include safety, reliability, human and environmental factors, economic analysis, and cost estimation. Professional ethics, product liability, solid modeling, machine shop orientation, and practice are also included. Group design projects.

Prerequisite: MAE 111.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MAE 202. Dynamics. 3 Credit Hours.

Discussion of motion description and analysis, application of Newton's laws, energy, and momentum principles to mechanical systems. Introduction to mechanical vibrations. Corequisite: PHY 205.

Prerequisite: CAE 210.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MAE 207. Mechanics of Solids II. 3 Credit Hours.

Discussion of displacements, instability, flexural, shear, torsional, and principle stresses. Introduction to statically indeterminate analysis.

Prerequisite: CAE 210.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MAE 241. Measurements Laboratory. 3 Credit Hours.

Introduction to experimental mechanical engineering. Basic principles of measurement, data interpretation, and uncertainty analysis are covered.

Laboratory exercises in mechanical engineering areas are included. Corequisite: EEN 201 or 205.

Prerequisite: MAE 207 and IEN 311 and ENG 107.

Components: IND.

Grading: GRD.

Typically Offered: Fall.

MAE 301. Engineering Materials Science. 3 Credit Hours.

Introduction to the physics and chemistry of the solid state including the structure and properties of metals, polymers, and ceramics. Corequisite: PHY 207.

Prerequisite: PHY 207.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MAE 302. Mechanical Behavior of Materials. 3 Credit Hours.

Application of metallurgy and mechanics to the study of the plastic deformation and fracture of metals, ceramics, and plastics.

Prerequisite: MAE 207.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MAE 303. Thermodynamics I. 3 Credit Hours.

Thermodynamic properties of materials; the first and second laws of thermodynamics; application to thermodynamic processes; introduction to heat transfer.

Prerequisite: PHY 206 and MTH 162 or MTH 172.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MAE 309. Fluid Mechanics. 3 Credit Hours.

Course topics include fluid statics, fluid flow concepts, dynamics of inviscid and viscous fluids, closed and open channel flow, and compressibility effects.

Prerequisite: CAE 210 and PHY 206.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MAE 310. Heat Transfer. 3 Credit Hours.

Application of elementary methods of solution to heat transfer problems involving steady and unsteady state conduction, radiation, and convection. Introduction of meaningful experimental data is also included.

Prerequisite: MAE 303.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MAE 341. Mechanical Design I. 3 Credit Hours.

Concepts and software for kinematics, solid modeling, and project management. Fundamentals of mechanical design: stresses in and failure of mechanical elements. Individual and group design projects.

Prerequisite: MAE 202 and MAE 207.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAE 342. Mechanical Design II. 3 Credit Hours.

Review of the design process and creativity in design. Topics include design and reliability gears, shafts, etc. Individual and group design projects are included.

Prerequisite: MAE 341.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MAE 351. Mechanics Laboratory. 2.00 Credit Hours.

Exercises in the experimental determination of the mechanical properties of materials and the static and dynamic characteristics of mechanical and structural elements. Lecture, 1 hour; laboratory, 3 hours.

Prerequisite: MAE 302.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MAE 362. Computer Analysis of Mechanical and Aerospace Engineering Problems. 3 Credit Hours.

Exploration of physical systems behavior using discrete models. Topics include numerical analysis, solid modeling, and software evaluation. Students solve engineering problems using student-developed and existing software. Corequisite: MAE 310.

Prerequisite: MAE 111, MAE 341 and MTH 211. Corequisite: MAE 310.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MAE 371. Aerodynamics. 3 Credit Hours.

Course discusses the history of flight. Topics include fundamental variables, the atmosphere, basic equations, their approximations, compressibility, viscosity, flow regimes potential flow, and aerodynamics of airfoil and wing.

Prerequisite: MAE 309.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MAE 399. Cooperative Education. 1 Credit Hour.

Practical application of classroom theory through alternating semester or summer employment with firms offering positions consistent with the student's field of study. Course may be repeated.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MAE 404. Experimental Engineering Laboratory. 2.00 Credit Hours.

Experimental analysis of problems in fluid mechanics, thermodynamics, and other areas of engineering. Lecture, 1 hour; laboratory, 3 hours.

Prerequisite: MAE 303 and MAE 309 and MAE 310.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAE 408. Heating, Ventilating, and Air Conditioning. 3 Credit Hours.

Principles and procedures for the analysis and design of heating, ventilating and air conditioning (HVAC) systems, including moist air properties and conditioning processes, heating and cooling load calculations, building energy consumption, thermal comfort, and indoor air quality. Not available for students having taken MAE 405.

Prerequisite: MAE 303.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MAE 412. System Dynamics. 3 Credit Hours.

Course topics include dynamic modeling of mechanical and thermo-fluid systems. Laplace transforms, transfer functions, energy concepts, causality, linearity, linear graph models, energy transducing system elements, frequency domain methods.

Prerequisite: ECE 201 or ECE 205 and MAE 202 and MAE 309.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAE 415. Automatic Control. 3 Credit Hours.

Introduction to system theory, transfer functions, and state space modeling of physical systems. Course topics include stability, analysis and design of PID, Lead/Lag, other forms of controllers in time and frequency domains, root locus Bode diagrams, gain and phase margins, Nichols chart, Nyquist criterion, and systems with time delay.

Requisite: Senior Status.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MAE 420. Applied Thermodynamics. 3 Credit Hours.

Cycle irreversibility; energy. Power and refrigeration cycles. Behavior of mixtures and solutions. Chemical thermodynamics, including combustion fundamentals. Compressible fluids. Advanced energy systems.

Prerequisite: MAE 303.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MAE 440. Introduction to Capstone Design. 3 Credit Hours.

Lectures and classroom discussion of the design process including product safety and manufacturability. Students are required to design, fabricate, test, and analyze the data from a design project chosen by the students. The students are required to form individual groups to accomplish the desired objectives of the design project.

Prerequisite: MAE 303 and MAE 309.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MAE 441. Design of Fluid and Thermal Systems. 3 Credit Hours.

Course topics include thermal and fluid systems design fundamentals, piping systems, selection of pumps, piping system design practices, classification of heat exchangers. Basic design methods of heat exchange equipment is also included.

Prerequisite: MAE 309 and MAE 310.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MAE 442. Capstone Design Project-I. 1 Credit Hour.

Lectures and classroom discussions cover (i) legal, ethical, and societal responsibilities of engineers, (ii) design factors such as product safety, reliability, life cycle costs, and manufacturability, and (iii) other aspects such as global market, contemporary issues, and continuous learning process. Students are required to select group design projects from the breadth of mechanical engineering activity and present project to serve as the basis for MAE 443.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MAE 443. Capstone Design Project-II. 2 Credit Hours.

Continuation of the Capstone Design Project-I course. A mechanical system is designed, implemented, documented, and presented.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MAE 444. Capstone Aerospace Design Project-I. 3 Credit Hours.

Lectures and classroom discussions cover (i) legal, ethical and societal responsibilities of engineers, (ii) design factors such as product safety, reliability, life cycle costs and manufacturability, and (iii) other aspects such as global market, contemporary issues and continuous learning process. Students are required to select group design projects from the breadth of aerospace engineering activity and present project proposals to serve as the basis for MAE 445.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MAE 445. Capstone Aerospace Design Project-II. 3 Credit Hours.

Continuation of the Capstone Aerospace Design Project-I course. An aerospace system/subsystem is designed, implemented, documented and presented.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MAE 446. Aircraft Design. 3 Credit Hours.

Concepts of aircraft design emphasizing on design layout including the airfoil geometry selection, propulsion integration, configuration layout, payload and landing gear system. Corequisite: MAE 471.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAE 470. Introduction to Aerospace Structures. 3 Credit Hours.

Course topics include mechanics of thin-walled aerospace structures, load analysis, virtual work, energy principles, stability of aerostructures, and finite element methods.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MAE 471. Flight Dynamics. 3 Credit Hours.

Course topics include aerodynamic performance, stability, control, propulsion systems, and structures. Case Studies of Aerospace Systems are also included.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAE 472. Design of Aerospace Structures. 3 Credit Hours.

Design Philosophy and principles of aerospace structures. Detailed design of wing box structure, fuselage, landing gear mechanism, fasteners and structural joints. Application of composite materials.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAE 490. Undergraduate Research. 1-3 Credit Hours.

Research Projects. Individual investigation of current problems.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MAE 501. Methods of Engineering Analysis. 3 Credit Hours.

Analysis of engineering systems in equilibrium and motion. Examples considered from mechanical, electrical, thermal and fluids engineering. Mathematical theory and computer methods for obtaining numerical solutions are developed for various cases involving discrete and continuous systems. Lecture, 3 hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAE 502. Vibrations. 3 Credit Hours.

Basic theory of free and forced vibrations of mechanical systems with and without damping. Applications to systems with one and several degrees of freedom are included.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAE 503. Internal Combustion Engines. 3 Credit Hours.

Course discusses engine types, characteristics, and operation. Topics include performance factors, fuel combustion, power cycles, knock and engine variables, exhaust emissions, fuel metering, compressors, and turbines.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAE 505. Design for Manufacturability. 3 Credit Hours.

Manufacturing concerns at design stage. Design theory and methodology. Statistical considerations in geometric dimensioning, tolerances, reliability-based design, and quality control. Producibility, design for assembly, and value engineering. Life cycle costs and optimum design using nonlinear programming and Taguchi approaches. Hands on projects on machine tools.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MAE 506. Nuclear Engineering. 3 Credit Hours.

Course topics include a review of neutron physics, chain reactions, reactor theory, steady state operation, and reactor kinetics. Control, long term reactivity changes, materials, heat transfer, and shielding are also included. Lecture, 3 hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MAE 507. Advanced Mechanics of Solids. 3 Credit Hours.

Courses discusses the basic elements of elasticity, plasticity, and viscoelasticity. Application to mechanical systems at rest and in motion are included.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MAE 508. Intermediate Heat Transfer. 3 Credit Hours.

Course discusses steady and unsteady heat transfer by conduction, convective heat transfer in laminar and turbulent fluid flow, natural convection, and heat transfer by radiation.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MAE 510. Fundamentals of Solar Energy Utilization. 3 Credit Hours.

Fundamentals basic to the design and performance analysis of thermal systems for the capture and utilization of Solar Energy.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MAE 512. Intermediate Fluid Mechanics. 3 Credit Hours.

Course topics include conservation of mass, momentum, and energy, potential flow, viscous laminar and turbulent flows, the Reynolds analogy, and Boundary-layer approximations. Gas dynamics are also discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAE 514. Advanced Internal Combustion Engines Experimental Studies. 3 Credit Hours.

Experimental mechanical engineering as it pertains to internal combustion engines. The principal measurements necessary to analyze the operation of an internal combustion engine are covered. Emphasis is placed on experiment planning, data interpretation, and error analysis.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MAE 516. Introduction to Composite Materials. 3 Credit Hours.

Course provides an introduction to composite materials and terminology. Topics include advantages offered by composite materials, current aerospace, automotive, and bio-mechanics applications, experimental results, analytical models, and effects of impact and fatigue loads. The environment's impact on composite materials' performance and design procedures are discussed. Case studies examining composite materials as efficient replacements are also included.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MAE 521. Exhaust Emission Control. 3 Credit Hours.

Course topics include automotive emissions, air pollution, combustion of homogeneous mixtures, emission control systems, Federal emission standards, and emission instrumentation and measurement. Lecture, 2 hours; Laboratory, 3 hours.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MAE 528. Fuel Cells. 3 Credit Hours.

Introduction to fuel cells, thermodynamics of fuel cells, electrochemical kinetics in fuel cells, transport phenomena in fuel cells, introduction to various types of fuel cells.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MAE 539. Heating, Ventilating and Air Conditioning System Design. 3 Credit Hours.

Course topics include basic HVAC systems, multizone systems, dual-duct systems, terminal reheat systems, variable air volume systems, induction and induction reheat systems, special applications, hydronic systems, unitary and heat pump systems, hydronic heat recovery systems, cooling and heating load calculation duct and piping design, overall system design, and integration.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAE 540. Energy Conversion. 3 Credit Hours.

Course topics include energy conversion, utilization, present and projected consumption of energy, thermodynamic principles, nuclear energy, fission and fusion reactions, hydroelectric power, and solar energy. Alternative energy sources, the hydrogen economy, and the energy-environment-economy system are also discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAE 551. Special Problems. 1-3 Credit Hours.

Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MAE 552. Special Problems. 1-3 Credit Hours.

Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MAE 570. Aero Propulsion. 3 Credit Hours.

Definition of the atmosphere, propulsion basics, rocket fundamentals, turbine fundamentals, gas turbine cycles, component matching, math and computer models, aircraft missions, cycle section, reliability, and durability are analyzed.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAE 590. Special Topics. 1-4 Credit Hours.

Subtitles describing the topics will be shown in parentheses in the class schedule, following the "Special Topics."

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAE 591. Special Topics. 1-4 Credit Hours.

Subtitles describing the topics will be shown in parentheses in the class schedule, following the "Special Topics."

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MAE 592. Special Topics. 1-4 Credit Hours.

Subtitles describing the topics will be shown in parentheses in the class schedule, following the "Special Topics."

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MAE 599. Cooperative Education. 1 Credit Hour.

Practical application of classroom theory through alternating semester or summer employment with industries offering positions consistent with the student's field of study. Course may be repeated. Periodic reports and conferences are required.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MAE 601. Methods of Engineering Analysis. 3 Credit Hours.

Analysis of engineering systems in equilibrium and motion. Examples considered from mechanical, electrical, thermal and fluids engineering. Mathematical theory and computer methods for obtaining numerical solutions are developed for various cases involving discrete and continuous systems. Lecture, 3 hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAE 602. Vibrations. 3 Credit Hours.

Basic theory of free and forced vibrations of mechanical systems with and without damping. Applications to systems with one and several degrees of freedom are included.

Components: LEC.

Grading: GRD.

MAE 603. Internal Combustion Engines. 3 Credit Hours.

Course discusses engine types, characteristics, and operation. Topics include performance factors, fuel combustion, power cycles, knock and engine variables, exhaust emissions, fuel metering, compressors, and turbines.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAE 605. Design for Manufacturability. 3 Credit Hours.

Manufacturing concerns at design stage. Design theory and methodology. Statistical considerations in geometric dimensioning, tolerances, reliability-based design, and quality control. Producibility, design for assembly, and value engineering. Life cycle costs and optimum design using nonlinear programming and Taguchi approaches. Hands on projects on machine tools.

Components: LAB.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MAE 607. Advanced Mechanics of Solids. 3 Credit Hours.

Courses discusses the basic elements of elasticity, plasticity, and viscoelasticity. Application to mechanical systems at rest and in motion are included.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MAE 608. Intermediate Heat Transfer. 3 Credit Hours.

Course discusses steady and unsteady heat transfer by conduction, convective heat transfer in laminar and turbulent fluid flow, natural convection, and heat transfer by radiation.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MAE 612. Intermediate Fluid Mechanics. 3 Credit Hours.

Course topics include conservation of mass, momentum, and energy, potential flow, viscous laminar and turbulent flows, the Reynolds analogy, and Boundary-layer approximations. Gas dynamics are also discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAE 614. Advanced Internal Combustion Engines Experimental Studies. 3 Credit Hours.

Experimental mechanical engineering as it pertains to internal combustion engines. The principal measurements necessary to analyze the operation of an internal combustion engine are covered. Emphasis is placed on experiment planning, data interpretation, and error analysis.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MAE 616. Introduction to Composite Materials. 3 Credit Hours.

Course provides an introduction to composite materials and terminology. Topics include advantages offered by composite materials, current aerospace, automotive, and bio-mechanics applications, experimental results, analytical models, and effects of impact and fatigue loads. The environment's impact on composite materials' performance and design procedures are discussed. Case studies examining composite materials as efficient replacements are also included.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MAE 621. Exhaust Emission Control. 3 Credit Hours.

Course topics include automotive emissions, air pollution, combustion of homogeneous mixtures, emission control systems, Federal emission standards, and emission instrumentation and measurement. Lecture, 2 hours; Laboratory, 3 hours.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MAE 628. Fuel Cells. 3 Credit Hours.

Introduction to fuel cells, thermodynamics of fuel cells, electrochemical kinetics in fuel cells, transport phenomena in fuel cells, introduction to various types of fuel cells.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MAE 639. Heating, Ventilating and Air Conditioning System Design. 3 Credit Hours.

Course topics include basic HVAC systems, multizone systems, dual-duct systems, terminal reheat systems, variable air volume systems, induction and induction reheat systems, special applications, hydronic systems, unitary and heat pump systems, hydronic heat recovery systems, cooling and heating load calculation duct and piping design, overall system design, and integration.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAE 640. Energy Conversion. 3 Credit Hours.

Course topics include energy conversion, utilization, present and projected consumption of energy, thermodynamic principles, nuclear energy, fission and fusion reactions, hydroelectric power, and solar energy. Alternative energy sources, the hydrogen economy, and the energy-environment-economy system are also discussed.

Requisite: Senior Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAE 651. Special Problems. 1-3 Credit Hours.

Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MAE 652. Special Problems. 1-3 Credit Hours.

Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MAE 670. Aero Propulsion. 3 Credit Hours.

Definition of the atmosphere, propulsion basics, rocket fundamentals, turbine fundamentals, gas turbine cycles, component matching, math and computer models, aircraft missions, cycle section, reliability, and durability are analyzed.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAE 690. Special Topics. 1-4 Credit Hours.

Subtitles describing the topics will be shown in parentheses in the class schedule, following the "Special Topics."

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAE 691. Special Topics. 1-4 Credit Hours.

Subtitles describing the topics will be shown in parentheses in the class schedule, following the "Special Topics."

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MAE 692. Special Topics. 1-4 Credit Hours.

Subtitles describing the topics will be shown in parentheses in the class schedule, following the "Special Topics."

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MAE 699. Cooperative Education. 1 Credit Hour.

Practical application of classroom theory through alternating semester or summer employment with industries offering positions consistent with the student's field of study. Course may be repeated. Periodic reports and conferences are required.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MAE 701. Advanced Heat Transfer--Conduction and Radiation. 3 Credit Hours.

Advanced analytical methods of solutions of boundary value problems of steady, periodic, and unsteady heat conductions. Topics include techniques of transient point, line, and plane sources and sinks, thermodynamics of radiative equilibrium, radiative exchange, geometrical factors, network, and other methods. Lecture, 3 hours.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MAE 702. Advanced Heat Transfer--Convection. 3 Credit Hours.

The analogy between heat, mass, and momentum transfers. Topics include the transfer mechanism, heat transfer to liquid metals, boiling and condensation mechanisms, heat transfer in two-phase flow, ablation heat transfer, transpiration, film cooling, and heat exchanges. Lecture, 3 hours.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MAE 705. Finite Element Methods in Mechanical and Aerospace Engineering. 3 Credit Hours.

Finite-element analysis methods for static and dynamic analysis of mechanical and aerospace structures, heat transfer analysis, and fluid flow applications. Primary emphasis is placed on underlying mechanics and numerical techniques. Consideration is also given to the use of existing programs, such as ANSYS, NASTRAN and FIDAP, designing proper meshes, and choosing the proper element. A term project is included.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MAE 706. Experimental Methods in Fluid Mechanics. 3 Credit Hours.

Course topics include methods of flow visualization, laser techniques in measurement of wall motions, conduit compliance, Newtonian and non-Newtonian properties of fluids, measurement of unsteady flow and pressure, laser Doppler anemometry, ultrasound Doppler velocimetry, electro-magnetic flowmetry, measurement of steady and unsteady wall shear stresses and boundary layers.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MAE 713. Transport Phenomena. 3 Credit Hours.

Course topics include laws of molecular transfer, the kinetic theory explanation of molecular transfer phenomena, introduction to turbulence, and molecular transfer in laminar and turbulent flows with experimental results. A unified treatment of salient aspects of momentum, heat, and mass transfer including the relationship between rate and conservation equations are also discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MAE 714. Computational Fluid Dynamics. 3 Credit Hours.

Incompressible flow equations in rectangular co-ordinates. Topics include basic computational methods for incompressible flow, three dimensional flows, compressible flow equations in rectangular coordinates, basic computational methods for compressible flows, treatment of shocks, artificial viscosities, convergence, other mesh systems, programming, testing, and information processing.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MAE 730. Mechanical Systems Optimization. 3 Credit Hours.

Optimization as an element of the engineering design process. Topics include comparative examination of unconstrained algorithms, as well as development and application of methods for constrained optimization problems. Case studies which demonstrate the theory and application of mathematical programming as a design tool are also included.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MAE 740. Continuum Mechanics. 3 Credit Hours.

Course discusses concepts that are common to all continuous media. Topics include elements of tensor analysis, motion, deformation, vorticity, material derivatives, mass balance equation, and balance of linear and angular momentum as well as energy. Stress and its geometric characterization, constitutive equations of solid and fluid type behavior, fundamental applications, and the Clausius-Duhem inequality are also covered.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MAE 751. Master's Project. 3 Credit Hours.

A required project for M.S. students in the non-thesis option.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MAE 752. Master's Capstone Project. 4 Credit Hours.

A required project for the five year BSME/MSME program.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MAE 780. Graduate Colloquium. 1 Credit Hour.

Presentations by selected speakers of weekly programs dealing with topics of interest in Mechanical Engineering. Attendance is required of all students registered in Mechanical Engineering graduate programs.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

MAE 791. Professional Communications Skills for Engineering Grad Students. 0 Credit Hours.

This course covers fundamental areas in professional communication for Engineering graduate students. Topic areas include: presenting research at conferences, writing manuscripts for publication, preparing the dissertation, the PhD comprehensive exams, effective teaching and mentoring, and obtaining positions in academia. Through interactive workshops, in-class exercises, brief presentations and assignments, students will have an opportunity to practice and strengthen necessary communication skills, developing collaborations, and developing effective presentation skills.

Components: MOD.

Grading: SUS.

Typically Offered: Fall & Spring.

MAE 792. Special Problems. 1-3 Credit Hours.

Research and/or design projects consisting of individual investigation of current problems. Offered by special arrangement only.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MAE 798. Advanced Topics. 1-3 Credit Hours.

Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MAE 810. Master's Thesis. 1-6 Credit Hours.

The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

MAE 820. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in MAE 710 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MAE 830. Pre-Candidacy Doctoral Dissertation. 1-12 Credit Hours.

Doctoral dissertation credits taken prior to Ph.D. student's candidacy. The student will enroll for credit as determined by his/her advisor. Not more than 12 hours of MAE 730 may be taken in a regular semester, nor more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

MAE 840. Post-Candidacy Doctoral Dissertation. 1-12 Credit Hours.

Doctoral dissertation credits taken after Ph.D. student has been admitted to candidacy. The student will enroll for credit as determined by his/her advisor. Not more than 12 credits in MAE 740 may be taken in a regular semester, nor more than six credits in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

MAE 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the Ph.D. and D.A., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Medicine

MDR 1000. RMC Shoulder Orthopedic Surgery. 2-4 Credit Hours.

This is a 2 or 4 week elective intended to expose the senior medical student to a comprehensive experience in orthopedic shoulder surgery. During the 2 or 4 week rotation, the student will spend approximately 50% of the time in an office clinical setting evaluating patients with shoulder disorders and 50% of the time in the operating room gaining surgical experience and insight. The surgical experience will be 60% arthroscopic shoulder surgery and 40% open shoulder surgery. The elective will be spent under the direction of one surgeon. There will be on-call responsibilities though not burdensome. For those students interested in a 4 week elective, there will be clinical outcomes research opportunities, and the opportunity to work with other orthopedic specialists within the group.

Components: MOD.

Grading: GRD.

MDR 1001. RMC Developmental and Behavioral Pediatrics. 2 Credit Hours.

This is an outpatient private practice rotation is at the office of Dr. Aronson-Ramos in Coconut Creek, located in northern Broward county. This busy private practice sees children, teens, and young adults with diverse neuro-developmental issues. The practice has a family centered approach and considerable time is spent interviewing family members and observing and interacting with patients. Students will learn about diagnostic assessments and treatment planning for the most common pediatric neuro-developmental problems. Common conditions the student will encounter include: autism spectrum disorders, ADHD, developmental delays, anxiety disorders, mild depression, syndromes, disruptive behavioral disorders, obsessive compulsive disorder, among other clinical issues.

Components: MOD.

Grading: GRD.

MDR 1002. RMC Pediatric Otolaryngology. 2-4 Credit Hours.

1. This clinical elective will expose students to the subspecialty of Pediatric Otolaryngology—Head and Neck Surgery. i) Students will have the opportunity to learn by seeing patients in our private office as well as assisting in the operating room. 2. This elective is designed with two different types student interests in mind, and will be individually tailored to the individual students interests i) PRIMARY CARE TRACK (1) For students interested in entering medical fields with a primary focus on treating children (a) E.g. Pediatrics, Family Practice, etc. (2) Students will learn evidence-based medical management of acute and chronic problems of the ears, nose, and throat in children (3) Students will hone their diagnostic skills in pediatric otoscopy, rhinoscopy, and throat examinations with direct feedback (4) Student will be exposed to common Pediatric ENT surgical procedures, so they can understand firsthand exactly what they involve ii) SURGICAL SPECIALTY TRACK (1) For students interest in becoming Otolaryngologists, or other related surgical fields (a) E.g. pediatric surgery, neurosurgery, ophthalmology, plastic and craniofacial surgery, neuroradiology (2) Students will complete all the objectives of the Primary Care Track (3) Students will be exposed to surgical decision making and the criteria for medical vs. surgical management of Pediatric ENT disorders (4) Students will experience performing pre-operative work-up and post-operative management of surgical cases (5) Students will assist in more complicated Pediatric ENT surgical procedures (6) Students will have the option of performing inpatient Pediatric ENT consultations

Components: MOD.

Grading: GRD.

MDR 1003. Public Health Sub-Internship. 4 Credit Hours.

This is a 4-week required rotation for students in the MD/MPH track. This sub-internship will expose them to the professional responsibilities and work flow of a physician trained and practicing public health. Each week the student will be rotating through various clinics within the health department. They will also have weekly interaction with the Department of Health preventive medicine residents. The student will spend time at the Palm Beach County Health Department administrative offices interacting in didactic sessions and journal club presentation with the Preventive Medicine Residents. The didactic curriculum will be linked to the residency program curriculum. Students will be scheduled to rotate through the health department's HIV and sexual health clinics (OB/GYN, STD and family planning). Students will also rotate in the JFK Internal Medicine Residency continuity clinic. They will participate in the residency clinic ambulatory didactic, journal club and interdisciplinary psychology conferences. Students will also have dedicated time to complete their fieldwork and capstone during the rotation. Students will receive a final grade (P/F), based on clinical evaluations, participation in didactics, assigned tasks and a final journal club presentation.

Components: MOD.

Grading: GRD.

MDR 1004. Remediation / Make Up Place Holder. 0 Credit Hours.

Remediation / Make up place holder.

Components: CLN.

Grading: NON.

Typically Offered: Fall & Spring.

MDR 1005. Healthcare System Quality Improvement. 2 Credit Hours.

This elective was conceived out of the recognition for the need for medical students to broaden their knowledge of the healthcare system, and their role in facilitating change within this structure. In order to be well rounded physician-leaders, students should have a basic understanding of their role in the team of healthcare professionals within the framework of our healthcare system. As such, this course aims to provide students with a better understanding of how health care disciplines outside of medicine (such as nursing, pharmacy, laboratory, etc) as well as business, administration and public health fields interact. One way to study this cross-disciplinary intersection is through familiarizing oneself with the basics of process improvement as it applies to health care. This elective provides an opportunity for third and fourth year medical students to gain knowledge of the fundamentals of healthcare quality and process improvement through a combination of didactic learning sessions and hands-on experience. Students will expand their learning environment beyond the typical classroom and clinical settings in order to complete a practical, relevant quality improvement project working in collaboration with health care administrators, allied health professionals and physicians leaders at our institution. This longitudinal experience provides students the opportunity to receive two weeks of elective credit by completing online coursework through the Institute for Healthcare Improvement Open School, classroom-based didactic sessions, "field work" outside of patient-physician encounter, and, ultimately, a scholarly project in a quality/process improvement area of their choosing.

Components: MOD.

Grading: GRD.

MDR 1006. HCH Colorectal Surgery. 2-4 Credit Hours.

This is a 2 or 4 week elective that will provide students with an exposure to a private practice specializing in colorectal surgery. The student will be one-on-one with a colorectal surgeon. Dr. Schochet specializes further in high resolution anoscopy, HIV-related anal disease and minimally invasive surgery.

Components: MOD.

Grading: GRD.

MDR 1007. RMC Plastic Surgery. 2-4 Credit Hours.

This is a 2 or 4 week rotation intended for the senior medical student who is interested in plastic surgery as a career choice or simply wants exposure to the field. The rotation will provide a comprehensive exposure to all facets of aesthetic plastic and reconstructive surgery in a community setting.

Components: MOD.

Grading: GRD.

MDR 1008. WPB VAMC Pathology. 2-4 Credit Hours.

This is a 2 or 4 week rotation intended to give the student a global concept of how the ancillary medical discipline of Pathology integrates into the patient's diagnosis and ongoing management. The student, who already has a basic working knowledge of clinical medicine, will be able to appreciate the value of appropriate choice of laboratory tests to help patient management from a laboratory perspective.

Components: MOD.

Grading: GRD.

MDR 1009. RMC Medical Education Elective. 2 Credit Hours.

This elective is grounded in the University of Miami Miller School of Medicine MD/MPH track course work. It offers students who are interested in medical education the opportunity to become familiar with what is required to build and maintain a medical curriculum as well as hone their educational skills in the classroom and clinical setting. The MD/MPH curriculum is able to provide an excellent environment for learning about medical education as it incorporates both problem-based learning and didactic lectures on the Miami campus as well as integrated and traditional clerkship models at the regional campus. This elective will allow senior students the opportunity to gain further insight into the overall goals of medical education and receive a well-rounded immersion in the areas of teaching and curriculum development.

Components: MOD.

Grading: GRD.

MDR 1010. University of Miami School of Medicine Bridge Course. 0 Credit Hours.

The intention of the new Bridge Course is to facilitate the transition of medical students from IMU to UMMSM. Students will be joining the incoming second year class after successful completion of this four week course.

Components: MOD.

Grading: GRD.

Typically Offered: Fall.

MDR 1013. Med-Peds. 4 Credit Hours.

Combined Internal Medicine and Pediatrics is a unique specialty that trains physicians in the care of patients of all ages. The elective aims to give students exposure to Med/Peds in an urban primary care practice setting. Students will see routine care of newborns, infants, children, adolescents and adults, as well as care of patients with complex pediatric diseases as they transition into adulthood.

Components: MOD.

Grading: GRD.

MDR 1014. Jupiter Medical Center Cardiothoracic Surgery. 2-4 Credit Hours.

This elective in cardiothoracic surgery will provide students the ability to learn in a preceptor based model about the management of diseases of the thorax. The student will work as an active member of the thoracic team; engaging with patients in the thoracic clinic, performing preoperative and post-operative assessment, as well as hospital rounds. The student will be introduced with hands on experience with leading edge technologies as EndoBronchial Ultra-sound (EBUS), Navigational bronchoscopy, Robotic surgery as well as VATS and open procedures.

Components: MOD.

Grading: GRD.

MDR 1015. RMC Dermatology. 2 Credit Hours.

This is a two-week elective is intended to expose the senior medical student to a spectrum of experiences in a private practice outpatient dermatology setting. During the two-week rotation, the student will spend time in a private practice dermatology office and will take part in patient visits and observe common outpatient dermatologic procedures including surgical and cosmetic procedures.

Components: MOD.

Grading: GRD.

MDR 1016. RMC Interdisciplinary Women's Health. 4 Credit Hours.

Students will be exposed to all aspects of women's health, both benign and malignant disease. This rotation is suitable for students considering careers in Primary Care, OB/GYN, GYN Oncology, Breast Surgery, General Surgery or Surgical Oncology.

Components: MOD.

Grading: GRD.

MDR 1017. RMC Interdisciplinary Women's Oncology. 4 Credit Hours.

Students will be exposed to all aspects of women's oncology, including breast, ovarian and other women's cancers, including patients with genetic risk of breast or ovarian cancer. Suitable for students considering careers in Primary Care, OB/GYN, GYN Oncology, Breast Surgery, General Surgery or Surgical Oncology.

Components: MOD.

Grading: GRD.

MDR 1018. Pediatric Mobile Clinic. 2-4 Credit Hours.

This is an outpatient rotation on the University of Miami Pediatric Mobile Clinic (PMC). The PMC is a clinic on wheels that delivers comprehensive pediatric primary care primarily to uninsured children from birth to 21 years of age throughout Miami Dade County free of charge. The PMC provides care for some of the neediest children in communities including Little Havana, West Dade, Homestead, Florida City, Little Haiti/North Miami, Sweetwater, Kendall and Miami Beach. Patients encountered reflect the diverse population of Miami-Dade County. Many are new immigrants and non-English speaking patients accessing medical care for the first time. Thirteen percent of children served have complex medical needs; 20% of the children have disabilities or developmental concerns. Clinic activities include sick and well-child care and follow up for chronic conditions. Students will work independently and responsibilities will include taking histories, conducting physical exams and discussing assessment and plans of care with the entire unit team including resident and attending physicians, nurse practitioners, social worker, therapist, and psychologist. Students also have the opportunity to do basic procedures such as throat swab, urinalysis, phlebotomy and administration of immunizations and provide counseling and education to patients and families. The students will have an opportunity to participate in telehealth and medical-legal clinics on the unit as well as special projects that are taking place. In addition, students will learn about the public health issues related to caring for uninsured, underserved populations and the social determinants that play a role in health and accessing health care. They will also learn about community resources available to underserved populations.

Components: MOD.

Grading: GRD.

MDR 1019. Senior Capstone Course: Transition to Residency. 2 Credit Hours.

The Senior Capstone Course: Transition to Residency offers fourth-year medical students an opportunity to review and hone core concepts, diagnostic/therapeutic algorithms, procedural skills, and communication tools in preparation for their first-year of residency. This is an elective course offered to a maximum of 20 students per class.

Components: MOD.

Grading: GRD.

MDR 1020. WPB VAMC Radiology. 2 Credit Hours.

Students will be able to take a 2 week elective block during their fourth year in diagnostic radiology. During the block, students will spend their time in the department of radiology with the faculty and radiology technicians. They will be responsible for working with radiologists and compiling the medical history as appropriate for the imaging modality.

Components: MOD.

Grading: GRD.

MDR 1021. HCH Interventional Radiology. 2-4 Credit Hours.

Students will be able to take a 2-4 week elective during their fourth year in diagnostic and interventional radiology. During the block, students will spend their time in the department of radiology with the faculty and radiology technicians. They will be working with radiologists on diagnostic imaging, interventional procedures, imaging and compiling the medical history as appropriate for the procedure. They should also attend any conferences or other teaching seminars offered in radiology during their assigned time.

Components: MOD.

Grading: GRD.

MDR 1022. HCH Infectious Disease. 2-4 Credit Hours.

Infectious Disease Medicine requires an understanding of the microbiology, prevention and management of diseases caused by viral, bacterial, fungal and parasitic infections, including the appropriate use of antimicrobial agents, vaccines and other immunobiologic agents. The Infectious Disease fourth year elective at Holy Cross Hospital will provide students with the skills to begin to appropriately provide preventive, diagnostic and therapeutic care for many infections. There will also be specific experiences in HIV clinics to learn about the management of patients with HIV infection.

Components: MOD.

Grading: GRD.

MDR 1024. Forensic Psychiatry. 2-4 Credit Hours.

This is a 4-week elective intended to expose the senior medical student to a spectrum of experiences in forensic psychiatry. The student will spend a portion of each week in various hospital and community settings that involve the clinical practice of aspects of forensic psychiatry.

Components: MOD.

Grading: GRD.

MDR 1025. OB/GYN Boot Camp – Transition to Residency. 2 Credit Hours.

The purpose of this course is to allow all M4 students who match in OB/GYN or related residencies to enter their intern year with a solid knowledge base and set of procedural skills related to women's health, obstetrical care and gynecologic surgery. Participation in the two-week course will allow students to practice procedural and basic surgical skills, enhance their OB/GYN knowledge, and review APGO practice guidelines. This course is intended to consolidate and expand upon skills learned on the core clerkship and OB/GYN M4 electives.

Components: MOD.

Grading: GRD.

MDR 1027. RMC Venous Vascular Disease. 2-4 Credit Hours.

Phlebology is an innovative medical specialty in the diagnosis and treatment of disorders of venous origin. This elective will introduce the subspecialty of Phlebology to medical students interested in careers in vein disease and their related specialties (vascular surgery, general surgery, interventional cardiology, cardiology, cardiothoracic surgery and interventional radiology) and to the basic understanding of fundamental venous diseases pertinent to the practice in the primary care setting of internal medicine and family medicine. Phlebology pushes the forefront of medicine into a new direction by offering diagnostics, treatment options, and research and development opportunities not previously available for the patients with venous disease. This elective is intended to expose the medical student to a spectrum of experiences in a private practice outpatient phlebology office and will take part in patient visits and observe common outpatient venous procedures including office-based surgical and cosmetic procedures in Palm Beach County.

Components: MOD.

Grading: GRD.

MDR 1028. HCH Medicine Sub-I. 4 Credit Hours.

The objective of this rotation is to provide students with hands on clinical experiences that are specifically designed to mirror their upcoming roles as interns in postgraduate training. The medical Sub-intern will master specific core competencies and basic principles of inpatient medical care. The sub-I will be a member of a medical ward team that consists of an attending, two residents, and two interns. The sub-intern will work specifically with one resident on the team who will directly oversee the sub-I and the care of his/her patients. They will focus on delivery of inpatient care to general medical patients as well as collaborate with medical and surgical subspecialties and develop efficient hand offs of care. They will attend daily afternoon report and attending rounds as well as participate in daily sign out/hand off rounds. Sub-Interns will attend weekly academic half days, weekly grand rounds, and weekly sessions with sub-internship coordinators to review key inpatient topics. Typical days begin at 7am, and alternate ending at 4pm and 7 pm. You will have one day off every week. There is no night coverage during this rotation.

Components: MOD.

Grading: GRD.

MDR 1029. Plastic Surgery SUB-I. 4 Credit Hours.

The primary objective of this rotation is to promote the development and mastery of clinical core plastic, aesthetic, and reconstructive competencies and to review common reconstructive and cosmetic conditions. The practice of evidence based medicine is promoted by encouraging students to conduct literature search for current guidelines.

Components: MOD.

Grading: GRD.

MDR 1030. Transition to Clinical Rotations. 1 Credit Hour.

Overview: Students will take part in mandatory activities, including didactic, experiential and independent activities to prepare them to take part in clinical rotations at the Regional Medical Campus. This experience is required for all students prior to participating in the MD/ MPH third year rotations. Course Design: Activities will include - BLS/ ACLS training; Online training modules for clinical sites; Physical exam practice; Didactic sessions including: Working with interpreters, critical thinking, writing summary statements, wellness during clinical rotations, professionalism based discussions, taking charge of your education, the medical record. Goals/Objectives: Provide students with the knowledge to transition effectively from pre-clinical to clinical curriculum and function as a part of medical teams in the clinical setting. Provide students with the required skills to participate in the clinical curriculum at the Regional Medical Campus sites

Components: MOD.

Grading: GRD.

MDR 1031. Minimally Invasive Gynecologic Surgery. 2-4 Credit Hours.

The objective is for the student to gain experience in the diagnostic and therapeutic approaches for various obstetrical scenarios through participating in direct patient care. Students will enhance interpersonal skills and professional conduct in the female pregnant patient encounter setting. After completing the rotation, students should feel comfortable with the management of an uncomplicated vaginal delivery and also gain insight into the management of the complicated obstetrical patient.

Components: MOD.

Grading: GRD.

MDR 1032. Pediatric Palliative Care. 2-4 Credit Hours.

OVERVIEW This is a 2-4 week elective intended to expose the senior medical student to a spectrum of life-threatening and complex medical illnesses in pediatrics. The student will work directly with a faculty physician and the Palliative Care Nurse Coordinator and interface with a broad spectrum of pediatric sub-specialties. COURSE DESIGN The student will spend time at Holtz Children's Hospital on the Palliative Care consult service, seeing patients in consultation and follow-up, and discussing them with the fellows and attending on rounds. Patients may also be seen in an Outpatient Clinic setting and during Home Visits as needed. All students will meet with Dr. Cantwell, the rotation coordinator, and interact with faculty overseeing the Palliative Care initiative. Students are expected to attend the weekly Palliative Care Interdisciplinary Conference

Components: MOD.

Grading: GRD.

MDR 1033. Introduction to Orthopedic Surgery. 2 Credit Hours.

Orthopedic Surgery is an increasingly competitive field for medical students to match into. Appropriate evaluation of the students' aptitude, interest in the field, compassion for patient treatment and strength of application is important to thoroughly guide students through the residency application process. While there are multiple facets considered in an application, many students applying to residency often lack insight into their relative competitiveness and need more concrete advice as how to improve their chances of matching. The goal of this rotation is to provide qualified students who are interested in pursuing a career in Orthopaedic Surgery an opportunity to work clinically with faculty mentors (Associate Program Director/ Faculty Advisor to Orthopaedic Surgery Interest Group), both of whom have special interest in student education. In addition to this clinical experience, the faculty will provide recommendations, guidance, and mentorship towards a possible application to orthopedic residency programs. The mentors will provide comments regarding the students' performance to the Chairman/Program Director of the Orthopaedic Surgery program here at the University of Miami.

Components: MOD.

Grading: GRD.

MDR 1034. Pediatrics Boot Camp - Transition to Residency. 2 Credit Hours.

Overview: Our immersive course offers the unique opportunity to learn what it means and what is required to become a pediatrician. It includes review of key concepts and knowledge, common pediatric physiology and pediatric illnesses, practice of common procedures, and hopes to generate self-reflection and guidance on human aspects such as professionalism, communication with families, patients, and team members, leadership, wellness, and life management skills (coping with challenges and stress of residency). **Course Design:** This 2-week elective course uses highly interactive didactics such small group case discussions, procedural skills labs, group-based simulations, team building exercises, and lectures. It provides one-on-one conversations with current PGY1's (who will be on the cusp of completion of their intern year), Chief Residents, and pediatric faculty. It is divided equally into one inpatient and one outpatient week. A sample schedule is provided with this course description (see below).

Components: MOD.

Grading: GRD.

Typically Offered: Spring.

MDR 1035. Developmental-Behavioral Pediatrics. 2-4 Credit Hours.

Overview: This is a 4-week elective to expose the medical student to a spectrum of experiences in developmental and behavioral pediatrics. The student will rotate through different clinic/community settings and see patients based on the emphasis at that location. **Course Design:** The student will spend time at the Mailman Center for Child development as well as the pediatric University of Miami Hospital Clinics. The student will gain exposure to developmental-behavioral pediatrics through observation and participation in the Behavioral Pediatrics Clinic, the Interdisciplinary Developmental Service, the Developmental Screening clinic, and various aspects of the Leadership Education in Neurodevelopmental and related Disabilities (LEND) trainee program. At the various clinics, the student will learn the aspects included in a comprehensive developmental pediatrics history as well as participate in discussions to help decide treatment options. Finally, the student will complete the LEND program by attending weekly classes at the Mailman Center and creating a leadership/advocacy project.

Components: MOD.

Grading: GRD.

Typically Offered: Fall & Spring.

MDR 1036. Point Care of Ultrasound Elective. 2-4 Credit Hours.

This is an intensive 2-week elective, which will teach the senior medical student point-of-care, bedside emergency ultrasound. The medical student will gain knowledge and competency, through supervised and independent scanning with an ultrasound machine in the JMH Emergency Department, online modules, scholarly articles, image review and a final US presentation. This elective is opened to students applying into all specialties of medicine, not just emergency medicine. No Emergency Medicine SLOE's will be written based off this elective rotation.

Components: MOD.

Grading: GRD.

MDR 1037. Emergency Medicine Boot Camp - Transition to Residency. 2 Credit Hours.

The Emergency Medicine Boot Camp – Transition to Residency elective offers fourth-year medical students matching into emergency medicine the ability to enhance their critical thinking and clinical skills at the level expected of an incoming emergency medicine intern. With an effort to maximize our students' focus for successful preparation and transition into residency, this elective will review undifferentiated clinical presentations for common ED chief complaints, infuse in specialty-specific, basic science anatomy, physiology and pharmacology review, expand on the students' repertoire of procedural and clinical skills and allow for small group collaboration within the course and interdisciplinary collaboration with other specialty-specific capstone bootcamps. Elements of resident professionalism, wellness, time management and personal organization will also be addressed. This elective course is offered to all Miami and Regional Campus emergency medicine bound students. This Emergency Medicine Bootcamp elective is part of the larger Senior Capstone Courses focused on the Transitions to Residency educational initiative. While emergency medicine students can enroll in this course independently, the highest yield is if completed in conjunction and after the broader Senior Capstone Course: Transitions to Residency (MDR 1019).

Components: MOD.

Grading: GRD.

MDR 500. Medical Curriculum 5 MD/PHD Research. 18 Credit Hours.**Components:** LEC.**Grading:** GRD.**MDR 501. Molecular Basis of Life. 4 Credit Hours.**

The Molecular Basis of Life is a course that gives the students the fundamental elements of medical biochemistry, molecular and clinical genetics. The medical biochemistry section includes the basic fundamentals of amino acids, vitamins, proteins, lipids and carbohydrates. The pathways of metabolism and energy production are also studied. The fundamentals of molecular and clinical genetics are discussed. The concepts such as translation, transcription, mutation, single and multiple gene effects are discussed.

Components: LEC.**Grading:** GRD.**MDR 502. Cellular Function and Regulation. 4 Credit Hours.**

The Cellular Function and Regulation course is an introductory course into normal cellular physiology and the general principles of pharmacology. Mechanisms of normal cellular function that are fundamental to all cellular systems are taught during this course. The general concepts of pharmacokinetics including drug delivery, distribution in the body, metabolism, and elimination are discussed during the introduction to pharmacology.

Components: LEC.**Grading:** GRD.**MDR 503. Host Defense, Pathogens, and Pathology. 6 Credit Hours.**

The Host Defenses and Pathogens course is an introductory course that deals with the general principles of immunobiology and microbiology. It also provides students with an introduction to the principles of pathology. Students are introduced into the normal functioning of the immune defense system and abnormal functioning during disease such as HIV and cancer. The microbiology section of the course deals primarily with prototypical pathogens of bacterial, viral, fungal or parasitic origin. The pathology section deals with the fundamentals of pathological process such as inflammation, necrosis, neoplasia and thrombosis.

Components: LEC.**Grading:** GRD.**MDR 504. Human Structure. 8 Credit Hours.**

The Human Structure course contains 4 sections that include gross anatomy of the human body, histology of tissues, introduction to cell biology, and introduction to embryology. In the gross anatomy section students are expected to learn the various structures of the human body and their relationships to each other. The gross anatomy course uses dissection of human cadavers and body imaging in the form of CT and MRI to assist in the teaching process. The microscopic anatomy of the various structures of the body are studied in the histology section of the course. The cell biology section introduces the students to various components of the cell and the various functions of these organelles. In the embryology section students learn about the development of the human from the union of the egg and sperm to the birth of the baby.

Components: LEC.**Grading:** GRD.**MDR 505. Introduction to Epidemiology and Infectious Disease. 2 Credit Hours.**

The principles of epidemiology including the distribution, determinants of disease frequency and their investigation. There is a review of biostatistics to help with the evaluation of scientific investigations. The basic concepts of infectious processes and disease are discussed during the infectious disease section of the course. The student will learn about the interaction between the human host and the pathogen. There are discussions on the impact of infection on the host and society. The pharmacology of the antimicrobials is discussed. The principles of epidemiology are illustrated in the study of infectious processes. (This course is no longer given. Instead Epidemiology is a separate course in the second year curriculum as it is shown below.)

Components: LEC.**Grading:** GRD.**MDR 506. Neuroscience and Behavioral Science. 8 Credit Hours.**

The Neuroscience and Behavioral Science module is an interdisciplinary approach to the study of the nervous system. It incorporates the basic sciences of neuroanatomy, neurophysiology, neurochemistry, pharmacology, neuropathology, microbiology, immunology, and behavioral psychology. Students learn the basic structure and function of the nervous system from the brain to the muscle and motor units. Common disease processes that affect the nervous system are discussed with respect to the basic science of the system. The basic and clinical aspects of behavioral science are also a major portion of the module. Students are introduced to the basic science of behavioral medicine and the common diseases that are encountered. The clinical sciences of neurology, neurosurgery, otolaryngology and psychiatry are represented and offer the clinical applications of the basic sciences.

Components: LEC.**Grading:** GRD.

MDR 507. Cardiovascular System. 7 Credit Hours.

The Cardiovascular System module is an interdisciplinary approach to the study of the cardiovascular system including the heart and blood vasculature. The basic sciences of anatomy, physiology, pharmacology, biochemistry, pathology and immunology are integrated with the clinical sciences of cardiology in the study of cardiac function and its response to changes in the body with aging from birth to the elderly. The principles of preload, afterload, cardiac output, cardiac failure, EKG, echo and stress testing are discussed. The effects of congenital defects and the surgical procedures to correct these defects are also discussed.

Components: LEC.

Grading: GRD.

MDR 508. Problem Based Learning I. 0.25 Credit Hours.

The Problem Based Learning I course has the following objectives: 1) integrate different key concepts in human structure, biochemistry, genetics, microbiology and immunology within a case based, problem-centered format and 2) promote self-directed learning and problem solving. PBL I employs small group teaching, with trained facilitators, where students engage in applying basic science principles to clinical problems.

Components: MOD.

Grading: GRD.

MDR 509. Problem Based Learning II. 0.25 Credit Hours.

The Problem Based Learning II course has the following objectives: 1) integrate different key concepts in basic sciences related to medicine within a case based, problem-centered format and 2) promote self-directed learning and problem solving. PBL II employs small group teaching, with trained facilitators, where students engage in applying basic science principles to clinical problems.

MDR 518. Doctoring I the Art and Practice of Medicine I. 4 Credit Hours.

Include eight themes which are: Behavioral Medicine and Special Populations, Clinical Skills, Complementary and Alternative Medicine, Evidence-Based Medicine, Geriatrics - Pain Management and Palliative Care, Population Health, Professionalism and Systems-Based Care.

Components: LEC.

Grading: GRD.

MDR 519. Doctoring II: The Art and Practice of Medicine II. 4 Credit Hours.

Include eight themes, which are: Behavioral Medicine and Special Populations, Clinical Skills, Complementary and Alternative Medicine, Evidence-Based Medicine, Geriatrics - Pain Management and Palliative Care, Population Health, Professionalism and Systems-Based Care.

Components: LEC.

Grading: GRD.

MDR 530. Epidemiology I. 1 Credit Hour.

The principles of epidemiology including the distribution, determinants of disease frequency and their investigation. There is a review of the biostatistics to help with the evaluation of scientific investigations.

Components: LEC.

Grading: GRD.

MDR 550. CMC Introduction to the Medical Profession. 3 Credit Hours.

This course provides the foundation of the MD/MPH curriculum areas of emphasis. The course covers the role and responsibilities of physicians, concepts of population medicine and professionalism. Along with didactic sessions, the course utilizes communication skills laboratories designed to equip students for the community physician practice settings. CMC stands for Continuity Medicine Curriculum.

Components: LEC.

Grading: GRD.

MDR 551. CMC Fundamentals of Biomedical Science I. 8 Credit Hours.

The course covers the basic concepts and vocabulary in the disciplines of cell biology and physiology, genetics and biochemistry, immunology, microbiology, anatomy, histology, pharmacology, and pathology. This course will meet for about 20 hours per week with approximately 10 hours of lecture per week and 10 hours per week of small group or other non-lecture sessions. Week-long clinical cases will cover specific learning objectives for the various basic science disciplines, are facilitated by a faculty tutor and lectures are designed to complement the clinical cases. FBS I is a prerequisite for FBS 2 and 3. CMC stands for Continuity Medicine Curriculum.

Components: LEC.

Grading: GRD.

MDR 552. CMC Integration of Public Health and Medicine 1. 1 Credit Hour.

Components: MOD.

Grading: GRD.

MDR 553. CMC Physicianship Skills I. 2 Credit Hours.

The PS course will expose students to competencies that physicians must master to provide high quality and effective care in today's health care system. The course covers the fundamentals of process evaluation, quality management, out-comes assessment, patient satisfaction, patient safety, systems-based care, interprofessional team care, and complex chronic disease management. The PS course will meet for 4 - 5 hours per week. PS I is a prerequisite for PS II. CMC stands for Continuity Medicine Curriculum.

Components: LEC.

Grading: GRD.

MDR 554. CMC Fundamentals of Biomedical Science II. 5 Credit Hours.

FBS 2 continues from FBS1 with the basic concepts and vocabulary in the disciplines of cell biology and physiology, genetics and biochemistry, immunology, microbiology, anatomy, histology, pharmacology, and pathology. This course will meet for about 20 hours per week with approximately 10 hours of lecture per week and 10 hours per week of small group or other non-lecture sessions. Week-long clinical cases will cover specific learning objectives for the various basic science disciplines, are facilitated by a faculty tutor and lectures are designed to complement the clinical cases. CMC stands for Continuity Medicine Curriculum.

Components: LEC.

Grading: GRD.

MDR 555. CMC Fundamentals of Biomedical Science III. 6 Credit Hours.

FBS 3 continues from FBS2 with the basic concepts and vocabulary in the disciplines of cell biology and physiology, genetics and biochemistry, immunology, microbiology, anatomy, histology, pharmacology, and pathology. This course will meet for about 20 hours per week with approximately 10 hours of lecture per week and 10 hours per week of small group or other non-lecture sessions. Week-long clinical cases will cover specific learning objectives for the various basic science disciplines, are facilitated by a faculty tutor and lectures are designed to complement the clinical cases. CMC stands for Continuity Medicine Curriculum.

Components: LEC.

Grading: GRD.

MDR 556. CMC Integration of Public Health and Medicine 2. 2 Credit Hours.

The IPC course is designed to allow students to develop their fundamental clinical skills (communication, history taking and physical exam skills) in continuity of care environments (community practice setting and Department of Health clinics). The IPC course will meet for 4-5 hours per week and is closely coordinated and integrated with the PS course. Community and faculty preceptors will supervise and evaluate students longitudinally. IPC I is a prerequisite for IPC II. CMC stands for Continuity Medicine Curriculum.

Components: MOD.

Grading: GRD.

MDR 557. CMC Physicianship Skills II. 3 Credit Hours.

The PS course will continue to expose students to competencies that physicians must master to provide high quality and effective care in today's health care system. The course covers the fundamentals of process evaluation, quality management, outcomes assessment, patient satisfaction, patient safety, systems-based care, interprofessional team care, and complex chronic disease management. The PS course will meet for 4 - 5 hours per week. PS I is a prerequisite for PS II. CMC stands for Continuity Medicine Curriculum.

Components: LEC.

Grading: GRD.

MDR 558. CMC Neuroscience and Behavioral Science. 9 Credit Hours.

The module is an interdisciplinary approach to the study of the nervous system. In the context of the principles of continuity medicine and chronic illness, the module includes neurophysiology, neurochemistry, pharmacology, neuropathology, microbiology, immunology, and behavioral psychology. Progressing from neuroanatomy to gross anatomy, students learn the structure and function of the nervous system from the head/brain, and neck, to the muscle and motor units. Students are introduced to the basic science of behavioral medicine and the common diseases that are encountered. Finally, the basic sciences are integrated to the clinical sciences of neurology, neurosurgery, otolaryngology and psychiatry. A combination of didactic, small-group and laboratory methods are used.

Components: LEC.

Grading: GRD.

MDR 559. CMC Cardiovascular System. 7 Credit Hours.

The module is an interdisciplinary approach to the study of the cardiovascular system including the heart and blood vasculature. The basic sciences are intergrated with the clinical sciences of cardiology in the study of cardiac function and its response to changes in the body with aging from birth to the elderly. The module seeks to place cardiovascular disease and management into the context of continuity medicine and chronic illness using a combination of didactic, small-group and simulation teaching methods.

Grading: GRD.

MDR 610. Respiratory System. 5 Credit Hours.

The module is an interdisciplinary study of the respiratory system and includes the anatomy, physiology, immunology, pathology, radiology and biochemistry of the system. The pathophysiology is illustrated with clinical vignettes. Students are also exposed to the evaluation of normal physiological measurement of the respiratory system and the principles of artificial ventilation. Students should be able to solve clinical problems in pulmonary medicine and critical care by the end of the module.

Components: LEC.

Grading: GRD.

MDR 611. Accl Basic Science Curriculum. 18 Credit Hours.

Components: LEC.

Grading: GRD.

MDR 612. Renal System. 5 Credit Hours.

The module is an interdisciplinary course of the renal system. Students study the structure, function and pathophysiology of the kidneys and genitourinary tract. General concepts of acid-base and electrolyte balance are studied in the normal and diseased states. The course provides a foundation for dealing with the various diseases of the renal system encountered during the clinical years.

Components: LEC.

Grading: GRD.

MDR 613. Endocrine and Reproductive Systems. 5 Credit Hours.

The module is an interdisciplinary course that deals with the normal endocrine development, function, pathophysiology and disease processes. Students are exposed to problems solving of clinical cases involving endocrine and reproductive medicine. Students will be exposed to various evaluation and treatment tools available at this time.

Components: LEC.

Grading: GRD.

MDR 614. Gastrointestinal System and Nutrition. 5 Credit Hours.

The module is an integrated course on the molecular and cellular processes that involve the digestive system and its associated organs. The module covers the normal structure and function and the pathophysiological processes that occur during disease states of the digestive organs. Nutrition and the clinical aspects of obesity and bariatric surgery are discussed.

Components: LEC.

Grading: GRD.

MDR 615. Hematology/Oncology. 5 Credit Hours.

The module is an introductory course that covers basic hematology that is essential to the practice of medicine. Students are introduced into the variations in hematological parameters that are used in the diagnosis and monitoring of common hematological diseases. The second half of the module serves as a basic overview of cancer and includes basic concepts of oncogenesis, epidemiology, biology of cancer, pathology and the role of the immune system. Students are introduced to the various treatment modalities.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MDR 616. Dermatology and Ophthalmology. 2 Credit Hours.

The Dermatology and Ophthalmology module is an introductory course that covers the basic pathophysiology and clinical aspects of dermatology and ophthalmology that are essential for a general physician. The module covers the normal structure and function of skin, and eye. Common disease diseases of the skin and eye are discussed.

Components: LEC.

Grading: GRD.

MDR 618. Respiratory. 4 Credit Hours.

Components: LEC.

Grading: GRD.

MDR 619. Case Based Learning - Infection and Inflammation. 4 Credit Hours.

During this four week segment of the curriculum students are divided into small groups and will work with a faculty facilitator who has been trained in small group learning. Students work as a group on clinical scenarios. They are expected to work as both teacher and student during this time. Students are to focus on clinical cases involving rheumatological and infectious disease problems. They receive guiding questions with each case to assist with their learning process. The students will have opportunities to interact with experts in the various areas covered in the cases during consultation sessions. The small group sessions are case driven. The facilitator is there to assist with group dynamics and not to serve as a teacher. The student groups work through a clinical scenario during the three two-hour sessions a week.

Components: LEC.

Grading: GRD.

MDR 620. Problem Based Learning III. 0.5 Credit Hours.

During this segment of the curriculum, students are divided into small groups and will work with a faculty facilitator who has been trained in problem based learning. Students work as a group on clinical scenarios. They are expected to work as both teacher and student during this time utilizing the knowledge that they have gained during the core and organ system modules to work through these cases and develop a differential diagnosis and treatment plan for the patients. The small group sessions are student driven. Self-directed learning is emphasized. This allows the students to use their knowledge of basic sciences and to hone the skills of presentation to a clinical team in preparation for their clinical years.

Components: MOD.

Grading: GRD.

MDR 621. Problem Based Learning IV. 0.5 Credit Hours.

During this segment of the curriculum, students are divided into small groups and will work with a faculty facilitator who has been trained in problem based learning. Students work as a group on clinical scenarios. They are expected to work as both teacher and student during this time utilizing the knowledge that they have gained during the core and organ system modules to work through these cases and develop a differential diagnosis and treatment plan for the patients. The small group sessions are student driven. Self-directed learning is emphasized. This allows the students to use their knowledge of basic sciences and to hone the skills of presentation to a clinical team in preparation for their clinical years.

MDR 628. Doctoring III: The Art and Practice of Medicine III. 4 Credit Hours.

Include eight themes which are: Behavioral Medicine and Special Populations, Clinical Skills, Complementary and Alternative Medicine, Evidence-Based Medicine, Geriatrics - Pain Management and Palliative Care, Population Health, Professionalism and Systems-Based Care.

Components: LEC.

Grading: GRD.

MDR 629. Doctoring 4 the Art and Practice of Medicine. 4 Credit Hours.

Include eight themes which are: Behavioral Medicine and Special Populations, Clinical Skills, Complementary and Alternative Medicine, Evidence-Based Medicine, Geriatrics - Pain Management and Palliative Care, Population Health, Professionalism and Systems-Based Care.

Components: LEC.

Grading: GRD.

MDR 630. Epidemiology II. 1 Credit Hour.

The principles of epidemiology including the distribution, determinants of disease frequency and their investigation. There is a review of biostatistics to help with the evaluation of scientific investigations.

Components: LEC.

Grading: GRD.

MDR 650. CMC Gastrointestinal System and Nutrition. 5 Credit Hours.

The course continues the interdisciplinary approach to the study of all the systems included are the gastrointestinal system and the liver, and the normal structure-function and the pathophysiological processing during disease states of the digestive organs. The course seeks to place GI disease and nutrition management into the context of continuity medicine and chronic illness using a combination of didactic, and small-group teaching methods.

Components: LEC.

Grading: GRD.

MDR 651. CMC Respiratory System. 5 Credit Hours.

The course continues the interdisciplinary approach to the study of all the systems. It builds upon the knowledge of respiratory anatomy from the FBS course sequence and covers physiology, immunology, pathology, radiology, and biochemistry of the system. Students are also exposed to the evaluation of normal physiological measurement of the respiratory system and the principles of artificial ventilation. The course seeks to place acute and chronic respiratory disease into the context of continuity medicine using a combination of didactic, clinical case presentations and small-group teaching methods.

Components: LEC.

Grading: GRD.

MDR 652. CMC Renal System. 5 Credit Hours.

The course continues the interdisciplinary approach to the study of all the systems. The structure, function and pathophysiology of the kidneys and genito-urinary tract are covered. General concepts of acid-base and electrolyte balance are studied in the normal and acute and chronic diseased states. The course seeks to place renal disease into the context of continuity medicine and chronic illness and care, and uses a combination of didactic, clinical case presentations, simulation and small-group teaching methods.

Components: LEC.

Grading: GRD.

MDR 653. CMC Inflammation and Infectious Disease. 4 Credit Hours.

The course uses an interdisciplinary approach to present basic concepts of rheumatology (inflammation) and uses these disciplines to present the basic concepts of infectious processes and disease. The course uses a combination of didactic, clinical case presentations, and small-group teaching methods.

Components: LEC.

Grading: GRD.

MDR 654. CMC Hematology and Oncology. 5 Credit Hours.

The course presents basic hematology concepts essential to the practice of medicine. Variations in hematological parameters used in diagnosis and monitoring of common hematological diseases are presented and integrated with a basic overview of cancer. This includes basic concepts of oncogenesis, epidemiology, biology of cancer, pathology and the role of the immune system. The course seeks to place hematological disorders and cancer into the context of continuity medicine and chronic illness and care, and uses a combination of didactic, clinical case presentations and small-group teaching methods.

Components: LEC.

Grading: GRD.

MDR 655. CMC Endocrinology and Reproductive System. 5 Credit Hours.

The course is an interdisciplinary approach to the study of normal endocrine, function, pathophysiology and disease processes. Students are exposed to problem solving of clinical cases involving endocrine and reproductive medicine. The course seeks to place endocrine disorders and management into the context of continuity medicine and chronic illness using a combination of didactic and small-group teaching methods.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MDR 656. CMC Integration of Public Health and Medicine 3. 5.5 Credit Hours.

The IPC3 course is designed to allow students to apply their clinical skills (communication, history taking and physical exam skills) in continuity of care environments (community practice setting and Department of Health clinics). The IPC3 course will meet for 4-5 hours per week and is closely coordinated and integrated with the PS3 course. Community and faculty preceptors will supervise and evaluate students longitudinally.

Components: MOD.

Grading: GRD.

Typically Offered: Fall & Spring.

MDR 657. CMC Physicianship Skills 3. 5 Credit Hours.

The PS3 course exposes students to more advanced competencies that physicians must master to provide high quality and effective care in today's health care system. The course reviews and expands upon the process of evaluation, quality management, outcomes assessment, patient satisfaction, patient safety, systems-based care, interprofessional team care, and complex chronic disease management. The PS3 course will meet for 4-5 hours per week.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MDR 659. CMC Dermatology and Ophthalmology. 2 Credit Hours.

The course uses an interdisciplinary approach to present basic concepts of Dermatology and Ophthalmology and uses these disciplines to present the basic concepts of infectious processes and disease. The course uses a combination of didactic, clinical case presentations, and small-group teaching methods.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MDR 700. Medical Curriculum 7. 18 Credit Hours.

Components: LEC.

Grading: GRD.

MDR 701. Introduction to Radiology. 0 Credit Hours.

Components: LEC.

Grading: GRD.

MDR 702. Interprofessional Patient Safety. 1 Credit Hour.

The Patient Safety/Transition to the Wards module is a one week module geared towards preparing students for their role in the health care field. The goals are to provide students with the requisite knowledge, skills, behaviors and attitudes to not only deliver safe patient care but also to be able to identify and solve patient safety problems. The course involves a series of interactive didactic sessions and simulated role play at the UM-JMH Center for Patient Safety.

Components: MOD.

Grading: GRD.

MDR 703. Core Family and Community Medicine. 4 Credit Hours.

The family medicine and geriatric medicine clerkship is a community based primary care rotation where students are exposed to patients in the outpatient setting. Students are introduced to the whole patient approach to medical care. They are expected to gain a working knowledge of the types of medical conditions that are commonly seen in the primary care setting. They will become familiar with managed care concepts of health delivery. They should gain an appreciation for how cultural and social influences affect the perception of health and management of diseases. They should acquire an understanding of the concepts of continuity and coordination of care. Students will also spend one week of intensive training experience on the acute care of elders unit at Jackson Memorial Hospital. They will become proficient in the use of assessment instruments in the evaluation of the geriatric patient. Students are evaluated on their knowledge of family medicine and geriatrics, their interpersonal skills, and their professionalism.

Components: LEC.

Grading: GRD.

MDR 705. Core Generalist Primary Care Clerkship. 4 Credit Hours.

The generalist primary care clerkship exposes students to ambulatory medicine. Students are expected to become competent in the properties of common diseases seen in an outpatient setting. They will gain skills and competence in the history taking, physical examination, diagnosis and treatment of these conditions. They will also rotate through a variety of specialty care areas and will evaluate patients with the guidance of specialty care faculty. Students are evaluated on their knowledge of ambulatory medicine, their interpersonal skills, and their professionalism.

Components: LEC.

Grading: GRD.

MDR 706. Core Internal Medicine Clerkship. 8 Credit Hours.

The Internal Medicine clerkship is a rotation where students are expected to further develop their skills of history taking, physical examination, and observation. They are to gain knowledge about the diagnosis and treatment of medical conditions. They will practice their skills of communication with their team, the hospital staff, and their patients. The clerkship has didactic activities in addition to the bedside teaching, student report, and patient oriented problem solving sessions. Students are evaluated on their knowledge of medicine, their interpersonal skills, and their professionalism.

Components: LEC.

Grading: GRD.

MDR 707. Neurology Clerkship. 4 Credit Hours.

The Neurology Clerkship exposes students to common and emergency neurological diseases. Students have the option of exposure to Pediatric Neurology during the clerkship. Students are expected to become competent in the neurological examination, diagnosis, evaluation by various modalities of imaging and laboratory testing, and treatment options. Students are exposed to inpatient ward, consult and stroke services. Students are evaluated on their knowledge of neurology, their interpersonal skills, and their professionalism.

Components: LEC.

Grading: GRD.

MDR 708. Core Obstetrics and Gynecology Clerkship. 6 Credit Hours.

The Ob/Gyn clerkship offers clinical and didactic learning opportunities in the varied settings of ob/gyn practice - the operating room, inpatient wards, the clinic, labor and delivery, and the ultrasound suite. Students are assigned to JMH, community hospital and private practice sites to varying degrees to meet learning requirements. Students learn the clinical presentations and differential diagnosis of the conditions comprising the majority women's reproductive health care - with nearly even distribution of obstetrics and gynecology topics. On site clinical learning is supplemented with case based and problem based didactic learning, both in the intermediate sized classroom and small group learning settings. Ethical reasoning, EBM, suturing and communications skills and issues are covered in the workshop format. Students will learn how women's cultural, educational and socioeconomic backgrounds affect their access to health care their values about fertility, childbearing, and contraception, the consequences of sexual behaviors and their understanding of their bodies throughout life, and their power in relationships and the role of sexuality in their lives. The evaluation system focuses on medical knowledge, communications skills and EBM skills.

Components: LEC.

Grading: GRD.

MDR 709. Core Pediatrics Clerkship. 6 Credit Hours.

The clerkship exposes the students to the spectrum of the pediatric population from neonates to adolescence. It is divided into experiences on the clinical ward service, ambulatory, emergency room, neonatal and comprehensive healthcare program. Students are expected to become competent in the examination of the child and in common pediatric diseases. The teaching is divided between ward based teaching rounds and didactic sessions. Students are evaluated on their knowledge of pediatrics, their interpersonal skills, and their professionalism.

Components: LEC.

Grading: GRD.

MDR 710. Core Psychiatry Clerkship. 6 Credit Hours.

The clerkship exposes students to psychiatric disorders and the psychiatric patient. Students are expected to become competent with obtaining a psychiatric history and performing a mental status examination. They are expected to identify and evaluate patients with neuropsychiatric and substance abuse symptoms. They are expected to recognize the spectrum of ages affected by psychiatric disorders and brain diseases. They will become acquainted with the laboratory and imaging testing relevant to the clinical manifestations of psychiatric disorders. They are expected to be knowledgeable as to the various medications used in the treatment of these diseases, including potential drug interactions. Students are evaluated on their knowledge of psychiatry, their interpersonal skills, and their professionalism.

Components: LEC.

Grading: GRD.

MDR 711. Core Surgery Clerkship. 8 Credit Hours.

The surgical clerkship is a rotation where students gain knowledge about diseases that have surgery as a treatment modality. Students are exposed to the operating room and assist in surgical procedures. They are expected to gain an understanding of the pathophysiology of the disease processes and have a basic knowledge of the diagnosis and treatment of them. They are expected to develop the basic surgical skills that are expected of a general physician. Students evaluated on their knowledge of surgery, their interpersonal skills, and their professionalism.

Components: LEC.

Grading: GRD.

MDR 712. Anesthesiology Clerkship. 2 Credit Hours.

The anesthesia clerkship exposes students to the various techniques used by anesthesiologists during surgical procedures and exposes them to the pre-operative evaluation of patients and post-operative care. Students will use the simulation training devices to become competent in the techniques of management of a patient and their airway. Students will become knowledgeable on the pharmacology of the various medications used in anesthesia. Students are evaluated on their knowledge of anesthesia, their interpersonal skills, and their professionalism. No interviewing during Thanksgiving block.

Components: LEC.

Grading: GRD.

MDR 714. Caring for Families and Communities. 8 Credit Hours.

Caring for Families and Communities (CFC) clerkship will help prepare students for the unique and evolving role of the physician in the ever changing health care system. During this 8-week clerkship, you will have many opportunities to work closely with patients, primary care physicians, and other members of the health care team in the varied clinical settings in which future physicians will encounter patients. You will be learning and practicing both the traditional and less traditional skills necessary for our future physicians. You will learn about the importance of meeting the healthcare needs of communities of patients as well as individual patients and will develop some of the knowledge and skills necessary to fulfill these fundamental physician responsibilities. No matter what career path you choose, the experiences, knowledge, and skills that you gain from this clerkship are intended to help you become the best physician you can be.

Components: LEC.

Grading: GRD.

MDR 756. RMC Core Integrated Internal Medicine Clerkship. 12 Credit Hours.

The Integrated Medicine clerkship offers students parallel training in internal medicine primarily, geriatrics and palliative care. Radiology is included as it supports clinical decision making in internal medicine. Students will acquire the clinical skills, critical thinking skills, knowledge, and professional behaviors necessary to provide comprehensive medical care for adults and develop experience in the assessment, evaluation, and basic management of important, common problems encountered in inpatient internal medicine. The objectives for the clerkship are derived from the internal medicine and geriatrics clerkships on the main campus and from the Clerkship Directors in Internal Medicine guidelines. Students will spend half the rotation as part of a team with the UMMSM Internal Medicine residents based at JFK and half the rotation assigned to an internist preceptor and spend their time in both inpatient and outpatient settings. Students will also participate in a geriatrics consult service and a palliative care consult service. Academic half-days will include lecture and small-group activities in the individual disciplines along with integrated multidisciplinary activities. Assessment will be achieved by the use of the NBME Subject Exam in Medicine, clinical performance evaluation by faculty preceptor, observed clinic histories and physical exams and written case reports.

Components: LEC.

Grading: GRD.

MDR 757. JFK Neurology Clerkship. 4 Credit Hours.

The purpose of the JFK Neurology clerkship at JFK Medical Center is to provide students with an opportunity to acquire a foundation of knowledge and skills to care for patients with neurological conditions. The primary goals of the Neurology Clerkship are for you to gain competence in taking a neurologic history and performing a neurologic exam, and use them to aid in localization and diagnosis of neurologic disease. Also, it is hoped students will develop knowledge, attitudes, and skills necessary to assess, diagnose and refer patients presenting in the primary care setting with neurologic complaints. Students will have the opportunity to explore the field of neurology as a potential career path through exposure to a variety of complaints, diagnoses, patient encounters, and case-based didactics. Students are evaluated on their knowledge of neurology, their interpersonal skills, and their professionalism.

Components: LEC.

Grading: GRD.

MDR 758. RMC Core Obstetrics and Gynecology Clerkship. 6 Credit Hours.

By the end of the clerkship, students will demonstrate the ability to obtain a complete obstetric and gynecologic age-appropriate history and perform the physical examination which elicits information necessary for diagnosis and treatment. Students will complement their clinical experience in the office and on the wards with independent directed study and recognize the importance of interdisciplinary collaboration in optimizing clinical outcomes for patients, work effectively with other health professionals, and demonstrate knowledge of the role of obstetrics and gynecological care in the broader community and health care system. Academic half-days will include lecture and small-group activities. Assessment will be achieved by the use of the NBME Subject Exam in Obstetrics and Gynecology, clinical performance evaluation by faculty preceptor, observed structured clinical examination (OSCE), written case reports and journal club.

Components: LEC.

Grading: GRD.

MDR 759. RMC Core Pediatrics Clerkship. 6 Credit Hours.

By the end of this clerkship, students will demonstrate the ability to obtain a complete age-appropriate pediatric history which elicits information necessary for diagnosis and treatment and will demonstrate knowledge of appropriate health supervision, anticipatory guidance, and preventive medicine in pediatrics. Students will demonstrate interpersonal and communication skills that result in effective information exchange and collaboration with patients, their families, and other health care providers. Students will be assigned to a general pediatrician preceptor and spend their time in the clinical ward service, ambulatory, emergency room, neonatal and the hospital setting, and a comprehensive healthcare program in private practice. Academic half-days will include lecture and small-group activities. Assessment will be achieved by the use of the NBME Subject Exam in Pediatrics, clinical performance evaluation by faculty preceptor, observed clinical histories and physical exams and written case reports.

Components: LEC.

Grading: GRD.

MDR 760. RMC Core Psychiatry Clerkship. 6 Credit Hours.

By the end of this clerkship, students will demonstrate the ability to obtain a complete psychiatric history, recognize relevant physical findings and perform a complete mental status examination, and conduct a psychiatric interview which elicits information necessary for diagnosis and treatment, all of which form the basis of a therapeutic alliance with the patient. Students will demonstrate knowledge of common psychiatric emergencies and their management and demonstrate the ability to evaluate both their patient care practices and the scientific evidence, in order to improve the quality of care they deliver to patients with psychiatric illness. Academic half-days will include lecture and small-group activities. Assessment will be achieved by the use of the NBME Subject Exam in Psychiatry, clinical performance evaluation by faculty preceptor, observed clinical histories and written case reports.

Components: LEC.

Grading: GRD.

MDR 761. RMC Core Integrated Surgery Clerkship. 12 Credit Hours.

The Integrated Surgery clerkship offers students parallel training in surgery primarily, anesthesiology and radiology. Students will acquire the clinical skills, critical thinking skills, knowledge, and professional behaviors necessary to provide comprehensive pre-operative evaluation of patients and post-operative care. Students will spend half the rotation assigned to a general surgeon and the other with a vascular surgeon in order to acquire the skills and knowledge about diseases that have surgery as a treatment modality. Students will be part of the operating room teams and assist in surgical procedures. Students will be expected to assist the anesthesiology teams for pre- and post-surgical care. Radiology experiences will be provided by the JFK radiology team during discipline-specific teaching time but also as part of the care of the patient pre- and post-surgery. Academic half-days will include lecture and small-group activities in the individual disciplines along with integrated multidisciplinary activities. Assessment will be achieved by the use of the NBME Subject Exam in Surgery, clinical performance evaluation, observed clinical histories and physical exams and written case reports.

Components: LEC.

Grading: GRD.

MDR 764. RMC Core Family Medicine Clerkship. 6 Credit Hours.

The clerkship aims to train students to provide care that is compassionate, appropriate and effective for the treatment of health problems and the promotion of health. The objectives for the clerkship are derived initially from the clerkship objectives on the main campus and from the Society for the Teaching of Family Medicine guidelines. Students will be assigned to a family medicine preceptor and spend the majority of their time in the private practice. Academic half-days will include lecture and small-group activities. Assessment will be achieved by the use of the NBME Subject Exam in Family Medicine, clinical performance evaluation by faculty preceptor, observed clinical histories and physical exams and written case reports.

Components: LEC.

Grading: GRD.

MDR 765. RMC Community Public Health Practicum. 2 Credit Hours.

This course will build upon the experiences in the first two years during Community & Public Health Practicum 1. All students will spend one afternoon per week during the core clinical clerkships during this practicum course. Students will rotate through a repeating sequence of four experiences each week: an afternoon in their public health continuity clinic, an immersion experience with Department of Health sites, work on their public health capstone project, and a monthly seminar series. Seminars in contemporary Public Health Issues. In their continuity primary care clinics they will be assigned to a public health FQHC clinic in an underserved community in Palm Beach County. They will work with general internist physicians in this clinic. The course is Pass/Fall and contingent upon attendance, enthusiasm, and professionalism.

Components: MOD.

Grading: GRD.

MDR 766. RMC Physicianship Skills 4 Transition to Residency. 0 Credit Hours.

The PS4: Transitions to Residency course continues the themes addressed in PS1-2-3 related to the competencies that physicians must master to provide high quality and effective care in today's health care system. The course expands upon the themes of communication skills, medical ethics, medical humanities, wellness, time-management strategies, patient safety, systems-based care, inter-professional team care, and preparing for life as a medical resident within the applied setting of the year 3 clerkships. The PS4 course will meet for eight sessions for two-hours each during the academic year. Each session is delivered in the form of learning communities, with faculty and student continuity throughout the year. This allows for small group discussion, communication skill role plays, team-based learning, and the forging of mentoring relationships. A passing grade will be contingent on attendance at the eight sessions, completion of journal activities, and satisfactory participation.

Components: MOD.

Grading: GRD.

MDR 800. Ultrasound in Gynecology and Obstetrics. 2-4 Credit Hours.

This rotation is an intensive experience with the faculty of the Division of Ultrasound in the Department of Obstetrics and Gynecology. It is geared for students interested in the fields of Obstetrics and Gynecology, Radiology and/ or General Surgery. The emphasis of the rotation is on the use of ultrasound as a diagnostic and therapeutic tool in women's health. The student will observe and participate in diagnostic ultrasound for gynecologic problems, routine and complicated obstetrics, and ultrasound guided procedures for gynecologic and obstetrical indications. This will be complemented by time in the operating room for general gynecologic surgery and on labor and delivery. Students are expected to display a high level of intellectual curiosity and perform as a self motivated learner. For students with an interest in Obstetrics and Gynecology or Radiology there may be opportunities to become involved with research with the attending physicians.

Components: MOD.

Grading: GRD.

MDR 801. University of Miami Hospital Gynecology. 4 Credit Hours.

This rotation is intended for students with an interest in the fields of Obstetrics and Gynecology, Urology, General Surgery and Family Medicine. Students will become an integral part of the gynecology service at the University of Miami Hospital. Experience will include participation in private practice clinics, office surgery, inpatient consults, surgery in the operating room and post operative care. Surgeries will include minor procedures, operative laparoscopy, robotics and open gynecologic surgery. Students are expected to display a high level of intellectual curiosity and perform at the level of an in Obstetrics and Gynecology.

Components: MOD.

Grading: GRD.

MDR 802. Ophthalmology @ BPEI Naples FL. 2 Credit Hours.

The two week clinical elective in ophthalmology is geared toward fourth year medical students with an interest in obtaining a basic understanding of fundamental ophthalmology for students NOT pursuing a career in ophthalmology. Aspects of ophthalmology that are pertinent to the practice of internal medicine, neurology, pediatrics, family practice and other primary care specialties will also be taught. Students will rotate through the emergency room, operating room, and various subspecialty clinics at the Bascom Palmer Eye Institute where they will shadow attendings and housestaff. Students will be required to keep a patient log and will be expected to complete an online course. A case presentation session based on the patient pathology seen throughout the course will take place at the end of the rotation. Students are also welcome to attend weekly grand rounds and fluorescein conferences as well as daily resident lectures during the rotation.

Components: MOD.

MDR 803. Mechanisms of Disease I. 1-9 Credit Hours.

Components: MOD.

Grading: PNP.

MDR 804. Mechanisms of Disease II. 1-9 Credit Hours.

Components: MOD.

Grading: PNP.

MDR 805. Geriatrics: Morse Center Palm Beach. 2 Credit Hours.

The medical student will spend two weeks at the Morse Geriatric Center and assume responsibility for the care of older patients under the supervision of a board-certified geriatrician, geriatric medicine fellows, and members of the interdisciplinary care team. Our mission is to teach, model and assess the knowledge, skills, and attitudes needed by medical students to complete a comprehensive geriatrics assessment. Clinical activities will take place in multiple chronic care venues including the Morse Geriatric Center, a long term care facility; the Levine Rehabilitation Center, a subacute rehabilitation center; the Traditions of the Palm Beaches, an assisted living center; and the Geriatric Clinic.

Components: MOD.

Grading: GRD.

MDR 806. Wound Healing. 2-4 Credit Hours.

The student will be exposed to a multitude of difficult-to-heal wounds in the lower extremity (i.e. diabetic foot ulcers, venous ulcers), trunk (pressure sores), upper extremities (traumatic, infected), and head and neck (cancers, etc.) Students will interview patients with chronic and acute wounds and identify critical pathways that will lead to the diagnosis, etiology, pathophysiology and treatment of these difficult-to-heal wounds. Students will learn to care for these wounds and make clinical interventions and recommendations to their healing.

Components: MOD.

Grading: GRD.

MDR 807. Advanced Gross Anatomy. 2-4 Credit Hours.

Intended primarily for students applying for surgical or orthopedic residency programs, this elective provides the ability to study advanced regional anatomy with opportunities for students to develop teaching and presentation skills.

Components: MOD.

Grading: GRD.

MDR 808. Third Year Anesthesiology. 2 Credit Hours.

Components: MOD.

Grading: GRD.

MDR 809. Advanced Anesthesiology. 4 Credit Hours.

The Senior Elective rotation program is consistent with the guidelines of the American Society of Anesthesiology. However, few additions and modifications are included in order to make this rotation a more meaningful one for a student who has been exposed to anesthesiology during his junior year. By the end of the rotation, the student is expected to be proficient in airway management, pharmacology of general and local anesthetics, drug interactions, and the medical evaluation of surgical patients as it pertains to anesthesia.

Components: MOD.

Grading: GRD.

MDR 810. Cell Biology Research. 2 Credit Hours.

Components: MOD.

Grading: GRD.

MDR 811. Dermatology. 2-4 Credit Hours.

The student will attend 7 clinics per week, weekly management conferences and grand rounds, the Miami Dermatology Society meetings (which are held 6 times a year), journal club, and slide conferences. The student will participate in outpatient dermatologic care, under supervision of the Chief Resident and a member of the faculty, at Jackson Memorial Hospital and the University of Miami Hospital. Development of history taking, diagnostic skills, and ambulatory management of dermatological diseases will be emphasized in this elective program. Basic diagnostic procedures, including punch and shave biopsies, Tzanck, scabies, and potassium hydroxide preparations will be taught. There will also be opportunities to observe surgical therapy and the Dermatology inpatient service. All students will be required to participate in slide reading session with Dr. Elgart and there will be a quiz at the end of the rotation.

Components: MOD.

Grading: GRD.

MDR 812. Emergency Medicine Clerkship. 4 Credit Hours.

The Emergency Medicine four-week rotation will provide both classroom teaching, simulation, and hands-on clinical experience in emergency care of patients of all ages with a wide spectrum of illnesses and injuries. Students are expected to evaluate and manage assigned patients under the direct supervision of an EM attending physician. Students will also gain additional experience at physical diagnosis and procedural skills by working with patients being evaluated by other housestaff, as appropriate for teaching. Emphasis is placed upon initial assessment, recognition, prioritization, and stabilization of acute emergency conditions. Procedural skills are an important emphasized component, including wound repair, intravenous techniques, airway management, ACLS care, fracture and soft tissue injury management, incision and drainage procedures, etc. This rotation also includes a variety of generalist skills in handling minor acute conditions that will be encountered frequently in primary care practice. The student will participate in the provision of pre-hospital emergency care with a Fire Rescue EMS crew.

Components: LEC.

Grading: GRD.

MDR 813. Emergency Medicine Intensive Care Unit. 4 Credit Hours.

The emergency medicine / intensive care clerkship will give students exposure to the evaluation and treatment of critically ill patients. Students can choose to do either the entire time in the emergency rooms or divide the clerkship between emergency rooms and the intensive care rooms. Students will become competent in the rapid, systematic approach to assessment and diagnosis of a patient in the emergency room. They will be exposed to various procedures such as intubation, central lines, lavage, and phlebotomy. Students are evaluated on their knowledge of critical care, their interpersonal skills, and their professionalism.

Components: LEC.

Grading: GRD.

MDR 815. Externship not at University of Miami. 2-8 Credit Hours.

A maximum of 12 weeks may be spent in elective time away from UMMSM. Externship time in excess of the allowable 12 weeks will be counted for credit but will not count towards fulfillment of the required 14 weeks of Electives, unless a student obtains prior written approval from the Senior Associate Dean for Undergraduate Medical Education. In other words, at least two weeks of Electives must be taken at your home school. Externship experiences must be described in the course catalog of the host institution. No externships with physicians in private practice will be approved.

Components: MOD.

Grading: GRD.

MDR 816. Family Medicine in the Florida Keys. 2-4 Credit Hours.

Since late 1992, third year medical students have been given the opportunity to complete their Family Medicine rotation in the private office of physicians practicing in the Florida Keys. The popular rotation has prompted many students to request similar experience during the senior year.

Components: MOD.

Grading: GRD.

MDR 817. Family Medicine Preceptorship. 2 Credit Hours.

Students taking the Family Medicine Preceptorship will have the opportunity to experience the true essence and diversity of Family Practice in an ambulatory setting and develop knowledge of the specialty. *Students are expected to participate with their family physician preceptor in all health care related activities. These may include but are not limited to: management of hospitalized patients, nursing home visits, home visits and volunteer activities.

Components: MOD.

Grading: GRD.

MDR 818. Family Medicine Practice Based Research. 4 Credit Hours.**Components:** MOD.**Grading:** GRD.**MDR 819. Family Medicine Sub-I. 4 Credit Hours.**

The overall goal for the students taking Inpatient Family Medicine (Ward Family Medicine) is to afford them the opportunity to experience Family Medicine in an inpatient setting, and to develop some knowledge of the specialty.

Components: MOD.**Grading:** GRD.**MDR 820. Ambulatory Internal Medicine. 2-4 Credit Hours.**

The ambulatory block rotation serves to enhance the medical student's knowledge and skills in caring for the ambulatory medical patient. Students will primarily be seeing patients which are new to the outpatient clinic, addressing preventive screening as well as care of chronic conditions such as diabetes, hypertension, cardiomyopathy, and chronic obstructive pulmonary disease. In addition, they will be exposed to patients with the following characteristics: - Ambulatory patients with acute complaints - Gender-specific medical care - Patients recently discharged from the inpatient setting or from the emergency room - Patients being evaluated for surgery - Patients presenting for routine GYN care.

Components: MOD.**Grading:** GRD.**MDR 821. Arthritis. 2-4 Credit Hours.**

This elective will teach the student an approach to the diagnosis, management and therapy of common rheumatic disease including rheumatoid arthritis, gout and osteoarthritis. In addition, unusual diseases such as systemic sclerosis, polymyositis, and vasculitis are seen. Students will become proficient in the examination of joints and interpretation of joint fluid findings.

Components: MOD.**Grading:** GRD.**MDR 822. UMH Cardiovascular Intensive Care Unit. 4 Credit Hours.**

This elective is intended to provide the senior medical student with a variety of cardiac critical care experiences, including acute myocardial infarction, heart failure, valvular heart disease, and arrhythmias. The student will also be exposed to clinical research ranging from valvular heart disease to stem cell transplantation. Three-to-four cardiology conferences will be offered each week, supplementing the daily teaching rounds, which include didactic presentations. An opportunity for procedures experience, including central line placement, will also be available.

Components: MOD.**Grading:** GRD.**MDR 823. Cardiology Teaching Lab - Harvey (4 wks). 4 Credit Hours.**

This rotation consists of a comprehensive review of cardiology for the clinician. A clinician must be able to evaluate and treat cardiology patients, as they represent the largest subset of patients they see with significant disease. Each student is trained to develop the knowledge and skills needed to conduct a complete cardiovascular history and bedside examination. The rotation includes the integration of the Bedside Evaluation with the current indications for non-invasive and invasive diagnostic testing. The diagnosis and management of valvular heart disease, coronary heart disease, hypertensive heart disease, congestive failure, and congenital lesions are covered by didactic lectures, patient presentations (certain rotations), review of highly selected material during Self-Learning time, and by group and individual sessions with Harvey, the Cardiopulmonary Patient Simulator. The UMedic multimedia computer curriculum is incorporated into the elective to further interactive self-learning. Didactic ECG and Arrhythmia lectures are given daily. Each student will also read, interpret and review electrocardiograms and arrhythmias with clinical faculty. Students will use web-based programs, Essential ECG and Essential Arrhythmia, to facilitate their learning.

Components: MOD.**Grading:** GRD.**MDR 824. JMH Cardiology Consult. 2-4 Credit Hours.**

This rotation includes consultative diagnosis, electrocardiography, and intensive medical and surgical cardiac care at JMH. Students work up patients and discuss the history and physical findings with the cardiology fellows, participate in daily consultation rounds with the attending cardiologists, and are in the supervision of fellows and faculty. Students attend and participate in the cardiology conference; and for those interested, a period of observation in the Cardiac Catheterization Laboratory may be arranged.

Components: MOD.**Grading:** GRD.**MDR 825. Clinical Cardiology at Mount Sinai Medical Center. 4 Credit Hours.****Components:** MOD.**Grading:** GRD.**MDR 826. Endocrinology, Diabetes and Metabolism. 4 Credit Hours.**

This is a 4-week elective intended to expose the senior medical student to a spectrum of experiences in Endocrinology and Diabetes. The student will spend time at Jackson Memorial Hospital (JMH) and University of Miami Hospital (UMH) on the inpatient Diabetes and Endocrinology consult services, seeing patients in consultation and follow-up and discussing them with the fellows and attending on rounds. The student will attend the JMH and VA diabetes and endocrinology outpatient clinics. All students will meet with the clerkship director and are expected to attend all conferences.

Components: MOD.**Grading:** GRD.

MDR 827. Advanced Geriatrics. 2-4 Credit Hours.

This senior level elective in geriatric medicine allows students to gain additional experience evaluating older patients in a variety of care settings under the supervision of attendings physicians and fellows in geriatric medicine. It can also be designed to give students a clinical or research experience in a specialized area of geriatrics tailored to their interests. Students will be assigned to a primary clinical venue and will have opportunities to rotate through other care settings (inpatient consultation, outpatient, home-based and/or long term care).

Components: MOD.

Grading: GRD.

MDR 828. Community Preventive Medicine. 2-4 Credit Hours.

To provide students with practice-oriented and/or service-oriented learning opportunities related to community medicine. Students will learn about the types and functions of the formal and informal medical, public health, and social support programs involved in community health care. The course is designed to be individualized to students' specific population-medicine interests.

Components: MOD.

Grading: GRD.

MDR 829. JMH Coronary Care Unit. 2-4 Credit Hours.

This elective presents students with the opportunity to follow patients with life endangering cardiac problems from the moment of admission to the hospital to discharge from the Unit. Particular emphasis is placed on clinical aspects of diagnosis and management of these patients. Participation in the insertion of Swann-Ganz and pacemaker catheters shall be allowed for students who show exceptional interest. The rotation will, in addition, provide experience in computerized monitoring of arrhythmias, EKG and echocardiographic interpretations, and experience in interpreting cardiac catheterization data.

Components: MOD.

Grading: GRD.

MDR 830. Gastroenterology. 2-4 Credit Hours.

This is a 4-week elective intended to expose the senior medical student to a wide spectrum of experiences in gastroenterology. Each week or two (depending on the length of the elective), the student will rotate through a different hospital/clinic setting and see patients/procedures based on the emphasis at that location. The student will spend time at Jackson Memorial Hospital on the consult service, seeing patients in consultation and follow-up and discussing them with the fellows and attending on rounds. The student will also watch endoscopy and learn its indications and findings. At the University of Miami Hospital, students will be exposed to a more tertiary care setting, also rounding with the fellow and attending and watching procedures, some of which are more advanced and not done at Jackson. At the University of Miami Hospital and Clinics, the student will be given an outpatient experience, including subspecialty clinics in Inflammatory Bowel Disease and Motility while also watching advanced endoscopic procedures. The student will have the opportunity to go to clinic and watch procedures at the VA as well. The rotation director will try to meet with the students during the rotation, and they are expected to attend fellow conferences and the VA and JMH fellows' clinics.

Components: MOD.

Grading: GRD.

MDR 831. General Ambulatory Internal Medicine at Veteran's Adm. 2-4 Credit Hours.

Components: MOD.

Grading: GRD.

MDR 832. Advanced Geriatrics @ Miami Jewish Home. 2 Credit Hours.

The medical student will spend two weeks at the Miami Jewish Health Systems and assume responsibility for the care of older patients under the supervision of a faculty member and members of the interdisciplinary care team. The goal is to teach, model and assess the knowledge, skills, and attitudes needed by medical students to complete a comprehensive geriatrics assessment. Clinical activities will take place in multiple chronic care venues available at the Miami Jewish Health Systems, which include a nursing home, an assisted living facility, outpatient clinics, and an inpatient hospital.

Components: MOD.

Grading: GRD.

MDR 833. Hematology. 2-4 Credit Hours.

The objective of this clinical hematology program is to allow students to obtain experience in the diagnosis and management of hematological disease, in the performance of marrow aspiration and in the study of morphology of peripheral blood cells and bone marrow. Students are expected to participate in the workup of hematology consults, hematology conferences, rounds, and seminars. Direct contact during teaching rounds between the students and faculty provides ongoing evaluation of the progress and comprehension

Components: MOD.

Grading: GRD.

MDR 834. Hepatology. 2-4 Credit Hours.

The student will be exposed to a wide spectrum of liver and biliary disease. The pathogenesis and development of a practical clinical approach to the recognition and differential diagnosis of these disorders will be emphasized. The student may opt for a predominantly outpatient or inpatient exposure or a combination of both. In the outpatient rotation the student will be assigned to the clinic fellow and will attend daily outpatient clinic at UMHC with different faculty members. In the inpatient rotation the student will round with the inpatient fellow and attending on the patients admitted to the Hepatology service at UMH and inpatient Hepatology consults. In a 4-week rotation the student may opt to spend 2 weeks in the outpatient and 2 weeks in the inpatient setting or all 4 weeks in one of them. There are daily morning conferences at 8:00 a.m., weekly liver biopsy / tumor conferences and literature review sessions.

Components: MOD.

Grading: GRD.

MDR 835. Mt. Sinai Infectious Diseases. 4 Credit Hours.

The goal of the elective is to provide the opportunity to increase understanding of the broad range of Infectious Disease through the experience of serving as a consultant. Students work closely with the fellow and Attending in Infectious Disease at Mt. Sinai Medical Center. The student is expected to see patients as a consultant. Cases are presented to Attending physician and discussed in detail. There are special microbiology laboratory conferences and a weekly Infectious Disease clinical conference.

Components: MOD.

Grading: GRD.

MDR 836. Infectious Diseases. 2-4 Credit Hours.

This elective provides a learning experience in the clinical discipline of Infectious Diseases, a discipline that stresses accurate definition of disease and establishment of an etiologic diagnosis through clinical assessment and microbiologic testing. Treatment can be rationally selected when the etiologic diagnosis is correctly identified. Appropriate initiation and discontinuation of antimicrobials are key activities on the ID service. Performing these steps under guidance of a physician with ID specialty training provides the essence of this clinical experience. This elective provides a unique opportunity to see a broad range of infectious diseases.

Components: MOD.

Grading: GRD.

MDR 837. Hospital, Health Care Services, and Access: An Interdisciplinary Inquiry. 2 Credit Hours.

Hospitals are settings in which great numbers of people converge and interact in surprisingly many ways. This interdisciplinary course will offer graduate students across the University the opportunity to appreciate and examine closely the complexity of the hospital form and the necessarily multiple perspectives within which we view, think, and work in hospitals.

Components: MOD.

Grading: GRD.

MDR 838. Latin American Externship. 4 Credit Hours.

Electives in various Latin American countries can be arranged on an individual basis. Areas of special interest will vary but most deal with tropical hygiene and medicine in underdeveloped areas. This program is a reciprocal part of our Latin American Training Program and as such entails certain stipulations. • All students will be screened by the Office of Student Affairs and recommended in writing. • Students must speak Portuguese if they are planning to travel to Brazil. All other countries in Latin America require conversational Spanish skills. • Students will be responsible for their travel, room and board, and any other incidental expense. • A maximum of 10 students will be allowed to travel to Latin America. • Length of externship is 4-6 weeks. Students will receive credit for four weeks only.

Components: MOD.

Grading: GRD.

MDR 839. JMH Medical Intensive Care Unit. 2-4 Credit Hours.

The Medical Intensive Care Unit is an eighteen bed unit that provides care for critically ill medical patients. Students will gain an understanding of caring for patients with acute and chronic respiratory failure, various types of shock, cardiogenic pulmonary edema, the acute respiratory distress syndrome, malignant hypertension, acute myocardial infarction and various complications of multi-organ system failure. Emphasis will be placed on the indications for admission to and discharge from the MICU, invasive hemodynamic monitoring and mechanical ventilatory support. Education is provided during morning work rounds with the attending, core lectures on MICU related topics, biweekly critical care journal club and informal student and housestaff case presentations.

Components: MOD.

Grading: GRD.

MDR 840. MIA VAMC Medical Intensive Care Unit. 2-4 Credit Hours.

By spending time on Attending rounds in the morning and check-out rounds in the afternoon with the housestaff, students will increase their appreciation of the problems of providing care for patients with acute and chronic respiratory failure, the various types of shock, cardiogenic pulmonary edema, the adult respiratory distress syndrome, malignant hypertension, acute myocardial infarction and various complications of multi-organ system failure.

Components: MOD.

Grading: GRD.

MDR 842. Nephrology. 4 Credit Hours.

The clinical and teaching activities focus on the provision of consultative and direct medical care for patients with renal disease, hypertension, disorders of water, electrolyte and acid-base balance, and related metabolic and immunologic disease. Contemporary technologies used in diagnosis and treatment include renal biopsy, acute and chronic hemo- and peritoneal-dialysis, renal transplantation, plasmapheresis, evaluation of nuclear flow studies, and interventional nephrology.

Components: MOD.

Grading: GRD.

MDR 843. Pulmonary. 4 Credit Hours.

This 4-week elective is intended to expose the senior medical student to a spectrum of experiences in pulmonary disease. The student will be assigned to the pulmonary consultation services at either Jackson Memorial Hospital or University of Miami Hospital.

Components: MOD.

Grading: GRD.

MDR 844. Teaching Elective 4th Year. 4 Credit Hours.

Components: MOD.

Grading: GRD.

MDR 845. HIV Primary Care Clinic. 2-4 Credit Hours.

Students, under the supervision of an HIV / Infectious Disease Attending, will act as Internist developing their skills of diagnosis and management of patients with human immunodeficiency virus (HIV) infection at the dedicated outpatient ambulatory facility. The spectrum of patients includes those with predominantly advanced HIV disease and complications to evaluation and screening of patients with mildly symptomatic or asymptomatic HIV disease. Special emphasis is placed on Infectious Disease, Primary Care, and General Internal Medicine. In addition, particular needs in the areas of psychiatry, Dermatology and Ophthalmology related to the general internist will be covered.

Components: MOD.

Grading: GRD.

MDR 846. Student Health Clinic. 2 Credit Hours.

The Student Health Service provides primary care services to UM undergraduate and graduate students. Students are seen for acute illnesses and injuries, and are followed for chronic medical problems. Specialty care services include orthopaedics, women's health, and allergy clinics. Routine lab tests and X-rays are performed on site.

Components: MOD.

Grading: GRD.

MDR 847. JMH Medicine Sub-I. 4 Credit Hours.

Two senior students will be paired, and together, will carry out all the duties and responsibilities of an intern, commensurate with their capabilities. The pair will function as an "acting intern" and will have an increased level of responsibility for direct patient care. There will be an opportunity to improve clinical and didactic skills in the diagnosis and treatment of a wide spectrum of medical disorders. They will be directly supervised by their second or third year medical resident and Attending Physician. Students will be assigned to Jackson Memorial Hospital (JMH) medical teams – General Medicine, Special Immunology/Infectious Diseases, Cardiology, Hematology/Oncology, or Transplant Nephrology. Every effort will be made to pair students with their requested fellow student as well as with residents and attendings who have demonstrated excellence in student teaching and a high level of interest in education. Assignment will be made by the Chief Medical Residents with input from the clerkship director. While students may indicate a preference, the final decision will be up to the course director.

Components: MOD.

Grading: GRD.

MDR 848. Brain Injury Neurorehab. 2-4 Credit Hours.

During the elective, the medical student will spend time on the Ryder Trauma 4th floor Neurorehab service, shadowing the Rehab attending on daily rounds. There is an opportunity to get involved in clinical research activities that are ongoing in the division. Students will also have the opportunity to become familiar with Botulinum toxin injections and Baclofen pumps.

Components: MOD.

Grading: GRD.

MDR 849. Neurology Consultation. 2-4 Credit Hours.

On this service, students who have completed the neurology clerkship are provided the opportunity to evaluate off-service neurology problems with the neurology consulting resident and attending assigned to that service.

Components: MOD.

Grading: GRD.

MDR 850. Advanced Neurology. 2-4 Credit Hours.

Third- or fourth-year students who have completed the clinical clerkship in neurology may perform an elective on the General Neurology service at Jackson Memorial Hospital or the Veterans Administration Medical Center with an array of university-run or private physician clinic choices to complement this experience. Clinic choices include Epilepsy, Veterans Administration Neurology, Neuro-ophthalmology, Neuromuscular, Stroke, Pediatric Neurology, Multiple Sclerosis, Movement Disorders, Neuro-Oncology, Sleep and Headache. Experience in EMG and Neuropathology can be arranged based on director approval and availability.

Components: MOD.

Grading: GRD.

MDR 851. Stroke Neurology. 2-4 Credit Hours.

Third- or fourth-year medical students who have completed the clinical clerkship in Neurology may perform a 2- or 4-week rotation on the stroke neurology service at Jackson Memorial Hospital under the supervision of a stroke neurology attending.

Components: MOD.

Grading: GRD.

MDR 852. Neurosurgery Sub-I. 4 Credit Hours.

The neurosurgery service covers virtually the entire gamut of modern neurosurgical practice. The clinical service is divided into teams that focus primarily on specific subspecialty areas. The spine team cares for patients with tumors, trauma, degenerative disease, and other disorders. The general cranial team deals with cerebrovascular disease, tumors, epilepsy, movement disorders, and other pathology. A separate team cares for patients with head injuries. The pediatric division cares for patients at both Jackson Memorial Hospital and Miami Children's Hospital. A separate team cares for a busy neurosurgical service at University of Miami Hospital that includes both cranial and spinal patients. The JMH Neuroscience Intensive Care Unit is one of the largest such facilities in the world and is an important center of the department's clinical activities.

Components: MOD.

Grading: GRD.

MDR 853. UMH Cardiac Catheterization. 2 Credit Hours.

This is a 2-week elective intended to expose the senior medical student to the vast array of procedures performed in interventional cardiology. During the rotation, the student will have the opportunity to interact with multiple specialists who have expertise in various areas of interventional cardiology and attend cardiology conferences. The student will spend time at the Catheterization Laboratory of University of Miami Hospital (UMH), and be actively involved in the care of patients undergoing procedures. The student will discuss all cases with cardiology fellows and attending physicians and scrub in 3 or more diagnostic and interventional catheterization procedures daily. The student will attend cardiology conferences and a weekly half-day clinic where he/she will either see patients referred for catheterization procedures or follow up patients who had recently undergone a procedure. Learning during the rotation will be case-based. The student will meet at least once weekly with the clerkship director, or a designated faculty member. During these meetings, the student will present the case log and discuss one of the two required case work-ups as detailed below.

Components: MOD.

Grading: GRD.

MDR 854. MIA VAMC Military Related Mental Health and General Psychiatry. 2-4 Credit Hours.

The medical student will be involved in the care of patients with a wide spectrum of psychiatric conditions but specific emphasis will be placed on those disorders that are related to military life and exposure to combat. The student will rotate through different clinics at the Miami VA. This rotation will give the medical student the opportunity to work with patients in different settings, such as Outpatient psychiatry, Consultation Liaison Psychiatry, and Primary Care

Components: MOD.

Grading: GRD.

MDR 855. Gynecologic Oncology. 4 Credit Hours.

Components: MOD.

Grading: GRD.

MDR 856. Gynecologic Oncology Sub-I. 4 Credit Hours.

The objective is for the student to gain experience in the diagnostic and therapeutic approaches for various gynecologic cancers through participating in direct patient care and Resident/Fellow didactic activities. Students will enhance interpersonal skills and professional conduct in the female patient encounter setting. After completing the rotation, students should feel comfortable with both pre and postoperative management of women having common gynecologic procedures, and have an understanding of the management of women with gynecologic malignancies.

Components: MOD.

Grading: GRD.

MDR 857. Maternal Fetal Medicine Sub-I. 4 Credit Hours.

The objective is for the student to gain experience in the diagnostic and therapeutic approaches for various obstetrical scenarios through participating in direct patient care. Students will enhance interpersonal skills and professional conduct in the female pregnant patient encounter setting. After completing the rotation, students should feel comfortable with the management of an uncomplicated vaginal delivery and also gain insight into the management of the complicated obstetrical patient.

Components: MOD.

Grading: GRD.

MDR 858. Reproductive Health. 2-4 Credit Hours.

The objectives are for the student to improve knowledge and skills in managing contraceptive cases that are routine and also highly complex and to learn about pregnancy options including surgical and medical abortion techniques. The student should become proficient in recognizing and managing the complications arising from contraception and abortion. Participation in the 4 week course will allow the introduction of other material including sexual assault, addiction and other issues of reproductive health.

Components: MOD.

Grading: GRD.

MDR 859. Oncology. 4 Credit Hours.

The Division of Hematology/Oncology is responsible for the diagnosis and treatment of benign hematology and neoplastic diseases at the three teaching hospitals: Jackson Memorial (JMH), University of Miami Hospitals and Clinics (UMHC), and University of Miami (UMH). The Department provides consultative services at the UMH, inpatient services and outpatient clinics at UMHC and both consultative and inpatient ward services at JMH. Only private outpatients are seen at UMHC.

Components: MOD.

Grading: GRD.

MDR 860. Ophthalmology. 2-4 Credit Hours.

The two week clinical elective in ophthalmology is geared toward medical students with an interest in obtaining a basic understanding of fundamental ophthalmology. Aspects of ophthalmology that are pertinent to the practice of internal medicine, neurology, pediatrics, family practice and other primary care specialties will also be taught. Students will rotate through the emergency room, operating room, and various subspecialty clinics at the Bascom Palmer Eye Institute where they will shadow attendings and housestaff. A comprehensive didactic course will be conducted concurrently during this two week block which includes interactive case based presentations. A final examination will be administered at the conclusion of the course. Students are also welcome to attend weekly grand rounds and fluorescein conferences as well as daily resident lectures during the rotation. An additional two weeks is offered for students considering ophthalmology as a career. All students wishing to be part of the four week course must have approval of the course coordinator. These additional two weeks may be arranged independently with a faculty ophthalmologist.

Components: MOD.

Grading: GRD.

MDR 861. MIA VAMC Ophthalmology. 2-4 Credit Hours.

To provide medical students the opportunity to shadow residents and attendings in the clinic and emergency room setting, and thereby become familiar with instrumentation utilized in standard eye examinations. To provide medical students the opportunity to watch ophthalmic surgery (cataract surgery, glaucoma surgery, retinal surgery) to provide initial exposure to microsurgical techniques.

Components: MOD.

Grading: GRD.

MDR 862. Orthopedic Trauma Elective. 2 Credit Hours.

The student will participate in the management of traumatic injuries of the musculoskeletal system, excluding hand, and spine. The participation will be directed to acquiring an adequate history and physical examination and management of trauma through conservative and surgical approaches. The student will be asked to assist in the operating room to learn surgical skills, how to set up traction and to do closed reductions with cast applications.

Components: MOD.

Grading: GRD.

MDR 863. Orthopedic Trauma Sub-I. 4 Credit Hours.

The student will participate in the management of traumatic injuries of the musculoskeletal system, excluding hand, and spine. The participation will be directed to acquiring an adequate history and physical examination and management of trauma through conservative and surgical approaches. The student will be asked to assist in the operating room to learn surgical skills, how to set up traction and to do closed reductions with cast applications.

Components: MOD.

Grading: GRD.

MDR 864. Sports Medicine Elective. 2 Credit Hours.

This rotation offers the student exposure to sports-related injuries of the musculoskeletal system. Multiple arthroscopic procedures of the shoulder, knee, elbow, and ankle are performed on the service. There will also be exposure to the management of acute concussion. The student will be exposed to a wide variety of these procedures as well their clinical presentation and postoperative management. The student will be expected to become an active participant on the team. Opportunities for research are available if a particular student is interested.

Components: MOD.

Grading: GRD.

MDR 865. Children's Orthopaedics and Rehabilitation. 2 Credit Hours.

Components: MOD.

Grading: GRD.

MDR 866. Hand Surgery. 2 Credit Hours.

The student will be provided with the opportunity to become familiar with acute injuries, chronic conditions and congenital deformities of the hand. They will learn to take a history and do a physical examination of the hand, as well as assist in the conservative and surgical management of hand problems. The student will be expected to attend rounds, clinics, surgery and conferences, both hand and general orthopedic conferences. All Students will be required to take Ortho E.R. call with the PGY2 on the hand service.

Components: MOD.

Grading: GRD.

MDR 867. Musculoskeletal Oncology. 2 Credit Hours.

Students on the orthopedic oncology service are expected to become familiar with the principles of staging and diagnosing tumors of bone and soft tissue. The student will evaluate patients in the outpatient and inpatient setting and be responsible for the management of these patients pre- and post-operatively with close resident and attending supervision. The student will develop history and physical examination skills, as they pertain to oncologic patients, as well as actively participate in their non-operative and operative management. The student will participate in the regular educational conferences including a bi-weekly didactic orthopaedic oncology case-based conference, a weekly multidisciplinary oncology conference, and a weekly pre-operative planning conference. There are a number of potential research projects, both clinical and laboratory, that are available to interested investigators. Dr. Conway is the Program Director and member of the Orthopedic Residency Selection Committee.

Components: MOD.

Grading: GRD.

MDR 868. Multidisciplinary Hematology and Oncology at Deerfield Beach. 4 Credit Hours.

This elective will focus on a multidisciplinary approach to the diagnosis and treatment of solid and blood cancers, as well as benign hematologic diseases. It will take place in the outpatient hematology oncology clinic at the Sylvester Cancer Center at Deerfield Beach.

Components: MOD.

Grading: GRD.

MDR 870. Orthopedic Spine. 2 Credit Hours.

This rotation provides exposure to traumatic and degenerative affections of the spine. Students will participate in all rounds, clinics, and conferences. Students will be exposed to and participate in the care of patients with traumatic and degenerative disorders of the spine.

Components: MOD.

Grading: GRD.

MDR 871. Otolaryngology. 4 Credit Hours.

Otolaryngology is the surgical sub-specialty of hearing, balance, skull base and cochlear implant surgery, and facial nerve dysfunction. During this rotation, the senior clerk will have the opportunity to participate in the clinical evaluation, auditory and vestibular testing, medical and surgical treatment of disorders of the ear and facial nerve. The rotation will be split into three portions: clinic, operating room, and didactic sessions. Hands on anatomical dissection of the temporal bone and preparation of a clinical Grand Rounds presentation are included.

Components: MOD.

Grading: GRD.

MDR 872. Inpatient and Outpatient Otolaryngology. 2 Credit Hours.

Components: MOD.

Grading: GRD.

MDR 873. Otolaryngology Elective. 2 Credit Hours.

This rotation gives an overview of the scope of activities covered by Otolaryngology. Students are expected to get exposed to both clinical and surgical aspects of Otolaryngology and explore the variety of different subspecialties within this field. Students are encouraged to start if possible with this course before taking MDR875.

Components: MOD.

Grading: GRD.

MDR 874. Outpatient Clinical Otolaryngology. 2-4 Credit Hours.

Components: MOD.

Grading: GRD.

MDR 875. Otolaryngology Sub-I. 4 Credit Hours.

This rotation is a clinical and surgical Otolaryngology clerkship. Students are expected to get involved in both clinical and surgical aspects of Otolaryngology. Students are encouraged to start if possible with MDR873 before taking this course.

Components: MOD.

Grading: GRD.

MDR 876. Subinternship in Otolaryngology. 4 Credit Hours.

This rotation is a clinical and surgical Otolaryngology clerkship. Students are expected to get involved in both clinical and surgical aspects of Otolaryngology. Students are encouraged to start if possible with MDR873 before taking this course.

Components: MOD.

Grading: GRD.

MDR 877. Forensic Pathology. 2-4 Credit Hours.**Components:** MOD.**Grading:** GRD.**MDR 878. Mt. Sinai Pathology. 2-4 Credit Hours.**

The Department of Pathology at Mount Sinai Medical Center offers an elective in either clinical or anatomic pathology. The program will be tailored to the particular interest and level of training of the individual. The student will be supervised by staff pathologists working with the resident staff and participate in inter- and intradepartmental conferences.

Components: MOD.**Grading:** GRD.**MDR 879. Pathology. 2-4 Credit Hours.**

This elective is geared towards students who wish to explore Pathology as a career option or who seek to better understand and utilize clinical and anatomic pathology services in their clinical practice. Students select week long rotations from a list and attend all Pathology Teaching Conferences and Grand Rounds. Anatomic Pathology rotations are at JMH or UMH and Clinical Pathology rotations are at JMH. This elective may be taken as a two or four week rotation.

Components: MOD.**Grading:** GRD.**MDR 880. Adolescent Medicine. 2-4 Credit Hours.**

The goals of this elective clinical rotation are to broaden the student's general knowledge of Adolescent Medicine, with emphasis on learning diagnosis and treatment of the unique physical, developmental, and psychosocial problems of patients ages 10 – 25 years. The student will participate in the multidisciplinary team approach to adolescent health care; gain experience in communicating and interacting with a wide variety of inpatient and outpatient adolescents, and attend all aspects of the Adolescent Medicine teaching program.

Components: MOD.**Grading:** GRD.**MDR 881. Child Protection Team. 2-4 Credit Hours.**

The Child Protection Team elective is designed to familiarize the students to all aspects of child abuse. The students will learn to assess and document physical abuse and neglect, attend court hearings and participate in case staffing. This elective is geared to meet the needs of all medical students (independent of their career goals) and introduce them to the community resources available for children and their families.

Components: MOD.**Grading:** GRD.**MDR 882. Fetal Cardiology. 2 Credit Hours.****Components:** MOD.**Grading:** GRD.**MDR 883. Neonatology. 2-4 Credit Hours.**

This rotation in Neonatology can be taken as a 2 or 4 week elective. The student will be part of the team headed by an attending, and will follow and manage one or two patients together with one of the residents on the team. Teaching rounds will be conducted 5 times a week, work rounds 7 days a week. During the first 2 weeks of the rotation the student will refresh and refine his/her physical examination skills. He/she will become familiar with the nutritional needs of neonates and infants and with how these needs can be met by feedings and parental alimentation. How to prevent and correct imbalances in body water and electrolytes will be stressed. Problems with anemia, hyperbilirubinemia, infection (congenital or acquired after birth), hypoglycemia and hypocalcemia and their management will be explained. During the second two weeks of the rotation the focus of training will change to infants with respiratory and cardiovascular failure. The student will become familiar with the different causes of respiratory failure, how to judge the severity of respiratory failure by interpreting arterial blood gases and acid base status, and how to support the infants with supplement O₂ or mechanical ventilation. Furthermore, the students will be exposed to signs and symptoms of cardiovascular failure, impaired regulation of breathing, and the consequences of hypoxic ischemic brain injury.

Components: MOD.**Grading:** GRD.**MDR 885. Pediatric Cardiology. 2 Credit Hours.**

The student is exposed to the physiology, clinical and laboratory diagnosis, and management of the infant and child with congenital and acquired heart disease. Fundamentals of electrophysiology and pulmonary physiology, as it relates to heart disease, will be discussed in scheduled tutored sessions. Physical diagnosis is emphasized during participation in the out-patient clinics at the University of Miami and Jackson Memorial Hospital. Cardiology ward rounds are conducted daily providing the opportunity to follow hospitalized patients from clinical diagnosis to cardiac catheterization to cardiac surgery. Interpretation of pediatric electrocardiograms and cardiac echocardiograms are included in the individual patient's evaluation.

Components: MOD.**Grading:** GRD.

MDR 886. Pediatric Dermatology. 2-4 Credit Hours.

The understanding of mechanisms of pathophysiology and effective therapy in pediatric dermatological diseases is stressed in this elective. The students will participate in management of in-patient and out-patient dermatological and connective tissue problems. Diagnostic techniques by light microscopy and immunologic techniques and standard dermatologic laboratory techniques will be emphasized.

Components: MOD.

Grading: GRD.

MDR 887. Pediatric Emergency Medicine. 2-4 Credit Hours.

The student will be the primary physician for pediatric patients presenting with acute problems in the emergency facility of Jackson Memorial Hospital. The student will evaluate and treat patients with an extensive variety of acute illnesses under supervision of pediatric faculty and house staff.

Components: MOD.

Grading: GRD.

MDR 888. Pediatric Endocrinology. 4 Credit Hours.

The student will be the primary physician for pediatric patients presenting with acute problems in the emergency facility of Jackson Memorial Hospital. The student will evaluate and treat patients with an extensive variety of acute illnesses under supervision of pediatric faculty and house staff.

Components: MOD.

Grading: GRD.

MDR 889. Pediatric Gastroenterology, Hepatology, and Nutrition. 2-4 Credit Hours.

The student will be able to participate in the care for inpatients and outpatients; to participate in daily rounds on inpatients as well as consults with the attending physician, fellow and pediatric resident team. Opportunities to conduct patient interviews and examinations as well as to observe/participate in GI procedures will be an integral part of the elective. The student will review indications/risks for particular procedures and surgeries as they relate to pediatric gastroenterology. Students will also participate in weekly outpatient clinics. Students will also learn care of gastrostomy tubes. The 4 week rotation will consist of 2 weeks inpatient and 2 weeks outpatient. For the 2 week rotation, the student will choose either the inpatient or outpatient component of the rotation.

Components: MOD.

Grading: GRD.

MDR 890. Genetics and Metabolic Diseases. 2-4 Credit Hours.

This elective exposes students to diagnosis and management of a variety of genetic syndromes, inheritable metabolic diseases, hereditary cancer syndromes, and other heritable disorders. During this elective, patients with genetic syndromes, chromosomal disorders, metabolic disease, and other Mendelian disorders are seen in the Mailman Center Metabolic and Genetics clinic, the Jackson Pediatric Genetics clinic, Specialty Genetics Clinics at UM, and the Jackson Memorial Hospital wards. The specialty clinics include Neurogenetics clinic, Cleft lip and palate clinic, Cancer Genetics clinic, Muscular Dystrophy clinic, Fragile X clinic, Hearing loss clinic, and Prenatal Genetics clinic.

Components: MOD.

Grading: GRD.

MDR 891. Pediatric Infectious Diseases and Immunology. 4 Credit Hours.

The 4-week rotation in Pediatric Immunology and Infectious Disease is designed to give the student a broad experience in the immunological and infectious disease problems of children. The student will participate in both the inpatient and outpatient care of children with such problems by rounding daily with the attending fellow and the clinical pediatric infectious disease faculty. The student will also have the opportunity to assist in the care of children with HIV-1 infection as well as other immunodeficiency diseases.

Components: MOD.

Grading: GRD.

MDR 892. Pediatric Intensive Care Unit Sub-I. 4 Credit Hours.

The primary objective of this rotation is to promote the development and mastery of clinical critical care pediatric competencies. The environment of the PICU affords the student a broad exposure to clinically relevant physiological and pathophysiological principles and multisystem disease (Competencies: Patient Care, Medical Knowledge). The practice of evidence based medicine is promoted by encouraging students to conduct literature search for current guide lines (Practice-based Learning and improvement), with an emphasis on the basic principles of recognition and management of respiratory failure and shock in the pediatric population (infance to 21 years).

Components: MOD.

Grading: GRD.

MDR 893. Pediatric Mobile Clinic. 4 Credit Hours.

Components: MOD.

Grading: GRD.

MDR 894. Pediatric Nephrology. 4 Credit Hours.

This elective consists of exposure to in-patient and outpatient pediatric renal problems, participation in clinical and experimental discussion with House staff and Fellows, and observation of renal physiology experiments. Students will be able to describe diagnostic approaches to pediatric renal problems by radiological, histological, electromicroscopic, and immunological techniques. Current clinical studies include: immunological, metabolic, and physiologic changes in nephrotic syndrome poorly controlled or uncontrolled with steroids; recurrent hematuria; renal function of newborn and infant; calcium, phosphorus, vitamin D, and PTH metabolism in uremia. Chronic Renal Failure; growth; lipids; HIV nephropathy; effect of maternal cocaine on the fetal kidney, low birth weight Nephropathy, dialysis cardiomyopathy; and drug use in hypertension.

Components: MOD.

Grading: GRD.

MDR 895. Pediatric Pulmonary. 2-4 Credit Hours.

The objective of this rotation is to provide the students with the clinical exposure to acute and chronic, acquired and congenital, respiratory diseases from infancy to adolescence in both in-patient and out-patient venues. These conditions include but are not limited to asthma, chronic cough, chronic lung disease of infancy, cystic fibrosis, congenital lung abnormalities, recurrent and complicated pneumonia. The student will participate in the in-patient rounds or activities, ambulatory clinics and didactic conferences.

Components: MOD.

Grading: GRD.

MDR 896. Poison Center Toxicology. 2-4 Credit Hours.

The senior student will be given the opportunity to assist the Poison Information Specialists and Toxicologists at the Florida Poison Information Center with the diagnosis, triage, treatment and follow-up of patients exposed to toxins. The high volume of cases (over 170 patients per day) will allow the student to learn about a wide variety of toxins in both pediatric and adult patients. The clinical experience at the Poison Center will be supplemented with didactic lectures and bedside consultations for both adult and pediatric patients hospitalized at Jackson Memorial Hospital.

Components: MOD.

Grading: GRD.

MDR 897. Pediatrics Sub-I. 4 Credit Hours.

The large pediatric inpatient service offers a unique opportunity to the student to improve the clinical and didactic skills in the diagnosis and management of all the common and most of the uncommon disorders in children. The senior student will be placed in the regular first year resident rotation functioning as part of the ward team under direct supervision of pediatric residents and the attending physicians. There might be two (2) attendings on the team, one full time faculty member in general pediatrics and the other a pediatric specialist or a practicing community pediatrician.

Components: MOD.

Grading: GRD.

MDR 898. Ophthalmology @ Palm Beach Gardens. 2-4 Credit Hours.

The primary goal of this elective is to familiarize the student with general concepts of Ophthalmology, and how to conduct a basic eye examination. Aspects of Ophthalmology that are pertinent to the practice of Internal Medicine, Neurology, Family Practice, and other primary care specialties will also be taught. Emphasis is placed on the ocular exam and findings related to common eye pathology such as cataracts, glaucoma, macular degeneration, diabetic retinopathy, and conjunctivitis. Some exposure to more unusual cases to ophthalmology as a subspecialty will be obtained in clinics. Didactic sessions with attending faculty, patient care with fellows in the clinics and coordinated self teaching make up the majority of the elective. Students will also have the ability to go to the OR to observe ophthalmic surgery. Opportunity to assist faculty in write-up of case reports will also be available for the students considering ophthalmology as a career goal.

Components: MOD.

Grading: GRD.

MDR 899. Pharmacology Research Opportunities. 2-4 Credit Hours.

Components: MOD.

Grading: GRD.

MDR 900. Physical Medicine and Rehabilitation. 2-4 Credit Hours.

This elective is intended for medical students who have completed the neurology core clerkship rotation. During the elective, the medical student will spend time on the Ryder Trauma 4th floor Neurorehab service, shadowing the Rehab attending on daily rounds. Students will also have the opportunity to become familiar with Botulinum toxin injections and participate of Brain Injury Medicine Clinic on the 2nd and 4th Thursday of the month. There is an opportunity to get involved in clinical research activities that are ongoing in the division.

Components: MOD.

Grading: GRD.

MDR 901. Child and Adolescent Psychiatry. 2-4 Credit Hours.

Various clinical services are utilized for undergraduate and post-graduate training in Child & Adolescent Psychiatry: the Children's Inpatient Unit and the Child and Adolescent Outpatient Clinic. Students may be assigned to one or a combination of these services where they will have a supervised experience.

Components: MOD.

Grading: GRD.

MDR 902. Consultation-Liaison Psychiatry. 2-4 Credit Hours.

This service is responsible for consultations to non-psychiatric inpatients and for various liaison activities with other services and units of the general hospital. Students under supervision will respond to consultation requests in evaluating the patient and making recommendations to the referring physician. They will join faculty members in their liaison work and attend regularly scheduled seminars and consultation reviews.

Components: MOD.

Grading: GRD.

MDR 903. Geriatric Psychiatry. 2-4 Credit Hours.

The Department of Psychiatry offers an elective in Geriatric Psychiatry. The elective can be tailored to the student's special needs. Clinical experiences focus on diseases that are more prevalent in the geriatric population such as delirium and dementia.

Components: MOD.

Grading: GRD.

MDR 904. JMH Inpatient Psychiatry. 2-4 Credit Hours.

This elective allows students to diagnose and manage a variety of psychiatric disorders. This includes patients with mood disorders, psychotic disorders and other conditions that require psychiatric hospitalization. Under the supervision of attending physicians students will manage patients with a variety of therapeutic techniques available for their treatment. We have several units available for this elective: 2 Inpatient units for acutely ill adult psychiatric patients - JMH, 1 dual diagnosis unit (treatment of acute substance abuse, detox and psychiatric disorders) – JMH, 1 inpatient unit for Mood Disorders - UMH.

Components: MOD.

Grading: GRD.

MDR 905. Psychiatry Emergency Service. 2 Credit Hours.

This course provides students with the opportunity to be involved in the diagnosis and therapy of selected patients presenting to the Psychiatric Emergency Room. The student will be assigned to the Psychiatric Emergency Room. The student will then be able to observe a wide range of acute psychiatric emergencies and learn to handle these in an appropriate manner. The student will begin to develop concepts of psychiatric diagnosis, nomenclature and treatment applicable to the acute situation. Also, under supervision, the student will see acute psychiatric consultations as requested. Students should consider this elective interested in a career in Emergency Room Medicine or Family Medicine besides those students interested in Psychiatry.

Components: MOD.

Grading: GRD.

MDR 906. Ambulatory Psychiatry. 2 Credit Hours.

This course provides students with the opportunity to be involved in the diagnosis and therapy of selected patients presenting to the outpatient clinics at the Mental Health Center. Individual supervision will be aimed at exposing the student to the range of psychiatric disorders that can be managed in an outpatient basis such as anxiety disorders, depression, etc. The students will be exposed to different therapeutic modalities used to treat these problems including psychopharmacologic treatments, cognitive behavioral therapy, and group therapy.

Components: MOD.

Grading: GRD.

MDR 907. Research Experience. 0 Credit Hours.

Components: MOD.

Grading: NON.

MDR 908. Mt. Sinai Diagnostic Radiology. 2-4 Credit Hours.

The courses consist of daily required didactic conferences and practical film interpretation sessions covering all areas of Radiology. The student will participate in divisional activities including diagnostic and therapeutic nuclear medicine and non-invasive cardiovascular laboratory, under the direct Preceptorship of attending physicians.

Components: MOD.

Grading: GRD.

MDR 909. Radiology Clerkship. 4 Credit Hours.

Radiology I is a required 4 week clerkship available to third and fourth year medical students, and must be successfully completed prior to graduation. It is a structured four week course at Jackson Memorial Medical Center. The aim of the program is to teach the student an approach to diagnostic imaging and how to effectively use our varied radiographic techniques and imaging modalities to diagnose disease. The course consists of daily required didactic conferences and practical film interpretation sessions covering all areas of Radiology. Attendance will be recorded at the end of these sessions. The students will take a pre-course exam on day one of the rotations and will be required to present a case with a proven Radiologic diagnosis half way through the clerkship, and take a final exam at the end of the course. The goal is to achieve a basic knowledge of plain film interpretation as screening tools enabling the medical student to identify emergent and life threatening situations as well as giving the student a basic understanding of the indications and protocols for the more specialized imaging modalities such as sonography, computerized tomography, magnetic resonance imaging, and nuclear medicine.

Components: LEC.

Grading: GRD.

MDR 910. Advanced Radiology. 2 Credit Hours.

Radiology II at Jackson Memorial Medical Center consists of a more extensive exposure to one or two subspecialty areas in clinical Diagnostic Radiology. The student may select to spend one or two weeks in any subspecialty area to gain more in-depth knowledge of that subspecialty. The experience will vary somewhat depending on the area of Diagnostic Radiology which the student selects. They are welcome, but not required, to attend scheduled student lectures. They are encouraged to attend the daily 12:30 p.m. Departmental conference. They are required to attend all subspecialty conferences of the sections they are rotating through.

Components: MOD.

Grading: GRD.

MDR 911. Nuclear Medicine. 2 Credit Hours.

The Nuclear Medicine elective allows the student to interact with the clinical and research activities of Nuclear Medicine as it relates to diagnostic imaging and therapy with this modality. Students are trained under the direct supervision of our faculty members with guidance from our residents. Learning Techniques include: daily work, teaching file and conference attendance. Reading sessions start at 8 a.m. daily. While patients are injected for studies during the morning, the students observe the technical aspect of this procedure prior to interpreting the studies with residents and attendings. An example of such studies is the myocardial perfusion studies - patients are injected early in the morning, residents and students monitor the stress and rest imaging acquisitions. They also interpret the EKGs prior to evaluating the processed images in the reading room. Students will also observe many other nuclear medicine procedures, such as cisternograms, renal scintigraphy, thyroid scintigraphy and PET scans.

Components: MOD.

Grading: GRD.

MDR 913. HCH Cardiology. 2-4 Credit Hours.

This rotation includes consultative diagnosis, electrocardiography, and intensive medical and surgical cardiac care at Holy Cross Hospital and Clinics. Under the direct supervision of the attending cardiologist, students will have the opportunity to evaluate patients presenting with a full spectrum of cardiac complaints. The student will participate in consultation rounds with the attending cardiologists, in both the inpatient and outpatient settings, participate in the evaluation of noninvasive testing, and observe cardiac catheterization and cardiac surgery of their patients.

Components: MOD.

Grading: GRD.

MDR 914. Pediatric Radiology. 2 Credit Hours.

This course is designed for students interested in Pediatrics and consists of intensive exposure to Pediatric Radiology under the direct preceptorship of two-three staff pediatric radiologists. The student will attend the daily neonatal, in-patient and out-patient film reading sessions, observe the performance of fluoroscopy, attend Pediatric Cardiology and Pediatric Tumor Board conferences. There will also be some exposure to cross-sectional imaging including pediatric abdominal, pelvic and head ultrasound, as well as ultrasound of the neonatal hip and any other educational conference that may be assigned during the rotation.

Components: MOD.

Grading: GRD.

MDR 915. Radiation Oncology. 4 Credit Hours.

The objective of the elective on Radiation Oncology is to familiarize the student with the treatment of neoplastic disease in general, and specifically with the role of ionizing radiation in treating cancer and related disorders. The course is tailored to the needs of individual students, with an emphasis on providing a general introduction to Radiation Oncology for students either interested in other medical fields, other oncologic specialties, or considering Radiation Oncology as a field specialization.

Components: MOD.

Grading: GRD.

MDR 916. Research. 8.00 Credit Hours.

Guidelines for obtaining academic credit for research are found on the subsequent pages. This information is also available on the MedEd website under Important Documents for students. MDR 916 "Research" – Used to designate credits student has been awarded. Seniors are required to always have on their scheduled an appropriate number of credits required for graduation. Since Research Credits are frequently granted late in the Senior year, students must schedule Electives late in the year that they may drop if and when Research credit is granted.

Components: MOD.

Grading: GRD.

MDR 917. Burn Unit Sub-I. 4 Credit Hours.

The Burn Service admits over 150 major injuries and 300 total patients per year. Concentration is on acute care but reconstruction is also done. Principles of critical care, infection control, nutritional support, wound care and rehabilitation are stressed. Opportunities for clinical research exist.

Components: MOD.

Grading: GRD.

MDR 918. Burn Unit Elective. 2 Credit Hours.

Components: LEC.

Grading: GRD.

MDR 919. Cardiothoracic Surgery Sub-I. 4 Credit Hours.

This rotation will give the 4th year student a unique opportunity to see complex surgical procedures while learning how to care for critically ill patients. The attending and resident staff will supervise the care of patients undergoing operations for coronary artery disease, congenital and acquired valvular heart disease, complex congenital heart defects, a variety of lung and esophageal diseases, trauma to the chest, and heart and lung transplants. Patients will range from premature infants to elderly adults at JMH and VA Hospitals.

Components: MOD.

Grading: GRD.

MDR 920. General Surgery EI Sub-I. 4 Credit Hours.

This 4-week rotation will expose the 4th year student to a wide array of cancer problems and teach an integrated interdisciplinary approach to their management. Esophageal, hepatic, breast, and gastric carcinomas will be seen and treated in addition to melanomas and soft tissue sarcomas.

Components: MOD.

Grading: GRD.

MDR 921. General Surgery EII Sub-I. 4 Credit Hours.

This elective surgery service predominantly sees hepatobiliary, pancreatic problems, surgical endocrine and adrenal disease. It deals with patients with portal hypertension and biliary tract disease, and both benign and malignant conditions will be seen and treated. In addition, endocrine surgery patients will be seen, and the full spectrum of thyroid and parathyroid disease will be learned. Advanced laparoscopic skills can also be seen treating a whole spectrum of surgical problems. Students have the opportunity to join evening rounds, present patients, discuss current problems and generate treatment options. Students will present didactic discussion of patient subjects to staff and colleagues weekly.

Components: MOD.

Grading: GRD.

MDR 922. General Surgery EIII Sub-I. 4 Credit Hours.

This elective service deals primarily with diseases of the colon, rectum, and anus. Benign disease, such as hemorrhoids, anal fistulae, anal fissures, and inflammatory bowel disease will be seen and thoroughly discussed and learned. In addition, the entire spectrum of colon and rectal cancer will be seen and treated.

Components: MOD.

Grading: GRD.

MDR 924. Introduction to Neurosurgery. 2 Credit Hours.

This 2 week elective is intended to give the third year medical student an initial acquaintance to neurosurgery including the pathophysiology, evaluation, and management of the spectrum of disorders that confront the modern neurosurgeon. The UM neurosurgery service covers virtually the entire gamut of neurosurgical practice. The clinical service is divided into teams that focus primarily on specific subspecialty areas. The spine team cares for patients with tumors, trauma, degenerative disease, and other disorders. The general cranial team deals with cerebrovascular disease, tumors, epilepsy, movement disorders, and other pathology. A separate team cares for patients with head injuries. The pediatric division cares for patients at both Jackson Memorial Hospital and Miami Children's Hospital. A separate team cares for a busy neurosurgical service at University of Miami Hospital that includes both cranial and spinal patients.

Components: MOD.

Grading: GRD.

MDR 926. Oral and Maxillofacial Surgery. 2-4 Credit Hours.

The Department of Surgery's Division of Oral and Maxillofacial Surgery offers the student an intense experience in Head and Neck Reconstructive Surgery, Oral and Maxillofacial Pathology, Facial Trauma and Head and Neck Anatomy. The attending and resident staff is committed to providing the student with a valuable educational experience. This is the only exposure the medical student receives regarding the problems related to the oral cavity and to oral and maxillofacial surgery, which may confront him/her at a later date in his/her career. This is an advantageous rotation for those interested in ENT, Plastic Surgery, and Ophthalmology.

Components: MOD.

Grading: GRD.

MDR 927. Pediatric Surgery Sub-I. 4 Credit Hours.

This very busy surgical service will allow the 4th year student the opportunity to care for common and uncommon, yet very interesting, surgical problems in the pediatric population. The experience includes abdominal surgery, hernia surgery, and thoracic procedures. There is close supervision by the pediatric surgery attendings with daily rounds and a chance to follow patients closely. Outpatient clinics also provide for close patient follow up.

Components: MOD.

Grading: GRD.

MDR 928. Plastic Surgery. 2 Credit Hours.

This rotation provides comprehensive exposure to all facets of aesthetic plastic and reconstructive surgery at UM affiliated clinical institutions and educational venues. Students participate in the pre-operative planning, operative management, and post-operative care of plastic and reconstructive surgery patients, on the wards and in the clinics; learn plastic techniques in the operating and emergency rooms; and also participate in the on-call schedule with the residents. Students are also welcome to actively participate in all of educational programs of the division including Grand Rounds, Journal Clubs & Didactic Sessions. Medical students will be encouraged to participate in any ongoing research projects.

Components: MOD.

Grading: GRD.

MDR 929. Surgical Intensive Care Unit. 4 Credit Hours.

This rotation is offered to give 4th year students an introduction to the environment of the ICU and the unique subject matter that pertains to it. It also gives you the opportunity to see what happens after surgical emergencies, surgical complications, and transplants. Education is provided by morning rounds, student and housestaff presentations, reading, and by paying attention and asking questions!

Components: MOD.

Grading: GRD.

MDR 930. Transplant Surgery. 4 Credit Hours.

The student will have responsibilities similar to a junior house officer, under strict supervision of the Transplant Team because of the critical care of these patients. The student will be present at the operation for vascular access surgery, general surgery on transplantation patients and chronic renal failure patients, which would include bilateral native nephrectomies (usually for difficult to control hypertension), kidney, liver, pancreas, and pancreatic islet transplants, and related surgery. In addition, issues related to native organ disease ? kidney, pancreas, liver, leading to need for transplantation ? will be covered. There will be weekly conferences and seminars in research and clinical problems in kidney, liver, and pancreas transplantation and participation in weekly immunobiology transplant conferences.

Components: MOD.

Grading: GRD.

MDR 931. Trauma Surgery. 4 Credit Hours.

The trauma teams treat all patients requiring surgery who are admitted through the emergency room. In addition, the trauma teams are responsible for management of all major trauma victims brought to the Ryder Trauma Center, a Level-I Center. This rotation will allow the student to care for major trauma victims and patients with non-trauma surgical emergencies.

Components: MOD.

Grading: GRD.

MDR 932. Trauma Intensive Care Unit. 4 Credit Hours.

The students will gain an initial understanding of critical care and complex postoperative care of the critically ill trauma and surgical patient. Education is provided by morning rounds, student and housestaff presentations, reading, and by paying attention and asking questions!

Components: MOD.

Grading: GRD.

MDR 933. HCH General Surgery. 2-4 Credit Hours.

This elective in General Surgery will focus on Open and Laparoscopic General Surgery, Surgical Oncology, Colorectal Surgery and Vascular Surgery. The cases include cholecystectomies, colon resections, hepatobiliary and pancreatic surgery, complex hernia repairs, distal bypasses, aortic aneurysms and vascular stenting. In addition, appendectomies, hernias, hemorrhoid operations, as well as other outpatient procedures will be part of the surgery experience.

Components: MOD.

Grading: GRD.

MDR 934. Female Urology. 2-4 Credit Hours.

Female urology/voiding dysfunction is a surgical subspecialty within Urology dealing with problems with urination. During this elective, the senior clerk will have the opportunity to participate in the evaluation and the medical and surgical treatment of female and male voiding dysfunction.

Components: MOD.

Grading: GRD.

MDR 935. Out-Patient Urology. 2-4 Credit Hours.

This elective is offered to those students who are particularly interested in Urology as a career choice. It is designed so that the student will participate as a team member on each service he/she rotates on and will accept responsibilities and perform duties commensurate with his/her ability.

Components: MOD.

Grading: GRD.

MDR 936. Research in Urology. 4 Credit Hours.

Components: MOD.

Grading: GRD.

MDR 937. Urology Sub-I. 4 Credit Hours.

This elective is offered to those students who are particularly interested in Urology as a career choice. It is designed so that the student will participate as a team member on each service he/she rotates on and will accept responsibilities and perform duties commensurate with his/her ability.

Components: MOD.

Grading: GRD.

MDR 938. Urology Elective. 2-4 Credit Hours.

As much as 30% of all visits of elderly men to the primary care physician can relate to symptoms and disorder of the genitourinary tract. Physician should at least be conversant on these common ailments (i.e., BPH, Prostate cancer, Incontinence, Impotence, Stones or Hematuria).

Components: MOD.

Grading: GRD.

MDR 939. Professional Development for Medical Student Leaders. 2 Credit Hours.

1. Students must hold a leadership position within the Academic Societies (as a society director, assistant director, a member of the society executive staff, or training director), DOCS, or Executive Student Government staff. 2. The course will span the senior year, from July through March. 3. During the month of July, assigned readings, didactic sessions, and group exercises will be offered during evenings and weekends; students will need to be available to attend ALL of these sessions in July in order to receive the 2 weeks of academic credit. 4. These activities are designed to teach the fundamental aspects of teamwork, leadership, teaching and learning, and mentoring. 5. Throughout the year, students will be responsible for fulfilling the obligations of their specific position within the student organization. 6. Students in Academic Society positions will attend their society training and student report sessions to apply the information learned in the didactic sessions and will complete exercises to evaluate and improve their skills in these areas. Student Evaluation and Grading: By completing a combination of assigned exercises, attending all scheduled seminar sessions, and fulfilling student leadership responsibilities, each student will receive 2 weeks of elective credit. **For credit, attendance is REQUIRED for ALL summer sessions in JULY.

Components: MOD.

Grading: GRD.

MDR 940. Introduction to Research. 2-4 Credit Hours.

Components: MOD.

Grading: GRD.

MDR 941. HCH Cardiothoracic Surgery Sub-I. 4 Credit Hours.

Overview: This unique surgery sub-internship will allow the student to learn in a preceptor-based model about the surgical management of cardiovascular and thoracic diseases. The students will be exposed to a wide variety of surgical experiences, including open and minimally-invasive surgical approaches. The student will also engage in preoperative and postoperative assessment and treatment of patients. The students will have primary responsibility for the care and management of their patients.

Components: MOD.

Grading: GRD.

MDR 942. Business Skills for Healthcare Providers. 4 Credit Hours.

Components: MOD.

Grading: GRD.

MDR 943. General Surgery E IV Sub-I. 4 Credit Hours.

This 4-week rotation will expose the 4th year student to several unique, yet related, surgical disciplines: laparoscopic surgery, surgical endoscopy, and the surgical management of morbid obesity.

Components: MOD.

Grading: GRD.

MDR 944. MIA VAMC General Surgery Sub-I. 4 Credit Hours.

The surgical program at the VA Medical Center is a truly General Surgical Service which focuses on Open and Laparoscopic General Surgery, Surgical Oncology, Colorectal Surgery and Vascular surgery. The cases include cholecystectomies, colon resections, hepatobiliary and pancreatic surgery, complex hernia repairs, distal bypasses, aortic aneurysms and vascular stenting. In addition, appendectomies, hernias, hemorrhoid operations and an increasing number of outpatient surgeries compose our experience.

Components: MOD.

Grading: GRD.

MDR 945. Taylor Breast Health Center. 2-4 Credit Hours.

This elective will consist of a 2 week or a 4 week block at the Taylor Breast Health Center. During this time, the student will have the opportunity to participate in the diagnosis and follow-up of patients with the full spectrum of breast diseases, most importantly breast cancer.

Components: MOD.

Grading: GRD.

MDR 947. Research Review by Research Committee. 8.00 Credit Hours.

Components: MOD.

Grading: GRD.

MDR 948. JFK Surgery Sub-I. 4 Credit Hours.

This surgery sub-internship will allow the student to learn in a team model about the surgical management of common gastrointestinal and endocrine disorders. The student will be exposed to both open and laparoscopic operations, treating a broad spectrum of surgical entities. The student will also engage in preoperative and postoperative assessment and treatment of patients, with an emphasis on continuity of care.

Components: MOD.

Grading: GRD.

MDR 949. Caring for the Community: Free Clinics Elective. 2 Credit Hours.

Provides students with an opportunity of clinical care at student-run free clinics while advancing their knowledge of the social determinants of health and the barriers that uninsured patients encounter in obtaining primary medical care and specialty care when needed. The student-run free clinic elective will provide medical students with an engaging clinical experience that will prepare them to more effectively advocate and care for uninsured patients. This elective provides an opportunity for third and fourth year medical students to provide clinical care at student-run free clinics while advancing their knowledge of the social determinants of health and the barriers that uninsured patients encounter in obtaining primary medical care and specialty care when needed. The student-run free clinic elective will provide medical students with an engaging clinical experience that will prepare them to more effectively advocate and care for uninsured patients. In addition to their clinical roles, students will be actively involved as both teachers and learners. Working under the direct supervision of faculty physicians, students will participate in training and educating volunteer underclass students by leading clinical care teams and conducting wrap-up sessions at the end of each clinic session. To prepare them for their educator roles, students will receive didactic training outside of clinic on various topics pertaining to teaching skills and the social determinants of health. This longitudinal experience provides students the opportunity to receive two weeks of elective credit by completing the required didactic sessions and at least 18 clinical experiences that may be scheduled over the course of 21 months during years 3 and 4. The Free Clinic elective is available to all students; however it will be required of all third and fourth year students in the social medicine pathway.

Components: MOD.

Grading: GRD.

MDR 950. The Mark Dogoli Community Care Elective. 4-8 Credit Hours.

The Mark Dogoli Community Care elective (MDCCE) rotation provides 4 to 8 weeks of primary care continuity experience. This rotation includes three components : Private practice, nursing home and The Mark Dogoli, MD Medical Center, a free clinic in an under-served community. Students will gain exposure to cross- cultural, linguistic, behavioral, and community medicine principles and be part of sustaining a community-based health initiative.

Components: MOD.

Grading: GRD.

MDR 951. Cardiology Teaching Lab - Harvey (2 wks). 2 Credit Hours.

This rotation consists of a focused review of cardiology for the clinician. A clinician must be able to evaluate and treat cardiology patients, as they represent the largest subset of patients they see with significant disease. Each student is trained to develop the knowledge and skills needed to conduct a complete cardiovascular history and bedside examination, and interpret ECG's and arrhythmias. The rotation includes the integration of the bedside evaluation with the current indications for non-invasive and invasive diagnostic testing. The diagnosis and management of valvular disease, coronary disease, hypertensive heart disease, heart failure and congenital lesions are covered by group and individual sessions with Harvey, the Cardiopulmonary Patient Simulator. The UMedic multimedia computer curriculum is incorporated into the elective to further interactive self-learning. Didactic ECG and Arrhythmia lectures are given daily. Each student will also read, interpret and review electrocardiograms and arrhythmias with clinical faculty. Students will use our web-based programs, Essential ECG and Essential Arrhythmia, to facilitate their learning.

Components: MOD.

Grading: GRD.

MDR 952. Reproductive Endocrinology and Infertility. 2 Credit Hours.

This rotation will provide you with the unique opportunity to learn about the subspecialty of reproductive endocrinology and infertility. During this rotation student will learn the basics of menstrual cycle, hormonal regulation and different causes of infertility. Students will be exposed to a wide variety of endocrinological disorders such as amenorrhea, polycystic ovarian syndromes, thyroid dysfunction, and hyperprolactinemia. Opportunity will be given to attend and observe the different techniques of advanced reproductive technology, including in vitro fertilization, intracytoplasmic sperm injection, intrauterine insemination. You will also be able to scrub-in and observe a wide variety of endoscopic surgeries.

Components: MOD.

Grading: GRD.

MDR 953. Cardiac Anesthesiology / CVICU. 4 Credit Hours.

During this rotation, the student will be exposed to the principles and the practice of cardiothoracic anesthesia, applied cardiovascular physiology and pharmacology, and the management of the cardiothoracic surgical patient in the post-surgical ICU setting. The course will provide the student exposure to and experience performing the preoperative assessment, intraoperative management, and postoperative intensive care management of cardiothoracic surgical patients from the perspective of the cardiac anesthesiologist and critical care specialist. The student will work with faculty, fellows, and residents delivering anesthetic care to adult patients undergoing cardiothoracic and vascular procedures and under the supervision of the ICU attendings and fellows, and share in the responsibility for direct day-to-day ICU patient care.

Components: MOD.

Grading: GRD.

MDR 954. Pediatric Anesthesiology. 2 Credit Hours.

This elective will introduce the subspecialty of Pediatric Anesthesiology to medical students interested in careers in Anesthesiology, Pediatrics and related specialties. The rotation will consist of a 2-week consecutive period that will expose the medical student to the basic knowledge and skills inherent to the practice of pediatric anesthesia. Techniques of basic procedural skills will be reviewed along with discussions on topics integral to pediatric peri-operative care. The course will provide the student exposure to and experience performing the preoperative assessment, intra- and post-operative management of pediatric surgical patients from the perspective of the pediatric anesthesiologist.

Components: MOD.

Grading: GRD.

MDR 955. UroGynecology Sub-I. 4 Credit Hours.

The objective of this sub-internship is to improve the students' knowledge and skills in evaluating and managing women with pelvic organ prolapse (POP) and urinary incontinence. The student will develop an understanding of pelvic anatomy, become familiar with surgical principles and develop proficiency in evaluating and recognizing the various types of POP, urinary incontinence and voiding disorders. Student participating in the sub-internship will also become familiar with the surgical management of POP and urinary incontinence, and have greater exposure to other common types of pelvic floor dysfunction such as; fecal incontinence, constipation, urinary tract infections, bladder and pelvic pain, urethral diverticulum, and sexual dysfunction.

Components: MOD.

Grading: GRD.

MDR 956. Procedure Team Medical Student Elective. 2-4 Credit Hours.

The performance of an invasive bedside procedure carries with it inherent risks and potential complications. Incorrect accomplishment of such may adversely affect patient safety, increase hospital length of stay, necessitate the use of additional resources, and propagate incorrect procedural methods for the next generation of physicians. To this end a formal course in procedural instruction serves as model for the other institutions and as a standard within our own. The days of "see one, do one, teach one" are extinct. Students will undergo formal procedural instruction using task trainers/models. They will become familiar with relevant anatomy, and perfect the technical skills needed to successfully perform invasive bedside procedures, from pre-procedural assessment to post-procedure documentation and follow-up

Components: MOD.

Grading: GRD.

MDR 957. Geriatrics and Palliative Medicine Clerkship. 4 Credit Hours.

The medical student will spend four weeks at the VA Medical Center and assume responsibility for the care of older patients under the supervision of board-certified geriatricians and palliative medicine physicians, geriatric and palliative medicine fellows, and members of the interdisciplinary care team. Our mission is to teach, model and assess the knowledge, skills, and attitudes needed by medical students to complete comprehensive geriatric and palliative care assessments. Clinical activities will mainly take place in multiple chronic care venues at the VA including the Intermediate Care Unit, the Hospice Unit, the Community Living Center, and the Geriatric Primary Care Clinic. Students may have an opportunity to rotate at the Miami Jewish Health System or participate in clinical services at the University of Miami Hospital and the Cancer Center.

Components: LEC.

Grading: GRD.

MDR 958. UMH Medicine Sub-I. 4 Credit Hours.

The primary objective of this rotation is to emphasize mastery of clinical core internal medicine competencies, to develop skills in inpatient management of common medical illnesses, and to prepare fourth year medical students for internship. This rotation will promote the expansion of the clinical knowledge base and emphasize the practice of evidence based internal medicine.

Components: MOD.

Grading: GRD.

MDR 959. JFK Medicine Sub-I. 4 Credit Hours.

The objective of this rotation is to provide students with hands on clinical experiences that are specifically designed to mirror their upcoming roles as interns in postgraduate training. The medical Sub-intern will master specific core competencies and basic principles of inpatient medical care. The sub-intern will be a member of a medical ward team that consists of an attending, one resident, two interns and two third year clerks. The sub-intern will work specifically with one resident on the team who will directly oversee the sub-intern and the care of his/her patients. They will focus on delivery of inpatient care to general medical patients as well as collaborate with medical and surgical subspecialties. They will attend daily morning report and attending rounds as well as participate in daily sign out/hand off rounds. Sub-Interns will attend daily noon conferences, weekly grand rounds, and twice weekly sessions with sub-internship coordinators to review key inpatient topics.

Components: MOD.

Grading: GRD.

MDR 960. Vascular Surgery. 4 Credit Hours.

This rotation is a busy service treating the complete spectrum of vascular diseases including aneurysms of the aorta, cerebrovascular disease, mesenteric vascular disease, renovascular disease and peripheral vascular disease. In addition, endovascular procedures will be observed. This rotation will allow the student to care for patients both pre-operatively and post-operatively. There will also be some experience interpreting non-invasive diagnostic tests to tailor the operation for specific vascular problems. Conferences with the attendings are held on a weekly basis. Students will learn how to recognize, diagnose and treat the most common vascular diseases. All students will be evaluated by the attending in charge on their professionalism, clinical skills, and participation. Attendance is mandatory for all assigned conferences, rounds and/or presentations and will be taken into consideration. Students are required to stay until 10 PM when on night call.

Components: MOD.

Grading: GRD.

MDR 961. MIA VAMC Medicine Sub-I. 4 Credit Hours.

The objective of this rotation is to provide students with hands on clinical experiences that are specifically designed to mirror their upcoming roles as interns in postgraduate training. The medical Sub-intern will master specific core competencies and basic principles of inpatient medical care. With the guidance and oversight of the supervising attending and resident, the sub-I will be seen as the primary care giver by the patient and the hospital staff,

Components: MOD.

Grading: GRD.

MDR 962. JFK Intensive Care Unit. 4 Credit Hours.

The objective of this rotation is to provide M4 students with hands on clinical experiences in an ICU setting that will expose them to the pathophysiology, and management of patients in a intensive care setting. The M4 will act as an integral member of the ICU team.

Components: MOD.

Grading: GRD.

MDR 963. Ambulatory Obstetrics and Gynecology. 4 Credit Hours.

The objective is for the student to gain experience in the diagnostic and therapeutic approaches for general obstetric and gynecologic conditions by participating in direct patient care and resident didactic activities. Students will enhance interpersonal skills and professional conduct in the female patient encounter setting. Students will learn the basic ambulatory management of medium and high risk obstetrical patients, the management of ambulatory gynecologic conditions, and prevention and screening in women's reproductive health. This rotation is ideal for the student considering a career in obstetrics and gynecology as he or she will be exposed to multiple aspects of the field. The rotation will also provide a strong foundation in outpatient women's reproductive health for those going into internal medicine, family medicine, pediatrics and psychiatry.

Components: MOD.

Grading: GRD.

MDR 965. Addiction Psychiatry @ Wellington Retreat. 4 Credit Hours.

Medical students get hands on experience regarding the evaluation and treatment of addiction and other psychiatric illnesses. From day one, they are taught to recognize symptoms and gain interview techniques. They perform initial evaluations directly supervised by Dr. Moran who is triple board certified in general psychiatry, addiction psychiatry, and addiction medicine. Students attend community meetings every week day as well as adolescent community meetings and several groups (which usually takes all morning 8:30-12:00). They are shown the proper way to write notes on patients with psychiatric diseases and all notes are written by the students and reviewed by the doctor. Students are assigned a caseload of patients. The students are expected to assess them daily to witness and understand the gradual changes in the psychopathology. Every day, everyone involved in the care of patients (Doctors, Therapists, Clinical Director, Coordinators Director, Residents P.A. students and the medical students) meet during lunch (12:30-13:30) to discuss the individual treatment of each patient; students are encouraged to participate since their contact with the patients provides helpful additional observations. Our treatment is based on cutting edge research and the students will learn about psychopharmacology as well as evidence-based psychosocial interventions.

Components: MOD.

Grading: GRD.

MDR 966. Medical-Legal Partnership. 2-4 Credit Hours.

Medical-Legal Partnership clinic presents issues of health in the broader social context of people's lives, providing knowledge and skills from both disciplines to the advancement of health through joint medical-legal advocacy and interdisciplinary solutions to complex problems. During the course, students from medicine will be partnered with various mentors to focus on basic legal issues in the context of medical care. They will have the opportunity to work in unique clinical experiences which focus not only on medical care of actual patients but also on broader policy issues that affect public health. They will have an opportunity to work with the Child protection Team, Justice Outreach with the Veterans courts, Human Trafficking and Asylum clinics and Mental Health In- Hospital program to learn how medical expertise works with hospital regulations and laws to impact on health outcomes of the public. They will also participate in the medical-legal clinics with law students as medical "experts" to work together to advocate for patients by the elimination of social determinants that adversely affect patient health such as income and employment, housing, education, legal status, and personal safety. The Medical-Legal clinic at the Miami Veterans Administration Medical Center (inter disciplinary with Medical and Psychiatric attendings), will allow students to use their clinical skills and learn about the complex intersection of health and law. There they will develop insight into how the law may be used as a tool to improve health, and how health care providers and lawyers can work together to invoke more effective and preventive remedies for patients and clients.

Components: MOD.

Grading: GRD.

MDR 967. JFK Cardiology Consult. 2-4 Credit Hours.

This is an inpatient consult rotation is at JFK Medical Center, a tertiary care center in Palm Beach County. It is a very active cardiac center with invasive cardiology services, cardiac surgery, and electrophysiology services. Patients encountered reflect the rich, diverse nature of pathology present in the area with equal exposure to men and women of multiple ethnicities and socioeconomic backgrounds.

Components: MOD.

Grading: GRD.

MDR 968. Psychiatry @ South County Mental Health. 2-4 Credit Hours.

This elective provides students with the opportunity to build upon their Psychiatry Core Clerkship experience by assuming increased responsibility for the diagnosis, treatment and management of psychiatric inpatients. Under the supervision of attending physicians, students will gain experience in the diagnosis and treatment of patients presenting with a wide range of psychopathology, including Mood Disorders, Psychotic Disorders and Substance Use Disorders. Students will gain experience in performing psychiatric evaluations, psychopharmacology and psychosocial interventions.

Components: MOD.

Grading: GRD.

MDR 969. Interventional Radiology. 4 Credit Hours.

The course is an introduction to Vascular/Interventional Radiology and consists of intensive exposure to Vascular and Interventional Radiology procedures under the direct supervision of interventional radiologists. Students will learn and participate in (a) the use of radiological imaging to guide procedures in different organ systems, (b) the evaluation and management of patients requiring interventional radiology procedures, and (c) performance of interventional procedures, including arterial and venous angiography, angioplasty, stenting, embolization of tumors and vascular malformations, and other vascular and interventional procedures. They will also be instructed in the placement of different venous access devices. Students will also be exposed to non-vascular procedures such as percutaneous biliary drainage and tumor ablation.

Components: MOD.

Grading: GRD.

MDR 970. Ophthalmology for the Non-Ophthalmologist. 2 Credit Hours.

The two week clinical elective in ophthalmology is geared toward medical students with a particular interest in obtaining an in depth understanding of fundamental ophthalmology (geared for every student regardless of specialty interest). Aspects of ophthalmology that are pertinent to the practice of internal medicine, neurology, pediatrics, family practice and other primary care specialties will also be taught. Students will rotate through the emergency room, operating room, and various subspecialty clinics at the Bascom Palmer Eye Institute where they will shadow attendings and housestaff. A comprehensive didactic course will be conducted concurrently during this two week block which includes interactive case based presentations. A final examination will be administered at the conclusion of the course. Students are also welcome to attend weekly grand rounds and fluorescein conferences as well as daily resident lectures during the rotation. An additional two weeks is offered for students considering ophthalmology as a career. All students wishing to be part of the four week course must have approval of the course coordinator. These additional two weeks are set up as a preceptorship and may be arranged independently with a faculty ophthalmologist.

Components: MOD.

Grading: GRD.

MDR 971. Ophthalmic Pathology. 4 Credit Hours.

The two week clinical elective in ophthalmology is geared toward medical students with a particular interest in obtaining an in depth understanding of fundamental ophthalmology (geared for every student regardless of specialty interest). The purpose of the RMC Emergency Medicine clerkship at Holy Cross is to provide students with an opportunity to acquire a foundation of knowledge and skills to care for patients with emergency medical conditions. Every physician should possess adequate assessment and management skills to rapidly identify life-threatening conditions, to initiate care, and to know whom and when to call for assistance. The Emergency Department is also one of the few practice sites where students play an integral role in the initial evaluation of an "undifferentiated" patient – where the diagnosis is completely unknown on initial contact, and the clinician must "start from scratch" to formulate a differential diagnosis, plan of evaluation, and plan of management. Experience in a wide range of procedural skills are also readily available including airway management, suturing, and central venous line placement. Students will participate in an EMS ride along, simulation cases, and didactic sessions. Students are evaluated through clinical evaluations and a written examination.

Components: LEC.**Grading:** GRD.**MDR 992. RMC Radiation Oncology. 2-4 Credit Hours.**

This is a 2 or 4-week elective intended to expose the senior medical student to spectrum of experiences in radiation-oncology. It's anticipated that the student will rotate through 2-3 outpatient clinic settings and be exposed to various radiation-oncology treatment modalities/technologies.

Components: MOD.**Grading:** GRD.**MDR 993. RMC Urology. 2-4 Credit Hours.**

This course will expose the student to general urology in a busy office setting, at the hospital for daily rounds, and in the operating suite, where the student will scrub in surgical cases as a first or second assistant. The student will work closely with Dr. Gold and with the other physicians and staff at the Urology Center of South Florida. The student will be evaluating patients in the office and hospital, presenting findings and discussing the treatment plan with attending staff, and participating in a wide variety of minor office procedures as well as surgical procedures in the OR.

Components: MOD.**Grading:** GRD.**MDR 994. Adult Allergy and Immunology. 2-4 Credit Hours.**

The adult Allergy and Immunology elective is designed to give senior medical students exposure to the spectrum of diseases seen in the field of Allergy/ Immunology. The student will predominantly rotate through the outpatient clinic and see patients and procedures based on the emphasis of that location.

Components: MOD.**Grading:** GRD.**MDR 995. WPB VAMC Physical Medicine and Rehabilitation. 2-4 Credit Hours.**

The purpose of this rotation is to provide the medical student with an introduction to the field of PM&R with emphasis on basic assessment and management options for common musculoskeletal disorders and neurological conditions affecting physical function. The rotation takes place mostly in the outpatient clinic setting with opportunities to also learn in other settings such as a nursing home or acute general hospital. There is also exposure to electrodiagnostic medicine and pain management.

Components: MOD.**Grading:** GRD.**MDR 996. International Study Abroad. 8.00 Credit Hours.**

All students going abroad on international programs (ie, medical mission trips and others), regardless if UM or non-UM sponsored/related, must obtain proper approval from the Office of Student Affairs. Required forms can be found on the MedEd website under Important Documents for Students – "Administrative Requirements for International Study". MDR 996 "International Study Abroad" – Senior medical students may obtain academic credit for selected international clinical experiences. Only senior students are allowed to receive credit for such experiences. Credit is counted towards their Elective requirements. The above mentioned forms must be filled out. Additional information is also required, including written goals/objectives for the rotation, expectations, student responsibilities, location/institution for the clinical experience, how the student will be evaluated, and the name/contact of physician who will complete the evaluation form. This information needs to be presented in advance to the Senior Associate Dean for Undergraduate Medical Education for approval prior to the trip, preferably far in advance.

Components: MOD.**Grading:** GRD.**MDR 997. Research Md/Phd Program. 8.00 Credit Hours.**

Students must have defended their thesis for Graduate School and also finished their 3rd year MD clerkships student will be granted 8 credits.

Components: MOD.**Grading:** GRD.

MDR 998. Medical Students from MD Program on Research. 0 Credit Hours.

Requires approval from the Senior Associate Dean for Undergraduate Medical Education

Components: MOD.

Grading: GRD.

MDR 999. Medical Students on MD program on LOA. 0 Credit Hours.

Requires approval from the Senior Associate Dean for Undergraduate Medical Education

Components: LEC.

Grading: GRD.

MDR 000. Elective. 1-30 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

Microbiology and Immunology (MIC)

MIC 100. Microbiology as it Relates to Humans (EXP). 3 Credit Hours.

An introductory microbiology course for the summer scholars program. Microorganisms are in every facet of our lives and make up a microscopic world. Right now, your body is inhabited by over 40 trillion bacteria. Due to the evolution of our immune systems, we have been able to coexist with this world. It is when our immune systems weaken or when our otherwise healthy immune system encounters a particularly nasty pathogen that we become vulnerable. This course will cover the topics of how our immune system works, how microbial pathogens cause disease, how beneficial microbes protect us from disease, and some of the other activities perform that impact our world. The laboratory will provide you with invaluable experience in growing, staining, viewing and identifying microorganisms through the use of practical techniques and procedures. An in lab presentation of your "unknown organism" will culminate what you have learned.

Components: LAB.

Grading: GRD.

Typically Offered: Summer.

MIC 201. Modern Plagues and Society. 3 Credit Hours.

An examination of three infectious diseases (AIDS, tuberculosis, and malaria) that currently impact a significant fraction of the human population, describing the infectious microbes themselves, efforts of researchers to contain these diseases, and how politics, infrastructure, and geographical factors determine public health outcomes.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MIC 280. UMiami Scientifica Magazine - Writer. 0 Credit Hours.

UMiami Scientifica is a premier scientific publication at the University of Miami. The magazine, focuses on the STEM fields and publishes quarterly. Students who write for the magazine will learn to write clearly, concisely and in a manner that can be understood by the layperson. Successfully completing an article does not mean that an article will be published.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MIC 301. Introduction to Microbes and the Immune System. 3 Credit Hours.

Basic principles of microbiology and immunology; the microbiology component will include basic properties of bacteria, viruses, and parasites and how microbes interact with multicellular organisms in both disease and non-disease settings. The Immunology component presents the players and basic concepts of immune responses as they apply to combat infectious pathogens, autoimmunity, allergy and transplantation. Course is required for microbiology and immunology majors; recommended for biology, chemistry and biochemistry majors and those considering the health sciences

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MIC 304. Introduction to Microbes and the Immune System (Lab). 2 Credit Hours.

Basic laboratory principles of microbiology and immunology. Students are instructed on how to handle, culture, and identify microorganisms.

Microscope care/use, various staining techniques, ELISA, blood typing, bacterial transformation, and more. This laboratory is required of all microbiology and immunology majors.

Corequisite: MIC 301.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

MIC 319. Innate Immunity. 3 Credit Hours.

The innate immune system provides the first line of defense against infectious microorganisms and is a very important disease-preventing mechanism. In this course the students will learn the molecular and cellular processes mediating innate immune responses to microbial pathogens, including intra- and extra- cellular bacteria and viruses.

Prerequisite: MIC 301 OR 303 OR 304.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MIC 320. Introduction to Microbes and the Immune System for Nurses. 3 Credit Hours.

Course covers the basic principles of microbiology and immunology. Course cannot be used for MIC major or minor credit.

Requisite: School of Nursing Health Studies.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MIC 321. Immunobiology. 3 Credit Hours.

Mechanisms underlying the cooperation between T-cells, B-cells, and antigens leading to humoral and cell mediated responses. The significance of immune cells and their products pertaining to autoimmunity, transplantation, and the surveillance of neoplastic cells is covered.

Prerequisite: MIC 301 or MIC 303.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MIC 322. Medical Parasitology. 3 Credit Hours.

Course discusses the biochemistry, physiology, pathogenicity, immunology, and mechanism of drug action and resistance of medically important parasitic protozoa, trematodes, nematodes, and cestodes.

Prerequisite: MIC 301 or MIC 303.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MIC 323. Microbial Pathogenesis and Physiology. 3 Credit Hours.

Fundamental properties of microbes as well as host-microbe relationships at the molecular and cellular levels.

Prerequisite: MIC 301. Or MIC 303.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MIC 436. Fundamental and Medical Virology. 3 Credit Hours.

The study of viruses as biological entities and etiological agents of disease. Virus-cell and virus-host interactions are also discussed.

Prerequisite: MIC 301 or MIC 303.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MIC 441. Microbiology and Immunology Colloquium. 1 Credit Hour.

External and internal faculty presentations as well as graduate presentations of recent advances in research. Course meets on hour per week.

Prerequisite: MIC 301. Or MIC 303.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

MIC 451. Special Projects in Immunobiology. 2-6 Credit Hours.

Wet bench laboratory research with faculty in the Microbiology and Immunology (M&I) Department at the Miller School of Medicine. Students will be actively participating in all aspects of hypothesis-driven scientific research ranging from familiarity with the literature to conducting and analyzing experiments.

Requisite: at least 17 credits in MIC and MIN GPA 3.0.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

MIC 452. Special Projects in Parasitology. 2-6 Credit Hours.

Wet bench laboratory research with faculty in the Microbiology and Immunology (M&I) Department at the Miller School of Medicine. Students will be actively participating in all aspects of hypothesis-driven scientific research ranging from familiarity with the literature to conducting and analyzing experiments.

Requisite: at least 17 credits in MIC and MIN GPA 3.0.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

MIC 453. Special Projects in Pathogenic Bacteriology. 2-6 Credit Hours.

Wet bench laboratory research with faculty in the Microbiology and Immunology (M&I) Department at the Miller School of Medicine. Students will be actively participating in all aspects of hypothesis-driven scientific research ranging from familiarity with the literature to conducting and analyzing experiments.

Requisite: at least 17 credits in MIC and MIN GPA 3.0.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

MIC 454. Special Projects in Microbial Genetics. 2-6 Credit Hours.

Wet bench laboratory research with faculty in the Microbiology and Immunology (M&I) Department at the Miller School of Medicine. Students will be actively participating in all aspects of hypothesis-driven scientific research ranging from familiarity with the literature to conducting and analyzing experiments.

Requisite: at least 17 credits in MIC and MIN GPA 3.0.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

MIC 455. Special Projects in Immunogenetics. 2-6 Credit Hours.

Wet bench laboratory research with faculty in the Microbiology and Immunology (M&I) Department at the Miller School of Medicine. Students will be actively participating in all aspects of hypothesis-driven scientific research ranging from familiarity with the literature to conducting and analyzing experiments.

Requisite: at least 17 credits in MIC and MIN GPA 3.0.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

MIC 456. Special Projects in Virology. 2-6 Credit Hours.

Wet bench laboratory research with faculty in the Microbiology and Immunology (M&I) Department at the Miller School of Medicine. Students will be actively participating in all aspects of hypothesis-driven scientific research ranging from familiarity with the literature to conducting and analyzing experiments.

Requisite: at least 17 credits in MIC and MIN GPA 3.0.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

MIC 460. Advanced Topics in Microbiology and Immunology. 3 Credit Hours.

An extensive and detailed examination of a number of topics covered in the core courses of the major. The goal is for upper-division undergraduate students to take the knowledge base they acquired in their major core courses into 'cutting edge' research areas. Each topic (of a total of 4 to 8) will be presented by a Faculty member with expertise in the area. Topics may include HIV Infection and the Immune System, immunology of Pregnancy, and Mitochondrial-based diseases. Emphasis will be placed on gaining a familiarity with the primary scientific literature.

Requisite: MIC 301 OR MIC 303 OR MIC 304 AND MIC 319 AND MIC 321.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MIC 601. Medical Microbiology. 5 Credit Hours.

Course discusses the nature of microbial agents of infectious disease as well as relationship of virulence to host resistance and fundamental immunologic concepts. Microbial physiology and genetics, the structure, design, and mechanism of action on antimicrobials.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MIC 623. Mechanisms of Microbial Virulence. 2 Credit Hours.

This course will focus on the mechanisms employed by bacterial and viral pathogens to produce disease in animals and humans. The course is divided into two, three-week modules. The first module will cover bacterial pathogens with an emphasis on the bacteria-host cell interaction. Specific topics will include: bacterial attachment and invasion of eukaryotic cells, virulence gene regulation, secretion of virulence factors, bacterial toxins and obligate intracellular bacterial pathogens. The second module will cover viruses and human viral diseases with an emphasis on viral replication, gene expression, virus-host cell interactions and viral oncology. Classes will consist of a mixture of lectures and discussions of recent or classic papers.

There will be two exams.

Prerequisites: MIC 775 and MIC 755.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MIC 705. Faculty Research and Discussions. 1 Credit Hour.

Forum for the discussion of the current research projects and interests of the faculty. This course provides students with the opportunity to exchange ideas about important scientific questions and the technologies being applied to experimentally address the hypotheses being tested.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MIC 711. Accelerated Basic Science Medical Curriculum. 1-18 Credit Hours.

Beginning in the latter part of June each year, extending to the middle of February of the ensuing year, the following accelerated and intensive complete basic science medical curriculum is offered: Embryology, Gross Anatomy, Histology, Biochemistry, Neuroanatomy, Biophysics and Neurophysiology, Systemic Physiology, Pathology, Medical Microbiology, and Pharmacology. single grade will be entered on the graduate transcript for this course.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MIC 716. Advanced Molecular Biology. 3 Credit Hours.

The molecular basis of cellular function and regulation in both procaryotic and eucaryotic systems. The molecular genetics and biochemistry of the genetic material and its utilization during replication, transcription, translation, cellular growth, division, and differentiation. Recombinant DNA technology and molecular genetics are discussed. This course is designed for graduate students in biological sciences. A good background in biology or biochemistry is recommended.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MIC 726. Laboratory Experimentation. 4 Credit Hours.

One or two laboratory training sessions of 6-12 weeks each. Each student rotates through faculty research laboratories in the areas of immunology, molecular biology, and microbiology, (bacteriology, virology, parasitology) where they receive "hands on" experience by participating in ongoing research projects.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MIC 727. Laboratory Experimentation. 6 Credit Hours.

Two or three laboratory training sessions of 6-12 weeks each. Each student rotates through faculty research laboratories in the areas of immunology, molecular biology and microbiology, (bacteriology, virology, parasitology) where they receive "hands on" experience by participating in ongoing research projects.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MIC 728. Principles of Immunology. 3 Credit Hours.

This team-taught course will present immunological concepts and reasoning in immunological research. The course is divided into 7 weekly modules. Each module has a common theme and consists of 3 lectures on immunological concepts and one session where students present and discuss a research paper related to the theme of each module. The paper discussion session will include use of disease models as a portal to understand the function of immune system in health and disease. The module topics are (a) lymphoid cell development, (b) antigen recognition, (3) initiation of immune responses, (4) T lymphocyte effector development and function, (5) T cell immunity versus tolerance, (6) B cell immunity, and (7) innate immunity. There will be one exam following the first 4 modules and the second exam after the remaining 3 modules.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MIC 731. Special Work. 1-5 Credit Hours.

Special work, lecture, laboratory or a combination of these, as determined by advisor in accord with student's individual interest. Course is offered only on demand.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MIC 751. Advance Topics in Microbiology and Virology. 3.00 Credit Hours.

This course is intended to explore, at an advanced level, the dynamic equilibrium that exists between microbial pathogens and host immune systems with emphasis on factors that influence progression to disease or sterilizing immunity. Mechanisms employed by the host and pathogen to shift that equilibrium in their favor will be discussed taking into account interactions at systems, cellular and sub-cellular levels.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MIC 755. Micro and Immunol Research: Career Skills and Proficiencies. 1-6 Credit Hours.

This is a longitudinal training course delivered throughout all the years. Students start taking it when entering the program upon choice of Lab and mentor. Full credit will be given at time of PhD defense depending on attendance and participation to all modules. This include writing assignments and attendance/participation in seminars, journal clubs, research forums, and classes when applicable.

Components: MOD.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

MIC 761. Advanced Topics in Molecular Biology of Animal Viruses. 2 Credit Hours.

This course is organized around four major themes of virological studies: (i) viral genome transcription, replication, and virus assembly; (ii) viral pathogenesis; (iii) virus cell interactions; and (iv) antiviral strategies. Most recent research developments in these areas are covered through lectures by participating faculty members as well as paper presentations by students.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MIC 775. Advanced Microbiology and Immunology. 3 Credit Hours.

This course will explore in depth the current and advanced concepts and topics in selected areas of Microbiology and Immunology. The classes will consist of a mixture of lectures and discussions of recent papers. Besides covering recent advances and cutting edge experimental approaches in cellular and molecular immunology and microbiology, this course will also expose students to breakthrough concepts and themes that link the disciplines of immunology, microbiology and virology.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MIC 780. Research Ethics. 1 Credit Hour.

The NIH Guide for Grants and Contracts stipulates that Institutions receiving support for National Research Service Award Training Grants are required to develop a program in the principles of Scientific Integrity. This program should be an integral part of the proposed training effort. The University of Miami School of Medicine has chosen to respond to this requirement with this course. This course must be taken during the first semester in the Department or Program. This is a six-hour course and is given in two sessions of three hours each.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MIC 799. Advanced Topics. 1-3 Credit Hours.

Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MIC 810. Master's Thesis. 1-6 Credit Hours.

The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: THI.

Grading: SUS.

Typically Offered: Offered by Announcement Only.

MIC 820. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in MIC 710 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MIC 830. Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of MIC 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

MIC 840. Doctoral Dissertation - Post Candidacy. 1-12 Credit Hours.

Required for all PhD candidates. The student will enroll for credits as determined by their advisor/ Office of Graduate and Postdoctoral Studies but not less than a total of 24. No more than 12 hours of research may be taken in a regular semester, and no more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall.

MIC 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Military Science (MSL)

MSL 101. Basic Military Science. 2.00 Credit Hours.

Introduction to Army organizations, military customs and courtesies, basic stationary and marching drills, basic map reading, land navigation, drown-proofing, rappelling, river crossing techniques, physical fitness training, and practical exercises in field discipline. Requires outdoor leadership laboratory and at least one weekend field training exercise.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MSL 102. Basic Military Science. 2.00 Credit Hours.

Introduction to basic leadership principles and traits, army command and staff officer duties, awards, decorations, individual military tactics, field discipline, patrolling techniques, radio telephone procedures, rappelling and river crossing. Requires outdoor leadership laboratory and at least one weekend field training exercise.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MSL 201. Basic Military Science. 2.00 Credit Hours.

Instruction to squad and platoon marching drills, development of physical fitness training programs, conduct on military training and inspections, leadership techniques, advanced map reading, rappelling and river crossing techniques. Requires outdoor leadership laboratory and at least one weekend field training exercise.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MSL 202. Basic Military Science. 2.00 Credit Hours.

Continued instruction in drill and ceremonies, radio/telephone procedures, nuclear, biological, and chemical warfare, practical land navigation, orienteering, and introduction to combat troop leading procedures. Requires outdoor leadership laboratory and at least one weekend field training exercise.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MSL 301. Basic Military Science. 3.00 Credit Hours.

Classroom and field experience in leading squads and platoons in both garrison and combat environments. Practical exercises in combat troop leading procedures. Advanced physical fitness training to include endurance runs and tactical road marches. Requires outdoor leadership laboratory and at least one weekend field training exercise.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MSL 302. Advanced Military Science. 3.00 Credit Hours.

Classroom instruction and field experience in combat troop leading procedures for offensive, defensive and patrolling missions. Advanced written and practical land navigation exercises. Company level drill and ceremonies to include manual of arms. Classroom and practical exercises on requests for artillery and mortar fires. Practical experience with training underclassmen in first aid and individual tactics.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MSL 401. Advanced Military Science. 3.00 Credit Hours.

Instruction instills an uncompromising commitment to the Army Ethic, enhances thought processes and decision-making skills, and relates officer behavior to cadet leadership roles. Students are primarily responsible for the command and control of the cadet battalion for training purposes.

Student's role is principally one of officer leader at the platoon (30 or more under classmen) and higher levels and cadet instructor/evaluator. Rifle qualification. Company level drill and ceremonies to include manual of arms.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MSL 402. Advanced Military Science. 3.00 Credit Hours.

Capstone course in the preparation for a commission as a second lieutenant. The training is intended to solidify the commitment to officership, reinforce individual competencies, and afford maximum practical officer leader experiences through responsible leadership positions within the cadet battalion command and staff.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MSL 440. Studies in Military History. 1-3 Credit Hours.

Supervised readings and independent study in military history.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MSL 499. Independent Studies in U.S. Military History. 3 Credit Hours.

Supervised readings and independent study in United States Military History. Writing requirements.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

Military Studies (MIS)

MIS 100T. Transfer Credit Elective. 1-10 Credit Hours.

Components: LEC.

Grading: TRN.

Modern Languages and Literature (MLL)

MLL 195. Transfer Credit. 1-3 Credit Hours.

Transfer credit at the 100 level for courses in languages not offered by the Department of Modern Languages and Literature.

Components: UNG.

Grading: GRD.

Typically Offered: Fall.

MLL 295. Transfer Credit. 1-3 Credit Hours.

Transfer credit at the 200 level for courses in languages not offered by the Department of Modern Languages and Literature.

Components: LEC.

Grading: GRD.

MLL 321. Topics in Comparative Literary Studies. 3 Credit Hours.

Comparative and/or interdisciplinary topics in the study of literature. Specific topics vary; may be repeated for credit if topics differ. Taught in English
Prerequisite: ENG 106 or ENG 107.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MLL 322. Topics in Comparative Cultural Studies. 3 Credit Hours.

Cultural phenomena in various societies. Interdisciplinary analysis of the political dynamics of contemporary culture and its historical foundations with a focus on ideology, social class, nationality, ethnicity, sexuality and/or gender. Specific topics vary; may be repeated for credit if topics differ. Taught in English.

Prerequisite: ENG 106 or ENG 107.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MLL 325. World Cinema. 3 Credit Hours.

World cinema in a comparative perspective - national or international film movements and directors - based upon narrative film analysis. May be repeated for credit if topics vary.

Prerequisite: ENG 106 or ENG 107.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MLL 330. Comparative Topics in Gender and Sexuality. 3 Credit Hours.

Topics in gender and sexuality in a comparative perspective. May be repeated if topics vary. Taught in English.

Prerequisite: ENG 106 or ENG 107.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MLL 340. Migration Studies. 3 Credit Hours.

Topics within the literary and/or cultural dimensions of migration in a comparative framework.

Prerequisite: ENG 106 or ENG 107.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MLL 345. Franco-Maghreb Studies. 3 Credit Hours.

Major historical, social, cultural and literary issues related to the Franco-Maghrebian interface, in a comparative perspective. May be repeated if topics vary.

Prerequisite: ENG 106 or ENG 107.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MLL 360. The Caribbean through Literary and Cultural Studies. 3 Credit Hours.

Literary and cultural readings on the Caribbean in comparative perspective. May be repeated if topics vary.

Prerequisite: ENG 106 or ENG 107.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MLL 370. Studies in Literature, Culture, and Science. 3 Credit Hours.

An analysis, in a comparative or historical perspective, of the literary works that expose the deep interaction and mutual influence between literary or visual cultures and the sciences. Topics might include: Leonardo's genius; technology at the turn of the 20th-century; 20th-century wars, the science behind them and their representations; Vesalius's anatomical work and the philosophy and representation of the body in 16th-century Europe.

Prerequisite: ENG 106 or ENG 107.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MLL 395. Transfer Credit. 1-3 Credit Hours.

Transfer credit at the 300 level for courses in languages not offered by the Department of Modern Languages and Literature.

Components: LEC.

Grading: GRD.

MLL 404. Language in Society. 3 Credit Hours.

Overview of ideological, social, political, economic, and cultural issues of language in society, and the principle linguistic concepts and methodologies that guide research on those issues. Language variation, social dialectology, multilingualism, interaction and interpersonal communication, gender, language and power, language policy and planning, and globalization are highlighted. The main focus of the course (at least 80%) will be on non-English languages in particular, those taught in MLL.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

MLL 495. Transfer Credit. 1-3 Credit Hours.

Transfer credit at the 400 level for courses in languages not offered by the Department of Modern Languages and Literature.

Components: LEC.

Grading: GRD.

MLL 701. Intro to Second Language Teaching: Theory and Practice. 3 Credit Hours.

Introduction to the teaching of second languages in university settings. Overview of major theoretical approaches: sociocultural, communicative, and task-based. Practice with teaching techniques: Lesson planning, task design, use of the target language, grammar teaching, use of authentic oral and written materials in the classroom

Requisite: Graduate Standing.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

MLL 702. Bilingualism. 3 Credit Hours.

Social, psychological, linguistic, and pedagogical dimensions of language contact situations. Emphasis on Spanish and French.

Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MLL 703. Topics in Critical Studies of Language. 3 Credit Hours.

Special topics in the critical analysis of language.

Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MLL 704. Sociocultural Theory and Second Language Development. 3 Credit Hours.

Key principles of sociocultural theory of mind applied to second language acquisition and pedagogy. The seminar will explore the theoretical, methodological, and pedagogical implications of the theory, emphasizing concept-based teaching and dynamic assessment.

Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MLL 711. Introduction to Critical Theory. 3 Credit Hours.

An introduction to the major concepts, issues, and debates that inform contemporary literary criticism.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

MLL 712. Topics in Early Modern Comparative Literature. 3 Credit Hours.

Specific genres, works, authors and movements in comparative perspective in the early modern period (1300-1750). Topics may include: Trans-Atlantic Baroque; Grottesque Literature; Petrarchan Poetry in Italy, France, and England The Emergence of Professional Theater in Western Europe.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MLL 714. Readings in Critical Theory. 3 Credit Hours.

Representative works of critical theory as related to philosophy, sociology of culture, psychoanalysis, hermeneutics, deconstruction, etc. May be repeated for credit if topics are different.

Components: SEM.

Grading: GRD.

Typically Offered: Spring.

MLL 721. Special Topics in Literature. 3 Credit Hours.

May be repeated for credit, if topics are different.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MLL 726. Topics in Comparative Literature. 3 Credit Hours.

May be repeated for credit, if topics are different.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MLL 771. Introduction to Digital Humanities. 3 Credit Hours.

An introduction to the theory and practice of the digital humanities from a literary and cultural studies perspective. It introduces major types of digital humanities work and central debates and concerns in the field. The course is taught in English and is open to graduate students from all humanities departments. No experience in the digital humanities or with digital tools or methods is required.

Components: SEM.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MLL 772. Topics in Digital Humanities and Media Studies. 3 Credit Hours.

A survey of Media Studies. Students will approach a broad range of texts in the field, and outline both its historical development and present state, with a particular focus on emerging theories and practices within Media Studies and Digital Humanities in the academy. The course is taught in English and is open to graduate students from all humanities departments.

Components: SEM.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MLL 773. Digital Medieval Studies. 3 Credit Hours.

An overview on the history and theoretical trends regarding digital resources and tools applied to medieval disciplines. This course is taught in English and is open to graduate students from all humanities departments, especially those interested in historical studies and digital methods.

Components: SEM.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MLL 774. Practicum in Digital Humanities. 3 Credit Hours.

Offers students the possibility to apply their learning in the field of Digital Humanities and move forward on their personal Digital Humanities research project. Students will carry out many practical exercises with programming languages and digital tools, and work towards a final digital project. This course is taught in English and is open to graduate students from all humanities departments.

Components: SEM.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MLL 792. Directed Readings. 1-3 Credit Hours.

Directed readings.

Components: IND.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MLL 793. Teaching Practicum. 3 Credit Hours.

Teaching Practicum.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MLL 797. Readings for the Ph.D. Examinations. 3 Credit Hours.

For Ph.D. students who are preparing for exams.

Components: IND.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MLL 798. Internship. 1 Credit Hour.

Students work in a community or business setting on issues related to language, culture, and/or teaching.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MLL 799. Dissertation and Professional Writing Seminar. 1-3 Credit Hours.

This course will be taken during the seventh semester of graduate study, concurrently with the final preparation/defense of dissertation prospectus during the first month of the semester. The course provides a structure and a time frame for completing the first chapter of the dissertation over the course of that semester so that students have their projects well underway at the beginning of their eighth semester of graduate study. Students will present their thesis work-in-progress to the course instructor and each other while receiving broader counsel on dissertation completion strategies and various areas of professional writing, including conceptualizing arguments for various audiences, submitting grant proposals, and publishing across a variety of venues. Course is required in the fourth year of graduate study and may be repeated optionally in subsequent years by students in advanced stages of dissertation writing.

Prerequisite: SPA 830 or FRE 830.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

Molecular and Cellular Pharmacology (MCP)

MCP 701. Seminar. 2 Credit Hours.

Review of related literature, discussion of special topics, student presentations and attendance of faculty/department seminars. Course may be repeated for a total of eight credits.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

MCP 704. Mechanisms of Drug Action. 3 Credit Hours.

This course consists of a combination of lectures, problem sessions and student presentations. Students will be given in-depth exposure to the fundamental principles of Pharmacology. The mechanism of action of some specific drug classes will be examined in detail.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MCP 731. Special Topics. 1-6 Credit Hours.

Directed readings on subjects not ordinarily treated in depth in specific courses. Course may also consist of special laboratory problems.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MCP 732. Cardiovascular Pharmacology. 2-3 Credit Hours.

The course covers cardiovascular pharmacology, necessary cardiovascular physiology and anatomy and the function and pharmacology of the autonomic nervous system. The students learn about the function and energetics of the heart and how it is changed in cardiac disease.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MCP 743. Introductory Python Programming for Bioscientists. 3 Credit Hours.

The course is designed to teach the basic of the Python programming language. Students will learn to use code to solve problems related to biological datasets such as genomes, proteomes, and molecular structures.

Components: DIS.

Grading: SUS.

Typically Offered: Spring.

MCP 752. Systems Biology and Approaches in Pharmacology. 3 Credit Hours.

In this course students will discuss the biochemical structure and function of signaling pathways that are most frequently targeted by the pharmaceutical industry. Students will be exposed to novel concepts and findings, in particular with regards to innovative therapeutic applications. Each week will address a different pathway or signaling network, its biological targets and functions, and specific drugs that target it. Each week includes one lecture and one class where students and instructor convene to discuss articles, technical approaches or fundamental questions in the field.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MCP 753. Computational Pharmacology and Fundamentals of Drug Design. 3 Credit Hours.

Like physics and chemistry in the 20th century, computers are transforming biology and medicine at a rapid pace. In pharmacology, the importance of computation and bio- and chemo-informatics cannot be overestimated. This course is collectively taught by the MCP faculty and addresses the following four distinct areas. (1). Computer-based analysis of drug-receptor interactions. Students learn principles and specific software packages for in silico docking of drugs to proteins, predict structure-activity relationships and become familiar with programming tools required for such tasks. (2). Using on-line databases to study biological activity, therapeutic indexes, toxicity and other characteristics of drugs and other chemicals. Similarly, they learn to analyze the vast information available for drug targets such as receptor proteins and enzymes. (3). Students learn about pharmacogenomics, an area essential for personalized medicine. Here, they learn, for example, how to predict the reaction of certain populations to particular treatments. (4). Students learn about the drug development pipeline, starting with the design, through screening chemical libraries and to the basics of FDA approval. In addition to lectures, they visit a UM robotic drug screening facility and UM pharmacy. Overall, this course emphasizes a hands-on approach with students performing computation tasks on their laptops. Laptops and gaining access to certain on-line resources are required.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MCP 768. Neuropharmacology. 2-3 Credit Hours.

An intensive course covering the regulation of neural processes by drugs that target neurotransmitter signaling at the level of GPCRs, G proteins, second-messengers and ion channels.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MCP 810. Master's Thesis. 1-6 Credit Hours.

The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

MCP 820. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in MCP 710 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MCP 830. Dissertation Research-Pre-Candidacy. 1-12 Credit Hours.

Required for all PhD candidates. The student will enroll for credits as determined by their advisor/Office of Graduate and Postdoctoral Studies. No more than 12 hours of research may be taken in a regular semester, and no more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

MCP 840. Doctoral Dissertation- Post Candidacy. 1-12 Credit Hours.

Required for all PhD candidates. The student will enroll for credits as determined by their advisor/ Office of Graduate and Postdoctoral Studies but not less than a total of 24. No more than 12 hours of research may be taken in a regular semester, and no more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

MCP 850. Research in Residence. 1 Credit Hour.

Student must be registered in the semester they plan to defend. Used to establish research in residence for the PhD after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Student may be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Molecular, Cellular and Developmental Biology (MDB)

MDB 701. Seminar. 1-2 Credit Hours.

Students are required to present their research findings as well as attend Department Faculty seminars.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MDB 710. Readings in Cell Biology. 1-6 Credit Hours.

Current and classical research papers in cell, developmental, and molecular biology. Critical evaluation of papers and the methodologies used is included.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MDB 713. Topics in Cell Biology. 1-6 Credit Hours.

Formal seminar course in which each student presents a lecture relating to a specific theme. Topic areas include cell, developmental, and molecular biology with the subject changing each term.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MDB 751. Advanced Cell Biology Approaches to Molecular Medicine. 2-3 Credit Hours.

Structure, function, and biogenesis of cellular organelles and the cytoskeleton, including their regulation and dynamic interactions. The course is taught in seminars, followed by student-led discussion of recent relevant papers in the literature. The goal of the course is to lead the students to in-depth conceptual and methodological analysis of selected topics up the understanding of current leading-edge research in specific topics in Cell Biology. The course is designed to cover knowledge beyond the text books and to enable the students to design and criticize experimental approaches in Cell Biology acceptable for current peer-review criteria.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MDB 752. Current Topics in Mammalian Development. 2-3 Credit Hours.

The course will cover central emerging topics in mammalian development today including embryonic stem cells, micro RNA gene regulation, and organogenesis. The class will have an interactive format, starting with basic lecture in mammalian development; subsequent sessions will include an overview of the selected topic by faculty, followed by round table discussions of current paper(s) in the field.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MDB 753. Histology. 1 Credit Hour.

This course will offer the student a virtual slide collection of histology with interactive lectures to support image-based learning. The course covers basic tissues, organs, and systems (vascular; heart; pancreas; eyes; brain; spinal cord; liver; lung; mouse embryo; GI track). The course will meet once a week for one hour.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MDB 763. Stem Cell Biology and Genetic Engineering for Regenerative Medicine. 3 Credit Hours.

This course is designed to provide a current overview on the cell and molecular biology of stem cells, their identification and analysis, and the current status of their use for the repair and regeneration of a variety of tissues including heart, lung, muscle, pancreatic, neuronal and others.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MDB 765. Tumor Biology. 3 Credit Hours.

This course, comprised of lectures and student-led literature discussion, is intended to provide broad-based instruction on the modern molecular and cellular aspects of cancer biology, basic and translational research. The course highlights multiple areas including cell cycle, apoptosis, epidemiology, angiogenesis, and meets two times weekly.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MDB 810. Master's Thesis. 1-6 Credit Hours.

Current and classical research papers in cell, developmental, and molecular biology. Critical evaluation of papers and the methodologies used is included.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MDB 820. Research in Residence. 1-6 Credit Hours.

Direct laboratory experience as determined by the Departmental Graduate Committee.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MDB 830. Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of MDB 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

MDB 840. Doctoral Dissertation- Post Candidacy. 1-12 Credit Hours.

Required for all PhD candidates. The student will enroll for credits as determined by their advisor/ Office of Graduate and Postdoctoral Studies but not less than a total of 24. No more than 12 hours of research may be taken in a regular semester, and no more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

MDB 850. Research in Residence. 1 Credit Hour.

Student must be registered in the semester they plan to defend. Used to establish research in residence for the PhD after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Student may be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Music Education and Therapy (MED)

MED 10. Mus Therapy Forum. 0 Credit Hours.

The course provides a weekly forum for sharing information about issues, current developments, and other matters related to music therapy as a field of study and as a profession.

Components: FOR.

Grading: CNC.

Typically Offered: Fall & Spring.

MED 149. Functional Techniques in Music Therapy I. 2 Credit Hours.

Students acquire functional guitar and piano skills while learning repertoire and techniques for leading and accompanying music therapy experiences.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MED 15. Mus Edu Forum. 0 Credit Hours.

The course provides a weekly forum for sharing information about issues, current developments, and other matters related to music education as a field of study and as a profession. The course is required for all undergraduate MED majors during each semester, except during the semester of the internship. Components: FOR.

Components: FOR.

Grading: CNC.

Typically Offered: Fall & Spring.

MED 159. Introduction to Music Therapy. 2 Credit Hours.

An overview of the field of music therapy, including history, theory and clinical practice. Includes field observations.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MED 240. Woodwind Techniques. 1 Credit Hour.

Course provides group instruction in woodwind instruments with emphasis on basic skills of performance as well as the appropriate teaching techniques, methods, and materials necessary for public school pedagogy.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

MED 241. Brass Techniques. 1 Credit Hour.

Group instruction in brass instruments with emphasis upon basic skills of performance as well as the appropriate teaching techniques, methods, and materials necessary for public school pedagogy.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

MED 242. Percussion Techniques. 1 Credit Hour.

Group instruction in percussion (snare drum, mallet-keyboard percussion, timpani, drum set, and small accessory instruments) with emphasis upon basic skills of performance as well as the appropriate teaching techniques, methods, and materials necessary for public school pedagogy.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

MED 243. String Techniques. 1 Credit Hour.

Group instruction in percussion (snare drum, mallet-keyboard percussion, timpani, drum set, and small accessory instruments) with emphasis upon basic skills of performance as well as the appropriate teaching techniques, methods, and materials necessary for public school pedagogy.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

MED 244. Vocal Techniques. 1 Credit Hour.

Class instruction in fundamentals of singing, breath control, tone production, and solo singing for music majors.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

MED 245. Folk and Modern Instrumental Techniques. 1 Credit Hour.

Group instruction in folk and modern instruments, including but not limited to guitar, ukulele, recorder, and drums, with emphasis on basic skills of performance and classroom uses, as well as the appropriate teaching techniques, methods, and materials.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

MED 249. Functional Techniques in Music Therapy II. 2 Credit Hours.

Students acquire functional piano skills while learning repertoire and techniques for leading and accompanying music therapy experiences. Vocal skills are also emphasized.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

MED 259. Music Therapy Pre-Practicum. 2 Credit Hours.

Students will learn a treatment-planning model for clinical practice. Topics include: assessment, goal setting, intervention design and data collection.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MED 340. Marching Band Fundamentals. 1 Credit Hour.

A study of all types of marching band activities and methods of presentation.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MED 359. Music Therapy Practicum 1A. 1 Credit Hour.

Structured clinical experience in music therapy under supervision of a music therapist in varying health-related settings. Focus of the 1A practicum is to observe and assist the on-site music therapist and to engage in limited co-leading.

Prerequisite: MED 259.

Components: PRA.

Grading: GRD.

Typically Offered: Fall & Spring.

MED 360. Music therapy Practicum 1B. 1 Credit Hour.

Structured clinical experience in music therapy under supervision of a music therapist in varying health-related settings. Focus of the 1B practicum is to observe and assist the on-site music therapist and to co-lead for half of all sessions.

Components: PRA.

Grading: GRD.

Typically Offered: Fall & Spring.
