Transfer Admission	65
Undergraduate International Admission	66
General Education Requirements	67
Grades	69
Graduation	73
Honors	75
First-Year Seminars	75
First Year Seminars	76
Foote Fellow Honors Program	76
Foote Fellow Honors Program	76
Student Status	76
Graduate Policies and Procedures	80
Academic Policies	80
Research Policies	90
Admission	94
Master's Degree	98
Doctoral Degree	99
Undergraduate Academic Programs	103
Architecture	104
Bachelor of Architecture	107
Bachelor of Science in Architectural Engineering and Master of Architecture	109
Minor in Architecture	113
Arts and Sciences	114
Aerospace Studies	119
Minor in Aerospace Studies	120
Africana Studies	120
B.A. in Africana Studies	121
Minor in Africana Studies	122
American Studies	123
B.A. in American Studies	123
Minor in American Studies	125
Anthropology	126
B.A. in Anthropology	127
Minor in Anthropology	130
Art and Art History	131
B.A. in Art History	132
B.A. in Art (General Study)	134
B.A. in Studio Art	136
B.F.A. in Art	138
Minor in Art and Art History	140
Astronomy	140
Biochemistry and Molecular Biology	140

B.S. in Biochemistry and Molecular Biology or Nutrition	141
Minor in Biochemistry and Molecular Biology	146
Biology	147
B.A. in Biology	148
B.S. in Biology	150
Minor in Biology	154
Chemistry	154
B.A. in Chemistry	156
B.S. in Chemistry	158
B.S. / M.S. in Chemistry Five-Year	160
Certified B.S. in Chemistry	163
Minor in Chemistry	166
Classics	166
B.A. in Classics - Classical Civilization Track	167
B.A. in Classics - Greek Track	169
B.A. in Classics - Latin Track	171
B.A. in Classics - Latin and Greek Track	172
Minor in Classics	174
Computer Science	174
B.A. in Computer Science	175
B.S. in Computer Science	178
B.S. + M.S. in Computer Science - Five Year	181
Minor in Computer Science	186
Criminology	187
B.A. in Criminology	188
Minor in Criminology	190
Economics	190
B.A. in Economics	190
Ecosystem Science and Policy	194
B.A. in Ecosystem Science and Policy	194
B.S. in Ecosystem Science and Policy	199
Certificate in Sustainability	205
Minor in Ecosystem Science and Policy	207
Education	208
Minor in Traditional Education	208
Professional Training Option Certificate	208
Engineering	209
English	209
B.A. in English	211
B.A. in English - Concentration in British Literary History	213
B.A. in English - Concentration in Creative Writing	216
B.A. in English - Concentration in Women's Literature	219

Minor in Creative Writing	221
Minor in English	222
Geography	222
B.A. in Geography	224
B.S. in Geography	225
Certificate in Geospatial Technology	227
Minor in Geography	228
Minor in Geospatial Technology	228
Minor in Social Science and Medicine	228
Geological Sciences	230
B.A. in Geological Sciences	230
B.S. in Geological Sciences	230
Five Year B.S./M.S. in Geological Sciences and Marine Geology	230
Minor in Geological Sciences	230
History	230
B.A. in History	230
Minor in History	232
International Studies	232
B.A. in International Studies	234
Minor in International Studies	236
Judaic Studies	236
B.A. in the George Feldenkreis Program in Judaic Studies	237
Minor in the George Feldenkreis Program in Judaic Studies	239
Latin American Studies	240
B.A. in Latin American Studies	241
B.A./M.A in Latin American Studies (Fellows in Latin American Studies)	243
Minor in Latin American Studies	245
Mathematics	246
B.A. or B.S. in Mathematics	247
Minor in Mathematics	251
Microbiology and Immunology	251
B.S. in Microbiology and Immunology	252
Minor in Microbiology and Immunology	256
Military Science	257
Modern Languages and Literatures	259
B.A. in French	262
B.A. in German	267
B.A. in Spanish	271
Minor in Arabic Studies	276
Minor in French	278
Minor in German	279
Minor in Italian	280

Minor in Modern Languages	280
Minor in Portugese	281
Minor in Spanish	282
Neuroscience	282
B.S. in Neuroscience	283
Philosophy	287
B.A. in Philosophy	288
Philosophy Major - Pre-Law Track	290
Philosophy Major - Pre-Med Track	292
Minor in Philosophy	294
Philosophy Minor - Pre-Law Track	294
Philosophy Minor - Pre-Med Track	295
Physical Sciences	295
Physics	295
B.S. in Applied Physics	296
B.S. Dual Major in Chemistry and Physics	304
B.S. Dual Major in Engineering and Physics	307
B.S. Dual Major in Marine Science and Physics	308
B.S. in Pure Physics	311
Minor in Physics	313
Political Science	314
B.A. in Political Science	314
B.A. in Public Administration	321
Minor in Political Science	322
Minor in Public Administration	323
Psychology	323
B.A. or B.S. in Psychology	325
Minor in Psychology	329
Religious Studies	329
B.A. in Religion and Health Care	330
B.A. in Religious Studies	333
Minor in Medical Humanities	335
Minor in Religion and Healthcare	335
Minor in Religious Studies	336
Sociology	336
B.A. in Sociology	337
Sociology & Criminology Double Major	339
Minor in Sociology	340
Theatre Arts	340
B.A. in Theatre Arts	342
B.F.A. in Theatre Arts - Acting	345
B.F.A. in Theatre Arts - Design/Technical Production	348

B.F.A. in Theatre Arts - Musical Theatre	350
B.F.A. in Theatre Arts - Stage Management	353
B.F.A. in Theatre Arts - Theatre Management	356
Minor in Theatre Arts	358
Urban Studies	359
Minor in Urban Studies	359
Women's and Gender Studies	360
B.A. in Women's and Gender Studies	361
Minor in LGBTQ Studies	362
Minor in Women's and Gender Studies	363
Business	364
Accounting	377
Accelerated Accounting Programs	378
B.B.A. in Accounting	380
B.S.B.A. in Accounting	383
Five-Year Accounting Program with Senior-Year Internship	385
Minor in Accounting	386
Business Law	386
B.B.A. in Legal Studies	387
B.S.B.A. in Legal Studies	390
Minor in Business Law for Business Students	393
Minor in Business Law for Non-Business Students	394
Business Technology	394
B.B.A. in Business Technology	395
B.S.B.A. in Business Technology	398
Minor in Business Technology	401
Economics	402
B.B.A. in Economics	402
B.S.B.A. in Economics	407
Minor in Political Economy for Business Students	412
Minor in Political Economy for Non Business Students	413
Minor in Quantitative Economics for Business Students	414
Minor in Quantitative Economics for Non Business Students	415
Finance	415
B.B.A. in Finance	416
B.B.A. in International Finance and Marketing	419
B.B.A. in Real Estate	422
B.S.B.A. in Finance	425
B.S.B.A. in International Finance and Marketing	428
B.S.B.A. in Real Estate	431
Minor in Finance	434
Minor in Real Estate	435

Health Management and Policy	435
B.B.A. in Health Sector Management and Policy	436
B.S.B.A. in Health Sector Management and Policy	439
Minor in Health Sector Management and Policy	442
Management	443
B.B.A. in Entrepreneurship	443
B.B.A. in Human Resource Management	447
B.B.A. in Management	449
B.S.B.A. in Entrepreneurship	452
B.S.B.A. in Human Resource Management	455
B.S.B.A. in Management	458
Minor in Entrepreneurship for Business Students	461
Minor in Entrepreneurship for Non-Business Students	462
Minor in Management for Business Students	463
Minor in Management for Non-Business Students	463
Management Science	464
B.S.B.A. in Business Analytics	464
Minor in Business Analytics	467
Marketing	468
B.B.A. in Marketing	468
B.S.B.A. in Marketing	471
Minor in Marketing for Business Students	475
Minor in Marketing for Non-Business Students	475
Communication	477
Cinema and Interactive Media	484
B.S.C. in Interactive Media	486
B.S.C. Motion Pictures - Business Track	488
B.S.C. Motion Pictures - Critical Studies Track	491
B.S.C. Motion Pictures - General Track	494
B.S.C. Motion Pictures - Production Track	498
B.S.C. Motion Pictures - Screenwriting Track	501
Minor in Game Design	504
Minor in Interactive Media	504
Minor in Motion Pictures	505
Communication Studies	505
B.S.C. Communication Studies - General Track	507
B.S.C. Communication Studies - Intercultural Track	509
B.S.C. Communication Studies - Organizational Track	511
B.S.C. Communication Studies - Public Advocacy Track	513
Minor in Communication Studies	517
Minor in Health Communication	518
Journalism and Media Management	518

B.S.C. Broadcast Journalism	520
B.S.C. Electronic Media	523
B.S.C. Journalism	526
B.S.C. Media Management	532
Minor in Broadcast Journalism	535
Minor in Electronic Media	535
Minor in Hispanic Media	536
Minor in Journalism	537
Minor in Media Management	537
Strategic Communication	537
B.S.C. Advertising - Advertising Creative Track	539
B.S.C. Advertising - Advertising Management Track	542
B.S.C. Advertising - General Advertising Track	545
B.S.C. Public Relations - General Track	547
B.S.C. Public Relations - Practice Track	550
Minor in Advertising	552
Minor in Public Relations	553
Minor in Strategic Communication	553
Continuing and International Education	555
Adult Student Access Program	555
Bachelor of General Studies	555
Credit Certificate Programs	557
Intensive Language Institute	558
Office of Professional Advancement	559
Education and Human Development	559
Educational and Psychological Studies	562
B.S.E.D. Human and Social Development - Community and Program Development (HSDC)	564
B.S.E.D. Human and Social Development - Human and Social Development Studies (HSDS)	566
B.S.E.D. Human and Social Development - Individual and Relational Development (HSDI)	568
Minor in Human and Social Development	570
Kinesiology and Sport Sciences	570
B.S.A.T. Athletic Training	573
B.S.E.D. Sport Administration	575
B.S. in Exercise Physiology	577
Minor in Exercise Physiology	580
Minor in Sport Administration	581
Minor in Sports Medicine	581
Teaching and Learning	581
B.S.E.D. Elementary/Exceptional Student Education (ESE) with ESOL and Reading Endorsements	584
Secondary Education	588
Minor in Education	590
Professional Training Option Certificate	591

Engineering	592
Biomedical Engineering	599
B.S. in Biomedical Engineering - Biomaterials and Tissue	602
B.S. in Biomedical Engineering - Electrical	605
B.S. in Biomedical Engineering - Mechanical	608
B.S. in Biomedical Engineering - Premed	611
B.S./M.S. in Biomedical Engineering - Biomaterials and Tissue Concentration	614
B.S./M.S. in Biomedical Engineering - Electrical Concentration	616
B.S./M.S. in Biomedical Engineering - Mechanical Concentration	619
B.S./M.S. in Biomedical Engineering - Premed Concentration	622
Civil, Architectural and Environmental Engineering	625
B.S. in Civil Engineering	627
B.S. in Architectural Engineering	629
B.S. in Environmental Engineering	632
B.S./M.S. in Civil Engineering	635
B.S./M.S. in Architectural Engineering	636
B.S. in Environmental Engineering/M.S. in Civil Engineering	636
B.S. in Architectural Engineering/Master of Architecture	637
Minor in Architectural Engineering	640
Minor in Civil Engineering	640
Minor in Environmental Engineering	641
Electrical and Computer Engineering	641
B.S. in Computer Engineering	646
B.S. in Computer Engineering - Software Engineering Option	648
Computer Engineering - Pre-Med Option	651
B.S. in Electrical Engineering - Audio Engineering Option	653
B.S. in Electrical Engineering	656
Electrical Engineering - Pre-Med Option	658
B.S./M.S. in Computer Engineering	660
B.S./M.S. in Computer Engineering - Software Engineering Option	663
B.S./M.S. in Electrical Engineering - Audio Engineering Option	667
B.S./M.S. in Electrical Engineering	670
Minor in Computer Engineering	673
Minor in Electrical Engineering	674
Engineering Science	675
B.S. in Engineering Science	675
Engineering Science - Premed Concentration	678
Industrial Engineering	678
B.S. in Industrial Engineering	680
Industrial Engineering - Engineering Management Concentration	683
Industrial Engineering - Manufacturing Concentration	685
Industrial Engineering - Pre-Med Concentration	687

B.S./M.S.- Industrial Engineering	689
Industrial Engineering - Engineering Management Concentration - Five Year Program	692
Minor in Industrial Engineering	695
Mechanical and Aerospace Engineering	695
B.S. in Aerospace Engineering	697
B.S. in Mechanical Engineering	699
Mechanical Engineering - Aerospace Engineering Concentration	702
Mechanical Engineering - Internal Combustion Engines Concentration	704
B.S./M.S.- Mechanical Engineering	707
B.S. in Aerospace Engineering and B.S. in Mechanical Engineering Dual Degree	710
Minor in Mechanical Engineering	713
Marine and Atmospheric Science	714
Atmospheric Science - Meteorology	717
B.S.M.A.S. in Meteorology and Marine Science	717
B.S.M.A.S. in Meteorology and Mathematics	720
B.S.M.A.S. in Meteorology	722
Minor in Climate Science and Policy	725
Minor in Meteorology	726
Marine Affairs	726
Geological Sciences	727
B.A. in Geological Sciences	727
B.S. in Geological Sciences	729
B.S.M.A.S. in Marine Science / Geological Sciences	732
Minor in Geological Sciences	735
B.A. in Marine Affairs	735
Minor in Marine Policy	738
Marine Biology and Ecology	738
B.S.M.A.S. in Marine Biology and Ecology	739
Marine Science	742
B.S.M.A.S. in Marine Science with a Second Major	743
B.S.M.A.S. in Marine Science / Biology	747
B.S.M.A.S. in Marine Science / Chemistry	750
B.S.M.A.S. in Marine Science / Computer Science	753
B.S.M.A.S. in Marine Science / Geological Sciences	756
B.S.M.A.S. in Marine Science / Meteorology	759
B.S.M.A.S. in Marine Science / Microbiology and Immunology	762
B.S.M.A.S. in Marine Science / Physics	765
Minor in Marine Science	768
Oceanography	770
B.S.M.A.S. in Oceanography	771
Music	774
Bachelor of Arts in Music (MUS)	783

B.A.M. Bachelor of Arts in Music	783
Minor in General Music	787
Instrumental Performance (MIP)	787
B.M. in Instrumental Performance	788
Certificate in Instrumental Performance	792
Keyboard Performance (MKP)	793
B.M. in Keyboard Performance	793
Certificate in Keyboard Performance	797
Music Education and Music Therapy (MED) & (MTY)	797
B.M. in Music Education with Minor in Education	798
B.M. in Music Therapy with Minor in Psychology	803
Music Media and Industry (MMI)	810
B.M. in Music Business Entertainment Industries	810
B.M. in Musicianship, Artistry Development, and Entrepreneurship	817
B.M. in Professional Studies	822
B.S. in Music Engineering Technology	826
Minor in Creative American Music	839
Minor in Music Business and Entertainment Industries	840
Music Theory and Composition (MTC)	841
B.M. in Media Writing and Production	841
B.M. in Music Theory and Composition	847
Minor in Music Composition	851
Studio Music and Jazz (MSJI) & (MSJV)	851
B.M. in Studio Music and Jazz Instrumental	852
B.M. in Studio Music and Jazz Voice	857
Certificate in Jazz Performance	860
Minor in Studio Music and Jazz Instrumental (Music Majors Only)	860
Vocal Performance (MVP)	861
B.M. in Vocal Performance	861
Certificate in Vocal Performance	864
Minor in Dance	865
Nursing and Health Studies	866
Health Science	867
BSHS - General Track	872
BSHS - Health Management and Policy Track	875
BSHS - Pre-Medical Track	879
BSHS - Pre-Occupational Therapy Track	882
BSHS - Pre-Pharmacy Track	886
BSHS - Pre-Physical Therapy Track	889
Nursing	893
Accelerated BSN	901
RN to BSN	903

Traditional BSN	905
Public Health	908
BSPH - Public Health	913
Health Communication Minor	916
Public Health Minor	916
Graduate Academic Programs	918
Architecture	918
Master of Architecture	921
Master of Construction Management	923
Master of Science in Architecture	925
Master of Urban Design	925
Master of Real Estate Development + Urbanism	926
Arts and Sciences	928
Anthropology	928
M.A. in Anthropology	929
Art and Art History	931
M.F.A. in Studio Art	932
Biology	933
M.S. in Biology with Thesis (Three Year Program)	934
M.S. in Biology without Thesis (Two Year Program)	936
Ph.D. in Biology	936
Chemistry	940
M.S. in Chemistry	940
Ph.D. in Chemistry	941
Computer Science	942
B.S./M.S. in Computer Science Five-Year	943
M.S. in Computer Science	943
Ph.D. in Computer Science	944
Criminology	946
Certificate in Criminology and Criminal Justice	947
M.S. in Criminology and Criminal Justice	948
M.F.A. in Creative Writing	949
English	950
Ph.D. in English	951
Geography	951
Certificate in Geospatial Technology	952
M.A. in Geography	953
Geological Sciences	954
History	954
M.A. in History	954
Ph.D. in History	956
International Administration	959

M.A. in International Administration	959
International Studies	960
M.A. in International Studies	960
M.A./M.P.H. Dual Degree in International Administration and Public Health	962
Ph.D. in International Studies	962
Latin American Studies	963
B.A./M.A. in Latin American Studies	963
J.D./M.A. in Latin American Studies	965
M.A. Dual Degree in Latin American Studies and Public Health	966
M.A. in Latin American Studies	967
M.A. in Latin American Studies with GIS Certificate	968
Liberal Studies	968
M.A. in Liberal Studies	969
Mathematics	969
M.A. in Mathematics	970
M.S. in Mathematical Finance	971
M.S. in Mathematics	972
Ph.D. in Mathematics	973
Modern Languages and Literatures	974
Ph.D. in Literary, Cultural, and Linguistic Studies	975
Philosophy	976
M.A. in Philosophy	976
Ph.D. in Philosophy	977
Physics	978
M.S. in Physics	978
Ph.D. in Physics	979
Political Science	979
J.D./M.P.A. Joint Degree Program	980
M.P.A. Masters in Public Administration	981
M.P.A./M.P.H. Second Master's Degree in Public Health	983
M.P.A. Online	984
Certificate in Public Administration	984
Psychology	984
Ph.D. in Psychology	985
Certificate in Applied Behavior Analysis	986
M.S. in Psychology	986
Sociology	987
M.A. in Sociology	987
Ph.D. in Sociology	988
Certificate in Criminology and Criminal Justice	989
Business	989
Doctoral	993

Doctorate of Philosophy in Business	993
Doctorate of Philosophy in Economics	995
MBA Programs	996
Executive and Professional MBA Programs	996
Miami Executive MBA en Español	996
Health Sector Management and Policy	997
Professional MBA	998
The Miami Executive MBA for Artists and Athletes (hybrid)	999
Global Executive MBA	1000
Full Time MBA Programs	1001
Accelerated MBA in Real Estate	1001
BArch/MBA	1002
JD/LLM/MBA	1003
JD/MBA	1004
MD/MBA	1005
One Year MBA	1006
Two Year MBA	1007
Specialized Master Degrees	1008
Master in International Business	1008
Master of Accounting	1009
Master of Arts in Economics	1016
Master of Professional Accounting (online)	1016
Master of Science in Business Analytics	1017
Master of Science in Finance	1018
Master of Science in Finance (online)	1019
Master of Science in Management	1020
Master of Science in Taxation	1021
M.H.A. in Health Sector Management and Policy	1026
Non-Degree Programs	1027
Certificate in Accounting Practice (online)	1027
Certificate in Business	1028
Certificate in Corporate Finance (online)	1028
Certificate in Financial Decision Making (online)	1029
Certificate in Leadership	1030
Communication	1030
Cinema and Interactive Media	1033
M.F.A. in Interactive Media	1033
M.F.A. in Motion Pictures	1034
Communication Studies	1037
M.A. in Communication Studies - Communication Studies Track	1037
M.A. in Communication Studies - Health Communication Track	1038
M.A. in Communication Studies - Intercultural Communication Track	1040

M.A. in Communication Studies - Organizational Communication Track	1041
Doctor of Philosophy in Communication	1042
J.D./M.A. in School of Communication	1043
J.D./M.A. in Communication Studies	1044
J.D./M.A. in Journalism	1046
J.D./M.A. in Public Relations	1047
Journalism and Media Management	1047
M.A. in Journalism	1048
M.S. in Media Management	1049
Strategic Communication	1051
M.A. in Public Relations	1051
Education and Human Development	1053
Educational and Psychological Studies	1057
Certificate in Higher Education Administration/Enrollment Management	1058
Certificate in Higher Education Administration/Student Life and Development	1059
Certificate in Latino Mental Health Counseling	1060
Executive Ed.D. in Higher Education Leadership	1060
M.S.Ed. in Community and Social Change	1061
M.S.Ed. in Counseling - Marriage and Family Therapy	1062
M.S.Ed. in Counseling - Mental Health	1062
M.S.Ed. in Higher Education Administration - Enrollment Management	1063
M.S.Ed. in Higher Education Administration - Institutional Research and Policy Analysis	1064
M.S.Ed. in Higher Education Administration - Student Life and Development	1065
M.S.Ed. in Research, Measurement and Evaluation	1066
Ph.D. in Community Well-Being	1067
Ph.D. in Counseling Psychology	1068
Ph.D. in Research, Measurement, and Evaluation	1068
Kinesiology and Sport Sciences	1070
Certificate in Women's Health	1070
M.S.Ed. in Exercise Physiology	1070
M.S.Ed. in Exercise Physiology - Strength and Conditioning/Fitness Entrepreneurship Track	1071
M.S.Ed. in Nutrition for Health and Human Performance	1072
M.S.Ed. in Sport Administration	1073
M.S.Ed. in Sports Medicine - Athletic Training Concentration	1074
Ph.D. in Exercise Physiology	1074
Teaching and Learning	1074
Certificate in Applied Learning Sciences	1075
Ed.D. in Applied Learning Sciences	1076
Ed.S. Early Childhood Special Education	1077
M.S.Ed. in Applied Learning Sciences	1077
M.S.Ed. in Early Childhood Special Education	1078
M.S.Ed. in Education and Social Change	1078

M.S.Ed. in Reading	1080
M.S.Ed. in Special Education	1080
M.S.Ed. in STEM Education	1080
M.S.Ed. in TESOL	1080
Ph.D. in Teaching and Learning	1081
Ph.D. in Teaching and Learning - Science, Technology, Engineering and Mathematics (STEM) Education	1082
Ph.D. in Teaching and Learning - Special Education	1082
Engineering	1082
Biomedical Engineering	1085
B.S./M.S. Five-Year Program in Biomedical Engineering	1085
Certificate Program in Medical Physics	1087
M.S. in Biomedical Engineering	1088
Ph.D. in Biomedical Engineering	1095
Civil, Architectural and Environmental Engineering	1101
B.S./M.S. in Civil Engineering	1103
M.S. in Architectural Engineering	1104
M.S. in Civil Engineering	1106
M.S. in Construction Management	1107
Dual M.S. in Civil Engineering with the University of Bologna	1110
Ph.D. in Civil Engineering	1116
Electrical and Computer Engineering	1118
M.S. in Electrical and Computer Engineering	1118
Ph.D. in Electrical and Computer Engineering	1120
Industrial Engineering	1121
M.S. in Environmental Health and Safety	1122

UNIVERSITY OF MIAMI ACADEMIC BULLETIN

GENERAL UNIVERSITY INFORMATION

A private, independent, international university

An equal opportunity/affirmative action employer

An announcement with information on administration, organization, admission and graduation requirements, and the courses of instruction in:

Undergraduate and Graduate Studies, 2018-2019

It is the policy of the University of Miami that no person within the jurisdiction thereof shall, on the basis of race, religion, color, sex, age, disability, sexual orientation, gender identity or expression, veterans status, or national origin, be excluded from, participation in, be denied the benefits of, or be subjected to discrimination or harassment (including all forms of sexual harassment and sexual violence) under any program or activity of the University, regardless of whether such program or activity occurs on-campus or off-campus. The University does not intend by this commitment to require compliance with this policy by governmental or external organizations that associate with but are not controlled by the University, except as required by law. The Executive Director of Workplace Equity and Performance is responsible for coordinating the University's effort to implement the nondiscrimination policy and Affirmative Action Programs for employees and students. The Executive Director may be contacted at the following address or telephone number:

Workplace Equity and Performance Office
Gables One Tower, Suite 100R
1320 S. Dixie Highway
Coral Gables, FL 33146
305-284-3064

More information regarding the student sexual harassment/violence policy may be found online in the Student Rights and Responsibilities Handbook (<http://www.miami.edu/SRR>). For available resources and services contact the Dean of Students Office (http://www.miami.edu/sa/index.php/dean_of_students), Phone: 305-284-5353; the Counseling Center (http://www.miami.edu/sa/index.php/counseling_center), Phone: 305-284-5511; and/or the Sexual Assault Response Team (http://www.miami.edu/sa/index.php/counseling_center/current_students/special_programs/sexual_assault_response_team_sart) (S.A.R.T).

The University of Miami is authorized under Federal law to enroll non-immigrant alien students.

The University reserves the right to change any provision or requirement, including, but not limited to fees and tuition, at any time without notice. Degrees, courses, programs, activities, and like academic or non-academic offerings of the University may also be changed from time to time without notice. The University further reserves the right to require a student to withdraw at any time under University policies, as may be promulgated from time to time. Further, admission of a student to the University of Miami for any semester does not imply that such student will be enrolled in any succeeding academic semesters. It also reserves the right to impose sanctions on any student whose conduct is unsatisfactory. Any admission on the basis of false statements or documents is void when the misconduct is discovered, and the student is not entitled to any credit hour for work which the student may have done at the University prior to any discipline that may be taken as a result of such misconduct. When a student is dismissed or suspended from the University for cause, there will be no refund of tuition or fees paid. If a dismissed student has paid only a part of his tuition and fees, the balance due the University will be considered a receivable and will be collected.

There will be no refund of tuition, fees, charges or any other payments made to the University in the event the operation of the University is suspended at any time as a result of any act of God, strike, riot, disruption, or for any other reason beyond the control of the University.

The University of Miami is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award bachelor's, master's, specialist, and doctoral degrees. Contact the Commission on Colleges at:

1866 Southern Lane
Decatur, Georgia 30033-4097

or call 404-679-4500 for questions about the accreditation of the University of Miami.

Mission Statement

The University of Miami's mission is to educate and nurture students, to create knowledge, and to provide service to our community and beyond. Committed to excellence and proud of the diversity of our University family, we strive to develop future leaders of our nation and the world.

Core Values

We are absolutely committed to freedom of inquiry—the freedom to think, to question, to criticize, and to dissent. We will pursue the value of excellence in our research and educational missions with the single-mindedness that only great commitments deserve. We will provide our students with the foundations for ethical citizenship and service to others, a respect for differences among people, and a commitment to high standards of

thought and communication. We also will prepare them for rewarding lifelong careers and will imbue in them a continued and permanent desire for the study of knowledge and the search for truth.

University Policies

Course Information

Academic Calendar

The University of Miami adheres to a reasonable approximation of the Carnegie unit for contact time. In addition, students are expected to spend two hours outside of class in preparation for every classroom hour. The Academic Calendar (<http://www.miami.edu/index.php/registrar/calendar>) is maintained by the University Registrar and is the official record of academic instruction.

The standard meeting times for three-credit hour courses are as follows:

- 50-minute, Monday-Wednesday-Friday schedule;
- 75-minute, Tuesday-Thursday schedule.

The calendar is planned to ensure 69 class days (41 Monday-Wednesday-Friday meeting days and 28 Tuesday-Thursday meeting days) and at least five days for final examinations in a 15-week semester. The policy allows a mandatory examination period to be counted in the minutes of instruction, but does not count reading days. The University has a required two-and-a-half-hour final examination policy, resulting in a minimum of 45 hours of classroom instruction in a three-credit hour course for all undergraduate and graduate terms in the Academic Calendar.

The calculation for summer sessions and other abbreviated terms follows this same standard which means longer class meeting times over the duration of the shortened term.

Miami Business School

In the Miami Business School, graduate programs include terms of varying length. The School follows federal and SACS guidelines for the credit hour. All graduate business programs have a minimum of 750 minutes of instructional contact time per credit hour, including the final examination. Students are expected to dedicate at least two hours of course-related work for each hour of instruction.

School of Law

The School of Law is accredited by the American Bar Association and follows federal and SACS guidelines for the credit hour. Ordinarily, full-time students must enroll for a minimum of 11 credit hours and a maximum of 16 credit hours (please consult the Student Handbook and Honor Code). For one credit hour, a student receives 700 minutes of instruction, exclusive of examination time. For a three-credit hour course, this equates to 2,100 minutes of classroom instruction. An additional 180 minutes of instruction is allotted for the final exam session in a three-credit hour course. The faculty expects students to spend at least two hours outside the classroom in preparation for each hour of instruction.

Miller School of Medicine

The Miller School of Medicine is accredited by the Liaison Committee on Medical Education (LCME). The School's Department of Physical Therapy is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE). The length of all educational programs is appropriate for each degree, based on national standards and accreditation criteria. The School follows federal and SACS guidelines for the credit hour. Completion of the M.D. program ordinarily takes four years. Although credit hours are not specified by the LCME, the medical education program leading to the M.D. must include at least 130 weeks of instruction.

Academic Credit

The University of Miami adopted the following Federal Definition of the Credit Hour at the Faculty Senate meeting on April 17, 2013 that appears in the Credit Hours policy statement of the Southern Association of Colleges and Schools Commission on Colleges (SACS), Federal Requirement 4.9:

Federal Definition of the Credit Hour

For purposes of the application of this policy and in accord with federal regulations, a credit hour is an amount of work represented in intended learning outcomes and verified by evidence of student achievement that is an institutionally established equivalency that reasonably approximates:

1. Not less than one hour of classroom or direct faculty instruction and a minimum of two hours out of class student work each week for approximately fifteen weeks for one semester or trimester credit hour, or ten to twelve weeks for one quarter credit hour, or the equivalent amount of work over a different amount of time, or
2. At least an equivalent amount of work as outlined in item 1 above for other academic activities as established by the institution including laboratory work, internships, practica, studio work, and other academic work leading to the award of credit hours.

Application of Credit Hour Policy

This credit hour policy applies to all undergraduate and graduate programs that award academic credit (i.e., any course that appears on an official transcript issued by the University) regardless of the delivery method including, but not limited to, self-paced, online, hybrid, lecture, seminar, and laboratory. Academic units are responsible for ensuring that credit hours are awarded only for work that meets the requirements outlined in this policy.

The expectation of contact time inside the classroom and student effort outside the classroom is the same in all formats of a course whether it be online, a hybrid of face-to-face contact with some content delivered electronically, or one delivered in lecture or seminar format. The University operates on the semester system and, for its measure of academic course work, uses academic credits (referred to as semester credits, semester hours, credit hours, hours, or credits).

Courses that have less structured classroom schedules, such as research seminars, independent studies, internships, practica, studio work, or any other academic work leading to the award of credit hours, at a minimum, should state clearly learning objectives and expected outcomes and workload expectations that meet the standards set forth above.

Two or three laboratory hours each week throughout a semester are considered the equivalent of one lecture hour in counting credit hours earned in an undergraduate laboratory or studio course.

No grades or credit hours are given for audited courses.

Campus Processes - Curriculum Review

Each College or School within the University of Miami is charged with following the policy on credit hours in its review and approval of all undergraduate and graduate courses and for certifying that the expected student learning for the course meets the credit hour standard. The determination of credit hours is made when a new course or a revision to an existing course is proposed. The submitted syllabus is examined for contact time as well as for assignments and evaluation mechanisms.

The Office of the University Registrar requires training for class scheduling before granting access to any departmental staff approved by a department for scheduling classes.

Cancellation of Courses

Students who select courses and fail to make payment and/or financial arrangements with the Office of Student Account Services (OSAS) prior to the payment deadline will have their course schedules canceled. Reinstatement of classes can only occur after payment arrangements have been made with the OSAS to cover all financial obligations including any reinstatement fees. Reinstatement to cancelled classes will be on an "as available" basis after financial arrangements have been completed.

Change or Drop of Course

- Course changes after the completion of registration must be approved by the student's academic dean.
- Dropping of any course for which the student has registered is official only when the drop has been fully processed by the student successfully dropping the course via CaneLink or by the Office of the University Registrar.
- **Please note: Failure to attend classes or merely giving notice to instructors of one's absence will not be considered as an official withdrawal and may result in failure in the course.**
- The last day to drop a course or make a change in credit-only option is noted on the Academic Calendar (<http://www.miami.edu/index.php/registrar/calendar>).
- Students enrolled in a course after the withdrawal date must receive a final grade in the course.

Class Attendance and Absences

Regular and punctual class attendance is vital for all students. Instructors will distribute course syllabi which include policies regarding class attendance and missed or late work. Any student may be dropped from a course or receive a lowered grade for unauthorized absences in excess of those permitted by the instructor. It is each student's responsibility to know and understand the instructor's policies. It is also the student's responsibility to give the instructor notice one week prior to any anticipated absence and to contact the instructor within one week after any unanticipated absence.

All students are responsible for material covered during their absence. However, the instructor must allow each student who is absent for a University-approved reason either the opportunity to make up, or to be excused from, work missed, without any reduction in the student's final course grade as a direct result of such absence.

Other than absences for a University-approved reason, the instructor determines whether or not an absence is for an acceptable reason and whether or not students shall have the opportunity to make up missed work. If the instructor does not recognize the reason as acceptable, the student may appeal to the chair of the department in which the course is offered.

The following constitute University-approved reasons for absences:

1. Participation in an activity approved by the Academic Deans Policy Council, such as musical and debate activity, R.O.T.C. function, or varsity athletic trip; participation in a special academic activity such as a field trip or other special event connected with academic coursework. Verification of a student's participation shall be issued by the sponsor when authorized by the Office of the Executive Vice President and Provost.
2. Observance of a religious holy day as described in the Religious Holy Day Policy, below.

Religious Holy Day Policy

The University of Miami, although a secular institution, is determined to accommodate those students who wish to observe religious holy days. It seeks to reflect its awareness of and sensitivity to religious holy days whenever possible when scheduling University activities. The following provisions are meant to apply equitably to all religious groups and to provide opportunities to all to meet their religious obligations.

1. Except as specifically provided to the contrary, this policy is binding on all students in undergraduate programs. Schools offering graduate or professional programs, including undergraduate professional programs, are strongly encouraged to adhere to these policies to the maximum extent practicable.
2. Any student absent from class in observance of a religious holy day shall not be penalized in any way for an examination or assignment missed during the period of absence. Absence in observance of a religious holy day does not relieve students from responsibility for any part of the course work required during the period of absence. Students who are absent on days of examinations or class assignments shall be offered a reasonable opportunity to make up the work without penalty, if the student previously arranged to be absent. Nothing in this policy shall preclude faculty members from limiting the number of student absences to a reasonable number of absences for any reason. The faculty member has discretion to determine how the make-up obligation will be fulfilled. A faculty member who penalizes a student contrary to these provisions may have committed unprofessional conduct, and thus may be subject to a complaint to the Committee on Professional Conduct under the provisions of Section B4.9 of the Faculty Manual.
3. It is the student's obligation to provide faculty members with notice of the dates they will be absent due to observance of religious holy days, preferably before the beginning of classes but no later than the end of the first three class days. For religious holy days that fall within the first three class days, students must provide faculty members with notice no later than two class days before the absence. Missing a class due to travel plans associated with a particular religious holy day does not constitute an excused absence. Absences due to observance of religious holy days that are not pre-arranged with the relevant faculty member within the first three class days may be considered unexcused, and the faculty member may therefore prevent the student from making up examinations or assignments missed during the period of absence.
4. Faculty members are encouraged to anticipate days when a substantial number of students will be absent for observance of religious holy days and should avoid scheduling examinations and assignment deadlines on those days. Faculty members are expected to reasonably assist students in obtaining class information the student missed during the period of absence in observance of a religious holy day. In that regard, faculty members are urged to allow taping or recording of the class session, with the reproduction limited to the student's personal use, when a student misses a class due to observance of a religious holy day. To assist in identifying religious observance days, faculty members are encouraged to consult the illustrative list provided in the Interfaith Calendar. (<http://www.interfaith-calendar.org>) Faculty members are urged to remind students of their obligation to inform faculty members within the first three class days of any anticipated absences due to observance of religious holy days and should include that information in the syllabus or course requirements document for that course.

Course Numbering System

The following course-numbering system is used:

- Courses in the 100 series are primarily for freshmen.
- Courses in the 200 series are primarily for sophomores.
- Courses in the 300 series are primarily for juniors.
- Courses in the 400 series are primarily for seniors.
- Courses in the 500 series are open only to seniors or other qualified undergraduates.
- Courses in the 600 through 800 are open only to graduate students.

Courses in some departments, with the specific numbers 100, 200, 300, 400 are offered, in most instances, on an experimental or trial basis. When listed in CaneLink's Course Offerings, a more descriptive title will normally be attached.

Eligibility

To be eligible to enroll for courses under the CR/NC option, a student must:

1. Hold the standing of Sophomore or above, and, if a transfer, must have completed one semester of residency at the University of Miami;
2. At the time of registration have a minimum cumulative grade point average of at least 3.00;
3. Elect the CR/NC option within two weeks following the last day of registration for Fall and Spring semesters. Election of CR/NC options for Summer Sessions must occur no later than the fifth class day following the last day of registration. No changes except withdrawals from the course are permitted after this time.

Regulations and Restrictions

1. Eligible students may take one course per semester for credit only, to a maximum of 9 credit hours.
2. Only free electives may be taken under this option. Free electives are defined as courses not taken to fulfill the requirements for the major, minor, or general education requirements (including prerequisite course work) of the University and the individual schools.
3. ENG 105 and ENG 106 cannot be taken for credit only.
4. Grading standards for the credit only option are the same as for students who register for the course under the regular grading system. Letter grades will be submitted by instructors to the Office of the University Registrar. The Office of the University Registrar will change all grades A through C (including "C-") to CR (Credit Received) for those enrolled under the CR/NC option.
5. A grade of NC (No Credit) will be recorded by the Office of the University Registrar for all grades of D and F. The student will not receive credit hours or quality points for the grade of NC.
6. Should a student subsequently change his/her major, free electives taken for credit only prior to the declaration of this major may be counted toward fulfilling major, minor, or general education requirements at the discretion of the department chairman and the academic dean.

Credit for Service Experience

Veterans of the military services may make application for academic credit for schooling received while in the armed forces. Credit hour may be awarded for work that the American Council on Education Guide regards as college level. Students must have credit hours approved by their departmental chairperson.

Credit hour for military service and experience is usually in the elective area and may not take the place of subjects required for graduation. Such work is not assigned quality points and is not included in quality point computations.

Final Examination Policy

- Final Examinations may not be given during a regularly-scheduled class period.
- No examination shall be permitted during the reading period.
- Final Examinations may be rescheduled only with the permission of the school/college dean.
- No student shall be required to take more than two final examinations in a twenty-four hour period. A student having three or more final examinations scheduled during a twenty-four hour period may request the instructor of the course most easily rescheduled (normally the course with the smallest enrollment) to reschedule the examination for that individual. The request shall be made no later than two weeks before the last class day.
- A student who has a conflict between a final examination and a religious observation may request that the instructor reschedule that student's examination. The request shall be made no later than two weeks before the last class day.
- For the resolution of any problem pertaining to the scheduling of final examinations, a student should consult with the following entities or persons in this order: the relevant instructor, the department chair, the Dean or designee. If the matter cannot be resolved at the school or college, the student should contact the Office of the Provost.

Military Withdrawal

- Students who need to withdraw from a semester due to official orders to active duty with the Armed Forces of the United State must provide a copy of their official written orders when submitting the request to withdraw.
- Students who withdraw **after the 12th week of the semester** because of these official orders may either be awarded credit hour (CR) or an academic grade for any course in which they have achieved a C or better up to the time of withdrawal. Instructors must certify that the student had achieved satisfactory accomplishment on the basis of previous work in the course by awarding an appropriate grade. Accomplishment of less than C should be entered on the permanent record as a withdrawal without prejudice (W).
- Credit hour granted for courses under this policy should count toward graduation.
- There should be no refund of tuition for courses for which credit hour has been awarded. Refunds for courses not awarded credit hour should be on the same basis as complete withdrawals for military service.
- The above recommendations are procedures for determining the awarding of credit hour and do not release the student from the usual withdrawal procedures.

Registration

Registration dates are shown on the University Academic Calendar (<http://www.miami.edu/index.php/registrar/calendar>), and all students are expected to register on these days. If a student is permitted to register late, a fee may be charged.

Repeat Rules

A student may repeat a course, but the repetition will not eliminate the previous grade from the record. A course may be repeated only once¹ unless written authorization is provided by the chair of the department in which the course is offered or, in the case of an un-departmentalized school, by the dean.

Illegal Repeat

A student may not repeat a course in which a grade of C or higher has been earned. This is considered an illegal repeat.

General Repeat Rule

- If the initial grade is D+ or lower (or a C- in cases where an academic unit requires a C or higher), both the initial grade and the repeat grade are included in the computation of the student's cumulative grade-point average (CGPA).
- If the initial grade is a D or D+ (or a C- in cases where an academic unit requires a C or higher) and the repeat grade is passing, the number of credit hours required for graduation will be increased by the number of credit hours repeated.
- Registrations that involve repeating a course in which a grade of C or higher (or C- in cases where an academic unit does not require a C or higher) has already been earned do not earn quality points or credit hours, nor count as credit hours attempted.
- Courses repeated after graduation² will be posted to the transcript showing the grade received; however, the CGPA and credits earned will not be modified based on the grade received for the repeated course.

Undergraduate Repeat Rule

- A student may elect to repeat up to two courses that were taken at the University of Miami in which the student earned a grade of D (including D+) or F. Each repeated course must be taken at the University of Miami, must be the same course as the course initially taken, and must be completed within two regular semesters enrolled following the initial course.
- No course may be repeated more than once under this rule. A course repeated more than once under the University's General Repeat Rule will not qualify under the Undergraduate Repeat Rule.
- Enrollment for a second time in a course constitutes a repeat of that course for the purposes of this rule, unless the student withdraws from the course on or before the University's published Last Day to Drop a Course date.
- For each repeated course, only the second grade (whether higher, or lower, or the same as the first grade) will be used in the computation of the student's CGPA. The initial course will not count as credit hours attempted or earned, although the initial course grade will remain on the student's permanent record.
- Students who plan to apply to graduate and/or professional school should be aware that such institutions may recalculate the CGPA to include the initial grade earned before the repeat.

¹ This does not include courses that are eligible to be repeated for credit (e.g. Special Topic courses, Music lessons, etc.). Courses that are eligible to be repeated are designated in the student information system, CaneLink. Courses may have limits on the number of times they may be repeated.

² This refers to courses or a course with a particular grade required for entry into a different degree program.

Graduate Repeat Rule

A student may repeat a course *in which a failing grade was earned*, but the repetition of the course will not eliminate the previous grade from the record. A course may be repeated only once unless written authorization is provided by the Dean of the Graduate School. All grades are included in the computation of the quality point average. If a course in which an unsatisfactory grade (as determined by the program advisor) was earned is repeated and the repeat grade is a "C-" or higher, the number of credit hours required for graduation will be increased by the number of credit hours repeated.

Miami Business School Graduate Repeat Rule

Graduate students in the Miami Business School who fall below the 3.0 GPA may be placed on academic probation. Within one semester after their GPA falling below 3.0, Master's students wishing to repeat a course may petition their program director to do so. If the petition is approved by the Graduate Program Director, the grade obtained in their second attempt will replace the original grade for purposes of calculating their GPA for clearance for graduation only. Authorization to repeat a course is limited to courses in which an unsatisfactory grade was earned (as determined by the Graduate Program Director). Additionally, a course may be repeated only once and students may not repeat more than two courses. The student's transcripts will continue to show all attempts and the GPA computation will include all grades earned for purposes other than computing the GPA for clearance for graduation. If a course in which an unsatisfactory grade of lower than a B- was earned is repeated and the repeat grade is "C-" or higher, the number of credits required for graduation will be increased by the number of credits repeated. Registrations which involve repeating a course in which a grade of "A" or "B" has already been earned may not earn quality points or credit hours, nor count as credits attempted.

Undergraduate Schedules

Fifteen or sixteen credit hours constitutes a normal schedule at the University. Academic deans and advisors will determine the appropriate credit hour load for their students. (A schedule of charges for credit hours is found in the Financial Payment Policies section of this Bulletin.) The schedule of any student whose outside interests cause unsatisfactory scholastic attainment may be reduced by the dean.

Temporary/Permanent Withdrawal from the University

If a student decides to withdraw from the University of Miami, there are procedures in place to facilitate this process. In order to withdraw officially from the University, a student must follow the procedures outlined in this bulletin and on the University of Miami website (<https://success.miami.edu/student-withdrawal/important-information>).

Failure to follow the outlined withdrawal process may result in monies owed to the university (e.g. tuition, fees, etc.), failing grades on a student's academic record and/or other negative consequences.

Please note that dropping courses in a summer session, thereby reducing a student credit-hour load to zero is not construed as a formal withdrawal from the University.

Undergraduate Students

In order to officially withdraw from the University, Undergraduate students are **required to** speak with an Advisor in the 'Cane Success Center. The 'Cane Success Center is located on the 2nd Floor of the University Center, Suite 2275 (also known as "The Nest"). Walk-in hours are available from 9:00 AM – 2:00 PM Monday thru Friday. You may also reach a 'Cane Success Center Advisor by calling 305-284-4500 or via email (success@miami.edu) to initiate the withdrawal process.

For more details about the withdrawal process and for helpful hints on making a smooth transition out of the University, visit the Undergraduate Withdrawing Student Checklist (<https://success.miami.edu/student-withdrawal/important-information>).

For students who are no longer on campus – If you have already left the University but did not complete the withdrawal process before your departure, please call or email (success@miami.edu) the 'Cane Success Center at (305) 284-4500 to begin the withdrawal process. Your withdrawal will not be finalized until an Exit Interview is completed with a 'Cane Success Center Advisor.

Undergraduate Appeal Process

Withdrawal Date Appeal Form – If you were unable to attend classes due to a serious accident or illness, and this prevented you from notifying the University of your withdrawal in a timely manner, a Withdrawal Date Appeal Form (<https://success.miami.edu/student-withdrawal/important-information>) can be submitted for consideration by an Appeals Committee. Appeals are submitted **AFTER** completing the official withdrawal process above and must include supporting documentation as to what prevented a timely notification. All appeals must be submitted within 30 calendar days of the official withdrawal date established with the 'Cane Success Center or if the appeal is being submitted for a semester that has already completed, it must be submitted within 30 calendar days of the last day of the end of the semester in question. Appeals should be submitted via email (registrar@miami.edu) or by mail to:

University of Miami
Office of the University Registrar - Withdrawal Date Appeal
P.O. Box 248026
Coral Gables, FL 33124-6914

Merit-based Scholarship Status upon Return – If you withdraw from the University but choose to return within one calendar¹ year, and you have continued to meet the requirements of your scholarship, then your merit scholarship² will be waiting for you. Contact the 'Cane Success Center to begin the process of readmission.

¹ Frost School of Music students will need to re-audition after one semester away from the University.

² Merit Scholarships are awarded as consecutive semesters. If you spent a semester or two away from the University, these would be terms counted as part of your total scholarship. Please refer to your scholarship agreement for details.

Student Groups with Special Concerns Regarding Withdrawing from the University

- **Veterans** and children of deceased or totally disabled veterans attending the University as students under the government's educational benefit bills must also be cleared by the Veterans Affairs Certifying Official.
- **Varsity athletes or any athlete** registered with the department of Athletics must obtain approval and be cleared by the Athletic department prior to any change in their registration status, including withdrawal from the university.
- Per U.S. Department of Homeland Security (DHS) regulations, **international students in F-1 or J-1 visa status** must notify their ISSS advisor prior to temporarily or permanently withdrawing from the University and must leave the U.S. within 15 days of withdrawing. Failure to comply with DHS regulations may result in the loss of your future eligibility to enter the U.S.

Refunds

During the academic year, tuition will be refunded on a prorated basis depending on the date that is noted as the 'Total Withdrawal Date'. Tuition will be refunded on a prorated basis through 60 percent of the semester. Please see the Refund Policy (p. 42) under the Financial Payment Policies section.

Title IV financial aid and tuition will be refunded on a pro rated daily basis through 60 percent of the semester. This date is determined based on the student notifying the Cane Success Center (Undergraduate)/ Office of the University Registrar (Graduate) of his/her intent to withdraw. If the student fails to notify the appropriate office, federal guidelines for determining refunds will be followed.

Student Right to Know Act

The Student-Right-to-Know and Campus Security Act requires institutions to disclose information about graduation rates and crime statistics to current and prospective students. Students interested in obtaining this type of information should contact the Office of Admission, 305-284-4323 or go to this website (<http://www.miami.edu/hea>).

Family Educational Rights and Privacy Act (FERPA) Buckley Amendment

The purpose of this policy is to assure that students have access to their educational records and to assure the privacy of students by restricting the disclosure of information from education records to those persons authorized under the Act.

The policy is provided to all students in the Student Life Handbook. Copies can also be printed from the website (<http://www.miami.edu/SRR>).

Security of Student Records

The Office of the University Registrar is charged with the responsibility of maintaining the security and integrity of student records. Student records created before 1985 have been electronically scanned. Student records created after 1985 are housed on an electronic database.

In order to maintain confidentiality, access to the student record system is limited to university personnel who have a legitimate need for this information. Each user is required to fill out an access form. A user name is created, and each user must also create a password that must be changed every 180 days. Periodic audits of records as well as reviews of who has access to the system are regularly scheduled to ensure a secure environment.

Students are assigned a UM ID number that is unique to them and they are encouraged to use it instead of their social security number. Students are required to provide their student ID or a photo ID when requesting academic record information from this office.

FERPA Training

FERPA, the Family Educational Rights and Privacy Act, provides established guidelines for universities to ensure that students have access to their educational records as well as to ensure the privacy of said records by restricting the disclosure of information from educational records to those persons authorized under the Act. FERPA guidelines must be followed when dealing with the disclosure of student information.

All staff who use the student records system are required to complete a FERPA tutorial. Periodic reviews are required.

Service Indicator (Hold) on Student Records

Schools and colleges, university administrative departments and other student related offices have the ability to put service indicators, also known as holds, on student records. These holds can be financial, academic or disciplinary in nature and may delay a student's ability to register, to receive an official transcript or to receive a diploma. Holds on a student's record normally require action on the part of the student, i.e., a payment, completion of paperwork, etc. Specific information on a hold and what is required to remove it can be found in the Student Services Center in CaneLink or can be obtained from the office/department that initiated the hold.

Financial Assistance

<https://finaid.miami.edu/>

The Office of Student Financial Assistance (<https://finaid.miami.edu>) and Employment (<https://www.miami.edu/ofas>) administers federal, state, private and University financial assistance programs. Our office awards financial assistance for Undergraduate and Graduate/Professional students. We communicate with our students mainly through the **CaneLink** (<https://canelink.miami.edu>) system regarding any information we might need in order to complete the financial aid process. Medical students should contact their respective financial aid office.

Hours of Operation

Walk In Hours

Monday, Tuesday, Thursday, Friday 9:00 to 5:00
Wednesday 10:30 to 5:00

Phone Hours

Monday and Friday 9:00 to 5:00
Tuesday, Wednesday, Thursday 9:00 to 6:00

Office of Student Financial Assistance and Employment
P.O. Box 248187

Coral Gables, FL 33124-5240
 Telephone: 305-284-6000
 Fax: 305-284-4082

Undergraduate Financial Assistance

It is the purpose of the Office of Student Financial Assistance and Employment to provide need base assistance and/or academic achievement awards to qualified students in the form of scholarships, grants, loans and work programs (<https://finaid.miami.edu/types-of-aid>) to the extent that resources are available. Professional financial aid and student employment advisors are ready to assist all students plan for the most efficient use of their financial resources for education.

Underlying the awarding of need-based financial assistance is the philosophy that the student and family have the primary responsibility for educational costs. Need-based financial assistance serves to supplement these primary resources.

- Students who require financial assistance in order to attend the University should apply for assistance each academic year.
- Candidates for admission should indicate their interest in financial assistance by checking the box provided for that purpose in the application for admission.
- The U.S. Department of Education's Free Application for Federal Student Aid (FAFSA) (<http://www.fafsa.ed.gov>) is used to determine eligibility for federal need based assistance. The FAFSA must be completed for each academic year.
- Beginning with students who entered during the 2014-2015 academic year (including readmitted students) the College Board's CSS Financial Aid PROFILE Application is required to determine institutional need based financial aid awards. The PROFILE application must be completed each academic year to determine renewal eligibility.

Admission Application Option (App Deadline)	FAFSA, CSS/Financial Aid PROFILE, Noncustodial Parent PROFILE, Prior-Prior Year Tax Returns and W2's
Early Decision I & Early Action	December 1
Early Decision II and Regular Decision	January 1
Transfer- Fall	April 15
Transfer - Spring	November 1
Continuing Student	April 15

Important Financial Aid Tips

- Financial aid applications are accepted throughout the year but it is important to note that the appropriate preference date for receipt of aid applications must be met as aid is awarded on a funds available basis.
- **DO NOT WAIT FOR YOUR ADMISSION DECISION TO APPLY FOR FINANCIAL AID.** Financial aid resources are limited and there is no guarantee of assistance for students who do not submit appropriate documentation by the deadline posted above. **Your financial aid application will not be considered complete until all documents are received.**
- The Free Application for Federal Student Aid (FAFSA) is available at fafsa.gov. Use Federal School Code is 001536. Create an FSA ID and Password at fsaid.ed.gov (<http://fsaid.ed.gov>).
- Complete your CSS/Financial Aid PROFILE at css.collegeboard.org (<https://student.collegeboard.org/css-financial-aid-profile>). After you complete your CSS/Financial Aid PROFILE, you will receive an e-mail from the College Board's IDOC (<https://idoc.collegeboard.org/idoc>) process with instructions on submitting the necessary documentation. *All documents should be submitted directly to College Board.*
- If you are not required to file a federal tax return and will not be filing, please submit the official IRS non-filer letter. This can be ordered through the IRS website www.irs.gov (<https://www.irs.gov/individuals/get-transcript>).

Financial Aid Census Date

Effective Fall 2014, financial aid awards will be set according to a census date or date of fixed enrollment. All financial aid awards will be set according to the enrollment in effect at the close of business on the last day of the drop/add period each regular term semester. No adjustments will be made to the financial aid awards for any enrollment changes (increases or decreases) made after this date with two exceptions:

1. Bright Futures awards will continue to be adjusted (increased or decreased) according to any change in the enrolled credit hours.
2. The aid award package for students with federal financial aid and who completely withdraw (drop to 0 credit hours enrolled) will be adjusted according to the regulatory required Return To Title IV Calculation.

Graduate and Doctoral Students

It is the purpose of the Office of Student Financial Assistance and Employment to provide federal financial aid assistance to qualified students in the form of loans and work programs (<https://grad-prof.miami.edu/types-of-aid>) to the extent that resources are available. Professional financial aid and student employment advisors are ready to assist all students plan for the most efficient use of their financial resources for education. Law, Graduate and Doctoral students need only complete a few steps in order to receive notification and disbursement of federal awards.

1. Apply for Admission to a Graduate Program or the Law Program at the University of Miami.
2. Complete the Free Application for Federal Student Aid (FAFSA).
 - a. Graduate/Doctoral Students: School Code 001536
 - b. Law Students: School Code E00532
3. Accept, reduce or decline your awarded aid via CaneLink.
 - a. First-time loan borrowers must complete Entrance Counseling at the Department of Education website (<http://www.studentloans.gov>).
 - b. A signed Promissory Note for both the Unsubsidized and the Graduate PLUS Loan are required if either loan is utilized. Each should be completed at the Department of Education website (<http://www.studentloans.gov>).
 - c. Students receiving the Graduate PLUS Loan must have an approved credit check conducted by the Department of Education in order for the loan to be disbursed.

Your financial aid award may consist of loans, scholarships, tuition waivers or a combination. Aid is offered to a student's maximum eligibility as determined by enrollment and the Cost of Attendance (COA).

Some of the aid programs which may be offered to a Law, Graduate or Doctoral student:

Federal Direct Unsubsidized Stafford Loan: the interest becomes due to the student upon the disbursement of the funds. However, a student may choose to capitalize the interest which will accrue and result in additional indebtedness when repayment begins. Eligibility is not based on need and is up to \$20,500 for an academic year.

Federal Direct Graduate PLUS Loan: Borrowers may be eligible to request up to the cost of attendance minus other financial aid. Your award letter includes your maximum loan eligibility for the Federal Graduate PLUS Loan. This loan is based on the borrower not having an adverse credit history. Once you have accepted the offered loan amount on CaneLink, a credit check will be conducted by the US Department of Education. You will be required to have completed a Master Promissory Notice as well as Entrance Counseling (first time borrowers only). In the event your loan is declined, you have the option of appealing that decision or reapplying with an endorser; however, the Department of Education will then require you complete Credit Counseling in order to approve the disbursement of your loan.

First-time borrowers will need to complete the online Federal Direct Stafford Loan Master Promissory Note (MPN) and Loan Entrance Counseling with the Department of Education. Students may complete all federal student loan applications and entrance counseling at the Department of Education website (<http://www.studentloans.gov>).

Scholarships and Tuition Waivers are exclusively handled by the respective department. Our office is notified of scholarships/waivers by the department and it is then added to your award package. Adjustments to your Graduate PLUS Loan and/or other aid may take place upon notification to prevent an over award of aid.

In order to receive a graduate assistantship or fellowship, a graduate student must:

- Be admitted unconditionally to a post-baccalaureate degree program;
- Be enrolled for full-time study; and
- Maintain a cumulative graduate grade point average of 3.0 or above.

For additional information, please visit the Law School Website (<http://www.law.miami.edu>) or the Graduate School Website (<http://www.miami.edu/grad>). For specific information regarding graduate programs, contact the Graduate Advisor of the respective program. For information regarding loan and work-study opportunities, visit the Office Student Financial Assistance and Employment website (<http://www.miami.edu/ofas>).

For United States citizens and eligible non-citizens, federal financial aid is available for online programs.

- Applying for Financial Aid (<https://grad-prof.miami.edu/applying-for-aid>), UM
- Costs and Financial Aid (<https://grad-prof.miami.edu/cost>), UM

Eligibility

Please see the University's Financial Aid (<https://grad-prof.miami.edu/applying-for-aid/terms-and-conditions>) website for eligibility criteria.

Applying for Financial Aid

To apply for financial aid, submit the Free Application for Federal Student Aid (FAFSA) (<https://fafsa.ed.gov>). Be sure to include the University of Miami school code **001536**.

Awarding and Disbursing Financial Aid

Key Points and associated deadlines:

- Awards are processed on a rolling basis and are done annually, one academic year at a time (3 terms per academic year: Fall, Spring and Summer).

- Students are strongly encouraged to begin the application process at least **four weeks** prior to the start date of their program or renewal date of their existing loan.
- Applications will be accepted in the **last 30 days of the term**, but the Office of Student Financial Assistance and Employment cannot be held responsible if funds are not available for disbursement for the term. Delays can occur that are outside of the control of the Office of Student Financial Assistance and Employment.

New Students

The Office of Student Financial Assistance and Employment will award Financial Aid for new students when

- A student has been fully admitted
- FAFSA has been received
- Student has enrolled in classes
- Student has been billed for that term

Financial Aid will be disbursed to the Office of Student Account Services:

- After the last day to add/drop and when attendance has been confirmed by the Online Department.

Continuing Students

The Office of Student Financial Assistance and Employment will award Financial Aid for continuing students only when

- FAFSA has been received
- The student has enrolled in classes
- Satisfactory Academic Progress has been determined
- Student has been billed for that term

Financial Aid will be disbursed to the Office of Student Account Services:

- After the last day to add/drop and when attendance has been confirmed by the Online Department.

Maintaining Eligibility, including Satisfactory Academic Progress

Students must maintain all federal aid eligibility requirements for the entire term. Please see the Satisfactory Academic Progress (<https://grad-prof.miami.edu/applying-for-aid/satisfactory-academic-progress>) page for specific criteria for maintaining eligibility.

Satisfactory Academic Progress

Federal and Institutional Need-based SAP Policy

- In compliance with federal financial aid regulations, the University of Miami requires satisfactory academic progress (SAP) towards a degree as an eligibility requirement for federal and university need-based financial assistance. The SAP policy requires both a quantitative and a qualitative measure of a student's progress.
- This policy is applicable to all undergraduate, law, graduate and doctoral students receiving financial aid through federal aid sources, including the Federal Parent Loan for Undergraduate Students (PLUS).
- At the end of each semester, the Office of Student Financial Assistance and Employment Services reviews the academic progress of all University of Miami financial aid recipients.
- If it is determined that a student is not making satisfactory academic progress at the end of the semester, a notification is sent to the student. The student will be placed on financial aid warning for one semester. Aid will not be withdrawn for the subsequent (warning) term, but at the end of that term, the student's academic record will be reviewed by Office of Student Financial Assistance and Employment and appropriate renewal or termination actions will be taken. Notification will be sent to the student detailing information on the appeal process.
- Federal academic progress policy is subject to change based on guidelines and changes made by the U.S. Department of Education.

A general description of the major financial assistance programs available through various departments as well as the Office of Student Financial Assistance and Employment can be found here (<http://www.miami.edu/ofas>).

Undergraduate Satisfactory Academic Progress

Review and Notification

In order to determine continued aid eligibility, the Office of Student Financial Assistance and Employment will review the academic progress at the end of each academic term for all undergraduate students receiving federal and institutional need-based aid, including the Federal Direct PLUS Loan; and at the end of each academic year for all Florida aid programs and merit scholarships.

Students who fail to meet Satisfactory Academic Progress will be notified by email. If a student is placed on academic probation they will be eligible for financial aid during that probationary period. A student may receive probationary scholarship assistance only once.

SAP Appeal

A student may appeal a failed SAP determination by completing and submitting to the financial aid office an Academic Progress Appeal Form (<http://finaid.miami.edu/resources/forms>). Appeals may be granted only if the student failed to meet academic progress requirements as a result of an emergency and/or illness, and these circumstances must have occurred within the semester/academic year during which SAP requirements were not met. All appeals should be submitted no later than 30 calendar days from notice of ineligibility. All decisions made by the committee are final. Please be advised that students will only be eligible to receive one approved appeal during their enrollment at UM. Should a student fail to meet the minimum academic standards outlined in the conditions of their initial approved appeal, they will not be granted an additional appeal unless there are new mitigating circumstances.

Federal and Institutional Need-Based Aid Academic Requirements

For the purposes of these policies, an academic year is defined as Summer, Fall, and Spring semesters.

GPA Requirement

Students must complete a minimum institutional GPA of 2.0.

Credit Completion Requirement

Students must earn 67% of the total credit hours attempted during his/her overall academic career. Rounding does not apply.

- Undergraduate and graduate credits cannot be combined to meet this standard.
- Withdrawals, incompletes, audits, NG (no grade) and F's are attempted but not earned hours.
- Transfer credits are counted in the calculation, but not in a cumulative GPA.

Maximum Timeframe Requirement

Degree must be completed within 150% of normal completion as determined by the school or college catalog (example: Bachelor's degree = 120 credits; 150% rule = 180 credits).

Warning Period

Federal and institutional need-based aid recipients will be placed on a "warning status" for one semester following notice of failure to meet SAP requirements. Failure to meet the requirements by the end of the warning period will result in cancellation of aid.

Merit Scholarship Academic Requirements

Applies to undergraduate students receiving academic scholarships except Ronald A. Hammond Scholarship. Ronald A. Hammond Scholarship recipients should contact the Office of Academic Enhancement (<http://www6.miami.edu/provost/oe/hammond>) to review their contract renewal terms.

GPA Requirement

Students must complete a minimum institutional GPA of 3.0.

- Only credits taken at UM count toward your GPA requirement.

Credit Completion Requirement

- At least 24 credit hours each academic year.
- At least 12-credit hours for full-time students enrolled for only one semester.
- Withdrawals, incomplete, audits, and F's are attempted but not considered earned hours.
- Transfer credits are counted in the calculation, but not in a cumulative GPA.
- Beginning Summer 2017, credits earned and transferred from any institution may count toward the upcoming year's total credits earned to satisfy this requirement. Because summer is the first term of the academic year it cannot be used to make up credit hour deficiencies from the prior year.

For All Incoming Freshmen and Transfer Students Enrolled beginning Fall 2015 and After:

Students who fail to meet the academic requirements to maintain their scholarship at the end of their first year will lose their eligibility. Students will not receive a probationary period.

For All Incoming Freshmen and Transfer Students Enrolled Prior to Fall 2015:

Merit scholarship recipients whose cumulative GPA is between 2.70 to 2.99, or have not completed 48 credits by the end of their sophomore year will be placed on a one-year academic probation period during their third year. Failure to raise the cumulative GPA to 3.0 while completing 24 credits at the end of the probationary period will result in loss of scholarship for the fourth year of attendance. Students whose cumulative GPA falls below 2.70 or fails to complete the 48-credit requirement by the end of their sophomore year will not be placed on academic probation and will have scholarship automatically rescinded. *Transfer students* receiving a UM academic scholarship that fail to meet the SAP requirements at the end of their first

academic year may be placed on a one-year probationary period. A student that fails to meet the SAP requirements at the end of the fourth semester loses eligibility for the award.

Florida Financial Aid Requirements

The Florida Department of Education (<http://www.fldoe.org/students/financialaid.asp>) Office of Student Financial Assistance (<http://www.floridastudentfinancialaid.org>) has its own standards of progress for state financial assistance.

GPA Requirement

- Florida Academic Scholars must maintain a minimum institutional GPA of 3.0 for full renewal; 2.75 for partial renewal (equivalent to FL Medallion amount).
- Florida Medallion Scholars must maintain a minimum institutional GPA of 2.75.
- Effective Access to Student Education Grant (EASE), and Florida Student Assistance Grant (FSAG) must maintain a minimum institutional GPA of 2.0.

Credit Completion Requirement

At least 24 credit hours each academic year

- At least 12-credit hours for full-time students enrolled for only one semester.
- Withdrawals, incompletes, audits, and F's are attempted but not considered earned hours.
- For EASE and FSAG students, classes taken in the previous summer may be included in calculating the completed hours
- Part-time Bright Futures recipients must earn a prorated number of credit hours.
(9-11 credits per term = 9 earned hours per term) (6-8 credits per term = 6 earned hours per term).

Maximum Time Frame

Students receiving Florida Bright Futures awards may receive funding for up to five years from high school graduation for a maximum of 120 semester hours (or equivalent) toward the completion of a first baccalaureate degree.

Students receiving the Effective Access to Student Education Grant and/or the Florida Student Assistance Grant may only receive a maximum of 9 semesters of eligibility. Unused terms may not be used for further course funding after a student earns a baccalaureate degree.

Reinstatement of Florida Bright Futures

Recipients of the Florida Bright Future programs who do not receive any scholarships for the period of one academic year may apply for reinstatement of aid through the Florida Department of Education Office of Student Financial Assistance (OSFA) website at www.FloridaStudentFinancialAid.org (<http://www.floridastudentfinancialaid.org>).

Florida Academic award recipients who fail to achieve a 3.0 institutional average, but achieve at least a 2.75 institutional average will renew at the lower Florida Medallion amount.

Bright Future eligible recipients who graduated from high school in 2009-2010 and thereafter who fail to achieve a minimum 2.75 institutional GPA and became ineligible during their first year of funding may apply for restoration in an academic year after which the 2.75 institutional GPA requirements were met. (The 2.75 institutional GPA must be met before the fall term for which the student is applying.)

The student must complete a Reinstatement/Restoration application available on the Florida Department of Education Office of Student Financial Assistance (OSFA) website at www.FloridaStudentFinancialAid.org (<http://www.floridastudentfinancialaid.org>).

Students who do not meet the minimum earned hours requirement during any academic renewal period or who fail to meet the minimum institutional GPA requirement after their first year of funding will not be permitted a restoration opportunity.

Restoration of Effective Access to Student Education Grant

Reinstatement of the Effective Access to Student Education grant (EASE) may be obtained after one full academic year of ineligibility by earning a minimum of 24 credits and/or a minimum institutional GPA of 2.0.

Graduate/Professional Satisfactory Academic Progress

Graduate Students

Review and Notification

In order to determine continued aid eligibility, the Office of Student Financial Assistance and Employment will review the academic progress at the end of each academic semester for all graduate and professional students receiving federal aid, including the Federal Direct PLUS Loan.

Students who fail to meet SAP will be notified in writing by email. If a student is placed on academic probation they will be eligible for financial aid during that probationary period. A student may receive probationary scholarship assistance only once.

SAP Appeal

A student may appeal a SAP determination that results in loss of aid by completing and submitting to the financial aid office an Academic Progress Appeal Form. Appeals may be granted only if the student failed to meet academic progress requirements as a result of an emergency and/or illness, and these circumstances must have occurred within the semester/academic year during which SAP requirements were not met. All appeals should be submitted no later than 30 calendar days from notice of ineligibility. All decisions made by the committee are final.

Reinstatement of Aid

Reinstatement of aid may be obtained by earning additional University approved credits, achieving the indicated percent completion standard, or successfully appealing.

GPA Requirement

All University of Miami graduate and doctoral students must maintain a minimum 3.0 cumulative grade point average (CGPA). Graduate students who fail to meet the minimum credit hour or cumulative grade point average requirements have failed to meet the satisfactory academic progress standards established by the University. Those in violation of the satisfactory academic progress eligibility requirements will be notified in writing of their eligibility status and right to appeal.

Credit Completion Requirement

Students must earn 67% of the total credit hours attempted during his/her overall academic career. Rounding does not apply.

- Undergraduate and graduate credits cannot be combined to meet this standard.
- Withdrawals, incompletes, audits, NG (no grade) and F's are attempted but not earned hours.
- Transfer credits are counted in the calculation, but not in a cumulative GPA.

Graduate students must be enrolled at least half-time in order to receive federal financial assistance. A minimum of 5 graduate credit hours constitutes at least half-time enrollment at the graduate level. The only exception to this credit hour requirement is enrollment in any of the 800-level research courses. Students enrolled in any of these courses are considered full-time and are eligible for federal loans.

Duration of Eligibility

All work must be completed within six years of the time of admission to a graduate program, for those studying for the various master's degrees; and within eight years for those studying for doctoral degrees. For those admitted directly into a Ph.D. program without a master's degree in field, work must be completed within eight years. Individual programs may set a shorter time period.

Graduate students may receive federally funded assistance for the time to completion limits set up by the Graduate School - six (6) years for those studying for the various master's degrees and 8 years for those studying for doctoral degrees. Students pursuing dual master's degrees will receive aid for a maximum of six (6) years. Students in a combined master's degree/doctoral degree program are eligible for assistance for a maximum of eight (8) years.

Merit Scholarships

Graduates scholarships awards are determined by the departments. A student's academic progress and eligibility for an award is monitored and evaluated by the departments.

Law Students

Program specific requirements may be found online at <http://grad-prof.miami.edu/applying-for-aid/satisfactory-academic-progress/law-sap/index.html>

Maximum Time Frame

Law Students are eligible to receive financial aid up to 33% over and above the maximum of credit hours required to obtain his/her law degree. All periods of enrollment (including Summer), will be counted toward the maximum time frame.

Treatment of Punitive and Non-punitive Grades and Courses

All courses with a grade of F, I, IP, NG, U, W and repeated courses will be considered in the calculation of credit hours attempted and will be subject to satisfactory academic progress. Audited courses are not considered in awarding financial aid; therefore, they will not be counted in the determination of satisfactory academic progress. Incomplete (I) grades will be calculated as failing grades in regard to credit hour completion until the course has been satisfactorily completed.

Notification of Satisfactory Academic Progress

Awards are considered estimated, until the final grades are reviewed by the Office of Financial Aid. Students are allowed their first term of failing to meet satisfactory progress, due to GPA or failure to meet the required 67%, as a probationary period. Students who have not met the minimum standards of satisfactory academic progress as outlined above, beyond a their probationary period or are academically dismissed, are considered on financial aid suspension and no longer eligible for aid.

Reinstatement of Financial Aid Eligibility

A student may regain eligibility by:

- Achieving the required GPA and Credit Hour Completion as outlined.

- Appealing the financial aid decision as described below.

Financial Aid Appeal Process

A student may appeal a SAP determination that results in the loss of aid by completing and submitting to the Office of Student Financial Assistance and Employment an Academic Progress Appeal Form. Appeals may be granted only if the student failed to meet academic progress requirements as a result of an emergency and/or illness, and these circumstances must have occurred within the semester during which SAP requirements were not met. All appeals should be submitted no more than 30 calendar days from notice of ineligibility. All decisions made by the appeals committee are final.

Student Employment

Student Employment

Student Employment (<http://www.miami.edu/ose>) is responsible for assisting and guiding students (admitted and enrolled in a degree program at the University of Miami) through the job search and placement process while attending the University.

Student Employment provides job opportunities to all students regardless of sex, age, disability, sexual orientation, ethnicity, nationality, race or creed. University of Miami student employees are required to adhere to established federal, state and local employment regulation practices.

Employment programs for undergraduate students include the Federal Work Study, Student Assistant program, and Lead Miami program, all of which offer opportunities on campus and in the surrounding community. Employment programs for graduate students include: Federal Work Study, Student Assistant Program and Graduate Assistantships. Available positions are posted in JobX (<https://umiami.studentemployment.ngwebsolutions.com/?>)

Student employment program earnings are paid directly to the student as they work and are not applied as a credit toward tuition charges.

Federal Work Study

Federal Work Study is a need-based program that provides part-time job opportunities based on your financial aid eligibility. To apply for Federal Work Study, you must complete the Free Application for Federal Student Aid (FAFSA) and the CSS Financial Aid PROFILE.

Students who are awarded Federal Work Study obtain jobs available at the University of Miami campuses or at off-campus community service agencies that have been approved to participate in the program.

Student Assistant Program

All degree seeking, admitted, and enrolled students are eligible to apply for positions under the Student Assistant program. Student assistant positions are similar to Federal Work Study in terms of job responsibilities and rates of pay; however, they are not supported by federal funds.

LEAD Miami Program

The LEAD Miami program (<http://admissions.miami.edu/undergraduate/financial-aid/lead-miami>) is available by invitation to a limited number of students based on Office of Admission referrals. To be considered, invited students must apply to the program by the published deadline.

Graduate Assistantship Program

Graduate Assistantships are mostly offered directly to selected students by their academic departments. Graduate Assistantships may include a tuition scholarship of varying amounts, in addition to work payment. Students must be admitted to a Graduate or Professional Degree Program at the University of Miami in order to be hired as a Graduate Assistant.

Off-Campus Employment

Students seeking career-related experiences and who have reliable transportation can work off-campus. Student Financial Assistance and Employment acts only as a referral service and makes no particular recommendations regarding off-campus employers. Off-Campus employers hire students directly and Student Financial Assistance and Employment is not responsible for safety, wages, working conditions, or other aspects of off-campus employment.

The University of Miami participates in E-verify, an Internet-based system that allows an employer, using information reported on an employee's Form I-9, to determine the eligibility of that employee to work in the United States. The E-Verify system is operated by the U.S. Department of Homeland Security (DHS) in partnership with the Social Security Administration (SSA). Student employees need to present original documents to complete the Form I-9 and E-verify. A list of other acceptable documents can be found online at <https://www.uscis.gov/i-9-central/acceptable-documents>.

Terms and Conditions

My UMIAMI E-MAIL ACCOUNT

I understand University of Miami Office of Student Financial Assistance and Employment (OSFAE) will communicate with students and their parents by e-mail. I will monitor my CaneLink account and will be responsible for checking my email account regularly. I understand if I miss an important deadline or lose eligibility because I did not resolve an outstanding issue, I will not hold the OSFAE at fault.

ESTIMATED FINANCIAL AID AWARDS

I understand my award may be "ESTIMATED" due to a variety of issues that I will need to resolve before my financial aid can be disbursed. I will monitor my outstanding requirements on CaneLink and submit the necessary documentation as soon as possible. I understand if I fail to complete the financial aid process by the priority deadline, my financial aid eligibility may be affected or I may not be eligible for a variety of funds which I may have received in previous years.

FINANCIAL AID OVER-AWARDS

I understand my financial need is the difference between the cost of attendance (COA) and the amount of my expected family contribution (EFC) as calculated by the Institutional Methodology formula from data I provided on the CSS Profile. I understand my eligibility may change if I receive funds from another source that is not included on my initial financial aid award. I understand the OSFAE will communicate with me about these changes and I will review CaneLink frequently to understand how my award may have been affected.

OUTSIDE SCHOLARSHIP

I understand that if I receive an outside scholarship my award may be affected. I will need to submit all information from the scholarship agency to the Office of Student Financial Assistance and Employment as soon as I am notified I will be receiving additional funds. I understand that the Office of Financial Assistance Services will first fill any gap between the institutional EFC and federal EFC, and then reduce my loans/work study, before reducing any need-based grant eligibility in my financial aid package. I understand that I can request that the financial aid office reduce my work study before reducing loan eligibility, however, I must do so in writing with the Office of Financial Assistance Services.

FEDERAL AND INSTITUTIONAL WORK STUDY PROGRAMS

I understand there are a variety of work study (federal and institutional) positions available on and off campus. It is my responsibility to find a suitable employment opportunity that fits my needs, areas of interest and academic schedule. Once I find an employer, I understand I must complete a work study authorization form, I-9 form, W-4 form and a direct deposit authorization before I can begin work. I understand if Federal Work Study is awarded as part of my financial aid package, the amount indicated is the maximum amount I may earn during the academic year. I also understand the amount awarded is not a guarantee of employment and that if I apply too late in the hiring season, I may not find a suitable position to take advantage of the work study program.

INSTITUTIONAL AID ENROLLMENT REQUIREMENTS

For all merit and need-based aid from the University of Miami, full-time enrollment is required. Full-time enrollment is defined as 12 credits or more each semester. The student must have the required full-time enrollment to qualify for institutional aid. Enrollment of less than 12 credits may result in the reduction or loss of some aid programs.

SATISFACTORY ACADEMIC PROGRESS

I understand in order to be eligible for federal, state and institutional financial aid programs, I must initially and continually meet satisfactory academic progress (SAP). University of Miami standards of SAP measure a student's academic performance both qualitatively and quantitatively by reviewing the following three areas of performance: completion rate for coursework enrolled, cumulative grade point average earned, and the maximum time frame to complete a degree. I understand the OSFAE is responsible for ensuring that I am meeting these minimum standards. The standards of SAP apply for all federal, state and college funded financial assistance programs. I understand if I fail to meet the minimum requirements to be eligible for financial aid, I will lose my eligibility at the end of the period of review. I will have the opportunity to appeal the loss of my financial aid within 30 days of notification; and if my appeal is approved, I will have one semester to improve my GPA and completion rate. I understand if my appeal is denied, there is no further recourse to reinstatement of my financial aid at that time.

REPEAT COURSE WORK

I understand if I pass a course and need to retake that same course for a better grade my financial aid may be affected. I will work with my advisor to ensure I maintain my full-time status in order to receive all of my financial aid. I understand by the end of the add/drop period, if I have not enrolled in full-time credits, my financial aid will be affected, removed or may be prorated based on the total of all the **new** courses that have not already been paid by my financial aid. Full-time enrollment is defined as 12 credits or more for the fall and spring semesters. Enrollment of less than 12 credits may result in the reduction or loss of aid.

WITHDRAWAL OR LEAVE OF ABSENCE

I understand financial aid funds are awarded with the expectation that I will complete the entire period of enrollment. I earn a percentage of funds that are disbursed with each day of class attendance. If I decide to leave school before the end of the semester or designated period of enrollment, I understand federal regulations require University of Miami to calculate the percentage and amount of "unearned" financial aid funds that must be

returned. If I complete more than 60% of the enrollment period, I will have earned all of my eligibility for federal aid for that period. I understand this calculation may require me to repay funds that have already been disbursed or credited to my student account.

ENROLLMENT FREEZE/CENSUS DATE

I understand the college will freeze my enrollment at the end of the add/drop period for each semester. This means I will make any and all adjustments to my course schedule before the end of the add/drop period to avoid any problems with repeat courses or being under-enrolled. I understand once my course schedule has been completed my Pell Grant will not adjust regardless of any changes to my enrollment. However, I may be eligible to receive more loans if in the event I am charged more due to the adjustment to my course schedule. Full-time enrollment is defined as 12 credits or more.

I understand most federal financial aid requires at least half-time enrollment including Federal Pell Grant and Direct Loans. Most institutional and state financial aid requires full-time enrollment including need-based UM grants and merit scholarships. Adjustments to financial aid for enrollment changes after the Census Date will not be done except for Florida Bright Futures and in the case of a complete withdrawal from the University. There are no exceptions to this policy.

RECONSIDERATION OF FINANCIAL AID AWARDS

I understand I have the opportunity to appeal some financial aid decisions. If I wish to request a reconsideration of financial aid, I must submit a Request for Review (<https://finaid.miami.edu/request-for-review>) with supporting documentation of my situation to the Office of Student Financial Assistance and Employment. I understand that only certain circumstances can be evaluated such as loss of income, unusual medical expenses (not premiums), separation/divorce of parent's, death of a family member, non-discretionary expenses incurred by the family.

SUMMER LEAVE TERM EXPECTATION

A portion of the family's contribution is the responsibility of the student. UM expects the student to contribute a minimum of \$2,000 from income (summer and leave term employment opportunities) and any savings or other resources that may be available to the student. University of Miami follows this policy with the following exception: In an effort to encourage participation in summer internships, UM will provide need-based financial aid to replace the summer savings expectation for all students who are unable to earn and save all or a portion of their student contribution. In order to qualify for additional financial aid, students must meet posted deadlines for participation in a summer internship. *NOTE: The additional financial aid may take the form of increased work-study employment, student loan and/or grant (if applicable) as determined in conjunction with the student's financial aid eligibility and University of Miami's awarding policies.*

SUMMER ENROLLMENT AND DISBURSEMENT

Summer aid is processed once the student is enrolled for the summer term and completes the Summer Financial Aid Request Form (<https://finaid.miami.edu/resources/forms>). Only undergraduate students enrolled at least half-time (6 credits or more) will be eligible to receive federal student loans. Financial aid for summer will not disburse until the first day of the term in which the student meets the minimum required enrollment for the aid program. Students who are not enrolled for summer but wish to request Federal Work Study for the summer term must submit a Summer Financial Aid Request Form on the OSFAE website (<http://finaid.miami.edu/resources/forms>).

Financial Payment Policies

Policy

All semester charges (tuition, room, meal plans, and fees) are due by the date on the billing notification e-mail, unless an established Monthly Payment Plan contract has been finalized with the Office of Student Account Services. Previously unbilled and new charges are due and payable when incurred. Payment is considered complete only when all charges are paid or when satisfactory arrangements to pay have been finalized with the Office of Student Account Services.

Consequences of Non-Payment

Students that are delinquent in paying their tuition and fees statement balance and/or Monthly Payment Plan may be subject to having their class schedule cancelled. Also, there will be a hold on transcripts and course registration for the current and subsequent semester. Cancellation may also lead to the forfeiture of any financial aid the student may have been awarded.

Course selection will not be permitted for any past due accounts including Monthly Payment Plans. A late payment fee can be assessed to delinquent accounts.

Registration Fees

Late Registration

Student who register late for classes will incur a late registration fee. Any undergraduate or graduate student who enrolls after the last day to add (as defined by the academic calendar) will be assessed a late registration fee of \$150.00.

Reinstatement

Students who are reinstated into classes after being cancelled for non-payment will be assessed a \$150.00 reinstatement fee.

Finance Charges

No additional charges are imposed on an account once full payments are received by the payment due date. If, however, payment is received after the payment due date, a Finance Charge can be assessed.

Anticipated Payments

If financial aid funds are not available at the time the semester's balance is due, then the student is expected to pay the balance with a different payment method. Financial aid awards will be considered "anticipated" under the following conditions:

- The Office of Student Financial Assistance and Employment (OSFAE) is provided with a source of aid (other than College Work Study or Miami Commitment) on the student's award package.
- OSFAE awards the corresponding amount on the student's award package. i.e., outside scholarship information must be provided to both the Offices of Financial Assistance and Student Account Services in order to consider the aid as "anticipated."
- OSFAE allocates the **guaranteed** award during the semester that the disbursement should be expected. This means the student completed all the "To Do" check list items related to financial aid.
- Final guarantees have been processed by the appropriate alternative loan lender – preliminary approvals will not result in automatic disbursements of alternative loan funds.

Examples

Veterans Monthly Educational Benefit Checks: An amount not to exceed the total of the checks expected to be received during the semester (for fall and spring, this is typically three checks) may be credited. Arrangements for this type of tuition credit must be initiated with a representative of Veterans Affairs through the Office of the Registrar and the Office of Student Account Services. Students with VA benefits are required to sign a promissory note with the Office of Student Accounts in order to have their anticipated awards credited to their account.

International Students with Government Sponsorships: Payment of all or a portion of charges that can be billed directly to corresponding government agencies may be credited upon presentation of appropriate documentation from their government or embassy.

Florida Prepaid Program

The University of Miami will assist with a student's education expenses by billing for any available Florida Prepaid College Program funding directly to the Florida Prepaid College Board. Florida Prepaid participants may authorize the University of Miami to request a payment disbursement option that best matches your needs and current savings in the plan. We encourage participants to authorize a payment that will facilitate your financial planning objectives for your student's enrollment at the University of Miami.

The University of Miami requires all students requesting FLPP to complete the "Florida Prepaid College Program Authorization Form" each academic year. In addition to this form, all students who plan to use their prepaid funds must contact Florida Prepaid at 1-800-552-4723 option 2, and request a separate Florida Prepaid "Transfer Form." Upon your request, Florida Prepaid will mail the Transfer Form to you. The purchaser of the plan must complete this form and return it directly to Florida Prepaid. It is necessary that Florida Prepaid have this Transfer Form on file in order for students to use Florida Prepaid funds at the University of Miami.

Questions in reference to Florida Prepaid can be emailed (saccounts@miami.edu) with "Florida Prepaid" in the subject line. The required authorization form for the University of Miami and an example can be downloaded (http://www.miami.edu/finance/index.php/student_account_services/third_party_fl_prepaid/florida_prepaid) here (<https://osas.miami.edu/paying-your-bill/types-of-payments/florida-prepaid>).

Policy on Previous and Unpaid Balances

Non-Payment

The University of Miami may declare due and payable at once the sum of all past due balances. In addition, the student will be responsible for interest accrued on all past due and unpaid amounts at the maximum rate permitted by law and any and all costs incurred by the University of Miami in enforcing its rights. The University reserves the right to withhold transcripts, diplomas, readmission, and future registration for non-payment of outstanding balances. The University's Collection Department may also disclose the student's outstanding indebtedness, along with other relevant information, to credit information bureaus. A non-refundable \$150 reinstatement fee will be charged to reinstate each unpaid and cancelled semester.

Withdrawal & Tuition Drop Refunds

Definitions

Title IV Financial Aid or Title IV Programs refers to the following awards:

- Unsubsidized Federal Stafford Loans
- Subsidized Federal Stafford Loans
- Federal Perkins Loan, DL PLUS (Graduate Student), DL PLUS (Parent)

- Federal PELL Grant
- Federal Supplemental Educational Opportunity Grant (SEOG)
- Federal College Work Study

Students who have advised the Canes Success Center of their withdrawal, through 60 percent of the semester, will receive credit for eligible financial aid refunds using a pro-rated calculation based on the percentage of the semester attended by the student. Unearned Title IV funds will be returned in accordance with the refund policy established in Section 484B of the Higher Education Act of 1965, as amended (HEA) and provided for through the Student Assistance General Provisions regulations enacted on October 7, 1998. Please review UM's current policy on tuition refunds (<https://osas.miami.edu/refunds-and-withdrawals>). **Fees are not refundable and will not be pro-rated.**

The University refund schedule (click here for current drop refund schedules (<https://osas.miami.edu/understanding-your-bill/tuition-and-fees-information/tuition-drop-credit-schedule>)) does not apply to students in the following on-campus and off-campus programs: The Executive MBA, the MBA Program for Working Professionals, and the Master of Science in Professional Management. Unless the student has completed official withdrawal procedures in writing with the Graduate Business Program office prior to the beginning of a course/term, tuition will be refunded on a prorated basis based on the number of class meetings attended through the effective date of withdrawal. No tuition refund will be granted when class attendance has exceeded 50% of class meetings. This policy supersedes any information stated in the Graduate Bulletin and other university publications.

Procedure

The amount of earned tuition and financial aid will be calculated on a daily pro-rated basis. Unearned tuition will be credited to the students account. Unearned, disbursed financial aid will be charged to the students account and refunded to the appropriate financial aid programs. Students who have not completed the verification process are ineligible to receive any financial aid and therefore no financial aid will have been earned. All disbursed financial aid will be charged to the students account and refunded to the appropriate financial aid program.

The return of financial aid will be refunded in the specific order noted below until the total amount of the school's responsibility has been satisfied:

- Unsubsidized Federal Stafford Loans
- Subsidized Federal Stafford Loans
- Federal Perkins Loans
- Federal PLUS Loans (Graduate Student)
- Federal PLUS Loans (Parent)
- Federal Pell Grant
- Federal Supplemental Opportunity Grant (SEOG - Federal Portion Only)
- Any other Title IV Assistance
- State financial aid

In the event of an over-payment of unearned Title IV grants, the University will send the student a notification letter requesting payment in full or the establishment of a satisfactory payment arrangement with the University's Department of Collection or the Debt Collection Services of the U.S. Department of Education. This notification letter will be processed within 30 days of the date of the University's determination that the student withdrew.

If the student does not respond to the request for repayment within 15 days, the University will notify the Department of Education of any Title IV grant over-payment. If the student does not make satisfactory repayment arrangements for the repayment of Title IV grant aid, the student will then become ineligible for federal assistance on the 46th day from the date of the University's repayment letter.

Withdrawal Example

A student notifies the Registrar of withdrawal on the 50th day of the semester. If the total number of calendar days in a semester were 108, the earned financial aid ratio would be 50 divided by 108 or 46.3 percent. The student would have earned 46.3 percent of the approved federal aid that the student was originally scheduled to receive for the term. The 53.7 percent of the student's scheduled or disbursed aid remains unearned and must be returned to the Federal Program. If a student remains in school until the percentage of earned financial aid is 60% or more, then federal regulations consider the student to have earned 100% of their federal aid. For further information please refer to the 'Cane Success Center withdrawal information page (<https://success.miami.edu/student-withdrawal>).

Post Withdrawal Disbursements

If the University determines that a student is eligible for Title IV funds that have not been disbursed, grant funds that the student is eligible for will be disbursed first. Federal aid that the student is eligible for will be credited to the students account and applied against any outstanding charges.

Alumni Rate and Policy

Special Opportunity for UM Graduates

UM graduates may take undergraduate credit hour courses in the College of Arts and Sciences on a space available basis, at a special alumni rate. All University of Miami graduates are eligible for this special program.

Students may take whatever courses are of interest. From Anthropology to Theatre Arts and all the disciplines in between, participants may choose a course or collection of courses (maximum two courses per discipline) to meet professional or personal goals.

Interested students may call the Division of Continuing and International Education at 305-284-4000 to inquire about the benefit and/or the current tuition rate, request an application, or enroll in the courses. They will submit a simple, no-fee, one-page application, simply select an undergraduate course (open on a space available basis) and be on their way to continued learning at UM.

Policies Governing Enrollment in University of Miami Alumni Status

The University of Miami Alumni Status includes students who are not seeking a degree and meet the following requirements. Enrollment in a non-degree program and/or satisfactory completion of courses does not imply admission to a degree program.

1. University of Miami graduates (completed degree);
2. U.S. citizens or permanent U.S. residents.

Conditions applying to University of Miami Alumni enrollment

1. Students may enroll in a maximum of 12 undergraduate credit hours per semester.
2. Students are limited to two courses per academic department.¹
3. Courses may be selected from the College of Arts and Sciences only.
4. International students will not be issued I-20 forms.
5. International students in B-1 (business) or B-2 (pleasure) visa status may engage in study as long as the educational activity is secondary to the principal activity for which the visa was sought.
6. Enrollment may be completed on a space-available basis only. (Course availability determined two days prior to semester start.)
7. Courses taken for undergraduate credit hour (including 500 level courses) will not be considered for graduate credit hour at a later date.

¹ Note: Not all courses and/or departments may be available.

Meal Plans

The Links below are where you can find the Meal Plan rates for the 2018 - 2019 academic year.

Residential Meal Plans (<https://new.dineoncampus.com/miami/for-residents>)

Commuter & University Village Apartment Meal Plans (<https://new.dineoncampus.com/miami/for-commuters>)

Parking and Transportation

<http://pt.ref.miami.edu/>

Description	Price (Tax Included)
Commuter Student	\$ 531.00
Fall Only - Commuter	\$ 266.00
Resident Student	\$ 573.00
Fall Only - Resident	\$ 289.00
Discount	\$ 266.00
Motorcycle	\$ 107.00

*Parking subject to change

Parking on the University of Miami's Coral Gables campus is a privilege extended to those using the facilities of the University consistent with the terms of the University's Parking Policies and Procedures and other policies of the University as they are set or amended by the Provost. Parking privileges are extended only to those eligible members of the university community including trustees, faculty, administrators, staff, students, vendors and visitors who have paid for a valid UM parking permit. In consideration of being allowed to use the University's facilities for parking, the purchaser

of a parking permit agrees to be bound by the rules set forth in the Parking Policies and Procedures, and agrees to pay to the University any fine or administrative charge assessed for non-compliance with this code.

Students, faculty, employees, and staff may not park in visitor parking spaces, and UM parking permits are not valid at parking meters.

First year resident students (students residing on the Coral Gables campus who are attending college on a full time basis for the first time) are restricted from purchasing a parking permit to park on the University of Miami's Coral Gables campus. This policy applies to first year students living in University of Miami student housing on the Coral Gables campus.

For more information on Parking, please visit our website (<http://www.miami.edu/parking>). Annual permits are valid August 16, 2018 through August 15, 2019.

Payment Options

The University Cashier accepts cash, personal checks, traveler's checks, cashier's checks, certified checks, money orders, and checks drawn against lines of credit. Personal check and credit card payments are accepted on line via CaneLink. Bank wire transfers are also accepted.

Checks and Money Orders

Payments must be in U.S. Dollars and drawn on a U.S. bank. Payments must be made payable to the University of Miami and include the student's identification number to ensure credit to the student's account. **Post-dated checks are not accepted.**

Returned Checks Policy

All returned checks are deposited twice, automatically, and without notice. A Returned Check Fine will be assessed to the student's account, as listed below, after the second attempt. Check cashing privileges will be canceled for those students who have three (3) or more returned checks.

A notification letter will be mailed to the maker of the check by the University's Collection Department detailing the amount and fine for the returned check. Check cashing privileges will be restricted until cash or certified funds (money order or cashier's check) are presented for payment. A personal check will not be accepted to replace a dishonored check.

Returned check fines processed through CaneLink will incur a \$20 fee. Checks not processed through CaneLink will incur the following charges:

Check < or = \$800.00	\$20.00 fee
Checks over \$800.00	2.5% of the check amount
Checks for Monthly Payment Plan	\$20.00 Fee

Wire Transfer of Funds

Students may pay their tuition by wire transfer. The wire transfer instructions can be obtained through CaneLink.

How to obtain wire transfer instructions:

1. Log into CaneLink and go to Student Center, click on the Account Inquiry button under the Finances.
2. Click on Make a Payment to pay your tuition and select Wire Transfer Payment (USA & International).
3. Select the country from the "What country are you paying from" dropdown list. For domestic wire instructions, select the US wire transfer payment option.
4. Create a Flywire account, to track your wire payment, and enter basic identification information for the University to identify your payment.
5. The bank account wire instructions will be provided.
6. An email will be sent with a unique wire identification number.

Students should make sure their full name, student ID number, and unique wire ID number are included with the wire transfer to ensure the funds are applied correctly.

Tuition Payment Plans

The Office of Student Account Services offers several tuition payment options to assist students and parents. The University's payment options are designed to provide convenient alternative plans of budgeting and paying educational costs whether or not a financial assistance award is granted.

Monthly Payment Plan (MPP)

Purpose: This plan allows you to divide all or part of your semester educational expenses (tuition, fees, on-campus housing, and meal plan less financial assistance) into four convenient monthly payments for the fall. A four month payment plan is also available for the spring term as well. The University of Miami does not offer a monthly payment plan option for the summer term.

Contract length: This plan is offered on a semester-by-semester basis for the fall and spring semesters. The minimum contract for either plan is \$1,000.

Fee: A 3% non-refundable administration fee of the amount financed is charged and included in the established monthly payments.

Conditions: Payments are due on the 1st of each month with the first payment due on August 1st for the Fall semester. The first payment for Spring semester MPPs will be due on the first business day in January.

Students may apply for the Monthly Payment Plan on CaneLink. For more information regarding this option please follow this link to the Monthly Payment Plan FAQ page (<https://osas.miami.edu/paying-your-bill/types-of-payments/payment-plan-option>).

Room Rates

Room Rates - Undergraduates

Residential Colleges ¹	Semester	Annual
Double	\$4,060.00	\$8,120.00
Small Single ²	\$5,480.00	\$9,160.00
Standard Single ³	\$6,310.00	\$12,620.00
Efficiency	\$6,750.00	\$13,500

University Village ⁴	Fall Semester (Aug-Dec)	Spring Semester (Jan-May)	Summer Term (June-July)	Annual Rate (12-mos. agreement) in Total
Ibis Model (1:1)	\$9,550.00	\$9,550.00	\$3,770.00	\$22,870.00
Palm Model (2:2)	\$6,760.00	\$6,760.00	\$2,660.00	\$16,180.00
Cane Model (4:2)	\$5,730.00	\$5,730.00	\$2,250.00	\$13,710.00
Villager Model (4:4)	\$6,320.00	\$6,320.00	\$2,480.00	\$15,120.00
Lake Model (4:4)	\$6,430.00	\$6,430.00	\$2,530.00	\$15,390.00

¹ Freshmen are typically assigned to Hecht and Stanford Residential Colleges but may be assigned to another residential college based on availability.

² Small Singles are only available in Hecht and Stanford Residential Colleges and only to new freshmen.

³ Standard single rooms are available in Eaton, Mahoney, and Pearson Colleges and only to returning upper-class students.

⁴ For upper-class students only (60+ academic credit hours completed)—no freshmen or sophomores; annual (12-month) agreement for all Village residents—billed by semester/term through the Office of Student Account Services.

SUMMER SESSION (all air-conditioned)	Rates are per person
Double Room	\$ 1,100.00 per session
Small Single Room (when available)	N/A
Standard Single Room	\$1,400.00 per session

Graduate Housing

Housing in on-campus housing is not available for GRADUATE students in addition to married students, single parents with children, law students, and medical students. The Department of Housing and Residential Life does assist GRADUATE students with off-campus housing information and resources here (<http://www.miami.edu/housing>).

Law Housing

Housing in on-campus housing is not available for LAW students in addition to married students, single parents with children, graduate students, and medical students. The Department of Housing and Residential Life does assist LAW students with off-campus housing information and resources that can be found here (<http://www.miami.edu/housing>).

Tuition and Fees

Tuition

The basic undergraduate tuition rate covers the normal student load and is increased if the student carries an overload. Private instruction, e.g., music lessons, carries extra charges. Students who opt to participate in any of the University's intercession courses will be billed for the intercession course separately from the flat rate cost of full-time tuition and fees.

For tuition charges in special programs and sessions, see announcements that are published concerning these components of the University's academic program.

The following list of charges is effective for the academic year 2018-2019.

Undergraduates (All Colleges and Schools)

Number of Credit Hours	Tuition (per semester)
One	\$ 2,030.00
Two	\$ 4,060.00
Three	\$ 6,090.00
Four	\$ 8,120.00
Five	\$ 10,150.00
Six	\$ 12,180.00
Seven	\$ 14,210.00
Eight	\$ 16,240.00
Nine	\$ 18,270.00
Ten	\$ 20,300.00
Eleven	\$ 22,330.00
Twelve to twenty	\$ 24,360.00
In excess of 20, per credit hour	\$ 2,030.00
No credit hour towards degree (audit), per course, nonrefundable	\$ 2,030.00

Undergraduate students carrying both undergraduate and graduate courses will be charged tuition at the rate in effect for undergraduate credit hours taken and appropriate fees. For example, tuition for a student carrying a total of 15 credit hours, of which 3 are graduate and 12 are undergraduate, would be charged at the \$24,360.00 rate.

Undergraduate students taking graduate level coursework that is priced at a special level will be billed separately for these courses. Students should check with their advisors and/or the appropriate school's department for more details on their course pricing requirements.

Full-time fees will be assessed according to student classification as an undergraduate or graduate.

The University reserves the right to change without notice tuition, fees, room and all other charges at the beginning of any academic year, and the right to change activities and meal plan fees at the beginning of any semester.

Graduate Students

Pre-Master's, Post-Master's, and Doctoral Students per credit hour	\$2,030.00
Research in Residence (720 or 750) or Continuous Registration-Master's Study (725), per fall/spring semester	\$2,030.00
Research in Residence (720 or 750) or Continuous Registration-Master's Study (725), per summer session (0 Research Credit Courses)	\$2,030.00
Audit Work (No degree credit) Tuition, per course, non-refundable.	\$2,030.00

Certain programs are conducted by the University under contract with the State of Florida. Florida residents who have been accepted as students in those contract programs are required to pay current state tuition for each credit hour taken and the state provides the University with additional funds in accordance with the terms of the contracts. Students involved in state contract programs should contact the appropriate school/college to ascertain the state tuition charge per credit hour that they are expected to pay.

Fees

Some fees depend upon full-time status. This is usually determined by the sum total of semester credit hours carried by the student in all divisions or enrollment in certain special programs that are classified as full-time regardless of credit hour load. Intersession classes are included with regular fall and spring semester classes in determining the student's full- or part-time status. This determination will also result in the billing of required fees. Fees are subject to change.

Undergraduate students are classified full-time if they enroll in 12 or more credit hours in a regular semester or 12 or more credit hours in a summer session or if they are enrolled in a special program which is classified full-time regardless of credit hour load.

Graduate students are classified full-time if they enroll in nine (9) or more credit hours in a regular semester or six (6) or more credit hours in a summer session, or if they are enrolled in dissertation credit hours that are classified as full-time.

Mandatory Fees

FALL OR SPRING SEMESTER FEES (per semester)	Student Activity Fee	Athletic Fee	Wellness Center	Student Health and Counseling Centers Fee	Student Center Fee	Total
Undergraduate – full-time (12 or more credit hours) ¹	167.00	\$90.00	\$156.00	\$180.00	\$160.00 ²	753.00
Graduate, fulltime (9 or more credit hours) ¹	\$46.00	N/A	\$156.00 ³	\$180.00	\$160.00 ²	542.00
Rosenstiel Graduate (9 or more credit hours) ¹	\$20.00	N/A	\$156.00 ³	\$180.00	N/A	356.00
Medical Science Graduate (0 or more credit hours) ¹	\$20.00	N/A	\$171.00 ³	\$25.00-Med \$155.00- Gables	N/A	371.00
Law Students (11 or more credit hours) ¹	\$59.00 ⁴	N/A	\$156.00	\$180.00	\$160.00	555.00

¹ Student Health & Counseling Centers Fee is mandatory for all full time and part-time students regardless of credit hour load. Part-time students will be charged the part-time rate..

² Student Center Fee is mandatory for all full time and part-time students regardless of credit hour load. Part-time students will be charged the part-time rate.

³ Wellness Center Fee is automatically charged to all full-time Graduate, Rosenstiel Graduate, and Medical Graduate students. It is mandatory unless declined by opting out of the fee in CaneLink. The last day to decline the fee is the last day to drop a class without a "W" as defined in the University's academic calendar

⁴ Law Student Activity Fee mandatory regardless of credit hour load.

SUMMER SESSION FEES (per session)	
Undergraduate (Full Time 5+ Credit Hours)	
Student Activity Fee	\$11.00
Student Health and Counseling Centers Fee	\$86.00
Student Center Fee	\$78.00
Total:	175.00
Graduate (Full Time 5+ Credit Hours)	
Student Health and Counseling Centers Fee	\$86.00
Student Center Fee	\$78.00
Rosenstiel Graduate	
Student Health and Counseling Centers Fee	\$86.00
Medical Graduate	
Student Health and Counseling Centers Fee	\$46.00
Law	
Student Health and Counseling Centers Fee	\$90.00
Student Center Fee	\$80.00

Health Insurance Fee (August 15, 2018 to August 14, 2019)

The new fees will be available July 2018.

Please note you are not required to have the University sponsored health insurance plan in order to utilize the services of the Student Health Center.

Students who are not enrolled for the current semester but intend to enroll for the next semester and graduating seniors (who wish access for one additional week after graduation), may gain access to the services of the Student Health Service after paying the Health and Counseling Centers Fee.

Optional Fees

FALL OR SPRING SEMESTER FEES (per semester)	Student Activity Fee	Student health and Counseling Centers Fee	Athletic Fee	Wellness Center
Undergraduate Students (1 to 11 credit hours)	\$167.00	Not Optional	\$90.00	\$156.00

Graduate Students (0-8 credit hours)	\$46.00	Not Optional	\$90.00	\$156.00 ¹
Graduate Students (9 or more credit hours)	Not Optional	Not Optional	\$90.00	\$156.00 ¹
Rosenstiel Graduate Students (0 to 8 credit hours)	\$20.00	Not Optional	\$90.00	\$156.00 ¹
Rosenstiel Graduate Students (9 or more credit hours)	Not Optional	Not Optional	\$90.00	\$156.00 ¹
Medical Science Graduate Students (0 to 8 credit hours)	\$20.00	Not Optional	\$90.00	\$171.00 ¹

¹ Wellness Center Fee is automatically charged to all full-time Graduate, Rosenstiel Graduate, and Medical Graduate students. It is mandatory unless declined with a waiver form submitted to and approved by the Office of Student Account Services by the last date to add classes for the semester as defined in the university's academic calendar.

Optional SUMMER SESSION FEES (per entire summer term)	Activity Fee ¹	Wellness Center Fee
Undergraduates	\$11.00	\$130.00
Graduate	\$10.00	\$130.00

¹ Optional only for students taking less than 5 credit hours per session and not listed as a full-time student. Students listed as full-time students, regardless of credit hours, are responsible for the fees.

Other Fees

Diploma Fee	
Original Diploma	no charge
Replacement Covers	\$10.00
Replacement – Bachelors, Masters, Ph.D	\$10.00
Replacement – Law, Medicine	\$15.00

Transcript Fee	
Mailed/Paper Transcripts	\$10.00
Electronic/PDF Transcripts	\$7.00

Note: Unofficial transcripts are available in CaneLink (<https://caneid.miami.edu/cas/login?service=https%3A%2F%2Fcaneid.miami.edu%2Fidp%2FAuthn%2FRemoteUser>). (<https://caneid.miami.edu/cas/login?service=https%3A%2F%2Fcaneid.miami.edu%2Fidp%2FAuthn%2FRemoteUser>)

Fees Charged by Sonhs to Students Registered for Clinical Courses (Annual, non-refundable, due at registration, estimated at time of publication) ¹	
	Academic Year 2018-2019
Nursing Fees	\$770.00
Total	Between \$347.00 - \$520.00

Professional Liability Insurance (annual, non-refundable, due at registration, estimated at time of publication)¹

Clinical athletic training students	\$75.00/semester
-------------------------------------	------------------

Music Charges for Non-Music Majors or Minors (Lessons in Applied Music)

Fees, in addition to regular tuition, per credit hour per semester	\$300.00
Readmission Fee	\$100.00
Non-UM Program Status Fee	\$350.00/semester
Graduate Application Fee	\$65.00

Graduate Business Program Mandatory Fees

Graduate Business Programs have a one-time non-refundable \$2,200.00 mandatory Enrollment Fee for Applicants with intent to enroll in all Masters of Business Administration (MBA) and Specialized Master Degree Programs, with the exception of graduate programs in accounting.

The Executive and Professional MBA programs listed below have a mandatory Program Administration Fee charged per semester according to the number of credits in which a student is enrolled.

Program Administration Fee*

	Per Credit
Professional MBA**	\$290.00
Global Executive MBA	\$538.00
Miami Executive MBA en Español	\$207.00
Executive Health Sector Management and Management	\$113.00

*Tuition typically increases each academic year. Any increase in the University of Miami per credit tuition rate will be compensated by a corresponding reduction in the program administration fee. The total cost of the program (Tuition and Program Administration Fee) therefore will not vary.

**Based on 42 credits

Late Registration Fee (Permission to register required)

Late Registration Fee charged if student's initial registration is after the Last Day to Add	\$150.00
--	----------

Reinstatement Fee

Reinstatement Fee charged if classes are canceled AFTER Semester begins	\$150.00
---	----------

Proficiency or Competency Examination Fee

College of Engineering, Division of Continuing and International Education:

Examination Fee, per examination	\$25.00
Recording Fee for Competency Examinations, per examination	\$25.00
English Language Proficiency Test	\$50.00

Student Services

Camner Center for Academic Resources

<http://umarc.miami.edu/arc/Index.html>

Located on the second floor of the University Center, the Camner Center for Academic Resources offers free academic assistance to all UM students. The Camner Center offers individual peer tutoring by appointment in most subjects, study skills instruction with a Learning Specialist, free academic workshops, and many other valuable services. Please visit our website (<http://www.umarc.miami.edu>) or call 305-284-2800 to learn more and/or schedule an appointment.

Peer Tutoring

At the Camner Center, all UM students can take advantage of free individual peer tutoring to develop a deeper understanding of course work through additional, special, or corrective content instruction. All tutoring is course specific and taught by nationally certified peer tutors. All UM students are eligible for two hours of tutoring per week for each course. Please send us an email (tutoring.arc@miami.edu) for more information or to ask any questions.

Supplemental Instruction

Small group sessions are available to help students succeed in the University's toughest courses. Group Peer Tutoring is done on a weekly basis where students sit down to discuss course content in a small group setting with the peer tutor serving as a facilitator.

Academic Workshops

This free workshop series instructs students on specific academic skills and strategies to enhance academic performance. Workshop topics include effective test-taking strategies, improving study strategies, utilizing technology, and organization and time management skills. Topics are updated every semester, and students may attend unlimited sessions. Please visit our website (<http://www.umarc.miami.edu>) for the current workshop schedule.

Learning Specialists

The Camner Center for Academic Resources provides the support of trained Learning Specialists to students experiencing difficulty with academic issues. Students may request a one-on-one meeting with a Learning Specialist to help develop the skills needed to achieve success in their academic careers. Skills covered during these appointments include time management, effective note-taking, college textbook reading, educational technologies, test taking, and other learning strategies. Students can request an appointment with a Learning Specialist through our website. Visit the website (<http://www.umarc.miami.edu>) for more information about the support services available to students.

Independent Learning Initiative

The Independent Learning Initiative is a fee-based academic support program that provides structure, support, instruction, and monitoring for students needing additional guidance during the college experience. During the semester, students will identify and understand their academic strengths and areas for growth, as well as learn strategies, skills, and technologies to enhance their academic and personal success in college. Participants learn to monitor their academic progress and critically evaluate their current skills and strategies to work towards becoming a successful independent student. For more information about the program or to apply, please visit our website (<http://www.umarc.miami.edu>).

UMX 100: The University of Miami Experience

The University of Miami Experience (UMX 100) is a graded, comprehensive virtual self-paced course specifically designed to assist first year students in making a successful transition to the University of Miami. Freshman and transfer students are automatically enrolled. UMX 100 provides an opportunity for students to utilize UM resources necessary for success in college and beyond. Specifically, students will be exposed to campus leadership opportunities, academic and career planning, university traditions, study abroad opportunities, personal wellness programs, as well as advising and registration through videos, power points, blogs, and more. These resources and opportunities are only a click away. Send us an email (umx@miami.edu) if you have any questions about UMX 100.

The course will open on the following dates each semester:

Fall Semester	July 1st
Spring Semester	January 1st

Cane Cards

<http://pt.ref.miami.edu/other-services/cane-card/index.html>

The Cane Card is an on-campus student identification card. Students, faculty, and staff must present a government issued photo ID such as a driver's license or passport when acquiring their card. The Cane Card provides access to on-campus student residences, the Otto G. Richter Library, computer laboratories, the swimming pool, the Patti and Allan Herbert Wellness Center (for those who purchase a membership), and other facilities where access has been granted. The Cane Card is also used to control lending privileges at the library, access to athletic and other events (fee required), the purchase of discounted Metrorail tickets, U-Print services, and meal plan privileges. All University of Miami students, faculty and, staff are required to carry their Cane Cards for identification purposes while on campus.

- Lost or stolen Cane Cards should be reported to the Cane Card office at 305-284-3096 during the week or anytime by accessing your MyUM account, under the financial tab.
- Lost or stolen cards may also be reported to security 24 hours per day at 305-284-6666.
- After being reported stolen or lost, a card will be deactivated to prevent unauthorized use.
- Lost or stolen cards will be replaced for a \$25 fee (Fee waived in certain circumstances. Please contact the Cane Card office for additional details).
- Damaged cards will be replaced for free upon exchange of the original damaged card.
- For all issues with Cane Express accounts, call Student Account Services at 305-284-6430.

Career Services

<http://www.HireACane.com>

Patricia and Harold Toppel Career Center

(305) 284-5451 | toppel@miami.edu

The Toppel Career Center provides innovative and dynamic career services to students and alumni of the University of Miami. Furnished with the latest technology, including videoconferencing, 360-degree video recording, and lecture capture, the Center's six interview suites, a technology lab, a conference room, and a multipurpose Loft offer a variety of spaces (<http://hireacane.miami.edu/about/reserve-space>) for students to meet their career-related needs. The Center is often described as "like no other" by visitors and is a model for career services throughout the country. Over six times larger than the average career center, the 12,000 square-foot building on Ponce De Leon Boulevard houses career programs and workshops,

networking events, professional individualized advising, practice interviews, industry panels, walk-in peer advising, company presentations, on-campus interviews, and more.

Career Education

Regardless of the path you take, a comprehensive career planning process begins *as soon as you step on campus*. Professional staff at the Center assist students with their career development utilizing a three-part model (<http://hireacane.miami.edu/about>) that provides the tools necessary to Explore (strengths, interests, values, skills, and abilities), Prepare (career and industry research, practice interviews, and internships), and Connect (building meaningful relationships and growing a professional network).

Advising Services

Toppel offers a variety of options for career advising. You can set up an individual or small group advising with highly trained and motivated career peer advisors who have industry-specific knowledge and they can provide you guidance on potential career paths. You can drop by any time Monday through Friday, 9am - 4:30pm, no appointment necessary. The Center even offers online career assessments (<http://hireacane.miami.edu/explore/majors-careers>) that can help you narrow down career options by building self-awareness.

Programs and Workshops

A series of programs and workshops (<http://hireacane.miami.edu/events/education>) is offered throughout the academic year both in person and virtually. Each session provides information and skill-building activities in the areas of resume development, interviewing skills, social media for the job search, securing internships, and much more. In addition, programs designed to increase awareness of specific career paths and professional opportunities are offered. These are often conducted by outside speakers and panelists who are UM alumni and/or recognized specialists in their fields.

Career Preparation & Networking

Through the Center's vision, *Empowering and Connecting 'Canes to Achieve a Lifetime of Career Fulfillment*, the staff encourages students to develop meaningful relationships with professionals in their area(s) of interest. The Toppel Career Center provides many opportunities for you to network with employers and alumni, including panel programs, employer meet-ups, job shadowing (UShadow (<http://hireacane.miami.edu/explore/ushadow>)), on-campus recruiting, and career fairs.

Career Fairs and On-Campus Recruiting

Career Expo (<http://hireacane.miami.edu/events/fairs>) is the largest career fair, typically bringing in over 100 employers and 1,000 students and alumni biannually in September and February. Toppel also organizes smaller industry-specific career fairs that focus on more specialized areas. Representatives from a variety of industries from around the world visit campus to meet, interview, and discuss career opportunities with students. In addition, the On-Campus Recruiting (<http://hireacane.miami.edu/gain-experience/on-campus-recruiting>) program brings employers to campus for company information sessions and to interview students for jobs and internships in the interview suites. Last year, over 1,000 interviews were conducted in the Center's interview suites. You can apply for these positions through Toppel's free online career management system Handshake (<https://miami.joinhandshake.com>).

Career Crawls

Career Crawls (<http://hireacane.miami.edu/gain-experience/career-crawls>) are immersive trips that allow students to explore career paths in a specific industry. They take place in a variety of domestic and international cities, where students have the opportunity to connect with a specific city's University of Miami community through employer site visits and receptions with alumni.

Toppel Internship Program

The Toppel Internship Program (TIP) (<http://hireacane.miami.edu/gain-experience/tip>) is designed to provide valuable career-related work experience through internships with participating employers. TIP allows students to earn a one-credit transcript notation from the Toppel Career Center for internships they have already secured. Students can also search Handshake (<https://miami.joinhandshake.com>) for hundreds of opportunities available to them. Part-time internships require at least 160 working hours while full-time internships require at least 320 working hours.

UCAN

If you are interested in jobs and internships outside of South Florida, the Center is a member of the University Career Action Network (UCAN) (<http://ucan-csm.symplicity.com/students>), a highly selective consortium of private institutions across the country. Participating schools, including Brown, Duke, Emory, Princeton, Harvard, and others, share internship opportunities across the network. You will be strongly encouraged to complete at least one internship while here, and these partnerships will help you meet this goal.

The Launch Pad at Toppel

The Launch Pad at Toppel (<http://www.thelaunchpad.org>) provides support to all entrepreneurs and inventors at the University of Miami. The Launch Pad's programs are co-curricular and voluntary by design. Pragmatic, concrete, and experiential, they provide the just-in-time knowledge entrepreneurs need to assess and develop their ideas and plans for a new enterprise. The Launch Pad offers guidance, encouragement, and immediate access to a

dedicated local commercial network. It brings entrepreneurs into the local business community as early as possible. The Launch Pad's programs are exercises in experiential capitalism that fulfill a key educational obligation: to teach learners not just how to find a job, but also how to make a job.

Connecting with the Toppel Career Center

The Toppel Career Center's vision is to empower and connect all 'Canes to achieve a lifetime of career fulfillment. Currently, over 2/3 of all undergraduate students utilize the Center's services each year, including close to 1,500 unique visits to career fairs and nearly 4,000 unique visits to career education opportunities. Evidence shows that students who visit the Career Center are more likely to earn internships and ultimately have better career outcomes at the time of graduation. Visit us in person at 5225 Ponce De Leon Blvd., online at HireACane.com (<http://www.HireACane.com>), or by logging into Handshake (<https://miami.joinhandshake.com>) and activating your account as soon as you arrive on campus! You can also keep up with what we're doing by following any one of our social media platforms: LinkedIn (http://www.linkedin.com/groups?gid=1295647&trk=hb_side_g), Facebook (<http://www.facebook.com/pages/Toppel-Career-Center-at-the-University-of-Miami/70221785028?ref=ts>), Twitter (<http://www.twitter.com/toppel>), Instagram (<http://instagram.com/hireacane>), YouTube (<http://www.youtube.com/toppelcareercenter>), Flickr (<http://www.flickr.com/photos/hireacane>), WordPress (<http://toppelpeers.wordpress.com>), Pinterest (<http://pinterest.com/umtoppel>), and Snapchat (username: HireACane).

Commuter Student Involvement

orientation.studentaffairs.miami.edu

The Orientation and Commuter Student Involvement (OCSI) is located on the on the second floor of the Shalala Student Center, suite 203. OCSI offers a variety of services and programs for students from Miami-Dade and Broward Counties who live at home and commute to the University of Miami. For more information, please visit our website (<http://miami.edu/csi>).

Great Start Pre-Orientation Program for First-Year Commuter Students

Great Start is an overnight, pre-orientation program designed to promote and emphasize college adjustment and campus involvement opportunities. The program's goal is to help students feel like a part of the University and give them a chance to meet other commuter students. Students who participated in Great Start have said the program greatly contributed to a positive transition from high school to college. Commuter student leaders serve as Program Coordinators, Steering Committee members, and Counselors. Applications are available in the fall on the OCSI website (<http://miami.edu/greatstart>).

Commuter Assistant/Transfer Assistant Program

The Commuter Assistant (CA)/Transfer Assistant (TA) Program provides first-year commuter and incoming transfer students with an experience that mirrors the programs and services offered by Resident Assistants and First Year Fellows to first-year students living on-campus in a Residential College. All first-year commuter students and interested new transfer students will be assigned to a CA or TA group and will begin meeting with this group during New Student Orientation. The CA/TA serves as a mentor, plans programs that will aid commuter or transfer students in their transition to college, and works with the Department of Orientation and Commuter Student Involvement to plan, promote, and implement initiatives specifically focused on first-year commuter or incoming transfer students. CAs and TAs release informative newsletters to their student groups and also host a monthly breakfast called "Good Morning, Commuters!" for off-campus students. CAs and TAs are hired during the spring semester.

Association of Commuter Students

The Association of Commuter Students (ACS) is a second home for its members. ACS, a student organization, provides social support, service opportunities, school spirit involvement, and a physical space through which commuters bond with fellow students and to participate in all that the University has to offer. ACS provides its members with a working knowledge of UM that gives them the opportunity to become fully involved in campus life. Brought together by a simple fact of life, commuting to campus, ACS members have forged bonds that extend beyond this commonality. For more information on ACS, click here (<http://orientation.studentaffairs.miami.edu/commuter-students/association-of-commuter-students>).

Counseling Center

counseling.studentaffairs.miami.edu

The Counseling Center is the primary provider of mental health services for UM students. The Counseling Center provides short-term individual, couples, and group therapy as well as psycho-educational outreach programming and consultation. Urgent care and limited career and psychological assessment are also available. Psychiatric services are available to those under the care of a Counseling Center therapist. The Counseling Center staff consists of experienced professionals from the fields of mental health counseling, psychology, social work and psychiatry.

For hours of operation please click here (<http://counseling.studentaffairs.miami.edu/appointments/hours-of-operation>). For appointments, students can call the Counseling Center directly at 305-284-5511 or request an appointment in person. The Counseling Center offers walk-in triage service for students in crisis. The Counseling Center is located at 5513 Merrick Drive.

After normal business hours, students can talk to a licensed mental health professional by calling the main Counseling Center phone number at 305-284-5511. This number turns over into an after-hours hotline for students.

Sexual Assault Response Team (SART)

The Counseling Center also coordinates the **Sexual Assault Response Team (SART)**. SART is a 24/7 telephone response line to assist University of Miami students victims of sexual assault. This service is available during the academic year and is for both men and women. The SART hotline number is 305-798-6666.

For more information, visit the SART website (<https://miami.edu/SART>).

Graduate Student Training

The Counseling Center participates in the graduate training programs in the Department of Psychology and the programs of the Department of Educational and Psychological Studies. Doctoral students in psychology take part in the Center's professional activities and have first-hand contact with clinical problems. In addition, pre-doctoral interns obtain professional training at the Counseling Center through the Dr. Jess Spierer Pre-doctoral Internship in Professional Psychology. The pre-doctoral internship at the Counseling Center is accredited by the American Psychological Association.

Dean of Students

www.doso.studentaffairs.miami.edu

The Dean of Students Office provides leadership that is consistent with the University's mission and works closely with students and student organizations, contributing to their co-curricular education and serving as an advocate for their varied interests. The staff works directly with academic, athletic, student affairs, and other administrators in the coordination of institutional efforts to address specific concerns, as well as to enhance the overall quality of the student experience.

Each area within the Dean of Students Office provides students with opportunities for student support, involvement, and leadership. For more information about each of these areas, click the links below.

- Alcohol and Other Drug Education (<https://doso.studentaffairs.miami.edu/units/alcohol-and-other>)
- Greek Life (<https://doso.studentaffairs.miami.edu/units/greek-life>)
- Judicial Affairs (<https://doso.studentaffairs.miami.edu/units/judicial-affairs>)
 - Student Rights and Responsibilities Handbook (<http://www.miami.edu/srr>)
- Sexual Assault Resources - It's On Us (<http://itsonus.miami.edu>)
- Undergraduate Honor Council (<https://doso.studentaffairs.miami.edu/units/undergraduate-honor-council>)
- University Chaplains Association (<https://doso.studentaffairs.staging.miami.edu/units/chaplains-association>)
- Veteran Student Services (<https://doso.studentaffairs.staging.miami.edu/units/veterans-services>)

The Dean of Students Office coordinates efforts in response to various student crises and employs an Associate Dean who is a Licensed Clinical Social Worker. The staff is knowledgeable and prepared to assist all students in their adjustments to campus life. The administration and record keeping of all undergraduate student disciplinary infractions are also the responsibility of the Dean of Students Office.

To contact the Dean of Students Office call 305-284-5353 or visit the University Center, Suite 2250.

The Honor Council - Undergraduate

Honor Council protects the academic integrity of the University by encouraging consistent ethical behavior by students in their academic work. The Honor Council investigates and adjudicates alleged violations of the Undergraduate Student Honor Code (<http://www.miami.edu/honor-code>). The Council is responsible for educating the University community on Honor Code related issues and promoting academic integrity through a variety of educational programs. The Council consists of representatives from the undergraduate schools and colleges.

Members of the University community who would like to request Honor Council programming or an investigation of alleged academic dishonesty are encouraged to call the Honor Council at 305-284-5354 or email (honorcouncil@miami.edu).

Disability Services

<http://umarc.miami.edu/arc/Index.html>

Office of Disability Services (ODS)

The Office of Disability Services (ODS) is the primary university office responsible for the coordination of auxiliary aids and services for students with disabilities. Please visit our website (<http://www.umarc.miami.edu>) for more information.

The Office of Disability Services (ODS) provides academic accommodations and support to ensure that students with disabilities are able to access and participate in the opportunities available at the University of Miami. Individuals with disabilities must request academic accommodations through the Office of Disabilities Services. Accommodations are determined on a collaborative and case-by-case basis and are based on the documentation

provided by the individual. ODS staff will work collaboratively with students to determine what academic adjustments and educational auxiliary aids are reasonable to ensure that students with disabilities are not subject to discrimination.

Information is available to prospective and enrolled students, their parents and/or sponsors. The Office of Disability Services (ODS) is located in the Camner Center for Academic Resources in Whitten University Center N2400. ODS staff can be reached at 305-284-2374 (Voice) or 305-284-1999 (Fax). Office hours are 8:30 am to 5:00 pm, Monday through Friday. Individuals may email the office staff (disabilityservices@miami.edu) for quick responses to questions.

The following deadline dates apply for all requests for academic accommodations through the Office of Disabilities Services:

Fall Semester	June 1st
Spring Semester	December 1st
Summer Semester	6 weeks prior to first day of class

Grievance Procedure

The University of Miami, through the Office of Disability Services, has adopted a grievance procedure providing for prompt resolution of complaints by persons who believe they have been subjected to discrimination based upon their disability.

- All complaints must be directed to the University of Miami, Office of Disability Services, P.O. Box 249003, Coral Gables, Florida, 33124 and addressed to the Director of the Camner Center for Academic Resources.
- All complaints must be in writing and must contain the name and address of the complainant. In the grievance, the student or individual must set forth specific facts in support of his/her complaint. All grievances must be signed by the student or individual.
- All grievances must be filed within 90 days of the alleged discriminatory event. If the complaint involves the denial of a student's request for auxiliary aids and services or other modifications, the grievance must be filed within ten (10) days after the student receives notification that their request for auxiliary aids and services or other modifications has been denied. All additional documentation regarding your appeal must be submitted at the time of the individual's appeal request.
- The grievance will be reviewed and adjudicated by the Director of the Camner Center for Academic Resources, or her designee (the "Director"). In no event, will the designee be the same individual who made the initial determination as to the request for auxiliary aids, services, or other modifications or accommodations.
- An investigation, if deemed appropriate by the Director, will be conducted by the Director following receipt of the grievance. The Director may review information and documentation contained in a student's file and/or any other information an individual may submit in support of his/her grievance.
- Within twenty (20) days of the receipt of the grievance, the grieving party will receive a written decision from the Director.
- The decision of the Director of the Camner Center for Academic Resources shall be considered the final decision on the matter.

Retaliation against a person who files a grievance, or opposes a policy he/she believes to be discriminatory is prohibited.

Persons may contact the Assistant Director of Disability Services, who is responsible for coordinating the University of Miami's 504 compliance efforts at (305) 284- 2374 (P.O. Box 249003, Coral Gables, Florida, 33124), with any questions or concerns.

Individuals, who believe that they were subjected to discrimination on the basis of disability by the University of Miami, are encouraged to use the grievance procedure to resolve their concerns. Individuals may file a complaint directly with the U.S. Department of Education, Office for Civil Rights, at 61 Forsyth St., Southwest, Suite 19T10 Atlanta, GA 30303. To file a complaint with the State of Florida, contact the Commission for Independent Education 325 W. Gaines Street, Suite 1414, Tallahassee, FL. 32399-0400.

International Student and Scholar Services (ISSS)

www.miami.edu/issss

ISSS represents the needs and interests of the University of Miami international community and provides support services and programs for international students, scholars, and academic departments at UM. Every year, approximately 3,600 international students (undergraduate and graduate) and scholars (professors and researchers) from 120 countries representing every region of the world study, teach, and conduct research at the University of Miami.

International students and scholars face some unique challenges as well as opportunities while pursuing their academic goals at UM. The professional and dedicated ISSS staff provides expert advice, information, services, acclimation and culturally relevant activities aimed at supporting their educational endeavors, enriching their U.S. experience, and ensuring their success over the entire course of their stay. ISSS support services and programs encompass:

- **Pre-Arrival Information**
- **Immigration Advising for Students and Scholars in F-1 and J-1 Status**
- **Employment Information and Authorization**

- **Online Tax Return Preparation System**
- **Liaison with Sponsoring Embassies, Government and Agencies**
- **The International Student Grant**
- **Short-Term, Small Emergency Loans**
- **Assistance with Personal and Adjustment Problems**
- **Assistance in Coping with Crises**
- **Advocacy**
- **International Student Orientation**
- **International Scholar Orientation**
- **Advise the Council of International Students and Organizations (COISO)**

On the ISSS website you will find detailed information regarding each of these services and programs. Please do not hesitate to contact us should you have any questions or require additional information. We look forward to assisting you.

Ombudsperson and University Troubleshooters

www.ombuds.studentaffairs.miami.edu

The Ombudspersons and University Troubleshooters provide open channels of communication between students and the university by listening to student concerns, investigating the facts and attempting to resolve situations in the best possible way. Ultimately, the goal is to resolve matters and assist students in their success at the University. The Ombudspersons and University Troubleshooters do not bypass or circumvent those individuals who have responsibility for departments or classroom instruction. Nor will they eliminate certain structured grievance and appellate mechanisms already established by the University.

Ombudsperson

An Ombudsperson interprets University policy for students and make recommendations to the central administration when policy changes are needed. The University of Miami has two Ombudspersons for students. The Academic Ombudsperson works most closely with issues with faculty, coursework, grade appeals, etc. The Administrative Ombudsperson works most closely with administrative issues such as financial registration, access concerns, and university polices and procedures. Ombudspersons connect students to faculty and administrators who will listen, answer questions, interpret policies/procedures and provide guidance on the appropriate steps to consider for a resolution. The Ombudspersons seek to resolve matters informally before they become matters in a formal grievance-appeal proceeding and works with students in establishing next steps to assist in their success at the University. However, if a formal grievance-appeal is most appropriate, they can provide guidance on the process.

University Troubleshooters

University Troubleshooters are faculty members and administrators who serve as a resource for students seeking assistance. They represent in a wide range of campus departments, who assist students with academic and administrative related matters. If a student has spoken to the appropriate University Troubleshooter and have not brought resolution to a student's concern, students should contact the Ombudsperson. For a listing of University Troubleshooters, click on the following links: Academic Troubleshooters (<https://ombuds.studentaffairs.miami.edu/who-can-help/academic-troubleshooters>) or Administrative Troubleshooters (<https://ombuds.studentaffairs.miami.edu/who-can-help/administrative-troubleshooters>).

For more information, visit [miami.edu/ombudsperson](http://www.miami.edu/ombudsperson) (<http://www.miami.edu/ombudsperson>), call 305-284-4922, email ombudsperson@miami.edu or visit Ashe Building 244.

Student Health Service

<https://studenthealth.studentaffairs.miami.edu/>

The Student Health Service provides primary care, specialty care and pharmacy services to eligible (http://www.miami.edu/sa/index.php/student_health_center/general_information/#Eligibility) University of Miami students. You are not required to have the Health Center sponsored insurance plan to utilize our services. Appointments can be scheduled at mystudenthealth.miami.edu (<https://caneid.miami.edu/cas/login?service=https://mystudenthealth.miami.edu>), services are also available on a "drop in" basis.

Contact Information

Telephone: 305-284-9100

Fax: 305-284-4098

Hours of Operation

Fall and Spring semesters: 8:30 a.m. to 5:00 p.m., Mondays, Tuesdays, Wednesdays, and Fridays. On Thursdays: 9:00 a.m. to 5:00 p.m. Sundays: 11:00 a.m. to 4:00 p.m.

Winter break, Spring break, and Summer sessions: Monday through Friday from 8:30 a.m. to 5:00 p.m.

The Health Service is closed on Saturdays and University holidays. After hours assistance is available by calling 305-284-9100.

For sudden, severe illness or serious accident dial 911. For illnesses or injuries requiring immediate attention, students are urged to go to an Emergency Room. After hours assistance for urgent situations can be obtained by dialing 305-284-9100. Students with United Healthcare insurance may also contact the United Healthcare Nurseline by calling 800-436-7709 and selecting the Health Resources option. For less urgent conditions, you may visit one of the local Urgent Care Centers (https://studenthealth.studentaffairs.miami.edu/_assets/pdf/urgent-care-centers.pdf).

Eligibility/Access

The Health & Counseling Centers Fee, is mandatory for students regardless of credit hour load and all students registered in an off-campus program who are enrolled in the University sponsored student insurance plan (<https://studenthealth.studentaffairs.miami.edu/insurance-information/domestic-students>).

Employees may be charged the Health and Counseling Centers fee on their initial bill, however the charge will be removed from their bill soon after the last day to drop or add a class, if they remain eligible for tuition remission benefits. Dependent of UM employees are treated the same as all other students..

Health Insurance

Domestic students enrolled in six or more credit hours per semester (or considered full time) are required to obtain adequate health insurance (see exceptions (<https://studenthealth.studentaffairs.miami.edu>)). The annual premium for the health insurance plan offered through the University is added to each student's fees. Domestic students with adequate alternative coverage may request cancellation of the insurance fee via CaneLink. Insurance cancellation must be renewed each year via the United HealthCare

(UHCSR) [waiver portal](https://urldefense.proofpoint.com/v2/url?u=https-3A__studentcenter.uhcsr.com_&d=DwMGaQ&c=y2w-uYmhgFWijp_IQN0DhA&r=LxZr5vQ1AW1tJhe48NNcoMkwDx3MH1b2w2xh2mA8fo0YTWvT-6KkgmgR5TvU6jg8&m=_QrEeY5VrtZJWrrjc_BpDyE0aXHbv_87sQDdE) (https://urldefense.proofpoint.com/v2/url?u=https-3A__studentcenter.uhcsr.com_&d=DwMGaQ&c=y2w-uYmhgFWijp_IQN0DhA&r=LxZr5vQ1AW1tJhe48NNcoMkwDx3MH1b2w2xh2mA8fo0YTWvT-6KkgmgR5TvU6jg8&m=_QrEeY5VrtZJWrrjc_BpDyE0aXHbv_87sQDdE)

You or your designee will need your student ID (C#), date of birth, and insurance information in order to submit a waiver request. You will receive a waiver approval or denial (if we are unable to confirm insurance coverage) from waiverstatus@uhcsr.com within 5 business days of waiver submission..

Deadlines to waive the insurance are:

- July 25 for the Fall semester
- January 25 for the Spring semester
- April 25 for Summer I
- June 25 for Summer II

Domestic students can check the status of their insurance waiver/cancellation request via CaneLink. The insurance premium will be prorated for those students entering for the first time in the Spring or Summer semesters. No waiver and/or refund will be granted after the above dates.

Students who have previously waived the insurance charge can reinstate the insurance prior to the Spring semester or first Summer session by completing the reinstatement request form and checklist. Coverage can also be reinitiated at the start of the Fall semester by choosing **not** to re-waive the charge, or at other times during the academic year, if within 30 days of termination of other similar coverage, by completing the reinstatement request form and checklist (<https://studenthealth.studentaffairs.miami.edu/insurance-information/domestic-students>). Documentation of termination may be requested.

Deadline for reinstatement of insurance is January 25th for the Spring semester. Please do not consider your reinstatement complete until reinstatement has been verified via CaneLink, i.e. the charge has been posted to your student account and all charges on your account have been paid.

All international students are required to enroll in the University sponsored health insurance program. The annual premium for this coverage is added to each student's fees.

Any additional questions regarding the health insurance requirement should be directed to the Student Health Service at 305-284-9100 or to studenthealth@miami.edu.

Immunization

All students are required to provide proof of immunization against measles, mumps and rubella; and tetanus, diphtheria and pertussis. All new students must also provide proof of immunization against hepatitis B (<https://studenthealth.studentaffairs.miami.edu/immunization-information/required-immunization>) and meningococcal meningitis (<https://studenthealth.studentaffairs.miami.edu/immunization-information/required-immunization>) **or** sign a waiver declining these immunizations. An immunization (<https://studenthealth.studentaffairs.miami.edu/immunization-information/required-immunization>) form must be completed and returned to the Student Health Service prior to arrival on campus. For students less than 18 years old, the meningitis/hepatitis vaccine waivers must be signed by a parent or legal guardian.

All international students must also be screened for tuberculosis by completing page two of the immunization form (<https://studenthealth.studentaffairs.miami.edu/immunization-information/required-immunization>).

Deadlines for submission of immunization records are Fall - August 22nd, Spring - January 15th, Summer - April 15th. Failure to comply with this requirement will interfere with registration. Immunization information must be entered at mystudenthealth.miami.edu (<https://mystudenthealth.miami.edu>) prior to faxing or mailing the form to the Student Health Service for verification. Immunization compliance can also be verified at mystudenthealth.miami.edu (<https://mystudenthealth.miami.edu>). Instructions on the use of mystudenthealth.miami.edu (<https://mystudenthealth.miami.edu>) is available at [miami.edu/student-health](http://www.miami.edu/student-health) (<http://www.miami.edu/student-health>).

Most students will be able to obtain the required immunization information from their prior medical providers or from their prior high school, college or university. Students who believe that they were previously immunized but are unable to provide proof of immunization may either obtain blood tests confirming immunity or obtain the necessary immunizations. Immunizations and blood tests documenting immunity are available at the Student Health Service. All charges are in addition to processing fees for late forms.

Immunization against varicella (chicken pox) is suggested and is available at the Student Health Service for a reasonable charge.

Pharmacy

Students with the Health Service sponsored insurance plan receive enhanced benefits if prescriptions are filled at the Walgreens pharmacy located on the first floor of the Lennar Medical Center.

Lennar Walgreens Pharmacy

Hours: Monday – Friday 9:00 am – 6:00 pm

Phone: 305-351-0606

Fax: 305-351-0608

Study Abroad

Dept. Code: SAP

Opportunities for study abroad may be available for some graduate degree programs during the summer, fall, spring and intersession terms.

Students may participate in programs led by faculty members or may participate in semester exchange program options offered by the MAIA program.

For further information contact:

Office of Study Abroad
PO Box 248263
Coral Gables, FL 33124-1610
305-284-3434
e-mail: studyabroad@miami.edu

In some programs it is possible to earn graduate credit hours for study taken abroad. The curriculum must be worked out by the student in conjunction with an advisor.

Undergraduate Housing and Residence Life

hrl.studentaffairs.miami.edu

Housing and Residential Life

The University of Miami offers undergraduate on-campus housing in five residential colleges and University Village.

Each residential college has residential faculty members, an Area Director/Assistant Area Director, and student staff who all live in the residential college with the resident students to support and promote student well-being, safety, academic achievement, student learning, and development. Numerous social, educational, cultural, and recreational programs are offered throughout the academic year.

General Highlights

- The University has both single and double rooms. Singles are limited and assigned based on seniority living on campus and, thus, entering students are typically assigned to double occupancy rooms.
- All non-local freshmen students are required to live in University housing for two academic semesters, as long as space is available. This policy does not apply to freshmen students living with parents or legal guardians in Miami-Dade or Broward Counties. Non-local freshman must complete the Live-On Requirement exemption Request Form in order to be exempt from this requirement.
- University Village, an apartment-style residential community, is an available option to juniors and seniors, who have completed 60 or more credit hours. The apartments are fully furnished and include in-apartment washers and dryers, full-size kitchen appliances (stove, refrigerator, microwave, & dishwasher), and reserved parking (extra fee).
- All housing facilities are co-educational with men and women living on alternate floors or alternating separate suites or apartments. Gender inclusive housing is available upon request.

Applying for On-Campus Housing

- Admitted undergraduate students, following verification of acceptance to the University and payment of the enrollment deposit, can apply for housing via CaneLink (<http://www.canelink.miami.edu>).
- Students are encouraged to apply for housing as soon as possible after paying the enrollment deposit. New freshmen housing applications should be submitted by May 1; applications received from new freshmen after May 1 will be accommodated on a space available basis.
- The \$500 pre-payment is paid by credit card at the time of application.
- Assignments to buildings, rooms, and specific roommates are made according to the date of application, receipt of the housing prepayment, and overall availability.
- Whenever possible, requests for roommates are honored. However, if specific preferences are not available, the University reserves the right to assign students to other roommates.

The housing agreement is for the entire academic year (both fall and spring semesters), unless the applicant is:

1. applying only for spring semester housing
2. applying only for one of the offered summer housing sessions

3. graduating in December (must notify HRL directly)
4. participating in a University of Miami study abroad experience spring semester (must notify HRL directly)
5. not enrolling in the University spring semester (must notify HRL directly)

Housing cancellations received through May 31 will result in a \$500 cancellation penalty. Cancellations received after May 31 will result in:

- the canceling student being responsible for the fall semester housing charges, unless or until the vacancy created by the cancellation can be filled by another qualifying University student applying for housing
- if filled, the canceling student will only be assessed the \$500 cancellation penalty

Housing cancellations for the spring semester received through December 1 will result in a \$500 cancellation penalty. Cancellations for the spring semester received after December 1 will result in:

- the canceling student being responsible for the spring semester housing charges, unless or until the vacancy created by the cancellation can be filled by another qualifying University student applying for housing
- if filled, the canceling student will only be assessed the \$500 cancellation penalty for early termination

Note: Written notice of cancellations must be made to the Department of Housing and Residential Life office directly.

Dates of Housing Availability

Fall Semester	August 14, 2018 - December 13, 2018
Spring Semester	January 9, 2019 - May 10, 2019

Off-Campus Housing Resources

The Department of Housing and Residential Life also provides assistance to students, staff, and faculty with identifying off-campus housing options, including a web-based search engine of community listings.

For more information about housing on-campus or assistance with off-campus housing, please visit our website (<http://hrl.studentaffairs.miami.edu>), call 305-284-4505, or email (housing@miami.edu).

University Dining Services

To read more about the University of Miami Dining Services program visit our website link below.

University of Miami Dining Service (<http://business-services.miami.edu/departments/auxiliary-services/dining-services>)

Veterans

Veterans' Benefits

The University of Miami maintains a Veterans' Affairs (V.A.) Office in the:

Office of the University Registrar
1306 Stanford Drive
Whitten University Center, Room 1230
Coral Gables, FL 33146

Mailing Address:
P.O. Box 248026
Coral Gables, Florida 33124-6914

This office assists veterans and dependents of veterans who are entitled to V.A. educational benefits under Chapter 30, 31, 33, or Chapter 35 of Title 38, U.S. Code, or Chapter 1606. The University of Miami participates in the Yellow Ribbon Program for qualified Chapter 33 recipients.¹ Anyone needing information on Veterans' Benefits is advised to contact the Office of the University Registrar or visit their website (<https://registrar.miami.edu/forms-and-services/veterans-affairs>).

V.A. students with previous post-secondary educational training/experience must request an official transcript(s) be sent to the university. If the transcript has not been received prior to the end of the student's initial semester, or as specified in the guidelines under the program he/she is enrolled in, the Veterans' Affairs Office will not re-certify the student for V.A. educational benefits. The Veterans' Affairs Office may re-certify the student after the transcript has been received.

The V.A. student's previous training and/or experience will be evaluated by the university. Should credit(s) be accepted and/or awarded, the V.A. student's tuition and training time may be reduced proportionally. The V.A. and the student will receive a written notice of the credit(s) allowed.

¹ The University of Miami's Yellow Ribbon Program is available to students in the Fall and Spring semesters only.

Standards of Progress Policy for Veterans

Satisfactory progress is indicated by a Satisfactory Progress Average (SPA), which is a variation of the Quality Point Average (QPA). The SPA is computed by the following formula:

A	4
B	3
C	2
D	1
E	0
IE	0
F	0
IF	0
NG	0

- Note that "E's", "F's", "IE's" and "IF's" are included in the SPA.
- A grade of CR will be counted as CR=2.
- The SPA is determined by dividing the total quality points earned by the credits attempted.

When a course is dropped with a grade of "W", the V.A. requires a student to repay any benefits received for that course unless the V.A. determines there are mitigating circumstances involved.

Benefits will not be paid for courses in which a student receives an NG or NC or IPs that do not convert to a letter grade.

- An SPA of 2.0 or greater for undergraduate students, or 3.0 or greater for graduate students, is satisfactory progress.
- Less than 2.0 for undergraduate, and less than 3.0 for graduate students, is not satisfactory.
- Law and M.D. students will be considered to be making satisfactory progress as long as they meet the academic standards set by their schools for retention in their degree programs.
- The SPA is non-cumulative. It is computed each term on a one-term basis.
- Any term a student's SPA is less than 2.0 for undergraduate or 3.0 for graduate, he/she will be notified that he/she is not making satisfactory progress. He/she will be certified, in a probationary status, for only one additional semester.
- If, at the end of this additional semester, his/her SPA for that semester is still below the satisfactory level, the V.A. will be notified of the unsatisfactory progress and his/her educational benefits will be terminated.
- A student whose V.A. educational benefits have been terminated for unsatisfactory progress may petition the Veterans' Affairs Office to be re-certified after one semester has elapsed. Please address your request to:

VA Certifying Official
c/o Office of the University Registrar
University of Miami
P.O. Box 248026
Coral Gables Florida 33124-6914

- The Veterans' Affairs Office may re-certify the student for V.A. educational benefits only if there is a reasonable likelihood that the student will be able to attain and maintain satisfactory progress for the remainder of the program.

For V.A. Payment of Benefits Purposes

All V.A. Students are required to notify the V.A. Certifying Official, every semester, in writing, their intent to use their benefits, and therefore to be certified for that semester.

- An "I" (incomplete) designation for a course must be converted to a credit grade counting toward graduation, or a failing grade, by the end of **one calendar year** unless permission for a delay is granted by the Academic Dean.
- An "NG" (no grade) designation for a course must be converted to a credit grade counting toward graduation, or a failing grade, by the end of **one regular semester** unless permission for a delay is granted by the Academic Dean.
- If permission is obtained, a memo signed by the Academic Dean must be given to the Veterans' Affairs Office during the semester in which the "I" or "NG" was to be removed. This memo should also state the period of time for which the delay is approved.

- If a memo giving permission for a delay in the “I” or “NG” removal is not received by the end of the semester in which the “I” or “NG” was to be removed, the V.A. will be notified of the incomplete grade resulting in a loss of educational benefits for that course.

Please consult with our office regarding regulations for “IP’s” received in Thesis, Research, or Dissertation.

There is an official period after each registration in which a student may drop a course without a “W” appearing on his/her grade report. This period is not to be confused with the last date to drop a course with a “W” grade. Please check the academic calendar on the University (<http://www.miami.edu/registrar>) Registrar’s website (<http://www.miami.edu/index.php/registrar/calendar>) for dates.

Class Attendance and Absences

- Regular and punctual class attendance is vital for all students.
- It is the student’s responsibility to know the instructor’s policies regarding examinations, penalties for absences, and late or missed work.
- A copy of the student’s transcript will be placed in the student’s permanent file maintained by the Veterans’ Affairs Office.

Because of the far-reaching effects of these revisions in the V.A. educational benefits program, it is suggested that you exercise care and judgment in your program planning and in the selection of your courses. V.A. educational benefits will only pay for courses that are toward the program in which you are enrolled.

Veterans and children of deceased or totally disabled veterans receive training allowance in proportion to the schedule carried. The full load required to receive full training allowance is 12 credits in undergraduate school (9 credits in Graduate School).

Undergraduate Policies and Procedures

While the University makes every effort to provide academic counseling to its students, its basic policy places the responsibility for planning an academic program upon the student.

The University of Miami relies on electronic means, e.g. email, CaneLink, university-specific app (*scheduled to launch in the 2018-2019 academic year*), for correspondence with students. Students are required to maintain a working email address and are expected to update their personal biographical information annually via their CaneLink account. Students who fail to maintain a working email account may not receive critical university information.

Students are expected to familiarize themselves with the requirements of:

- the University,
- the schools in which they are enrolled, and
- their major department.

Requirements refer to those stated in the Bulletin at the time of admission to degree status, unless a student has not been continuously enrolled. In such cases, the Bulletin in effect at the time of re-admission is the one to be used. Under special circumstances, a student may appeal the bulletin decision. In such cases, the determination of the Bulletin in effect is made by the readmitting School or College.

Academic core requirements will not be waived for students under any circumstances.

The work of each student is under the supervision of an academic Dean and of the appropriate Scholarship Committee. A student who fails to maintain an adequate academic record may be dismissed from the University.

Admission of a student to the University of Miami for any semester does not imply that such student will be re-enrolled in any succeeding academic semesters. If a student whose record is unsatisfactory is for some reason permitted to continue in attendance, the appropriate scholarship committee or Dean may specify the standard that must be attained, and any other conditions to be met.

A student who graduates and plans to enter a graduate school or professional school at the University of Miami must apply for admission to the appropriate school of the University in accordance with application deadlines of respective schools.

Not all the regulations and procedures described above pertain to the Graduate School, the Law School, and the School of Medicine. The specific regulations of these schools are stated in their respective Bulletins.

Admission

The University of Miami is a member of the National Association for College Admission Counseling and subscribes to its Statement of Principles of Good Practice.

Advanced Placement/Credit

The University allows students to receive college credit hour toward graduation from the following programs: Advanced Placement, International Baccalaureate, Dual Enrollment, and College Level Examination Program. To have Advanced Placement, International Baccalaureate, or College

Level Examination Program credit hours evaluated, the student must submit an official test result report to the Office of Undergraduate Admission. The University of Miami does not give credit hour for CLEP Foreign Language and General Examinations. Students taking Dual Enrollment courses (college courses taken while still in high school) must submit an official college transcript for review of potential transfer credit hour. Please refer to the transfer student section for requirements to transfer college coursework.

A student must submit official AP, IB, Dual Enrollment transcripts or CLEP results no later than the end of the first semester of enrollment for review. Documents submitted after this time period will not be reviewed and credit hour will not be awarded.

The University will accept no more than 60 credit hours from these programs to count toward the 120 credit hours required for graduation.

Early Admission

A limited number of carefully selected students who are currently enrolled in high school and who have completed three years of study may be admitted to the University as freshmen. Early admission applicants typically have a very strong academic background and demonstrate a mature character.

Students who wish to apply under Early Admission must have the support of his/her parents, guidance counselor, and high school. Early applicants must also schedule an interview with the Office of Undergraduate Admission.

Early Admission applicants must submit official high school transcripts, SAT or ACT examination results, and all other supporting documents required to complete the application as part of the admission process.

Early Admission applicants will be notified of an admission decision by June 1 or after receipt of grades from the final high school year completed.

Since every applicant must be appraised individually, no general qualifications can be listed. Students interested in early admission may send inquiries and requests for applications to the Office of Undergraduate Admission.

Freshman Admission

The Admission Committee reviews applications and bases admission decisions on the following factors:

- **The Secondary School Record.** The applicant must be in the process of completing graduation requirements at a regionally accredited secondary school or must be a graduate of an accredited secondary school. The applicant must have successfully completed a solid college preparatory program including English, Mathematics, natural sciences, social sciences and foreign language.
- **Standardized Tests.** Applicants attending schools in the United States must submit official SAT or ACT results. The results of these tests, together with the secondary school record, provide a better measure of the ability of a candidate to perform college level work successfully than can be obtained by either measure alone. Applicants graduating from a secondary school outside of the United States **should not** submit SAT or ACT results.
- **The Counselor's Evaluation Form.** This form is to be completed by the applicant's secondary school counselor and includes rank in class, test score information, and an evaluation of potential for academic success in the student's area of interest.
- **The Essay.** Since each applicant is considered individually, the Essay provides the opportunity to present information that may assist the Admission Committee as it evaluates the application for admission.

See admission procedures for freshmen (http://www.miami.edu/admission/index.php/undergraduate_admission/apply/freshman/freshman_application_instructions).

GED Scores

Submitting GED Scores

An applicant may apply to the University upon completion of the GED in lieu of completing high school. When applying with the GED, the applicant must submit official high school transcripts up to the time of withdrawal, as well as the official GED score report and diploma.

Applicants submitting the GED must achieve the following scores to be considered for admission. These scores should be considered a guideline and do not guarantee admission to the applicant.

For exams taken in English:

A score of 175 or higher should be obtained on all four subject test.

For exams taken in any language other than English:

A score of 175 or higher should be obtained on all four subject test.

It is strongly suggested that applicants submitting the GED in any language other than English also submit a TOEFL score.

Non-Degree Enrollment

Adult Student Access Program (A.S.A.P.)

For information and policies regarding enrollment for classes in a Non-Degree seeking status, please visit this page: (p. 555)

For more information, please contact:

The Adult Student Access Program
Division of Continuing Studies
University of Miami
Coral Gables, FL 33124-1610
305-284-4000

Transfer Admission

Transfer admission may be granted in most fields of study to students who have earned credit hours from other regionally accredited colleges or universities. Courses completed with **passing grades of C or higher** at other colleges and universities and acceptable for academic credit hours by the University of Miami, will be verified, and where appropriate, will be translated into University of Miami equivalents by the Office of Undergraduate Admission. However, the Dean of the College or School within the University from which the student plans to graduate determines which transferred courses may be counted toward meeting graduation requirements of that College or School.

Transfer of Credit Hours to UM

Work taken at other institutions will appear on the University of Miami transcript in separate entries as:

1. The total number of transferable credit hours attempted and quality points earned, regardless of grades, and
2. The total credit hours transferred, which shall be the total credit hours for which a grade of C or higher was earned.

*Note: Only the transfer totals earned are added to the University of Miami totals. Total credit hours attempted and quality points earned elsewhere are **not included** in the University of Miami totals.*

The University does not accept transfer credit hours for courses in which a grade of C- and below (or the equivalent grade) was earned. However, grades of C-, D, and F are used to calculate the transfer admission grade point average.

Credit hours are not transferred from institutions not accredited by the appropriate regional accrediting association. Limited exceptions may be made with the approval of the Dean in the College or School of the student's major. Credit hours transferred from institutions not in existence long enough to attain regional accreditation must be validated by the attainment of a C average or better in the first 12 credit hours of course work taken at the University of Miami.

The University does not have a coursework forgiveness policy. The grades of any repeated courses will be averaged.

A student may not repeat a course in which a grade of C or higher has been earned. This is considered an illegal repeat.

Upper division course requirements (300 level or above) at the University may not be satisfied with community college courses.

After being offered admission and enrolling, a student must submit any final college transcripts with grades, AP, IB, AICE or CLEP examination scores for review by the end of the first semester of enrollment. Any documents listed above which are submitted after this time period will not be reviewed and credit hours will not be awarded.

Required Credit Hours in Residence at the University of Miami

A student transferring credit hours from a 2-year community or junior college (this being the last school attended) must complete a minimum of **56 credit hours in residence** at the University of Miami to earn an undergraduate degree.

A student transferring credit hours from a 4-year college or university (this being the last school attended) must complete a minimum of **45 credit hours in residence** at the University of Miami to earn an undergraduate degree.

At least **half of the credit hours** required for the chosen Major or Minor must be completed at the University of Miami.

See Admission procedures for transfer students (http://www.miami.edu/admission/index.php/undergraduate_admission/apply/transfer_applicants/transfer_application_instructions).

Undergraduate International Admission

ELIGIBILITY FOR ADMISSION (http://www.miami.edu/admission/index.php/undergraduate_admission/apply/international_applicants/eligibility_requirements_by_country)

Admission Procedures for International Students

Educational Documents

Diplomas, Certificates

Copies should be enclosed with the application. Students from countries following the British educational system must submit certified photocopies, or ask the examinations council to mail confidential results to the University of Miami. Reports of scores in school-leaving examinations (e.g., Baccalaureate) must also be submitted.

Transcripts, Statements of Marks

A transcript must contain the following information: subjects studied; marks (grades) awarded; length of class periods; number of periods per week for each subject; and grading scale with minimum passing mark. Year-by-year records of marks should be sent to the University of Miami directly from U.S. institutions. Certified records from foreign institutions may be submitted by applicants, but the University may sometimes insist that such transcripts be sent directly to the University of Miami from the issuing institutions. All secondary and tertiary transcripts must be submitted.

English Translations

Documents in a language other than English must be accompanied by certified English translations. Notarized translations will not be accepted. Translations supplement but do not replace original documents. Please remember to send both.

Syllabus of university study (description of each course or subject studied accompanied by certified English translations. Notarized translations will not be accepted).

A current (within the past six months) bank or government sponsorship letter guaranteeing payment for tuition and fees, books, room and board, medical insurance and personal expenses for one calendar year (two semesters and two summer sessions) is required.

Examinations for International Students

All international students whose native language is not English, including those applying for transfer from U.S. institutions, are required to submit the results of the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). The TOEFL code for the University of Miami is 5815.

The SAT score report is **not required and should not be submitted for admission consideration** from applicants who are attending schools outside the United States. Applicants should only submit an SAT score report if they qualify for merit scholarship consideration.

Please see the TOEFL Score Requirements (http://www.miami.edu/admission/index.php/undergraduate_admission/apply/international_applicants/toefl_or_other_english_proficiency_requirements).

Conditional admission: Academically qualified applicants who are unable to take the TOEFL, or who have scored less than the required minimum, may be offered admission to undergraduate programs with the condition that they successfully complete level five of the University of Miami Intensive English Program or obtain a 550 TOEFL and higher. University of Miami TOEFL code number is 5815, and the IELTS code number is 4861.

Institutional TOEFL scores are designed for academic placement use at the University of Miami. Those needing TOEFL for admission to the University of Miami or for use elsewhere should take the TOEFL iBT instead. Visit www.ets.org/toefl/ (<http://www.ets.org/toefl/>) for more information about the TOEFL iBT.

Please see the IELTS Score Requirements (http://www.miami.edu/admission/index.php/undergraduate_admission/apply/international_applicants/toefl_or_other_english_proficiency_requirements).

IELTS is the International English Language Testing System. It measures ability to communicate in English across all four language skills – listening, reading, writing and speaking – for people who intend to study or work where English is the language of communication.

IELTS Course ID (codes): Undergraduate Admission – 4861; Graduate Admission – 4862. For more information, visit http://bandscore.ielts.org/course_info.aspx?OrgId=3187.

Programs of Study

International students are eligible to apply for all programs offered at the University of Miami. It should be noted that medicine and law are studied at the graduate level in the United States, and it is therefore inappropriate for undergraduate international applicants to request these programs.

Financial Information

The University of Miami has no financial assistance for international students other than academic scholarships. International students must provide funds for all of their expenses during the entire period of study, including travel and vacations. Students who would not be able to cover their expenses are best advised not to apply for admission.

General Education Requirements

Philosophy

The University of Miami's General Education Requirements ensure that graduates have acquired essential intellectual skills and have engaged in a range of academic disciplines. The General Education Requirements provide students with the opportunity to study methods and achievements in all areas of human inquiry and creative endeavor and to cultivate abilities essential for the acquisition of knowledge. The General Education Requirements allow students to create an integrative map for their academic careers, providing a context for more focused studies.

As an institution of higher learning in an increasingly diverse and global community, our goals are to produce graduates who have been exposed to a broad spectrum of educational opportunities and to prepare them for successful participation in the world. The University's General Education Requirements consist of coursework taken before, within, and in addition to students' specialized study in their areas of concentration. The aims of the General Education Requirements are designed to ensure that graduates of the University will have acquired essential intellectual skills and exposure to a range of intellectual perspectives and academic disciplines. Whereas the requirements of majors specified by schools and colleges within the University emphasize depth of learning, the General Education Requirements stress breadth of knowledge and the cultivation of intellectual abilities essential for the acquisition of knowledge.

Areas of Proficiency

The Areas of Proficiency requirements ensure that students either already possess, or develop at the University, the ability to express themselves effectively, to use quantitative skills with facility, and to reason cogently.

English Composition

Effective writing skills advance ideas efficiently and persuasively, so the expectation is that students become adept at using writing as an effective communication tool. Students fulfill this requirement by satisfactorily completing ENG 105 together with ENG 106 or ENG 107, or the equivalent. Appropriate Advanced Placement (AP) or International Baccalaureate (IB) scores in English composition may be used to satisfy this requirement. An appropriate score on the SAT or ACT examination may earn a student exemption from, but not credit for, ENG 105.

Students will be able to:

- Gather information, synthesize data, compare various points of view, and present results in writing.
- Develop the ability to read texts critically and to use textual evidence to support a sophisticated written argument.
- Consider audience, tone, organization, and standard conventions in relation to specific rhetorical tasks

Effective Fall 2017, new students without prior college credit in English Composition will be placed as follows:

- ENG 103: ACT English score below 18 or SAT Evidence-Based Reading and Writing or Critical Reading score below 430, or TOEFL iBT Writing score below 18.
- ENG 105: ACT English score 18-31 or SAT Evidence-Based Reading and Writing or Critical Reading score 430-690, or TOEFL iBT Writing score 18 or above.
- ENG 106 or ENG 107: ACT English score 32 or above or SAT Evidence-Based Reading and Writing or Critical Reading score 700 or above

All requirements for the English Composition General Education Requirements must be completed prior to attaining junior year classification.

Quantitative Skills

In a world increasingly influenced by science and technology, it is important for students to acquire the capacity to understand and use essential quantitative skills. The Quantitative Skills requirement helps students learn to use quantitative skills and tools to solve problems, including the interpretation, manipulation, and application of quantitative data. Students fulfill this requirement by completing either a Department of Mathematics course numbered MTH 108 or higher or a quantitative skills course approved by the student's college/school and the University Curriculum Committee in consultation with appropriate academic units.¹

Students may be able to fulfill this requirement through credit earned through the following tests: AP, IB, A-Level, and Cambridge Pre-U. The University has an equivalency chart (<http://admissions.miami.edu/undergraduate/application-process/ap-ib-clep-credits>) that illustrates how credit/exemption may be earned through these tests.²

Students will be able to:

- Select and use appropriate quantitative methods and tools to solve problems.
- Interpret, manipulate, and apply quantitative data to solve problems.

¹ Students in the following majors in the Frost School of Music may take MTH 101: *Algebra for College Students* instead of MTH 108: Instrumental Performance, Keyboard Performance, Vocal Performance, Studio Music and Jazz Instrument, Studio Music and Jazz Vocal, Music Education, and Music Therapy. Students in the following majors in the Frost School of Music may take MTH 113: *Finite Math* instead of MTH 108: Music Business Entertainment Industries, Music, Musicianship, Artist Development and Entrepreneurship, Music Theory-Composition, and Media Writing and Production.

² Students in the Frost School of Music : An appropriate score on the SAT, ACT or proctored ALEKS examination may earn a student exemption from, but not credit for, the math requirement of the student's degree program.

Areas of Knowledge

The Areas of Knowledge requirement is designed to help students understand and appreciate intellectual achievements in major areas of human inquiry and creative endeavor. Students satisfy this requirement through the Cognates Program, which aims to provide a broad array of intellectual and cultural exploration.

In the Cognate Program for the Areas of Knowledge requirement, students examine creative expression in the arts, literature, and philosophy; study human development and behavior; and explore the mathematical, scientific, and technological world. Students fulfill the requirement by completing three cognates, one from each of the three areas of the university curriculum: Arts & Humanities (A&H); People & Society (P&S); and Science, Technology, Engineering & Mathematics (STEM). A cognate is a group of at least three courses for at least nine credit hours with a shared theme or topic determined by the faculty. Each cognate has course options that allow students to complete the cognate in a manner that meets their interests, while staying within the focus of the cognate.

While students are required to take three cognates to fulfill the Areas of Knowledge requirement, there is no limit to the number of additional cognates students may complete. All cognates completed are listed on the students' transcripts.

The university offers a large number and range of cognates. Additionally, each major and minor fulfills the cognate requirement in one Area of Knowledge. All approved cognates are visible in a cognate search engine (<https://cognates.miami.edu>) that allows students to search for cognates based on cognate features, cognate courses, and keywords. Each cognate is administered by a department or program that is designated as the "Responsible Academic Unit" (RAU) for the cognate. Inquiries about a cognate should be directed to the cognate's RAU.

The following rule applies to all cognates: A course may not be used to satisfy the requirements of more than one cognate. This rule applies whether the cognate requirement is being met by a major, a minor, or a designated cognate. The fact that a school requires students to take courses which the school construes as outside the major or minor, but must be taken to fulfill the requirements for that major or minor, does not allow the course to be counted for both purposes. On the other hand, the fact that a course is listed as one which must be taken to meet the requirements for a major or minor does not necessarily preclude a student from participating in a cognate which has that course as one of its options. In many cases, the student could take one of the other courses included in the cognate.

Arts & Humanities

Arts & Humanities cognates engage students in the study of the most enduring and influential works of art, imagination, and culture. Through study, creation, and performance, courses in this area enable students to understand the works of artists, musicians, novelists, philosophers, playwrights, poets, historians, and theologians. These courses cultivate the ability to interpret, critically evaluate, and experience the creative products of human culture and expression.

Students will be able to:

- Critically evaluate and interpret the creative products of humanistic and artistic expression, applying appropriate vocabulary and concepts for their description and analysis.
- Understand the creation and performance of art.

The following departments and programs offer courses that are used in Arts & Humanities cognates: Africana Studies; American Studies; Architecture; Art & Art History; Cinema & Interactive Media; Classics; Dance; English; History; Judaic Studies; Latin American Studies; Modern Languages & Literatures; Music Theory – Composition; Musicology; Philosophy; Religious Studies; Strategic Communication; and Theatre Arts. Others will be added as cognates are approved.

People & Society

People & Society cognates help students understand and analyze the organization of society and the patterns of social change in the past and in the contemporary world.

Students will be able to:

- Analyze the organization of society.

- Analyze patterns of social change.

The following departments and programs offer courses that are used in People & Society cognates: Accounting; Advertising; Aerospace Studies; Africana Studies; American Studies; Anthropology; Business Law; Classics; Communication Studies; Criminology; Economics; Ecosystem Science & Policy; Educational & Psychological Studies; Entrepreneurship; Geography; Health Sector Management; History; Human Resource Management; International Studies; Journalism & Media Management; Judaic Studies; Kinesiology & Sport Sciences; Latin American Studies; Legal Studies; Management; Marine Affairs; Marketing; Military Science; Modern Languages & Literatures; Music Media & Industry; Nursing; Philosophy; Political Science; Psychology; Public Administration; Public Health; Regional Studies; Religious Studies; Sociology; Strategic Communication; Teaching & Learning; Urban Studies; and Women's & Gender Studies. Others will be added as cognates are approved.

Science, Technology, Engineering & Mathematics (STEM)

Science, Technology, Engineering & Mathematics (STEM) cognates develop students' abilities to think critically about mathematical, scientific, and technological issues, through an understanding of processes and methods of scientific inquiry involving experimentation, observation, and quantitative analysis. The cognates nurture literacies that enable students to make informed decisions in an increasingly complex world.

Students will be able to:

- Understand the use of quantitative tools, experimentation, and observation to analyze and solve mathematical, scientific, environmental, and technological problems.
- Interpret quantitative data and draw useful conclusions.

The following departments and programs offer courses that are used in Science, Technology, Engineering & Mathematics cognates: Aerospace Engineering; Anthropology; Architecture; Art; Atmospheric Science; Audio Engineering; Biochemistry; Biology; Biomedical Engineering; Business Law; Business Technology; Chemistry; Cinema & Interactive Media; Civil, Architectural & Environmental Engineering; Computer Information Systems; Computer Science; Economics; Ecosystem Science & Policy; Educational and Psychological Studies; Electrical & Computer Engineering; Engineering Science; Finance; Geography; Geological Sciences; Healthcare Science; Industrial Engineering; International Finance & Marketing; Journalism & Media Management; Kinesiology & Sport Sciences; Management Science; Marine Science; Marketing; Mathematics; Mechanical Engineering; Microbiology & Immunology; Molecular Biology; Neuroscience; Nursing; Philosophy; Physics; and Psychology; Public Health; Real Estate; and Strategic Communication. Others will be added as cognates are approved.

NOTES

The three cognates taken to fulfill the Areas of Knowledge requirement (including cognates fulfilled by majors and minors) must have different RAUs. No more than two Areas of Knowledge may be fulfilled by cognates whose RAUs are in the same school or college, except for the College of Arts and Sciences. Majors and minors may cover more than one Area of Knowledge but may be used to fulfill the cognate requirement in only one of those areas. A course may count in only one cognate used to fulfill the Areas of Knowledge requirement (including cognates fulfilled by majors and minors). Students may petition for individual course substitutions in cognates by application to the cognate's RAU. Transfer courses, Advanced Placement, International Baccalaureate, CLEP, dual enrollment, etc., that are transferred in with specific UM course equivalencies can be used in cognates. Courses that transfer in with non-specific UM course credit hours can be used in cognates only by application to the cognate's Responsible Academic Unit (RAU).

Transfer students entering the university with 30 or more credits may take an individualized cognate as one of the three required cognates. Individualized cognates allow for flexible use of transfer credits to fulfill a cognate requirement, as approved by the dean/advising office in the student's school/college.

Grades

Academic Standing, Probation, and Dismissal

At the end of each semester the University shall determine whether a student is in Good Academic Standing, on Academic Probation, or subject to Academic Dismissal. Some schools and colleges may have exceptions to the Good Academic Standing, Academic Warning, Academic Probation and Academic Dismissal policies listed below.

Good Academic Standing

To be in Good Academic Standing a student must not be on Academic Probation or subject to Academic Dismissal.

Academic Probation

Students other than first-semester freshmen (non-transfer student) whose UM cumulative grade-point average (CGPA) in University of Miami courses is below the following levels shall be placed on Academic Probation.

Credit Hours Earned	CGPA
Fewer than 33	1.7
33-64	1.8

65-96	1.9
More than 96	2.0

First-semester freshmen who have a semester grade-point average below 1.3 shall be placed on Academic Probation. In addition, students who fail to make satisfactory progress toward meeting the degree requirements specified by their School or College may be put on Probation by the Academic Standards Committee of the School/College. Students on Academic Probation must meet with their academic advisor prior to the following semester and shall be restricted to a 13-credit hour load.

Academic Dismissal

A student who remains on probationary status after two consecutive semesters on Academic Probation shall be subject to Academic Dismissal. A student who has been on Academic Probation for one semester and has a CGPA below 1.0 shall also be subject to Academic Dismissal. The decision to dismiss shall be made by the Academic Standards Committee of the School or College in which the student is enrolled. If a decision is made not to dismiss, the student shall remain on Academic Probation.

Appeals and Readmission

Students who wish to appeal their Academic probation or dismissal for academic reasons, must do so in writing to the School or College Academic Standards Committee within thirty days of the notice of dismissal. Those who have been dismissed for academic reasons shall not be considered for readmission to any school or college at the University until at least two regular semesters have elapsed since their dismissal.

Faculty Senate Student Affairs Committee Standard Academic Appeals Process

The Faculty Senate Student Affairs Committee (FSSAC) has responsibility for undergraduate student academic appeals. The FSSAC includes faculty representatives from all undergraduate schools as well as three non-voting ex officio representatives: a graduate and undergraduate student representative and the University ombudsperson. The FSSAC reviews undergraduate student academic appeals that have not been resolved at the department, school, or college levels. As noted in section II below, the FSSAC hears cases only after they have gone through the departmental and college process. The processes are the same for grade and non-grade appeals except as noted below.

I. Time Constraints

Appeals must be filed within a year of the occurrence of the academic action resulting in the appeal and prior to the completion of all degree requirements or withdrawal from the University. Exceptions to this deadline may be permitted by the FSSAC for good cause.

Each level of appeal should aim to review the appeal and arrive at judgment within a two month period from the date the appeal reaches them. The entire process should be completed within one year.

II. Order of Appeal

A student appeal regarding a faculty or administrative academic action must be addressed to the following entities or persons in this order:

1. The faculty member or administrator responsible for the course, program, or activity.
2. The department/program chair/director or administrative superior of the faculty member or administrator.
3. The Dean or designee of the school or college offering the course, program or activity.
4. If the school, college or administrative unit has a committee constituted to hear student appeals, that committee must be consulted before proceeding to the next level.
5. The ombudsperson. The student is to provide the materials listed in Section III below to the ombudsperson who will review the merits of the appeal, and attempt to resolve the matter. The ombudsperson, as part of his/her review should give the student a preliminary assessment as to whether the matter, as presented by the student at that time, is reviewable by the FSSAC.
If the matter is the appeal of a final grade, and only after all the other steps are taken, the ombudsperson may refer the matter to the Provost who will decide whether or not to refer the appeal to the FSSAC.
For a non-grade-appeal, the student has the final authority to decide whether to take the appeal to FSSAC. If s/he chooses to do so, the ombudsperson shall forward the appeal and the accompanying documentation to the FSSAC via the Faculty Senate Office.
6. The Provost may request that the FSSAC review an appeal. If, but only if, s/he does so, the FSSAC shall have jurisdiction to review a grade-related appeal.
 - a. As part of the request, the Provost shall forward to the FSSAC, via the Faculty Senate office, the materials submitted by the student as indicated in Section III, below.
 - b. The FSSAC will review the student's written appeal (see section III below), confer with the appropriate faculty, administrators, and others as it deems necessary in making its recommendation to the Provost. The FSSAC may request an interview with the student, additional information or access to records, interviews with relevant faculty or administrators, or additional information or access to records kept by faculty or administrators.
 - c. The FSSAC will communicate its findings and recommendations to the Provost. Copies shall be provided to the Faculty Senate.
7. The final decision with respect to the grade-related appeal will be made by the Provost and communicated to the student in writing. Copies shall be provided to the Faculty Senate Office and to the Chair of the FSSAC.
8. For non-grade-related academic appeals:

- a. The FSSAC shall act upon those appeals and report its findings and recommendation to the Provost. The Committee shall forward to the Chair of the Faculty Senate a copy of its recommendation to the Provost.
- b. The Provost shall communicate his/her decision on each recommendation to the student concerned, to the Chair of the Committee, and the Chair of the Faculty Senate.

III. Materials for an Appeal

When bringing an appeal, the student must state in writing issues s/he wishes to have considered. The appeal must include:

1. An appeal letter clearly stating the conditions as seen by the student, and offering reasons for granting the appeal.
2. The appeal letter must indicate if the student wishes to make a personal appearance and, if so, the reasons why the appearance is necessary.
3. Documents of support (e.g., examinations, term papers, syllabi, or medical documentation of illness) that the student wishes to have examined.
4. All written decisions made at earlier levels of the appeal by individual faculty/administrators, departments/programs/administrative units, college or school committees, and deans which are available to the student or in the student's possession.

IV. Other Notes and Special Conditions

1. If the appeal is based on or related to a charge made by the student of discrimination on the basis of race, color, national origin, religion, sex, sexual orientation, age, or handicap, a representative of the appropriate University office will be contacted and, as appropriate, consulted in the appeal process.
2. If the appeal is based on or related to a disability:
 - a. The ADA Coordinating Committee shall serve in an advisory capacity.
 - b. The student is to include in the materials provided, the appropriate forms from the Office of Disability Services documenting:
 - i. An evaluation of the disability
 - ii. Recommendations related to the disability
 - c. The FSSAC does not consider appeals based upon the grant, denial or modification of an accommodation by the Office of Disability Services. Instead, any such appeal is as prescribed by the Office of Disability Services Grievance Procedure only.

The Grading System

A	Excellent attainment
B	Good attainment
C	Fair attainment
D	Poor attainment (earns credit hour but may not fulfill requirement for a major)
F	Failure (effective Fall 1995)
W	Course dropped on or before the last day for withdrawing from classes as published in the official calendar of the University. Credit hour can be earned only by successful repetition of the course.
WL	Late Withdrawal—Administrative; Only used for Complete Withdrawal (Effective Summer 2017)
I	Incomplete work in passing status with the instructor's permission to complete the course. An "I" will be assigned only if the instructor is satisfied that there are reasonable non-academic grounds for the student's incomplete work. ¹ An "I" is not intended to be assigned in order to permit a student to repeat a course without registration or to permit a student to do additional work in order to improve upon grades earned during the semester. The student who receives an "I" must complete the course with a passing grade within the time frame specified by the professor of the course but not longer than the end of one calendar year, or prior to graduation, whichever occurs first. An Academic Dean may approve an extension initiated by the course instructor. An "I" not completed prior to the student's graduation shall be changed to an "IE" or "IF" by action of the student's Academic Dean. ²
IP	Denotes in progress grade assigned upon satisfactory completion of the first semester of a two-semester sequence, with the final grade for both courses to be submitted at the end of the second semester of the sequence. Please note that all "IP"s must be converted to a letter grade or "IF" at graduation. "IP" will also be converted to "IF" upon any departure from the University for a period in excess of one year. ³
IF	Symbol indicating that an "I" grade was not appropriately completed. ⁴ The symbol "IF" is equivalent to an "F" when computing a student's average.
CP	Completed
CR	Grade signifying that credit only is awarded based on a "C" average or better.
NC	Grade signifying that no credit hour is awarded based on a course average below a grade of "C".
NG	Symbol assigned by the Office of the Registrar indicating that the instructor has not reported the student's grade. For a student to receive credit hour for the course, the instructor must report a passing grade prior to the student's graduation, or by the end of one regular academic semester, whichever comes first. An Academic Dean may approve an extension initiated by the course instructor. An "NG" not replaced by a passing grade, or by a "W", prior to the student's graduation shall be changed to an "F" by action of the student's Academic Dean. ⁵

Credit Only Option

The credit only option has been established to encourage students to explore academic areas outside their major and minor fields of concentration. Students may use this option with free electives and receive a CR (Credit Received) or NC (No Credit). These courses become part of a student's record, but they do not count in the grade point average as computed by the University of Miami.

Grade Point Average

The grade point average is used to determine:

- class rank
- graduation and university honor eligibility
- good standing, probation, and dismissal status
- scholarship eligibility

Your official grade point average is based only on the work you have completed at the University of Miami. The only exception to this policy is for determining whether a student qualifies for university honors established by the minimum grade point requirement at the time of graduation. For graduation purposes, cumulative grade point average is defined as either the average of all grades earned at the University of Miami or the combined average of all graded work taken at the University of Miami and elsewhere whether or not the transfer work is accepted toward a degree at the University of Miami, whichever is lower.

Quality points per credit hour are awarded as follows:

A+	4.00
A	4.00
A-	3.70
B+	3.30
B	3.00
B-	2.70
C+	2.30
C	2.00
C-	1.70
D+	1.30
D	1.00
E (Prior to Fall 1995)	0.00
IE ¹	0.00
F (Effective Fall 1995)	0.00
IF	0.00

Courses marked with an "IE" or "IF" count as credit hour attempted but are not counted in credit hours earned and do not carry quality points.⁵

Credit hours marked CR are counted as credit hours earned but are not counted in credit hours attempted and do not carry quality points. Courses marked with the symbols I, IP, W, NC, and NG do not carry credit hours attempted, credit hours earned, or quality points.

The grade point average is determined by dividing the total quality points earned by the total credit hours attempted.

Military service credit hour, some foreign university credit hour, correspondence course credit hour, credit by examination, etc., are not awarded quality points and do not enter the computation of the grade point average.

- ¹ Faculty Senate legislation #83032(B)
- ² Faculty Senate legislation #2000-24(B)
- ³ Faculty Senate legislation #2001-29(B)
- ⁴ Faculty Senate legislation #85005(B) and #97001(B)
- ⁵ Faculty Senate legislation #85001(B)

Honor Code

The Honor Code, initiated at the request of the Undergraduate Student Body Government, ratified by student referendum, approved by the Faculty Senate, by the President of the University, and administered by students, protects the academic integrity of the University of Miami by encouraging consistent ethical behavior among its undergraduate students. The Code provides standards that prohibit all forms of scholastic dishonesty, including

cheating, plagiarism, collusion, and falsification or misrepresentation of experimental data. The Code covers all written and oral examinations, term papers, creative works, assigned computer related work, and any other academic work done at the University by an undergraduate student.

All undergraduate students are responsible for reading, understanding, and upholding the Honor Code. Signed pledges are required for written work submitted for evaluation, but the absence of a signed pledge does not free a student from the ethical standards required by the Code. Procedures for dealing with infractions of the Code, including provisions for appeals, are printed in the text of the Honor Code. Copies may be obtained from the Office of the Dean of Students or from the office of the Undergraduate Student Body Government, or on-line (<http://www.miami.edu/honor-council>).

In keeping with the traditional prerogatives of university faculties, nothing in the Code infringes on the faculty's assignment of grades undertaken in a class. Instructors are informed when students have been found guilty of infractions involving their classes. Courses in which students have been failed for academic dishonesty may neither be dropped nor repeated under the terms of the freshman repeat rule.

Honor Rolls

The Dean's List

The Dean's List is composed of those undergraduate students who are enrolled in a degree-seeking program and have attained high scholastic achievement for the semester. To attain the Dean's List, a student must, for the semester:

1. have registered for and have completed 12 or more graded credit hours (excluding the credit hours earned in courses taken for credit only);
2. have attained a quality point average of 3.50 or higher for the semester;
3. have no courses with pending grades (I or NG).

The Dean's List will be announced by each college and school at the end of the semester. The Office of the Registrar will post this achievement to the student's permanent record.

The Provost's Honor Roll

The Provost's Honor Roll is composed of those undergraduate students who are enrolled in a degree-seeking program and have attained a high scholastic achievement for the semester. To attain the Provost's Honor Roll, a student must, for the semester:

1. have registered for and have completed 12 or more graded credit hours (excluding the credit hours earned in courses taken for credit hour only);
2. have attained a quality point average of 3.75 or higher for the semester;
3. have no courses with pending grades (I or NG).

The Provost's Honor Roll will be announced by the Provost's Office. The Office of the Registrar will post the achievement to the student's permanent record, and distribute the Provost's Honor Roll Certificate.

The President's Honor Roll

The President's Honor Roll is composed of those undergraduate students who are enrolled in a degree-seeking program and have attained the highest possible scholastic achievement for the semester. To attain the President's Honor Roll a student must, for the semester:

1. have registered for and completed 12 or more graded credit hours (excluding credit hours earned in courses taken for credit only);
2. have attained a quality point average of 4.0 for the semester;
3. have no courses with pending grades (I or NG).

The President's Honor Roll will be announced by the Office of the Registrar who will post the achievement to the student's permanent record, and distribute the President's Honor Roll Certificate.

Graduation

Degrees

It is the responsibility of the student to be sure he/she makes satisfactory progress toward, and fulfills requirements for, the degree he/she seeks. He/she may obtain help in the office of his/her Academic Dean.

To receive a Bachelor's degree from the University, the student must earn at least 120 credit hours (more in some schools), with a C average (2.0) or better as well as a C average for all work done at the University of Miami.

Students must also meet all of the degree requirements of their respective schools and should not expect requirements in composition, mathematics, foreign languages, or other subject areas to be waived for any reason.

- A student transferring credit hours from a 2-year community or junior college (this being the last school attended) must complete a minimum of **56 credit hours in residence** at the University of Miami to earn an undergraduate degree.

- A student transferring credit hours from a 4-year college or university (this being the last school attended) must complete a minimum of **45 credit hours in residence** at the University of Miami to earn an undergraduate degree.
- In addition, each student must complete at least half of the credit hours specified for his or her major in residence at the University of Miami.
- Not more than 30 credit hours of correspondence work and extension work combined will be accepted toward a degree, and neither correspondence nor extension work may be credited as a part of the last 45/56 credit hours of the student's program.
- Not more than 30 credit hours based on military experience will be awarded toward the degree.
- Credit hours earned in a manner other than by course registration, i.e. proficiency examination, CLEP, placement tests, etc., may not be used to meet the final 45/56 credit hour residency requirement, however such credit by examination may be earned while the student is enrolled in the courses needed to meet the final 45/56 credit-hour residency requirement.
- Once a degree has been awarded, no changes will be made to the academic record.

Dual Degree

- To obtain two different undergraduate degrees, a student must complete all the requirements for each degree.
- A second undergraduate degree on the same level requires a different major and a different minor.
- If the degrees are in two different schools, a student must meet the requirements with distinctly different majors and minors, wherever applicable, in each school.
- Students must obtain approval from the Office of the Senior Vice Provost and Dean of Undergraduate Education to pursue dual degrees in different schools.

As a general rule, college credit hours more than 12 years old are not recognized for degree purposes. Students in this category should consult their academic deans.

A student must apply for graduation on CaneLink during the semester in which they expect to graduate.

University Graduation Honors (Latin Honors)

University Graduation Honors (*Latin Honors - Summa / Magna / Cum Laude*) will be determined by a minimum GPA unique to the school or college from which the student is graduating.

- University Graduation Honors only applies to undergraduate students.
- The GPA required will change each academic year (beginning with the fall semester) and will be based on the cumulative GPAs of the previous year's graduating class.
- The top 5% of the graduating class will receive *Summa Cum Laude* within each individual school or college; the next 10% will receive *Magna Cum Laude* and the next 10% *Cum Laude*.
- For the determination of University Graduation Honors, cumulative GPA is never rounded off and is the lower of:
 - the average of all grades earned at the University of Miami (UM cumulative graduation GPA), OR
 - the combined average of all graded work taken at the University of Miami or elsewhere (whether or not the transfer work is accepted toward a degree at the University of Miami).
- Students must meet the required GPAs by the completion of the final semester within his/her school or college to be eligible to graduate with the honor.
- The appropriate honor will automatically be placed on the student's final transcript and diploma.

Departmental Honors

Among the departments offering approved programs for honors study at the junior-senior level for both majors and elective students are American studies, art and art history, biochemistry and molecular biology, biology, business administration, chemistry, computer science, engineering, English, finance, French, German, history, international finance and marketing, international studies, Judaic Studies, marine science, mathematics, meteorology, microbiology and immunology, philosophy, political science, psychology, religious studies, sociology, Spanish, and women's and gender studies. Admission into the program is by invitation, but any student who believes himself or herself qualified may apply to the Chairman or the Departmental Honors Advisor of the major department, preferably during the sophomore or early junior year. Upon successful completion of the required program and with approval by the faculty of the department, the notation Departmental Honors in ... is included in the candidate's diploma and transcript.

Departmental Honors are designed primarily to provide an opportunity for the student to intensify and deepen his or her knowledge of the major, to permit closer associations with professors in the student's area of concentration, and to prepare the student for research, thesis preparation, and other work at the graduate level in the major areas.

Departmental Honors requirements vary by departments; the prospective Departmental Honors student should confer with the Honors Advisor within the department about specific requirements for graduation with Departmental Honors.

Diplomas and Transcripts

No diplomas or official transcripts are released from the Office of the University Registrar without the approval of the Office of Student Account Services.

The last date on which application may be made for each graduation period is published in the Academic Calendar. The academic deans are the only officers authorized to approve placing the student's name on the candidate degree list.

Diplomas are issued after the student's graduation has been awarded by the school/college and noted on the student's official transcript. The diploma must be issued in the name on the student's academic record. Addition or omission of a middle name is acceptable. The addition of a middle name will be acceptable only as it appears on the student's application for admission. If the middle name is not on the application or if the student wants another version, documented proof of a legal name change must be presented to the Office of the University Registrar.

Official transcripts are issued only upon receipt of a secure electronic request through the university's online transcript system or a written and signed request from the student is received in the office. Payment for the transcripts is required before they will be sent.

Unofficial transcripts are available free of charge to students through CaneLink.

FIRST YEAR SEMINARS

Conceived as alternatives to the typical survey courses that incoming students take, First-Year Seminars offer a limited number of students a small class focused on a specific topic. The seminars are interdisciplinary in nature and/or experimental in subject and design. Seminars are taught by distinguished faculty from a wide variety of academic disciplines and offer students the opportunity to engage in research from their first semester on campus. No student may take more than one. First-Year Seminars are 3 credit hour courses that may be used to fulfill general education requirements in STEM, People & Society, or Arts & Humanities, as they can be a part of cognates.

Seminar Courses

- FFA 190-199. First-Year Seminars in Arts
- FLT 190-199. First-Year Seminars in Literature
- FNS 190-199. First-Year Seminars in Natural Science
- FPR 190-199. First-Year Seminars in Philosophy/Religion
- FSS 190-199. First-Year Seminars in the Social Sciences

Foote Fellow Honors Program

<https://admissions.miami.edu/undergraduate/academics/programs-of-distinction/foote-fellows/index.html>

The Foote Fellows Honors Program recognizes the most educationally accomplished incoming students at the University of Miami. Foote Fellows have distinguished themselves both in and out of the classroom, are self-motivated, and think independently. Admission to the Foote Fellows Honors Program is by invitation.

Within the curricular framework of their school or college, Foote Fellows enjoy maximum freedom to explore a multitude of educational resources. Many Foote Fellows leverage this opportunity to take additional majors and/or minors and to study abroad.

At each of the nine undergraduate schools at the University of Miami, a dedicated advisor helps Foote Fellows chart their academic path and attain access to distinctive learning opportunities and educational guidance, such as special school-based seminars, faculty-mentored research, networking opportunities, and off-campus internships.

In addition, Foote Fellows have access to opportunities outside their school. Special Foote Fellow lectures are held throughout the academic year. "Books That Matter," a rigorous, multidisciplinary seminar in reading and analyzing significant works of nonfiction, is offered to Foote Fellows. In their junior and senior years, Foote Fellows are invited to join advanced, interdisciplinary, and integrative seminars taught by leading faculty members from across the University. Foote Fellows also benefit from focused advising regarding post-baccalaureate distinguished fellowships and awards, support and information about co-curricular opportunities from a dedicated program manager, and networking events with other Foote Fellows from all disciplines.

To graduate with the Foote Fellows Honors Program distinction, Foote Fellow students must achieve a minimum GPA of 3.5 by the completion of the final semester.

Eligibility for the Foote Fellows Honors Program transcript distinction for each student is determined by the lower of two GPAs:

1. UM cumulative graduation GPA
2. Combination GPA (UM cumulative graduation GPA + Transfer GPA)

The Foote Fellows Honors Program reflects the educational vision of former University of Miami President Edward T. Foote, who retired in 2000 after serving the University for twenty years.

Student Status

Academic Bankruptcy

Students entering college sometimes perform at an unacceptable academic level. They either drop out or are dismissed. Some individuals with this experience re-evaluate their educational goals and desire to return to college. Their academic record, however, may present an insurmountable obstacle. Undergraduate students in this category who want the opportunity for a fresh start at the University without this handicap may apply for admission or readmission with the request that their prior academic record be disregarded.

In order to be considered for academic bankruptcy, a student's combined college grade point average must be below 2.00 as calculated by the Office of Admission.

Application for Initial Admission to the University with Academic Bankruptcy

The applicant must apply to the Office of Admission and:

1. Must have been admissible to the University as a senior in high school,
2. Must have attended an accredited institution for at least one year and must not have attended any college or university for the preceding six months, and,
3. Must not be admissible to the University based on his or her college-level work.

Application for Readmission to the University with Academic Bankruptcy

A University of Miami student who has dropped out or who has been dismissed may request Academic Bankruptcy on meeting these conditions:

1. The student must apply to the Office of the University Registrar.
2. At least six months must have elapsed since the end of the semester in which the student was last in attendance at the University of Miami.
3. Detailed written evidence must be provided with the readmission application, showing that the conditions or factors that caused the poor performance have changed sufficiently, so that there is a reasonable expectation of future satisfactory performance.

Conditions of Approval

1. If Academic Bankruptcy is approved, no course credit hours earned previously will be displayed on the transcript for credit hours attempted, credit hours earned, or quality points earned; however, all grades¹ earned previously will remain on the transcript.
 2. Readmission applicants with approval from the dean of the accepting school, may have Academic Bankruptcy apply only to those credit hours taken by the student when last in attendance at the University of Miami, so that credit hours earned at another institution subsequent to the date the student last attended the University are not affected.
- ¹ All grades, good or bad, are invalidated during this process and will not be reinstated at any future time.

Academic Bankruptcy will be granted only once for any student.

Certification of Enrollment

Students who require certification of enrollment for insurance or education loan purposes may obtain an enrollment letter via their CaneLink (<https://canelink.miami.edu>)¹ account or by submitting a request in writing to the Office of the University Registrar. Enrollment verification via CaneLink is available after the last day to drop without a "W". Please refer to the University's academic calendar for specific dates.

Enrollment Verification letters will include only information maintained in the university's official academic record system. The Office of the University Registrar will not alter, amend or add anything to the standard letter. Notarization is available upon request.

Students will be certified as currently enrolled once they have met their financial obligations. If a student is delinquent in paying his/her tuition and fees statement balance and/or Monthly Payment Plan, the University will not process transcript and/or diploma requests. Course selection/modification will not be permitted for any previous, current or future semesters. The student is not considered enrolled during the term in question, which means that certification of enrollment cannot be provided for insurance, student loan deferment or repayment purposes. Non-payment also means the student is ineligible for financial assistance awarded for the term in question. A late payment fee may be assessed on delinquent accounts.

Students who require enrollment certification for scholarship purposes only, will be conditionally certified until financial obligations are met.

¹ For students who do not have a Social Security number, verification letters are generated by the Office of the University Registrar. Letters are typically generated in seven (7) business days but may take longer during our registration period and the first two weeks of classes.

Classification of Students

Students are classified in three ways:

1. By course load (full- or part-time)
2. By objective (degree sought, non-degree, transient, audit, etc.)
3. By year

Course Load

A student is a full-time student if he/she carries not less than the minimum normal load, 12 credit hours per semester in most schools, nine credit hours in the Graduate School (please refer to the Graduate section for exceptions). The minimum credit hour loads in a summer session will vary for each category, according to the length of the sessions. (A typical full-time class schedule for fall and spring semesters not requiring override approval from an advisor consists of 15 credit hours. In some cases, students are recommended to enroll in fewer than 15 credit hours.) Please refer to the university's full-time/half-time policy (<https://registrar.miami.edu/general-information/policies/full-time-half-time-policy>). For spring semester, Intersession courses can be included when evaluating full-time status. It is important to note that tuition charges for Intersession courses typically are

separate from and in addition to charges for the spring semester. Full-time status may vary from one college or school to another. Students should consult with the dean of his/her college or school for details.

Objective

A degree student is one whose immediate educational objective consists wholly or principally of work normally credited to a University of Miami bachelor's or higher degree. To qualify for this status, a student must meet the standards for admission.

A non-degree student is one who is not pursuing a degree program. Such students are those who, although eligible for degree candidacy, have requested permission to take a limited or special selection of credit hour courses without regard to requirements for a degree. This classification includes high school graduates and students with previous college credit hour

1. who do not want degree status;
2. whose applications for degree status are incomplete;
3. who are taking work toward teacher certification;
4. who are workshop applicants;
5. who are visiting summer school students. (Students under 21 years of age who have not completed high school will not be admitted to this status.) Non-degree students are sub-classified as transient, special, etc.

An undergraduate non-degree student may petition the Director of Admissions to have his/her status changed to that of degree student. Up to 30 credit hours earned in non-degree status may be applied towards a degree, but only to the extent approved by the appropriate academic dean. It is therefore important that the degree student identify himself/herself as such, early in his/her program.

Transient Student

A transient student is one who is enrolled at the University of Miami with the sole intention of using credit hours earned toward graduation elsewhere.

Audit Student

An audit student is one who enrolls as an observer or listener only. Auditing is allowed only when there is space available in the class. Audit status may be restricted by the Dean in the case of laboratory, studio or performance courses where audit status is not appropriate. Audit students receive no credit hour, do not prepare written assignments or take examinations, are not eligible for residence in campus residence halls, and do not receive student privileges except for the use of the library. No entries are made on the permanent academic record for audited courses.

Students wishing to change from audit status to credit hour status must obtain all necessary approvals within two weeks following the last day of registration for Fall and Spring semesters and no later than the fifth class day following the last day of registration for Summer Sessions. No changes except withdrawals from the course are permitted after this time.

Note: Fee for auditing a course is non-refundable. Please refer to financial information section of the bulletin.

Year

- A freshman is a degree-seeking student who has earned 0 to 29 credit hours.
- A sophomore is a degree-seeking student who has earned 30 to 59 credit hours.
- A junior is a degree-seeking student who has earned 60 to 89 credit hours.
- A senior is a degree-seeking student who has earned 90 credit hours or more.

Undergraduates Taking Graduate Coursework

University of Miami undergraduates within 30 credit hours of meeting the requirements for the Baccalaureate Degree may be considered for concurrent admission to graduate study in non-degree graduate status, and in this status may take and receive credit hour for graduate courses, while completing the requirement for the baccalaureate. The application may be found on the Graduate School website (<https://grad.miami.edu>).

Admission to Graduate Status requires:

1. Must have a minimum of 3.000 G.P.A.
2. The submission of an Undergraduates to Take a Graduate Course form (which can be obtained at the Graduate School) which will not require the application fee;
3. The written approval of the Chairman of the Department, the Dean of the Undergraduate School or College, and of the Graduate Dean prior to registration on the form.

Admission to Graduate status does not automatically admit the student, upon graduation, to status as an applicant for a graduate degree at the University of Miami.

The graduate credit hours earned may NOT be used to meet undergraduate graduation requirements or be used to meet the 120 credit hour requirements at the University of Miami.

No more than six (6) credit hours may be taken in one semester, and no more than a total of twelve (12) credit hours may be taken while in Graduate Status. Students may take no more than 15 credit hours of combined undergraduate and graduate courses per semester.

Students electing Graduate status must register and be processed centrally at the Office of the Registrar.

Eligibility for University Extracurricular Activities

Full participation in University-sanctioned extracurricular activities and organizations is open to all full-time students who are not on academic probation and who have been assessed the Student Activity Fee. Extracurricular activities include, but are not limited to the following: academic, athletic, dramatic, or musical organizations or teams; student organizations registered with the Committee on Student Organizations (COSO); fraternities and sororities; student publications; program boards; and University committees.

Students on probation may participate in any activity required as partial fulfillment of their degree program; may attend meetings of organizations; and may play intramural sports. They may not otherwise compete, perform, or hold a leadership position. At the beginning of each fall semester, the activity's faculty or staff advisor or appropriate committee chairperson shall determine with the Office of the Provost the eligibility of each participating student. Some activities apply stricter standards, and may monitor academic progress and review eligibility during the academic year. Students should consult with the individual activity for specific requirements.

Readmission

Undergraduate students who have not attended the University for at least one semester should request readmission through the Office of the University Registrar no later than two weeks before the beginning of classes, in the semester they wish to re-enroll. Readmission to the University is contingent upon approval of the Dean of the school/college the student is applying to and clearance from the Office of Student Account Services.

International students who seek readmission must receive clearance from International Admission and submit a bank letter to receive an I-20 from International Student and Scholar Services.

Specific details on the readmission process can be found here (<https://registrar.miami.edu/general-information/policies/readmission>).

Students who have attended another college or university since they were last enrolled at the University of Miami, will be required to provide a transcript of their work. Failure to disclose all prior institutions attended may result in disciplinary action.

An undergraduate student who has applied to graduate for a given semester will not be eligible to register for any subsequent semester until the student applies for readmission or admission to a new program. A candidate for graduation may wish to continue his/her studies in one of the following situations:

1. If the student fails to graduate and further registration is needed, they must delete their application for graduation in CaneLink and within twenty-four hours, registration for subsequent semesters or sessions should be available. Students should contact the Office of the University Registrar for assistance.
2. If the student graduates and wishes to pursue a second bachelor's degree, the student must apply for readmission, stating his/her new degree objective.
3. If the student graduates and wishes to take additional course work without a degree objective, the student must apply for unclassified status.

Proof of immunization must be provided to the Student Health Service before readmission to the University of Miami. Failure to do so may prevent you from registering for classes.

Inactive Status

Inactive status is available to continuing, undergraduate, degree-seeking students who intend, and qualify, to re-enroll at the University of Miami after leaving the university for a designated period of time. This status is used when students will not be taking classes at another institution. Students interested in this option may obtain further information here (<https://registrar.miami.edu/general-information/policies/inactive-status>) or by visiting the Office of the University Registrar.

Non-UM Programs

Students who study through a non-UM program, domestic or study abroad, and would like to have those credit hours applied toward their UM degree, should apply for Non-UM Program status. For more specific information on the Non-UM program please see the application (<http://cdn.miami.edu/wda/registrar/Documents/non-um-program-application-2017.pdf>).

Non-UM is only available in the Fall and Spring semesters.

As of July 1, 2017, the fee will be \$350 per semester.

Student Identification Numbers

All students at the University of Miami will receive an identification number that is unique to them. This number supplements the social security number, which is also required by the university in order to provide information to the federal government and approved agencies. Access to social security numbers is limited to staff who have a legitimate need for that information.

Transfers Between Schools and Colleges

Undergraduate students who have compiled fewer than sixty (60) credit hours may transfer between schools and colleges provided that such students:

1. Demonstrate their academic admissibility to the new program (as defined by class rank and SAT scores) at the time of their original matriculation at the University;
2. Satisfy any special criteria required for admission by a particular program (e.g., auditions in the arts, portfolios in architecture, etc.); and
3. Obtain the approval of the Dean of the receiving school or college.

It is a general policy of the University that students admitted to degree seeking status may not transfer to an unclassified status.

Students who have compiled 60 or more credit hours with an average of 2.0 or higher and who have satisfied all of the above three conditions may be eligible to transfer between schools and colleges pending space availability and additional program requirements.

Graduate Policies and Procedures

grad.miami.edu

All graduate work (except for the Master's Degree in Law, J.D. in Law and M.D. degree) at the University of Miami is under the direction of the Dean of the Graduate School and the Graduate Council.

All graduate students at the University of Miami are subject to the general standards and requirements of the University and its various programs in regard to attendance, examinations, payment of fees, and conduct, as well as to the specific requirements of the Graduate School. The graduate student is expected to assume the initiative in completing all requirements in the time specified.

Admission requirements are described in the *Bulletin* of the Graduate School, and may be obtained from the individual department or program.

Applications are processed through the various Schools and Colleges. Visit the Graduate School website (<http://grad.miami.edu>) and click apply to review the application process.

Prospective students should note that "graduate study" means an integrated program of advanced, specialized study, based on an undergraduate major and/or adequate background, presupposing academic and personal maturity, and making much more than average demand upon the industry, initiative, and scholarship of the student. The term must be distinguished from "post-graduation study" which means merely that courses, not necessarily of graduate level, are taken after the student has received a bachelor's degree.

To preserve its ideals of scholarship, conduct, and character, the Graduate School reserves the right and the student by his/her registration concedes the right to require the withdrawal of any student for any reason deemed sufficient by the Graduate School at any time.

Academic Policies

Time to Completion

Time to completion starts when a student begins any program in the Graduate School, whether it be a master's or doctoral program. All work must be completed within six years of the time of admission to graduate work, for those studying for the various master's degrees; and within eight years for those studying for doctoral degrees. For those admitted directly into a Ph.D. program without a master's degree in that field, work must be completed within eight years. Individual programs may set a shorter time period. Exceptions to the time to completion policy may be granted by the Dean of the Graduate School at the request of the Graduate Program Director.

Recency/Validation for Over-Aged Credit Hours

Graduate credit hours transferred from another university may not be applied toward a graduate degree at the University of Miami if their age at the time of acceptance into the University of Miami program exceeds six years. On an individual basis, students may be permitted to validate over-aged credit hours by examination, with program approval.

Continuous Enrollment

To maintain status as a graduate student, registration in each fall and spring semester is required. Otherwise, admission lapses and readmission must be granted. Doctoral students for whom course work is no longer appropriate should consult their program for registration guidance.

Registration

Graduate students can register on the first day of registration and through the registration period. For more information on registration, students should contact their respective School or College. See academic calendar for dates of registration periods here (<http://www.miami.edu/index.php/registrar/calendar>).

Full-Time Study

The categories of full-time students include:

1. Graduate students taking 18 or more graduate credit hours during the calendar year (9 credit hours in a regular semester or 6 credit hours in a summer semester. In online programs, 6 credit hours in each regular semester and 6 credit hours during the summer.)
2. Graduate teaching and research assistants taking 16 or more graduate credit hours during the calendar year (8 credit hours in regular semester or 6 credit hours in a summer semester).
3. Graduate students enrolled in any course numbered 800 or above, i.e., any 800-level course required for the completion of the degree.
4. All MBA for Executive and Professional students are considered full-time.

In all cases, determination as to whether or not a student is in full-time study is the privilege of the Dean of the Graduate School.

The maximum number of credit hours allowed for full-time study is 12 for each semester and six for each summer semester. Exception to this policy can only be made by the Dean of the Graduate School or his/her designee and requires a signed recommendation from the Program Director.

For thesis and dissertation students, full-time registration is required during the semester or summer session in which a candidate defends the thesis or dissertation. Students who wish to have this requirement waived must have a written request provided to the Graduate School by the Dean of their respective College or School, or the Dean's designee.

No full-time faculty member may be a full-time student, whether or not working toward a degree. Nor may a full-time student be a full-time faculty member.

No full-time student will be a principal investigator in any grant or contract, whether in name or fact. And no principal investigator will be a full-time student.

Exceptions to these rules may be made in cases in which students are encouraged to apply individually for small research grants that are consistent with and contribute to their field of study and their dissertation work, and, in certain programs, in which students in a terminal degree status are obliged, as a part of their degree program, to teach as *de facto* faculty members. (Note: Faculty from the School of Nursing and Health Sciences and from the Physical Therapy program are permitted to pursue doctoral degrees in their home program/school.)

Withdrawals

Withdrawals, either from individual courses or from a graduate program, should be processed through the office of the Dean of the School or College of the student's program. Students who wish to officially withdraw from joint or dual degree programs should consult the office of the Dean of the School or College for both disciplines. The date of withdrawal is that on which the student notifies the office of the Dean or the date of receipt of a letter requesting withdrawal. No withdrawal from the University is official until the student has consulted with the Dean of his/her school or college and has completed the necessary forms.

Students wishing to officially withdraw from the University of Miami must provide the Office of the Registrar notification of their intent to withdraw. Initial notification may be made in person, in writing, by fax, or by telephone. This notification will be recorded and used for notification purposes for the Federal Government. Repayment of any federal funds will be based on the date of notification.

Students must also follow the required process as set forth by their school/college for withdrawing from courses. This process often requires that a signature from a Dean or the Dean's representative be obtained on a Change of Course form. In some cases, students can complete the Change of Course form (hard copy or through the CaneLink system) without an approving signature. Change of Course forms must be submitted to the Office of the Registrar for final processing/review.

To officially withdraw from the MBA Program or Master of Science in Professional Management program, students must inform the Office of Graduate Business Programs in writing prior to the beginning of a course/term. Tuition will be refunded on a prorated basis based on the number of class meetings attended. No tuition refund will be granted when class attendance has exceeded 50% of class meetings. For further information contact: Office of Graduate Business Programs, 305-284-2510, email (mba@miami.edu).

Military Withdrawal

Tuition refunds of 100% are granted to students who withdraw due to military service, provided they do not receive credit hour for the course (see below under "Credit Hour for Courses After the 12th Week of the Semester").

If you receive federal financial aid and withdraw before you complete 60% of the semester, a pro rate calculation will determine the amount of financial aid you have earned. It is based on the amount of time you were enrolled. This calculation is independent of any charges incurred at the university.

Credit Hour for Courses After the 12th Week of the Semester

The following statement of policy was adopted by action of the Academic Deans' Council April 14, 1967:

1. On recommendation of the Dean of the school or college, students who withdraw after the 12th week of the semester because of official orders to active duty with the Armed Forces of the United States may be awarded credit hour in any course in which they have achieved a C or better up to the time of withdrawal. Instructors must certify that the student had achieved satisfactory accomplishment on the basis of previous work in the course by awarding an appropriate grade. Accomplishment of less than C should be entered on the permanent record as a withdrawal without prejudice (W).
2. Credit hour granted for a course under this policy should count toward graduation.
3. There should be no refund of tuition for courses for which credit hour has been granted. Refunds of courses not awarded credit hour should be on the same basis as complete withdrawals for military service.
4. The above recommendations are procedures for determining the awarding of credit hour and do not release the student from the usual withdrawal procedures.

Veterans and children of deceased or totally disabled veterans attending the University as students under the government's educational benefits bills must also clear their withdrawal with the main campus Veterans Affairs Officials in the Office of the Registrar who can be contacted at:

Phone: 305-284-2294 or
Email: registrar@miami.edu

Leave of Absence

Leave may be obtained by petition of the Program Director followed by the approval of the Dean of the Graduate School. Leave of Absence officially stops the time to completion clock. The Petition for Leave of Absence form may be found on the Graduate School website (<http://grad.miami.edu>).

Grades and Credit Hours

The same letter grades are used for graduate and undergraduate students, but with somewhat different meaning.

A	Excellent accomplishment
B	Good accomplishment
C	Fair, but below that expected of graduate students (C- is the lowest passing grade. Some programs may require higher standards.).
S	Symbol used for acceptable (U-unacceptable) thesis, dissertation, practicum, and internship credit hour. It may be used for regular courses under special circumstances with the prior approval of the instructor, department chairman, and the Dean of the Graduate School. The Graduate School considers a grade of "S" to indicate a minimum of a 3.0 GPA in a graduate course if a student has taken no prior coursework on the graduate level. A grade of "S" reflects that a student is in good academic standing.
D	Poor (not acceptable for credit hour toward the advanced degree)
F	Failure
W	Course dropped prior to the last day for withdrawing from classes as published in the official calendar of the university. Courses dropped after last date must have approval of Dean of the Graduate School. Credit hour can be earned only by successful repetition of the course.
I	Incomplete work in passing status with the instructor's permission to complete the course. (Not to be used for thesis or dissertation credit hours). The "I" should be changed to a letter grade within one (1) calendar year after it is given, unless the Academic Dean of the student's primary school or college and the Dean of the Graduate School approve the delay. If the "I" is not changed within one year, credit hour can be earned only by successful repetition of the course. (Note: Fellowships and financial aid may be withdrawn if there is an excess accumulation of "I"s on a student's transcript).
NG	Symbol assigned by Enrollment Services indicating that the instructor has not yet reported the student's grade. For a student to receive credit hour for the course, the instructor must report a passing grade prior to the student's graduation. ¹

¹ Faculty Senate Legislation #85005(B)

An average of B (3.0) is required for a graduate degree, and no "D" credit hour may be counted toward the degree. All work leading to the graduate degree and taken as a graduate student will be counted in computing the quality point average, including courses graded "D".

No transferred credit hours are calculated into the University of Miami G.P.A.

Award of Academic Merit

Students who obtain a 3.8 G.P.A. or better will receive an Award of Academic Merit from the Graduate School. The Award is posted on the transcript.

Quality points are awarded as follows:

A+	4.00
A	4.00
A-	3.70
B+	3.30
B	3.00
B-	2.70
C+	2.30
C	2.00
C-	1.70
D+	1.30
D	1.00
F	0.00

The quality point average is then determined by dividing the total of quality points earned by the total of credit hours attempted. The symbols "S", "W", and "I" are not counted as credit hour attempted.

Graduate Repeat Rule

A student may repeat a course *in which a failing grade was earned*, but the repetition of the course will not eliminate the previous grade from the record. A course may be repeated only once unless written authorization is provided by the Dean of the Graduate School. All grades are included in the computation of the quality point average. If a course in which an unsatisfactory grade (as determined by the program advisor) was earned is repeated and the repeat grade is a "C-" or higher, the number of credit hours required for graduation will be increased by the number of credit hours repeated.

Graduate School of Business Repeat Rule

Graduate students in the Miami Business School who fall below the 3.0 GPA may be placed on academic probation. Within one semester after their GPA falling below 3.0, Master's students wishing to repeat a course may petition their program director to do so. If the petition is approved by the Graduate Program Director, the grade obtained in their second attempt will replace the original grade for purposes of calculating their GPA for clearance for graduation only. Authorization to repeat a course is limited to courses in which an unsatisfactory grade was earned (as determined by the Graduate Program Director). Additionally, a course may be repeated only once and students may not repeat more than two courses. The student's transcripts will continue to show all attempts and the GPA computation will include all grades earned for purposes other than computing the GPA for clearance for graduation. If a course in which an unsatisfactory grade of lower than a B- was earned is repeated and the repeat grade is "C-" or higher, the number of credits required for graduation will be increased by the number of credits repeated. Registrations which involve repeating a course in which a grade of "A" or "B" has already been earned may not earn quality points or credit hours, nor count as credits attempted.

Graduate Student Grade Appeal Process

The Academic community is unanimous in its position that the grade an instructor assigns to a student is the instructor's responsibility and privilege. Any effort to alter this would be a violation of academic freedom. It is the instructor's responsibility to establish criteria for assigning grades. Grounds for appeal of how a grade was assigned are:

1. Award of a grade based on the student's race, religion, color, sex, age, disability, sexual orientation, gender identity or expression, veteran status, national origin or any other characteristic set forth in the University's Non-Discrimination Policy;
2. Award of a grade based on conduct that violates the University's anti-harassment or anti-retaliation policies; or
3. Failure to adhere to the grading criteria established for the course;
4. Violations of other policies/procedures for grading that are clearly defined in the *Faculty Manual*.

The Faculty Senate Student Affairs Committee (FSSAC) has responsibility for graduate student grade appeals, except for MD and JD programs. To facilitate grade appeals from graduate students, the FSSAC will have a non-voting *ex officio* faculty representative of the Graduate School. The FSSAC reviews graduate student grade appeals that have not been resolved at the department, school/college, or Graduate School levels. The FSSAC reserves the right to not hear appeals that require extensive knowledge of specialized or technical issues, including but not limited to, dissertations, theses, qualifying exams, recitals, and clinical/research assignments. The Graduate School has responsibility for all other graduate academic appeals.

I. Time Constraints

The appeal process must be initiated before the completion of the following semester (i.e. Fall or Spring) of the assignment of the grade resulting in appeal and prior to the completion of all degree requirements or withdrawal from the University. Each level of appeal should aim to review the appeal

and deliver a judgement within a 20 academic day period from the date the appeal is submitted. The entire process should be completed within one calendar year. Exceptions to this deadline may be permitted by the FSSAC for good cause.

Timeline Goals:

1. Student Appeal to the Graduate School Level must follow completion of all internal (i.e., home School or College) grade resolution and/or appeals processes, and then has 20 academic days from the completion date of the internal process to contact the Academic Ombudsperson and/or directly to the Dean of the Graduate School regarding an appeal.
2. Academic Ombudsperson has 20 academic days to review, provide a preliminary assessment to the student about whether it is reviewable by FSSAC, after receiving information from the student. The student may appeal directly to the Dean of the Graduate School (step 3).
3. The Dean of the Graduate School has 20 academic days to review, decide whether to forward to FSSAC, after receiving all information from the student.
4. FSSAC has 20 academic days to review/hear appeal, and to submit recommendation to Dean of Graduate School.
5. Dean of the Graduate School has 20 academic days to review recommendation of the FSSAC, and to inform student of final decision.

II. Order of the Appeal

Attempts to resolve issues regarding a grade must be addressed to the following entities or persons in this order:

1. The faculty member of administrator responsible for the course, program or activity.
2. The department/program chair/director and/or administrative superior(s) of the faculty member or administrator.
3. The Dean or designee of the school or college offering the course, program, or activity. If the school, college or administrative unit has a committee constituted to hear graduate student appeals, that committee must be consulted before proceeding to the next level, i.e., for advice from the Ombudsperson or appeal to the Graduate School.
4. The student is to provide the materials listed in Section IV below to the Academic Ombudsperson who will review the merits of the potential appeal, and attempt to resolve the matter. The Academic Ombudsperson, as part of his/her review should give the student a preliminary assessment as to whether the matter, as presented by the student at that time, is reviewable by FSSAC. After, and only if, all other steps are taken, the Ombudsperson may refer the matter to the Dean of the Graduate School.
5. Appeal to the Graduate School Level. If the student has exhausted all levels of appeals in their School/College and has consulted with the Ombudsperson, then the student is to provide the materials listed in Section IV below to the Dean of the Graduate School, who will review the merits of the appeal and attempt to resolve the matter. As part of his/her review should give the student a preliminary assessment as to whether the matter, as presented by the student at that time, is reviewable by FSSAC.
6. After, and only if, all the other steps are taken the Dean of the Graduate School (or designee) will decide whether or not to refer the appeal to the FSSAC. If, and only if, the Dean of the Graduate School (or designee) does so, the FSSAC shall have jurisdiction to review a grade-related appeal. As part of the request, the Dean of the Graduate School shall forward to the FSSAC, via the Faculty Senate office, the materials submitted by the student as indicated in Section IV below.

III. Faculty Senate Student Affairs Committee (FSSAC) Appeals Process

The FSSAC will review the student's written appeal (see Section IV below), confer with the appropriate faculty, administrators, and others as it deems necessary in making its recommendation to the Dean of the Graduate School. Students may present written materials to the FSSAC, or request an additional in-person meeting with the FSSAC. The FSSAC may request an interview with the student, additional information, or access to records, interviews with relevant faculty or administrators, or additional information or access to records kept by faculty or administrators.

The FSSAC will communicate its findings and recommendations to the Dean of the Graduate School. Copies shall be provided to the Faculty Senate. The final decision with respect to the grade-related appeal will be made by the Dean of the Graduate School and communicated to the student in writing. Copies shall be provided to the Faculty Senate Office and to the Chair of the FSSAC.

IV. Materials for an Appeal

When bringing an appeal, the student must state in writing issues they wish to have considered. The appeal must include:

1. An appeal letter clearly stating the circumstances of the grade as seen by the student, and offering reasons for granting the appeal.
2. The appeal letter must indicate if the student wishes to make a personal appearance and, if so, the reasons why the appearance is necessary.
3. Documents of support (e.g., examinations, term papers, syllabi, or medical documentation of illness) that the student wishes to have examined.
4. All written decisions made at earlier levels of the appeal by individual faculty/administrators, departments/program/administrative units, college or school committees, and/or deans which are available to the student or in the student's possession.

V. Other Notes and Special Considerations

If the appeal is based on or related to a charge made by the student of discrimination on the basis of race, color, national origin, religion, sex, sexual orientation, age or handicap, a representative of the appropriate University office will be contacted and, as appropriate, consulted in the appeal process.

If the appeal is based on or related to a disability:

- The ADA Coordinating Committee shall serve in an advisory capacity.
- The student is to include in the materials provided the appropriate forms from the Office of Disability Services documenting
 - An evaluation of the disability
 - Recommendations related to the disability

The FSSAC does not consider appeals based upon the grant, denial or modification of an accommodation by the Office of Disability Services. Instead, any such appeal is as prescribed by the Office of Disability Services Grievance Procedure only.

Levels of Graduate Study

Graduate study implies the need for a minimum of formal courses and a maximum of independent work under faculty supervision. Coursework, in itself, is not necessarily a determinant of graduate progress and achievement. The appropriate determinants are the ability of the qualified student to master the various qualifying and comprehensive examinations that a program requires of the student. All work taken by a graduate student in the major area or area of concentration shall be at the graduate level (600 or above). With the permission of the program of major concentration a student may take elective credit hours (not prerequisite to the major) at any level provided the following limits are observed:

Total Graduate Course Credit Hours	Maximum Course Credit Hours Below 600 Level
30	3
31 or above	6

Approval for students enrolled in a graduate degree program to take undergraduate credit hours can be made only after a minimum of 12 credit hours are completed. Undergraduate credit may not count toward the graduate degree requirements. Undergraduate credit may not be awarded retroactively, nor are credit hours accepted from another institution.

RA, TA, GA Hourly Guidelines

To receive a stipend an RA, TA, GA must be a full-time student.

Graduate students with appointments as RAs, TAs or GAs will be expected to work 20 hours per week with the exception of efforts directly required for dissertation research.

International students may work on campus provided the student is maintaining F1 status and does not work more than a total of 20 hours per week (including any off campus work the student may have been authorized to perform) while school is in session. Questions regarding work for international students should be directed to International Student and Scholar Services (<http://www.miami.edu/iss>).

Graduate students with Assistantships and Fellowships will be classified with the following designations. *(FE) Fellows, *(RA) Research Assistant, *(TA) Teaching Assistant, *(GA) Graduate Assistant, *(TR) Trainee. *Please contact the Graduate School for specific codes.

Definitions

FE (Fellow)

Responsibilities do not include the provision of direct services to the University and require internal/external fellowship support.

RA (Research Assistant)

Responsibilities are mainly conducting research and/or assisting with research projects.

TA (Teaching Assistant)

Responsibilities are mainly teaching and/or assisting in the area of teaching.

GA (Graduate Assistant)

Responsibilities are mainly in professional support of University operations and programs. Graduate students should not be hired to perform clerical duties.

TR (Trainee)

Designated as such by specific federal guidelines which indicate a complex process wherein the trainee takes on an increasingly independent role in the selection, conceptualization, and execution of research projects under the supervision of an experienced mentor.

In definitions where the word "mainly" is used, "mainly" is defined as greater than 50%.

Requirements for Teaching Assistants

1. Graduate teaching assistants who are the instructors of record and responsible for assigning grades in an undergraduate course must have a master's in the teaching discipline or 18 graduate credit hours in the discipline.

2. Graduate teaching assistants must be directly supervised by a faculty member in the teaching discipline, must attend regular in-service training provided by the Graduate School and/or provided by the specific graduate program, and must be reviewed by the supervising faculty member at least once a semester.
3. Graduate Teaching Assistants who have previous teaching experience and indication of competency may be exempted from Teaching Assistant training by the Graduate Program Director in the discipline. The Graduate Program Director must then notify the Graduate School of any exemptions that are granted.

Policy on Outside Employment for RA/TA/GA

A graduate student must have prior approval from the chair or advisor to work outside the department, since such activities might impede progress toward his/her degree. Any question or concern should be discussed with the Dean of the Graduate School.

1. A graduate student is allowed to supplement his/her stipend by tutoring undergraduate students in courses in which he/she has no direct responsibility at the time.
2. A graduate student who is teaching a class or lab of a multi-section course using a common syllabus and common exams may not tutor any student in any section of that course.
3. A graduate student, like any other member of the teaching faculty, may offer review sessions for his or her students to which he or she may invite students from other sections of the same course. The graduate student arranging such sessions may not under any circumstances take money from the students in attendance.
4. A graduate student may use his or her office for tutoring or may ask departmental permission to use a classroom or other appropriate university facility.
5. The graduate advisor or department chair may require a graduate student to limit his or her outside employment or tutoring activity if, in the view of the department, such activity is impeding the graduate student's academic progress or keeping him or her from fulfilling responsibilities within the department.
6. International students should clear their work instructions with International Student and Scholar Services. Questions regarding work for international students should be directed to International Student and Scholar Services (<http://www.miami.edu/iss>), Phone: 305-284-2928, E-mail: iss@miami.edu.

Graduation

It is the responsibility of the student to apply for graduation through CaneLink during the student's final semester before the date indicated on the Academic Calendar (<https://registrar.miami.edu/dates-and-deadlines/academic-calendars>) and the Schedule of Classes. These dates are published here (<http://www.miami.edu/index.php/registrar/calendar>). Students who previously applied for graduation but did not receive the degree must repeat the application procedure. Deadlines for the commencement program are firm. Students may walk in the commencement ceremony, but the program will indicate "in progress" if information is missing. Students will be degree candidates until they have been cleared for degree conferral by the Graduate School.

Commencement ceremonies are held in May and December only. Those completing degree requirements during the fall, spring or summer sessions may, if they wish, participate in the commencement ceremonies of the previous or following May or December. Doctoral students participating in the hooding ceremony and master's students marching in the commencement ceremony must have the approval of the graduate advisor, director, or appropriate person in the program to participate in the ceremonies.

Participation in graduation for students in all graduate programs is contingent upon the following:

1. The student must have met the requirements for his or her program.
2. The student must have a minimum of 3.00 cumulative grade point average; all students receiving master's degrees must have completed a minimum of 30 credit hours; all Ph.D., D.M.A., and Ed.D. students must have completed a minimum of 60 credit hours.
3. The student (Ph.D., D.M.A., and Ed.D. candidates) must be admitted to candidacy one semester prior to graduation.
4. The student may not have any outstanding debt including, but not limited to, tuition, fines, and fees. Tuition for the last semester of study must be paid in full by the beginning of the final semester.
5. The student must complete an electronic thesis or dissertation (ETD) according to the Graduate School's requirements and submit the final three forms, online surveys and agreements (if required) in the semester the student wishes to graduate. All students are required to adhere to the following deadlines (and the requirements associated with these deadlines) posted on the ETD website (<https://grad.miami.edu/electronic-thesis-and-dissertation>): 1) Deadline to defend the thesis, dissertation, or doctoral/lecture recital essay; 2) Deadline to submit the full draft of the thesis, dissertation, or doctoral/lecture recital essay draft for formatting review by the Dissertation Editor; 3) Deadline to produce the final PDF; and 4) Deadline for completion. It is recommended that students begin the ETD process early in the semester by discussing with their advisors a suitable timetable for completing the defense of their thesis or dissertation. Students should check the Academic Calendar (<https://registrar.miami.edu/dates-and-deadlines/academic-calendars>) for the defense deadline date set for the semester they wish to graduate. The Graduate School also encourages students to familiarize themselves with the ETD process posted on the Graduate School website (<http://grad.miami.edu>), or contact the Dissertation Editor early in the semester at grad.dissertation@miami.edu if they have questions regarding any aspect of the ETD process.

Clearance for Degree Conferral

For the Graduate School to clear a student for graduation:

1. All original documents (official transcripts from previous degrees, GRE scores, etc.) must be on record in the Graduate School (except for MBA students).
2. The Admission to Candidacy form must have been completed by the program at least one semester before graduation. The Graduate School does not require application to candidacy for master's, D.P.T., nor D.N.P. degrees.
3. Student must defend the dissertation, doctoral essay, lecture recital essay, or thesis by the deadline specified in the Academic Calendar for the semester the student wishes to graduate.
4. Student must upload one Dissertation Editor-approved PDF of the dissertation, doctoral essay, lecture recital essay, or thesis conforming in style to the standards set by the Graduate School to the ETD database and submit the final three forms to the Graduate School in the semester the student wishes to graduate. All students are required to adhere to the following deadlines (and the requirements associated with these deadlines) posted on the ETD website (<https://grad.miami.edu/electronic-thesis-and-dissertation>): 1) Deadline to defend the thesis, dissertation, or doctoral/lecture recital essay; 2) Deadline to submit the full draft of the thesis, dissertation, or doctoral/lecture recital essay draft for formatting review by the Dissertation Editor; 3) Deadline to produce the final PDF; and 4) Deadline for completion.

Class Attendance and Absences

Regular and punctual class attendance is expected of all graduate students. It is the student's responsibility to know the instructor's policies regarding examinations, penalties for absences, and late or missed work.

V.A. students will be provided a grade report at the end of each semester period. A copy of the report will be placed in the student's permanent file maintained by the Veteran Affairs Office. Because of the far-reaching effects of these revisions in the V.A. educational benefits program, it is suggested that you exercise care and judgment in your program planning and in the selection of your courses.

Student Responsibility

Standards of study and conduct in the Graduate School are set and maintained, not by fiat of the Graduate School, but rather by the faculty who determine the standards. The Graduate School through its Council sets no course requirements for a degree. It does set certain general residence, grade and examination standards. Fundamentally the Graduate School devolves responsibility upon the student and the appointed committee. Within this broad responsibility the recommendation for the degree rests with the committee.

All graduate students at the University of Miami are subject to the general standards and requirements of the University and its various departments in regard to attendance, examinations, payment of fees, and conduct, as well as to the specific requirements of the Graduate School. The graduate student is expected to assume the initiative in completing all requirements at the time specified.

To preserve its ideals of scholarship, conduct, and character, the Graduate School reserves the right and the student by his/her registration concedes the right to require the withdrawal of any student for any reason deemed sufficient by the Graduate School at any time.

It is the responsibility of the student to be informed concerning all regulations and procedures required. In no case will a regulation be waived or an exception granted because a student pleads ignorance of the regulation or asserts that he/she was not informed of it by an advisor or other authority. The student should become familiar with the Bulletin, including

1. The section presenting the requirements for the degree to be undertaken;
2. The offerings and requirements of the major department;
3. The Graduate Student Honor Code.

After the applicant has been admitted to the Graduate School but before the first registration, the student should consult the School or College and program in which the major work will be done concerning course requirements, deficiencies, if any, the planning of a program or special regulations. Programs may have additional degree requirements that are not listed in this Bulletin. All registrations require the signature of the Dean of the School or College (or his/her representative) in which the degree is to be awarded.

Only a Graduate Program, with approval of the Dean of the Graduate School, may waive requirements stated in this Bulletin.

Graduate Student Code of Ethics

Graduate students agree to abide by the Graduate Student Honor Code.

The University of Miami expects all graduate students to adhere to the highest standards of ethics and academic integrity. All forms of academic fraud are strictly prohibited. These include, but are not limited to, plagiarism, cheating, collusion, falsification, violation of professional ethics or misrepresentation of research data. Students certify that all work (whether an examination, dissertation, thesis, research paper, research project, form of creative expression, experimental data, or any other academic undertaking) submitted for evaluation, presentation, or publication meets these standards. Additionally, graduate students are expected to respect and appreciate the diversity of the community and to respect the rights of others, be they property, privacy, opinion, or expression. Any student found to be in violation of these standards is subject to disciplinary actions by the

student's program and/or the Graduate School through the process described in the Graduate Student Honor Code. All graduate students are bound by the rules and regulations of the University of Miami that apply to them.

Graduate School Grievance Guidelines

Introduction

These University of Miami Graduate Grievance Procedures provide an opportunity for the resolution of disputes involving graduate students in a fair and collegial manner. These Graduate Student Grievance Procedures supersede all prior such procedures in effect or formerly utilized at the graduate level. They do not supplant UM Students Rights & Responsibilities or any other published policy or procedure relating to graduate students.

Purview of the Guidelines

The formal grievance process described herein is intended for cases not involving grades or matters covered by the Honor Code, which have not been resolved at the department or program level, and it is available only after a final determination within the relevant School or College has been reached. Students are encouraged to seek assistance from the University Ombudsperson for possible resolution before initiating the formal graduate grievance process. The procedures set forth here are applicable to any of the following types of grievances by graduate students who are enrolled in any graduate program at the University of Miami, except exclusively in the M.D. and J.D. programs:

1. grievances alleging improper dismissal or suspension from a graduate program;
2. grievances alleging the improper withholding or termination of financial support of any kind;
3. grievances alleging any other improper treatment, either substantive or procedural, of a graduate student by a faculty member, department or program, or university agency or administrator except:
 - a. allegations of improper evaluation of the quality and/or quantity of academic work (see UM Student Rights & Responsibilities);
 - b. allegations of unfair recommendation for employment or further graduate study;
 - c. allegations of discriminatory treatment arising from the student complainant's age, race, gender, sexual preference, handicap, national origin, or religion. (Such allegations ordinarily are handled by the Office of Equality Administration).
 - d. grade appeals (certain appeals are reviewed by the Faculty Senate Affairs Committee,-FSSAC; see UM FSSAC Standard Grade Appeals Process- Graduate Students).

Constitution of the Committee and Grievance Panel

The Graduate Council Grievance Committee (GCGC) is a standing committee comprised of the Schools' and Colleges' alternate representatives to the Graduate Council. Grievances as understood herein shall be heard by *ad hoc* appeals panels, constituted from time to time by the Dean of the Graduate School to review individual graduate grievances. The grievance review panel (GRP) shall consist of five disinterested members: four faculty members of the GCGC and one graduate student appointed by the executive board of the Graduate Student Association. Notice of the constitution of the GRP shall be given by the Office of the Dean of the Graduate School in writing to all parties to the grievance within ten (10) days after the grievance review request is properly filed.

Any party to the grievance may challenge the disinterestedness of a GRP member in writing to the Dean of the Graduate School within five (5) days after notification of the appointment. The challenge must specify reasons that would prevent the committee member or graduate student from making an unbiased recommendation with respect to the grievance. If such a challenge is determined to be valid by the Graduate Dean, a substitute appointment shall be made and the process will resume accordingly.

Procedure and Time Limits for Filing a Grievance

After a final determination has been made in the relevant School or College (or by the head of the relevant administrative office in the event of a grievance against a university agency), a student who believes he or she has grounds for appeal within the purview of these guidelines may file a written grievance review request with the Office of the Dean of the Graduate School. The request shall describe the student's allegations in a clear and concise fashion and shall clearly identify the individual(s), program(s), department, School or College, and/or University agency or administrator against whom the grievance is brought. The student's written grievance review request shall be filed within thirty (30) days of the final determination. No grievance review request nor any other appeal of any kind will be granted after this time limit has expired unless a written extension of time is granted by the Dean of the Graduate School based on a written request from the grievant stating good cause.

Definitions and Assumptions

Burden of Persuasion

The burden of persuasion is on the grievant.

Final Determination

This grievance process is available only after a final determination within the relevant School or College has been reached. This provision is intended to require the grievant to exhaust the remedies available within the relevant School or College before appealing to the Graduate Dean. In the case of a student in an interdisciplinary program who does not yet have a chair and/or committee assembled, the Dean of the Graduate School shall make a final determination in the student's case subject thereafter to the appeal contemplated by this policy. An appeal of the decision of the Dean of the Graduate School allows this same procedure, except that the GRP shall be constituted by the Office of the Provost from the pool of GSGS

members. Written notice of the constitution of the GRP in the case of a student in an interdisciplinary program without a chair or committee, shall be given by the Office of the Provost to all parties to the grievance within ten (10) days after the grievance review request is properly filed. All other deadlines, requirements, procedures, and the hearing format remain the same.

Originals

Wherever possible, the party in possession of an original document in support of or rebuttal to or at issue in the grievance shall provide it to the GRP within the time frames set out in the Hearing Materials and Preparation Deadlines. If a party has only a copy of a document not received by him, her, or it, the copy shall serve as an original. Digital documents or email messages in contention shall be printed and may then serve as originals.

Party

A party is the student grievant or the individual, program, department, School or College, or University agency or administrator against whom the student brings his or her grievance.

Time Limits

All time limits shall be calculated based on working days of the Fall and Spring Semesters, excluding reading and exam periods and University holidays. Grievances originally filed after the end of the Spring Semester will be heard at the beginning of the following Fall Semester. Any stated time limit herein may be extended with the written consent of the grievant and the Dean of the Graduate School.

Written

Any document to which these guidelines refer as written signifies electronic or paper (hard) copy. Email messages and digital or other electronic versions meet the requirement that a form or notice be provided in writing.

Deadlines for Hearing Materials, Preparation, and Witness Identification

All materials to be considered for review by the members of the GRP must be submitted in writing to the Office of the Dean of the Graduate School at least fourteen (14) days before the scheduled date of the hearing, at which time such materials will be distributed to all parties to the grievance and to the members of the GRP. Thereafter, to the extent that any of the parties wishes to have additional materials considered by the GRP, such materials must be received by the Executive Assistant to the Dean of the Graduate School no later than seven (7) days before the scheduled date of the hearing, at which time all such additional written materials will be distributed to the parties as well as to the members of the GRP. Any party submitting written materials for consideration shall submit the original(s) and five (5) copies thereof to the Dean of the Graduate School at his, her, or its own expense.

The name of any witness to be called by any party at the hearing shall be provided in writing to the Office of the Graduate Dean no less than five (5) days before the scheduled date of the hearing, at which time the names will be distributed to the parties and members of the GRP.

Hearing

The grievance review hearing is chaired by a designated member of the GRP. The hearing is staffed by the non-voting Associate Dean of the Graduate School and the non-voting Executive Assistant of the Dean of the Graduate School, who will audio-record the hearing to assist the panel and Dean in rendering their decision. The audio-recording will be kept at the Graduate School for one year following the conclusion of the grievance. The hearing will proceed as follows:

1. GRP chair's introduction, summary of issues, and process overview.
2. Student's presentation of issues (15 minutes maximum).
3. University representative's presentation of issues (15 minutes maximum).
4. Optional: Presentation(s) by witnesses (limited to 3 per side and a maximum of 15 minutes total per side).
5. Questions by members of the GRP.
6. All presenters and witnesses are excused.
7. Deliberation by GRP.

Presentation of the issues should be concise and relevant. Undoubtedly the dispute is somewhat complex or it would not have reached this stage. Points of dispute or ambiguity may be summarized or illustrated by anecdote at the hearing. Experience suggests, however, that the best approach is to minimize formal presentations and allow the GRP members maximum time for questions.

GRP Decision and Authority

No additional substantive information may be submitted by any party following the hearing, unless requested by the GRP. The GRP may but need not seek additional information from other sources during its deliberations, which will be conducted in closed session. Following its deliberations, and within ten (10) days of the date of the grievance review hearing, the GRP will make its confidential advisory recommendation to the Dean of the Graduate School [Office of the Provost in the event of a student in an interdisciplinary program who does not yet have a chair or committee]. The subsequent decision by the Dean of the Graduate School [Office of the Provost], which shall be rendered within ten (10) days of the GRP's recommendation, is final.

Note: The above guidelines pertain only to matters which do not involve representation by an attorney. If an attorney is involved in the grievance, the Office of Legal Counsel at the University should be contacted.

Modifications

These procedures may be modified or withdrawn with or without notice.

Research Policies

University of Miami Policy on Inventions, Intellectual Property, and Technology Transfer

I. GENERAL

1.1

General

Although the University does not undertake research or developmental work principally for the purposes of commercialization, patentable inventions and other works with commercial application may result from activities carried out by Applicable Personnel. The University has an obligation to appropriately develop innovations to both benefit the public and generate resources that further support the academic mission of the University. The purpose of this policy is to outline rights and responsibilities regarding inventions, intellectual property and technology transfer and to provide guidelines for the protection, management and commercial application of Innovations.

1.2

The policy is applicable to:

1. All full- and part-time faculty, staff and employees, students, fellows and non- employees who use University funds, facilities or other resources, or participate in University-administered research, including visiting faculty and industrial personnel, regardless of obligations to other companies or institutions;
2. Innovations conceived, created, made or disclosed on or after the Effective Date of this policy, and to those prior Innovations disclosed to the Office of Technology Transfer (OTT) as agreed by Applicable Personnel.

1.3

Responsible Official: The Provost is responsible for administration of this policy.

Policy Review: The Technology Transfer Policy Committee (TTPC) is responsible for review of proposed changes to the Faculty Manual in relation to this policy.

II. DEFINITIONS and ABBREVIATIONS

For the purposes of this policy, the following definitions shall apply.

Applicable Personnel: all full- and part-time faculty, staff and employees, students, fellows and non-employees who use University funds, facilities or other resources, or participate in University-administered research, including visiting faculty and industrial personnel, regardless of obligations to other companies or institutions.

Commercialization Costs: costs incurred by the University for evaluating, protecting, defending, enforcing, marketing, negotiating, licensing, assigning, transferring and otherwise commercializing Innovations and/or University owned Intellectual Property.

Courseware: course syllabi, assignments, assessments, and/or other materials that are first created and made available to students as part of the educational curriculum at the University.

Creations: copyrightable works created in the course of Applicable Personnel's scholarly and artistic pursuits, including literary works, textbooks, other scholarly books, journal articles, novels, poems, plays, musical compositions and other artistic works to disseminate for scholarly study or artistic expression; a student work created using student dedicated resources, as part of the educational curriculum at the University, including Capstone projects, papers, dissertations and articles.

Gross Revenue: the amount received by the University under a license or assignment of the University's rights in Innovations, including option or license fees, milestone payments, royalties and proceeds from sale of equity.

Incidental Use: use of none of the University's resources other than its library, limited secretarial or administrative resources, the University's computers and/or Applicable Personnel's office space. Use of University laboratories, clinics and equipment may also be construed as an incidental use in accordance with written policies jointly developed by a school or college and the TTPC.

Innovations: patentable or un-patentable inventions, discoveries, processes, compositions, research tools, data, ideas, databases, know-how, copyrightable works that are not scholarly or artistic Creations and tangible property, including biological organisms, engineering prototypes, drawings,

and software created, conceived or made by Applicable Personnel within their normal duties (including clinical duties), course of studies, field of research or scholarly expertise or making more than Incidental Use of University's resources.

Intellectual Property (IP): patent applications and patents, copyright registrations and renewals, trade secrets and trademarks. IP may be categorized as Creations or Innovations as detailed in Section III.

Net Revenue: Gross Revenue, less all Commercialization Costs and a 15% deduction for administration of OTT.

CDA: Confidential Disclosure Agreement

IP: Intellectual Property

MTA: Material Transfer Agreement

OTT: Office of Technology Transfer

TTPC: Technology Transfer Policy Committee

III. OWNERSHIP

3.1

Consistent with long-standing academic tradition, Creations are owned by the author(s), unless otherwise agreed in a contract between the University and Applicable Personnel, including:

1. the University has expressly commissioned the Applicable Personnel in writing to produce, or participate in production of, the work with University's funds for a specific University purpose;
2. the University has expressly assigned the Applicable Personnel in writing to produce or participate in the production of the work; or
3. the work is otherwise subject to contractual obligations.

3.2

Creations meeting one of the above criteria (a-c) will be treated as Innovations and shall be owned by the University.

3.3

Innovations are owned by the University; revenues derived from commercialization of Innovations will be shared with the Applicable Personnel as detailed in Section VI.

1. Applicable Personnel are required to assign and hereby do assign to the University all Innovations. This assignment includes the right for the University to claim priority and recover for third party infringement or misappropriation.
2. This assignment and abiding by this policy are conditions of employment and continued employment, access to University's resources and/or receipt of funding by the University.
3. This policy governs in the event of any inconsistent obligation to which Applicable Personnel may agree, including in any consulting agreement.

3.4

Intellectual property made or developed with not more than Incidental Use of University resources and not within normal duties (including clinical duties), course of studies, field of research and scholarly expertise of Applicable Personnel will belong to the Applicable Personnel. If Applicable Personnel are uncertain about the disposition of rights, they should make full disclosure of the potential Innovation or Creation to the OTT for determination of rights, as further described in Section 5.2.

3.5

Criteria for ownership of Courseware developed by Applicable Personnel follow the guidelines for Creations and Innovations.

IV. ADMINISTRATION OF THE POLICY

4.1

The Provost is responsible for oversight and administration of this policy. The Director of the OTT reports to the Provost or Provost's designee.

4.2

The TTPC is a committee consisting of seven voting faculty members, including the Provost or Provost's designee, the Vice Provost for Research and 5 additional faculty members, chosen by the Provost in consultation with the Faculty Senate chair. The Director of OTT and a member of the Office of General Counsel will serve as advisors to the TTPC. The five faculty members will serve two-year terms, which may be renewed.

1. The TTPC is charged with review of proposed changes to the Faculty Manual in relation to this policy;

2. TTPC proposed changes must be approved by the Provost and subsequently undergo the standard procedure for changes to the Faculty Manual, with final approval by the President and the Board of Trustees; and
3. The TTPC will meet at least annually and otherwise as necessary and will be chaired by the Provost or Provost's designee.

4.3

The OTT:

1. Evaluates Disclosure Forms and determines the commercial potential and the most appropriate mechanism, if any, for protecting each Innovation;
2. Works with Applicable Personnel to identify and engage potential commercial partners for their Innovations;
3. Undertakes negotiation and execution of agreements pertaining to Innovations, including licenses, data transfers, assignments, Material Transfer Agreements (MTA) that cover transmission of Innovations (outbound MTA), as well as Confidential Disclosure Agreements (CDA);
4. Receives Gross Revenue and distributes Net Revenue received from commercialization of Innovations; and
5. Interacts with University's research, compliance and finance units, including the Office of the Vice Provost for Research, Office of General Counsel, Office of Research Administration, Business Services, University Advancement, University Compliance Services and other units to ensure appropriate conduct of business and protection of the University's interests and recommend contractual language related to all Innovations.

4.4

Appeal Process. Disagreements with decisions made pursuant to this policy should be addressed to the Provost for final resolution.

4.5

Failure by Applicable Personnel to comply with the requirements of this policy may constitute unprofessional conduct and may lead to penalties including:

1. The individual being deemed ineligible to hold principal investigator status on sponsored projects;
2. The individual being deemed ineligible to enter into technology transfer agreements; and
3. In the case of University Faculty, referral to the Senate's Committee on Professional Conduct for such other sanctions as it may recommend to the President and/or the Senate.

V. DISCLOSURE, REVIEW AND PROTECTION OF INNOVATIONS

5.1

Disclosure

1. Applicable Personnel are required to make timely and complete disclosure of Innovations to the OTT via submission of a Disclosure Form, available on the OTT website; early disclosure facilitates engagement of the OTT and allows for specific discussion and guidance toward determination of commercial potential.
2. In general, disclosure to the OTT should occur at least 45 days prior to public disclosure of the Innovations, including submitting an abstract, poster, article, grant application or talking about the Innovation outside the University; this allows time for the OTT to evaluate commercial potential and identify mechanisms for protection of the Innovation.
3. On the Disclosure Form, the Applicable Personnel will report:
 - a. the percent contribution of each of the Applicable Personnel to the Innovation;
 - b. primary department and school for each Applicable Personnel;
 - c. any center, institute or other department that supported the work that led to the Innovation;
 - d. any Intellectual Property or tangible materials of a third party, including those that were generated at a previous institution or place of employment that has relevance to the disclosure;
 - e. any non-University inventors (i.e., inventors who are not Applicable Personnel as defined in this policy), including, individuals acting as independent contractors, or individuals at other universities, institutions, companies, foundations or other entities; and
 - f. the source of funding for the work that led to the Innovation and details regarding specific technology transfer language (for example, ownership of allocations, sharing of revenue or licensing of Intellectual Property) in the funding agreements.

5.2

Review and Protection of Innovations

1. The OTT will evaluate each Innovation Disclosure Form to determine
 - a. commercial potential;
 - b. what Intellectual Property protection, if any, would be appropriate to facilitate the University's ability to incentivize investment in the commercial development of the Innovation; and
 - c. whether or not the Disclosure Form is premature or incomplete, in which case, the Applicable Personnel may be asked to resubmit the Disclosure Form when additional information is obtained.

2. Evaluation for such Innovation as described in Section 5.2(a) will be made to Applicable Personnel within 90 days of receipt of a complete Disclosure Form.
3. Applicable Personnel will cooperate with the OTT in its efforts to evaluate, protect and transfer Innovations, including executing documents and taking other actions as reasonably requested by OTT. The University encourages Applicable Personnel to participate through the OTT in the process of commercialization.
4. Applicable Personnel are required to consult with the OTT to ensure that appropriate agreements are in place prior to disclosing the University's Innovations or sending materials embodying Innovations outside the University (for example, to another university, institution, company, foundation or other entity).
5. Lack of patentability need not eliminate commercial potential for an Innovation and will not alter the University's ownership of the Innovation.
6. The OTT is responsible for directing the filing of University-owned Intellectual Property. The OTT may delegate this authority including by written agreement in connection with commercializing an Innovation. As an example, the University retains qualified law firms to draft, submit and prosecute patents.
7. The OTT decides when and whether to enter into agreements conveying Innovations and the terms and conditions in such agreements.
8. Applicable Personnel are required to record all research data and information accurately and clearly and to keep all such data in a permanent and retrievable form. In addition, with regard to a patentable Innovation, original laboratory data must be kept for the life of the patent. Tangible property, including biological materials, chemical compounds, etc., must be securely stored. All of the foregoing are the University's property. Exceptions to these requirements may be adopted in writing by the TTPC.
9. It is the University's policy to publish research results as soon as possible; however, if publication may reveal an Innovation, Applicable Personnel should seek advice from OTT as to how and when to publish the results in order that patent or other protection is not compromised.
10. Applicable Personnel are obligated to refrain from any act that would impair the University's rights in any Innovations and must maintain the confidentiality of Innovations, along with custody of applicable data and tangible property, consistent with the University's decisions regarding protection and commercialization. This is especially important when the Innovations have been supported by outside entities through a grant or contract.
11. If Applicable Personnel leaves the University, all the Innovations arising prior to their departure remain the property of the University, and cannot be practiced, including being commercialized, without the University's written agreement;

5.3

Release of Technology

1. In rare cases, the OTT may recommend that the University return the rights to an Innovation to the Applicable Personnel. When this situation occurs, the University will generally transfer its rights, and if so by in a written agreement that will allow the University to practice and have practiced the Innovation for research, education and/or patient care, at no cost, and may include other provisions to protect the University's interests;
2. Such a release will not be given until all pre-existing commitments to third parties, including sponsoring agencies, with regard to Innovations have been cleared;
3. Prior to conducting activities, including research and clinical trials, that could reasonably appear to influence the financial value of the released Innovation, the Applicable Personnel must disclose the potential conflict of interest.
4. Improvements, new developments and modifications to these returned rights, otherwise satisfying the definition of Innovations, remain subject to this policy;
5. Release may be conditioned upon reimbursement to the University for all Commercialization Costs and 10% of the Applicable Personnel's net income from the released Innovation.

VI. DISTRIBUTION OF REVENUE DERIVED FROM COMMERCIALIZATION OF INNOVATIONS

6.1

Sharing of Revenue - Guidelines

1. Multiple units may contribute to the support of work that leads to an Innovation, including the departments and schools/colleges of Applicable Personnel, as well as centers or institutes of which the Applicable Personnel are members.
2. Distribution of Net Revenue will follow the percent allocation for Applicable Personnel as agreed upon on the Disclosure Form. Absent agreement on the percent allocation among Applicable Personnel, and subject to notice of a dispute being resolved pursuant to Section 6.1(i), the Applicable Personnel will share equally.
3. Distribution to departments will follow the percent allocation for Applicable Personnel. For those schools/colleges without departments, the department share will be distributed to the school/college.
4. The Applicable Personnel are responsible for disclosing whether a center or institute has provided financial or other support for the work that led to the Innovation, including laboratory space, supplies or significant administrative support. In such cases, upon disclosure of the Innovation, the involved department (or school/college in the absence of departments) will work with the center or institute to agree upon sharing of the department Net Revenue with the center or institute. As centers and institutes often include faculty from more than one school or college, the Provost or Provost's designee will mediate disputes related to the department's share.

5. In the event that departments, centers or institutes from different schools/colleges contribute to an Innovation, sharing of Net Revenue will follow the allocation as determined in 6.1(c) and (d).
6. University may make alternative arrangements for distribution of Gross Revenue or Net Revenue, whether due to co-ownership, grant, funding contract, gift or other agreement, only after review and approval of the Provost or Provost's designee.
7. The OTT is authorized to delay distribution where additional expenses are anticipated, including those associated with filing for patent protection in foreign countries.
8. The University has no fiduciary or other duty regarding whether or when to liquidate equity. Unless equity is liquidated, there is no Net Revenue to distribute.
9. Any dispute regarding the distribution of Net Revenue may be addressed as set forth in Section 4.4 of this policy.

6.2

Formula for Sharing of Revenue

1. Accrued as a result of Innovations licensed or assigned prior to the effective date of this policy, and in the absence of special funding/gift agreements:
 - a. Commercialization Costs will be deducted from Gross Revenue; this does not include 15% for administration of OTT; and
 - b. The first \$1,000 of cumulative Net Revenue shall be paid to the Applicable Personnel
2. Cumulative Net Revenue will then be distributed 1/3 to the Applicable Personnel; 1/3 to the departments of the Applicable Personnel and 1/3 to the University.
 - a. Accrued as a result of Innovations licensed or assigned on or after the effective date of this policy, and in the absence of special funding/gift agreements:
 - b. Commercialization Costs will be deducted from Gross Revenue; however, the 15% for administration of OTT will not be deducted from Gross Revenue until initial cumulative Net Revenue equal to \$25,000 has been distributed to the Applicable Personnel; after which
 - c. Ongoing Commercialization Costs will be deducted from cumulative Gross Revenue, followed by deduction of 15% for administration of OTT;
 - d. Cumulative Net Revenue greater than \$25,000 and up to \$2 million will be distributed 1/3 to the Applicable Personnel, 1/3 to the department(s), as well as institutes and centers, as described in Sections 6.1c - 6.1e and 1/3 to the University.
 - e. Cumulative Net Revenue greater than \$2 million will be distributed 1/3 to Applicable Personnel; 1/3 to the school/college, with the Dean of the Applicable Personnel school/college having the authority to determine sharing of Net Revenue between department(s)/center(s)/institute(s) within the school/college; 1/3 to the University.

6.3

Additional Information

1. In the absence of extenuating circumstances, distributions of Net Revenue will generally be made within three months of receipt but no less than semi-annually.
2. If Applicable Personnel should change departments within the University, the department share of revenue will generally not follow the Applicable Personnel, except under special circumstances and only as agreed upon by the Dean of the school/college in which the original department resides.
3. If an Applicable Personnel should leave the University, the portion allocated to the Applicable Personnel's department will remain with the department.
4. Payments made to Applicable Personnel must be made to the Applicable Personnel and cannot be assigned by the Applicable Personnel to other parties or entities, except upon the Applicable Personnel's death, in which case the personal representative of the Applicable Personnel's estate will notify the University Controller's Office, in order to ensure that the appropriate paperwork and permissions are received for distribution of the revenue to the Applicable Personnel's estate/heirs.

Admission

Eligibility for Admission

In addition to holding the baccalaureate degree from an institution accredited by SACS or another regional accrediting body (or equivalent credential for international applicants), the applicant for admission to the Graduate School should have the prerequisite coursework required by the program to which he/she is applying. In general, those applying for graduate admission should have achieved an overall average grade of "B" or better (3.0 G.P.A. on a 4.0 scale). International students will be required to give evidence of adequate knowledge of English through a TOEFL or IELTS test score. University of Miami faculty members above the rank of instructor are not eligible to apply for the doctorate at the University of Miami. (Note: Faculty from the School of Nursing and Health Sciences and from the Physical Therapy program are permitted to pursue doctoral degrees in their home program/school.)

For specific admission requirements see also statements of the various programs.

Admission of a student to the University of Miami for any semester does not imply that such student will be re-enrolled in any succeeding academic semesters.

All those wishing to take courses for graduate credit hour, whether or not they wish to become candidates for a degree, must make application for admission directly to the program of interest prior to registration.

Requirements for Admission Application

1. The completed application form.
2. Official transcripts of **all** college work, both undergraduate and graduate. International applicants must have their educational credentials earned outside the United States verified by an approved international credentialing evaluation service. Contact the specific program to which you are applying for details on this process.
3. The official score report of the appropriate entrance examination.

GRE	All applicants must submit recent (within five years) Graduate Record Examination (GRE) scores which include 1) the aptitude portion (verbal & quantitative); 2) the most relevant advanced test in the major field if required by the program. GRE scores are valid for 5 years after the test date.
GMAT	Applicants for the Master or Ph.D. of Business Administration, the Master of Professional Accounting, or the Master of Science in Taxation must submit the Graduate Management Admissions Test (GMAT) scores. GMAT scores are valid for 5 years after the test date.
TOEFL/IELTS	International applicants whose native language is not English must take the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) in addition to the Graduate Record Examination or Graduate Management Admissions Test. The TOEFL and IELTS scores are valid for 2 years after the test date.

4. Letters of recommendation sent directly to the graduate program director of the academic program.
5. Other requirements may be required/requested by individual programs. Contact the specific program to which you are applying for their requirements, or for exemptions from the entrance examination.
6. Application fee of \$85 for all graduate programs except master's and doctoral programs in the Frost School of Music, which have a \$100 application fee.
7. All materials and the fee should be sent directly to the program as indicated on the application.

Materials submitted in support of an application cannot be released for other purposes nor returned to the applicant.

Categories of Admission

1. *Regular* admission with or without specified deficiencies. Under circumstances in which it is difficult to evaluate the academic background of intellectually qualified applicants, they may be admitted with specified deficiencies based on evaluative criteria established and maintained by the school or college. Such status is often appropriate for international students or students with extensive professional experience relevant to the desired discipline. The Graduate School allows only one semester in deficiency status. Graduate Council notification is required for programs requesting deficiency status beyond one semester. For all regular admissions with deficiencies, students must receive a list of documented requirements to remove the deficiency and specific milestones. Students who fail to qualify at the end of that time will be requested to withdraw from the Graduate School.
2. *Post-Baccalaureate*. This category provides an opportunity for graduate study for
 - a. qualified applicants who, for good reason, do not wish to work toward an advanced degree. This would be appropriate for those students who have special objectives for professional study or scholarly work;
 - b. students enrolled in a graduate program elsewhere but desiring to earn graduate credit hour at the University of Miami for the purpose of transferring it to the other institution;
 - c. students already holding the master's degree or doctorate but who desire additional coursework in their field.
Those admitted to a post-baccalaureate status should realize that their future admission to regular status is improbable unless they achieve the qualifications originally appropriate to admission to those categories. This is to say that the mere accumulation of graduate course credit hours is not sufficient to permit entrance into another graduate category. No more than a total of 12 credit hours may be taken while in post-baccalaureate status.

Transient students described in (b) above should have sent to the Graduate School a letter from the Dean of the School or College of the student's program from which they expect to earn a degree, stating that they are in good standing there and have permission to transfer credit hour. If possible, this letter should indicate specific courses to be taken. The students described in (c) above should have a transcript showing their most recent graduate work and graduate degree [to be sent directly by the issuing institution to the Graduate School].

3. *Certification/Professional Goals*. This category provides an opportunity for graduate study for qualified teachers or professionals who do not wish to work toward an advanced degree but, who for professional reasons, need to continue to take graduate courses and have already taken 12 credit

hours in Post-Baccalaureate Status. No credit taken in this status can be applied toward a graduate degree at the University. A letter explaining the need for the course work by the student's employer must accompany the application.

Every applicant for admission can be assured that all credentials will be carefully studied in an effort to select appropriately qualified students. Each application for admission is examined by the members of the faculty responsible for the graduate program. The program informs each applicant of the results.

It is expected that most applicants for admission will be candidates for an advanced degree. Except under unusual circumstances those who already hold an advanced degree are not admitted to candidacy for the same degree. Graduate programs vary as to whether students who do not hold the master's degree are required to initiate graduate studies at that level.

Applicants should note the following:

1. M.B.A. applicants should send applications and all documents to:
The Office of Graduate Business Programs
Miami Business School
P.O. Box 248505
Coral Gables, FL 33124
For further information you may contact mba@miami.edu
2. all other correspondence, applications, and documents should be sent directly to the academic department;
3. no action is taken until a file is complete and all documents are available;
4. application files should be complete at least one month before registration, much earlier for some applications, as specified elsewhere in this *Bulletin*;
5. admission to graduate status does not imply admission to candidacy for a degree;
6. some programs close admissions early because of limited capacity;
7. materials submitted in support of an application are not released for other purposes and cannot be returned to the applicant.

International Students Admissions

All international students who have been admitted to a program of full-time study at the University of Miami need to enter the U.S. on a student visa. To apply for an F-1 visa, you must provide the U.S. Embassy or Consulate with a Form I-20 or DS-2019, passport, statement of funds, and other documents as required by the U.S. Embassy or Consulate. Please visit the International Student and Scholar Services (<http://www.miami.edu/iss>) (ISSS) website for further information regarding visas, travel, pre-arrival information, etc. The Form I-20 or DS-2019 can only be issued after you have been admitted and have submitted proof of adequate financial support for your studies and living expenses. For questions regarding issuance of the Form I-20 or DS-2019, please contact your individual department.

Readmission

Students who have not been continuously enrolled must request readmission and adhere to the readmission deadlines outlined in the Academic Calendar (<https://registrar.miami.edu/dates-and-deadlines/academic-calendars>). Contact the appropriate program office well in advance of registration. If additional college work has been completed elsewhere since the last enrollment at the University of Miami, an official transcript of this will be required. Recency of credit hour rules will apply. The application for readmission to the Graduate School may be found on the Graduate School website (<http://grad.miami.edu>). If you are an applicant for readmission and also an international student, please contact International Student and Scholar Services at iss@miami.edu and 305-284-2928.

Dual Degree and Accelerated Degree Programs

The University offers unique combined degree programs that culminate with students receiving both the undergraduate and graduate degrees concurrently or an accelerated program of study in which they receive an undergraduate degree and then a graduate degree the following year.

These programs are intended for exceptional students to acquire both undergraduate and graduate degrees, in five years rather than the 4 plus 2 years (approximately) that is traditionally expected.

Please note: Many financial aid programs, including those offered by the University and the federal and state governments are restricted to coursework required to complete an undergraduate degree.

Requirements

Students must have undergraduate student status and a cumulative G.P.A. of at least 3.0 at the time of application. Students should discuss the program and possibility of entering the program with an academic advisor. The program may require application at the time of matriculation to the undergraduate degree or prior to the beginning of final exams in the junior year.

Undergraduate students must take the GRE Examination before the end of their classification as a senior and attain a combined score of more than 297 on the verbal and quantitative portions.

Once admitted into a dual degree or accelerated program:

In their senior year, students may take a maximum of 12 graduate credit hours, with a maximum of 6 credit hours per semester. While in senior status, to register, students must complete and submit the Graduate School's Application for Undergraduates to Take a Graduate Course form which is available on the Graduate School website (<https://grad.miami.edu>). This form must accompany the Add/Drop and/or Course Request form to ensure that students are registered with the correct registration status. Add/Drop and/or Course Request forms without this approval form will not be processed. Undergraduate students must register for courses with graduate status in the Office of the University Registrar. This process cannot be facilitated via online registration.

Financial Implications

Many financial aid programs, including those offered by the University and the federal and state governments are restricted to coursework required to complete an undergraduate degree.

Students are eligible for undergraduate aid only as long as they are undergraduates. Students enrolled in combined or accelerated degree programs are permitted undergraduate federal and University aid for a maximum of four academic years or to the point at which the number of graduate credit hours in a term exceeds the number of undergraduate credit hours, whichever comes first. During that time frame the student's undergraduate enrollment status will be determined using only undergraduate level courses in which the student enrolls. Graduate level courses in which the student enrolls during such semesters will not be used to determine the student's undergraduate enrollment status. Once a student is registered at the graduate level for financial assistance his/her status is considered graduate for all subsequent semesters.

Once registered as a graduate student, a student cannot revert to undergraduate status.

For further information, contact the Office of Financial Assistance at ofas@miami.edu, call 305-284-6000, or visit the office in the Whitten University Center.

Graduation Clearance Requirements

For dual degree programs, the student must apply for undergraduate and graduate graduation at the same time. Degrees from dual degree programs are conferred at the same time.

For accelerated degree programs, the student must apply for undergraduate graduation in one semester, and for graduate graduation in a subsequent semester.

The student must meet the requirements of the Graduate School specified in the Bulletin for the awarding of the graduate degree.

Students enrolled in a dual degree or accelerated program can take a **maximum of 6 graduate credit hours per semester in their senior year for a maximum of 12 graduate credit hours** without incurring additional costs **if they are full-time undergraduate students** during this period.

Students should register for courses towards their graduate degree as "G" credit hours and not as "U" credit hours. These registrations must be completed prior to taking courses. Retroactive add/drops will not be processed.

Summary of Guidelines for Dual Degree and Accelerated Programs

- Take at least 12 undergraduate credit hours per semester. This qualifies you for the opportunity to take up to 6 graduate credit hours per semester at no additional cost.
- Graduate credit hours can be taken only in the senior year in a dual degree or accelerated program (based on the number of credit hours earned towards the undergraduate degree).
- The maximum number of graduate credit hours allowed per semester is 6.
- The maximum number of graduate credit hours the undergraduate student can take at no additional cost is 12.
- The Application for Undergraduates to take a Graduate Course form should be completed and all signatures must be obtained before registering for graduate credit hours.
- The student can change his/her status to "graduate", or his/her status might be determined to be "graduate" for financial aid purposes during or at the completion of the senior year. This will make the student eligible for graduate financial aid (for US citizens or permanent residents).
- The student cannot be a full-time undergraduate (taking 12 or more undergraduate credit hours) and a full-time graduate (taking 9 or more graduate credit hours) student at the same time.
- Once a student's status changes to graduate (or after they have taken a full load of graduate credit hours) his/her status cannot revert to undergraduate status.
- In a dual degree or accelerated program, an undergraduate student cannot take graduate credit hours in any other year except in the senior year.
- The student should avoid taking any undergraduate credit hours after the student's status has changed to graduate.

For University of Miami Undergraduates

Undergraduates Taking Graduate Coursework. University of Miami undergraduates within 30 credit hours of meeting the requirements for the Baccalaureate Degree may be considered for concurrent admission to graduate study in non-degree graduate status, and in this status may take

and receive credit hour for graduate courses, while completing the requirement for the baccalaureate. The Graduate School's Application for Undergraduates to Take a Graduate Course form is available on the Graduate School website (<https://grad.miami.edu>).

Admission to Graduate status requires:

1. Must have a minimum of 3.000 G.P.A.
2. The submission of an Application for Undergraduates to Take a Graduate Course form (available on the Graduate School website (<https://grad.miami.edu>)) which will not require the application fee;
3. The written approval of the Chairman of the Department, the Dean of the Undergraduate School or College, and the Graduate School Representative **prior to registration**.

Admission to Graduate status does not automatically admit the student, upon graduation, to status as an applicant for a graduate degree at the University of Miami.

The graduate credit hours earned may NOT be used to meet undergraduate graduation requirements or be used to meet the 120 credit hour requirements at the University of Miami.

No more than 6 credit hours may be taken in one semester, and no more than a total of 12 credit hours may be taken while in graduate status. Students may take no more than 15 credit hours of combined undergraduate and graduate courses per semester.

Students electing graduate status must register and be processed centrally at the Office of the Registrar, 305-284-2294.

Master's Degree

The minimum residence requirement is two semesters in full-time study or the equivalent in part-time work. In practice, most students need at least three semesters, or two semesters plus summer work, to complete degree requirements.

Foreign Language

The requirements in a foreign language or languages are established by the student's program. In those cases where the program deems it necessary that the student have competency in a foreign language, the student will be required to demonstrate such competence by examination in one or more languages. The choice of language or languages required will be by the program.

Thesis

Decision as to the thesis subject must be approved by the program. The thesis committee will consist of not less than three members. The committee chair must be Regular Faculty from the student's program or department of concentration (this includes secondary appointments). In addition to the chair, one of the remaining members must also be Regular Faculty or have Graduate Faculty status in the student's program or department of concentration; the third member must be an outside member. "Regular Faculty" are faculty having tenured or tenure-earning appointments of a program or department. A thesis or dissertation committee cannot be chaired by a person unless they hold a higher or equivalent degree as the candidate for the graduate degree. Exceptions to the committee composition may be approved by the Chair of the Department and Dean of the Graduate School. A program may require additional members.

The committee is nominated by the Graduate Program Director of the program concerned. The duties of the thesis committee are similar to those of the dissertation committee. The student who presents a thesis must enroll for at least 6 credit hours of thesis. Ordinarily no more than 6 credit hours may be granted.

The Dissertation Editor will provide information on the guidelines and deadlines that will become critical in the final months of the degree process and this information is located on the Graduate School website (<https://grad.miami.edu>). The Graduate School office telephone number is 305-284-4154 and the email address is grad.dissertation@miami.edu.

Master's degree students who are required to write a thesis must defend their thesis by the deadline specified in the Academic Calendar (<https://registrar.miami.edu/dates-and-deadlines/academic-calendars>) and on the ETD website (<https://grad.miami.edu/electronic-thesis-and-dissertation>), upload one Dissertation Editor-approved PDF conforming in style to the formatting standards set by the Graduate School to the ETD database, and submit the final three forms to the Graduate School in the semester the student wishes to graduate. Final forms include one Certificate of Defense Approval form, one ETD Final Content Approval form, and one ETD Availability Agreement form. The forms are available on the Forms page of the Graduate School website. (<https://grad.miami.edu/policies-and-forms/forms>)

All students are required to adhere to the following deadlines (and the requirements associated with these deadlines) posted on the ETD website (<https://grad.miami.edu/electronic-thesis-and-dissertation>): 1) Deadline to defend the thesis, dissertation, or doctoral/lecture recital essay; 2) Deadline to submit the full draft of the thesis, dissertation, or doctoral/lecture recital essay draft for formatting review by the Dissertation Editor; 3) Deadline to produce the final PDF; and 4) Deadline for completion.

It is the duty of the student to acquire a copy of the guidelines for preparing theses and dissertations and to conform to the requirements therein. It is recommended that students begin the process early in the semester by discussing with their advisors a suitable timetable for meeting these

deadlines. All information pertaining to the formatting and electronic guidelines for electronic thesis and dissertation submission can be found on the Graduate School website (<https://grad.miami.edu>). The Graduate School also encourages students to contact the Dissertation Editor early in the semester at grad.dissertation@miami.edu if they have questions regarding any aspect of the ETD process.

Electronic Theses and Dissertation (ETD) Embargo Policy

Graduate students can elect to withhold their electronic thesis or dissertation for up to two years before the work is available for download from the University of Miami's Scholarly Repository (<http://scholarlyrepository.miami.edu>). The metadata for all theses and dissertations regardless of the availability option elected (i.e., open access, UM campus only, or embargo) will be immediately available for viewing in the university's Scholarly Repository after the Dissertation Editor has approved and released the thesis or dissertation to the repository. If embargo is elected by the student, the existence of the student's information page will appear in the Scholarly Repository right away displaying title, defense date, abstract, committee, keywords, etc., but the PDF of the electronic thesis or dissertation will not be downloadable until the term of embargo elected has expired. After the elected embargo period has expired the electronic thesis or dissertation will be released for open access in the Scholarly Repository. Students requesting embargo should carefully review the details of embargo election described in the ETD Availability Agreement form posted on the Graduate School website (<https://grad.miami.edu>) to ensure they fully understand the terms of access for their embargoed work.

Final Examination

A final public oral defense of the thesis is required. However, none but the members of the thesis committee may interrogate the candidate. In addition there may be required, if desired by the program, a final written integration examination to test the candidate's ability to integrate the whole graduate program and the thesis in relation to it. These examinations must be held at least two weeks prior to commencement.

Research in Residence

Once a student has completed all course and required research credit hours, he or she must enroll in Research in Residence status until the degree has been granted. Research in Residence status is considered full-time enrollment. Time restrictions on obtaining degrees will be strictly enforced and can be waived only by the Dean of the Graduate School. (See Recency of Credit and Time to Completion sections of the Bulletin.) Research in Residence students, while not required, may purchase or receive any prerequisites that are normally available to graduate students.

Comprehensive Examination

In most master's programs (and some doctoral programs) a comprehensive examination, either written, oral, or both, is a requirement. When the thesis is not a part of the program, an examining board, at least one of whose members must be a regular member of the Graduate Faculty, will be appointed by the program.

A student failing the comprehensive examination may be allowed one opportunity to retake it if the student's committee so advises. The re-examination may not be taken during the same semester or summer session, and must be taken within one calendar year.

Transfer of Credit Hour

Upon recommendation of the major program and the approval of the Graduate School, a maximum of 6 credit hours of graduate credit hour, with grades of B or above, may be transferred from another accredited graduate institution, in partial satisfaction of a master's degree requiring less than 36 credit hours. 9 credit hours of graduate credit hour may be approved for transfer to a degree program requiring 36 credit hours or more. Work taken more than six years prior to transfer will not be accepted. All work transferred is subject to examination by the program. Any student wishing to transfer credit hour must first be admitted to a graduate program at the University of Miami. The satisfaction of the requirements of another university does not relieve the student from the University of Miami's requirements. An official transcript of work to be transferred must be on file in the Graduate Office. Credit hours that pertain to or have been counted toward another degree cannot be transferred. Students enrolled in the Master of Business Administration program are not eligible for credit hour transfers.

Exceptions must be approved by the Dean of the Graduate School.

No transferred credit hours are calculated into the University of Miami G.P.A.

A Second Master's Degree

A student enrolled in a University of Miami master's degree program or holding a University of Miami master's degree may earn a second master's degree in a related area at the University by completing a minimum of 21 credit hours in residence toward the second degree, as long as all program and admission requirements for the degree are met and the total credit hours for both masters degrees is at least 60 credit hours. Each degree must have a separate thesis if two thesis options are elected. The second program decides if the areas are related enough to qualify for the reduced number of credit hours. The student must contact the second program during the application process for the second program to determine if the areas are related enough to qualify for the reduced number of credit hours.

Doctoral Degree

(For Ph.D., D.M.A., and Ed.D. candidates only)

General

The Graduate School does not specify course requirements for the Ph.D. However, the Graduate School will not, ordinarily, approve the taking of the qualifying examination until the student has had a minimum of one continuous academic year of graduate work in courses, seminars, and directed or tutorial study. 60 credit hours beyond the baccalaureate degree are the minimum requirement for the Ph.D., and not less than half of the total credit hours must be in work open only to graduate students. At least 24 credit hours must have been taken in residence at the University of Miami. A minimum of 12 dissertation credit hours must be taken. Graduate students studying for the Ph.D. who have received their master's degree in the same field must take at least 24 credit hours in residence at the University of Miami in doctoral status.

The specific course requirements for the Ph.D. are established by the major department or program which may require such additional graduate credit hour as it deems necessary. Such requirements will be found in that part of the Bulletin which lists course offerings.

Dissertation

A student must take a minimum of 12 credit hours of dissertation research except where otherwise stated. Not more than 12 credit hours of research may be taken in a regular semester, nor more than 6 in a summer session.

Ph.D., D.M.A., and Ed.D. degree students must defend their dissertation, doctoral essay, or lecture recital essay by the deadline specified in the Academic Calendar (<https://registrar.miami.edu/dates-and-deadlines/academic-calendars>) and on the ETD website, upload one Dissertation Editor-approved PDF conforming in style to the standards set by the Graduate School to the ETD database, complete any online requirements, and submit the final three forms to the Graduate School in the semester the student wishes to graduate. Final forms include one Certificate of Defense Approval form, one ETD Final Content Approval form, and one ETD Availability Agreement form. All three forms are available on the Forms page of the Graduate School website (<https://grad.miami.edu/policies-and-forms/forms>).

All students are required to adhere to the following deadlines (and the requirements associated with these deadlines) posted on the ETD website (<https://grad.miami.edu/electronic-thesis-and-dissertation>): 1) Deadline to defend the thesis, dissertation, or doctoral/lecture recital essay; 2) Deadline to submit the full draft of the thesis, dissertation, or doctoral/lecture recital essay draft for formatting review by the Dissertation Editor; and 4) Deadline for completion.

The candidate is well advised to have a final, acceptable typescript of the dissertation in the hands of each member of his/her committee a minimum of two weeks prior to the defense. It is the duty of the student to acquire a copy of the guidelines for preparing theses and dissertations and to conform to the requirements therein. It is recommended that students begin the process early in the semester by discussing with their advisors a suitable timetable for meeting the ETD deadlines. All information pertaining to the formatting and electronic guidelines for electronic thesis and dissertation submission can be found on the ETD website (<https://grad.miami.edu/electronic-thesis-and-dissertation>). It is the duty of the student to acquire a copy of the formatting guidelines for preparing theses and dissertations and to conform to the requirements therein. All dissertations are also published by ProQuest/University Microfilms, Inc. The Graduate School also encourages students to contact the Dissertation Editor early in the semester at grad.dissertation@miami.edu if they have questions regarding any aspect of the ETD process.

The dissertation may be written in a language other than English at the recommendation of the dissertation committee and with the approval of the program and the Graduate School. Graduate School approval will be determined on a case-by-case basis. The Dissertation Chair will submit a memorandum from the Department Chair to the Dissertation Editor together with the student's application for admission to candidacy explaining why it is both relevant and appropriate for the dissertation research to be written in a language other than English. Acceptable "relevant and appropriate" reasons for writing the dissertation in a language other than English include, but are not limited to: relevancy to research where presentation in a non-English language expands knowledge of that language; relevancy where the loss or weakening of the research's meaning and impact if primary data, e.g., interviews, are translated into English; or appropriateness where the majority of the bibliographic sources, references, and potential outlets for future publication are anticipated to be in that language other than English. Both the memorandum and the application for admission to candidacy form must be submitted to the Graduate School at the same time. In some cases upon review of the memorandum, the Graduate School may determine that the student will also be required to submit an English translation of the non-English dissertation. For all approved cases, an abstract in English should be included in the final dissertation.

Electronic Theses and Dissertation (ETD) Embargo Policy

Graduate students can elect to withhold their electronic thesis or dissertation for up to two years before the work is available for download from the University of Miami's Scholarly Repository (<http://scholarlyrepository.miami.edu>). The metadata for all theses and dissertations regardless of the availability option elected (i.e., open access, UM campus only, or embargo) will be immediately available for viewing in the university's Scholarly Repository after the Dissertation Editor has approved and released the thesis or dissertation to the repository. If embargo is elected by the student, the existence of the student's information page will appear in the Scholarly Repository right away displaying title, defense date, abstract, committee, keywords, etc., but the PDF of the electronic thesis or dissertation will not be downloadable until the term of embargo elected has expired. After the elected embargo period has expired the electronic thesis or dissertation will be released for open access in the Scholarly Repository. Students requesting embargo should carefully review the details of embargo election described in the ETD Availability Agreement form available on the Graduate School website (<https://grad.miami.edu>) to ensure they fully understand the terms of access for their embargoed work.

Research in Residence

Once a student has completed all course and required research credit hours, he or she must enroll in Research in Residence status until the degree has been granted. Research in Residence status is considered full-time enrollment. Time restrictions on obtaining degrees will be strictly enforced and can be waived only by the Dean of the Graduate School. Research in Residence students, while not required, may purchase or receive any perquisites that are normally available to graduate students. (See **Recency of Credit** section.)

Residence

The student must spend at least two consecutive semesters beyond the first year's graduate work, wherever taken, in full-time study at the University of Miami. With program approval,

1. one summer of full-time study in two sessions can be substituted for one semester of residence, or
2. full-time study for two successive summers can be substituted for two regular semesters.

Residence requirements may be altered only by the Dean of the Graduate School. (At least 24 credit hours must be taken in residence.)

The Supervisory and Dissertation Committees

A supervisory committee is usually appointed when a student is formally admitted to a doctoral program. For the dissertation/doctoral essay/lecture recital essay committee a student needs no less than four members. The committee chair must be Regular Faculty from the student's program of concentration (this includes secondary appointments). In addition to the chair, two members must be Regular Faculty or have Graduate Faculty status in the student's program of concentration. The fourth member must be an outside member. "Regular Faculty" are faculty having tenured or tenure-earning appointments of a program or department. A thesis or dissertation committee cannot be chaired by a person unless they hold a higher or equivalent degree as the candidate for the graduate degree. Exceptions to the committee composition may be approved by the Program Director (or Chair of the Department) and Dean of the Graduate School. A department, program, or school/college may require additional members.

This committee is nominated by the chairperson of the program concerned. It is appropriate for the chairperson to consult with the student regarding the membership of the committee. The supervisory committee is empowered to plan the course of study for the student; to determine deficiencies, if any; to set language and other requirements; to request applicable transfer of credit hour where appropriate and to make up and administer the qualifying examination.

When the student is admitted to candidacy, a dissertation committee is formed. This may be the supervisory committee, but it may also be a committee formed anew to undertake the duties of advising and passing upon the dissertation. The dissertation committee is nominated by the department or program concerned, and appointed by the Graduate Program Director and approved by the Department Chair. The dissertation committee is comprised of at least four members; this includes the committee chair (i.e. the primary research mentor/advisor), who may or may not be from the student's program, department or school (this includes secondary appointments), and must be a permanent member of the Graduate Faculty (<https://grad.miami.edu>). Of the remaining members, it is also required that two shall be members of the program or department of concentration, as well as permanent members of the Graduate Faculty (<http://grad.miami.edu>), and one from outside the program or department of concentration. A program may require additional members. The duties of the Dissertation Committee are:

1. To consult with and to advise students on their research;
2. To meet, at regular intervals, to review progress and expected results;
3. To read and comment upon the draft dissertation;
4. To meet, when the dissertation is completed, to conduct the final oral examination and to satisfy itself that the dissertation is a contribution to knowledge and that it is written in lucid and correct English and submitted in approved form.

No student gains the right to be recommended for the degree simply by fulfilling requirements. This right is reserved to the student's committee. Changes of committee members must be approved by the Graduate Program Director, and submitted to the Graduate School.

Qualifying Examinations

A written qualifying examination is to be taken by each doctoral degree candidate in all doctoral programs, with the exception of Physical Therapy, at the time that the student and the supervisory committee deem appropriate. The major program may specify that its students must take an oral examination as well. In those cases, normally, the student shall pass the written examination before the oral examination is conducted. Upon completion of the examination process, the supervisory committee shall notify the Graduate School and the instructional school or program that the student has passed or failed the examination. A student who fails the examination will be given one opportunity to retake it with the permission of the supervisory committee. After a qualifying exam is failed for a second time, the student is terminated from the program. Some programs do not administer qualifying examinations during the summer months. Check with the Graduate Program Director for specific program requirements.

Admission to Candidacy

When the student has met all requirements and passed the qualifying examinations, admission to candidacy for the degree is approved. No student may receive the degree in the same semester or summer session in which he or she is admitted to candidacy. The student must be admitted to candidacy before the defense of dissertation is scheduled.

Final Examination

A final public oral defense of the dissertation is required. Refer to the Academic Calendar (<https://registrar.miami.edu/dates-and-deadlines/academic-calendars>) for the deadline regarding dissertation defense for each graduation. Graduate programs set the specific requirements and format of the defense. Please contact your Graduate Program Director for details.

Transfer of Credit Hour

Transfer of graduate credit hour from another institution will not be made until the student has completed a like amount of credit hour at the University of Miami, and the transfer has been approved by the supervisory/dissertation committee and the Dean of the Graduate School. Credit hour transferred is subject to the same recency rules as all other credit hour counted toward the degree, and is also subject to examination by the program. An official transcript of work to be transferred must be on file in the Graduate School. Credit hours that pertain to or have been counted toward another degree cannot be transferred.

Florida International University and University of Miami Agreement

Effective as of Fall 2007, students may take up to 6 credit hours at the host institution as long as the following requirements are met:

1. Must be Ph.D. student or Master's student in Latin American Studies.
2. Approval from both home and host institution;
3. Approval of Graduate School Deans;
4. Space at the host institution is available.
5. Approval of the faculty member teaching the course.

Tuition and fees are to be paid at the home institution. Performance level is set at host institution. Contact the Graduate School for more information. The application form can be found here (<http://grad.miami.edu>).

UNDERGRADUATE ACADEMIC PROGRAMS

Architecture

<http://www.arc.miami.edu>

Introduction

The School of Architecture offers a five-year, accredited professional program leading to the Bachelor of Architecture degree. The Bachelor of Architecture fulfills the educational requirements for professional registration. It offers specialized architectural study through upper-level studios and architecture electives, as well as opportunities for the study of liberal arts through the elective sequence.

The School of Architecture's location in Coral Gables within the Miami metropolitan area provides an outstanding laboratory for research and advanced study; the challenges of conservation and development are intense in one of the nation's fastest growing urban areas. These challenges result in an increasing demand for skilled professionals. Students have the opportunity to work with faculty in the exploration of theoretical issues and the resolution of practical problems. The School of Architecture values and sustains a creative, open and supportive environment, emphasizing personalized instruction in small classes and studio courses.

Mission

- Prepare students for professional leadership and lifelong learning in architecture, urbanism and related fields.
- Preserve and develop knowledge for the profession through research and practice.
- Share knowledge locally and internationally through community service.
- Promote building and community design goals of environmental responsibility, social equity and economic sustainability.

Accreditation

The school is a member of the Association of Collegiate Schools of Architecture and the Association of Collegiate Schools of Planning, and is fully accredited by the National Architectural Accreditation Board, who asks each school to include the following paragraph on professional degrees in all literature:

In the United States, most registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit professional degree programs in architecture offered by institutions with U.S. regional accreditation, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted an eight-year, three-year, or two-year term of accreditation, depending on the extent of its conformance with established educational standards.

Doctor of Architecture and Master of Architecture degree programs may require a preprofessional undergraduate degree in architecture for admission. However, the preprofessional degree is not, by itself, recognized as an accredited degree.

The University of Miami School of Architecture offers the following NAAB-accredited degree programs:

B.Arch. (171 undergraduate credits)

M.Arch I (3-year Track – 105 graduate credits)

M.Arch II (2-year Track – 60 graduate credits)

Admission

Applications for incoming freshmen are processed and reviewed by the Office of Admission. Enrollment in the School of Architecture is selective and highly competitive. Applications to the Bachelor of Architecture program are requested by January 1st. Early applications are encouraged.

Freshman

Admission decisions are based on the following factors: secondary school record, SAT/ACT score, counselor's evaluation and the student essay. Portfolio submission is not required for entering freshmen, but is highly encouraged.

Transfer Students

The academic accomplishments of each transfer student will be evaluated on an individual basis. A 3.0 G.P.A. is required for transfer admission. A portfolio is required for advanced placement in the design sequence of the Bachelor of Architecture Program. Application deadline for the School of Architecture program is March 1st.

All transfer students requesting advanced placement in design must provide a portfolio of previous academic design and graphic work and three academic recommendations. Students accepted into third year design will be required to complete a design module during the summer prior to enrollment.

Student Responsibilities

Students in the School of Architecture are responsible for planning their own programs and for meeting degree requirements. It is the student's responsibility to understand and fully comply with all the provisions set forth in this Bulletin and written changes to their program of study. Students

are provided assistance by advisors and faculty members. Written requests for variation from program or school requirements are reviewed by a faculty committee.

Academic Progress and Probation

The School of Architecture will review each student's record at the end of each semester. When a student's semester or cumulative average is less than stated below, or progress toward degree completion is unsatisfactory, the student will be placed on academic probation or warning in accordance with School of Architecture policies and procedures. Students on probation are not permitted to enroll in more than 13 credit hours, shall meet on a monthly basis with their academic advisor, and may have a STOP placed upon their future enrollment until grades for work-in-progress are reviewed. First semester freshmen who have a semester grade-point average below 2.0 shall be placed on probation.

Credit Hours Earned	CGPA
Fewer than 33 credit hours	2.0
33-64 credit hours	2.1
65-96 credit hours	2.2
More than 96 credit hours	2.3

Students must complete all Architecture Design studios with a grade of C- or higher. Students receiving two consecutive C- grades in architecture design studios will have to repeat the later course. Students receiving a grade of D+ or lower in an architecture design studio must repeat the studio and will be restricted to a 15 credit hour semester load. The student will meet with an academic advisor on a monthly basis and will be reviewed prior to continuation.

Academic Dismissal

A student in the School of Architecture whose CGPA or progress toward degree completion falls below the level of the minimum standards of the University of Miami may be dismissed. In the School of Architecture this includes a student who receives three grades of D+ or lower in design courses.

Class Attendance and Absences

Class attendance is mandatory for all architecture courses; three unexcused absences constitutes grounds for dismissal from the course and/or a failing grade. Students are required to be present for an entire design review, therefore, students arriving late or departing early from class will be considered absent. Excused absences require written notification and are granted by the instructor.

Failing Grades or Incompletes

A required architecture course in which a student receives a failing grade must be repeated during the first subsequent semester in which the course is offered. Incompletes can be given only for reasons of serious illness or exceptional hardship.

Student Work

The University may retain selected student work and may place it in the architecture archives for exhibition, publication, or other use as the University deems appropriate. Each student in architecture is encouraged to maintain a design portfolio of every project undertaken throughout the five-year program.

Permission to Take Courses at Another University

A form is available from the Office of Academic Services and should be completed and approved PRIOR to off-campus enrollment. Students are encouraged to provide complete documentation for each course request form. Each student requesting transfer credit hour must supply the University of Miami registrar with certified transcripts. Additionally, each student should review transfer evaluations to be certain that all courses are correctly evaluated for credit hour. The proper transmission and transfer of credit hours is the responsibility of the individual student. The last 45 credit hours towards the degree must be completed at the University of Miami.

Changes to Academic Requirements

The School reserves the right to change academic requirements.

Computer Requirement

Undergraduate and graduate students entering the program are required to purchase their own computers for use in the design studio. The School of Architecture computing resources are accessible via a wireless network with an approved device and subject to School and University policy. Suggested system requirements are published on the School of Architecture web site.

Requirements for Graduation

As part of the 171 credits required for the Bachelor of Architecture curriculum, architecture students must complete a cognate in People and Society and a cognate in either Arts & Humanities or STEM.

Resources

The school's resources, including state-of-the-art computer lab, digital fabrication laboratories and model shop are enhanced by the interdisciplinary opportunities offered by the other schools and colleges of the University of Miami. A distinguished faculty is joined each semester by internationally renowned visiting scholars and designers.

Other programs that offer academic opportunities for undergraduate architecture students include:

- the **Historic Preservation Certificate**
- the **Classical Architecture Certificate**
- the **Master of Urban Design**
- the **Master of Real Estate Development and Urbanism**
- the **M.S. Architecture**
- the **Master in Construction Management**
- the **BSAE/MARCH**
- the **BARC/MBA**

Dual Degree Programs

A six year dual degree program leading to a Bachelor of Science in Architectural Engineering and a Master of Architecture is also available. The program is open to exceptional students who are admitted to the graduate program at the end of their junior year. Upon completion of this program, graduates are eligible for professional registration as both an engineer and an architect.

Major in Architecture

- Bachelor of Architecture (p. 107)

Minor in Architecture

- Architecture (p. 113)

Joint Degrees in Architecture

- Bachelor of Science in Architectural Engineering and Master of Architecture (p. 109)

General overview of Foote Fellows

The Foote Fellows Honors Program recognizes the most educationally accomplished incoming students at the University of Miami. Foote Fellows have distinguished themselves both in and out of the classroom, are self-motivated, and think independently. Admission to the Foote Fellows Honors Program is by invitation.

Within the curricular framework of their school or college, Foote Fellows enjoy unmatched freedom and flexibility to explore a multitude of educational resources. Many Foote Fellows leverage this opportunity to take additional majors and/or minors and to study abroad.

At each of the nine undergraduate schools at the University of Miami, a dedicated advisor helps Foote Fellows chart their academic path and attain access to distinctive learning opportunities at the University, such as special school-based seminars, faculty-mentored research, networking opportunities, and off-campus internships.

Foote Fellows also will be invited to join advanced, interdisciplinary Foote Fellow seminars taught by leading faculty members from across the University. An example is Books That Matter, a rigorous seminar in non-fiction reading that is offered in sessions for first-year and for upper-class students. Freshman Foote Fellows benefit from early move-in to the residential colleges. Further, Foote Fellows receive focused advising on post-baccalaureate distinguished fellowships and awards.

The Foote Fellows Honors Program reflects the educational vision of former University of Miami President Edward T. Foote, who retired in 2000 after serving the University for twenty years.

Foote Fellows at U_SoA

Foote Fellows at U_SoA benefit from priority advising, enrollment and design studio selection (including the *Partnership Studio* which places students in local firms as part of their academic experience). The English and Cognates general education requirements (24 credits) are replaced with

course topics of their choice so they may explore the educational resources of the University and create their own program of study. Academic and professional career advising is personalized for each Foote Fellow to ensure a trajectory is established as early as the Sophomore year

Henry Adams Medal

Awarded in conjunction with the American Institute of Architects to the highest-ranking graduating student for scholarship and excellence in a professional architecture program.

Henry Adams Certificate

Awarded in conjunction with the American Institute of Architects to the second highest-ranking graduating student for scholarship and excellence in a professional architecture program.

Other honors, distinctions, and awards are presented annually for excellent student performance.

Bachelor of Architecture Curriculum Requirements

ENG 106	English Composition II	3
MTH 130	Introductory Calculus	3
PHY 103	General Physics	3
Non-Architecture Electives		15
Total Credit Hours		171

- 1 **Curriculum Notes**
- The School reserves the right to retain all student projects done in for academic credit hour.
 - MTH 130 AND ENG 105 are entry-level courses.

- 2 **Electives**
- The program requires four types of electives:
- Architecture electives (7 courses): Investigations in areas of architectural interest beyond the core requirements
 - Professional practice elective (1 course) : Focused examination of a topic related to practice
 - Non-Architecture electives (5 courses): Explorations of general University offerings
 - Minor (4-5 courses) or 2 cognates (6 courses): Concentrated study in an area outside of architecture

A minor or its equivalent is required for all students who began the program prior to the Fall of 2013. All others shall complete the cognate requirements. Areas are selected in consultation with advisors.

- 3 **Policies and Procedures**
- Specific procedures and policies are detailed in the student handbook available from the Office of Academic Services.

Bachelor of Science in Architectural Engineering and Master of Architecture

A six-year dual-degree program leading to a Bachelor of Science in Architectural Engineering and a Master of Science in Architecture is available. The program is open to exceptional students who are admitted to the graduate program at the end of their junior year. Upon completion of this program, graduates are eligible for professional registration as both an engineer and an architect.

- ¹ To be selected from approved lists of People and Society (PS)/Arts and Humanities (HA). Students take a minimum of 3 courses (9 credit hours) in HA cognate and 3 courses in PS Cognate (9 credit hours). Students are advised to select the HA Cognate that includes the following courses: ARC 230 or ARC 630, ARC 268 or ARC 476 and ARC 594.
- ² To be selected from approved list of Technical Electives

Minor in Architecture

A minor in architecture is available to non-architecture majors as an option in the undergraduate architecture program. The purpose of the minor is to provide a general understanding and appreciation of the discipline of architecture. The minor does not satisfy professional requirements in architecture but does offer an introductory basis for further study at the undergraduate or graduate level. The program requires 12 credit hours in architecture courses.

Twelve architecture credits from the following list of courses may be taken to complete the requirements for the minor.

Code	Title	Credit Hours

Arts and Sciences

<http://www.as.miami.edu>

Introduction

The College of Arts and Sciences at the University of Miami is a community of scholars and students that encourages the quest for a deeper understanding of the human experience and fosters a personal commitment to lifelong learning, intellectual growth, and the enduring values of the liberal arts.

The College is dedicated to helping students develop analytical and communication skills, creative abilities, and a sense of civic responsibility needed in an increasingly complex society. It strives to provide them with a rigorous grounding in their chosen field, an awareness of the interconnectedness of disciplines, and an exposure to the discovery of new knowledge.

The College seeks to create an intellectual environment that enhances individual growth and supports scholarly activities and creative endeavors that augment human knowledge and understanding.

Degree Programs

The College of Arts and Sciences offers courses leading to the degrees of:

- Bachelor of Arts
- Bachelor of Science
- Bachelor of Fine Arts
- Bachelor of Liberal Arts
- Bachelor of General Studies (offered in partnership with DCIE, for students who are at least 22 years old pursuing their first undergraduate degree)

Graduates with one of these degrees will have had a sound liberal arts introduction to the major fields of human knowledge. In addition to this background, each bachelor's candidate has the opportunity to select an area of academic or of occupational interest. Professional or pre-professional curricula leading to certification in teaching, or to dentistry, medicine, law, etc., can be built into the degree program.

Academic Policies

The College of Arts and Sciences follows the general university academic policies outlined in the General Academic Information section of this Bulletin.

Requirements for Graduation

Candidates for degrees in the College of Arts and Sciences must complete the credit hours of work and achieve the quality point average specified for students in the University at large. These requirements are indicated in the *Academic Procedures and Information* section of this Bulletin. Candidates must also complete the General Education requirements of the University, i.e., the *Proficiencies*: English Composition, Advanced Writing and Communication, and Quantitative Skills; completion of a cognate in each of the three areas: Arts & Humanities, People & Society, and Science, Technology, Engineering & Mathematics.

I. Additional Proficiencies and Areas of Knowledge Requirements

In addition to the university's general education requirements, the college has the following requirements and provisos:

Bachelor of Science

- Second Language Proficiency: Degree candidates must earn at least 3 credit hours of a language other than English at the 200 level or higher.
- Advanced Writing and Communication Proficiency: Degree candidates must complete at least four writing courses, and at least one writing course must be in the student's major discipline.
- Mathematics Proficiency: Degree candidates must complete a calculus sequence: MTH 161-MTH 162, MTH 140-MTH 141-MTH 162, or MTH 171-MTH 172.
- Computing or Statistics Proficiency: Degree candidates must earn at least 3 credit hours in either
 1. a computing course approved by the major department; or
 2. a statistics course approved by the major department.
- Natural Science Area of Knowledge: Degree candidates must earn at least 3 credit hours in Natural Science, in one of the following departments: Biology, Chemistry, Geological Sciences or Physics. These credit hours must be earned in courses that count toward a major in that department.

Bachelor of Arts

- Second Language Proficiency: Degree candidates must earn at least 3 credit hours of a language other than English at the 200 level or higher.

- **Advanced Writing and Communication Proficiency:** Degree candidates must complete at least four writing courses, and at least one writing course must be in the student's major discipline.
- **Mathematics Proficiency:** Degree candidates must earn at least 3 credit hours in a Mathematics course numbered MTH 108 or higher.
- **Natural Science Area of Knowledge:** Degree candidates must earn at least 3 credit hours in Natural Science: Anthropology (only APY 203), Biology, Chemistry, Ecosystem Science and Policy (only ECS 111, ECS 112, ECS 202), Geography (only GEG 120), Geological Sciences, Marine Sciences (except MSC 313, MSC 314), Physical Sciences, and Physics.

Bachelor of Fine Arts

- **Advanced Writing and Communication Proficiency:** Degree candidates must complete at least four writing courses, and at least one writing course must be in the student's major discipline.
- **Mathematics Proficiency:** Degree candidates must earn at least 3 credit hours in a Mathematics course numbered MTH 108 or higher.

Bachelor of Liberal Arts

- **Advanced Writing and Communication Proficiency:** Degree candidates must complete at least four writing courses, and at least one writing course must be in the student's major discipline.

BACHELOR OF GENERAL STUDIES

Requirements for the BGS degree can be found here (p. 555):

Details of the Second Language Proficiency

Second language requirements can be fulfilled through courses offered in the departments of Modern Languages and Literatures (Arabic, Chinese, French, German, Haitian Creole, Hebrew, Italian, Japanese, Portuguese, and Spanish, except for courses numbered 310-319), Classics (Latin and Greek), and Teaching and Learning in the School of Education (American Sign Language). The department of Modern Languages and Literatures has special courses required of heritage learners who wish to use that language to fulfill the language requirement by taking courses in their heritage language. These courses are designated as "open to heritage learners." Courses taken in order to meet second language requirements, including necessary prerequisite courses, cannot be used in cognates taken to fulfill the Areas of Knowledge requirement.

Students who have at least two years of full-time secondary schooling beyond the age of 14 taught in a foreign language are eligible for exemption from the A&S second language requirement. Exemption will be granted by A&S Office of Student Advising. To be granted the exemption, the student must have on file their high school transcript providing proof of two years of schooling in a foreign language from a secondary institution.

Details of the Advanced Writing and Communication Proficiency

Degree candidates must complete at least four writing courses, and at least one writing course must be in one of the student's major disciplines (not applicable to BLA students who do not select a major). Students should consult the bulletin section of their major to find out which writing-intensive courses are acceptable to the discipline.

Individual writing course offerings may make the writing component independent of the rest of the course. As such the the writing component might be optional, the writing component might not contribute to the overall grade, and writing credit might be awarded even if the overall grade is a fail.

Transfer students may use a maximum of two transfer courses towards the writing requirement.

II. Major and Minor Fields (B.A. and B.S degrees)

B.A. and B.S. degree candidates must choose a major offered in the college by one of the disciplines with an undergraduate academic program in the college, and at least one other minor or major from any of the disciplines in the university. B.S. degree candidates must choose a major from one the STEM fields: Biochemistry and Molecular Biology, Biology, Chemistry, Computer Science, Ecosystem Science and Policy, Geological Sciences, Mathematics, Microbiology and Immunology, Neuroscience, Physics, Psychology. B.A. degree candidates must choose at least one major or minor from a field other than the STEM fields: Biochemistry and Molecular Biology, Biology, Chemistry, Computer Science, Geological Sciences, Mathematics, Microbiology and Immunology, Neuroscience, Physics, Business Technology, and Engineering. The majors and minors taken by a student must come from different fields of study. Multiple majors and minors may be taken from departments and programs that offer multiple fields of study. To find the requirements for majors and minors, consult this bulletin under the discipline concerned, and confer with the designated departmental representatives. Any student who does not make satisfactory progress towards a major may be required to change or relinquish candidacy for the degree.

Individual courses may be used to satisfy the requirements of multiple majors and minors. However, each major taken by a student must include at least 24 credits that are not counted towards any other major or minor, and each minor must include at least 9 credits that are not counted towards any other major or minor. If a major or minor is used to fulfil a cognate requirement, the 24/9 credits may also not be counted towards any other cognate.

III. Additional Bachelor of Fine Arts Requirements

B.F.A. degree candidates must satisfy the requirements of a major as determined by the Department of Art and Art History or the Department of Theatre Arts. B.F.A. studio majors must minor in Art History. Students must maintain at least a GPA of 3.0 in their major, and an overall GPA of 2.0 or above as specified in departmental and program sections of this bulletin.

IV. Additional Bachelor of Liberal Arts Requirements

B.L.A. degree candidates must complete 120 credit hours with an overall GPA of 2.0 or above. At least 60 of the 120 credit hours must be in 300, 400, or 500-level courses. Of these 60 credit hours, 30 credit hours must be completed in the College of Arts and Sciences. No more than 40 credit hours in 300-level or higher courses may be earned in any one department, and no more than 52 total credit hours may be earned in any one department. Up to 30 of the 120 credit hours may be courses from other schools and colleges of the university except for those courses expressly excluded from recognition by the college. Students may, but are not required to, elect a major in a department. If a student fulfills the departmental requirements for the major, it will be recorded on the official transcript. No minor may be elected.

V. Other Requirements

General Electives

Beyond the general education and major/minor courses, all students must complete sufficient general electives to reach a total of 120 credit hours. General electives may be chosen from any courses offered by the University. The student should consult an advisor before selecting elective courses.

Credit Only

Only general electives may be taken under this option. Courses that are used to satisfy the major, the minor, the distribution requirements of the College and the general education requirements of the University may not be taken for credit only.

Exemption

Exemption from a course or courses refers specifically to the following:

1. credit by examination through the Advanced Placement (AP) or International Baccalaureate (IB) programs;
2. advanced placement by proficiency examinations or test scores, with no credit earned;
3. advanced standing and/or placement, with credit earned.

Transfer Credit Hours

Credit hours transferred from other institutions may not count towards the completion of a major or minor without the written approval of the department or program.

Independent Major

The Independent Major allows students to pursue a BA or a BS degree in the College of Arts and Sciences, depending on the field of study and in consultation with the Guidance Committee. Students will fulfill all requirements for such degrees.

Students may begin to develop a proposal for the IM when they have reached sophomore standing. The proposal should explain why existing majors are inappropriate or inadequate to satisfy the student's interests. Students will be ineligible for declaring the IM upon reaching senior standing, that is, they must declare as a junior and spend at least two (2) full semesters in residence at UM in the IM. Students must have a cumulative UM GPA of 3.5 or higher to be eligible for the IM.

A student's Guidance Committee typically will comprise two tenured or tenure-track faculty, typically from different departments, who represent the disciplinary breadth of the courses selected for the IM. A third Guidance Committee member might be appropriate when the proposed course of study encompasses expertise from three Departments or disciplines. The Guidance Committee Chair, who has primary oversight responsibility regarding satisfactory completion of the major, will serve as the primary advisor for the student's senior research/creative project under most circumstances, and must be a tenure-track faculty. Exceptions to the Chair serving as the primary advisor might include situations where there are co-advisors.

The IM proposal must include at least thirty (30) credit hours of coursework beyond those needed to fulfill General Education requirements. Of those thirty (30), at least six (6) must be at the 300 level; additionally, six (6) credit hours will be satisfied by a Capstone project/thesis in the last two (2) semesters of the Bachelor's degree. Because many courses have variable availability and conflicts are inevitable, strong proposals will identify more than 30 credit hours of coursework before being submitted to the Advisory Committee for approval. If a student wishes to pursue the IM as a double-major, the Advisory Committee should give particular attention to the appropriateness of the student's plan of study; no double-counting of credit hours will be allowed between the two majors.

Independent Minor

The Independent Minor allows students at the University of Miami to complete a minor in a field that currently do not have a major in the College or elsewhere at the University of Miami. It consists of at least 15 graded credits and it requires one faculty member who will act as point of contact and advisor. Students may declare this minor starting with their second semester at UM and no later than the end of their junior year. A minimum GPA for 2.5 is required to declare this minor. An average of 2.5 is required to continue in the minor. Given that this minor requires students to work closely with a faculty member to select the appropriate courses at a level consistent with each field of study, students will not be able to apply more than two courses (6 credits) already taken to their minor.

Academic Appeal Policy and Procedures

The College's Faculty Committee on Academic Appeals (FCAA) is responsible for reviewing and conducting hearings on appeals related to exceptions to academic policy under the authority of the College of Arts and Sciences. Appeals **must** be submitted directly by the student from their student UM email account. Appeals will not be accepted from parents/guardians, doctors, attorneys, or anyone else other than the student. Please read below

for a list of acceptable and unacceptable appeal requests. **All appeals related to course drops/enrollment adjustments MUST be submitted within one (1) calendar year from the semester end date noted on the academic calendar for the semester in question.** Transcripts will not be altered once a student has graduated and has a conferred degree. Appeal decisions will be delivered to students' UM email account within 2 to 3 business weeks upon receipt of the appeal. All appeal decisions are final and non-negotiable. The student maintains full responsibility for the impact of an appeal decision, especially as it relates to their account, financial aid, visa status, academic progress, and graduation timeline.

Steps to Submit an Acceptable Appeal:

1. Draft an email to the Assistant Dean of Academic Services – see website for contact information. as.miami.edu/advising.
2. The appeal email must briefly describe the situation, the reason/justification for the request, the specific request/action, the specific year/term/course ID as applicable to the type of appeal, and the student's name/ID.
3. Appeals must be accompanied by supporting documentation, if applicable to the type of appeal. Documentation must be submitted as an attachment to the appeal email. It is the responsibility of the student to determine what documentation best supports their appeal case. We will not pre-approve documentation before submission of the appeal. We will only accept documentation from the student submitting the appeal.

Appealable Actions for Committee Review:

1. Request for retroactive drop of one, or more, courses after the last date to drop without a W, and/or after the last day to drop a class for the semester in question. **This type of appeal is only considered for cases of extreme, unforeseen circumstances or medical emergencies that can be documented.** Retroactive drop action can **NOT result in a complete withdrawal (all enrolled classes dropped)**.
2. Request for waiver of the 45 credit hour residency requirement
 - a. Appeal must include the institution where credits will be/were taken, the year/term to be/were taken, and the exact number of credits to be considered for waiver.
 - b. This process **does not** preapprove transfer equivalencies or guarantee transferability of courses. Students are responsible for adhering to all necessary policies and procedures related to transferring courses to UM.
3. Substitution for, or waiver from College of Arts and Sciences' General Education Requirements (not University general education requirements – see below).

The following requested actions are not appealable through the College of Arts and Sciences FCAA:

1. Adjustment of academic record/transcript after graduation and a conferral of the degree: See University Bulletin
2. Retroactive withdrawals for Fall/Spring semesters
 - a. The University has a formal withdrawal policy found here (<https://success.miami.edu/student-withdrawal>).
3. Retroactive withdrawals for summer sessions that alters the effective date of the withdrawal
 - a. See withdrawal policy linked above
4. Grade Appeals, including incomplete grades that are now IF grades
 - a. See Faculty Senate Appeals process in Bulletin here (p. 80).
5. Waiver of University General Education Requirements as defined by the Bulletin: No appeals process available
6. Substitution for/waiver from any requirements related to a major or minor: Under respective department authority
7. Excused absences from a course(s): Absences are under the authority of individual instructors
8. Credit Only Option after deadline: No appeals process available

PreLaw Preparation

Although no specific curriculum is required in preparation for Law School, the Pre-Law Committee of the American Bar Association strongly recommends that students considering a career in Law should have a well-balanced education. This education should include courses requiring intensive writing, logical reasoning and critical thinking and reading skills.

PreLaw Advising provides a variety of services to all students interested in attending Law School. For more information, please contact the Office of Student Academic Services in Ashe 200. These services include:

1. Pre-Law Advising: confidential advising in preparation for law school (i.e. application process, general information, discussion of your concerns).
2. The Pre-Law Manual: information about requirements, preparation etc., for law school.
3. Pre-Law Newsletter: information about programs and events.
4. LSAT and LSDAS registration booklets (for juniors and seniors).
5. Campus-wide programs for pre-law students such as Law Day.
6. Programs and seminars in coordination with other University of Miami departments such as: School of Law Career Planning Center, School of Law Center for Ethics and Public Service, Toppel Career Planning and Placement, the Counseling Center, and the Reading and Study Skills Center.

In order to take advantage of the services listed above a student should complete a Pre-Law registration card at the beginning of the academic year.

Max and Peggy Kriloff Fund

The Max and Peggy Kriloff Fund is a fund that provides travel support for students earning degrees from the College of Arts and Sciences. The fund provides support for students to present papers, or posters at professional conferences worldwide. Students will need to fill out an application form available at this link (<http://www.as.miami.edu/academics/undergraduate-studies/scholarships>); and submit it, along with the necessary supporting documentation to the Office of Graduate and Administrative Services in the College of Arts and Sciences.

Footnote Fellows pursuing degrees in the College of Arts and Sciences are exempt from all University-wide and College-specific general education requirements. They are eligible for priority admission into the daVinci program, first-year seminars, and internships in the Dean's office. Opportunities to learn by doing, through research or tutorials, as well as seed money for students interested in developing a business plan or a prototype are also available to A&S Footnote Fellows. Questions? Read more (<http://www.as.miami.edu/academics/undergraduate-studies/foote-fellows>) or go to Ashe 200 for answers!

The da Vinci Program encourages high-achieving, intellectually curious students to rethink the map of human knowledge. It emphasizes connections between humanistic and scientific inquiry and their modes of understanding: objectivity, critical analysis, self-reflexivity, the nature of proof, authority, and the logic and rhetoric of written expression. It also helps define the distinctive elements that humanities classes can offer to STEM-minded students: a chance to reflect on questions of human values, ethics, and aesthetics. At the same time, it introduces humanities students to conceptually new means of investigating the traditional fields.

Students are invited in the program before their first year and they take a seminar per semester in each of the first four semesters of study. Students in the da Vinci program are exempt from College - specific requirements. A capstone experience marks the conclusion of their undergraduate career. Read more (<http://www.as.miami.edu/davinci>) about the Davinci Program.

The Advanced Program in Integrated Science and Math (PRISM) brings together top first-year students interested in the natural sciences. The program is designed for those who plan on pursuing postgraduate education and a career in science or medicine (Ph.D./M.D. track). Our outstanding faculty, lab directors, graduate assistants, and caring advisors are here to encourage integrated learning in STEM disciplines. PRISM students are exposed to new developments in science and are encouraged to become actively engaged in research during their undergraduate experience. PRISM classes are advanced versions of the typical track done by a first-year natural science student, so there are no additional classes to complete. Read more (<http://www.as.miami.edu/prismrsvp>) about the PRISM program.

Dual Degree Honors Programs Fellows in Latin American Studies (FILAS)

This innovative, dual B.A./M.A. honors degree in Latin American Studies allows outstanding incoming freshmen the opportunity to complete a master's degree in five years, following a rigorous, efficient, accelerated curriculum of 150 credits. This highly selective group of students will enjoy close faculty mentoring and the opportunity to engage in specialized research projects with faculty. Students will gain advanced competence in at least one major language of Latin America, intern for one semester in public or private organizations dealing with Latin America and/or the Caribbean, and take advanced seminars with UM's major Latin American scholars and visiting scholars. In addition, students will receive first-hand experience in their regions of focus by studying abroad. Most study abroad opportunities are for one semester (six months). FILAS students may arrange their own study abroad in consultation with the academic director or they may participate in the university's study abroad options. Applicants must be high school seniors in the top 10% of their class and must have a minimum SAT I score of 1360 or (ACT 31). In addition to the regular Application for Admission to the University, the applicant must complete a separate application form for the Fellows in Latin American Studies (FILAS). The FILAS application form and supporting materials must be submitted no later than November 1st of the applicant's senior year. A review of completed applications will begin by the end of November. Admitted first-semester freshmen interested in admittance to the FILAS program should contact the Academic Director of the Latin American Studies Programs for application information before October 1st. For further information and application forms please visit this website (<http://www.miami.edu/dualdegree>).

Dual-Degree Program in Law for Undergraduates

To be considered as a **High School Student**, applicants must:

- have a minimum SAT I score of 1350 (combined Math and Critical Reading scores) or a 30 on the ACT;
- have three (3) letters of Recommendations from high school teachers;
- complete a Dual-Degree Program Supplemental Application (<https://admissions.miami.edu/undergraduate/academics/programs-of-distinction/dual-degree-program/dual-degree-law>) for Law by November 1st

To be considered as an **Undergraduate Student**, applicants must:

- have a minimum SAT I score of 1350 (combined Math and Critical Reading scores) or a 30 on the ACT;
- have an overall cumulative grade point average of 3.5 in all college-level courses;
- have Two (2) letters of recommendations from college-level professors;
- complete a Dual-Degree Program Supplemental Application (<https://admissions.miami.edu/undergraduate/academics/programs-of-distinction/dual-degree-program/dual-degree-law>) for Law.

Students admitted into the program must successfully complete 90 credits earned toward their undergraduate degree, including requirements for their majors and any minors they may be undertaking. Students must complete 90 credits in college course work at the University of Miami, including advanced standing credits, before matriculating into the University of Miami School of Law. The University of Miami requires that the last 45 credits be taken in residence. Students will graduate from the College of Arts and Sciences (<http://www.as.miami.edu>) upon completion of 120 credits including AP/IB credit. Please visit <http://www.law.miami.edu/admissions/dual-degree-program-in-law-for-undergraduates>.

Aerospace Studies

<http://www.miami.edu/aerospace-studies>

Dept. Code: AIS

Air Force Reserve Officer Training Corps (AFROTC)

AFROTC is a nationwide program that allows students to pursue commissions (become officers) in the United States Air Force (USAF) while simultaneously attending college. AFROTC classes are held on college campuses throughout the United States and Puerto Rico; students can register through normal course registration processes. AFROTC consists of four years of Aerospace Studies classes (Foundations of the USAF, Evolution of USAF and Space Power, Air Force Leadership Studies, and National Security Affairs/Preparation for Active Duty), and a corresponding Leadership Laboratory for each year (where students apply leadership skills, demonstrate command and effective communication, develop physical fitness, and practice military customs and courtesies). College students enrolled in the AFROTC program (known as "cadets") who successfully complete both AFROTC training and college degree requirements will graduate and simultaneously commission as Second Lieutenants in the Active Duty Air Force.

For more information on AFROTC course descriptions, please review this webpage (p.). For more information on the AFROTC program, please review this webpage (<http://www.as.miami.edu/afrotc>).

Enrollment

There is no military obligation to enroll in AFROTC. To enroll students must meet the following criteria:

- Prior to enrolling in Aerospace classes, students must speak with a professor/cadre member at (305) 284-2870.
- Be a U.S. citizen or resident alien, or be able to become a U.S. citizen prior to attending Field Training the summer following sophomore year
- Be full-time college students, enrolled in 12 credit hours per semester
- Be able to participate in a demanding physical fitness program
- Be able to pass a Department of Defense Medical Examination
- Have solid moral character
- Maintain AFROTC minimum required grade point average

Scholarships

More than 60% of Air Force ROTC scholarships are awarded to undergraduate students in engineering or other scientific and technical disciplines. However, students in every degree program enjoy scholarship opportunities, as the Air Force seeks to engage students who excel both academically and militarily. Scholarships are awarded in increments of two, three, and four years. Air Force ROTC offers several types of scholarships. Type 1 covers full tuition and most required fees. Type 2 covers tuition and fees, but is capped at \$18,000 annually. Type 7 scholarships are designated for in-state tuition-level institutions. All types of awards provide an allowance for books and a monthly non-taxable stipend. All scholarship cadets are required to meet academic, military, and physical fitness standards to earn and maintain scholarship benefits.

Additionally, University of Miami undergraduates enrolled in the Air Force ROTC program are assured a combined University grant and/or scholarship award during the fall and spring semesters equal to 25% of the University's tuition charge for a maximum of four years. The subsidy is not available during the summer term. Students must maintain continuous enrollment in the AFROTC program, must maintain satisfactory academic progress to continue receiving the subsidy, and full time enrollment in one of the University's undergraduate degree programs is required. No application is required. Awards are made automatically based on information provided by the University's AFROTC detachment.

Benefits

All AFROTC cadets receive uniforms, books and equipment for ROTC classes at no cost. Upon being commissioned a Second Lieutenant in the Air Force, you will receive a starting salary and allowances worth more than \$58,000 annually¹. Free medical and dental care, 30 days paid annual vacation and educational benefits are also part of the compensation package.

¹ Based on 2013 Pay Chart and Miami FL Housing Allowance for an O-1

Africana Studies

<http://www.as.miami.edu/africanastudies>

Dept. Code: AAS

Introduction

Africana Studies offers students the opportunity to confront and critically analyze distinctive Black intellectual and social-cultural traditions, and political-economic and historical structures. Situated in Miami, Florida, we are uniquely positioned in and between the US South and the Global South. Therefore, our translocal perspective finds blackness and Black people everywhere in the world. As the university's center for Africana Studies, the Program reaches beyond undergraduate study—inviting a wide variety of local and international graduate students, artists, scholars, and community advocates into our intellectual community.

Africana Studies' interdisciplinary structure offers students an opportunity to satisfy the increasingly rigorous expectations of graduate and professional school admissions committees and prospective employers, offering a broad liberal arts perspective that complements specialized knowledge of a field. Our curriculum and programmatic efforts uniquely help to prepare students to understand and effectively work toward social justice. We encourage all students, regardless of major, to enroll in Africana classes. Africana Studies can be taken either as a primary major, as one of two majors, or a minor.

Educational Objectives

1. To help students research, acquire, and disseminate information about the historical and social experiences of Africans and people of African descent on all sides of the Atlantic basin, but with special emphasis on the United States.
2. To facilitate students' understanding of the multi-cultural, multi-ethnic, globalized society of our time.
3. To help students think critically about the global black experience.
4. To prepare students for graduate work and professional careers.

Departmental Honors

Carter G. Woodson Award - Best all-round student who combines intellectual excellence and community service.

Advanced Writing Requirement

To satisfy the College of Arts & Sciences writing requirement in the discipline, students majoring in Africana Studies should take at least one English course or one History course related to Africana Studies and is listed as an advanced writing course, and any Africana Studies course with the Writing Credit designation.

Major in Africana Studies

American Studies

<http://www.as.miami.edu/americanstudies/>

Dept. Codes: AMS

Introduction

The **Program in American Studies at the University of Miami** fosters the interdisciplinary study of American culture and society, and explores the place of the United States in an increasingly interconnected world. Our faculty come from a wide range of fields, including history, literature, political science, religion, art, philosophy, law, music, ethnic studies, anthropology, architecture, sociology, communications, and education. What unites them is the commitment to examining the U.S. from multiple perspectives, highlighting the diversity of people, cultures, and experiences that have shaped the past and present United States. The Program places analysis of globalization at its center, and encourages a hemispheric perspective that allows students and faculty to explore interests in the United States, the Caribbean, Latin America, the Pacific Rim, and other border crossings.

Educational Objectives

The undergraduate curriculum in American Studies encourages students to bridge the divide between disciplines by examining specific themes and topics in an engaging, dynamic, interdisciplinary manner. By exposing students to courses that place questions of cultural diversity, regional difference, ethnic and racial identity, gender and sexuality, class dynamics, and popular culture at the forefront of intellectual investigation, the Program in American Studies enables them to situate their own experiences in a wider context. It also exposes them to a multiplicity of perspectives that inform our understanding of the United States and its place in a global society. The Program encourages its majors to study abroad, and faculty members help students plan their curriculum to make that option feasible.

Departmental Honors

American Studies majors with a cumulative GPA of at least 3.5 in AMS courses and an overall GPA of at least 3.0 may earn departmental honors by completing AMS 505. Candidates for departmental honors are responsible for finding a faculty member to serve as thesis advisor. Students then must complete a thesis proposal of approximately 500 words that must be approved by the thesis advisor and the program director. The format and length of the thesis will vary according to the nature of the project. Students would take AMS 501 in the fall semester of the senior year and AMS 505 in the spring to complete the honors thesis.

Advanced Writing and Communication Requirement

To satisfy the College of Arts & Sciences writing requirement in the discipline, students majoring in American Studies should take at least one English course or one History course related to the American Studies discipline listed as an advanced writing course.

Major in American Studies

- B.A. in American Studies (p. 123)

Minor in American Studies

- American Studies (p. 125)

B.A. in American Studies

Curriculum Requirements

Code	Title	Credit Hours
Students must take courses from at least three different departments in order to fulfill the requirements for the major

Total Credit Hours		120-126

¹ AMS 501 can take the form of an individual research project or an internship at a local cultural or civic institution. For the research option, students will identify an appropriate faculty member to supervise and grade the project, and then obtain approval from the program director before proceeding with the project. The student must produce a substantial written report or research paper, the format of which will be determined by the faculty member and student in consultation with the program director. For the internship option, students will partner with any number of local institutions and produce a creative and/or scholarly project for evaluation. The internship will be arranged through the program director, in consultation with the Butler Center. The final product will be evaluated by the program director. American Studies majors with a cumulative GPA of at least 3.5 in AMS courses and an overall GPA of at least 3.0 may earn departmental honors by completing AMS 505. Candidates for departmental honors are responsible for finding a faculty member to serve as thesis advisor. Students then must complete a thesis proposal of approximately 500 words that must be approved by the thesis advisor and the program director. The format and length of the thesis will vary according to the nature of the project. Students would take AMS 501 in the fall semester of the senior year and AMS 505 in the spring to complete the honors thesis.

² Students must take three courses, chosen in consultation with an American Studies advisor, in a specialized area of American Studies (200 level or higher). Students may work in areas including, but not limited to, Ethnic Studies, Caribbean Studies, Latino/a Studies, Environmental Studies, Communication Studies, Women's Literature, Urban Studies, Africana Studies, Religious Studies, or Material Culture Studies. At least one of these courses must be either comparative or non-U.S.-based.

Anthropology

<http://www.as.miami.edu/anthropology>

Dept. Code: APY

Introduction

Anthropology is the scientific study of humankind, from its beginnings to the present. Of the many sciences that study aspects of humans and their behavior, only anthropology attempts to understand and integrate the entire panorama of human culture and biology in all times and places.

The **Anthropology Department** offers a wide range of courses for students in pursuit of the Bachelor of Arts degree, from the basic four fields of cultural anthropology, linguistics, biological anthropology, and archaeology, to advanced study of topics such as Maya archaeology, non-Western medical practices, primatology, gender and sexuality, and the evolution of language, among many others.

Anthropological training concentrates on broadly transferable skill areas such as understanding human diversity, building research skills for collecting and making sense of information, and communicating effectively. The skills developed through completing a degree in anthropology are useful for living and working in today's globalized world, which increasingly means interacting with people from many different cultural backgrounds and nations.

The field is especially suited to a multi-ethnic, multi-lingual, and multi-cultural urban center such as Miami, and the research programs of the department faculty reflect the compositions and concerns of our larger community.

Anthropological knowledge has taken an increasing role in the solution of practical problems in public health, cultural resource and heritage management, international business, legal and human rights issues, and many other areas. The anthropological view challenges ethnocentric perspectives and encourages the rigorous exploration of the world's cultural diversity.

Educational Objectives

Students who graduate from our program in anthropology will have achieved:

1. Basic familiarity with each of the four subfields of our discipline: archaeology, cultural anthropology, linguistic anthropology, and physical or biological anthropology.
2. Extended familiarity with one or more of these subfields in terms of knowledge of content related to, for example, gender, food, primate behavior, art, ritual, museums and collections, the interaction of language and thought, material culture, the sounds of languages; and methodological skills involving field research in one or more of the subfields.
3. The ability to articulate the anthropological view of the human condition in terms of an operational definition of culture and a holistic perspective on how humans behave.
4. Sufficient skill in research to be able to produce a research paper based on original anthropological investigation.

Advanced Writing and Communication

To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in anthropology should take at least two courses designated as W (writing intensive) offered in the department. Writing courses are regularly offered by the department; however, it is the student's responsibility to plan accordingly and to incorporate writing-designated courses into their graduation plans.

Degree Programs

The **Department of Anthropology** offers a **major** and a **minor** in the University's array of Bachelor of Arts Degrees.

Departmental Honors

A student with junior or senior standing and a cumulative grade point average of 3.5 or higher may earn honors in anthropology by completion of a qualifying senior thesis encompassing an original research agenda under the direction of a member of the faculty in the Department of Anthropology.

The scope of work will be set in a thesis proposal approved by at least two faculty (one may be from outside the Department) which will result in a submitted (although not necessarily accepted) manuscript/conference paper. Students who wish to complete a senior thesis shall enroll in senior thesis/independent study classes for at least two semesters (with three being ideal, or two plus summer), such that one semester could be devoted to a directed reading, one to data collections/analysis, and the final semester to writing.

Extraordinary Anthropology majors are also recognized via an invitation to join Lambda Alpha, the international honors society for anthropology.

Lambda Alpha was founded with the purpose of encouraging and recognizing outstanding scholarship and research in anthropology. Each year the Department recognizes a graduating senior with the highest academic achievement both in and outside of the classroom with the Zora Neale Hurston Award in Anthropology.

Minor in Anthropology

Code	Title	Credit Hours
Select two of the following:		6
APY 201	Principles of Archaeology	
APY 202	Principles of Cultural Anthropology	
APY 203	Principles of Physical Anthropology	
APY 204	Principles of Linguistic Anthropology	

Three additional anthropology courses at the 200 level or higher.	9
Total Credit Hours	15

* A minor in Anthropology consists of 15 or more credit hours

** A grade of C- or higher is required with an overall GPA of 2.0 including any two 200-level anthropology courses.

*** Appropriate courses offered in other departments may also be counted toward the minor with approval of the Director of Undergraduate Studies.

Art and Art History

<http://www.as.miami.edu/art>

Dept. Codes: ART, ARH

Educational Objectives

The Department of Art and Art History provides facilities and instruction to serve the needs of the general student. The program fosters participation and appreciation in the visual arts for students with specialized interests and abilities preparing for careers in the production and interpretation of Art and Art History.

Degree Programs

The Department of Art and Art History offers two degrees:

- the Bachelor of Arts, with tracks in:
 - Art (General Study)
 - Art History
 - Studio Art
- the Bachelor of Fine Arts in Studio Art, which allows for primary and secondary concentrations in:
 - Painting
 - Sculpture
 - Printmaking
 - Photography/Digital Imaging
 - Graphic Design/Multimedia
 - Ceramics

The B.A. requires a minimum of 36 credit hours in the department with a grade of C or higher. The B. A. major is also required to have a minor outside the department. Minor requirements are specified by each department and are listed in the Bulletin. The B.F.A. requires a minimum of 72 credit hours in the department, a grade of C or higher in each course, a group exhibition and at least a 3.0 average in departmental courses. The B.F.A. major is not required to have a minor outside the department.

Writing within the Discipline

To satisfy the College of Arts and Sciences writing requirement in the discipline, students whose first major is Art or Art History must take at least one of the following courses for a writing credit: Modern Art ARH 343, and/or Contemporary Art ARH 344.

Departmental Honors

In order to be eligible for Departmental Honors, candidates must have completed at least nine credit hours at the 300 level or above, and must have a GPA of 3.5 in all their major courses and a 3.5 overall average GPA. Both GPAs must be maintained in order to graduate with Departmental Honors.

During their junior year, candidates for Honors must request admission to Departmental Honors from the Department Chair, and identify an exhibition/thesis faculty supervisor.

In addition to fulfilling the regular major requirements, students must register in their senior for six credits of Independent Study at the 500 level. Art majors will be expected to work on an exhibition project. Art history majors will be expected to research and write an Honors thesis.

The Department Chair and the faculty supervisor will determine whether the completed exhibition project or thesis merits Departmental Honors.

Audit

Due to the nature of studio courses, it is not possible for a student to audit courses offered in the studio areas.

Majors in Art and Art History

- B.A. in Art (General Study (p. 134))
- B.A. in Art History (p. 132)
- B.A. in Studio Art (p. 138)
- B.F.A. in Art (p. 138)

Minor in Art and Art History

- Art and Art History (p. 140)

B.A. in Art History

Total Credit Hours		123

¹ MTH 113 or appropriate level Math course.

* **BFA Exhibition**

Unless otherwise instructed, each BFA candidate will take part in an exhibition of work screened and approved by a faculty member from their area of specialization, accomplished as an art major at the University of Miami, in the Fall or Spring semester of the senior year. The BFA exhibitions are held in the College Gallery.

At the time the candidates BFA exhibition is hung, a formal critique will be arranged between the student and the art faculty.

** **BFA Minor in Art History**

All BFA studio majors automatically minor in art history. A minor outside the department is not required.

Maximum Credits in Studio Areas

A BFA student is limited to a maximum of 21 credit hours in any one studio area – Painting, Printmaking, Graphic Design/Multimedia, Photo/Digital, Ceramics, and Sculpture.

Minimum Major GPA

Students must maintain at least a 3.0 average in their major.

	Choose 15 Credits in ARH and ART Courses	15

- ¹ All BFA studio majors automatically minor in Art History. A minor outside the department is not required.
- ² A BFA student is limited to a maximum of 21 credits in any one studio area - Painting, Printmaking, Graphic Design, Multimedia, Photography/ Digital Imaging, Ceramics, or Sculpture.
- ³ Students must maintain at least a 3.0 average in their major.
- ⁴ A minor in Art and Art History consists of 15 credit hours (9 of which must be from the University of Miami).
- ⁵ All courses must be passed with a C or higher.

Astronomy

For courses in Astronomy see PHYSICS (p. 295), in particular PHY 110 and PHY 545.

Biochemistry and Molecular Biology

<http://bm.med.miami.edu/>

Dept. Code: **BMB**

(Code for the major is either Track 1: BCHM or Track 2: BCHN)

Introduction

Biochemistry is the chemistry of life. It includes or has large areas of overlap with molecular biology, biophysics, structural biology, cell biology, metabolism, neuroscience, nutrition, genetics, etc. It tries to explain what happens in living organisms and how biological processes are regulated. It is a relatively young science. Our understanding is still developing and students can learn something new every day. An Undergraduate Major in one of our two tracks, Track 1: Biochemistry and Molecular Biology (BCHM) or Track 2: Biochemistry and Nutrition (BCHN), provides an excellent preparation for:

1. Medical School
2. Graduate Studies in all basic medical sciences: Biochemistry, Molecular Biology, Cell Biology, Genetics, Neurobiology, Microbiology, Immunology, Pharmacology, Biophysics, Physiology, Bio-informatics, Biology, Nutrition, Environmental Science, and others.
3. Industry: Biotechnology, Pharmaceutical, Food Production, Food processing, and others.
4. Allied Health Professions: Nutrition, Dentistry, Forensics, Veterinary Medicine, Toxicology, Clinical Chemistry, Environmental Science, and others.
5. Non-Health Professions: Chemistry, Physics, Scientific Publishing, Patent Law, and others.

Educational Objectives

The undergraduate program in Biochemistry & Molecular Biology strives to provide

1. superior training in nutrition, biochemistry and molecular biology and
2. encouragement for self-study and research to students seeking a BS degree.

As part of a research-oriented university, the department, through its students, creates new knowledge. As a result of our teaching efforts, the new BS's created will be able to matriculate into professional and graduate schools or to find positions in teaching professions and/or industry. In addition, the department serves the community by providing expertise in matters related to nutritional and medical biochemistry. For example, it teaches biochemistry to pre-medical and other pre-health students across a wide variety of life science related majors including biology, microbiology, neuroscience, and biomedical engineering.

Degree Programs

As a member of the College of Arts & Sciences, the Department of Biochemistry and Molecular Biology offers an undergraduate BS degree. As a member of the Miller School of Medicine, it offers the following graduate degrees: PhD, Executive PhD, dual BS-PhD, and dual MD-PhD. Also, it offers a Molecular Medicine Pathway for MD students.

Departmental Honors

Departmental honors can be earned by biochemistry majors who have:

1. Successfully completed at least 6 credit hours of BMB 545. This research must be described in a brief thesis that needs to be approved by three BMB faculty members.
2. A 3.5 or higher grade point average in all BMB courses.
3. A 3.3 or higher grade point average in all courses taken at the University of Miami.

Dual Degree Honors Program

The Dual Degree BS-PhD Program in Biochemistry & Molecular Biology is offered to mature high school seniors with strong academic ability and achievement who seek careers in biological or biomedical science. Students can earn both a Bachelor of Science (BS) and a Doctor of Philosophy Degree (PhD) in approximately 6 years. For information see our website (http://www.miami.edu/admission/index.php/undergraduate_admission/academics/dual_degree_honors).

Major in Biochemistry and Molecular Biology

- B.S. in Biochemistry and Molecular Biology or Nutrition (p. 141)

Minor in Biochemistry and Molecular Biology

- Biochemistry and Molecular Biology (p. 146)

B.S. in Biochemistry and Molecular Biology or Nutrition

Major

The Bachelor of Science (B.S.) degree in either BCHM or BCHN requires 23 total credits of BMB courses: 17 credits of required BMB courses plus six credits of elective BMB courses. At least two elective BMB credits must come from a BMB lab course, either BMB 145, BMB 245, BMB 402, or BMB 545. To satisfy the College of Arts and Sciences writing requirement in the discipline, BMB majors must complete for writing credit (W) either BMB 507, BMB 511, or BMB 545. For all students, a grade of C or better must be earned in each BMB course. For current UM students to declare either

major or minor in BMB, a UM cumulative grade point average of 2.9 is required. For transfer students to declare either major or minor in BMB, a grade point average of 3.5 is required. The Department will make its own independent determination on a case-by-case basis concerning the equivalency of courses taken at other universities. The two possible academic tracks, BCHM and BCHN, differ by two required upper level BMB lecture courses.

Curriculum Requirements

Code	Title	Credit Hours
Required BMB Courses		
Students must complete all six BMB lecture courses listed in either Track 1 or Track 2:		17
Track 1 (BCHM)		
BMB 401	Biochemistry for the Biomedical Sciences	
BMB 506	Biomedical Case Studies	
BMB 507	Protein Structure, Function and Biology ¹	
BMB 509	Molecular Biology of the Gene	
BMB 514	Genetics and Genomics: Principles, Mechanisms, and Use	
BMB 555	Cellular Structure, Function, and Biology	
Track 2 (BCHN)		
BMB 401	Biochemistry for the Biomedical Sciences	
BMB 506	Biomedical Case Studies

Language Requirement		6
Arts and Humanities Cognate		9
People and Society Cognate		9
Electives		20
Total Credit Hours		120

¹ Writing credit (W) may be obtained in this course.

² These courses may be taken more than once for additional credits.

³ PRISM students take designated sections of the traditional chemistry series: CHM 111/CHM 113, CHM 112/CHM 114, CHM 201/CHM 205, and CHM 202/CHM 206, which satisfy the requirement for obtaining the Minor in Chemistry. The indicated three semester "Chemistry for the Biosciences" series is preferred, since students will be prepared for independent BMB research at a more early stage.

⁴ PRISM students take PHY 201/PHY 106 and PHY 202/PHY 108. A more advanced physics course series can be substituted (e.g., PHY 205, PHY 206/PHY 208, PHY 207/PHY 209).

⁵ PRISM students take MTH 171 and MTH 172.

⁶ PRISM students take CSC 210.

Biochemistry and Molecular Biology - Preferred CHM

BMB 519	Epigenetics and Nutrition	
Total Credit Hours		17

¹ A grade of C or better must be earned in each BMB course.

Biology

<http://www.as.miami.edu/biology/>

Dept. Code: BIL

Introduction

The Department of Biology offers undergraduate programs for students interested in a natural science education that will prepare them for careers in biological research, medicine and other health-related fields, teaching, environmental management and other fields that require a broad base of biological knowledge.

Educational Objectives

The Department of Biology trains students to understand and use the scientific method, and to engage in critical thinking and experimental design.

We strongly encourage original laboratory and/or field research under the mentorship of biology faculty. The Bachelor of Science in Biology prepares the student for further training in natural science, such as biology graduate school, as well as medical, veterinary, dental or other health-care professions. The Bachelor of Arts degree prepares the student for a career in humanities-related fields such as teaching or environmental law.

Degree Programs

Two undergraduate degrees are available in Biology: the **Bachelor of Science** and the **Bachelor of Arts**.

Both require a **major** in Biology consisting of 34 credit hours in BIL with a minimum grade of C- in each course and an overall GPA of 2.0.

Additional course requirements for each degree are listed under **Bachelor of Science** and the **Bachelor of Arts** elsewhere in this Bulletin.

Advanced Writing and Communication Requirement

Degree candidates in the College of Arts and Sciences must complete at least four writing courses, and at least one such course must be in the student's major discipline. Candidates for the B.S. or B.A. degree in Biology should consult the listings at <http://www.as.miami.edu/academics/undergraduate-studies/writing-courses/> to find writing-intensive courses in BIL. Transfer students may use a maximum of two transfer courses towards the writing requirement.

Departmental Honors

Honors Program

The Honors in Biology Program gives students the opportunity to do original research, working closely with faculty members. Students also have the opportunity to discuss their research with other students by participating in Honors Seminars.

Curriculum requirements for Honors in Biology:

Code	Title	Credit Hours
Select a minimum of two of the following: ¹		4
BIL 495	Projects in Biology	
BIL 496	Projects in Biology	
BIL 497	Projects in Biology	
Complete a senior thesis, of superior quality, on the results of the research.		
BIL 498	Senior Thesis	
Select research colloquium:		
BIL 499	Research Colloquium	
Select a minimum of two BIL credit hours from the following:		2
BIL 299	Seminar in Research Problems	
BIL 374	Seminar in Biology	
BIL 375	Seminar in Biology	
BIL 402	Seminar in Biology	
Select a minimum of one course in the Department of Biology at the 500 level		3
An overall GPA of 3.3 and a biology GPA of 3.5.		

¹ Projects in Biology involve a research project carried out under the supervision of a member of the Department of Biology faculty or alternative faculty approved by the Office of Undergraduate Research.

Advanced placement, and in certain situations, course credit hours can be earned through the College Entrance Examination Board program, placement examinations, and departmental proficiency examinations.

For Graduate programs, consult the Graduate School section of this Bulletin.

Variations within the above program may be permitted by the Department Chair in special cases.

Majors in Biology

- B.S. in Biology (p. 150)
- B.A. in Biology (p. 148)

Minor in Biology

- Biology (p. 154)

B.A. in Biology

The B.A. degree is recommended for students involved in interdisciplinary programs and for entrance to those professional schools and specific biological careers not requiring a B.S. degree with a major in Biology.

Curriculum Requirements

Code	Title	Credit Hours
Biology		10
BIL 150	General Biology	
BIL 151 or BIL 152 or BIL 153	General Biology Laboratory HHMI General Biology Laboratory. Introductory Biology/Chemistry Laboratory I	
BIL 160	Evolution and Biodiversity	
BIL 161 or BIL 162 or BIL 163	Evolution and Biodiversity Laboratory HHMI Evolution and Biodiversity Laboratory. Introductory Biology/Chemistry Laboratory II	
BIL Electives		24
At least three BIL elective credits must be at the 400-level or higher		
At least one elective course must be a CAPSTONE. (Locate capstone courses in Canelink Class Search under "Additional Search Criteria", subheading "Course Attributes".)		
Up to eight credit hours for the major may be selected from courses with a biological topic and numbered 300 or higher in MBE, MES, or MSC.		
Chemistry		8-15
Select one of the following options:		
Option 1:		
CHM 103 or CHM 111	Chemistry for Life Sciences I (Lecture) Principles of Chemistry I	
CHM 105 or CHM 113	Chemistry for Life Sciences I (Laboratory) Chemistry Laboratory I	
CHM 104 or CHM 201	Chemistry for Life Sciences II (Lecture) Organic Chemistry I (Lecture)	
CHM 106 or CHM 205	Chemistry for Life Sciences II (Laboratory) Organic Chemistry Laboratory I	
Option 2: Choose Chemistry for the BioSciences Three-semester Sequence.		
CHM 121 & CHM 113	Chemistry for the Biosciences I and Chemistry Laboratory I	
CHM 221 & CHM 114	CHM211 Chemistry for the Biosciences II and Chemistry Laboratory II	
CHM 222 & CHM 205	CHM212 Chemistry for the Biosciences III and Organic Chemistry Laboratory I	
Minor		15

A minor in a department other than natural science.		
Additional Required Courses		
ENG 105	English Composition I	3
ENG 106 or ENG 107	English Composition II English Composition II: Science and Technology	3
MTH 113 or MTH 108	Finite Mathematics Precalculus Mathematics II	3
Language Courses		3-9
Arts and Humanities Cognate		9

B.S. in Biology

The B.S. degree is recommended in preparation for graduate schools, professional schools, marine biology, and high school or college teaching.

Curriculum Requirements

Code	Title	Credit Hours
Biology Core Courses		22
BIL 150	General Biology	
BIL 151 or BIL 152 or BIL 153	General Biology Laboratory HHMI General Biology Laboratory. Introductory Biology/Chemistry Laboratory I	
BIL 160	Evolution and Biodiversity	
BIL 161	Evolution and Biodiversity Laboratory	

or BIL 162	HHMI Evolution and Biodiversity Laboratory.
or BIL 163	Introductory Biology/Chemistry Laboratory II
BIL 250	Genetics
BIL 255	Cellular and Molecular Biology
BIL 330	Ecology
or BIL 432	Ecology in the Galapagos
BIL 360	Comparative Physiology
Additional BIL electives	12
At least three credit hours of additional BIL electives must be at the 400-level or higher	
At least one BIL elective must be a CAPSTONE course. (Locate capstone courses in Class Search under "Additional Search Criteria", subheading "Class Attributes".)	
Two biology laboratory or field courses beyond <BIL 151 or BIL 152 or BIL 153> and <BIL 161 or BIL 162 or BIL 163> are required as part of the additional BIL electives. Approved laboratory/field courses at the 300 level or higher in departments other than Biology (e.g., BMB, MIC, MSC, NEU) may be counted towards this lab requirement. Check with the Department of Biology to confirm that a specific course is allowed to fulfill this requirement.	
Up to eight credit hours toward the major may be selected from courses with a biological topic and numbered 300 or higher in MBE, MES, or MSC.	
A maximum of two credit hours of the following may be applied towards the major	
BIL 371	Readings in Biology
BIL 372	Readings in Biology
A maximum of six credit hours of the following may be applied towards the major. (One of these may be counted towards the lab/field requirement.) ¹	
BIL 495	Projects in Biology
BIL 496	Projects in Biology
BIL 497	Projects in Biology
A maximum of three total credit hours from the following courses may be applied towards the major. Any course in this list may be taken only once to count towards the major. However, these courses may be taken additional times for general elective credit only.	
BIL 281	Undergraduate Learning Internship in Biology
BIL 381	Workshop Leaders in Biology I ²
BIL 382	Workshop Leaders in Biology II
BIL 481	Undergraduate Teaching Assistant Training in Biology
BIL 482	PRISM Teaching Fellow
Chemistry	12-15
Select one of the following Options:	
Option 1: Three-semester, 15 credit Chemistry Sequence recommended for life sciences majors. One additional CHM credit at the 200-level or higher (e.g., CHM 206) will fulfill the requirements for the minor in Chemistry.	
CHM 121 & CHM 113	Chemistry for the Biosciences I and Chemistry Laboratory I
CHM 221 & CHM 114	CHM211 Chemistry for the Biosciences II and Chemistry Laboratory II
CHM 222 & CHM 205	CHM212 Chemistry for the Biosciences III and Organic Chemistry Laboratory I
Option 2: Four-semester, 12 credit Chemistry Sequence. Four additional CHM credits at the 200-level or higher (e.g., CHM 202/CHM 206) will fulfill the requirements for the minor in Chemistry)	
CHM 111 & CHM 113	Principles of Chemistry I and Chemistry Laboratory I (recommended to be taken in the first year)
CHM 112 & CHM 114	Principles of Chemistry II and Chemistry Laboratory II (recommended to be taken in the first year)
CHM 201 & CHM 205	Organic Chemistry I (Lecture) and Organic Chemistry Laboratory I (recommended to be taken in the second year)
Statistics or Computer Language/Programming	

Select one statistics or one computer language/programming course from the following: ³	3	
BIL 511	Advanced Biostatistics	
ECS 204	Environmental Statistics	
IEN 311	Applied Probability and Statistics	
MSC 204	Environmental Statistics	
MTH 224	Introduction to Probability and Statistics	
PSY 291	Introduction to Biobehavioral Statistics	
PSY 292	Introduction to Biobehavioral Statistics for Non-Majors	
CSC 120	Computer Programming I	
Physics		
Select one of the following Options:	10-11	
Option One:		
PHY 101 & PHY 106	College Physics I and College Physics Laboratory I	
PHY 102 & PHY 108	College Physics II and College Physics Laboratory II	
Option Two:		
PHY 201 & PHY 106	University Physics I for the Sciences and College Physics Laboratory I	
PHY 202 & PHY 108	University Physics II for the Sciences and College Physics Laboratory II	
Option Three:		
PHY 205	University Physics I	
PHY 206 & PHY 208	University Physics II and University Physics II Lab	
PHY 207 & PHY 209	University Physics III and University Physics III Lab	
Minor in a Natural Science		
1-16		
A minor in chemistry, ecosystem science and policy, physics, geological sciences, marine sciences, biochemistry and molecular biology, computer science, mathematics, or microbiology and immunology		
Total credit hours for the minor will vary by department.		
The CHM requirement for the BS in biology fulfills either 12 or 15 (depending on which option is selected) of the 16 credits necessary for the minor in Chemistry. To complete the minor in Chemistry, only 1-4 additional credits in CHM are required beyond those necessary for the BS in Biology.		
Additional Required Courses		
ENG 105	English Composition I	3
ENG 106 or ENG 107	English Composition II English Composition II: Science and Technology	3
MTH 161	Calculus I	4
MTH 162	Calculus II	4
Language Courses		3-9
Arts and Humanities Cognate		9
People and Society Cognate		9
Electives		25-0
Total Credit Hours		120

¹ Only one course may be counted towards the laboratory course requirement for the B.S. degree

² A maximum of one credit hour may be applied towards the major or minor. These courses may be taken more than once each for *general elective credit only*, but only two credits from these options may count towards the major or minor.

³ This will fulfill the mathematics/statistics/computer programming requirement under the College of Arts and Sciences General degree requirements for the Bachelor of Science.

Suggested Plan of Study

Course	Title	Credit Hours

CHM 114	Chemistry Laboratory II	1
CHM 202	Organic Chemistry II (Lecture)	3
CHM 205	Organic Chemistry Laboratory I	1
CHM 206	Organic Chemistry Laboratory II	1
CHM 214	Quantitative Analytical Chemistry	3
One year of Calculus		
At least two semesters of Physics Plus Lab		
Total Credit Hours		16

The requirements for a major are flexible and should conform to the objectives of the student. A grade of C- or higher must be earned in all courses taken for major or minor credit hour, and the Chemistry GPA must be 2.00 or higher. Credit hours earned in CHM 381 and CHM 382 **do not count** toward the major or minor.

Educational Objectives

The mission of the Bachelor's degree program in the Chemistry Department is to promote an understanding and appreciation of the role of chemistry in modern society, especially as it relates to and integrates with other biological and physical sciences and societal issues facing humanity today such as the environment, health issues and technological advances.

Degree Programs

Three programs lead to degrees with a chemistry major:

1. The B.A. degree
2. The B.S. degree
3. The B.S. degree with certification by the American Chemical Society Committee for Professional Training of Chemists.

Departmental Honors

Honors in Chemistry may be earned by students who complete the B.S. degree in chemistry, plus at least five credit hours of CHM 488 and one credit hour of CHM 490, all with an average grade of at least 3.30. A written Honors Thesis and oral defense on the subject of the Honors Research must be presented by the student and approved by a Department Honors Committee.

Writing Requirement

To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in Chemistry should take CHM 320 or ENG 233.

Credit for Courses at the 100- and 200-Level

Credit hour may be earned in only one of the courses CHM 103, CHM 111 or CHM 151. Credit hour may not be earned in both CHM 104 and CHM 201.

Majors in Chemistry

- B.A. in Chemistry (p. 156)
- B.S. in Chemistry (p. 158)
- Certified B.S. in Chemistry (p. 163)
- B.S. Dual major in Chemistry and Physics (p. 304)

Minor in Chemistry

- Chemistry (p. 166)

B.A. in Chemistry

<http://www.as.miami.edu/chemistry/>

The **B.A.** degree requires 27 credit hours of chemistry. This major is designed for premedical students, high school science teachers, and others who choose a non-science minor. It may be combined with business courses in an interdisciplinary program. Variations within the program below may be recommended by the Department. Transfer students must complete a minimum of half of the required major credit hours in residence in the Department. Students should make certain that math and physics prerequisites are fulfilled in a timely manner.

B.S. in Chemistry

<http://www.as.miami.edu/chemistry/>

The B.S. degree requires 40 credit hours of chemistry. This major meets the minimum entrance requirements of many graduate programs in chemistry. Variations within the above program may be recommended by the Department. Transfer students must complete a minimum of half of the required major credit hours in residence in the Department. Students should make certain that math and physics prerequisites are fulfilled in a timely manner. For students who plan to do graduate work in physical chemistry, a double minor is recommended: Mathematics and Computer Science through 310 and 311, Physics through 350 and 360.

B.S. / M.S. in Chemistry Five-Year

The BS/MS program is a five-year program emphasizing research in the Senior year and in the Master's year. Before they enter the program, students will be prepared for their research experience through existing laboratory courses and by mentored research with a Chemistry graduate faculty member. Whereas students may begin mentored research as early as their freshmen year, it is expected that they should have at least one semester of

research prior to the start of their senior year. Students will have access to capstone and interdisciplinary 500 level courses as seniors and to 600 level courses as Masters students.

Classics

<http://www.as.miami.edu/classics>

Introduction

All culture and civilizations have their classics: those works of art that are seen as the best of their kind, have withstood the test of time, and embody the symbolic values of their society. In the Western tradition, the study of 'Classics' has focused upon the languages, thoughts, literatures, and cultures of ancient Greece and Rome, and their impact on the whole subsequent history of the Western world.

The study of Classics has been conceived in unusually broad terms; it is intended to encompass everything that can be known about the ancient Mediterranean world. There is room in Classics for the study of fields as disparate as literature, science, sculpture, history, architecture, religion, philosophy, theater, economics, music – in short, the entire panorama of human endeavor. It is no wonder that the study of Classics has always tended to attract some of the liveliest and most brilliant intellects; and it is equally unsurprising that students majoring in Classics find themselves extremely well-prepared for undertaking practically any type of career, whether that be in politics, law, medicine, teaching, publishing, research of all kinds, journalism, banking, or the corporate world. A degree in Classics marks the UM graduate as a person of superior analytical and critical skills, one who has proved able to cope with a rigorous academic curriculum, and who is exceptionally educated in the most fundamental aspects of what it means to be human. Thus, Classics is at the core of the humanities.

Educational Objectives

The educational objectives of the Department of Classics may be stated in a variety of ways, and on a number of levels. In terms of linguistic competency, students majoring (or minoring) in Classics are required to reach an appropriate level of fluency in reading ancient Greek or Latin, or both. In terms of cultural literacy, students of the Classics are educated within a rigorous curriculum exposing them to the great literary works and material cultures of ancient Greece and Rome. In terms of critical thinking, students of the Classics are trained to hone the skills of memory, analysis, and synthesis, skills that they will be able to apply for the rest of their lives in any realm of thought or action whatsoever.

The goal of an education in Classics is to foster and inculcate an ever-burgeoning awareness of what Cicero referred to as *humanitas* – in short, everything it is to be human. It is the mission of Classics to expose its students to the greatest thoughts and endeavors of the human race, and to encourage them to think about what that greatness consists in, and how to enlarge upon it. The profoundest educational objective of the Department of Classics is to preserve and study all that is important about the past, in order best to prepare for the future.

Degree Programs

The Department of Classics offers the Major and the Minor in Classics.

Major in Classics

The undergraduate Major in Classics at UM has four possible tracks. Greek, Latin, Greek and Latin, and Classical Civilization. To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in Classics should take three courses marked W from the list of GRE, LAT, and CLA courses offered in the catalog.

Departmental Honors

A student may earn Honors in Classics by completing a 'capstone' project with a grade of B or higher. This project can be the senior thesis (CLA 495 and CLA 496) or an Independent Study course (LAT 491, GRE 491, or CLA 491) that includes a substantial research paper. Either project must be supervised by a faculty member in the Classics Department. In order to qualify for a 'capstone' project, the student must have by the end of the junior year a minimum GPA of 3.5 in the Classics major and 3.3 overall.

In addition, Classics Majors, Classics Minors, and other students who meet certain academic criteria are eligible for membership in Eta Sigma Phi, the National Honors Society for Classics.

Majors in Classics

B.A. in Classics with Tracks in:

- Greek (p. 169)
- Latin (p. 171)
- Latin and Greek (p. 172)
- Classical Civilization (p. 167)

Minor in Classics

- Classics (p. 174)

B.A. in Classics - Classical Civilization Track

3 credit hours in a Greek (GRE) course		
3 credit hours in a Latin (LAT) course		
Select 12 credit hours in Greek (GRE), Latin (LAT), or Classics-in-translation (CLA) courses in any combination desired		12
Total Credit Hours		15

* Courses that qualify for the minor in Classics are taught each semester.

** A grade of C-minus or better is required in each course taken for the minor, as well as an overall GPA of 2.0 or higher.

Computer Science

<http://www.cs.miami.edu>

Dept Code: CSC

Introduction

The Department of Computer Science offers undergraduate and graduate education in Computer Science, and performs research in various areas of Computer Science. The Department has faculty with strong accomplishments in the fields of algorithm engineering, automated reasoning,

bioinformatics, computational complexity, computational geometry & computer graphics, cryptography & network security, data mining, data science, molecular computation, multimedia systems, music information retrieval, robotics, scientific computing, scientific visualization, semantic web, and wireless & mobile computing.

Educational Objectives

The Department of Computer Science educates students in the science of software development: the analysis of domain problems, the development of algorithms and programs, the use of specialist computing techniques, the system-software and hardware platforms, and the production and deployment of efficient and robust computer software. Instruction ranges from introductory programming classes and laboratories, through to research in various areas of computer science.

Degree Programs

The Department of Computer Science offers

- a Bachelor of Science (BS) major (p. 178)
- a Bachelor of Arts (BA) major (p. 175)
- a 5-year Bachelor of Science + Master of Science (BS+MS) (p. 943)
- a minor (p. 186)

Computer Science as a Second Major

A second major in Computer Science is available to all students. A second major in Computer Science requires completion of the requirements of a Computer Science major, either the Second Major in Computer Science, Fundamentals (p. 175) or the Second Major in Computer Science, with Tracks (p. 178).

Writing within the Discipline

To satisfy the College of Arts and Sciences writing requirement in the discipline, students whose first major is Computer Science must take at least one of the following courses for a writing credit: CSC 405, CSC 431, ENG 233.

Departmental Honors

In addition to the University's requirements for Departmental Honors, Departmental Honors in Computer Science requires completing a major and 6 additional approved credit hours (all CSC 4XX and CSC 5XX courses are approved). The major or additional credit hours must include at least 3 credit hours from CSC 410 and CSC 411.

Notes

- A grade of C- or better in all CSC courses is required in a major or minor.
- An overall GPA of 2.5 or better in all CSC courses is required in a major or minor. This GPA is computed using only courses from this department. If a course is repeated only the highest grade for the course is used.
- For a Computer Science major, at least 15 credit hours of CSC courses must be completed at the University of Miami.
- For a Computer Science minor, at least 9 credit hours of CSC courses must be completed at the University of Miami.

Majors in Computer Science

- B.S. in Computer Science (p. 178)
- B.A. in Computer Science (p. 175)

Minor in Computer Science

- Minor in Computer Science (p. 186)

Joint Degrees in Computer Science

- BS + MS in Computer Science - Five Year (p. 181)

B.A. in Computer Science

- 1 These mathematics courses can also fulfill the requirements for a Minor in Mathematics (see here (<http://bulletin.miami.edu/undergraduate-academic-programs/arts-sciences/mathematics/mathematics-minor>) for details).
- 2 Available to all students.
- 3 The Comprehensive Track provides coverage of the topics in Computer Science prescribed by the Association of Computing Machinery curriculum and the ABET Computing Accreditation Commission.
- 4 Requires permission of the Director of Undergraduate Studies.
- 5 This course may also be applied towards the Science requirement.
- 6 In addition to the generally approved electives, MMI 504 and MMI 505 are approved for the Graphics and Games track.
- 7 Maximally 6 credit hours from CSC 40X Computer Science Practicum, and maximally 6 credit hours from CSC 481.

B.S. + M.S. in Computer Science - Five Year

The 5-year Bachelor of Science + Master of Science program in Computer Science provides research training for students who wish to work in a computing research lab, or possibly continue to PhD studies.

Students enter the "MS-phase" of the program when they have met the following requirements:

- They have achieved senior status, i.e., earned 89 credit hours towards their Bachelor of Science in Computer Science.
- Within the requirements for a Bachelor of Science in Computer Science, they have completed the prerequisites for entry into the regular Master of Science program, i.e.:

Code	Title	Credit Hours
Pre-Requisites for entry to Regular MS in Computer Science Program		
CSC 120	Computer Programming I	4
CSC 220	Computer Programming II	4
CSC 314	Computer Organization and Architecture	3
CSC 317	Data Structures and Algorithm Analysis	3
CSC 427	Theory of Computing	3
MTH 161	Calculus I	4
MTH 224	Introduction to Probability and Statistics	3
MTH 309	Discrete Mathematics I	3

- They have completed 3 credit hours of CSC 410 and/or CSC 411 in a research-oriented project.
- They have an overall GPA of at least 3.0.
- They have a GPA of at least 3.3 in the CSC courses taken towards their BS in Computer Science.
- They have advised the Director of Graduate Studies of their eligibility for the MS-phase.

Students in the MS-phase must complete 3 further credit hours of CSC 410 and/or CSC 411 in a research-oriented project, as part of their Bachelor of Science in Computer Science (this project will normally be the starting point for the Master of Science research). Students in the MS-phase may take up to 12 credits of courses, including 600 level courses, that count towards completing the requirements for the Master of Science in Computer Science. When students have completed the requirements for a Bachelor of Science in Computer Science they will be awarded that degree, and when they have completed the requirements for the Master of Science in Computer Science they will be awarded that degree.

Incoming students can be admitted to the program if their mathematics placement is MTH 108 or higher. Existing Bachelor of Science in Computer Science students can switch into the program when they have met the requirements for entering the MS-phase of the program. Students can be removed from the program if they have not met the prerequisites for admission to the MS-phase by the time they have achieved senior status. If a student is removed or decides to withdraw from the program, any 600 level courses taken may be used to fulfill the requirements for a Bachelor of Science in Computer Science.

B.S. Curriculum Requirements

Code	Title	Credit Hours
Core Computer Science Courses		
CSC 120	Computer Programming I	4
CSC 220	Computer Programming II	4
CSC 314	Computer Organization and Architecture	3
CSC 317	Data Structures and Algorithm Analysis	3
CSC 322	System Programming	3
CSC 427	Theory of Computing	3
CSC 431	Introduction to Software Engineering	3
Core Mathematics Courses ¹		
MTH 161	Calculus I (or equivalent - MTH 140 and MTH 141, MTH 151, or MTH 171)	4
MTH 162	Calculus II (or equivalent - MTH 172)	4
MTH 210	Introduction to Linear Algebra	3
MTH 224	Introduction to Probability and Statistics	3
MTH 309	Discrete Mathematics I	3
Tracks		
Select one of the following Tracks:		17
Comprehensive Track: ^{2,3}		
CSC 419	Programming Languages	
CSC 421	Principles of Computer Operating Systems	
CSC 423	Database Systems	
CSC 424	Computer Networks	
Select a minimum of 5 credit hours of approved electives		
Flexible Track: ²		
Select a minimum of 17 credit hours of approved electives		
Computational Science Track: ⁴		
CSC 210	Computing for Scientists	
CSC 528	Introduction to Parallel Computing	
CSC 547	Computational Geometry	
CSC 548	Bioinformatics Algorithms	
CSC 410	Computer Science Project Planning	
or CSC 411	Computer Science Project Implementation	
MTH 320	Introduction to Numerical Analysis	
or MTH 520	Numerical Linear Algebra	
BIL 150	General Biology ⁵	
BIL 151	General Biology Laboratory ⁵	
Cryptography and Security Track: ⁴		
CSC 421	Principles of Computer Operating Systems	
CSC 424	Computer Networks	
CSC 507	Data Security and Cryptography	

CSC 410 or CSC 411	Computer Science Project Planning Computer Science Project Implementation	
Select one of the following:		
MTH 461	Survey of Modern Algebra	
MTH 505	Theory of Numbers	
MTH 561	Abstract Algebra I	
Select a minimum of 2 credit hours of approved electives		
Graphics and Games Track: ⁴		
CSC 329	Introduction to Game Programming	
CSC 529	Introduction to Computer Graphics	
CSC 545	Introduction to Artificial Intelligence	
CSC 410 or CSC 411	Computer Science Project Planning Computer Science Project Implementation	
Select a minimum of 5 credit hours of approved electives ⁶		
PHY 201 or PHY 205 or PHY 101	University Physics I for the Sciences ⁵ University Physics I College Physics I	
Science & Ethics Requirement		
An approved two semester sequence of courses with laboratory in Biology, Chemistry, or Physics		8-11
PHI 115	Social and Ethical Issues in Computing	3
Approved Electives		
Any CSC 2XX, CSC 3XX, CSC 4XX, CSC 5XX ⁷		
BTE 535	Information Security	
BTE 565	Mobile to Cloud: Developing Distributed Applications	
ECE 414	Computer Organization and Design	
ECE 514	Computer Architecture	
ECE 548	Machine Learning	
ECE 553	Neural Networks	
ECE 570	Network Client-Server Programming	
ECE 572	Object-Oriented and Distributed Database Management Systems	
ECE 574	Agent Technology	
ECE 576	Internet and Intranet Security	
ECE 577	Data Mining	
MTH 320	Introduction to Numerical Analysis	
MTH 505	Theory of Numbers	
MTH 520	Numerical Linear Algebra	
MTH 521	Numerical Methods in Differential Equations	
MTH 524	Introduction to Probability	
MTH 525	Introduction to Mathematical Statistics	
MTH 542	Statistical Analysis	
Additional Requirements		
ENG 105	English Composition I	3
ENG 106	English Composition II	3
Language Requirement		3-9
Arts and Humanities Cognate		9
People and Society Cognate		9
Electives		25
Total Credit Hours		120-129

¹ These mathematics courses can also fulfill the requirements for a Minor in Mathematics (see here (<http://bulletin.miami.edu/undergraduate-academic-programs/arts-sciences/mathematics/mathematics-minor>) for details).

² Available to all students.

- ³ The Comprehensive Track provides coverage of the topics in Computer Science prescribed by the Association of Computing Machinery curriculum and the ABET Computing Accreditation Commission.
- ⁴ Requires permission of the Director of Undergraduate Studies.
- ⁵ This course may also be applied towards the Science requirement.
- ⁶ In addition to the generally approved electives, MMI 504 and MMI 505 are approved for the Graphics and Games track.
- ⁷ Maximally 6 credit hours from CSC 40X Computer Science Practicum, and maximally 6 credit hours from CSC 481.

M.S. Curriculum Requirements

Students must complete the Graduate School requirements, and the Departmental requirements described here.

Code	Title	Credit Hours
Select either the Thesis Option or the Coursework Option ¹		24-30
Thesis Option		
CSC 810	Master's Thesis	6
24 credits from approved courses, including at least 9 credits from CSC7XX courses.		
Coursework Option		
30 credits from approved courses, including at least 18 credits from CSC7XX courses.		
Total Credit Hours		30-36

- ¹ For both options, at least 18 credit hours must be from CSC 6XX and CSC 7XX courses, and may not include more than 6 credit hours from CSC 670.

Each program must include both theoretical and experimental topics. By graduation students will have knowledge in the areas of Programming Languages, Algorithm Design and Analysis, Theory of Computing, Operating Systems, Computer Networks, and Software Engineering. Each program is approved by the CSGC and the Department Chairman or designate. Programs may be individually tailored to meet varied backgrounds and objectives. It is recognized that there are individuals with undergraduate degrees in other fields wishing to pursue graduate work in Computer Science, and individuals with work experience in the field wishing to advance their formal training in Computer Science.

Criminology

<http://www.as.miami.edu/sociology>

Overview

The major in Criminology provides a comprehensive understanding of crime and the criminal justice system. The major prepares students to assume roles of leadership in this critical area of modern society. Courses are designed to review theory, research, and applications of knowledge regarding delinquency and crime, as well as to understand the manner in which offenders are processed. Students learn about the nature and extent of crime, different types of crime and theories to explain crime. In addition, detailed analyses are made of the functions of the law, police, courts, and correctional systems and the ways in which these are linked to broader aspects of society. Students may also minor in Criminology. The Criminology major and minor are administered through the Department of Sociology.

Educational Objectives

The undergraduate program in Criminology has as its main objectives are to provide students with:

1. A strong component of a social science education, training in analytical and statistical skills that are highly valued by potential employers.
2. A valuable undergraduate preparation for pursuing careers in such fields as law in society, in the local and state criminal justice systems (e.g., juvenile probation officer, pretrial services officer, crime analyst for criminal justice agencies), or in federal agencies (e.g., DEA).
3. An excellent and comprehensive training program for students wishing to pursue graduate study in criminology, law school, criminal justice, sociology, or other social and behavioral sciences.

Degree Programs

Students may earn a Bachelor of Arts degree in Criminology. The Department of Sociology also offers graduate programs leading to a PhD. degree in the areas of:

- Criminology
- Medical Sociology
- Race, Ethnic Relations, and Immigration

Departmental Honors

Graduation with Departmental Honors is available to eligible students who fulfill the following:

1. Students desiring Departmental Honors in Criminology must maintain an overall GPA of 3.3 and a GPA of 3.5 in Criminology. They must also achieve a minimum of B in all Criminology courses. For transfer students, the Department uses the cumulative, combined GPA calculated by the Office of the Registrar.
2. A student seeking Departmental Honors is required to write an independent research paper which is submitted to the Undergraduate Committee in the Department of Sociology. The nature of the independent research project is determined by the faculty member(s) with whom the student works. This project is done in SOC 498 & SOC 499. The student should have the same professor for all six credit hours.
3. Recruitment of eligible students is by departmental invitation during a student's junior year.

Advanced Writing and Communication Requirements

To satisfy the College of Arts and Sciences Advanced Writing and Communication requirement, all Criminology majors must take 4 writing-designated courses, including 1 writing-designated course in the SOC area. Writing courses are regularly offered by the department; however, it is the student's responsibility to plan accordingly to incorporate a designated SOC writing-designated course into their graduation plans.

Alpha Phi Sigma

Majors, minors, and other students who meet certain academic criteria are eligible for membership in Alpha Phi Sigma, the National Criminal Justice Honor Society. Alpha Phi Sigma sponsors events that enhance the academic and social life of the department.

Major in Criminology

- B.A. in Criminology (p. 188)
- Criminology & Sociology Double Major; Combined Minor (p. 339)

Minor in Criminology

- Criminology (p. 190)

- Criminology & Sociology Double Major; Combined Minor (p. 339)

B.A. in Criminology

Curriculum Requirements

Code	Title	Credit Hours
Required Courses		
SOC 101	Introduction to Sociology	3

Economics

Introduction and Educational Objectives

Economics uses the idea of optimizing behavior to provide a unified framework for studying human action. The economics curriculum is designed to give students an understanding of economic theory and its application to a wide range of problems. The program provides excellent preparation for careers in business, government, and international agencies. It is particularly recommended for students planning graduate study or professional training in fields such as law, business, international studies, public administration, and economics.

A student pursuing the Economics major will select one of two possible tracks: Political Economy (the People and Society track) or Quantitative Economics (the Science, Technology, Mathematics, and Engineering track).

Members of the Department are prepared to counsel students in the selection of courses and in other matters relating to the preparation for careers. Economics may be the major area of specialization of a candidate for the Master of Arts (p. 1016) and Doctor of Philosophy (p. 995) degrees. Consult the Graduate Academic Programs section of the Bulletin for the general requirements of these programs.

Major in Economics

- B.A. in Economics (p. 190)
- Minor in Political Economy for Non Business Students (p. 413)
- Minor in Quantitative Economics for Non Business Students (p. 415)

B.A. in Economics

Curriculum Requirements

A student pursuing the major in Economics through the College of Arts and Sciences will select one of two possible tracks: Political Economy (the People and Society track) or Quantitative Economics (the Science, Technology, Mathematics, and Engineering track) and complete the curriculum requirements as follows:

Code	Title	Credit Hours
1. Choose either the POLITICAL ECONOMY Track or the QUANTITATIVE ECONOMICS Track ¹		30
Political Economy Track Required Courses (People & Society) :		
ECO 211	Principles of Microeconomics	
ECO 212	Principles of Macroeconomics	
ECO 300	Microeconomic Theory and Applications (ECO 302 may be taken instead if MTH 161 or equivalent is completed)	
ECO 301	Macroeconomic Theory	
ECO 430	Applied Econometrics	
Major Choice Courses (P&S) - Select five courses (15 credit hours) from the following: ²		
ECO 311	Labor Economics (I)	
ECO 333	Industrial Economics and Public Policy	
ECO 345	Environmental Economics	
ECO 351	Economics of Development	

ECO 371	Latin America and the Global Economy	
ECO 379	The Political Economy of Growth	
ECO 386	Health Economics	
ECO 403	Monetary Economics	
ECO 420	Economic Growth	
ECO 441	International Trade Theory	
ECO 442	International Monetary Economics	
ECO 443	Economic Analysis of Energy and Commodity Markets	
ECO 445	Global Economics: Trade and Currencies	
ECO 498	Special Topics in Economics (People and Society Topics)	
ECO 532	History of Economic Thought	
Students who have completed ECO 302 may select a maximum of two STEM-designated courses (6 credit hours) as their major choice courses. Students who have completed ECO 300 may select a maximum of three STEM-designated courses (9 credit hours) as major choice courses. ²		
ECO 444	Game Theory in Economic Applications.	
ECO 460	Industrial Organization	
ECO 499	Special Topics in Economics (STEM Topics)	
ECO 510	Mathematical Economics and Applications	
ECO 511	Empirical Labor Economics	
ECO 512	Topics in Mathematical Economics	
ECO 520	Econometrics	
ECO 521	Advanced Macroeconomic Theory	
ECO 533	Advanced Microeconomic Theory	
Quantitative Economics Track Required Courses (STEM) : ³		
ECO 211	Principles of Microeconomics	
ECO 212	Principles of Macroeconomics	
ECO 301	Macroeconomic Theory	
ECO 302	Microeconomic Theory (requires MTH 161 or equivalent as a pre-requisite)	
ECO 430	Applied Econometrics	
Major Choice Courses (STEM): Select five courses (15 credit hours). Only one course from these five major choice courses may be a People & Society ECO major choice course. Students must select four to five STEM-designated major choice courses (12-15 credit hours) from the following ²		
ECO 444	Game Theory in Economic Applications.	
ECO 460	Industrial Organization	
ECO 499	Special Topics in Economics (STEM Topics)	
ECO 510	Mathematical Economics and Applications	
ECO 511	Empirical Labor Economics	
ECO 512	Topics in Mathematical Economics	
ECO 520	Econometrics	
ECO 521	Advanced Macroeconomic Theory	
ECO 533	Advanced Microeconomic Theory	
2. Additional Graduation Requirements for Degree Completion:		
ENG 105	English Composition I	3
ENG 106	English Composition II	3
UMX 100	The University of Miami Experience	0
Calculus Course ⁴		4
Second Language Proficiency Requirement (3-9 credit hours, depending on the student's initial placement in the language chosen) ⁵		9
Minor (may be used in lieu of a cognate to satisfy an Area of Knowledge in General Education)		15
Arts and Humanities Cognate Courses		9
STEM or People and Society Cognate Courses (depends upon which Economics Major track is selected)		9
Natural Science Course ⁶		3

Electives ⁷	35
Advanced Writing and Communication - see note regarding ECO writing course ⁸	
Total Credit Hours	120

- ¹ All specific coursework for the major in Economics must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.0 is required for all specific coursework taken in the major. All courses must be taken within the current pre-requisite structure.
- ² Course pre-requisites vary by course.
- ³ This track requires both MTH 161 or an equivalent calculus course and ECO 302.
- ⁴ This requirement is satisfied by MAS 110 or MTH 130 or MTH 141 or MTH 151 or MTH 161 or MTH 171 or an equivalent calculus course or higher. Please note: If the student wishes to take ECO 302 or the Quantitative Economics track, then MTH 161 or equivalent must be taken. Also note that if the student wishes to apply to transfer to the Miami Business School, he/she must take MTH 161 or an equivalent and earn a minimum "B" grade in the course, as well as have a minimum UM grade point average of 3.0.
- ⁵ Please see the College of Arts and Sciences Bulletin Overview page (p. 114) regarding the "Details of the Second Language Proficiency."
- ⁶ This requirement is waived if the student's STEM cognate includes a Natural Science course from the approved list. See the College of Arts and Sciences Bulletin Overview (p. 114) page for more information.
- ⁷ A minimum of 120 credits is required for graduation. Sufficient credits must be earned in electives to enable the student to complete this minimum of 120 credits. The exact number of elective credits required will vary depending on the number of credits needed to complete all other graduation requirements.
- ⁸ Advanced Writing and Communication Proficiency: Degree candidates must complete at least four writing courses, and at least one writing course must be in the student's major discipline. ECO 445 will satisfy the College of Arts & Sciences writing requirement in the discipline.

*The curriculum change to require 30 hours instead of 24 hours for the Economics major for Arts and Sciences students is pending Board of Trustee approval.

Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman student's 8-semester plan. The individual student's plan may vary depending upon the initial placement into English Composition, mathematics, and modern language. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor satisfies a particular "Area of Knowledge" within the general education requirements of the University, so that a separate cognate in that same Area of Knowledge is not required. For example, if a student chooses the Political Economy track for the Economics major, then the People and Society Area of Knowledge will be fulfilled by the major. The STEM and Arts and Humanities Areas of Knowledge may likewise be fulfilled by an additional major, or through the minor or a cognate.

Students construct their individualized plans in collaboration with their assigned academic advisor.

Course	Title	Credit Hours
Freshman Year

¹ A calculus course is required for the Economics major. If a student wishes to take ECO 302 or the Quantitative Economics track, then MTH 161 or an equivalent must be taken. If a student has taken an "applied" calculus course such as MAS 110 or MTH 130, then he/she will take ECO 300 instead of ECO 302 and must follow the Political Economy (P&S) Major track for Economics.

Ecosystem Science and Policy

<http://www.cesp.miami.edu>

Dept. Code: ECS

Introduction

The undergraduate program in Ecosystem Science and Policy (ECS) is offered by the Leonard and Jayne Abess Center for Ecosystem Science and Policy. The goal of the program is to educate the next generation of environmental leaders. The ECS program provides students with a broad background in environmental issues from a variety of perspectives, along with in-depth education in an area of specialization.

Educational Objectives

The ECS major offers a series of problem-based learning courses, culminating in a capstone course in the senior year. Courses emphasize integration of science and policy approaches to real-world environmental issues. This preparation gives students both the theoretical background and technical skills to pursue environmental careers in, teaching and research, as well as for careers in government and private industries concerned with the environment.

Advanced Writing and Communication Requirement

To satisfy the Advanced Writing and Communication requirement, students majoring in ECS take three ECS writing intensive courses (ECS 113, 302, 403). They also receive instruction in scientific communication, including how to make charts, graphs, maps, meeting posters, and other representations of data, in ECS 112 and 301. Many ECS courses co-listed with other departments /programs are writing intensive or include instruction in visual communication.

Degree Programs

The Ecosystem Science and Policy program offers two undergraduate degree major programs: a Bachelor of Science (B.S.) and a Bachelor of Arts (B.A.). The minor consists of 15 credit hours. Majors are required to complete either an environmentally related internship or a research project with the Center for Ecosystem Science and Policy or with other UM faculty.

Only those courses passed with a grade of "C-" or better in the ECS core may be applied to the major or minor. All ECS majors are required to maintain an overall cumulative grade point average of 2.5 or better.

Majors in Ecosystem Science and Policy

- B.S. in Ecosystem Science and Policy (p. 199)
- B.A. in Ecosystem Science and Policy (p. 194)

Minor in Ecosystem Science and Policy

- Ecosystem Science and Policy (p. 207)

Certificate in Ecosystem Science and Policy

- Sustainability (p. 205)

B.A. in Ecosystem Science and Policy

The B.A. degree in Ecosystem Science and Policy is recommended in preparation for careers in law, government and business, including professional schools and careers in government and private industries concerned with the environment. Students pursuing the B.A. may choose to have the major fulfill either the STEM or People & Society cognate; they will need to complete the other cognate plus the Arts & Humanities cognate. Students with a second major in another school or college should consult their advisors regarding requirements for that major. Any course used to fulfill one ECS requirement cannot be used to fulfill another; however, courses other than the ECS core can be used to fulfill requirements for a cognate, minor, or second major. Students whose primary college is Arts & Sciences are required to complete four courses designated as "Writing Intensive" (also known as "W") courses. Those seeking a B.A. degree in ECS must complete at least two, but as many as four, ECS courses designated as "W". These include ECS 113, ECS 301, ECS 302, ECS 402, and ECS 403. Up to two "W" courses may be selected from other departments. Students whose primary degree is in another school or college should follow its writing requirements.

Curriculum Requirements

Code	Title	Credit Hours
ECS Core Courses		
ECS 111	Introduction to the Earth's Ecosystem	3
ECS 112	Field Problems in Ecosystem Science and Policy	2

ECS 113	Introduction to Environmental Policy	3
ECS 201 or ECS 202	Seminar Series in Contemporary Environmental Issues I Seminar Series in Contemporary Environmental Issues II	1
ECS 232	Ecological Principles and Environmental Applications	3
ECS 301	Tools for Environmental Decision-Making: The Quantitative Perspective	3
ECS 302	Perspectives on Environmental Decision Making	3
ECS 401 or ECS 402	Internship Thesis	3
ECS 403	Interdisciplinary Approaches	3
Science Core Courses		
Geological Sciences:		
Select one of the following:		3-6
GSC 102	Evolution of the Biosphere	
GSC 103	Evolution of the Modern Earth's Environment	
GSC 106	Geological Influences on Society	
GSC 110 & GSC 114	The Earth System and Earth Processes Lab	
GSC 111	Earth System History	
Marine Science:		
MSC 101 or MSC 111	Survey of Oceanography Introduction to Marine Science	3
Electives:		
Environmentally-related science elective(s) to total 3 credits ¹		3
Mathematics Courses		
MTH 108	Precalculus Mathematics II (or higher)	3
Select one of the following Statistics courses:		3
ECS 204	Environmental Statistics	
MSC 204	Environmental Statistics	
MTH 224	Introduction to Probability and Statistics	
PSY 292	Introduction to Biobehavioral Statistics for Non-Majors	
Social Science Core Courses		
GEG 310	Geographic Information Systems I	3
Select one of the following:		3
ECO 211	Principles of Microeconomics	
ECO 212	Principles of Macroeconomics	
POL 201	Introduction to American National Government	
POL 202	Introduction to Comparative Politics	
POL 203	Introduction to International Relations	
Select one of the following:		3
APY 201	Principles of Archaeology	
APY 202	Principles of Cultural Anthropology	
APY 203	Principles of Physical Anthropology	
APY 204	Principles of Linguistic Anthropology	
Select three credit hours of environmentally-related People & Society electives: ²		3
Select three credit hours of environmentally-related People & Society electives at 300 level or higher: ²		3
APY 418	Seminar in Anthropology	
APY 435	Anthropology of Nature and Environment	
ARC 594	Geographic Information Systems in Urban Design	
ECO 345	Environmental Economics	
ECO 351	Economics of Development	
GEG 345	Drinking Water: Past, Present, and Future	

GEG 341	Population, Health, and Environment	
GEG 334	Biogeography and Conservation	
GEG 410	Geographic Information Systems II	
GEG 321	Remote Sensing of the Environment	
GEG 421	GIS and Environmental Modeling	
GEG 506	Field Studies in Geography	
HIS 368	Nature and the Environment in American History	
INS 322	Economics of Development and the Environment	
INS 421	Poverty and the Environment	
LAS 302	Interdisciplinary Topics in Latin American and Caribbean Studies- Travel Course	
POL 314	Legislative Processes	
SOC 210	Introduction to Social Research	
Additional Required Courses		
ENG 105	English Composition I	3
ENG 106	English Composition II	3
Arts and Humanities Cognate		9
Language Courses		9
Minor and Electives		42
Total Credit Hours		120-123

¹ Additional courses may be approved by the ECS program.

² APY, ARC, ECO, ECS, GEG, HIS, INS, LAS, MAF, POL, SOC

Suggested Plan of Study - with Minor

In this plan, we are showing the case in which study abroad simply counts toward the total required for graduation, 120 credits. However, study abroad courses generally can be used as courses for ECS, for a minor, or for cognates, in which case there would be additional electives opened up in subsequent semesters.

Course	Title	Credit Hours
Year One		
Fall		
ECS 111	Introduction to the Earth's Ecosystem	3
MTH 108	Precalculus Mathematics II	3
ENG 105	English Composition I	3
APY 202	Principles of Cultural Anthropology	3

ECS Elective 300 level or higher	3
Elective	3
Credit Hours	12
Total Credit Hours	120

¹ This course needs to be at the 300 level or higher.

B.S. in Ecosystem Science and Policy

The B.S. degree in Ecosystem Science and Policy is recommended for students intending to attend graduate or professional schools in pursuit of research or academic careers (including secondary or higher education). It is also suitable for those preparing for technical careers in government and private industries concerned with the environment. Students pursuing the B.S. may choose to have the major fulfill either the STEM or People & Society cognate; they will need to complete the other cognate plus the Arts & Humanities cognate. Students with a second major in another school or college should consult their advisors regarding requirements for that major and school or college. Any course used to fulfill one ECS requirement cannot be used to fulfill another; however, courses other than the ECS core can be used to fulfill requirements for a cognate, minor, or second major.

Students whose primary college is Arts & Sciences are required to complete four courses designated as "Writing Intensive" (also known as "W") courses. Those seeking a B.S. degree in ECS must complete at least two, but as many as four, ECS courses designated as "W". These include ECS 113, ECS 301, ECS 302, ECS 402, and ECS 403. Up to two "W" courses may be selected from other departments. Students whose primary degree is in another school or college should follow its writing requirements.

Curriculum Requirements

Code	Title	Credit Hours
ECS Core Courses		
ECS 111	Introduction to the Earth's Ecosystem	3
ECS 112	Field Problems in Ecosystem Science and Policy	2
ECS 113	Introduction to Environmental Policy	3
ECS 201 or ECS 202	Seminar Series in Contemporary Environmental Issues I Seminar Series in Contemporary Environmental Issues II	1
ECS 232 or BIL 330	Ecological Principles and Environmental Applications Ecology	3
ECS 301	Tools for Environmental Decision-Making: The Quantitative Perspective	3
ECS 302	Perspectives on Environmental Decision Making	3
ECS 401 or ECS 402	Internship Thesis	3
ECS 403	Interdisciplinary Approaches	3
ECS electives at the 300 level or higher		6
In addition, students must take the following courses, which may fulfill cognate or second major requirements:		
Science Core Courses		
A science course at the 110 level or above with lab (BIL, GSC, MSC, PHY)		4
CHM 111 & CHM 113	Principles of Chemistry I and Chemistry Laboratory I	4
CHM 112 & CHM 114	Principles of Chemistry II and Chemistry Laboratory II	4
CAE 240 or CAE 340	Environmental Pollution Introduction to Environmental Engineering	3
Complete one of the ECS science tracks (see table below)		9-22
Environmental Chemistry Track		
Environmental Health track		
Geology track		
Geospatial Certificate track		
Mathematics track		
Conservation Biology track		
Climate Science & Policy track		
Mathematics Courses

Track Requirements

Code	Title	Credit Hours
Complete one of the following ECS science tracks:		
Environmental Chemistry Track: ³		11-12
Select three of the following (must include 2 labs):		
CHM 201 & CHM 205	Organic Chemistry I (Lecture) and Organic Chemistry Laboratory I	
CHM 202 & CHM 206	Organic Chemistry II (Lecture) and Organic Chemistry Laboratory II	
CHM 360 & CHM 364	Physical Chemistry I (Lecture) and Physical Chemistry (Laboratory I)	
CHM 365 & CHM 464	Physical Chemistry II (Lecture) and Physical Chemistry (Laboratory II)	
CHM 401	Environmental Chemistry	
Geology track: ⁴		19-21
GSC 110 & GSC 114	The Earth System and Earth Processes Lab	
GSC 111	Earth System History	
GSC 260	Earth Materials	
Select two of the following:		
GSC 360	Depositional and Diagenetic Systems	
GSC 380	Paleontology and Stratigraphy	
GSC 410	Environmental Geochemistry	
GSC 420	Geophysics	
GSC 480	Structural Geology	
GSC 550	Hydrogeology	
Geospatial Certificate track: ⁵		15
GEG 310	Geographic Information Systems I	
GEG 321	Remote Sensing of the Environment	
GEG 410	Geographic Information Systems II	
Select 2 of the following:		
GEG 305	Spatial Data Analysis I	
GEG 390 or GEG 590	Topics in Geography Advanced Topics in Geography	
GEG 315	Digital Cartography	
GEG 405	Spatial Data Analysis II	
GEG 415	Web GIS	
Mathematics track: ⁶		9
MTH 359	Mathematical Models in Biology and Medicine	
Select two of the following:		
MTH 210	Introduction to Linear Algebra	
MTH 310	Multivariable Calculus	
MTH 311	Introduction to Ordinary Differential Equations	
Environmental Health track: ⁷		23-25
BIL 150 & BIL 151	General Biology and General Biology Laboratory	
CHM 121	Chemistry for the Biosciences I	
CHM 221	CHM211 Chemistry for the Biosciences II	
CHM 222	CHM212 Chemistry for the Biosciences III	
Select one of the following:		

BPH 208	Introductory Epidemiology	
BMB 401	Biochemistry for the Biomedical Sciences	
MIC 301	Introduction to Microbes and the Immune System	
MIC 322	Medical Parasitology	
Climate Science & Policy track: ⁸		18
MSC 111	Introduction to Marine Science	
ATM 102 or ATM 103	Introduction to Weather and Climate Survey of Modern Meteorology	
MSC 346	Climate Science and Policy	
Select two courses from the following:		
MSC 220	Climate and Global Change	
MSC 222	The Earth's Climate: Past and Future	
GSC 462	Earth's Ancient Atmospheres, Climates, and Sea Levels	
Other approved climate science course		
Select one course from the following:		
MSC 313	Coastal Law	
MSC 314	Ocean Law	
MSC 340	Ocean Policy	
MSC 342	Decision Making and the Environment	
Other approved climate policy course		
Conservation Biology track: ⁹		22
BIL 150 & BIL 151	General Biology and General Biology Laboratory	
BIL 160	Evolution and Biodiversity	
Select 12 credits from the following (must include 3 credits in the field/lab category):		
BIL 220	Evolution and Disease	
BIL 226	General Botany	
BIL 230	Introduction to Marine Biology	
BIL 250	Genetics	
BIL 315	Marine Biota and Biogeochemical Cycles	
BIL 316	Global Primary Production	
BIL 330	Ecology	
BIL 350	Survey of Marine Mammals	
BIL 360	Comparative Physiology	
BIL 415	Coral Reef Science and Management	
BIL 433	Conservation in Practice	
BIL 435	Origins, Ecology and Conservation of Insular Diversity	
BIL 441	Animal Behavior	
BIL 539	Conservation and Protected Areas	
Field/Lab Category:		
BIL 227	General Botany Laboratory	
BIL 231	Introduction to Marine Biology Laboratory	
BIL 321	Invertebrate Zoology	
BIL 328	Biology of Birds	
BIL 331	Ecology Laboratory	
BIL 332	Tropical Ecology	
BIL 432	Ecology in the Galapagos	
BIL 525	Herpetology	

¹ Note: ECS B.S. majors without a second major must take a GIS course, e.g. GEG310.

² Note: For tracks having a higher credit count, the number of electives available is reduced.

³ Note: CHM111/CHM113, CHM112/CHM114 must be taken before the Environmental Chemistry track. Fulfillment of the Environmental Chemistry track earns a Chemistry minor.

- 4 *Note: Fulfillment of the Geology track earns a minor in Geological Sciences.*
- 5 *Note: Fulfillment of the Geospatial Certificate track PLUS GEG 110 earns a geography minor.*
- 6 *Note: Calculus II must be taken before the Mathematics track. Fulfillment of the Mathematics track earns a Mathematics minor.*
- 7 *Note: The 12-credit CHM121/221/222 sequence of the Environmental Health track replaces the normal 8 credit ECS B.S. CHM111/112/113/114 series, making the effective credit count for the Environmental Chemistry track 19-21. This track as described does not earn a minor; additional courses to finish a minor (or a separate minor) must be undertaken.*
- 8 *Note: MSC346 (co-listed with ECS403) taken to satisfy the Climate Science & Policy track cannot also satisfy the ECS403 core course requirement; a separate ECS403 section must be taken. Fulfillment of the track earns a minor in Climate Science & Policy.*
- 9 *Note: BIL539 (Co-listed with ECS403) taken to satisfy the Conservation Biology track cannot also satisfy the ECS403 core course requirement; a separate ECS403 section must be taken. Fulfillment of the Conservation Biology track earns a Biology minor.*
- * Students following the ECS Bachelor of Science must complete either a track (listed separately above) or a second major in a STEM field.

Certificate in Sustainability

The certificate program is intended to equip students with knowledge and skills for implementing positive change through environmentally responsible practices in various fields; to serve as a curricular adjunct to sustainable initiatives at UM; to foster a culture of conservation at the University; to enhance students' preparation for a variety of careers, including engineering, architecture, business, marketing, government, and more; and to affirm UM's commitment to sustainability and complement its efforts to enhance environmental education.

To obtain the sustainability certificate, students will complete 18 credits from the courses below.

Students may take courses to align with their major or minor, or individual interests (e.g., energy, green buildings, natural resource management). Note that some courses on the list may require one or more prerequisites. It is the responsibility of students to obtain any permissions for waivers of prerequisites from the appropriate parties in a given School or College. Courses not on the list below may be substituted; students should obtain permission for substitutions in advance from the director or assistant director of ECS.

Students must be enrolled full time and all courses for the Certificate must be passed with no lower than a "C" grade. Students who successfully complete the program will receive a notation on their transcripts that they have received the Sustainability Certificate.

Prerequisite Courses

- POL 322 has a prerequisite of POL 201 or POL 202; it is only offered in Summer
- MSC 340 has a prerequisite of MSC 111
- ARC 223 has a prerequisite of ARC 102 and ARC 122
- INS 322 has a prerequisite of INS 102 or ECO 211 and ECO 212, or permission of instructor
- INS 421 has a prerequisite of INS 102 or permission of instructor
- ECO 345 has a prerequisite of ECO 211 and ECO 302
- MSC 345 has a prerequisite of ECO 211
- GEG 341 has a prerequisite of any 100 level GEG course.

Curriculum Requirements

Code	Title	Credit Hours
Group 1: Human Impacts on Natural World		3
ECS 111	Introduction to the Earth's Ecosystem	
GSC 103	Evolution of the Modern Earth's Environment	
MSC 220	Climate and Global Change	
Group 2: Environmental Politics & Policy		3
ECS 113	Introduction to Environmental Policy	
ECS 372	Special Topics in Ecosystem Science and Policy	
POL 322	Environmental Politics and Policy	
MSC 340	Ocean Policy	
MSC 313	Coastal Law	
MSC 346	Climate Science and Policy	
Group 3: Social Implications		3
ARC 223	Architecture and the Environment	
INS 322	Economics of Development and the Environment	
INS 421	Poverty and the Environment	
ECO 345	Environmental Economics	
MSC 345	Economics of Natural Resources and the Environment	
ECS 310	Sustainable Living	
GEG 345	Drinking Water: Past, Present, and Future	
GEG 341	Population, Health, and Environment	
Total Credit Hours		9

Additional Courses

Education

Degree in Teacher Education for Elementary and Secondary Schools

The School of Education and Human Development has suspended admission into the accredited Secondary Education program for the 2018-2019 academic year. Though admission to the major is currently suspended, the school offers a Professional Training Option (PTO) minor that provides eligibility for a temporary teaching certificate in the State of Florida for students who are majoring in English, Mathematics, Biology, Economics, Geography, History, International Studies, Political Science, Art, Drama, or Music.

¹ For specific information regarding required coursework, field experiences, and State requirements, please see an academic advisor in the School of Education and Human Development.

Florida State Department of Education

All education programs are approved by the State of Florida Department of Education. For specific information regarding required coursework, please see an advisor in the School of Education and Human Development.

Minor in Education

- Traditional Education (p. 208)

Certificate in Education

- Professional Training Option (p. 208)

Minor in Traditional Education

Code	Title	Credit Hours
TAL 103	Psychological Foundations of Education	3
Take any TAL course at the 200 level or higher		3
Take two courses at the 300 level or higher		6
Total Credit Hours		12

* The requirements for a minor in education consist of 12 credit hours passed with a C or higher, with an overall GPA of 2.5 in courses selected from the list of acceptable TAL departmental courses.

** A minimum of six credit hours must be numbered 300 or higher. This minor does not lead to teaching credentials.

*** American Sign Language courses **do not count** toward the Education minor (TAL 107, 207, 307, and 407).
TAL 191 **does not count** toward the Education minor.

Professional Training Option Certificate

The Professional Training Option (PTO) is a Florida Department of Education approved pathway for non-education majors to complete the professional component, one of the requirements to become a certified teacher in the State of Florida.

The PTO minor is 18 credit hours. Students must successfully pass the required portions of the Florida Teacher Certification Exam (FTCE) prior to degree conferral. UM transcripts will indicate that the student has completed a Florida State approved PTO program. Program completers will be eligible to apply for a Temporary Teaching Certificate in the State of Florida. Please see an academic advisor in the School of Education and Human Development for exam requirements and course advising.

Minor in Engineering

The College of Engineering offers the student in the College of Arts and Sciences a variety of 15 credit hour minors designed to give the student a basic understanding of the technologies that support and shape our civilization. Minors may be elected in Architectural, Civil, Computer, Electrical, Environmental, Industrial, or Mechanical Engineering. The student is given considerable freedom in choosing courses in accordance with the student's interests.

Faculty in the College is prepared to assist students seeking Engineering minors in the preparation of programs of study.

More detailed descriptions of these minors will be found in the College of Engineering (p. 592) section of this Bulletin.

English

<http://www.as.miami.edu/english>

Dept. Code: ENG

Introduction

The English Department offers programs for students interested in a liberal arts education. While many English majors direct their studies toward careers in law, creative writing, secondary education, or university teaching and scholarship, a major in English is just as valuable to students considering careers in business, journalism, or any of the health professions. Students who would like to learn more about any of these programs are encouraged to consult the Director of Undergraduate Studies in the Department of English, Ashe Bldg. 321.

Educational Objectives

English as a discipline offers an opportunity for a general humanistic education, and it develops skills in communication and analysis essential in most careers. An education in English teaches students to write, to think critically, to weigh values, and to communicate ideas. At the same time, it develops their creativity and aesthetic understanding, and affords them a knowledge of our literary heritage in all of its historical and cultural dimensions.

Degree Programs

The major in English leads to the degree of Bachelor of Arts.

Advanced Writing and Communication Proficiency

All English courses (other than ENG 103, ENG 105, ENG 106, and ENG 107) are designated writing courses (WRIT credit). A student majoring in English will complete the advanced writing and communication requirement of the College of Arts and Sciences (which requires four writing classes, including at least one in one of the student's major disciplines).

Major in English

Students majoring in English must earn 30 credit hours in English courses (36 credit hours for Departmental Honors) and must meet the requirements for one of the tracks described below:

- The Major in English (p. 211) (with a concentration in Literature),
- The Creative Writing Concentration (p. 216),
- The Concentration in British Literary History (p. 213), or
- The Women's Literature Concentration (p. 219).

Credit hours earned for courses in freshman composition (ENG 105, ENG 106, ENG 107, and ENG 208) may not be applied toward the total number of credit hours required for the major. In each English course, the English major must earn a grade of C- or better, with an overall GPA in the major of 2.0 or better.

Students pursuing both a major and a minor (or two majors) offered by the Department of English may double-count a maximum of two English courses toward the fulfillment of their degree requirements. They must also have an additional major or minor in a department other than English.

Since all ENG courses, other than freshman composition, are designated as writing (WRIT) courses, all English majors satisfy the College of Arts & Sciences Advanced Writing and Communication requirement by completing their major.

Minor

The Department of English offers two minors:

- The Minor in English (p. 222) and
- The English Minor in Creative Writing (p. 221).

Students pursuing both a major and a minor (or two majors) offered by the Department of English may double-count a maximum of two English courses toward the fulfillment of their degree requirements. They must also have an additional major or minor in a department other than English.

Departmental Honors in English

Students interested in seeking Departmental Honors in English should consult the Director of Undergraduate Studies in English, normally before the end of the junior year.

To enter the program a student must have achieved by the end of the junior year at least a 3.5 average in English courses and a 3.3 average overall. In addition to fulfilling the requirements for the Major in English (with a concentration in Literature), the candidate for Departmental Honors must:

1. Take at least three literature courses numbered 400 or above in fulfilling requirement #2 of the English Literature Major.
2. Complete a six-credit-hour Senior Thesis. This thesis is a documented essay of about 10,000 words on a literary subject. The student undertaking a Senior Thesis normally registers in ENG 497 for the first semester of the project, and in ENG 498 for the second semester. The student must receive a grade of B or higher in both courses in order to qualify for honors. (**6 credit hours**)
3. While taking ENG 497 and ENG 498, participate in any workshops offered by the English Department for students engaged in independent research projects.
4. Receive for the thesis a recommendation for honors by the director of the Senior Thesis and by one other faculty reader from the Department of English.
5. Achieve an average in the major of at least 3.5, and an overall average of at least 3.3.

Total: 36 credit hours

Departmental Honors in Creative Writing

Students interested in seeking Departmental Honors in Creative Writing should consult the Director of Creative Writing, normally before the end of the junior year.

To enter the program a student must have achieved by the end of the junior year at least a 3.5 average in English courses (including courses in creative writing) and a 3.3 average overall. In addition to meeting the requirements for the Creative Writing Concentration, the candidate for Departmental Honors must:

1. Take at least three literature courses numbered 400 or above in fulfilling requirement #3 of the Creative Writing Concentration.
2. Complete a six-credit-hour Senior Creative Writing Project. The student undertaking this project normally registers in ENG 497 for the first semester of the project, and in ENG 498 for the second semester. The student must receive a grade of B or higher in both courses in order to qualify for honors. (**6 credit hours**)
3. Receive for the project a recommendation for honors by the director of the Senior Creative Writing Project and by one other faculty reader designated by the Director of Creative Writing.
4. Achieve an average in the major of at least 3.5, and an overall average of at least 3.3.

Total: 36 credit hours

Departmental Honors in Women's Literature

Students interested in seeking Departmental Honors in Women's Literature should consult the Director of Undergraduate Studies in English, normally before the end of the junior year.

To enter the program a student must have achieved by the end of the junior year at least a 3.5 average in English courses and a 3.3 average overall. In addition to fulfilling the requirements for the Women's Literature Concentration, the candidate for Departmental Honors must:

1. Take at least three literature courses numbered 400 or above in fulfilling requirements #2 and #3 of the Women's Literature Concentration.
2. Complete a six-credit-hour Senior Thesis. This thesis is a documented essay of about 10,000 words on a literary subject. The student undertaking a Senior Thesis normally registers in ENG 497 for the first semester of the project, and in ENG 498 for the second semester. The student must receive a grade of B or higher in both courses in order to qualify for honors. **(6 credit hours)**
3. While taking ENG 497 and ENG 498, participate in any workshops offered by the English Department for students engaged in independent research projects.
4. Receive for the thesis a recommendation for honors by the director of the Senior Thesis and by one other faculty reader from the Department of English.
5. Achieve an average in the major of at least 3.5, and an overall average of at least 3.3.

Total: 36 credit hours

B.A. in English

Curriculum Requirements

Requirements for the Major in English (with a concentration in Literature) are as follows:

Code	Title	Credit Hours
1. Select ONE of the following (N.B., ENG 210 may NOT be used to fulfill this requirement):		3
ENG 201	World Literary Masterpieces I	
ENG 202	World Literary Masterpieces II	
ENG 205	Jewish Literature	
ENG 211	English Literature I	
ENG 212	English Literature II	
ENG 213	American Literature I	
ENG 214	American Literature II	
ENG 215	English and American Literature by Women	
ENG 260	African-American Literature	
ENG 261	Literature of the Americas	
2. Select FIVE LITERATURE courses numbered 300 or above. At least TWO must be numbered 400 or above. The courses must be distributed as follows:		15
Select two courses numbered 300 or above in literature before 1700		
Select two courses numbered 300 or above in literature between 1700 and 1900		
Select one course numbered 300 or above in literature since 1900		
3. Select FOUR additional English courses other than freshman composition ¹		12
Total credits required for the major: 30 (36 credits required for Departmental Honors)		
4. Additional Graduation Requirements:		
ENG 105	English Composition I	3
ENG 106	English Composition II	3
MTH 101	Algebra for College Students (not needed by students who place into MTH 113)	3

MTH 113	Finite Mathematics (or any MTH course numbered 108 or higher)	3
Language Requirement (3-9 credits, depending on the student's initial placement in the language chosen)		9
Minor		15
People & Society Cognate ²		9
STEM Cognate ³		9
Natural Science course ⁴		3
Advanced Writing & Communication ⁵		
Electives ⁶		33
Total Credit Hours		120

¹ i.e., any four courses designated ENG and numbered 200 or above, excluding ENG 208.

² If the student has a minor (or second major) that counts as "People & Society," the student does not need to satisfy the requirement for a People & Society cognate.

³ If the student has a minor (or second major) that counts as "STEM," the student does not need to satisfy the requirement for a STEM cognate.

⁴ This requirement is waived if the STEM cognate includes a Natural Science course from the approved list.

⁵ Students satisfy this requirement by taking four writing courses, at least one of which must be in one of the student's major disciplines. Since all ENG courses, other than freshman composition, are designated as writing (WRIT) courses, all English majors satisfy this requirement by completing their major.

⁶ A minimum of 120 credits is required for graduation. Sufficient credits must be earned in electives to enable the student to complete this minimum of 120 credits. The exact number of elective credits required will vary depending on the number of credits needed to complete all other graduation requirements.

Suggested Plan of Study

This Suggested Plan of Study is a sample four-year plan, but an individual student's actual plan is likely to vary from this sample plan in a number of ways, depending on such factors as (1) AP, dual-enrollment, and transfer credits that a student brings in; (2) the student's initial placement in composition, mathematics, and foreign language; and (3) the minor chosen by the student, as well as any additional minor or major the student chooses to complete. For example, a student is not required to complete a cognate in People & Society if the student has a minor (or second major) that counts as "People & Society," and similarly, a student is not required to complete a cognate in STEM if the student has a minor (or second major) that counts as "STEM."

¹ Students who are considering the possibility of writing a six-credit senior thesis for Departmental Honors in English their last year should replace this elective course with an ENG course for their major.

² Students who are writing a six-credit senior thesis for Departmental Honors in English should, ideally, have completed eight ENG courses for their major prior to their senior year, and should therefore be able to replace this course with ENG 497.

³ Students who are writing a six-credit senior thesis for Departmental Honors in English should replace this elective course with ENG 498 .

B.A. in English - Concentration in British Literary History

Curriculum Requirements

Requirements for the Concentration in British Literary History are as follows:

Code	Title	Credit Hours
1. Complete the two-semester survey of British literature:		6
ENG 211	English Literature I	
ENG 212	English Literature II	
2. Select EIGHT English courses numbered 300 or above, at least FOUR of which must be numbered 400 or above. These courses must be distributed as follows:		24
Select one course numbered 300 or above on Shakespeare		
Select one course numbered 300 or above on literary theory or the history of criticism		
Select two additional courses numbered 300 or above in British literature (or a combination of British and other literatures) before 1800		
Select two additional courses numbered 300 or above in British literature (or a combination of British and other literatures) after 1800		
Select two ENG electives numbered 300 or above		
3. Recommended Courses:		
Select ancillary courses in Art History, Music, History, and Philosophy, in consultation with a departmental advisor		
Total credits required for the major: 30		
4. Additional Graduation Requirements:		
ENG 105	English Composition I	3
ENG 106	English Composition II	3
MTH 101	Algebra for College Students (not needed by students who place into MTH 113)	3
MTH 113	Finite Mathematics (or any MTH course numbered 108 or higher)	3
Language Requirement (3-9 credits, depending on the student's initial placement in the language chosen)		9
Minor		15
People & Society Cognate ¹		9
STEM Cognate ²		9
Natural Science course ³		3
Advanced Writing & Communication ⁴		
Electives ⁵		33
Total Credit Hours		120

- ¹ If the student has a minor (or second major) that counts as "People & Society," the student does not need to satisfy the requirement for a People & Society cognate.
- ² If the student has a minor (or second major) that counts as "STEM," the student does not need to satisfy the requirement for a STEM cognate.
- ³ This requirement is waived if the STEM cognate includes a Natural Science course from the approved list.
- ⁴ Students satisfy this requirement by taking four writing courses, at least one of which must be in one of the student's major disciplines. Since all ENG courses, other than freshman composition, are designated as writing (WRIT) courses, all English majors satisfy this requirement by completing their major.
- ⁵ A minimum of 120 credits is required for graduation. Sufficient credits must be earned in electives to enable the student to complete this minimum of 120 credits. The exact number of elective credits required will vary depending on the number of credits needed to complete all other graduation requirements.

Suggested Plan of Study

This Suggested Plan of Study is a sample four-year plan, but an individual student's actual plan is likely to vary from this sample plan in a number of ways, depending on such factors as (1) AP, dual-enrollment, and transfer credits that a student brings in; (2) the student's initial placement in composition, mathematics, and foreign language; and (3) the minor chosen by the student, as well as any additional minor or major the student chooses to complete. B.A. in English - Concentration in Creative Writing

Curriculum Requirements

Students who declare a major in English with a Creative Writing Concentration should meet with the Director of Creative Writing.

Code	Title	Credit Hours
1. Select either the FICTION TRACK or the POETRY TRACK:		12
Fiction Track		
ENG 290	Beginning Fiction Workshop	
ENG 390	Intermediate Fiction Workshop	
Select one of the following options to complete the FICTION TRACK:		
ENG 404 & 404	Creative Writing (Prose Fiction) and Creative Writing (Prose Fiction) (ENG 404 to be taken twice)	
OR		
ENG 404 & ENG 407	Creative Writing (Prose Fiction) and Creative Writing Special Topics, Advanced Workshop (taken in either order)	
OR		
ENG 404 & ENG 408	Creative Writing (Prose Fiction) and Writing Autobiography (taken in either order)	
Poetry Track		
ENG 292	Beginning Poetry Workshop	
ENG 392	Intermediate Poetry Workshop	
Select one of the following options to complete the POETRY TRACK:		
ENG 406 & 406	Creative Writing (Poetry) and Creative Writing (Poetry) (ENG 406 to be taken twice)	
OR		
ENG 406 & ENG 407	Creative Writing (Poetry) and Creative Writing Special Topics, Advanced Workshop (taken in either order)	
OR		
ENG 406 & ENG 408	Creative Writing (Poetry) and Writing Autobiography (taken in either order)	
2. Select one of the following (N. B., ENG 210 may NOT be used toward the fulfillment of this requirement):		3
ENG 201	World Literary Masterpieces I	
ENG 202	World Literary Masterpieces II	
ENG 205	Jewish Literature	
ENG 211	English Literature I	
ENG 212	English Literature II	
ENG 213	American Literature I	
ENG 214	American Literature II	
ENG 215	English and American Literature by Women	
ENG 260	African-American Literature	
ENG 261	Literature of the Americas	

3. Select FOUR LITERATURE courses numbered 300 or above, at least TWO of which must cover literature earlier than 1900. At least TWO of the four courses must be numbered 400 or above.	12
4. Select one additional LITERATURE course numbered 200 or higher	3
Total credits required for the major: 30 (36 credits required for Departmental Honors)	
5. Additional Graduation Requirements:	
ENG 105 English Composition I	3
ENG 106 English Composition II	3
MTH 101 Algebra for College Students (not needed by students who place into MTH 113)	3
MTH 113 Finite Mathematics (or any MTH course numbered 108 or higher)	3
Language Requirement (3-9 credits, depending on the student's initial placement in the language chosen)	9
Minor	15
People & Society cognate ¹	9
STEM cognate ²	9
Natural Science course ³	3
Advanced Writing & Communication ⁴	
Electives ⁵	33
Total Credit Hours	120

¹ If the student has a minor (or second major) that counts as "People & Society," the student does not need to satisfy the requirement for a People & Society cognate.

² If the student has a minor (or second major) that counts as "STEM," the student does not need to satisfy the requirement for a STEM cognate.

³ This requirement is waived if the STEM cognate includes a Natural Science course from the approved list.

⁴ Students satisfy this requirement by taking four writing courses, at least one of which must be in one of the student's major disciplines. Since all ENG courses, other than freshman composition, are designated as writing (WRIT) courses, all English majors satisfy this requirement by completing their major.

⁵ A minimum of 120 credits is required for graduation. Sufficient credits must be earned in electives to enable the student to complete this minimum of 120 credits. The exact number of elective credits required will vary depending on the number of credits needed to complete all other graduation requirements.

Suggested Plan of Study

This Suggested Plan of Study is a sample four-year plan, but an individual student's actual plan is likely to vary from this sample plan in a number of ways, depending on such factors as (1) AP, dual-enrollment, and transfer credits that a student brings in; (2) the student's initial placement in composition, mathematics, and foreign language; and (3) the minor chosen by the student, as well as any additional minor or major the student chooses to complete. For example, a student is not required to complete a cognate in People & Society if the student has a minor (or second major) that counts as "People & Society," and similarly, a student is not required to complete a cognate in STEM if the student has a minor (or second major) that counts as "STEM."

- ¹ Students who are considering the possibility of writing a six-credit senior thesis for Departmental Honors in Creative Writing their last year should replace this elective course with one of the literature courses required for the Creative Writing major.
- ² Students who are writing a six-credit senior thesis for Departmental Honors in Creative Writing should, ideally, have completed eight ENG courses for their major prior to their senior year, and should therefore be able to replace this course with ENG 497.
- ³ Students who are writing a six-credit senior thesis for Departmental Honors in Creative Writing should replace this elective course with ENG 498.

B.A. in English - Concentration in Women's Literature

Curriculum Requirements

Code	Title	Credit Hours
ENG 215	English and American Literature by Women	3
Select FOUR literature courses numbered 300 or above, at least TWO of which must be numbered 400 or above. These courses must be distributed as follows:		12
Select two courses in literature before 1700		
Select two courses in literature between 1700 and 1900		
Select FIVE additional English courses other than freshman composition ¹		15
Select 3 of the following courses:		6
ENG 372	Women Writing: Theory and Practice	
ENG 373	Literary Representations of Women	
ENG 374	Women Writers	
ENG 490	Studies in Women and Literature	
ENG 494	Feminist Literary Theory	
Any 200 level course except ENG 215		
Recommended Courses:		
Select ancillary courses in Women's and Gender Studies, in consultation with a departmental advisor		
Total credits required for the major: 30 (36 credits required for Departmental Honors)		
Additional Graduation Requirements:		
ENG 105	English Composition I	3
ENG 106	English Composition II	3
MTH 101	Algebra for College Students (not needed by students who place into MTH 113)	3
MTH 113	Finite Mathematics (or any MTH course numbered 108 or higher)	3
Language Requirement (3-9 credits, depending on the student's initial placement in the language chosen)		9
Minor		15
People & Society Cognate ³		9
STEM Cognate ⁴		9
Natural Science course ⁵		3
Advanced Writing & Communication ⁶		
Electives ⁷		33
Total Credit Hours		126

- ¹ i.e., any five courses designated ENG and numbered 200 or above, excluding ENG 208.
- ² The topics for some courses on this list, such as ENG 373, vary from semester to semester. Such courses may be repeated and may count more than once toward the fulfillment of this requirement.
- ³ If the student has a minor (or second major) that counts as "People & Society," the student does not need to satisfy the requirement for a People & Society cognate.
- ⁴ If the student has a minor (or second major) that counts as "STEM," the student does not need to satisfy the requirement for a STEM cognate.
- ⁵ This requirement is waived if the STEM cognate includes a Natural Science course from the approved list.
- ⁶ Students satisfy this requirement by taking four writing courses, at least one of which must be in one of the student's major disciplines. Since all ENG courses, other than freshman composition, are designated as writing (WRIT) courses, all English majors satisfy this requirement by completing their major.

⁷ A minimum of 120 credits is required for graduation. Sufficient credits must be earned in electives to enable the student to complete this minimum of 120 credits. The exact number of elective credits required will vary depending on the number of credits needed to complete all other graduation requirements.

* Students considering this concentration may want to take a special Women's Studies section of ENG 106 in the freshman year.

Suggested Plan of Study

This Suggested Plan of Study is a sample four-year plan, but an individual student's actual plan is likely to vary from this sample plan in a number of ways, depending on such factors as (1) AP, dual-enrollment, and transfer credits that a student brings in; (2) the student's initial placement in composition, mathematics, and foreign language; and (3) the minor chosen by the student, as well as any additional minor or major the student chooses to complete. For example, a student is not required to complete a cognate in People & Society if the student has a minor (or second major) that counts as "People & Society," and similarly, a student is not required to complete a cognate in STEM if the student has a minor (or second major) that counts as "STEM."

Course	Title	Credit Hours

¹ Students who are considering the possibility of writing a six-credit senior thesis for Departmental Honors in English their last year should replace this elective course with an ENG course for their major.

² Students who are writing a six-credit senior thesis for Departmental Honors in English should, ideally, have completed eight ENG courses for their major prior to their senior year, and should therefore be able to replace this course with ENG 497.

³ Students who are writing a six-credit senior thesis for Departmental Honors in English should replace this elective course with ENG 498.

Minor in Creative Writing

Code	Title	Credit Hours
ENG 209	Creative Writing	3
After taking ENG 209, complete ONE of the following three tracks:		6
ENG 290 & ENG 292	Beginning Fiction Workshop and Beginning Poetry Workshop (taken in either order)	
ENG 290 & ENG 390	Beginning Fiction Workshop and Intermediate Fiction Workshop	
ENG 292 & ENG 392	Beginning Poetry Workshop and Intermediate Poetry Workshop	
Select one LITERATURE course at the 200-level		3
Select one LITERATURE course at the 300-level or above		3
Total Credit Hours		15

* Students may declare an English Minor in Creative Writing through their school or college. Submitting materials to the Creative Writing Program is not required for the minor.

** The student completes at least 15 credit hours at the 200-level or above beyond the credits earned for freshman composition.

*** A minimum grade of C- or better is required in each course and along with an overall GPA in the minor of 2.0 or better,

**** Students pursuing both a major and a minor (or two majors) offered by the Department of English may double-count a maximum of two English courses toward the fulfillment of their degree requirements. They must also have an additional major or minor in a department other than English.

Minor in English

Code	Title	Credit Hours
	Select one LITERATURE course at the 200-level	3
	Select one LITERATURE course at the 200-level or the 300-level	3
	Select one LITERATURE course at the 400-level	3
	Select TWO additional English courses other than freshman composition ¹	6
	Total Credit Hours	15

¹ i.e., any two courses designated ENG and numbered 200 or above, excluding ENG 208.

* The student minoring in English completes at least 15 credit hours at the 200-level or above beyond the credits earned for freshman composition.

** A grade of C- or better is required in each course along with an overall GPA in the minor of 2.0 or better,

*** Students pursuing both a major and a minor (or two majors) offered by the Department of English may double-count a maximum of two English courses toward the fulfillment of their degree requirements. They must also have an additional major or minor in a department other than English.

Geography

<http://www.as.miami.edu/geography>

Dept. Code: GEG

Introduction

Geography is the science of place and space. Geographers ask where things are located on the surface of the earth, why they are located where they are, how places differ from one another, and how people interact with the environment. There are two main branches of geography: human geography and physical geography. Human geography is concerned with the spatial aspects of human existence. Physical geographers study patterns of climates, landforms, vegetation, soils, and water. Thus, Geography links the social sciences and natural sciences.

Geographers use many tools and techniques in their work, and geographic technologies are increasingly among the most important emerging fields for understanding our complex world. They include Geographic Information Systems (GIS), Remote Sensing, Global Positioning Systems (GPS), online mapping platforms such as Google Earth, statistics, survey research, and others.

Geographers work in many different areas, such as environmental management, education, disaster response, city and county planning, community development, and more. Geography is an interdisciplinary field that offers diverse career opportunities.

The relevance and prestige of Geography as a discipline was helped enormously during the past 20 years by four key developments:

1. the emergence of "globalization" as a phenomenon requiring analysis and explanation;
2. the increasing recognition of space and place in cognate social and physical sciences;
3. deepening concern for nature-society interactions and issues of environmental sustainability, development, and climate change;
4. the development of geographic information systems (GIS and GIScience) and remote sensing technologies and their widespread adoption by organizations in both the public and private sectors.

Knowledge of GIS and Geospatial Technology can be important in the field of geography and cognate disciplines. The US Bureau of Labor Statistics has identified GIS as a top emerging field, with more than 41,000 GIS-related job postings in 2016, according to Education Advisory Board research.

Educational Objectives

Geography offers specializations in areas such as

- Geographic Information Systems and Remote Sensing
- Medical Geography and Global Health
- Urban Geography and International urbanization
- Environmental Studies

Geography offers courses that provide training in indispensable skills for everyone entering the present-day labor market:

- Research Methodology
- Statistics
- Computer Cartography

- Geographic Information Systems (GIS)
- Remote Sensing of the Environment
- Survey Research

Study Abroad

Majors are strongly encouraged to study abroad. Study abroad at carefully selected institutions will complement the student's curriculum and area of specialization, will enhance fluency in a foreign language, and will result in heightened affinity for a foreign culture. The study abroad experience need not result in credit overloads or extended time spent in the program.

Writing within the Discipline

To satisfy the College of Arts and Sciences writing requirement in the discipline, students whose first major is Geography must take at least one of the following courses for a writing credit: GEG 306, GEG 346, GEG 402.

Degree Programs

The major in Geography leads to a Bachelor of Arts Degree, or a Bachelor of Science Degree.

Departmental Honors in Geography

The Department of Geography encourages its majors and minors to intensify and deepen their knowledge of Geography through its Departmental Honors Program. The program is designed to give our students the opportunity to explore various topics and problems in Geography that are of particular interest to them, to work more closely with faculty in the department, to develop skills in research and thesis preparation, and in some cases to prepare for graduate work in Geography or other disciplines.

Minimum requirements for the program are as follows:

1. a cumulative grade point average of at least 3.30;
2. a cumulative grade point average in Geography of at least 3.50; and
3. a thesis that is approved by departmental faculty.

Students have 3 options for writing the thesis.

1. Students may take 6 credit hours of independent study (GEG 598) with one or more departmental faculty.
2. Students may take a 3 credit hour course offered at the 300-level or above and 3 credit hours of independent study (GEG 598).
3. In exceptional circumstances, a student's thesis may be written as part of the requirements for earning 6 credit hours in Geography at the 300-level or above.

In all three cases, the thesis must be a single, coherent work of scholarship through which the student earns 6 credit hours in Geography over the course of two semesters.

A Geography faculty member must serve as the Honors thesis advisor, and a second reader, who may be from another department, must be selected in consultation with the thesis advisor. The thesis must be at least 30 pages in length (double spaced, 12 point font), not including tables and figures. Once the topic and committee are secured, students should turn in their signed Departmental Honors Thesis Form to the main office of the Geography Department. This form must be signed by the Director of Undergraduate Studies and submitted by October 15 for fall graduation and February 15 for Spring graduation.

In addition to completing the written thesis, students must orally present the results of their work to faculty and students at a special honors colloquium to be held at the end of the semester.

Majors in Geography and Regional Studies

- B.A. in Geography (p. 224)
- B.S. in Geography (p. 225)

Minor in Geography and Regional Studies

- Minor in Geography (p. 228)
- Minor in Geospatial Technology (p. 228)

Total Credit Hours	

15

- ¹
- Courses offered as Special Topics or Independent Research may be applied toward the minor with approval by the program advisor.
 - No more than 6 credit hours may be applied to the minor from a single department.
 - At least 6 credit hours must be taken at the 300 level or higher.

- * Students must earn a grade of C- or better in each course and maintain a cumulative GPA of at least 2.0 in all courses counting toward the minor.

History

<http://www.as.miami.edu/history>

Dept. Code: HIS

Introduction

History is the systematic study of the past. The study of history includes training in how to gather information, how to research issues and problems, how to analyze data and construct arguments, and how to communicate ideas in writing. These are essential skills, tools that are prized in the world beyond the university. A major in history is an excellent beginning and solid stepping stone to professional school and the business world. For goals ranging from law to journalism, and from medicine to the MBA, history serves as a versatile undergraduate major. Multinational businesses demand that their executives understand the peoples and cultures around them, and be able to communicate that understanding effectively. If an occupation demands critical thinking and analysis, a background in history is invaluable.

Educational Objectives

All history courses expose students to historical interpretation and critical analysis.

- Courses at the 100 and 200 levels are intended as introductions to broad fields of history and are open to students with no previous college-level history experience.
- All 300 level history courses are writing intensive, are graded principally through essay examinations and short papers, and count toward the fulfillment of the University of Miami writing across the curriculum requirement.
- Courses at the 500 level require a 300 level history course as prerequisite. All 500 level courses deal extensively with the historiography of their particular subjects, and all require a written research project as a major component of the work of the course.
- Since all History courses at the 300-level and higher are officially designated as "Writing" courses, History majors will automatically fulfill the College of Arts & Sciences's Advanced Writing and Communication requirement by completing the major.

Degree Programs

The major in History leads to the degree of Bachelor of Arts.

Departmental Honors

History majors with a cumulative GPA of at least 3.6 in history courses may earn departmental honors by completing a two-semester-long, 500-level Honors seminar course HIS 597 and HIS 598, held in the Spring and Fall respectively). Admittance to the History Honors program is by application in the Fall semester during course registration week. Also, students must have completed at least 6 courses in History worth 18 credit hours at the University of Miami.

Major in History

- B.A. in History (p. 230)

Minor in History

- History (p. 232)

B.A. in History

A major in history consists of at least 30 credit hours in history with a grade of C- or better in each course, and with a cumulative GPA of at least 2.0 in history courses. These credit hours may include history courses taken for general distribution requirements, and must include at least 18 credit hours at the 300 level or above, of which at least 6 credit hours must be taken in the form of 500-level seminars. (HIS 599 does not count). All courses for majors will be selected by students in consultation with advisors designated by the department.

Credit hours from other institutions may be counted toward the major or minor, and to general distribution requirements as appropriate, but departmental approval is required in each case. Students who complete the Advanced Placement course in either United States or European history and pass the examination with a grade of 4 or 5 may receive credit in the appropriate history courses. Students who complete the International Baccalaureate program and pass the higher level history examination with a grade of 6 or higher will receive 3 credit hours in the appropriate entry-level history course. (However, in some cases students will only receive elective credit hours). At least 18 credit hours of the major and at least 9 credit hours of the minor must be completed at the University of Miami.

The department offers a variety of study abroad options with credit toward the major or minor.

Curriculum Requirements

Code	Title	Credit Hours
HIS 3XX Level or Higher		12
HIS 500 Level Seminars ¹		6

International Studies

<http://www.as.miami.edu/international-studies>

Dept. Code: INS

Introduction

The International Studies major provides a focused educational experience aimed at familiarizing students with the key structural features and dynamics of the international system and preparing them to enter the growing international job market. Processes of globalization, in part driven by global capital flows, expanding trade and the unrelenting development of communication and information technologies, have affected virtually everyone in every country, often in ways we are just beginning to understand. These developments often pose serious problems for government and other societal institutions, while also creating a demand for individuals who understand international processes. Jobs in virtually all sectors have acquired a decidedly international dimension, whether in trade, tourism, finance, public policy, government, or education. INS Graduates have moved on to the corporate world, the public sector, started their own businesses, or have continued their studies at the graduate level (i.e. Law, Business, and International Studies).

Educational Objectives

International Studies seeks to provide students with the ability to understand:

- International politics within the context of interstate relations and foreign policy.
- International economics and its sub-discipline international political economy, including such issues as trade and production, money and finance, and development.
- Social science research methods including qualitative, quantitative, comparative case study and formal modeling.

Students are encouraged to explore interdisciplinary options that further their understanding of international studies. This type of coursework can be taken in other disciplines offered at the university or taken outside the institution, either through exchange programs or other inter-institutional options provided by UM. Students will demonstrate the ability to synthesize the various thematic areas of the discipline through required participation in advanced seminars. Seminars will stress analytical participation, oral presentations and the ability to interpret and critique core theoretical readings.

Degree Programs

International Studies provides both a major and minor option for students. The flexibility of the program often allows students to double major without the need to extend their university studies. Students are encouraged to speak with the International Studies advisor to explore such possibilities. The major in International Studies leads to the degree of Bachelor of Arts.

Advanced Writing & Communication Requirements

Details of the Advanced Writing and Communication Proficiency:

Degree candidates must complete at least four writing courses, and at least one writing course must be in one of the student's major disciplines (not applicable to BLA students who do not select a major). Students should consult the bulletin section of their major to find out which writing-intensive courses are acceptable to the discipline.

Individual writing course offerings may make the writing component independent of the rest of the course. As such the writing component might be optional, the writing component might not contribute to the overall grade, and writing credit might be awarded even if the overall grade is a fail.

Transfer students may use a maximum of two courses towards the writing requirement.

Departmental Honors

The Department of International Studies encourages its majors to intensify and deepen their knowledge of the field through its departmental honors program. The program is designed to give students the opportunity to explore various topics and problems in international studies that are of particular interest to them, to work more closely with departmental faculty, to develop skills in research and thesis preparation, and in some cases to prepare for graduate work in international studies and related fields.

Minimal requirements for the program are as follows:

1. a cumulative grade point average of at least 3.30;
2. a cumulative grade point average in international studies of at least 3.50; and
3. a thesis that is approved, with a grade of at least B+, by a member of the departmental faculty.

After reaching agreement with a member of the faculty who will serve as the honors thesis advisor, students writing a senior honors thesis will enroll in INS 418 and INS 419, Honors Thesis, for a total of six credit hours [the credit hours may be spread over two semesters or taken in a single semester]. The thesis itself is expected to be an extended, coherent work of scholarship on an issue of relevance in the field of international studies.

Language Requirement		3-9
Minor Requirement		15
General Electives		33
Total Credit Hours		120

¹ These courses must be completed before taking the Thematic Core courses.

- 2 Additional classes will be counted toward the elective portion of the INS major, if taken. Other courses, including classes in other disciplines, may be taken with the approval of the INS Advisor.
- 3 With the approval of the INS Advisor, students may take courses from other departments outside of INS such as Geography and Regional Studies, History, Anthropology, Sociology, Political Science, Economics, Religion, Art History, Foreign Languages, Environmental Science, et cetera. Appropriate study abroad courses, an approved internship (INS 519), or an honors thesis (INS 418 & INS 419) may also be used to fulfill elective credit hour requirements.

Important Advising Notes for all International Studies Majors

- Double Counting:** Of the combined courses in the INS Electives, no more than 6 credit hours may count double towards a second major. A student may not count any course used to fulfill the requirements of the INS major toward a minor requirement.
- Study Abroad:** Students are strongly encouraged to study abroad for a summer, a semester, or an entire year, depending on the program. Study abroad at carefully selected institutions will complement the student’s curriculum and area of specialization, will enhance fluency in the foreign language, and will result in heightened affinity for a foreign culture. The study abroad experience need not result in credit hour overloads or extended time spent in the program.
- Internship Credit Hour:** Students are encouraged to find a suitable internship during their undergraduate career. Upon approval by an advisor in the International Studies Undergraduate Program Office, 3 credit hours may be earned with an internship (INS 519), either toward the major or as elective credit hours (depending on the relevance of the particular internship to the INS major). The University’s Toppel Career Planning and Placement Center regularly advertises internships.
- Academic Standing:** Only courses in which a grade of C- or better is attained, may be counted towards the International Studies major and students must maintain a GPA of 2.75 or better in all major requirements (30 credit hours).

Judaic Studies

<http://www.as.miami.edu/judaic>

Dept. Code: JUS

Introduction

The George Feldenkreis Program in Judaic Studies is a broad, flexible, interdisciplinary program designed for undergraduates to gain an understanding of Jewish civilization and its diverse cultural experiences. The program, which is non-theological in orientation, is an academic exploration of the multi-faceted, socio-historical, 4,000-year record of the Jewish people. Courses taught by, and combined with the program highlight the variety of cultural, political, social, and religious experiences of Jews in different times and places.

Educational Objectives

The program is structured to provide an in-depth liberal arts education that will constitute a foundation for advanced academic study, professional careers in a variety of fields, and a more complex and rich understanding of the Jewish world. There are a total of 5 Judaic Studies Cognates. Judaic Studies cognates meet the requirements for People & Society and Arts & Humanities Cognates in the College of Arts and Sciences.

Advanced Writing and Communication Requirement

Students majoring in Judaic Studies satisfy the college of Arts and Sciences "Writing requirement in the discipline" when they take any course in Jewish or Israeli literature offered by the Department of English and any Judaic Studies course with the Writing Credit designation.

Major in Judaic Studies

- B.A. in the George Feldenkreis Program in Judaic Studies (p. 237)

Minor in Judaic Studies

- The George Feldenkreis Program in Judaic Studies (p. 239)

One or more of the following 3 courses (regular concentration):		3
JUS 231	Jewish Civilization: Society, Culture and Religion	
Any course in Jewish Literature offered by the English Department:		
GEG 385	Jewish Geography	
Up to four courses in ancient/modern Jewish History, Society, Culture and Religion (to be designated as "ancient" or "modern" and published by the JUS Program Director each semester). Students are strongly encouraged to take at least one course in the "ancient," and at least one course in the "modern" categories. ¹		12
Students are also strongly encouraged to take HEB 101 as one of the 4 courses.		
Total Credit Hours		15

Hebrew Language Option

Code	Title	Credit Hours
One or more of the following 3 courses:		3
JUS 231	Jewish Civilization: Society, Culture and Religion	
GEG 385	Jewish Geography	
Any course in Jewish Literature offered by the English Department		
Choose at least two of the following:		6
HEB 101	Elementary Hebrew I	
HEB 102	Elementary Hebrew II	
HEB 201	Intermediate Hebrew I	
HEB 202	Intermediate Hebrew II	
Any additional JUS course(s), or course(s) combined with JUS, that are needed to complete a total of 15 JUS credits.		6
Native Hebrew speakers require the advance approval of the JUS Undergraduate Advisor before they enroll in this concentration		
Completing the JUS Minor with Hebrew Language Concentration, including HEB 201 and/or 202 will be counted as fulfilling the requirement of a foreign language.		
Total Credit Hours		15

¹ To be designated as such and published by the JUS program director each semester. Students are strongly encouraged to take at least 1 course in Ancient Jewish History and Society and at least one course in Modern Jewish History and Society.

* A grade of "C-" or better must be attained in each course taken for the Minor, with an overall GPA of 2.0.

* Both JUS Minor concentrations will be listed in the student's transcript as a "Minor in Judaic Studies."

- * Each of the JUS Minor concentrations are eligible to qualify as a cognate in either “Arts and Humanities” or “People and Society.” Students are encouraged to contact the JUS Undergraduate Advisor, who will make the determination based on whether at least three courses of the JUS Minor count toward either “Arts and Humanities” or “People and Society.”

Latin American Studies

<http://www.as.miami.edu/las>

Dept. Code: LAS

Introduction

The Latin American Studies Program at the University of Miami takes an interdisciplinary approach to the study of the politics, economics, cultures, and societies of Latin America and the Caribbean. Courses in the program are offered in departments from every school and college at the University of Miami, and the program’s faculty research topics ranging from development economics to immigrant health care, from indigenous music to Caribbean colonial literature, from the archaeology of the region’s earliest people to present-day questions of resource conservation and management. Our students become true experts who can speak to a wide range of issues confronting Latin America; experts who can contribute proactively to development and cooperation as well as to business and political analysis in ways that their peers with a more traditional disciplinary focus simply cannot.

Educational Objectives

The goal of the BA in Latin American Studies is to acquire, advance and disseminate knowledge of the history, literature, culture, politics, economics, and natural and social sciences of the regions within an interdisciplinary framework. This program also places special emphasis on the languages and cultures of Hispanophone, Francophone and Lusophone Americas, including the transnational study of Latin Americans, Caribbeans and their descendants in the United States. Students should leave the program with the following:

- the analytical and methodological tools needed to conduct interdisciplinary research;
- the ability to read, write and think critically about primary and secondary sources;
- a general knowledge of the different regions that comprise Latin America, the Caribbean, and their Diaspora, as well as a critical understanding that the geographic, political, and cultural boundaries that have traditionally defined the “area” as an object of study are not isomorphic and are connected to the interests of European and North American powers;
- a critical understanding of the competing ways in which Latin American and Caribbean peoples have represented themselves paying particular attention to race/ethnicity, class, gender and sexuality, language, religion, migration, transculturation, and other historical, social, economic, and political factors;
- a language competency in either French, Spanish, Portuguese, or Haitian Creole at an intermediate level and a beginning competency in a second language spoken in the region (either French, Spanish, Portuguese, Haitian Creole, or an indigenous language of Latin America or the Caribbean);
- a “Beyond the Books” experience that will bridge the gap between the university and the surrounding communities, and will help solidify a long-term interest in and commitment to the regions.

Degree Programs

- Bachelor of Arts

Departmental Honors

The Latin American Studies Program invites its undergraduate majors and minors to apply for departmental honors and expand their knowledge of Latin America and the Caribbean. Admission into the departmental honors program is by invitation, but any student who believes her or himself qualified may apply to the academic director of Latin American Studies, preferably during the sophomore or early junior year. Candidates for departmental honors work closely with one faculty member for two semesters to engage in original research in an area of her/his choice. LAS majors and minors with a cumulative G.P.A. of at least 3.0 and an overall G.P.A. of at least 3.5 in the LAS major or minor may earn departmental honors by completing two honors thesis courses, LAS 495 and LAS 496 (Honors I & II). Candidates for departmental honors are responsible for finding a faculty member who is willing to serve as honors thesis advisor and obtain written approval of the Academic Director. The faculty member with whom the student works will help determine the nature of the independent research project. Candidates must complete a thesis (with a grade of at least a B+, which must be approved by the thesis advisor) and present the work at the LAS Annual Student Symposium or another similar event showcasing undergraduate research at the university.

Advanced Writing and Communication Requirement

To satisfy a portion of the College of Arts and Sciences writing requirement, students majoring in Latin American Studies should take at least one Latin American Studies course with a “W” (writing) designation.

Requests for Information

Dr. William J. Pestle
Academic Director, Latin American Studies Program
Merrick Hall 102-E
University of Miami
Coral Gables, FL 33124-2005
las@miami.edu (lasgrad@miami.edu)

The Latin American Studies major is designed for students who desire a comprehensive understanding of Latin America and the Caribbean; its history, cultures, languages, economics, politics, and societies. Majors often combine their studies with concentrations in other departments or schools. LAS majors also learn outside of the classroom, through interaction with visiting experts, participation in symposium and conferences, and travel courses. Students are required to attain at least competency in two Latin American languages, and are advised (but not required) to spend at least one semester in Latin America.

FILAS is a highly selective Honors Program, in which students follow a rigorous, accelerated curriculum to complete a dual degree (B.A./M.A.) in Latin American and Caribbean Studies in five years. The program provides exciting collaborative research, travel, and work opportunities. Working with UM's world-class faculty in various academic disciplines, FILAS participants design individualized curricula. In addition to the regular general education course requirements of the College of Arts and Sciences, FILAS students choose one focus track for their most advanced courses: Social Sciences, Literature & Culture, Communication, Environmental Studies, Public Health, or History.

Majors in Latin American Studies

- B.A. in Latin American Studies (p. 241)
- B.A./M.A in Latin American Studies (Fellows in Latin American Studies) (p. 243)

The minor in Latin American Studies is designed for students who have an interest in Latin America and the Caribbean, but may not have the flexibility to pursue a Major. The minor may be obtained by completing five courses (detailed below), or through participation in the UBuenos Aires program.

Minor in Latin American Studies

B.A./M.A in Latin American Studies (Fellows in Latin American Studies) FILAS (Fellows in Latin American Studies)

In this highly selective Honors Program. Students follow a rigorous, accelerated curriculum to complete a dual degree (B.A./M.A.) in Latin American and Caribbean Studies in five years. The program provides exciting collaborative research, travel, and work opportunities.

Working with UM's world-class faculty in various academic disciplines, *FILAS* participants design individualized curricula. In addition to the regular general education course requirements of the College of Arts and Sciences, *FILAS* students choose one focus track for their most advanced courses: Social Sciences, Literature & Culture, Communication, Environmental Studies, Public Health, or History. For broad-based, multi-disciplinary preparation, students choose courses that focus on Latin America and the Caribbean (at least ten of these courses must be taken at the Master's level).

FILAS Admission Requirements

- SAT1 composite score of 1360 or ACT 31.
- Top 10% of high school graduating class.
- Regular Application for Admission to the University of Miami. We recommend students submit their applications by November 15.
- Recommendations from three high school teachers.
- Statement of interest in *FILAS*, emphasizing prior language or area study
- To continue through the graduate level (MA Phase), students must maintain at least a 3.4 GPA and take the GRE Exam.

Curriculum Requirements

Code	Title	Credit Hours
CAS GENERAL EDUCATION REQUIREMENTS		
English Composition ¹		6
ENG 105	English Composition I	
ENG 106	English Composition II	
Mathematics, Computing & Statistics ²		3
Second Language ³		
Writing Across the Curriculum ⁴		
Cognates ⁵		9
Advanced Language Proficiency in Spanish, French, Portuguese, or Haitian Creole		3
Select one of the following:		
FRE 203	Advanced French	
HAI 201	Intermediate Haitian Creole I	
POR 202	Intermediate Portuguese II	
SPA 203	Advanced Spanish	
Secondary Language Competence in another Latin American or Caribbean Language		3
Select one of the following:		
FRE 105	Accelerated Elementary French	
HAI 102	Elementary Haitian Creole II ((or equivalent))	
POR 105	Beginning Portuguese for Spanish Speakers	
SPA 105	Accelerated Elementary Spanish	
FILAS Specific Requirements		
Select one gateway seminar in Latin American Studies		3
Select two History courses		6
Select two International Studies courses		6
Select two Economics courses		6
Select two advanced Languages and Literatures courses (SPA, POR, FRE, or HAI)		6
Select seven courses in Study Abroad		21
Select one course as Internship in Latin America		3
Select five courses above the 300-level (third-year) in a range of disciplines		15
Select ten courses in one focus track		30
MA Phase Requirements		
GRE Exam in Semester 7 or 8		
LAS 601	Interdisciplinary in Latin American and Caribbean	3
LAS 602	Research Design in Latin American Studies	3
Select two Regional Fundamentals courses		6
Select four electives from approved LAS or combined courses		12
LAS 810	Pre-candidacy thesis credits (students must enroll in two semesters of this 3-credit course to fulfill this requirement.)	3
LAS 810	Pre-candidacy thesis credits	3
Total Credit Hours		150

¹ Certain AP/IB scores may be used to fulfill the Composition requirement as credit. If Transfer students transfer one of the two above, but not both, they may take ENG 208 to complete the requirement. ENG 105 must be taken unless exempted by SAT/V or ACT/V scores (does not include credits).

² MTH 108 or higher. Unless exempted by AP/IB, or UM placement test. UM placement test does not include credits. Prerequisites must be met before enrolling in MTH courses.

³ Students must take at least three credits in a language other than English at the 200-level or higher. Prerequisites may be required. Courses taken in order to meet this requirement, including necessary prerequisite courses to the 200 level courses, cannot be used in cognates seen below. FILAS students already fulfill this requirement when completing the language requirements cited below.

⁴ Degree candidates must complete at least four writing courses, and at least one such course must be in the student's major discipline.

- ⁵ Typically, students must complete a minimum of three cognates, one from each of the three areas of the University curriculum: Arts & Humanities; People & Society; and Science, Technology, Engineering & Mathematics. A cognate is a minimum of 9 credit hours, however it can be more. Each major/minor fulfills the cognate requirement in one Area of Knowledge. However, FILAS students must complete only the STEM Cognate as the FILAS program fulfills the Arts & Humanities and People & Society cognates. To avoid additional course credits, please select a STEM Cognate that includes a Natural Science course to concurrently fulfill this CAS general education requirement. According to the Collage of Arts & Sciences, "three credits must be earned from one of the following departments: Biology, Chemistry, Ecosystem Science & Policy (only ECS 111, ECS 112, or ECS 202), Geological Sciences, Marine Science (except MSC 313 and MSC 314), Physical Science, or Physics. APY 203 and GEG 120 may also count. These credits may double count with any other requirement, e.g., courses in the STEM cognate."
- ⁶ FILAS students also write a Master's Thesis based on an original research project. In addition, they must defend the thesis and present their findings at the LAS Annual Student Symposium.

Disclaimer: This is a model plan of study only. It is not guaranteed that every course will be available in the year/semester noted below.

Minor in Latin American Studies

The minor in Latin American Studies is designed for students who have an interest in Latin America and the Caribbean, but may not have the flexibility to pursue a Major. The minor may be obtained by completing five courses (detailed below), or through participation in the UBuenos Aires program.

Code	Title	Credit Hours
LAS 101	Introduction to Latin American and Caribbean Studies	3
LAS Courses 300 Level or Higher		9

Additional LAS Course	3
Total Credit Hours	15

UBuenos Aires

This UM designed program offers students the opportunity to earn a Latin American Studies minor in one semester while studying in the Argentine capital of Buenos Aires. Students will also have the opportunity to carry out an internship. Students from all majors are welcome to apply. Students will earn UM credits while taking classes in English or Spanish with other students from U.S. institutions. In the fall semester, coursework will be completed at the University of Belgrano. In the spring semester, coursework will be completed at the CEA Study Center.

Further information is available from UM Study Abroad at https://goabroad.miami.edu/index.cfm?FuseAction=Programs.ViewProgram&Program_ID=10256.

Students wanting to apply these classes towards an LAS major should consult with the academic director of Latin American Studies for further guidance.

Mathematics

<http://www.math.miami.edu>

Dept. Code: MTH

Educational Objectives

The aim of our mathematics degree programs is to provide students with a core knowledge of mathematics essential to the understanding of science and other disciplines. Students should gain substantial problem solving and critical reasoning skills and should develop an understanding of the conceptual underpinnings of mathematics. The knowledge gained through these programs should provide the necessary background in mathematics for those students planning to go on to graduate study in mathematics and related fields. This knowledge should also prepare those students who will be immediately entering careers in science, business, education or other fields which are increasingly making use of mathematics.

Degree Programs

- Bachelor of Arts and Bachelor of Science

Major

The requirements for a major in mathematics (p. 247) vary according to the objectives of the student. There are **seven courses** required of all mathematics majors.

An **additional four courses** are required, selected from one of the following track options:

- Core Mathematics
- Applied Analysis
- Computational Mathematics
- Probability and Statistics
- Secondary School Teaching
- Mathematical Economics

Writing Requirement

In order to satisfy the College of Arts and Sciences writing requirement, students majoring in mathematics must obtain writing credit in one of the following courses: MTH 433, MTH 461, MTH 502, MTH 504, MTH 520, MTH 533, MTH 561, and in three more writing courses from other departments.

Minor

A student seeking a minor in mathematics (p. 251) must have credit for a **calculus sequence**: MTH 161-MTH 162 or MTH 171-MTH 172.

In addition, a minor in mathematics requires **three courses** from a list of approved courses for the minor. (p. 251) All three courses must be taken in the Department of Mathematics, University of Miami. A grade of C- or better is required for each of the three courses applied toward the minor and the quality point average for the three courses must be 2.5 or above.

Departmental Honors

Requirements for Departmental Honors in Mathematics (p. 247):

The student must complete **three sequences** from a list of approved two-course sequences. The student must attain at least a B in each course used to fulfill this requirement. In addition, the student must attain at least a 3.5 average over all courses counted toward the mathematics major and an overall (university-wide) average of at least 3.3.

For requirements leading to the Master of Arts, Master of Science, or Doctor of Philosophy degrees, with a major in mathematics, see the Bulletin of the Graduate School (p. 969).

B.A. or B.S. in Mathematics (p. 247) Minor in Mathematics (p. 251)

B.A. or B.S. in Mathematics

www.math.miami.edu

The requirements of a major in mathematics vary according to the objectives of the student. There are seven courses required of all mathematics majors. An additional four courses are required selected from one of six track options:

Core Courses and Track Options

Code	Title	Credit Hours
Courses Required for All Mathematics Majors		
MTH 161 or MTH 171	Calculus I Calculus I	4
MTH 162 or MTH 172	Calculus II Calculus II	4
MTH 210	Introduction to Linear Algebra	3
MTH 230	Introduction to Abstract Mathematics	3
MTH 310	Multivariable Calculus	3
MTH 461 or MTH 561	Survey of Modern Algebra Abstract Algebra I	3
MTH 433 or MTH 533	Advanced Calculus Introduction to Real Analysis I	3
Track Options		
Select four courses from one of the following Tracks:		12
Core Mathematics Track:		
Select four of the following:		
MTH 510	Linear Algebra	
MTH 512	Elementary Complex Analysis	
MTH 531	Topology I	
MTH 532	Topology II	
MTH 534	Introduction to Real Analysis II	
MTH 551	Introduction to Differential Geometry	
MTH 562	Abstract Algebra II	
Applied Analysis Track: ¹		
MTH 311	Introduction to Ordinary Differential Equations	
MTH 512	Elementary Complex Analysis	
Select one of the following sequences:		
MTH 513 & MTH 514	Partial Differential Equations I and Partial Differential Equations II	
MTH 515 & MTH 516	Ordinary Differential Equations and Dynamics and Bifurcations	
Computational Mathematics Track:		
MTH 320	Introduction to Numerical Analysis	
CSC 317	Data Structures and Algorithm Analysis	
MTH 520 & MTH 521	Numerical Linear Algebra and Numerical Methods in Differential Equations	
Probability and Statistics Track:		
MTH 224	Introduction to Probability and Statistics	

MTH 524 & MTH 525	Introduction to Probability and Introduction to Mathematical Statistics	
MTH 542	Statistical Analysis	
Secondary School Teaching Track: ²		
MTH 224	Introduction to Probability and Statistics	
MTH 309	Discrete Mathematics I	
Select two of the following:		
MTH 502	History of Mathematics	
MTH 504	Foundations of Geometry	
MTH 505	Theory of Numbers	
Mathematical Economics Track:		
MTH 524 & MTH 525	Introduction to Probability and Introduction to Mathematical Statistics	
ECO 533	Advanced Microeconomic Theory	
Select one of the following:		
ECO 512	Topics in Mathematical Economics	
ECO 520	Econometrics	
ECO 521	Advanced Macroeconomic Theory	
Other Requirements		
University and School/College Specific General Education Requirements and Electives ^{3, 4, 5}		85
Total Credit Hours		120

- ¹ Course work in physics is desirable.
- ² This option is only for those obtaining a teaching credential.
- ³ Students should satisfy the General Education Requirements stipulated by the University as well as their specific School/College. These requirements typically include proficiency requirements in language, along with requirements for advanced writing and communication skills.
- ⁴ All students must satisfy University cognate requirements. A mathematics major satisfies the STEM Cognate requirement.
- ⁵ Elective courses selected must include courses that satisfy the requirements of an additional major or a minor outside of mathematics.
- * **Notes**
- It would be useful for students planning to do graduate study in mathematics to complete the following courses: MTH 531, MTH 532, MTH 533, MTH 534, MTH 561, MTH 562.
 - Students interested in **actuarial science** should choose the Probability and Statistics option; for these students a finance minor is recommended.
 - Transfer students will be permitted to apply up to 14 transfer credit hours towards the major; however, the courses MTH 461 (or MTH 561) and MTH 433 (or MTH 533) must be completed at the University of Miami.
 - A grade of C- or better is required for each course applied toward the major; the overall quality point average for University of Miami courses applied toward the major must be 2.5 or above.

Requirements for Departmental Honors in Mathematics:

Code	Title	Credit Hours
Select three of the following sequences		18
MTH 513 & MTH 514	Partial Differential Equations I and Partial Differential Equations II	6
MTH 515 & MTH 516	Ordinary Differential Equations and Dynamics and Bifurcations	6
MTH 520 & MTH 521	Numerical Linear Algebra and Numerical Methods in Differential Equations	6
MTH 524 & MTH 525	Introduction to Probability and Introduction to Mathematical Statistics	6
MTH 531 & MTH 532	Topology I and Topology II	6
MTH 533 & MTH 534	Introduction to Real Analysis I and Introduction to Real Analysis II	6
MTH 561 & MTH 562	Abstract Algebra I and Abstract Algebra II	6

- * The student must attain at least a B in each course used to fulfill this requirement. In addition, the student must attain at least a 3.5 average over all courses counted toward the mathematics major and an overall (university-wide) average of at least 3.3.

Dual Major in Meteorology and Mathematics

A combined major in meteorology and mathematics (p. 720) is available. For specific information please see the Meteorology section of the bulletin.

Possible Plan of Study

The B.A. and B.S. degrees in Mathematics differ only in the College of Arts and Sciences general education requirements. Here is a possible plan of study.

Minor in Mathematics

www.math.miami.edu

Code	Title	Credit Hours
Select three of the following:		9
MTH 210	Introduction to Linear Algebra	
MTH 211	Calculus III	
or MTH 310	Multivariable Calculus	
MTH 224	Introduction to Probability and Statistics	
MTH 230	Introduction to Abstract Mathematics	
MTH 309	Discrete Mathematics I	
MTH 311	Introduction to Ordinary Differential Equations	
MTH 320	Introduction to Numerical Analysis	
MTH 359	Mathematical Models in Biology and Medicine	
MTH 433	Advanced Calculus	
MTH 461	Survey of Modern Algebra	
Total Credit Hours		9

* A student seeking a minor in mathematics must have credit in a **calculus sequence**: MTH 161-MTH 162 or MTH 171-MTH 172.

** All three courses must be taken in the Department of Mathematics, University of Miami.

*** It is possible to select certain 500 level mathematics courses among the three, with prior approval of the Mathematics Department.

**** A grade of C- or better is required for each of these three courses and the quality point average for the three courses must be 2.5 or above; and in case the quality point average is below 2.5, an additional mathematics course must be taken.

Microbiology and Immunology

<http://www.as.miami.edu/mic/>

Dept. Code: MIC

Introduction

Microbiology and Immunology is an ancillary department in the College of Arts and Sciences. Our primary goal is to educate students in their chosen field and instill into them a desire for lifelong learning. Research opportunities and laboratory engagement help create knowledge in our students while preparing them to become active members of the scientific and public communities. A major in Microbiology and Immunology requires thorough preparation in chemistry, biology, biochemistry, physics, and mathematics.

Educational Objectives

1. To expose students to the various disciplines within the field of Microbiology and Immunology, including virology, parasitology, microbial genetics, immunology and medical bacteriology.

- To introduce students to special projects and/or research opportunities in laboratories at the School of Medicine.
- To provide laboratory experience for the development of skills required for the conduct of research.
- To make students aware of current cutting edge research in the field of Microbiology and Immunology by attending seminars of speakers from within and outside the University.

Degree Programs

- A Bachelor's of Science degree is awarded to all microbiology and immunology majors upon completion of the requirements. A chemistry minor is automatically received however, a student's choice of minor may be science or non-science.

Advanced Writing and Communication

To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in Microbiology and Immunology should take at least one course from the following: MIC 280, MIC 304, MIC 441.

Departmental Honors

Students that wish to gain a deeper understanding of Microbiology and Immunology can choose to write a thesis. The following program constitutes receiving Departmental Honors in Microbiology and Immunology.

- Overall GPA 3.3 or higher
- Six credit hours of Special Projects (MIC 451, MIC 452, MIC 453, MIC 454, MIC 455 or MIC 456) carried out under supervision of a member of the Microbiology and Immunology faculty, culminating in a senior thesis that includes 15 references. Once the mentor and student have revised and finalized the document a hard copy must be turned in to the Program Director.

Major in Microbiology and Immunology (Pre-Med and Graduate)

MCAT (<https://students-residents.aamc.org/applying-medical-school/taking-mcat-exam>) or GRE (http://www.ets.org/gre/revised_general/register)

- B.S. in Microbiology and Immunology (Pre-Medical and Graduate) (p. 252)

Double Major in Marine Science/Microbiology and Immunology

- B.S. in Marine Science/Microbiology and Immunology (p. 762)

Minor in Microbiology and Immunology

- Microbiology and Immunology (p. 256)

B.S. in Microbiology and Immunology

Required Natural Science Courses		
CHM 111 & CHM 113	Principles of Chemistry I and Chemistry Laboratory I	4
CHM 112 & CHM 114	Principles of Chemistry II and Chemistry Laboratory II	4
CHM 201 & CHM 205	Organic Chemistry I (Lecture) and Organic Chemistry Laboratory I	4
CHM 202 & CHM 206	Organic Chemistry II (Lecture) and Organic Chemistry Laboratory II	4
BIL 150 & BIL 151	General Biology and General Biology Laboratory	5
BIL 160 & BIL 161	Evolution and Biodiversity and Evolution and Biodiversity Laboratory	5
BMB 401	Biochemistry for the Biomedical Sciences	4
Select one of the following Physics Options:		10-11
Option 1:		
PHY 101 & PHY 106	College Physics I and College Physics Laboratory I	
PHY 102 & PHY 108	College Physics II and College Physics Laboratory II	
Option 2:		
PHY 205	University Physics I	
PHY 206	University Physics II	
PHY 207	University Physics III	
PHY 208	University Physics II Lab	
PHY 209	University Physics III Lab	
Select one of the following: ⁶		8
MTH 140 & MTH 141 & MTH 162	Calculus Concepts with Foundations A and Calculus Concepts with Foundations B and Calculus II	
MTH 161 & MTH 162	Calculus I and Calculus II	
MTH 171 & MTH 172	Calculus I and Calculus II	
Select one of the following Computer Science or Statistics courses:		

CSC 120	Computer Programming I	
CSC 210	Computing for Scientists	
MTH 224	Introduction to Probability and Statistics	
PSY 292	Introduction to Biobehavioral Statistics for Non-Majors	
SOC 211	Quantitative Methods for Sociologists	
Additional Required Courses		
ENG 105	English Composition I	3
ENG 106	English Composition II	3
or ENG 107	English Composition II: Science and Technology	
PSY 110	Introduction to Psychology	3
SOC 101	Introduction to Sociology	3
Language Courses		3-9
Arts and Humanities Cognate		9
People and Society Cognate		9
Electives		13
Total Credit Hours		127-129

- 1 Required of all Microbiology and Immunology majors.
- 2 MIC 201, MIC 319, MIC 323, GSC 309, BIL 554 Fall Semester only or by announcement
- 3 MIC 301, MIC 321, MIC 322, MIC 436, MIC 460 Spring Semester only or by announcement
- 4 Fall and Spring Semesters
- 5 MIC 451, MIC 452, MIC 453, MIC 454, MIC 455, MIC 456 all require that you have already completed 17 credit hours in MIC/MIC electives and a 3.0 cumm GPA with permission of Program Director or Roger Fall and Spring Semester
- 6 Depends on Math placement from SAT/ACT or ALEKS score.
- 7 University writing credit course
- * All MIC majors are required to have a minor (science or non-science). Students automatically get a CHM minor provided that they take one year of organic chemistry while in residence at UM.
- ** Transfer students seeking a Microbiology and Immunology major must earn at least 10 credit hours taken in residence at UM beyond MIC 301 in the courses listed above for majors.

Sample Plan of Study

This is a 4 year sample plan of study that assumes courses are taken during the fall and spring.

This is a guide and is not meant to take the place of the advice of your major advisor, you should consult with them before making any changes.

Course	Title	Credit Hours
Freshman Year		
Fall		
MIC 304 or 201	Introduction to Microbes and the Immune System (Lab) or Modern Plagues and Society	2-3
BIL 150	General Biology	4
BIL 151	General Biology Laboratory	1
CHM 111	Principles of Chemistry I	3
CHM 113	Chemistry Laboratory I	1
ENG 105	English Composition I	3
PSY 110	Introduction to Psychology (People & Society Cognate)	3
	Credit Hours	17-18
Spring		
MIC 301	Introduction to Microbes and the Immune System	3
MIC 304	Introduction to Microbes and the Immune System (Lab)	2
BIL 160	Evolution and Biodiversity	4
BIL 161	Evolution and Biodiversity Laboratory	1

Minor in Microbiology and Immunology

Code	Title	Credit Hours
Take the following: ¹		11
MIC 301	Introduction to Microbes and the Immune System ³	
MIC 304	Introduction to Microbes and the Immune System (Lab) (Can be taken before or after the MIC 301) ⁴	
Select one of the following: ¹		
MIC 319	Innate Immunity ²	
MIC 321	Immunobiology ³	
Select one of the following: ¹		
MIC 201	Modern Plagues and Society ²	
MIC 322	Medical Parasitology ³	
MIC 323	Microbial Pathogenesis and Physiology ²	
MIC 436	Fundamental and Medical Virology ³	
Select a minimum of one credit hour from the following:		1
MIC 201	Modern Plagues and Society ²	
MIC 322	Medical Parasitology ³	
MIC 319	Innate Immunity ²	
MIC 321	Immunobiology ³	
MIC 323	Microbial Pathogenesis and Physiology ²	
MIC 436	Fundamental and Medical Virology ³	
MIC 441	Microbiology and Immunology Colloquium ⁴	
MIC 460	Advanced Topics in Microbiology and Immunology ³	
Total Credit Hours		12

- 1 Required of all Microbiology and Immunology Minors
 - 2 MIC 201, MIC 319, MIC 323 Fall Semester Only or by announcement
 - 3 MIC 301, MIC 321, MIC 322, MIC 436, MIC 460 Spring Semester Only or by announcement
 - 4 Fall and Spring Semesters
- * Variations in the above programs may, in special cases, be approved by the Microbiology and Immunology undergraduate advisor and Director.
- ** All courses in Microbiology and Immunology to be credited toward a Microbiology and Immunology major or minor must be completed with a grade of C- or better with an overall GPA of 2.0.

Military Science

<http://www.as.miami.edu/armyrotc>

Dept. Code: MSL

Introduction

The Army Reserve Officer Training Corps is a college elective that will help students succeed in their desired career, whether civilian or military. Students who complete all ROTC requirements may be commissioned second lieutenants and serve in the Army, Army National Guard or Army Reserve.

The military science department's Reserve Officers Training Corps (ROTC) program of instruction qualifies the student for a commission in the United States Army, Army National Guard, or United States Army Reserve. The curriculum does not provide technical training in a job specialty nor does it emphasize vocational training; rather, it complements and provides a base for normal progression in the commissioned officers' educational program.

Leadership and management objectives are included in academic periods of instruction. Practical leadership experience is gained in a field training environment by attendance at a 31-day summer camp, normally between the junior and senior years. Nursing students may attend a nursing internship at Army hospitals following the normal summer camp. A leadership laboratory also provides experience in a range of leadership positions during the school year. The department offers both a four-year and a two-year program, each with its own special advantages. Students are invited to visit or write the Department of Military Science to obtain additional information.

Core Program

The program requires four years of military science courses which consist of a two-year basic course and a two-year advanced course. Students can begin the four-year program as freshmen or as sophomores.

There is also a two-year ROTC program for those students with only two years of college remaining. The two-year course is designed for junior college and other non-ROTC college transfer students, but may be utilized by students who did not enroll in the basic course outlined below.

Graduate students may also qualify for enrollment in the two-year course. Additional information regarding eligibility requirements for the two-year program may be obtained by contacting the Department of Military Science.

Women are encouraged to enroll and will be commissioned as officers in the United States Army upon completion of the ROTC curriculum. Job opportunities for women officers in the Army are the same as those for men, excluding a few combat arms fields.

Basic Course

The basic course is normally taken as an elective subject by students in their freshman and sophomore years. The purpose of this instruction is to qualify students for entry into the advanced course by familiarizing them with the organization of the Army, military skills, and military tradition. Students do not incur any military obligation as a result of enrolling in the basic course. Enrollment in ROTC requires proof of a doctor's physical screening. Participation in regularly scheduled physical training is required. In addition to classroom instruction, a one and a half hour leadership laboratory period is required every other week.

Advanced Course

Instruction in the advanced course includes leadership and management, the exercise of command, military teaching methods, tactics, logistics, administration, history, and military justice. Leadership experience and command experience are provided by assigning advanced course students as cadet officers and noncommissioned officers. Participation in regularly scheduled physical training is a required part of the leadership training. Classroom instruction consists of two one and a quarter hour (75 minutes) periods each week and a two hour (120 minutes) leadership laboratory period every week. Only students who have demonstrated a definite potential for becoming competent officers will be selected for the advanced course.

Army Nurse Corps Option

Students enrolled in the School of Nursing curriculum leading to the degree of Bachelor of Science in Nursing may simultaneously qualify for commissions as Second Lieutenants in the Army Nurse Corps. Nursing students qualify for entry into the Officer Development Course through

satisfactory completion of the General Military Course, the Basic Camp option or equivalent training. Nursing students participate in a summer Advanced Camp training program and an Army nurse training program. They provide practical and leadership experience in the clinical setting. The focus is to provide nursing cadets an experience which integrates clinical, interpersonal and leadership knowledge and skills. Emphasis is placed on practical experience under the direct supervision of an Army Nurse Corps Officer who acts as the cadet's preceptor throughout the camp period.

Professional Military Education

In addition to basic and advanced ROTC courses, cadets must complete professional military education requirements consisting of one course in each of the following areas: written and oral communication skills, U.S. military history, and computer literacy. Students should consult with the professor of military science to determine those University courses suitable for fulfilling these requirements.

Monetary Allowances

Cadets selected for admission into the advanced course qualify for a nontaxable monetary allowance of \$450–\$500 per month for up to 20 months. Cadets may also qualify for the simultaneous membership program with the United States Army Reserve or National Guard, which can provide approximately \$4,800 per semester during the last two years of school. Both the United States Army Reserve and the National Guard offer additional monetary incentives for cadets who join their organizations (drill pay).

Army ROTC College Scholarship Program

Financial assistance is available in the form of two- or three-year ROTC academic scholarships for selected students. Under the Army ROTC Scholarship Program, the students/cadets receive FULL Tuition and Fees. Additionally, Army scholarship recipients receive a flat-rate allowance of \$1200 per year for textbooks and other expenses and \$350–\$500 per month stipend for up to 10 months per year. During the 32-day advanced course summer training between the junior and senior years, Army ROTC also pays attending cadets \$27 per day plus room and board. There are also numerous national and organizational scholarships that students may compete for as a member of Army ROTC.

Additionally, University of Miami undergraduates enrolled in the Army ROTC program are assured a combined University grant and/or scholarship award during the fall and spring semesters equal to 25% of the University's tuition charge for a maximum of four years. The subsidy is not available during the summer term. Students must maintain continuous enrollment in the Army ROTC program, must maintain satisfactory academic progress to continue receiving the subsidy, and full time enrollment in one of the University's undergraduate degree programs is required. No application is required. Awards are made automatically based on information provided by the University's Army ROTC detachment.

Uniforms and Textbooks

All uniforms and items of insignia incident to membership in the Army ROTC Program are furnished by the Department of Military Science. Textbooks are provided at no cost to students/cadets enrolled in the basic course.

Special Activities

Cadets have the opportunity to join and participate in a number of military affiliated organizations and activities, both on a voluntary and a selective basis. The Color Guard is a voluntary organization that functions as a military unit participating in military ceremonies and presenting the national colors at civic events. Cadets have the opportunity to qualify for and compete with cadets from other universities and colleges in a series of military events termed Ranger Challenge.

Awards and Decorations

Awards and decorations made available by national organizations, the University of Miami Army ROTC Alumni Association, and local and national military organizations, are presented to both basic and advanced officer course cadets each year. These plaques, trophies, medals, and ribbons symbolize superior achievement in Army ROTC and other University academic courses, and in outstanding campus and cadet corps leadership.

Prerequisite for Admission to the Professional Officer Course

1. Be at least 17 years of age at time of acceptance.
2. Be able to complete the professional officer course and graduate from the University of Miami prior to reaching the age of thirty (30) at the time of commissioning.
3. Selection by the professor of military science and acceptance by the University of Miami.
4. Execute a written agreement with the government to complete the professional officer course and accept an Army ROTC commission.
5. Enlist in the Army Reserve Component-ROTC (terminated upon receiving an Army officer commission).

Those students enrolled in the four-year Army ROTC program must complete the basic course or its equivalent, or have acceptable prior military service. Veterans and students with previous ROTC training are invited to write, visit, or call the Department of Military Science 305-284-3329 or 305-348-1619 to discuss their eligibility status.

Students desiring entry into the two-year Army ROTC program should contact the Department of Military Science one semester prior to the semester in which they wish to enroll in the professional officer course. This lead time is required to complete the application and a physical examination prior to enrollment in the professional officer course.

Leadership Laboratory

Leadership laboratory is open to students who are members of the Reserve Officer Training Corps or who are eligible to pursue a commission as determined by the professor of military science. Leadership laboratory is the formalized phase of leadership training conducted by the cadets. It is scheduled for two (120 minutes) hours every week for both the basic and advanced officer courses (non-contracted and contracted). All uniforms and equipment required for cadet activities are furnished.

Educational Objectives

To provide a base of knowledge in the areas of ethics, leadership, Communication skills, Military Leadership, U.S Military History, Tactics and Team building to include future Officer development.

Degree Programs

Students can receive degrees from the university in addition to being in the Army ROTC program, as well as being eligible (once requirements are met) to receive a minor in Military Science.

Modern Languages and Literatures

<http://www.as.miami.edu/ml>

Dept. Code: MLL

Introduction

The study of languages and cultures is an integral part of a modern, global university education. At the University of Miami, students can choose courses in Arabic, Chinese, French, German, Haitian Creole, Hebrew, Italian, Japanese, Portuguese, and Spanish. All majors (French, German, Spanish), minors (Arabic Studies, French, German, Italian, Portuguese, Spanish), and language programs (Chinese, Haitian Creole, Hebrew, Japanese) in the department are articulated through the notion of Global Literacy. Global literacy is the **ability to participate in sociocultural practices** by both interacting with others in different languages and by creating, presenting, and interpreting ideas through oral and written texts **in more than one language**. Consequently, global literacy involves awareness about oral and written texts, their conventions and genres, and their social, historical, political, and artistic uses. It entails linguistic proficiency in a language other than your own. You cannot be global if you only live in one language. Global Literacy includes written and oral communication, critical thinking and social responsibility, and appreciation of cultural artifacts, artistic products, and new technologies in more than one language.

Global Literacy and multilingualism foster success in business, economics, education, law, medicine, natural sciences, politics, social sciences, arts, and humanities. Language study most effectively enriches academic as well as personal experiences when students choose a language based on its relevance to possible careers, to research in particular fields, to personal heritage, or to the understanding of unfamiliar cultures. Students combine advanced modern language study with majors in other fields, such as International Studies, Communications, History, Political Science (and other pre-law fields), Biology (and other pre-med fields), Nursing, English, Finance, Latin American Studies, Anthropology, Psychology, Computer Science, Sociology, and Philosophy.

The Department has Undergraduate Advisors for each language (<http://www.as.miami.edu/ml/undergraduate/advising>). You are encouraged to consult with them for placement, and must consult with them if you plan to major, minor, or study abroad (contact the Department office for names and office hours). If you plan to double major, you must have an advisor from each of your fields.

Students may qualify for a wide range of departmental awards (<http://www.as.miami.edu/ml/undergraduate/student-awards>) for excellence in linguistic and literary achievement. The Modern Languages and Literatures Awards Reception takes place annually during graduation week. Some awards are conferred through nomination by professors; others require an application. Students may obtain information on specific awards in the Department office. The annual deadline for applications is usually in early March.

Placement Guidelines for MLL Courses

Most students studying a second language can determine their appropriate level by adhering to the following guidelines. However, various factors (i.e., the strength of the program in which the student previously studied the language, how long it has been since the student has used the language, the extent of the student's exposure to the language at home/in social settings, the student's knowledge of other languages, etc.) make it such that these are only guidelines and individual cases may differ. For this reason, on the first day of class of each course section, the instructor conducts a diagnostic evaluation of students' abilities. The instructor will then inform students whether that course is indeed the level or track that will benefit him/her the most or, if not, which course he/she must take. Therefore, it is extremely important that students attend their language class on the first day of class for the semester.

Students who wish to study Spanish (as a second language, native language, or heritage language) can get more tailored placement advice through our on-line placement advisor (<http://www.as.miami.edu/labs/resources/placement>).

The following are MLL's general placement guidelines (<http://www.as.miami.edu/ml/undergraduate/placement-guidelines>):

- If you have not studied Arabic, Chinese, French, German, Hebrew, Italian, Japanese, or Spanish in high school, or have completed one to two years of high school instruction, take 101; for Portuguese, take 105.
- If you have taken 101 or its equivalent at another institution, take 102.
- If you have completed three years of high school instruction in French or Spanish, or scored a 3 on the AP language exam take 105. If you have had three years of high school Arabic, Chinese, German, Hebrew, Italian, or Japanese, take 102.
- If you have taken four years of high school French or Spanish, scored a 4 on the AP language exam or a 4 on the IB exam in French or Spanish, or took the equivalent of 102 or 105 at another university, take 201. If you have taken four years of high school German, Italian or Portuguese, take 201. If you have taken four years of Arabic, Chinese, Hebrew, or Japanese, take 201.
- If you had five to six years of French, German, Italian, or Spanish in middle and high school, take 202.
- If you have taken the equivalent of 201 at another university or scored a 5 on the AP language exam, you have completed your language requirement. If you wish to continue your studies, take 202.
- If you took the equivalent of 202 in French or Spanish at another university or scored a 4 on the AP literature exam, you have completed your language requirement. If you wish to continue your studies, take 203. If you took the equivalent of 202 in German, Italian or Portuguese at another university, you have completed your language requirement. If you wish to continue your studies, take 301.
- If you scored a 5 on the AP literature exam in French, Italian or Spanish, you have completed your language requirement. If you wish to continue your studies, take 301.

The Department offers courses open to native speakers of French, German, Italian, Portuguese, and Spanish. Native speakers may *not* enroll in 101, 102, 105, 201, 202, 203, or 301 in their language. If you are a native speaker of French, German, Italian, or Portuguese, and graduated from a high school where that was the official language of instruction, you may take any course above 301 (consult with the respective Undergraduate Advisor). If you are a native speaker of Spanish and graduated from a high school where that was the official language of instruction, your first SPA course at UM must be either SPA 302 or SPA 303 or SPA 307 (which is a prerequisite for most other SPA courses).

The Department of Modern Languages & Literatures identifies as *heritage learners* of Spanish those students who begin their university studies of the language with little or no prior instruction in Spanish but who, because of family background or social experience, can already understand much casual spoken Spanish and have a passive knowledge of the language (though they may not usually speak the language themselves). In the great majority of cases, they have been born and fully educated in the United States, and may have grown up speaking principally English (or a 'mix' of Spanish and English, i.e. 'Spanglish') in the home with their grandparents, parents and siblings. Heritage learners may or may not consider themselves as "bilinguals" or "native speakers", since both of these terms carry very different connotations—linguistic, social, and psychological—for different individuals. Some state that they "do not really speak Spanish" even though they are able to comprehend much spoken language (i.e., they are "passive bilinguals"). In the great majority of cases, they self-identify as "Hispanic" or "Latino/a".

HERITAGE LEARNERS OF SPANISH MUST BE PLACED IN ONE OF THE FOLLOWING FOUR COURSES:

1. **SPA 107 Basic Spanish for Heritage Learners** is for those students with little or no prior instruction in Spanish who, because of family background or social experience, can understand casual spoken Spanish and have a passive knowledge of the language although they do not usually speak the language themselves. Generally, their abilities to read and write Spanish are at a beginning level. **CLOSED TO STUDENTS WHO GRADUATED HIGH SCHOOL IN A SPANISH-SPEAKING COUNTRY.**
2. **SPA 207 Intermediate Spanish for Heritage Learners** is for those students **WHO HAVE ALREADY TAKEN AND PASSED SPA 107** or who have studied Spanish for AT LEAST TWO YEARS IN HIGH SCHOOL. They can understand casual spoken Spanish and have some functional ability in speaking, reading and writing the language. **CLOSED TO STUDENTS WHO GRADUATED HIGH SCHOOL IN A SPANISH-SPEAKING COUNTRY.**
3. **SPA 208 Advanced Spanish for Heritage Learners** is for those students who have studied Spanish for four years in high school and who have developed functional abilities in speaking, reading and writing the language. Students who earned a score of 5 on the AP Spanish Language Exam or 4 in the AP Literature Exam should register for this course. **CLOSED TO STUDENTS WHO GRADUATED HIGH SCHOOL IN A SPANISH-SPEAKING COUNTRY.**
4. **SPA 307 Interpreting Literary And Cultural Texts In Spanish For Heritage/Native Speakers** is intended **for those students who have completed secondary and/or university studies in a Spanish-speaking country** and for those heritage learners who demonstrate an advanced level of productive competence (in the written and spoken modes) in Spanish because of prior formal study of the language. Heritage learners who place directly into 307 have taken AP Spanish literature in high school and earned a score of 5.

SPA 101, SPA 102, SPA 105, SPA 201, SPA 202 AND SPA 203 ARE NOT FOR HERITAGE LEARNERS. ANY HERITAGE LEARNER WHO ENROLLS IN ONE OF THESE COURSES WILL BE OBLIGATED TO SWITCH TO A HERITAGE LANGUAGE COURSE (SPA 107, SPA 207, SPA 208 OR SPA 307) DURING THE FIRST WEEK OF CLASS.

Arts and Sciences Language Requirement

The College of Arts and Sciences requires all B.A. and B.S. degree students to show competency in a language other than English by successfully completing an approved college language course at the 200-level or higher. Students wishing to fulfill the language requirement in a language not taught at UM, may request an equivalency evaluation for a course at the appropriate level offered at an accredited institution, complete the approved equivalent course, and transfer the credits. Students requesting such an equivalency evaluation must submit appropriate documentation to the MLL department for approval. For a native speaker of the language in question, a course that transfers at UM's 300-level will fulfill the language requirement. For a second language learner of the language in question, a course that transfers at UM's 200-level will fulfill the language requirement.

Writing Credits: Writing Across the Curriculum

All of the Department's 300- and 500-level courses and some 400-level courses offer writing credit. NOTE: Courses may simultaneously fulfill General Education requirements and Writing Credit, or the Foreign Language Requirement and Writing Credit.

Cognates

Most of the Department's courses are part of cognates in one of two Areas of Knowledge: Arts & Humanities, and People & Society. A course cannot simultaneously complete a cognate in an Area of Knowledge and the College of Arts & Sciences' Foreign Language Requirement.

Degree Programs

Students pursuing a single major in Arts and Sciences earn a BA.

Majors

The Department offers majors in French, German, and Spanish. Students majoring in any of these three languages must earn 24 credit hours in courses above 201 for French and above 202 for German and Spanish (30 credit hours for Departmental Honors). In consultation with their MLL advisor, students can have up to 1 course (3 credits) from among the MLL courses or the FRE, GER, and SPA courses taught in English (numbered 310-319) count toward their French, German, or Spanish major.

Minors

The Department offers minors in Arabic Studies, French, German, Italian, Portuguese, Spanish, and Modern Languages. You do not have to be a student of the College of Arts and Sciences to minor in a modern language; you need only the approval of your college or school advisor and to complete the departmental requirements. If you wish to complete a double degree, consult with an Arts and Sciences Advisor. Except for Arabic Studies, French and Italian, all courses in the German, Portuguese, Spanish minors must be taught in the target language. The two 300-level courses for the additional language in the Modern Languages minor must also be taught in the target language.

Students may also pursue a minor in Chinese Studies or Japanese Studies as an Independent Minor. Please consult the requirements here. (p. 114)

Study Abroad

Students completing a major or a minor in a modern language are encouraged to study abroad. The Department offers faculty-led summer study abroad programs in France, Japan, and Spain. The Department and Study Abroad sponsor a semester-long study abroad program in Paris (UParis) for students of all majors and minors and all levels of ability in the French language; French majors and minors are especially encouraged to apply. For more information, please click [here](#). Study Abroad (in Dooly Memorial Classroom, Building 1111, Memorial Drive, Suite 125) sponsors programs for Chinese, French, German, Italian, Japanese, Portuguese, and Spanish. It is also possible to fulfill some Arts and Sciences distribution requirements abroad. In order to take full advantage of study abroad, students should visit the Study Abroad office early in their university careers, discuss course equivalencies with the Study Abroad Advisor for their chosen languages (contact the Department office for names and office hours), and consult with their major advisors. Credit hour toward the major for courses taken abroad will be determined on an individual basis.

Departmental Honors

Departmental Honors in Modern Languages are possible in the three languages for which the major is offered: French, German and Spanish. In order to request admission to Departmental Honors, candidates must have completed at least twelve credit hours at the 300 level or above. They must have a GPA of 3.5 in all their major courses and a 3.5 overall average GPA. Both GPAs must be maintained in order to graduate with Departmental Honors.

During their junior year, candidates for honors will identify an honors thesis supervisor and a second reader and request admission to Departmental Honors. Admission to candidacy must also be approved by the Director of Undergraduate Studies for the appropriate language.

In addition to fulfilling the regular major requirements, students must register in their Senior year for FRE or GER or SPA 594-595, Senior Honors Thesis. This is a two-semester, six credit hour sequence: 594 for research and 595 for the actual writing of the honors thesis.

The honors thesis advisor and the second reader will determine whether the finished thesis merits Departmental Honors.

Majors in Modern Languages and Literatures

- B.A. in French (p. 262)
- B.A. in German (p. 267)
- B.A. in Spanish (p. 271)

Minors in Modern Languages and Literatures

- Arabic Studies (p. 276)
- French (p. 278)
- German (p. 279)
- Italian (p. 280)
- Portuguese (p. 281)
- Spanish (p. 282)
- Modern Languages (p. 280)

B.A. in French

Goals of the Major

A major in French consists of at least 24 credit hours beyond FRE 201 with a grade of C- or higher in every course counting toward the major, and with a cumulative GPA of at least 2.5 in the major (see curriculum for course distribution). The major is designed to allow students to gain advanced linguistic, cultural, and literary competence in the communities that speak this language. With each course students further develop the capacity to communicate with and to critically see and understand the linguistic communities being studied. Not only do students learn to understand, interpret, and analyze communication patterns and cultural products (new technologies, film, literature, etc.) from other geopolitical positions, but this process also fosters a greater appreciation of the learners' own language, culture, and society. As part of the development of analytical and critical skills, students learn to build coherent arguments orally and in writing# to develop tools for the interpretation of various texts# to perform research and write critical papers# to find and evaluate sources of information# to heighten their sensitivity to the contexts of language, and to appreciate language as art. Students will also acquire a broad, structured knowledge of the relevant history, literature and culture in the target language. Finally, they will learn to carry out cultural comparisons and to view their own culture with new eyes.

You do not have to be a student of the College of Arts and Sciences to major in a modern language; you need only the approval of your college or school advisor and to complete the departmental requirements. If you wish to complete a double degree, consult with an Arts and Sciences Advisor.

Students completing a major in a modern language are encouraged to study abroad. The Department and Study Abroad sponsor a semester-long study abroad program in Paris (UParis) for students of all majors and minors and all levels of ability in the French language; French majors and minors are especially encouraged to apply. For more information, please click here. The Study Abroad Office (in Dooly Memorial Classroom, Building 1111, Memorial Drive, Suite 125) sponsors programs for Chinese, French, German, Italian, Japanese, Portuguese, and Spanish. It is also possible to fulfill some Arts and Sciences distribution requirements abroad. In order to take full advantage of study abroad, students should visit Study Abroad early in their university careers, discuss course equivalencies with the Study Abroad Advisor for their chosen languages (contact the Department office for names and office hours), and consult with their major advisors. Credit hour toward the major for courses taken abroad will be determined on an individual basis.

Students with transfer credit hours must take at least 18 graded credit hours at or above the 300-level at the University of Miami; i.e., up to 6 credit hours may be transferred towards the French major from another institution or a study abroad program not administered by UM. Up to 12 credit hours taken abroad in a UM-administered program may count towards the major.

Capstone Courses

The final course in the major is the capstone course (501) which must be taken in residence. This course will:

- Integrate the various skills acquired during the course of study (linguistic, analytical, knowledge-based);
- Incorporate interpretive as well as presentational modes of communication;
- Contain an over-arching and cohesive theme;
- Include an element of collaboration among students.

It will constitute a moment of recapitulation of, synthesis, and reflection on a student's experience in the major as well as a bridge towards graduate-level studies, should s/he decide to pursue them.

Of the 24 credit hours required for the major, a minimum of 12 credit hours must be earned in courses taught by MLL faculty (whether on campus or in faculty-led study-abroad programs). Since we encourage students to study abroad in UM-sponsored programs, up to 12 credit hours from these programs may be applied toward the major. Up to 6 transfer credit hours from other institutions may count toward the major; whether these are credit hours transferred from another U.S. institution or from non-UM study abroad programs, transferred credit hours must be granted UM equivalency in

order to be eligible to count toward the major. Please note, however, that the total number of combined UM study-abroad (exclusive of MLL faculty-led programs) and transfer credit hours shall not exceed 12 credit hours.

For example:

- A student may use 3 transfer credit hours with UM equivalency and 9 credit hours from a UM-sponsored study abroad program toward fulfillment of the major; the remaining 12 credit hours must be earned in courses taught by MLL faculty.
- A student may use 6 transfer credit hours with UM equivalency and 6 credit hours from a UM-sponsored study abroad program toward fulfillment of the major; the remaining 12 credit hours must be earned in courses taught by MLL faculty.
- A student may use 12 credit hours from a UM-administered study-abroad program not led by MLL faculty and 12 credit hours in courses taught by MLL faculty to fulfill the major.

Exceptions to this 12 credit hours rule may be made in cases where a student will participate in a UM-administered study-abroad program for a full academic year.

Curriculum Requirements

Code	Title	Credit Hours
Core Requirements		
FRE 202	Intermediate French II	3
FRE 203	Advanced French	3
FRE 301	Introduction to French and Francophone Studies	3
300 or 400 Level Courses		
At least 15 credits must be at the 300 or 400 level. ¹		15
At least 3 credits of the 15 credits at the 300 or 400 level must focus on a pre- 20th century period. The following courses meet this requirement:		
FRE 363	Medieval and Renaissance Topics in French	
FRE 364	Early Modern Topics in French	
FRE 365	19th Century Topics in French	
Capstone Requirement		
FRE 501	Capstone	3
Additional Graduation Requirements		
ENG 105	English Composition I	3
ENG 106	English Composition II	3
MTH 101	Algebra for College Students ^{Not needed by students who place into MTH 113}	3
MTH 113	Finite Mathematics	3
Language Requirement (3-9 credits) ²		
Minor		15
People & Society Cognate ³		9
STEM Cognate ⁴		9
Natural Science Course ⁵		3
Advanced Writing & Communication ⁶		3
Electives ⁷		42
Total Credit Hours		120

¹ In consultation with their FRE advisor students can have up to 1 course (3 credits) from among the MLL courses or FRE courses taught in English (numbered 310-319) count toward their major.

² Students satisfy this requirement by the time they start the major with FRE 202

³ If the student has a minor (or second major) that counts as "People & Society", the student does not need to satisfy the requirement for a People & Society cognate.

⁴ If the student has a minor (or second major) that counts as "STEM", the student does not need to satisfy the requirement for a STEM cognate.

⁵ This requirement is waived if the STEM cognate includes a Natural Science course from the approved list.

⁶ Students satisfy this requirement by taking four writing courses, at least one of which must be in one of the student's major disciplines. Since all FRE courses above 203/208 are designated as writing (WRIT) courses, all French majors satisfy this requirement by completing their major.

⁷ A minimum of 120 credits is required for graduation. Sufficient credits must be earned in electives to enable the student to complete this minimum of 120 credits. The exact number of elective credits required will vary depending on the number of credits needed to complete all other graduation requirements.

Suggested Plan of Study

These Suggested Plans of Study are samples of four-year plans, but an individual student's actual plan is likely to vary from these sample plans in a number of ways, depending on such factors as (1) AP, dual-enrollment, and transfer credits that a student brings in; (2) the student's initial placement in composition, mathematics, and French; and (3) the minor chosen by the student, as well as any additional minor or major the student chooses to complete. For example, a student is not required to complete a cognate in People & Society if the student has a minor (or second major) that counts as "People & Society," and similarly, a student is not required to complete a cognate in STEM if the student has a minor (or second major) that counts as "STEM."

B.A. in German

Goals of the Major

A major in German consists of at least 24 credit hours beyond GER 202 with a grade of C- or higher in every course counting toward the major, and maintain a minimum overall average of 2.5 in the major (see curriculum for course distribution). The major is designed to allow students to gain advanced linguistic, cultural, and literary competence in the communities that speak this language. With each course students further develop the capacity to communicate with and to critically see and understand the linguistic communities being studied. Not only do students learn to understand, interpret, and analyze communication patterns and cultural products (new technologies, film, literature, etc.) from other geopolitical positions, but this process also fosters a greater appreciation of the learners' own language, culture, and society. As part of the development of analytical and critical skills, students learn to build coherent arguments orally and in writing# to develop tools for the interpretation of various texts# to perform research and write critical papers# to find and evaluate sources of information# to heighten their sensitivity to the contexts of language, and to appreciate language as art. Students will also acquire a broad, structured knowledge of the relevant history, literature and culture in the target language. Finally, they will learn to carry out cultural comparisons and to view their own culture with new eyes.

You do not have to be a student of the College of Arts and Sciences to major in a modern language; you need only the approval of your college or school advisor and to complete the departmental requirements. If you wish to complete a double degree, consult with an Arts and Sciences Advisor.

Students completing a major in a modern language are encouraged to study abroad. The Study Abroad Office (in Dooly Memorial Classroom, Building 1111, Memorial Drive, Suite 125) sponsors programs for Chinese, French, German, Italian, Japanese, Portuguese, and Spanish. It is also possible to fulfill some Arts and Sciences distribution requirements abroad. In order to take full advantage of study abroad, students should visit Study Abroad early in their university careers, discuss course equivalencies with the Study Abroad Advisor for their chosen languages (contact the Department office for names and office hours), and consult with their major advisors. Credit hour toward the major for courses taken abroad will be determined on an individual basis.

Students with transfer credit hours at the 300-level must take at least 18 graded credit hours at or above the 300-level at the University of Miami; i.e., up to 6 credit hours may be transferred towards the German major from another institution or a study abroad program not administered by UM. Up to 12 credit hours taken abroad in a UM-administered program may count towards the major.

Capstone Courses

The final course in the major is the capstone course (501) which must be taken in residence. This course will:

- Integrate the various skills acquired during the course of study (linguistic, analytical, knowledge-based);
- Incorporate interpretive as well as presentational modes of communication;
- Contain an over-arching and cohesive theme;
- Include an element of collaboration among students.

It will constitute a moment of recapitulation of, synthesis, and reflection on a student's experience in the major as well as a bridge towards graduate-level studies, should s/he decide to pursue them.

Of the 24 credit hours required for the major, a minimum of 12 credit hours must be earned in courses taught by MLL faculty (whether on campus or in faculty-led study-abroad programs). Since we encourage students to study abroad in UM-sponsored programs, up to 12 credit hours from these programs may be applied toward the major. Up to 6 transfer credit hours from other institutions may count toward the major; whether these are credit hours transferred from another U.S. institution or from non-UM study abroad programs, transferred credit hours must be granted UM equivalency in order to be eligible to count toward the major. Please note, however, that the total number of combined UM study-abroad (exclusive of MLL faculty-led programs) and transfer credit hours shall not exceed 12 credit hours.

For example:

- A student may use 3 transfer credit hours with UM equivalency and 9 credit hours from a UM-sponsored study abroad program toward fulfillment of the major; the remaining 12 credit hours must be earned in courses taught by MLL faculty.

- A student may use 6 transfer credit hours with UM equivalency and 6 credit hours from a UM-sponsored study abroad program toward fulfillment of the major; the remaining 12 credit hours must be earned in courses taught by MLL faculty.
- A student may use 12 credit hours from a UM-administered study-abroad program not led by MLL faculty and 12 credit hours in courses taught by MLL faculty to fulfill the major.

Exceptions to this 12 credit hours rule may be made in cases where a student will participate in a UM-administered study-abroad program for a full academic year.

B.A. in Spanish

Goals of the Major

A major in Spanish consists of at least 24 credit hours beyond SPA 202 with a grade of C- or higher in every course counting toward the major, and with a cumulative GPA of at least 2.5 in the major (see curriculum for course distribution). The major is designed to allow students to gain advanced linguistic, cultural, and literary competence in the communities that speak this language. Students learn with each course to understand, interpret, and analyze communication patterns and cultural products (new technologies, film, literature, etc.) from the geopolitical positions of the linguistic communities they study. This learning process also fosters a greater appreciation of the students' own language, culture, and society. As part of the development of analytical and critical skills, students learn to build coherent arguments orally and in writing# to develop tools for the interpretation of various texts# to perform research and write critical papers# to find and evaluate sources of information# to heighten their sensitivity to the contexts of language, and to appreciate language as art. Students will also acquire a broad, structured knowledge of the relevant history, literature and culture in the target language. Finally, they will learn to carry out cultural comparisons and to view their own culture with new eyes.

You do not have to be a student of the College of Arts and Sciences to major in a modern language; you need only the approval of your college or school advisor and to complete the departmental requirements. If you wish to complete a double degree, consult with an Arts and Sciences Advisor.

Students with transfer credit hours must take at least 18 graded credit hours at or above the 300-level at the University of Miami, i.e., up to 6 credit hours may be transferred towards the Spanish major from another institution or non-UM study abroad program.

Spanish majors must take SPA 301 or SPA 307 (or equivalent), and they are advised to take this course as they start fulfilling their 300-level credit requirements. In consultation with their MLL advisor, students can have up to 1 course (3 credits) from among the MLL courses or SPA courses taught in English (numbered 310-319) count toward their Spanish major. Students must also take one pre-twentieth century course to fulfill their course requirements towards the major (SPA 353, SPA 354, SPA 363, or SPA 364). Only one professional Spanish course (SPA 432, SPA 433, SPA 434) will count towards the Spanish major, although students are free to take more than one.

Capstone Courses

The final course in the major is the capstone course (501) which must be taken in residence. This course will:

- Integrate the various skills acquired during the course of study (linguistic, analytical, knowledge-based);
- Incorporate interpretive as well as presentational modes of communication;
- Contain an over-arching and cohesive theme;
- Include an element of collaboration among students.

It will constitute a moment of recapitulation, synthesis, and reflection on a student's experience in the major as well as a bridge towards graduate-level studies, should s/he decide to pursue them.

Study Abroad

Students completing a major in a modern language are encouraged to study abroad. The Department offers a faculty-led study abroad summer program in Spain. The Study Abroad Office (in Dooly Memorial Classroom, Building 1111, Memorial Drive, Suite 125) sponsors programs for Chinese, French, German, Italian, Japanese, Portuguese, and Spanish. It is also possible to fulfill some Arts and Sciences distribution requirements abroad. In order to take full advantage of these opportunities, students should visit Study Abroad early in their university careers, discuss course equivalencies

with the Study Abroad Advisor for their chosen languages (contact the Department office for names and office hours), and consult with their major advisors. Credit hours toward the major for courses taken abroad will be determined on an individual basis.

Of the 24 credit hours required for the major, a minimum of 12 graded credit hours must be earned in courses taught by MLL faculty (whether on campus or in faculty-led study-abroad programs). Since we encourage students to study abroad in UM-sponsored programs, up to 12 graded credit hours from these programs may be applied toward the major. As stated above, up to 6 transfer credit hours from other institutions may count toward the major. Whether these are credit hours transferred from another U.S. institution or from non-UM study abroad programs, transferred credit hours must be granted UM equivalency in order to be eligible to count toward the major. Please note, however, that the total number of combined UM study-abroad (exclusive of MLL faculty-led programs) and transfer credit hours shall not exceed 12 credit hours.

For example:

- A student may use 3 transfer credit hours with UM equivalency and 9 graded credit hours from a UM-sponsored study abroad program toward fulfillment of the major; the remaining 12 graded credit hours must be earned in courses taught by MLL faculty.
- A student may use 6 transfer credit hours with UM equivalency and 6 graded credit hours from a UM-sponsored study abroad program toward fulfillment of the major; the remaining 12 graded credit hours must be earned in courses taught by MLL faculty.
- A student may use 12 graded credit hours from a UM-administered study-abroad program not led by MLL faculty and 12 graded credit hours in courses taught by MLL faculty to fulfill the major.

Exceptions to this 12 credit hours rule may be made in cases where a student will participate in a UM-administered study-abroad program for a full academic year.

¹ Ideally through Faculty Led Study Abroad

² Also satisfies Writing Credit.

³ Or any other 300 level SPA course also satisfies Writing Credit.

⁴ Students can opt to take SPA 302 and SPA 442 in Santander, Spain during the summer.

Minor in Arabic Studies

Code	Title	Credit Hours
Select a minimum of three credit hours in a 200 level Arabic language course:		3
ARB 201	Intermediate Arabic I	
ARB 202	Intermediate Arabic II	
ARB 203 or ARB 207	Advanced Arabic Arabic for Heritage Learners	
ARB 204 or ARB 208	Arabic 204: Advanced Arabic II Arabic for Heritage Learners II	
Or the equivalent		
Select a minimum of three additional credit hours in any ARB course at the 200 level.		3
Select a minimum of three credit hours in one of the following: ¹		3
ARB 310	Topics in Arabic Literature and Culture in Translation	
ARB 312	Arab Cultures: A Cultural History of the Arab World	
ARB 315	Topics in Gender and Sexuality in Translation	
ARB 410	Language and Power in the Arab World	
Select a minimum of three credit hours, outside of ARB courses, in humanities or social science courses focused on the Middle East, North Africa, Islam, or the Arab world.		3

REL 271	Introduction to Islam	
ARH 260	Islamic Art	
INS 352	Panoramic View of the Middle East	
GEG 382	Political Geography of the Middle East	
POL 387	Politics of the Middle East	
Or another relevant course as approved by the program director		
Select a minimum of three additional credit hours from either an ARB course in the 200 level or above or any approved course focused on the Middle East, North Africa, Islam, or the Arab world		3
Total Credit Hours		15

- ¹ Arabic Studies courses are taught in English.
- * A minor in Arabic Studies consists of a minimum of 15 credit hours, passed with a "C" or higher.
- ** Up to 9 credit hours taken abroad in an Arabic-speaking country are eligible to fulfill the requirements for the minor. Up to 6 transfer credit hours from an accredited university or 4-year college in another region of the world are eligible to fulfill the requirements for the minor. In all cases, whether the credit hours are from a UM-affiliated study abroad program or transfer credit hours from any institution, the credit hours' UM equivalency, if any, will be determined by the UM Arabic Studies Program Director; ARB 310 must be taken within the Department of Modern Languages and Literatures at UM; and the student must fulfill the distribution of requirements and other criteria stipulated above.
- *** If a student has studied Modern Standard Arabic (fusha) in another setting (e.g., a high school foreign language program or schooling in an Arab country), she/he may request a proficiency evaluation from the Program Director. If the student's Modern Standard Arabic is equivalent to, or beyond, the Intermediate level, the student may be exempted from the requirement to earn 3 credit hours in a 200-level Arabic language course; however, the student will still be required to take at least 9 credit hours of ARB courses and a total of 15 credit hours, as stipulated above, to complete the minor.

MINOR IN FRENCH

Code	Title	Credit Hours
Minor in French		
FRE 202	Intermediate French II (or above) ¹	3
FRE 301	Introduction to French and Francophone Studies	3
At least 3 credit hours at 300 and/or 400 level ²		3
Minimum of 6 graded credit hours from UM faculty		
Maximum of 3 transfer credit hours ³		
Study abroad participation in UParis recommended		
Total Credit Hours		12

- * Students must earn a grade of C- or higher in every course counting toward the minor, and maintain a minimum overall average of 2.5 in the minor.
- ¹ Students who begin their minor in FRE 202 will do 6 credits at the 200-level. Students who begin their minor in FRE 203 will do 3 credits at the 200-level.
- ² Students who begin their French minor in FRE 301 will do 12 credits towards their minor at the 300-level. Students may count FRE 310 toward the minor no more than 1 time (3 credits).
- ³ 3 credit hours may be transferred from another institution or from a study-abroad program not administered by UM.

MINOR IN GERMAN

Code	Title	Credit Hours
Minor in German		
GER 202	Intermediate German II (or above)	3
At least 9 credit hours at 300 and/or 400 level		9
Minimum of 6 graded credit hours from UM faculty		
Maximum of 3 transfer credit hours		
Total Credit Hours		12

- * Students must earn a grade of C- or higher in every course counting toward the minor, and maintain a minimum overall average of 2.5 in the minor.
- * 3 credit hours may be transferred from another institution or from a study-abroad program not administered by UM.

MINOR IN ITALIAN

Code	Title	Credit Hours
Minor in Italian		
ITA 202	Intermediate Italian II (or above)	3
At least 9 credit hours at 300 and/or 400 level		9
Minimum of 6 graded credit hours from UM faculty		
Maximum of 3 transfer credit hours		
Total Credit Hours		12

- * Students must earn a grade of C- or higher in every course counting toward the minor, and maintain a minimum overall average of 2.5 in the minor.
- * 3 credit hours may be transferred from another institution or from a study-abroad program not administered by UM.
- * Only one course in English with a topic in Italian may count towards the minor.

Minor in Modern Languages

Code	Title	Credit Hours
First Language Any Level		12
Additional Language		6
Additional Language 300-level or above		6
Total Credit Hours		24

- * For example, ARB 101, ARB 102, ARB 201 and ARB 202 along with SPA 202, SPA 203, SPA 301 and SPA 322 would constitute a Minor in Modern Languages; so would FRE 202, FRE 203, FRE 301 and FRE 330 along with JPN 101, JPN 102, JPN 201 and JPN 202. Many other combinations are possible.
- ** This minor must include 6 graded credit hours per language from the University of Miami.
- *** Students must earn a grade of C- or higher in every course counting toward the minor, and maintain a minimum overall average of 2.5 in the minor.
- **** All courses toward the minor in Modern Languages must be taught in the two target languages.

MINOR IN PORTUGUESE

Code	Title	Credit Hours
Minor in Portuguese		
POR 202	Intermediate Portuguese II (or above)	3
At least 9 credit hours at 300 and/or 400 level		9
Minimum of 6 graded credit hours from UM faculty		
Maximum of 3 transfer credit hours		
Total Credit Hours		12

- * Students must earn a grade of C- or higher in every course counting toward the minor, and maintain a minimum overall average of 2.5 in the minor.
- * All courses towards the minor in Portuguese must be taught in the target language.
- * 3 credit hours may be transferred from another institution or from a study-abroad program not administered by UM.

MINOR IN SPANISH

Code	Title	Credit Hours
SPA 203	Advanced Spanish (or above)	3
At least 9 credit hours of SPA at 300 and/or 400 level		9
Minimum of 6 graded credit hours from UM faculty		
Maximum of 3 transfer credit hours		
Total Credit Hours		12

- * Students must earn a grade of C- or higher in every course counting toward the minor, and maintain a minimum overall average of 2.5 in the minor.
- * All courses towards the minor in Spanish must be taught in the target language.
- * 3 credit hours may be transferred from another institution or from a study-abroad program not administered by UM.

Neuroscience

<https://www.as.miami.edu/neuroscience/>

Dept. Code (NEUR)

Introduction

Neuroscience is the study of the nervous system (i.e., the brain, spinal cord, and peripheral nerves), the mechanisms of behavior, and the nature of mind and consciousness. The Neuroscience Program is a rigorous, interdisciplinary program between the Department of Psychology (<http://www.psy.miami.edu>), the Department of Biology, and the Miller School of Medicine. The neuroscience major provides a broad-based liberal arts background that can be applied to a variety of career fields. It is also excellent preparation for medical school or graduate study in neuroscience, psychology, biology or behavioral medicine.

Educational Objectives

The neuroscience major seeks to provide students with exposure to and a fundamental understanding of the neural and bio behavioral sciences by delivering an integrative educational experience and promoting interactions among faculty, graduate students, and undergraduate students in basic scientific inquiry, advising, and mentoring.

Degree Programs

All neuroscience majors are required to pursue a Bachelor of Science (B.S.) degree.

Departmental Honors

Students can earn Departmental Honors in Neuroscience by demonstrating excellence in their coursework and completing a Senior Honors Thesis in Neuroscience.

1. **Excellence in Coursework** – A minimum 3.3 combined GPA and a minimum 3.5 neuroscience GPA is required.
2. **Senior Honors Thesis in Neuroscience** – This is an independent empirical research project that is completed across two semesters (i.e., NEU 580 and NEU 581) under the supervision of a faculty mentor in the Neuroscience Program. At least one year of prior research experience with the faculty mentor is highly recommended. Written approval from the faculty mentor and the Director of Undergraduate Academic Services in the Department of Psychology is also required.

Additional Information

The office of Undergraduate Academic Services for Psychology (UASP) provides comprehensive advising services to all students on a walk-in basis from 9:00 a.m. to 4:30 p.m., Monday through Friday, in Flipse 508. Appointments are only necessary during the official advising period for registration.

Freshmen and Transfer Students

All freshmen psychology majors in the College of Arts and Sciences are required to participate in the Department of Psychology's year-long orientation, advising, and mentoring program, FACT FORUM (Freshmen Advising Contact Term and Faculty Overview of Research and Undergraduate Mentoring).

These courses are one credit hour general electives designed to enable students to take ownership of their education by familiarizing them with the academic rules and regulations of the University of Miami, helping them think critically about their curriculum, providing them with in-depth exposure to research, and preparing them to enter the professional world.

New transfer students are highly encouraged to participate in a similar one semester program called TUMS (Transfer to the University of Miami). This course is specifically designed to ease the transition for new transfer students to the University of Miami.

Students who declare a psychology major after matriculation may be required to take part in an advising seminar prior to declaring the psychology major.

Prerequisites

Students must adhere to all prerequisites. They are also required to earn a minimum grade of C- in any PSY course that is to serve as a prerequisite for another course in the psychology major. Students who enroll in PSY courses without the specified prerequisites may be dropped.

Advanced Writing and Communication Requirement

To satisfy the College of Arts and Sciences Advanced Writing and Communication requirement, psychology majors must take 4 writing-designated courses, including 1 writing-designated course in the PSY area. Writing courses are already built into the required courses of the B.S. track of the psychology major; however, students who follow the B.A. track of the psychology major will need to plan accordingly to incorporate a writing-designated PSY course into their graduation plans.

Research Experience for Course Credit

Research experience is considered an integral part of the psychology major. Students may earn course credit (i.e., PSY 280, PSY 380, and/or PSY 480) by working in the laboratory of a Department of Psychology faculty mentor. Students can repeat PSY 280, PSY 380, and PSY 480 without penalty. A minimum 2.8 combined and psychology GPA is required to earn research credit. Written permission from a faculty mentor and UASP is also required.

Note: Students may volunteer in a research laboratory by completing the appropriate volunteer paperwork with UASP if they are unable to register for research credit.

Research Participation in PSY 110

As an introduction to behavioral science, all students enrolled in PSY 110 may be required to participate as subjects in research studies conducted by faculty and/or graduate students, or by reading selected research reports and writing article critiques. Refer to the course syllabus for more details.

Note: This introductory research participation requirement is not sufficient for students interested in attending graduate school in psychology.

Senior Assessment

As part of the Department of Psychology's accreditation plan, all senior psychology majors will be required to take part in a senior assessment that may last up to four hours. Assessment scores will not affect the students' graduation status; however, failure to complete the assessment may delay or prevent graduation.

Transfer Courses

Courses from other colleges or universities may be assigned PSY credit at UM with written approval by UASP.

Cognates

Neuroscience majors may not use a cognate with a Responsible Academic Unit (RAU) of Psychology to fulfill their People and Society (P & S) area of knowledge.

Major in Neuroscience

- B.S. in Neuroscience (p. 283)

B.S. in Neuroscience

<http://neuroscience.med.miami.edu/undergraduate-program>

Overview

- Students must earn a minimum grade of C- in any course that is to count toward the neuroscience major.
- Students may repeat no more than two courses for the neuroscience major in which they received a D or an F.
- New freshmen and current students must have a minimum 1360 SAT, 30 ACT, or 3.5 combined, UM, and neuroscience GPA after 24 completed credit hours at UM to declare the neuroscience major. Note: At least 7 of these 24 credit hours must be in the BIL, CHM, or MTH courses required of the major and/or the degree.
- New transfer students must have a minimum 3.8 combined GPA to declare the neuroscience major, and at least 7 completed credit hours in the required BIL or CHM courses.
- Students are strongly advised not to continue with the neuroscience major if they have less than a 2.8 neuroscience GPA after 15 completed credit hours in the neuroscience major.
- Students must earn a minimum 2.6 neuroscience GPA and a minimum of 130 credits to graduate with the neuroscience major.

Notes

- There are limited seats in the neuroscience major so students may be required to join a waitlist before they are able to declare.
- Neuroscience majors are required to complete 130 total credit hours to complete their B.S. degree.
- The neuroscience major can only be declared as a first major for students who are enrolled in the College of Arts and Sciences.
- AP Credit for Statistics (i.e., PSY 292) cannot count toward the neuroscience major.
- Students who declare the neuroscience major after they transfer credit for PSY 292 or complete PSY 292 at UM can use PSY 292 as a substitute for PSY 291.

Curriculum Requirements

Code	Title	Credit Hours
Core Courses		
BIL 150	General Biology	4
BIL 160	Evolution and Biodiversity	4
Select one of the following:		1
BIL 151	General Biology Laboratory	
BIL 152	HHMI General Biology Laboratory.	
Select one of the following:		1
BIL 161	Evolution and Biodiversity Laboratory	
BIL 162	HHMI Evolution and Biodiversity Laboratory.	
BIL 250	Genetics	3
BIL 255	Cellular and Molecular Biology	3
BIL 268	Neurobiology	3
NEU 342	Neural Mechanisms of Disease	3
NEU 403	Neuroscience laboratory	4
Select one of the following:		3
NEU 400	Neurogenetics	
NEU 440	Neural Mechanisms of Psychiatric Disorders	
NEU 465	Cellular and Molecular Neuroscience	
NEU 468	Developmental Neuroscience.	
PSY 110	Introduction to Psychology	3
PSY 290	Introduction to Research Methods	3
PSY 291	Introduction to Biobehavioral Statistics	3
PSY 390	Intermediate Research Methods and Biobehavioral Statistics	3
PSY 425	Psychobiology	3
Select one additional BIL elective of the following: ¹		3
BIL 330	Ecology	
BIL 360	Comparative Physiology	
BIL 365	Endocrinology	
BIL 441	Animal Behavior

Philosophy

<http://www.as.miami.edu/phi>

Dept. Code: PHI

Introduction

The Philosophy Department offers a wide range of courses at the undergraduate level which cover every major area of philosophy as well as its history. Students can major or minor in the subject. In addition, the department sponsors two undergraduate philosophy organizations:

- the Philosophy Club, which is open to all UM undergraduates, and
- Phi Sigma Tau, a chapter of the National Honor Society in Philosophy.

Both groups afford students regular opportunities to meet, eat, and talk philosophy with each other and with graduate students and faculty in the department. All undergraduates who are interested in philosophy are welcome to participate in these philosophical events.

Educational Objectives

Philosophy is the study of the most basic moral, scientific, legal, aesthetic, religious, and metaphysical concepts and theories by which we understand ourselves and our universe. It is a reasoned pursuit of fundamental truths, a quest for understanding, a study of principles of conduct. It analyzes the basic assumptions and concepts of other disciplines and the norms that govern interpersonal relations and the acquisition of knowledge. It seeks to establish standards of evidence, to provide rational methods of resolving conflicts, and to create techniques for evaluating ideas and arguments. Philosophers are dedicated to developing the following abilities: reasoning clearly, distinguishing between good and bad arguments, thinking through complicated questions, and using reason in situations that are often governed by emotions. Studies have shown that philosophy majors do extremely well on standardized tests, and in careers that require analytical abilities such as the practice of law and software development. But irrespective of career choice, philosophy deepens one's sense of the meaning and varieties of human experience, and enhances self-knowledge, foresight, and sense of direction in life.

Degree Programs

The major in Philosophy leads to the degree of Bachelor of Arts. To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in philosophy should take at least two (2) (properly approved writing and communication) philosophy courses.

Pre-Law Major and Minor Tracks

The Department offers major and minor tracks for students wishing to enhance their Pre-Law studies with relevant Philosophy coursework.

Pre-Med Major and Minor Tracks

The Department also offers major and minor tracks for students wishing to supplement their Pre-Med work with relevant Philosophy coursework.

Departmental Honors

A program of work toward graduation with Honors in Philosophy is available for qualified students. Interested students should consult the Departmental Director of Undergraduate Studies during their sophomore or junior years. Further information may be found under the section entitled HONORS PROGRAM.

Advance Writing and Communication Requirement

Philosophy degree candidates in the College of Arts and Sciences who matriculate under Bulletin 2015/2016 and forward must complete at least four writing courses, and at least one such course must have a course code starting with PHI.

Transfer students may use a maximum of two transfer courses towards the requirement. The following links to a table listing the courses that have approval as writing courses:

<http://www.as.miami.edu/academics/undergraduate-studies/writing-courses/>

These courses, and only these courses, can be used to fulfill the Writing & Communication proficiency requirement. This table will be updated regularly with further courses, as they are approved.

For requirements leading to the Master of Arts and Ph.D. degree (p. 976), see the Bulletin of the Graduate School.

Major in Philosophy

- B.A. in Philosophy (p. 288)
- Philosophy Major- Pre-Law Track (p. 290)
- Philosophy Major - Pre-Med Track (p. 292)

Minor in Philosophy

- Minor in (p. 294)Philosophy (p. 294)
- Philosophy Minor - Pre-Law Track (p. 294)
- Philosophy Minor - Pre-Med Track (p. 295)

B.A. in Philosophy

Physical Sciences

Dept. Code: PSC

Introduction

PSC 101 is an interdisciplinary physical science course designed primarily for the non-science major. It may be used to satisfy a physical science requirement in some degree programs. Students should consult the degree requirements listed elsewhere in the Bulletin as well as their advisors for the appropriateness of this course for their programs. See also under PHY 110.

Physics

<http://www.physics.miami.edu>

Dept. Code: PHY

Introduction

The requirements for a major or minor in the Department of Physics are flexible and may be adapted to the needs of the individual student.

A grade of C- or better is required in all courses counted toward the major or minor with an overall GPA of 2.0. Any lecture course in the Physics department may be passed by means of a proficiency examination.

Note that more mathematics beyond two semesters of calculus is typically required for most of the physics courses at the 300 level or higher. In order to complete any Physics major sequence in four years, the student should begin elementary calculus as soon as possible. Students are encouraged to discuss an appropriate math sequence with the physics advisor. The minimum math requirement for physics major typically is as follow:

Code	Title	Credit Hours
MTH 151 or MTH 161 or MTH 171	Calculus I for Engineers Calculus I Calculus I	4-5
MTH 162 or MTH 172	Calculus II Calculus II	4
MTH 210 or PHY 315	Introduction to Linear Algebra Mathematical Tools for Physics	3
MTH 211 or MTH 310 or PHY 315	Calculus III Multivariable Calculus Mathematical Tools for Physics	3
MTH 311	Introduction to Ordinary Differential Equations	3

or PHY 315	Mathematical Tools for Physics	
Total Credit Hours		17-18

Requirements for the Master of Science and Doctor of Philosophy (p. 978) degrees will be found in the Bulletin of the Graduate School.

Majors in Physics

- B.S. in Pure Physics (p. 311)
- B.S. in Applied Physics (p. 296)
- B.S. Dual Major in Chemistry and Physics (p. 304)
- B.S. Dual Major in Engineering and Physics (p. 307)
- B.S. Dual Major in Marine Science and Physics (p. 308)

Minor in Physics

- Physics (p. 313)

B.S. in Applied Physics

<http://www.physics.miami.edu>

This sequence is available for those intending careers in applied physics. The major is divided into tracks, depending on the student's field of interest. The Physics for the Life Sciences track is designed for premedical students.

Students must complete the core set of courses AND one track in their field of interest. Multiple tracks are allowed with prior authorization from the Department of Physics.

To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in Applied Physics should pass at least one writing intensive course within the Physics Department. These are PHY 306, PHY 362, and PHY 506. The requirement can also be fulfilled by passing ENG 233 with a grade of C- or higher.

Core Courses

The core set of courses is required for all tracks and it includes one of the University Physics sequences with two labs (see table below), plus PHY 350, and PHY 360.

Engineering Physics Track

Additional 5 credits in physics at the 300 level or higher, including PHY 340 and one lab, plus 9 credits in Engineering with prior authorization from the Department of Physics.

Computational Physics Track

Additional 5 credits in physics at the 300 level or higher, including PHY 340 and one lab, plus 2 courses from the Computer Science BS core (p. 178) and a third course in Computer Science with prior authorization from the Department of Physics.

Medical Physics Track

Additional 5 credits in physics at the 300 level or higher, including PHY 351 and one lab, plus BME 265, BME 310, and BME 330 (Note: BIL 150, BIL 151, CHM 111, and CHM 112 are prerequisites for the BME courses).

Physics for the Life Sciences Track

Additional 6 credits in physics at the 300 level or higher, including PHY 321, plus required biology and chemistry courses. In biology, the required courses are BIL 150, BIL 151, BIL 160, BIL 161, BIL 255, and either BIL 360 or BME 265. In chemistry, the students are required to take one year of inorganic chemistry (CHM 111-CHM 112) with laboratory (CHM 113-CHM 114) and one semester of organic chemistry with laboratory (CHM 201/CHM 205) OR the three-semester sequence of Chemistry for the Life Sciences (CHM 121, CHM 221, CHM 222) with laboratory (CHM 113, CHM 114, CHM 205).

Chemical Physics Track

Additional 6 credits in physics at the 300 level or higher, including PHY 321, plus CHM 360, CHM 364, CHM 365, CHM 464, and one among CHM 530, CHM 553, or CHM 575.

B.S. Dual Major in Chemistry and Physics

The dual major in Chemistry and Physics is designed for students who are pursuing a regular B.S. degree in Chemistry (p.) and want to pursue a second major in Physics.

In addition to the major in Chemistry (p. 158), the dual major requires 22 credit hours in physics and specific courses in Chemistry. The physics courses must include one of the University Physics sequences with two labs, plus PHY 350 and PHY 360. The remaining courses must receive advanced permission from the physics advisor. The specific Chemistry courses include CHM 360, CHM 364, CHM 365, CHM 464, and one among CHM 530, CHM 553, or CHM 575.

Students pursuing this dual major will have to satisfy the College of Arts and Sciences writing requirement for the Chemistry major.

B.S. Dual Major in Engineering and Physics

Students in the College of Engineering (p. 592) can pursue a dual major in Engineering and Physics, which consists of a regular major in Engineering, plus selected courses in physics. The physics courses required are the complete University Physics sequence for Engineers, plus 11 additional credits in physics at the 300 level or higher, including PHY 350, PHY 360, and one between PHY 321, PHY 340, and PHY 560.

Students pursuing this dual major will take courses designed to provide them with the skills required for effective communication, both written and oral, within their discipline in the College of Engineering.

Curriculum Requirements

Code	Title	Credit Hours
Engineering Major		128
Physics Courses Included in the Engineering Major		
Option 1:		
PHY 205	University Physics I	
PHY 206	University Physics II	
PHY 207	University Physics III	
PHY 208	University Physics II Lab	
PHY 209	University Physics III Lab	
Option 2:		
PHY 205	University Physics I	
PHY 210	Honors University Physics II-III	
PHY 208	University Physics II Lab	
PHY 209	University Physics III Lab	
Additional Physics Requirements		
PHY 350	Intermediate Electricity and Magnetism	3
PHY 360	Introduction to Modern Physics	3
PHY 340	Classical Mechanics I	3
or PHY 321	Thermodynamics and Kinetic Theory	
or PHY 560	Quantum Mechanics and Modern Physics I	
One physics course at the 300 level or higher		2-3
Total Credit Hours		139-140

Sample Plan of Study

This plan of study includes only the Physics portion of the Dual major. Please refer to the corresponding Engineering major (p. 592) for the Engineering portion (including general education requirements).

 - 1 Course (3 credits) at the 300+ level

B.S. in Pure Physics

The pure physics major is recommended for students intending to enter graduate school in Physics, or that want a deeper understanding of fundamental physics.

It consists of one of the University Physics sequences with two labs, plus PHY 306 (lab), PHY 321, PHY 340, PHY 350, PHY 351, PHY 360, PHY 362, PHY 506 (lab), PHY 540, and PHY 560.

Students interested in a Ph.D. program in physics are strongly encouraged to also take PHY 561.

To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in Pure Physics are required to pass at least one writing intensive course within the Physics Department. These are PHY 306, PHY 362, and PHY 506. The requirement can also be fulfilled by passing ENG 233 with a grade of C- or higher.

Curriculum Requirements

Political Science

<http://www.as.miami.edu/politicalscience>

Dept. Code: POL

Introduction

A political science major prepares students for work in a number of fields including law, politics, public policy, public administration, and international affairs, as well as employment in business and the non-profit sector.

Educational Objectives

Political science majors gain an understanding of American political and legal life, the workings of other countries' political and economic systems, the relations among countries in the international arena, and key concepts in both political philosophy and social science methodology.

Advanced Writing & Communication Requirements

Details of the Advanced Writing and Communication Proficiency:

Degree candidates must complete at least four writing courses, and at least one writing course must be in one of the student's major disciplines (not applicable to BLA students who do not select a major). Students should consult the bulletin section of their major to find out which writing-intensive courses are acceptable to the discipline.

Individual writing course offerings may make the writing component independent of the rest of the course. As such the writing component might be optional, the writing component might not contribute to the overall grade, and writing credit might be awarded even if the overall grade is a fail.

Transfer students may use a maximum of two courses towards the writing requirement.

Degree Programs

- Bachelor of Arts in Political Science
- Five year program: Bachelor of Arts in Political Science and Masters of Public Administration (A special curriculum for students specializing in public administration enables them to complete the requirements for both a Bachelor's and Master's degree in five years.)

Departmental Honors

To earn Departmental Honors a political science major must:

1. Graduate with an overall GPA of 3.500.
2. Graduate with a political science GPA of at least 3.700. All political science course grades on a student's transcript are counted in the calculation of the major GPA. This includes all grades from courses that were completed more than once (e.g. to obtain a high enough grade to count towards the major).

Major in Political Science

- B.A. in Political Science (p. 314)
- B.A. in Public Administration (p. 321)

Minors

- Political Science (p. 322)
- Public Administration (p. 323)

B.A. in Political Science

- ¹ **Students who complete INS 101 with a grade of C- or better will be given credit for POL 203.**
- ² This includes any 500-level seminar offered by the Department of Political Science or cross-listed with Political Science. The following 500 level courses are **not** seminars and do **not** fulfill this requirement: POL 520, POL 521, POL 563, POL 564, POL 589, POL 590.
- ³ Please note that some courses cover more than one sub-field. Students may not, however, use a single class to fulfill multiple sub-field requirements.
- ⁴ Please note that for the Natural Science Area of Knowledge Requirement degree candidates must earn at least 3 credit hours in the Natural Sciences. Departments offering these courses include Anthropology (only APY 203), Biology, Chemistry, Ecosystem Science and Policy (only ECS 111, ECS 112, ECS 202), Geography (only GEG 120), Geological Sciences, Marine Sciences (except MSC 313, MSC 314), Physical Sciences, and Physics. These credit hours may double count with any other requirement.
- * All majors must complete a quiz for graduating seniors (to be used for assessment purposes) during their last semester of coursework.
- ** To satisfy the Advanced Writing & Communication proficiency requirement, students majoring in political science must complete at least one of the four required writing-intensive courses in the Department of Political Science.
- *** A student may only share (i.e., "double count") maximally 6 credits between majors and minors offered by the Department of Political Science.
- **** To count toward the major, each course must be completed with a grade of C- or above, with an overall GPA of 2.0 or above.

Suggested Plan of Study

Place Holder for Economics for Politics and Public Administration		
Place Holder for Applied Policy Analysis		
Total Credit Hours		15

¹ A minimum grade of C- or better and a 2.0 gpa are required for all courses within the department.

² A minimum of 9 credits must be earned in residence, thus a maximum of 6 credits can be transferred in.

³ One of the two elective courses must be a 500 level course

Psychology

<http://www.psy.miami.edu>

Dept. Code: PSY

Introduction

Psychology is the study of how individuals think, behave, feel, and relate to others. Because of its broad and fundamental nature, the psychology major prepares students for graduate study and/or careers in a wide range of people-oriented professions (e.g., psychology, medicine, law, business, communication, etc.). Psychology majors learn about human behavior and gain the analytical and critical thinking skills that are highly-valued in the workforce.

Educational Objectives

The Department of Psychology seeks to provide students with exposure to and a fundamental understanding of psychological science by delivering an integrative educational experience and promoting interactions among faculty, graduate students, and undergraduate students in basic and applied psychological inquiry, advising, mentoring, and community outreach.

Degree Programs

The Department of Psychology offers a Bachelor of Arts (B.A.) and a Bachelor of Science (B.S.) degree.

Departmental Honors

Students can earn Departmental Honors in Psychology by demonstrating excellence in their course work and completing a Senior Honors Thesis in Psychology.

1. **Excellence in Coursework** – A minimum 3.3 combined GPA and a minimum 3.5 psychology GPA is required.
2. **Senior Honors Thesis in Psychology** – This is an independent empirical research project that is completed across two semesters (i.e., PSY 580 and PSY 581) under the supervision of a faculty mentor in the Department of Psychology. At least one year of prior research experience with the faculty mentor is highly recommended. Written approval from the faculty mentor and the Director of Undergraduate Academic Services is also required.

Additional Information

The office of Undergraduate Academic Services for Psychology (UASP) provides comprehensive advising services to all students on a walk-in basis from 9:00 a.m. to 4:30 p.m., Monday through Friday, in Flipse 508. Appointments are only necessary during the official advising period for registration.

Freshmen and Transfer Students

All freshmen psychology majors in the College of Arts and Sciences are required to participate in the Department of Psychology's year-long orientation, advising, and mentoring program, FACT FORUM (Freshmen Advising Contact Term and Faculty Overview of Research and Undergraduate Mentoring).

These courses are one credit hour general electives designed to enable students to take ownership of their education by familiarizing them with the academic rules and regulations of the University of Miami, helping them think critically about their curriculum, providing them with in-depth exposure to research, and preparing them to enter the professional world.

New transfer students are highly encouraged to participate in a similar one semester program called TUMS (Transfer to the University of Miami). This course is specifically designed to ease the transition for new transfer students to the University of Miami.

Students who declare a psychology major after matriculation may be required to take part in an advising seminar prior to declaring the psychology major.

Prerequisites

Students must adhere to all prerequisites. They are also required to earn a minimum grade of C- in any PSY course that is to serve as a prerequisite for another course in the psychology major. Students who enroll in PSY courses without the specified prerequisites may be dropped.

Advanced Writing and Communication Requirement

To satisfy the College of Arts and Sciences Advanced Writing and Communication requirement, psychology majors must take 4 writing-designated courses, including 1 writing-designated course in the PSY area. Writing courses are already built into the required courses of the B.S. track of the psychology major; however, students who follow the B.A. track of the psychology major will need to plan accordingly to incorporate a writing-designated PSY course into their graduation plans.

Research Experience for Course Credit

Research experience is considered an integral part of the psychology major. Students may earn course credit (i.e., PSY 280, PSY 380, and/or PSY 480) by working in the laboratory of a Department of Psychology faculty mentor. Students can repeat PSY 280, PSY 380, and PSY 480 without penalty. A minimum 2.8 combined and psychology GPA is required to earn research credit. Written permission from a faculty mentor and UASP is also required.

Note: Students may volunteer in a research laboratory by completing the appropriate volunteer paperwork with UASP if they are unable to register for research credit.

Research Participation in PSY 110

As an introduction to behavioral science, all students enrolled in PSY 110 may be required to participate as subjects in research studies conducted by faculty and/or graduate students, or by reading selected research reports and writing article critiques. Refer to the course syllabus for more details.

Note: This introductory research participation requirement is not sufficient for students interested in attending graduate school in psychology.

Senior Assessment

As part of the Department of Psychology's accreditation plan, all senior psychology majors will be required to take part in a senior assessment that may last up to four hours. Assessment scores will not affect the students' graduation status; however, failure to complete the assessment may delay or prevent graduation.

Transfer Courses

Courses from other colleges or universities may be assigned PSY credit at UM with written approval by UASP.

Cognates

Neuroscience majors may not use a cognate with a Responsible Academic Unit (RAU) of Psychology to fulfill their People and Society (P & S) area of knowledge.

Major in Psychology

- B.A. or B.S. in Psychology (p. 325)

Minor in Psychology

- Psychology (p. 329)

B.A. or B.S. in Psychology

The major in psychology requires 33 credit hours in PSY courses. AP Credit for Statistics (i.e., PSY 292) cannot count toward the psychology major. Students who declare the psychology major after they transfer credit for PSY 292 or complete PSY 292 can use PSY 292 as a substitute for PSY 291.

Only 6 credit hours of the following may count toward the psychology major:

Code	Title	Credit Hours
PSY 280	Introduction to Research Projects I	1-3
PSY 380	Introduction to Research Projects II	1-3
PSY 480	Research with Writing Credit	1-3
PSY 581	Senior Honors in Psychology II	3

The following courses do not count toward the psychology major:

Code	Title	Credit Hours
PSY 106	Freshman Advising Contact Term (Fact)	1
PSY 190	Faculty Overview of Research and Undergraduate Mentoring (FORUM)	1
PSY 206	Transfer to the University of Miami (TUMS)	1
PSY 305	Introduction to Research and Graduate School	1
PSY 580	Senior Honors in Psychology I	3

All psychology majors who pursue a B.A. degree in the College of Arts and Sciences must complete a minor from the list of acceptable minors published by the College.

All psychology majors who pursue a B.S. degree in the College of Arts and Sciences must complete a minor in Biochemistry, Biology, Chemistry, Computer Science, Engineering, Geological Sciences, Marine Science, Mathematics, Microbiology and Immunology, or Physics.

Curriculum Requirements - BA

¹ Note: At least 3 of these credit hours must be in a 400 level PSY writing course.

Other Requirements

- Students must earn a minimum grade of C- in a PSY course to count it toward the psychology major.
- Students must have a minimum 2.8 combined, UM, and psychology GPA to declare the psychology major.
- Students are strongly advised not to continue with the psychology major if they have less than a 2.5 psychology GPA after 15 completed credit hours in psychology.
- Students must earn a minimum 2.3 psychology GPA and a minimum of 120 credit hours to graduate with the psychology major.
- Students must complete at least half of their psychology major in residence, including all 300, 400, and 500 level PSY courses.
- Only 6 PSY credit hours at the 300, 400, and 500 level may be taken through a UM Study Abroad Program with prior written approval.
- Students completing a B.S. in Psychology must complete a minor in one of the following programs: Biochemistry, Biology, Chemistry, Computer Science, Engineering, Geological Sciences, Marine Sciences, Mathematics, Microbiology & Immunology, or Physics. Students who complete a second major in one of the mentioned fields are not required to complete a minor.

* Students must earn a minimum grade of C- in a PSY course to count it toward the minor.

** Students must earn a minimum 2.0 psychology GPA to graduate with the minor.

*** Students must complete at least 9 of the 15 minor credit hours in residence, and only 3 of these credit hours may be taken through a UM Study Abroad Program with prior written approval.

Religious Studies

<http://www.as.miami.edu/religion>

Dept. Code: REL

Introduction

Religion is one fundamental way humans order and discern meaning and frame identity, both collective and individual. In the study of religion, students learn what religion is; how religion both shapes and reflects culture, society, politics, and individual experience; and the multiple ways religion matters and has mattered locally and globally, from antiquity to the present. Through the examination of varied disciplinary approaches and exposure to concrete diverse cultural expressions of religion, the department fosters students' broad and deep apprehension of religion's place(s) in human experience. The department's educational work aims to strengthen students' capacities to read carefully, question critically, communicate knowledge effectively, and apply their learning in civic engagement.

The University regards the academic study of religion as an integral part of liberal, humane learning and seeks to assist students in understanding the role religion plays in human existence and culture. Instruction in the Department of Religious Studies is non-sectarian and seeks an open analysis of all points of view. Courses are designed to provide a general orientation to the academic study of religion for the undergraduate student, as well as more advanced exposure for those who wish to pursue professional careers where a study of religious ideas and institutions would be helpful, such as in psychology, sociology, history, journalism, teaching, law, medicine, the fine arts, religious education, the ministry, and the rabbinate.

The Department sponsors a wide variety of speakers and events each year, including a Religious Studies Colloquium series and a Forum on Religion and Public Life. The Forum has enriched the existing curriculum by bringing to the campus outstanding scholars and public intellectuals.

Educational Objectives

The general educational objectives of the Department are

1. to explore texts, histories, and ways in which humans from various cultures have understood their world including the beliefs, ethics, rituals, artifacts, and organizations of religions;
2. to understand the changing relationship between religion and elements of the wider culture including the dynamics of politics, art, economics, literature, and society and their relationship to religions;
3. to become familiar with the theories and methods used in the study of religion.

Degree Programs

The Department offers two tracks by which students may earn a major or a minor. The first track is Religious Studies, which is designed for students who are seeking a broad and comprehensive understanding of the world's major religions and the cultures in which they are practiced. The second track is Religion and Health Care, which is designed for students who are interested in any aspect of health care or who wish to supplement their pre-med concentration with coursework in the field of Religious Studies.

Departmental Honors

The Department of Religious Studies encourages its majors and minors to intensify and deepen their knowledge of religious texts, traditions, and issues through its Departmental Honors Program. The program is designed to give our students the opportunity to explore various topics and problems in religion that are of particular interest to them, to work more closely with faculty in the department, to develop skills in research and thesis preparation, and in some cases to prepare for graduate work in religious studies or other disciplines.

Minimum requirements for the program are as follows:

1. A cumulative grade point average of at least 3.30;
2. A cumulative grade point average in religious studies of at least 3.50; and
3. A thesis that is approved by departmental faculty.

For the determination of honors, cumulative grade point average means either the average of all grades earned at the University of Miami or the combined average of all graded work taken at the University of Miami and elsewhere (whether or not the transfer work is accepted toward a degree at the University of Miami), whichever is lower.

Theta Alpha Kappa

Majors, minors, and other students who meet certain academic criteria are eligible for membership in Theta Alpha Kappa, the National Honor Society for Religious Studies and Theology. Theta Alpha Kappa sponsors events that enhance the academic and social life of the department.

URome

In keeping with its emphasis on a global approach to the study of religion and society, the Department sponsors a study abroad program known as URome. This semester-on-location program, which is open to all qualified University of Miami undergraduate students, is offered each spring semester in collaboration with the American University of Rome. A limited amount of scholarship support for the URome program is available for qualified Religious Studies majors and minors.

- *** Transfer students who minor in Religious Studies must complete at least 6 credits in department offered courses numbered 300 or above in residence at the Coral Gables campus.

Sociology

<http://www.as.miami.edu/sociology>

Dept. Code: SOC

Overview

The Major in Sociology provides scientific training for understanding the organization and fluid nature of contemporary society, patterns of social change, and the mutual influence between macro structures and processes (society and culture) on one hand, and the micro level (individuals and groups) on the other. Increasingly, sociologists are also focused on understanding the processes of globalization that are currently transforming contemporary societies.

Courses for both majors are designated SOC; see course list below. For information on Criminology please see the Criminology (p. 187) section of the Bulletin.

Educational Objectives

The undergraduate program in Sociology has as its main objective to provide students with:

1. A strong component of a social science education, training in analytical and statistical skills that are highly valued by potential employers;
2. A valuable undergraduate preparation for pursuing careers in such fields as environmental studies, public health, law, journalism, politics, public relations, business or public administration and in other fields that involve investigative or analytical skills or working with diverse groups;
3. An excellent and comprehensive training program for students wishing to pursue graduate work in programs leading to academic positions, research expertise, or work in the field of applied sociology.

Degree Programs

Students may earn a Bachelor of Arts degree in Sociology. The Department of Sociology also offers graduate programs leading to a PhD. degree in the areas of:

- Criminology
- Medical Sociology
- Race, Ethnic Relations, and Immigration

Departmental Honors

Graduation with Departmental Honors is available to eligible students who fulfill the following:

1. Students desiring Departmental Honors in Sociology or Criminology must maintain an overall GPA of 3.3 and a GPA of 3.5 in Sociology or Criminology. They must also achieve a minimum of B in all Sociology/Criminology courses. For transfer students, the Department uses the cumulative, combined GPA calculated by the Office of the Registrar.

2. A student seeking Departmental Honors is required to write an independent research paper which is submitted to the Undergraduate Committee. The nature of the independent research project is determined by the faculty member(s) with whom the student works. This project is done in SOC 498 & SOC 499. The student should have the same professor(s) for all six credit hours.
3. Recruitment of eligible students is by department invitation during a student's junior year.

Advanced Writing and Communication Requirement

To satisfy the College of Arts and Sciences Advanced Writing and Communication requirement, all Sociology majors must take 4 writing-designated courses, including 1 writing-designated course in the SOC area. Writing courses are regularly offered within the department; however, it is the student's responsibility to plan accordingly to incorporate a designated SOC writing-designated course into their graduation plans.

Alpha Kappa Delta

Majors, minors, and other students who meet certain academic criteria are eligible for membership in Alpha Kappa Delta, the International Sociology Honor Society. Alpha Kappa Delta sponsors events that enhance the academic and social life of the department.

Major in Sociology

- B.A. in Sociology (p. 337)
- Sociology & Criminology Double Major; Combined Minor (p. 339)

Minor in Sociology

- Sociology (p. 340)
- Sociology & Criminology Double Major; Combined Minor (p. 339)

- ** A minimum cumulative GPA of 2.0 in all courses offered by the Department.
- *** A minimum of 9 credit hours must be earned in residency in the Department; thus, only a maximum of 6 credit hours can be transferred from other institutions as eligible credit hours for the sociology minor.

Theatre Arts

<http://www.as.miami.edu/theatrearts>

Dept. Code: **THA**

Introduction

The University of Miami Department of Theatre Arts offers two distinct undergraduate degrees:

- a liberal arts program leading to a Bachelor of Arts degree in Theatre Arts and
- a pre-professional conservatory-based theatre training program leading to a Bachelor of Fine Arts degree in either
 - Acting,
 - Musical Theatre,
 - Stage Management,
 - Theatre Management, or
 - Design/Production.

The Department produces a season of plays and musicals at the Jerry Herman Ring Theatre as well as smaller-scale works in the Studio Theatre located in Hecht Residential College.

Educational Objectives

BA degree students are empowered to engage with and explore their world using the tools of theatre and performance. As an interdisciplinary degree program pursued in conjunction with a second major or as a minor, the BA program fosters a sound knowledge of theatre practice along with a deep

understanding of its history and diversity of applications. By emphasizing creative and critical approaches to both the study and practice of the theatre arts, the BA program aspires to produce skilled artists, educators, and leaders in the field of theatre and beyond.

The objective of the BFA programming is to prepare gifted creative artists with the experience, training and craft necessary for entry into the world of professional theatre, television and film. Intensive training is complemented by a liberal arts curriculum and access to the vibrant international community of South Florida.

Degree Programs

- THE BACHELOR OF FINE ARTS DEGREE
- THE BACHELOR OF ARTS DEGREE

The Bachelor of Fine Arts Degree in Theatre Arts

In addition to meeting the requirements for admission to the University of Miami, students seeking admission to the Department of Theatre Arts BFA program must:

1. Submit the Supplemental Application to the Department of Theatre Arts. This application may be found here <http://www.as.miami.edu/theatrearts/prospective/supplemental-application/>, as well as on the "Undergraduate Admissions" page on the University website;
2. Schedule an audition or portfolio review. These auditions and reviews are held on the University of Miami campus as well as in major cities throughout the United States at the National Unified Auditions. Auditions schedules can be found on the Department of Theatre Arts website on the "Prospective Students" page.

BFA transfer applicants must follow the Admission procedures described above and should note that if accepted, class standing in the program (freshman, sophomore, etc.) is determined by the BFA Theatre Arts Faculty and the Director of Undergraduate Studies.

Musical Theatre and Acting Majors are typically admitted to the Bachelor of Fine Arts degree program in the fall semester of each academic year.

The candidates for the degree of Bachelor of Fine Arts must satisfy the academic requirements established by the College of Arts and Sciences, including, but not limited to the demonstration of:

- Advanced Writing and Communication Proficiency: Degree candidates must complete at least four writing courses, and at least one writing course must be in the student's major discipline,
- Mathematics Proficiency: Degree candidates must earn at least 3 credit hours in a Mathematics course numbered MTH 108 or higher.

To remain in the program, BFA students in the Department of Theatre Arts must maintain a cumulative 2.7 (B-) grade point average in all theatre courses (and any other courses required in a student's area of specialization) and a cumulative GPA of 2.0 (C) in all courses. Failure to maintain satisfactory academic standing will result in the student being placed on academic probation by the Department and may lead to dismissal from the BFA program.

BFA Theatre Arts courses are progressive in nature and students must successfully complete each course in sequence. Failure to pass the requirements of any particular class in the program may result in the student's dismissal.

All BFA students are evaluated by the faculty on commitment to training, production work, growth, discipline, talent and professional potential at the end of each semester.

Departmental production requirements, student responsibilities, and disciplinary policies are detailed in the Student Handbook, available here <http://www.as.miami.edu/media/college-of-arts-and-sciences/content-assets/theatre-arts/docs/pdfs/Student%20Handbook%202017.pdf> and on the "Current Students" page on the Department's website.

Majors in Theatre Arts

- B.A. in Theatre Arts (p. 342)
- B.F.A. in Theatre Arts - Design/Technical Production (p. 348)
- B.F.A. in Theatre Arts - Musical Theatre (p. 350)
- B.F.A. in Theatre Arts - Acting (p. 345)
- B.F.A. in Theatre Arts - Stage Management (p. 353)
- B.F.A. in Theatre Arts - Theatre Management (p. 356)

Minor in Theatre Arts

- Theatre Arts (p. 358)

Minor in Theatre Arts

Code	Title	Credit Hours
THA Courses ¹		15
Total Credit Hours		15

¹ A minor in Theatre Arts consists of 15 credit hours of Theatre Arts classes with a minimum grade of C- in each course and an overall GPA of 2.0 or above.

Urban Studies

<http://www.as.miami.edu/urb>

Introduction

The minor in Urban Studies provides undergraduate students with a flexible concentration in interdisciplinary studies of cities, urbanism, and urbanity. Urban Studies is a long established academic field, especially prominent in major cities in the United States. Course work combines a practical focus on Metropolitan Miami with more general attention to urban theory and globalization.

The minor has a liberal arts orientation and includes perspectives from the social sciences, architecture, and history. It is a useful complement to majors such as Geography, History, Sociology, Anthropology, Literature, International Studies, Economics, Political Science, and others. A summer study abroad option in South Africa and Namibia is offered regularly in summer. In addition, it is possible for a student to study in the spring semester in Cape Town, South Africa (UCape Town Program). The minor is also of particular interest to students in Architecture Communication and Business. Courses in the Minor are taught in the College of Arts & Sciences and the School of Architecture. Note that there are slightly different requirements for ARC students.

Total Credit Hours		15

- ¹ ARC students may select no more than one ARC course while NonARC students must select at least one ARC course. Note that URB 201 or URB 301 will suffice as prerequisites for any of these courses.
- * Other courses may be approved upon request; please consult the program Director, Dr. Richard Grant: rgrant@miami.edu
- ** A minimum grade of C- with a 2.0 overall GPA are required.

Women's and Gender Studies

<http://www.as.miami.edu/wgs>

Dept. code: WGS

Introduction

The Program in Women's and Gender Studies at the University of Miami seeks to encourage the rigorous investigation of gender as a significant issue in all areas of human experience. It reaches across disciplines to draw on a range of methods, theories, and perspectives that help us to understand how ideas and structures based on gender shape our lives. The program's core objective is to foster the examination, open discussion, and lively debate of gender issues among faculty and students from all fields of study, enriching the undergraduate curriculum and the university's academic mission through greater communication across disciplines and colleges. Its aim is to broaden, deepen, and transform the learning community at UM and beyond.

Educational Objectives

The undergraduate curriculum in Women's and Gender Studies explores the ways in which ideas about gender and sexuality shape social roles and identities, as well as the ways in which race, ethnicity, class, and nationhood influence the perception and experience of gender and sexuality within particular cultures. The curriculum is informed by recent scholarship that recognizes gender and sexuality as crucial components of human experience in social, cultural, economic, political, religious, and legal contexts. It includes courses that introduce students to feminist theory and scholarship, engaging ethical and political issues of equality and justice. The program encourages students to question their assumptions about the possible meanings of female and male through the comparative study of how different societies and historical periods have viewed manhood, womanhood, and relations between women and men. Courses in Women's and Gender Studies enable students to acquire critical and analytical skills that they can then apply in other aspects of their educational experience at UM and beyond the university in their careers and personal development.

The LGBTQ Studies minor is designed to allow students to explore sexuality and sexual minorities from a variety of perspectives. The course will provide students with an introduction to a broad array of LGBTQ issues including visual and performing arts, literature, languages, history, social science, various theories, public policy and the law, families and other types of intimate relationships, crime, popular culture, and LGBTQ identities and communities. This widely interdisciplinary field addresses work in a broad range of scholarly disciplines including biological and cultural studies, in literature and anthropology, in the health sciences, history, and the visual arts. It ranges from archival research to the elaboration of queer theory, from the analysis of constitutional law to questions of public health, from the study of popular culture to investigations into the development and social construction of sexual identity.

Advanced Writing and Communication Requirement

To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in WGS should take at least one WGS core course that is writing intensive (i.e., WGS 301).

Departmental Honors

Women's and Gender Studies majors with a cumulative GPA of at least 3.5 in WGS courses and an overall GPA of at least 3.0 may earn departmental honors by completing WGS 505 instead of the senior research project. Candidates for departmental honors are responsible for finding a faculty member who is willing to serve as thesis adviser and then must complete a thesis proposal of approximately 400 words which must be approved by the thesis adviser and then the program director. The format and length of the thesis will vary according to the nature of the project. Most students writing an honors thesis as part of their WGS major will take WGS 505 twice (for a total of 6 credit hours).

Major in Women's and Gender Studies

Business

<http://www.bus.miami.edu>

Introduction

The University of Miami Business School offers courses leading to the degrees of

- Bachelor of Business Administration (BBA), and
- Bachelor of Science in Business Administration (BSBA).

Undergraduate degrees in business are administered by the Vice Dean for Undergraduate Business Education.

Mission

The mission of the University of Miami Business School is to develop innovative ideas and principled leaders that transform global business and society.

Accreditation

The Bachelor of Science in Business Administration and the Bachelor of Business Administration as well as all Accounting programs are fully accredited by AACSB International – The Association to Advance Collegiate Schools of Business.

Academic Policies

Student Responsibilities

- Miami Business School students are responsible for planning their own academic programs and for meeting degree requirements.
- It is the students' responsibility to understand fully, and to comply with, all the provisions of this Bulletin and any written changes to their program of study.
- Students are provided assistance by academic advisors and faculty members.
- Deviations from department, program, or school requirements are granted only by written approval from the Vice Dean or, in some cases, the relevant department chairperson.
- A student who is in violation of the provisions of this Bulletin may be administratively withdrawn from a class or classes, dismissed from Miami Business School, and/or have an electronic hold placed upon future enrollment.
- A student who is disruptive in class as determined by assigned faculty and the Vice Dean will be administratively dropped from the class.
- Information regarding appeal procedures and special requests relative to academic matters is available in Merrick 104, University of Miami Business School, Office of Undergraduate Business Education.

Admission to Miami Business School

Admission to the University for undergraduate study as a freshman is sufficient for admission to Miami Business School prior to matriculation. However, strong quantitative skills are typically needed for success. Students who do not matriculate in to Miami Business School in their first semester of study at the University may request a transfer to Miami Business School thereafter only according to the policies and procedures set out below.

Transferring to Miami Business School

Transfer applicants from outside the University of Miami must submit a satisfactory academic record in compliance with the standards of the University of Miami Office of Admission. Admitted applicants will be in good academic standing at all institutions previously attended and have a minimum UM cumulative grade point average (GPA) of 3.0. All previous transfer courses must be from an accredited institution, and a minimum grade of "C" (2.0) must be earned in all transfer courses for credit to be awarded. This includes repeated courses under a forgiveness policy at any previous institution.

All transfer students to Miami Business School, including those from other Schools and Colleges within the University of Miami, must have completed and received college credit for a calculus course equivalent to either MTH 161 (4 credit hours) or MTH 140/MTH 141 (8 credit hours), and earned a grade of "B" or better in the(se) course(s). The transfer calculus course must be approved by submitting the syllabus and textbook title to the University of Miami Department of Mathematics for evaluation.

All transfer coursework taken outside the University of Miami will be reviewed on a course-by-course basis for equivalency to Miami Business School course requirements. Any business class that is from a non-AACSB accredited institution will be accepted only as elective credit toward the overall degree requirements. Transfer applicants may appeal to have transfer classes from non-AACSB accredited institutions reviewed for possible application toward business course requirements by submitting the course syllabus and textbook title to the Office of Undergraduate Business Education.

A transfer student's overall coursework must also meet specific curricular and residency requirements. Pursuant to Miami Business School policy, transfer students must complete a minimum of 50 percent of the Business Core at the University of Miami. Transfer students must also complete a minimum of 50 percent of all major and a minimum of 50 percent of all minor courses at the University of Miami. University Residency and other requirements, applicable to all students, are set out below in the section headed Requirements for Graduation.

Academic Progress, Probation, and Dismissal

When a student's semester or cumulative GPA is below 2.0, or progress toward degree completion is unsatisfactory, the student will be warned, placed on academic probation, or dismissed in accordance with the University's or School of Business Administration's policies and procedures:

- Warning: semester GPA lower than 2.0 but cumulative GPA above 2.0
- Probation: cumulative GPA lower than 2.0
- Probation with Dismissal: two consecutive semesters with cumulative GPA lower than 2.0, or failure to make progress toward degree completion
- Failure to make progress toward degree completion includes, but is not be limited to:
 - failure to complete enough credit hours in the business degree program to graduate after ten regular semesters of enrollment
 - failure to maintain a GPA sufficiently high to permit graduation in the ordinary course with the minimum 2.5 GPA.
 - failure in any business course the student repeats pursuant to the University's General Repeat Rule (p. 27) or otherwise.
 - failure to pass the required calculus course (MAS 110 or MTH 161 for the BBA degree, MTH 161 for the BSBA degree) by the fourth semester.
- A student on probation is not permitted to enroll in more than four courses (no more than 13 credit hours) and may have an electronic hold placed upon future enrollment until grades for work-in-progress are reviewed by the Undergraduate Business Education Academic Standards Committee.
- A student who is dismissed for failure to satisfactorily complete required business core courses, or for failure to make progress toward the degree, may not automatically be dismissed from the University. Accordingly, such a student may apply to another School or College within the University, and if accepted, may continue as an undergraduate student at the University of Miami. For such a student who is **not** accepted by another School or College, dismissal from Miami Business School may have the incidental effect of dismissal from the University of Miami as well.

University Repeat Rule at Miami Business School

The University's rules regarding repeating courses may be viewed in the General University Information pages of this Bulletin, which explain the University Policies on Repeat Rules (p.). The following policy is applied specifically to business students taking advantage of the University's Repeat Rule:

- The summer sessions are not counted as semesters, either individually or together, in determining the last semester in which a student may elect to repeat a course in which a "D" or "F" grade is earned under the University Repeat policy.
- A student who wishes to take advantage of the University Repeat Rule policy must complete a Repeat Rule Request Form, which is available from the student's academic advisor in Miami Business School, Office of Undergraduate Business Education. For additional information about the application of the Repeat Rule in Miami Business School, consult an academic advisor in the Office of Undergraduate Business Education.

Readmission

The requirements for readmission may be viewed in the General Information, Student Status (p. 76) section of this Bulletin. The following special conditions related to readmission are also in effect for Miami Business School:

- A student requesting readmission, who was previously dismissed for academic reasons or who had below a 2.0 cumulative GPA, must present adequate evidence that the conditions and/or factors that caused the prior poor academic performance have changed sufficiently and that there is a reasonable expectation of satisfactory performance if the student is permitted to resume study at Miami Business School.
- A student dismissed for nonacademic reasons must provide written authorization from the Dean of Students' Office before re-enrollment will be permitted.
- A business student who did not earn at least a C grade in MAS 110 or MTH 161 will not be readmitted to Miami Business School.
- A student seeking readmission may have conditions placed upon any such readmission. Failure to satisfactorily accomplish the stated conditions may result in dismissal or the student otherwise not being permitted to register for future semesters.

Changes to Academic Requirements

Miami Business School reserves the right to change academic requirements including course offerings, minimum grade requirements, and minimum required grade point averages, to ensure that students are receiving the latest knowledge and are maintaining the standards necessary to be professionally competitive. Changes are communicated to students either by written or electronic notice, or personally by their academic advisors.

Requirements for Graduation

Residency and Other Graduation Requirements

In addition to meeting the graduation requirements as set out in Degree Programs, below, a candidate for either the BBA or BSBA degree must complete the last 45 credit hours consecutively and exclusively in degree-seeking status in residence at Miami Business School, University of Miami. Credit by examination may not be used to meet the residency requirement. In addition, a minimum of 120 credit hours is required for graduation, not including ENG 103, TAL 191, MTH 099, or any UMI Internship course. The student's last 56 credit hours must be completed at a four-year institution.

After being admitted to the University of Miami, students must complete all business coursework in residence, including coursework required by the Business Core and specific coursework for the business major and minor areas of specialization. This policy applies equally to non-business students completing minor areas of specialization at Miami Business School. Any appeal for an exception to this policy must be submitted in writing to the Office of Undergraduate Business Education.

Age of Credit Hours

Credit hours more than 12 years old are not recognized for degree purposes.

Grade Point Average (GPA)

To graduate, business students must earn a minimum cumulative grade point average (GPA) of 2.5 in all undergraduate courses taken (combined UM and transfer coursework) *and* must also earn a minimum cumulative GPA of 2.5 in all undergraduate courses taken at the University of Miami. (See the General University Information page in this Bulletin regarding Grades (p. 69).) Each major and/or minor area of specialization within Miami Business School has its own set of requirements regarding minimum GPA, both for individual courses in the major/minor area of specialization and with regard to the cumulative GPA in the specific coursework required for the major/minor area of specialization. Students are responsible for understanding the minimum GPA requirements for their proposed major/minor area(s) of specialization.

Degree Programs

Bachelor of Business Administration (BBA)

All BBA students must complete areas A, B, C, D, and E as listed below. All courses, except some of those in area D, must be taken for graded credit. (See the General University Information page in this Bulletin regarding Credit Only Option (p. 69).)

A. University of Miami's General Education Requirements

Miami Business School participates in the University's General Education requirements (p. 67). See descriptions in the General University Information section of this Academic Bulletin.

All students must satisfy the University's general education Areas of Proficiency: English composition (ENG 105 and ENG 106), Advanced Writing and Communication Skills (School-based program described below), and Quantitative Skills (MAS 110 or any Department of Mathematics course numbered MTH 108 or higher). In addition, all undergraduate students must satisfy the University's general education distribution requirements in three Areas of Knowledge: Arts & Humanities (A&H); People & Society (P&S); and Science, Technology, Engineering & Mathematics (STEM).

Every BBA student must complete a cognate designated Arts & Humanities (A&H) outside Miami Business School. Additionally, each business major and minor area of specialization fulfills either the People & Society (P&S) Area of Knowledge or the Science, Technology, Engineering & Mathematics (STEM) Area of Knowledge. For specific information about majors/minors and Area of Knowledge designations, please refer to the chart of **Majors and Minors for the BBA Degree** that follows or the relevant Academic Bulletin page for each major/minor area of specialization.

Depending on the Area of Knowledge of the student's major(s) and any minor(s), an additional cognate in either People & Society (P&S) or Science, Technology, Engineering, and Mathematics (STEM) may also be required of the BBA student. Students are required to declare their cognates with the Office of Undergraduate Business Education prior to the start of the junior year.

Miami Business School's program establishing Advanced Writing and Communication Skills proficiency for business requires students to successfully complete the following courses beyond the basic English composition courses, ENG 105 and ENG 106: BSL 212 and BUS 300. Any student who does not complete ENG 106 with at least a C- is required either to repeat ENG 106 and earn at least a C- or complete ENG 230, Advanced Professional Communication, with at least a C- before enrolling in BUS 300.

The University Quantitative Skills proficiency requirement is satisfied within the BBA degree requirements upon successful completion of MAS 110 or MTH 161 (or a MTH 161 equivalent).

B. BBA Business Core

Code	Title	Credit Hours
ACC 211	Principles of Financial Accounting	3
ACC 212	Managerial Accounting	3
BSL 212	Introduction to Business Law	3
BTE 210	Fundamentals of Business Technology and Innovation	3

BUS 101	First Step: Freshman Integrity, Responsibility, and Success through Teamwork	3
BUS 150	Business Analytics	3
BUS 300	Critical Thinking and Persuasion for Business	3
ECO 211	Principles of Microeconomics (Microeconomics)	3
ECO 212	Principles of Macroeconomics (Macroeconomics)	3
FIN 302	Fundamentals of Finance	3
MAS 110	Quantitative Applications in Business (minimum grade of C- required)	3
or MTH 161	Calculus I	
MAS 201	Introduction to Business Statistics (minimum grade of C- required)	3
MAS 202	Intermediate Business Statistics	3
MGT 303	Operations Management	3
MGT 304	Organizational Behavior	3
MGT 401	Strategic Management (must be taken in final semester)	3
MKT 201	Foundations of Marketing	3
or MKT 301	Marketing Foundations	
Total Credit Hours		51

NOTE: ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements (p. 67). Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

NOTE: MAS 110/MTH 161 and MAS 201 must be completed with a "C-" or better.

C. Major and Minor Areas of Specialization - Requirements

All BBA students must complete at least one major area of specialization in the Miami Business School. Additionally, students may elect to complete a minor area of specialization either at Miami Business School or in another School or College within the University. For specific information on minors offered by other Schools and Colleges of the University of Miami, please refer to the applicable College, School, or Department section within this Academic Bulletin.

Requirements for the major and minor areas of specialization are specified by each academic department. Every course completed in satisfaction of either a major or minor area of specialization must be taken for a grade and a grade of "C-" or higher earned, unless specified differently by the department. GPA minima for each business area of specialization are set by the departments. Please refer to the relevant Academic Bulletin page for the major/minor area of specialization.

Business students are permitted to pursue more than one (business or other) major in distinct areas of specialization; however, completion of all required coursework is dependent upon careful sequencing. No course may be counted toward more than one major area of specialization or toward a major and a minor area of specialization, except a course that is specifically listed by number as required for both major areas of specialization and/or a major and a minor area of specialization. In this case, an alternate course or courses may be required for the additional major and/or minor. The courses of choice required for one major or minor area of specialization may not be utilized to satisfy courses of choice requirements for a second major and/or minor area of specialization. Consequently, students should understand that completion of more than one major and/or minor area of specialization may necessitate the completion of more than 120 credit hours or more than eight semesters of study for graduation.

Business students may choose to pursue a second major (also referred to as an additional major) from the College of Arts and Sciences, the School of Communication, or the School of Education (certain majors only). No courses used to satisfy an additional major may be used to satisfy the requirements for a business major or minor area of specialization.

Major areas of specialization at Miami Business School are available only with completion of the required Business Core. A student in another School or College at the University of Miami pursuing a business degree as a "second degree" or "dual degree" student, must meet the minimum requirements for transfer to Miami Business School, although the student is not required to formally transfer to Miami Business School.

- The student must meet with the Director of Advising in the Office of Undergraduate Business Education in order to construct an academic plan and complete the Dual Degree Memorandum.
- A minimum of 160 credit hours is required for graduation with the dual degree.
- The student must meet for academic planning with the appropriate advising administrator in his/her University of Miami home School or College. Satisfaction of degree requirements in each School or College may vary.
- The Office of the Provost completes the final approval of the Dual Degree Memorandum.

Students are required to declare their major area of specialization and minor area of specialization with the Office of Undergraduate Business Education prior to the start of their junior year.

Majors and Minors for the BBA Degree

Major Areas of Specialization	Responsible Department
Accounting (P&S)	Accounting
Business Technology (STEM)	Business Technology

D. Electives (as needed to meet the minimum 120 credit hours)

All undergraduate courses offered by the University may be used as electives, with the following exceptions:

- ENG 103, TAL 191, MTH 099, and UMI 105-UMI 410, are offered for credit but do not count toward degree requirements. Nonetheless, the grade, if any, earned in any of these courses is included in the student's cumulative GPA, and credit for the course is included in the student's overall credit hours earned. Accordingly, these courses will serve to increase the total number of credit hours required to graduate.
- No more than 8 credit hours in applied music, including band, may be used.
- Any science course taken as an elective and used as preparation for entrance to medical school must be taken for a grade.

E. International Focus Within the Curriculum

At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

Bachelor of Science in Business Administration (BSBA)

The BSBA degree at Miami Business School emphasizes quantitative foundation courses. All BSBA majors at Miami Business School must complete areas A, B, C, D, and E as listed below. All courses, except some of those in area D, must be taken for graded credit. (See the General University Information page in this Bulletin regarding Credit Only Option (p. 69).)

A. University of Miami's General Education Requirements

The Miami Business School participates in the University's General Education requirements (p. 67). See descriptions in the General University Information section of this Academic Bulletin.

All students must satisfy the University's general education Areas of Proficiency: English composition (ENG 105 and ENG 106), Advanced Writing and Communication Skills (School-based program described below), and Quantitative Skills (MAS 110 or any Department of Mathematics course numbered MTH 108 or higher). In addition, all undergraduate students must satisfy the University's general education distribution requirements in three Areas of Knowledge: Arts & Humanities (A&H); People & Society (P&S); and Science, Technology, Engineering & Mathematics (STEM).

Every BSBA student must complete a cognate designated Arts & Humanities (A&H) outside Miami Business School. Additionally, each business major and minor area of specialization fulfills either the People & Society (P&S) Area of Knowledge or the Science, Technology, Engineering & Mathematics (STEM) Area of Knowledge. For specific information about majors/minors and Area of Knowledge designations, please refer to the chart of **Majors and Minors for the BSBA Degree** that follows or the relevant Academic Bulletin page for each major/minor area of specialization.

Depending on the Area of Knowledge of the student's major(s) and any minor(s), an additional cognate in either People & Society (P&S) or Science, Technology, Engineering, and Mathematics (STEM) may also be required of the BSBA student. Students are required to declare their cognates with the Office of Undergraduate Business Education prior to the start of the junior year.

Miami Business School's program establishing Advanced Writing and Communication Skills proficiency for business requires students to successfully complete the following courses beyond the basic English composition courses, ENG 105 and ENG 106: BSL 212 and BUS 300. Any student who does not complete ENG 106 with at least a C- is required to either repeat ENG 106 and earn at least a C- or complete ENG 230, Advanced Professional Communication, with at least a C- before enrolling in BUS 300.

The University Quantitative Skills proficiency requirement is satisfied within the BSBA degree requirements upon successful completion of MTH 161 (or a MTH 161 equivalent).

B. BSBA Business Core

Code	Title	Credit Hours
ACC 221 or ACC 211	Accelerated Principles of Financial Accounting Principles of Financial Accounting	3
ACC 222 or ACC 212	Accelerated Managerial Accounting Managerial Accounting	3
BSL 212	Introduction to Business Law	3
BTE 210	Fundamentals of Business Technology and Innovation	3
BTE 320	Introduction to Programming	3
BUS 101	First Step: Freshman Integrity, Responsibility, and Success through Teamwork	3
BUS 150	Business Analytics	3
BUS 300	Critical Thinking and Persuasion for Business	3

MAS 442	Stochastic Models in Operations Research	
MAS 547	Computer Simulation Systems	
MGT 445	Supply Chain Modeling and Analysis	
MGT 446	Supply Chain Strategy	
Total Credit Hours		62

NOTE: ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements (p. 67). Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

NOTE: MTH 161 and MAS 311 must be completed with a “C-” or better.

C. Major and Minor Areas of Specialization - Requirements

All BSBA students must complete at least one major area of specialization at Miami Business School. Additionally, students may elect to complete a minor area of specialization either at Miami Business School or in another School or College within the University. For specific information on minors offered by other Schools and Colleges of the University of Miami, please refer to the applicable College, School, or Department section within this Academic Bulletin.

Requirements for the major and minor areas of specialization are specified by each academic department. Every course completed in satisfaction of either a major or minor area of specialization must be taken for a grade and a grade of “C-” or higher earned, unless specified differently by the department. GPA minima for each business area of specialization are set by the departments. Please refer to the relevant Academic Bulletin page for the major/minor area of specialization.

Business students are permitted to pursue more than one (business or other) major in distinct areas of specialization; however, completion of all required coursework is dependent upon careful sequencing. No course may be counted toward more than one major area of specialization or toward a major and a minor area of specialization, except a course that is specifically listed by number as required for both major areas of specialization and/or a major and a minor area of specialization. In this case, an alternate course or courses may be required for the additional major and/or minor. The courses of choice required for one major or minor area of specialization may not be utilized to satisfy courses of choice requirements for a second major and/or minor area of specialization. Consequently, students should understand that completion of more than one major and/or minor area of specialization may necessitate the completion of more than 120 credit hours or more than eight semesters of study for graduation.

Business students may choose to pursue a second major (also referred to as an additional major) from the College of Arts and Sciences, the School of Communication, or the School of Education (certain majors only). No courses used to satisfy an additional major may be used to satisfy the requirements for a business major or minor area of specialization.

Major areas of specialization at Miami Business School are available only with completion of the required Business Core. A student in another School or College at the University of Miami pursuing a business degree as a “second degree” or “dual degree” student, must meet the minimum requirements for transfer to Miami Business School, although the student is not required to formally transfer to Miami Business School.

- The student must meet with the Director of Advising in the Office of Undergraduate Business Education in order to construct an academic plan and complete the Dual Degree Memorandum.
- A minimum of 160 credit hours is required for graduation with the dual degree.
- The student must meet for academic planning with the appropriate advising administrator in his/her University of Miami home School or College. Satisfaction of degree requirements in each School or College may vary.
- The Office of the Provost completes the final approval of the Dual Degree Memorandum.

Students are required to declare their major area of specialization and minor area of specialization with the Office of Undergraduate Business Education prior to the start of their junior year.

Majors and Minors for the BSBA Degree

Major Areas of Specialization	Responsible Department
Accounting (P&S)	Accounting
Business Analytics (STEM)	Management Science
Business Technology (STEM)	Business Technology
Economics - Political Economy (P&S) or Quantitative Economics (STEM)	Economics
Entrepreneurship (P&S)	Management
Finance (STEM)	Finance
Health Sector Management and Policy (P&S)	Health Management and Policy
Human Resource Management (P&S)	Management
International Finance and Marketing (STEM)	Finance
Legal Studies (P&S)	Business Law
Management (P&S)	Management
Marketing (P&S)	Marketing
Real Estate (STEM)	Finance

Minor Areas of Specialization	Responsible Department
Accounting (P&S)	Accounting
Business Analytics (STEM)	Management Science
Business Law (P&S)	Business Law
Business Technology (STEM)	Business Technology
Economics - Political Economy (P&S) or Quantitative Economics (STEM)	Economics
Entrepreneurship (P&S)	Management
Finance (STEM)	Finance
Health Sector Management and Policy (P&S)	Health Management and Policy
International Business (P&S)	Undergraduate Business Education
Management (P&S)	Management
Marketing (P&S)	Marketing
Real Estate (STEM)	Finance

D. Electives (as needed to meet the minimum 120 credit hours)

All undergraduate courses offered by the University may be used as electives with the following exceptions:

- ENG 103, TAL 191, MTH 099, and UMI 105-UMI 410, are offered for credit but do not count toward degree requirements. Nonetheless, the grade, if any, earned in any of these courses is included in the student's cumulative GPA, and credit for the course is included in the student's overall credit hours earned. Accordingly, these courses will serve to increase the total number of credit hours required to graduate.
- No more than 8 credit hours in applied music, including band, may be used.
- Any science course taken as an elective and used in preparation for entrance to medical school must be taken for a grade.

E. International Focus Within the Curriculum

At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

Honors

Foote Fellows Honors Program

The Foote Fellows Honors Program recognizes the most educationally accomplished incoming students at the University of Miami. Select incoming students will receive an invitation to the Foote Fellows Honors Program (<http://admissions.miami.edu/undergraduate/academics/programs-of-distinction/foote-fellows>).

Graduation (Latin) Honors

- Students who qualify based on their **cumulative GPA** (combined UM GPA and transfer course GPA) and class rank will graduate with University Honors: *cum laude*, *magna cum laude*, or *summa cum laude*.
- For details consult an academic advisor in the Office of Undergraduate Business Education and the Office of Academic Enhancement. (<https://oae.miami.edu/units/general-honors-program/graduation-honors>)

General Business Honors, Miami Business School

Graduation with General Business Honors requires:

- Completion of all of the requirements of the **BSBA degree program**; and
- A minimum 3.75 **cumulative GPA** (combined UM GPA and transfer course GPA) at graduation.

For details, consult an academic advisor in the Office of Undergraduate Business Education.

Departmental Honors in Business

Graduation with Departmental Honors requires:

- A minimum 3.9 GPA in Miami Business School courses at the end of the junior year; and
- Completion of a 3-credit hour research project during the entire senior year on a topic that is of interest to both the faculty member supervising the research and the student responsible for completing it. The research and written deliverable must be deemed to be of exceptional quality, consistent with the workload of a 3-credit upper level independent study course, and worthy of a designation that is only open to the top 1% of Business School undergraduates; and
- A minimum 3.9 GPA in all Miami Business School courses at graduation; and
- Any other requirements, if any, established by the Department granting honors, as set forth in this Academic Bulletin.

Students who major in two distinct areas of specialization may complete their honors research project in the department of either business major specialization. Students pursuing the International Finance and Marketing major area of specialization may complete their research project in either department.

The 3-credit hour research project class is taken for "credit only" and does not count toward the 120-credit hours required for graduation. Students who begin a research project but do not complete it will be retroactively withdrawn from the research course. Students receive credit for the project only if the work is deemed to be of exceptional quality. Details related to Departmental Honors are available in the Office of Undergraduate Business Education.

Business Honor Societies

Students may be nominated for or elected into an honor society based on specific criteria. Contact the listed department for additional information.

- Beta Gamma Sigma (Highest Honors in Business) (Undergraduate Business Education (<https://www.bus.miami.edu/academic-programs/undergraduate-business-education>))
- Beta Alpha Psi (Department of Accounting (<http://www.bus.miami.edu/thought-leadership/academic-departments/accounting>))
- Omicron Delta Epsilon (Department of Economics (<http://www.bus.miami.edu/thought-leadership/academic-departments/economics>))

Majors for Business Students

- Marketing for Business Students (p. 475)
- Real Estate (p. 435)

Minors for Non-Business Students

- Business Law for Non-Business Students (p. 394)
- Business Technology (p. 401)
- Economics - Political Economy for Non-Business Students (p. 413)
- Economics - Quantitative Economics for Non-Business Students (p. 415)
- Entrepreneurship for Non-Business Students (p. 462)
- Finance (p. 434)
- Health Sector Management and Policy (p. 442)
- Management for Non-Business Students (p. 463)
- Marketing for Non-Business Students (p. 475)

The Global Business Studies Program: Latin America (People & Society)

The Global Business Studies Program (<http://www.bus.miami.edu/academic-programs/undergraduate-business-education/special-programs/global-business-studies.html>) is a co-major option for incoming Miami Business School freshmen, who apply and are selected as GBS Scholars/Foote Fellows. Students in the program simultaneously pursue a major in a functional area of business and, in the co-major, region-specific global studies coursework.

Curriculum for Co-major in Global Business Studies (21-27 credit hours)

1. Introduction to the region (3 credit hours)
2. Demonstrated proficiency in the language of the region, or where this is not feasible, at least one language course at the 200 level or above (min. 3 credit hours) Students may demonstrate language proficiency by completing business coursework delivered in the language of the region selected.
3. Economics of the region (3 credit hours)
4. Political and/or Regulatory Environment of the region (3 credit hours)
5. History of the region (3 credit hours)
6. Introduction to International Business (Standard course is MGT 349. Recommended alternatives: MGT "Doing Business in [the Region]" where available, or other approved business course in-country) (total of 3 credit hours)
7. Seminar & Senior Thesis (6 credit hours)
 - Culminates in a written research paper examining a significant problem or proposal for a particular country, approached from an interdisciplinary stand point
 - Carried out under the supervision of one or more faculty members
 - Oral presentation of the student's findings and recommendations also required
 - Required internship or directed study in-country may allow for field research
8. Minimum of one semester "study abroad" in the studied region is required.
 - Students may choose to satisfy the co-major's economics and/or history and/or politics/regulation course requirement in-country.

GBS Scholars are also invited to participate in a wide array of co-curricular activities, intentionally designed to enhance the Global Business Studies co-major. These include a faculty-led, international travel course in the summer following freshman year and cultural activities and events throughout the program, curated by the GBS Academic Program Director.

Please note that any student who does not complete these curricular and co-curricular requirements, or who is unable to maintain a cumulative GPA of 3.5, will be asked to exit the program and co-major.

Minor Area of Specialization in International Business (People & Society)

The International Business minor provides Miami Business School students an interdisciplinary perspective of international business to augment their studies in other areas of business specialization. The International Business minor may not be taken by students pursuing the International

Finance and Marketing major or by non-business students. Students must complete all pre-requisite courses before enrolling in required International Business minor courses.

The International Business minor consists of 12 credit hours as follows:

Code	Title	Credit Hours
Core Courses ¹		
Select two or three courses (6-9 credit hours) from the following:		6-9
FIN 330	International Finance	
MGT 349	International Business	
MGT 459	International and Multinational Management	
MKT 360	International Marketing	
Choice Courses for the Minor ¹		
Select one or two courses (3-6 credit hours) to equal 12 total credit hours for the minor from the following:		3-6
BSL 412	International Business Law	
ECO 351	Economics of Development	
ECO 371	Latin America and the Global Economy	
ECO 441	International Trade Theory	
ECO 442	International Monetary Economics	
FIN 431	International Financial Management	
MGT 359	Comparative Management	
MGT 371	Doing Business in Latin America	
MKT 469	International Marketing Management	
POL 346	U.S.-Latin American Relations	
POL 347	American Foreign Policy	
POL 348	United States Relations with the Middle East	
POL 381	West European Politics (Previous Title: European Politics and Government)	
POL 384	Postcommunist Russian Politics	
POL 385	Politics and Society in Latin America	
POL 387	Politics of the Middle East	
POL 392	International Terrorism	
POL 544	Chinese Foreign Policy	
POL 582	Political Economy of Development	
POL 588	Politics in China	
POL 591	International Security	
POL 593	International Relations of the Middle East	
Total Credit Hours		12

¹ All specific coursework for the International Business minor must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.0 is required for all specific coursework in this minor area of specialization. All courses must be taken within the current pre-requisite structure.

The General Business Program: An Individually-Designed Major for BBA and BSBA Students (People & Society or STEM)

The Individualized General Business major allows students at Miami Business School to tailor an area of business specialization creatively and to seek and develop connections among the business disciplines in ways that will suit their own academic interests and graduate school or career objectives. Building upon the strong foundation provided by the Business Core, students pursuing this program of study will be motivated to craft a unique business specialization that enhances their ability to respond to and compete in a dynamic economic marketplace.

Any BBA or BSBA degree-seeking student may pursue the customized Individualized General Business major. No additional admission or application is required. The student, however, must consult with his/her Business School academic advisor in order to select the Individualized General Business major. A three-person committee comprised of at least one faculty member and at least one undergraduate business academic advisor will be

appointed by the Undergraduate Business Education Committee to oversee the student's chosen academic program, provide feedback and assistance with course choices, and to connect the student to other relevant faculty or administrators for advice where indicated.

Curriculum for the Individualized General Business Major Area of Specialization

The student who wishes to pursue the BBA or BSBA in General Business must complete:

1. all University general education requirements, unless exempt (e.g. Foote Fellows), and
2. the Business Core requirements for either the BBA or the BSBA, including the international focus course, and
3. a minimum of 18 additional credit hours of upper-level (300-500 level) coursework chosen from among the course offerings of Miami Business School. The specific coursework selected to satisfy the Individualized General Business major may not be utilized to also satisfy the Business Core or the specific coursework requirements for any other major or minor area of specialization in Business. All coursework must be taken for a grade and within the current pre-requisite structure.

A minimum of 120 credit hours is required for graduation. The Individualized General Business major area of specialization may fulfill either the People & Society or the STEM general education Area of Knowledge, based upon the preponderance of the specific coursework pursued and with the approval of the advising committee.

Cognates for Non-Business Students: Understanding Business (P&S); and Business Analytics (STEM)

Understanding Business (People and Society)

The University of Miami Business School offers a general business cognate to non-business students: Understanding Business. Completion of this cognate fulfills the University's General Education requirement of a cognate in the Area of Knowledge labeled People & Society (P&S).

This cognate offers students an overview of the business environment with the goal of promoting awareness and understanding of the real-world issues that affect the global economy in the twenty-first century. Courses in the cognate deliver the essential business concepts that enable critical consideration of the questions that confront decision makers in the various functional areas of business. Students declare the cognate via their advisor at their home School or College.

The Understanding Business cognate consists of the following courses:

Code	Title	Credit Hours
Required Course		
BUS 200	Introduction to Business	3
Options		
Select two courses (6 credit hours) from the following:		6
BUS 201	Money	
BUS 202	Introduction to the Legal Environment of Business	
BUS 203	Managing Effectively: A Skills Development Approach	
BUS 206	Principles of International Business	
FIN 300	Fundamentals of Finance for Non-Finance Majors	
HIS 225	History of the Modern Business Enterprise	
MGT 251	Nature and Foundations of Entrepreneurship	
MKT 301	Marketing Foundations	
Total Credit Hours		9

Business Analytics: Transforming data into insights for better informed decisions (STEM)

Professionals with deep analytical skills are in high demand across a variety of industries and organizations. Business analytics solutions use quantitative analysis to measure past performance and to guide and organization's future business planning. The Business Analytics cognate offers a selection of courses that cover important tools and techniques to help understand and analyze data, predict outcomes, and to improve decision-making in increasingly complex and interconnected business environments. Completion of this cognate fulfills the University's General Education requirement of a cognate in the Area of Knowledge labeled Science, Technology, Engineering, and Math (STEM). Students declare the cognate via their advisor at their home School or College.

Code	Title	Credit Hours
Complete exactly three courses (9 credit hours) from the following:		
MAS 332	Data Acquisition, Preparation and Visualization	
MAS 342	Introduction to Optimization and Decision Making	
MAS 432	Data Analysis	
		9

MAS 442	Stochastic Models in Operations Research	
MAS 547	Computer Simulation Systems	
MAS 548	Data Mining and Knowledge Acquisition	
Total Credit Hours		9

Minors for Non-Business Students

Students in other schools and colleges of the University may choose to pursue any of the following minor areas of specialization at Miami Business School by officially declaring the minor at their home School or College:

Minor Areas of Specialization

- Business Law (P&S) (p. 394)
- Business Technology (STEM) (p. 401)
- Economics - Political Economy (P&S) (p. 413)
- Economics - Quantitative Economics (STEM) (p. 415)
- Entrepreneurship (P&S) (p. 462)
- Finance (STEM) (p. 434)
- Health Sector Management and Policy (P&S) (p. 442)
- Management (P&S) (p. 463)
- Marketing (P&S) (p. 475)

Students interested in completing a minor offered by the University of Miami Business School should consult with an academic advisor *in the School or College of their degree/major* to determine if a business minor is acceptable. Neither advice nor consent from either the Office of Undergraduate Business Education or the relevant Miami Business School department is necessary for a student to choose or complete a Miami Business School minor. Instead the non-business student should simply declare the minor in CaneLink and complete the necessary specific coursework, according to the details listed in the appropriate department's section of this Academic Bulletin and the following supplemental guidelines, which are applicable to all minors unless otherwise provided by the department offering the minor area of specialization:

All courses within the minor must be taken for a grade and completed with a grade of "C-" or higher unless a higher minimum grade is prescribed by the department offering the minor. To be awarded the minor, the student must also achieve a minimum cumulative GPA of 2.0 in all minor courses, unless a higher grade or GPA is prescribed by the department offering the minor, as set out in that department's section of this Academic Bulletin. All courses taken by the student in the department offering the minor will count toward the GPA in the minor.

General Overview

The Foote Fellows Honors Program (p. 76) recognizes the most educationally accomplished incoming students at the University of Miami. Foote Fellows have distinguished themselves both in and out of the classroom at their previous schools, are self-motivated, and think independently. Admission to the Foote Fellows Honors Program is by invitation only.

Foote Fellows are exempt from the Cognates Program of General Education requirements. Within the curricular framework of their school or college, Foote Fellows enjoy unmatched freedom and flexibility to explore a multitude of educational resources. Many Foote Fellows leverage this opportunity to take additional majors and/or minors and to study abroad.

At each of the nine undergraduate schools at the University of Miami, a dedicated advisor helps Foote Fellows chart their academic path and attain access to distinctive learning opportunities at the University, such as special school-based seminars, faculty-mentored research, networking opportunities, and off-campus internships.

Foote Fellows also will be invited to join advanced, interdisciplinary Foote Fellow seminars taught by leading faculty members from across the University. An example is "Books That Matter," a rigorous seminar in non-fiction reading that is offered in sessions for first-year and for upper-class students. Freshman Foote Fellows benefit from early move-in to the residential colleges. Further, Foote Fellows receive focused advising on post-baccalaureate distinguished fellowships and awards. The Foote Fellows Honors Program reflects the educational vision of former University of Miami President Edward T. Foote, who retired in 2000 after serving the University for twenty years.

To graduate with the Foote Fellows Honors Program distinction, Foote Fellow students must have achieved a minimum GPA of 3.5 at the completion of the final semester.

Eligibility for the Foote Fellows Honors Program transcript distinction for each student is determined by the **lower** of two GPAs:

1. UM cumulative graduation GPA
2. Combined GPA (UM cumulative graduation GPA + Transfer GPA)

Foote Fellows in Business

As the best and brightest of each incoming class, Miami Business School Foote Fellows are afforded the most stimulating academic and co-curricular experiences the School has to offer. They are invited to take part in Foote-only seminars, exclusive workshops on a variety of academic and career-oriented themes, and networking events with some of Miami Business School's most honored speakers and guests.

Miami Business School Foote Fellows enroll in the Foote Fellow sections of business core classes, such as BUS 101, BUS 255, BSL 212, ACC 221, and ACC 222. They are also privileged to engage, one-on-one with business faculty, for at least one (1) semester, in cutting-edge research projects that culminate in a series of collaborative workshops as well as potential publications. Unsurprisingly, then, Foote Fellows frequently represent the School as ambassadors to elite conferences and as members of competitive teams vying for regional, national, and international recognition.

Business Foote Fellows also enjoy dedicated academic and co-curricular/career advisors, as well as opportunities for unique mentorship by prominent alumni.

Accounting

Department Code: ACC

Introduction and Educational Objectives

The objective of the program of studies in accounting is to prepare business students to make a smooth transition from college into a successful and meaningful career in the professional practice of accounting, whether it be in public, private, or governmental accounting. Because of the professional aspects of accounting, equal emphasis is placed upon general education in the arts and humanities and the functioning of business enterprises, as well as the basic underlying concepts of accounting.

Educational Requirements to Sit for the CPA Exam

Most of our students intend to become qualified as Certified Public Accountants (CPA). While the CPA exam is a national exam administered by the American Institute of Certified Public Accountants, its execution and CPA licensing practices are governed by state law. For example, some states require a certain number of credit hours in particular subjects and have overall accounting and business credit hour requirements. As such, you should check with the state in which you intend to practice to determine what the specific course requirements are for that state. **Note:** Our department is unable to make a determination of your eligibility to sit for the CPA exam. This can only be done by the appropriate state board. The licensure requirements for the State of Florida can be viewed at the Florida Department of Business and Professional Regulation website (<http://www.myfloridalicense.com/dbpr/cpa/licensure.html>).

For your convenience, the Florida rules that apply to most individuals are summarized here. Please check the State of Florida website (<http://www.myfloridalicense.com/dbpr/cpa/licensure.html>) for updates and rules which may apply in particular circumstances.

As of July 1, 2008 the Florida State Board of Accountancy (BOA) separated the requirements to become a Certified Public Accountant (CPA) into two parts:

1. the requirements to be eligible to take the CPA exam and
2. the requirements for licensure to practice as a CPA in Florida.

Requirements to Sit for the CPA Exam

To be eligible to take the CPA exam, you must have completed at least 120 credit hours including 24 credit hours of accounting (auditing, cost and managerial accounting, financial accounting, accounting information systems, and taxation) at the upper division (300-level or above) and 24 credit hours in upper division general business courses with some exceptions in that one microeconomics, one macroeconomics, one statistics, one business law, and one introduction to computers course may be lower division. As part of the general business credit hours, applicants are required to have at least 3 credit hours of business law courses. Excess upper division accounting courses may be used to meet the general business requirement; however, elementary accounting classes are never acceptable toward the required credit hours nor are courses for non-accounting majors and any MBA courses that are equivalent to elementary accounting. The exam is offered in the following time periods; January – February, April – May, July – August and October – November. **Note:** you do not have to have a bachelor's degree in order to sit for the CPA exam.

Requirements for Licensure

In addition to passing all four parts of the CPA exam with at least a 75% within an 18 month rolling period, the BOA requires that you have completed a bachelor's degree plus an additional 30 credit hours for a total of 150 credit hours before you can become licensed as a CPA. One year of work experience under the supervision of a licensed CPA is now also required to become licensed. (This experience may be obtained before or after sitting for the exam; however, all requirements to sit for the exam must be met before the work experience commences.) If you fail to apply for licensure within three years of receiving the licensure package, (sent after you pass all four parts) the CPA grades expire and you have to retake the examination.

The 150 credit hours must include a minimum of 30 credit hours of accounting courses at the 300-level or above and at least 36 credit hours of general business courses at the 300-level or above (with some exceptions). Excess upper division accounting courses may be used to meet the general

business requirement. Courses for non-accounting majors and any MBA courses that are equivalent to elementary accounting are not accepted for this requirement.

Licensed in Another State

If you are licensed in a state other than Florida you can obtain a license in Florida by a process called endorsement. You must provide evidence of meeting all of the requirements in effect at the time of your application. In addition, if you passed the exam more than two years before applying you must provide evidence of meeting continuing professional education requirements.

Accreditation

The Board accepts degrees from schools accredited by the following associations: Middle States Association, New England Association, North Central Association, Northwest Association, Southern Association of Colleges and Schools, Western Association of Schools and Colleges, Association of Independent Schools and Colleges who have been approved by the Florida State Board of Independent Colleges and Universities, and Canadian Schools who have been approved by their provincial educational bodies. If you have graduated from a school or college which is not accredited by the above-mentioned means, then you must use the provisions of F.A.C. 61H1-27.001(5).

Duplicate Courses

- No credit will be given for courses which duplicate another course for which the applicant has received credit. CPA review courses are considered as duplicates.
- For the CPA requirements in other states, you should consult the State Board of Accountancy for your state.

The Fifth Year Option

Many of our graduates satisfy the 30 credit hour requirement for the CPA by continuing on for a fifth year during which time they also can complete the requirements for either the Master of Accounting (MAcc) or Master of Science in Taxation (MST) degree. While the programs are similar in that they offer an opportunity to concentrate in accounting, they differ in degree of specialization and career path orientation. The MAcc program offers two tracks: Assurance (MAcc-Assurance) for students planning to go into public accounting and Corporate Accounting (MAcc-Corporate) for students planning careers as controllers/CFOs or financial analysts. The MST is designed for students interested in careers requiring a high degree of specialized tax knowledge in public accounting, private industry, and government. Students interested in these programs should consult with the Program Director in the Department of Accounting.

Major in Accounting

- B.B.A. in Accounting (p. 380)
- B.S.B.A. in Accounting (p. 383)

Minor in Accounting

- Accounting (p. 386)

Special Programs

- Accelerated Accounting Programs (p. 378)
- Five-Year Accounting Program with Senior-Year Internship (p. 385)

Accelerated Accounting Programs

Accelerated Master's Programs

In addition to offering the Master of Accounting (MAcc) and Master of Science in Taxation (MST) in the usual time frame involving one year of full-time study beyond the Bachelor's level, the MAcc-Assurance Track, MAcc-Corporate Track, and MST are offered as accelerated programs. These programs permit high achieving accounting students who have accelerated their education by taking advanced courses in high school, testing out of classes, taking increased class loads, or going to summer school, to start their graduate work while in the senior year.

The accelerated programs are available only to students who are undergraduate students at the University of Miami Business School. The programs are designed in such a way that students can expect to complete both their Bachelor's and Master's degrees and make significant progress on the CPA exam (if not complete it entirely) within 4½ years. In addition, these programs are extremely price competitive.

Accelerated Program Timeline

1. Internship in summer after junior year
2. Twelve credit hours of work in senior year will count towards the MAcc or MST degree (only students in the accelerated programs are eligible to take these classes during their senior year).
3. In summer after senior year take one graduate course, CPA review course, and the CPA exam.
4. Complete remaining credit hours of graduate work in fall semester after senior year.

Pre-requisites

The following must be completed before students begin their senior year:

- A minimum of 102 credit hours
- All undergraduate degree requirements except for those that can be completed in the senior year
- FIN 303 before or during senior year (for those students who intend to select the MAcc-Corporate track)
- Note: MGT 401 must be completed in the final semester of the undergraduate program.
- The following Accounting major requirements must be taken prior to senior year:

Code	Title	Credit Hours
ACC 311	Intermediate Accounting I	3
ACC 312	Intermediate Accounting II	3
ACC 402	Auditing	3
ACC 403	Fundamentals of Taxation	3
ACC 404	Advanced Taxation	3
or ACC 301	Cost Accounting	
BSL 401	The Law of Financial Transactions	3
Total Credit Hours		18

Senior Year Curriculum (Senior-Graduate Status)

The program-specific curriculum¹ for the senior year is the same for all tracks (except that students selecting the MAcc-Corporate track must complete FIN 303 in order to take the graduate finance courses required for the track) and consists of the following courses:

Code	Title	Credit Hours
ACC 301	Cost Accounting ²	3
or ACC 404	Advanced Taxation	
ACC 406	Accounting Systems	3
ACC 411	Advanced Accounting	3
FIN 303	Intermediate Financial Management (or other non-accounting undergraduate course approved by Program Director)	3
MGT 401	Strategic Management (taken in the final undergraduate semester)	3
Select one additional non-accounting undergraduate course approved by the Program Director		3
Six (6) credit hours of 500-level courses approved by the Program Director. Examples of approved courses include ACC 522 Advanced Issues in Auditing (3 credit hours) and ACC 530 International Financial Reporting Standards (one credit hour)		6
Six (6) credit hours of 600-level courses approved by the Program Director. Examples of approved courses include ACC 648 Financial Reporting Implications of Income Taxes (2 credit hours) and BUS 610 Critical Thinking and Persuasion for Business (2 credit hours)		6
Total Credit Hours		30

¹ Program requirements are subject to change. Not all courses are offered every semester or term. Consult the Program Director for the recommended sequence.

² Both ACC 301 and ACC 404 are required courses. One of these two courses is completed in the junior year. the remaining course must be completed in the senior year.

Students must select their track (MAcc-Assurance, MAcc-Corporate, or MST) by the spring semester of their senior year before registering for their final fall graduate classes.

Summer after Senior Year

Students must take one approved graduate course, such as ACC 620, in the summer following their senior year. Students are also **REQUIRED** to take an approved CPA review course during the summer following their senior year after graduation. Students who do not take a CPA review course must complete an additional six graduate credit hours which will likely delay graduation from December to the following May. Students are expected to pass part, if not all, of the CPA exam during this summer.

Final Fall Semester

In the final fall semester, students will complete the remaining 16 graduate credit hours including the requirements for their track and electives selected in consultation with the Program Director in the Department of Accounting.

Admission to the Accelerated Master's Programs

Incoming Freshmen

- Prospective students may apply to the accelerated program when they apply for admission to the University of Miami.
- SAT Reading and Math combined scores should meet or exceed 1400; high school unweighted GPA should meet or exceed 3.75.
- Students are required to have a cumulative and an accounting major GPA of 3.3 or higher by their junior at the University of Miami. Students must then maintain a cumulative GPA of 3.3 or higher and an accounting major GPA of 3.3 or higher to remain in the program. Students who do not maintain the expected GPA may be placed on probation or transferred out of the program.
- Students will need to have completed a minimum of 102 credit hours by the start of their senior year.

Current University of Miami Undergraduate Accounting Majors

- Students should apply to the accelerated program by September 30 of their junior year.
- Admission to the program will be based on GPA, letters of recommendation, and performance in upper division (300-level or above) accounting courses in progress or completed. It is expected that the students admitted to the program will have GPAs exceeding 3.3, but students with these scores are not guaranteed admission. The decision will depend on the quality and size of the applicant pool and will be made by senior school administrators and faculty.
- After admission, to remain in the program, students must maintain a cumulative GPA of 3.3 or higher and an accounting major GPA of 3.3 or higher. Students who do not maintain the expected GPA may be placed on probation or transferred out of the program.
- Students will need to have completed a minimum of 102 credit hours by the start of their senior year including the following:

Code	Title	Credit Hours
ACC 311	Intermediate Accounting I	3
ACC 312	Intermediate Accounting II	3
ACC 402	Auditing	3
ACC 403	Fundamentals of Taxation	3
ACC 404 or ACC 301	Advanced Taxation Cost Accounting	3
BSL 401	The Law of Financial Transactions	3
Total Credit Hours		18

B.B.A. in Accounting

Curriculum Requirements

Major Area of Specialization in Accounting (People & Society)

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BBA in Accounting must complete the BBA Business Core and the specific coursework for the Accounting major area of specialization as follows:

Code	Title	Credit Hours
University General Education Requirements ¹		
ENG 105	English Composition I	3
ENG 106	English Composition II	3
UMX 100	The University of Miami Experience	0
Arts and Humanities Cognate Courses		9
STEM Cognate Courses		9
Electives ²		18
BBA Business Core Requirements ¹		
ACC 211	Principles of Financial Accounting	3
ACC 212	Managerial Accounting	3
BSL 212	Introduction to Business Law	3
BTE 210	Fundamentals of Business Technology and Innovation	3
BUS 101	First Step: Freshman Integrity, Responsibility, and Success through Teamwork	3
BUS 150	Business Analytics	3
BUS 300	Critical Thinking and Persuasion for Business ³	3
ECO 211	Principles of Microeconomics (Microeconomics)	3

ECO 212	Principles of Macroeconomics (Macroeconomics)	3
FIN 302	Fundamentals of Finance	3
MAS 110	Quantitative Applications in Business (minimum grade of C- required)	3
or MTH 161	Calculus I	
MAS 201	Introduction to Business Statistics (minimum grade of C- required)	3
MAS 202	Intermediate Business Statistics	3
MGT 303	Operations Management	3
MGT 304	Organizational Behavior	3
MGT 401	Strategic Management (must be taken in the final semester)	3
MKT 201	Foundations of Marketing	3
or MKT 301	Marketing Foundations	
Major Area of Specialization in Accounting ⁴		
ACC 301	Cost Accounting	3
ACC 311	Intermediate Accounting I	3
ACC 312	Intermediate Accounting II ⁴	3
ACC 402	Auditing	3
ACC 403	Fundamentals of Taxation	3
ACC 404	Advanced Taxation	3
ACC 406	Accounting Systems	3
ACC 411	Advanced Accounting	3
BSL 401	The Law of Financial Transactions	3
Total Credit Hours		120

¹ **NOTE:** ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

² At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

³ Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

⁴ To continue as an accounting major, a student must have a minimum cumulative GPA of 3.0 in accounting courses before enrolling in ACC 312. In subsequent coursework specific to the Accounting major area of specialization, including ACC 312, a grade of "C-" or better is acceptable as long as the overall GPA in the major is a 2.0.

Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman Business student's 8-semester plan. The individual student's plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular "Area of Knowledge" within the general education requirements of the University. This means that it is possible to pursue two majors or a major and a minor within the Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge would be Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

Five-Year Accounting Program with Senior-Year Internship

The Five-Year Accounting Program with Senior-Year Internship is intended to allow exceptional students to acquire both undergraduate and graduate accounting degrees in five years while gaining valuable experience working at a full-time internship in the spring semester of their senior year. Students will also take a CPA review course and sit for the CPA exam so they can pass some (if not all) parts of the exam before they graduate with their Master of Accounting or Master of Science in Taxation degree.

Program Timeline

1. Junior Year: Complete an application to the program and apply for an internship position to take place in the spring of senior year.
2. Fall semester of Senior Year: Submit the internship agreement and apply to graduate school.
3. Spring semester of Senior Year: Complete Internship followed by 9 credit hours of coursework to complete the undergraduate degree and Accounting major.
4. Summer following Senior Year: Take CPA review and exam.

5. Fall semester following Senior Year. Begin the Master of Accounting (MAcc) or Master of Science in Taxation (MST) Program.

Pre-requisites

The program is designed for University of Miami Business School undergraduate students who are pursuing the accounting major and who have a cumulative GPA of at least 3.2 at the time of application. Admission to the program is based on several criteria, so a 3.2 GPA does not guarantee admission. Students should discuss the program and their academic plan for entering the program with an academic advisor in the Office of Undergraduate Business Education or with the Program Director in the Department of Accounting. Prior to the spring semester of their senior year, students will need to have completed all undergraduate degree requirements, except for two accounting major courses and MGT 401.

Senior Year Spring Semester Curriculum

In the first half of the spring semester of the senior year, students will work full-time in an accounting internship for which they can receive 3 credit hours toward their undergraduate degree (ACC 550). Additionally, in the spring semester of their senior year, students will take 9 credit hours in three specially-designed short-duration courses that include two accounting major courses and MGT 401.

Summer, Fall, and Spring after Senior Year

In the summer after their senior year, students will have the opportunity to take a CPA review course and sit for the CPA exam. Students will complete their Master of Accounting or Master of Science in Taxation in the fall and spring semesters after senior year and begin working that following summer or fall.

Admission to the Five-Year Accounting Program with Senior-Year Internship

- Students must apply to the program in their junior year and obtain an "approved" internship through the Toppel Career Center.
- The internship must be scheduled to take place during the spring semester of their senior year.
- In the fall semester of their senior year, before registering for their senior-year spring classes, students must submit a copy of their internship agreement to the Program Director or Program Manager in the Department of Accounting.
- By the fall semester of their senior year, students must have applied for admission to the graduate program and submitted their verification deposit to pursue a Master of Accounting or Master of Science in Taxation degree in the fall semester immediately following their senior year.
- The GMAT will be waived for students admitted into the program.

Minor in Accounting

Minor Area of Specialization in Accounting (People & Society)

The Department of Accounting allows Miami Business School students to earn a minor in Accounting. The Accounting minor is not available to non-business students.

Business students who choose to pursue the minor in Accounting must complete the following 9 credit hours of coursework in accordance with the current pre-requisite structure, which includes "Junior Status" and either completion of ACC 211 and ACC 212 or completion of ACC 221 and ACC 222:

Code	Title	Credit Hours
Required Courses ¹		
ACC 301	Cost Accounting	3
ACC 311	Intermediate Accounting I ²	3
ACC 312	Intermediate Accounting II ³	3
Total Credit Hours		9

¹ ACC 211 and ACC 212 or ACC 221 and ACC 222 are pre-requisites for all other Accounting courses.

² ACC 311 may be taken concurrently with ACC 222 for BSBA students.

³ To obtain a minor in Accounting a student must have a minimum cumulative GPA of 3.0 in Accounting courses before enrolling in ACC 312. This course has the additional pre-requisite of ACC 311.

Business Law

Department Code: BSL

Introduction

The modern manager faces increasing legal implications in daily operations and in formulating business policy. Consequently, effective decision-making requires an appreciation of the social, ethical, economic, and political bases of law as it relates to business. Business law courses provide the student with fundamental insight into legal institutions, the regulatory environment, and the nature of legal discourse, as well as an array

of substantive principles of law, including such areas as contracts, sales, business organizations, and domestic and international commercial relationships.

Educational Objectives

The primary goals of the Department of Business Law are to contribute to legal knowledge through conducting scholarly research, to disseminate it by publication in leading journals and law reviews, and to transmit that knowledge to students and the larger University-wide, business, and professional communities.

These goals both inform and drive the Department's educational objectives, which focus on:

- instilling in students a strong sense of the legal and ethical issues permeating business;
- aiding students' comprehension of the legal and regulatory environment as well as the ethical considerations and substantive laws that shape business practices and policies; and
- developing students' analytical and problem solving ability, as well as their oral and written presentation skills.

Major in Legal Studies

- B.B.A. in Legal Studies (p. 387)
- B.S.B.A. in Legal Studies (p. 390)

Minor in Business Law

- Business Law for Business Students (p. 393)
- Business Law for Non-Business Students (p. 394)

B.B.A. in Legal Studies

Major Area of Specialization in Legal Studies (People & Society)

The Bachelor of Business Administration (BBA) with a major area of specialization in Legal Studies is intended to enhance the interaction between legal counsel and the business manager, preparing graduates to excel in a wide variety of business pursuits. A flexible, inherently cross-disciplinary course of study, the Legal Studies major can facilitate careers in such fields as risk management, compliance, human resources, marketing, finance and accounting, general business or non-profit management, health care, government, and small business ownership/entrepreneurship. For some, it may also provide an appropriate foundation for the professional study of law.

Curriculum Requirements

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BBA in Legal Studies must complete the BBA Business Core and the specific coursework for the Legal Studies major area of specialization as follows:

Code	Title	Credit Hours
University General Education Requirements ¹		
ENG 105	English Composition I	3
ENG 106	English Composition II	3

BSL 499	Special Topics in Business Law	
Total Credit Hours		120

¹ **NOTE:** ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

² At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

³ Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

⁴ All specific coursework for the major area of specialization in Legal Studies must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major area of specialization. All courses must be completed within the current pre-requisite structure.

Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman business student's 8-semester plan. The individual student's plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular "Area of Knowledge" within the general education requirements of the University. This means that it is possible to pursue two majors or a major and a minor within Miami Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge is Arts and Humanities, which must be completed through a major, minor, or cognate outside of Miami Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

B.S.B.A. in Legal Studies

Major Area of Specialization in Legal Studies (People & Society)

A student may pursue the Bachelor of Science in Business Administration (BSBA) with a major area of specialization in Legal Studies. This course of study facilitates the interaction between legal counsel and the business manager, preparing graduates to excel in a wide variety of business pursuits. A flexible, inherently cross-disciplinary course of study, the Legal Studies major can facilitate careers in such fields as risk management, compliance, human resources, marketing, finance and accounting, general business or non-profit management, health care, government, and small business ownership/entrepreneurship. For some, it may also provide an appropriate foundation for the professional study of law.

Curriculum Requirements

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BSBA in Legal Studies must complete the BSBA Business Core and the specific coursework for the Legal Studies major area of specialization as follows:

Code	Title	Credit Hours
University General Education Requirements ¹

Minor in Business Law for Business Students

Minor Area of Specialization in Business Law (People & Society)

The Business Law minor is flexible, permitting students to augment their studies with an appreciation of the role of law and ethics in global citizenship as well as in the student's chosen corporate, creative, scientific, academic, professional, or personal endeavors. Students in the Miami Business School pursue the minor in Business Law by officially declaring the minor and by completing the coursework identified below.

Curriculum Requirements - Business Students

The 12-credit-hour minor in Business Law for Business School students consists of the following (all courses must be completed within the current pre-requisite structure):

Code	Title	Credit Hours
Required Courses		
BSL 212	Introduction to Business Law (part of the Business Core for Business students; pre-requisite for all other BSL courses)	3
BSL 485	Managing the Legal Factor (required in the student's final semester)	3
Choice Courses for the Minor		
Select two courses (6 credit hours) from the following:		6
BSL 304	Corporate Law	
BSL 305	Legal and Social Aspects of Business Regulation	
BSL 324	Negotiation	
BSL 333	Legal Aspects of Real Estate Transactions	
BSL 401	The Law of Financial Transactions	
BSL 412	International Business Law	
BSL 424	Intellectual Property Law	
BSL 435	Law of Entrepreneurship	
BSL 460	Health Care Law and Ethics	
BSL 476	The Law of Risk	
BSL 498	Special Topics in Business Law	
BSL 499	Special Topics in Business Law	
Total Credit Hours		12

NOTE: All specific coursework for the minor in Business Law must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the minor area of specialization.

Minor in Business Law for Non-Business Students

Minor Area of Specialization in Business Law (People & Society)

The Business Law minor is flexible, permitting students to augment their studies with an appreciation of the role of law and ethics in global citizenship as well as in the student's chosen corporate, creative, scientific, academic, professional, or personal endeavors. Non-Business students pursue the minor in Business Law by officially declaring the minor at their home school or college and by completing the coursework identified below.

Interested students, before declaring the minor, should consult with an academic advisor *in the School or College of their degree/major* to determine if the minor in Business Law is acceptable. If so, neither advice nor consent from either the Office of Undergraduate Business Education or the Business Law Department is necessary.

Curriculum Requirements for Non-Business Students

The 12-credit-hour minor in Business Law for non-business students consists of the following (all courses must be completed within the current pre-requisite structure):

Code	Title	Credit Hours
Required Course		
BUS 202	Introduction to the Legal Environment of Business	3
Choice Courses for the Minor		
Select three courses (9 credit hours) from the following:		9
BSL 304	Corporate Law	
BSL 305	Legal and Social Aspects of Business Regulation	
BSL 324	Negotiation	
BSL 333	Legal Aspects of Real Estate Transactions	
BSL 401	The Law of Financial Transactions	
BSL 412	International Business Law	
BSL 424	Intellectual Property Law	
BSL 435	Law of Entrepreneurship	
BSL 460	Health Care Law and Ethics	
BSL 476	The Law of Risk	
BSL 498	Special Topics in Business Law	
BSL 499	Special Topics in Business Law	
Total Credit Hours		12

NOTE: All specific coursework for the minor in Business Law must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the minor area of specialization.

Business Technology

Department Code: BTE

Introduction

The Department of Business Technology serves the University as the focus for employing business technology and information management in the efficient solution of the entire range of business problems.

Today's business and government organizations rely heavily upon information management for efficient administration and management. Collection, storage, and retrieval of data by computers are involved in the wide range of business activities including daily operations, management decision-making, and long-range planning. As the dependence of management on business technology grows, so does the need for business technology specialists. The courses and degree programs are described below.

Educational Objectives

The Business Technology major is designed to provide the student with the key information technology and management skills needed in today's business environment, plus a firm grounding in the primary business areas in which these skills will be applied. Graduates of the program may qualify for entry-level positions as systems and/or information analysts, information security specialists, consultants, user support analysts, programmers, or other information management positions.

Major in Business Technology

- B.B.A. in Business Technology (p. 395)
- B.S.B.A. in Business Technology (p. 398)

Minor in Business Technology

- Business Technology (p. 401)

B.B.A. in Business Technology

Curriculum Requirements

Major Area of Specialization in Business Technology (STEM)

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BBA in Business Technology must complete the BBA Business Core and the specific coursework for the Business Technology major area of specialization as follows:

Code	Title	Credit Hours
University General Education Requirements ¹

Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

² At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

³ Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

⁴ All specific coursework for the major area of specialization in Business Technology must be completed with a grade of "C-" or higher. In addition, a minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major area of specialization. All courses must be completed within the current pre-requisite structure.

Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman business student's 8-semester plan. The individual student's plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular "Area of Knowledge" within the general education requirements of the University. This means that it is possible to pursue two majors, or a major and a minor, within Miami School of Business and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge is Arts and Humanities, which must be completed through a major, minor, or cognate outside of the School of Business.

Students construct their individualized plans in collaboration with their assigned academic advisor.

Minor in Business Technology

Minor Area of Specialization in Business Technology (STEM)

Miami Business School students, as well as students in the other schools and colleges of the University of Miami, may pursue the minor in Business Technology by officially declaring the minor at their home school or college and completing the coursework specified below. Interested *non-business* students, before declaring the minor, should consult with an academic advisor *in the School or College of their degree/major* to determine if the minor in Business Technology is acceptable. If so, neither advice nor consent from either the Office of Undergraduate Business Education or the Business Technology Department is necessary.

The 12-credit-hour minor in Business Technology consists of the following:

Code	Title	Credit Hours
Required Courses		
BTE 320	Introduction to Programming	3
BTE 412	Foundations of Business Enterprise Technologies	3
Choice Courses for the Minor ¹		
Select two courses (6 credit hours) from the following:		6
BTE 324	Object-Oriented Programming (pre-requisite BTE 320)	
BTE 360	Systems Analysis and Design	
BTE 389	Launching HighTechnology Ventures	
BTE 400	Web-Mobile-Cloud (pre-requisite BTE 320)	
BTE 401	Computers in an Inter-Networked Society	
BTE 413	Big Data Strategy	
BTE 417	Fundamentals of Tech Project Management	
BTE 423	Database Management Systems (pre-requisite BTE 320)	
BTE 430	Business Networks	
BTE 450	Introduction to Health Informatics	
BTE 465	Web Application Development (pre-requisite BTE 320)	
BTE 496	Directed Studies in Business Technology (Only 3 credit hours of either BTE 496 or 498 may be selected for the minor.)	
BTE 497	Directed Studies in Business Technology	
BTE 498	Special Topics in Business Technology (Only 3 credit hours of either BTE 496 or 498 may be selected for the minor.)	
BTE 499	Special Topics in Business Technology	
BTE 523	Big Data Development (pre-requisite BTE 320)	
BTE 524	Mobile Apps Development (pre-requisite BTE 320 & BTE 324)	
BTE 535	Information Security (pre-requisite BTE 320)	
BTE 550	Business Technology Internship	

BTE 565	Mobile to Cloud: Developing Distributed Applications (pre-requisite BTE 320 & BTE 324)	
Total Credit Hours		12

¹ All courses must be completed within the current pre-requisite structure.

Note: All specific coursework for the minor in Business Technology must be completed with a grade of “C-” or better. In addition, a minimum cumulative GPA of 2.5 is required for all specific coursework taken in the minor area of specialization.

Economics

Department Code: ECO

Introduction and Educational Objectives

Economics uses the idea of optimizing behavior to provide a unified framework for studying human action. The economics curriculum is designed to give business students an understanding of economic theory and its application to a wide range of problems. The program provides excellent preparation for careers in business, government, and international agencies. It is particularly recommended for students planning graduate study or professional training in fields such as law, business, international studies, public administration, and economics.

A student pursuing the Economics major will select one of two possible tracks: Political Economy (the People and Society track) or Quantitative Economics (the Science, Technology, Mathematics, and Engineering track).

Members of the Department are prepared to counsel students in the selection of courses and in other matters relating to the preparation for careers. Economics may also be the major area of specialization of a candidate for the Master of Arts (p. 1016) and Doctor of Philosophy (p. 995) degrees. Consult the Graduate Academic Programs (p. 989) section of the Bulletin for general requirements of these programs of study.

Major in Economics

- B.B.A. in Economics (p. 402)
- B.S.B.A. in Economics (p. 407)

Minors in Economics

- Minor in Political Economy for Business Students (p. 412)
- Minor in Political Economy for Non Business Students (p. 413)
- Minor in Quantitative Economics for Business Students (p. 414)
- Minor in Quantitative Economics for Non Business Students (p. 415)

B.B.A. in Economics

Curriculum Requirements

Major Area of Specialization in Economics (People & Society or STEM)

Miami Business School students who wish to pursue the Economics major area of specialization will choose between two tracks: Political Economy (P&S) or Quantitative Economics (STEM).

In the Political Economy track, People and Society courses are predominant. In the Quantitative Economics track, Science, Technology, Engineering, and Mathematics courses are predominant.

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BBA in Economics must complete the BBA Business Core and the specific coursework for one of the Economics major tracks as follows:

Code	Title	Credit Hours
University General Education Requirements ¹		
ENG 105	English Composition I	3
ENG 106	English Composition II	3
UMX 100	The University of Miami Experience	0
Arts and Humanities Cognate Courses		9
STEM or People and Society Cognate Courses (depends upon which Major track is selected)		9
Electives ²		27

ECO 521	Advanced Macroeconomic Theory
ECO 533	Advanced Microeconomic Theory
Quantitative Economics Track Required Courses (STEM) : ⁶	
ECO 211	Principles of Microeconomics (taken as part of the Business Core)
ECO 212	Principles of Macroeconomics (taken as part of the Business Core)
ECO 302	Microeconomic Theory (requires MTH 161 or equivalent as a pre-requisite)
ECO 303	Macroeconomic Theory
Major Choice Courses (STEM) - Select four courses (12 credit hours) from the following: ⁵	
ECO 430	Applied Econometrics
ECO 444	Game Theory in Economic Applications.
ECO 460	Industrial Organization
ECO 499	Special Topics in Economics (STEM Topics)
ECO 510	Mathematical Economics and Applications
ECO 511	Empirical Labor Economics
ECO 512	Topics in Mathematical Economics
ECO 520	Econometrics
ECO 521	Advanced Macroeconomic Theory
ECO 533	Advanced Microeconomic Theory
Total Credit Hours	120

¹ **NOTE:** ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

² At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

³ Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

⁴ All specific coursework for the major in Economics must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.0 is required for all specific coursework taken in the major area of specialization.
All courses must be taken within the current pre-requisite structure.

⁵ Course pre-requisites vary by course.

⁶ MTH 161 or its equivalent and ECO 302 are required for Quantitative Economics.

Sample Plans of Study

This Sample Plan of Study represents one possible version of a new freshman Business student's 8-semester plan. The individual student's plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular "Area of Knowledge" within the general education requirements of the University. This means that it is possible to pursue two majors or a major and a minor within the Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge would be Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

Minor in Political Economy for Business Students

Minor Area of Specialization in Political Economy (People & Society)

Curriculum Requirements - Business Students

Code	Title	Credit Hours
Required Courses		
ECO 211	Principles of Microeconomics (taken as part of the Business Core)	3
ECO 212	Principles of Macroeconomics (taken as part of the Business Core)	3
ECO 300 or ECO 302	Microeconomic Theory and Applications ^{1,2} Microeconomic Theory	3
Choice Courses for the Minor		
Select three courses from the following: ³		9
ECO 303	Macroeconomic Theory	
ECO 311	Labor Economics (I)	
ECO 333	Industrial Economics and Public Policy	
ECO 345	Environmental Economics	
ECO 351	Economics of Development	
ECO 371	Latin America and the Global Economy	
ECO 379	The Political Economy of Growth	
ECO 386	Health Economics	
ECO 403	Monetary Economics	
ECO 420	Economic Growth	
ECO 441	International Trade Theory	

ECO 442	International Monetary Economics
ECO 443	Economic Analysis of Energy and Commodity Markets
ECO 445	Global Economics: Trade and Currencies
ECO 498	Special Topics in Economics (People and Society Topics)
ECO 532	History of Economic Thought
Students may select only one course (3 credit hours) of their minor choice courses from the following STEM courses: ³	
ECO 430	Applied Econometrics
ECO 444	Game Theory in Economic Applications.
ECO 460	Industrial Organization
ECO 499	Special Topics in Economics (STEM Topics)
ECO 510	Mathematical Economics and Applications
ECO 511	Empirical Labor Economics
ECO 512	Topics in Mathematical Economics
ECO 520	Econometrics
ECO 521	Advanced Macroeconomic Theory
ECO 533	Advanced Microeconomic Theory
Total Credit Hours	18

¹ Pre-requisites for ECO 300: ECO 211 and MAS 110 or MTH 130 or MTH 141 or MTH 151 or MTH 161 or MTH 171 or an equivalent calculus course or higher

² Pre-requisites for ECO 302 : ECO 211 and MTH 141 or MTH 151 or MTH 161 or MTH 171 or an equivalent Calculus 1 course or higher

³ Course pre-requisites vary by course.

* **NOTE:** All specific coursework for the minor in Economics must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.0 is required for all specific coursework taken in the minor area of specialization.

Minor in Political Economy for Non Business Students

Minor Area of Specialization in Political Economy (People & Society)

Curriculum Requirements for Non-Business Students

Interested students should consult with an academic advisor **in the School or College of their degree/major** to determine if the minor in Political Economy is acceptable. If so, neither advice nor consent from either the Office of Undergraduate Business Education or the Economics department is necessary for a student to choose or complete the Political Economy minor. Instead the non-business student should simply declare the Political Economy minor and complete the required 15 credit hours of Economics courses, according to the following:

Code	Title	Credit Hours
Required Courses		
ECO 211	Principles of Microeconomics	3
ECO 212	Principles of Macroeconomics	3
ECO 300 or ECO 302	Microeconomic Theory and Applications ^{1,2} Microeconomic Theory	3
Choice Courses for the Minor		
Select two courses from the following: ³		6
ECO 303	Macroeconomic Theory	
ECO 311	Labor Economics (I)	
ECO 333	Industrial Economics and Public Policy	
ECO 345	Environmental Economics	
ECO 351	Economics of Development	
ECO 371	Latin America and the Global Economy	
ECO 379	The Political Economy of Growth	
ECO 386	Health Economics	
ECO 403	Monetary Economics	
ECO 420	Economic Growth	
ECO 441	International Trade Theory	

ECO 442	International Monetary Economics
ECO 443	Economic Analysis of Energy and Commodity Markets
ECO 445	Global Economics: Trade and Currencies
ECO 498	Special Topics in Economics (People and Society Topics)
ECO 532	History of Economic Thought
Students may select only one course (3 credit hours) of their minor choice courses from the following STEM courses: ³	
ECO 430	Applied Econometrics
ECO 444	Game Theory in Economic Applications.
ECO 460	Industrial Organization
ECO 499	Special Topics in Economics (STEM Topics)
ECO 510	Mathematical Economics and Applications ⁴
ECO 511	Empirical Labor Economics
ECO 512	Topics in Mathematical Economics
ECO 520	Econometrics
ECO 521	Advanced Macroeconomic Theory
ECO 533	Advanced Microeconomic Theory
Total Credit Hours	15

¹ Pre-requisites for ECO 300: ECO 211 and MAS 110 or MTH 130 or MTH 141 or MTH 151 or MTH 161 or MTH 171 or an equivalent calculus course or higher

² Pre-requisites for ECO 302 : ECO 211 and MTH 141 or MTH 151 or MTH 161 or MTH 171 or an equivalent Calculus 1 course or higher

³ Course pre-requisites vary by course.

* **NOTE:** All specific coursework for the minor in Economics must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.0 is required for all specific coursework taken in the minor area of specialization.

Minor in Quantitative Economics for Business Students

Minor Area of Specialization in Quantitative Economics (STEM)

Curriculum Requirements for Business Students

Code	Title	Credit Hours

* **NOTE:** All specific coursework for the minor in Economics must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.0 is required for all specific coursework taken in the minor area of specialization.

Finance

Department Code: FIN

Introduction

The finance major area of specialization is designed to prepare business students for a wide variety of careers. Because finance is focused on valuation and decision making, it is applicable to virtually every possible type of organization.

Educational Objectives

The finance discipline is focused on two primary issues. The first is determining value. The second is making the best decisions with respect to value. We study these issues in a variety of contexts and industries.

The three primary areas of finance are financial management, investments, and financial markets and intermediaries. Financial management focuses on how an organization can accomplish its mission. For example, a corporation seeks to create and maintain wealth, and a non-profit organization seeks to improve the world in some way. All organizations want to achieve their mission to the greatest extent possible, and that requires making the best decisions with respect to value. The area of investments studies the purchase and sale of financial securities, such as stocks, bonds, options, and futures from the point of view of an investor. Financial markets are created to facilitate the trading (buying/selling) of financial securities. Financial intermediaries sell claims on themselves to investors, such as stock, life insurance, or a bank deposit. Financial intermediaries then invest the money from such sales in other assets such as loans, real estate, or other financial securities.

Major Areas of Specialization

- Finance

- International Finance and Marketing
- Real Estate

Important Note: To be eligible for any major specialization offered by the Finance Department, the following requirements must be met:

- A student must earn a grade of "B" (grade point of 3.0) or higher in FIN 302 (note that a grade of "B-" does not qualify).
- A student must have a cumulative University of Miami GPA of 2.5 or higher before enrolling in FIN 303 or FIN 320.
- All specific coursework for the major area of specialization must be completed with a grade of "C-" or higher (except for the minimum "B" grade required for FIN 302, as noted).
- A minimum cumulative GPA of 2.0 is required for all specific coursework taken in the major area of specialization.

Minor Areas of Specialization

- Finance
- Real Estate

Majors in Finance, International Finance and Marketing, and Real Estate

- B.B.A. in Finance (p. 416)
- B.S.B.A. in Finance (p. 425)
- B.B.A. in International Finance and Marketing (p. 419)
- B.S.B.A. in International Finance and Marketing (p. 428)
- B.B.A. in Real Estate (p. 422)

MGT 304	Organizational Behavior	3
MGT 401	Strategic Management (must be taken in the final semester)	3
MKT 201 or MKT 301	Foundations of Marketing Marketing Foundations	3
Major Area of Specialization in Finance ^{4, 5}		
FIN 302	Fundamentals of Finance (taken as part of the Business Core - minimum B grade required)	
FIN 303	Intermediate Financial Management (pre-requisite FIN 302) ⁶	3
FIN 320	Investment and Security Markets (pre-requisite FIN 302) ⁶	3
Major Choice Courses		12
Select two courses (6 credit hours) at the 300-500 level from the Finance departmental offerings. ⁷		
Select two courses (6 credit hours) at the 400 or 500 level from the Finance departmental offerings.		
Total Credit Hours		120

¹ **NOTE:** ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

² At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

³ Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

⁴ In order to pursue a major in Finance, a student must earn a grade of "B" (grade point of 3.0) or higher in FIN 302 (note that a grade of "B-" does not qualify), and must have a minimum cumulative University of Miami GPA of 2.5 before enrolling in FIN 303 or FIN 320.

⁵ All specific coursework for the major area of specialization in Finance must be completed with a grade of "C-" or higher (except for the minimum "B" grade required for FIN 302, as noted). A minimum cumulative GPA of 2.0 is required for all specific coursework taken in the major area of specialization.

All courses must be taken within the current pre-requisite structure.

⁶ Students are strongly encouraged to take FIN 303 and FIN 320 during the same semester.

⁷ Excluding FIN 300 and FIN 308.

Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman Business student's 8-semester plan. The individual student's plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular "Area of Knowledge" within the general education requirements of the University. This means that it is possible to pursue two majors or a major and a minor within the Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge would be Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

B.B.A. in International Finance and Marketing

Introduction

The International Finance and Marketing major area of specialization is aimed at meeting the needs of business students seeking to pursue a career in international business, finance, and/or marketing.

Educational Objectives

The International Finance and Marketing major area of specialization is designed to prepare students for the most critical areas of decision making in international business. The objective is to provide business students with a comprehensive curriculum based on a strong program of international courses, and to create opportunities for access to multinational companies and the international business community.

Curriculum Requirements

Major Area of Specialization in International Finance and Marketing (STEM).

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BBA in International Finance and Marketing must complete the BBA Business Core and the specific coursework for the International Finance and Marketing major area of specialization as follows:

Code	Title	Credit Hours
University General Education Requirements ¹		
ENG 105	English Composition I	3
ENG 106	English Composition II	3

B.B.A. in Real Estate

Introduction

The Real Estate area of study at the University of Miami Business School is for business students seeking to apply the theoretical and analytical concepts of finance to real estate lending, investment, and development.

Educational Objectives

The importance of understanding developments in real estate and mortgage markets and the integration of real estate investments into the national and international economy have led to increased interest in this important field. The real estate major area of specialization strengthens ties with important segments of the business community and builds on the University's strategic strengths in architecture (New Urbanism) and urban planning.

Business students pursuing the major area of specialization in Real Estate should consider taking the courses necessary to meet the requirements of the Urban Studies Minor (p. 359) (For more information, contact the Director of the Urban Studies Program. (<http://www.as.miami.edu/urbanstudies/contact>))

Curriculum Requirements

Major Area of Specialization in Real Estate (STEM)

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BBA in Real Estate must complete the BBA Business Core and the specific coursework for the Real Estate major area of specialization as follows:

Code	Title	Credit Hours
University General Education Requirements ¹		
ENG 105	English Composition I	3

¹ **NOTE:** ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

² At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

³ Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

⁴ In order to pursue a major area of specialization in Real Estate, a student must earn a grade of "B" (grade point of 3.0) or higher in FIN 302 (note that a grade of "B-" does not qualify), and must have a minimum cumulative University of Miami GPA of 2.5 before enrolling in FIN 303 or FIN 320.

⁵ All specific coursework for the major in Real Estate must be completed with a grade of "C-" or higher (except for the minimum "B" grade required for FIN 302, as noted). A minimum cumulative GPA of 2.0 is required for all specific coursework taken in the major area of specialization.

All courses must be taken within the current pre-requisite structure.

⁶ Currently, two of the three major electives for Real Estate require FIN 320 as a pre-requisite.

⁷ The pre-requisite for FIN 348 is FIN 347.

Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman business student's 8-semester plan. The individual student's plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular "Area of Knowledge" within the general education requirements of the University. This means that it is possible to pursue two majors or a major and a minor within Miami Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge is Arts and Humanities, which must be completed through a major, minor, or cognate outside of Miami Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

B.S.B.A. in International Finance and Marketing

Introduction

The International Finance and Marketing major area of specialization is aimed at meeting the needs of business students seeking to pursue careers in international business, finance, and/or marketing.

Educational Objectives

The International Finance and Marketing major area of specialization is designed to prepare Miami Business School students for the most critical areas of decision making in international business: Finance and Marketing. The objective is to provide business students with a comprehensive curriculum based on a strong program of international courses, and create opportunities for access to multinational companies and the international business community.

Curriculum Requirements

Major Area of Specialization in International Finance and Marketing (STEM)

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BSBA in International Finance and Marketing must complete the BSBA Business Core and the specific coursework for the International Finance and Marketing major area of specialization as follows:

Code	Title	Credit Hours
University General Education Requirements ¹		
ENG 105	English Composition I	3
ENG 106	English Composition II	3

Total Credit Hours		120

¹ **NOTE:** ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

² At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

³ Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

⁴ In order to pursue a major in International Finance and Marketing, a student must earn a grade of "B" (grade point of 3.0) or higher in both FIN 302 and MKT 201/MKT 301 (note that a grade of "B-" does not qualify), and must have a minimum cumulative University of Miami GPA of 2.5 before enrolling in FIN 303 or FIN 320.

⁵ All specific coursework for the major in International Finance and Marketing must be completed with a grade of "C-" or higher (except for the minimum "B" grade required for FIN 302 and MKT 201/MKT 301, as noted). A minimum cumulative GPA of 2.0 is required for all specific coursework taken in the major area of specialization.

All courses must be taken within the current pre-requisite structure.

⁶ No 300-level Finance course may be used to satisfy this requirement. Additionally, some 400-level Finance courses require FIN 303 as a pre-requisite.

BSBA in International Finance and Marketing - Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman business student's 8-semester plan. The individual student's plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular "Area of Knowledge" within the general education requirements of the University. This means that it is possible to pursue two majors, or a major and a minor, within Miami Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge is Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

B.S.B.A. in Real Estate

Introduction

The Real Estate major area of specialization at the University of Miami Business School is for business students seeking to apply the theoretical and analytical concepts of finance to real estate lending, investment, and development.

Educational Objectives

The importance of understanding developments in real estate and mortgage markets and the integration of real estate investments into the national and international economy have led to increased interest in this important field. The real estate major strengthens ties with important segments of the business community and builds on the University's strategic strengths in architecture (New Urbanism) and urban planning.

Business students pursuing the Real Estate major area of specialization should consider taking the courses necessary to meet the requirements of the Urban Studies Minor (p. 359) (For more information, contact the Director of the Urban Studies Program. (<http://www.as.miami.edu/urbanstudies/contact>))

Curriculum Requirements

Major Area of Specialization in Real Estate (STEM)

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BSBA in Real Estate must complete the BSBA Business Core and the specific coursework for the Real Estate major area of specialization as follows:

Code	Title	Credit Hours
University General Education Requirements ¹		
ENG 105	English Composition I	3

or FIN 303	Intermediate Financial Management	
FIN 344	Real Estate Investment Analysis (pre-requisite FIN 302 & pre- or co-requisite FIN 303 or FIN 320)	3
FIN 347	Introduction to ARGUS	1
FIN 445	Real Estate Finance (pre-requisite FIN 344)	3
Major Choice Courses - Select two courses (6 credit hours) from the following: ⁶		6
FIN 423	Introduction to Alternative Investment (pre-requisites FIN 302 & FIN 320)	
FIN 427	Fixed Income Markets and Analysis (pre-requisites FIN 302 & FIN 320)	
FIN 446	Real Estate Market Analysis (pre- or co-requisite FIN 344)	
Optional Course (Strongly Recommended)		
FIN 348	Advanced ARGUS (offered as a one-credit enhancement in the spring semester) ⁷	
Total Credit Hours		120

¹ **NOTE:** ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

² At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

³ Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

⁴ In order to pursue a major area of specialization in Real Estate, a student must earn a grade of "B" (grade point of 3.0) or higher in FIN 302 (note that a grade of "B-" does not qualify), and must have a minimum cumulative University of Miami GPA of 2.5 before enrolling in FIN 303 or FIN 320.

- 5 All specific coursework for the major area of specialization in Real Estate must be completed with a grade of "C-" of higher (except for the minimum "B" grade required for FIN 302, as noted). A minimum cumulative GPA of 2.0 is required for all specific coursework taken in the major area of specialization.
All courses must be taken within the current pre-requisite structure.
- 6 Currently, two of the three major electives for Real Estate require FIN 320 as a pre-requisite.
- 7 The pre-requisite for FIN 348 is FIN 347.

BSBA in Real Estate - Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman business student's 8-semester plan. The individual student's plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular "Area of Knowledge" within the general education requirements of the University. This means that it is possible to pursue two majors, or a major and a minor, within Miami Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge is Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

Minor in Finance

Minor Area of Specialization in Finance (STEM)

Miami Business School students, as well as students in the other schools and colleges of the University of Miami, may pursue a minor in Finance by officially declaring the minor at their home school or college. Interested *non-business* students, before declaring the minor, should consult with an academic advisor *in the School or College of their degree/major* to determine if the minor in Finance is acceptable. If so, neither the advice nor the consent of either the Office of Undergraduate Business Education or the Finance Department is necessary.

The 12-credit-hour minor in Finance consists of the following (all courses must be taken within the current pre-requisite structure):

Code	Title	Credit Hours
Required Courses		
FIN 302	Fundamentals of Finance (part of Business Core for Business students)	3
FIN 303	Intermediate Financial Management ^{1, 2}	3
FIN 320	Investment and Security Markets ¹	3
Choice Course for the Minor		
Select one course (3 credit hours) at the 300 or 400 level from Finance departmental offerings. ³		3
Total Credit Hours		12

- ¹ Pre-requisite is FIN 302
- ² Business students who combine the Entrepreneurship major area of specialization with the Finance minor do not take FIN 303. They are required to take FIN 308 for the Entrepreneurship major and an additional FIN 300 or 400 level course for the Finance minor to replace the FIN 303 requirement.
- ³ excluding FIN 300 and FIN 308
- * **NOTE:** All specific coursework for the minor in Finance must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.0 is required for all specific coursework taken in the minor area of specialization.

Minor in Real Estate

Minor Area of Specialization in Real Estate (STEM)

The Miami Business School's Real Estate minor is for business students seeking to apply the theoretical and analytical concepts of finance to real estate lending, investment, and development.

The importance of understanding developments in real estate and mortgage markets and the integration of real estate investments into the national and international economy have led to increased interest in this important field. The Real Estate minor strengthens ties with important segments of the business community.

The Real Estate minor consists of the following classes:

Code	Title	Credit Hours
Required Courses		
FIN 302	Fundamentals of Finance (taken as part of the Business Core for Business students)	3
FIN 303 or FIN 320	Intermediate Financial Management (pre-requisite FIN 302) Investment and Security Markets	3
FIN 344	Real Estate Investment Analysis (pre-requisite FIN 302 & pre- or co-requisite FIN 303 or FIN 320; offered in fall)	3
FIN 445	Real Estate Finance (pre-requisite FIN 344; offered in spring)	3
FIN 446	Real Estate Market Analysis (pre-requisite FIN 344; offered in spring)	3
The following one-credit hour courses are strongly recommended, though not required:		
FIN 347	Introduction to ARGUS (pre-requisite FIN 302)	
FIN 348	Advanced ARGUS (pre-requisite FIN 347)	
Total Credit Hours		15

- * **NOTE:** All specific coursework for the minor in Real Estate must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.0 is required for all specific coursework taken in the minor area of specialization.

Health Management and Policy

Department Code: HSM

*The department name change from Health Sector Management and Policy to Health Management and Policy is pending Board of Trustee Approval

Introduction

The Health Sector Management and Policy major area of specialization is designed for Miami Business School students seeking to pursue careers in health management and policy in any of a variety of health care organizations and public settings. The curriculum enables students to gain skills and understanding in the specialized language of health care and to comprehend concepts of management, financing, politics, law, and ethics as applied to the health care sector. The major area of specialization is also ideal for students aspiring to earn advanced degrees in health administration, health economics, medical sociology, public health, or law.

Educational Objectives

The purpose of the major area of specialization in Health Sector Management and Policy is to provide the business student with a basic understanding of the management, economic and financial structure, as well as the legal, ethical, and governmental policy aspects of the health care industry. Appropriate candidates for the major area of specialization in Health Sector Management and Policy include Miami Business School students interested in exploring the health care sector, working in the legal, management, or policy-making aspects of the health care sector or those wanting to have an augmentation to their pre-med, pre-law or pre-MBA, MPA or MPH studies, as well as those who expect to pursue a Ph.D. The minor

area of specialization in Health Sector Management and Policy is available to students from all University of Miami schools and colleges. Members of the Department are prepared to counsel students in the selection of courses and in other matters relating to the preparation for careers.

Major in Health Sector Management and Policy

- B.B.A. in Health Sector Management and Policy (p. 436)
- B.S.B.A. in Health Sector Management and Policy (p. 439)

Minor in Health Sector Management and Policy

- Health Sector Management and Policy (p. 442)

B.B.A. in Health Sector Management and Policy

Curriculum Requirements

Major Area of Specialization in Health Sector Management and Policy (People & Society)

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BBA in Health Sector Management and Policy must complete the BBA Business Core and the specific coursework for the Health Sector Management and Policy major area of specialization as follows:

Code	Title	Credit Hours

Total Credit Hours		120

- 1 **NOTE:** ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.
- 2 At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.
- 3 Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.
- 4 All specific coursework for the major area of specialization in Health Sector Management and Policy must be completed with a grade of "C" or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major area of specialization. All courses must be taken within the current pre-requisite structure.
- 5 No one course may count toward more than one major or minor area of specialization.

Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman Business student's 8-semester plan. The individual student's plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular "Area of Knowledge" within the general education requirements of the University. This means that it is possible to pursue two majors or a major and a minor within the Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge would be Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

Minor in Health Sector Management and Policy

Minor Area of Specialization in Health Sector Management and Policy (People & Society)

The purpose of the minor in Health Sector Management and Policy is to provide the student with a basic understanding of the organizational, management, economic, and financial structure, as well as the legal, ethical, and governmental policy of the health care industry. Appropriate candidates for this minor will include students interested in: exploring the health care sector; working in the legal, management, or policy making aspects of the health care sector; or those wanting to have an augmentation to their health sciences, nursing, pre-med, pre-law or pre-MBA/MPA studies.

Miami Business School students, as well as students in the other schools and colleges of the University of Miami, may pursue the minor in Health Sector Management and Policy by officially declaring the minor at their home school or college and completing the coursework specified below. Interested *non-business* students, before declaring the minor, should consult with an academic advisor *in the School or College of their degree/major* to determine if the minor in Health Sector Management and Policy is acceptable. If so, neither advice nor consent from either the Office of Undergraduate Business Education or the Department of Health Management and Policy is necessary.

The 12-credit-hour minor in Health Sector Management and Policy consists of four courses— three required and one minor choice course as indicated below (all courses must be taken within the current pre-requisite structure):

Code	Title	Credit Hours
Foundational Course		
HSM 270 or MGT 270	Introduction to Health Sector Management and Policy ¹ Introduction to Health Sector Organization and Management	3
Required Courses		
BSL 460 or HSM 460	Health Care Law and Ethics ² Health Care Law and Ethics	3
HSM 320 or HSM 350	Health Care Demand and Supply (pre-requisite HSM 270 or MGT 270) ³ Production and Consumption of Health and Health Care	3
Choice Course for the Minor		
Select one course (3 credit hours) from the following:		3
HSM 310	Population Health (pre-requisite HSM 270 or MGT 270)	
HSM 498	Special Topics in Health Sector Management and Policy	
HSM 499	Special Topics in Health Sector Management and Policy	
INS 570	Globalization and Health	
INS 571	International Development and Human Welfare	
INS 572	Global Health Policy and Ethics	

INS 573	Disasters, Terrorism and Global Public Health	
MKT 388 or HSM 388	Health Care Marketing ² Health Care Marketing	
SOC 321	Applied Health Policy	
Total Credit Hours		12

- ¹ HSM 270/MGT 270, foundational for the Health Sector Management and Policy minor, is a pre-requisite for all other HSM courses. Non-Business students should take HSM 270 rather than MGT 270 as the foundational course.
- ² BSL 460 and MKT 388 are intended for Business students who have declared the HSMP minor and have the BSL 212 and MKT 201 or MKT 301 pre-requisites. HSM 460 and HSM 388 are intended for Non-Business students who have declared the HSMP minor.
- ³ All Business students who choose to minor in HSMP should take HSM 350 instead of HSM 320. The pre-requisites for HSM 350 are HSM 270/MGT 270, ECO 211, and ECO 212.
- * **Note:** All specific coursework for the minor in Health Sector Management and Policy must be completed with a grade of "C" or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the minor area of specialization. No one course may count toward more than one major or minor area of specialization.

Management

Department Code: MGT

Introduction

The Department of Management at the University of Miami Business School is heterogeneous with respect to both research and teaching areas. Faculty are specialized in and teach courses that span a number of fields including entrepreneurship, human resources, international management, leadership, operations management, organizational behavior, strategic management, supply chain management, and teams. Given both the multinational context and diversity present in twenty-first century organizations, coursework in the Department of Management is focused on preparing business students to be productive and effective contributors to the various communities they are embedded within or impact. Students who select any of the Management major areas of specialization pursue a variety of careers after graduation including starting businesses, running family businesses, accepting management positions in domestic or international organizations, attending law school, or pursuing other advanced graduate degrees.

Educational Objectives

- The development of critical thinking skills to evaluate decision choices, challenges, and issues confronting managers today;
- The improvement of interpersonal skills and learning to work effectively in teams; and
- An understanding of the tools, methods, and procedures used to successfully lead people and organizations.

Note: No one course may be applied toward more than one major and/or minor area of specialization in the Department of Management. All area specific coursework for any major and/or minor in the Department of Management must be completed with a grade of "C" or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major and/or minor area of specialization.

- Management for Non-Business Students (p. 463)

B.B.A. in Entrepreneurship

Curriculum Requirements

Major Area of Specialization in Entrepreneurship (People & Society)

The Entrepreneurship major prepares Miami Business School students to engage in the process of value creation, regardless of organizational context. Students will develop a holistic view of organizational creation and change that is applicable to either starting a new venture (for profit or nonprofit), or working effectively within an existing organization.

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BBA in Entrepreneurship must complete the BBA Business Core and the specific coursework for the Entrepreneurship major area of specialization as follows:

Total Credit Hours	120

- ¹ **NOTE:** ENG 105 and ENG 106 , or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.
- ² At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.
- ³ Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.
- ⁴ All specific coursework for the major area of specialization in Entrepreneurship must be completed with a grade of "C" or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major area of specialization. All courses must be taken within the current pre-requisite structure.
- ⁵ No one course may be applied toward more than one major and/or minor area of specialization in the Department of Management.

Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman Business student's 8-semester plan. The individual student's plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular "Area of Knowledge" within the general education requirements of the University. This means that it is possible to pursue two majors or a major and a minor within the Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge would be Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

B.S.B.A. in Entrepreneurship

Curriculum Requirements

Major Area of Specialization in Entrepreneurship (People & Society)

The Entrepreneurship major prepares Miami Business School students to engage in the process of value creation, regardless of organizational context. Students pursuing this major will develop a holistic view of organizational creation and change that is applicable to either starting a new venture (for profit or nonprofit) or working effectively within an existing organization.

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BSBA in Entrepreneurship must complete the BSBA Business Core and the specific coursework for the Entrepreneurship major area of specialization as follows:

Code	Title	Credit Hours
University General Education Requirements ¹		
ENG 105	English Composition I	3
ENG 106	English Composition II	3

- 3 Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or ENG 230 with at least a C- before enrolling in BUS 300.
- 4 All specific coursework for the major area of specialization in Human Resource Management must be completed with a grade of "C" or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major area of specialization. All courses must be taken within the current pre-requisite structure.
- 5 No one course may be applied toward more than one major and/or minor area of specialization in the Department of Management.

Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman business student's 8-semester plan. The individual student's plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular "Area of Knowledge" within the general education requirements of the University. This means that it is possible to pursue two majors, or a major and a minor, within Miami Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge is Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

B.S.B.A. in Management

Curriculum Requirements

Major Area of Specialization in Management (People & Society)

Business students who pursue the Management major area of specialization will be prepared for future careers in all areas of management, including small business and corporate levels. The study of Management also provides a solid preparation for the pursuit of other graduate degree programs, particularly in law and business.

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BSBA in Management must complete the BSBA Business Core and the specific coursework for the Management major area of specialization as follows:

Code	Title	Credit Hours
University General Education Requirements ¹		
ENG 105	English Composition I	3
ENG 106	English Composition II	3

Minor in Entrepreneurship for Business Students

Minor Area of Specialization in Entrepreneurship for Business Students (People & Society)

This minor in Entrepreneurship is intended to acquaint Miami Business School students with the essential business tools and perspective of the entrepreneur. Eligible business students must have a declared business major other than Entrepreneurship.

The requirements of the 15-credit-hour minor in Entrepreneurship are the following:

Code	Title	Credit Hours
Required Courses ¹		
MGT 253	Introduction to Entrepreneurship	3
MGT 354	Growing the New Venture	3
MGT 455	Entrepreneurial Consulting	3
MKT 385	Marketing for Entrepreneurs (pre-requisite MKT 201 or MKT 301)	3

Choice Course for the Minor ¹		
Select one course (3 credit hours) from the following:		3
BSL 324 or MGT 324	Negotiation Negotiation Strategies	
BSL 424	Intellectual Property Law	
BSL 435	Law of Entrepreneurship	
BTE 320	Introduction to Programming	
BTE 324	Object-Oriented Programming	
BTE 389	Launching HighTechnology Ventures	
BTE 524	Mobile Apps Development	
FIN 320	Investment and Security Markets	
FIN 410	Financial Institutions and Markets	
FIN 425	Business and Security Valuation	
MGT 251	Nature and Foundations of Entrepreneurship	
MGT 349	International Business	
MGT 357	Entrepreneurship Simulation Experience: Inside the Mind of the Entrepreneurial CEO	
MGT 360	Effective Leadership	
MGT 445	Supply Chain Modeling and Analysis	
MGT 446	Supply Chain Strategy	
MGT 498	Special Topics in Management (Families in Business; Innovators for the Americas; or Social Entrepreneurship)	
MKT 302	Marketing Research and Market Analysis	
MKT 310	Consumer Behavior and Marketing Strategy	
MKT 320	Retailing	
MKT 340	Professional Selling	
MKT 380	New Product Development	
MKT 387	Digital Marketing	
MKT 388	Health Care Marketing	
MKT 389	Fundamentals of Digital Marketing Analytics	
Total Credit Hours		15

¹ All courses must be taken within the current pre-requisite structure.

* No one course may be applied toward more than one major or minor area of specialization.

** All specific coursework taken for any minor in the Department of Management must be completed with a grade of "C" or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the minor area of specialization.

Minor in Entrepreneurship for Non-Business Students

Minor Area of Specialization in Entrepreneurship for Non-Business Students (People & Society)

This minor is for non-business students who seek to learn about developing business plans or how to initiate and manage small business enterprises. Interested students should consult with an academic advisor *in the School or College of their degree/major* to determine if a minor in Entrepreneurship is acceptable. If so, neither advice nor consent from either the Office of Undergraduate Business Education or the Department of Management is necessary. Instead the non-business student should simply declare the minor and complete the required six courses, or 18 credit hours, as follows:

Code	Title	Credit Hours
Required Courses ¹		
ACC 211	Principles of Financial Accounting	3
ECO 211	Principles of Microeconomics	3
FIN 300	Fundamentals of Finance for Non-Finance Majors	3
MGT 253	Introduction to Entrepreneurship	3
MKT 301	Marketing Foundations	3
Choice Course for the Minor ¹		

Select one course (3 credit hours) from the following:	3
BSL 435	Law of Entrepreneurship
MGT 251	Nature and Foundations of Entrepreneurship
MGT 354	Growing the New Venture
MGT 357	Entrepreneurship Simulation Experience: Inside the Mind of the Entrepreneurial CEO
MGT 498	Special Topics in Management (related to entrepreneurship)
MKT 385	Marketing for Entrepreneurs (pre-requisite MKT 301)
Total Credit Hours	18

¹ All courses must be taken within the current pre-requisite structure.

Note: No one course may be applied toward more than one minor area of specialization and/or cognate. All coursework taken for any minor in the Department of Management must be completed with a grade of "C" or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the minor area of specialization.

Minor in Management for Business Students

Minor Area of Specialization in Management for Business Students (People & Society)

A minor in Management for business students consists of 12 credit hours in Management courses beyond the required courses in the BBA or BSBA Business Core. All courses must be taken within the current pre-requisite structure.

Code	Title	Credit Hours
Core Courses		
MGT 303	Operations Management (taken as part of the Business Core)	
MGT 304	Organizational Behavior (taken as part of the Business Core)	
Choice Courses for the Minor		
Select four courses (12 credit hours) from the Department of Management ¹		12
Total Credit Hours		12

¹ excluding any 100-level Management courses and MGT 401.

* **Note:** No one course may be applied toward more than one major and/or minor area of specialization in the Department of Management. All specific coursework for any minor in the Department of Management must be completed with a grade of "C" or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the minor area of specialization.

Minor in Management for Non-Business Students

Minor Area of Specialization in Management for Non-Business Students (People & Society)

Non-Business students in any school or college may pursue a minor in Management. Interested students should consult with an academic advisor *in the School or College of their degree/major* to determine if a minor in Management is acceptable. If so, neither advice nor consent from either the Office of Undergraduate Business Education or the Management Department is necessary for a student to choose or complete a minor in Management. Instead the non-business student should simply declare the Management minor and complete the required 12 credit hours of Management courses, as follows:

Code	Title	Credit Hours
Required Courses ¹		
MGT 302	Human Resource Management	3
MGT 303	Operations Management ²	3
MGT 304	Organizational Behavior	3
Choice Course for the Minor ¹		
Select one course (3 credit hours) at the 300 - 400 level from the Department of Management. ³		3
Total Credit Hours		12

¹ All courses must be taken within the current pre-requisite structure.

² pre-requisite of a Statistics 1 course, such as MAS 201, MAS 311, IEN 311, MTH 224, or the equivalent.

³ excluding MGT 401

Note: No one course may be applied toward more than one minor area of specialization in the Department of Management. All specific coursework for any minor in the Department of Management must be completed with a grade of “C” or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the minor area of specialization.

Management Science

Department Code: MAS

Introduction

Management Science uses the ideas and methods of science, mathematics, statistics, and computing, which collectively are often referred to as Business Analytics, to help managers make better business decisions. Management science techniques have been applied in a wide variety of areas including financial modeling, marketing research, organizational theory, transportation and logistics, health care, environmental protection, and manufacturing. Almost any decision can benefit from the methods of management science/analytics.

Educational Objectives

The Department of Management Science offers a major area of specialization in Business Analytics as well as a minor in Business Analytics. The Business Analytics curriculum is designed to give Miami Business School students the necessary educational background and experience to allow them to work as successful business analytics professionals. In addition to the general education, business, and economics courses of the Bachelor of Science in Business Administration degree program, the major in Business Analytics requires a solid background in the sciences and mathematics. Additionally, students are required to take sequences of courses in optimization, decision science, and data analytics. A number of the courses in the Business Analytics curriculum require projects, in which the student evaluates a real-world system or process. As the system is studied and modeled, the student applies management science methods to find ways to improve the process. In such a course, written and oral presentation of findings is part of the learning and evaluation process. A major or minor area of specialization in Business Analytics is recommended to qualified students as preparation for direct entry into the field of Analytics or as preparation for future graduate studies.

Major in Business Analytics

- B.S.B.A. in Business Analytics (p. 464)

Minor in Business Analytics

- Business Analytics (p. 467)

B.S.B.A. in Business Analytics

Curriculum Requirements

Major Area of Specialization in Business Analytics (STEM)

The Department of Management Science offers a major area of specialization in Business Analytics for students pursuing the Bachelor of Science in Business Administration degree. Students who choose the major area of specialization in Business Analytics are trained to combine quantitative, statistical, and computational tools and techniques to help companies understand, predict, and act on large amounts of data, improving decision-making in increasingly complex and interconnected business environments.

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BSBA in Business Analytics must complete the BSBA Business Core and the specific coursework for the Business Analytics major area of specialization as follows:

Code	Title	Credit Hours
University General Education Requirements ¹		
ENG 105	English Composition I	3

Total Credit Hours		120

¹ **NOTE:** ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

² At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

³ Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

⁴ All specific coursework for the major area of specialization in Business Analytics must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major area of specialization. All courses must be taken within the current pre-requisite structure.

⁵ may not double count as both the Quantitative Choice and a Major Choice unless Business Analytics is an additional major

⁶ may not double count as both the Quantitative Choice and the major requirement unless Business Analytics is an additional major

Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman business student's 8-semester plan. The individual student's plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular "Area of Knowledge" within the general education requirements of the University. This means that it is possible to pursue two majors, or a major and a minor, within the Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge is Arts and Humanities, which must be completed through a major, minor, or cognate outside of the Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

Minor in Business Analytics

Minor Area of Specialization in Business Analytics (STEM)

Miami Business School students who choose the minor area of specialization in Business Analytics are trained to combine quantitative, statistical, and computational tools and techniques to help companies understand, predict, and act on large amounts of data, improving decision-making in increasingly complex and interconnected business environments.

The 12-credit-hour minor in Business Analytics consists of the following:

Code	Title	Credit Hours
Required Courses ¹		
MAS 332	Data Acquisition, Preparation and Visualization (pre-requisite MAS 202 or MAS 312 or equivalent) ²	3
MAS 342	Introduction to Optimization and Decision Making (pre-requisites MTH 162 or equivalent & MAS 201 or MAS 311 or equivalent) ²	3
MAS 432	Data Analysis (pre-requisite MAS 202 or MAS 312 or equivalent) ³	3
MAS 442	Stochastic Models in Operations Research (pre-requisite MAS 311 or equivalent) ³	3
Total Credit Hours		12

¹ All courses must be taken within the current pre-requisite structure. In order to complete this minor, students will need pre-requisite courses of MTH 162, MAS 311, and MAS 312 or their equivalents.

² offered in fall semester

³ offered in spring semester

* **Note:** All specific coursework for the minor in Business Analytics must be completed with a grade of “C-” or better. In addition, a minimum cumulative GPA of 2.5 is required for all specific coursework taken in the minor area of specialization.

Marketing

Department Code: MKT

Introduction

Rapidly increasing global competition, emergence of new markets, and technological advancements make today’s marketplace a highly dynamic and challenging environment for companies. Effective marketing is therefore crucial for organizations to survive and prosper in such an environment. Marketing is the process through which organizations develop and distribute products and services that satisfy the needs of customers. Customer satisfaction is critical to the profitable operations and growth of organizations and, as such, an integral component of modern-day marketing.

Educational Objectives

The primary goals of the Department of Marketing are:

1. to contribute to marketing knowledge through conducting scholarly research and disseminating the research findings through leading journals;
2. to excel in imparting marketing knowledge to students and honing their critical-thinking skills so as to prepare them for potentially successful careers in an increasingly competitive, dynamic, global, and service-and technology-oriented environment; and
3. to be of service to the business and professional communities at large.

The marketing curriculum offers courses and programs to undergraduate and graduate students for their professional development in domestic and world business.

A program of study in marketing offers students better understanding of and insights into:

- Marketing’s role within the organization and society;
- The various “markets” for goods and services through better identification and analysis of consumer needs, wants, and interests;
- Marketers’ legal and ethical responsibility to society;
- Methods, procedures, and techniques used in planning and managing marketing decisions.

Major in Marketing

- B.B.A. in Marketing (p. 468)
- B.S.B.A. in Marketing (p. 471)

Minor in Marketing

- Marketing for Business Students (p. 475)
- Marketing for Non-Business Students (p. 475)

B.B.A. in Marketing

The Marketing major area of specialization provides business students with an understanding of the basic concepts of marketing with an emphasis on emerging techniques and technologies. This major area of specialization prepares students to practice marketing in a changing competitive environment. Specifically, it covers the 4 Ps of marketing (i.e., product/service, price, promotion and place/distribution) from a managerial perspective.

Additionally, the marketing program of study is flexible, allowing students to concentrate on specific areas of professional pursuit such as sales management, advertising, retailing, or marketing research.

A program of study in marketing offers business students a comprehensive understanding of such topics as:

- Marketing’s critical role within organizations;
- Identification of markets for products and services through better understanding and analysis of consumers’ wants and needs;
- The nature of global competition and identification of viable competitive strategies;
- Methods used in planning and implementing marketing strategies;
- The legal and ethical responsibilities of marketers.

Curriculum Requirements

Major Area of Specialization in Marketing (People & Society)

In addition to satisfying the University General Education Requirements and Electives, students pursuing the BBA in Marketing must complete the BBA Business Core and the specific coursework for the Marketing major area of specialization as follows:

Code	Title	Credit Hours
University General Education Requirements ¹		
ENG 105	English Composition I	3
ENG 106	English Composition II	3
UMX 100	The University of Miami Experience	0
Arts and Humanities Cognate Courses		9
STEM Cognate Courses		9
Electives ²		30
BBA Business Core Requirements ¹		
ACC 211	Principles of Financial Accounting	3
ACC 212	Managerial Accounting	3
BSL 212	Introduction to Business Law	3
BTE 210	Fundamentals of Business Technology and Innovation	3
BUS 101	First Step: Freshman Integrity, Responsibility, and Success through Teamwork	3
BUS 150	Business Analytics	3
BUS 300	Critical Thinking and Persuasion for Business ³	3
ECO 211	Principles of Microeconomics (Microeconomics)	3
ECO 212	Principles of Macroeconomics (Macroeconomics)	3
FIN 302	Fundamentals of Finance	3
MAS 110	Quantitative Applications in Business (Minimum grade of C- required)	3
or MTH 161	Calculus I	
MAS 201	Introduction to Business Statistics (Minimum grade of C- required)	3
MAS 202	Intermediate Business Statistics	3
MGT 303	Operations Management	3
MGT 304	Organizational Behavior	3
MGT 401	Strategic Management (must be taken in the final semester)	3
MKT 201	Foundations of Marketing	3
or MKT 301	Marketing Foundations	
Major Area of Specialization in Marketing ^{4, 5}		
MKT 201	Foundations of Marketing (taken as part of the Business Core; pre-requisite for all other MKT courses) ⁶	
or MKT 301	Marketing Foundations	
MKT 302	Marketing Research and Market Analysis (pre-requisites MKT 201/ MKT 301 & MAS 202 or MAS 312)	3
MKT 403	Marketing Management (pre-requisite FIN 302 and pre- or co-requisite of MKT 302)	3
Major Choice Courses - Select three MKT courses (9 credit hours). At most, one course (3 credit hours) identified as STEM may be selected from the available choice courses.		9
MKT 310	Consumer Behavior and Marketing Strategy	
MKT 320	Retailing	
MKT 340	Professional Selling	
MKT 350	Luxury Marketing	
MKT 360	International Marketing	
MKT 380	New Product Development	
MKT 385	Marketing for Entrepreneurs	
MKT 386	Advertising Management	

MKT 387	Digital Marketing	
MKT 388	Health Care Marketing	
MKT 389	Fundamentals of Digital Marketing Analytics	
MKT 469	International Marketing Management (pre-requisite MKT 360 and pre- or co-requisite of MKT 302)	
MKT 498	Special Topics in Marketing (People and Society Topics)	
MKT 499	Special Topics in Marketing (STEM topics - only 3 credit hours permitted from this area)	
Total Credit Hours		120

- 1 **NOTE:** ENG 105 and ENG 106 , or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.
- 2 At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.
- 3 Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.
- 4 In order to pursue a major area of specialization in Marketing, a student must earn a grade of "B" (grade point of 3.0) or higher in MKT 201/MKT 301 (note that a grade of B- does not qualify).
- 5 All specific coursework for the major area of specialization in Marketing must be completed with a grade of "C-" or higher (except for the minimum "B" grade required for MKT 201/MKT 301 as noted). A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major area of specialization. All graded departmental courses in Marketing will be calculated into the major GPA. All courses must be completed within the current pre-requisite structure.
- 6 MKT 201 is intended for freshman business students only. MKT 301 is an equivalent course, but is intended for students at the sophomore level or higher. Students may not take both MKT 201 and MKT 301.

Sample Plan of Study

This Sample Plan of Study represents one possible version of a new freshman business student's 8-semester plan. The individual student's plan may vary depending upon the initial placement into English Composition and mathematics. Moreover, numerous plan variations are possible if a student enters the University with advanced college credits, wishes to participate in study abroad, chooses a special program option, or selects additional majors or minors.

Note that each major/minor at the University of Miami satisfies a particular "Area of Knowledge" within the general education requirements of the University. This means that it is possible to pursue two majors, or a major and a minor, within Miami Business School and fulfill both the STEM and People and Society Areas of Knowledge; a separate cognate in these areas would not be required. The only remaining general education Area of Knowledge is Arts and Humanities, which must be completed through a major, minor, or cognate outside of Miami Business School.

Students construct their individualized plans in collaboration with their assigned academic advisor.

Minor in Marketing for Business Students

Minor Area of Specialization in Marketing for Business Students (People & Society)

The 12-credit-hour minor in Marketing for Miami Business School students consists of 9 credit hours of Marketing courses beyond the core course MKT 201/MKT 301, as follows:

Code	Title	Credit Hours
Core Course		
MKT 201/ or MKT 301	Foundations of Marketing (taken as part of the Business Core; pre-requisite for all other MKT courses) ^{1, 2} Marketing Foundations	
Choice Courses for the Minor		
Select three courses (9 credit hours) from the Department of Marketing ³		9
Total Credit Hours		9

¹ **Important Note:** In order to pursue the minor in Marketing, a student must earn a grade of "B" (grade point average of 3.0) or higher in MKT 201/MKT 301 (note that a grade of "B-" does not qualify).

² MKT 201 is intended for freshman business students. MKT 301 is an equivalent course, but is intended for students at the sophomore level or higher. Students may not take both MKT 201 and MKT 301.

³ All courses must be taken within the current pre-requisite structure.

* **Note:** All specific coursework for the minor in Marketing must be completed with a grade of "C-" or higher (except for the minimum "B" grade required for MKT 201/MKT 301, as noted). A minimum cumulative GPA of 2.5 is required for all specific coursework taken in this minor area of specialization. All graded departmental courses in Marketing will be calculated into the minor GPA.

Minor in Marketing for Non-Business Students

Minor Area of Specialization in Marketing for Non-Business Students (People & Society)

Non-Business students in any school or college may pursue a minor in Marketing. Interested students should consult with an academic advisor *in the School or College of their degree/major* to determine if a minor in Marketing is acceptable. If so, neither advice nor consent from either the Office of Undergraduate Business Education or the Marketing Department is necessary for a student to choose or complete a Marketing minor. Instead the non-business student should simply declare the minor and complete the required 12 credit hours of Marketing courses, as follows:

Code	Title	Credit Hours
Required Course		
MKT 301	Marketing Foundations (pre-requisite for all other MKT courses) ¹	3
Choice Courses for the Minor		

Select three courses (9 credit hours) from the Department of Marketing. ²	9
Total Credit Hours	12

- ¹ **Important Note:** In order to pursue the minor in Marketing, a student must earn a grade of "B" (grade point average of 3.0) or higher in MKT 301 (note that a grade of "B-" does not qualify).
- ² All courses must be taken within the current pre-requisite structure.
- * **Note:** All specific coursework for the minor in Marketing must be completed with a grade of "C-" or higher (except for the minimum "B" grade required for MKT 301, as noted). A minimum cumulative GPA of 2.5 is required for all specific coursework taken in this minor area of specialization. All graded departmental courses in Marketing will be calculated into the minor GPA.

Communication

<http://www.com.miami.edu/>

Introduction

The School of Communication houses four departments that offer courses in nine majors leading to the Bachelor of Science in Communication degree. The departments are: Cinema and Interactive Media (Motion Pictures, Interactive Media), Communication Studies (Communication Studies), Journalism and Media Management (Broadcast Journalism, Electronic Media, Journalism, Media Management), and Strategic Communication (Advertising, Public Relations). In addition, the Master of Arts, Master of Fine Arts, and Doctor of Philosophy degrees are offered in the School.

Students engage with a diverse faculty of communication scholars, artists and professionals in a variety of hands-on learning experiences embracing research, writing, production, creative problem-solving and multimedia storytelling. On-campus television and radio facilities, soundstages and multimedia labs are available for academic and extra curricular student projects. Students utilize contemporary digital imaging technology and learn skills that cut across a variety of media platforms. Digital editing, recording and mixing facilities are available. New media technology is incorporated throughout the curriculum and the School has numerous computer labs and digitally “smart” classrooms.

The School houses a film soundstage and two fully digital, high-definition television studios and state of the art control rooms. Two video-conference centers with broadcast-quality interactive capability for remote interviews and programming support the School's mission. In addition, a fiber-optic linked studio allows for real-time, broadcast-quality transmissions to sites around the world. Under Communication faculty supervision, student-produced programming is distributed through the University's cable facility and carried throughout the community by the local cable operator and is available through online streaming. The School operates several online sites that afford students outlets for multimedia, interactive and cross-platform writing, research, reporting and creative work.

The University's FM radio station, and student online and print newspapers and magazines, offer additional opportunities for career development. The Bill Cosford Cinema, a 240-seat movie theatre, supports the Motion Picture Program and offers film programming for the Miami community. The School's Norton Herrick Center for Motion Picture Studies is dedicated to research into the history and aesthetics of motion pictures and their social and cultural impact.

The School's Center for Communication, Culture, and Change focuses on promoting positive social and behavioral change through communication research. The Center seeks to address urgent social issues, and make a positive difference in people's lives.

The Koenigsberg & Nadal Interactive Media Center facilitates collaborative education for School of Communication students. With the latest technology seamlessly integrated into a flexible co-working space, students in the Interactive Media Center can easily work together and share their knowledge with one another. Whether students are using the dry erase walls to strategize a research project or touch-screen monitor to showcase their creative concepts to a client, the Interactive Media Center provides a student-driven and innovative experiential learning ecosystem unique to the School of Communication. In this space, groundbreaking ideas are born and innovative visions are able to come to life across all disciplines.

The School supports student chapters of the American Advertising Association, the Public Relations Society of America, the Society of Professional Journalists, the National Broadcasting Society, the University Film and Video Association and other professional organizations. In addition, the School sponsors a nationally competitive intercollegiate debate team, which annually produces several members of the All American Debate Team.

Internships in professional settings are available to Communication students at the sophomore, junior and senior levels. Professionals at daily and weekly newspapers, magazines, news bureaus, cable systems, radio and television stations and networks, production houses and motion picture studios cooperate in faculty-supervised internships. Executives of city and county governments, advertising agencies, public relations firms and other business and nonprofit organizations join in providing internship opportunities. The Stein Family Office of Career Services and Internships assists students seeking internships and offers career planning services. Summer and semester-length study abroad opportunities are also available.

Mission

The School of Communication is dedicated to a global educational perspective and is committed to providing a socially responsible and ethically grounded learning environment guided by a diverse faculty of scholars, artists and professionals. The School is committed to quality undergraduate and graduate programs in communication that emphasize the relationship between theory and practice. We believe in freedom of expression and creativity, and encourage both collaboration and independent thinking as we prepare future scholars, professionals and leaders for a lifetime of service and learning.

Accreditation

The University of Miami is accredited by:

The Southern Association of Colleges and Schools
1866 Southern Lane
Decatur, GA 30033-4097

Academic Policies

Internal Transfer into the School of Communication

A student enrolled at the University of Miami in a School or College other than the School of Communication may apply for admission into the School. Applications are accepted throughout the year. A minimum overall grade point average of 2.5 is necessary for consideration. Applications are available in the Admissions, Academic & Alumni Services Office of the School of Communication (2037 Wolfson Building) and must be submitted prior to the end of each semester. Admission decisions will be made promptly after semester grades are final. Students will be notified in writing of the School's decision.

Transfer Students

A transfer student must complete in residence a minimum of 18 credit hours toward a Communication major or a minimum of 9 credit hours toward a Communication minor. Courses taken elsewhere in Communication or related disciplines are not automatically accepted toward a major or minor at the University of Miami. Students who have obtained the written approval of the the appropriate department chair to use transfer credit hours to satisfy one or more requirements of that major may be required to complete additional courses in residence at the University before being admitted to that major. Students should consult a School of Communication advisor to determine whether the transfer of Communication courses will increase beyond 120 the total number of credit hours required for a degree. In general, transfer credit hours will not be accepted to satisfy requirements for any course in any major or minor at the 300-level or above. Student petitions to transfer credit hours will be considered on an individual basis.

Transfer credit hours may not be used to satisfy requirements for any major or minor in Communication without the written approval of the Chair of the program concerned.

Academic Progress & Probation/Dismissal

Students must maintain a grade point average (GPA) of 2.5 or higher in courses taken in residence and submitted for their School of Communication major. Following the first semester in which any student's GPA in the major falls below a 2.5, the School may issue a warning to that student that his or her work does not meet School expectations. Should that student's GPA in the major be below a 2.5 in any subsequent semester, he or she may be placed on Academic Probation. The School may dismiss from the University any student who is on probation a total of two semesters (not necessarily consecutive). A student who has been dismissed from the School may apply for admission to one of the other Schools or Colleges within the University, but will not be readmitted to the School of Communication.

Those who wish to appeal their probation or dismissal must do so in writing to the Dean within 30 days of the notice of probation or dismissal.

Internship Credit Hours

All programs allow students to complete multiple internships for academic credit. Students should consult with their faculty advisor or the School's academic advising office for their department's specific internship credit hour policies.

Credit Hours and Advanced Placement Credit

Credit hours may be earned through Advanced Placement, IB, CLEP Examinations and Advanced Placement by Proficiency Examinations. These credit hours may be applied to the appropriate General Education Required Areas of Study or as electives except:

1. where prohibited by the University or a specific program area; or
2. if the course is remedial (e.g., ENG 103, MTH 099).

To earn credit hours, each student must pay a recording fee and have exempted course credit hours entered on his or her University transcript. An exemption may be granted for ENG 105 by the Department of English, but this exemption will not earn credit hours toward the 120 University credit hours required for graduation.

Grade Point Average

A candidate for the Bachelor of Science in Communication (B.S.C.) must complete the credit hours and achieve the grade point average specified for students in the University at large as stated in the section titled ACADEMIC PROCEDURES AND INFORMATION, subject to additional requirements specified in School and Program sections.

General Education Requirements

In April 2012, the University of Miami Faculty Senate adopted a new set of General Education Requirements (GERs). The new Cognate Program of General Education was implemented in the 2013-2014 academic year (AY 2014).

Please note, students completing majors and minors within the same department may only satisfy one required cognate area of study.

See GENERAL EDUCATIONAL REQUIREMENTS.

Degree Programs

The School of Communication offers courses in nine programs of study leading to the degree Bachelor of Science in Communication. The programs are Advertising, Public Relations, Communication Studies, Electronic Media, Broadcast Journalism, Journalism, Media Management, Interactive Media, and Motion Pictures.

Minors

The School of Communication offers minors in its nine programs of study and a general minor in Communication (COM). School of Communication students may complete a minor in a specific program of study, but are not eligible for the general minor in Communication.

Concentrations

Most degree programs offer concentrations or tracks of study in specialty areas. See the individual program sections for details on these concentrations.

Requirements for Graduation with a Bachelor of Science Degree in Communication

Required University General Education Requirements

The General Education Requirements provide students with the opportunity to study methodologies and achievements in all areas of human inquiry and creative endeavor, and to cultivate abilities essential for the acquisition of knowledge. The Areas of Proficiency requirements ensure that students either already possess, or develop at the University, the ability to express themselves effectively, to use mathematics with facility, and to reason cogently. The Areas of Knowledge requirement is designed to help students understand and appreciate intellectual achievements in major areas of human inquiry and creative endeavor.

All School of Communication students must complete the University's General Education Requirements. These requirements can be found in the General Education Requirements section. Note that the General Education Requirements differ for incoming freshmen and transfer students.

Completion of each School of Communication major or minor fulfills one of the three cognate areas required by the University: People & Society, Arts & Humanities and STEM. (See individual program descriptions below identifying the specific cognate area covered.)

Students completing a second major or minor in the School which fulfills a cognate area different from their first major, and offered in a different department, may apply the second major or minor toward a second cognate area. No course submitted toward a School of Communication major or minor used to fulfill a University cognate may be applied toward any other cognate area. No more than two cognate areas may be completed in the School of Communication.

Students should meet with their advisors for assistance in completing all University and School requirements.

Developing Proficiency in Advanced Writing and Communication Skills

By their nature, Schools of Communication aspire to help students understand communication processes and develop high-level skills in writing, oral presentation and the use of digital communication technologies for crafting meaningful and effective messages. To fulfill the University's Advanced Writing and Communication Skills requirement, all students enrolled in one of the eight undergraduate majors offered by the School will be required to complete their program's core writing course, at least one public speaking/presentational skills course, and one digital skills course.

Major/Minor Requirements

In addition to completing a major in the School of Communication, students must also complete a minor (or a second major) in either a second Program of Study within the School or in an academic program outside of the School. Students completing majors and/or minors in the School must complete all School of Communication courses with grades of C or higher (a grade of C- or lower is not acceptable.) Students may not enroll in a School of Communication course without grades of C or higher in prerequisite courses. Students completing a minor or second major outside the School of Communication should consult this Bulletin for minimum grade requirements.

The Major in the School of Communication

Majors in the School of Communication leading to a Bachelor of Science in Communication require between 36 and 42 credit hours in School of Communication courses specified in Program Statements (below). Courses within each major must be completed with a grade of C or higher (a grade of C- or lower is not acceptable.) In addition, students must maintain a grade point average of 2.5 or higher in courses taken in residence and submitted for their School of Communication majors.

The Minor

Each Communication student, in addition to completing requirements for a Communication major, must complete a minor field in either a second Program of Study within the School or in an academic program outside the School. Each course submitted for a minor offered in the School of Communication must be completed with a grade of C or higher (a grade of C- or lower is not acceptable). To find the requirements for a given minor, students should consult this Bulletin and confer with the appropriate department representative.

School of Communication advisors will aid students in identifying appropriate minors. The candidate for a Communication degree may choose from among any of the disciplines offering minors at the University for which they may qualify. The choice of a minor should be made no later than the beginning of the junior year and must be approved by the discipline concerned.

The Second Major Option

Students may choose to complete a second major, either within the School or in an academic program outside the School, in place of the minor requirement. Some second majors are impractical within the minimum 120 credit hours degree program. Students should consult with a Communication advisor before selecting a second major. The choice of a second major should be made no later than the beginning of the junior year and must be approved by the discipline concerned.

Double Counting

Students completing a major and a minor in the School of Communication, or two majors within the School of Communication, may count only COM 250 toward both Programs of Study. No other course duplication is allowed. Students should consult with the Department Chair of the minor or second major for acceptable course substitutions where appropriate.

Upper Division Credit Hours

In earning a Bachelor of Science in Communication, each School of Communication student must complete a minimum of 36 credit hours of course work at the 300-level or above. Upper division transfer credit hours also apply if completed at a four-year institution and if approved by the Department Chair.

Electives

Only Free Elective courses may be taken under the University's Credit Only option. Free Electives are defined as courses not taken to fulfill the requirements of the major within the School of Communication, of the second major or minor, or of the School's General Education Requirements. Free Electives are courses that are not taken to meet any of the above requirements or their prerequisites, but taken solely to meet the requirement of a minimum total of 120 credit hours for the degree.

General Electives

A sufficient number of University electives must be completed to fulfill a minimum total of 120 credit hours. Electives may be chosen from any course offered by the University except certain unapproved courses such as:

Code	Title	Credit Hours
DAN 102	Stretching and Body Work	1
ENG 103	Basic Academic Writing	3
MTH 099	Intermediate Algebra	3
UMI Toppel Internship at any level		1

Students should consult a School of Communication advisor before selecting elective courses. Because specific courses are required in some School of Communication majors, students are advised to read Program Statements carefully and seek the advice of a School of Communication advisor prior to taking general University electives.

Schedules

Fifteen to sixteen credit hours constitute a normal semester schedule in the School of Communication. Students who wish to register for more than 18 credit hours must obtain prior approval from the Office of Admissions, Academic & Alumni Services (2037 Wolfson Building). Students who are on academic probation will be limited to a maximum of 13 credit hours.

Honors

School of Communication students may graduate with School Honors in Communication noted upon their diplomas and transcripts. Students must contact the School's Office of Admissions, Academic & Alumni Services (2037 Wolfson Building) for details about the School of Communication Honors Program.

Students may receive recognition as graduates cum laude, magna cum laude, or summa cum laude if they meet the requirements set forth under graduation honors.

General Information

The Foote Fellows Honors Program recognizes the most educationally accomplished incoming students at the University of Miami. Foote Fellows have distinguished themselves both in and out of the classroom at their previous schools, are self-motivated, and think independently. Admission to the Foote Fellows Honors Program is by invitation.

Foote Fellows are exempt from the Cognates Program of General Education requirements. Within the curricular framework of their school or college, Foote Fellows enjoy unmatched freedom and flexibility to explore a multitude of educational resources. Many Foote Fellows leverage this opportunity to take additional majors and/or minors and to study abroad.

At each of the nine undergraduate schools at the University of Miami, a dedicated advisor helps Foote Fellows chart their academic path and attain access to distinctive learning opportunities at the University, such as special school-based seminars, faculty-mentored research, networking opportunities, and off-campus internships.

Foote Fellows also will be invited to join advanced, interdisciplinary Foote Fellow seminars taught by leading faculty members from across the University. An example is Books That Matter, a rigorous seminar in non-fiction reading that is offered in sessions for first-year and for upper-class students. Freshman Foote Fellows benefit from early move-in to the residential colleges. Further, Foote Fellows receive focused advising on post-baccalaureate distinguished fellowships and awards.

The Foote Fellows Honors Program reflects the educational vision of former University of Miami President Edward T. Foote, who retired in 2000 after serving the University for twenty years.

Foote Fellows in the School of Communication

The School of Communication hosts several activities geared for our Foote Fellows throughout the academic year. School of Communication Foote Fellows will be receiving information from Assistant Dean Luis Herrera regarding our specific programs. For further inquiries, please contact him at lherrera@miami.edu.

SCHOOL OF COMMUNICATION HONORS PROGRAM

Admission to the School's Honors Program is contingent upon admission to the Communication Honors Program as an incoming freshman. Transfer or continuing students may apply for admission to the School of Communication Honors Program after completion of their first full semester at UM. Admission into the School of Communication Honors Program is contingent upon:

1. a freshman student admitted in the fall semester attaining at least a 3.5 overall grade point average and a 3.75 cumulative grade point average in all School of Communication classes, or
2. a transfer student with at least a 3.5 overall grade point average at his or her previous school and a 3.75 grade point average in School of Communication classes.

Continuation in the School's Honors Program is contingent upon satisfying the criteria set forth below over the student's academic career. Students enrolled in the School of Communication Honors Program may choose from two academic paths: (1) an individualized major in communication created in consultation with the School's Director of Honors or, (2) a concentrated major in one of the School's programs of study.

Students admitted to the School of Communication Honors Program must maintain a minimum 3.5 grade point average in all university coursework and a minimum 3.6 cumulative grade point average in all School of Communication Honors Program classes (at least 15 credits of such course work must be completed). All Honors students must complete the following Honors-designated courses with grades of "B" or higher (grades of "B-" will not be acceptable):

Code	Title	Credit Hours
Required School of Communication Honors Core		
COM 101	Mass Media Communication in Society (or approved alternate for transfer honors students)	3
COM 250	Freedom of Expression and Communication Ethics	3
COM 395	Honors Seminar in Communication	3
COM 401	Honors Communication Colloquium	3
COM 499	Senior Honors Project/Thesis	3

All School Honors students must have worked out by the end of their second semester of UM enrollment a plan of studies, under the direction of the School's Director of Honors.

In conducting a Senior Honors Project/Thesis the student, under the direction of an approved faculty mentor, will produce an original communication thesis/project. This project may take the form of original research, a theoretical examination of communication phenomena, a film or motion picture script, a radio or video drama or documentary, a teleplay, or a visual communication project incorporating web interactive design, photography, and multi-media.

Inquiries regarding the School of Communication Honors Program should be made through the School's Office of Admissions, Academic & Alumni Services (2037 Wolfson Building).

Minor in Communication

A student seeking a minor in the general area of Communication must complete 15 credit hours, at least six of which must be at the 300-level or above.

- Students in the School of Communication cannot minor in Communication.
- Courses for this minor must be taken from the departments of Cinema and Interactive Media, Communication Studies, Journalism and Media Management and Strategic Communication. Course prefixes include: CIM, COM, COS, JMM and STC.
- Each course taken for a Communication minor must be completed with a grade of C or higher (a grade of C- or lower is not acceptable).
- At least 9 credit hours towards the minor must be completed at UM.

- 1 STC 200 requires STC 114, STC 201 requires STC 116 and STC 202 requires STC 102. These courses cannot be taken concurrently. Any exceptions must be made by the STC Department Chair.
- 2 Please consult each department's bulletin listing for course requirements. No exceptions, substitutions or waivers will be given if student does not meet requirements for a course.
- 3 Most 300 level or above Communication courses require at least junior standing and one or more of the following survey courses: CIM 103, CIM 126, CIM 151, COS 220, JMM 102, JMM 108, STC 102, STC 114, or STC 116. Please consult the Bulletin for course prerequisites.

Cinema and Interactive Media

<http://com.miami.edu/programs>

The Department of Cinema and Interactive Media offers majors in Motion Pictures and Interactive Media and minors in Motion Pictures (CMPT), Game Design (GAME) and Interactive Media (CIMI).

A Motion Pictures major selects from the following tracks: Studio, Production, Screenwriting, Business, or Critical Studies.

The Department of Cinema and Interactive Media prepares the next generation of storytellers, innovators, filmmakers, designers, creators, researchers, and entrepreneurs for the abundance of opportunities in world of film, digital media, and emerging technologies.

Design:

The majors and minors offered by the Department of Cinema and Interactive are designed to enable you to customize your education, within a learning environment that is collaborative and conducive to the pursuit, development, and exchange of ideas and information. The curriculum provides students with the training necessary to succeed in a range of careers defined by a rapidly changing media landscape, and equips them to best leverage emerging technologies and innovative developments in the field.

Goals of the Program are:

- To furnish students with the technical and practical skills needed to make them career-ready through hands-on learning, problem-solving based inquiry, and advanced study.
- To nurture the individual talent, creativity, and discovery process of every student by fostering principles of collaboration, professionalism, and intellectual curiosity.
- To support the educational process through mentoring and advising by renowned faculty and seasoned professionals.
- To encourage students to integrate theory and practice, to cultivate the capacity to think critically, and to connect technology and art and/or design.
- To familiarize students with theoretical, historical, and cultural approaches and expose them to a range of traditions within the field of study.
- To provide access to state of the art facilities, the most technologically advanced tools, and the latest technology.

--To continue to build on our reputation as a place of innovation and interdisciplinarity, as we educate students according to the highest professional and ethical standards

Major Cognate Area

- Motion Pictures – Arts and Humanities
- Interactive Media – STEM

Minor Cognate Areas

- Motion Pictures – Arts and Humanities
- Game Design – Arts and Humanities
- Interactive Media – STEM

Please note: students completing majors and minors within the same department may only satisfy one required cognate area of study.

Dept. Code: CIM

Requirements for the Majors in Motion Pictures and Interactive Media

Each candidate for the degree of Bachelor of Science in Communication will complete School of Communication requirements including courses in the School's General Education Required Areas of Study. Motion Pictures majors must also complete a separate minor or a second major in either a second Program of Study within the School or in an academic program outside the School.

Before admission as a Motion Pictures (CMPT) major or Interactive Media (CIMI), a student must:

- Complete the Core courses in residence at the University, all with grades of C or higher (C- is not acceptable).
- Students who have obtained the written approval of the Chair of Cinema and Interactive Media to use transfer credit hours to satisfy one or more requirements of that major may be required to complete additional courses in residence at the University before being admitted to that major.
- Upon completion of a student's first 45 University credit hours while enrolled in the School of Communication, all University credit hours earned toward the major will be used in computing a student's major cumulative grade point average; only those students with a cumulative average of 2.5 or higher will be admitted to the major.
- A student who has completed 45 credit hours while enrolled in the School of Communication, but who has not been admitted to one of the Communication majors, may be dismissed from the School. A student who has completed 60 University credit hours while enrolled in the School, but who has not been admitted to one of the Communication majors, will be dismissed from the School.

Opportunities

As a major or minor in the CIM department, many opportunities await you, including access to the following facilities and equipment: digital cameras; grip and electrical equipment; a soundstage; digital post-production image and sound facilities; a digital animation studio; a VR Lab, User Experience Lab, and a New Experience Research and Design Lab (NERDLab).

The department offers a Semester in Los Angeles Program each spring as well as summer sessions in Prague (FAMU), Greece, and Spain.

In addition to the chance to work on numerous student projects, there is an array of extracurricular activities in the School of Communication, including the award-winning cable channel UMTV and Delta Kappa Alpha, the National Professional Co-Ed Cinematic Arts Fraternity.

The Bill Cosford Cinema, a state-of-the-art movie theater exhibits first-run alternative, foreign and classic films and hosts numerous guest filmmakers and special events throughout the year. The Cosford Cinema serves as a venue for local film festivals as well as the annual Canes Film Festival featuring UM undergraduate and graduate work.

Students have the opportunity to compete in the UM Canes Film Festival to earn the chance to take their work to a professional showcase screening, held annually in Los Angeles.

Majors in Cinema and Interactive Media

- B.S.C. in Interactive Media (p. 486)
- B.S.C. in Motion Pictures - Business Track (p. 488)
- B.S.C. in Motion Pictures - Critical Studies Track (p. 491)
- B.S.C. in Motion Pictures - General Track (p. 494)
- B.S.C. in Motion Pictures - Production Track (p. 498)
- B.S.C. in Motion Pictures - Screenwriting Track (p. 501)

Minors in Cinema and Interactive Media

- Motion Pictures (p. 505)
- Interactive Media (p. 504)
- Game Design (p. 504)

B.S.C. Motion Pictures - Business Track

Intended for students interested in media industries, this track offers an in-depth view from a decision-making perspective. You will learn how content is made, while attaining advanced business skills in many aspects from traditional movie outlets to new distribution opportunities, defined by multi-platforms and omni-channels.

You will discover motives, tactics and tools for content creation as well as strategies for choosing which platform best serves a particular story. This track is an excellent choice for students who strive to think critically about the environment the industry operates in and how it can inform your own business strategy.

You will be encouraged to develop your individual talent in a nurturing and collaborative environment, where you begin learning through practical, problem-solving based classes from your first semester on.

Internships, extra-curricular organizations, guest master classes, CIM project-based, study-abroad programs (in Prague, Greece, and Barcelona), and the Semester in Los Angeles Program, give you ample opportunity to further your education in business outside of the classroom.

B.S.C. Motion Pictures - Critical Studies Track

For students excited by the study of film and media, the Critical Studies track offers the opportunity to consider a wide range of perspectives on culturally, historically, and artistically significant works. You will engage with the aesthetic, political, and moral issues that inevitably arise when closely looking at examples, while broadening your horizons as you learn about the contexts in which they were produced.

You will cultivate analytical, conceptual, communication, and writing skills and gain research tools, all of which provide a strong foundation for media-related fields. Students in the Critical Studies track may go on to pursue graduate study. They are also well-positioned to choose creative careers or work in the media industry.

Curriculum Requirements

Code	Title	Credit Hours
Core Courses		
CIM 103	Survey of Motion Pictures	3
CIM 126	Introduction to Screenwriting	3
CIM 151	Introduction to Digital Filmmaking	3
CIM 206	History of International Cinema	3
COM 250	Freedom of Expression and Communication Ethics	3
Advanced Writing and Communication Skills Requirement		
COS 211 or COS 333 or JMM 233	Public Speaking Business Communication Television Performance	3
Other Required Courses		
CIM 401	Nonfiction Film and Digital Media	3
CIM 403	Film Directors	3
CIM 406	Genres	3
Select three of the following:		9
CIM 404	Aspects of Contemporary Cinema	
CIM 405	Representations of Sport in Popular Culture

B.S.C. Motion Pictures - General Track

The general track gives students flexibility and range as well as depth of focus. This track offers a unique edge in today's expanding technological landscape, providing breadth, versatility, and the advanced skills that will position you to succeed in a number of media careers.

Students select a primary specialization from one of the following areas: production, screenwriting, business, documentary, graphics and animation, games, or critical studies. Students choose an additional six credits of electives. It is recommended, though not required, that these six electives be chosen from a single area creating a secondary specialization.

Some students prefer not to check just one box as they go along their academic journey. The general track appeals to students who like to step out of the box and customize the cinema major to their individual goals.

B.S.C. Motion Pictures - Production Track

Intended for students interested in intensive production, this track offers advanced technical skills in directing, cinematography, editing, sound, documentary, immersive storytelling, graphics and animation. You will learn about all stages of the creative process from writing and development, through production and post-production, to all forms of exhibition.

You will be encouraged to develop your individual talent and personal expression in a nurturing and collaborative environment, where you start making films in your first semester and participate in hands-on learning throughout the program.

Internships, extra-curricular organizations, guest master classes, CIM production-based, study-abroad programs (in Prague, Greece, and Barcelona), and the Semester in Los Angeles Program, give you ample opportunity to further your education in production outside of the classroom.

B.S.C. Motion Pictures - Screenwriting Track

Intended for students interested in intensive scriptwriting, this track provides advanced skills in writing for film and series television. You will gain a familiarity with all stages of the creative process for film and TV (from writing and development, through production and post-production, to exhibition). You will attain advanced writing skills and techniques, such as story development, characterization, structure, and dialogue while acquiring extensive knowledge about the business of scriptwriting (including the submission process, agents, financing, television writers' rooms, etc.).

You will be encouraged to develop your individual talent and personal expression in a nurturing and collaborative environment, where you start writing scripts in your first semester and continue with practical, applied learning throughout the program.

Internships, extra-curricular organizations, guest master classes, CIM project-based, study-abroad programs (in Prague, Greece, and Barcelona), and the Semester in Los Angeles Program, give you ample opportunity to further your education in writing outside of the classroom.

CIM 540	Intro to Creative Coding	3
Electives ³		
Choose three of the following:		9
CIM 413	Mobile Application Development	
CIM 513	UX Research Methods	
CIM 542	Physical Computing	
CIM 593	Dynamic Data	
CIM 594	Special Topics in Cinema and Interactive Media ²	
or CIM 513	UX Research Methods	
JMM 331	Information Graphics and Visualization	
STC 102	Graphic Design for Strategic Communication	
Total Credit Hours		18

- ¹ Students *cannot double count* any CIM courses from the Interactive Media minor towards the Motion Pictures major and/or minor or the Game Design minor.
- ² Only UX Design may count as the CIM 594 Special Topics in Motion Pictures elective for the Interactive Media minor. Other electives must be approved by the director or faculty advisor of the Interactive Media program.
- ³ Students, in conjunction with an advisor, can construct an Interactive Media minor focusing on one of these suggested areas: Development, Design and UX Research. These suggested areas listed below are notated on the transcript as an Interactive Media minor.
- * All courses for the minor must be passed with a minimum grade of C or higher.

Suggested Options

Designer Courses

Code	Title	Credit Hours
Select three of the following:		9
STC 102	Graphic Design for Strategic Communication	
JMM 331	Information Graphics and Visualization	
CIM 594 or CIM 513	Special Topics in Cinema and Interactive Media (UX Design) ² UX Research Methods	

Developer Courses

Code	Title	Credit Hours
Select three of the following:		9
CIM 413	Mobile Application Development	
CIM 542	Physical Computing	
CIM 593	Dynamic Data	

Researcher Courses

Code	Title	Credit Hours
Select three of the following:		9
JMM 331	Information Graphics and Visualization	
CIM 513	UX Research Methods	
CIM 594	Special Topics in Cinema and Interactive Media (UX Design) ²	

Minor in Motion Pictures

Code	Title	Credit Hours
CIM 103	Survey of Motion Pictures	3
Select a maximum of 6 credits in CIM at the 100 or 200 level		6
Select a minimum of 6 credits in CIM at the 300 or 400 or 500 level		6
Total Credit Hours		15

¹ A grade of C or higher is required in all courses (a C- is not acceptable).

² Students with minors in Motion Pictures, Game Design and Interactive Media may not double count any CIM courses towards these minors.

Motion Pictures Minor for Journalism Visual and Documentary Track Only

This suggested track will be notated on the transcript as the Motion Pictures minor. Journalism majors must complete CIM 103 and a minimum of 12 credits from the following list:

Code	Title	Credit Hours
CIM 103	Survey of Motion Pictures	3
Select 4 to 5 courses:		12-15
CIM 355	Essentials of Documentary Film	
CIM 353	Post Production Sound Editing and Design ¹	
CIM 357	Editing ¹	
CIM 401	Nonfiction Film and Digital Media ¹	
CIM 458	Documentary Production ¹	
Total Credit Hours		15-18

¹ Journalism majors will need a permission code to enroll in courses. CIM faculty advisor will determine if the student has equivalent JMM course prerequisites before waiving or substituting requirements.

Communication Studies

<http://com.miami.edu/programs>

The Department of Communication Studies offers a major in Communication Studies and minors in Communication Studies (COS) and Health Communication (CHCO).

Introduction

The major in Communication Studies empowers students to acquire advanced skills in many areas involving human interaction, cross-cultural and international communication, advocacy, argumentation, relationship building, leadership, presentation (oral and written), critical thinking, research and writing. Students become familiar with the rich tradition of communication theory and research, investigate emerging knowledge about communication, and contribute to the growth of new understanding by developing and applying their research capabilities. Students also are challenged to employ their communication understanding and skills in meaningful ways through experiential learning, and professional and community involvement. Communication Studies blends a broad-based theoretical understanding of communication principles with specific and concrete applications to particular contexts.

Students are prepared for a variety of career options in health communication, business and the professions, politics and public advocacy, education, training and media, as well as further graduate and professional study in communication, law and other areas.

Major Cognate Area

- Communication Studies
 - People and Society

Minor Cognate Area

- Communication Studies
 - People and Society
- Health Communication
 - People and Society

Degree Programs

The Bachelor of Science in Communication is offered in Communication Studies.

Major in Communication Studies

A major is offered in Communication Studies.

Each candidate for the degree of Bachelor of Science in Communication will complete School of Communication requirements including courses in the School's General Education Required Areas of Study. Communication Studies majors must also complete a separate minor or a second major in either a second Program of Study within the School or in an academic program outside the School.

Admission to the Communication Studies major

Before admission as a Communication Studies (COS) major, a student must:

- Complete the four Core courses listed below, in residence at the University, all with grades of C or higher (C- is not acceptable).
- Students who have obtained the written approval of the Chair of Communication Studies to use transfer credit hours to satisfy one or more requirements of that major may be required to complete additional courses in residence at the University before being admitted to that major.
- Upon completion of a student's first 45 University credit hours while enrolled in the School of Communication, all University credit hours earned toward the major will be used in computing a student's major cumulative grade point average; only those students with a cumulative average of 2.5 or higher will be admitted to the major.
- A student who has completed 45 credit hours while enrolled in the School of Communication, but who has not been admitted to one of the Communication majors, may be dismissed from the School. A student who has completed 60 University credit hours while enrolled in the School, but who has not been admitted to one of the Communication majors, will be dismissed from the School.

Major in Communication Studies

- B.S.C. in Communication Studies - General Track (p. 507)
- B.S.C. in Communication Studies - Intercultural Track (p. 509)
- B.S.C. in Communication Studies - Organizational Track (p. 511)
- B.S.C. in Communication Studies - Public Advocacy Track (p. 513)

Minors in Communication Studies

- Communication Studies (p. 517)
- Health Communication (p. 518)

B.S.C. Communication Studies - General Track

Curriculum Requirements

Code	Title	Credit Hours
Core Courses		
COS 120	Exploring Human Communication	3
COS 220	Communication Theory	3
COM 250	Freedom of Expression and Communication Ethics	3
Advanced Writing and Communication Skills Requirement

Minor in Communication Studies

Communication Studies Minor

The minor in Communication Studies requires 15 credit hours, at least six of which must be at the 300-level or above. The additional credit hours must be chosen with prior approval of a Communication Studies advisor. A grade of C or higher is required in all courses (a C- is not acceptable).

Students, in conjunction with an advisor, can construct a Communication Studies minor focusing on areas of specific interest. These sample areas of concentration listed below are notated on the transcript as a Communication Studies minor. Possible areas of concentration include the following:

Sample Concentration in General Communication Studies

Offers a rich background in the field of human communication in a variety of contexts applicable to all personal, social and professional endeavors. Complements any major or academic/career objective.

Code	Title	Credit Hours
COS 120	Exploring Human Communication	3
Select four of the following:		12
COS 112	Interpersonal Communication	
COS 211	Public Speaking	
COS 220	Communication Theory	
COS 316	Small Group Communication	
COS 318	Nonverbal Communication	
COS 333	Business Communication	
COS 336	Political Communication	
COS 343	Introduction to Intercultural Communication	
COS 418	Organizational Communication	
Total Credit Hours		15

Sample Concentration in Organizational Communication

Offers practical application of theoretical concepts in organizational environments to develop skills in effective leadership, management, teamwork, conflict resolution, and professional presentations. Appropriate for students interested in working for a wide-range of businesses including profit and non-profit corporations, and government agencies.

Code	Title	Credit Hours
Select five of the following:		15
COS 120	Exploring Human Communication	
COS 220	Communication Theory	
COS 316	Small Group Communication	
COS 318	Nonverbal Communication	
COS 330	Conflict Management	
COS 333	Business Communication	
COS 343	Introduction to Intercultural Communication	
COS 418	Organizational Communication	
COS 560	The Executive Communicator	
Total Credit Hours		15

Sample Concentration in Public Advocacy

Offers theory and application of oral communication and argumentation as it is used to influence others to promote social change and accomplish persuasive advocacy. Appropriate for students interested in a wide range of objectives, including legal studies and pre-law, sales, advertising, marketing, entrepreneurship, and civic and political engagement.

Code	Title	Credit Hours
COS 211	Public Speaking	3
Select one of the following:		3
COS 304	Intercollegiate Debate Theory and Practice (complete three credits)	
COS 377	Argumentation and Critical Thinking	
Select three of the following:		9
COS 311	Advanced Oral Advocacy	
COS 314	The Power of Dialogue	
COS 318	Nonverbal Communication	
COS 336	Political Communication	
COS 352	Critical Research in Communication	
COS 472	Persuasion	
COS 473	Words that Shaped the World	
COS 474	Presidential Debates	
Total Credit Hours		15

Minor in Health Communication

* A grade of C or higher is required in all courses (a grade of C- or lower is not acceptable).

Journalism and Media Management

<http://com.miami.edu/programs>

The Department of Journalism and Media Management offers majors in Broadcast Journalism, Electronic Media, Journalism and Media Management and minors in Broadcast Journalism, Electronic Media, Hispanic Media, Journalism and Media Management.

Dept. Code: JMM

Introduction

The Department of Journalism and Media Management emphasizes hands-on learning and critical thinking within a multicultural, international context. Our students consistently win regional and national awards, and obtain prestigious internships and long-term positions in a competitive media marketplace. Additionally, they are meeting the challenges of the evolving media industry through entrepreneurial leadership. Our graduates also gain admission to excellent graduate programs and professional schools in a variety of fields.

Four majors and five minors are offered in the Department of Journalism and Media Management. The department's programs attract students interested in working in these specific fields, but also provide strong writing, creative, and analytical skills to students who pursue careers in other fields, such as law and business.

The School of Communication's Electronic Media and Broadcast Journalism majors are designed for students who intend to pursue professional work in electronic news, production operations and allied fields.

Students majoring or minoring in these subjects study all aspects of television, radio, cable, broadband, digital and mobile operations. All Broadcast Journalism and Electronic Media students are encouraged to become involved in UMTV (the campus cable television channel available to the community, the UM campus and over the web) and the student-run radio station, WVUM-FM, serving South Florida.

The School's Media Management major is designed for students interested in the business and management aspects of contemporary media. Students may pursue interests in entrepreneurship, sales, management, technology and research, among other topics. Students are encouraged to network with industry professionals at Media Management Association meetings and expand their knowledge of media business operations on various platforms through local and national internships.

The School's major in Journalism prepares students to be writers, editors and designers for a variety of media from mainstream and alternative newspapers and magazines to online media and entrepreneurial ventures. We emphasize effective storytelling through writing, audio and video recording, photography, graphics and data visualization. Reporting skills, analytical thinking and journalistic ethics are stressed throughout the program. Students are encouraged to work for *The Miami Hurricane*, the student-run newspaper, *Distraction* magazine and the *Ibis* yearbook, all of which are nationally award-winning publications. The robust South Florida media market also provides off-campus opportunities at various professional publications and websites.

Students majoring in Journalism may concentrate their studies in one of several tracks or areas or they may customize their course of study. The suggested tracks include: Reporting and Writing (which is the general journalism or custom track); Media and Journalism Studies (a more conceptual and less applied track for students interested in media analysis); Visual and Documentary Journalism (which allows for the study of photography, web design and videography or documentaries); and Sports, Travel and Lifestyle Features (which focuses on these as related areas of content). These tracks allow students the flexibility to design programmatic concentrations in everything from writing to web design to documentary and visual storytelling.

The School's facilities include a state-of-the-art radio studio, two high-definition television studios, digital post-production suites and related capabilities.

Major Cognate Area

- Broadcast Journalism
 - People and Society
- Electronic Media
 - People and Society
- Journalism
 - People and Society
- Media Management

- Media Management
 - People and Society

Degree Programs

The Bachelor of Science in Communication is offered in Journalism, Electronic Media, Broadcast Journalism, and Media Management.

Major

Majors are offered in:

- Electronic Media
- Broadcast Journalism
- Media Management
- Journalism

Each candidate for the degree of Bachelor of Science in Communication will complete School of Communication requirements including courses in the School's General Education Required Areas of Study. All majors must also complete a separate minor or second major within the School or in an academic program outside the School.

NOTE: Departmental Majors, if you wish to double major in the Department of Journalism and Media Management, you must first obtain the written approval of the JMM Department Chair.

Admission to the Electronic Media, Broadcast Journalism, Media Management and Journalism Majors

Before admission as an Electronic Media, Broadcast Journalism, Media Management or Journalism major, a student must:

- Complete the Core courses listed below, in residence at the University, all with grades of C or higher (C- is not acceptable).
- Students who have obtained the written approval of the Chair of Journalism and Media Management to use transfer credit hours to satisfy one or more requirements of that major may be required to complete additional courses in residence at the University before being admitted to that major.
- Upon completion of a student's first 45 University credit hours while enrolled in the School of Communication, all University credit hours earned toward the major will be used in computing a student's major cumulative grade point average; only those students with a cumulative average of 2.5 or higher will be admitted to a major.
- A student who has completed 45 credit hours while enrolled in the School of Communication, but who has not been admitted to one of the Communication majors, may be dismissed from the School. A student who has completed 60 University credit hours while enrolled in the School, but who has not been admitted to one of the Communication majors, will be dismissed from the School.

Majors in Journalism and Media Management

- B.S.C. in Broadcast Journalism (p. 520)
- B.S.C. in Electronic Media (p. 523)
- B.S.C. in Journalism (p. 526)

² A grade of C or higher is required in all courses (a C- is not acceptable).

Strategic Communication

<http://com.miami.edu/programs>

Dept. Code: STC

Introduction

The Department of Strategic Communication offers majors and minors in Advertising and Public Relations.

Students majoring in Advertising learn the art, craft and business of promoting brands from an integrated marketing perspective. The program gives students a well-rounded education in advertising that emphasizes strategy building, data gathering and analysis, creative development and media planning skills. The program includes practical and theoretical approaches to the world of professional advertising, both domestically and internationally. The curriculum is hands-on and students learn how to create an advertising campaign that meets their client's goals. Qualified students may elect to participate in the internship program, which provides an opportunity to work in the professional community of the Greater Miami area or other regions. The School's Advertising Program also has an active alliance with the American Advertising Federation.

Students majoring in Public Relations learn how to promote a client's business, image, product or service. Public relations is a strategic communication process that builds mutually beneficial relationships between organizations (business, government, nonprofit, individual) and their public's. PR practitioners develop and deliver key messages through traditional and social media channels. The program provides a well-rounded education in public relations that emphasizes research and analysis, creative development and the relationship of all media to PR in both public and private sectors.

The hands-on curriculum reflects the importance of strategic critical thinking, research for understanding target audiences, writing, design expertise and creativity. Students create and execute a PR campaign in a senior-level capstone course that serves a client organization in the community. Demand for PR interns is high, and qualified students may elect to participate in the internship program to acquire professional experience in South Florida and other regions. The program has ties to the Public Relations Society of America and maintains a Public Relations Student Society of America chapter.

Major Cognate Area

- Advertising General Track:
 - People and Society
- Advertising Management Track:
 - People and Society
- Advertising Creative Track:
 - People and Society or
 - Arts and Humanities
- Public Relations:
 - People and Society

Minor Cognate Area

- Advertising Minor:
 - People and Society
- Public Relations Minor:
 - People and Society
- Strategic Communication Minor:
 - People and Society

Please note, students completing majors and minors within the same department may only satisfy one required cognate area of study.

Degree Programs

The Bachelor of Science in Communication is offered in Advertising and Public Relations

Majors are offered in:

- Advertising General Track
- Advertising Creative Track
- Advertising Management Track
- Public Relations General Track
- Public Relations Practice Track

Each candidate for the degree of Bachelor of Science in Communication will complete School of Communication requirements including courses in the School's General Education Required Areas of Study. Advertising majors must also complete a separate minor or a second major in either a second Program of Study within the School or in an academic program outside the School.

Admission to the Advertising and Public Relations Majors

Before admission as an Advertising or Public Relations major, a student must:

- Complete the five Core courses listed below, in residence at the University, all with grades of C or higher (C- is not acceptable).

- Students who have obtained the written approval of the Chair of Strategic Communication to use transfer credit hours to satisfy one or more requirements of that major may be required to complete additional courses in residence at the University before being admitted to that major.
- Upon completion of a student’s first 45 University credit hours while enrolled in the School of Communication, all University credit hours earned toward the major will be used in computing a student’s major cumulative grade point average; only those students with a cumulative average of 2.5 or higher will be admitted to a major.
- A student who has completed 45 credit hours while enrolled in the School of Communication, but who has not been admitted to one of the Communication majors, may be dismissed from the School. A student who has completed 60 University credit hours while enrolled in the School, but who has not been admitted to one of the Communication majors, will be dismissed from the School.

Major in Advertising

Students majoring in advertising will choose one of the following three tracks:

- Advertising General Track
- Advertising Management Track
- Advertising Creative Track

Major in Public Relations

Students majoring in public relations will choose one of the following two tracks:

- Public Relations General Track
- Public Relations Practice Track

Each candidate for the degree of Bachelor of Science in Communication will complete School of Communication requirements including courses in the School’s General Education Required Areas of Study. Public Relations majors must also complete a separate minor or a second major in either a second Program of Study within the School or in an academic program outside the School.

Minors in Strategic Communication Department

The Department of Strategic Communication offers minors in:

- Advertising
- Public Relations
- Strategic Communication

The minors in Advertising, Public Relations and Strategic Communication require a grade of C or higher in all courses (a C- is not acceptable).

Majors in Strategic Communication

- B.S.C. in Advertising - Advertising Creative Track (p. 539)
- B.S.C. in Advertising - Advertising Management Track (p. 542)
- B.S.C. in Advertising - General Advertising Track (p. 545)
- B.S.C. in Public Relations - General Track (p. 547)
- B.S.C. in Public Relations - Practice Track (p. 550)

Minors in Strategic Communication

- Advertising (p. 552)
- Public Relations (p. 553)
- Strategic Communication (p. 553)

B.S.C. Advertising - Advertising Creative Track

Continuing and International Education

<http://www.continue.miami.edu>

The University of Miami Division of Continuing & International Education (DCIE) is dedicated to providing the highest quality education and training – both on campus and online – to people of all ages, throughout every stage of their lives. DCIE offers undergraduate, graduate and noncredit courses (including online and hybrid options) that span a wide array academic disciplines. Our programs help advance and enrich students who are either beginning their academic journey to seasoned professionals pursuing career opportunities within the global community.

DCIE manages the following programs:

- Adult Student Access Program (non-degree status enrollment in undergraduate and graduate credit classes)

• Credit certificate programs

- Noncredit professional certificate programs (p. 1371)
- Bachelor of General Studies degree program for adults 22+
- Summer college credit programs for high school students (p. 1375)
- Intensive English language programs for international students
- Intensive language programs
- Osher lifelong learning community for adults aged 50+
- Corporate/custom training and workforce development programs

Adult Student Access Program

www.miami.edu/asap

Students that meet the minimum requirements may be eligible to enroll in a maximum of 30 credit hours in an undergraduate, non-degree seeking category which may be applied to certain degree programs, after all application and degree seeking requirements are met. In order to be enrolled in this category, students submit an online application (<http://www.miami.edu/asap>) with any required documents. A minimum 2.5 G.P.A. is required to continue in the program beyond 12 attempted credit hours.

Students may take up to 6 credit hours, **lifetime maximum**, in a graduate non-degree seeking category which may be applied to certain degree programs, after all application and degree seeking requirements are met. Not all graduate departments participate in this program. In order to enroll in this category, students submit an online application (<http://www.miami.edu/asap>), after securing the written permission of the participating graduate department.

For more information, contact: The Adult Student Access Program, DCIE, University of Miami, umnondegree@miami.edu, 305-284-4000.

Bachelor of General Studies

www.miami.edu/bgs

Introduction

Under the leadership of Collegiate Studies, the DCIE offers the Bachelor of General Studies (BGS) degree program, which provides a solid and rigorous, interdisciplinary academic experience for adult students. It is designed specifically for adults who have previously attended college but have not yet completed their undergraduate degrees, as well as for those who have never had the opportunity to pursue post-secondary studies. Admitted students may attend in either a part-time or full-time status. Prospective students are eligible for admission if graduated from high school at least four years ago, have not attended the University of Miami during the past calendar year, have a minimum of 2.2 grade-point average on previous college work, and are U.S. citizens or permanent residents. Students must be pursuing first undergraduate degree.

The BGS curriculum allows an individual the flexibility to design an area of concentration to enhance professional or personal goals. Designed to strengthen critical thinking and writing skills of the students, each course is taught by University of Miami faculty who are committed to the adult student.

Advisors offer personalized attention in career exploration and academic advising and discuss educational alternatives with potential students. Every effort is made to ensure that the process - from admission to registration - is efficient, convenient, and flexible. Students may complete their degree by attending online and on-campus courses.

To underscore its commitment to the adults in our community, the University offers a special tuition to students in the Bachelor of General Studies program which enables the adult, part-time student to pursue this degree at an affordable tuition rate.

The admission process takes into consideration that one's grade-point average, while significant, is only one factor in determining an applicant's qualification for acceptance. Therefore, an advising session with an advisor from DCIE will be scheduled to supplement the information you provide on the BGS application form (<http://www.miami.edu/dcie/index.php/bgs/apply>), which may also be obtained by calling Collegiate Studies at 305-284-4000.

Requirements for Graduation

I. Candidates for the Bachelor of General Studies (BGS) degree must complete the required credit hours and achieve the quality point average specified for students in the University at large as stated in the section Academic Regulations and Procedures. Exempted is interpreted to refer exclusively to those exemptions provided under the following headings:

1. Advanced Standing and Placement (Credit Hour Granted);
2. Credit by Examination;
3. Advanced Placement (by proficiency examination);

II. Except where a required course is one designated to correct a deficiency in his/her college preparation, the student may apply the credit hours of any required course from which he is exempted toward the credit hours for that subject as a general requirement for graduation, toward the 120 credit hours required for graduation. (See Departmental Proficiency Examinations.) An exemption may be granted for ENG 105, but these credit hours may not be applied towards the 120 required for graduation.

III. Credit Only

Only free electives may be taken under this option. Courses which satisfy the major, the distributions of the School, the General Education Requirements of the University or any course for which a C or better is required may not be taken for credit only.

Curriculum Requirements

Code	Title	Credit Hours
General Education Requirements		
English Composition ¹		
ENG 105	English Composition I	3

German	
Portuguese	
French	
Italian	
Spanish	
History Survey Sequence	
Select a total of 6 credit hours in a single two semester sequence	6
Area of Concentration	
Every candidate for a degree must select an area of concentration. ²	30
ENG 333	Writing the Research Paper ³
Secondary Focus ⁴	
Select four more secondary courses to compliment AOC (previously Interdisciplinary courses)	12
Electives	
Select elective courses in consultation with their advisor to meet the 120 credit hour graduation requirement	15
Total Credit Hours	120

¹ During the first year of enrollment in the School.

² The candidate designs an area of concentration that meets his/her professional and personal goals. The course of study is reviewed and approved by the Dean and/or Director of the program.

³ ENG 333 Writing the Research Paper is a Pre-requisite to completing courses in Area of Concentration and/or Secondary Focus.

⁴ Secondary Focus courses are especially designated to complement the AOC, enhance professional knowledge, cultural perspective and its relation to contemporary society.

Credit Certificate Programs

miami.edu/ccp

Not everyone needs or wants a complete degree program. Recognizing this, the DCIE - in cooperation with several other colleges and schools of the University - offers special Credit Certificate Programs.

Focusing on a single subject, these certificate programs allow students to concentrate on courses that offer the specific knowledge and skills needed for career advancement. All courses are taught by University of Miami faculty at the undergraduate level and are taken for academic credit hour.

Each certificate program varies in the number of required credit hours. While required courses are noted, students may work with an advisor in developing an individually-designed program.

Credit certificate programs are currently available in the following subject areas:

Certificate in Accounting

The Undergraduate Certificate in Accounting is awarded by the Division of Continuing and International Education and the Department of Accounting. It is designed for those who hold at least an undergraduate degree (preferably in business) from an accredited college or university, and whose present interest or occupation is accounting. The program requires students to take the same 24 credit hours of accounting courses (as listed below) required for the undergraduate major in Accounting. To sit for the Certified Public Accountant (CPA) examination in Florida, students must have completed 120 credit hours, including 24 credit hours of accounting (above the elementary level) and 24 credit hours of business courses, including a minimum of six credit hours of business law. There are additional educational requirements to become licensed as a Certified Public Accountant in Florida. Students may wish to consider either the Graduate Certificate in Accounting or the Graduate Certificate in Taxation (offered by the School of Business) to meet those additional education requirements.

Code	Title	Credit Hours
300 Level		
ACC 301	Cost Accounting	3
ACC 311	Intermediate Accounting I	3
ACC 312	Intermediate Accounting II	3
400 Level		
ACC 402	Auditing	3
ACC 403	Fundamentals of Taxation	3
ACC 404	Advanced Taxation	3
ACC 406	Accounting Systems	3
ACC 411	Advanced Accounting	3
Total Credit Hours		24

Business Technology

The Business Technology (previously CIS) program is designed to provide a broad background in business computer information systems and to develop the technical skills one needs to stay competitive in this challenging field. The program will be of particular benefit to programmers and to management information systems analysts. The certificate is awarded by the DCIE and the Department of Business Technology upon the successful completion of 18 credit hours as listed below.

Code	Title	Credit Hours

Intensive Language Institute

www.continue.miami.edu

The Intensive Language Institute (ILI) offers comprehensive language instruction for academic, professional, and personal purposes. The Intensive English Program (IEP), a full-time course of study for international students who wish to pursue university studies in the United States, provides instruction in English language and academic study skills. The ILI offers certificate programs, language courses and customized language programs.

The Intensive English Program and Intensive Language Institute are housed in the Division of Continuing and International Education and are located in Allen Hall.

Intensive English Program

The Intensive English Program prepares students to successfully participate in the academic environment by providing instruction in English language and academic study skills. Courses are offered at five levels of instruction. Students are given a placement test upon arrival to determine the most appropriate level of study. The skills-based curriculum integrates reading and writing, listening and speaking into one complete program of study. Specialized classes vary by level; focusing on the needs of the language learners. Satisfactory completion of the highest level meets the English language requirement for acceptance to undergraduate programs at the University.

The Intensive English Program is accredited by the Commission on English Language Program Accreditation.

For further information about the IEP please contact us at 305-284-2754 or iep@miami.edu. Additional information can be found on www.miami.edu/iep

Intensive Language Institute

The Intensive Language Institute offers specialized English courses in Legal English in several formats. Both a three week certificate program and a semester long program offered in conjunction with the UM School of Law are available.

Customized language instructional packages are also offered in Spanish, Portuguese, Italian, French, and English as a Second Language throughout the year. Instruction focuses on meaningful communication in the chosen language and is tailored for the participants. Specialized classes may focus on Accent Reduction, Medical Spanish, and/or Legal English. Customized language courses can take place on or off campus, are tailored for individuals, groups, and organizations, and are built to deliver targeted language training needs. For further information about these programs please contact us at 305-284-2752.

An Intensive Spanish certificate program is offered several times a year and is an immersion-style Spanish language program. For further information about the Spanish program please contact us at 305-284-4000.

Education and Human Development

<http://www.education.miami.edu>

Introduction

The School of Education and Human Development (SEHD) offers undergraduate majors in:

- Human and Social Development
 - Track I: Individual and Relational Development
 - Track II: Community and Program Development
 - Track III: Human and Social Development Studies
- Athletic Training
- Exercise Physiology
- Sport Administration
- Elementary (K-6)/Exceptional Student Education (K-12) with ESOL and Reading Endorsements (K-12)

The degrees of Master of Science in Education, Specialist in Education, Doctor of Education, and Doctor of Philosophy are available in various departments within the School. These programs are under the supervision of the Dean of the Graduate School and the School of Education and Human Development Sr. Associate Dean for Graduate Studies.

Vision/Mission

Our vision is to be a center of excellence in the study, promotion and integration of educational, psychological, and physical well-being in multicultural communities.

Our mission is to produce knowledge and prepare the next generation of leaders, researchers, and agents of change and well-being in education and the community.

Academic Policies

Academic Integrity Statement

Academic integrity is fundamental to scholarship, good citizenry, and individual success. All students in the School of Education and Human Development are expected to abide by the University of Miami Honor Code (https://doso.studentaffairs.miami.edu/_assets/pdf/policies/student_rights_and_responsibilities_handbook.pdf#page=10). It was established “to preserve the academic integrity of the student body, to encourage consistent ethical behavior among undergraduates, and to foster a climate of fair competition.” Please become thoroughly familiar with the provisions of the Code, academic dishonesty and violations of the Honor Code will not be tolerated.

Admission

Applications for incoming freshman are processed and reviewed by the Office of Admission.

Application to the Bachelor of Science in Education program is requested by February 1st.

Early application is encouraged.

Transfer students: The academic accomplishments of each transfer student will be evaluated on an individual basis. A 3.0 GPA is recommended for transfer admission.

Application deadline for transfer students is March 1st.

Students admitted into the SEHD programs are held to the program requirements stated in the Bulletin for that term.

Student Responsibilities

Students are responsible for planning their own programs and for meeting degree requirements. It is the student’s responsibility to understand and fully comply with the provisions set forth in this Bulletin and written changes to their program of study. Written requests for variation from program or school requirements are reviewed by an administrative committee.

Matriculated students who elect to transfer courses from another institution over a summer or intersession term, must receive departmental or program approval prior to enrolling in the course. Students are responsible for adhering to the residency rule which states that the last 45 consecutive credits must be earned at UM.

A student advising compact specifies the dual responsibilities between students and advisors in each program.

Transfer Approval for Coursework from other Institutions

The Associate Dean for Undergraduate Academic Services makes the final determination for transfer course equivalency. Transfer courses for minors and cognates will not be accepted once students have matriculated to the University of Miami. New transfer students may be awarded a maximum of one course toward a cognate (3 credits) and a maximum of two courses or 6 credits toward a minor.

The school has a very strict transfer policy regarding on-line course work from matriculated students. Students must present a syllabus for course evaluations.

Academic Progress and Probation

The School will review each student’s record at the end of each semester.

When a student’s semester or cumulative average is less than stated below, or progress toward degree completion is unsatisfactory, the student will be placed on academic probation or warning in accordance with the School of Education and Human Development policies and procedures.

Students on probation are not permitted to enroll in more than 12 credit hours, shall make arrangements to meet on a monthly basis with their academic advisor, and may have a STOP placed on their future enrollment until grades are further reviewed. The following criteria will determine probationary status.

Credit Hours Earned	CGPA	CGPA (Exercise Physiology Majors Only)
Fewer than 30 credit hours	1.7	2.0
30-59 credit hours	2.0	2.5
60+ credit hours	2.3	2.5

Note: There are different retention and probation policies for Athletic Training majors. Please see the Athletic Training (p. 570) website or the Athletic Training Guidelines Manual for this and other important information regarding the requirements for completion of the Athletic Training major.

Note: The minimum GPA required for graduation from a Teacher Education Program is 2.5.

Subject to Dismissal

A student who remains on academic probation twice during their undergraduate studies can be designated as "Subject to Dismissal" and will be dismissed the following semester if not removed from probationary status. It is not required to be on this status to be dismissed from the School of Education and Human Development or from the University of Miami.

Academic Dismissal

A student in the School of Education and Human Development whose CGPA or progress toward degree completion, falls below the level of the minimum standards of the University of Miami and/or the School of Education and Human Development, may be dismissed.

Accreditation

Kinesiology and Sport Sciences offers the Athletic Training Program that is accredited by the Commission on Accreditation of Athletic Training Education (CAATE); the Sport Administration Program is approved by the North American Society of Sport Management.

The Department of Teaching and Learning in The School of Education and Human Development offers Teacher Education Programs approved by the Florida Department of Education. In conjunction with the Phillip and Patricia Frost School of Music, the School of Education and Human Development offers Teacher Education Programs in Music Education at the undergraduate and graduate levels. Students who successfully complete their program of studies and submit an application to the Florida Department of Education - Bureau of Educator Certification are eligible to receive a Professional Teaching Certificate.

The policy for practicum, internship and clinical lab credit hours will vary by program. Please check the specific program requirements with your academic advisor or program director.

The Foote Fellows Honors Program reflects the educational vision of former University of Miami President Edward T. Foote, who retired in 2000 after serving the University for twenty years. President Foote passed away in the spring, 2016 but his legacy lives on through the Foote Fellow Honors Program that recognizes the most educationally accomplished incoming students at the University of Miami. Foote Fellows have distinguished themselves both in and out of the classroom at their previous schools, are self-motivated, and think independently. Foote Fellows enjoy unmatched freedom and flexibility to explore a multitude of educational resources within the curricular framework of their school or college. Many Foote Fellows leverage this opportunity to pursue additional majors and/or minors and to study abroad.

The School of Education and Human Development (SEHD) offers a first year inter-disciplinary seminar exclusively for Foote Fellows lead by the dean of the school, Isaac Prilleltensky.

Foote Fellows have preferential advising for course registration with their advisor, Associate Dean, Gina Astorini. Dean Astorini assists Foote Fellows to chart their academic path and to attain access to distinctive learning opportunities at the University, such as special school-based seminars, faculty-mentored research, networking opportunities, and off-campus internships. They also have early registration appointments thus providing optimal access to the most exciting and popular courses on campus.

Foote Fellows are invited to participate in the Research Honors Program. This is a two year program where students complete the following components:

- 2 consecutive semesters of faculty mentored research (2-credits each semester)
- A Thesis (20 page minimum-faculty mentored)
- Seminar and poster presentation at the Undergraduate Research, Creativity and Innovation Forum in the spring
- Students who complete the program will have their transcripts stamped with Research Honors Designation.

The SEHD has partnered with the Melissa Institute of Miami. The Melissa Institute, conducts research and sponsors conferences, forums and seminars throughout the year addressing school bullying, domestic violence, prevention, education, awareness and community engagement directed at reducing violence. The SEHD, through the generosity of the Melissa Institute, offers complimentary tickets to Foote Fellow students in our program to attend these conferences/seminars during the semester.

Foote Fellows are invited to join advanced, interdisciplinary Foote Fellow seminars taught by leading faculty members from across the University. An example is Books That Matter, a rigorous seminar in non-fiction reading that is offered in sessions for first-year and for upper-class students. Additionally, Foote Fellows benefit from early move-in to the residential colleges and receive focused advising on post-baccalaureate distinguished fellowships and awards.

The Foote Fellow Program will provide an enriching experience for students who have been accepted by UM.

Honors Program in Exercise Physiology (HPEP)

The Kinesiology and Sport Sciences Department offers an accelerated Master degree program for students who have completed their 4-year undergraduate program in Exercise Physiology or Athletic Training. It allows students to complete their Master degree in any of the Exercise Physiology tracks (Clinical and Applied Exercise Physiology, Strength and Conditioning, and Nutrition for Health and Human Performance) within one year of their BS degree obtained in that major.

The additional year of study will enable students to complete all requirements leading to a Master of Science degree in Exercise Physiology in the School of Education and Human Development, (M.S. Ed.), in 5 years. To be considered, applicants must be in the top 10% of their high school graduating class. Students must have an SAT score of 1000 or an ACT score of 30 and an unweighted minimum GPA of 3.0 or above. The Exercise Physiology and HPEP application forms and supporting materials must be submitted no later than August 1st of the applicant's senior year. A review of completed applications will begin by the end of September.

For further information and application forms please visit this website (<http://www.miami.edu/dualdegree>).

Educational and Psychological Studies

Dept. Code: EPS

Bachelor of Science in Education: Human and Social Development

The major in **Human and Social Development (HSD)** focuses on the promotion of healthy development and well-being. It prepares students to work with people in multiple contexts and settings:

- health and human services
- schools, universities, and community programs
- government and non-government agencies
- grass-roots movements
- socially responsible business and entrepreneurial organizations

By exploring the scholarly and practical interconnections among **individual, interpersonal, social, and community approaches to change**, students learn to identify barriers to well-being and to implement effective change-oriented strategies and policies. HSD coursework emphasizes **theory, research, and skills**. It culminates in a **practicum** in a setting related to students' area of interest and prepares them for both graduate studies and careers.

Students choose between three areas of concentration (tracks).

- **Track I: Individual and Relational Development (Track Code: HSDI)**
This track emphasizes individual, relational, and family well-being. Focusing on context and diversity in mental health and on strength-based, preventive, and empowering approaches, courses cover family studies, counseling theories and techniques, interviewing skills, and the basics of human service work. Students are well-prepared for graduate study in the helping professions and careers in health and human services.
- **Track II: Community and Program Development (Track Code: HSDC)**
This track promotes healthy individual and community development by emphasizing how social, institutional, and community dynamics affect personal well-being. Stressing the role of non-government agencies in fostering well-being for people with diverse backgrounds, HSDC prepares students to diagnose institutional and community challenges and offer strategies for positive change. Courses include community-focused planning, needs assessment, and change strategies and nonprofit program development, implementation, and evaluation. Students are well prepared for graduate study in community psychology and public policy and careers in community organizations.
- **Track III: Human and Social Development Studies (Track Code: HSDS)**
This is a general track which offers a menu of courses relating to individual and community development. HSDS students are free to combine classes from the Individual (HSDI) and Community (HSDC) tracks. This track meets the needs of students who seek greater flexibility in course work and are less concerned with specializing in the individual or community tracks.

HSD students must declare an approved second major or a minor either in the School of Education or through any other school or college.

Requirements for Graduation

Bachelor of Science in Education

I. Candidates for B.S.Ed. in the School of Education and Human Development must complete the credit hours of work and achieve the quality point average specified for students in the University at large as stated in the section ACADEMIC REGULATIONS AND PROCEDURES, subject to regulations concerning the major specified in departmental and program sections of this Bulletin.

Exempted is interpreted to refer exclusively to those exemptions provided under the following headings:

- Advanced Standing and Placement (Credit Hour Granted);
- Credit by Examination;
- Advanced Placement (by proficiency examination);
- Statement of Foreign Language Requirements;

II. Except where a required course is one designated to correct a deficiency in his/her college preparation, the student may apply the credit hours of any required course from which he is exempted toward the credit hours specified for that subject as a general requirement for graduation and, upon

payment of a recording fee, toward the 120 credit hours required for graduation. (See Departmental Proficiency Examinations.) An exemption may be granted for ENG 105, but these credit hours may not be applied toward the 120 credit hours required for graduation.

III. Credit Only. Only free electives may be taken under this option. Courses which satisfy the major, minor, the distributions of the School, the General Education Requirements of the University or any course for which a C or better is required may not be taken for credit only.

IV. Transferred credit hour may not count toward the completion of a major without the written approval of the Assistant Dean of the School of Education and Human Development.

V. Required Areas of Study

1. English Composition 3 – 6 credit hours

Students fulfill this requirement by satisfactorily completing ENG 105 and ENG 106 or its equivalent. Appropriate Advanced Placement (AP) or International Baccalaureate (IB) scores in English composition may be used to satisfy the ENG 105/ENG 106 requirement. An appropriate score on the SAT or ACT verbal examination may earn a student exemption from, but not credit hour in, ENG 105. Appropriate scores on other tests determined by the Department of English may earn a student exemption from, but not credit hour in, ENG 105. Courses satisfying the English Composition requirement may not be used to fulfill the Advanced Writing and Communication Requirement.

2. Mathematics

B.S.Ed. degree candidates in the Department of Educational and Psychological Studies are required to take EPS 351. This course fulfills a Math requirement for the HSD major. Prior to taking EPS 351, students must complete MTH 101 or be exempt from MTH 101 based on any of the following tests: AP, IB, or an examination administered by the Department of Mathematics.

3. Foreign Languages (not applicable)

Areas of Knowledge and Cognate Requirements

The University of Miami's General Education requirements ensure that graduates have acquired essential intellectual skills and have engaged a range of academic disciplines. All new students will fulfill the General Education requirements by selecting a **Cognate**, which is a cluster of courses arranged by their content, field and interest.

- A cognate is a group of at least three related courses for at least 9 credit hours.
- The courses in a cognate are related in a topical, thematic, interdisciplinary, sequential, or other such fashion, so that completion of a cognate provides coherent depth of knowledge in the area.
- Students must take three cognates to fulfill the Areas of Knowledge requirement,
 - one in the **Arts & Humanities (A&H)**,
 - one in **People & Society (P&S)**, and
 - one in **Science, Technology, Engineering & Mathematics (STEM)**.
- Each cognate has course options that allow students to complete the cognate in ways that meet their individual interests, while staying within the coherent focus of the cognate.
- In addition to the cognates that have been designed by faculty, each major and minor fulfills the cognate requirement in that one area.
 - Exercise Physiology and Athletic Training majors will fulfill the **STEM** cognate.
 - Sport Administration, Human and Social Development, and Elementary/ESE majors will fulfill the **P&S** cognate.
- An approved list of cognates can be found on the University of Miami website.

VI. Advanced Writing and Communication Skills Requirement

Every student majoring in Human and Social Development, will meet the Advanced Writing and Communication Requirement upon fulfillment of their major courses. These courses have a prerequisite requirement of ENG 105 and ENG 106 and will be identified as either writing intensive or as an oral/verbal communication proficiency course or both. Digital competency for both written and oral competencies will be assessed. Writing intensive courses require a minimum of 2500 written words; assignments will be assessed for analytical ability, synthesis of information, grammar, content and style. Courses designated as an oral/verbal proficiency class will provide students an opportunity to demonstrate their presentation skills using accurate standard English structure and syntax, non-verbal cues and gestures, as well as audience appropriate language. Courses in the HSD major which meet the Advanced Writing and Communication Skills Requirement are EPS 321, EPS 371 and EPS 579.

VII. Major in Human and Social Development

- Every candidate for the B.S.Ed. degree in the Department of Educational and Psychological Studies must choose a major in Human and Social Development.
- Students choose among three areas of concentration:
 - Track I – Individual and Relational Development (HSDI);
 - Track II – Community and Program Development (HSDC);
 - Track III – Human and Social Development Studies (HSDS).

To find the requirements for the major, consult this Bulletin under the discipline concerned, and confer with the designated departmental representative.

- HSD majors must maintain a minimum overall grade point average of 2.0 with a grade of “C” or better in all courses in the major.
- HSD students must declare an approved second major or a minor in the School of Education and Human Development or through any other UM school or college.

VIII. Minor

B.S.Ed. majors in Human and Social Development are required to declare a minor.

IX. Electives

Electives may be chosen from any courses offered by the University. The student should consult an advisor before selecting elective courses. At least 6 credit hours must be at the 300 level or above.

X. Senior Assessment

Seniors are required to participate in the General Education Assessment prior to graduation as part of the SACS review process.

For further information, address all inquiries to:

Total Credit Hours		15

- * The requirements of the minor are 15 credit hours with a grade of C or better. Nine of these 15 credit hours must be earned at the University of Miami; with prior approval, three of these nine may be taken through the UM Study Abroad Program.
- ** All transfer course equivalencies, (up to 6 credits), must be approved by the EPS department.
- *** The undergraduate coursework in Human and Social Development is open to all qualified University of Miami students.
- **** Determination for using these courses as a minor, as a specialization, and/or as electives in any program, is made by the individual student's degree granting college or school.

Kinesiology and Sport Sciences

Dept. Code: KIN

The School of Education and Human Development offers undergraduate studies in the Kinesiology and Sport Sciences Department. The Department provides some of the strongest programs in the field, providing a structured classroom setting immersed in theory and knowledge with clinical and practical experiences. The department is committed to fostering unique and collaborative efforts within our diverse University community. Students are encouraged to engage in various work and clinical experiences including opportunities at the Medical School, the Miami Project to cure paralysis, UM Varsity Athletics Department, South Florida sports industry, Sports Medicine Clinics, Veterans Administration Hospital, and local high schools. Students can choose to major in one of the following areas:

- Athletic Training
- Exercise Physiology (with a pre-medical or pre-physical therapy track)
- Sport Administration

Bachelor of Science in Education

I. Candidates for B.S.Ed. in the School of Education and Human Development must complete the credit hours of work and achieve the quality point average specified for students in the University at large as stated in the section ACADEMIC REGULATIONS AND PROCEDURES, subject to regulations concerning the major specified in departmental and program sections of this Bulletin. Exempted is interpreted to refer exclusively to those exemptions provided under the following headings:

- Advanced Standing and Placement (Credit Hour Granted);
- Credit by Examination;

- Advanced Placement (by proficiency examination);
- Statement of Foreign Language Requirements;

II. Except where a required course is one designated to correct a deficiency in his/her college preparation, the student may apply the credit hours of any required course from which he is exempted toward the credit hours specified for that subject as a general requirement for graduation and, upon payment of a recording fee, toward the 120 credit hours required for graduation. (See Departmental Proficiency Examinations.) An exemption may be granted for ENG 105, but these credit hours may not be applied toward the 120 credit hours required for graduation.

III. Credit Only

Only free electives may be taken under this option. Courses which satisfy the major, minor, the distributions of the School, the General Education Requirements of the University or any course for which a C or better is required may not be taken for credit only.

IV. Transferred credit hour may not count toward the completion of a major without the written approval of the Assistant Dean of the School of Education and Human Development.

V. Required Areas of Study.

1. English Composition

Students must take ENG 105 and ENG 106 (or their equivalent) during the first year of enrollment in the School. Admission to ENG 105 requires a placement score acceptable to the Department of English. Students whose placement scores are deemed unacceptably low will be required to take the non-credit course, ENG 103, before taking ENG 105 and ENG 106. Students whose placement scores are high may be exempt from ENG 105 but not from ENG 106 or its equivalent.

2. Mathematics

B.S.Ed. degree candidates must complete MTH 113 or higher. Students who do not place directly into MTH 113 must enroll in either MTH 099 or MTH 101 based on results of placement tests. Statistics does not satisfy the Math requirement. B.S. in Athletic Training and B.S. in Exercise Physiology have different Math requirements. Please see specific program requirements.

3. Foreign Languages (applicable to Sport Administration majors only)

Students must earn at least 3 credit hours of a foreign language at the 200 course level or higher. Special 200-level courses are required of native speakers who choose to fulfill the language requirement. Two semesters of American Sign Language constitutes an acceptable alternative for the Foreign Language Requirement.

Areas of Knowledge and Cognate Requirements

The University of Miami's General Education requirements ensure that graduates have acquired essential intellectual skills and have engaged a range of academic disciplines. All new students will fulfill the General Education requirements by selecting a **Cognate**, which is a cluster of courses arranged by their content, field and interest.

- A cognate is a group of at least three related courses for at least 9 credit hours.
- The courses in a cognate are related in a topical, thematic, interdisciplinary, sequential, or other such fashion, so that completion of a cognate provides coherent depth of knowledge in the area.
- Students must take three cognates to fulfill the Areas of Knowledge requirement,
 - one in the **Arts & Humanities (A&H)**,
 - one in **People & Society (P&S)**, and
 - one in **Science, Technology, Engineering & Mathematics (STEM)**.
- Each cognate has course options that allow students to complete the cognate in ways that meet their individual interests, while staying within the coherent focus of the cognate.
- In addition to the cognates that have been designed by faculty, each major and minor fulfills the cognate requirement in one area.
 - Exercise Physiology and Athletic Training majors will fulfill the **STEM** cognate.
 - Sport Administration, Human and Social Development, and Elementary/ESE majors will fulfill the **P&S** cognate.
- An approved list of cognates can be found on the University of Miami website.

VI. Advanced Writing and Communication Requirement

Every student majoring in a program from the Kinesiology and Sport Sciences Department will meet the Advanced Writing and Communication Requirement upon fulfillment of the courses for that major. These courses have a prerequisite of ENG 105 and ENG 106 and will be identified as either writing intensive or as an oral/verbal communication proficiency course or both. Digital competency for both written and oral components will be assessed. Writing intensive courses require a minimum of 2500 written words; assignments will be assessed for analytical ability, synthesis of information, grammar, content and style. Courses designated as an oral/verbal proficiency class will provide students an opportunity to demonstrate their presentation skills using accurate standard English structure and syntax, non-verbal cues and gestures, as well as audience appropriate language. The following courses meet the Advanced Writing and Communication Skills Requirement for the major:

Athletic Training: KIN 250 and KIN 260

Exercise Physiology: KIN 365 and KIN 457

Sport Administration: KIN 308 and KIN 498

VII. Majors

Every candidate for the B.S. Athletic Training degree must choose Athletic Training as a major. Every candidate for the B.S. EXPH degree must choose Exercise Physiology as a major. Every candidate for the B.S. Ed. degree must choose a major in Sport Administration. To find the requirements for the major, consult this Bulletin under the discipline concerned, and confer with the designated departmental representative.

The choice of majors should be made no later than the beginning of the junior year and must be approved by the major department. Any student making unsatisfactory progress in a major may be required to change his/her major or to relinquish candidacy for the degree.

VIII. Minors

B.S. Ed. majors in Sport Administration and Exercise Physiology and B.S. EXPH majors are required to declare a minor. Sport Administration students require department approval before declaring a minor. Exercise Physiology students may choose not to declare a minor if following the pre-med track. Students must complete all of the pre-med courses in order to be waived from the minor requirement. Please consult an advisor for clarification of this requirement.

Athletic Training majors are not required to have a minor.

IX. Electives

Electives may be chosen from any courses offered by the University. The student should consult an advisor before selecting elective courses. At least 6 credit hours must be at the 300 level or above.

X. Senior Assessment

Seniors are required to participate in the General Education Assessment prior to graduation as part of the SACS review process.

Minors

A minor in any of the three areas below consists of 14-15 credit hours:

Exercise Physiology

Sport Administration

Sports Medicine

- A grade of C or better is required for each course applied toward the minor; the overall grade point average for the minor must be 2.5 or above.
- The undergraduate coursework in Exercise Physiology, Sports Medicine, and Sport Administration are open to all qualified University of Miami students. A student can minor in *either* Exercise Physiology or Sports Medicine but not both.
- Athletic Training majors are not allowed to minor in Sports Medicine.
- Determination for using these courses as a minor, as a specialization, and/or as electives in any program, is made by the individual student's degree granting college or school.
- Seniors are required to participate in the General Education Assessment as part of the SACS review process.

For further information, address all inquiries to:

Majors in Kinesiology and Sport Sciences

- B.S. Athletic Training (p. 573)
- B.S. Education, Sport Administration (p. 575)
- B.S. Exercise Physiology (p. 577)

Minors in Kinesiology and Sport Sciences

- Exercise Physiology (p. 580)
- Sport Administration (p. 581)
- Sports Medicine (p. 581)

B.S.A.T. Athletic Training

The Athletic Training program at the University of Miami is an undergraduate education program that has been accredited by CAATE. The program is designed to provide a structured classroom and clinical experience to prepare students to become eligible to sit for the Board of Certification exam; Didactic courses are sequenced to maximize student learning. Please see the Athletic Training website or the Athletic Training Guidelines Manual for the course sequence form and other important information regarding the requirements for completion of the Athletic Training major.

- A degree in Athletic Training requires a major GPA of 3.0 or higher and an overall GPA of 2.5 or higher.
- Seniors are required to participate in the General Education Assessment prior to graduation as part of the SACS accreditation review process.
- Students must successfully meet all of the retention requirements outlined in the Athletic Training Education Program (ATEP) handbook in order to continue in the major.

B.S.E.D. Sport Administration

The Sport Administration major at the University of Miami is an undergraduate education program designed to prepare students for careers in the sport industry. The program is committed to the professional development of students so that competencies and skills relevant to the Sport Industry can be acquired over time. Specific competencies in organization, ethics, marketing, leadership and legal issues are emphasized.

- Field experience and internships are an essential component of the major. The KIN department is actively engaged in placing students in visible sports settings and appropriate sport environments so that students acquire relevant competencies and gain pragmatic hands-on experiences that are necessary for success in today's sport industry.
- The Sport Administration major is a 42 credit hour major in Kinesiology coursework plus a class in public speaking (COS 211).
- Students are required to meet a foreign language component. This may be satisfied with two semesters of American Sign Language (TAL 107 and TAL 207), or any intermediate course (200+) in a foreign language that is offered at UM.
- Students transferring from another college or university must have a cumulative GPA of 2.5 or above in order to be considered for admission to the major.
- Students are required to complete a 9-credit internship upon successful completion of **ALL** coursework for the Sport Administration Major. Exceptions to this policy must be approved by the Undergraduate Program Director and the Associate Dean.
- A minor in any field is required. A Business minor is suggested to complement the Sport Administration major and provide a well-rounded comprehensive background to the Sport Administration field.
- Students pursuing a degree in Sport Administration must receive a grade of C or higher in KIN 201 in order to continue with the major. Students are allowed to retake KIN 201 to achieve the minimum C grade only once per University of Miami policy.
- **Students will be allowed to retake a course once.**

- All 400-level courses are restricted to declared Sport Administration majors and minors only.
- A degree in Sport Administration requires a major GPA of 2.5 or higher and an overall GPA of 2.3 or higher.
- KIN 306 and KIN 308 may not be taken in the same semester and must be taken during junior year. KIN 308 must be taken before KIN 410.
- A grade of C or better is required for each course applied toward the major.

B.S. in Exercise Physiology

The Undergraduate program in Exercise Physiology at the University of Miami, is designed for students to acquire a sound knowledge base in the sciences followed by the application of that knowledge base to human movement, exercise and sports performance. Clinical laboratory experiences supplement applied scientific theory in a rigorous academic setting.

- Students may pursue a pre-med track concurrent with the Exercise Physiology major and should inform their advisor if selecting this track.

- Students are required to complete a minimum of 8 credits in chemistry. The academic advisor will advise on the correct sequence of chemistry based on the individual student's career goals.
- Exercise Physiology requires that students maintain a major GPA of 2.75. Students with a major GPA below 2.75 will have one semester to raise their GPA to meet the requirement. Failure to do so may lead to dismissal from the major.
- Students transferring from another college or university must have a cumulative GPA of 3.0 or above in order to be considered for admission to the major.
- A grade of "C" or better is required for each course applied toward the major. Students are allowed to retake a course one time.
- All 100 level courses and KIN 202, KIN 212 are open to non-majors. All other courses are open to majors and minors only. KIN 202 is only open to science majors. Students should not take KIN 150 and KIN 202 as course material overlaps.
- All 300- and 400-level courses except those in a STEM cognate, are restricted to declared Exercise Physiology majors only.
- KIN 399 should be taken in the Spring semester of the junior year.
- Seniors are required to participate in the General Education Assessment prior to graduation as part of the SACS accreditation review process.

Honors Program in Exercise Physiology (HPEP)

KIN 458 will be available for honors credit for Exercise Physiology students provided the following stipulations are met:

1. The course is under the direction of a full-time faculty member in Exercise Physiology.
2. The student completes an honors project permission form and submits this form to the instructor within the first three weeks of the semester.
3. The student completes assigned writing credit work by the end of the semester.
4. Assignments completed for honors credit hour are sent to the University of Miami Writing Center for review.

The University of Miami currently offers an accelerated programs for undergraduate Exercise Physiology majors who want to obtain a Master's Degree in Exercise Physiology, Strength & Conditioning/Fitness Entrepreneurship, or Nutrition for Health & Human Performance. This can be done by taking one additional year of graduate courses. These students must take two graduate courses in Exercise Physiology in their senior undergraduate year in order to earn an M.S.Ed. degree in one additional year. Please visit our website (<http://www.education.miami.edu>) for additional information on the accelerated master's programs. To be eligible students must apply for admission to the accelerated master's program no later than the end of the Fall semester of their senior year.

- * A minor in Sports Medicine is available to all students at the University of Miami. Students should take the following 5 courses in the course list for a total of 15 credits. A grade of C or higher is required in each course.
 ** Please note that students majoring in Athletic Training are ineligible for the Sports Medicine minor.
 *** KIN 370 Sociocultural Aspects of Sports Medicine may be substituted for one of the courses listed above for the minor.

Teaching and Learning

Dept. Code: TAL

The Department of Teaching and Learning offers a Bachelor of Science in Education Degree in **Elementary Education (K-6)/Exceptional Student Education (K-12)** with ESOL (English for Speakers of Other Languages, K-12) and Reading (K-12) endorsements.

The Department offers two minors:

1. A traditional Education Minor consisting of 12 credit hours and
2. A Professional Training Option minor of 18 credit hours that fulfills the State of Florida "Professional Training Option" (PTO) for teaching in secondary-schools. Candidates must select a minor area of study in English, math, Secondary Science or Secondary Social studies or other areas of recognized certification. In order to obtain teaching credentials from the State of Florida, a PTO completer must successfully teach in an accredited school in Florida for one academic year.

Teacher Preparation Programs

One of the roles of the School of Education and Human Development is to serve as the professional school to conduct and coordinate programs for the preparation of teachers and other educational personnel at the University of Miami. Membership is held in the American Association of Colleges for Teacher Education, the National Association of State Directors of Teacher Education & Certification and in the Florida Association of Colleges for Teacher Educators. Teacher Preparation Programs (TPP) are accredited by the Florida Department of Education for the preparation of elementary/exceptional student education teachers, secondary teachers, music teachers and other school service personnel.

Professional Development Schools

Bel-Aire Elementary, Henry S. West Laboratory Elementary, Sunset Elementary, Ponce de Leon Middle School and Booker T. Washington Senior High School are operated by Miami-Dade County Public Schools. These schools provide the most up-to-date teaching environments, both in terms of design and curriculum, in partnership with the University of Miami. Students are welcomed at these facilities for field experiences and student teaching, and both students and faculty have the opportunity to contribute to the high quality functioning of these professional development schools.

Teacher Preparation Programs

Teacher Preparation Programs/majors in Elementary/Exceptional Student Education and Secondary Education that lead to professional certification and applicable endorsements are approved by the Florida Department of Education (FLDOE). Please be advised that the State may implement new requirements for certification. ***These requirements will be mandatory with or without notice in this bulletin.*** The student is responsible for securing the application for certification and submitting the necessary documents and fees to the Florida Department of Education to obtain certification and endorsement. The DOE Certification Ombudsman in the School of Education and Human Development is available to assist with certification and re-certification matters.

Academic Policies

Admission

Selection for the Teaching Profession

The faculty of the School of Education and Human Development conceives its ultimate obligation to be to the children, adolescents, and adults who will be taught by teachers who have completed teacher preparation programs at the University. The quality of students admitted into the teacher education curriculum is as important as the skills, content, and concepts to be learned.

Most courses in the teacher education program require school site-based field experiences, culminating in a full-time 15-week internship. School districts require a criminal background check for field placement students and interns. Fingerprinting and FBI background check procedures are at the applicant's expense. Students with felony arrests may wish to consider these requirements carefully and, if necessary, seek advice from an advisor in the School before applying for admission to the program. Students without a valid social security number will not be eligible for placement in the school district.

All students who wish to be considered for admission and/or retention in curricula leading to Florida Teacher Certification will be formally screened at certain points in their program of study with respect to the following criteria:

1. Admission to Teacher Candidacy (see requirements below).
2. Acceptable grade point averages (C or better for courses in the major).
3. Acceptable evaluations by University of Miami faculty.
4. Evaluations by clinical faculty at various field experience sites.
5. Satisfactory progress toward the completion of the Florida Educators Accomplished Practices requirement.

Students who receive a grade below C in their Student Teaching semester will not be recommended for teacher certification.

Note: The Associate Dean of the School of Education & Human Development and the Chairperson of the Department of Teaching and Learning (TAL) jointly approve appeals to the above policies.

Requirements for Admission to Teacher Candidacy

1. Satisfactory performance on the **General Knowledge Test**.
2. Completion of 45 credit hours. In addition, transfer students must have a minimum of 9 credit hours of acceptable credit earned at the University of Miami.
3. A **2.5 GPA in education core** courses. No education classes lower than C.

4. A **2.5 GPA in the content area** teaching major (for secondary education majors).
5. Completion of the Course Advisement Plan (CAP).
6. Completion of at least one Field Experience requirement.
7. Further enrollment in teacher education course work offered by the School of Education and Human Development is contingent upon the student meeting requirements 1-6 above.
8. All students must successfully complete M-DCPS fingerprinting process. Forms are available in the Office of Undergraduate Academic Services.

NOTE: Appeals to the policies stated 1-6 above must be directed to the Associate Dean of the School of Education and Human Development.

Please note: **Students may not register for any class above TAL 332 without admission to Teacher Candidacy .**

Requirements for Admission to Student Teaching

Students submit a formal application to the Department of TAL for admission to Student Teaching. Application materials are available and are to be completed by students no later than October 15 (Fall semester) or March 15 (Spring semester).

The following requirements must be met:

1. Admission to a Teacher Preparation Program (Teacher Candidacy).
2. Completion of application for admission to Student Teaching
3. Approval of the Associate Dean for Undergraduate Studies and the Department of TAL Chairperson.
4. Recommendations from two members of the faculty familiar with the student's academic proficiency. One of these must be from a faculty member in the School of Education and Human Development.
5. Earned a minimum of 90 credit hours.
6. **Submission of the Florida Educator's Accomplished Practices (FEAP) Portfolio via Live Text to the Assistant Director of Accreditation in the Department of TAL. The FEAP Portfolio must include evidence at the indicator level in the first five FEAPs.**
7. All Elementary/ESE majors must have completed **ALL** of the courses for the Elementary/ESE major.
8. Earned a minimum of 2.5 grade point average in core courses offered by the School of Education and Human Development.
9. A grade of C or better is required of each course applied to the major.
10. Earned a minimum of a 2.5 grade point average overall.
11. Successfully completed pre-internship field experiences.
12. Demonstrate satisfactory progress towards the completion of the FEAP requirement, as indicated in #6 above.
13. Passed the Florida General Knowledge Test.
14. Taken and passed one of the following exams: the Professional Education Test or the Subject Area Exam in either Elementary Education (K-6) or ESE (K-12).

NOTE: A MAXIMUM OF 12 CREDIT HOURS MAY BE TAKEN DURING THE STUDENT TEACHING SEMESTER. No outside job may be held or additional classes taken during the Student Teaching semester.

NOTE: The Associate Dean and the Chairperson of TAL in the School of Education and Human Development must approve appeals to the above policies.

Students must complete the FEAPs and the P- 12 Student Impact Project requirements. Monitoring of FEAPs and progress made toward program completion in the Teacher Education program will occur at the following checkpoints:

1. TAL 306, and TAL 429 ; and application to student teaching
2. Students enrolled in all teacher-education programs will submit complete portfolios at the end of TAL 480/TAL 580.

In addition, students enrolled in all teacher-education programs will submit e-portfolios via Live Text as follows

- TAL 306 Field Experience Seminar I (Must submit artifacts in order to receive a passing grade).
- TAL 429 Field Experience Seminar II (Must submit artifacts in order to receive a passing grade).
- Seniors are required to participate in the General Education Assessment prior to graduation as a part of the SACS review process.

Licensure/Certification Information

Only students who have completed all requirements for any State approved degree or certificate program will have their transcripts stamped as meeting State approved requirements for certification as well as appropriate endorsements. Students must meet requirements of the School of Education and Human Development as well as the college or school issuing the second major. Evidence of successful completion of all twelve Florida Educator Accomplished Practices is required to receive the FLDOE stamp on the graduate's final transcript.

Transcript stamp is contingent upon the student taking at least half of the coursework in teacher education at the University of Miami, including the Student Teaching component. At least half of the coursework in the students teaching content area(s) must be taken at the University of Miami in

the School of Education and Human Development, Frost School of Music, or other UM schools or colleges as determined by the program in which the student is enrolled.

Department's Honor Code, Ethics FEAP and Plagiarism Policy

At a minimum, students will receive an automatic FAIL for any assignment that shows even minimal evidence of any of the violations listed in the Student Handbook such as cheating, plagiarism, misrepresentation, collusion, falsification of data and documents, or fabrication of findings. The student will not be allowed to improve that grade and the Ethics FEAP will be marked as permanently failed in the student's portfolio record.

The professor of record will have absolute discretion to judge the severity of an offense involving plagiarism and/or violation of The Honor Code, including extending the penalty to an F in the course.

Students will receive an automatic FAIL on any **assignment** or **action** which shows a violation to the **Ethics FEAP**. Either the TAL Chair or the Dean's office may refer a student to the University Honors Council. Consequence for violating the Honor Code include disciplinary warning, disciplinary probation, suspension or expulsion from the university.

For further information, address all inquiries to:

Dr. Gina F. Astorini Associate Dean School of Education and Human Development P.O. Box 248065 University of Miami
Coral Gables, Florida 33124
Telephone: (305) 284-3711

Majors in Teaching and Learning

- B.S.E.D. in Elementary/Exceptional Student Education (ESE) with ESOL and Reading Endorsements (p. 584)

Minor in Teaching and Learning

- Education (p. 590)

Certificate in Teaching and Learning

- Professional Training Option (p. 591)

B.S.E.D. Elementary/Exceptional Student Education (ESE) with ESOL and Reading Endorsements

The Department of Teaching and Learning offers a major in Elementary/Exceptional Student Education that leads to certification in Elementary Education (K-6)/ESE (K-12) with ESOL and Reading endorsements. The requirements for Elementary/ESE Education are a major in Elementary/ESE Education and a minor outside of the Department of Teaching and Learning.

Requirements for Graduation

Bachelor of Science in Education

I. Candidates for B.S.Ed. in the School of Education and Human Development must complete the credit hours of work and achieve the quality point average specified for students in the University at large as stated in the section ACADEMIC REGULATIONS AND PROCEDURES, subject to regulations concerning the major specified in departmental and program sections of this Bulletin.

Exemption

Exempted is interpreted to refer exclusively to those exemptions provided under the following headings:

1. Advanced Standing and Placement (Credit Hour Granted);
2. Credit by Examination;
3. Advanced Placement (by proficiency examination);
4. Statement of Foreign Language Requirements;

Florida Teacher Certification (FTCE)

Students must pass the Professional Education, General Knowledge and Subject Area tests of the Florida Teacher Certification Examination (FTCE).

Florida Educator Accomplished Practices (FEAPS)

Students must complete the Florida Educator Accomplished Practices (FEAPs) and the P-12 Student Impact Project requirements. Monitoring of FEAPs and progress made toward program completion in the Teacher Education program will occur at the following checkpoints: Students enrolled in all teacher-education programs will submit complete portfolios at

1. application to student teaching and
2. at the end of TAL 480/TAL 580.

In addition, students enrolled in all teacher-education programs will submit e-portfolios via Live Text as follows

- TAL 306 Field Experience Seminar I (Must submit artifacts in order to receive a passing grade).
- TAL 429 Field Experience Seminar II (Must submit artifacts in order to receive a passing grade).

Departmental Proficiency Examinations

Except where a required course is one designated to correct a deficiency in his/her college preparation, the student may apply the credit hours of any required course from which he is exempted toward the credit hours specified for that subject as a general requirement for graduation and, upon payment of a recording fee, toward the 120 credit hours required for graduation. (See Departmental Proficiency Examinations.) An exemption may be granted for ENG 105, but these credit hours may not be applied toward the 120 credit hours required for graduation.

Credit Only

Only free electives may be taken under this option. Courses which satisfy the major, minor, the distributions of the School, the General Education Requirements of the University or any course for which a C or better is required may not be taken for credit only.

Transfer Credit

Transferred credit hours may not count toward the completion of a major without the written approval of the Assistant Dean of the School of Education and Human Development.

Required Areas of Study

English Composition 3 – 6 credit hours

Students fulfill this requirement by satisfactorily completing ENG 105 and ENG 106 or its equivalent. Appropriate Advanced Placement (AP) or International Baccalaureate (IB) scores in English composition may be used to satisfy the ENG 105/ENG 106 requirement. An appropriate score on the SAT or ACT verbal examination may earn a student exemption from, but not credit hour in, ENG 105.

Appropriate scores on other tests determined by the Department of English may earn a student exemption from, but not credit hour in, ENG 105. Courses satisfying the English Composition requirement may not be used to fulfill the Writing Across the Curriculum Required Area of Study.

Mathematics

B.S.Ed. degree candidates must complete MTH 113 or higher. Students who do not place directly into MTH 113 must enroll in either MTH 099 or MTH 101 based on results of placement tests.

Foreign Languages (not applicable)

Areas of Knowledge and Cognate Requirements

The University of Miami's General Education requirements ensure that graduates have acquired essential intellectual skills and have engaged a range of academic disciplines. All new students will fulfill the General Education requirements by selecting a Cognate, which is a cluster of courses arranged by their content, field and interest.

- A cognate is a group of at least three related courses for at least 9 credit hours.
- The courses in a cognate are related in a topical, thematic, interdisciplinary, sequential, or other such fashion, so that completion of a cognate provides coherent depth of knowledge in the area.
- Student must take three cognates to fulfill the Areas of Knowledge requirement,
 - one in the **Arts & Humanities (A&H)**,
 - one in **People & Society (P&S)**, and
 - one in **Science, Technology, Engineering & Mathematics (STEM)**.
- Each cognate has course options that allow students to complete the cognate in ways that meet their individual interests, while staying within the coherent focus of the cognate.
- In addition to the cognates that have been designed by faculty, each major and minor fulfills the cognate requirement in one area.
 - Exercise Physiology and Athletic Training majors will fulfill the **STEM** cognate.
 - Sport Administration, Human and Social Development, and Elementary/ESE majors will fulfill the **P&S** cognate.
- An approved list of cognates can be found on the University of Miami website.

Writing

Every student majoring in Teaching and Learning, will meet the Advanced Writing and Communication Requirement upon fulfillment of their major courses. These courses have a prerequisite requirement of ENG 105 and ENG 106 and will be identified as either writing intensive or as an oral/verbal communication proficiency course or both. Digital competency for both written and oral competencies will be assessed. Writing intensive courses require a minimum of 2500 written words; assignments will be assessed for analytical ability, synthesis of information, grammar, content and style.

Courses designated as an oral/verbal proficiency class will provide students an opportunity to demonstrate their presentation skills using accurate standard English structure and syntax, non-verbal cues and gestures, as well as audience appropriate language. Courses for the TAL Major which meet the Advanced Writing and Communication Skills Requirement are TAL 332 and TAL 428

Majors

Every candidate for the B.S.Ed. degree in the Department of Teaching and Learning must choose a major in Elementary/Exceptional Student Education (ESE) with ESOL and Reading endorsements.

Minors

Every candidate for a B.S. Ed. in Elementary Education/ESE must select a minor outside of the department of TAL.

Electives

Electives may be chosen from any courses offered by the University. The student should consult an advisor before selecting elective courses. At least 6 credit hours must be at the 300 level or above. Students may select elective course credits beyond the major, minor and general education requirements to complete a total of 120 credits required for the degree.

Note: Common prerequisites and total length for state-approved teacher education programs are subject to revision based on legislative and State of Florida Department of Education rule changes.

General Education Assessment

Seniors are required to participate in the General Education Assessment prior to graduation as a part of the SACS review process.

Please note: Students may not register for any class above TAL 332 without admission to Teacher Candidacy. Please see the requirements for Teacher Candidacy on the TAL Department page (p. 581).

Please note: Students are strongly encouraged to register for TAL 203 and TAL 324.

TAL Course		3
Total Credit Hours		12

- 1 All courses must be passed with a C or high with a minimum of 2.5 GPA for the minor.
- 2 It is strongly recommended that students enroll in courses for this minor which do not include Field Experience. Please see an advisor for a list of those courses.
- 3 TAL 107, TAL 207, TAL 307, TAL 407, and TAL 191 do NOT count toward the minor.
- 4 This minor does not lead to teaching credentials.

Professional Training Option Minor

The Professional Training Option (PTO) is a Florida Department of Education approved pathway for non-education majors to complete the Professional Education component, one of the requirements to become a certified teacher in the State of Florida. Please be advised that students seeking the PTO must be majoring or minoring in a teachable subject

Code	Title	Credit Hours
TAL 103	Psychological Foundations of Education	3
TAL 305	Classroom and Behavior Management	3

TAL 330	Introduction to the Education of Exceptional Individuals	3
TAL 404	Content Area Literacy in the Secondary Classroom	3
TAL 506	Issues and Strategies for ESOL	3
Select one course from the following list as appropriate for the subject area		3
TAL 524	Education and the Arts

TAL 544	Instruction and Assessment in Secondary Social Studies	
Total Credit Hours		18

- ¹ Students must pass the specified tests of the Florida Teacher Certification Exam. These tests include the General Knowledge Test (all four sections) and the Subject Area Exam of the student's discipline area (Biology, English, Math etc...). These tests must be passed prior to graduation in order to be eligible for the State of Florida Stamp applied to transcripts.
- ² All courses must be passed with a C or high with a minimum of 2.5 GPA for the minor.
- ³ Students must pass all 4 sections of the General Knowledge Exam (GKT), part of the FTCE, in order to be eligible for 400 level courses or higher.

Professional Training Option Certificate

The Professional Training Option (PTO) is a Florida Department of Education approved pathway for non-education majors to complete the Professional Education component, one of the requirements to become a certified teacher in the State of Florida. Please be advised that students seeking the PTO must be majoring in a teachable area in order to participate in the program.

The PTO minor consists of 18 credit hours passed with a C or higher with an overall GPA of 2.5 or higher. Upon successful completion of the coursework and passing the required Florida Teacher Certification Exams (FTCE) student's UM transcripts will indicate that the student has completed a Florida State-approved PTO program. Students will then be eligible to apply for a 3-year Temporary Teaching Certificate in the State of Florida. There is a one-year of successful teaching requirement in an accredited school in Florida in order to apply for a Professional Teaching Certificate. Please note: Students must have passing scores on the FTCE **prior to graduation** in order to be eligible for the PTO Stamp.

Engineering

<http://www.miami.edu/engineering>

Mission

The College of Engineering is committed to educating tomorrow's technology leaders for career success.

The objective of the College of Engineering is to serve society by offering high quality educational programs in the professional areas that it covers, and by performing research and community service, with high professional standards. The College is dedicated to educating engineers to deal with the major issues of society over the next generation - enhancing competitiveness, advancing health care, coming into harmony with the environment, utilizing technology for humankind's benefit, and supporting a sophisticated infrastructure. The goal of the faculty is to prepare students to be employed effectively in manufacturing, consulting, construction, information technology, service industries, and those related to the medical industry and health care, in roles involving planning, design and implementation at all levels of decision making. Students are broadly prepared in technical, leadership, and management skills. Student development accrues both inside and outside the classroom, with input from faculty, employers, alumni, and other students. They are made acutely aware of environmental and international perspectives. Professional competence in the traditional sense is complemented by a broad capability to function in society. The College places great emphasis on providing students with a learning experience which will enable them to develop productive careers while creating engineering solutions to problems of our society. Learning is centered around real life experiences, which involve an understanding of science, mathematics, social values, and aesthetics, to produce economical solutions to physical problems which society encounters. Protection and enhancement of the environment is stressed at all levels, and emphasis is placed on the creative application of knowledge which will improve the quality of life.

Department and Programs

The College of Engineering has five departments -

- Biomedical Engineering,
- Civil, Architectural, and Environmental Engineering,
- Electrical and Computer Engineering,
- Industrial Engineering, and
- Mechanical and Aerospace Engineering

offering curricula leading to Bachelor of Science degrees in the following fields:

- Aerospace Engineering,
- Architectural Engineering,
- Biomedical Engineering,
- Civil Engineering,
- Computer Engineering,
- Electrical Engineering,
- Engineering Science,
- Environmental Engineering,
- Industrial Engineering, and
- Mechanical Engineering.

Interdisciplinary areas of study, areas of specialization within departments, and study in two entirely different areas are available through options, concentrations and dual degree programs.

Accreditation

The programs in Aerospace Engineering, Architectural Engineering, Biomedical Engineering, Civil Engineering, Computer Engineering, Electrical Engineering, Environmental Engineering, Industrial Engineering, and Mechanical Engineering are accredited by the

Engineering Accreditation Commission (EAC) of the Accreditation Board for Engineering and Technology (<http://www.abet.org>) (ABET)

415 North Charles Street

Baltimore, MD 21201

telephone: 410-347-7700

The program in Engineering Science is not accredited.

The College offers graduate programs leading to degrees both in the traditional and interdisciplinary areas of study. Programs leading to the M.S. degree may include specialization in the following areas of study: Architectural Engineering, Biomedical Engineering, Civil Engineering, Electrical and

Computer Engineering, Engineering Management, Environmental Engineering, Industrial Engineering, Mechanical Engineering, Medical Informatics, Structural Engineering, and Thermal and Fluid Sciences. .

Engineering Laboratories

The College of Engineering maintains a variety of well-equipped laboratories adequate for undergraduate instruction and providing for graduate and sponsored research.

Computer Laboratory

- Clarke Computational Laboratory
- Computer Graphics Laboratory

Biomedical Engineering Laboratories

- Biomedical Design and Instrumentation Laboratory
- Biomaterials/Circulatory Assist Device Laboratory
- Biomedical Atomic Force Microscopy Laboratory
- Biomedical Optics Laboratory
- Diabetes Tissue Engineering Laboratory
- Joint Bioengineering and Endourology Laboratory
- Measurements Laboratory
- Medical Imaging Laboratory
- Neuroprosthetics Research Group
- Neurosensory Engineering Laboratory
- Stem Cell and Mechanobiology Laboratory
- Tissue Biomechanics Laboratory
- Tissue Engineering Laboratory

Civil, Architectural and Environmental Engineering Laboratories

- Environmental Engineering Laboratory
- Geotechnical Engineering Laboratory
- Mechanics of Solids and Materials Laboratory
- Structures and Materials Laboratory
- Sustainable Building Systems Laboratory

Electrical and Computer Engineering Laboratories

- Electronics Laboratory
- Wireless Communications Laboratory
- Digital Signal Processing Laboratory
- Electrical Machinery Laboratory
- Digital Design Laboratory
- Microprocessor Laboratory
- Photonics and Micro-Devices Laboratory
- Distributed Decision Environments Laboratory
- Underwater Imaging Laboratory
- Networks Laboratory
- Embedded Systems Laboratory
- Computer Vision and Image Processing Laboratory
- Information Technology Laboratory
- Multimedia Laboratory
- Digital Audio and Speech Processing Laboratory
- Optics and Fiber Communications Laboratory
- ECE Computer Laboratory
- Nanophotonics and Devices Laboratory
- MEMS and VLSI Laboratory

Industrial Engineering Laboratories

- Computer Integrated Manufacturing Laboratory
- Industrial Hygiene Laboratory
- Biomechanics and Gait Laboratory
- Human Factors and Aging Research Laboratory
- Productivity Research Laboratory
- Work Design Laboratory
- Work Physiology Laboratory
- Systems and Operations Research Laboratory
- Industrial Ventilation Laboratory
- Robotics Laboratory

Mechanical and Aerospace Engineering Laboratories

- Aerospace Materials Simulation Laboratory
- Aerodynamics and Computational Fluid Dynamics Laboratory
- Design and Manufacturing Laboratory
- Fuel Cells Laboratory
- Thermo-Fluid Mechanics Laboratory
- Integrated Nano-Bio-Systems Laboratory
- Internal Combustion Laboratory
- Materials Laboratory
- Materials Modeling Laboratory
- Measurements Laboratory
- Multifunctional Composite Materials Laboratory
- Optimization and Reliability Laboratory
- Robotics and Intelligent Systems Engineering Laboratory
- Stress Analysis Laboratory
- Tissue Biomechanics Laboratory
- Wind Tunnel Laboratory

Academic Policies

Admission

Admission to the College of Engineering is covered under the section on Admission to the University in the General Information section of this Bulletin. Algebra, trigonometry, analytic geometry, chemistry, computer literacy, and physics are high school subjects that are appropriate for students planning on entering the College.

The academic work of each transfer student will be evaluated on an individual basis, and the student will be enrolled in the College at an appropriate level.

Requirements for Graduation

The College believes that emphasis should be placed on the student's ultimate level of attainment in selected subject areas. For those students whose preparation is advanced beyond that of the average secondary school graduate, the University provides proficiency examinations and schedules the students for more advanced work. Graduation for these students may be accelerated. For those students whose secondary school preparation has not provided an adequate background, the University offers preparatory courses. Graduation for these students may be delayed accordingly.

The student's program of study is selected jointly with an adviser, with special attention to the individual student's needs. Flexibility is ordinarily possible within the framework of sound education in the essential fundamentals and within the development of depth in selected fields of design and analysis. An examination of a typical curriculum given under the various department sections of this Bulletin shows that there is a strong common core of studies. Therefore, students uncertain of their ultimate field of specialization retain a high degree of mobility to enable them to transfer from one curriculum to another.

Each student must demonstrate upon admission an adequate preparation in the necessary skills of reading, writing, and mathematics. Placement test scores will indicate which, if any, supplementary courses must be taken the first semester. Although these courses are recorded for University credit hour, the student must take the full curriculum, as listed, in addition to these courses. Students not prepared in these areas are advised to make every effort to correct deficiencies before the first semester.

Completion of any of the prescribed curricula, except Engineering Science, with an overall grade point average of at least 2.0 (C) in all course work, to include all accepted work from other institution(s), is the basic requirement for graduation in the College. An average of C also must be attained in all work attempted at the University of Miami and the professional studies. The Engineering Science curriculum, because of its special purpose, has a higher requirement, i.e., a grade point average of 3.0 (B).

The requirements for graduation as specified by each Department and Program reflect the general education requirements of the University of Miami and the requirements of the appropriate accrediting agencies. The curricula contain required courses and elective courses. No course required for graduation may be taken under the credit-no credit (Credit-Only) option.

Students are expected to make satisfactory progress toward graduation by meeting the criteria established above. Whenever a student fails to demonstrate positive academic progress, he/she may be placed on academic probation or dismissed by the College of Engineering Scholastic Standards and Advising (SSA) Committee.

General Educational Requirements

Areas of Knowledge

Students at the College of Engineering fulfill the Areas of Knowledge requirement by completing three *cognates*, one from each of the three areas of the university curriculum:

- Arts & Humanities;
- People & Society; and
- Science, Technology, Engineering & Mathematics.

For students in the College of Engineering, their engineering major will count as a cognate in Science, Technology, Engineering & Mathematics. These students have to complete a cognate in People & Society and Arts & Humanities.

A cognate is a group of at least three courses for at least nine credit hours, related in a topical, thematic, interdisciplinary, sequential, or other fashion, so that completion of a cognate provides coherent depth of knowledge. Each cognate has course options that allow students to complete the cognate in a manner that meets their interests, while staying within the coherent focus of the cognate. While students are required to take three cognates to fulfill the Areas of Knowledge requirement, there is no limit to the number of additional cognates students may complete. All cognates completed by students are listed on the students' transcripts, thus certifying their depth of knowledge in those areas.

The university offers a large number and range of cognates. All approved cognates are visible in a cognate search engine (at www.miami.edu/cognates) that allows students to search for cognates based on cognate features, cognate courses, and keywords. Each cognate is administered by a department or program that is designated as the Responsible Academic Unit (RAU) for the cognate. Inquiries regarding a cognate should be directed to the cognate's RAU.

Engineering students satisfy the University's Advanced Writing and Communication Skills requirement by completing a set of classroom courses, laboratory courses and design courses where they learn effective oral, graphical and technical writing skills. These requirements are specified under each department.

The student's official records are maintained by the Office of Enrollment Services. It is the student's obligation to take the initiative to assure that all requirements are being met in conformity with his/her own graduation plans.

Degree Programs

Dual Majors

Dual majors are offered for engineering students with strong interest in related fields of study such as Physics or Mathematics. In order to obtain a dual major in one of these areas, the student will have to obtain, in parallel, a degree in one of the engineering programs, plus additional course work approved by the dual majors department. Further information on this dual major program may be obtained from the Dean's Office of the College.

Minors

Minors are offered by the College of Engineering. The departments of:

- Civil, Architectural, and Environmental Engineering,
- Electrical and Computer Engineering,
- Industrial Engineering, and
- Mechanical Engineering

offer minors with various areas of specialization. Details of each area of concentration and its requirements may be found under each departmental listing.

Engineering students can earn a minor offered by any other College/School within the University of Miami, including the College of Engineering. In cases where the major degree requirements satisfy some of the requirements for the minor, at least six credit hours beyond the major degree

requirements must be taken in the minor subject area to earn a minor. Minors in Engineering require a minimum GPA of 2.0 in the courses required for the minor.

Departmental Honors Program

A student in the College of Engineering may graduate with Departmental Honors noted upon his/her diploma and transcript upon fulfillment of the following requirements:

1. Completion of at least 18 credit hours of course work in honors courses and/or in courses at the 500 level, including 6 credit hours in independent study, senior thesis, or designated advanced or special honors courses specified by the department, with grades of at least B in these 6 credit hours.
2. Attainment of at least a 3.4 overall grade point average. Transfer students must also attain at least a 3.4 grade point average in all work taken at the University of Miami.
3. Attainment of at least a 3.5 average in the departmental major courses.
4. A written request from the student to the departmental faculty during his/her semester of expected graduation stating the desire to graduate with Departmental Honors, and specifying those courses taken in compliance with section (A) above.

Certificate Programs in Engineering

In cooperation with the University's School of Continuing Studies, the College of Engineering offers practicing engineers advanced or specialized training without having to meet the stringent entrance requirements of the Graduate School. Persons holding Bachelor's degrees, registered as Professional Engineers, or possessing equivalent qualifications can be granted Certificates of Proficiency by the University after completing fifteen credit hours of course work in a specified field of engineering. Study programs are arranged on an individual basis by each student and his/her advisor. Detailed information on Certificate Programs can be requested from the Office of the Dean of Engineering.

The Internship Cooperative Program

The Cooperative Program takes its name from the close cooperation that exists between the College and participating employers. This arrangement attempts to insure that each student's academic and work experience will integrate and contribute significantly to his/her overall growth and professional development. Interviews and screening by both the employer and Cooperative Program personnel attempt to match the needs of the employer carefully with the interests and capability of the student.

Advantages to the Student

1. Offers on-the-job experience to supplement the academic degree program.
2. Offers potential long term career employment with the Cooperative Program employer.
3. The experience obtained makes the student, upon graduation, potentially much more valuable to any future employer. Upon completion of an appropriate amount and level of experience, graduation in the Cooperative Program may be recognized by a special seal on the student's diploma.
4. Helps the student to verify whether or not his/her career or specialty choice is correct.
5. Tends to increase motivation and to make academic studies more meaningful.
6. Earnings from Cooperative Program employment can cover a significant portion of the student's college expenses.
7. Certain work experience may shorten the experience requirements, after graduation, for eligibility for professional registration.
8. Helps to develop the students understanding of human relations and the lifelong need of learning to balance appropriately the demands on ones time of multiple duties such as studying, employment, daily necessities, family obligations, etc.

Advantages to the Employer

1. Offers an opportunity to recruit and screen potential employees in the fields of engineering.
2. The Cooperative Program maintains an up-to-date roster of available undergraduate and graduate students, many with previous experience. This roster offers employers means of obtaining employees to meet fluctuating work loads, on relatively short notice.
3. Students in the Cooperative Program can provide good company public relations with their classmates.
4. Participation in a Cooperative Program serves the profession by providing opportunities for many capable and well deserving young persons to attend a University, who otherwise might lack the financial ability or motivation to attend.

Types of Cooperative Program Arrangements

Continuous Work-Study

An arrangement involving a combination of part-time employment (15 or more hours per week) and a credit hour academic load which is appropriately reduced from the normal full-time load to balance the employment duties. Full-time employment may be undertaken during the summer period. Two students may be used during the year to share the hours of a full-time position (20 hours each student). In some instances, an individual student will hold a full-time position and carry a light academic load in evening and/or early morning classes.

Alternating Work-Study

An arrangement involving two students alternating full-time employment and full-time study. Students alternate positions of work and study at the end of each semester (including the summer), and thereby provide the equivalent employee time of a full-time position year-round.

Student Eligibility for the Program

University of Miami students enrolled in the College of Engineering are eligible to enter the Cooperative Program. Initial entry into the Program is limited to superior students. Normally, work assignments are not given until the equivalent of one or two semesters of full-time academic work is completed. Currently, most students in the Program are under continuous work-study arrangements.

Study Abroad Programs

The College of Engineering encourages its students to take advantage of one of the University of Miami's numerous study abroad options in Latin America, Europe, Asia, Australia and the Middle East, especially through partners in the Global Engineering Education Exchange (GE3). Of particular interest to Engineering students are the following: internships (unpaid and paid) in Spain, England, France, Argentina, Colombia, Chile, and Australia in which professional work experience is carried out abroad; course work at Engineering schools abroad for a semester or an academic year; summer programs in intensive Language instruction, Humanities and Social Sciences abroad. The cost of attending these programs is equivalent to University of Miami tuition and fees. Almost all University of Miami financial aid is granted. With prior approval and detailed curriculum advice, courses taken abroad will apply towards graduation.

The Management of Technology Supplemental Program

The objective of this program is to educate engineers in how to exploit their technological knowledge. This is a vital, but often neglected, link in achieving competitiveness in the global marketplace. The basic premise motivating this approach is the recognition that in today's world, technology is the backbone of the business enterprise system and that wealth can only be created through production of goods and services. This program will educate engineers in a multitude of subjects bridging the gap between product technology, production technology and the marketplace, which is the ultimate customer of engineering contributions.

The program consists of four courses:

1. Quality in Design of Products and Production Systems
2. Entrepreneurship for Engineers
3. Production Systems Design
4. Management of Technology.

A project is required at the end of the program, but is threaded throughout the program starting with the first course. Upon completion of the program, the student will receive a special certificate of completion. This program is available to all qualified students in all departments of the College of Engineering.

Admission to the Program

Admission to this supplemental program will be by application submitted by the candidate or by nomination by an advisor or department chair. All applications will be reviewed by a standing committee. Students must meet the prerequisite of each course before enrolling in it.

Requirements for the Certificate

The program is an add-on to existing curriculum. Students must complete all courses designated in order to qualify for the certificate. A notation will be made on the student's transcript recognizing their completion of the special program. No designation will be made on the diploma.

Course Sequence

Courses are recommended to be taken in the sequence indicated above.

Team Work

Students will be encouraged to work on projects in teams. Multidisciplinary teams will also be encouraged.

The College is primarily housed in the J. Neville McArthur Building. Completed in 1959 and renovated in 1984, this attractive building is the gift of the late J. Neville McArthur, who was a member of the Board of Trustees and a prominent citizen and dairyman. The Engineering Addition is also a gift of the McArthur family. Students in the College of Engineering come from all parts of the United States and from many nations throughout the world, comprising one of the most diverse and cosmopolitan engineering student bodies in the country.

Combined BS/MS Program

The College offers a five-year Bachelor of Science and Master of Science BS/MS degree program in Architectural Engineering, Biomedical Engineering, Civil Engineering, Computer Engineering, Electrical Engineering, Environmental Engineering, Industrial Engineering, and Mechanical Engineering. This program is specifically designed for those students who want to pursue their graduate study as they are completing their undergraduate study. Both

degrees are awarded at the completion of required coursework for both the BS and MS degrees. The special conditions and processes for the five-year BS/MS Program are as follows:

Requirements

You must be an undergraduate student in the College of Engineering (CoE). A master's degree is considered the first professional degree in engineering. The Admission Committee will carefully review academic credentials for admission into our M.S. program. Students should discuss the program and possibility of entering with an academic adviser. Completed applications are due prior to the beginning of your junior year.

Application Process

Interested CoE students must complete the application process during their "junior" year. Applicants will need to provide all the required documentation outlined on the on-line graduate application including 3 recommenders, a UM transcript sent directly from the UM Office of the Registrar and official GRE test scores of 300 or higher sent directly from ETS, the testing agency. An admission decision will not be made until all required application materials have been received and processed for review by the Admission Committee.

Financial Implications

Many financial aid programs, including those offered by the University and the federal and state governments are restricted to coursework required to complete an undergraduate degree. For further information contact the University of Miami Financial Aid Office.

Once admitted into BS-MS program

In your senior year when you have a full time undergraduate status, you may take a maximum of twelve (12) graduate credit hours (a maximum of six (6) credit hours per semester) with approval of your academic advisor. In order to register for these classes, you must complete and submit the UM Graduate School "Application for Undergraduate to Take Graduate Course" special form.

During your last one or two semesters, when you are taking graduate course work only, register as a graduate student.

A student wishing to withdraw from the BS/MS Program without the MS degree must complete all the requirements for the BS degree.

To qualify for the MS degree, the student must meet all the pertinent Graduate School requirements, including an acceptable score on the GRE (Graduate Record Examination) and a minimum of 3.0 GPA in the credit hours applied toward the MS degree.

The student is awarded both the BS and MS degrees at the end of the fifth year when all degree requirements are satisfied.

The Doctor of Philosophy Degree is currently offered in the area of:

- Biomedical Engineering
- Civil Engineering
- Electrical and Computer Engineering
- Ergonomics and Human Factors
- Industrial Engineering
- Mechanical Engineering

The Ph.D. programs in Interdepartmental Graduate Studies permit, with approval of the Graduate Council, highly qualified students to pursue a privileged individualized program which cuts across disciplinary lines.

The Bulletin of the Graduate School (p. 1082) presents more detailed information on these graduate programs.

The College is primarily housed in the J. Neville McArthur Building. Completed in 1959 and renovated in 1984, this attractive building is the gift of the late J. Neville McArthur, who was a member of the Board of Trustees and a prominent citizen and dairyman. The Engineering Addition is also a gift of the McArthur family. Students in the College of Engineering come from all parts of the United States and from many nations throughout the world, comprising one of the most diverse and cosmopolitan engineering student bodies in the country.

Foote Fellows in CoE

The Foote Fellows Honors Program recognizes the most educationally accomplished incoming students at the University of Miami. Foote Fellows have distinguished themselves both in and out of the classroom at their previous schools, are self-motivated, and think independently. Admission to the Foote Fellows Honors Program is by invitation.

Foote Fellows in the College of Engineering are exempt from the Cognates Program of General Education requirements within the curricular framework of their major. Within the curricular framework of their majors, Foote Fellows enjoy unmatched freedom and flexibility to explore a multitude of educational resources. Many Foote Fellows leverage this opportunity to take additional majors and/or minors and to study abroad.

At each of the nine undergraduate schools at the University of Miami, a dedicated adviser helps Foote Fellows chart their academic path and attain access to distinctive learning opportunities at the University, such as special school-based seminars, faculty-mentored research, networking opportunities, and off-campus internships.

Foote Fellows also will be invited to join advanced, interdisciplinary Foote Fellow seminars taught by leading faculty members from across the University. An example is Books That Matter, a rigorous seminar in non-fiction reading that is offered in sessions for first-year and for upper-class students. Freshman Foote Fellows benefit from early move-in to the residential colleges. Further, Foote Fellows receive focused advising on post-baccalaureate distinguished fellowships and awards.

The Foote Fellows Honors Program reflects the educational vision of former University of Miami President Edward T. Foote, who retired in 2000 after serving the University for twenty years.

Biomedical Engineering

<http://www.miami.edu/bme>

Dept. Code: BME

Introduction

Biomedical engineering is a multidisciplinary field that addresses problems at the interface of engineering, medicine, and the life sciences. Examples include the design of medical devices, implants and prostheses; the development of new biomaterials or drug delivery systems; the engineering of cells and tissues; the design of optical and laser systems for diagnostic and therapy; the development of medical imaging systems and algorithms for medical image processing; and the acquisition, interpretation and use of physiological signals to assess and control physiological function, such as the use of brain signals to control movement in brain computer interfaces. Biomedical engineering has an impact on virtually all fields of medicine.

The Department of Biomedical Engineering at the University of Miami was formally created in 1979 as a graduate program. The four-year undergraduate program leading to the B.S degree in BME was established approximately ten years later to address the need for professional biomedical engineers. The undergraduate BME program at the University of Miami was the first of its kind in Florida, with the first class of B.S.B.E. students graduating in 1993. It has been continuously accredited by the Engineering Accreditation Commission (EAC) of the Accreditation Board of Engineering and Technology (ABET) since 1997. The Department of Biomedical Engineering also offers graduate courses leading to the Master of Science and Doctor of Philosophy degrees and it includes a graduate program in Medical Physics. The PhD program in Biomedical Engineering is also a degree-granting program of the University's MD/PhD program. In addition, qualified undergraduate students may apply for the combined BS/MS program (details are provided following the curricula for the BS degrees).

Graduates of the biomedical engineering undergraduate program find employment in industry or continue their studies either in graduate school or in a professional school in medicine and other health-related disciplines (such as dentistry, optometry, orthotics), law or business.

Some special features of the program include the small class size and open-door policy of the faculty, which facilitates student-faculty interaction. The Department has very strong ties with the University of Miami Miller School of Medicine and with industry. Undergraduate students have a wide range of research and internship opportunities in some of the leading research laboratories in their respective field. The Department strongly encourages undergraduate student participation in research and professional activities.

Mission Statement

The mission of the biomedical engineering program is to prepare students to become knowledgeable and skilled engineers with an understanding of the ethical and other professional aspects of biomedical engineering. Design skills and an ability to work both independently and as part of a team are emphasized.

Educational Objectives

The educational objectives of the program are to graduate engineers who will apply their knowledge, technical skills, and ability to solve problems at the interface of engineering and life sciences. Within a few years after graduation they will be:

1. Working as professionals in biomedical engineering or related fields.
2. Continuing their education to advance their careers through professional development activities or through the pursuit of advanced degrees.

Program Description

Curriculum

The two educational objectives of the Biomedical Engineering program are achieved via the implementation of a curriculum with four parallel concentrations which include a common core and concentration-specific courses. The core curriculum is designed to provide a broad foundation in the basic sciences and in engineering. Concentration-specific courses provide the depth required to be proficient engineers.

The four concentrations are:

- Biomaterials and Tissue (B)
- Electrical (E),
- Mechanical (M),
- Premedical (P)

The Biomaterials and Tissue concentration provides training in the fundamental aspects of cell and tissue biology, design of biomaterial scaffolds and implants, and the application of tissue engineered constructs toward repair, restoration, and regeneration of damaged cells, tissues and organs. The Electrical concentration provides training in the fundamental aspects of electronics and signal processing, design of instrumentation, sensors, imaging systems and neural interfaces, and the application of biomedical technology to the measurement, control and rehabilitation of tissue and organ function. The Mechanical concentration provides training in the fundamental aspects of solid, fluid, and computational mechanics, design and modeling of biomedical devices such as artificial implants, and prostheses and the application of biomechanical principles toward assessment and restoration of tissue and organ function. The Premedical concentration is designed for students who plan to seek admission to medical school. In addition to providing core training in biomedical engineering, the Premedical concentration ensures that students meet the general requirements for admission to medical school.

The curriculum is designed to provide all graduates with the analytical and design skills required to formulate and solve problems at the interface of engineering, medicine and the life sciences. Required courses in the humanities and social sciences provide students with an awareness of social, ethical and environmental issues related to their profession. The curriculum has been carefully designed with the prerequisite structure in mind so that students have to draw from previously acquired knowledge to complete the upper level course requirements successfully. The curriculum includes two or three technical electives selected by the student based on their individual professional interests. The curriculum places a special emphasis on written and oral communication skills. Many of the Biomedical Engineering courses, as well as the capstone design project, include a requirement for a written term paper and oral presentation on a course-related topic related to the class.

Advanced Writing and Communication Skills

Biomedical Engineering students satisfy the University's Advanced Writing and Communication Skills requirement by completing a set of classroom courses, laboratory courses and design courses where they learn effective oral, graphical and technical writing skills. Biomedical Engineering students acquire Advanced Writing and Communication skills in the following core courses:

Code	Title	Credit Hours
BME 111	Introduction to Engineering I	3
BME 112	Introduction to Biomedical Engineering	2
BME 330	Foundations of Medical Imaging	3
BME 335	Biomaterials	3
BME 402	Senior Design I	2
BME 403	Senior Design II	1
BME 440	Biomedical Measurements	4
BME 450	Biomedical Transport Phenomena	3
BME 480	Biomedical Instrumentation	3

Design Experience

The biomedical engineering design experience is integrated in the curriculum throughout the four years of study, starting in the freshman year with the Introduction to Biomedical Engineering course. Each semester includes classroom or laboratory courses which place a heavy emphasis on theoretical and practical biomedical engineering design concepts. In the second semester of the junior year, students complete a 3 credit-hour course which covers the principles of biomedical engineering design, from problem identification and design conception to implementation and testing, including regulatory aspects. The design experience culminates in the senior year with a yearlong capstone Senior Design Project. The Senior Design Project is typically completed by teams of two to four students who build on their knowledge and previous design experience to solve one major design problem which integrates the various components of the curriculum.

Teaching and Design Laboratories

The Department of Biomedical Engineering houses several teaching laboratories which provide students hands-on experience in core areas of the curriculum, including cell and tissue engineering, tissue mechanics, medical instrumentation, measurements, and optics and physiology, among others. In particular, the Ben-Josef Cell and Tissue Laboratory provides undergraduate and graduate students a unique opportunity to gain hand-on experience in the field of cell and tissue engineering, biomaterials and tissue mechanics. The Department also houses a state-of-the art Scanning Electron Microscope and 3D printer which are used by students in their design and research projects. In addition, students have access to the College of Engineering's maker space and Johnson & Johnson 3D Printing Center of Excellence Collaborative Laboratory. The facility provides access to a wide variety of advanced 3-D printers and fabrication equipment, and has a full-time engineer/scientist available for training purposes. Students can use the facility for their design projects.

Undergraduate Research and Internships

Biomedical Engineering students are strongly encouraged to gain research or professional experience through internships. Most undergraduate students conduct research in laboratories at the Department of Biomedical Engineering and at the School of Medicine, or are hired as interns by the local biomedical industry.

Degree Programs

The department offers one degree program with four concentrations: Electrical, Mechanical, Biomaterials and Tissue, and Premed. A list of the core science and engineering courses common to all four concentrations is provided below, followed by a tabular listing of the course requirements for the degree Bachelor of Science in Biomedical Engineering for each concentration.

Dual Major

The College of Engineering offers a dual major in Biomedical Engineering for students that are majoring in another engineering Department. In order to obtain the dual major in Biomedical Engineering, the student will have to obtain, in parallel, a major in one of the fundamental engineering programs, plus 24 credit hours of course work, including 19 credit hours of required course work and 5 credit hours of elective course work from the lists given below. Of this total of 24 credit hours, at least 12 have to be at the level of 400 and above.

The required courses for the dual major are:

Code	Title	Credit Hours
BME 265	Medical Systems Physiology	3
BME 335	Biomaterials	3
BME 375	Fundamentals of Biomechanics	3
BME 440	Biomedical Measurements	4
BME 470	Biomedical Signal Analysis	3
BME 480	Biomedical Instrumentation	3
Total Credit Hours		19

The electives are to be chosen from the BME course list.

Departmental Honors

Upon request departmental honor is noted in a student's diploma and transcript upon fulfillment of the requirements specified in the College Bulletin.

Majors in Biomedical Engineering

The four concentrations in Biomedical Engineering include 112 core credits, with the remaining 21 credits pertaining to each concentrations. The core credits include General Education (24), Common-Core Math Science (39), and Common-Core Engineering (49). The table below details the common-core courses.

- B.S. in Biomedical Engineering - Biomaterials and Tissue Concentration (p. 602)
- B.S. in Biomedical Engineering - Electrical Concentration (p. 605)
- B.S. in Biomedical Engineering - Mechanical Concentration (p. 608)
- B.S. in Biomedical Engineering - Premed Concentration (p. 611)

Code	Title	Credit Hours
General Education		
ENG 105	English Composition I	3
ENG 107	English Composition II: Science and Technology	3
HA Cognates (3 Courses)		9
PS Cognates (3 Courses)		9

Advanced Bioscience Elective ²		3
Technical or Science Lab Elective ⁴		1
PS/HA Cognate ¹		3
PS/HA Cognate ¹		3
	Credit Hours	17
	Total Credit Hours	133

¹ PS/HA Cognate: Students must complete a minimum of 1 People & Society (PS) cognate and 1 Humanities & Arts (HA) cognate, to be selected from the list of available cognates (<http://www.miami.edu/index.php/registrar/cognates>). Each cognate should be a minimum of 3 courses (9 credit hours). Students in the Premed Concentration are highly encouraged to choose cognates that include PSY 110 and SOC 101.

² Advanced Bioscience Elective is to be chosen from BIL 250, BIL 255, BIL 268, CHM 202, or BMB 401. Students should verify admission requirements of their medical school of interest to verify Adv. Bioscience requirements, e.g. organic chemistry II, biochemistry, or both.

³ Technical Lab Elective is selected from BME 506, BME 507, BME 567, or BME 395; Science Lab Elective is selected from a science lab complementing the Adv. Bioscience Elective (e.g., CHM or BIL lab).

- ⁴ Technical Electives are chosen from BME course offerings (300 level & above) with the approval of the advisor. Any other course selected need to be approved by the advisor and the department chairperson.
- [†] Students planning on taking the MCAT should take BMB 401 Biochemistry for the Biomedical Sciences as their first Adv. Bioscience Elective.

B.S./M.S. in Biomedical Engineering - Biomaterials and Tissue Concentration

- Juniors from any of the four BME Concentrations who have maintained at least a 3.0 CGPA have the option to apply for admission to the combined BS-MS in Biomedical Engineering program.
- Those who are accepted into this accelerated program must maintain at least a 3.0 CGPA and a minimum of a 3.0 GPA for the final 30 credit hours to meet the requirements of the Graduate School.
- The participants are excused from BME 402/BME 403, but are required to complete BME 705/BME 706.
- Up to 12 credit hours of Technical electives earned during the fourth year can be counted toward the 30 credit hours required for the MS degree.
- Students must be registered for a minimum of 12 undergraduate credit hours per semester in their senior year.
- Students can register for a maximum of 6 graduate credit hours per semester in their senior year.
- A typical curriculum of the BS/MS is shown below for the Biomaterials and Tissue Concentration.
- If a student needs to withdraw from the BS/MS BME program then all the requirements for the specific BS BME Concentration must be completed for graduation with the BS BME degree.

- 1 PS/HA Cognate: Students must complete a minimum of 1 People & Society (PS) cognate and 1 Humanities & Arts (HA) cognate, to be selected from the list of available cognates (<http://www.miami.edu/index.php/registrar/cognates>). Each cognate should be a minimum of 3 courses (9 credit hours).
- 2 The undergraduate elective is any undergraduate level course with a number of credit hours sufficient to ensure that the student is enrolled for a total of 12 undergraduate credit hours during each semester of the senior year. The undergraduate elective can be any undergraduate class, but students are encouraged to select an engineering or science course.
- 3 All Technical Electives are taken as graduate courses. They are graduate-level courses (600 level and above) chosen from the BME course offerings with the approval of the advisor. A minimum of 6 credit hours of technical electives must be taken at the 700 level. Non-BME courses need to be approved by the advisor and the chairperson.

B.S./M.S. in Biomedical Engineering - Electrical Concentration

- Juniors from any of the four BME Concentrations who have maintained at least a 3.0 CGPA have the option to apply for admission to the combined BS-MS in Biomedical Engineering program.
- Those who are accepted into this accelerated program must maintain at least a 3.0 CGPA and a minimum of a 3.0 GPA for the final 30 credit hours to meet the requirements of the Graduate School.
- The participants are excused from BME 402/BME 403, but are required to complete BME 705/BME 706.
- Up to 12 credit hours of Technical electives earned during the fourth year can be counted toward the 30 credit hours required for the MS degree.
- Students must be registered for a minimum of 12 undergraduate credit hours per semester in their senior year.
- Students can register for a maximum of 6 graduate credit hours per semester in their senior year.
- A typical curriculum of the BS/MS is shown below for the Electrical Concentration.
- If a student needs to withdraw from the BS/MS BME program then all the requirements for the specific BS BME Concentration must be completed for graduation with the BS BME degree.

¹ PS/HA Cognate: Students must complete a minimum of 1 People & Society (PS) cognate and 1 Humanities & Arts (HA) cognate, to be selected from the list of available cognates (<http://www.miami.edu/index.php/registrar/cognates>). Each cognate should be a minimum of 3 courses (9 credit hours).

² Technical Elective Labs are selected from BME 506, BME 566 or BME 395.

³ The undergraduate elective is any undergraduate level course with a number of credit hours sufficient to ensure that the student is enrolled for a total of 12 undergraduate credit hours during each semester of the senior year. The undergraduate elective can be any undergraduate class, but students are encouraged to select an engineering or science course.

⁴ All Technical Electives are taken as graduate courses. They are graduate-level courses (600 level and above) chosen from the BME course offerings with the approval of the advisor. A minimum of 6 credit hours of technical electives must be taken at the 700 level. Non-BME courses need to be approved by the advisor and the chairperson.

B.S./M.S. in Biomedical Engineering - Mechanical Concentration

- Juniors from any of the four BME Concentrations who have maintained at least a 3.0 CGPA have the option to apply for admission to the combined BS-MS in Biomedical Engineering program.
- Those who are accepted into this accelerated program must maintain at least a 3.0 CGPA and a minimum of a 3.0 GPA for the final 30 credit hours to meet the requirements of the Graduate School.
- The participants are excused from BME 402/BME 403, but are required to complete BME 705/BME 706.
- Up to 12 credit hours of Technical electives earned during the fourth year can be counted toward the 30 credit hours required for the MS degree.
- Students must be registered for a minimum of 12 undergraduate credit hours per semester in their senior year.
- Students can register for a maximum of 6 graduate credit hours per semester in their senior year.
- A typical curriculum of the BS/MS is shown below for the Mechanical Concentration.
- If a student needs to withdraw from the BS/MS BME program then all the requirements for the specific BS BME Concentration must be completed for graduation with the BS BME degree.

¹ Students must complete a minimum of 1 PS cognate and 1 HA cognate to be selected from the list of available cognates (<http://www.miami.edu/index.php/registrar/cognates>). Each cognate should be a minimum of 3 courses (9 credit hours). Students in the Premed Concentration are highly encouraged to choose cognates that include PSY 110 and SOC 101.

² Advanced Bioscience Elective is to be chosen from BIL 250, BIL 255, BIL 268, CHM 202, or BMB 402. Students should verify admission requirements of their medical school of interest to verify Adv. Bioscience requirements, e.g. organic chemistry II, biochemistry, or both

³ Technical or Science Elective Lab is selected from BME 506, BME 507, BME 566 or BME 395 or from a science lab complementing the Adv Bioscience Elective (e.g., CHM or BIL lab).

⁴ Technical Elective Lab is selected from BME 506, BME 507, BME 566 or BME 395

⁵ All Technical Electives are taken as graduate courses. They are graduate-level courses (600 level and above) chosen from the BME course offerings with the approval of the advisor. A minimum of 6 credit hours of technical electives must be taken at the 700 level. Non-BME courses need to be approved by the advisor and the chairperson.

⁶ The undergraduate elective is any undergraduate level course with a number of credit hours sufficient to ensure that the student is enrolled for a total of 12 undergraduate credit hours during each semester of the senior year. The undergraduate elective can be any undergraduate class, but students are encouraged to select an engineering or science course.

† Students planning on taking the MCAT should take BMB 401 as their first Adv. Bioscience Elective.

Civil, Architectural and Environmental Engineering

<http://www.cae.miami.edu>

Dept. Code: CAE

Mission Statement

The mission of the Department of Civil, Architectural, and Environmental Engineering is to:

- Provide high-quality undergraduate and graduate education in civil, architectural, and environmental engineering that will prepare graduates for professional careers and a lifetime of learning
- Conduct high-quality research that will advance the body of knowledge and improve the quality of human life
- Serve the engineering profession and society through active involvement in professional organizations and contribution of professional expertise

The department offers three undergraduate degrees:

- Bachelor of Science in Civil Engineering,
- Bachelor of Science in Architectural Engineering, and
- Bachelor of Science in Environmental Engineering.

Civil Engineering

Civil engineers are leaders in the planning, design, construction, and operation of systems that are essential to modern life. These systems include: buildings, highways, airports, pipelines, bridges, dams, irrigation systems, drainage systems, water-supply and distribution systems, and wastewater collection and treatment works. Civil engineers are employed by government agencies, public utility companies, private consulting firms, construction companies, architectural firms, and universities.

Architectural Engineering

Architectural engineers are leaders in the planning, design, construction, and operation of engineered systems for commercial, industrial, and institutional buildings and other facilities. These engineered systems include electrical, communications and control, lighting, heating, ventilating, air conditioning, fire protection, plumbing, acoustic, and structural components. Architectural engineers are employed by consulting firms, construction companies, facility management companies, HVAC equipment manufacturers, architectural firms, government agencies, and universities.

Environmental Engineering

Environmental engineers are leaders in the application of engineering principles to improve and maintain the environment for the protection of human health, for the protection of nature's beneficial ecosystems, and for environment-related enhancement of the quality of human life. Environmental engineers are employed by government agencies, consulting firms, and universities.

Educational Objectives

The educational objectives of the Civil Engineering Program are to have graduates who within the first several years following graduation are either

1. Working as a professional in an area closely related to civil engineering, or
2. Pursuing a graduate or professional degree.

The educational objectives of the Architectural Engineering Program are to have graduates who within the first several years following graduation are either

1. Working as a professional in an area closely related to architectural engineering, or
2. Pursuing a graduate or professional degree.

The educational objectives of the Environmental Engineering Program are to have graduates who within the first several years following graduation are either

1. Working as a professional in an area closely related to the water environment, or
2. Pursuing a graduate or professional degree.

Advanced Writing and Communication Skills

Civil, Architectural, and Environmental Engineering students satisfy the University's Advanced Writing and Communication Skills requirement by completing a set of classroom courses, laboratory courses and design courses where they learn effective oral, graphical and technical writing skills. Civil, Architectural, and Environmental Engineering students acquire Advanced Writing and Communication skills in the following core courses:

- CAE 111 - Introduction to Engineering
- CAE 212 - Structures Laboratory (Civil and Architectural Engineering)
- CAE 345 - Environmental Laboratory (Environmental Engineering)
- CAE 371 - Geotechnical Laboratory (Civil and Architectural Engineering)
- CAE 402 - Professional Engineering Practice

Majors in Civil, Architectural, and Environmental Engineering

- B.S. in Civil Engineering (p. 627)
- B.S. in Architectural Engineering (p. 629)

- B.S. in Environmental Engineering (p. 632)

Dual B.S./M.S. Degrees in Civil, Architectural, and Environmental Engineering

- B.S./M.S. in Civil Engineering (p. 635)
- B.S./M.S. in Architectural Engineering (p. 636)
- B.S. in Environmental Engineering/M.S. in Civil Engineering (p. 636)
- B.S. in Architectural Engineering and Master of Architecture Dual Degree Program (p. 637)

Minor in Civil, Architectural, and Environmental Engineering

- Civil Engineering (p. 640)
- Architectural Engineering (p. 640)
- Environmental Engineering (p. 641)

B.S. in Civil Engineering

Civil Engineering Curriculum

The Civil Engineering curriculum provides an integrated educational experience in mathematics, basic sciences, humanities, social sciences, engineering sciences, and civil engineering design. The first two years of the Civil Engineering curriculum provide a strong foundation in mathematics, basic sciences, and engineering sciences. During the next two years of the four-year program, the Civil Engineering curriculum integrates engineering sciences with design applications in the areas of structural, environmental, geotechnical, and water resources engineering. The curriculum culminates with a major senior-level design project that includes design applications from the major specialty areas of civil engineering.

Graduate study is offered leading to the degrees of Master of Science and Doctor of Philosophy in Civil Engineering (p. 1101). For detailed information on graduate studies, see the Graduate Studies Bulletin.

A tabular listing of the course requirements for the degree of Bachelor of Science in Civil Engineering is shown below.

Curriculum Requirements

B.S. in Architectural Engineering

The Architectural Engineering curriculum provides an integrated educational experience in mathematics, basic sciences, humanities, social sciences, engineering sciences, and architectural engineering design. The Architectural Engineering program integrates design applications across the

curriculum, beginning with building construction and architectural design in the sophomore year, and continuing with structural, building mechanical and electrical systems design, and construction management in the junior and senior years. The curriculum culminates with a major comprehensive design experience that includes applications from the major specialty areas of architectural engineering.

Graduate study is offered leading to the degree of Master of Science in Architectural Engineering (p. 1101). For detailed information on graduate studies, see the Graduate Studies Bulletin..

B.S. in Environmental Engineering

The Environmental Engineering curriculum provides an integrated educational experience in mathematics, basic sciences, humanities, social sciences, engineering sciences, and environmental engineering design. The first two years of the Environmental Engineering curriculum provide a strong foundation in mathematics, basic sciences, and engineering sciences. The next two years of the four-year program, integrate engineering sciences with design applications with particular emphasis in the areas of water and wastewater engineering .

Design courses emphasize an integrated approach that considers all environmental media in the prevention and control of environmental problems. The curriculum culminates with a major senior-level design project that includes design applications from the major specialty areas of environmental engineering.

- ¹ Only offered once a year.
- ² To be selected from approved lists of People and Society (PS)/Humanities and Arts (HA) cognates and Biology Electives. Students take a minimum of 3 courses (9 credit hours) in HA cognate and 3 courses in PS Cognate (9 credit hours).
- ³ Co-requisite CAE 212 not required for EnE majors.
- ⁴ CAE 540, CAE 533 and CAE 542 offered on a 3-semester rotation. Students **must** take these three courses.
- * Note: students must select the RSMAS course from the list of required (non-elective) courses in either the Ocean Engineering Track or the Marine Policy Track. A minor in Marine Science will be awarded for 15 credit hours of MSC, OCE or other RSMAS courses provided these include MSC 111, MSC 301 and at least 6 credit hours at the 300 level or higher. Required courses in the track count towards the 6 credit hours at the 300 level or higher.

RSMAS Track 1: Ocean Engineering

Code	Title	Credit Hours
MSC 403	Marine Environmental Toxicology	3
OCE 509	Coastal Physics and Engineering	3
Select one elective from any MSC course or any RSMAS 500-level course		3

Code	Title	Credit Hours
MSC 340	Ocean Policy	3
MSC 313	Coastal Law	3
MSC 314	Ocean Law	3
Total Credit Hours		9

B.S./M.S. in Civil Engineering

The Department also offers three 5-year programs leading to the B.S. and the M.S. degrees (BSCE-MSCE (p.); BSAE-MSAE (p.); and BSEnE-MSCE (p.)). These programs are open to students who are admitted to the graduate program at the end of their junior year. Students applying for this program must have a minimum grade point average of 3.0, and score more than 310 on the Graduate Record Examination. The course requirements for the MS portion of the five-year BS/MS programs can be met as follows:

Course	Title	Credit Hours
Senior Year

B.S.in Architectural Engineering/Master of Architecture

A six-year dual degree program leading to a Bachelor of Science in Architectural Engineering and a Master of Architecture is available. The program is open to exceptional students who are admitted to the graduate program at the end of their junior year. Upon completion of this program, graduates are eligible for professional registration as both an engineer and an architect.

ARC 699	Directed Research	3
ARC 652	Management of Professional Practice	3
History of Architecture Elective		3
Architecture Elective		3
PS Cognate ¹		3
	Credit Hours	15
Second Semester		
CAE 581	Energy-Efficient Building Design	3
ARC 610	Architecture Design Degree Project	6
Architecture Elective		3
	Credit Hours	12
	Total Credit Hours	194

¹ To be selected from lists of approved People and Society (PS)/Humanities and Arts (HA) cognates and Technical electives. Students take a minimum of 3 courses (9 credit hours) in HA cognate and 3 courses in PS Cognate (9 credit hours). Students are advised to select the HA Cognate that includes the following courses: ARC 230 or ARC 630; ARC 268 or ARC 476; and ARC 594.

Minor in Architectural Engineering

Code	Title	Credit Hours
CAE 210	Mechanics of Solids I	3
CAE Electives ¹		12
Total Credit Hours		15

- ¹ CAE Electives are chosen in consultation with CAE Faculty Advisor.
- * Pre-requisites need to be satisfied for all courses taken.
- ** A 2.0 grade point average is required in all courses taken for the minor.

Minor in Civil Engineering

Code	Title	Credit Hours
CAE 210	Mechanics of Solids I	3
CAE Electives ¹		12
Total Credit Hours		15

¹ CAE Electives are chosen in consultation with CAE Faculty Advisor.

- * Pre-requisites need to be satisfied for all courses taken.
- ** A 2.0 grade point average is required in all courses taken for the minor.

Minor in Environmental Engineering

Code	Title	Credit Hours
CAE 210	Mechanics of Solids I	3
CAE Electives ¹		12
Total Credit Hours		15

- ¹ CAE Electives are chosen in consultation with CAE Faculty Advisor.
- * Pre-requisites need to be satisfied for all courses taken.
- ** A 2.0 grade point average is required in all courses taken for the minor.

Electrical and Computer Engineering

<http://www.coe.miami.edu/dept-eec/>

Dept. Code: ECE

Mission Statement

The mission of the Department of Electrical and Computer Engineering is to achieve and maintain, through a continuous improvement process, excellence in undergraduate and graduate education, research, and service to the community and the nation. We endeavor to accomplish this by providing high-quality education and research programs which will impart the requisite knowledge and skills to our students enabling them to assume leadership roles in contributing to the advancement of the underlying electrical and computer engineering technologies which sustain the current world economy, to promote a strong commitment to life-long learning, to prepare them for a variety of alternative career paths and to participate as responsible citizens in a rapidly changing and shrinking global community.

Introduction

Electrical and Computer Engineering are complementary disciplines that are at the forefront of the continuing development and evolution of our modern technological society. Electrical and computer engineers have initiated and contributed to the development of such important and diverse areas as integrated electronics and photonics, telecommunication systems and computer networks, computer hardware and software, image processing and computer vision, automation and robotics, electrical power generating and transmission systems, as well as participated in the development of significant applications to biotechnology. These technologies have significantly transformed how our evolving society will live, learn, work, communicate and do business in the 21st century and are critical to the development of a sustainable world economy. It is an exciting and challenging discipline offering a variety of rewarding career paths. The Department of Electrical and Computer Engineering offers a number of innovative academic and research programs to help prepare students to achieve a variety of career goals.

The Department offers two undergraduate degree programs as well as two five year BS/MS degree programs:

- Bachelor of Science in Electrical Engineering degree program (B.S.E.E.)
- Bachelor of Science in Computer Engineering degree program (B.S.Cp.E.)
- Bachelor of Science in Computer Engineering/Master of Science in Electrical and Computer Engineering (B.S.Cp.E./M.S.E.C.E.)
- Bachelor of Science in Electrical Engineering/Master of Science in Electrical and Computer Engineering (B.S.E.E./M.S.E.C.E.)

The Electrical Engineering and the Computer Engineering degree programs are accredited by the Engineering Accreditation Commission (EAC) of the Accreditation Board for Engineering and Technology (ABET).

In addition, the Department offers graduate courses leading to the:

- Degree of Master of Science in Electrical and Computer Engineering (M.S.E.C.E.), and the
- Doctor of Philosophy degree (Ph.D.).

For further information see the Bulletin of the Graduate School (p. 1082).

Bachelor of Science in Electrical Engineering (B.S.E.E.)

This degree program endeavors to achieve its objectives by imparting to its students the fundamental principles underlying modern electrical engineering, along with the necessary skills and experiences to apply standard practices, methodologies and available tools for solving electrical engineering problems. The major areas of Electrical Engineering include electronics, analog and digital circuits, microprocessors, communications and control systems. The design sequence is spread throughout the educational experience curricula, culminating in the two-semester senior design

project. Graduates are expected to keep pace with this rapidly evolving discipline. To this end, the faculty stresses the importance of continued education and life-long professional development by trying to instill in their students a sense of excitement for the prospects of this evolving technology, tempered by a strong sense of responsibility and concern for its potential impacts on society.

Educational Objectives

We expect that our alumni will exhibit the following:

1. Successful careers in dynamic and multidisciplinary technical fields with the ability to apply engineering practices within societal, global, and environmental contexts in an ethical manner.
2. Continuous professional improvement through life-long learning including but not limited to the admission to and completion of professional or graduate studies of the highest standard.

Degree Program

The Electrical Engineering degree program has three options:

1. Electrical Engineering Option (p. 656)
2. Audio Engineering Option (p. 653)
3. Electrical Engineering Pre-Med Option (p. 658)

These options require specialized courses as well as the 49 Engineering Credit Hours required in the accredited Electrical Engineering degree program.

Double Degree Program - B.S.E.E. & B.S.B.E.

A BME student who satisfies the requirement of the Bachelor of Science in Biomedical Engineering (B.S.B.E.) degree with electrical orientation as described in this Bulletin may also qualify for the B.S.E.E. degree by taking the following additional courses:

Code	Title	Credit Hours
ECE 218	Data Structures	3
ECE 301	Electromagnetic Field Theory	3
ECE 302	Electronics II	3
ECE 303	Electronics Laboratory	1
ECE 212	Processors: Hardware, Software, and Interfacing	3
ECE 316	Structured Digital Design	1
ECE 336	Discrete-Time Signals and Systems	3
Select one ECE Design Elective		3
Select two EE Core Electives		6
Select three ECE Electives		9
Senior Project (ECE Faculty as co-sponsor)		
Total Credit Hours		35

Bachelor of Science in Computer Engineering (B.S.Cp.E.)

Computer engineering is a rapidly changing and evolving discipline driven by new technological developments and marketplace conditions. To adequately train students to meet the challenges of the future and to assume leadership roles in the practice of computer engineering, the department offers an up-to-date curriculum that reflects new technological developments that have the potential for significantly impacting professional practice in the industry. The curriculum is constantly updated to incorporate new technological, scientific and economic developments.

Alternatively, students can earn a Bachelor of Science in Computer Engineering under the Software Engineering option, which is primarily focused on the systematic and disciplined development of software systems. This option focuses on the application of computer engineering and computer science principles and practices to the creation, operation, and maintenance of software applications and systems.

Educational Objectives

We expect that our alumni will exhibit the following:

1. Successful careers in dynamic and multidisciplinary technical fields with the ability to apply engineering practices within societal, global, and environmental contexts in an ethical manner.
2. Continuous professional improvement through life-long learning including but not limited to the admission to and completion of professional or graduate studies of the highest standard.

Degree Program

This degree program endeavors to achieve its objectives by imparting to its students the fundamental principles underlying modern computer engineering, along with the necessary skills and experiences to apply standard practices, methodologies and modern tools for solving computer engineering problems.

The computer engineering design sequence is spread throughout the curriculum, culminating in a two semester senior design project.

Graduates are expected to keep pace with this rapidly-evolving discipline. To this end, the faculty stress the importance of continued education and life-long professional development, by trying to instill in the students a sense of excitement for the prospects of this evolving technology, tempered by a strong sense of responsibility and concern for its potential impacts on society.

The Computer Engineering degree program has three options:

1. Computer Engineering Option (p. 646)
2. Software Engineering Option (p. 648)
3. Computer Engineering Pre-Med Option (p. 651)

These options require a common engineering core, which is followed by specialized courses in each area along with elective courses.

Dual Majors

Computer Engineering or Electrical Engineering students who want to do additional majors or minors must meet with their academic advisor to plan out their course work.

Computer Engineering students wanting to do Computer Science as a second major must:

1. Have an additional 6 advisor-approved technical credit hours beyond that required for the CE major, and
2. Take PHI 115.

Five-Year Dual B.S./M.S. Degrees

Purpose

Intended for exceptional students to acquire both a Bachelor of Science and a Master of Science degree simultaneously, in five years rather than the 4 plus 2 years (approximately) it normally requires.

Requirements

You must be an undergraduate student in the College of Engineering (CoE). A master's degree is considered the first professional degree in engineering. The Admission Committee will carefully review academic credentials for admission into our M.S. program. Students should discuss the program and possibility of entering with an academic adviser. Completed applications are due prior to the beginning of the final exams in your junior year.

Get the application form (it is different for US students and International students) from the CoE Office of Research and Graduate Studies, fill it out and then return it to the same office. The application fee is waived for currently enrolled students in the CoE.

Take the GRE Examination before the end of your senior year and attain a combined score of more than 1000 on the Verbal and Quantitative portions. You must have a cumulative GPA of at least 3.0 at the time of application.

For further information about admission into the graduate school see the Bulletin of the Graduate School (p. 1082).

For more detailed information about the CoE Five-Year programs, please refer to the College of Engineering Bulletin section (p. 597). The Department of Electrical and Computer Engineering has two Five-Year degree programs, B.S.Cp.E./M.S.E.C.E. and B.S.E.E./M.S.E.C.E. Each of these programs has two options listed below.

The B.S.Cp.E./M.S.E.C.E. program has two options:

1. Computer Engineering Option (p. 660)
2. Software Engineering Option (p. 663)

The B.S.E.E./M.S.E.C.E. program has two options:

1. Audio Engineering Option (p. 667)
2. Electrical Engineering Option (p. 670)

Departmental Laboratories

The Department maintains a variety of well-equipped laboratories and computers adequate for undergraduate instruction and graduate research. The laboratories and computer facilities include:

- Computer Vision and Image Processing Laboratory
- Digital Audio and Speech Processing Laboratory
- Digital Signal Processing Laboratory
- Digital Systems Design Laboratory
- Electronics Laboratory
- Electro-Optics and Micro-Devices Laboratory
- Embedded Systems Laboratory
- Fortinet Cyber Security Laboratory
- Information Technology Laboratory
- Microprocessor Laboratory
- Multimedia Laboratory (Arnold Center for Confluent Media Studies)
- Networks Laboratory
- Optics and Fiber Communications Laboratory
- Underwater Imaging Laboratory

Departmental Electives

Code	Title	Credit Hours
Humanities and Arts/People and Society Cognates		
Humanities and Arts (HA) Cognates, and People and Society (PS) Cognates can be selected from the appropriate University list, the link of which can be found in the Engineering section.		
EE Core Electives		
ECE 301	Electromagnetic Field Theory	3
ECE 308	Linear Control Systems	3
ECE 404	Communication Systems	3
ECE 405	Solid-State Electronics	3
ECE 436	Digital Signal Processing	3
ECE Electives		
Select from all ECE elective classes at the 300 level or above.		
Technical Electives		
Select from all ECE or any 200 level or above CoE courses, as well as courses from Math, Physics, Chemistry, Biology, Computer Science, selected in consultation with, and with the approval of, the academic advisor.		
Audio Engineering Electives		
Select from the following set of courses:		
MMI 361	Acoustics	3
MMI 504	Audio Signal Processing III	3
MMI 505	Current Trends in Music Engineering I	3
MMI 508	Current Trends in Music Engineering III	3
MMI 510	Computational Psychoacoustics	3
MTC 506	Digital Editing and Sequencing	3
EE Design Elective		
Select one of the following:		
ECE 417	Embedded Microprocessor System Design	3
ECE 454	Digital System Design and Testing	3
ECE 505	Semiconductor Photonic Devices	3
ECE 532	VLSI Systems	3
or any ECE course approved by the Academic Advisor		
Basic Science (/Lab) Electives		
Basic Science (/Lab) Electives are selected in consultation with the Academic Advisor from courses in Biology, Chemistry, Environmental Science, Geological Science, Marine Science, or Physics.		

Computer Engineering (CE) Technical Electives

Select from all ECE at any 300 level or above in consultation with, and with the approval of, the academic advisor. Additionally, one elective course may be selected from the following computer science courses:

CSC 317	Data Structures and Algorithm Analysis	3
CSC 427	Theory of Computing	3
CSC 518	Interpreters and Compiler Theory	3
CSC 529	Introduction to Computer Graphics	3
CSC 540	Algorithm Design and Analysis	3
CSC 555	Multimedia Systems	3

Software Engineering (SE) Technical Electives

Select from all ECE at any 300 level or above in consultation with, and with the approval of, the academic advisor. Additionally, one elective course may be selected from the following computer science courses:

CSC 329	Introduction to Game Programming	3
CSC 424	Computer Networks	3
CSC 427	Theory of Computing	3
CSC 507	Data Security and Cryptography	3
CSC 529	Introduction to Computer Graphics	3
CSC 540	Algorithm Design and Analysis	3
CSC 545	Introduction to Artificial Intelligence	3
CSC 547	Computational Geometry	3
CSC 555	Multimedia Systems	3

Advanced Writing and Communication Skills

Electrical and Computer Engineering students satisfy the University's Advanced Writing and Communication Skills requirement by completing a set of classroom, laboratory, and design procedures where they learn effective oral, graphical and technical writing skills. Electrical and Computer Engineering students acquire Advanced Writing and Communication skills in the following core courses: ECE 212 and ECE 481.

Internship Program

The Department of Electrical and Computer Engineering encourages its students to take advantage of the College of Engineering Internship Cooperative Program with Industry.

Students may pursue an internship either on a part-time or a full-time arrangement. Students who wish to intern full-time for one semester or for twelve weeks in the summer may apply to earn as much as 3 credit hours that could be applied to their degree requirement as a Technical Elective. Students interested in such a possibility need to submit a proposal to the ECE Department describing the type of work they expect to accomplish approved by the industrial supervisor. If the proposal is approved the student will be assigned a Faculty Supervisor and will be able to register under ECE 499. At the end of the Internship Program, the student is expected to submit to the ECE Department a technical report with comments from the student industrial supervisor. The Faculty advisor will review the report and submit the appropriate grade for ECE 499.

NOTE 1: An ECE course for which another ECE course is a prerequisite may not be taken unless the student has completed the ECE prerequisite course with a grade of C- or better.

NOTE 2: All ECE courses at the 300 level or above must be taken at UM.

Departmental Honors

See College of Engineering (p. 592) section.

Majors/Options in Electrical and Computer Engineering

Electrical Engineering

- B.S. in Electrical Engineering (p. 656)
- B.S. in Electrical Engineering - Audio Engineering Option (p. 653)
- Electrical Engineering - Pre-Medical Option (p. 658)

Computer Engineering

- B.S. in Computer Engineering (p. 646)
- B.S. in Computer Engineering - Software Engineering Option (p. 648)

- Computer Engineering - Pre-Medical Option (p. 651)

Dual B.S./M.S. Degrees in Electrical and Computer Engineering

- B.S./M.S. in Electrical Engineering (p. 670)- Five Year Dual Degree Program (p. 670)
- B.S./M.S. in Electrical Engineering (p. 670) (p. 667)- Audio Engineering Option (p. 667) - (p. 667)Five Year Dual Degree Program (p. 670)
- B.S./M.S. (p. 670) in (p. 660)Computer Engineering (p. 660)- (p. 660)Five Year Dual Degree Program (p. 670)
- B.S./M.S. in (p. 663)Computer Engineering - Software Engineering Option (p. 663) - (p. 663)Five Year Dual Degree Program (p. 670)

Minors in Electrical and Computer Engineering

- Electrical Engineering (p. 674)
- Computer Engineering (p. 673)

B.S. in Computer Engineering

Computer engineering is concerned with the characterization, design, analysis and implementation of hardware, software and the overall architecture of computers and computer systems, and with the development of applications enabled by such configurations. This ranges from embedded microprocessors and associated software supporting a variety of familiar devices, to large-scale distributed computer systems interconnected by high-speed telecommunication networks controlled by sophisticated communication protocols. Since modern electronic computing systems are digital in nature, the program provides in-depth coverage of a range of topics dealing with digital information processing systems. Among the topics covered are digital system design, computer organization and architecture, operating systems, software engineering, programming, data structures, algorithms, database systems, microprocessor-based systems, and embedded systems.

The department also offers electives in digital communications, computer networks, wireless and mobile networks, very large scale integration (VLSI), microelectronics, nanotechnology, application specific integrated circuits (ASIC), microelectromechanical systems (MEMS), image processing and computer vision, artificial intelligence, machine learning, data mining, agent technology, and cybersecurity (application, information, network, systems security etc.).

B.S. in Computer Engineering - Software Engineering Option

Software Engineering is concerned primarily with the systematic and disciplined approach to developing software systems. It requires the application of both computer engineering and computer science principles and practices to the creation, operation, and maintenance of software systems and applications. The Software Engineering Option of the Bachelor of Science in Computer Engineering degree at the University of Miami is a unique interdisciplinary program developed and administered collaboratively by the Department of Electrical and Computer Engineering and the Department of Computer Science.

This Option prepares students for successful careers in software engineering. Software systems are becoming increasingly complex, and emerging technologies are pushing the boundaries of reusable components and software quality assurance. To prepare students to meet these challenges, this Option establishes a solid foundation of software system fundamentals, coupled with strong hands-on experience and an understanding of professional practice and conduct.

In addition to the core curriculum in software engineering, students are introduced to the paradigms of real-time, adaptive, and collaborative software systems, through a wide range of technical elective courses from both the Department of Electrical and Computer Engineering and the Department of Computer Science. Students may also use courses from other departments with academic advisor approval. The technical electives allow students to apply the knowledge they have gained to different application areas. This provides valuable hands-on experience in contemporary application areas, which enhances the students' potential career development opportunities.

Students pursuing the Software Engineering Option of the Bachelor of Science in Computer Engineering degree must earn at least 15 credit hours in Computer Science as part of their degree requirements.

** **Students must have at least 32 credit hours of Math and Science**

Computer Engineering - Pre-Med Option

Our Department offers a pre-medical option that allows motivated students to obtain the rigorous education of a bachelors degree in computer engineering while simultaneously completing the basic science requirements necessary for applying to medical or dental school. Much of the excitement in engineering involves applications of electrical and computer engineering to problems in health, such as the development of nano-scale biosensors, or the signal processing analysis of DNA sequences or the development and/or use of new hardware and software tools to better serve both medical professionals and patients. With the rapid advancement and application of technology in the medical field, the pre-med option ensures that students learn and understand the fundamentals of Electrical and Computer Engineering while preparing them for entry into either medical school, advanced graduate study, or industry.

¹ See description of electives under the Departmental Electives Section.

² CE Core Elective is selected from ECE 302, ECE 454/ECE 455, ECE 412

³ Advanced Bioscience Elective is to be chosen from BMB 260 , BIL 250, BIL 255, BIL 268, or BMB 401, in consultation with their academic advisor. Students should verify admission requirements of their medical school of interest to verify Adv. Bioscience requirements.

⁴ Students in the Premed Concentration are highly encouraged to choose cognates that include PSY 110 and SOC 101

B.S. in Electrical Engineering - Audio Engineering Option

Audio Engineering at the University of Miami was established 1992. The program brings together faculty expertise from Electrical and Computer Engineering and from the Frost School of Music. It uniquely meets the needs of industry, training professionals with solid foundations in technical areas where sound and acoustics play a key role. Students gain theoretical knowledge from engineering and music, along with analytical, technical and design skills that can only be acquired with an engineering degree.

Fully ABET-accredited, the Audio Engineering curriculum combines traditional electrical engineering areas such as electronics, digital systems, microprocessors and digital signal processing with audio studies in acoustics, digital speech and audio, and acoustic transducers. Students work in modern laboratory facilities where they can experiment with electronics, digital design, microprocessors, audio recording, audio synthesis and acoustics. UM Audio Engineering graduates are audio-specialized electrical engineers who are highly sought-after by the industry.

During its 26 successful years, Audio Engineering at UM has produced an impressive group of alumni successful careers in music, gaming and entertainment, telecommunications, the analog and digital electronics, computer and software industries, and in the biomedical systems and instrumentation industry. Many have pursued graduate degrees at other top universities. The program implements continuous improvements, including innovative teaching and hands-on audio engineering design projects, as well as ever-deeper links with industry.

- 1 See description of electives under the Electrical and Computer Engineering Section.
- 2 Recommended a cognate that includes a Musicology Elective.
- 3 Offered only in the Fall semester.
- 4 Note that MMI 504 could be substituted for MMI 436.

B.S. in Electrical Engineering

Electrical Engineering is concerned with the design, analysis and implementation of a variety of systems, components and devices, primarily of an electrical or electronic nature, which form the cornerstone of our complex and technologically oriented society. For example, this ranges from small-scale integrated electronics and photonics systems and devices, the technological drivers of the information technology revolution, to large-scale electrical power systems and power generators, which supply the nation's energy needs and form the basis for sustained economic growth. Furthermore, Electrical engineering also involves the design of micro and nano devices, integrated circuits, hardware, and large-scale systems for telecommunications and networking that engender our increasingly networked life. Therefore, electrical engineering is a vast and rich discipline involved in the design of systems, components, and devices for a variety of applications and areas such as portable electronics (e.g., cell phones), communications and networks, biomedical sensing and medical systems, energy harvesting, next generation displays, lasers, optical and wireless transmission, audio/video compression and recognition, radar and tracking/guidance systems, and remote sensing systems.

The University of Miami's electrical engineering curriculum is focused on the fundamentals of the discipline, in the first two years building a firm foundation in mathematics, basic science, and basic engineering principles such as basic circuits, electronics, software and programming, computer hardware, and signal and system analysis. The students build upon this foundation through more advanced courses and focused specialization, culminating in a capstone major design experience. We continually update our curriculum and laboratories to incorporate new scientific and technological developments, and industry practices. Our graduates have gone on to successful careers in industry, or to graduate school in science and engineering, as well as law school, business school, and medical school.

Electrical Engineering - Pre-Med Option

Our Department offers a pre-medical option that allows motivated students to obtain the rigorous education of a bachelors degree in electrical engineering while simultaneously completing the basic science requirements necessary for applying to medical or dental school. Much of the excitement in engineering involves applications of electrical and computer engineering to problems in health, such as the development of nano-scale biosensors, or the signal processing analysis of DNA sequences. The pre-med option allows students to learn the fundamentals of Electrical and Computer Engineering while preparing them for entry into either medical school, advanced graduate study, or industry.

² Advanced Bioscience Elective is to be chosen from BMB 260 BIL 250, BIL 255, BIL 268, or BMB 401, in consultation with their academic advisor. Students should verify admission requirements of their medical school of interest to verify Adv. Bioscience requirements.

³ Offered only in the Fall semester.

⁴ Students in the Premed Concentration are highly encouraged to choose cognates that include PSY 110 and SOC 101.

B.S./M.S. in Computer Engineering

This is a structured and integrated program of 154/156 credit hours (depending on the undergraduate option). Students may pursue this program from either of the undergraduate options available for Computer Engineering Majors. It includes two required courses, ECE 715 and ECE 716 as well as the selection of advanced technical electives.

- At least 30 credit hours must be at the graduate (600 or 700) level. Of these, at least 12 credit hours must be in courses open to graduate students only (700 level).
- Interested Computer Engineering juniors with cumulative GPA above 3.0 may declare their intent to participate by submitting an official application to the Departmental Graduate Committee for admission into the M.S.E.C.E. portion of the program.
- A student wishing to drop out of the five-year program without the M.S.E.C.E. degree could receive the B.S.Cp.E. degree after completing all its requirements, including the senior design project.
- All students must take the Graduate Record Examination (G.R.E.) before beginning their fifth-year courses.
- To qualify for the M.S.E.C.E. degree, students must meet all the pertinent Graduate School requirements, including an acceptable GRE score and a minimum of 3.0 GPA in the 30 credit hours applied towards the M.S.E.C.E. degree.

- The student is awarded both the B.S.Cp.E. and the M.S.E.C.E. degrees after the requirements for both degrees are satisfied.

For more information about the BS/MS Program please refer to the College of Engineering Section (p. 597).

B.S./M.S. in Electrical Engineering - Audio Engineering Option

This is a structured and integrated program of 152/154 credit hours (depending on the undergraduate option). Students may pursue this program from either of the undergraduate option available for Electrical Engineering Majors. It includes two required courses, ECE 715 and ECE 716, as well as the selection of advanced technical electives.

Note the following:

- At least 30 credit hours must be at the graduate (600 or 700) level. Of these, at least 12 credit hours must be in courses open to graduate students only (700 level).
- Interested ECE Juniors with cumulative GPA above 3.0 may declare their intent to participate by submitting an official application to the Departmental Graduate Committee for admission into the M.S.E.C.E. portion of the program.
- A student wishing to drop out of the five-year program without the M.S.E.C.E. degree could receive the B.S.E.E. degree after completing all its requirements, including the senior design project.
- All students must take the Graduate Record Examination (G.R.E.) before beginning their fifth-year courses.
- To qualify for the M.S.E.C.E. degree, students must meet all the pertinent Graduate School requirements, including an acceptable G.R.E. score and a minimum of 3.0 GPA in the 30 credit hours applied towards the M.S.E.C.E. degree.
- The student is awarded both the B.S.E.E. and the M.S.E.C.E. degrees after the requirements for both degrees are satisfied.

For more information about the BS/MS Program please refer to the College of Engineering Section (p. 597).

² Offered only in the Fall semester.

³ Should be taken as Graduate (G) courses.

Minor in Computer Engineering

Requirements

Students must follow these guidelines in order to qualify for this minor:

- No more than 6 credits hours may be taken outside the ECE department.
- Students must maintain a minimum 2.0 grade point average in all ECE courses taken.
- Students with a major in Electrical Engineering wishing to add a minor in Computer Engineering must take 6 Computer Engineering course credit hours in addition to those needed to satisfy their degree requirements.

Curriculum

Students wishing to minor in Computer Engineering must satisfy 18 credits hours specified as follows:

Code	Title	Credit Hours
Core Courses		
ECE 118	Introduction to Programming	3
ECE 211	Logic Design	3

ECE 212	Processors: Hardware, Software, and Interfacing	3
ECE 218	Data Structures	3
Select a minimum of 6 credit hours of computer engineering electives from the following:		6
ECE 315	Digital Design Laboratory	
ECE 316	Structured Digital Design	
ECE 318	Algorithms	
ECE 322	Systems Programming	
ECE 412	Software Engineering and Architecture	
ECE 413	Software Design and Verification	
ECE 414	Computer Organization and Design	
ECE 421	Computer Operating Systems	
ECE 454 & ECE 455	Digital System Design and Testing and Design-for-Testability Laboratory	
ECE 467	Database Design and Management	
ECE 511	Computability, Complexity, and Algorithms	
ECE 534	Communication Networks	
ECE 537	Principles of Artificial Intelligence	
ECE 548	Machine Learning	
Total Credit Hours		18

Minor in Electrical Engineering

Requirements

Students must follow these guidelines in order to qualify for this minor:

- No more than 6 credits hours may be taken outside the ECE department.
- Students must maintain a minimum 2.0 grade point average in all ECE courses taken.
- Students with a major in Computer Engineering wishing to add a minor in Electrical Engineering must take 6 Electrical Engineering course credit hours in addition to those needed to satisfy their degree requirements.

Curriculum

Students wishing to minor in Electrical Engineering should satisfy a 15 credit hour requirement specified as follows:

Code	Title	Credit Hours
Electrical engineering core electives		
ECE 201	Electrical Circuit Theory	3
ECE 202	Electronics I	3
ECE 203	Electrical Circuits Laboratory	1
Select a minimum of 8 credit hours of electrical engineering electives of the following:		8
ECE 206	Circuits, Signals, and Systems	
ECE 211	Logic Design	
ECE 301	Electromagnetic Field Theory	
ECE 302	Electronics II	
ECE 303	Electronics Laboratory	
ECE 308	Linear Control Systems	
ECE 336	Discrete-Time Signals and Systems	
ECE 404	Communication Systems	
ECE 405	Solid-State Electronics	
ECE 417	Embedded Microprocessor System Design	
ECE 436	Digital Signal Processing	
ECE 454	Digital System Design and Testing	
ECE 502	Engineering Acoustics	
ECE 503	Laser Communications	

ECE 504	Fundamentals of Optical
ECE 505	Semiconductor Photonic Devices
ECE 506	Microfabrication
ECE 532	VLSI Systems
ECE 533	Random Signals and Noise
ECE 538	Introduction to Digital Image Processing
ECE 543	BioNanotechnology
ECE 540	Digital Speech and Audio Processing
Total Credit Hours	
15	

Engineering Science

Introduction

The curricula in the engineering sciences have been designed to prepare a student to fill the gap between the pure and applied sciences. The programs have been planned to enable the graduate to meet, work, and communicate with scientists and engineers at all levels of research and development, design and production, sales and distribution and to participate in the rapid and efficient translation of the latest scientific discoveries into technological achievements.

The general curriculum outlined below has been developed to give the student a firm foundation in the engineering sciences supported by a thorough grounding and facility in mathematics, physics and chemistry. In addition, each student will choose an area of specialization in at least one of the Engineering fields of architectural, civil, biomedical, electrical, industrial, or mechanical, and mathematics, chemistry or physics. By being well grounded in both the basic and applied sciences, the student, upon graduation, will be well prepared to assume responsibilities in his/her field of specialization or continue his/her professional development through graduate studies.

The engineering science program is intended primarily for students who expect to pursue graduate studies, and it will not satisfy the licensure requirements for professional engineering registration.

Premedical Studies: When BIL 150 and BIL 160 are added to the course sequence for engineering science, basic premedical requirements are satisfied. Additional specific courses, such as genetics or biochemistry, may be required for admission to certain medical schools. For optimum timing and course selection students who combine premedical studies and engineering science should consult the faculty advisor for engineering science and the Coordinator, Committee on Premedical Studies.

Because of the nature of the curriculum and its goals, the student must maintain a B average. The degree of Bachelor of Science Engineering Science is awarded upon successful completion of the program.

The required curriculum for the degree of Bachelor of Science in Engineering Science (General Concentration) is shown below as is a typical premed curriculum. A Professional Chemistry Concentration in the Engineering Science Program is available (the Professional Chemistry Program, approved by the American Chemical Society, is also available in the College of Arts and Sciences).

Mission Statement

The mission of the Engineering Science program is to provide excellent undergraduate and graduate education in engineering that will prepare graduates to meet Societies changing needs and aspirations.

Educational Objectives

The objectives of the Engineering Science program are to educate engineers who:

- have a sound background in the fundamentals of engineering science grounded in mathematics, physics and chemistry
- have abilities and knowledge expected by graduate programs
- are prepared to enter graduate programs with a strong background in pure science

	Credit Hours	16
	Total Credit Hours	125

¹ You must complete a minimum of 1 PS cognate and 1 HA cognate to be selected from the list of available cognates. Each cognate should be a minimum of three courses (9 credit hours).

² Applied electives are advanced courses selected in coordination with the Faculty Advisor and require his/her approval.

³ Technical Electives are advanced courses in mathematics, science or engineering, approved by the Faculty Advisor, as appropriate for individual objectives.

Industrial Engineering

<http://www.ie.miami.edu>

Dept. Code: IEN

Mission Statement

The Department of Industrial Engineering's mission is to provide contemporary and relevant industrial and systems engineering education and research; impart knowledge and skills necessary to design and to improve a variety of manufacturing and service processes; promote life-long learning; and contribute to emerging societal needs.

Overview

Industrial Engineering combines science and technical knowledge with human sciences to design, plan, and analyze systems that involve people, materials, money, energy, equipment, and other resources. Industrial engineers work with personnel in research and development, accounting, engineers in other disciplines, maintenance, human resources, and production to increase organizational productivity, improve quality, reduce health care costs, conserve energy, develop public transportation systems, and improve industrial safety conditions. Industrial engineering distinguishes itself from other engineering professions because it has applications in manufacturing, service, commercial, and governmental activities. It is the major branch of engineering concerned not only with technology, but with people, making industrial engineers a prime source of management talent.

Through consultation with his/her academic advisor, a student is assisted in choosing electives which will prepare him/her for a degree of specialization compatible with his/her future goals. The available concentrations are Engineering Management and Manufacturing. Specific courses required in each concentration are described in Degree Programs Section.

The Department of Industrial Engineering offers graduate programs leading to the:

- Master of Science in Industrial Engineering
- Master of Science in Environmental Health and Safety
- MSIE/MBA Weekend Executive Program (in conjunction with the School of Business)
- Master of Science in Management of Technology (in conjunction with the School of Business)

The Department also offers:

- a Ph.D. program in Ergonomics and Human Factors
- a Ph.D. in Industrial Engineering.

For further information, see the Bulletin of the Graduate School (p. 1121).

Bachelor of Science in Industrial Engineering

Industrial Engineering Program Educational Objectives

The major goal of the Industrial Engineering program at the University of Miami is to prepare graduates to contribute to the economy by virtue of employment in a variety of industries: manufacturing (heavy and light, traditional and high technology) and service (health care, retail, transportation, logistics, government, consulting, banking, and insurance). In striving to achieve this goal, the objective of the faculty is to provide all graduates with the mathematical, scientific, and design tools required to formulate problems accurately, generate alternative solutions, evaluate those alternatives, and present the best solutions to clients or decision makers in a fashion that facilitates decision-making processes. In addition, superior students are prepared for graduate studies and research. Within the first several years following graduation from the Industrial Engineering program, graduates are expected to be:

1. Working as professionals by adding value in any one of the following sectors:
 - Service
 - Government
 - Consulting
 - Retail
 - Manufacturing
2. Pursuing or holding a graduate degree and/or developing professionally through continuing education, licensure, certification and seminars in a new area or their chosen areas of expertise.

The curriculum includes required courses in mathematics and the physical sciences that ensure a firm scientific background while advanced departmental courses provide specialization. Required courses in the people and society - humanities and arts give students the social, ethical and ecological awareness needed in their profession. The courses are designed with the prerequisite structure in mind so that students have to draw from previously acquired knowledge to successfully complete upper level course requirements.

The engineering design experience is interwoven in the curriculum throughout the students' four years of study.

- Starting with IEN 111 **Introduction to Engineering I** and IEN 112 **Introduction to Engineering II**, an introduction to Engineering graphics, Auto CAD, MATLAB, C++, advanced Excel and Access are given.
- The students then move on to take IEN 201 **Methods Analysis and Work Measurement** where they perform work measurement projects in industry, write reports, and make oral presentations to management. In the Spring of their Junior year, the students take IEN 363 **Project Management for Engineers** and they are exposed to techniques and tools in project management such as use of network flow and MS Project.
- Students take IEN 361 **Industrial Cost Analysis** and IEN 380 **Engineering Economy** where they become aware of the impact of productivity on the economic and social well-being of industry and countries. The students are also introduced to basic models of decision making such as the formulation and evaluation of an economic strategy.
- IEN 406 **Computer-Aided Manufacturing** introduces the students to product design in manufacturing and modern concepts of CAD/CAM/ Automation.
- IEN 441 **Deterministic Models in Operations Research** focuses on the formulation of linear programming problems and solutions by the simplex method. Related topics include sensitivity analysis, duality theory and network programming. Engineering applications are emphasized.
- IEN 442 **Stochastic Models in Operations Research** focuses on basic concepts and techniques of random processes that are used to develop models for a variety of engineering and managerial problems. Topics include the Poisson Process, Markov chains, renewal theory, queuing models, and reliability.
- IEN 465 **Production and Inventory Control** provides a thorough treatment of modern production and inventory management policies, and their ramifications on supply chain management.
- Theory and applications of decision support systems in industrial engineering are covered in IEN 524 **Decision Support Systems in IE**. The topics include the study of model-based data-based, knowledge-based, and communication-based decision support systems.
- In IEN 557 **Ergonomics and Human Factors Engineering** both laboratory projects and real-world projects are designed, discussed, and conducted.
- Industry based projects are embedded into several other courses such as IEN 512 **Statistical Quality Control and Quality Management**, IEN 547 **Computer Simulation Systems**, and IEN 568 **Materials Handling and Facilities Planning**.
- IEN 494 **Senior Project** is a capstone project course where the students pool all of their knowledge and previous design experience into one major project integrating all components of the curriculum together. These projects are usually industry-based. Students prepare written and oral presentations. These presentations are made before top management or engineers of the organization where the projects were conducted in the presence of the faculty representatives from the department.

Real world projects are an integral part of most junior and senior level courses. In these courses, communication is emphasized through requirements for oral presentation and written technical reports. This experience provides the graduates with valuable industrial experience and communications skills while studying at the University of Miami.

The teaching laboratories meet current program needs and are constantly being improved. Equipment and experiments are geared to provide instruction in the areas of production system design, work methods and measurement, human factors engineering, manufacturing processes, computer applications in industrial engineering and operations research.

Advanced Writing and Communication Skills: Industrial Engineering students satisfy the University's Advanced Writing and Communication Skills requirement by completing a set of classroom courses, laboratory courses and design courses where they learn effective oral, graphical and technical writing skills. Industrial Engineering students acquire Advanced Writing and Communication skills in the following core courses:

- IEN 111 Introduction to Engineering I
- IEN 201 Methods Analysis and Work Measurement
- IEN 351 Industrial Safety Engineering
- IEN 363 Project Management for Engineers
- IEN 380 Engineering Economy
- IEN 494 Senior Project
- IEN 512 Statistical Quality Control and Quality Management
- IEN 547 Computer Simulation Systems
- IEN 557 Ergonomics and Human Factors Engineering
- IEN 568 Materials Handling and Facilities Planning

Industrial Engineering Concentrations

- Engineering Management Concentration
- Manufacturing Engineering Concentration
- Pre-Medical Concentration

Five-Year Bachelor of Science in Industrial Engineering and Master of Science in Industrial Engineering (Five-Year BSIE/MSIE Program)

This program is specifically designed for those students who want to pursue their graduate study as soon as they complete their undergraduate study in Industrial Engineering. The special conditions for this Five-Year BSIE/MSIE Program are as follows:

1. The student must declare his/her intent to participate before the end of the Junior year by submitting an official application to the department graduate committee for admission into the MSIE portion of the program. Exceptions to this rule must be approved by the department faculty.
2. A student wishing to withdraw from the Five-Year Program without the MSIE degree must complete all the requirements for the BSIE program, including the IEN 494 Senior Project in order to get his/her BSIE degree.
3. To qualify for the MSIE degree, the student must meet all the pertinent Graduate School requirements, including an acceptable score on the GRE (Graduate Record Examination) and a minimum of 3.0 GPA.
4. The student is awarded both the BSIE and MSIE degrees at the end of the fifth year when all undergraduate and graduate requirements are satisfied.

Majors in Industrial Engineering

- B.S.I.E. in Industrial Engineering (p. 680)
- Industrial Engineering - Engineering Management Concentration (p. 683)
- Industrial Engineering - Manufacturing Concentration (p. 685)
- Industrial Engineering - Pre-Med Concentration (p. 687)

Dual B.S./M.S. Degrees in Industrial Engineering

- B.S./M.S. in Industrial Engineering - Five Year Dual Degree (p. 689)
- Industrial Engineering - (p. 692)Engineering Management Concentration - Five Year Program (p. 692)

Minor in Industrial Engineering

- Industrial Engineering (p. 695)

B.S. in Industrial Engineering

	Total Credit Hours	138

¹ To be selected from lists of approved People and Society (PS)/Humanities and Arts (HA) (or applicable cognates). Students take a minimum of 3 courses (9 credit hours) in HA cognate and 3 courses in PS Cognate (9 credit hours).

² Advanced Bioscience Elective is to be chosen from BIL 250, BIL 255, BIL 268, MIC 301, CHM 202, or BMB 402. **Students should verify admission requirements of their medical school of interest to verify Adv. Bioscience requirements, e.g. organic chemistry II, biochemistry, or both.**

³ Technical or Science Elective Lab is selected from a science lab complementing the Adv Bioscience Elective (e.g., CHM or BIL lab).

¹ To be selected from lists of approved People and Society (PS)/Humanities and Arts (HA) or applicable cognates). Students take a minimum of 3 courses (9 credit hours) in HA cognate and 3 courses in PS Cognate (9 credit hours).

² IEN Electives are selected from courses at the 600- or 700-level, offered by the Department of Industrial Engineering.

Minor in Industrial Engineering

A student majoring in another discipline who chooses to take a minor in Industrial Engineering must complete 15 credit hours of coursework consisting of the courses listed below. A minimum of 12 credits must be taken at the University of Miami and IEN 201 must be taken at the University of Miami. In addition, you must achieve a minimum GPA of 2.5 for the courses in the minor.

Code	Title	Credit Hours
IEN 201	Methods Analysis and Work Measurement	3
IEN 310	Introduction to Engineering Probability	3
or IEN 311	Applied Probability and Statistics	
Select three from the following courses:		9
IEN 351	Industrial Safety Engineering	
IEN 361	Industrial Cost Analysis	
IEN 363	Project Management for Engineers	
IEN 380	Engineering Economy	
IEN 512	Statistical Quality Control and Quality Management	
IEN 557	Ergonomics and Human Factors Engineering	
IEN 570	Engineering Management	
IEN 572	Management of Technological Innovation	
Total Credit Hours		15

Substitutions may be accepted with the permission of the Department Chairman except for IEN 201.

Mechanical and Aerospace Engineering

<http://www.mae.miami.edu>

Dept. Code: MAE

Introduction

Engineering is the art of applying the knowledge of science for the benefit of humanity. Mechanical Engineering is the most broadly based area of engineering. It is concerned with the analysis, design, development and application of equipment for such diverse fields as energy conversion, transportation, production machinery, consumer goods, and environmental control. Today's advanced technology is largely a result of the skill of mechanical engineers who are heavily represented in most fields of modern industry.

Because of the varied careers and opportunities which are available to the Mechanical Engineering graduates, the curriculum emphasizes education in the fundamentals of the physical, mathematical, and engineering sciences, including materials science, solid mechanics, fluid mechanics and

thermodynamics. These basic subjects are followed by courses in their application to the design and analysis of engineering devices and systems. Computers are utilized for analysis and design throughout the curriculum.

Aerospace Engineering is concerned with the analysis, design and development of a wide variety of aircraft and space vehicles and systems. The undergraduate aerospace engineering program is designed to provide a broad based foundation in aeronautics and astronautics, including topics such as aerodynamics, propulsion, aerospace structures and materials, flight dynamics, control and performance.

In the junior and senior years, the student is assisted in choosing technical electives in preparation for a degree of professional specialization or for further study in engineering, law, business or medicine. With the aid of an advisor and the concurrence of the department chairman, the student may select courses compatible with a variety of career goals.

The department offers two undergraduate degrees:

- Bachelor of Science in Mechanical Engineering and
- Bachelor of Science in Aerospace Engineering.

Within the Bachelor of Science in Mechanical Engineering program, sequences of courses are available to provide advanced knowledge in such traditional areas as electromechanical design, heat transfer, solid mechanics, fluid mechanics, and materials science. There are concentrations in:

- Aerospace Engineering and
- Internal Combustion Engines.

Mission of Mechanical and Aerospace Engineering Department

The mission of the Department of Mechanical and Aerospace Engineering is to provide excellent undergraduate education in aerospace engineering and undergraduate and graduate education in mechanical engineering that will prepare graduates to meet Society's changing needs and aspirations.

Mission of the Mechanical Engineering Program

The mission of the Mechanical Engineering program is to provide excellent undergraduate education in Mechanical Engineering that will prepare graduates to meet society's changing needs and aspirations.

Mission of the Aerospace Engineering Program

The mission of the Aerospace Engineering program is to provide excellent undergraduate education in Aerospace Engineering that will prepare graduates to meet society's changing needs and aspirations.

Educational Objectives

The educational objectives of the undergraduate Aerospace Engineering (B.S.A.S.E.) Program are to prepare graduates, within the first four to six years after graduation, to be:

- working as a professional or as an entrepreneur in an area closely related to aerospace engineering, and/or
- exhibiting lifelong learning by pursuing or having completed a graduate or professional degree and/or demonstrated professional development.

The educational objectives of the undergraduate Mechanical Engineering (B.S.M.E.) Program are to prepare graduates, within the first four to six years after graduation, to be:

- working as a professional or as an entrepreneur in an area closely related to mechanical engineering, and/or
- exhibiting lifelong learning by pursuing or having completed a graduate or professional degree and/or demonstrated professional development.

Advanced Writing and Communication Skills

Mechanical & Aerospace Engineering students satisfy the University's Advanced Writing and Communication Skills requirement by completing a set of classroom courses, laboratory courses and design courses where they learn effective oral, graphical and technical writing skills. Mechanical & Aerospace Engineering students acquire Advanced Writing and Communication skills in the following core courses:

Code	Title	Credit Hours
MAE 111	Introduction to Engineering I	3
MAE 112	Introduction to Engineering II	2
MAE 241	Measurements Laboratory	3
MAE 351	Mechanics Laboratory	2
MAE 404	Experimental Engineering Laboratory	2
MAE 442	Capstone Design Project-I	1

or MAE 444	Capstone Aerospace Design Project-I	
MAE 443	Capstone Design Project-II	2
or MAE 445	Capstone Aerospace Design Project-II	

Graduate Studies

Graduate programs leading to the degrees of Master of Science and Doctor of Philosophy are offered by the Department with options in various engineering and interdisciplinary fields. Detailed information is available in the Bulletin of the Graduate School (p. 1127).

Majors in Mechanical and Aerospace Engineering

- B.S. in Mechanical Engineering (p. 699)
- Mechanical Engineering - Aerospace Engineering Concentration (p. 702)
- Mechanical Engineering - Internal Combustion Engines Concentration (p. 704)
- B.S. in Aerospace Engineering (p. 697)

Dual B.S./M.S. Degrees in Mechanical and Aerospace Engineering

- B.S. in Aerospace Engineering and B.S. in Mechanical Engineering Dual Degree (p. 710)
- B.S. and M.S. in Mechanical Engineering (p. 707)

Minor in Mechanical and Aerospace Engineering

- Mechanical Engineering (p. 713)

	Credit Hours	14
	Total Credit Hours	129

¹ You must complete a minimum of 1 PS cognate and 1 HA cognate to be selected from the list of available cognates. Each cognate should be a minimum of 3 courses (9 credits).

² Technical electives are advanced courses in mathematics, science or engineering, approved by the Faculty Advisor, as appropriate for individual objectives.

Mechanical Engineering - Aerospace Engineering Concentration

<http://www.coe.miami.edu/dept-mac/>

The mission of the aerospace engineer is to design and manufacture payload carrying vehicles to travel distances at the lowest cost in the shortest period of time. The training of the aerospace engineer is by demand multidisciplinary and by spirit pioneering. It includes aerodynamics, propulsion, advanced materials, structures, controls, robotics, electronics and computer usage.

An option has been developed to allow students at the University of Miami to have a concentration of courses in Aerospace Engineering. This concentration in aerospace is built on the existing accredited degree program in Mechanical Engineering.

Mechanical Engineering - Internal Combustion Engines Concentration

<http://www.coe.miami.edu/dept-mac/>

This program is designed to acquaint the mechanical engineering student with the fundamental science and engineering underlying the design of both conventional and high performance internal combustion engines and the fundamentals of emission formation in combustion systems, automobile mechanisms and structures including vibrations and noise. Included are studies of conventional fuels and synthetic fuels of the future such as hydrogen and methanol.

B.S./M.S.- Mechanical Engineering

The five-year BS/MS program leads to both the B.S. degree and the M.S. degree in Mechanical Engineering in five years. The program is intended for exceptional students who are admitted to the graduate program in their junior year. Students applying for this program must have a grade point average of at least 3.0 and must attain a score of 300 or more on the Graduate Record Examination (taken before the fifth year).

* At least 9 credit hours of Mechanical Engineering courses must be taken at the University of Miami; subject to approval of an academic advisor.

** A minimum 2.0 grade point average in all MAE courses taken is required.

Marine and Atmospheric Science

<http://www.rsmas.miami.edu/academics/undergraduate>

Introduction

The Rosenstiel School of Marine and Atmospheric Science was established in 1943 as the Marine Laboratory of the University of Miami. It has grown from its modest beginnings in a boathouse to be one of the nation's leading institutions for oceanographic and atmospheric research and education.

Originally a tropical marine biological facility, the Marine Laboratory initiated a program of studies leading to the Master of Science degree in 1949. In 1953, laboratory and classroom buildings were constructed on the School's present campus on Virginia Key, and in the late fifties, the Marine Laboratory expanded its staff and developed its oceanographic capabilities in response to the increased interest in scientific research in the United States. It became the Institute of Marine Science in 1961. Ocean-going research vessels were acquired, and additional buildings were constructed to accommodate new wide-ranging projects. In 1969, the Institute, now a School, was named for Dorothy H. and Lewis Rosenstiel in recognition of a major contribution, made through the Rosenstiel Foundation, to encourage progress in the marine and atmospheric sciences at the University of Miami. In 1977, the Rosenstiel School and College of Arts and Sciences joined together to establish an undergraduate Marine and Atmospheric Science program based on the Coral Gables campus. The degree granting authority for this program was formally transferred to the Rosenstiel School in 2008.

Today the Rosenstiel School has a faculty of over 80 who conduct sponsored research while offering studies leading to the Bachelor of Science, Bachelor of Arts, Master of Arts, Master of Science, Master of Professional Science and Doctor of Philosophy degrees.

Government agencies and private organizations support basic and applied research at the Rosenstiel School. Graduate and undergraduate students are an integral part of the research effort, and research programs, many multidisciplinary in nature, provide the environment within which professors and students interact.

The Rosenstiel School has modern laboratory facilities and a state-of-the-art catamaran, named the F. G. WALTON SMITH, in honor of the founder of the Rosenstiel School.

Mission

The Rosenstiel School strives to be in the forefront of basic and applied research as it applies to the ocean, atmosphere, and global environment, with particular emphasis on subjects of societal significance. Our goal is to provide excellence in graduate and undergraduate education and research training and to be a strong force towards improved environmental understanding and management.

Academic Policies

Admission

Applications for incoming freshmen are processed and reviewed by the Office of Admission. Enrollment in the RSMAS Undergraduate Program is selective and highly competitive. Admission decisions are based on the secondary school record, SAT/ACT score, counselor's evaluation and the applicant's essay.

Student Responsibilities

Students of the Rosenstiel School are responsible for planning their own programs and for meeting degree requirements. It is the student's responsibility to understand and fully comply with all the provisions set forth in this Bulletin and written changes to their program of study.

Academic Progress

The Rosenstiel School will review each student's record at the end of each semester. All students in the RSMAS Undergraduate Program must maintain a cumulative grade point average of 2.5 or better in order to remain in the program. Only those courses passed with a grade of C- or better may be applied to the major or minor.

Honors

Geological Sciences

Honors may be earned by students who have an overall 3.5 GPA, completed research beginning prior to their senior year resulting in a written Honor's Thesis, and completed an oral defense approved by the student's thesis advisor.

Marine Biology

Honors may be earned by students who have an overall 3.5 GPA, successfully completed 6 credit hours of independent research (411/412) **OR** 3 credit hours of independent research (411/412) plus the complete Saltwater Semester sequence, a senior thesis, and presented a poster or oral presentation of the research at a public forum such as the RSMAS Undergraduate Research Forum.

Marine Science, Marine Affairs, Meteorology, and Oceanography

Honors may be earned by students who have an overall 3.5 GPA, successfully completed 4 credit hours of independent research (411/412), a senior thesis, and presented a poster or oral presentation of the research at a public forum such as the RSMAS Undergraduate Research Forum.

Degree Programs

The Rosenstiel School of Marine and Atmospheric Science offers degree programs at both the undergraduate and graduate levels for students interested in marine science and/or atmospheric science as a career.

Undergraduate Degree Programs

The Rosenstiel School of Marine and Atmospheric Science offers both Bachelor of Science /Bachelor of Science in Marine and Atmospheric Science and Bachelor of Arts/ Bachelor of Arts in Marine Affairs undergraduate degree options. Bachelor of Science options include Marine Science, Oceanography, Marine Biology, Geology, and Meteorology. Bachelor of Arts options include Marine Affairs and Geology.

The Bachelor of Science degree programs are meant for students planning to continue with graduate and professional studies or for those who will pursue a technical career in government, research, or private industry. The Bachelor of Arts degree programs are designed for students planning either non-technical careers with government agencies or private industries or graduate studies in such areas as business, law, economics, political science, education, or communication.

In cooperation with the graduate program, courses of study culminating in a Master of Science or Master of Professional Science are also available.

Graduate Degree Programs

Graduate courses in the marine and atmospheric sciences are offered through the Graduate School and the Rosenstiel School of Marine and Atmospheric Science and are listed under the Rosenstiel School graduate program entries in the Bulletin.

Courses at the 500-level may be taken for undergraduate credit with junior standing and departmental consent. These courses are listed in the course section of the undergraduate bulletin.

Requirements for Graduation

In addition to satisfying the course requirements for the different undergraduate majors, students are expected to satisfy the School's General Education Requirements. General Education Requirements stress breadth of knowledge and the cultivation of intellectual abilities essential for the acquisition of knowledge. Courses taken for the major, the minor, and the writing requirement may also be used to satisfy the General Education Requirements

Areas of Proficiency

A) English Composition

Students must complete ENG 105 and either ENG 106 or ENG 107, or their approved equivalents, typically in the first year of residence. Students with an appropriate score on the Advanced Placement [AP] language or literature examinations, or with an appropriate score on the International Baccalaureate [IB] higher level English examination, may earn 6 credits in English 105 and English 106. Those with an appropriate score on the SAT/ V or ACT/E exams may be exempted from English 105.

B) Communication across the Curriculum

Students in the Rosenstiel School will, as part of their major curriculum, take courses designed to provide students with the skills required for effective communication, both written and oral, within the discipline.

C) Mathematics

Bachelor of Arts:

Code	Title	Credit Hours
Select one of the following:		3-4
MTH 108	Precalculus Mathematics II	
MTH 113	Finite Mathematics	
MTH 130	Introductory Calculus	
MTH 140	Calculus Concepts with Foundations A	
MTH 141	Calculus Concepts with Foundations B	
MTH 161	Calculus I	
MTH 171	Calculus I	
Select an approved course in statistics or computer science of the following or an approved alternative: ¹		3-4
MSC 204	Environmental Statistics	
IEN 311	Applied Probability and Statistics	

MTH 224	Introduction to Probability and Statistics
CSC 120	Computer Programming I

¹ For specific Statistics and Computer Science requirements review each major.

Bachelor of Science:

Code	Title	Credit Hours
Complete two semesters of Calculus: ¹		8
MTH 161 or MTH 171	Calculus I	
MTH 162 or MTH 172	Calculus II	
Select an approved course in statistics or computer science of the following or an approved alternative: ²		3-4
MSC 204	Environmental Statistics	
IEN 311	Applied Probability and Statistics	
MTH 224	Introduction to Probability and Statistics	
CSC 120	Computer Programming I	

¹ Students must earn a letter grade of C- or higher in Calculus I for Marine Science majors excluding RSMI, RSMP, and RSMX+MATH which require a letter grade of C- or higher in Calculus I and II. Meteorology majors must earn a letter grade of C- or higher in both Calculus I and Calculus II.

² For specific Statistics and Computer Science requirements review each major.

Areas of Knowledge

As described under the section General Education Requirements under *General University Information*, students must complete one cognate in each of three the Areas of Knowledge:

1. Arts and Humanities,
2. People and Society (Social Sciences) and
3. Science, Technology, Engineering and Mathematics (STEM).

All undergraduate students in the Rosenstiel School will fulfill their STEM cognate requirement through their major requirements. Students in Marine Affairs will fulfill their People and Society cognate requirement through their minor. Students in Marine Science may elect to fulfill the People and Society cognate requirement with a Marine Policy cognate. Students in Meteorology may elect to fulfill the People and Society cognate requirement with a Broadcast Meteorology cognate. Cognates integrating Study Abroad courses are also available. See program advisors for details.

Minors Offered by Marine and Atmospheric Science

- Climate Science and Policy (p. 725)
- Marine Policy (p. 738)
- Marine Science (p. 768)
- Meteorology (p. 726)

Foote Fellows are exempt from cognate requirements. Foote Fellows with (ACT English score greater than or equal to 32) Or (SAT Evidence-Based Reading and Writing score greater than or equal to 700) Or (SAT Critical Reading score greater than or equal to 700) are exempt from the English composition requirement. All Foote Fellows must complete math requirements as specified by their program. Exempt courses must be replaced by courses at the 200-level or higher.

Honors Program in Marine Geology (HPMG)

The Honors Program in Marine Geology (HPMG) allows exceptional students to pursue an accelerated program in the undergraduate Geological Sciences and graduate Marine Geology and Geophysics programs. The degree consists of an undergraduate Bachelor of Sciences degree in Geological Sciences combined with a graduate Master of Science degree from the Division of Marine Geology and Geophysics at the University of Miami Rosenstiel School of Marine and Atmospheric Science. Applicants must be high school seniors in the top 10% of their class and must have a minimum SAT I score of 1360 or (ACT 31). In addition to the regular Application for Admission to the University, the applicant must complete a separate application form for the Honors Program in Marine Geology. The HPMG application form and supporting materials must be submitted no later than November 1st of the applicant's senior year. A review of completed applications will begin by the end of November.

For further information and application forms please visit this website (<http://www.miami.edu/dualdegree>).

Atmospheric Science - Meteorology

Dept. Code: ATM

Meteorology

Meteorology is the study of the atmosphere, including climate and climate variability, weather forecasting, cloud and precipitation physics, tropical dynamics, severe weather and hurricanes. Atmospheric scientists use computer models and sophisticated observing systems to describe and understand the atmosphere. The curriculum emphasizes math and physics basics, providing a strong foundation for an intensive study of meteorology. The curriculum, conforming to the recommendations of the American Meteorological Society, prepares students for graduate school and for jobs in industry and government.

The Rosenstiel School offers a Bachelor of Science in Marine and Atmospheric Science with a major in Meteorology. The major includes a minor in Mathematics with an adequate MTH GPA.

Although Meteorology is a single major program, students often combine Meteorology with a second major in such diverse fields as Mathematics, Marine Science, or Broadcast Journalism. Interested students should read the information below and contact the Rosenstiel Undergraduate office (Ungar 210A or 305-284-2180) for details.

Double Major Options

Mathematics

The double major in Meteorology and Mathematics is intended for students who anticipate graduate study in Atmospheric Science and require a strong background in Mathematics. Interested students may find more information on the B.S.M.A.S. in Meteorology and Mathematics here (p. 720).

Marine Science

The double major in Meteorology and Marine Science is intended for those students who wish to have a truly interdisciplinary career in atmospheric and marine science. Interested students may find more information on the B.S.M.A.S. in Meteorology and Marine Science here (p. 759).

Broadcast Journalism

The double major in Meteorology and Broadcast Journalism is designed for Meteorology majors interested in Broadcast Meteorology. Students interested in adding Broadcast Journalism as a second major should review the School of Communication (p. 520) page for additional requirements.

Majors in Atmospheric Science - Meteorology

- B.S.M.A.S. in Meteorology (p. 722)
- B.S.M.A.S. (p. 722) Double Major in Meteorology and Mathematics (p. 720)
- B.S.M.A.S. (p. 722) Double Major in Meteorology and Marine Science (p. 717)

Minors Offered by Marine and Atmospheric Science

- Climate Science and Policy (p. 725)
- Marine Policy (p. 738)
- Marine Science (p. 768)
- Meteorology (p. 726)

Approved 500-level classes offered by the Rosenstiel School		
Total Credit Hours		15

* The Meteorology minor fulfills the requirements of a STEM cognate. Only those courses passed with a grade of "C-" or higher may be applied to the minor.

Marine Affairs

Dept. Code: MSC

Marine Affairs

The ocean is acquiring an ever-increasing significance as an avenue of worldwide commerce and communication and as a source of food, energy, minerals and fuels. As nations and private concerns become more involved in the ocean, the need increases for qualified professionals to deal with the social, cultural, economic, and legal complexities of marine affairs. In order to meet this need, the Rosenstiel School offers a Bachelor of Arts degree with a major in Marine Affairs combined with a required minor or additional major in Anthropology, Economics, Ecosystem Science and Policy, Geography, International Studies, Latin American Studies, Political Science, or an approved field within the Miami Business School. Students in the School of Communication may include Marine Affairs as a second major. This program is designed for students who wish to prepare themselves for graduate studies and careers in ocean related areas of business, policy, management, law, and communication.

5 Year BA/MPS Program in Marine Ecosystems and Society

The Rosenstiel School offers a 5 year BA/Master of Professional Science (MPS) Program in Marine Ecosystems and Society. This program enables qualified Marine Affairs students to earn a Bachelor of Arts in Marine Affairs in four years with the opportunity to earn a Master of Professional Science in Marine Ecosystems and Society in one additional year. Conditional acceptance to the graduate Marine Ecosystems and Society program is based on the student's GPA at the end of the sophomore year. Students must then apply for acceptance to the graduate program at the Rosenstiel School during their junior year.

Majors in Marine Affairs

- B.A. in Marine Affairs (p. 735)

Minors Offered by Marine and Atmospheric Science

- Climate Science and Policy (p. 725)
- Marine Policy (p. 738)
- Marine Science (p. 768)
- Meteorology (p. 726)

Geological Sciences

Dept. Code: GSC

Geological Sciences

Geological Sciences is concerned with Planet Earth, its origin, evolution, structure, internal and surface processes, mineral resources, environmental preservation, global dynamics, paleoclimate reconstruction, and life history. Geologists use their knowledge of chemistry, biology, physics and mathematics to solve Earth problems.

Geological Sciences undergraduates are prepared for careers in industry as well as graduate study in geosciences, the environmental sciences, and marine sciences. Career paths include research and teaching, as well as employment in the petroleum and mineral industries and in industries and government organizations concerned with energy resources, geodynamics, the marine environment, conservation, and climate change.

Major Options

The Department of Geological Sciences offers three undergraduate degree options. Although a single major program, students often combine Geological Sciences with a second major in such diverse fields as, Marine Science, Mathematics, or Ecosystem Science and Policy. Interested students should read the information below and contact the Rosenstiel Undergraduate office (Ungar 210A or 305-284-2180) for details.

- Bachelor of Science (B.S.) in Geological Science
- Bachelor of Science (B.S.) Marine Science/Geological Sciences
- Bachelor of Arts (B.A.) in Geological Sciences
- Five-year Master of Science Program (M.S.)

5 Year B.S./M.S. Program in Geological Sciences and Marine Geosciences

A 5-year B.S. /M.S. in Geological Sciences and Marine Geosciences allows qualified students to complete a master's degree in one year of study beyond the B.S.

Both the B.S. degree in Geological Sciences and M.S. degree in Marine Geosciences are offered through the Department of Marine Geosciences in the Rosenstiel School

By the beginning of their junior year students should have obtained a graduate faculty advisor, selected an approved topic for research, and begun work on their senior thesis as preparation for the M.S. In the senior year, students will increase their focus on graduate courses and work closely with their graduate faculty advisor. Contact the Geological Sciences chair at the departmental office (305-284-4253) for more information.

- B.A. in Geological Sciences (p. 727)
- B.S. in Geological Sciences (p. 729)
- B.S. in Marine Science / Geological Sciences (p. 732)
- Geological Sciences (p. 735)

B.A. in Geological Sciences

Curriculum Requirements

Code	Title	Credit Hours
Geological Sciences		
GSC 110 or GSC 103	The Earth System ¹ Evolution of the Modern Earth's Environment	3
GSC 111 or GSC 102	Earth System History ¹ Evolution of the Biosphere	3-4
GSC 114	Earth Processes Lab	2
GSC 260	Earth Materials	4
GSC 360	Depositional and Diagenetic Systems	4
GSC 482	Field Methods	2
Select 9 credit hours of approved electives in Geological Sciences ²		9
Other Required Courses		
ENG 105	English Composition I	3

MES 510	Environmental Planning and the Environmental Impact Statement	
MES 512	Aquaculture I	
MES 518	Coastal Zone Management	
MES 530	Port Operations and Policy	
Total Credit Hours		16

* Students majoring in the School of Marine and Atmospheric Science should replace MSC 111 and MSC 112 with one additional elective, and all electives must be above and beyond those used for the major. The Marine Policy minor fulfills the requirements of a People and Society cognate. Only those courses passed with a grade of "C-" or higher may be applied to the minor.

Marine Biology and Ecology

Dept. Code: MBE

Marine Biology and Ecology

The Bachelor of Science in Marine Biology and Ecology teaches fundamental concepts and precepts in ecology, physiology and organismal-environmental interactions. The educational goals are to understand the range of significant biological concepts from the molecular biology of DNA to how species interactions are affected by environmental change. These educational goals are enhanced by active research experiences that catalyze a student's understanding of the scientific process. This program is designed for students with a strong interest in academic research, graduate school, and professional careers that require critical thinking skills. For these high performing students, this program will develop competencies with which to successfully advance their careers.

While it is not required, there is enough flexibility in the Bachelor of Science in Marine Biology and Ecology program to allow students to do a minor or even a second major in the College of Arts and Sciences or other Schools. Students wishing to do a second major should review these disciplines for additional requirements.

- * 8 elective courses must include:
- 3 Arts and Humanities Cognate courses
 - 3 People and Society Cognate courses
 - 1 Course (3 credits) at the 300+ level

¹ Recommended electives to take for the Marine Biology and Ecology major.

Marine Science

Dept. Code: MSC

Marine Science

Marine Science is an interdisciplinary program dealing with the study of the world's oceans, their physical and biological constituents, the influence of oceanic resources on human society, and the conservation and future development of these resources.

The Bachelor of Science double major in Marine Science prepares students for admission to graduate programs and for careers in teaching and research as well as for technical careers in government and private industries concerned with the oceans. The Bachelor of Science in Marine Science is a full double major program that requires a major in Marine Science through the Rosenstiel School and a second major in one of the sciences through the College of Arts and Sciences, RSMAS, or the College of Engineering. Common second majors are Biology, Chemistry, Geological Sciences, Physics, Computer Science, Meteorology and Microbiology & Immunology. Required courses for these combinations are listed within the major tab.

Second majors in Applied Physics, Biochemistry, Engineering (all disciplines), and Mathematics may be taken. Students interested in adding a second major in one of these disciplines should review the Applied Physics (p. 296), Biochemistry (p. 141), Engineering (all disciplines) (p. 592), or Mathematics (p. 247) pages for additional requirements. Each of the areas of concentration constitutes a rigorous program requiring 120-130 credit hours for graduation.

Majors in Marine Science

- B.S. in Marine Science / Biology (p. 747)
- B.S. in Marine Science / Chemistry (p. 750)
- B.S. in Marine Science / Computer Science (p. 753)
- B.S. in Marine Science / Geological Sciences (p. 756)
- B.S. in Marine Science / Meteorology (p. 759)
- B.S. in Marine Science / Microbiology and Immunology (p. 762)
- B.S. in Marine Science / Physics (p. 765)
- B.S. in Marine Science with a Second Major in One of: Applied Physics, Biochemistry, Engineering (All Disciplines), and Mathematics (p. 743)

Minors Offered by Marine and Atmospheric Science

- Climate Science and Policy (p. 725)
- Marine Policy (p. 738)
- Marine Science (p. 768)

• Meteorology (p. 726)

B.S.M.A.S. in Marine Science with a Second Major Curriculum Requirements

Code	Title	Credit Hours
Marine Science		
MSC 111	Introduction to Marine Science	3
MSC 112	Introduction to Marine Science Lab	1
MSC 215	Chemical Oceanography	3
MSC 230	Introduction to Marine Biology	3
MSC 301	Introduction to Physical Oceanography	3
Select two of the following:		2
MSC 216	Chemical Oceanography Laboratory ¹

PHY 108	College Physics Laboratory II	
Electives		
Arts and Humanities Cognate Courses		9
People and Society Cognate Courses		9
Requirements for Second Major ⁷		32
Total Credit Hours		120-123

- ¹ Required for Biochemistry double majors.
- ² Required for Engineering, Mathematics and Applied Physics double majors.
- ³ At least 6 of which must be at the 300-level or higher. MSC 204 does not satisfy the MSC elective requirement but does satisfy the Statistics requirement. Three credits may double count for both MSC and the second major if approved by advisor.
- ⁴ Principles of Chemistry I must be passed with a grade of "C-" or higher.
- ⁵ Calculus I must be passed with a grade of "C-" or higher.
- ⁶ Option 1 or 2 is recommended for Physics. Option 2 (University Physics) is required for Engineering and Applied Physics.
- ⁷ Students should review the Applied Physics (p. 296), Biochemistry (p. 141), Engineering (all disciplines) (p. 592), or Mathematics (p. 247) page for the second major requirements and credits needed.

CSC 120	Computer Programming I	4
ENG 105	English Composition I	3
MTH 161	Calculus I	4
	Credit Hours	15
Spring		
CSC 220	Computer Programming II	4
CHM 111	Principles of Chemistry I	3
CHM 113	Chemistry Laboratory I	1
ENG 107	English Composition II: Science and Technology	3
MTH 162	Calculus II	4
	Credit Hours	15
Sophomore Year		
Fall		
CSC 314	Computer Organization and Architecture	3
CHM 112	Principles of Chemistry II	3
CHM 114	Chemistry Laboratory II	1
GSC 111	Earth System History	4
PHY 201	University Physics I for the Sciences	4
PHY 106	College Physics Laboratory I	1
	Credit Hours	16
Spring		
MSC 301	Introduction to Physical Oceanography	3
MSC 302	Introduction to Physical Oceanography Lab	1
BIL 160	Evolution and Biodiversity	4
BIL 161	Evolution and Biodiversity Laboratory	1
MTH 311	Introduction to Ordinary Differential Equations	3
PHY 202	University Physics II for the Sciences	4
PHY 108	College Physics Laboratory II	1
	Credit Hours	17
Junior Year		
Fall		
CSC Course		3
MTH 210	Introduction to Linear Algebra	3
MTH 309	Discrete Mathematics I	3
Elective #1		3
Elective #2		3
	Credit Hours	15
Spring		
MSC 215	Chemical Oceanography	3
MSC 216	Chemical Oceanography Laboratory ¹	1
MSC 321	Scientific Programming in the Atmospheric Sciences	3
CSC 322	System Programming	3
MSC 204	Environmental Statistics	3
Elective #3		3
	Credit Hours	16
Senior Year		
Fall		
MSC 230	Introduction to Marine Biology	3
CSC Course		3
MSC Course		3
Elective #4		3

Elective #5		3
Elective #6		3
	Credit Hours	18
Spring		
CSC 431	Introduction to Software Engineering	3
MSC Course		3
MSC Course		3
Elective #7		3
Elective #8		3
	Credit Hours	15
	Total Credit Hours	127

- * 8 elective courses must include:
- 3 Arts and Humanities Cognate courses
 - 3 People and Society Cognate courses
 - 1 Course (3 credits) at the 300+ level

¹ Students must take one laboratory from MSC 216, MSC 232.

B.S.M.A.S. in Marine Science / Geological Sciences

Curriculum Requirements

Code	Title	Credit Hours
Marine Science		
MSC 111	Introduction to Marine Science	3
MSC 112	Introduction to Marine Science Lab	1
MSC 215	Chemical Oceanography	3
MSC 230	Introduction to Marine Biology	3
MSC 301	Introduction to Physical Oceanography	3
Select two of the following:		2
MSC 216	Chemical Oceanography Laboratory	
MSC 232	Introduction to Marine Biology Laboratory	
MSC 302	Introduction to Physical Oceanography Lab	
Select 12 credit hours of approved electives in Marine Science ^{1,2}		12
Additional Required Courses		
Select one of the following:		5
BIL 150 & BIL 151	General Biology and General Biology Laboratory	
BIL 160 & BIL 161	Evolution and Biodiversity and Evolution and Biodiversity Laboratory	
CHM 111	Principles of Chemistry I ³	3
CHM 112	Principles of Chemistry II	3
CHM 113	Chemistry Laboratory I	1
CHM 114	Chemistry Laboratory II	1
ENG 105	English Composition I	3
ENG 107 or ENG 106	English Composition II: Science and Technology English Composition II	3
GSC 110	The Earth System	3
GSC 111	Earth System History	4
GSC 114	Earth Processes Lab	2
GSC 260	Earth Materials	4
GSC 360	Depositional and Diagenetic Systems	4
GSC 380	Paleontology and Stratigraphy	4
GSC 410	Environmental Geochemistry	3

or GSC 420	Geophysics	
GSC 440	Igneous and Metamorphic Petrology	4
GSC 480	Structural Geology	4
GSC 482	Field Methods	2
GSC 561	Colloquium - Current Topics in the Geosciences	1
GSC 580	Summer Field Geology	4
MTH 161	Calculus I ⁴	4
or MTH 171	Calculus I	
MTH 162	Calculus II	4
or MTH 172	Calculus II	
Choose one of the following:		3-4
GSC 204	Environmental Statistics	
MSC 204	Environmental Statistics	
MTH 224	Introduction to Probability and Statistics	
CSC 120	Computer Programming I	
Select one of the following options: ⁵		10
Option 1:		
PHY 201	University Physics I for the Sciences	
PHY 106	College Physics Laboratory I	
PHY 202	University Physics II for the Sciences	
PHY 108	College Physics Laboratory II	
Option 2:		
PHY 205	University Physics I	
PHY 206	University Physics II	
PHY 207	University Physics III	
PHY 208	University Physics II Lab	
or PHY 209	University Physics III Lab	
Option 3:		
PHY 101	College Physics I	
PHY 102	College Physics II	
PHY 106	College Physics Laboratory I	
PHY 108	College Physics Laboratory II	
Electives		
Arts and Humanities Cognate Courses		9
People and Society Cognate Courses		9
300+ Level Elective		3
Additional Elective		3
Total Credit Hours		130-131

¹ At least 6 of which must be at the 300-level or higher. MSC 204 does not satisfy the MSC elective requirement but does satisfy the Statistics requirement.

² One course in Geological Sciences may fulfill requirements in both Marine Science and Geology.

³ Principles of Chemistry I must be passed with a grade of "C-" or higher.

⁴ Calculus I must be passed with a grade of "C-" or higher.

⁵ Option 1 is recommended for Physics.

MSC 466	Environmental Physiology: Oxygen, Water, and Ionoregulatory Stress	
Approved MSC 372 and 500-level classes offered by the Rosenstiel School		
Total Credit Hours		16

¹ At least 6 of which must be at the 300-level or higher.

* Students majoring in the School of Marine and Atmospheric Science should replace MSC 111 and MSC 112 with an additional elective, and all electives must be above and beyond those used for the major. The Marine Science minor fulfills the requirements of a STEM cognate. Only those courses passed with a grade of "C-" or higher may be applied to the major or minor.

OCEANOGRAPHY

Dept. Code: OCE

Oceanography

The BSMAS in Oceanography is designed to give students a broad overview of the ocean sciences (physical, chemical, biological and geological oceanography, and ocean-atmosphere interactions as they relate to weather and climate) and specialized knowledge in one or more subdisciplines. Students are encouraged, but not required, to complete a second major in Chemistry, Physics, Biology, Geological Sciences, Meteorology, Mathematics, Computer Science or Engineering.

Music

<http://www.music.miami.edu>

Phillip and Patricia Frost School of Music

Introduction

The University of Miami Frost School of Music awards three types of undergraduate degrees within fourteen major programs.

- Bachelor of Music
 - Instrumental Performance (MIP) (p. 787)
 - Keyboard Performance (MKP) (p. 793)
 - Vocal Performance (MVP) (p. 861)
 - Studio Jazz Instrumental (MSJI) (p. 851)
 - Studio Jazz Vocal (MSJV) (p. 851)
 - Music Education (MED) (p. 797)
 - Music Therapy (MTY) (p. 797)
 - Theory and Composition (MTC) (p. 841)
 - Media Writing and Production (MWP) (p. 841)
 - Music Business and Entertainment Industries (MBEI) (p. 810)
 - Musicianship, Artistry Development, and Entrepreneurship (MADE) (p. 817)
 - B.M. in Professional Studies (MPRO) (p. 822)
- Bachelor of Science
 - Music Engineering (MUE) (p. 826)
- Bachelor of Arts
 - Music (MUS) (p. 783)

Mission

The Frost School of Music seeks to transform lives through the study and performance of music, and to enhance music's future as the result of the most innovative and relevant curricula in higher education. The Frost School of Music is devoted to excellence and a culture of collegiality, in which a diversity of people, musical styles, and careers are valued. The Frost School of Music is a community of musicians committed to advanced musicianship for all Frost students across a broad array of majors and programs. The Frost School of Music seeks to elevate the community through intensive, sustained outreach to under-served populations. The Frost School of music strives to enhance the cultural richness of the University of Miami, South Florida and throughout the world as the result of world class performance, scholarship and research.

Accreditation

The Frost School of Music has been a member of the National Association of Schools of Music since 1939. The requirements for entrance and for graduation as set forth in this bulletin are in accordance with the principles of this association.

Goals

The primary goals are:

1. to provide music majors with a high quality education,
2. to provide opportunities for other university students to increase their musical skill, understanding, and appreciation,
3. to provide the music faculty with opportunities for creative activity and scholarly inquiry, and
4. to serve as an educational and cultural resource for the university, South Florida, and global communities.

Admissions

Admission to the Frost School of Music

Students admitted to the Frost School of Music must successfully complete a dual admission process. In addition to the general requirements for admission to the University, the undergraduate student must meet the following requirements of the Frost School of Music:

1. Submit a Frost School of Music Application to the Frost School of Music Admission Office.
2. Submit an Application for Undergraduate Study to the University Office of Undergraduate Admission.
3. Demonstrate performance proficiency by auditioning on campus, at designated regional audition centers, or by recording. Appropriate faculty committees will evaluate the audition.

4. After being admitted to the university each student will be required to participate in placement auditions and exams in theory and music performance. These examinations will be given immediately prior to the fall semester.
5. Transfer students who are admitted to the university will receive a tentative evaluation of their previous work from the office of Admission. Validation of credit hours in music will be based on the results of auditions and placement examinations discussed above. The Associate Dean for Undergraduate Studies of the Frost School of Music determines which transferred courses will meet specific requirements for graduation.
6. Admission is granted in Fall semesters only.

Students who are admitted to the Frost School of Music must begin a program of specialized requirements in music during their first semester.

Admission to the University (Undergraduate Students)

Application forms and bulletins for undergraduate students may be secured from the University of Miami web site (<http://www.miami.edu>). The University Office of Admission receives and processes all undergraduate applications, evaluates credentials, and mails letters of acceptance to applicants who qualify for entrance. Because of the university's selective admissions policy and limited enrollment only those applicants are accepted who present evidence of intellectual promise, unusual talent and potential, and strong personal qualifications. Admission as a transfer student requires a 3.0 grade point average from the previous institution. The University Office of Admission and the Frost School of Music determine admission to the university. Prospective students should make formal application for admission in the fall of the senior year in high school.

New Student Placement

New students will participate in an ensemble placement audition and music theory placement assessment during Frost Orientation. These auditions and assessments will determine the student's appropriate ensemble and music theory placement. Further information on placement materials and procedures will be communicated before Frost Orientation.

Academic Probation and Failed Course Policies

Students Who Fail to Successfully Complete a Music Course

Students who fail to successfully complete any music course, including zero credit forums, after the second enrollment will be dismissed from the Frost School of Music. Courses required for the degree must be taken at the next available opportunity and may not be dropped during the second enrollment.

Grading Criteria:

1. **Experiential Music Curriculum Core Courses** (48 credits) must be passed with a grade of a "C" or higher, including program forums ("C-" = failing);
2. **MED courses** must be passed with a grade of "C" or higher for Music Education and Music Therapy majors;
3. **Primary lessons** must be passed with a grade of "B-" or higher; and
4. All other music courses will be failing with a grade of "F."

Academic Probation

In addition to the University of Miami academic probation guidelines, a Frost School of Music student is subject to Academic Probation if she/he:

1. Fails to make satisfactory progress towards completion of degree; or
2. Earns an overall Term GPA below a 2.7.

A student who remains on probationary status after two consecutive semesters shall be subject to dismissal:

- Semester One = Probation One;
- Semester Two = Probation Two; and
- Semester Three = Dismissal

The decision to dismiss shall be made by the Academic Standards Committee (ASC) of FSOM. If the decision is made not to dismiss, the student shall remain on Academic Probation. Dismissal Procedures are outlined in the Frost School of Music Undergraduate Student Handbook.

Lessons

Primary Lessons

Primary lessons are for two (2) credit hours and must be taken on the student's primary instrument, unless otherwise approved. Students enrolled in primary lessons are required to perform a jury at the end of each semester. If a student wishes to take lessons on a secondary instrument, they must follow the procedures in the 'secondary lesson' section below.

There are two levels of undergraduate private lessons:

- Level 1 (V01) - Undergraduate freshman and sophomores, typically four semesters.

- Level 3 (V03) - Undergraduate juniors and seniors, typically four semesters.

The number of lessons required for graduation is outlined in the curriculum of each degree program found in the UM Academic Bulletin. Transfer students enrolled in Level 1 for their first semester will be placed at the appropriate level of study after their first jury.

Students earning a grade of "C+" or lower in lessons will be placed on probation for one semester. Following probation, an additional grade of "C+" or lower in lessons **will result in dismissal from the Frost School of Music.**

Secondary Lessons

Secondary lessons are available to FSOM and non-music students, pending studio approval, for one (1) credit hour. Students who wish to enroll in a secondary lesson must first receive approval from the applicable department and submit the Private Lessons Form, located on the FSOM Undergraduate Forms (http://www.miami.edu/frost/index.php/frost/programs/undergraduate_studies/undergraduate_forms) webpage,

There is a non-refundable \$300 secondary lesson fee required for each semester in which a secondary lesson is taken. This fee must be paid in full before enrollment. For further instructions please contact the Office of Undergraduate Studies.

Summer Lessons

Should a summer lesson be available, it will not fulfill degree requirements for FSOM academic programs.

Juries

A jury is designed to evaluate a student's musicianship and technical progress in their principal lesson. Juries are typically evaluated by a panel of performance faculty at the end of each semester. Repertoire and technical requirements are assigned by the student's private instructor. A portion of the final grade may be determined by studio class participation, recital attendance, or other requirements specific to the student's program of study.

Ensembles

Performing Ensembles

Ensembles provide music learning and performing experience for all students on the University of Miami campus through rehearsals and public concerts. Membership in each of these performing ensembles is based on auditions. Not all ensembles meet degree requirements. Please refer to the FSOM Undergraduate Student Handbook for detailed information regarding ensembles. Please see the course catalog for a complete list of all ensembles.

Instrumental Ensembles

- Accompanying
- American Music Ensemble (Songwriters)
- Avant Garde Ensemble
- "Band of the Hour" Marching Band
- Bluegrass Ensemble
- Blues Ensemble
- Brass Chamber Music
- Brass Choir
- Clarinet Choir
- Classical Guitar Ensemble
- Concert Jazz Band
- Contemporary Music Ensemble
- E.C.M. Ensemble
- Electronic Music Ensemble
- Flute Choir
- Funk/Fusion Ensemble
- Horace Silver Ensemble
- Ibis Ensemble
- Jazz Band III
- Jazz Bass Ensemble
- Jazz Guitar Ensemble
- Jazz Keyboard Ensemble
- Jazz Saxophone Ensemble
- Laptop Ensemble

- Mallet Ensemble
- Monk/Mingus Ensemble
- Percussion Chamber Music
- Salsa Ensemble
- Saxophone Ensemble
- Small Contemporary Ensemble
- Small Jazz Ensembles
- String-Keyboard Chamber Music
- Studio Jazz Band
- Studio Rhythm Section
- Symphonic Winds
- Symphony Orchestra
- Trombone Choir
- Tuba Ensemble
- University Band
- Wind Ensemble
- Woodwind Chamber Music

Vocal Ensembles

- Frost Chorale
- Jazz Vocal I-III
- Musical Theatre Workshop
- Opera Theater
- Symphonic Choir
- Women's Choir

Enrollment

Forums

Students must successfully complete a program forum each semester in residence. Program forums must be passed with a "C" or higher in order to be approved for graduation. The grade of a "C-" is considered failing. Please refer to the FSOM Undergraduate Student Handbook for detailed information regarding forums and studio classes.

Auditing

Students are not permitted to audit music courses.

Graduation Requirements

The general requirements for graduation from the University of Miami are described in the General Information (<http://bulletin.miami.edu/general-university-information>) section of the Academic Bulletin. These general requirements are included in the list of requirements for majors in the Frost School of Music. Students must satisfy all degree requirements in order to graduate. The student should consult his/her advisor regularly and review the Degree Progress Report available in CaneLink under Academic Requirements to ensure that these requirements are met. The Dean must approve changes or deviations from the printed requirements in writing. Degree requirements may be satisfied by successfully completing a course, an approved substitution for the course, an approved transfer course, or waiver from the course as a result of demonstrating the required competency through testing

Candidates for degrees must complete all requirements of the University and the Frost School of Music with a minimum "C" average (2.0) or better and at least 120 credits. Students may not graduate with an "I" or "NG" in any course.

Transfer Credits

Transfer Student Credit Evaluation

FSOM music course transfer equivalencies will be determined prior to Frost Orientation. Transfer Students will receive a pre-registration advising via email before enrolling in courses. If official transcripts are not received by the University, or if transfer credits are not correctly labeled, this process may be delayed. Please contact Eva Alonso at eva.alonso@miami.edu for further information.

Other Music Transfer Credits

If you have previously earned music credit at another institution and wish to receive transfer equivalencies, please complete the Transfer Credit Equivalency Form (http://www.miami.edu/frost/index.php/frost/programs/undergraduate_studies/undergraduate_forms) and return it to Eva Alonso in PLF 108 N.

Non-UM Programs (Summer, Study Abroad, and Term)

Students currently enrolled in the Frost School of Music who wish to Study Abroad must complete the Non-UM Program Request Form (https://registrar.miami.edu/_assets/pdf/new-site/Forms-1/Non-UM%20Program%20Application.0.1.pdf) through the Registrar's Office. If you wish to take summer courses away and earn college credit, please bring a completed Transfer Credit Equivalency Form (http://www.miami.edu/frost/index.php/frost/programs/undergraduate_studies/undergraduate_forms), along with the course description from the Non-UM Program, to the Undergraduate Studies Office. If you wish to transfer in a non-music course you must get the equivalency approved by the department in which the course lives (i.e. ENG 105 equivalency will need to be approved by the English Department). After the form is complete, please bring the form to the Office of Undergraduate Studies for final approval and processing.

If you have earned 56 credits or more, courses must be taken at a NASM or regionally accredited institution (four-year college or university). The last 45 credits prior to graduation must be in residence at the University of Miami.

Dual Degrees

Dual degrees have more stringent requirements than "double majors." The only courses that may count for both degrees are the general education requirements (ENG 105 and ENG 106, Math, People and Society cognate, and STEM cognate). For each degree a student must have a different major and minor, if a minor is required. The major for one degree may not be a minor for the other degree.

Music Opportunities for Non-Music Majors

Select music courses are available to students not enrolled in a music degree program. A list of courses is available on the music website (forms), <https://admissions.frost.miami.edu/undergraduate/current-students/>

Minors for Non-Music Students

- General Music Minor (p. 783) (Satisfies the Arts and Humanities Area of Knowledge) - Audition Required
- Dance Minor (p. 865)(Satisfies the Arts and Humanities Area of Knowledge) - Audition Required
- Music Business and Entertainment Industries Minor (p. 840) (Satisfies the People and Society Area of Knowledge) - No Audition Required

Students interested in the Minor in General Music must successfully pass an ensemble placement (if participating in an ensemble) or primary instrument audition (if enrolling in private lessons). Please contact the appropriate faculty member listed on the Ensemble Contact List or the Secondary Lesson Audition Contact List (located on the Undergraduate Forms Webpage (http://www.miami.edu/frost/index.php/frost/programs/undergraduate_studies/undergraduate_forms)) to inquire about audition materials and to schedule your audition.

Once you have received confirmation that you have passed the audition, request that the designated faculty member sign the bottom of the Declaration of Music Minor Form (http://www.miami.edu/frost/index.php/frost/programs/undergraduate_studies/undergraduate_forms) or the Declaration of Dance Minor Form (http://www.miami.edu/frost/index.php/frost/programs/undergraduate_studies/undergraduate_forms). For students declaring the General Music Minor, submit your completed Declaration of Music Minor Form to the Undergraduate Studies Office and declare your chosen music minor through your primary school. For students declaring the Minor in Dance, submit your completed Declaration of Dance Minor Form (http://www.miami.edu/frost/index.php/frost/programs/undergraduate_studies/undergraduate_forms) to the Dance Department and declare your chosen music minor through your primary school.

Cognates

All cognates that include courses offered by FSOM satisfy the Arts & Humanities Area of Knowledge. Please see a list of all applicable cognates below:

- World of Music (https://cognates.miami.edu/AT_0001) (AT_0001)
- Creative Arts in Therapy: Integrating Music and Dance into Counseling and Healthcare (https://cognates.miami.edu/AT_0099) (AT_0099)
- The Art and Culture of 17th Century Europe (https://cognates.miami.edu/AT_0020) (AT_0020)
- The Arts in Education: Contextual Connections (https://cognates.miami.edu/AT_0010) (AT_0010)
- Western Civilization: Historical Approaches (https://cognates.miami.edu/AT_0011) (AT_0011)

Secondary Lessons

Secondary lessons are available to FSOM and non-music students, pending studio approval, for one (1) credit hour per semester. Students who wish to enroll in a secondary lesson must first receive approval from the applicable department and submit the Private Lessons Form, located on the FSOM

Undergraduate Forms (http://www.miami.edu/frost/index.php/frost/programs/undergraduate_studies/undergraduate_forms) webpage, to the Office of Undergraduate Studies.

There is a \$300 secondary lesson fee required for each semester in which a secondary lesson is taken. This fee must be paid in full before enrollment. For further instructions, please visit the Office of Undergraduate Studies. The Secondary Lesson Contact List is located on the Undergraduate Forms Webpage (http://www.miami.edu/frost/index.php/frost/programs/undergraduate_studies/undergraduate_forms).

Ensembles

Non-music students may request to audition for any ensemble in the Frost School of Music. Students may enroll in ensembles upon approval of applicable faculty and ensemble instructor. If course is restricted to majors only in CaneLink, please send proof of faculty approval to the Office of Undergraduate Studies and a registration PIN will be created.

General Education

General Education Requirements

Music students are expected to meet the university general education requirements, detailed in the academic bulletin, in order to ensure that they have acquired essential intellectual skills. Music students are encouraged to engage in a range of academic disciplines.

English and Mathematics Requirements

Students requiring ENG 105, ENG 106, or MTH 101 must enroll in these classes during the first year in residence and are not permitted to drop the courses.

Course and Cognate Requirements

Code	Title	Credit Hours
ENG 105	English Composition I	3
ENG 106	English Composition II	3
Select one of the following:		3
MTH 101	Algebra for College Students (MIP, MKP, MVP, MSJI, MSJV, MED, MTY, MPRO)	
MTH 113	Finite Mathematics (MADE, MBEI, MUS, MTC, MWP)	
MTH 161	Calculus I (MUE)	
ST_XXXX	STEM Cognate	9
PS_XXXX	People & Society Cognate	9
UMX 100	Freshman Experience	0
Advanced Writing and Communication Skills (3 courses)		
Total Credit Hours		27

Areas of Knowledge

To discover cognates offered by UM, please visit the Cognate Search Engine (<https://cognates.miami.edu>). To declare a cognate and/or minor, students must submit a Minor and/or Cognate Declaration Form (http://www.miami.edu/frost/index.php/frost/programs/undergraduate_studies/undergraduate_forms) to the Office of Undergraduate Studies.

Arts and Humanities

All Frost School of Music students satisfy the Arts and Humanities Area of Knowledge, upon successful completion of the BM, BS, or BA music degree requirements.

People and Society

Students enrolled in the following degree programs must satisfy their People and Society Area of Knowledge with a cognate, minor, or major: MIP, MKP, MVP, MSJI, MSJV, MTC, MWP, MUE, and MPRO.

The following degree programs satisfy the People and Society Area of Knowledge upon successful completion of the required minor:

- MED Music Education with required minor in Education;
- MTY Music Therapy with required minor in Psychology;
- MBEI Music Business and Entertainment Industries with required minor in Business, Communications or Entertainment, if the minor is designated as People and Society; and
- MUS Bachelor of Arts in Music required minor outside of music may fulfill this requirement if the minor is in the People and Society Area of Knowledge.

Please note that a minor in Music Business and Entertainment Industries satisfies the People and Society Area of Knowledge.

Science, Technology, Engineering, and Math (STEM)

Students enrolled in the following degree programs must satisfy their STEM Area of Knowledge through a cognate, minor, or major: MIP, MKP, MVP, MSJI, MSJV, MED, MTY, MTC, MWP, MBEI, MADE, and MPRO.

The following degree programs satisfy the STEM cognate upon successful completion of the required minor:

- MUE Music Engineering with required minor in Electrical Engineering or Computer Engineering;
- MBEI Music Business and Entertainment Industries with required minor in Business, Communications or Entertainment, if the minor is designated as STEM;
- MUS Bachelor of Arts in Music required minor outside of music may fulfill this requirement if the minor is in the STEM area of knowledge.

Advanced Writing and Communication Skills

All students are required to successfully complete 3 Advanced Communications and Writing courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All music students will successfully complete:

1. A required musicology course, which will include substantial evaluated and revised writing components.
2. A Senior recital or culminating project, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. One required course in their major which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

- General Music Minor (p. 783)
- Music Business and Entertainment Industries Minor (p. 840)
- Creative American Music Minor (p. 839)
- Music Composition Minor (p. 851)
- Studio Music and Jazz Instrumental Minor (p. 860)
- Dance Minor (p. 865)
- Performer's Certificate in Instrumental Performance (p. 792)
- Performer's Certificate in Keyboard Performance (p. 797)
- Performer's Certificate in Jazz (p. 860)
- Performer's Certificate in Vocal Performance (p. 864)

Experiential Music Core Requirement (EMC)

The EMC Core courses are common to all Frost School of Music students regardless of degree program. The EMC core courses empower students to become internal musicians as they develop deep knowledge in music and a high level of musical skills. As a community of musicians, all students interact with their peers whose diverse interests strengthen their music making abilities.

Additional courses for Principal Instrument Lesson & Studio Class and Ensembles may be required for the major.

All EMC core courses must be successfully completed with a grade of "C" or higher. A grade of a "C-" is considered failing.

Code	Title	Credit Hours
Experiential Music Curriculum Core Courses		
Major Program Forum (each semester in residence)		0
MXX XX1 (Level 1)	Principal Instrument Lesson & Studio Class (semesters 1-4, 2 credit hours)	8
MXX XX3 (Level 3)	Principal Instrument Lesson & Studio Class (semesters 5-6, 2 credit hours)	4
MTC 140 or MSJ 140 or MMI 140	Experiential Musicianship I	3
MTC 141 or MSJ 141	Experiential Musicianship II	3

or MMI 141	Experiential Musicianship II	
MTC 240	Experiential Musicianship III	3
or MSJ 240	Experiential Musicianship III	
or MMI 240	Experiential Musicianship III	
MTC 241	Experiential Musicianship IV	3

Foote Fellow General Education Requirements

The Foote Fellows Honors Program recognizes the most educationally accomplished incoming students at the University of Miami. Foote Fellows have distinguished themselves both in and out of the classroom, are self-motivated, and think independently. Admission to the Foote Fellows Honors Program is by invitation.

Within the curricular framework of their school or college, Foote Fellows enjoy maximum freedom to explore a multitude of educational resources. Many Foote Fellows leverage this opportunity to take additional majors and/or minors and to study abroad.

At each of the nine undergraduate schools at the University of Miami, a dedicated advisor helps Foote Fellows chart their academic path and attain access to distinctive learning opportunities and educational guidance, such as special school-based seminars, faculty-mentored research, networking opportunities, and off-campus internships.

In addition, Foote Fellows have access to opportunities outside their school. Special Foote Fellow lectures are held throughout the academic year. "Books That Matter," a rigorous, multidisciplinary seminar in reading and analyzing significant works of nonfiction, is offered to Foote Fellows. In their junior and senior years, Foote Fellows are invited to join advanced, interdisciplinary, and integrative seminars taught by leading faculty members from across the University. Foote Fellows also benefit from focused advising regarding post-baccalaureate distinguished fellowships and awards, support and information about co-curricular opportunities from a dedicated program manager, and networking events with other Foote Fellows from all disciplines.

To graduate with the Foote Fellows Honors Program distinction, Foote Fellow students must achieve a minimum GPA of 3.5 by the completion of the final semester.

Eligibility for the Foote Fellows Honors Program transcript distinction for each student is determined by the lower of two GPAs:

1. UM cumulative graduation GPA

2. Combination GPA (UM cumulative graduation GPA + Transfer GPA)

The Foote Fellows Honors Program reflects the educational vision of former University of Miami President Edward T. Foote, who retired in 2000 after serving the University for twenty years.

Foote Fellows in the Frost School of Music have freedom within the General Education requirements as described below. However, Foote Fellow students are still required to accumulate twenty seven (27) total credit hours in non-music coursework to meet graduation requirements.

BA, MIP, MKP, MVP, MTC, MWP, MSJI, MSJV, MADE, MPRO

Bachelor of Arts in Music (MUS)

Dept. Code: MCY

Undergraduate students who are interested in musicology, music history or ethnomusicology are encouraged to enroll in the Bachelor of Arts in Music degree, through which they can pursue these and related subjects within a liberal arts music curriculum. There is no undergraduate degree in musicology.

Bachelor of Arts in Music

- B.A.M. Bachelor of Arts in Music (p. 783)

Minors

- Minor in General Music (p. 787)

B.A.M. Bachelor of Arts in Music

Introduction

The Bachelor of Arts in Music degree is a non-professional degree designed for talented musicians who wish to pursue a broad liberal arts education. Curriculum flexibility affords students the opportunity for a variety of pre-professional studies, including pre-medical and pre-legal. A minor outside the Frost School of Music is required. Students in the BA in Music program must earn a minimum 2.5 GPA each semester to remain in the program.

The mission of the Bachelor of Arts in Music is to provide students with the highest quality education possible in music, a broad education in the liberal arts, and in-depth study in an academic area outside of the Frost School of Music.

Educational Objectives

- Students will acquire a thorough knowledge of music theory and music history, and develop advanced competence in musical performance.
- They will develop the ability to think, speak, and write clearly with the capacity to explain and defend their views effectively and rationally based on substantive knowledge of the liberal arts.
- The student will acquire competency in a selected non-music academic area that includes a broad understanding of the area and contemporary thought within the area.

Advanced Writing and Communication Skills

Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All BA in Music students will successfully complete:

1. MCY 341, which will include substantial evaluated and revised writing components.

2. MCY or MTC 300+, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MCY or MTC 300+, which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

Minor in General Music

(Audition Required)

Any student wishing to declare a minor in music must audition on an instrument and be approved by the Frost School of Music as a minor. The approval form is available here (<https://my.frost.miami.edu/undergraduate/forms>) or in the Undergraduate Dean's Office. A fee is assessed for private instruction. The fee is \$300 per semester and must be paid prior to enrolling. Please note that private lessons may not be available on all instruments. Studio space varies from year to year. A music minor requires 15 credit hours, 12 of which must be earned at the University of Miami.

Code	Title	Credit Hours
Complete exactly 2 courses from the following:		6
MTC 109	Music Theory Skills I (AP Music Theory Score of 5 satisfies this requirement.)	
MTC 110	Music Theory Skills II (AP Music Theory Score of 5 satisfies this requirement.)	
Complete exactly 1 course from the following:		3
MCY 124	The Evolution of Jazz	
MCY 127	Evolution of Rock	
MCY 131	Understanding Music	
Complete at least 6 credit hours from the following:		6
Private Lessons (maximum of 4 semesters)

Instrumental Performance (MIP)

Dept. Code: MIP

The Department of Instrumental Performance offers a bachelor of music performance degree and a performer's certificate in 17 traditional instruments: flute, oboe, clarinet, saxophone, bassoon, horn, trumpet, trombone, euphonium, tuba, percussion, violin, viola, violoncello, double bass, guitar, and harp.

Bachelor of Music: Instrumental Performance (MIP)

The purpose of the Bachelor of Music in Performance Degree is to

1. Provide the highest quality of education possible in the areas of musicianship that will lead toward a professional performance career or graduate study as a classical artist.
2. To provide performance opportunities that integrate the skills learned in music and other classes and to foster creativity and research.
3. To provide audition skills and repertoire as well as the skills for building and managing the non-performance aspects of a professional career.

Educational Objectives

- Students will develop musicianship skills and technique that will lead toward a professional career as a solo classical performer or graduate study.
- Students will be able to sight-read and prepare musical performances without assistance.
- Students will develop musicianship skills and technique for working within an ensemble leading towards a professional career or graduate study as a classical performer. Ensemble requirements will vary by applied area.
- Students will develop skills for fostering a professional career or graduate study as a classical performer.
- Students will have a broad knowledge of music literature in their applied area as well as an understanding of stylistic and theoretical principles of the various musical and historical periods.

Major in Instrumental Performance

- B.M. in Instrumental Performance (MIP) degree requirements (p. 788)

Certificates

- Instrumental Performance (p. 792)

B.M. in Instrumental Performance

Advanced Writing and Communication Skills

Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All Instrumental Performance students will successfully complete:

1. MCY 341 Music of the Medieval, Renaissance, and Baroque Periods, which will include substantial evaluated and revised writing components.
2. MIP XXX Private Lesson Level 3 Senior Recital, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MIP 541-549 Pedagogy and Repertoire, which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

Certificate in Instrumental Performance

Audition Required-Music Majors Only

Performance Certificates may be awarded to music majors, in non-performance degrees: MED, MTY, MTC, MWP, MBEI, MUE, and MUS, who meet the achievement level and standards of a music performance major on a single instrument as offered by the following degree programs: MIP, MVP, MKP, MSJI, and MSJV. Any student wishing to declare a Performance Certificate must audition on an instrument or voice and be approved by the appropriate department. In addition to the Experiential Music Curriculum Core Courses, the following requirements must be met in one of the following tracks: MIP, MVP, MKP, or MSJ. The Music Performance Certificate requires approval by designated departmental faculty. The appropriate performance level must be achieved as determined by the designated departmental faculty or the certificate will not have been earned, even if all courses have been successfully completed. The Music Performance Certificate will be awarded upon successful completion of all coursework and final approval of the designated departmental faculty.

* Students who will enroll in a required internship (i.e. student teaching) in their 8th semester may petition the department to perform the senior recital and satisfy the Principal Instrument Lesson & Studio Class degree requirements in their 7th semester.

MTC 311	Analysis and Experience	3
or MTC 312	20th and 21st Century Techniques	
or MTC 313	18th Century Counterpoint	
Total required credits		23

Keyboard Performance (MKP)

Dept. Code: MKP

The Department of Keyboard Performance offers a bachelor of music performance degree and a performer's certificate in piano. It is a dynamic center for music scholarship. Regardless if a student is more versed in classical or contemporary repertoire, the performance and academic opportunities are exceptional and for all areas of keyboard study.

Bachelor of Music: Keyboard Performance (MKP)

The purpose of the Bachelor of Music in Keyboard Performance Degree: A degree from the Frost School of Music in Keyboard Performance will ensure a broad comprehensive training for a student in a performance-intensive environment. Degree programs incorporate performance, music research, pedagogy, and professional skills to cultivate students for a professional life in music. Graduates may seek careers as concert performers, collaborative pianists/accompanists, and/or as artist teachers.

Educational Objectives

Private lessons are taught with individual student goals in mind, and direction in academics and career pursuits are a priority for the entire faculty. We take pride in the reputation of our keyboard faculty for not only their distinguished concert careers, but also their dedication as inspiring teachers and mentors.

Major in Keyboard Performance

- B.M. in Keyboard Performance (p. 793)

Certificates

- Keyboard Performance (p. 797)

B.M. in Keyboard Performance

Advanced Writing and Communication Skills

Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All keyboard performance students will successfully complete:

1. MCY 341 Music of the Medieval, Renaissance, and Baroque Periods, which will include substantial evaluated and revised writing components.
2. MKP XXX Private Lesson Level 3 Senior Recital, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MKP 547 Keyboard Pedagogy, which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.
