Certificate in Keyboard Performance

Audition Required-Music Majors Only

Performance Certificates may be awarded to music majors, in non-performance degrees: MED, MTY, MTC, MWP, MBEI, MUE, and MUS, who meet the achievement level and standards of a music performance major on a single instrument as offered by the following degree programs: MIP, MVP, MKP, MSJI, and MSJV. Any student wishing to declare a Performance Certificate must audition on an instrument or voice and be approved by the appropriate department. In addition to the Experiential Music Curriculum Core Courses, the following requirements must be met in one of the following tracks: MIP, MVP, MKP, or MSJ. The Music Performance Certificate requires approval by designated departmental faculty. The appropriate performance level must be achieved as determined by the designated departmental faculty or the certificate will not have been earned, even if all courses have been successfully completed. The Music Performance Certificate will be awarded upon successful completion of all coursework and final approval of the designated departmental faculty.

* Students who will enroll in a required internship (i.e. student teaching) in their 8th semester may petition the department to perform the senior recital and satisfy the Principal Instrument Lesson & Studio Class degree requirements in their 7th semester.

Curriculum Requirements

Music Education and Music Therapy (MED) & (MTY)

Dept. Code: MED

The Department of Music Education and Music Therapy offers two degree programs,

- Music Education (MED)
- Music Therapy (MTY).

Majors in Music Education and Music Therapy

- B.M. in Music Education with Minor in Education (p. 798)
- B.M. in Music Therapy with Minor in Psychology (p. 803)

B.M. in Music Education with Minor in Education

Introduction

The Bachelor of Music in Music Education with Minor in Education degree program prepares undergraduate music students to become outstanding music educators who are certified by the Florida Department of Education (FL-DOE) to teach music in the schools of Florida and, through reciprocity agreements with other state DOEs, throughout the United States. A basic premise of the Bachelor of Music Education degree program is that music teachers must be both strong musicians and skilled educators; thus, competency as a performing and creating musician is as important as having strong foundations in pedagogy (both theory and practice). We believe our series of music education techniques and methods courses provide students with a broad foundation in teaching music through the lifespan (childhood through adulthood), as well as across a wide array of educational settings and musical contexts. This sequence incorporates ideas drawn from theory, research, and the practical experiences of the faculty and other successful practitioners. We also believe that students must be able to build themselves to meet their professional goals by developing a specialization in an area of music teaching through music education emphasis area electives.

Program Goals

- Help students develop the musical and teaching competencies necessary to enable them to demonstrate the generic and subject area competencies and the Florida Educational Accomplished Practices (FEAP) for becoming successful music teachers.
- Enable students to apply the musical and instructional skills developed in the program (and reinforced during field experience and student teaching) to teach music in a wide array of contexts.
- Help students to develop the skills and desire to continue music-making as a lifetime endeavor both personally and professionally.
- Help students develop skills in integrating information from the diverse professional literature into their teaching.

Educational Objectives

- Students must demonstrate generic competencies required by the university in general education courses.
- Students must demonstrate competencies related to the core Professional Education courses required by the State of Florida in Teaching and Learning (TAL) courses.
- Students must demonstrate musical competencies related to the requirements of the Bachelor of Music degree.
- Students must demonstrate teaching competencies related to the core courses in the music education.

The Music Education curriculum is designed to prepare students to teach music in a wide array of contexts, including (K-12) public & private schools. All Music Education majors must perform at a high level either vocally or on an instrument. Students must successfully complete the Florida General Knowledge Examination (FGKE) to be admitted to teacher candidacy and to graduate.

All students must develop knowledge of and performance ability on wind, string, and percussion instruments as well as, vocal skills to assure effective use of the voice in teaching.

Admission to and/or retention in the music education curriculum leading to Florida Teacher Certification requires that students be formally screened with respect to specific criteria. Following are the Requirements for Admission to Teacher Candidacy and for Admission to Associate Teaching:

Admission to Teacher Candidacy

1. Acceptance as a major in the music education program.
2. Satisfactory performance on the Florida General Knowledge Exam (FGKE).
3. Completion of 45 credit hours. (Transfer students must have at least 12 credit hours earned at the University of Miami.)
4. Successful completion of TAL 305 or TAL 404 (C or higher).
5. No grade less than a C in TAL & MED courses.
6. 2.5 minimum GPA in music courses.
7. Required Background Check completed through Miami-Dade Public Schools Office.
8. Completion of a successful Field Experience Requirement.

Admission to Student Teaching

1. Approval of MED faculty members.
2. Completion of 90 credit hours.
3. Completion of at least three-fourths of the courses in the teaching major, verified by advisor.
4. Admission to Teacher Candidacy through the Assistant Dean's Office in the School of Education & Human Development.
5. Completion of a C or better in all MED & TAL courses
6. 2.5 minimum GPA in TAL and music courses.
7. Completion of pre-internship field experiences with above-average evaluations.

Advanced Writing and Communication Skills

Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All Music Education students will successfully complete:

1. MCY 341 Music of the Medieval, Renaissance, and Baroque Periods, which will include substantial evaluated and revised writing components.
2. MED 471 & MED 473 Internship in Music Education (Elementary & Secondary) or MED 475 Internship in Music Education, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MED 542 Teaching General Music, one required course in their major which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

¹ Two semesters of Marching Band (MIP 170) required for all brass, percussion, & woodwind principals.

B.M. in Music Therapy with Minor in Psychology

Introduction

The music therapy program provides students with the opportunity to develop comprehensive musicianship as well as clinical knowledge and skills within a rich musical, scholarly and communicative environment. Music therapy majors must demonstrate musical proficiency, either vocally or instrumentally, and must acquire musical competency on guitar, piano, voice and percussion.

Graduates of this program are prepared for careers as professional music therapists in a variety of health care and educational settings. Furthermore, graduates are eligible to take the Board Certification Exam in music therapy, leading to the credential, Music Therapist Board Certified (MT-BC). The music therapy curriculum is approved by the American Music Therapy Association, and is based on the clinical and research paradigm known as Neurologic Music Therapy.

To remain in the Music Therapy program, students must earn a minimum 2.5 GPA each semester. Additionally, music therapy core courses must be completed with a grade of C or higher. All internship applications must include a written letter of recommendation from a music therapy faculty member.

Educational Objectives

The music therapy program is designed to address three primary objectives:

- **Comprehensive musicianship:** through intensive music study and performance experiences, students will articulate knowledge of music structure and style, produce aesthetically pleasing musical performances, and modify music for specific contexts.
- **Knowledge of human behavior:** by studying both theory and scientific evidence, students will develop an in-depth understanding of the systems of the human body, the intricacies of human behavior, as well as developmental norms and deviations in each domain of functioning.
- **Knowledge of Music Therapy:** students will engage in rigorous exploration of the theories and scientific evidence that support the use of music in a therapeutic context. Following the neurologic music therapy approach, all techniques learned in this program are based on scientific evidence regarding music perception and behavior. Furthermore, students have ample opportunity to establish and refine their therapeutic skills through five semesters of clinical practica in addition to a six-month, full-time clinical internship. Internship applications must include a written letter of recommendation from music therapy faculty member.

The Music Therapy Equivalency Program

The equivalency program is designed for the individual who has already completed a bachelor's degree in a related discipline, including the following courses:

Music Theory I, II, III and IV; Music History I and II; Conducting, Arranging, Applied Lessons (6 semesters), Performing Ensembles (8 semesters), Piano Competency (4 semesters of either lessons or group piano) and Introduction to Psychology.

Beyond these courses, the program consists of 50 credit hours that can be completed in two years, followed by a six-month clinical internship. All internship applications must include a written letter of recommendation from a music therapy faculty member. Please contact the Music Therapy Program Director for a listing of the 50 credit hours.

If any of the prerequisite courses have not yet been completed, they can be taken at the University of Miami. Taking these additional courses, however, may lengthen the amount of time required to complete the equivalency program. In certain situations, alternate courses from other universities can substitute for the required courses. Depending on the nature of the course, this decision will be made by the undergraduate dean, in consultation with the Music Therapy Program Director.

In order to determine exactly how many credits are required to complete the equivalency program, the student should obtain official transcripts for their previous degree and meet with the music therapy program director. Following completion of the course and internship, students are then eligible to sit for the music therapy board certification exam and can become professional members of the American Music Therapy Association (AMTA). For students wishing to pursue graduate studies in music therapy, the equivalency program can be combined with the master's degree in music therapy.

¹ EMC and MED courses require a grade of "C" or higher. Lessons require a grade of "B-" or higher.

² Students enrolling in MED 560 Music Therapy Internship II are considered full-time. Health insurance is mandatory but can be waived depending on visa status. International students must apply for CPT (Curricula Practical Training). This course confers full-time status for undergraduate students and fulfills a degree requirement for the Bachelor of Music Therapy degree program.

Advanced Writing and Communication Skills

Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All Music Therapy students will successfully complete:

1. MCY 141 Musical Trends and Traditions, which will include substantial evaluated and revised writing components.
2. MED 363 Senior Practicum, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MED 551 Music Therapy Research Methods, which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

Music Media and Industry (MMI)

Department code: MMI.

The Department of Music Media and Industry offers degree programs in the following areas:

- B.M. in Music Business Entertainment Industries with a Business, Communications, or Entertainment-Related Minor.
- B.M. in Musicianship, Artistry Development, and Entrepreneurship with a Minor in Music Business and Entertainment Industries.
- B.M. in Professional Studies
- B.S. in Music Engineering Technology with a Minor in Computer or Electrical Engineering
- B.M. in Media Writing and Production

Majors

- B.M. in Music Business Entertainment Industries with a Business, Communications, or Entertainment-Related Minor (p. 810)
- B.M. in Musicianship, Artistry Development, and Entrepreneurship with a Minor in Music Business and Entertainment Industries (p. 817)
- B.M. in Professional Studies (p. 822)
- B.S. in Music Engineering Technology with a Minor in Computer or Electrical Engineering (p. 826)
- B.M. in Media Writing and Production (p. 841)

Minors

- Creative American Music Minor (p. 839)
- Music Business and Entertainment Industries Minor (p. 840)

B.M. in Music Business Entertainment Industries

Introduction

The Bachelor of Music in Music Business and Entertainment Industries is a professional degree program designed to prepare qualified musicians for careers in the business management, financial, legal, and artistic areas of the music industry. Music, business, and music business courses are

combined in an interdisciplinary curriculum, which includes a minor in Marketing, Business Law, Management, Finance, Business Technology, Public Relations, or other approved business-related area. For curriculum requirements see Minors for Non-Business Students. (p. 372)

Students must maintain a minimum GPA of 2.70 to remain in the MBEI Program.

Please see below for additional goals and degree requirements.

Educational Objectives

- Students will have a conceptual understanding of the structures and inter-relationships of the music and entertainment industries.
- Students will acquire knowledge and understanding of the vocabulary and terminology associated with the music and entertainment industries.
- Students will be able to comprehend and apply basic music publishing procedures including copyright administration, mechanical licensing and royalties distribution.
- Students will know how to promote and sell a music industry product.
- Students will have an understanding of the performing artist as a major economic factor in the marketplace.
- Students will develop a set of skills applicable to the music industry including: financial and project management, create and enact marketing and promotional plans, the ability to write basic agreements and licenses, and copyright management and administration.

Advanced Writing and Communication Skills

Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All music students will successfully complete:

1. MCY 141 Musical Trends and Traditions, which will include substantial evaluated and revised writing components.
2. MMI 537 Recorded Music Operations, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.

3. ENG 230 Advanced Business Communications, COS 333 Business Communication, or ENG 331 Legal Writing which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

B.M. in Musicianship, Artistry Development, and Entrepreneurship

The MADE major allows the freedom and flexibility for students to focus on their preferred areas of emphasis, with outcomes that lead toward a viable career of their own choosing.

Educational Objectives

Upon graduation, students will have:

- a highly competitive skill set in musicianship, artistry, and entrepreneurship, including performing, writing, arranging/orchestration, recording, musical direction, marketing and promotion, copyright management and administration, as well as the ability to write basic agreements and licenses;
- a diverse and applied understanding of the music industry;
- the ability to create and execute a sound business plan, as well as a portfolio/EPK that best showcases their brand identity.
- a minor in Music Business and Entertainment Industry.

B.M. in Professional Studies

The Bachelor of Music in Professional Studies will allow students to work closely with an advisor to develop individual goals and design a personalized program of study. While most music degree programs are highly prescriptive, the MPRO will allow students to tailor the curriculum to match their diverse personal and professional goals, as well as adjust to the rapidly changing music industry.

Students will select approved electives with the assistance of a guidance committee consisting of their assigned Faculty Advisor(s), Senior Academic Advisor, and the Associate Dean for Undergraduate Studies.

B.S. in Music Engineering Technology

Introduction

The mission of the Music Engineering Technology program is to:

1. Provide the highest quality education in the field of music engineering.
2. Promote advancements in the fidelity and creativity of music recording, production and reproduction.
3. Promote advancements in the invention, design and implementation of audio hardware and software.

The goals of the Music Engineering Technology program are to:

1. Further enhance the program's national and international stature.
2. Obtain teaching infrastructure and resources needed to provide contemporary education in the field of music engineering technology.
3. Ensure that curricular offerings are current and able to educate students in new and future theory and practice.
4. To help graduates find professional career positions.

Educational Objectives

- Understanding the theoretical basis of sound recording, processing and reproduction.
- Understanding the practice techniques used in sound recording, processing and reproduction.
- Designing and implementing original audio hardware and/or software.
- Understanding the principles of computer science (Bachelor of Music) or electrical engineering (Bachelor of Science).

The Music Engineering Technology curriculum is designed for musicians interested in pursuing a career in music recording, audio hardware and software design, and related professions in the audio, audio-video, multimedia, and internet industries. The program is interdisciplinary in nature; it includes courses in music, music engineering, computer science, electrical engineering, and mathematics. This program includes a minor in Electrical Engineering or a double major in Computer Science. Freshman students are expected to enroll in calculus, which carries a prerequisite of Trigonometry and Analytical Geometry. Prospective students are expected to have a strong background in music performance and in mathematics.

or ECE 413	Software Design and Verification	
Total credits for courses in the major = 62		
Total Credit Hours		130

¹ EMC core courses require a grade of "C" or higher. Lessons require a grade of "B- or higher.

² MMI 460 Recital Recording and Sound Reinforcement must be taken a minimum of 3 times to satisfy the Advanced MUE elective requirement.

³ Must complete calculus by end of sophomore year.

* A minimum 2.7 GPA is required to remain in the Music Engineering Technology program.

** A minimum 2.0 GPA is required in all Engineering courses taken.

² MMI 460 Recital Recording and Sound Reinforcement must be taken a minimum of 3 times to satisfy the Advanced MUE elective requirement.

³ Must complete calculus by end of sophomore year.

* A minimum 2.7 GPA is required to remain in the Music Engineering Technology program.

** A minimum 2.0 GPA is required in all Engineering courses taken.

Advanced Writing and Communication Skills

Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All music students will successfully complete:

1. MCY 141 Musical Trends and Traditions, which will include substantial evaluated and revised writing components.
MMI 410 Music Engineering Capstone Project, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
MMI 401 Audio Electronics, which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

Minor in Creative American Music

(Audition Required, Music majors only)

The Bruce Hornsby Creative American Music Program

The Bruce Hornsby Creative American Music Program is designed to develop the creative skills of talented performing songwriters by immersing them in the diverse traditions that form the foundation of modern American songwriting. This rigorous approach will require students to become intimate,

both in understanding and practice, with the vast and varied legacy that is American music. The CAM Program is open to all Frost School of Music students by audition. Those who successfully complete the program will earn a minor in Creative American Music. A minor in Creative American Music requires 17 credit hours.

The Contemporary Performance Principal

The Contemporary Performance Principal accommodates talented songwriters, singers, and instrumentalists who are not classical or jazz musicians. Contemporary instruments include Guitar (Electric and Acoustic), Voice, Electric Bass, Keyboard, Media (Alternate Controllers/Electronic Producers), Strings (Fiddle, Electric Violin, etc.) and Percussion (incl. Drums). Songwriters will also apply to the Creative American Music Program. The Contemporary Performance Principal is available to students in the following majors: Music Business and Entertainment Industries, Music Engineering Technology, Media Writing and Production, Music Education, Music Theory/Composition, Music Therapy, and the Bachelor of Arts in Music. Pre-screening and audition are required.

Music Theory and Composition (MTC)

Dept. Code: MTC

The Department of Music Theory-Composition

- Music Theory-Composition (MTC)

Majors in Music Theory-Composition

- B.M. in Music Theory and Composition (p. 847)

Minor in Music Theory-Composition

- Music Composition (p. 851)

B.M. in Media Writing and Production

The Commercial Music & Production degree program is designed to prepare undergraduate students for the many issues facing today's commercial music writers and producers. In this specialized program, successful students complete diverse compositional assignments, develop technical and practical skills in the recording studio, and acquire an understanding of the music industry. Prospective students should furnish evidence of outstanding compositional ability as well as basic sequencing and music notation skills.

Advanced Writing and Communication Skills

Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All Media Writing and Production students will successfully complete:

1. MCY 141 Musical Trends and Traditions, which will include substantial evaluated and revised writing components.
2. MTC 402 Composition VIII, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MTC 311 Analysis and Experience, which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

- ³ MSJ/MTC Approved elective will be substituted with MCY 221.

B.M. in Music Theory and Composition

Introduction

The Bachelor of Music in Composition is designed to:

1. Provide students with a learning environment conducive to the pursuit, fostering, development, and exchange of ideas and information, particularly as it pertains to music composition and performance.
2. To provide student access to varied composition communities.
3. To continue to build upon the Frost School of Music's reputation as an innovative, forward-thinking, and first-rate center for advanced study.
4. To maintain the highest educational, professional, and ethical standards.

Goals of the program are:

1. To provide students with training to be fluent in basic compositional skills.
2. To help students understand various directions that are available to composers in the 21st century.
3. To help students perform and realize their music.

The curriculum in Composition is designed for those students intending to pursue a career as a composer and/or to pursue graduate degrees in Composition. Prospective students are expected to furnish evidence of compositional ability.

Educational Objectives

- Students develop basic compositional skills of varying lengths and genres.
- Students compose works utilizing various compositional techniques and styles.
- Students compose works for varied instrumentation and/or media.

Advanced Writing and Communication Skills

Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All Music Theory and Composition students will successfully complete:

1. MCY 341 Music of the Medieval, Renaissance, and Baroque Periods, which will include substantial evaluated and revised writing components.
2. MTC 402 Composition VIII, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MTC 311 Analysis and Experience which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

Studio Music and Jazz (MSJI) & (MSJV)

Dept. Code: MSJ

The Department of Studio Music and Jazz includes two programs, instrumental and vocal.

Introduction

The mission of the Studio Music and Jazz Performance Program is to:

- Prepare jazz instrumentalists to enter the music profession or graduate school.
- Identify, recruit, and retain high quality students who seek to pursue studio/jazz performance as a career.
- Foster faculty creativity and performance which serves as a role model for students.
- Develop, and revise courses in jazz improvisation, jazz arranging/composition and provide on and off campus performance opportunities.
- Produce in our on campus facility, recordings for the Down Beat Student Music Awards, compact disks, radio and Internet broadcast.
- Provide a platform of learning that includes performance, composition/arranging, technology, conducting, scholarship and production.

Educational Objectives

- Students will develop musical performance skills necessary to make them competitive in the jazz world.
- Students will develop performance skills in a variety of large and small ensembles that allow a student to participate in the professional jazz world.
- Students will develop the skills necessary to play in a chamber setting emphasizing spontaneous interaction and improvisation.
- Students will develop the skills necessary to play in large jazz ensembles emphasizing the development of ensemble skills necessary in a reading situation.
- Students will perform a senior recital of sixty-minute duration that demonstrates their capabilities in the jazz idiom.
- Students will develop the skills necessary to arrange and compose in a variety of styles appropriate to the jazz and contemporary music field.

Majors in Studio Music and Jazz

- B.M. in Studio Music and Jazz Instrumental (p. 852)
- B.M. in Studio Music and Jazz Voice (p. 857)

Minor in Studio Music and Jazz

- Studio Music and Jazz Instrumental (Music Majors Only) (p. 860)

Certificates

- Jazz Performance (p. 860)

B.M. in Studio Music and Jazz Instrumental

Dept. Code: MSJ

The instrumental curriculum in Studio Music and Jazz is designed for interested and qualified students who desire to continue to develop to the highest degree their background and skills in the performance of studio music and jazz. Admission to this major pre-supposes musical training in jazz on the principal instrument.

Advanced Writing and Communication Skills

Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All Studio Jazz Instrumental students will successfully complete:

1. MCY 141 Musical Trends and Traditions, which will include substantial evaluated and revised writing components.
2. MSJ XXX Private Lesson Level 3 Senior Recital, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MSJ 213 Analysis & Evolution of Jazz Styles II, which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

B.M. in Studio Music and Jazz Voice

Dept Code: MSJ

The vocal curriculum in Studio Music and Jazz is designed for interested and qualified vocalists who desire to continue to develop to the highest degree their backgrounds and skills in the performance of studio music (recording), jazz, and contemporary pop music. Admission to this major pre-supposes music training in jazz.

Advanced Writing and Communication Skills

Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All Studio Jazz Vocal students will successfully complete:

1. MCY 141 Musical Trends and Traditions, which will include substantial evaluated and revised writing components.
2. MSJ VO3 Private Lesson Senior Recital, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MSJ 213 Analysis & Evolution of Jazz Styles II, which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

Certificate in Jazz Performance

Audition Required-Music Majors Only

Performance Certificates may be awarded to music majors, in non-performance degrees: MED, MTY, MTC, MWP, MBEI, MUE, and MUS, who meet the achievement level and standards of a music performance major on a single instrument as offered by the following degree programs: MIP, MVP, MKP, MSJI, and MSJV. Any student wishing to declare a Performance Certificate must audition on an instrument or voice and be approved by the appropriate department. In addition to the Experiential Music Curriculum Core Courses, the following requirements must be met in one of the following tracks: MIP, MVP, MKP, or MSJ. The Music Performance Certificate requires approval by designated departmental faculty. The appropriate performance level must be achieved as determined by the designated departmental faculty or the certificate will not have been earned, even if all courses have been successfully completed. The Music Performance Certificate will be awarded upon successful completion of all coursework and final approval of the designated departmental faculty.

* Students who will enroll in a required internship (i.e. student teaching) in their 8th semester may petition the department to perform the senior recital and satisfy the Principal Instrument Lesson & Studio Class degree requirements in their 7th semester.

Minor in Dance

<https://dance.frost.miami.edu/>

***There is no undergraduate degree for dance.**

The dance minor is open to all university students with the approval of their advisor. Students intending to minor in dance are required to write a statement (150-300 words) explaining their motivation to minor in dance or submit a resume of their dance experience or a video of themselves in dance performance or class for consideration. Send your statement, video or resume to Carol Kaminsky at c.kaminsky@miami.edu. All dance minors must maintain a grade point average of 3.0 in dance courses. There is no undergraduate major in dance.

Nursing and Health Studies

<http://www.miami.edu/sonhs>

The School of Nursing and Health Studies (SONHS) is committed to academic excellence, the advancement of healthcare, and service to society. Opportunities are available for students to study and earn course credit in a variety of local and international settings.

Mission

The mission of the SONHS is to educate students and support faculty committed to excellence in nursing and health science. Through research, education and practice, the school will create and disseminate health knowledge and prepare culturally competent leaders to provide safe service to our community, the nation and the world.

Baccalaureate Degrees

The SONHS offers three baccalaureate degrees:

1. **Bachelor of Science in Health Science (BSHS)**
2. **Bachelor of Science in Nursing (BSN)**
3. **Bachelor of Science in Public Health (BSPH)**

Student Responsibilities

Students in the SONHS are responsible for fulfilling their degree requirements. Students are also responsible for complying with all provisions outlined in the Academic Bulletin and the Student Handbook.

Academic Bulletin and Student Handbook

In addition to the material listed in the Academic Bulletin, all SONHS students are held to the policies, procedures, and requirements listed in the most current Student Handbook (<http://www.sonhs.miami.edu/academics/student-handbooks>) for their respective degree program. Please note the material included in the Student Handbook is subject to change throughout the academic year and may not be reflected in the Academic Bulletin.

The Student Handbook contains the most current information. Consult an academic advisor in the Office of Student Services (OSS) (<http://oss.sonhs.miami.edu>) for questions related to academic requirements and opportunities.

Accommodations Policy for Students with Disabilities

The SONHS adheres to standards of the Americans with Disabilities Act. Any student needing special accommodations should seek assistance through the Office of Disability Services (ODS) (<http://umarc.miami.edu/arc/ODS.html>), which is the primary on-campus resource responsible for the coordination of services for students with disabilities. Students must follow ODS' policies, procedures, and timelines to request assistance. Please note ODS has strict deadlines to apply for accommodations; only students who are officially registered with ODS may be granted accommodations.

Financial Assistance

Students interested in obtaining financial assistance in the form of student loans, grants, etc. should contact the Office of Financial Assistance (<http://www.miami.edu/admission/index.php/ofas>).

The SONHS also offers limited merit-based and need-based scholarships to continuing students. The types of scholarships available and the qualifications for them vary by semester. Continuing students who wish to be considered for the SONHS scholarships must apply for such scholarships through the SONHS General Scholarship Application. Calls for applications are e-mailed to continuing students once each semester to prompt students to apply who wish to be considered for a scholarship for the next term. Additional information on the SONHS scholarships as well as health science-, nursing-, and public health-related outside scholarships can be found on the SONHS Scholarships website (<http://www.sonhs.miami.edu/admissions-and-financial-aid/financial-aid-and-community-scholarships>).

Facilities

The SONHS is located on the Coral Gables Campus. The four-story, Jerusalem-stone and stucco M. Christine Schwartz Center for Nursing and Health Studies opened in Fall 2006. The building features classrooms and clinical practice labs, conference rooms, a computer lab, and a simulation academy, all equipped with the latest technology. The spacious 53,000 square foot facility supports the work of more than 40 nurse-scientists and clinical educators, as well as approximately 1,100 undergraduate and graduate students enrolled in the SONHS' health science, nursing, and public health programs.

In Fall 2017, the SONHS opened the new, state-of-the-art, 41,000 square foot, 5 story Simulation Hospital (http://www.miami.edu/sonhs/index.php/simulation_hospital). The Simulation Hospital is a one-of-a-kind facility, as it is one of the first education-dedicated simulation facilities located on a college campus. This new facility uses the latest simulation technology to provide SONHS students with the highest-quality healthcare education

through a variety of simulated clinical environments. It also provides opportunities for public health-related simulation experiences and creates ample opportunities for inter-professional education (IPE).

Library resources for SONHS students are available at the Otto G. Richter Library (<http://library.miami.edu>) on the Coral Gables Campus and the Louis Calder Memorial Library (<http://calder.med.miami.edu>) on the Medical Campus.

Clinical experiences are offered in a variety of hospitals and health-related agencies in the community, including the University of Miami Hospital, Jackson Health System, Sylvester Comprehensive Cancer Center, Nicklaus Children's Hospital, and approximately 170 other community partners.

The Foote Fellows Honors Program (<http://admissions.miami.edu/undergraduate/academics/programs-of-distinction/foote-fellows>) at the University of Miami (UM) recognizes the most educationally accomplished incoming students. Throughout high school, Foote Fellows distinguished themselves both in and out of the classroom as self-motivated, independent-thinking individuals dedicated to the pursuit of knowledge. This program was built to reflect these ideals and to embody the educational vision of former University of Miami President, Edward T. Foote, who retired in 2000 after serving the University for twenty years.

Program Benefits and Opportunities

Foote Fellows in the School of Nursing and Health Studies (SONHS) are exempt from the Areas of Proficiency (e.g., English and mathematics), Areas of Knowledge (i.e., cognates), and Advanced Writing and Communication requirements. These exemptions provide Foote Fellows with unmatched freedom and flexibility to explore a multitude of educational endeavors within the curricular framework of the SONHS. Many Foote Fellows leverage this opportunity to complete additional majors, minors, and/or cognates, study abroad, participate in research, etc.

SONHS Foote Fellows may be eligible to participate in various global initiatives (<http://www.sonhs.miami.edu/academics/global-programs>), research experiences, civically-engaged or clinically-based courses, and academic lectures. They will be invited to join advanced, interdisciplinary Foote Fellow seminars taught by leading faculty members from across the University (e.g., "Books That Matter"). Furthermore, Foote Fellows receive focused advising by the Foote Fellow program coordinator on post-baccalaureate prestigious awards and fellowships. SONHS Foote Fellows should speak with the academic advisors located in the Office of Student Services (OSS) (<http://oss.sonhs.miami.edu>) to learn more about their academic and extracurricular opportunities.

Admission Criteria

Admission to the SONHS Foote Fellows program is by invitation only. To be considered for this program, health science, nursing, and public health students must have a weighted high school GPA of 4.5 or higher and a SAT score of 1300 or higher (verbal and math) or an ACT score of 30 or higher.

Students must also submit a portfolio consisting of (a) an essay on their desire to contribute to decreasing health disparities, including a description of at least one health disparity and a plan for addressing it, (b) a historical account of their community service, volunteer, and leadership experience, and (c) a discussion of their short-term and long-term goals.

Outcome Criteria

Foote Fellows in the SONHS will maintain an undergraduate GPA of 3.5 or higher. The GPA used to make this determination is the UM-specific GPA or the Combined GPA (i.e., UM-specific and Transfer GPA combined), whichever is lower. Foote Fellows must also create a capstone portfolio that includes examples of (a) how they have addressed a health disparity throughout their program of study and of (b) the community service, volunteer, and leadership experiences they have participated in throughout their time at the University of Miami.

Health Science

Academic Programs

The University of Miami (UM) School of Nursing and Health Studies (SONHS) offers courses leading to the degree of Bachelor of Science in Health Science (BSHS). Baccalaureate education provides the foundation for further education in specialized health professional fields. All students who pursue the BSHS degree graduate with a health science major and one of the following pre-professional tracks:

1. General Track
2. Health Management and Policy Track
3. Pre-Medical Track
4. Pre-Occupational Therapy Track
5. Pre-Pharmacy Track
6. Pre-Physical Therapy Track

Students are encouraged to contact graduate programs directly to ascertain if there are specific course requirements they must complete above and beyond those included in their chosen pre-professional track.

Admission

Admission as a new freshman or transfer student to the BSHS program is handled through the Office of Undergraduate Admission (http://admissions.miami.edu/undergraduate/index.html?utm_source=Mailers&utm_medium=Print&utm_campaign=FromPrint) and is open to applicants who meet the general requirements for admission to the UM.

In accepting students into the BSHS program, the UM does not in any way ensure admittance into professional graduate programs. Admission to professional graduate programs is dependent upon strong undergraduate academic performance and appropriate, well-rounded extracurricular experiences. Admission to these programs is determined independently by the school or program to which the student applies.

Applicants interested in any of the SONHS' baccalaureate programs are encouraged to speak with a representative from the SONHS' Office of Student Services (OSS) (<http://oss.sonhs.miami.edu>) and/or the UM's Office of Undergraduate Admission (http://admissions.miami.edu/undergraduate/index.html?utm_source=Mailers&utm_medium=Print&utm_campaign=FromPrint).

Academic Policies

Grades

Students should refer to the Student Handbook (<http://www.sonhs.miami.edu/academics/student-handbooks>) for more detailed information on the SONHS' policies related to grades, progression, and dismissal.

Undergraduate BSHS students must earn a C- or higher in each course for the major to progress.

When a course must be repeated, progression in the BSHS program may be altered in order for prerequisites to be met. Such alteration may lengthen the time required to complete the BSHS program.

Grade Point Averages (GPAs)

Students should refer to the Student Handbook (<http://www.sonhs.miami.edu/academics/student-handbooks>) for more detailed information on the SONHS' policies related to GPAs, progression, and dismissal.

Requirements to Declare

Current UM students who wish to switch into the BSHS program must possess a minimum 2.8 UM GPA to be considered for admission.

Incoming transfer students who plan to enter the BSHS program must possess a minimum 2.8 transfer GPA to be considered for admission.

Requirements to Continue

BSHS are strongly encouraged not to continue with the BSHS degree if they have less than a 2.5 UM GPA after 15 credits completed in the major.

Requirements to Graduate

Students enrolled in the BSHS program must complete their coursework with a minimum 2.0 UM GPA and a minimum 2.0 major GPA to graduate.

Prerequisites and Corequisites

Students must successfully complete all specified prerequisites with a C or higher before entering a nursing course or with a C- or higher before entering a health science or public health course. Students must also register for all required corequisites at the time of enrollment. If students enroll in a health science, nursing, or public health course without the proper prerequisite or corequisite, they may be dropped from the course at the discretion of the course instructor, OSS, Associate Dean, or Dean. Students should consult an academic advisor in the OSS (<http://oss.sonhs.miami.edu>) to discuss any questions related to course enrollment.

Note: All Health Science majors must take the anatomy and physiology lectures and labs offered through the SONHS (i.e., HCS 212/213 and HCS 215/216) as stated in their plan of study. No exceptions will be made to take other UM anatomy or physiology lectures or labs outside of the SONHS.

Residency Requirements

Undergraduate BSHS students must adhere to the general UM residency rules. At least half of the health science major must be taken in residence at the UM. Exceptions to the residency requirements may only be obtained through an appeal to the Undergraduate Academic Standing and Admissions Committee (UGASAC). Students should speak with an academic advisor in the OSS (<http://oss.sonhs.miami.edu>) for more information on the residency requirements and on the UGASAC appeals process.

Transfer Credit

Students may transfer health science, nursing, or public health courses from other institutions to the UM with approval by the OSS (<http://oss.sonhs.miami.edu>). Detailed course descriptions or syllabi must be presented to the OSS (<http://oss.sonhs.miami.edu>) for transfer equivalency reviews.

Degree Requirements

Listed in this section are the degree requirements for the BSHS program.

The University of Miami's General Education Requirements (GERs) consist of the Areas of Proficiency, Areas of Knowledge, and Advanced Writing and Communication Skills requirements. Through the completion of the GERs, graduates acquire essential intellectual skills and engage a range of academic disciplines. The GERs provide students with the opportunity to study methodologies and achievements in all areas of human inquiry and creative endeavor, and to cultivate abilities essential for the acquisition of knowledge. The GERs also allow students to create an integrative map for their academic careers, providing a context for more focused studies.

There are numerous ways students can create plans of study for the BSHS program. Students should feel empowered to use the information listed in the Academic Bulletin and the Student Handbook (<http://www.sonhs.miami.edu/academics/student-handbooks>) to take charge of their education, pursue their own academic interests, and create their own, unique plans of study. Students should meet with an academic advisor in the OSS (<http://oss.sonhs.miami.edu>) to discuss any questions related to degree requirements and plans of study.

Areas of Proficiency

The Areas of Proficiency requirements ensure students either possess or develop the ability to express themselves effectively, to use mathematics with facility, and to reason cogently.

English Composition

Good writing facilitates clear thinking, and clear thinking is the foundation of effective communication. The expectation is that students become adept at using the English language as an effective communication tool. Effective writing skills are representative of an educated person because they are instruments to advance ideas efficiently and persuasively.

Requirements

Students complete this requirement by completing ENG 105 and ENG 106 (Note: SAT or ACT verbal scores can be used to waive the ENG 105 requirement; credit will not be awarded for the waiver. Students who enter UM with credits for ENG 105 or ENG 106 may take ENG 208 to finish this requirement).

Outcomes

By completing the English Composition requirement, students will be able to:

1. gather information, synthesize data, compare various points of view, and present results in writing
2. develop the ability to read texts critically and to use textual evidence to support a sophisticated written argument
3. consider audience, tone, organization, and standard conventions in relationship to specific rhetorical tasks

Mathematics & Computer Science

In a world increasingly influenced by science and technology, it is important for students to acquire the capacity to use and understand essential mathematical applications. The mathematics requirement helps students learn to use quantitative methods to solve problems by emphasizing the manipulation, interpretation, and application of quantitative data.

Requirements

Students complete this requirement by completing a course in each of the following areas:

1. **Calculus:** MTH 141, MTH 161, or MTH 171
2. **Computer Science:** 1 CSC or BTE course
3. **Statistics:**
 - a. Health Management and Policy Track: MAS 201 or other approved statistics course
 - b. All other tracks: HCS 202 or other approved statistics course

Math placement criteria is established affected by the Department of Mathematics (<http://www.math.miami.edu/undergraduate/aleks-math-placement>). The following items may affect students' math placement at the UM: SAT and ACT scores, ALEKS math placement scores, and AP, IB, dual enrollment, and transfer credits. Students should review the information listed on the Department of Mathematics (<http://www.math.miami.edu/undergraduate/aleks-math-placement>) website and consult with an academic advisor in the OSS (<http://oss.sonhs.miami.edu>) if they have any questions.

Outcomes

By completing the Mathematics requirement, students will be able to:

1. select quantitative tools appropriate for solving problems
2. use quantitative tools appropriate for solving problems
3. interpret quantitative data in an appropriate manner for solving problems

Areas of Knowledge (Cognates)

The Areas of Knowledge requirement is designed to help students understand and appreciate intellectual achievements in major areas of human inquiry and creative endeavor. The courses offered in the Areas of Knowledge provide a broad array of intellectual and cultural exploration. In satisfying these requirements, students examine creative expression in the arts, literature, and philosophy; study human development and behavior; and explore the mathematical, scientific, and technological world.

Students fulfill the Areas of Knowledge requirement by completing a specific "cognate" in three distinct areas: Arts & Humanities, People & Society, and Science, Technology, Engineering, and Mathematics (STEM). Cognates are groups of "at least three related courses for at least 9 credits" focused on a specific topic. Majors and minors can be used to fulfill a cognate in its respective Area of Knowledge. Each cognate used to fulfill one of the Areas of Knowledge must have a different Responsible Academic Unit (RAU). Several cognates may include the same courses; however, one course cannot be used to complete multiple cognates. For more information on cognates, go to the "General Education Requirements" section of the Academic Bulletin or visit <http://www.miami.edu/cognates/>.

Arts & Humanities

Arts & Humanities cognates engage students in the study of the most enduring and influential works of art, imagination, and culture. Through study, creation, and performance, courses in this area enable students to understand the works of artists, musicians, novelists, philosophers, playwrights, poets, historians, and theologians. These courses cultivate the ability to interpret, critically evaluate, and experience the creative products of human culture and expression.

Requirements

Complete one Arts & Humanities cognate.

Outcomes

By completing the Arts & Humanities requirement, students will be able to:

1. critically evaluate and interpret the creative products of humanistic and artistic expression, applying appropriate vocabulary and concepts for their description and analysis
2. understand the creation and performance of art

People & Society

People & Society cognates help students understand and analyze the organization of society and the patterns of social change, in the past and in the contemporary world.

Requirements

Complete one People & Society cognate.

Outcomes

By completing the People & Society requirement, students will be able to:

1. analyze the organization of society
2. analyze patterns of social change

Science, Technology, Engineering, and Mathematics (STEM)

STEM cognates develop students' abilities to think critically about mathematical, scientific, and technological issues by understanding the processes and methods of scientific inquiry involved in experimentation, observation, and quantitative analysis. The STEM cognates nurture literacies that enable students to make informed decisions in an increasingly complex world.

Requirements

Complete one STEM cognate. The health science major may be used to fulfill this cognate area.

Outcomes

By completing the STEM requirement, students will be able to:

1. understand the use of quantitative tools, experimentation, and observation to analyze and solve mathematical, scientific, environmental, and technological problems
2. interpret quantitative data and draw useful conclusions

Major

Refer to the "Major Requirements" section below for information on the courses required for the BSHS program.

Minor

All students must complete a minor from the SONHS' approved minors list. An approved second major from this list waives the minor requirement. See the OSS (<http://oss.sonhs.miami.edu>) for details.

Advanced Writing and Communication Skills

The Advanced Writing and Communication Skills requirement empowers health science students to develop their communication skills, both written and verbal, enabling them to better articulate information relating to health science, nursing, and public health.

Requirements

To fulfill this requirement, students must complete five designated writing-intensive courses. Several health science requirements and/or electives may qualify as writing-intensive.

Health Science Courses that Require Formal Student Writing or Presentation

The following SONHS courses carry writing and presentation components and may count for the BSHS program:

Course	Writing Assignment	Student Presentations
BPH 301	Various papers	Various presentations
BPH 305	Three reflective papers	Final student presentation
BPH 309	Three reflective papers	Final student presentation
BPH 310	Four reflective papers	Final student presentation
BPH 321	Five reflective papers	Student presentations throughout class
BPH 490	Five journal entries, final paper	Final student presentation

Outcomes

By completing the Advanced Writing and Communication Skills requirement, students will be able to:

1. effectively communicate information related to health science in both speech and in writing, using appropriate information sources, presentation formats, and technologies
2. demonstrate the necessary written and verbal communication skills to effectively carry out a career in healthcare

Plan for Assessment

Student Performance on Written Assignments and Presentations

In order to graduate from the BSHS program students must successfully pass two courses in English Composition (i.e., ENG 105 and ENG 106) as well as five writing-intensive courses with a grade greater than or equal to 70%. Grading of student written assignments and oral presentations are based on defined rubrics. These courses may be applied to the BSHS program as outlined in the major requirements. A number of elective courses in the BSHS curriculum also require students to submit significant written assignments and give oral presentations throughout the semester. Throughout the BSHS curriculum, students must demonstrate their ability to write and communicate accurately and with clarity in order to successfully complete their courses.

Graduating Senior Survey (GSS) Responses for Questions Related to Written and Verbal Communication

Based on the results from the GSS, students believe their undergraduate coursework in the BSHS program significantly enhanced their written, oral, and formal presentation skills, which, in turn, allowed them to more effectively interact with various individuals and groups.

Electives

Students must earn a minimum of 120 credits to complete the BSHS degree. Students may need to take varying numbers of elective credits beyond the degree requirements listed above to reach the 120 credit threshold.

Major Requirements

Health science must be a student's first major. There is no additional major offered in health science.

Visit the "TRACKS IN BSHS PROGRAMS" link to learn more about the major requirements for the SONHS' BSHS programs, which are listed under the "OVERVIEW" section for each BSHS program.

Minor Requirements

There is no minor available in health science.

Classes Not Applicable Toward SONHS Degrees

The following courses do not count toward the 120 credits required of the BSHS degree: DAN 101-104, ENG 103, and MTH 099. Based on their ENG or MTH placement scores, students may need to complete ENG 103 or MTH 099 before enrolling in higher-level requirements. Even though the courses listed above cannot count toward graduation, they can count toward the 12 credits required to be considered a full-time student.

Senior Assessments

In line with the SONHS' ongoing accreditation efforts, seniors with a major in the health science, nursing, and public health may be required to participate in general or major-specific senior assessments lasting up to several hours each. Scores on senior assessments will not affect students' GPAs or ability to graduate, but failure to complete required assessments may delay or prevent students' ability to graduate.

Research Experience

Students may participate in research experiences through the SONHS (<http://www.miami.edu/sonhs/index.php/sonhs/research>) or the Office of Undergraduate Research and Community Outreach (http://www.miami.edu/index.php/undergraduate_research_and_community_outreach) during their time at the UM. Students should speak with the academic advisors located in the OSS (<http://oss.sonhs.miami.edu>) to learn more about the research opportunities available to them at the UM.

Required Coursework and Sample Plans of Study

Visit the "TRACKS IN BSHS PROGRAMS" link to learn more about the academic requirements for the SONHS' BSHS programs and to view sample graduation plans, which are listed under the "OVERVIEW" and "PLAN OF STUDY" sections, respectively, for each BSHS program.

Major in Health Science

- BSHS, Health Science Major, General Track (p. 872)
- BSHS, Health Science Major, Health Management and Policy Track (p. 875)
- BSHS, Health Science Major, Pre-Medical Track (p. 879)
- BSHS, Health Science Major, Pre-Occupational Therapy Track (p. 882)
- BSHS, Health Science Major, Pre-Pharmacy Track (p. 886)
- BSHS, Health Science Major, Pre-Physical Therapy Track (p. 889)

BSHS - General Track

Students enrolled in the General Track must complete the coursework listed below to earn the BSHS degree through the School of Nursing and Health Studies (SONHS). Students should meet with an academic advisor in the Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) to discuss any questions related to their degree requirements.

CHM 206	Organic Chemistry Laboratory II
Minor****	12-19
Advanced Writing and Communication Skills*****	0
Electives*****	27-11
Total Credit Hours	120

* The health science major may be used to fulfill this cognate area.

** Students may fulfill this requirement by taking BMB 401 or any BIL, BPH, or HCS course for at least 3 credits at the 200 level or above (except for BPH 202, HCS 202, and NUR 202).

*** CHM 201, CHM 202, CHM 205, CHM 206, and CHM 222 are recommended but not required for this track.

**** Students who complete the Traditional Chemistry or the Chemistry for the Biosciences sequences automatically fulfill the requirements for a minor in chemistry; no additional coursework would be required to complete this requirement.

***** Students must take at least five designated writing-intensive courses to complete this requirement; unless students choose to take additional credits to complete this requirement, it is highly recommended students select courses that are designated as writing-intensive and will double count toward this area and their other requirements.

***** The number of electives students take may vary due to differences in placement scores, transfer credits, course and cognate selections, etc.

This is only a sample. There are numerous ways students can create plans of study for the General Track. Students should feel empowered to use the information listed in the Academic Bulletin and the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks) to take charge of their education, pursue their own academic interests, and create their own, unique plans of study.

The School of Nursing and Health Studies (SONHS) **recommends students create their own plan of study** that accounts for their ENG and MTH placement scores and incorporates their major, minor, and cognate interests. Once students draft their initial plan of study, they are encouraged to meet with an academic advisor in the Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) to review their plan, address any questions or concerns, discuss areas for improvement, and brainstorm ways to integrate research experiences, study abroad opportunities, global initiatives, graduate school requirements, and career preparation experiences.

The sample plan of study listed below is based on the following ENG and MTH placement information and major, minor, and cognate selections:

- **ENG placement:** ENG 105
- **MTH placement:** MTH 107
- **Major(s):** Health Science, General Track
- **Minor(s):** Chemistry
- **Cognates**
 - Art & Humanities: American Literature (RAU = English)
 - People & Society: Abnormal Psychology (RAU = Psychology)
 - Science, Technology, Engineering, and Mathematics (STEM): Health Science major (RAU = Nursing & Health Studies)

HSM 460	Health Care Law and Ethics	3
Major Elective (*)		3
	Credit Hours	12
	Total Credit Hours	123

(W) = Course is designated as writing-intensive

(*) = Students may fulfill this requirement by taking BMB 401 or any BIL, BPH, or HCS course for at least 3 credits at the 200 level or above (except for BPH 202, HCS 202, and NUR 202)

BSHS - Pre-Medical Track

Students enrolled in the Pre-Medical Track must complete the coursework listed below to earn the BSHS degree through the School of Nursing and Health Studies (SONHS). Students should meet with an academic advisor in the Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) to discuss any questions related to their degree requirements.

Minor***		0
Advanced Writing and Communication Skills****		0
Electives*****		25-24
Total Credit Hours		120

* The health science major may be used to fulfill this cognate area.

** Six graded credits of ENG courses (6 credits). Creative writing courses cannot count. ENG 105 and ENG 106 may count if a grade was received.

*** Students who complete the Traditional Chemistry or the Chemistry for the Biosciences sequences automatically fulfill the requirements for a minor in chemistry; no additional coursework would be required to complete this requirement.

**** Students must take at least five designated writing-intensive courses to complete this requirement; unless students choose to take additional credits to complete this requirement, it is highly recommended students select courses that are designated as writing-intensive and will double count toward this area and their other requirements.

***** The number of electives students take may vary due to differences in placement scores, transfer credits, course and cognate selections, etc.

This is only a sample. There are numerous ways students can create plans of study for the Pre-Medical Track. Students should feel empowered to use the information listed in the Academic Bulletin and the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks) to take charge of their education, pursue their own academic interests, and create their own, unique plans of study.

The School of Nursing and Health Studies (SONHS) **recommends students create their own plan of study** that accounts for their ENG and MTH placement scores and incorporates their major, minor, and cognate interests. Once students draft their initial plan of study, they are encouraged to meet with an academic advisor in the Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) to review their plan, address any questions or concerns, discuss areas for improvement, and brainstorm ways to integrate research experiences, study abroad opportunities, global initiatives, graduate school requirements, and career preparation experiences.

The sample plan of study listed below is based on the following ENG and MTH placement information and major, minor, and cognate selections:

- **ENG placement:** ENG 105
- **MTH placement:** MTH 107
- **Major(s):** Health Science, Pre-Medical Track
- **Minor(s):** Chemistry
- **Cognates**
 - Art & Humanities: American Literature (RAU = English)
 - People & Society: Abnormal Psychology (RAU = Psychology)
 - Science, Technology, Engineering, and Mathematics (STEM): Health Science major (RAU = Nursing & Health Studies)

PHY 206 & PHY 208	University Physics II and University Physics II Lab	
PHY 207 & PHY 209	University Physics III and University Physics III Lab	
Choose one chemistry option below:		8-16
Chemistry for Life Sciences:		
CHM 103 & CHM 105	Chemistry for Life Sciences I (Lecture) and Chemistry for Life Sciences I (Laboratory)	
CHM 104 & CHM 106	Chemistry for Life Sciences II (Lecture) and Chemistry for Life Sciences II (Laboratory)	
Traditional Chemistry:****		
CHM 111 & CHM 113	Principles of Chemistry I and Chemistry Laboratory I	
CHM 112 & CHM 114	Principles of Chemistry II and Chemistry Laboratory II	
CHM 201 & CHM 205	Organic Chemistry I (Lecture) and Organic Chemistry Laboratory I	
CHM 202 & CHM 206	Organic Chemistry II (Lecture) and Organic Chemistry Laboratory II	
Chemistry for the Biosciences:****		
CHM 121 & CHM 113	Chemistry for the Biosciences I and Chemistry Laboratory I	
CHM 221 & CHM 114	CHM211 Chemistry for the Biosciences II and Chemistry Laboratory II	
CHM 222 & CHM 205	CHM212 Chemistry for the Biosciences III and Organic Chemistry Laboratory I	

CHM 206	Organic Chemistry Laboratory II	
Minor*****		12-19
Advanced Writing and Communication Skills*****		0
Electives*****		23-7
Total Credit Hours		120

- * The health science major may be used to fulfill this cognate area.
- ** HCS 216 is not required but it is highly recommended.
- *** Students may fulfill this requirement by taking BMB 401 or any BIL, BPH, or HCS course for at least 3 credits at the 200 level or above (except for BPH 202, HCS 202, and NUR 202).
- **** CHM 201, CHM 202, CHM 205, CHM 206, and CHM 222 are recommended but not required for this track.
- ***** Students who complete the Traditional Chemistry or the Chemistry for the Bioscience sequences automatically fulfill the requirements for a minor in chemistry; no additional coursework would be required to complete this requirement.
- ***** Students must take at least five designated writing-intensive courses to complete this requirement; unless students choose to take additional credits to complete this requirement, it is highly recommended students select courses that are designated as writing-intensive and will double count toward this area and their other requirements.
- ***** The number of electives students take may vary due to differences in placement scores, transfer credits, course and cognate selections, etc.

This is only a sample. There are numerous ways students can create plans of study for the Pre-Physical Therapy Track. Students should feel empowered to use the information listed in the Academic Bulletin and the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks) to take charge of their education, pursue their own academic interests, and create their own, unique plans of study.

The School of Nursing and Health Studies (SONHS) **recommends students create their own plan of study** that accounts for their ENG and MTH placement scores and incorporates their major, minor, and cognate interests. Once students draft their initial plan of study, they are encouraged to meet with an academic advisor in the Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) to review their plan, address any questions or concerns, discuss areas for improvement, and brainstorm ways to integrate research experiences, study abroad opportunities, global initiatives, graduate school requirements, and career preparation experiences.

The sample plan of study listed below is based on the following ENG and MTH placement information and major, minor, and cognate selections:

- **ENG placement:** ENG 105
- **MTH placement:** MTH 107
- **Major(s):** Health Science, Pre-Physical Therapy Track
- **Minor(s):** Chemistry
- **Cognates**
 - Art & Humanities: American Literature (RAU = English)
 - People & Society: Foundations of Behavior for Prehealth Professions (RAU = Anthropology)
 - Science, Technology, Engineering, and Mathematics (STEM): Health Science major (RAU = Nursing & Health Studies)

Sample Plan of Study

Course	Title	Credit Hours
Freshman Year		
Fall		
BIL 150 & BIL 151	General Biology and General Biology Laboratory	5
ENG 105	English Composition I	3
MTH 107	Precalculus Mathematics I	3
UMX 100	The University of Miami Experience	0
Elective		3
Elective		3
Credit Hours		17
Spring		
BIL 160 & BIL 161	Evolution and Biodiversity and Evolution and Biodiversity Laboratory	5
ENG 106	English Composition II	3
MTH 108	Precalculus Mathematics II	3

PSY 110	Introduction to Psychology	3
Elective		3
	Credit Hours	17
Sophomore Year		
Fall		
BIL 250	Genetics	3
CHM 121 & CHM 113	Chemistry for the Biosciences I and Chemistry Laboratory I	5
MTH 161	Calculus I	4
PSY 240	Abnormal Psychology	3
	Credit Hours	15
Spring		
BIL 255	Cellular and Molecular Biology	3
CHM 221 & CHM 114	CHM211 Chemistry for the Biosciences II and Chemistry Laboratory II	5
ENG 214	American Literature II (W; counts for Arts & Humanities cognate)	3
HCS 202	Introductory Statistics in Health Care	3
	Credit Hours	14
Junior Year		
Fall		
BPH 306	Principles of Nutrition	3
CHM 222 & CHM 205	CHM212 Chemistry for the Biosciences III and Organic Chemistry Laboratory I	5
ENG 389	The Sixties: Literature, History, and Culture of the 1960s (W; counts for Arts & Humanities cognate)	3
PHY 101 & PHY 106	College Physics I and College Physics Laboratory I	5
	Credit Hours	16
Spring		
APY 202	Principles of Cultural Anthropology (counts for People & Society cognate)	3
CHM 206	Organic Chemistry Laboratory II	1
PHY 102 & PHY 108	College Physics II and College Physics Laboratory II	5
Major Elective (*)		3
Elective		3
	Credit Hours	15
Senior Year		
Fall		
APY 413	Medical Anthropology (counts for People & Society cognate)	3
ENG 260	African-American Literature (W; counts for Arts & Humanities cognate)	3
HCS 212 & HCS 213	Human Anatomy and Human Anatomy Laboratory	4
Elective (W)		3
Elective		3
	Credit Hours	16
Spring		
CSC 115	Social and Ethical Issues in Computing	3
HCS 215 & HCS 216	Principles of Systemic Physiology and Principles of Systemic Physiology Laboratory (**)	4
PSY 250	Cognitive Psychology (counts for People & Society cognate)	3
Elective (W)		3

Elective	3
Credit Hours	16
Total Credit Hours	126

- W Course is designated as writing-intensive
- * Students may fulfill this requirement by taking BMB 401 or any BIL, BPH, or HCS course for at least 3 credits at the 200 level or above (except for BPH 202, HCS 202, and NUR 202.
- ** HCS 216 is not required but it is highly recommended.

Nursing

www.miami.edu/sonhs

Nursing Accreditation

The baccalaureate nursing program in the University of Miami's (UM's) School of Nursing and Health Studies (SONHS) is approved by the Florida Board of Nursing and accredited by the following:

Commission of Collegiate Nursing Education (CCNE)
 One DuPont Circle NW, Suite 530
 Washington, DC 20036
 (202) 887-6791

Academic Programs

Baccalaureate education is the primary foundation for professional nursing and is necessary for graduate study. The SONHS offers three baccalaureate options leading to the Bachelor of Science in Nursing (BSN) degree:

1. **Accelerated BSN:** For students who hold a baccalaureate degree in a field other than nursing and who seek a one year nursing degree
2. **RN-to-BSN:** For students who possess a diploma or Associate's degree in nursing, who have successfully completed the Registered Nurse (RN) licensure exam, and who wish to finish their baccalaureate education within three to five semesters
3. **Traditional BSN:** For students who may not have any previous higher education experience and who seek a traditional four-year nursing degree

Admission

Students who possess a baccalaureate degree from a regionally-accredited institution in a field other than nursing and who wish to pursue a career in nursing may apply to the **Accelerated BSN** program. Applicants must meet specific admission criteria and complete specific clinical prerequisites (<http://acceleratedbsn.sonhs.miami.edu/admissions>) before they may enter the Accelerated BSN program. Applications for the Accelerated BSN program are submitted through NursingCAS (<http://www.nursingcas.org>) and are reviewed by the SONHS.

The **RN-to-BSN** program is designed to provide licensed RNs who have an Associate's degree or a nursing diploma with an opportunity to complete the remaining coursework needed to earn a BSN degree. Students interested in the RN-to-BSN program must meet specific admission criteria (<http://rntobsn.sonhs.miami.edu/admissions>) and must apply through the Office of Undergraduate Admission (http://admissions.miami.edu/undergraduate/index.html?utm_source=Mailers&utm_medium=Print&utm_campaign=FromPrint). All applications are reviewed by the SONHS.

Admission as a new freshman to the **Traditional BSN** program is handled through the Office of Undergraduate Admission (http://admissions.miami.edu/undergraduate/index.html?utm_source=Mailers&utm_medium=Print&utm_campaign=FromPrint) and is open to applicants who meet the general requirements for admission to the UM. Students who wish to transfer into the Traditional BSN program must also meet general UM admission requirements. Additionally, students who wish to transfer directly into the clinical components of the Traditional BSN curriculum (i.e., the third year) must complete specific clinical prerequisites (<http://bsn.sonhs.miami.edu/admissions>) as outlined by the SONHS. These transfer applicants will be considered for direct entry into clinical coursework as space allows. All transfer applications are handled through the Office of Undergraduate Admission (http://admissions.miami.edu/undergraduate/index.html?utm_source=Mailers&utm_medium=Print&utm_campaign=FromPrint) and are reviewed by the SONHS. Only credits taken at regionally-accredited institutions are considered for transfer to the UM.

Applicants interested in any of the SONHS' baccalaureate programs are encouraged to speak with a representative from the SONHS' Office of Student Services (OSS) (<http://oss.sonhs.miami.edu>) and/or the UM's Office of Undergraduate Admission (http://admissions.miami.edu/undergraduate/index.html?utm_source=Mailers&utm_medium=Print&utm_campaign=FromPrint).

Academic Policies

Technical Standards

Nursing education requires that the accumulation of scientific knowledge be accompanied by the simultaneous acquisition of skills and professional attitudes and behaviors. The nursing degrees awarded by the UM SONHS at the completion of the educational process certifies that the individual has

acquired a base of knowledge and skills required for the practice of nursing at the respective undergraduate or graduate level. To this end, all courses in the curriculum must be completed successfully. In order to acquire the knowledge and skills to function in a variety of clinical situations and to render a wide spectrum of patient care, candidates for the undergraduate and graduate degrees in nursing must have abilities and skills in five areas:

1. Observation
2. Communication
3. Motor
4. Conceptual-Integrative
5. Behavioral-Social

Technological compensation can be made for some disabilities in certain of these areas, but a candidate should be able to perform in a reasonably independent manner and exercise independent judgment. Reasonable accommodations will be considered on a case by case basis for individuals who meet eligibility under applicable statutes. Any person expecting to need accommodations should request them prior to beginning the program, as some accommodations may not be considered reasonable and may impact an applicant's ability to complete all components of the program.

Observation

The candidate must be able to observe demonstrations and participate in didactic courses and simulated learning opportunities. A candidate must be able to observe a patient accurately at a distance and close at hand. Observation requires the use of common sense, as well as the functional use of the senses of vision, audition, olfaction, and palpation.

Communication

Candidates must communicate effectively using English in clinical and classroom settings. A candidate must be able to elicit information from patients, describe changes in mood, activity and posture, and perceive nonverbal communications. A candidate must be able to communicate effectively and sensitively with patients. Communication includes not only speech, but reading and writing. The candidate must be able to communicate effectively and efficiently with all members of the health care team in both immediate and recorded modes.

Motor

Candidates should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion and other assessment techniques. A candidate should be able to perform nursing skills requiring the use of gross and fine motor skills (e.g. IV insertion, venous blood draw, urinary catheter insertion). A candidate should be able to execute motor movements reasonably required to provide nursing care and emergency response to patients. Examples of emergency responses reasonably required of nurses are cardiopulmonary resuscitation, medication administration, and application of pressure to stop bleeding. Candidates must perform actions which require the use of both gross and fine muscular movements, equilibrium, and functional use of the senses of touch and vision. Candidates should also be able to assist and/or participate in various lifting activities.

Conceptual-Integrative

These abilities include measurement, calculation, reasoning, analysis, synthesis, and retention of complex information. Critical thinking requires all of these intellectual abilities in order to provide optimal nursing care. In addition, the candidate should be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures.

Behavioral-Social

Candidates must possess the emotional health required for the full use of their intellectual abilities, the exercise of good judgment, the prompt completion of all responsibilities attendant to the care of patients, and the development of mature, sensitive and effective relationships with patients. Candidates must be able to tolerate physically taxing workloads and to function effectively under stress in the classroom and clinical area. They must be able to adapt to changing environments, display flexibility and learn to function in the face of uncertainties inherent in the clinical environment. Compassion, integrity, concern for others, interpersonal skills, interest and motivation are all personal qualities that are assessed during the admissions and educational process.

Clinical Clearance

Before students can enter the clinical components of the undergraduate nursing curriculum, they must successfully complete a drug test and a background check. Students must have a background report without any infractions, regardless of how they were resolved or adjudicated. Accordingly, if a student's background report contains any infractions, regardless of how they were resolved or adjudicated, he/she may not be able to successfully complete the background check and he/she will be withdrawn from the nursing program.

Students must also provide current immunizations as outlined by the SONHS and obtain a Basic Life Support (BLS) for Healthcare Providers certification from the American Heart Association prior to entry into clinical coursework. The BLS certification must include content on Automated External Defibrillators (AEDs).

Refer to the Student Handbook (<http://www.sonhs.miami.edu/academics/student-handbooks>) or speak with a representative in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) for more information.

Grades

Students should refer to the Student Handbook (<http://www.sonhs.miami.edu/academics/student-handbooks>) for more detailed information on the SONHS' policies related to grades, progression, and dismissal.

Undergraduate nursing students must earn a C or higher in each clinical prerequisite and each nursing course to progress.

A C- or below is considered a failure in a clinical prerequisite or a nursing course. Students are allowed to repeat only one failed clinical prerequisite and one failed nursing course. A student who fails only one clinical prerequisite and/or one nursing course, retakes the failed clinical prerequisite and/or failed nursing course, and receives a passing grade on the second attempt at a failed clinical prerequisite and/or a failed nursing course may progress through the program but the original failure is still counted as a failed course. Failure of two clinical prerequisites or two nursing courses with a grade of C- or below, or failure of the same clinical prerequisite or the same nursing course twice with a grade of C- or below, constitutes failure of two clinical prerequisites or two nursing courses, respectively, and the student will be dismissed from the nursing program.

When a nursing course must be repeated, progression in the nursing program will be altered in order for prerequisites to be met. Such alteration will lengthen the time required to complete the BSN program.

Students who repeat a clinical nursing course must repeat both the theoretical and clinical components of the course. Students are required to fulfill the course requirements in effect at the time of enrollment. No special courses will be created for students who repeat a course.

Grade Point Averages (GPAs)

Students should refer to the Student Handbook (<http://www.sonhs.miami.edu/academics/student-handbooks>) for more detailed information on the SONHS' policies related to GPAs, progression, and dismissal.

Requirements to Declare

Current UM students who wish to switch into the **Traditional BSN** program must possess a minimum 3.0 UM GPA and a minimum 2.75 clinical prerequisite GPA to be considered.

Incoming transfer students who plan to enter the **Traditional BSN** degree must possess a minimum 3.5 transfer GPA and a minimum 3.3 clinical prerequisite GPA to be considered for admission.

Requirements to Continue

Students who are enrolled in the **Traditional BSN** program and who are not yet enrolled in their clinical coursework (i.e., third or fourth year) are strongly encouraged not to continue with the nursing major if they have less than a 2.5 UM GPA and/or less than a 2.5 clinical prerequisite GPA after 15 credits in the clinical prerequisites and/or second year nursing courses.

Requirements to Progress into Clinical Coursework

Students who enter the **Accelerated BSN** program enter directly into clinical coursework. These students must possess a minimum 3.0 transfer GPA and a minimum 3.0 clinical prerequisite GPA to be considered for admission.

Current UM students enrolled in the **Traditional BSN** program must possess a minimum 3.0 UM GPA and a minimum 2.75 clinical prerequisite GPA to progress into their clinical coursework (i.e., third year). Students must also have completed a minimum of 60-63 total credits to be eligible to progress (Note: Only 57 credits are slated in the prescribed Plan of Study for students' clinical years. If students only have 60-62 completed credits at the time of progression, they will be required to complete additional elective credits during their last two years to reach the 120 credit requirement for the degree.).

Incoming transfer students who apply to transfer directly into the clinical components of the **Traditional BSN** degree (i.e., the third year) must possess a minimum 3.5 transfer GPA and a minimum 3.3 clinical prerequisite GPA to be considered for admission.

Requirements to Graduate

Students enrolled in the **Accelerated BSN**, **RN-to-BSN**, and **Traditional BSN** programs must complete their coursework with a minimum 2.0 UM GPA and a minimum 2.0 major GPA to graduate.

Prerequisites and Corequisites

Students must successfully complete all specified prerequisites with a C or higher before entering a nursing course or with a C- or higher before entering a health science or public health course. Students must also register for all required corequisites at the time of enrollment. If students enroll in a health science, nursing, or public health course without the proper prerequisite or corequisite, they may be dropped from the course at the discretion of the course instructor, OSS, Associate Dean, or Dean. Students should consult an academic advisor in the OSS (<http://oss.sonhs.miami.edu>) to discuss any questions related to course enrollment.

Residency Requirements

Undergraduate nursing students must adhere to the general UM residency rules. Once a student enrolls at the UM, all remaining clinical prerequisites must be completed at the UM unless special permission is obtained through an appeal to the Undergraduate Academic Standing and Admissions

Committee (UGASAC). Additionally, all courses in the nursing major must be completed at the UM. Students should speak with an academic advisor in the OSS (<http://oss.sonhs.miami.edu>) for more information on the residency requirements and on the UGASAC appeals process.

Transfer Credit

Students may transfer health science, nursing, or public health courses from other institutions to the UM with approval by the OSS (<http://oss.sonhs.miami.edu>). Detailed course descriptions or syllabi must be presented to the OSS (<http://oss.sonhs.miami.edu>) for transfer equivalency reviews.

Degree Requirements

Listed in this section are the degree requirements for the **Traditional BSN** program. The **Accelerated BSN** and **RN-to-BSN** requirements are listed under the "OVERVIEW" section of the "TRACKS IN BSN PROGRAMS" link for each of the respective programs.

The University of Miami's General Education Requirements (GERs) consist of the Areas of Proficiency, Areas of Knowledge, and Advanced Writing and Communication Skills requirements. Through the completion of the GERs, graduates acquire essential intellectual skills and engage a range of academic disciplines. The GERs provide students with the opportunity to study methodologies and achievements in all areas of human inquiry and creative endeavor, and to cultivate abilities essential for the acquisition of knowledge. The GERs also allow students to create an integrative map for their academic careers, providing a context for more focused studies.

All Areas of Proficiency, Areas of Knowledge, clinical prerequisites, and electives, except for the nursing major elective, must be completed prior to the clinical components of the **Traditional BSN** program (i.e., the third year). Students should meet with an academic advisor in the OSS (<http://oss.sonhs.miami.edu>) to discuss any questions related to degree, clinical prerequisite, or major requirements.

Areas of Proficiency

The Areas of Proficiency requirements ensure students either possess or develop the ability to express themselves effectively, to use mathematics with facility, and to reason cogently.

English Composition

Good writing facilitates clear thinking, and clear thinking is the foundation of effective communication. The expectation is that students become adept at using the English language as an effective communication tool. Effective writing skills are representative of an educated person because they are instruments to advance ideas efficiently and persuasively.

Requirements

Students complete this requirement by completing ENG 105 and ENG 106 (Note: SAT or ACT verbal scores can be used to waive the ENG 105 requirement; credit will not be awarded for the waiver. Students who enter UM with credits for ENG 105 or ENG 106 may take ENG 208 to finish this requirement).

Outcomes

By completing the English Composition requirement, students will be able to:

1. gather information, synthesize data, compare various points of view, and present results in writing
2. develop the ability to read texts critically and to use textual evidence to support a sophisticated written argument
3. consider audience, tone, organization, and standard conventions in relationship to specific rhetorical tasks

Mathematics

In a world increasingly influenced by science and technology, it is important for students to acquire the capacity to use and understand essential mathematical applications. The mathematics requirement helps students learn to use quantitative methods to solve problems by emphasizing the manipulation, interpretation, and application of quantitative data.

Requirements

Students complete this requirement by completing NUR 202.

Math placement criteria is established affected by the Department of Mathematics (<http://www.math.miami.edu/undergraduate/aleks-math-placement>). The following items may affect students' math placement at the UM: SAT and ACT scores, ALEKS math placement scores, and AP, IB, dual enrollment, and transfer credits. Students should review the information listed on the Department of Mathematics (<http://www.math.miami.edu/undergraduate/aleks-math-placement>) website and consult with an academic advisor in the OSS (<http://oss.sonhs.miami.edu>) if they have any questions.

Outcomes

By completing the Mathematics requirement, students will be able to:

1. select quantitative tools appropriate for solving problems
2. use quantitative tools appropriate for solving problems
3. interpret quantitative data in an appropriate manner for solving problems

Areas of Knowledge (Cognates)

The Areas of Knowledge requirement is designed to help students understand and appreciate intellectual achievements in major areas of human inquiry and creative endeavor. The courses offered in the Areas of Knowledge provide a broad array of intellectual and cultural exploration. In satisfying these requirements, students examine creative expression in the arts, literature, and philosophy; study human development and behavior; and explore the mathematical, scientific, and technological world.

Students fulfill the Areas of Knowledge requirement by completing a specific "cognate" in three distinct areas: Arts & Humanities, People & Society, and Science, Technology, Engineering, and Mathematics (STEM). Cognates are groups of "at least three related courses for at least 9 credits" focused on a specific topic. Majors and minors can be used to fulfill a cognate in its respective Area of Knowledge. Each cognate used to fulfill one of the Areas of Knowledge must have a different Responsible Academic Unit (RAU). Several cognates may include the same courses; however, one course cannot be used to complete multiple cognates. For more information on cognates, go to the "General Education Requirements" section of the Academic Bulletin or visit <http://www.miami.edu/cognates/>.

Arts & Humanities

Arts & Humanities cognates engage students in the study of the most enduring and influential works of art, imagination, and culture. Through study, creation, and performance, courses in this area enable students to understand the works of artists, musicians, novelists, philosophers, playwrights, poets, historians, and theologians. These courses cultivate the ability to interpret, critically evaluate, and experience the creative products of human culture and expression.

Requirements

Complete one Arts & Humanities cognate.

Outcomes

By completing the Arts & Humanities requirement, students will be able to:

1. critically evaluate and interpret the creative products of humanistic and artistic expression, applying appropriate vocabulary and concepts for their description and analysis
2. understand the creation and performance of art

People & Society

People & Society cognates help students understand and analyze the organization of society and the patterns of social change, in the past and in the contemporary world.

Requirements

Complete one People & Society cognate.

Outcomes

By completing the People & Society requirement, students will be able to:

1. analyze the organization of society
2. analyze patterns of social change

Science, Technology, Engineering, and Mathematics (STEM)

STEM cognates develop students' abilities to think critically about mathematical, scientific, and technological issues by understanding the processes and methods of scientific inquiry involved in experimentation, observation, and quantitative analysis. The STEM cognates nurture literacies that enable students to make informed decisions in an increasingly complex world.

Requirements

Complete one STEM cognate. The nursing major may be used to fulfill this cognate area.

Outcomes

By completing the STEM requirement, students will be able to:

1. understand the use of quantitative tools, experimentation, and observation to analyze and solve mathematical, scientific, environmental, and technological problems
2. interpret quantitative data and draw useful conclusions

Clinical Prerequisites

Refer to the "Clinical Prerequisite Requirements" section below for information on the clinical prerequisites required for the **Traditional BSN** program.

Major

Refer to the "Major Requirements" section below for information on the courses required for the **Traditional BSN** nursing major.

Advanced Writing and Communication Skills

The Advanced Writing and Communication Skills requirement empowers nursing students to develop their communication skills, both written and verbal, enabling them to better articulate information relating to health science, nursing, and public health. Several designated writing-intensive courses are built into the nursing major to satisfy this requirement.

Required Communication domains

Students must communicate effectively using English in clinical and classroom settings. A student must be able to elicit information from patients, describe changes in mood, activity, and posture, and perceive nonverbal communications. A student must be able to communicate effectively and sensitively with patients. Communication includes not only speech, but reading and writing. Students must be able to communicate effectively and efficiently with all members of the healthcare team in both immediate and recorded modes. Throughout the curriculum students are expected to achieve skills in the following communication domains:

Therapeutic Communication

Therapeutic communication between the nurse and patient is a cornerstone of effective nursing care. This communication style is goal-oriented and focused on learning and promoting growth.

Example content: principles of therapeutic use of self; therapeutic communication techniques; health education/teaching; reflective journals

Technical Communication

Technical communication encompasses the specific methods used by the nursing profession to communicate information necessary for nursing practice.

Example content: use of clinical information systems (e.g., electronic health record, physician order entry); application of standardized health care terminology; use of data and data systems

Inter- and Intra-Professional Communication

Effective communication among all members of the healthcare team is essential for delivering high quality, safe patient care.

Example content: teamwork/cooperative learning; scopes of practice; conflict resolution; group dynamics and evaluation

Scholarly Written Communication

Scholarly writing is a formal means of communication in which the writer communicates synthesized knowledge about a topic while also demonstrating original thought and unique perspectives.

Example content: scholarly papers; research critiques; application of APA publication style

Scholarly Verbal Communication

Scholarly verbal communication is a formal way of speaking with the intended audience to provide and/or elicit information in a systematic manner. Primary methods of scholarly verbal communication involve verbal presentations/lectures and formal data gathering processes such as interviews.

Example content: scholarly presentations; key informant interviews

Minimal writing proficiency standards

Writing proficiency is evaluated throughout the BSN plan of study. Three primary categories of writing are required:

1. scholarly papers (NUR 400/NUR 401, NUR 440, and NUR 453)
2. patient care documentation (NUR 304, NUR 308, NUR 318, NUR 320, NUR 411, NUR 448, and NUR 453)
3. reflective journals (NUR 306 and NUR 453)

Each writing component is evaluated as part of the grading rubric for the associated course. Feedback and revisions are required.

Plan for assessment

Content to meet the required communication domains and minimal writing proficiency standards is provided across the curriculum. The table below outlines the specific communication domains covered in each course as well as the assessment/outcome criteria used to measure them. In addition to demonstrating skills across the five required communication domains, students must complete ENG 105 and ENG 106 or their equivalents to provide the foundation for the development of more advanced writing and communication skills.

Course	Communication Domain	Assessment/Outcome (exemplars)
ENG 105 and ENG 106 or their equivalents	Serves as a prerequisite to other skills	Serves as a prerequisite to other skills
HCS 212 and HCS 213	Technical Communication	Examinations
HSC 215 and HSC 216	Technical Communication	Examinations
NUR 306	Technical Communication	Dietary journals
	Therapeutic Communication	Dietary Analysis System
		Reflective Paper
NUR 202	Technical Communication	Examinations

NUR 300	Inter/Intra Professional Communication	Simulation/Scholarly Papers
NUR 317	Therapeutic Communication	Reflective Journals
	Scholarly Verbal Communication	Scholarly Presentation

	Scholarly Written Communication	Reflective Journals
		Scholarly Paper Simulation
Elective (BIL, BPH, HCS, HST, or NUR course at the 200 level or above)	Varies	Varies

Electives

Students must earn a minimum of 120 credits to complete the **Traditional BSN** degree. Students may need to take varying numbers of elective credits beyond the degree requirements listed above to reach the 120 credit threshold.

Clinical Prerequisite Requirements

Accelerated BSN

All clinical prerequisites must be completed prior to matriculation into the **Accelerated BSN** program and within the last 10 years. The clinical prerequisites include:

Code	Title	Credit Hours
CHM 103 & CHM 105	Chemistry for Life Sciences I (Lecture) and Chemistry for Life Sciences I (Laboratory)	4
HCS 212 & HCS 213	Human Anatomy and Human Anatomy Laboratory	4
HCS 215	Principles of Systemic Physiology	3
MIC 320	Introduction to Microbes and the Immune System for Nurses	3
NUR 202	Introductory Statistics in Health Care	3
NUR 306	Principles of Nutrition	3
NUR 317	Theories in Growth and Development	3
PSY 110	Introduction to Psychology	3

RN-to-BSN

Students must meet specific admission criteria (<http://rntobsn.sonhs.miami.edu/admissions>) to be considered for the **RN-to-BSN** program. If admitted, any required coursework must be completed prior to matriculation.

Traditional BSN

All clinical prerequisites must be completed prior to the clinical components of the **Traditional BSN** program (i.e., the third year) and within the last 10 years. The clinical requirements include:

Code	Title	Credit Hours
BIL 150 & BIL 151	General Biology and General Biology Laboratory	5
CHM**		4-5
HCS 212 & HCS 213	Human Anatomy and Human Anatomy Laboratory	4
HCS 215	Principles of Systemic Physiology	3
MIC 320	Introduction to Microbes and the Immune System for Nurses	3
MTH**		3
NUR 202	Introductory Statistics in Health Care	3
NUR 306	Principles of Nutrition	3
NUR 317	Theories in Growth and Development	3
PSY 110	Introduction to Psychology	3

(*) = Chemistry is satisfied by CHM 103/CHM 105, CHM 111/CHM 113, or CHM 121/CHM 113.

(**) = MTH 101, MTH 107, or mathematics placement higher than MTH 107. Note: MTH 107 is a pre- or co-requisite for BIL 150.

Students can transfer equivalent clinical prerequisites to the UM as long as they comply with the general UM and the SONHS residency rules (see "Residency Requirements" section above). Students must provide the documentation listed in the "Transfer Credit" section above to the OSS (<http://oss.sonhs.miami.edu>) for any health science, nursing, or public health transfer equivalency requests. For transfer equivalency reviews of any other clinical prerequisites, students must present any necessary documentation to the respective academic unit for their consideration.

Major Requirements

Nursing must be a student's first major. There is no additional major offered in nursing.

Visit the "TRACKS IN BSN PROGRAMS" link to learn more about the major requirements for the SONHS' BSN programs, which are listed under the "OVERVIEW" section for each BSN program.

Minor Requirements

BSN students are not required to complete a minor.

There is no minor available in nursing.

Classes Not Applicable Toward SONHS Degrees

The following courses do not count toward the 120 credits required of the BSN degree: DAN 101-104, ENG 103, and MTH 099. Based on their ENG or MTH placement scores, students may need to complete ENG 103 or MTH 099 before enrolling in higher-level requirements. Even though the courses listed above cannot count toward graduation, they can count toward the 12 credits required to be considered a full-time student.

Pre-immersion Course

Prior to enrollment in clinical nursing courses, students must complete a mandatory online pre-immersion course. The pre-immersion course is listed in students' first term of clinical enrollment but it does not affect students' GPAs. Failure to complete the pre-immersion course may delay entry into the clinical nursing courses. Information about the pre-immersion course will be provided to eligible students by the OSS.

Senior Assessments

In line with the SONHS' ongoing accreditation efforts, seniors with a major in the health science, nursing, and public health may be required to participate in general or major-specific senior assessments lasting up to several hours each. Scores on senior assessments will not affect students' GPAs or ability to graduate, but failure to complete required assessments may delay or prevent students' ability to graduate.

HESI Exams

Mandatory HESI exams are required throughout the undergraduate nursing programs. For further details, refer to the Student Handbook (<http://www.sonhs.miami.edu/academics/student-handbooks>).

RN Licensure Exam (NCLEX-RN)

Students who successfully complete the **Accelerated BSN** or **Traditional BSN** program at the SONHS are eligible to sit for the RN licensure exam referred to as the NCLEX-RN. For additional eligibility requirements, refer to the appropriate state board of nursing website.

Research Experience

Students may participate in research experiences through the SONHS (<http://www.miami.edu/sonhs/index.php/sonhs/research>) or the Office of Undergraduate Research and Community Outreach (http://www.miami.edu/index.php/undergraduate_research_and_community_outreach) during their time at the UM. Students should speak with the academic advisors located in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) to learn more about the research opportunities available to them at the UM.

Required Coursework and Sample Plans of Study

Visit the "TRACKS IN BSN PROGRAMS" link to learn more about the academic requirements for the SONHS' BSN programs and to view sample graduation plans, which are listed under the "OVERVIEW" and "PLAN OF STUDY" sections, respectively, for each BSN program.

Major in Nursing

- Accelerated BSN (p. 901)
- RN-to-BSN (p. 903)
- Traditional BSN (p. 905)

Accelerated BSN

Students enrolled in the Accelerated BSN program must complete the following coursework as specified in the Plan of Study to earn the BSN degree through the School of Nursing and Health Studies (SONHS):

Curriculum Requirements

Code	Title	Credit Hours
NUR 300	Seminar in Inter-Professional Health Care	1
NUR 304	Adult Health I: Fundamentals of Nursing Practice (C)	6

NUR 307	Pharmacology	3
NUR 308	Adult Health II (C)	7
NUR 314	Health Assessment and Promotion (L)	3
NUR 315	Pathophysiology	3
NUR 318	Women's Health Nursing (C)	4
NUR 320	Child and Adolescent Health Nursing (C)	4
NUR 401	Evidence-Based Nursing Practice	3
NUR 411	Adult Health III (C)	5
NUR 412	Epidemiology for Population-Based Care	2
NUR 417	Pre-Immersion Course for Accelerated Option Students (*)	0
NUR 430	Leadership in Nursing	3
NUR 441	Public Health Nursing (C)	2
NUR 448	Psychiatric Mental Health Nursing (C)	4
NUR 453	Role Transition (C)	5
Total Credit Hours		55

(C) = Course includes a clinical component and meets the UM civic engagement criteria

(L) = Course includes a lab component

(*) = Course must be completed online via Blackboard after the point of admission and prior to full matriculation into the Accelerated BSN program; students officially register for the course in their first semester but the course does not affect the students' GPA

The Accelerated BSN is a lock-step program. All students enrolled in the Accelerated BSN program at the School of Nursing and Health Studies (SONHS) must follow the Plan of Study as outlined below.

Plan of Study

Course	Title	Credit Hours
Year One		
First Semester		
NUR 304	Adult Health I: Fundamentals of Nursing Practice (C)	6
NUR 307	Pharmacology	3
NUR 314	Health Assessment and Promotion (L)	3
NUR 315	Pathophysiology	3
NUR 417	Pre-Immersion Course for Accelerated Option Students (*)	0
Credit Hours		15
Second Semester		
NUR 300	Seminar in Inter-Professional Health Care	1
NUR 308	Adult Health II (C)	7
NUR 318	Women's Health Nursing (C)	4
NUR 320	Child and Adolescent Health Nursing (C)	4
NUR 401	Evidence-Based Nursing Practice	3
NUR 412	Epidemiology for Population-Based Care	2
Credit Hours		21
Third Semester		
NUR 411	Adult Health III (C)	5
NUR 430	Leadership in Nursing	3
NUR 441	Public Health Nursing (C)	2
NUR 448	Psychiatric Mental Health Nursing (C)	4
NUR 453	Role Transition (C)	5
Credit Hours		19
Total Credit Hours		55

(C) = Course includes a clinical component and meets the UM civic engagement criteria

(L) = Course includes a lab component

(*) = Course must be completed online via Blackboard after the point of admission and prior to full matriculation into the Accelerated BSN program; students officially register for the course in their first semester but the course does not affect the students' GPA

RN to BSN

Students enrolled in the RN-to-BSN program must complete the following coursework as specified in the Plan of Study to earn the BSN degree through the School of Nursing and Health Studies (SONHS):

Curriculum Requirements

Code	Title	Credit Hours
NUR 305	Issues in Health Disparities	3
NUR 311	Theories and Concepts of Nursing	2
NUR 314	Health Assessment and Promotion (L)	3
NUR 350	Pathophysiology/Pharmacology for RN-to-BSN	4
NUR 400	Theories, Research and Evidence-Based Practice	3
NUR 405	Professionalism and Career Pathways	3
NUR 406	Current Issues in Healthcare (Current Issues in Healthcare)	3
NUR 426	Leadership and Management in Nursing (C)	5
NUR 440	Population Focused Nursing (C)	4
Total Credit Hours		30

L Course includes a lab component

C Course includes a clinical component and meets the UM civic engagement criteria

Upon successful completion of the 30 core credits listed above, 30 additional credits are automatically awarded to RN-to-BSN students simply for possessing an RN license, bringing their overall credit total up to the 120 credits required for the BSN degree. These credits are added in the form of the following Advanced Placement courses at no additional tuition cost:

Code	Title	Credit Hours
NUR 390	Advanced Placement Practice I for RN-to-BSN Students	10
NUR 403	Advanced Placement Practice II for RN-to-BSN Students	10
NUR 414	Advanced Placement Practice III for RN-to-BSN Students	10
Total Credit Hours		30

The RN-to-BSN is a lock-step program. Students are admitted into a 3 semester or 5 semester track and are required to follow the appropriate Plan of Study outlined below.

Plan of Study - 3 semester track

Course	Title	Credit Hours
Junior Year		
First Semester		
NUR 311	Theories and Concepts of Nursing	2
NUR 314	Health Assessment and Promotion (L)	3
NUR 350	Pathophysiology/Pharmacology for RN-to-BSN	4
Credit Hours		9
Second Semester		
NUR 400	Theories, Research and Evidence-Based Practice	3
NUR 405	Professionalism and Career Pathways	3
NUR 440	Population Focused Nursing (C)	4
Credit Hours		10
Third Semester		
NUR 305	Issues in Health Disparities	3
NUR 406	Current Issues in Healthcare	3

NUR 426	Leadership and Management in Nursing (C)	5
	Credit Hours	11
Senior Year		
Advanced Placement		
NUR 390	Advanced Placement Practice I for RN-to-BSN Students (*)	10
NUR 403	Advanced Placement Practice II for RN-to-BSN Students (*)	10
NUR 414	Advanced Placement Practice III for RN-to-BSN Students (*)	10
	Credit Hours	30
	Total Credit Hours	60

C Course includes a clinical component and meets the UM civic engagement criteria.

L Course includes a lab component.

* Upon successful completion of the 30 junior year credits listed above, 30 additional credits are automatically awarded to RN-to-BSN students simply for possessing an RN license, bringing their overall credit total up to the 120 credits required for the BSN degree. These credits are added in the form of Advanced Placement courses at no additional tuition cost.

Plan of Study - 5 semester track

Course	Title	Credit Hours
Junior Year

NUR 403	Advanced Placement Practice II for RN-to-BSN Students (*)	10
NUR 414	Advanced Placement Practice III for RN-to-BSN Students (*)	10
	Credit Hours	30
	Total Credit Hours	60

C Course includes a clinical component and meets the UM civic engagement criteria.

L Course includes a lab component.

* Upon successful completion of the 30 junior year credits listed above, 30 additional credits are automatically awarded to RN-to-BSN students simply for possessing an RN license, bringing their overall credit total up to the 120 credits required for the BSN degree. These credits are added in the form of Advanced Placement courses at no additional tuition cost.

Traditional BSN

Students enrolled in the Traditional BSN program must complete the coursework listed under curriculum to earn the BSN degree through the School of Nursing and Health Studies (SONHS). All Areas of Proficiency, Areas of Knowledge, clinical prerequisites, and electives, except for the nursing major elective, must be completed prior to the clinical components of the Traditional BSN program (i.e., the third year). Students should meet with an academic advisor in the Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) to discuss any questions related to degree, clinical prerequisite, or major requirements.

Curriculum Requirements

Code	Title	Credit Hours
Areas of Proficiency

Elective*****		3
Advanced Writing and Communication Skills*****		

Electives*****	0
Total Credit Hours	121-122

- C Course includes a clinical component and meets the UM civic engagement criteria.
- L Course includes a lab component.
- * The nursing major may be used to fulfill this cognate area.
- ** Chemistry is satisfied by CHM 103/CHM 105, CHM 111/CHM 113, or CHM 121/CHM 113.
- *** MTH 101, MTH 107, or mathematics placement higher than MTH 107. Note: MTH 107 is a pre- or co-requisite for BIL 150.
- **** These NUR courses follow a lock-step sequence; these NUR courses must be taken in the semesters specified in the Plan of Study.
- ***** Course must be completed online via Blackboard prior to full matriculation into the clinical components of the Traditional BSN program (i.e., the third year); students officially register for the course in their first semester of their third year but the course does not affect the students' GPA.
- ***** This elective must be completed by taking at least 3 credits in a BIL, BPH, HCS, HST, or NUR course at or above the 200 level (except for BPH 202, HCS 202, and NUR 202).
- ***** These courses are factored into the Traditional BSN nursing coursework; students do not need to take extra courses to complete this requirement.
- ***** The number of electives students take may vary due to differences in placement scores, transfer credits, course and cognate selections, etc.

This is only a sample. There are numerous ways students can create plans of study for the Traditional BSN program. Students should feel empowered to use the information listed in the Academic Bulletin and the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks) to take charge of their education, pursue their own academic interests, and create their own, unique plans of study.

The School of Nursing and Health Studies (SONHS) **recommends students create their own plan of study** that accounts for their ENG and MTH placement scores and incorporates their major, minor, and cognate interests. Once students draft their initial plan of study, they are encouraged to meet with an academic advisor in the Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) to review their plan, address any questions or concerns, discuss areas for improvement, and brainstorm ways to integrate research experiences, study abroad opportunities, global initiatives, graduate school requirements, and career preparation experiences.

The sample plan of study listed below is based on the following ENG and MTH placement information and major, minor, and cognate selections:

- **ENG placement:** ENG 105
- **MTH placement:** MTH 101
- **Major(s):** Nursing
- **Minor(s):** None
- **Cognates**
 - Art & Humanities: World of Music (RAU = Music)
 - People & Society: The Science of Human Development (RAU = Psychology)
 - Science, Technology, Engineering, and Mathematics (STEM): Nursing major (RAU = Nursing & Health Studies)

All Areas of Proficiency, Areas of Knowledge, clinical prerequisites, and electives, except for the nursing major elective, must be completed prior to the clinical components of the Traditional BSN program (i.e., the third year).

Sample Plan of Study

- C Course includes a clinical component and meets the UM civic engagement criteria.
- L Course includes a lab component.
- * These NUR courses follow a lock-step sequence; these NUR courses must be taken in the semesters specified in this Plan of Study.
- ** Course must be completed online via Blackboard prior to full matriculation into the clinical components of the Traditional BSN program (i.e., the third year); students officially register for the course in their first semester of their third year but the course does not affect the students' GPA.
- *** This elective must be completed by taking at least 3 credits in a BIL, BPH, HCS, HST, or NUR course at or above the 200 level (except for BPH 202, HCS 202, and NUR 202).

Public Health

Academic Programs

The University of Miami (UM) School of Nursing and Health Studies (SONHS) offers courses leading to the degree of Bachelor of Science in Public Health (BSPH). Baccalaureate education provides the foundation for further education in public health and specialized health professional fields. The program is currently undergoing the accreditation process with the Council on Education for Public Health.

Admission

Admission as a new freshman or transfer student to the BSPH program is handled through the Office of Undergraduate Admission (http://admissions.miami.edu/undergraduate/index.html?utm_source=Mailers&utm_medium=Print&utm_campaign=FromPrint) and is open to applicants who meet the general requirements for admission to the UM.

Applicants interested in any of the SONHS' baccalaureate programs are encouraged to speak with a representative from the SONHS' Office of Student Services (OSS) (<http://oss.sonhs.miami.edu>) and/or the UM's Office of Undergraduate Admission (http://admissions.miami.edu/undergraduate/index.html?utm_source=Mailers&utm_medium=Print&utm_campaign=FromPrint).

Academic Policies

Grades

Students should refer to the Student Handbook (<http://www.sonhs.miami.edu/academics/student-handbooks>) for more detailed information on the SONHS' policies related to grades, progression, and dismissal.

Undergraduate BSPH students must earn a C- or higher in each course for the major to progress.

When a course must be repeated, progression in the BSPH program may be altered in order for prerequisites to be met. Such alteration may lengthen the time required to complete the BSPH program.

Grade Point Averages (GPAs)

Students should refer to the Student Handbook (<http://www.sonhs.miami.edu/academics/student-handbooks>) for more detailed information on the SONHS' policies related to GPAs, progression, and dismissal.

Requirements to Declare

Current UM students who wish to switch into the BSPH program must possess a minimum 2.8 UM GPA to be considered.

Incoming transfer students who plan to enter the BSPH program must possess a minimum 2.8 transfer GPA to be considered for admission.

Requirements to Continue

BSPH are strongly encouraged not to continue with the BSPH degree if they have less than a 2.5 UM GPA after 15 credits completed in the major.

Requirements to Graduate

Students enrolled in the BSPH program must complete their coursework with a minimum 2.0 UM GPA and a minimum 2.0 major GPA to graduate.

Prerequisites and Corequisites

Students must successfully complete all specified prerequisites with a C or higher before entering a nursing course or with a C- or higher before entering a health science or public health course. Students must also register for all required corequisites at the time of enrollment. If students enroll in a health science, nursing, or public health course without the proper prerequisite or corequisite, they may be dropped from the course at the discretion of the course instructor, OSS, Associate Dean, or Dean. Students should consult an academic advisor in the OSS (<http://oss.sonhs.miami.edu>) to discuss any questions related to course enrollment.

Residency Requirements

Undergraduate BSPH students must adhere to the general UM residency rules. At least half of the public health major and at least half of the public health minor must be taken in residence at the UM. Exceptions to the residency requirements may only be obtained through an appeal to the Undergraduate Academic Standing and Admissions Committee (UGASAC). Students should speak with an academic advisor in the OSS (<http://oss.sonhs.miami.edu>) for more information on the residency requirements and on the UGASAC appeals process.

Transfer Credit

Students may transfer health science, nursing, or public health courses from other institutions to the UM with approval by the OSS (<http://oss.sonhs.miami.edu>). Detailed course descriptions or syllabi must be presented to the OSS (<http://oss.sonhs.miami.edu>) for transfer equivalency reviews.

Degree Requirements

Listed in this section are the degree requirements for the BSPH program.

The University of Miami's General Education Requirements (GERs) consist of the Areas of Proficiency, Areas of Knowledge, and Advanced Writing and Communication Skills requirements. Through the completion of the GERs, graduates acquire essential intellectual skills and engage a range of academic disciplines. The GERs provide students with the opportunity to study methodologies and achievements in all areas of human inquiry and creative endeavor, and to cultivate abilities essential for the acquisition of knowledge. The GERs also allow students to create an integrative map for their academic careers, providing a context for more focused studies.

There are numerous ways students can create plans of study for the BSPH program. Students should feel empowered to use the information listed in the Academic Bulletin and the Student Handbook (<http://www.sonhs.miami.edu/academics/student-handbooks>) to take charge of their education, pursue their own academic interests, and create their own, unique plans of study. Students should meet with an academic advisor in the OSS (<http://oss.sonhs.miami.edu>) to discuss any questions related to degree requirements and plans of study.

Areas of Proficiency

The Areas of Proficiency requirements ensure students either possess or develop the ability to express themselves effectively, to use mathematics with facility, and to reason cogently.

English Composition

Good writing facilitates clear thinking, and clear thinking is the foundation of effective communication. The expectation is that students become adept at using the English language as an effective communication tool. Effective writing skills are representative of an educated person because they are instruments to advance ideas efficiently and persuasively.

Requirements

Students complete this requirement by completing ENG 105 and ENG 106 (Note: SAT or ACT verbal scores can be used to waive the ENG 105 requirement; credit will not be awarded for the waiver. Students who enter UM with credits for ENG 105 or ENG 106 may take ENG 208 to finish this requirement).

Outcomes

By completing the English Composition requirement, students will be able to:

1. gather information, synthesize data, compare various points of view, and present results in writing
2. develop the ability to read texts critically and to use textual evidence to support a sophisticated written argument
3. consider audience, tone, organization, and standard conventions in relationship to specific rhetorical tasks

Mathematics

In a world increasingly influenced by science and technology, it is important for students to acquire the capacity to use and understand essential mathematical applications. The mathematics requirement helps students learn to use quantitative methods to solve problems by emphasizing the manipulation, interpretation, and application of quantitative data.

Requirements

Students complete this requirement by completing a course in each of the following areas:

1. **Mathematics:** MTH 107 or higher
2. **Statistics:** BPH 202 or other approved statistics course

Math placement criteria is established affected by the Department of Mathematics (<http://www.math.miami.edu/undergraduate/aleks-math-placement>). The following items may affect students' math placement at the UM: SAT and ACT scores, ALEKS math placement scores, and AP, IB, dual enrollment, and transfer credits. Students should review the information listed on the Department of Mathematics (<http://www.math.miami.edu/undergraduate/aleks-math-placement>) website and consult with an academic advisor in the OSS (<http://oss.sonhs.miami.edu>) if they have any questions.

Outcomes

By completing the Mathematics requirement, students will be able to:

1. select quantitative tools appropriate for solving problems
2. use quantitative tools appropriate for solving problems
3. interpret quantitative data in an appropriate manner for solving problems

Social Science Requirements

Students complete this requirement by completing PSY 110 and an additional approved social science course for a total of 6 credits.

Modern Language Requirements

Students complete this requirement by completing one 3 credit Modern Language course at or above the 200 level.

Natural Science Requirements

Students complete this requirement by completing BIL 150 and BIL 151, as well as CHM 103 and CHM 105 or CHM 111 and CHM 113 or CHM 121 and CHM 113 for a total of 9-10 credits.

Areas of Knowledge (Cognates)

The Areas of Knowledge requirement is designed to help students understand and appreciate intellectual achievements in major areas of human inquiry and creative endeavor. The courses offered in the Areas of Knowledge provide a broad array of intellectual and cultural exploration. In satisfying these requirements, students examine creative expression in the arts, literature, and philosophy; study human development and behavior; and explore the mathematical, scientific, and technological world.

Students fulfill the Areas of Knowledge requirement by completing a specific "cognate" in three distinct areas: Arts & Humanities, People & Society, and Science, Technology, Engineering, and Mathematics (STEM). Cognates are groups of "at least three related courses for at least 9 credits" focused on a specific topic. Majors and minors can be used to fulfill a cognate in its respective Area of Knowledge. Each cognate used to fulfill one of the Areas of Knowledge must have a different Responsible Academic Unit (RAU). Several cognates may include the same courses; however, one course cannot be used to complete multiple cognates. For more information on cognates, go to the "General Education Requirements" section of the Academic Bulletin or visit <http://www.miami.edu/cognates/>.

Arts & Humanities

Arts & Humanities cognates engage students in the study of the most enduring and influential works of art, imagination, and culture. Through study, creation, and performance, courses in this area enable students to understand the works of artists, musicians, novelists, philosophers, playwrights, poets, historians, and theologians. These courses cultivate the ability to interpret, critically evaluate, and experience the creative products of human culture and expression.

Requirements

Complete one Arts & Humanities cognate.

Outcomes

By completing the Arts & Humanities requirement, students will be able to:

1. critically evaluate and interpret the creative products of humanistic and artistic expression, applying appropriate vocabulary and concepts for their description and analysis
2. understand the creation and performance of art

People & Society

People & Society cognates help students understand and analyze the organization of society and the patterns of social change, in the past and in the contemporary world.

Requirements

Complete one People & Society cognate. The public health major may be used to fulfill this cognate area.

Outcomes

By completing the People & Society requirement, students will be able to:

1. analyze the organization of society
2. analyze patterns of social change

Science, Technology, Engineering, and Mathematics (STEM)

STEM cognates develop students' abilities to think critically about mathematical, scientific, and technological issues by understanding the processes and methods of scientific inquiry involved in experimentation, observation, and quantitative analysis. The STEM cognates nurture literacies that enable students to make informed decisions in an increasingly complex world.

Requirements

Complete one STEM cognate.

Outcomes

By completing the STEM requirement, students will be able to:

1. understand the use of quantitative tools, experimentation, and observation to analyze and solve mathematical, scientific, environmental, and technological problems
2. interpret quantitative data and draw useful conclusions

Major

Refer to the "Major Requirements" section below for information on the courses required for the BSPH program.

Minor

BSPH students are not required to complete a minor.

Advanced Writing and Communication Skills

The Advanced Writing and Communication Skills requirement empowers public health students to develop their communication skills, both written and verbal, enabling them to better articulate information relating to health science, nursing, and public health.

Requirements

To fulfill this requirement, students must complete five designated writing-intensive courses. Several public health requirements and/or electives may qualify as writing-intensive.

Public health Courses that Require Formal Student Writing or Presentation

The following courses carry writing and presentation components and may count for the BSPH program:

Course	Writing Assignment	Student Presentations
BPH 301	Various papers	Various presentations
BPH 305	Three reflective papers	Final student presentation
BPH 309	Three reflective papers	Final student presentation
BPH 310	Four reflective papers	Final student presentation
BPH 321	Five reflective papers	Student presentations throughout class
BPH 490	Five journal entries, final paper	Final student presentation

Outcomes

By completing the Advanced Writing and Communication Skills requirement, students will be able to:

1. effectively communicate information related to public health in both speech and in writing, using appropriate information sources, presentation formats, and technologies
2. demonstrate the necessary written and verbal communication skills to effectively carry out a career in healthcare

Plan for assessment

Student Performance on Written Assignments and Presentations

In order to graduate from the BSPH program students must successfully pass two courses in English Composition (i.e., ENG 105 and ENG 106) as well as five writing-intensive courses with a grade greater than or equal to 70%. The majority of public health courses include written assignments and student presentations as part of the course grade. Grading of student written assignments and oral presentations are based on defined rubrics. These courses may be applied to the BSPH program as outlined in the major requirements.

Graduating Senior Survey (GSS) Responses for Questions Related to Written and Verbal Communication

Based on the results from the GSS, students believe their undergraduate coursework in the BSPH program significantly enhanced their written, oral, and formal presentation skills, which, in turn, allowed them to more effectively interact with various individuals and groups.

Electives

Students must earn a minimum of 120 credits to complete the BSPH degree. Students may need to take varying numbers of elective credits beyond the degree requirements listed above to reach the 120 credit threshold.

Major Requirements

Public health can be a primary major or an additional major.

Coursework in the BSPH program is based on recommendations made by the Association for Prevention Teaching and Research (2008) for undergraduate course work in public health. Students are required to complete 33 credit hours of public health coursework, which includes 27 credit hours of core required courses and 6 credit hours of approved public health electives.

Visit the "MAJORS" link to learn more about the major requirements for the SONHS' BSPH program, which are listed under the "OVERVIEW" section for the public health major.

Second Major Requirements

A second major in public health is available to all UM students. Students who pursue a second major in public health must complete the the following courses:

Code	Title	Credit Hours
BPH 206	Introduction to Public Health	3
BPH 208	Introductory Epidemiology	3
BPH 305	Issues in Health Disparities	3
BPH 309	Health and Environment	3
BPH 310	Global Health	3
BPH 321	Health Promotion and Disease Prevention	3
BPH 322	Introduction to Health Policy	3
BPH 352	Biological Principles of Public Health	3
BPH 465	Public Health Statistics and Data Management	3
BPH 490	Field Practicum in Community Health	3
Elective (*)		3
Total Credit Hours		33

(*) = Students may choose an elective from the following courses: APY 205, BPH 301, BPH 303, BPH 306, BPH 317, BPH 319, BPH 355, BPH 402, BPH 419, BPH 461, BPH 487, BTE 450, BSL 460, COS 324, COS 325, COS 426, COS 427, COS 472, GEG 231, GEG 241, GEG 334, GEG 336, GEG 341, GEG 343, GEG 345, GEG 346, GEG 348, GEG 366, GEG 412, INS 570, INS 571, INS 572, INS 573, INS 599, KIN 155, MGT 270, MKT 388, and SOC 480

Minor Requirements

The SONHS offers a minor in public health. The School also collaborated with the School of Communication to offer a minor health communication.

Visit the "MINORS" link to learn more about the minor requirements for the public health and health communication minors.

Classes Not Applicable Toward SONHS Degrees

The following courses do not count toward the 120 credits required of the BSPH degree: DAN 101-104, ENG 103, and MTH 099. Based on their ENG or MTH placement scores, students may need to complete ENG 103 or MTH 099 before enrolling in higher-level requirements. Even though the courses listed above cannot count toward graduation, they can count toward the 12 credits required to be considered a full-time student.

Senior Assessments

In line with the SONHS' ongoing accreditation efforts, seniors with a major in the health science, nursing, and public health may be required to participate in general or major-specific senior assessments lasting up to several hours each. Scores on senior assessments will not affect students' GPAs or ability to graduate, but failure to complete required assessments may delay or prevent students' ability to graduate.

Bachelor of Science in Public Health (BSPH) and Master of Public Health (MPH)/ Master of Science in Public Health (MSPH) 4+1 Program

The SONHS and the Graduate Programs in Public Health at the UM Miller School of Medicine have developed a Bachelor of Science in Public Health (BSPH) to a Master in Public Health (MPH) or Master of Science in Public Health (MSPH) 4 + 1 program.

Program Highlights

- Undergraduate students enrolled in the BSPH program in the SONHS who qualify academically may apply to the MPH or MSPH program in the fall of their junior year
- Accepted students are able to take 12 credit hours of Master's-level public health courses in their senior year
 - BSPH students taking Master's-level public health courses in their senior year must obtain a grade of B or better in these courses in order for them to count toward the graduate degree

- b. All Master's-level credit hours count toward their MPH or MSPH degree
- c. By completing 3-6 credit hours of Master's-level MPH or MSPH coursework in the summer following completion of their BSPH degree, students can complete the MPH or MSPH degree in only one additional academic year
3. Students accepted to the 4 +1 program continue to pay undergraduate tuition for the senior year
 - a. Upon graduation with the BSPH, students matriculate into the MPH or MSPH program and complete the remaining credit hours of MPH or MSPH coursework at UM graduate school tuition rates

Admission Criteria

1. BSPH students must have an overall undergraduate GPA of 3.0 or higher at the time of application to be considered; accepted students who do not maintain a 3.0 GPA for the remainder of their undergraduate coursework are subject to re-evaluation
2. GRE scores are not required for UM undergraduates who apply to the 4+1 program
3. Admissions decisions are made solely by the admissions committee for the Graduate Programs in Public Health at the UM Miller School of Medicine

Research Experience

Students may participate in research experiences through the SONHS (<http://www.miami.edu/sonhs/index.php/sonhs/research>) or the Office of Undergraduate Research and Community Outreach (http://www.miami.edu/index.php/undergraduate_research_and_community_outreach) during their time at the UM. Students should speak with the academic advisors located in the OSS (<http://oss.sonhs.miami.edu>) to learn more about the research opportunities available to them at the UM.

Required Coursework and Sample Plans of Study

Visit the "MAJORS" link to learn more about the academic requirements for the SONHS' BSPH program and to view a sample graduation plan, which are listed under the "OVERVIEW" and "PLAN OF STUDY" sections, respectively, for the BSPH program.

Major in Public Health

- BSPH, Public Health Major (p. 913)

Minors in Public Health

- Public Health Minor (p. 916)
- Health Communication Minor (p. 916)

BSPH - Public Health

Students enrolled in the public health major must complete the coursework listed under curriculum requirements to earn the BSPH degree through the School of Nursing and Health Studies (SONHS). Students should meet with an academic advisor in the Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) to discuss any questions related to their degree requirements.

Curriculum Requirements

Code	Title	Credit Hours
Areas of Proficiency		
English Composition		
ENG 105	English Composition I	3
ENG 106	English Composition II	3
Mathematics		
Mathematics: MTH 107 or higher		3
Statistics: BPH 202 or other approved statistics course		3
Social Science		
PSY 110	Introduction to Psychology	3
One additional approved social science elective		3
Modern Language		
One modern language course at or above the 200 level		3
Natural Science		
BIL 150 & BIL 151	General Biology and General Biology Laboratory	5
Choose one chemistry option below:		4-5

CHM 103 & CHM 105	Chemistry for Life Sciences I (Lecture) and Chemistry for Life Sciences I (Laboratory)	
CHM 111 & CHM 113	Principles of Chemistry I and Chemistry Laboratory I	
CHM 121 & CHM 113	Chemistry for the Biosciences I and Chemistry Laboratory I	
Areas of Knowledge		
Arts & Humanities		9
People & Society*		0
Science, Technology, Engineering, and Mathematics (STEM)		9
Major		
BPH 206	Introduction to Public Health	3
BPH 208	Introductory Epidemiology	3
BPH 305	Issues in Health Disparities	3
BPH 309	Health and Environment	3
BPH 310	Global Health	3
BPH 321	Health Promotion and Disease Prevention	3
BPH 322	Introduction to Health Policy	3
BPH 352	Biological Principles of Public Health	3
BPH 465	Public Health Statistics and Data Management	3
BPH 490	Field Practicum in Community Health	3
Major Elective**		3
Advanced Writing and Communication Skills***		0
Electives****		39-38
Total Credit Hours		120

* The public health major may be used to fulfill this cognate area.

** Students may choose an elective from the following courses: APY 205, BPH 301, BPH 303, BPH 306, BPH 317, BPH 319, BPH 355, BPH 402, BPH 419, BPH 461, BPH 487, BTE 450, BSL 460, COS 324, COS 325, COS 426, COS 427, COS 472, GEG 231, GEG 241, GEG 334, GEG 336, GEG 341, GEG 343, GEG 345, GEG 346, GEG 348, GEG 366, GEG 412, INS 570, INS 571, INS 572, INS 573, INS 599, KIN 155, MGT 270, MKT 388, and SOC 480

*** Students must take at least five designated writing-intensive courses to complete this requirement; unless students choose to take additional credits to complete this requirement, it is highly recommended students select courses that are designated as writing-intensive and will double count toward this area and their other requirements.

**** The number of electives students take may vary due to differences in placement scores, transfer credits, course and cognate selections, etc.

This is only a sample. There are numerous ways students can create plans of study for the public health major. Students should feel empowered to use the information listed in the Academic Bulletin and the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks) to take charge of their education, pursue their own academic interests, and create their own, unique plans of study.

The School of Nursing and Health Studies (SONHS) **recommends students create their own plan of study** that accounts for their ENG, MTH, and modern language placements and incorporates their major, minor, and cognate interests. Once students draft their initial plan of study, they are encouraged to meet with an academic advisor in the Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) to review their plan, address any questions or concerns, discuss areas for improvement, and brainstorm ways to integrate research experiences, study abroad opportunities, global initiatives, graduate school requirements, and career preparation experiences.

The sample plan of study listed below is based on the following ENG, MTH, and modern language placement information and major, minor, and cognate selections:

- **ENG placement:** ENG 105
- **MTH placement:** MTH 101
- **Modern Language placement:** SPA 101
- **Major(s):** Public Health
- **Minor(s):** None
- **Cognates**
 - Art & Humanities: Popular Culture (RAU = English)
 - People & Society: Public Health major (RAU = Nursing & Health Studies)

- Science, Technology, Engineering, and Mathematics (STEM): Biology and Chemistry for Pre-Health Sciences (RAU = Chemistry)

Sample Plan of Study

Course	Title	Credit Hours
Freshman Year

(W) = Course is designated as writing-intensive

(*) = Students may choose an elective from the following courses: APY 205, BPH 301, BPH 303, BPH 306, BPH 317, BPH 319, BPH 355, BPH 402, BPH 419, BPH 461, BPH 487, BTE 450, BSL 460, COS 324, COS 325, COS 426, COS 427, COS 472, GEG 231, GEG 241, GEG 334, GEG 336, GEG 341, GEG 343, GEG 345, GEG 346, GEG 348, GEG 366, GEG 412, INS 570, INS 571, INS 572, INS 573, INS 599, KIN 155, MGT 270, MKT 388, and SOC 480

Health Communication Minor

The School of Communication (SoC) in collaboration with the School of Nursing and Health Studies (SONHS) offers a minor in health communication, which is available to all students. Students must have a minimum of a 2.0 UM GPA to declare the minor and they must earn a C or higher in each course for the minor for it to count; a grade of C- or lower is not acceptable for the health communication minor. Students should meet with an academic advisor in the Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services) to discuss any questions related to their degree requirements.

Curriculum Requirements

Code	Title	Credit Hours
COS 324	Health Communication	3
BPH 206	Introduction to Public Health	3
Choose 2 communication studies electives:		6
COS 325	Communication in Health Organization	
COS 426	Patient-Provider Communication	
COS 427	Health Behavior and Risk	
COS 472	Persuasion	
Choose 1 public health elective:		3
BPH 305	Issues in Health Disparities	
BPH 310	Global Health	
BPH 321	Health Promotion and Disease Prevention	
BPH 322	Introduction to Health Policy	
Total Credit Hours		15

Public Health Minor

The School of Nursing and Health Studies (SONHS) offers a minor in public health, which is available to all students. The public health minor consists of two required courses and two electives as outlined below. Students must earn a grade of C- or higher in each course and an overall GPA of 2.0 to complete the public health minor. Any questions related to the public health minor requirements should be directed to an academic advisor in the Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services).

Code	Title	Credit Hours
BPH 206	Introduction to Public Health	3
BPH 208	Introductory Epidemiology	3
Choose 2 electives:		6
APY 205	Medicine and Health Care in Society	
BPH 301	Human Sexuality and Vulnerable Populations	
BPH 303	HIV/AIDS and Health Maintenance for Health Care Providers	
BPH 305	Issues in Health Disparities	
BPH 306	Principles of Nutrition	
BPH 309	Health and Environment	
BPH 310	Global Health	
BPH 317	Theories in Growth and Development	
BPH 319	Contemporary Issues in Bioethics for Health Care	
BPH 321	Health Promotion and Disease Prevention	
BPH 322	Introduction to Health Policy	
BPH 352	Biological Principles of Public Health	
BPH 355	Global Nutrition	
BPH 402	Global Health Disparities Research	
BPH 419	Contemporary Health Issues in South Florida	
BPH 461	Practicum in Health Disparities Research	
BPH 465	Public Health Statistics and Data Management	
BPH 487	Global Health Practicum	
BTE 450	Introduction to Health Informatics	
BSL 460	Health Care Law and Ethics	
COS 324	Health Communication	
COS 325	Communication in Health Organization	
COS 426	Patient-Provider Communication	
COS 427	Health Behavior and Risk	
COS 472	Persuasion	
GEG 231	Environmental Geography and Planetary Health	
GEG 241	Health and Medical Geography	
GEG 334	Biogeography and Conservation	
GEG 336	Hazards and Disasters: The Nature-Society Interface	
GEG 341	Population, Health, and Environment	
GEG 343	Population, Sustainability, and the Media	
GEG 345	Drinking Water: Past, Present, and Future	
GEG 346	Immigrant and Refugee Health	
GEG 348	Climate Change and Public Health	
GEG 366	Cities in Time and Space	
GEG 412	GIS for Health and Environment	
INS 570	Globalization and Health	
INS 571	International Development and Human Welfare	
INS 572	Global Health Policy and Ethics	
INS 573	Disasters, Terrorism and Global Public Health	
INS 599	Special Topics	
KIN 155	Biological Bases for Physical Activity and Health	
MGT 270	Introduction to Health Sector Organization and Management	
MKT 388	Health Care Marketing	
SOC 480	Health Disparities in the U.S.	
Total Credit Hours		12

GRADUATE ACADEMIC PROGRAMS

Mission

The mission of the Graduate School is to promote graduate education, scholarship, and research; to support individuals, departments, and programs in the pursuit of excellence; to foster innovative, multidisciplinary, and interdisciplinary activities; and to maintain high ethical and academic standards in graduate studies.

The standards of study and conduct in the Graduate School are high. They are not set and maintained by the Graduate School but rather by the faculty who determine the standards for their individual program. The Graduate School through its Council sets no course requirements for a degree. It does set certain general residence, grade and examination standards. Fundamentally the Graduate School delegates responsibility to the student and his/her program. Within this broad responsibility the recommendation for the degree rests with the Committee.

Architecture

<http://www.arc.miami.edu>

Introduction

The School of Architecture at the University of Miami offers:

- Master of Architecture
- Master of Construction Management/Executive Master of Construction Management
- Master of Real Estate Development + Urbanism
- Master of Science in Architecture
- Master of Urban Design
- Dual degrees
- Certificates

The School of Architecture's location in Coral Gables within the Miami metropolitan area provides an outstanding laboratory for research and advanced study; the challenges of conservation and development are intense in one of the nation's fastest growing urban areas. These challenges result in an increasing demand for skilled professionals.

Students have the opportunity to work with the faculty in the exploration of theoretical issues as well as in the resolution of practical problems. The School of Architecture values and sustains a creative, open and supportive environment, emphasizing personalized instruction in small classes and studio courses.

Accreditation

In the United States, most registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit professional degree programs in architecture offered by institutions with U.S. regional accreditation, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted an eight-year, three-year, or two-year term of accreditation, depending on the extent of its conformance with established educational standards.

Master of Architecture degree programs may require a pre-professional undergraduate degree in architecture for admission. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

The University of Miami School of Architecture offers the following NAAB-accredited degree programs:

- Bachelor of Architecture (171 undergraduate credits)
- Master of Architecture I (105 graduate credits)
- Master of Architecture II (60 graduate credits)

Admission Requirements

To ensure an orderly design studio sequence we accept applications for **Fall semester only**. Entry in other semesters may result in a delay of design studio attendance which effects the timely completion of the program. Applications completed by February 1st will be given the highest priority, the Graduate program is accepting applications until June 1st. Admission to the graduate program is subject to the rules, regulations and procedures of the Graduate School as stipulated in the University Graduate Bulletin. It is the responsibility of each student to understand these requirements and to ensure that they are met.

The minimum requirements for application (<https://grad.miami.edu/apply>) to the Master's Degree program are:

- **GPA 3.0** cumulative grade point average
- **GRE 300** (<https://www.ets.org/gre>) or **GMAT 550** (www.mba.com/us) - not required for Executive Master of Construction Management
- **TOEFL 80** (www.ets.org/toefl) or **IELTS 6.5** (www.ielts.org/en-us) (<https://www.ielts.org/en-us>)
- **Official transcripts** (need to be addressed to: School of Architecture, Graduate Program, 1223 Dickinson Drive, Coral Gables, FL 33146)
- **International transcripts and diplomas** need to be translated and evaluated ([see link here](#)) (<https://www.arc.miami.edu/admissions/admissions-and-portfolio-requirements/grad-requirements/international-admissions>) by an accredited Evaluation Agency.
- **Resume**
- **Portfolio** (not required for Master of Real Estate Development + Urbanism and Master/Executive of Construction Management)

Please visit the website of the School of Architecture at www.arc.miami.edu for more information.

Resources

- Photo Lab (<https://www.arc.miami.edu/resources/labs/photo-lab>)

Dual Degrees

- Bachelor of Science in Architectural Engineering (B.S.A.E)/Master of Architecture I (M.ARCH)
- Master of Architecture (M.ARCH I and II) and Master of Real Estate Development + Urbanism: 105 credits + 21 credits
- Master of Architecture (M.ARCH I and II) and Master of Urban Design: 60 credits + 21 credits
- Master of Urban Design (M.U.D)/Master of Real Estate Development + Urbanism (MRED+U): 36 cr + 24 cr (min. 60 credits)
- Master of Real Estate Development + Urbanism (MRED+U) and Master of Construction Management (M.C.M.): 36 cr + 24 cr (min. 60 credits)

Certificates

- Historic Preservation Certificate
- Classical Architecture Certificate
- Sustainable and Resilient Design Certificate*
- Construction Management Certificate*
- Urban Design Certificate*
- Real Estate Development and Urbanism Certificate*
- Hospitality Design Certificate*
- Healthcare Design Certificate*

Certificates require 15 credits of one certificate related studio (6 cr) and related architecture electives (9 cr).

*pending approval

Master of Architecture

The Master of Architecture program promotes a creative, open and supportive environment emphasizing advanced and personalized instruction through small class and studio courses. The School's resources are enhanced by the interdisciplinary opportunities offered by the other schools and colleges at the University of Miami. Located in the southeastern U.S. in close proximity to the Caribbean and Latin America, the School also participates in an international network to enable students and faculty to develop an understanding of architecture and culture in an increasingly globalized world. In addition, the School of Architecture Rome Program offers graduate students an intensive experience in design, theory, and history of architecture with U-SoA faculty at the School's private Rome studios.

U-SoA faculty are joined each year by internationally recognized visiting scholars and fellows. The diversity of faculty interests and experience offers opportunities for students in the selection of studios and in the exploration of diverse areas of professional concentration. Students immerse in contemporary challenges to address a variety of social, cultural, technological and programmatic contexts. Students are encouraged to get involved in various research projects located within the School's various labs, and to pursue a certificate in an area of professional concentration.

The Master of Architecture (M.ARCH) program consists of the following two tracks:

Master of Architecture I

A 3 year program for students **with non-architecture degrees (completion of 105 credits is required)**.

Master of Architecture II

A 2 year program for students **with non-professional degrees in architecture or closely related field (completion of 60 credits is required)**.

Master of Construction Management/Executive Master of Construction Management

Gain the technical knowledge and managerial skills you need to set yourself apart in the construction industry. The Master of Construction Management (M.C.M.) is an one year (three semesters), 36 credit program. It is designed to broaden your educational and career options to solve challenges in the industry and become future leaders of design and construction related organizations worldwide. The Executive Master of Construction Management (E.M.C.M.) is a 30 credit program designed for accomplished professionals in the design and construction industry who are ready to take their career to the next level.

Master of Science in Architecture

The Master of Science in Architecture (M.Sc.Arch.) is a one year, three semester program (completion of 36 credits is required). The program offers a critical and professional environment to investigate design strategies and design challenges in relation to the most pressing issues of the 21st century: resilient design, tropical and subtropical architectures, identity in a globalized world, health care design, housing design, conservation of the built environment and the effect of embedded technologies on design. The Master of Science in Architecture program is designed to provide a skills and knowledge base for professional application as well as future advanced doctoral study.

The School of Architecture offers two tracks:

- Architectural Design
- Architectural Studies

Master of Urban Design

The Master of Urban Design (M.U.D.) is a three semester program (completion of 36 credits is required), with the possibility of an optional fourth semester for a Masters' Thesis (42 credits). This concentration consists of directed study to explore in-depth the existing state of suburbs and cities, study precedents and propose design solutions.

The Miami metropolitan area provides a laboratory for the identification of urban problems and for the exploration of design solutions. Each semester is comprised of a design studio and a seminar in parallel, studying both the real and ideal solutions for three aspects of town planning: new town design, housing and the redesign of existing situations. The School of Architecture faculty teaches the curriculum with field condition input from visiting faculty and other experts such as developers, marketing experts and bankers.

Master in Real Estate Development and Urbanism

The Master of Real Estate Development + Urbanism (MRED+U) is an intensive one-year (Fall, Spring, Summer), 36 credit graduate program for students with degrees and experience in business, architecture and related fields blending the fundamentals of real estate development (finance, law, market analysis, development process) with the School's strengths in livable community design.

Awards and Scholarships

All students admitted full time may be eligible for partial tuition based scholarship support. The School of Architecture provides merit-based tuition scholarships to graduate students. Applicants to the Graduate Programs will be considered each semester for a limited number of merit-based assistantships within the School. Assistantships are an honors award available to a limited number of students.

American Institute of Architects Henry Adams Medal is awarded by the American Institute of Architects to the highest ranking graduating student for scholarship and excellence in architecture. American Institute of Architects Henry Adams Certificate awarded to the second highest ranking graduating student for scholarship and excellence in architecture.

Other honors, distinctions, and awards are presented annually for excellent student performance.

Master's Degrees in Architecture

- Master of Architecture I

- Master of Architecture II
- Master of Construction Management (M.C.M.)/Executive Master of Construction Management (E.M.C.M.)
- Master of Real Estate Development + Urbanism (M.R.E.D.+U)
- Master of Science in Architecture - Architectural Design or Architectural Studies (M.Sc.Arch.)
- Master of Urban Design (M.U.D.)

Dual Masters Degrees in Architecture

- Master of Architecture I and II and Master of Real Estate Development + Urbanism
(105 cr + 21 cr or 60 + 21 cr)
- Master of Architecture I and II and Master of Urban Design
(105 cr + 21 cr or 60 + 21 cr)
- Master of Real Estate Development + Urbanism and Master of Urban Design
(36 cr + 24 cr, minimum of 60 cr)
- Master of Real Estate Development + Urbanism and Master of Construction Management
(36 cr + 30 cr, minimum of 60 cr)

Master of Architecture

Master of Architecture I (3 years)

For students with non-architecture degrees (completion of 105 credits is required)

Course	Title	Credit Hours
Fall Semester I		
ARC 604	Architecture Design and Theory I	6
ARC 611	Visual Representation	3
ARC 630	Building Technology I: Materials and Methods	3
ARC 667	History of Architecture I	3
	Credit Hours	15
Spring Semester II		
ARC 605	Architecture Design and Theory II	6
ARC 613	Advanced Visual Representation	3

Fall II		
ARC 609	Architecture Design (vertical studio)	6
ARC 652	Management of Professional Practice	3
ARC 699	Directed Research	3
Elective (1)		3
	Credit Hours	15
Spring II		
ARC 610	Architecture Design Degree Project (design thesis or research studio)	6
Electives (3) *		9
	Credit Hours	15
	Total Credit Hours	60

¹ Elective (s) may be taken in spring break or summer.

² Architecture and professional courses completed in a non-professional bachelor's degree program will be evaluated to identify courses that may be waived in the Master of Architecture Professional Degree Program.

³ Requirements/Recommendations for additional coursework will be contingent on the evaluation of the student's prior work at the time of admission.

⁴ An additional summer semester may be added for students with less than 8 Design Studios from a Bachelor of Architecture degree (6 credits).

Master of Construction Management

*Tentative pending approval by the Southern Association of Colleges and Schools Commission on Colleges

The Master of Construction Management (M.C.M.) (<https://www.arc.miami.edu/academics/graduate/construction-management/master-of-construction-management>)* is an interdisciplinary **36 credit** program and open to graduates from Architecture, Engineering and Construction related programs. The curriculum will broaden educational and career options for students. Formal knowledge and experience in project and construction management are highly sought after by, architectural and engineering firms, construction companies and real estate developers. Combined with other educational opportunities currently offered or planned, at the U-SoA or other academic units, students can create their own future expanding their horizon in the job market. Students at U-SoA are able to enroll in a Master of Construction Management and our Master of Real Estate Development and Urbanism degrees completing a total of 60 credits combined.

Sample Plan of Study

Fall

CMA 601 Fundamentals of Construction Management	3 cr
(or RED 670 Construction and Project Management)

- Master of Arts
- Master of Fine Arts
- Master of Public Administration
- Master of Science
- Doctor of Philosophy

Degree Requirements

Please consult the specific department section for information related to degree requirements in addition to general degree requirements for the various degrees as listed by the Graduate School.

Other

The Max and Peggy Kriloff Fund is a fund that provides travel support for students earning degrees from the College of Arts and Sciences. The fund provides support for students to present papers, or posters at professional conferences worldwide. Students will need to fill out an application form available here (<http://www.as.miami.edu/academics/graduate-studies>) and submit it, along with the necessary supporting documentation to the Office of Graduate and Administrative Services.

Anthropology

The University of Miami offers a Professional Practice in Anthropology. The program will provide an academic foundation of best practices, current theory, grantsmanship, government regulations, and ethical standards of working with living peoples, dynamic cultural systems, and cultural heritage materials within the U.S. and abroad. It is designed to prepare graduates for careers in the private sector, government and nongovernmental organizations, nonprofit organizations, and education, including medical and research settings.

Students in these programs are expected to design their mandatory field/research experience in concert with a faculty advisor and external site supervisor as a means of acquiring practical experience in workplace setting. These students will present a professional paper, submit a grant proposal, and/or produce a manuscript for publication as part of the requirements for graduation. They may elect to pursue a degree with or without a written thesis. A total of 36 semester credit hours of graduate coursework (600-level or above) is required to complete the degree.

Master's Program in Anthropology

- Master of Arts in Anthropology (p. 929)

M.A. in Anthropology

<http://www.as.miami.edu/anthropology/>

Overview

The Department of Anthropology offers a Master of Arts degree in the Professional Practice of Anthropology. The program offers students the opportunity to specialize in one of three areas:

Applied archaeology

Cultural heritage management (cultural resource management), including museum management for archaeological collections, graduates will be in compliance with regulations and requirements from the U.S. Secretary of the Interior.

Applied biological anthropology

Analysis and identification of human remains; museum management of human skeletal/dental remains; applied primatology.

Applied cultural anthropology

Medical anthropology, anthropology in public health and allied fields, and applied ethnography for industrial/private/government sectors.

Degree Requirements

The aim of the curriculum is to give graduates the skill sets needed to design, conduct, and analyze anthropological fieldwork for their employers or as a component of independent research-driven careers. Graduate students have two degree options:

Option 1 - Thesis Option

The thesis option requires a minimum of 36 credits beyond the baccalaureate degree and a written thesis with an open defense guided by a thesis advisor and thesis committee of the student's choice. The committee for the thesis must include at least three faculty members, including one from outside anthropology. Additional credits for thesis research and writing may be added to the minimum of 36 if the student wishes. A minimum of 18 months in residency is also required for this option. Thesis requirements will conform to the University of Miami's standards and format.

This option is designed for individuals who wish to pursue career employment with increased potential for professional advancement based an emphasis on advanced analytical and writing skills used in management. With the thesis track, graduates would have the option of eventually pursuing admission to a doctoral program.

The thesis option may require an additional year in the program to accommodate thesis research and writing.

Option 2 - Non-Thesis Option

This option is for applicants whose ultimate career will be in employment for which practical application of bench skills and a master's degree are the gold standard. Non-thesis students require a minimum of 36 credits beyond the baccalaureate degree with a minimum of 18 months in residency.

This option is designed to prepare students to compete successfully for employment in mid-level careers immediately upon graduation.

Basic Coursework Requirements

1. Seminars in two of the four core graduate seminars in professional practice and theoretical foundations (see below) (3 credits; total of 6 credits);
2. One course or seminar in analytical skills for qualitative and/or quantitative data (3 credits); and
3. One course or seminar in professional writing (e.g., scientific writing for publication, federal compliance reporting, grants writing) (3 credits).

Additional Requirements for the Degree

1. One semester of hands-on field work or internship (usually over the summer), with the option of a second as thesis research; and
2. One paper for presentation at professional organization or one paper for publication in a journal/proceedings/book chapter or other professional venue. The presentation may be poster, podium or multimedia.

Professional Certification of Competency

Certificates of Proficiency (optional) – These may be gained in professional competency courses offered in conjunction with institutions in the student's area of professional specialization. Credit hours may be earned if the student completes the certification as an independent study, part of an internship program, or fieldwork course.

Academic Standing

Graduate students are expected to maintain an overall GPA of 3.0 in all coursework. Should the average fall below that mark in a semester, the student will be notified and work with his/her advisor to rectify the performance problems. If the student has a second consecutive semester with an average GPA below the 3.0 standard, he/she will be placed on academic probation. Three semesters of below average performance may result in suspension from the program at the discretion of the Chair and in discussion with the student and his/her departmental advisor in accordance with guidelines for the University's Graduate College.

For more information, see our web page.

Admission Requirements

All applicants will be selected for admission based on:

GRE Score

1. A GRE score of 1100 (or combined 297 on the revised General Test).
2. Applicants with lower scores may be considered for admission with supporting documentation from referees of active and successful involvement in research and/or transcripts showing an established record of scholarly achievement as an undergraduate.

Transcripts

1. Official copy of undergraduate transcripts showing the date the bachelor's degree was awarded.
2. Transcripts must show a 3.0 GPA in anthropology and no less than 3.0 for the overall GPA.
3. Students with lower averages may be admitted provisionally with higher than minimum GRE scores and supporting materials from referees on a case-by-case basis.

Personal Statement

1. A personal statement in which the applicant details reasons for pursuing an MA in our program specifically.
2. A cogent written statement will be used in evaluating the applicants' ability for written expression, as well as their fit with our strengths and offerings.

Part Time Admission

Returning students or practicing professional anthropologists who seek continuing education to better their skill set while enhancing their opportunities for advancement in the field may apply. Nondegree-seeking students and/or part time students will be considered by the Admissions Committee on a case-by-case basis.

Curriculum Requirements

Thesis Option

Code	Title	Credit Hours

- ¹ Nine graduate-level credits outside of Anthropology (mandatory) – These may be from a suggested list of electives and/or may be designed as a graduate cognate by the student with guidance from the advisor.
- ² Foreign language (mandatory) – demonstrated competency in the language of the country in which the applicant will work is expected. The language requirement may be met by analysis and translation of historical documents in a language other than English, or translation into English of three scientific articles from peer-reviewed journals pertaining to the professional practice of anthropology published originally in a foreign language.
- ³ A written thesis with an open defense is required. Students may choose their thesis committee which must include at least three faculty members, including one from outside anthropology. Additional credits for thesis research and writing may be added to the minimum of 36 if the student wishes. Thesis requirements will conform to the University of Miami's standards and format.

Art and Art History

<http://www.as.miami.edu/art>

Degree Programs

One program serves the needs of graduate students in Art and Art History.

- Master of Fine Arts program in the studio areas of
 - Painting
 - Sculpture
 - Ceramics/Glass
 - Printmaking
 - Photography/Digital Imaging
 - Illustration

Master of Fine Arts

M.F.A. IN STUDIO ART

The Department of Art and Art History offers a Master of Fine Arts degree in the professional practice of studio art. The 3-year program offers students the opportunity to specialize in five concentrations: 1 – Painting; 2 – Printmaking; 3 – Sculpture; 4 – Ceramics; 5 – Digital Imaging/Photography; 6 – Illustration.

Admission Requirements

Applicants for the program will be selected for admission based on submission of the following materials and standards:

1. Official copy of undergraduate transcripts showing the date the B.A. /B.S. /B.F.A. degree was awarded. [Transcripts must show no less than 3.0 for the overall G.P.A.]
2. A minimum TOEFL score of 80 for international students.
3. Three letters of recommendation.
4. A personal statement of interest in the program

5. A portfolio of digital images of personal artwork (not to exceed # digital images)
6. It is recommended that the applicant has advanced coursework in the area they wish to study and related professional and/or exhibition experience.

Academic Standing

Graduate students are expected to maintain an overall G.P.A. of 3.0 in all coursework. Should the average fall below that mark in a semester, the student will be notified and work with his/her adviser to rectify the performance problems. If the student has a second consecutive semester with an average G.P.A. below the 3.0 standard, he/she will be placed on academic probation. Three semesters of below average performance may result in suspension from the program at the discretion of the Chair and in discussion with the student and his/her adviser in accordance with guidelines for the University's Graduate College.

<http://www.bio.miami.edu>

Dept. Code: BIL

Degree Programs

Application for Admission

Applications are due December 1.

In applying for admission, applicants must select either the *Master's* or the *Ph.D.* track.

Students with an appropriate B.S. degree may seek direct entry to either the M.S. track or the Ph.D. track.

Applicants who were admitted on the Master's track, but wish to change to a Ph.D. track without completing the Master's may apply for admission to the Ph.D. program before the end of their second semester. Letters of support from three UM Biology faculty, including a major advisor, should be added to the applicant's file. The file must be current. Such applicants will be judged by the same criteria that are applied to other Ph.D. applicants.

Applicants to the Ph.D. track who were admitted on the Master's track and wish to complete the M.S. degree, should follow the same procedures as all other applicants, but they must include letters of support from three UM Biology faculty. Such applicants will be judged by the same criteria that are applied to other Ph.D. applicants.

Applicants must:

1. Apply online (<https://www.applyweb.com/miamigrd>) at the UM Graduate School. Application fee of \$85.
2. Send hardcopies of the following to the Coordinator of Graduate Studies in Biology, Department of Biology, 1301 Memorial Drive, Coral Gables, FL 33146 USA.
 - a. Originals of all undergraduate and graduate official transcripts (photocopies are not accepted)

- b. Official scores from recent Graduate Record Examinations (within five years), including the aptitude portion; (photocopies of scores are not accepted)
 - c. International applicants whose native language is not English must additionally submit the TOEFL (Test of English as a Foreign Language) official scores (photocopies of scores are not accepted)
3. Send digital copies of the following to the Coordinator of Graduate Studies in Biology (bio.gradcoord@miami.edu)
 - a. A cover letter that identifies interests, suggests possible research projects, states career goals and identifies a UM Biology faculty sponsor
 - b. Copies of any research papers (e.g., publications, manuscripts, senior reports, etc.)
4. Letters of recommendation from **three** science instructors/ supervisors that address: nature and duration of relationship to applicant; motivation; ability to conceptualize and deal quantitatively with biological problems, and research potential should be sent by email to the Coordinator of Graduate Studies in Biology at bio.gradcoord@miami.edu
5. Request UM Biology faculty sponsor submit a memo of support by email to the Coordinator of Graduate Studies in Biology (bio.gradcoord@miami.edu). Applicants **MUST** secure the sponsorship of a faculty member as a condition for admission; the research interests of the applicant and the faculty sponsor should be well-matched; the sponsor will be the major advisor

A limited number of applicants to the Ph.D. program may be invited to interview at departmental expense in early January of the year of admission.

Materials submitted in support of an application cannot be released for other purposes or returned to the applicant.

Degree Requirements

All students are required to satisfy **the general requirements** for the appropriate degree that are listed in the **Graduate Studies Bulletin**, whether or not they are listed among the Biology requirements.

Implementation

All Graduate students will be reviewed each spring semester by GAAC.

1. The advisor will review the student's progress to date.
2. The student will provide updates for a student progress database every February.
3. The student will provide written evidence that the advisor and committee have reviewed her/his progress and plans.
4. Each student will receive a letter summarizing the results of the discussion concerning his/her progress.
5. All graduate students shall have the right to respond to GAAC, and, if necessary, the graduate faculty in matters pertaining to the review.
6. Possible outcomes of the review:
 - a. Student making satisfactory progress
 - b. Student not making satisfactory progress; recommendations for improvement
 - c. Student not making satisfactory progress; his/her tenure terminated.

Financial Support

1. The Department intends to support all doctoral students in good standing for up to 10 semesters. Support beyond 10 semesters is contingent upon GAAC approval.
2. Master's degree students usually are not eligible for departmental stipends or tuition remission.
3. Students who do not provide annual updates for the student progress database will not be eligible for continued funding. Students who will be off-campus are still responsible for making sure that GAAC receives the data. Students who choose not to present at the annual departmental graduate student symposium may be considered as not in good standing.
4. Students holding full fellowships or research assistantships will not normally be given teaching assignments, nor will students be permitted to hold fellowships and research assistantships simultaneously. Exceptions require GAAC approval.

Masters Programs in Biology

- M.S. in Biology with Thesis (Three Year Program) (p. 934)
- M.S. in Biology without Thesis (Two Year Program) (p. 936)

Doctoral Program in Biology

- Ph.D. in Biology (p. 936)

M.S. in Biology with Thesis (Three Year Program)

1. Credit hours: a total of 30 credit hours are required:
 - 24 course credit hours, including the two semester departmental core courses for graduate students and at least one graduate course in statistics. Students are encouraged to take courses from more than one conceptual area; they are encouraged to select courses and

independent studies that will prepare them for research, as listed under the Ph.D. requirements. No more than 9 credit hours from the independent study series may be used to fulfill the 24 course credit hours.:

Code	Title	Credit Hours
BIL 675	Advanced Study in Plant or Animal Sciences	1-6
BIL 678	Current Topics in Biological Research - DVP	1

At times these course numbers are used by professors to teach a new course or a special topics course, in which case the corresponding credit hours can be counted as a non-independent study credit hour. Course selection requires committee approval.

- 6 research credit hours (BIL 810); no more than 6 M.S. research credit hours are allowed.
 - The minimum acceptable grade average in all coursework towards the degree is a "B (3.0)" and no grade may be below a "C."
2. Research Proposal: public presentation and successful defense to the committee of a written research proposal. The public presentation must be given during regular sessions of the Fall or Spring semesters, not during summer sessions, intersessions, reading days or finals weeks.
 3. Thesis: A well-written and successfully defended thesis of publishable quality; a defense is successful if all members of the committee sign the grad school form and the signature page of the dissertation.
 4. Other requirements described under "The Master's Degree," including but not limited to:
 - a total of at least 30 credit hours (course credit hours plus research credit hours). The Graduate School and the Department concur in requiring at least 24 course credit hours and exactly 6 research credit hours (BIL 810) for a thesis M.S.
 - once a student has completed all required credit hours, she/he must enroll in "Research in Residence" (BIL 820) status until the degree is granted. This course carries 0 credit hours, but is considered full-time enrollment. Even though no credit is earned, a tuition charge equivalent to 1 course credit hour normally applies to this course.
 5. About the committee:
 - A single committee will combine the responsibilities of the supervisory and thesis committees.
 - The supervisory committee will be determined by the student in consultation with his or her advisor. The committee will consist of a minimum of three faculty, one of whom must be from outside the department, and one of whom must be a member of the graduate faculty. There is no sub-disciplinary representation requirement.
 - The thesis committee is formed officially when the student is admitted to candidacy. It may comprise the same individuals as the supervisory committee, or it may be formed anew. The student in consultation with the advisor suggests the membership of the committee to the graduate school. The committee will consist of a minimum of three faculty, one of whom must be from outside the department, and one of whom must be a member of the graduate faculty. There is no sub-disciplinary representation requirement.
 - The thesis committee is nominated by the department, but it must be approved and appointed by the Dean of the Graduate School. There is a special form that must be filed with the graduate school.
 - Committee meetings are required at least once a year (recommended at least once a semester); the student is responsible for arranging meetings; the student should consult with the committee about major changes in research goals and about problems. Memos summarizing each meeting should be in the student's file and emailed to the Graduate Director (graddirector@bio.miami.edu).
 6. About the time table:
 - A **written thesis proposal** is due no later than the **middle of the second semester. Please take note of this deadline. The scope of the M.S. thesis should be in line with the timetable.**
 - Analysis of data and a **polished draft of the thesis** should be completed and in the hands of the committee by the **middle of the sixth semester. Please take note of this deadline. The scope of the M.S. thesis should be in line with the timetable.**
 - **Defense of the thesis and its submission to the Graduate School** must meet or precede the deadline for graduation immediately **following the sixth semester** unless an extension has been approved by the Graduate Admissions and Advisement Committee (GAAC) upon recommendation of the thesis committee. Notice of the defense must be submitted on a special form to the graduate school in advance of the defense and must be posted publicly in the department.
 - The oral defense of the thesis **must** be given during regular sessions of the Fall or Spring semesters, not during summer sessions, intersessions, reading days or finals weeks.
 - **No student may receive the degree in the same semester in which she/he is admitted to candidacy.**
 - The indicated dates form **firm deadlines**. A student's committee, however, may submit a written petition to GAAC for an extension of time detailing reasons for the request. **An extension will be granted only under extraordinary circumstances and will be effective upon written approval by GAAC.**
 - Proposals to change the schedule for any reason should be preceded by a study of the **graduate bulletin** sections on **leaves of absence, full time student status** and **recency of credit hour** and explicitly address how the proposed change of schedule relates to these matters. The memo requesting the change also should address the **proposed financial support**.
 7. Completed SACS evaluation forms are required at two points during the course of study. One following the research proposal defense and the final following defense of the thesis. The student is responsible for providing blank forms to the committee at each milestone. The graduate advisor is responsible for forwarding completed forms to the Graduate Director. The student is responsible for ensuring the Graduate Director receives these forms.

M.S. in Biology without Thesis (Two Year Program)

1. Credit hours:

- A total of 30 course credit hours are required by the Biology Department, including the two semester departmental core courses for graduate students and at least one graduate course in statistics. Students are encouraged to take courses from more than one conceptual area, listed under the Ph.D. requirements. No more than 9 credit hours from the independent study series may be used to fulfill the 30 course credit hours.:

Code	Title	Credit Hours
BIL 675	Advanced Study in Plant or Animal Sciences	1-6
BIL 678	Current Topics in Biological Research - DVP	1

At times these course numbers are used by professors to teach a new course or a special topics course, in which case the corresponding credit hours can be counted as a non-independent study credit hour. Course selection requires committee approval.

- The minimum acceptable grade average in all coursework towards the degree is a "B (3.0)" and no grade may be below a "C."
- ### 2. Passing a written comprehensive exam given by the committee.
- ### 3. About the committee:
- A single committee will combine the responsibilities of the initial supervisory and the comprehensive examination committees. The committee will be determined by the student in consultation with her/his advisor. The committee will consist of a minimum of three faculty, one of whom must be from outside the department, and one of whom must be a member of the graduate faculty. There is no sub-disciplinary representation requirement.
 - The examination committee is formed officially when the student is admitted to candidacy. It may comprise the same individuals as the supervisory committee, or it may be formed anew. The student in consultation with the advisor suggests the membership of the committee to the graduate school. The committee will consist of a minimum of three faculty including the student's advisor, one of whom must be from outside the department, and one of whom must be a member of the graduate faculty. There is no sub-disciplinary representation requirement.
 - The examination committee is nominated by the department, but it must be approved and appointed by the Dean of the Graduate School. There is a special form that must be filed with the graduate school.
 - Committee meetings are required at least once a year (recommended at least once a semester); the student is responsible for arranging meetings; the student should keep the committee advised of major changes in the graduate program plan; memos summarizing each meeting should be in the student's file.
- ### 4. About the time table:
- The **comprehensive exam** must be passed by the **end of the fourth semester**.
 - No student may receive the degree in the same semester in which she/he is admitted to candidacy.**
 - The indicated dates form **firm deadlines**. A student's committee, however, may submit a written petition to GAAC for an extension of time detailing reasons for the request. **An extension will be granted only under extraordinary circumstances and will be effective upon written approval by GAAC.**
 - Proposals to change the schedule for any reason should be preceded by a study of the **graduate bulletin** sections on **leaves of absence, full time student status** and **recency of credit hour** and explicitly address how the proposed change of schedule relates to these matters. The memo requesting the change also should address the **proposed financial support**.
- ### 5. Completed SACS evaluation forms are required following the comprehensive exam.
- The student is responsible for providing blank forms to the committee. The graduate advisor is responsible for forwarding completed forms to the Graduate Director. The student is responsible for ensuring the Graduate Director receives these forms.

Ph.D. in Biology

1. Credit hours: a total of 60 credit hours (including both course and research credit hours) beyond the Bachelor's degree are required:

- At least 18 course credit hours that are not from the independent study series, including the two semester departmental core courses for graduate students and at least one graduate course in statistics. The independent study series is:

Code	Title	Credit Hours
BIL 675	Advanced Study in Plant or Animal Sciences	1-6
BIL 678	Current Topics in Biological Research - DVP	1

At times these course numbers are used by professors to teach a new course or a special topics course, however, in which case the corresponding credit hours can be counted as a non-independent study credit hour. Course selection requires committee approval.

- At least 12 research credit hours (BIL 830 and/or BIL 840). Once the overall number of required credit hours (see below #8) has been reached, there is no need to take additional research credit hours.
- An additional 30 credit hours from any combination of graduate courses (600 level regular courses and independent study courses) and research credit hours (800 level) to bring the total number of credit hours beyond the Bachelor's Degree to 60 credit hours. (One example: 18 required course credit hours + 12 required research credit hours + 15 **additional** course credit hours + 15 **additional** research credit hours = 60 total; another example would be 18 **additional** course credit hours and only 12 **additional** dissertation credit hours, etc.)

- Students who already have a Master's Degree in the same field may not need as many course credit hours (consult Graduate School rules on transfer credit hours), but at least 24 credit hours must be taken in residence at UM.
- The committee may decide that students with previous graduate level courses may be exempt from some of the course requirements.
- The minimum acceptable grade average in all coursework towards the degree is a "B (3.0)" and no grade may be below a "C."
- **CONCEPTUAL AREAS:** Students are encouraged to take courses and independent studies from at least 3 main conceptual areas, and are urged to take courses and independent studies that will prepare them for research and for the comprehensive qualifying exam. Students also are encouraged to participate in seminars and study groups and to take special courses in other departments of UM, at our Coalition for Excellence in Tropical Biology partner institutions, from the Organization for Tropical Studies, or other special interdisciplinary courses. Such courses should be appropriate to their course of study and research area as determined by their committee. Conceptual areas offered in our department include: EVOLUTION (graduate level evolution courses are in the 620's series); ECOLOGY (graduate level ecology courses are in the 630's series), BEHAVIOR (graduate level behavior courses are in the 640's series); GENETICS AND MOLECULAR BIOLOGY (graduate level genetics and molecular biology courses are in the 650's series); and PHYSIOLOGY AND CELL BIOLOGY (graduate level physiology courses are in the 660's series). Special concentrations in our department and/or in collaboration with other departments include: Tropical Biology, Mathematical Ecology, Neuroscience, and Behavior.

2. Comprehensive qualifying exam should be passed by the end of the third semester.

The qualifying examination has two components:

(I) *Comprehensive Component*

(II) *Specialty Component*

The Graduate Core will serve as the comprehensive component of the qualifying exam. The minimum acceptable grade in each of Graduate Core I and Graduate Core II is a "B" (3.0). Students who fail to achieve a B average across the two Graduate Core classes will be considered to have failed the comprehensive component of the qualifying exam. Students who earn As (4.0) in both Graduate Core I and Graduate Core II will pass with distinction, students whose grade average across the two classes is <4 but ≥ 3 will earn a passing grade, while students with a grade average across the two classes of <3 will fail the comprehensive component of the qualifying exam. In addition to assigning letter grades, faculty will complete the graduate school rubric for evaluating student performance on qualifying exams for each student.

Final letter grades will use the University of Miami standard quality points:

A+	4.0
A	4.0
A-	3.7
B+	3.3
B	3.0
B-	2.7
C+	2.3
C	2.0
C-	1.7
D+	1.3
D	1.0
F	0.0

In the event that a student fails the comprehensive component of the qualifying exam, the student will be given the opportunity in the following academic year to retake any Graduate Core class in which they failed to achieve the minimum grade of a B. It is only necessary to retake a class if a student earned less than a B in that class (*i.e.* if students earn less than a B in only one of the two classes, it is not necessary for them to retake both classes in the sequence). All students retaking classes must have completed their retakes by the end of their fourth semester. Each retake grade will replace a student's original grade for that part of the Graduate Core. Following the retakes, students who earn As (4.0) in both Graduate Core I and Graduate Core II will pass with distinction, students whose grade average across the two classes is <4 but ≥ 3 will earn a passing grade, while students with a grade average across the two classes of <3 will fail the comprehensive component of the qualifying exam. A student who earns less than a B in a retake, will fail the comprehensive component of the qualifying exam for a second time and be terminated from the program. In addition to assigning letter grades, faculty will complete the graduate school rubric for evaluating student performance on qualifying exams for each student.

(II) *Specialty Component*

The specialty component of the qualifying exam will be administered by the initial committee (see § "The committee") who will test the student in subject areas related to the student's field of study. As early as the middle of the first semester and before the end of the second semester the student should meet with their initial committee to define the scope of their specialty exam. The specialty component should focus two specific areas of biology that the student intends to incorporate into their dissertation research. These areas can be discussed with the committee,

and may be defined by a specific group of reviews, papers, books and book chapters, and even mathematical or computational skill sets to master. The student should be actively engaging their committee to explore and define these areas over their first year of study. The student is responsible for working with their committee to develop a clear understanding of what individual faculty expect of them with respect to preparing for the specialty component of the qualifying exam.

Traditional Specialty Component: The specialty component of the qualifying exam will be administered in the third semester. The committee will designate a chair other than the student's advisor to administer the examination. The written part of the exam will be closed-book and will be administered on campus in a single four-hour period by the examination chair. Two committee members will provide questions for the four-hour specialty exam. Each of the two committee members will provide questions expected to occupy the student for half of the four-hour exam. Exams can be hand-written or completed on a wireless disabled laptop with autocorrect and prompts disabled. All members of the committee will read the exam, the committee members who provided the questions will grade the exam questions they provided. One week after the committee has read the written answers (about one week after the written exam), an oral exam will be administered by the **whole committee** for the purpose of further exploring the student's grasp of **both the specialty component subject matter and any material covered by Graduate Core I and II**.

Alternative Specialty Component: With committee approval, an alternative to the traditional specialty component of the qualifying exam is to present to the committee a first-authored, publishable, full-length article manuscript concerning research conducted since matriculation at UM. The purpose of the alternate exam is to immediately focus students and their graduate advisors on developing the research, analysis and writing skills that are necessary for a successful career. Before the end of the third semester, the manuscript must be submitted to a journal approved by the committee. One week after the committee has read the manuscript, there will be an oral exam for the purpose of further exploring the student's grasp of both the specialty component subject matter and any material covered by Graduate Core I and II.

The specific requirements for the alternative specialty component are:

1. The research *must have been conducted since matriculation at UM*, under the guidance of the Ph.D. advisor. Research conducted prior to matriculation at UM cannot be the basis for the article. However, a student's supervisory committee may at its discretion approve work that considerably extends previous research (e.g. a M.S. project) and that contains substantial new data generated since matriculation.
2. The student *must be the first author* of the article, and *must play the principal role* in data analysis, writing, submission, and seeing the manuscript through to publication.
3. The target journal should have an impact factor above the median (i.e., top 50%) for journals in its subject area.
4. The publication *must be a full article*: No form of short note (e.g., primer, technical or natural history note), short communication or brief commentary is acceptable. Substance rather than paper length will be the major consideration: e.g., articles in *Science* and *Nature* would be short but perfectly acceptable! The exam committee will assess the paper's acceptability.
5. Prior to submission for publication, all members of the supervisory committee must have agreed upon journal selection, served as collegial reviewers of the manuscript, and agreed that the manuscript is suitable for submission. The student is also expected to orally present and defend the research described in the manuscript.
6. Satisfactory completion of this alternate qualifying exam will require *submission* of the manuscript *before the end of the third semester* of graduate study. As is the case for a standard written qualifying exam, satisfactory completion will also require a vote of the supervisory/ examination committee.
7. A memorandum to GAAC by the supervisory/examination committee chair reporting passing the alternate qualifying exam should be accompanied by a copy of the journal's acknowledgment of submission.
8. If the approved manuscript has not been submitted before the end of the third semester, the graduate student must prepare to sit the regular specialty component of the qualifying exam before the end of the fourth semester. Students have up to the Monday of the second last week of classes in the fourth semester to submit their manuscript. If the manuscript is not submitted by the end of the second last week of classes in the fourth semester, the student must sit the regular specialty component of the qualifying exam before the end of the fourth semester.
9. The student is encouraged to present the work on which the manuscript is based at the department's annual graduate student symposium.
 - Each committee member will decide on a pass/fail grade based on the total performance (written plus oral). Conditional passes may not be awarded. For the student to pass the examination, 3 of the 4 examiners must vote a grade of pass. An oral and written summary of the committee's evaluation must be prepared by the chair of the examination committee and given to the student and to GAAC. If the student does not pass the examination, there will be a chance to retake it the following semester. In the case of failure a second time, the student will be terminated from the program.
 - At time of completion of the oral examination the examination committee must provide the Graduate Director with a completed SACS evaluation form, the student is responsible for ensuring the Graduate Director receives this form.

3. Research proposal: public presentation of a research proposal and defense of a written research proposal to the **complete research committee** (see below) should be completed by the middle of the fourth semester. Students are encouraged to follow the format of a grant proposal to a major funding agency. At the proposal defense, the student will receive either a pass or a fail. A grade of pass will be recorded if no more than one member of the **complete research committee** (see below) votes to fail the student. If the student fails the proposal defense, she/he will be given a **second chance** to defend no later than the **sixth week of the fifth semester**. If the defense is failed a second time, the student will

be terminated from the program. At time of completion of the proposal defense the complete research committee must provide the Graduate Director with a completed SACS evaluation form, the student is responsible for ensuring the Graduate Director receives this form.

4. Admission to candidacy: (application is made on a form available in the grad school and in the department). This normally will occur at the end of the fourth semester. Requirements are to pass the comprehensive examination and to successfully defend a written research proposal and to have complete SACS evaluation forms from both the qualifying exam and the proposal defense on file.

5. Teaching: All students on the Ph.D. track in Biology are required to serve satisfactorily at least one semester as a teaching assistant in one of the courses offered as part of the Department's training program.

6. Grants: Submission of a grant proposal to a major funding agency (e.g., NSF, NIH, National Geographic, World Wildlife Fund, etc.) is required. All students are required to seek outside funding for their research. This must be a research project proposal. Application for an NSF pre-doctoral fellowship does not meet this requirement, but application for an NSF dissertation improvement grant does qualify.

7. Ph.D. Dissertation: A well-written and successfully defended dissertation containing an original contribution to the field and of quality appropriate for publication in a scientific journal; a defense is successful if all members of the committee sign the graduate school form and the signature page of the dissertation. A final, acceptable typescript of the dissertation *must* be in the hands of the committee a minimum of two weeks prior to the defense. If this deadline is not met, the defense must be rescheduled. A public dissertation seminar also is presented at the time of the defense. Following the defense the committee is required to provide the Graduate Director with a completed SACS evaluation form.

8. Other requirements described under "Doctor of Philosophy," including but not limited to:

- a total of at least 60 credit hours (course credit hours plus research credit hours).
- once a student has completed all required credit hours, she/he must enroll in "Research in Residence" (BIL 850) status until the degree is granted. This course carries 0 credit hours, but is considered full-time enrollment. Even though no credit is earned, a tuition charge equivalent to 1 course credit hours normally applies to this course.

9. Committee: A single committee will advise the student on both comprehensive and research training. The committee will be responsible for ensuring breadth, significant background and depth in at least 3 conceptual areas (examples include but are not limited to the areas listed above). The research function of the committee is to advise the student on research, including preparation, training, project choice, project design, implementation and evaluation of the research. The committee will go through several phases and its membership will be determined by the advisor and student together, contingent upon approval of GAAC and/or the Graduate School, as appropriate at each phase:

- The **initial committee** will consist of at least **4 faculty**, 2 appointed to ensure breadth of training (from two areas outside the research area) and 2 from the research area. It will be formed to help the student choose courses during the first few weeks of the first semester. This committee will decide whether students having a M.S. in biology (botany, zoology, etc.) from another institution can substitute a graduate level course taken elsewhere for a departmental course requirement; it also will decide which additional courses should be taken for both research and breadth. The choice of areas briefly will be outlined in a memo to GAAC.
- The **initial committee of at least 4 faculty** will be responsible for preparing and administering the comprehensive examination.
- The **complete committee of at least 4 faculty** including one from outside the department, should be formed by the end of the third semester; all four members should participate in the proposal evaluation which will take place in the fourth semester. The committee will consist of a minimum of four faculty, which includes the committee chair, who must be a member of the Graduate Faculty. Of the remaining members, it is also required that two shall be from the Graduate Faculty.
- The **dissertation committee (of four)** is formed officially when the student is admitted to candidacy. It usually will comprise the same individuals as the complete research committee, or it may be formed anew. The student and advisor consult on the membership of the committee, and the department nominates the committee to the graduate school. The committee will consist of a minimum of four faculty, which includes the committee chair who is the advisor, who must be a member of the Graduate Faculty. Of the remaining members, it also is required that two shall be from the Graduate Faculty and one from outside the department of concentration. The dissertation committee is nominated by the department, but it must be approved and appointed by the Dean of the Graduate School. There is a special form that must be filed with the graduate school.
- Committee meetings are **required at least once a year** (recommended at least once a semester in the early phases). The student is responsible for arranging meetings; the student should consult with the committee about any major changes in research goals and any problems; memos summarizing each meeting should be in the student's file.

10. About the time table:

- The written **comprehensive qualifying examination** must be passed by the **end of the third semester**.
- A **polished, written dissertation proposal** must be **defended to the committee in the fourth semester** together with a **public presentation of the proposal**. This must take place by mid-April of the spring semester or mid-November of the fall semester.
- **Admission to candidacy** normally occurs **after the comprehensive qualifying exam and proposal defense are passed upon the recommendation of the committee and the approval of the Graduate School**. Application for admission to candidacy is made to the graduate school on a special form.

- Analysis of data and a **polished draft of the dissertation** should be completed and in the hands of the dissertation committee **no later than the middle of the tenth semester**.
- **Defense of the dissertation and its submission to the Graduate School** must meet or precede the deadline for graduation immediately following the **tenth semester** unless an extension has been approved by GAAC upon recommendation of the dissertation committee. Notice of the defense and of the public seminar must be submitted on a special form to the graduate school in advance of the defense and must be posted publicly in the department.
- The oral **defense of the dissertation** must be given during **regular sessions** of the Fall or Spring semesters, **not during** summer sessions, intersessions, reading days or finals weeks.
- **No student may receive the degree in the same semester in which she/he is admitted to candidacy.**
- The indicated dates form **firm deadlines**. A student's committee, however, may submit a written petition to GAAC for an extension of time detailing reasons for the request. **An extension will be granted only under extraordinary circumstances and will be effective upon written approval by GAAC.**
- Proposals to change the schedule for any reason should be preceded by a study of the **graduate bulletin** sections on **leaves of absence, full time student status** and **recency of credit hour**, and explicitly should address how the proposed change of schedule relates to these matters. The memo requesting the change also should address the **proposed financial support** of the student beyond the 10 semesters of normal departmental support.

11. **Public presentations must be during regular semesters.** The public presentation associated with the defense of the proposal and the public seminar associated with the defense of the dissertation must be given during regular sessions of Fall or Spring semesters, not during summer sessions, inter-sessions, reading days, or finals weeks.

12. Completed SACS evaluation forms are required at three points during the course of study. One following the qualifying exam, one following the proposal defense and the final following defense of the dissertation. The student is responsible for providing blank forms to the committee at each milestone. The graduate advisor is responsible for forwarding completed forms to the Graduate Director. The student is responsible for ensuring the Graduate Director receives these forms.

Chemistry

<http://www.as.miami.edu/chemistry>

Dept. Code: CHM

Degree Programs

Prospective graduate students are expected to have completed, during their undergraduate training:

The candidate must hold a B.S./B.A. degree from an accredited institution. Consideration is given to applicants who have successfully completed general chemistry (two semesters), organic chemistry (two semesters), physical chemistry (two semesters), and the related laboratories. A course in advanced inorganic chemistry is strongly recommended, and remedial work in this area may be required of students who have not taken such a course. The mathematics and physics courses that are normally included in a B.S. program in chemistry are also required.

Undergraduate deficiencies are treated as such and must be overcome during the first year of graduate study.

Masters Program in Chemistry

- M.S. in Chemistry (p. 940)

Doctoral Program in Chemistry

- Ph.D. in Chemistry (p. 941)

M.S. in Chemistry

Curriculum Requirements

Code	Title	Credit Hours
CHM 600 level or Higher		18
CHM 779	Chemistry Seminar	2
CHM 785	Introduction to Research	2
CHM 810	Master's Thesis	8
Total Credit Hours		30

Students must take 18 credits of formal lecture courses by the end of the spring semester of their first year. Of the 18 credit hours, 4 core courses totaling 12 credit hours should be taken by all graduate students.

- The required number of credit hours in the *chemistry seminars* (CHM 779) and *Introduction to Research* (CHM 785) must be taken in the first and second year.
- The required number of credit hours in *research* (CHM 810) must be taken in the second year.
- A *dissertation* based on research of a quality acceptable for publication in a recognized scientific journal must be completed before the end of the second year.

The M.S. degree may be earned with or without a thesis.

In order to complete a MS degree without thesis, an advanced comprehensive exam must be passed.

The exam is administered at the end of the second year in the program.

Ph.D. in Chemistry

The general requirements for the **doctorate** in Chemistry are set forth in this *Bulletin* under the heading Doctor of Philosophy. The Department of Chemistry has the following specific requirements:

The PhD degree requires a minimum of 60 credit hours. The department will cover tuition costs up to 60 credit hours for students on assistantships and fellowships.

Code	Title	Credit Hours
CHM 600 level or Higher		18
CHM 779	Chemistry Seminar	4
CHM 780	Chemistry Seminar	1
CHM 785	Introduction to Research	2
CHM 788	Problems in Research Planning	2
CHM 830	Doctoral Dissertation	26
CHM 840	Post-candidacy Dissertation	6
CHM 880	Doctoral Dissertation Seminar	1
Total Credit Hours		60

Students must take 18 credits of formal lecture courses by the end of the spring semester of their first year. Of the 18 credit hours, 4 core courses totaling 12 credit hours should be taken by all graduate students.

Suggested Plan of Study

Course	Title	Credit Hours
Year One		
Fall		
CHM courses 600 level		9
CHM 779	Chemistry Seminar	1
CHM 785	Introduction to Research	2
	Credit Hours	12
Spring		
CHM 600 level courses		9
CHM 779	Chemistry Seminar	1
	Credit Hours	10
Year Two		
Fall		
CHM 779	Chemistry Seminar	1
CHM 830	Doctoral Dissertation	6
	Credit Hours	7
Spring		
CHM 779	Chemistry Seminar	1

CHM 830	Doctoral Dissertation	4
	Credit Hours	5
Year Three		
Fall		
CHM 780	Chemistry Seminar	1
CHM 830	Doctoral Dissertation	6
	Credit Hours	7
Spring		
CHM 788	Problems in Research Planning	2
CHM 830	Doctoral Dissertation	4
	Credit Hours	6
Year Four		
Fall		
CHM 830	Doctoral Dissertation	6
	Credit Hours	6
Spring		
CHM 840	Post-candidacy Dissertation	6
CHM 880	Doctoral Dissertation Seminar	1
	Credit Hours	7
	Total Credit Hours	60

- The required number of credit hours in the *chemistry seminar* (CHM 779) must be taken in the first and second year.
- The required number of credit hours in Introduction to Research (CHM 785) must be taken in the first year.
- The required number of credit hours in the *chemistry seminar* (CHM 780) must be taken in the fall semester of the third year.
- The required number of credit hours in *Pre-candidacy Doctoral Dissertation* (CHM 830) must be taken in the first, second, third and fourth year.
- The required number of credit hours credits in *Post-candidacy Doctoral Dissertation* (CHM 840) must be taken in the fourth year.
- An *Oral Comprehensive Exam* must be passed before the end of the spring semester of the second year.
- An original *research proposal in Problems in Research Planning* (CHM 788) must be presented and defended before the end of the spring semester of the third year.
- A *Doctoral Dissertation* (CHM 880) based on research of a quality acceptable for publication in a recognized scientific journal must be completed before the end of the fifth year.

Computer Science

<http://www.cs.miami.edu>

Dept. Code: CSC

Introduction

The Department of Computer Science offers undergraduate and graduate education in Computer Science, and performs research in various areas of Computer Science. The Department has faculty with strong accomplishments in the fields of algorithm engineering, automated reasoning, bioinformatics, computational complexity, computational geometry & computer graphics, cryptography & network security, data mining, data science, molecular computation, multimedia systems, music information retrieval, robotics, scientific computing, scientific visualization, semantic web, and wireless & mobile computing.

Degree Programs

The Department of Computer Science offers

- a Master of Science (MS) in Computer Science
- a Doctor of Philosophy (PhD) in Computer Science

Note

All Computer Science graduate TAs and RAs must complete RCR training during their first semester in the department. All other Computer Science graduate students must complete Responsible Conduct of Research (RCR) training before starting research work. Information about RCR training can be found from UM ethics programs, here (<http://www.miami.edu/index.php/ethics/projects/rcr>).

Masters Programs in Computer Science

- M.S. in Computer Science (p. 943)
- Five-Year B.S. and M.S. in Computer Science (p. 943)

Doctoral Program in Computer Science

- Ph.D. in Computer Science (p. 944)

B.S./M.S. in Computer Science Five-Year

This program is open only to currently enrolled Computer Science undergraduates.

The 5-year Bachelor of Science + Master of Science program in Computer Science provides research training for students who wish to work in a computing research lab, or possibly continue to PhD studies.

Students must complete the requirements for a Bachelor of Science in Computer Science (p. 178), and the requirements for a 30 credit hour Master of Science in Computer Science with thesis (p. 943). No credits may be counted towards both requirements.

Students enter the "MS-phase" of the program when they have met the following requirements:

- They have achieved senior status, i.e., earned 89 credit hours towards their Bachelor of Science in Computer Science.
- Within the requirements for a Bachelor of Science in Computer Science, they have completed the prerequisites for entry into the regular Master of Science program, i.e.:

Code	Title	Credit Hours
CSC 120	Computer Programming I	4
CSC 220	Computer Programming II	4
CSC 314	Computer Organization and Architecture	3
CSC 317	Data Structures and Algorithm Analysis	3
CSC 427	Theory of Computing	3
MTH 161	Calculus I	4
MTH 224	Introduction to Probability and Statistics	3
MTH 309	Discrete Mathematics I	3
Total Credit Hours		27

- They have completed 3 credit hours of CSC 410 and/or CSC 411 in a research-oriented project.
- They have an overall GPA of at least 3.0.
- They have a GPA of at least 3.3 in the CSC courses taken towards their BS in Computer Science.
- They have advised the Director of Graduate Studies of their eligibility for the MS-phase.
- Students in the MS-phase must complete 3 further credit hours of CSC 410 and/or CSC 411 in a research-oriented project, as part of their Bachelor of Science in Computer Science (this project will normally be the starting point for the Master of Science research). Students in the MS-phase may take up to 12 credits of courses that count towards completing the requirements for the Master of Science in Computer Science. When students have completed the requirements for a Bachelor of Science in Computer Science they will be awarded that degree, and when they have completed the requirements for the Master of Science in Computer Science they will be awarded that degree.
- Incoming students can be admitted to the program if their mathematics placement is MTH 108 or higher. Existing Bachelor of Science in Computer Science students can switch into the program when they have met the requirements for entering the MS-phase of the program. Students can be removed from the program if they have not met the prerequisites for admission to the MS-phase by the time they have achieved senior status. If a student is removed or decides to withdraw from the program, any CSC6XX level courses taken may be used to fulfill the requirements for a Bachelor of Science in Computer Science.

M.S. in Computer Science

The Master of Science program in Computer Science is overseen by the Computer Science Graduate Committee (CSGC). The basic guidelines for approval of a student's program are recommendations appearing in the Communications of the Association for Computing Machinery (ACM), the professional society in Computer Science.

Prerequisites for Admission

Completion of the following courses, or their equivalents, is prerequisite to entry into the program:

Code	Title	Credit Hours
CSC 120	Computer Programming I	4
CSC 220	Computer Programming II	4
CSC 314	Computer Organization and Architecture	3
CSC 317	Data Structures and Algorithm Analysis	3
CSC 427	Theory of Computing	3
MTH 161	Calculus I	4
MTH 224	Introduction to Probability and Statistics	3
MTH 309	Discrete Mathematics I	3
Total Credit Hours		27

Students may be admitted with deficiencies, normally a maximum of 6 credits. These must be completed in addition to the degree requirements.

Curriculum Requirements

Students must complete the Graduate School requirements, and the Departmental requirements described here.

Code	Title	Credit Hours
Select either the Thesis Option or the Coursework Option ¹		24-30
Thesis Option		
CSC 810	Master's Thesis	6
24 credits from approved courses, including at least 9 credits from CSC7XX courses.		
Coursework Option		
30 credits from approved courses, including at least 18 credits from CSC7XX courses.		
Total Credit Hours		30-36

¹ For both options, at least 18 credit hours must be from CSC 6XX and CSC 7XX courses, and may not include more than 6 credit hours from CSC 670.

Each program must include both theoretical and experimental topics. By graduation students will have knowledge in the areas of Programming Languages, Algorithm Design and Analysis, Theory of Computing, Operating Systems, Computer Networks, and Software Engineering. Each program is approved by the CSGC and the Department Chairman or designate. Programs may be individually tailored to meet varied backgrounds and objectives. It is recognized that there are individuals with undergraduate degrees in other fields wishing to pursue graduate work in Computer Science, and individuals with work experience in the field wishing to advance their formal training in Computer Science.

Ph.D. in Computer Science

The Doctor of Philosophy program in Computer Science is overseen by the Computer Science Graduate Committee (CSGC). The basic guidelines for approval of a student's program are recommendations appearing in the Communications of the Association for Computing Machinery (ACM), the professional society in Computer Science.

Prerequisites for Admission

Completion of the following courses, or their equivalents, is prerequisite to entry into the program:

Code	Title	Credit Hours
CSC 120	Computer Programming I	4
CSC 220	Computer Programming II	4
CSC 314	Computer Organization and Architecture	3
CSC 317	Data Structures and Algorithm Analysis	3
CSC 427	Theory of Computing	3
MTH 161	Calculus I	4
MTH 224	Introduction to Probability and Statistics	3
MTH 309	Discrete Mathematics I	3
Total Credit Hours		27

Students may be admitted with deficiencies, normally a maximum of 6 credits. These must be completed in addition to the degree requirements.

Requirements for Graduation

Students must complete the Graduate School requirements (p. 80), and the Departmental requirements described here.

Credits

For graduation students must complete at least 60 credits (as required by the Graduate School), including at least 24 classroom course credits (see below), at least 9 pre-candidacy credits (CSC830), and at least 9 post-candidacy credits (CSC840).

Written Qualifying Exam

The student must pass a three-hour written exam of general knowledge of Computer Science at the end of the first year. Upon failure, the student may petition the CSGC to allow a second attempt at the end of the second year. The exam will be administered once a year in the early weeks of the summer session. It will cover expected knowledge of all first-year graduate students. Included in this material are a fundamental understanding of algorithm analysis and design, advanced skills in programming, basic knowledge of computer architecture, and a general understanding of computer systems.

Classroom Courses

In the first two years, the student must take eight CSGC-approved classroom courses, for a total of 24 credit hours. At least four of these courses (12 credit hours) must be CSC 7XX courses. The eight courses must include two courses from each of the areas of Analysis, Applications, and Systems. The student must work with the Director of Graduate Studies to select a cohesive set of courses as approved by the CSGC. The CSGC will have sole authority in designating the areas to which each course belongs. In the case that a course is designated in more than one area, a student may apply the course to only one area. The designation of current CSGC-approved courses appears at the end of this description.

Selecting an Advisor

By the end of the second semester, the student must find a research supervisor. By the end of the third semester, the student must have made significant progress on a research project under the supervision of a faculty member. The student must write a detailed progress report that will become a public document and shall be kept on file by the Department. The student must present the report to a quorum of the CSGC at a time to be approved by the chairman of the Department. The supervisor and CSGC must approve the project as applicable toward candidacy for a Ph.D.

Annual Presentations

After passing the written comprehensive exam, the student must make a public oral presentation to the Department at least once per year. These presentations include the thesis proposal and the thesis defense. The goals are to develop the student's oral and presentation skills, to provide a means for the Department to check the research and progress of the student, and to present the opportunity for feedback to improve the student's research.

Teaching Experience

Each student must teach a lab-based course for a minimum of one semester. Lab-based courses typically require the student to present material in a relaxed lecture format, re-emphasizing material learned in the general lecture as well as introducing new material to the students.

Approved Courses for Doctor of Philosophy

Code	Title	Credit Hours
Approved Graduate Courses		
CSC 507	Data Security and Cryptography	3
MTH 520	Numerical Linear Algebra	3
MTH 521	Numerical Methods in Differential Equations	3
MTH 524	Introduction to Probability	3
MTH 525	Introduction to Mathematical Statistics	3
CSC 540	Algorithm Design and Analysis	3

CSC 789	Advanced Topics in Computer Science	1-3

Criminology

<http://www.as.miami.edu/sociology>

The Department of Sociology offers a Master's of Science degree in Criminology and Criminal Justice. The program provides training in fundamentals of the criminal justice system and criminological theory, as well as foundational training in research methods and statistics. Students may tailor their programs to best fit their goals through their selected electives, curricula tracks, and choice of one of three completion options. At present, curricula tracks (comprised of six credit hours) include such areas as leaderships and management, criminal law, research methods and statistics, and geographic information systems (GIS). Students have the program completion options of preparing for and taking a comprehensive examination, completing an internship and accompanying paper, or completing a Master's thesis.

For more information, please see our website: : <http://www.as.miami.edu/sociology/graduate-programs/mscriminology/>.

Admission Requirements

Students are evaluated for admission based on a holistic assessment of the following requirements. Students must submit:

1. A statement of purpose.
 - a. In this personal statement applicants detail their reasons for pursuing the degree, both in general and in our program specifically. The statement will help evaluate applicants' writing abilities as well as fit with our program.
2. Transcripts from all academic institutions attended.
 - a. Official transcripts from all academic institutions attended must be submitted. Transcripts should show that students attained a minimum of 3.0 in the last 60 credits of upper division undergraduate coursework and/or 3.0 in graduate coursework. Applicants with lower averages may be admitted to the Certificate program.
3. Letters of recommendation.
 - a. At least three letters of recommendation must be submitted. These should be positive and strongly indicate that the applicant has the aptitude and stamina necessary to successfully complete a graduate degree.
4. GRE scores.

- a. A minimum GRE score of 950 (or a combined 294 on the revised Test) is necessary for admission to the M.S. program. Applicants with lower scores may be admitted to the Certificate program. The GRE requirement may be waived for applicants based on a) Five or more years of relevant professional experience or b) Prior degree in related field/area

Academic Standing

Graduate students are expected to maintain a minimum of a 3.0 overall GPA in all coursework. Should the average fall below that minimum in a semester, the student will be notified and will work with his/her advisor to rectify the performance issues. If the student has a second consecutive semester with an average overall GPA below 3.0, he/she will be placed on academic probation. Three semesters of below average performance may result in suspension from the program in accordance with guidelines for the University's Graduate School.

Masters Program in Criminology and Criminal Justice

M.S. in Criminology and Criminal Justice (p. 948)

Certificate in Criminology and Criminal Justice

Certificate in Criminology and Criminal Justice (p. 947)

Certificate in Criminology and Criminal Justice

The Department of Sociology offers a Graduate Certificate in Criminology and Criminal Justice. The program provides training in fundamentals of the criminal justice system and criminological theory, as well as foundational training in research methods and statistics. The Certificate is designed for students who wish to augment their training in criminology and criminal justice as well as for those students seeking to enter the M.S. program in Criminology and Criminal Justice but who may not meet all program requirements. Students earn the Certificate by successfully completing the five required courses.

Please see our website for more information: <http://www.as.miami.edu/sociology/graduate-programs/mscriminology/>.

Admission Requirements

Students are evaluated for admission based on a holistic assessment of the following requirements. Students must submit:

1. A statement of purpose
 - a. In this personal statement, applicants detail their reasons for pursuing the degree, both in general and in our program specifically. The statement will help evaluate applicants' writing abilities as well as fit with our program.
2. Transcripts from all academic institutions attended
 - a. Official transcripts from all academic institutions attended must be submitted. Transcripts should show that students attained a minimum of 3.0 in the last 60 credits of upper division undergraduate coursework and/or 3.0 in graduate coursework. Applicants with lower averages may be admitted.
3. Letters of recommendation from at least three references familiar with the individual's scholastic and/or work performance
 - a. At least three letters of recommendation must be submitted. These should be positive and strongly indicate that the applicant has the aptitude and stamina necessary to successfully complete a graduate degree.
4. GRE scores
 - a. A minimum GRE score of 950 (or a combined 294 on the revised Test) is necessary for admission to the M.S. program. Applicants with lower scores may be admitted to the Certificate program. The GRE requirement may be waived for applicants based on a) Five or more years of relevant professional experience or b) Prior degree in related field/area.

Academic Standing

Graduate students are expected to maintain a minimum of a 3.0 overall GPA in all coursework. M.F.A. in Creative Writing

<http://www.as.miami.edu/english/creativewriting/>

Master of Fine Arts in Fiction and Poetry

The University of Miami's MFA Program offers a fully funded, two-year course of study in the writing of poetry, fiction, or cross-genre literature while providing substantial training in the teaching of creative writing and composition. Our program features an optional third year of funding during which graduate students focus on professional development and publication as they continue to teach undergraduate writing courses. The program features a broad multilingual focus in a vibrant, multicultural city unlike any other. Enrollment is kept deliberately small to maximize student-teacher interaction, and faculty at UM are supportive of the linguistic and cultural differences that writers bring to their art.

Full Funding

The James Michener Fellowships and Teaching Assistantships support all our graduate students. Awards include a full tuition waiver and annual stipend of \$15,965. MFA candidates teach one section of Introduction to Creative Writing per semester during their second year in the program or one section each of Creative Writing and Composition.

The Optional Third Year

Students who choose the third-year option teach two sections of Composition per semester while receiving faculty mentorship towards professional development.

Graduates of the MFA in Creative Writing have gone on to publish award winning novels, books of poetry, and creative nonfiction; have been awarded Stegner Fellowships and other residencies; and have gone on to find employment in teaching and publishing.

Curriculum Requirements

Code	Title	Credit Hours
Workshop Requirement		
Students must take 12 credits of workshop in the genre they were admitted to.		12

English

<http://www.as.miami.edu/english>

Dept. Code: ENG

Degree Programs

The Ph.D. program in English (p. 951) is an innovative scholarly course of study offering substantial work in literatures in English, including British, American, Caribbean, Irish, and other Anglophone literature, with some opportunities for advanced work in comparative literature.

The M.F.A. program in Creative Writing (p. 949) located in the English Department offers an intensive two year study with a third year option in the reading, writing and teaching of creative writing.

Master of Fine Arts

- M.F.A. in Creative Writing (p. 949)

Doctoral Program in English

- Ph.D. in English (p. 951)

Ph.D. in English

<http://www.as.miami.edu/english>

1. Courses

Ph.D. students must complete 54 credit hours (if entering with a B.A.) or 36 credit hours (if entering with an M.A.) of 600-level courses in literature and literary theory.

2. Language Requirements

A basic reading knowledge of two foreign languages or an advanced reading knowledge of one foreign language is required.

3. Qualifying Examination

All Ph.D. students are required to pass a qualifying examination.

Students may not take the qualifying examination until they have:

- completed the required Ph.D. coursework,
- satisfied the foreign language requirement
- enrolled for ENG 697.

4. Dissertation

Students may proceed with the dissertation after the dissertation committee has been appointed and the dissertation proposal has been accepted by the committee and approved by the department.

The dissertation itself must be an investigation of a substantial critical or scholarly topic. A final oral defense of the dissertation is required.

Further information on the department's graduate programs is contained in the Guide to Graduate Study available from the Department of English and posted on the department Web site in the Graduate section.

Students must complete their work within one year of the schedule set out in the Guide to Graduate Study.

Geography

<http://www.as.miami.edu/geography>

Dept. Code: GEG

Geographers have an instinctual love of maps, of places, and pay attention to the tangible worlds while posing a strong innate curiosity about the world.

Introduction

The Department of Geography and Regional Studies, has a long and distinguished history of excellent scholarship, is proud to continue its mission of education, research, and service to the community and the world about the importance of geographic knowledge. Our vibrant and diverse department is organized around three major core areas of specialization: Urbanization, Cities and Sustainability; Space, Conservation and Environment; and Public Health, Illness, and Disease. The program builds upon our strengths in urban geography, environmental studies, and medical geography along with gaining skills in methodology, including GIS, remote sensing, and statistics. For the past five years, the Department of Geography's urban studies program has consistently ranked as one of the nation's top 5% urban programs for its quality of research and instruction, based on data from Academic Analytics.

Degree Programs

The Department of Geography and Regional Studies at UM is home to one Geography graduate program: Master's (MA), and a Graduate Certificate in Geospatial Technology. Each graduate student selects one of the department's core program areas as a concentration for research and fieldwork, and works closely with a particular faculty adviser.

Areas of Specialization

Urbanization, Cities and Sustainability

This program examines the dramatic growth in the size, number, and population of global cities. Areas of emphasis include: Smart Cities; Global Urbanization and Infrastructure; Sustainable Development; African Urbanism; Urban Spatial Restructuring, Development Geography, Urban Health and Well-Being; Social Justice, and Ethnicity.

Conservation and Environment

This program builds upon the foundations of human geography as an integrated social science to examine the interplay of socio-spatial processes involved in shaping the complex interrelationships between societies and nature and the built environment. Areas of emphasis include: Climate Change, Biogeography, and Systematic Conservation Planning.

Public Health, Illness, and Disease

This program examines and responds to both challenges and opportunities to improve population health within and across populations and cities and metropolitan areas. Areas of emphasis include Health Disparities, Spatial Epidemiology, Community and Culturally Responsive Research and Mathematical Modeling for Disease Transmission.

Application Procedure & Financial Assistance

Applicants must submit a completed application form, at least two letters of reference, official transcripts from each undergraduate and/or graduate school attended, and an official GRE (Verbal/Quantitative/ Analytical) record. The Graduate Admissions Committee evaluates the student's academic accomplishments and promise as well as the match between the applicant's professional goals and core faculty expertise. For information about the department in general, as well as the professional activities of individual faculty members, see the Department website. The application procedure may be found on the Applications page.

Transfer of Credit

The university has specific and stringent requirements concerning the transfer of credit. Please see the Graduate College website for Transfer of Credit requirements.

Financial Assistance

Please visit the Financial Support page for details.

Admission requirements and deadlines can be found on the Geography Department's web page at <http://www.as.miami.edu/geography/graduate/> and for the Certificate Program at the Certificate Program webpage at <http://www.as.miami.edu/gisc/>.

Questions may be directed to the email below or by mail at:

Major

- MA in Geography (p. 953)

Certificate in Geospatial Technology

- Graduate Certificate in Geospatial Technology (p. 952)

Certificate in Geospatial Technology

The Certificate Program in Geospatial Technology (GT) is designed to benefit students who seek to enhance their skills in geospatial technology, especially Geographic Information Systems (GIS) and satellite remote sensing. The Certificate requires a minimum of 15 credit hours, including three core courses and two or more electives. Students may receive credit toward the Certificate for past coursework completed at UM or other

accredited schools. All fifteen credits may be double counted toward the M.A. degree, making it possible for a student to complete both the M.A. and the Certificate in two years.

Curriculum Requirements

Code	Title	Credit Hours
GIS Certificate Program Core Courses		
GEG 691	Geographic Information Systems I	3
GEG 692	Remote Sensing of the Environment	3
GEG 693	Geographic Information Systems II	3
GIS Certificate Program Electives		
Select 6 credit hours from the following:		6
GEG 625	Advanced Independent Study in Geography I	
GEG 635	Internship in Geography	
GEG 645	Advanced Independent Study in Geography II	
GEG 680	Spatial Data Analysis I	
GEG 681	Spatial Data Analysis II	
GEG 685	Digital Cartography	
GEG 695	Web GIS	
Other approved electives		
Total Credit Hours		15

* Note that all courses from the Certificate Program can be double counted toward the MA in Geography Degree.

** Students are encouraged to find a suitable internship experience with the Career Planning and Placement Center or with the GIS Program Director. Upon approval by the GIS Program Director, 3 credit hours may be earned with an internship (GEG 635)

*** For more information e-mail terghazar@miami.edu to make an appointment.

Elective		
	Credit Hours	3
	Credit Hours	9
	Total Credit Hours	36

* Students completing the Graduate Geospatial Certificate Program concurrently with the MA degree must complete GEG 692 and use one of the electives for a course that satisfies the Certificate Program requirements.

** Students completing the two-paper option take GEG 625 and GEG 645; Students completing the Thesis Option take GEG 810 and GEG 820.

History

<http://www.as.miami.edu/history>

Dept. Code: HIS

Our Department is committed to pursuing excellence in historical and interdisciplinary scholarship, teaching, and service to the profession, the University, and the wider community.

Our fine faculty of some twenty-four professors does research and teaches in many historical areas, often crossing chronological, geographic, and disciplinary boundaries.

Our courses combine innovative subjects and methods with more traditional subjects and presentations. In their classes, students have the opportunity to experience the latest and best historical research and writing, to explore special topics in depth, and to receive rigorous training in researching, analyzing, and writing history from nationally and internationally recognized scholars.

Master of Arts Program in History

- M.A. in History (p. 954)

Doctoral Program in History

- Ph.D. in History (p. 956)

M.A. in History

We are looking for applicants with a record of outstanding achievement and evidence of potential success in graduate studies, attributes which can be measured in various ways such as grades, recommendations, written work, and test scores. Students with a master's degree from an accredited institution may apply for admission to the doctoral program. Students with a bachelor's degree only and with very strong credentials may be admitted into the doctoral program. Applicants must meet the admissions requirements set by both the graduate school, which are listed in its materials, and the department of history.

Because one of the strengths of our program is a close working relationship between faculty members and students, we cannot always accept qualified applicants when no one in the department can provide the guidance they need in their area of interest. Applicants should explore the listing of faculty on our website and contact the DGS or relevant faculty members if they have any questions.

Application Requirements

1. A completed application form.
2. A completed financial aid application, if seeking aid.
3. Three letters of recommendation, preferably from applicant's former professors.
4. Recent Graduate Record Examination scores on the General Test.
5. TOEFL scores (for international students).
6. Official transcripts.
7. A detailed statement from the student indicating:
 - a. the student's background and education;
 - b. the student's interests (field, topic, etc.);
 - c. why the student wants to pursue a graduate degree in history at the University of Miami;
 - d. what the student plans to do with the degree upon completion. This statement constitutes a very important part of the application review process and should indicate the student's understanding of the professional nature of the training that the student is about to begin.
8. A representative writing sample.

Deadlines

January 5: Applications for admission and aid for Fall semester.

Curriculum Requirements

Code	Title	Credit Hours
HIS 600 level or higher		12
HIS 700 level or higher		18
HIS 721	Historiography ¹	
Comprehensive Exam ²		
Foreign Language ³		
M.A. Thesis (Optional) ⁴		
Total Credit Hours ⁵		30

¹ This course is normally given in the fall semester. All students are required to take the Historiography course in their first year. This course counts for 3 of the 30 credits.

² The comprehensive examination for the M.A. degree in history is an oral examination in two fields that will normally not exceed two hours. Although the exam is in two fields, all members of the advisory committee will participate. Students selecting the thesis examination should expect questioning on the thesis as well as their fields during the examination. For such students the comprehensive exam also will act as a thesis defense. For a list of fields, see below.

³ Students must demonstrate a reading knowledge in at least one foreign language. Reading knowledge in additional languages may be required by the major advisor. See under Ph.D. requirements for more information on fulfilling language requirements.

⁴ Students may, if they wish, write an M.A. thesis. Students who elect this option should consult with their advisor. Any student writing a thesis should register for 6 credit hours of HIS 810, which count toward the 30 required credit hours.

⁵ Students must apply for graduation in their penultimate semester (i.e. fall semester for spring semester graduation).

Committee

Upon admission to the master's program in history, the student is assigned a provisional major advisor. An advisory committee of three, including the major advisor and a faculty member representing the student's secondary field, must be formed no later than the student's second semester in the program. There are then two options for completing the masters. One requires 30 credit hours of coursework and an exam. The other requires 24 credit hours of coursework, a master's thesis (6 thesis credit hours), and an exam. In the case of both options, one member of the committee may be from a cognate discipline, but this is not required. It is the responsibility of the student and the advisor to form the committee and to notify the DGS of its composition. The major advisor chairs the advisory committee and oversees the student's course of study and progress in the program. The advisory committee also administers the oral comprehensive exam that is given in the case of either option. In the case of the second (thesis) option, the advisory committee and the thesis committee are usually, but not necessarily, composed of the same faculty members.

Ph.D. in History

With a program and faculty that are recognized regionally, nationally, and internationally, the history department at the University of Miami is dedicated to producing Ph.D.s of the highest quality. Our selective program offers close, individualized training for the next generation of teachers and researchers who will shape and lead the historical profession. While we have particular strengths in the histories of Latin America and the Caribbean, Europe, and the United States, our faculty shares interests that cut across geographies: gender and sexuality; religion; race and ethnicity; law; and economy, among others. Additionally, we have a strong commitment to interdisciplinarity, as we actively maintain bridges to other departments, programs, and centers at the University of Miami. Our graduate students are encouraged to take advantage of these dynamic scholarly connections as they cultivate their own intellectual pursuits.

Admissions

We are looking for applicants with a record of outstanding academic achievement and evidence of potential success in graduate studies, attributes which can be measured in various ways such as grades, recommendations, written work, and test scores. Students with a master's from an accredited institution may apply for admission to the doctoral program. Students with a bachelor's degree only and with very strong credentials may be admitted into the doctoral program. Applicants must meet the admissions requirements set by both the graduate school, which are listed in its materials, and the department of history.

Because one of the strengths of our program is a close working relationship between faculty members and students, we cannot always accept qualified applicants when no one in the department can provide the guidance they need in their area of interest. Applicants should explore the listing of faculty on our website and contact the DGS or relevant faculty members if they have any questions.

The complete application contains:

1. A completed application form.
2. A completed financial aid application, if seeking aid.
3. Three letters of recommendation, preferably from the applicant's former professors.
4. Recent Graduate Record Examination scores.
5. For international students, TOEFL scores.
6. Official transcripts.
7. A detailed statement from the student indicating:
 - a. the student's background and education;
 - b. the student's interests (field, topic, etc.);
 - c. why the student wants to pursue a graduate degree in history at the University of Miami; and
 - d. what the student plans to do with the degree upon completion.

This statement constitutes a very important part of the application review process and should indicate the student's understanding of the professional nature of the training that the student is about to begin.
8. A representative writing sample.

Admission from M.A. to Ph.D. Status

Students admitted at the master's level who are performing well in their studies are encouraged to proceed to Ph.D. status. Advisors who believe that a student should be admitted to the Ph.D. program, and have the consent of the student, inform the DGS of this desire early in the spring semester and at least before the annual departmental meeting reviewing graduate students' progress. The request is then reviewed by the department at its annual meeting for recommendation to the graduate committee. Students who move from the M.A. to the Ph.D. program are eligible for the same number of years' aid as students entering the Ph.D. program directly from the B.A., minus the years of aid they have already received. For course requirements, see below.

Deadlines

January 5: Applications for admissions and aid for Fall semester.

Curriculum Requirements

Code	Title	Credit Hours
Graduate Course Work ⁶		
	45 credit hours (5 semesters) of graduate coursework at the University of Miami for students entering the Ph.D. program with a B.A.	45
	Minimum of 27 credit hours (3 semesters) of graduate coursework at the University of Miami for students entering the Ph.D. program with an M.A. from another university.	
	Minimum of 27 additional credit hours (3 semesters) of graduate coursework at the University of Miami for students entering the Ph.D. program with an M.A. from another program at the University of Miami.	

Minimum of 24 additional credit hours of graduate coursework at the University of Miami for students entering the Ph.D. program with an M.A. from the History Department at the University of Miami.	
HIS 721	Historiography ⁷
HIS 701 & HIS 702	Research Seminar Part 1 and Research Seminar Part 2 ⁸
HIS 722	Dissertation Prospectus Seminar ⁹
Foreign Language ¹⁰	
Comprehensive Exam ¹¹	
Dissertation Research Credit Hours ¹²	15
HIS 830	Doctoral Dissertation
HIS 840	Post-Candidacy Doctoral Dissertation
Dissertation ¹³	
Total Credit Hours ¹⁴	60

- ⁶ The required credit hours of coursework are only the formal minimum. Although course work is necessary preparation for the comprehensive examination, students are examined on the mastery of fields of knowledge rather than courses. The number of courses taken depends on the student’s background, choice of fields, nature of related work, language skills, etc. Courses should be selected only after consultation with the Major Advisor.
- ⁷ This course is normally given in the fall semester. All students are required to take the Historiography course in their first year. The credit hours from this course are included in the total required.
- ⁸ Typically, students take HIS 701 and HIS 702 in their 2nd and 3rd semesters in the program. The credit hours from these courses are included in the total required.
- ⁹ Typically, students take HIS 722 in their 5th semester in the program. The credit hours from this course are included in the total required.
- ¹⁰ Students must demonstrate a reading knowledge in at least one foreign language. Reading knowledge in additional languages may be required by the major advisor. For more information on fulfilling language requirements, see below.
- ¹¹ The comprehensive examination for Ph.D. candidates consists of written and oral examinations in three fields. All doctoral students are expected to take their comprehensive exams no later than their 6th semester in the program. For more information about the comprehensive examination and a listing of fields, see below.
- ¹² Following the completion of course credit hours, students will need to take sufficient dissertation research credit hours (HIS 830 if before the comprehensive examination has been passed; HIS 840 after passage of the comprehensive examination) to reach a total of 60 credit hours beyond the B.A. in order to receive the doctorate. Graduate School rules require that students take a minimum of 12 dissertation credit hours. Students who enter the Ph.D. program with an M.A. from another university or from another program at the University of Miami receive 30 credit hours towards the 60 credit hour requirement.
- ¹³ For requirements relating to the dissertation, see below.
- ¹⁴ As indicated, the number of required course credit hours varies depending on the student’s previous graduate work, but all students must reach a total of 60 credit hours beyond the B.A.

Committee

Upon admission to the program, the student is assigned a provisional major advisor. As noted above, students should then concur or select a different advisor by the beginning of the second semester in the program. An advisory committee of four or five, including the major advisor and faculty members representing the second and third fields, must be formed no later than the student’s third semester in the program. It is the responsibility of the student and the advisor to form this committee and notify the DGS of its composition. The major advisor chairs the advisory committee and oversees the student’s course of study and progress in the program. The advisory committee will also administer the oral and written comprehensive examinations. Students may change advisor and other committee members throughout the program provided that the faculty member(s) selected agree(s).

Incompletes

All incompletes from the fall semester must be made up by the official end of the following spring semester. All incompletes from the spring semester must be made up before the official start of the subsequent fall semester. No student will be allowed to proceed to exams until all incompletes have been made up.

Languages Requirement

Reading knowledge of at least one foreign language is required. More than one foreign language may be required if the major advisor deems it necessary.

Comprehensive Examinations

It is the responsibility of the student and major advisor to organize the comprehensive examinations. Students may take them at any time of the year that classes are in session. Arrangements for the exams, including selection of their dates and a final list of committee members, should be made by the end of the first month of the semester in question, with notification to the Department Chair and DGS.

The student takes the written part of the examinations in three history fields, which are normally administered over a period of two successive weeks. The portion for each field is four hours in duration. Only after the advisory committee deems that the student has successfully passed the written portions for each field is the student permitted to take the oral part of the examination.

The oral section covers the three history fields and is approximately two hours in duration. The prospectus may form part of the discussion, but the examination will focus on coverage of the fields. The committee consists of at least three faculty members.

The student advances to candidate status after passing the comprehensive examinations and submitting an acceptable dissertation prospectus.

Students who have not already received a master's degree from the University of Miami will be awarded an M.A. upon successful completion of their doctoral comprehensive exams.

Dissertation

After passing the examinations, students form a dissertation committee. This may be the original advisory committee, but it may also be revised to meet the needs of the dissertation work. The students, in consultation with the Major Advisor, put forward the names of individuals suggested to serve on the dissertation committee. The committee must be comprised of at least three members within the department and one outside the department. The committee is then approved and appointed by the dean of the graduate school.

The dissertation must make a significant contribution to the candidate's field of specialization. It must meet the highest standards of research, substance, and form, and demonstrate an ability to conduct and report independent and original scholarly investigation.

The student must apply for graduation in his or her penultimate semester (i.e. fall for spring semester).

Upon completion of the dissertation and its tentative approval by the dissertation committee, the student takes a final oral examination that is a "defense" of the dissertation and that lasts for approximately two hours. It is open to the university community. Following the defense of the dissertation, the dissertation committee will render its decision to accept or reject the dissertation. Approval of the dissertation must be indicated by the signature of all members of the dissertation committee.

Fields

Chronological/Geographical fields:

- Medieval Europe
- Early Modern Europe
- Modern Europe
- Early American History
- Modern U.S. History
- Colonial Latin America
- Modern Latin America
- East Asia
- Russia
- Africa
- Caribbean

Topical Fields. These must cover either two of the geographic or two of the temporal fields listed above.:

- African Diaspora
- Race and Ethnicity
- Gender and Sexuality
- History of Religion
- History of Science and Medicine
- History of Crime and Law
- Political History
- Diplomatic History
- Urban and Environmental History

- Economic History
- Business History
- Labor History
- History of Sport
- Military History
- Cultural and Intellectual History
- Public History
- Atlantic World
- Renaissance
- Mediterranean World
- Empires and Nations

Customized Fields:

Students may create their own fields in consultation with their advisory committee. The student opting for this approach must file a plan of study listing relevant courses, the faculty member(s) involved, and the rationale. To pursue the individualized concentration, the student must obtain written approval of the plan by the major advisor, DGS, and the Department Chair.

The plan and signed approvals are placed in the student's file. With rare exceptions, a customized field may not be the major field of study.

International Administration

<http://www.miami.edu/maia>

The University of Miami's Master of Arts in International Administration Program is a thirty (30) credit graduate degree designed to prepare students for careers in the administration of public and private organizations. Our Program assists students in the identification, analysis and management of the complex problems that confront modern organizations. It combines considerations of politics and culture with business, finance and management to provide students with the skills necessary to pursue a range of career objectives in both domestic and international contexts. Our graduates have pursued careers in the realm of non-profits and non-governmental organizations, in the fields of public health, emergency management and national security, as well as in the financial and business sectors. Concentration options include International Business, Public Health, Strategic Communications, Geographical Information Systems, Security Management, as well as a Human Rights/General Track. The degree is awarded by the College of Arts and Sciences.

For additional program information and a complete list of MAIA faculty and staff, please visit us at www.as.miami.edu/maia (<http://www.miami.edu/maia>).

Dual Degree Program: MAIA/MPH

The Master of Arts in International Administration/Master of Public Health (M.A.I.A./M.P.H.) degree is offered jointly by the University of Miami College of Arts and Sciences and University of Miami Miller School of Medicine's Department of Public Health Sciences. The MAIA degree, with a second master's degree in public health, is designed for students who seek knowledge of public health with a broader emphasis in globalization and health, international health, international health policy and international development. Students enrolled in this joint program can expect to complete both degree requirements within two and a half (2.5) years.

Masters Program in International Administration

- M.A. in International Administration (p. 959)

M.A. in International Administration

Curriculum Requirements

Code	Title	Credit Hours
Core Courses *		
IGS 611	International Organizations	3
IGS 612	International Administration	3
IGS 613	Global Cultures: Religion, Communication, and Security	3
IGS 614	World Affairs	3
IGS 615	International Economics for MAIA	3
IGS 616	Administration of Organizations	3
Capstone** (Select One)		
IGS 617	Practicum in International Administration ¹	3

IGS 820	MAIA Masters Project ²	3
Additional Requirements		
Electives ³		9

* The core courses are taught in an integrated fashion, designed to give students the maximum learning experience.

In the core courses, students will

1. develop skills in writing, speaking, and quantitative and historical analyses
2. enhance methods of collecting, interpreting and reporting social, political, and economic data
3. increase skills in methods of research and communications
4. engage strategic and tactical thinking and negotiation
5. build practical and theoretical knowledge in international relations, international economics, intercultural communication and administration in an international context

¹ The purpose of the practicum is to give students the opportunity to apply academic theory and acquired skills in international administration under real world conditions. Students will be expected to complete the practicum with a minimum time commitment of at least two-hundred (200) hours. A final report is required as part of successful completion of the practicum. A more complete guide to the practicum and its requirements is provided to students by the MAIA Office.

² The purpose of the research project is to allow students to pursue an area of academic interest with their concentration. A final directed research paper is required as part of successful completion of the program. The MAIA Office will provide students with the guidelines and requirements.

³ MAIA students must complete their degree with three (3) graduate level elective courses or nine (9) elective credit hours outside of the program. The electives must be approved by a MAIA advisor and students are encouraged to use the electives to further their area of concentration.

International Studies

<http://www.as.miami.edu/international-studies/>

Dept. Code: INS

Degree Programs

The Department of International Studies offers interdisciplinary social science programs leading to the Ph.D. and MA degrees. Ph.D. and MA programs offer advanced students the opportunity to study issues such as globalization, democratic governance, comparative and international political economy, post-Cold War conflicts and security threats, and new forms of civil society mobilization in world politics. To organize the study of these debates in the social sciences, the Department offers three fields of specialization:

- **International Relations:** international relations theory; globalization; social movements beyond the nation-state; security studies; peace and conflict studies; international law and organization; international political economy; foreign policy analysis, global public health, and related fields.
- **Comparative Politics:** theory and methods of comparative analysis; authoritarian and democratic political regimes; democratic governance and citizenship, comparative political economy; contentious politics and social movements; civil-military relations; and appropriate courses on selected regions, such as the European Union, Latin America, or the Post-Soviet countries.
- **International and Comparative Political Economy:** the politics and institutions regulating the global trade, investment, and financial regimes; comparative international development; the politics and economics of international environmental regimes; democracy, partisan politics, and global governance, the domestic and international distributive impacts of globalization; and international economic theory.

Masters Program in International Studies

- M.A. in International Studies (p. 960)

Doctoral Program in International Studies

- Ph.D. in International Studies (p. 962)

M.A. in International Studies

The Master of Arts Degree in International Studies

The MA in International Studies is a 30-credit degree program that is designed for students who seek practical training in social science perspectives and methods that address emerging problems of globalization, international conflicts and humanitarian crises, global environmental change, and international development. The program emphasizes professional preparation through the acquisition of qualitative and quantitative research skills that will enhance students' career opportunities and/or prepare them for advanced study in doctoral programs. The program faculty consists of experts in international relations, comparative politics and political economy, geographical sciences, ethnographic inquiry, public health, and social

inquiry and change. The program can typically be completed within two years, although students may receive credit toward the degree if they have completed equivalent courses elsewhere. Students seeking the degree on a part-time basis are welcome.

Students must complete three core courses and are free to design their program of study on any topic within the broad sphere of international studies under the guidance of a faculty mentor. Major themes covered in International Studies elective courses range from international conflicts, refugee movements and migration, international trade and investment, climate change mitigation and adaptation, poverty alleviation, humanitarian crises, and emerging public health threats.

1. Core courses:

1.1 Thematic core courses (one required):

INS 601 International Relations (fall) Introduction to the theory of international relations; globalization; social movements beyond the nation#state; security studies; peace and conflict studies; international law and organization; international political economy; foreign policy analysis, global public health, and related fields.

Or

INS 630 Comparative Politics (fall): Introduction to theory and methods of comparative analysis; authoritarian and democratic political regimes; democratic governance and citizenship, comparative political economy; contentious politics and social movements; civil-military relations; and appropriate courses on selected regions, such as the European Union, Latin America, or the Post-Soviet countries.

Or

INS 637 International and Comparative Political Economy (fall): Introduction to the politics and institutions regulating the global trade, investment, and financial regimes; comparative international development; the politics and economics of international environmental regimes; democracy, partisan politics, and global governance, the domestic and international distributive impacts of globalization; and international economic theory.

1.2 Methodological core courses (two required):

POL 695A Introductory Statistical Methods in Political Science (fall) Introduction to the core concepts of descriptive and inferential statistics; probability theory; graphical presentation of data; descriptive measures of central tendency and dispersion; hypothesis testing, contingency tables and linear regression.

POL 695T Advanced Statistical Methods in Political Science (spring) Introduction to general linear models within a likelihood framework, including models for discrete data –binary, multinomial, ordered and count outcomes. In addition, the course provides an introduction to the R programming environment, a powerful and versatile open-source statistics suite.

Or

Students may substitute any graduate-level *mixed-methods* course such as **INS 611 (International Relations Methodology II)**, any *qualitative methods* courses (e.g., survey methods, ethnographic methods) such as **INS 612 (Qualitative Methods)**, or information technology course such as **GEG 691 (Introduction to Geographic Information Systems for Graduate Students)** and **APY 611** for POL 695T. In addition, a variety of other statistics courses are available in other social science departments that may be used as substitutes for POL 695T.

2. Foreign Language Requirement: All students must demonstrate competency (reading and basic comprehension) in at least one foreign language. Students are expected to pass a foreign language examination by the end of their first year to determine if they meet this essential requirement or may require additional foreign language training. A variety of options is available for practical language training including courses offered by the Department of Modern Languages and Literatures ([insert link](#)) and the Directed Independent Language Study (DILS, [insert link](#)).

3. Comprehensive Exam, Thesis and Non-thesis Options: As a final requirement to graduate, students must select one of the following 3 options:

- Pass a written qualifying (comprehensive) examination in one of the three fields of specialization. The MA qualifying examination probes student knowledge of one of the Department's three fields of study and the ability to think and express ideas clearly. Masters level students are required to answer three questions within four hours

- Thesis and Non-Thesis options: Both thesis and non-thesis options are available and students are expected to identify a specific topical interest and research focus by the end of their first semester in residence. The non-thesis option consists of two short papers and an oral examination; the thesis option involves production of a MA thesis that will be examined by a committee of three faculty members, one of whom is the faculty mentor. Students opting for an MA Thesis must have a GPA of 3.5 or higher.

Ph.D. in International Studies

The Department's Ph.D. program's primary objective is to prepare a select group of highly qualified doctoral students for careers in academic teaching and research. The requirements include:

- Complete a total of 66 degree credit hours (12 semester courses) to obtain the Ph.D. degree (i.e., 36 credit hours at the doctoral level beyond the MA degree).
- Complete one seminar on quantitative methods and one seminar on qualitative methods in the social sciences.
- Complete a sequence of two core seminars in two of the Program's three major fields of study:
 - International Relations;
 - Comparative Politics; and
 - International and Comparative Political Economy.
- Pass
 - a. written MA exam in one of the Program's three fields of study and
 - b. written and oral examinations in two of the Program's three fields of study.
- Complete at least one of the basic core seminars in the third (non-examination) field.
- Complete the Doctoral Workshop.

- Successfully defend a dissertation proposal/prospectus.
- Pass a foreign language examination.
- Complete 12 dissertation credit hours.
- Research, write and orally defend a dissertation that makes an original contribution to knowledge.

See the *INS Graduate Student Handbook* for a complete description of the requirements for the Ph.D. degree.

Latin American Studies

<http://www.as.miami.edu/las/graduate/>

Dept. Code: LAS

The Latin American Studies Program at the University of Miami takes an interdisciplinary approach to the study of the politics, economics, cultures, and societies of Latin America and the Caribbean. Courses in the program are offered in departments from every school and college at the University of Miami, and the program's faculty research topics ranging from development economics to immigrant health care, from indigenous music to Caribbean colonial literature, from the archaeology of the region's earliest people to present-day questions of resource conservation and management. Our students become true experts who can speak to a wide range of issues confronting Latin America; experts who can contribute proactively to development and cooperation as well as to business and political analysis in ways that their peers with a more traditional disciplinary focus simply cannot.

Requests for Information

Dr. William J. Pestle
Academic Director, Latin American Studies Program
Merrick Hall 102-E
University of Miami
Coral Gables, FL 33124-2005
las@miami.edu (lasgrad@miami.edu)

The interdisciplinary graduate programs in LAS offer excellent preparation for careers in international business, law, banking, work in philanthropy, economic development, the environment, government service, education, health care, journalism. There are currently three Masters Programs in Latin American Studies on offer.

Masters Programs in Latin American Studies

- M.A. in Latin American Studies (p. 967)
- M.A. in Latin American Studies with GIS Certificate (p. 968)
- B.A./M.A. in Latin American Studies (p. 243)

The interdisciplinary graduate programs in LAS offer excellent preparation for careers in international business, law, banking, work in philanthropy, economic development, the environment, government service, education, health care, journalism. There are two Joint/Dual degree programs currently on offer.

Joint Program in Latin American Studies

- M.A./M.PH Dual Degree in Latin American Studies and Public Health (p. 966)
- JD/M.A. in Latin American Studies (p. 965)

B.A./M.A. in Latin American Studies

FILAS (Fellows in Latin American Studies)

In this highly selective Honors Program, students follow a rigorous, accelerated curriculum to complete a dual degree (B.A./M.A.) in Latin American and Caribbean Studies in five years. The program provides exciting collaborative research, travel, and work opportunities.

Working with UM's world-class faculty in various academic disciplines, *FILAS* participants design individualized curricula. In addition to the regular general education course requirements of the College of Arts and Sciences, *FILAS* students choose one focus track for their most advanced courses: Social Sciences, Literature & Culture, Communication, Environmental Studies, Public Health, or History. For broad-based, multi-disciplinary preparation, students choose courses that focus on Latin America and the Caribbean from the following categories (at least ten of these courses must be taken at the Master's level):

Code	Title	Credit Hours
CAS GENERAL EDUCATION REQUIREMENTS		

English Composition ¹		6
ENG 105	English Composition I	
ENG 106	English Composition II	
Mathematics, Computing & Statistics ²		3
Second Language ³		
Writing Across the Curriculum ⁴		
Cognates ⁵		9
Advanced Language Proficiency in Spanish, French, Portuguese, or Haitian Creole		3
Select one of the following:		
FRE 203	Advanced French	
HAI 201	Intermediate Haitian Creole I	
POR 202	Intermediate Portuguese II	
SPA 203	Advanced Spanish	
Secondary Language Competence in another Latin American or Caribbean Language		3
Select one of the following:		
FRE 105	Accelerated Elementary French	
HAI 102	Elementary Haitian Creole II ((or equivalent))	
POR 105	Beginning Portuguese for Spanish Speakers	
SPA 105	Accelerated Elementary Spanish	
FILAS Specific Requirements		
Select one gateway seminar in Latin American Studies		3
Select two History courses		6
Select two International Studies courses		6
Select two Economics courses		6
Select two advanced Languages and Literatures courses (SPA, POR, FRE, or HAI)		6
Select seven courses in Study Abroad		21
Select one course as Internship in Latin America		3
Select five courses above the 300-level (third-year) in a range of disciplines		15
Select ten courses in one focus track		30
MA Phase Requirements		
GRE Exam in Semester 7 or 8		
LAS 601	Interdisciplinary in Latin American and Caribbean	3
LAS 602	Research Design in Latin American Studies	3
Select two Regional Fundamentals courses		6
Select four electives from approved LAS or combined courses		12
LAS 810	Pre-candidacy thesis credits (students must enroll in two semesters of this 3-credit course to fulfill this requirement.)	3
LAS 810	Pre-candidacy thesis credits	3
Total Credit Hours		150

¹ Certain AP/IB scores may be used to fulfill the Composition requirement as credit. If Transfer students transfer one of the two above, but not both, they may take ENG 208 to complete the requirement. ENG 105 must be taken unless exempted by SAT/V or ACT/V scores (does not include credits).

² MTH 108 or higher. Unless exempted by AP/IB, or UM placement test. UM placement test does not include credits. Prerequisites must be met before enrolling in MTH courses.

³ Students must take at least three credits in a language other than English at the 200-level or higher. Prerequisites may be required. Courses taken in order to meet this requirement, including necessary prerequisite courses to the 200 level courses, cannot be used in cognates seen below. **FILAS students already fulfill this requirement when completing the language requirements cited below.**

⁴ Degree candidates must complete at least four writing courses, and at least one such course must be in the student's major discipline.

- ⁵ Typically, students must complete a minimum of three cognates, one from each of the three areas of the University curriculum: Arts & Humanities; People & Society; and Science, Technology, Engineering & Mathematics. A cognate is a minimum of 9 credit hours, however it can be more. Each major/minor fulfills the cognate requirement in one Area of Knowledge. **However, FILAS students must complete only the STEM Cognate as the FILAS program fulfills the Arts & Humanities and People & Society cognates. To avoid additional course credits, please select a STEM Cognate that includes a Natural Science course to concurrently fulfill this CAS general education requirement.** According to the College of Arts & Sciences, "three credits must be earned from one of the following departments: Biology, Chemistry, Ecosystem Science & Policy (only ECS 111, 112, or 202), Geological Sciences, Marine Science (except MSC 313 and 314), Physical Science, or Physics. APY 203 and GEG 120 may also count. These credits may double count with any other requirement, e.g., courses in the STEM cognate."

FILAS students also write a Master's Thesis based on an original research project. In addition, they must defend the thesis and present their findings at the LAS Annual Student Symposium.

FILAS Admission Requirements

- SAT1 composite score of 1360 or ACT 31.
- Top 10% of high school graduating class.
- Regular Application for Admission to the University of Miami. We recommend students submit their applications by November 15.
- Recommendations from three high school teachers.
- Statement of interest in *FILAS*, emphasizing prior language or area study
- To continue through the graduate level (MA Phase), students must maintain at least a 3.4 GPA and take the GRE Exam.

J.D./M.A. in Latin American Studies

Overview

The University of Miami School of Law in partnership with the University of Miami Center for Latin American Studies (LAS), College of Arts and Sciences offers a joint J.D./M.A. in Latin American Studies and the Law. This curriculum prepares Law School students for government, political and nonprofit legal positions. The program provides a solid theoretical framework and grounding in policy analysis, administration, and management.

This joint program allows students to obtain both J.D. and M.A. degrees in 3 or 3 1/2 years -less time than obtaining the degrees separately. The first year is spent in the Law School and years two, three and four (if needed) are spent taking both Law and M. A. courses.

Admissions

To be admitted to this program, students must apply separately to both programs. Students may apply to the MA in Latin American Studies program prior to beginning Law School or anytime during the first or second year of Law School. Students may begin the MA program in the fall or spring semesters.

For admission to the M. A. program students must complete an MA application. If they apply before the end of their first year in Law School, they will not need to take the GRE exam. Their LSAT score will be used instead of the GRE. For more details on the M. A. program, visit the M.A. in Latin American Studies website.

Acceptance by one program does not in any way indicate or guarantee acceptance by the other degree program.

Tuition and Fees

Tuition for J.D. courses will be paid to the Law School. Tuition for the M.A courses will be paid to the College of Arts and Sciences. Law School scholarships may only be used towards tuition for Law School courses.

Courses and Credits

On the J.D. side, students must complete 82 credits in the Law School and 6 credits will be double-counted from the M.A. courses to complete the total of 88 JD credits. On the M.A. side, students must complete 21 credits in Latin American Studies courses, and 9 credits will be double-counted from the J.D. coursework to complete the total of 30 credits. Students will be required to complete a total of 103 credits for both degrees.

Juris Doctor (J.D.) Course Requirements

- During their first year of the joint program, students will be required to attend the J.D. program full-time.
- Students who begin in the JD program will be able to take courses in the Latin American Studies Master's program beginning the fall of their 2L year.
- Students must complete all J.D. requirements and all M.A. requirements as defined by their programs.
- Students may take summer law courses which may reduce the length of the joint degree program by up to a semester.
- Students may not take more than 16 credits/semester. Seventeen credits/semester may be taken with permission from the Associate Dean, Academic Affairs, School of Law.

Master of Latin American Studies Requirements

- Required courses in LAS are: LAS601, Introductory Seminar; LAS602, Research Design; and a disciplinary research methods course (to be approved by the degree director.)
- Two regional fundamentals courses are also required.
- Students will be required to write a master's thesis, create an equivalent capstone project, or pass a comprehensive exam. (6 credits) These options require a committee consisting of at least three faculty members.
- Language Requirement: Students must demonstrate advanced language competency in Spanish, French, Portuguese, or Haitian Creole. Students may establish proficiency by passing two courses taught in the target language at the 600-level or above, or by passing a language competency exam. A major indigenous language of Latin America may be substituted for either Spanish or Portuguese. Students may petition for a waiver of examination if they have gained language competency in another manner (i.e. native speaker, upper division coursework in target language, Peace Corps service, 18 credits or Defense Language Proficiency Test).

M.A. Dual Degree in Latin American Studies and Public Health

<http://www.as.miami.edu/las/graduate/joint-master-of-arts-programs/medicine-and-public-health/>

Miami is the gateway to Latin America. As such we recognize an urgent need for public health professionals with the training and expertise needed to meet the growing public health challenges both in Latin America and the Caribbean. This program is designed to train students for a career in public health with a focus on social policy, health management and health care in Latin America and the Caribbean, as well as expatriate communities in the United States.

Average Program Duration: 2 years, 5 semesters

Number of required credits: 54-55 (+6 for non-native speakers)

Curriculum Requirements

Code	Title	Credit Hours
EPH 600	Introduction to Public Health	3
EPH 601	Medical Biostatistics I	3-4
EPH 620	Health Education and Behavior	3
EPH 621	Fundamentals of Epidemiology	3
EPH 631	Public Health Administration	3
EPH 641	Aspects of Environmental Health	3
Language Requirement ¹		6
Select four of the following:		12
EPH 612	Global Health	
EPH 614	Global Outbreak	
EPH 639	Ecology and Control of Vector-Borne Diseases	
EPH 640	Urban Environment and Public Health	
EPH 644	Fundamentals of Program Evaluation	
EPH 647	Community Based Participatory Research	
EPH 650	Health Economics for Evaluation and Policy	
EPH 651	Research Methods	
EPH 671	Maternal and Child Health	
LAS 601	Interdisciplinary in Latin American and Caribbean	3
LAS 602	Research Design in Latin American Studies	3
Select two additional LAS courses in consultation with the Academic Director.		6
Regional Fundamentals in Latin America Electives ²		6
Select one of the following tracks (for a total of 6 credits):		6
EPH 680 & LAS 810	Practical Field Experience and Pre-candidacy thesis credits	
LAS 697	Readings for the Comprehensive Exam	
Total Credit Hours		60-61

¹ Students must demonstrate advanced language competency in Spanish, French, Portuguese, or Haitian Creole. Students may establish proficiency by passing two courses taught in the target language at the 500-level or above, or by passing a language competency exam. A major indigenous language of Latin America may be substituted for either Spanish or Portuguese. Students may petition for a waiver of examination if they have gained language competency in another manner (i.e. native speaker, upper division coursework in target language, Peace Corps service, IB credits or Defense Language Proficiency Test).

² Six credits worth of Regional Fundamentals in Latin America must be taken. These electives may be chosen from appropriate offerings in LAS, INS, POL, HIS, APY, or GEG. Regional Fundamentals are those courses that have a clear regional or sub-regional focus (e.g. Andean Region; the Caribbean; South America; Central America; Southern Cone; Brazil; South Florida) rather than a specific country focus. For this joint degree, we will require that the six credits of electives in POL, LAS, INS, APY, GEG, or HIS be used to meet this requirement. The LASAcademic Director may approve courses from other departments.

M.A. in Latin American Studies

The Master of Arts in Latin American Studies is a 30 credit hour interdisciplinary degree characterized by a high degree of flexibility in allowing students to create a course of study focused on Latin American and the Caribbean that serves the interests of the student. Combining core courses offered by the program with a large variety of courses combined with departments, programs, and units throughout the University of Miami, the program offers tremendous diversity in courses available for credit hour towards this degree. This encourages students to combine course offerings from around the university into a cohesive course of study that enables specialization in an area, topic, country, theme, or issue of their choosing and thus to tap into the many resources available at the University of Miami for students with a passion for Latin America and the Caribbean.

Curriculum Requirements

The program consists of two core Latin American and Caribbean seminars, two regional fundamentals, and a minimum of three additional seminars to be taken as electives. Students will also be required to take one research methods course at the 600-level.

Code	Title	Credit Hours
LAS 601	Interdisciplinary in Latin American and Caribbean	3
LAS 602	Research Design in Latin American Studies	3
Two Regional Fundamentals courses ¹		6
Three electives from the list of LAS designated or combined courses (600-level or above) ²		9
One research methods course in the discipline of the student's specialization ³		3
LAS 810	Pre-candidacy thesis credits (students must enroll in two semesters of this 3-credit course)	3
LAS 810	Pre-candidacy thesis credits	3
Thesis, Capstone, or Comprehensive Exam ⁴		
Language Proficiency ⁵		
Total Credit Hours		30

¹ Regional Fundamentals are those courses that have a clear regional or sub-regional focus (e.g. Andean Region; the Caribbean; South America; Central America; Southern Cone; Brazil; South Florida) rather than a specific country focus.

² Electives may be taken from any pre-approved combined or core LAS courses at the 600-level or above, or from other courses approved by the academic director.

³ A Research Methods course may be chosen from any available and accessible Research Methods courses available at the University of Miami, but must be appropriate to the course of study chosen by the student and requires approval of the academic director. Under special circumstances, the research methods requirement may be waived with the prior approval of the academic director.

⁴ Students are required to write a master's thesis, create an equivalent capstone project, or pass a comprehensive exam. The latter two options require the approval of the academic director. For each of these options, a committee consisting of at least three members is required. Students who opt for the comprehensive exam will take one more elective in the place of the Research Methods course and enroll in 6 credit hours of LAS 697, rather than LAS 810.

⁵ Students must demonstrate advanced language competence in Spanish, Portuguese, Haitian Creole, or French by passing a course taught in the target language at the 600-level or above, or by passing a language competency exam.

* With approval from the academic director, students may also take their elective credit hours with Latin Americanists in other Schools such as Communication, Law, Business, or Marine Sciences.

** Students who are simultaneously enrolled in a certificate program (other than GIS) at the University of Miami may double-count courses between the certificate program and the Master of Arts in Latin American Studies, with approval of the academic director. In select cases (such as methods courses), seminars and courses at the 600-level that do not specifically target Latin America or the Caribbean, but for which the final project or paper produced by the student is focused on Latin America may be counted towards the Master of Arts in Latin American Studies, subject to the approval of the academic director.

M.A. in Latin American Studies with GIS Certificate

<http://www.as.miami.edu/las/graduate/joint-master-of-arts-programs/gis/>

The Master of Arts in Latin American Studies with GIS certificate is a 30 credit hours interdisciplinary degree characterized by a high degree of flexibility in allowing students to create course of study focused on Latin American and the Caribbean that serves the interests of the student, while allowing students to focus on obtaining specific skills in geographic Information Systems (GIS). Combining core courses offered by the program with a large variety of combined courses offered by departments, programs, and units throughout the University of Miami, the program offers a tremendous diversity in courses available for credit hour towards this degree. This enables students to combine course offerings from around the university into a cohesive course of study that allows specialization in an area, topic, country, theme, or issue of their choosing and thus to tap into the many resources available at the University of Miami for students with a passion for Latin America and the Caribbean.

The GIS option allows students to work towards a graduate certificate in GIS through the department of Geographic and Regional Studies while working towards their Master of Arts in Latin American Studies.

Curriculum Requirements

Code	Title	Credit Hours
LAS 601	Interdisciplinary in Latin American and Caribbean	3
LAS 602	Research Design in Latin American Studies	3
GEG 691	Geographic Information Systems I	3
GEG 692	Remote Sensing of the Environment	3
GEG 693	Geographic Information Systems II	3
Select three electives in LAS		9
LAS 810	Pre-candidacy thesis credits (Students must enroll in two semester of this 3-credit course) ¹	3
LAS 810	Pre-candidacy thesis credits	3
Total Credit Hours		30

¹ The 6 credit hours in LAS 810 will consist of a GIS capstone project with a focus on Latin America, the Caribbean, or South Florida. Students will require a three-member committee to oversee the capstone project. A group project may be allowed with approval of the academic director.

Liberal Studies

<http://www.as.miami.edu/mals>

Dept. Code: MLS

Degree Programs

The Liberal Studies program is founded on an interdisciplinary approach to issues and questions central to the history and development of human culture. It is designed to provide a broad understanding of these issues and questions through a focused and systematic program of study drawing upon faculty from various disciplines in the humanities, the social sciences, and the basic sciences.

For further information regarding this program, please contact:

Master of Arts in Liberal Studies Program
1300 Campo Sano Avenue, 215
Coral Gables, FL 33146-2025
Call 305-284-8783 or email mals@miami.edu

Masters Program in Liberal Studies

- M.A. in Liberal Studies (p. 969)

The Master of Arts in Liberal Studies program is designed for the student who seeks to develop the critical thinking that marks a truly educated person—for the student who brings a heightened awareness of the unanswered questions that confront an inquiring mind—for the self-motivated person who never stops asking the first question: why?

MALS students come from varied backgrounds. They are artists, business professionals, entrepreneurs, engineers, homemakers, lawyers, recent graduates, journalists and teachers. The program gives them the opportunity for intellectual and personal growth and for sharing their experiences with others in a community of learning.

Post-Graduate Certificate in Liberal Studies

- Certificate in Liberal Studies

<http://www.as.miami.edu/mals/>

The Post-Graduate Certificate Program in Liberal Studies requires 15 credit hours of coursework. The curriculum can be designed to fit each student's academic goals. Students may select from MALS courses or other graduate level courses with the approval of the director.

M.A. in Liberal Studies

<http://www.as.miami.edu/mals/>

The Master of Arts in Liberal Studies degree requires 24 credit hours, plus a 6 credit hour thesis **OR** an additional 6 credit hours of coursework and a representative portfolio. The curriculum is drawn from three core courses as well as additional courses designed for MALS students. Students may select from other graduate level courses with the approval of the director. In addition, all students are required to participate in the MALS Writing Seminar.

Curriculum Requirements

Code	Title	Credit Hours
Core Courses		
MLS 601	Aspects of Creative and Reflective Thought	3
MLS 602	Perspectives on Human Nature	3
MLS 603	Theories of the Physical Universe	3
MLS Writing Workshop ¹		
Choose One of the Following Options:		21
Thesis or Project Option:		
Approved Graduate Credit Hours (15 credits) ²		
Thesis or Project Requirement (6 credits)		
Non-Thesis Option:		
Approved Graduate Credit Hours (21 credits) ²		
A portfolio representative of works completed		
Total Credit Hours		30

¹ Students learn to analyze and read texts critically and demonstrate their ability to express that knowledge in their oral and written work with accuracy and insight. This 3 hour, non-credit workshop is required and should be taken during the first regular semester of study.

² Students may select from other graduate level courses with the approval of the director.

Mathematics

<http://www.math.miami.edu>

Dept. Code: MTH

Degree Programs

The Mathematics Department offers graduate degree programs leading to the:

- Master of Arts (p. 970)
- Master of Science (p. 969)
- Master of Science in Mathematical Finance (p. 969)
- Doctor of Philosophy (p. 970)

Prerequisites and requirements for these degrees are described on the program pages:

Masters Programs in Mathematics

- M.A. in Mathematics (p. 970)
- M.S. in Mathematics (p. 972)
- M.S. in Mathematical Finance (p. 971)

Doctoral Program in Mathematics

- Ph.D. in Mathematics (p. 973)

M.A. in Mathematics

<http://www.math.miami.edu/>

Admissions Requirement

A minimum of 9 credit hours in mathematics courses numbered 200 and above is required. For more information about admission, please visit our website (<http://www.math.miami.edu/graduate/application-procedure>).

Curriculum Requirements

Code	Title	Credit Hours
One Year Topic Sequence		
Choose one of the following topic sequences:		6
MTH 613 & MTH 614	Partial Differential Equations I and Partial Differential Equations II	
MTH 615 & MTH 616	Ordinary Differential Equations and Dynamics and Bifurcations	
MTH 624 & MTH 625	Introduction to Probability Theory and Introduction to Mathematical Statistics	
MTH 631 & MTH 632	Topology I and Topology II	
MTH 633 & MTH 634	Introduction to Real Analysis I and Introduction to Real Analysis II	
MTH 661 & MTH 662	Abstract Algebra I and Abstract Algebra II	
Additional Courses ¹		24
A three-hour written examination covering the material in one of the year-long sequences listed above.		
Total Credit Hours		30

- ¹
- At least 18 credits of MTH courses are required.
 - All courses from other departments must be numbered 600 or above, be pertinent to the teaching of secondary school mathematics, and be approved by the graduate committee.

Sample Plan of Study

Ph.D. in Mathematics

<http://www.math.miami.edu/>

Curriculum Requirements

The following requirements are in addition to the general requirements for the Doctor of Philosophy Degree as described by the Graduate School.

Code	Title	Credit Hours
Required Courses		
MTH 733 & MTH 734	Real Variables and Real Variables	6
MTH 735 & MTH 736	Complex Variables and Complex Variables	6
MTH 741 & MTH 742	Algebraic Topology and Algebraic Topology	6
MTH 761 & MTH 762	Abstract Algebra I and Abstract Algebra II	6
MTH 700 level and higher		12
Preliminary and three written qualifying exams must be passed. Of these written exams, two must be from the above basic sequences; the other may be another from the basic sequences or in the candidate's area of specialty		
A proficiency in one of the languages French, German, or Russian must be demonstrated.		

Additional Courses	24
Total Credit Hours	60

Modern Languages and Literatures

<http://www.as.miami.edu/ml>

Dept. Codes: ARB, CHI, FRE, GER, HAI, HEB, ITA, JPN, MLL, POR, SPA

Degree Programs

The Ph.D. in **Literary, Cultural, and Linguistic Studies** offers major concentrations in Literary and Cultural Studies and Critical Studies of Language/Linguistics. The program is designed primarily to prepare students for careers as university professors and research scholars. Students develop advanced language, teaching, and research skills that lend themselves to other professions, as well. A variety of geographic, temporal, and theoretical concentrations allow students to carry out innovative and interdisciplinary research projects, often with a transnational focus.

Students develop superior language skills and professional competency in their major research field(s) through an intensive study of canonical works while engaging in comparative, interdisciplinary fields such as Africana Studies, Arabic Studies, Caribbean Studies, French and Francophone Studies, Iberian Studies, Italian Studies, Latin American Studies, Luso-Brazilian Studies, and combinations thereof.

The program's strong theoretical component grounds student research in a range of areas, including: aesthetics, bilingualism, digital humanities, early modern studies, film studies, gender and sexuality studies, (im)migration studies, indigenous studies, performance studies, postcolonial studies, queer studies, subaltern studies, sociolinguistics, theatre studies, and women's studies.

Students are required to develop competency in a cognate field related to their intellectual pursuits, leading to the dissertation topic. Recent examples of cognate specialization include anthropology, communication studies, film studies, history, law, philosophy, musicology, classics, and sociology.

The department offers two graduate certificates to prepare students beyond their specialization, which may be fulfilled with course electives:

- Graduate Certificate in Second Language Acquisition and Teaching (<http://www.as.miami.edu/ml/graduate/slat-certificate>)
- Early Modern Studies Concentration (<http://humanities.miami.edu/humanities/academic/early-modern-studies-concentration>), an interdisciplinary certificate offered in conjunction with English and History

Admission Requirements

The Department of Modern Languages and Literatures accepts applications to the Ph.D. program for Fall admission only from students holding (or completing during the time of application) B.A. or M.A. degrees in a related discipline (e.g. Spanish, French, Luso-Brazilian Studies, History, Anthropology, Communication Studies, Comparative Literature, Philosophy, Journalism). The Department does not admit students who seek terminal M.A. degrees.

The deadline to apply for the 2019-20 academic year is December 30, 2018. All applicants will automatically be considered for Departmental TAs and University-wide fellowships.

Applications must include the following materials:

1. A completed application form, including a detailed statement of purpose. (Applications are only accepted through this link (<https://www.applyweb.com/miamigrd>)).
2. A Graduate Assistantship application.
3. Three letters of recommendation (typically, 1-2 pages). Applicants should use the CollegeNet interface to have recommenders submit their letters online.
4. GRE scores mailed directly from ETS testing agency to the Department of Modern Languages and Literatures. Domestic and international students can send GRE and TOEFL scores to our Department with the University of Miami code (5815).
5. International students without BA or MA degrees from a U.S. institution should have TOEFL scores mailed directly from the testing agency to the Department of Modern Languages and Literatures.
6. Graduate applicants who have attended college or university outside the United States must submit official translations of transcripts and diplomas directly to the Department of Modern Languages and Literatures.
7. A research paper of 15-20 pages in English.
8. Research paper(s) of 15-20 pages in the primary language(s) of proposed study.

Application fee of \$85.00

Printed materials should be sent to:

Graduate Program Admissions

Department of Modern Languages & Literatures
 University of Miami
 P. O. Box 248093
 Coral Gables, Florida 33124-4650
 FAX: 305-284-2068

For questions, consult the Graduate Program website (<http://www.as.miami.edu/ml/graduate>) or contact the Department (mlgraduate@miami.edu? subject=Graduate Applications) (305-284-5585).

MLL encourages African American and Hispanic applicants to pursue McKnight Doctoral Fellowships, which are supplemented by the UM College of Arts and Sciences to match the Departmental stipend amount. (Applicants must be U.S. citizens).

Applications are due on 15 January of each year and are available online (<http://www.fefonline.org>).

In case of any difficulty submitting the online application, applicants should contact FEF (webmaster@fefonline.org) or call 813-943-7578. For additional information, please contact the Florida Education Fund at 813- 272-2772.

Doctoral Program in Modern Languages and Literatures

- Ph.D. in Literary, Cultural, and Linguistic Studies (p. 975)

Ph.D. in Literary, Cultural, and Linguistic Studies

The **Ph.D. in Literary, Cultural, and Linguistic Studies** offers two major concentrations: 1) Literary and Cultural Studies and 2) Critical Studies of Language/Linguistics. Students in each concentration may opt to develop a secondary field of expertise in the other.

The program is designed primarily to prepare students for careers as university professors and research scholars. Students develop advanced language, teaching, and research skills that lend themselves to other professions, as well. A variety of geographic, temporal, and theoretical concentrations allow students to carry out innovative and interdisciplinary research projects, often with a transnational focus.

Basic Program Requirements

The requirements set out below for the **Ph.D. in Literary, Cultural, and Linguistic Studies** are minimum requirements. The Graduate Studies Committee, Director of Graduate Studies, and individual advisors may set additional requirements.

- The requirements:
 - for students entering on the "five-year plan" (with a B.A. or M.A., see below), passing satisfactorily a minimum of 60 graded credit hours in approved courses, 30 of which must be open to graduate students only;
 - for students entering on the "four-year plan" (with an M.A. in a closely related field, see below), passing satisfactorily a minimum of 48 graded credit hours in approved courses, 24 of which must be open to graduate students only;
- Passing MLL 701, MLL 711, MLL 714, MLL 799, and a minimum of 15 graded credit hours in the area(s) of research emphasis to be determined on an individualized basis in collaboration with the graduate advisors.
- For students in the Literary and Cultural Studies concentration, three credits of Critical Studies of Language/Linguistics and three credits in any Arts and Sciences discipline focusing on Colonial or Early Modern Studies (18th century or earlier).
- At least six credits in an approved cognate discipline to be determined in consultation with graduate advisors.
- Nine credits in Literary/Cultural Studies or Critical Studies of Language/Linguistics, for students pursuing an optional minor concentration.
- In addition to proficiency in English and the major language of study, demonstrating the following:
 - reading knowledge of two other languages; or
 - holistic knowledge of one other language (for example, by passing the equivalent of a course at the 300-level). Note: Appropriate languages of study will be determined in collaboration with the student's advisors (e.g. students of Latin America may be encouraged to study Portuguese or an indigenous language; students focusing on early modern Spanish or French studies may be encouraged to study Italian; students working in the French-speaking Caribbean may need to take Haitian Kreyòl; etc.);
 - if areas of specialization include Medieval, Early Modern, or Colonial Latin American Studies, students must demonstrate reading knowledge of Latin.
- Passing a Breadth Exam. Depending on the student's interests, the exam shall consist of three parts, according to one of the following configurations:
 - one geographic region over three time periods;
 - two geographic regions over two or three time periods;
 - two geographic regions over one or two time periods and one area of critical sociolinguistics;
 - two areas of critical sociolinguistics and one geographic region over one-time period. Note: Students entering the doctoral program with an MA in a relevant field may petition to waive the Breadth Exam (normally taken in the spring semester of the second year) after the first semester of study. The Graduate Studies Committee will consider petitions on an individualized basis.

8. Passing a Qualifying Exam on an approved topic. The exam typically includes three general approaches focusing on:
 - a. literature, cultural studies, or sociolinguistics;
 - b. critical theory;
 - c. a cognate discipline (e.g. history, sociology, philosophy, law, art, film, etc.).
9. Successfully defending a dissertation prospectus.
10. Completing and defending satisfactorily a dissertation.
11. Satisfying the requirements of the Graduate School as stated in the *Graduate Bulletin*.

Philosophy

<http://www.as.miami.edu/phi>

We offer an M.A. and a Ph.D. in philosophy.

The M.A. program is designed for those who want to pursue philosophy at a deeper level than in their B.A. degree, or who wish to transition into philosophy from other academic disciplines. Students may choose this program to improve their chances of acceptance into a highly-ranked Ph.D. program, or for other reasons. There are no distribution requirements: students may tailor their coursework to their own interests. Students must also write and defend a thesis, which can be used as a writing sample for Ph.D. program applications. (Note that acceptance into the M.A. program does not guarantee acceptance into our own Ph.D. program later on; the application procedures are separate.)

The Ph.D. program is specifically designed to prepare students for careers as professional teachers and researchers in philosophy, not only by way of coursework and research supervision, but also through professional mentoring and opportunities for philosophical development both inside and outside the classroom. Students normally enter with either a B.A. or an M.A. degree in philosophy. Students who enter without an M.A. and who fulfil the relevant requirements are awarded the M.A. degree as they work towards the Ph.D.

Each entering student is assigned a mentor from among the faculty, and faculty members lead professional development seminars on such topics as teaching, preparing work for publication, and preparing for the job market. A dedicated placement director work with each student to maximize their success at securing good post-graduation employment.

The Department prides itself on providing an inclusive, friendly and congenial atmosphere for doing philosophy, with many opportunities for informal interaction among students and faculty including workshops, conferences, colloquia and post-colloquium dinners.

Masters Degree in Philosophy

- M.A. in Philosophy (p. 976)

Doctoral Program in Philosophy

- Ph.D. in Philosophy (p. 977)

M.A. in Philosophy

Policies & Important Details

1. The M.A. in Philosophy is intended to deepen a student's background in philosophy, and to improve a student's preparation for Ph.D. programs in philosophy. It is possible to use the M.A. as a bridge program from another discipline into philosophy.
2. To maintain status as a graduate student, registration in each fall and spring semester is required. Otherwise, admission lapses and permission to re-enter must be granted.
3. Time restrictions on obtaining degrees will be strictly enforced and can be waived only by the Dean of the Graduate School.
4. Upon completing the course requirements and presenting and defending a satisfactory thesis, the student has completed the requirements for an M.A. in Philosophy.
5. The student in consultation with his/her selected M.A. thesis committee chair will decide on the thesis committee members. The thesis committee will consist of not less than three members, two from the Department's graduate faculty, and one from either inside or outside the Department. The chair has to be a member of the graduate faculty. The duties of the thesis committee are:
 - a. To consult with and to advise students on their research.
 - b. To meet, at intervals, to review progress and expected results.
 - c. To read and comment upon the draft thesis.
 - d. To meet, when the thesis is completed, to conduct the final oral examination and to satisfy itself that the thesis is a contribution to knowledge and that it is written in lucid and correct English and submitted in approved form.

The candidate is well advised to have a final acceptable typescript of the thesis in the hands of each member of his/her committee at a time reasonably in advance of the final defense of the work.

Curriculum Requirements

Code	Title	Credit Hours
600 or 700 level PHI electives		24
Research Requirement		6
PHI 810	Master's Thesis	
Masters Thesis ¹		
Total Credit Hours		30

¹ Presentation and oral defense of and acceptable thesis.

* Students must accumulate 30 credits in philosophy with satisfactory grades, 24 credits of coursework and 6 credits of thesis research. At least 18 of these credits must be earned while in residence.

Ph.D. in Philosophy

Policies and Important Details

1. The Ph.D. in Philosophy is for students with a background in philosophy. Normally at least a B.A. in Philosophy is required.
2. To maintain status as a graduate student, registration in each fall and spring semester is required. Otherwise, admission lapses and permission to re-enter must be granted.
3. Once a student has completed all course and required research credit hours, he or she must enroll in "Research in Residence" status until the degree has been granted. "Research in Residence" status is considered full time enrollment. Time restrictions on obtaining degrees will be strictly enforced and can be waived only by the Dean of the Graduate School.
4. Upon completing the course requirements and passing the qualifying exams with a grade of 1 or 2, the student has completed the requirements for an M.A. in Philosophy.
5. Upon completing the course requirements, passing the qualifying exams with a grade of 2, and successfully defending the Ph.D. proposal, the student is eligible for admission to Ph.D. candidacy.
6. Upon passing the qualifying exams, the student in consultation with his/her selected Ph.D. dissertation committee chair will decide on the dissertation committee members. The dissertation committee will consist of not less than four members, three from the department's graduate faculty, and one from outside the Department. The chair has to be a member of the graduate faculty. The duties of the dissertation committee are:
 - a. To consult with and to advise students on their research.
 - b. To meet, at intervals, to review progress and expected results.
 - c. To read and comment upon the draft dissertation.
 - d. To meet, when the dissertation is completed, to conduct the final oral examination and to satisfy itself that the dissertation is a contribution to knowledge and that it is written in lucid and correct English and submitted in approved form.

The candidate is well advised to have a final acceptable typescript of the dissertation in the hands of each member of his/her committee at a time reasonably in advance of the final defense of the work.

Curriculum Requirements

Students must accumulate a 60 credits in philosophy with satisfactory grades, 45 credits of coursework and 15 credits of dissertation research. At least 21 of the 45 credits must be for courses at the 700 level. At least 27 of these credits must be earned while in residence.

Qualifying Exam ¹		
Language Requirement ²		
PHD Dissertation ³		
Total Credit Hours		60

¹ A comprehensive qualifying exam must be taken. Exams are given the grade of 0, 1 or 2. A student must receive a grade of 2 in order to proceed to the dissertation stage. The student is provided with a reading list in their intended area of specialization. The student studies the material on the reading list, writes a paper of around 8,000 words on a topic central to this material, writes a dissertation proposal of around 2,000 words, and participates in an oral defense of the paper and proposal as they relate to the reading list

² A student must possess the linguistic proficiency required by the proposed dissertation topic. This is determined by the dissertation proposal committee on the basis of examinations or coursework.

³ Presentation and oral defense of an acceptable dissertation.

Physics

<http://www.physics.miami.edu>

Dept. Code: PHY

Degree Programs

All graduate students in physics must plan their entire program with the advice and approval of a departmental advisor.

The program of graduate studies in physics emphasizes research work, but also includes teaching experience as an essential element. Research and thesis opportunities are at present available in the fields of astrophysics and cosmology, atmospheric, ocean and quantum optics, biological physics, complexity, condensed matter/energy materials physics, elementary particle theory.

Masters Program in Physics

- M.S. in Physics (p. 978)

Doctoral Program in Physics

- Ph.D. in Physics (p. 979)

M.S. in Physics

In addition to the general requirements for graduate degrees, the Physics Department makes the following specific requirements.

1. Submission of scores on the general Graduate Record Examination (GRE).
2. A minimum of 30 physics course credit hours at the 600-700 level are required for the Master Degree.
3. The following specific courses, or their equivalent, are required for the M.S. degree:

Code	Title	Credit Hours
PHY 640	Classical Mechanics II	3
PHY 660	Quantum Mechanics and Modern Physics I	3
PHY 661	Quantum Mechanics and Modern Physics II	3
PHY 723	Statistical Mechanics I	3
PHY 752	Electromagnetic Theory I	3
PHY 753	Electromagnetic Theory II	3
PHY 770	Quantum Theory I	3
PHY 771	Quantum Theory II	3
Select six additional physics course credits at the 600 or 700 level		6
Total Credit Hours		30

4. For the M.S. degree no more than 3 credit hours for reading courses may be counted, and no more than 2 credit hours of seminars. Up to 6 credit hours may be earned in thesis work for this degree.
5. The physics department offers a comprehensive graduate examination each year. All students are required to take the exam when it is offered.
6. Courses taken outside the department should be relevant to the students' program and approved by the graduate advisor.

Ph.D. in Physics

In addition to the general requirements for graduate degrees, the Physics Department makes the following specific requirements.

1. Submission of scores on the general Graduate Record Examination (GRE).
2. A minimum of 24 physics course credit hours at the 600-700 level are required for the PhD.
3. The following specific courses, or their equivalent, are required for the PhD degree:

Code	Title	Credit Hours
PHY 640	Classical Mechanics II	3
PHY 660	Quantum Mechanics and Modern Physics I	3
PHY 661	Quantum Mechanics and Modern Physics II	3
PHY 723	Statistical Mechanics I	3
PHY 752	Electromagnetic Theory I	3
PHY 753	Electromagnetic Theory II	3
PHY 770	Quantum Theory I	3
PHY 771	Quantum Theory II	3
Select three additional physics lecture courses at the 600 or 700 level		9
Total Credit Hours		33

4. The physics department offers a comprehensive graduate examination each year. A passing grade at an appropriate level is required for the Ph.D. A student is required to take the exam each year and is allowed two attempts toward a passing grade.
5. Courses taken outside the department should be relevant to the students' program and approved by the graduate advisor.
6. Students are required to participate in research at the earliest opportunity. Specifically, upon passing the written graduate examination and before the end of the following semester, the student is required to select a faculty member who consents to serve as the student's Ph.D. thesis advisor. Student and thesis advisor are to form, in a timely fashion, a dissertation committee to review an oral presentation of the student's initial research activities and future plans. Should a student need to select a new thesis advisor, this selection must be made without delay, and the review process must be repeated.
7. Renewal of financial support from the department is contingent, each semester, upon satisfactory performance of teaching duties and research activities, and upon timely progress towards completion of all requirements for the Ph.D. degree.

Political Science

<http://www.as.miami.edu/mpa>

The MPA program is designed to prepare students for a career of public service. Students will be exposed to the essential components of public service professionalism—excellence in technique, ethics and leadership—to help meet the challenges in the years ahead. Our award-winning, student-

oriented faculty is dedicated to helping you achieve this “professional edge” in small, stimulating seminars, convenient evening courses, super-modern facilities and we have an excellent record in placing graduates.

Masters Program in Political Science

- M.P.A. Masters in Public Administration (p. 981)

Joint Program in Political Science

- J.D./M.P.A. Joint Degree Program (p. 980)
- MPH/MPA Joint Program (<http://www.as.miami.edu/mpa/about-the-program/dual-mpamph-program>)

J.D./M.P.A. Joint Degree Program

The joint program allows students to obtain both JD and MPA degrees in four years. The program is designed to prepare law school students for government, political and nonprofit legal positions. The first year is spent in the Law School and years two through four are spent taking both Law and MPA courses.

To be admitted to this program, students must apply separately to both programs. Students may apply to the MPA program prior to beginning law school or anytime during the first or second year of law school. Students may begin the MPA program in the fall, spring or summer semesters. For further information contact the Department of Political Science at 305-284-2401 or the Law School at 305-284-5535.

M.P.A./M.P.H. Second Master's Degree in Public Health Master of Public Administration Joint Degree (MPA/MPH)

The Master of Public Administration/ Master in Public Health (MPA/MPH) degree is offered jointly by the University of Miami College of Arts and Sciences and the Miller School of Medicine's Department of Public Health Sciences. The joint degree is designed for students who seek an in-depth knowledge of public health with training in management and public policy administration. Students may complete the requirements for the MPA and MPH degrees consecutively or in succession.

Applicants must be admitted into the MPH and MPA programs on a separate basis, based on the admissions requirements and procedure of each individual program. Acceptance by one program does not in any way indicate or guarantee acceptance by the other degree program. Both the MPA and the MPH degree programs require the Graduate Record Exam (GRE) as part of the admissions requirement.

Average Program Duration: 2.5 years

M.P.A. Online

The MPA program is designed to provide students with a comprehensive and holistic understanding of what you will need to be an effective public service leader. Students will explore the most critical areas of public administration, planning and financial budgeting, political analysis and personnel administration as well as contemporary issues in Ethics, Digital Governance, NGOs and Global Governance. Assignment examples include practice in management consulting, policy making and democratic input.

Influence the future of your community. A Master's degree in Public Administration from the University Miami gives you access to a rewarding career in Public Service. According to the Bureau of Labor Statistics, this is a growing field with the number of new government jobs predicted to increase by 1.4 million over the next ten years. Visit our website for more information. (<http://miami.edu/online/programs/masters-in-public-administration>)

Certificate in Public Administration

The Certificate in Public Administration is available in both the traditional and online platform. The program is available to a student wishing to earn just a certificate or to a student who wants to earn a spot in the master's of Public Administration program but does not meet the admission criteria. The Certificate requires the completion of any six of the core MPA courses with a grade of B or higher in all six courses (see MPA course listing (p. 981)). Students who successfully earn a B or higher in all six core courses are then eligible to enroll in the Masters in Public Administration program.

Psychology

<http://www.psy.miami.edu>

Dept. Code: PSY

Complete details about the Psychology Graduate Program, including description of our three graduate divisions (Adult, Child, and Health), faculty research interests, and admission requirements, can be found at our website listed above.

Master of Science in Psychology

- M.S. in Psychology (p. 986)

Doctoral Program in Psychology

- Ph.D. in Psychology (p. 985)

Certificate in Applied Behavior Analysis

- Certificate in Applied Behavior Analysis (p. 986)

Ph.D. in Psychology

1. The principal goal of the graduate program in Psychology is that of preparing the student for a career contributing to the growth of scientific knowledge in psychology.
 2. Applicants for admission to graduate status in psychology shall have
 - a. a minimum average of B over-all
 - b. at least 18 credit hours of psychology that must include courses in Introductory Psychology, Statistics, and Experimental Psychology or Research Methods.
 - c. Students lacking the necessary preparation must ordinarily make up deficiencies prior to admission to the Graduate School.
 3. All applicants must present the Graduate Record Examination (Aptitude Tests; Advanced Test in Psychology preferred). In all cases admission to graduate degree programs in Psychology is competitive, since available resources do not permit admission of all qualified applicants.
 4. The Ph.D. programs are categorized into three Divisions: *Health Psychology* (including Health Clinical Psychology, Behavioral Medicine, and Behavioral Neurosciences); *Child Psychology* (including Clinical Child Psychology, Pediatric Health Psychology, and Applied Developmental Psychology); *Adult Psychology* (including Adult Clinical Psychology). All clinical Ph.D. programs in Psychology require a minimum of 72 credit hours, including thesis and dissertation credit hours. Non-clinical programs require a minimum of 60 credit hours.
 5. PSY 680 and PSY 681 will not be counted toward the 72 credit hour minimum.
 6. A Master of Science in Psychology based upon 24 credit hours of course work and 6 credit hours of Master's thesis research is required in all programs.
 7. In cases in which a student has a prior graduate degree, the number of credit hours required for the Ph.D. may be reduced at the discretion of the Department.
 8. All programs in Clinical Psychology require an internship.
- All clinical students must successfully complete:

Code	Title	Credit Hours
Foundation Courses		
PSY 604	Cognition and Emotion	3
PSY 605	Cognitive Neuroscience	3
PSY 614	Diversity issues in psychology	3
PSY 620	Advanced Developmental Psychology	3
PSY 625	Social Psychology	3
PSY 640 or PSY 641	Adult Psychopathology Child and Adolescent Psychopathology	3
Methodological Courses		
PSY 631	Psychological Statistics, Research Methods, and Design	3
PSY 632	Multiple Regression and Multivariate Statistics	3
PSY 633	Structural Equation Modeling	3
Total Credit Hours		27

Requirements for Cognitive Neuroscience Track (Non-clinical)

- a. A minimum grade average of B is required for all students.
- b. All students seeking an advanced degree in Psychology must participate substantially in the teaching of course offerings in the Psychology Department as an essential part of their education.

Certificate in Applied Behavior Analysis

<http://www.psy.miami.edu/aba/>

The Post-Baccalaureate Certificate Program in Applied Behavior Analysis (ABA) is a full-time graduate program designed for students who have earned a bachelor's degree in psychology or a related field and are seeking further training and/or professional certification in ABA. It is a 24-credit program designed to be completed in two consecutive semesters (fall/spring). Students who complete the certificate program will meet all the university instructional coursework and experience requirements necessary to take the exam to become a Board Certified assistant Behavior Analyst (BCaBA).

Curriculum Requirements

Code	Title	Credit Hours
Classroom Based Courses ¹		
PSY 666	Concepts and Principles of Applied Behavior Analysis	3
PSY 667	Assessment and Treatment of Language Learning	3
PSY 668	Functional Assessment and Treatment of Aberrant Behavior	3
PSY 669	Professional Issues in Designing and Monitoring Interventions	3

Sociology

<http://www.as.miami.edu/sociology>

Dept. Code: SOC

Graduate Program Overview

The Graduate Program in Sociology at the University of Miami is intended to equip students with the theoretical, methodological, and analytical tools required for research and teaching. The Graduate Program in Sociology is designed for students seeking the Doctor of Philosophy (Ph.D.) in Sociology. The Master of Arts (M.A.) degree is earned during the first portion of the program. At the doctoral level, graduate students are encouraged to choose two concentrations from three substantive areas:

1. Criminology,
2. Race & Ethnic Relations, and Immigration
3. Medical Sociology.

Although the strengths of the department lie within these major programmatic fields, students may also develop a course of study that meets unique research interests and career objectives. Assistantship and fellowships are awarded each academic year to cover tuition and living expenses.

For more details, consult the Guide to Graduate Study in Sociology available through the Sociology Department (<http://www.as.miami.edu/sociology>).

Masters Program in Sociology

Research Institutes

Institute for the Study of Quality in Manufacturing and Service

The University of Miami Institute for the Study of Quality in Manufacturing and Service (UMISQ) exists to advance the theory and practice of Quality Science. Its mission is to promote the improvement and innovation of quality on local, national, and international levels through the acquisition, dissemination, and application of knowledge in the areas of science, technology, and management as related to Quality Science in general, and Lean Six Sigma Management specifically.

Objectives

1. To conduct research in Quality Science and to publish its results through appropriate professional and academic outlets.
2. To educate and train management, labor, UM students, and others in the theories and practices of Quality Science in general, and Lean Six Sigma Management specifically.
3. To create internships for M.B.A. students in which they can solve real world problems using Quality Science theory and practice in general, and Lean Six Sigma management theory and practice in particular.
4. To provide a vehicle for Lean Six Sigma certifications.

The Institute pursues its objectives through involvement of faculty, students, and client organizations in all sectors of the economy.

Intelligent Computer Systems Research Institute

The Intelligent Computer Systems Research Institute is a center for research and information dissemination within the field of information business technology. The institute focuses on multi-disciplinary topics such as Big Data, Analytics, Cloud Computing, Artificial Intelligence, Machine Learning, Agent technology, 'The Internet of Things', Health and Legal Informatics, Business Intelligence, and embedded systems.

Objectives

1. To encourage partnerships between academia and industry. Corporate partners can provide data, field studies, test environments, and other resources through which leading theoretical work can be developed tested in an applied environment.
2. To conduct research for publication in leading academic and industry related journals, as well as working papers.
3. To encourage industry partners to work with students through the creation of internship positions. These internships provide students the opportunity to act as a link between the teaching and research of the institute's members and the field based applied environment.

Graduate Business Student Association

The Graduate Business Student Association (GBSA) is a professional and social student-run organization. All graduate business students become members once enrolled in a business master's or doctoral program and are encouraged to attend meetings and events. The GBSA organizes activities and events aimed at strengthening networking within the graduate business student body and the business community while enriching the academic and social experiences of its members. The GBSA is governed by a committee that consists of a president, vice president, treasurer, secretary, marketing director, community service director, networking director, wellness and athletics director, and a Graduate School Association senator. In addition, cohort representatives are elected per program to serve as a liaison between their respective cohort and the committee.

Financial Assistance

Graduate Business Scholarships and Fellowships

There are a limited number of merit-based graduate business scholarships which are awarded at the time of admission to qualified full-time MBA students entering in the fall semester only. A graduate business scholarship covers a portion of tuition for the MBA degree. Graduate business scholarships are not automatically renewed.

In addition to graduate business scholarships, there are a limited number of Emery Means Findley, Jr. Fellowships and scholarships which are awarded by Graduate Business Programs to applicants with outstanding academic credentials. Any applicant who wishes to be considered for a graduate business scholarship or a fellowship, must indicate this in the space provided on the application. Awards are available to both domestic and international students.

There may be a limited number of merit/need-based scholarships which are awarded following admission to Professional and Executive programs. Details on how to apply for these scholarships are provided at the time of admission.

Donor Scholarships

Several endowed scholarships are made available to incoming graduate business students through the generosity of alumni and friends of the University of Miami Business School. These donor scholarships are for the purpose of recruiting students of high academic merit. The total number and amount of scholarship awards vary from year to year.

Scholarships will be awarded based on the recommendations of the Faculty Admissions Committee on a first come, first served basis. Since the number of scholarships is limited, students who meet the minimum criteria are not guaranteed a donor scholarship award.

We regret that a student may be ineligible for financial awards if he/she receives tuition benefits from the University of Miami or accepts any assistantship, scholarship, grant or fellowship from the University of Miami, in addition to our offer. This includes employees, their spouses, and dependents.

BANK OF AMERICA - ENDOWED BUSINESS SCHOLARSHIPS¹

Criteria: A graduate business school student based on a combination of scholarship and financial need, who will preferably specialize in Finance, Accounting, or Management.

JACK R. BORSTING - GRADUATE SCHOLARSHIP ENDOWMENT

Criteria: Outstanding candidate for a master's level business degree.

RYDER/PATRICK J. CESARANO – ENDOWED SCHOLARSHIP¹

Criteria: MBA student with a concentration in finance or management science/operations research. Based on academic excellence and financial need.

PAT & LON WORTH CROW - SCHOLARSHIP ENDOWMENT¹

Criteria: Graduate business student specializing in Finance, who possesses several years of work experience, preferably with an expressed interest in a career in banking or a banking-related field. U.S. citizen, preferably resident in South Florida community.

EMERY MEANS FINDLEY, JR. – ENDOWED GRADUATE FELLOWSHIPS IN BUSINESS

Criteria: Outstanding candidates for Graduate Business Programs.

DEAN M. FOGEL BUSINESS ENDOWED SCHOLARSHIP

Criteria: Graduate business student with financial need and priority is for a United States veteran.

ALBERT AND ESTHER GREEN ENDOWED SCHOLARSHIP

Criteria: Graduate business student with a health challenge, or student studying or working in Health Administration.

ALLAN M. HERBERT & PATRICIA M. HERBERT – ENDOWED GRADUATE BUSINESS SCHOLARSHIP¹

Criteria: Outstanding graduate business student, well-rounded, willing to finance his/her own education, and who appreciates the value of work and strives to combine study, work and extra-curricular activities.

JAMES W. McLAMORE – GRADUATE BUSINESS FELLOWSHIPS

Criteria: To recruit and retain outstanding graduate business students.

E. BRUCE MCLAUGHLIN & CYNTHIA M. SWOL - ENDOWED SCHOLARSHIP IN MARKETING¹

Criteria: Graduate business student with concentration in Marketing, who has significant work experience prior to entering the MBA program. U. S. citizen, with preference given to female students with unmet financial need.

MERRILL LYNCH & CO. FOUNDATION, INC. – FELLOWSHIPS IN INTERNATIONAL FINANCE

Criteria: Graduate business student preparing for a career in International Finance.

CHARLES & ROSE NATIELLO AND THOMAS A. NATIELLO, JR. BUSINESS SCHOLARSHIP

Criteria: Full-time Graduate Business student who has completed one year and is enrolled in a two-year program with a 3.5 GPA or higher.

PIECHOSKI FAMILY GRADUATE BUSINESS FELLOWSHIP

Criteria: Outstanding graduate business student.

SOUTHEAST BANKING CORPORATION FOUNDATION – ENDOWED SCHOLARSHIPS¹

Criteria: Graduate student in the MBA program who is a Florida resident. Based on academic excellence and financial need.

SOUVIRON FAMILY SCHOLARSHIP - Annual MBA Scholarship

Criteria: The annual scholarship is for a MBA student with financial need with a preference for an Eagle Scout, if someone meets that criteria. If not, a qualified MBA student with need.

¹ Essay Required: In 300 words or less, please explain why you need financial assistance to complete your MBA degree. The essay must be included with your application.

Various other donor scholarships are available based upon need, merit, or other specified criteria.

Ziff Graduate Career Services Center

The Ziff Graduate Career Services Center's mission is to provide the most current career services and resources through systems that support career advising, coaching, and student counseling. The Ziff Graduate Career Services Center supports all University of Miami Business School graduate students who seek career guidance, coaching, and targeted job search information. The Ziff Graduate Career Services Center continues to build, foster, and maintain partnerships and corporate relationships with the South Florida business community, as well as relevant national and global business entities to expose and engage students in their chosen career interests.

The Ziff Graduate Career Services Team is committed to providing each student with a personalized career plan along with the requisite resources and skills needed to be competitive in their career path of choice. Developing graduates who will become principled leaders with innovative ideas in a more global society is the most important challenge that the Ziff Team seeks to meet for our students' career readiness.

The Ziff Graduate Career Services Team is the student's front-line resource to assist in the development of an effective career strategy and the personal branding activities and initiatives that will prepare them for a successful job search at all levels of their career. The personal branding efforts include a strategic resume, development of a LinkedIn profile, honing of interview skills through practice and mock interviews with selected employers, faculty and staff, networking opportunities and practices, understanding the generation and maintenance of contacts, and preparation for a successful career transition. Highlighting leadership, organization, and continuous career management while developing and enhancing an array of competencies and skills is central to the mission of the Ziff Graduate Career Services Center.

On Campus Corporate Recruiting, Interviews, and Making Connections

The Miami Business School recruiting initiatives begin in the Fall semester, from mid-September through mid-December, and continue into the Spring semester from mid-January through May. The Ziff Graduate Career Services Center provides ongoing events including Information Sessions, Workshops, Guest Speaker Events, Alumni Engagement, and On Campus recruiters – all in an effort to expose students to Talent Acquisition Professionals, C-Suite executives, Executive and mid-Level Executive Recruiting entities, and real-world executives who contribute their time to present a variety of career pathways and experiences for graduates.

Mock interviews are scheduled in the Fall and Spring to ensure employers are available to students so they may gain experience with their presentation and interviewing skills. The mock interview is a simulation of a job interview and includes a conversational exercise that replicates a real-life interview to the extent possible, or represents a practical scenario to provide experience for candidates in a non-threatening scenario. All participating students receive valuable and objective feedback in writing based on their unique interview experience.

Networking Strategies, Approaches and Practices

Students are encouraged to join the Miami Business Clubs and Groups via LinkedIn, Facebook and other social media outlets as an engaging way to reach out to contacts, companies, classmates, colleagues, UM alums, faculty, and employers to build their own unique network. The ZIFF/ SYMPPLICITY website (<https://sba-miami-csm.symplicity.com>) and the accompanying smart phone application, *Careers by SYMPPLICITY*, provides students with notices, agendas, job listings, itineraries, seminars, and work sessions key to their major. The Ziff team compiles and disseminates a weekly *eNEWS* publication available on the app. Additionally, student emails are sent allowing each to stay abreast of all current and future career opportunities and events.

The University of Miami Alumni Association (<http://www.miamialumni.net>) and the Miami Business School (<http://www.bus.miami.edu/alumni>) allows students to search for classmates, update their contact information, and make valuable career connections. These resources are continuously evolving to provide access to the ever-changing social media marketplace.

The Ziff Graduate Career Services Center also provides networking opportunities through on campus career fairs, guest speaker series and events that encourage students to engage employers, recruiters and other working professionals in a variety of disciplines, and sectors of business and industry. Additionally the Ziff website provides access to UM-MBS-MBA/Masters graduates who make themselves available as a resources for students.

Internship Opportunities and Experience

The Miami Business School encourages students to augment their classroom experience and curriculum through participation in an internship during Summer, Spring, and Fall semesters (if students are eligible). The Ziff Graduate Career Services Center recruits a variety of employers to provide unique and targeted internship opportunities for students - all identified and advertised on the Ziff website.

An internship assignment is a key positioning element for the post-MBA and post-Masters candidate's career. The internship search is the graduate student's main focus at the beginning of their enrollment in their specific program. The Ziff team works with all graduate students to target their career choices and optimize the type of resources necessary, while providing counseling to improve the student's fit for employers.

Registration for Ziff

Miami Business School graduate business students who are seeking employment opportunities post-graduation are required to register on the Ziff website to establish an individual account that includes personal and academic profiles, as well as career goals and objectives, in order to access job postings, workshops, events, coaching, advising, counseling, interviewing strategies, and more. The Ziff Graduate Career Services Center utilizes a software application that allows students to download the Careers by SYMPLICITY app for both iPhone and Android smart phones and any tablets. Students receive alerts about upcoming events and activities, resources for job searches, other career-related opportunities and initiatives, as well as links to employment search engines by major or discipline, while affording an array of other online resources in preparation for job searches and interviewing.

The Ziff team has engaged a few recent software applications that are, like Facebook and LinkedIn, synced with the Careers by SYMPLICITY app for resume optimization and professional objective feedback, as well as a software application for seeking global job opportunities.

Online Resources

The Center's online portal is where students can access an array of tools for career resources, tools for conducting and tracking employment searches and status, networking activities, career fairs, informational sessions, national and regional conferences, professional networking opportunities and corporate presentations - all of which are also promoted on the student's calendars. Updated and new employment search engines and resources and the links to the most efficient website tools are available to students to search types of companies and industries as well as geographic locations, position descriptions, company career requirements and benefits - including compensation packages and qualifications.

Student Responsibilities

Ultimately, success in obtaining a job is defined by the student's own activities, based on each individual's unique set of circumstances, discipline, geographic preferences, type of industry or business, as well as their short and long term goals and objectives. With the Ziff Graduate Career Services Center as a partner, students can create a successful personal branding effort that will connect a network of contacts that will lead to interviews and job offers. Participation in on-campus recruiting activities, Club activities, graduate and on-campus-wide business career fairs, relevant workshops and other MBS-sponsored events is encouraged to broaden students' exposure to individuals and environments that can assist them in their personal job search initiatives.

Students are required to meet with a Ziff Graduate Career Services Center career advisor in their first term to discuss career goals and to develop a personalized career plan that will lay out a strategy and time frame for their goals. This Career Action Plan document and the ongoing strategies and management will be built through numerous advising/coaching sessions, workshops, incorporation of valuable feedback from Miami Business School business partners, faculty and networking contacts - as well as participation in both Miami Business School and external events or initiatives.

International students have the additional responsibility of clarifying their work authorization and visa information in order to secure internships and full or part-time positions. The International Student and Scholar Services Department (ISSS) (http://www.miami.edu/sa/index.php/student_services-1) will be of invaluable assistance.

Please note, the Ziff Graduate Career Services Center supports career outcomes, however, it is the students' personal commitment that truly leads to career success.

The Mentor Program

1. The Miami Business School Mentor Program is designed to enhance the classroom experience by matching students with professionals who have experience and expertise in the students' area of career interest, or are versed in areas of professional development.
2. Through personal interaction with experienced business professionals, students gain an understanding of corporate culture, career directions, and networking. Students also have the opportunity to interact with other mentors by attending regularly scheduled round tables, hosted by the School.
3. Graduate business students are encouraged to participate.
4. Applications are available on our website. (<https://miamimentoring.chronus.com/about>)

Doctoral

Doctoral

The doctoral program at the University of Miami Business School links world-class faculty with accomplished PhD candidates to prepare them for careers in academic research and teaching. The PhD in Business and PhD in Economics programs, combine interdisciplinary study and research with one-on-one mentoring from faculty experts in your area of interest.

Doctorate of Philosophy in Business

Doctor of Philosophy in Business

The PhD in Business program combines interdisciplinary study and research. It is designed to prepare students for careers in academic research and teaching. Students follow specialized programs of study under the guidance of faculty experts. In addition, they have the opportunity to participate in cross-disciplinary training. The curriculum will also equip students with the skills and experience necessary for academic placement in the world's top research universities.

A minimum of 60 credit hours are required to earn the PhD in Business degree. The program requires year-round, full-time study in order to maximize interaction between faculty and students. Students are expected to interact and begin research projects with the faculty upon entering the program.

The requirements for the PhD in Business degree are the same as those listed in the general section.

Students may choose to concentrate their study in:

- **Accounting**
- **Finance**
- **Management Science**
- **Marketing**
- **Operations Management**
- **Organizational Behavior**
- **Strategy/International Business**

Required “Core” Courses

*These courses can be waived by consent of the appropriate department; waiver is granted by issuing transfer credit hours for similar courses taken at the advanced graduate level at accredited institutions.

There are two streams of “core” courses for students, each comprising of five courses.

Stream I

(Accounting, Finance, Management Science, Marketing-Quantitative, and Operations Management)

Code	Title	Credit Hours
ECO 600	Econometrics	3
ECO 601	Graduate Macroeconomic Theory	3
ECO 602	Advanced Microeconomic Theory	3
ECO 612	Economic Strategies for Firms and the Industry	3
ECO 620	Advanced Econometrics	3
Total Credit Hours		15

Stream II

(Marketing-Consumer Behavior, Organizational Behavior, Strategy/International Business)

Code	Title	Credit Hours
PSY 625	Social Psychology	3
PSY 631	Psychological Statistics, Research Methods, and Design	3
PSY 632	Multiple Regression and Multivariate Statistics	3
SOC 610	Advanced Research Methods	3
SOC 616	Social Psychology: Sociological Perspectives	3
or ECO 602	Advanced Microeconomic Theory	
Total Credit Hours		15

Area of Concentration Courses

*These are to be decided by the student and faculty.

*Students in the Management Science concentration are required to complete at least 30 graduate credits in STEM courses.

In total, a minimum of 33 credit hours in concentration courses are to be taken, up to 15 of which may be satisfied by transfer-credit hours. Some Departments may require students to complete a minor field. If so, their major field must consist of a minimum of 24 credit hours (with at least 15 credit hours completed in doctoral program residence at the University of Miami). The minor field would then consist of 9-12 credit hours in an area outside of the major concentration (with a minimum of 9 credit hours taken in doctoral program residency at the University of Miami).

Dissertation Research

12 credit hours are to be taken at a minimum—two semesters of 6-9 credit hours each. No transfer credit is given for dissertation or prior research.

Total Credit Hour Requirements

In total, a minimum of 60 credit hours are required for receiving the Ph.D. degree in Business:

Code	Title	Credit Hours
"Core" courses		15
"Concentration" courses		33
Dissertation research		12
Total Credit Hours		60

To this total must be added any prerequisite courses (as outlined above), with transfer- credit hours being subtracted.

Doctorate of Philosophy in Economics

The Ph.D. program in Economics prepares the recipient for a variety of research-oriented career opportunities, including university research/teaching, government employment, and a host of employment opportunities in the private sector

* Applicants for admission to graduate study in Economics should have an extensive background in Economic Theory and Quantitative methods.

MBA Programs

MBA Programs

The MBA (Master of Business Administration) at the University of Miami Business School prepare students for leadership in today's rapidly changing global economy. In order to compete and succeed in the 21st century, business leaders must not only be able to adapt to change, they must *drive* change. At the Miami Business School, we not only prepare students for careers in management and leadership positions, we produce creative thinkers, strong communicators, and the best negotiators.

MBA programs are offered in different formats to serve the diverse academic and business needs of our constituents including full time, part time, hybrid and online.

Executive and Professional MBA Programs

Executive MBA and Professional MBA Programs

The University of Miami Business School offers Executive and Professional MBA programs that are designed for accomplished professionals who are ready to take their career to the next level without interrupting their career. Participants gain insight and understanding into the business environment by gaining a more global outlook and are better equipped to meet the challenges of today's business world. They become better negotiators, strategic thinkers, and more effective team players in a variety of business related situations. Programs include:

- Professional MBA
- Global Executive MBA
- Executive MBA in Health Sector Management and Policy
- Miami Executive MBA en Español
- Miami Executive MBA for Artists and Athletes

Miami Executive MBA en Español

Miami Executive MBA en Español

The University of Miami Business School's Miami Executive MBA en Español is designed for highly experienced Spanish-speaking executives, entrepreneurs and other professionals in Latin America. The Miami Executive MBA en Español enables participants to broaden their business knowledge, improve their management skills and strategic decision-making abilities, and expand their professional network through close interaction with a select group of business leaders from across Latin America. The Miami Executive MBA en Español is taught in seven, two-week sessions offering a total of 15 courses of which 13 take place on campus in Coral Gables and two abroad during a Residential Session Abroad. The courses are given in sequence; the same group of students advances together throughout the entire program. A two-week residential session abroad provides MBA students with the opportunity to gain international business perspectives, first-hand. As part of this program, students may receive lectures on pressing international business matters, meet prominent local business leaders, tour companies and manufacturing operations, and immerse themselves in a country's cultural, social, and business environment. All classes are taught entirely in Spanish, with some reading materials in English, so reading-level knowledge of English is required.

To obtain detailed program admission curricula information please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (<http://www.bus.miami.edu/graduate-programs/executive-mba/global-emba>).

Health Sector Management and Policy

The University of Miami Business School Executive MBA in Health Sector Management and Policy Program prepares graduates for positions of leadership in health care and health-related organizations. The program focuses on the post-graduate educational needs of professionals already fully employed in the health care industry, as well as those aspiring to careers in the field. Combining its strengths in graduate business education and its close relationships with the South Florida health care community, the program teaches practical administrative skills as well as broad strategic and theoretical perspectives to students who wish to expand their knowledge of management and administration as applied to the health care industry.

To obtain detailed program admission and curricula information please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (<http://www.bus.miami.edu/graduate-programs/executive-mba/health-management>).

The Miami Executive MBA for Artists and Athletes (hybrid)

The Miami Executive MBA for Artists and Athletes is an accredited track of our existing Executive MBA program which combines classroom courses and online distance learning to allow both active and retired NFL players, as well as other athletes and artists the ability to take courses while tending to their regular daily activities or business commitments. This is a very important population, many of whom are already executives familiar with branding, marketing, media, and public relations. The participants in this Program would have demonstrated working in collaborative environments. They also possess a highly disciplined work ethic and perseverance to succeed.

The EMBA for Artists and Athletes track builds on these daily features of life and provides a framework for participants to capitalize on their experiences and become successful managers and business leaders during and/or after their professional sports and entertainment days. These individuals have to learn to transition their playing skills into practical leadership and business skills. The Artists and Athletes track provides participants with the industry exposure and extensive network base, both key for elevating their careers and leveraging their personal brands. Similar to our other EMBA tracks, the EMBA for Artists & Athletes is lock-step in nature. Participants progress together through a sequential pattern of courses. They will obtain their MBA from UM after a successful completion of 42 credits over an 18 month period. The course curriculum is adapted from the EMBA and Professional MBA programs with some adaptations with a similar structure to our Global Executive MBA Program. The Artists and Athletes track consists of 6 residencies in an 18 month period (33 credits) and the online distance learning module (9 credits) for a total of 42 credits.

To obtain detailed program admission and curricula information please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (<http://www.bus.miami.edu/graduate-programs/executive-mba/emba-artists-athletes>).

Global Executive MBA

The Global Executive MBA program is aimed at senior executives who want to further their business acumen and enhance their understanding of conducting business globally. The format flexibility and length of the program will permit students to earn their MBA. The 17-month program blends face-to-face on-campus modules, which include executive presentations, case studies and group projects, with distance learning. It covers four focus areas (Global Strategy and Execution; Managing Global Operations and Decision Making; Global Multi-Cultural Leadership; and Entrepreneurship, Innovation and Technology) through eleven courses or modules, as well as an Integrated Project carried out in nine on-campus residencies and eight Inter-Residencies (distance-learning). The Global EMBA is lock-step in nature. Students will progress together through a sequential pattern of courses. The students will obtain their MBA after the successful completion of 45 credit hours over an 17 month period.

To obtain detailed program admission and curricula information please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (<http://www.bus.miami.edu/graduate-programs/executive-mba/emba-americas>).

Full Time MBA Programs

Full-Time MBA Programs

The University of Miami delivers full-time MBA programs that are innovative, flexible and career focused. They are designed for those who either have an undergraduate background in business, or are from other industry areas interested in a career in business. The curriculum not only prepares students for leadership in business, it adds a valuable dimension to other professions. Students become better negotiators, strategic thinkers, and more effective team players in a variety of business related situations. Programs include:

- Two-Year MBA
- One-Year MBA
- Accelerated MBA in Real Estate
- JD/MBA (Joint Degree)
- MD/MBA (Joint Degree)
- JD/LLM/MBA
- BArch/MBA (Joint Degree)

Accelerated MBA in Real Estate

Accelerated MBA in Real Estate

The Miami Business School offers an accelerated MBA program with a concentration in real estate highlighted by two internship opportunities. Bringing together the School's strengths in management education with the strengths of the UM School of Architecture in new urbanism, the program prepares students to succeed in commercial real estate market careers. This program is designed to meet the needs of the student with an undergraduate degree in business. Applicants must demonstrate successful completion of the core business courses: Financial and Managerial Accounting, Microeconomics, Macroeconomics, Statistics, Calculus, Organizational Behavior, Operations Management, Marketing, and Finance.

To obtain detailed program admission information, please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (http://bus.miami.edu/graduate-programs/full-time-mba/real-estate/index.html?utm_source=undefined&utm_medium=undefined&utm_campaign=undefined&utm_term=undefined&utm_content=undefined).

BArch/MBA

The Bachelor of Architecture/Master of Business Administration is an exciting joint venture with the Miami Business School and School of Architecture, which will allow students to earn a Bachelor of Architecture as well as a Master of Business Administration. The joint degree offers students the unique opportunity to complete the two degrees in six years, saving an entire year by combining the programs.

Students will begin taking Saturday graduate level business courses during the fourth year of their architecture program. Both degrees are fully accredited by their respective accrediting bodies – the NCARB and AACSB International.

To obtain detailed program admission information, please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (<http://www.arc.miami.edu/academics/undergraduate/bachelor-of-architecture-mba>).

JD/LLM/MBA

JD/LLM/MBA

Triple Degree Program: A Specialized Option for Business Majors

The University of Miami School of Law and the Miami Business School have created a triple degree program - a JD, an LLM in Tax or Real Property Development, and an MBA- which can be completed in just four years and two summers.

This program offers a combination of legal and business degrees to students who were undergraduate business majors. These credentials are ideal for anyone with a long-term goal of servicing top corporate clients or becoming a senior executive at a bank, real estate company, or financial institution. They also serve as significant assets in today's competitive marketplace to any attorney starting out in tax or real estate law.

To obtain detailed program admission, please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (<http://bus.miami.edu/graduate-programs/full-time-mba/jd-llm-mba>).

JD/MBA

Juris Doctor /Master of Business Administration

The University of Miami School of Law and the Miami Business School offer a joint degree program in law and business. Upon completion of this program, a student earns the Juris Doctor degree from the School of Law and a Master of Business Administration degree from the Miami Business School.

Students who apply for the joint J.D./M.B.A. program must apply to both the School of Law and the Miami Business School. The applicant must achieve a qualifying score on the Law School Admissions Test (LSAT) and the Graduate Management Admissions Test (GMAT) for admission to the respective schools. The applicant must notify both schools that he or she is applying for the joint J.D./M.B.A. program, and in order to remain in the joint program, the student must meet minimum standards of both the School of Law and the Miami Business School.

To obtain detailed program admission information, please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (http://bus.miami.edu/graduate-programs/full-time-mba/jd-mba/index.html?utm_source=undefined&utm_medium=undefined&utm_campaign=undefined&utm_term=undefined&utm_content=undefined).

In addition to all requirements for the J.D degree., students in the joint J.D./M.B.A. program must complete the following courses:

LAW 406 - Professional Responsibility

And two of the following:

LAW 100 - Business Associations

LAW 101 - Commercial Law

LAW 105 - Federal Income Tax

MD/MBA

MD/MBA

The University of Miami Business School offers a joint MD/MBA degree program in partnership with the University's Miller School of Medicine (<http://www.med.miami.edu>). The business curriculum prepares future physicians for the business complexities related to running a private medical practice or heading a group practice, and prepares medical students for careers in health sector management, leadership, and policy.

The MD/MBA program adds an additional year to the four-year medical school curriculum. The MBA coursework ranges from financial reporting and corporate strategy to the legal aspects of health administration.

MD students are eligible to apply to the MD/MBA program during their 3rd year of Medical School and will be required to submit a Full-Time MBA online application and the GMAT (<http://www.mba.com>) to be considered for the program.

To obtain detailed program admission information, please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (<http://bus.miami.edu/graduate-programs/full-time-mba/md-mba>).

One Year MBA

One Year MBA Program

The One-Year MBA program at the University of Miami Business School is offered once per year in January. This program is innovative, flexible, and career focused. It is designed to meet the needs of the student with an undergraduate degree in business, who graduated from an accredited university. The 35-credit curriculum is cohort based and completed in one year.

To obtain detailed program admission information, please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (<http://bus.miami.edu/graduate-programs/full-time-mba/one-year-mba>).

Two Year MBA

Two Year MBA Program

The full-time two-year MBA Program is innovative and career focused. It is designed to meet the needs of undergraduate students who have studied in any discipline. In addition to preparing business leaders of the future, the curriculum adds a valuable dimension to those seeking to build their business acumen for a wide variety of future career opportunities.

UM's full-time MBA program is a 56 credit hour, lock-step program that is completed in less than two calendar years. Students typically enroll in elective courses during the second year of the program. In addition, students may enroll in a foreign language class, with no additional charge.

To obtain detailed program admission information, please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (<http://bus.miami.edu/graduate-programs/full-time-mba/two-year-mba>).

Specialized Master Degrees

Specialized Master Degrees

The Miami Business School offers a premier catalog of master's degree programs geared toward specific career paths. Each of these full-time programs can be completed in less than one year. Students will focus on in-depth business analysis as well as enhancing their proficiency in topics like accounting, finance, and organizational leadership. A new skill-set in a specialized area will make students more valuable to their organizations and more competitive in the marketplace.

- M.H.A. in Health Sector Management and Policy
- Master in International Business
- Master of Accounting
- Master of Arts in Economics
- Master of Professional Accounting (online)
- Master of Science in Business Analytics
- Master of Science in Finance
- Master of Science in Finance (online)
- Master of Science in Management (Leadership)
- Master of Science in Taxation

Master in International Business

Master in International Business

The Master in International Business (MIB) program seeks to develop global leaders. To this end, it offers to a select group of globally-minded students from throughout the world with rich experiential learning opportunities in Miami and other locations worldwide. The program incorporates a rigorous academic curriculum focusing on best practices by both global startups and leading multinationals in addressing their emerging opportunities and challenges. Students are exposed to South Florida's rich multicultural business community and the hundreds of international conferences that it hosts every year. Students may focus their professional development efforts on developing both regional competencies and functional expertise of their choice. MIB program activities in and out of classrooms are designed to help its students bond, as well as expand their professional network with participants of other graduate business programs.

To obtain detailed program admission information, please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (<http://bus.miami.edu/graduate-programs/specialized-masters/international>).

Master of Accounting

The Master of Accounting (MAcc) and Master of Science in Taxation (MST) programs are similar in that they offer an opportunity to concentrate in accounting, but they differ in degree of specialization and career path orientation. The MAcc offers two separate tracks in assurance and corporate accounting while the MST is designed for students interested in careers in taxation. In addition to the traditional one year of full-time study beyond the Bachelor's level, the MAcc and the MST programs are offered as accelerated programs for University of Miami undergraduates.

Scholarships

University of Miami School of Business - Alumni Association Endowed Accounting Scholarships are available for students pursuing Graduate Studies in Accounting. Various other scholarships and assistantships may be available.

Accounting Summer Intensive Program

The Accounting Summer Intensive Program is designed for students who hold at least an undergraduate business degree in a field other than accounting from an accredited college or university and for foreign students.

Non-Accounting Majors

Students that have a non-accounting degree, preferably in business, can apply for admission to our Master of Accounting (MAcc) or Master of Science in Taxation (MST) and Summer Intensive Program. Applicants to the MAcc or MST program will automatically be considered applicants to the Accounting Summer Intensive Program if their undergraduate degree is not in accounting. Summer Intensive students entering the MAcc or MST program must also take an advanced taxation course (ACC 639) which is offered following the Summer Intensive Program in an intersession format in August before the start of the fall semester. Although MST students must complete advanced taxation in the summer, MAcc students may complete the course in the summer or in term one of the spring semester.

Foreign Students

The Accounting Summer Intensive Program is also designed to meet the needs of foreign students. Foreign students must have successfully completed two semesters of intermediate accounting, one semester of cost accounting, one semester of auditing, one semester of accounting information systems and one semester of tax at a U.S. university accredited by the AACSB or alternatively, must attend the Summer Intensive Program before enrolling in graduate accounting courses. Foreign students entering the MAcc or MST program must also take an advanced taxation course (ACC 639) which is offered following the Summer Intensive Program in an intersession format and in term one of the spring semester. Foreign applicants to the MAcc program will automatically also be considered applicants to the Accounting Summer Intensive Program.

Program Schedule

The Accounting Summer Intensive Program is fast-paced and requires full-time attention. As its name implies, the program is intensive and not designed for students that are working even part-time. The 7-week program begins each year about July 1 and continues through mid-August and consists of two 3½-week modules. Three 2-credit courses are included in each module. Students who want to take any additional graduate

tax classes should also plan to take the advanced taxation course (ACC 639) which is offered following the Summer Intensive Program in a 9-day intersession format in August before the start of the fall semester.

Program Prerequisite Accounting Courses

Students entering the program are required to have previously completed introduction to financial accounting and management accounting at a US or foreign university.

Summer Intensive Program Course Offerings

The Summer Intensive Program includes the following six 2-credit upper division accounting courses that are prerequisites for graduate study.

Code	Title	Credit Hours
ACC 632	Intermediate Accounting I	2
ACC 633	Intermediate Accounting II	2
ACC 634	Cost Accounting	2
ACC 635	Auditing	2
ACC 636	Accounting Systems	2
ACC 673	Taxation for Business and Investment Decisions	2

Note that the Summer Intensive Program does not include an advanced taxation course (the equivalent of ACC 404) which is a required prerequisite for most tax courses in the MST program. Accordingly, in addition to the six summer intensive courses, students entering the MST program must complete ACC 639 which is offered following the Summer Intensive Program in an intersession format in August before the start of the fall semester.

Entering the MAcc or MST Program

Upon successful completion of the intensive program, students immediately enter the MAcc or MST program in the fall semester. To graduate with their MAcc or MST degree, students must complete 30 credits beyond the 12-credit intensive program and may graduate in as little as two semesters, assuming they are full-time students.

CPA Licensure Requirements

Most of our students intend to become qualified as Certified Public Accountants (CPA). While the CPA exam is a national exam administered by the American Institute of Certified Public Accountants, its execution and CPA licensing practices are governed by state law. For example, some states require a certain number of credit hours in particular subjects and have overall accounting and business credit hour requirements. As such, you should check with the state in which you intend to practice to determine what the specific course requirements are for that state. Our department is unable to make a determination of your eligibility to sit for the CPA exam. This can only be done by the appropriate state board. Please find the licensure requirements for the State of Florida, here (<http://www.myfloridalicense.com/dbpr/cpa/licensure.html>).

For your convenience, the Florida rules that apply to most individuals are summarized here. Please check the State of Florida Web site noted above for updates and rules which may apply in particular circumstances.

As of July 1, 2008 the Florida State Board of Accountancy (BOA) separated the requirements to become a Certified Public Accountant (CPA) into two parts: (1) the requirements to be eligible to take the CPA exam and (2) the requirements for licensure to practice as a CPA in Florida.

Requirements to Sit for the CPA Exam: To be eligible to take the CPA exam, applicants must have completed 120 semester hours including 24 semester hours of upper division (300-level or above) accounting to include auditing, cost and managerial accounting, financial accounting, accounting information systems, and taxation. Applicants must also complete 24 semester hours of upper division general business courses with some exceptions in that one microeconomics, one macroeconomics, one statistics, one business law, and one introduction to computers course may be lower division (freshman or sophomore level). As part of the general business hours, applicants are required to have a total of six semester hours of business law courses, which must cover contracts, torts, and the Uniform Commercial Code. Note that excess upper division accounting courses may be used to meet the general business requirement; however, elementary accounting classes are never acceptable for credit nor are courses for non-accounting majors and any MBA courses that are equivalent to elementary accounting.

The exam is offered in the following time periods; January – February, April – May, July – August and October – November. Note that applicants are not required to have a bachelor's degree in order to sit for the CPA exam.

Requirements for Licensure: In addition to passing all four parts of the CPA exam with at least a 75% within 18 month rolling period, the Florida State Board of Accountancy requires that applicants have completed a bachelor's degree plus an additional 30 hours for a total of 150 semester hours before you can become licensed as a CPA. One year of work experience under the supervision of a licensed CPA is now also required to become licensed. In addition to experience obtained in public accounting and government, Florida's 2008 legislative change also allows experience obtained in industry and academia. This experience may be obtained before or after sitting for the exam, however, all requirements to sit for the exam must be met before the work experience commences. If you fail to apply for licensure within three years of receiving the licensure package, (sent after you pass all four parts) the CPA grades expire and you have to retake the examination.

The 150 semester hours must include a minimum of 36 semester hours of upper division accounting courses and at least 39 semester hours of upper division (with some exception) general business courses. Excess upper division accounting courses may be used to meet the general business requirement. Courses for non-accounting majors and any MBA courses that are equivalent to elementary accounting are not accepted for this requirement.

Licensed in Another State: If you are licensed in a state other than Florida you can obtain a license in Florida by a process called endorsement. You must provide evidence of meeting all of the requirements in effect at the time of your application. In addition if you passed the exam more than two years before applying you must provide evidence of meeting continuing professional education requirements.

CPA Accreditation Requirements

The Florida State Board of Accountancy accepts degrees from schools accredited by the following associations : Middle States Association, New England Association, North Central Association, Northwest Association, Southern Association of Colleges and Schools, Western Association of Schools and Colleges, Association of Independent Schools and Colleges who have been approved by the Florida State Board of Independent Colleges and Universities, and Canadian Schools who have been approved by their provincial educational bodies. If you have graduated from a school or college which is not accredited by the above mentioned means, then you must use the provisions of F.A.C. 61H1-27.001 (5) (see below).

Applicants Who Have Graduated from Non-Accredited Schools (61H1-27.001) (5)

Applicants who have graduated from a non-accredited school may still qualify to sit for the CPA examination. The candidate must take 15 semester hours of graduate classes. Those must consist of at least nine hours of graduate level accounting courses including a minimum of three semester hours of graduate tax. THESE HOURS MUST BE TAKEN AFTER ADMISSION TO GRADUATE SCHOOL. If the courses are taken before admission to a graduate program, the classes will not be accepted, even if the school includes them as part of the graduate program. These courses cannot duplicate other courses which the applicant has taken and they cannot be used to accredit the non-accredited degree and satisfy the educational requirements. The applicant must complete the graduate school courses to validate the non-accredited degree. The applicant must also meet all other requirements for endorsement or transfer of credit. An evaluation of foreign transcripts must be completed by an evaluation service which has been approved by the Board (see Board Approval Evaluation Services).

Duplicate Courses

No credit will be given for courses which duplicate another course for which the applicant has received credit. CPA review courses are considered as duplicates.

Admission Requirements

For admission to MAcc , based on an undergraduate degree from an accredited U.S. institution, we consider the applicant's:

- Undergraduate grade point average
- GMAT score
- Grades in specific accounting courses
- Rigor of the undergraduate program
- Other factors such as work experience.

Admission decisions are made on a competitive basis from the applicant pool. Undergraduate students from the University of Miami that have a grade point average of 3.4 or higher do not have to take the GMAT exam. In addition individuals who have demonstrated their ability to do graduate work in accounting by becoming a CPA or who have earned a graduate degree from a business school accredited by the AACSB are also waved from the requirement to take the GMAT exam.

Students without an undergraduate degree in accounting will be required to take certain prerequisite courses to secure admission. These prerequisites will depend upon the undergraduate major and previous accounting courses taken. Necessary prerequisite accounting courses can be taken in the University of Miami's Accounting Summer Intensive Program, which is a seven-week program beginning in early July.

Foreign students must provide evidence of proficiency in English by supplying a TOEFL score. Additionally, foreign students must have successfully completed two semesters of intermediate accounting, one semester of cost accounting, one semester of auditing, one semester of accounting systems and one semester of tax at a U.S. university accredited by the AACSB before enrolling in graduate accounting courses. Alternatively, foreign students may attend the University of Miami's Accounting Summer Intensive Program to fulfill this requirement.

Master of Accounting (MACC)

The MAcc program offers two tracks: Assurance (MAcc-Assurance) for students planning to go into public accounting and Corporate Accounting (MAcc-Corporate) for students planning careers as controllers, CFOs or financial analysts. The MAcc is designed for the student who has taken the accounting and related courses required for an undergraduate major in accounting or other undergraduate business majors who have successfully completed the Accounting Summer Intensive Program. These students should be able to complete the MAcc in a year or less provided they enroll as full time students.

Undergraduate Course Requirements

The courses listed below are undergraduate prerequisites that, unless already completed, must be fulfilled in order to be admitted for graduate study. For most graduate tax classes including ACC 648 Financial Reporting Implications of Income Taxes., the equivalent of ACC 404 Advanced Taxation(Corporate and Partnership Income Taxation) is also required. Students can satisfy this prerequisite by taking ACC 639 Income Taxation and Business Entities which is offered in a 9-day intersession format in August before the start of the fall semester. If a candidate does not have an undergraduate business degree, additional business prerequisites (economics, marketing, management, finance and others) will also be required.

Code	Title	Credit Hours
ACC 211	Principles of Financial Accounting	3
ACC 212	Managerial Accounting	3
ACC 301	Cost Accounting	3
ACC 311	Intermediate Accounting I	3
ACC 312	Intermediate Accounting II	3
ACC 402	Auditing	3
ACC 403	Fundamentals of Taxation	3
ACC 404	Advanced Taxation	3
ACC 406	Accounting Systems	3

Master of Accounting—Assurance Track (MAcc-Assurance)

The program requires 30 semester hours consisting of nine required courses and the balance of approved elective courses provided the student has an undergraduate degree in Accounting, or its equivalent, from an accredited institution. In addition to the nine required courses, students must select four courses from the designated course list. Other courses can be selected from the list of approved electives or in consultation with the program director. Courses with a 600-level designation are designed for graduate students. Courses with a 500-level designation are open to upper-level undergraduate students and do not count toward the MAcc degree. Unless otherwise noted, courses in the program are two semester hours (two credits).

*Curriculum changes are pending Board of Trustee approval

Accelerated Masters Programs

In addition to offering the Master of Accounting (MAcc) and Master of Science in Taxation (MST) on the usual time frame involving one year of full-time study beyond the Bachelor's level, the MAcc and MST are offered as accelerated programs. These programs permit high achieving accounting students who have accelerated their education by taking advanced courses in high school, testing out of classes, taking increased class loads, or going to summer school, to start their graduate work while seniors.

The accelerated programs are available only to students who are undergraduate students at the University of Miami. The programs are designed in such a way that students can expect to complete both their Bachelor's and Master's degrees and make significant progress on the CPA exam (if not complete it entirely) within 4½ years. In addition, these programs are extremely price competitive.

Accelerated Program Timeline

Code	Title	Credit Hours
Pre-Requisites		
A minimum of 102 credit hours		
Accounting Major Requirements		
ACC 301 or ACC 404	Cost Accounting Advanced Taxation

BUS 610	Critical Thinking and Persuasion for Business	2
Summer after Senior Year ²		
1 ACC graduate course		
Approved CPA Review Course ³		
Pass CPA exam		
Final Fall Semester		
Remaining 16 graduate credits ⁴		

¹ Twelve credits of work in senior year will count towards the MAcc or MST degree (only students in the accelerated program are eligible to take these classes during their senior year).

² Students must take one accounting graduate course in the summer following their senior year. Accounting courses are offered based on demand and could include ACC 620 Accounting Controls in Information Technology(offered every summer) or ACC 649 Issues in Tax Policy.

- ³ Students are also REQUIRED to take an approved CPA review course during the summer following their senior year. Students who do not take a CPA review course must complete an additional six graduate credits which will likely delay graduation to May instead of graduating in December.
- Students are also expected to pass part, if not all, of the CPA exam during this summer.
- ⁴ In the final fall semester students will complete the remaining 16 graduate credits including the requirements for their track and electives selected in consultation with the Program Director.

Admission to the Accelerated Programs

Incoming Freshmen

- Prospective students apply to the accelerated program when they apply for admission to the University of Miami.
- SAT scores should meet or exceed 1400; high school unweighted GPA should meet or exceed 3.75.
- Students are required to have an overall and accounting GPA of 3.3 or higher by their junior year in college. Students must then maintain an overall GPA of 3.3 or higher and an accounting GPA of 3.3 or higher to remain in the program. Students who do not maintain the expected GPA may be placed on probation or transferred out of the program.
- Students will need to have completed 102 credit hours by the start of their senior year.

Current University of Miami Undergraduate Accounting Majors

- Students should apply to the accelerated program by September 15 of their junior year.
- Admission to the program will be based on GPA, letters of recommendation, and performance in upper division (300-level or above) accounting courses in progress or completed. It is expected that the students admitted to the program will have GPAs exceeding 3.3, but students with these scores are not guaranteed admission. The decision will depend on the quality and size of the applicant pool and will be made by senior school administrators and faculty.
- After admission, to remain in the program, students must maintain an overall GPA of 3.3 or higher and an accounting GPA of 3.3 or higher. Students who do not maintain the expected GPA may be placed on probation or transferred out of the program.
- Students will need to have completed 102 credit hours by the start of their senior year including ACC 311, ACC 312, ACC 402, ACC 403, BSL 401 and ACC 404.

Five-Year Accounting Program with Senior-Year Internship

The Five-Year Accounting Program with Senior-Year Internship is intended to allow exceptional students to acquire both undergraduate and graduate accounting degrees in five years while gaining valuable experience working at a full-time internship in the spring semester of their senior year. Students will also take a CPA review course and sit for the CPA exam so they can pass some (if not all) parts of the exam before they graduate with their Master of Accounting or Master of Science in Taxation degree.

Program Timeline

1. Fall semester of Junior Year: Complete an application to the program by September 15 and apply for an internship position to take place in the spring of senior year.
2. Fall semester of Senior Year: Submit the internship agreement and apply to graduate school.
3. Spring semester of Senior Year: Complete Internship followed by 9 credit hours of coursework to complete the undergraduate accounting degree in specially-designed short-duration courses that include ACC 301, ACC 406 and MGT 401.
4. Summer following Senior Year: Take CPA review and exam.
5. Fall semester following Senior Year: Begin the Master of Accounting (MAcc) or Master of Science in Taxation (MST) Program.

Pre-requisites

The program is designed for University of Miami Business School undergraduate students who are pursuing the accounting major and who have a cumulative GPA of at least 3.2 at the time of application. Admission to the program is based on several criteria, so a 3.2 GPA does not guarantee admission. Students should discuss the program and their academic plan for entering the program with an academic advisor in the Office of Undergraduate Business Education or with the Program Director in the Department of Accounting. Prior to the spring semester of their senior year, students will need to have completed all undergraduate degree requirements, except for two accounting major courses (ACC 301 and ACC 406) and MGT 401.

Senior Year Spring Semester Curriculum

In the first half of the spring semester of the senior year, students will work full-time in an accounting internship for which they can receive 3 credit hours toward their undergraduate degree (ACC 550). Additionally, in the spring semester of their senior year, students will take 9 credit hours in three specially-designed short-duration courses that include ACC 301, ACC 406 and MGT 401.

Summer, Fall, and Spring after Senior Year

In the summer after their senior year, students will have the opportunity to take a CPA review course and sit for the CPA exam. Students will complete their Master of Accounting or Master of Science in Taxation in the fall and spring semesters after senior year and begin working that following summer or fall.

Admission to the Five-Year Accounting Program with Senior-Year Internship

- Students must apply to the program in their junior year and obtain an “approved” internship through the Toppel Career Center.
- The internship must be scheduled to take place during the spring semester of their senior year.
- In the fall semester of their senior year, before registering for their senior-year spring classes, students must submit a copy of their internship agreement to the Program Director or Program Manager in the Department of Accounting.
- By the fall semester of their senior year, students must have applied for admission to the graduate program and submitted their verification deposit to pursue a Master of Accounting or Master of Science in Taxation degree in the fall semester immediately following their senior year.
- The GMAT will be waived for students admitted into the program.

Master of Arts in Economics

Master of Arts in Economics

The Master of Arts in Economics program provides students with the essential analytical tools and rigorous training they need to apply economic analysis to help both global corporations and government institutions achieve success. The program introduces students to several applied areas of economics and provides the required problem-solving skills to analyze economic problems.

To obtain detailed program admission information, please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (<http://bus.miami.edu/graduate-programs/specialized-masters/economics>).

Master of Professional Accounting (online)

Master of Professional Accounting (online)

The Master of Professional Accounting provides focused, accounting education meant to prepare students for a career in public accounting, private industry, as well as government/non-profit sector. The program consists of 32 credits that will be taken over a 16-month period with start dates in September, January, and May. The coursework will consist of 16 credits in basic accounting, taxation and information systems, followed by 16 credits in advanced topics including auditing and financial statement analysis and firm valuation. The courses offered in the MPrA are taught at both the undergraduate and graduate level in accounting at the Miami Business School. All of these courses have been taught as two-credit or three-credit courses, but have been modified, combined and packaged into four credit modules. Most students in the program will earn a Certificate in Accounting Practice along the way to earning their degree.

To obtain detailed program admission and curricula information please visit the website. (<http://www.miami.edu/online/online-degrees/masters-professional-accounting>)

Curriculum Requirements

Code	Title	Credit Hours
ACC 681	Introduction to Financial and Managerial Accounting	4
ACC 682	Intermediate Accounting	4
ACC 683	Taxation	4
ACC 684	Accounting Information Systems	4
ACC 685	Financial Statement Analysis and Valuation	4
ACC 686	Auditing	4
ACC 687	Advanced Cost Accounting	4
ACC 688	Advanced Accounting and Financial Reporting	4
Two additional optional courses ¹		
ACC 689	Current Issues in Accounting (Issues in Accounting with a focus on International Financial Reporting Standards (IFRS) and Governmental and Not-for-Profit Accounting)	4
ACC 690	Fraud and Forensic Accounting: Ethics and Legal Environment (Fraud and Forensic Accounting: Ethics and the Legal Environment)	4
Total Credit Hours		40

¹ Should your state of residence require additional coursework in order to sit for the CPA certification exam, you may enroll in two additional (optional) advanced courses which will enable you to earn additional Accounting credits that may be required.

Master of Science in Business Analytics

Master of Science in Business Analytics

The Master of Science in Business Analytics program is an intensive experience that develops well-trained business analysts armed with the skills necessary to understand, manage and make use of big data in a business context. Over the course of 10 months, students learn how to turn abstract data into meaningful information with which to predict consumer behavior and forecast revenue and expenses for virtually any business model and any industry sector.

To obtain detailed program admission information, please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (<http://bus.miami.edu/graduate-programs/specialized-masters/analytics>).

Master of Science in Finance

Master of Science in Finance

The Master of Science in Finance program prepares students for successful careers in corporate finance, investments, and other financial sectors. The program immerses student in a narrow course of study over the course of only 10 months. Throughout the program, students are challenged to approach real-world problems with a practical lens. When they graduate, they possess the knowledge base and sophistication to make critical financial decisions for any organization.

To obtain detailed program admission information, please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (<http://bus.miami.edu/graduate-programs/specialized-masters/finance>).

Master of Science in Finance (online)

Master of Science in Finance (online)

The Master of Science in Finance provides focused, graduate level education meant to prepare students for a professional career in finance. The program consists of 32 credits taken over a sixteen-month period beginning in August, January, or May. The program includes 4 credits of fundamental coursework in finance and quantitative methods plus 28 credits in more advanced finance topics. The proposed 32-credit online curriculum waives the following 3 courses from the on-campus version of the MS in Finance, as it is geared for Working Professionals who are already expected to possess the skills covered in these courses: BUS 600/ BUS 602 Critical Thinking and Effective Writing (1 credit); BUS 603 Critical Thinking and Effective Speaking (1 credit); and BUS 604 Career Development and Enrichment (1 credit). Students in the program will earn both the Certificate in Financial Decision Making and the Certificate in Corporate Finance along the way to earning their degree.

To obtain detailed program admission and curricula information, please visit the website (<http://www.miami.edu/online/programs/masters-in-finance>). (<http://www.miami.edu/online/programs/masters-in-finance>)

Certificate in Financial Decision Making

For students who want to advance in corporate finance functions without committing to a full degree program. This certificate is 16 credits taken over an eight-month period beginning in August, January or May. Students would typically be working in such functions as the controller's office, treasury management, capital budgeting, or investor relations. After completion, it is possible to apply for admission to the online Master of Science in Finance which would then take another 16 credits and 8 months to complete.

Master of Science in Management

Master of Science in Management (Leadership)

The Master of Science in Management (Leadership) program, with a leadership specialization, shapes students into competent, versatile and dynamic leaders ready to navigate the complex workplace of the 21st century. The program helps participants develop the interpersonal skills they need to influence others and lead effectively in today's challenging work environment. Not only does the program include coursework to provide students with a foundation of basic management skills, it includes a set of courses that focus on the skills needed to achieve performance at the highest levels possible.

To obtain detailed program admission information, please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (<http://bus.miami.edu/graduate-programs/specialized-masters/leadership>).

Master of Science in Taxation

The Master of Accounting (MAcc) and Master of Science in Taxation (MST) programs are similar in that they offer an opportunity to concentrate in accounting, but they differ in degree of specialization and career path orientation. The MAcc offers two separate tracks in assurance and corporate accounting while the MST is designed for students interested in careers in taxation. In addition to the traditional one year of full-time study beyond the Bachelor's level, the MAcc and the MST programs are offered as accelerated programs for University of Miami undergraduates.

Scholarships

University of Miami Business School - Alumni Association Endowed Accounting Scholarships are available for students pursuing Graduate Studies in Accounting. Various other scholarships and assistantships may be available.

Accounting Summer Intensive Program

The Accounting Summer Intensive Program is designed for students who hold at least an undergraduate business degree in a field other than accounting from an accredited college or university and for foreign students.

Non-Accounting Majors

Students that have a non-accounting degree, preferably in business, can apply for admission to our Master of Accounting (MAcc) or Master of Science in Taxation (MST) and Summer Intensive Program. Applicants to the MAcc or MST program will automatically be considered applicants to the Accounting Summer Intensive Program if their undergraduate degree is not in accounting. Summer Intensive students entering the MAcc or MST program must also take an advanced taxation course (ACC 639) which is offered following the Summer Intensive Program in an intersession format in August before the start of the fall semester. Although MST students must complete advanced taxation in the summer, MAcc students may complete the course in the summer or in term one of the spring semester.

Foreign Students

The Accounting Summer Intensive Program is also designed to meet the needs of foreign students. Foreign students must have successfully completed two semesters of intermediate accounting, one semester of cost accounting, one semester of auditing, one semester of accounting information systems and one semester of tax at a U.S. university accredited by the AACSB or alternatively, must attend the Summer Intensive Program before enrolling in graduate accounting courses. Foreign students entering the MAcc or MST program must also take an advanced taxation course (ACC 639) which is offered following the Summer Intensive Program in an intersession format and in term one of the spring semester. Foreign applicants to the MAcc program will automatically also be considered applicants to the Accounting Summer Intensive Program.

Program Schedule

The Accounting Summer Intensive Program is fast-paced and requires full-time attention. As its name implies, the program is intensive and not designed for students that are working even part-time. The 7-week program begins each year about July 1 and continues through mid-August and consists of two 3½ -week modules. Three 2-credit courses are included in each module. Students who want to take any additional graduate tax classes should also plan to take the advanced taxation course (ACC 639) which is offered following the Summer Intensive Program in a 9-day intersession format in August before the start of the fall semester.

Program Prerequisite Accounting Courses

Students entering the program are required to have previously completed introduction to financial accounting and management accounting at a US or foreign university.

Summer Intensive Program Course Offerings

The Summer Intensive Program includes the following six 2-credit upper division accounting courses that are prerequisites for graduate study.

Code	Title	Credit Hours
ACC 632	Intermediate Accounting I	2
ACC 633	Intermediate Accounting II	2
ACC 634	Cost Accounting	2
ACC 635	Auditing	2
ACC 636	Accounting Systems	2
ACC 673	Taxation for Business and Investment Decisions	2

Note that the Summer Intensive Program does not include an advanced taxation course (the equivalent of ACC 404) which is a required prerequisite for most tax courses in the MST program. Accordingly, in addition to the six summer intensive courses, students entering the MST program must complete ACC 639 which is offered following the Summer Intensive Program in an intersession format in August before the start of the fall semester.

Entering the MAcc or MST Program

Upon successful completion of the intensive program, students immediately enter the MAcc or MST program in the fall semester. To graduate with their MAcc or MST degree, students must complete 30 credits beyond the 12-credit intensive program and may graduate in as little as two semesters, assuming they are full-time students.

CPA Licensure Requirements

Most of our students intend to become qualified as Certified Public Accountants (CPA). While the CPA exam is a national exam administered by the American Institute of Certified Public Accountants, its execution and CPA licensing practices are governed by state law. For example, some states require a certain number of credit hours in particular subjects and have overall accounting and business credit hour requirements. As such, you should check with the state in which you intend to practice to determine what the specific course requirements are for that state. Our department is unable to make a determination of your eligibility to sit for the CPA exam. This can only be done by the appropriate state board. The licensure requirements for the State of Florida can be viewed here (<http://www.myfloridalicense.com/dbpr/cpa/licensure.html>).

For your convenience, the Florida rules that apply to most individuals are summarized here. Please check the State of Florida Web site noted above for updates and rules which may apply in particular circumstances.

As of July 1, 2008 the Florida State Board of Accountancy (BOA) separated the requirements to become a Certified Public Accountant (CPA) into two parts: (1) the requirements to be eligible to take the CPA exam and (2) the requirements for licensure to practice as a CPA in Florida.

Requirements to Sit for the CPA Exam

To be eligible to take the CPA exam, applicants must have completed 120 semester hours including 24 semester hours of upper division (300-level or above) accounting to include auditing, cost and managerial accounting, financial accounting, accounting information systems, and taxation. Applicants must also complete 24 semester hours of upper division general business courses with some exceptions in that one microeconomics, one macroeconomics, one statistics, one business law, and one introduction to computers course may be lower division (freshman or sophomore level). As part of the general business hours, applicants are required to have a total of six semester hours of business law courses, which must cover contracts, torts, and the Uniform Commercial Code. Note that excess upper division accounting courses may be used to meet the general business requirement; however, elementary accounting classes are never acceptable for credit nor are courses for non-accounting majors and any MBA courses that are equivalent to elementary accounting.

The exam is offered in the following time periods; January – February, April – May, July – August and October – November. Note that applicants are not required to have a bachelor's degree in order to sit for the CPA exam.

Requirements for Licensure

In addition to passing all four parts of the CPA exam with at least a 75% within 18 month rolling period, the Florida State Board of Accountancy requires that applicants have completed a bachelor's degree plus an additional 30 hours for a total of 150 semester hours before you can become licensed as a CPA. One year of work experience under the supervision of a licensed CPA is now also required to become licensed. In addition to experience obtained in public accounting and government, Florida's 2008 legislative change also allows experience obtained in industry and academia. This experience may be obtained before or after sitting for the exam, however, all requirements to sit for the exam must be met before the work experience commences. If you fail to apply for licensure within three years of receiving the licensure package, (sent after you pass all four parts) the CPA grades expire and you have to retake the examination.

The 150 semester hours must include a minimum of 36 semester hours of upper division accounting courses and at least 39 semester hours of upper division (with some exception) general business courses. Excess upper division accounting courses may be used to meet the general business requirement. Courses for non-accounting majors and any MBA courses that are equivalent to elementary accounting are not accepted for this requirement.

Licensed in Another State

If you are licensed in a state other than Florida you can obtain a license in Florida by a process called endorsement. You must provide evidence of meeting all of the requirements in effect at the time of your application. In addition if you passed the exam more than two years before applying you must provide evidence of meeting continuing professional education requirements.

CPA Accreditation Requirements

The Florida State Board of Accountancy accepts degrees from schools accredited by the following associations : Middle States Association, New England Association, North Central Association, Northwest Association, Southern Association of Colleges and Schools, Western Association of Schools and Colleges, Association of Independent Schools and Colleges who have been approved by the Florida State Board of Independent Colleges and Universities, and Canadian Schools who have been approved by their provincial educational bodies. If you have graduated from a school or college which is not accredited by the above mentioned means, then you must use the provisions of F.A.C. 61H1-27.001 (5) (see below).

Applicants Who Have Graduated from Non-Accredited Schools (61H1-27.001) (5)

Applicants who have graduated from a non-accredited school may still qualify to sit for the CPA examination. The candidate must take 15 semester hours of graduate classes. Those must consist of at least nine hours of graduate level accounting courses including a minimum of three semester

hours of graduate tax. THESE HOURS MUST BE TAKEN AFTER ADMISSION TO GRADUATE SCHOOL. If the courses are taken before admission to a graduate program, the classes will not be accepted, even if the school includes them as part of the graduate program. These courses cannot duplicate other courses which the applicant has taken and they cannot be used to accredit the non-accredited degree and satisfy the educational requirements. The applicant must complete the graduate school courses to validate the non-accredited degree. The applicant must also meet all other requirements for endorsement or transfer of credit. An evaluation of foreign transcripts must be completed by an evaluation service which has been approved by the Board (see Board Approval Evaluation Services).

Duplicate Courses

No credit will be given for courses which duplicate another course for which the applicant has received credit. CPA review courses are considered as duplicates.

For the CPA requirements in other states, you should consult the State Board of Accountancy for your state.

Admission Requirements

For admission to either the MAcc or MST, based on an undergraduate degree from an accredited U.S. institution, we consider the applicant's:

- Undergraduate grade point average
- GMAT score
- Grades in specific accounting courses,
- Rigor of the undergraduate program
- Other factors such as work experience

Admission decisions are made on a competitive basis from the applicant pool. Undergraduate students from the University of Miami that have a grade point average of 3.4 or higher do not have to take the GMAT exam. In addition individuals who have demonstrated their ability to do graduate work in accounting by becoming a CPA or who have earned a graduate degree from a business school accredited by the AACSB are also waved from the requirement to take the GMAT exam.

Students without an undergraduate degree in accounting will be required to take certain prerequisite courses to secure admission. These prerequisites will depend upon the undergraduate major and previous accounting courses taken. Necessary prerequisite accounting courses can be taken in the University of Miami's Accounting Summer Intensive Program, which is a seven-week program beginning in early July.

Foreign students must provide evidence of proficiency in English by supplying a TOEFL score. Additionally, foreign students must have successfully completed two semesters of intermediate accounting, one semester of cost accounting, one semester of auditing, one semester of accounting systems and one semester of tax at a U.S. university accredited by the AACSB before enrolling in graduate accounting courses. Alternatively, foreign students may attend the University of Miami's Accounting Summer Intensive Program to fulfill this requirement.

Master of Science in Taxation (MST)

This program affords the accounting major or equivalent the opportunity to specialize in the area of taxation. Through electives, students are able to expand their areas of expertise, so that they may adequately prepare themselves for careers requiring a high degree of specialized tax knowledge in public accounting, private industry, and government. The program requires 30 semester hours consisting of six required courses and the balance of approved elective courses provided the student has an undergraduate degree in Accounting, or its equivalent, from an accredited institution and has completed ACC 403 Fundamentals of Taxation and ACC 404 Advanced Taxation, or their equivalents. Students who have taken only one tax course should plan to take an advanced taxation course (such as ACC 639 Income Taxation and Business Entities which is offered following the Summer Intensive Program in an intersession format in August before the start of the fall semester). In addition to the nine required courses, students must select four courses from the designated course list. Other courses can be selected from the list of approved electives or in consultation with the program director. Courses with a 600-level designation are designed for graduate students. Courses with a 500-level designation are open to upper-level undergraduate students and do not count toward the MST degree. Unless otherwise noted, courses in the program are two semester hours (two credits).

Program Requirements

Code	Title	Credit Hours
Required Courses		15
ACC 610	Financial Reporting Research	
ACC 628	Introduction to Accounting Analytics	
ACC 630/530	International Financial Reporting Standards

MAS 648	Data Mining	
Total Credit Hours		30

¹ Any other electives must be selected in consultation with the Program Director.

*Curriculum changes are pending Board of Trustee approval.

Accelerated Masters Programs

In addition to offering the Master of Accounting (MAcc) and Master of Science in Taxation (MST) on the usual time frame involving one year of full-time study beyond the Bachelor's level, the MAcc-Assurance Track, MAcc-Corporate Track, and MST are offered as accelerated programs. These programs permit high achieving accounting students who have accelerated their education by taking advanced courses in high school, testing out of classes, taking increased class loads, or going to summer school, to start their graduate work while seniors.

The accelerated programs are available only to students who are undergraduate students at the University of Miami. The programs are designed in such a way that students can expect to complete both their Bachelor's and Master's degrees and make significant progress on the CPA exam (if not complete it entirely) within 4½ years. In addition, these programs are extremely price competitive.

Accelerated Program Timeline

Code	Title	Credit Hours
Pre-Requisites		
A minimum of 102 credit hours		
Accounting Major Requirements		
ACC 301 or ACC 404	Cost Accounting Advanced Taxation	
ACC 311	Intermediate Accounting I	
ACC 312	Intermediate Accounting II	
ACC 402	Auditing	

ACC 403	Fundamentals of Taxation	
BSL 401	The Law of Financial Transactions	
All UG degree requirements except those taken in the senior year.		
Students that select the MAcc-Corporate Track must take FIN 303 before or during their senior year.		
Summer after Junior Year		
Internship		
Senior Year Curriculum ¹		
ACC 506 or ACC 572	Internal Auditing Advanced Financial Analysis	2
ACC 522	Advanced Issues in Auditing	3
ACC 530	International Financial Reporting Standards	1
ACC 648	Financial Reporting Implications of Income Taxes.	2
BSL 691	The Public Corporation: Legal Perspectives	2
BUS 602	Critical Thinking and Effective Writing	1
BUS 603	Critical Thinking and Effective Speaking	1
Summer after Senior Year ²		
1 ACC graduate course		
Approved CPA Review Course ³		
Pass CPA exam		
Final Fall Semester		
Remaining 16 graduate credits ⁴		

¹ Twelve credits of work in senior year will count towards the MAcc or MST degree (only students in the accelerated program are eligible to take these classes during their senior year).

² Students must take one accounting graduate course in the summer following their senior year. Accounting courses are offered based on demand and could include ACC 620 Accounting Controls in Information Technology(offered every summer) or ACC 649 Issues in Tax Policy.

³ Students are also **REQUIRED** to take an approved CPA review course during the summer following their senior year. Students who do not take a CPA review course must complete an additional six graduate credits which will likely delay graduation to May instead of graduating in December.

Students are also expected to pass part, if not all, of the CPA exam during this summer.

⁴ In the final fall semester students will complete the remaining 16 graduate credits including the requirements for their track and electives selected in consultation with the Program Director.

Admission to the Accelerated Programs

Incoming Freshmen

- Prospective students apply to the accelerated program when they apply for admission to the University of Miami.
- SAT scores should meet or exceed 1400; high school unweighted GPA should meet or exceed 3.75.
- Students are required to have an overall and accounting GPA of 3.3 or higher by their junior year in college. Students must then maintain an overall GPA of 3.3 or higher and an accounting GPA of 3.3 or higher to remain in the program. Students who do not maintain the expected GPA may be placed on probation or transferred out of the program
- Students will need to have completed 102 credit hours by the start of their senior year.

Current University of Miami Undergraduate Accounting Majors

- Students should apply to the accelerated program by September 15 of their junior year.
- Admission to the program will be based on GPA, letters of recommendation, and performance in upper division (300-level or above) accounting courses in progress or completed. It is expected that the students admitted to the program will have GPAs exceeding 3.3, but students with these scores are not guaranteed admission. The decision will depend on the quality and size of the applicant pool and will be made by senior school administrators and faculty.
- After admission, to remain in the program, students must maintain an overall GPA of 3.3 or higher and an accounting GPA of 3.3 or higher. Students who do not maintain the expected GPA may be placed on probation or transferred out of the program.
- Students will need to have completed 102 credit hours by the start of their senior year including ACC 311, ACC 312, ACC 402, ACC 403, BSL 401 and ACC 404.

Five-Year Accounting Program with Senior-Year Internship

The Five-Year Accounting Program with Senior-Year Internship is intended to allow exceptional students to acquire both undergraduate and graduate accounting degrees in five years while gaining valuable experience working at a full-time internship in the spring semester of their senior year.

Students will also take a CPA review course and sit for the CPA exam so they can pass some (if not all) parts of the exam before they graduate with their Master of Accounting or Master of Science in Taxation degree.

Program Timeline

1. Fall semester of Junior Year: Complete an application to the program by September 15 and apply for an internship position to take place in the spring of senior year.
2. Fall semester of Senior Year: Submit the internship agreement and apply to graduate school.
3. Spring semester of Senior Year: Complete Internship followed by 9 credit hours of coursework to complete the undergraduate accounting degree in specially-designed short-duration courses that include ACC 301, ACC 406 and MGT 401.
4. Summer following Senior Year: Take CPA review and exam.
5. Fall semester following Senior Year: Begin the Master of Accounting (MAcc) or Master of Science in Taxation (MST) Program.

Pre-requisites

The program is designed for University of Miami Business School undergraduate students who are pursuing the accounting major and who have a cumulative GPA of at least 3.2 at the time of application. Admission to the program is based on several criteria, so a 3.2 GPA does not guarantee admission. Students should discuss the program and their academic plan for entering the program with an academic advisor in the Office of Undergraduate Business Education or with the Program Director in the Department of Accounting. Prior to the spring semester of their senior year, students will need to have completed all undergraduate degree requirements, except for two accounting major courses (ACC 301 and ACC 406) and MGT 401.

Senior Year Spring Semester Curriculum

In the first half of the spring semester of the senior year, students will work full-time in an accounting internship for which they can receive 3 credit hours toward their undergraduate degree (ACC 550). Additionally, in the spring semester of their senior year, students will take 9 credit hours in three specially-designed short-duration courses that include ACC 301, ACC 406 and MGT 401.

Summer, Fall, and Spring after Senior Year

In the summer after their senior year, students will have the opportunity to take a CPA review course and sit for the CPA exam. Students will complete their Master of Accounting or Master of Science in Taxation in the fall and spring semesters after senior year and begin working that following summer or fall.

Admission to the Five-Year Accounting Program with Senior-Year Internship

- Students must apply to the program in their junior year and obtain an "approved" internship through the Toppel Career Center.
- The internship must be scheduled to take place during the spring semester of their senior year.
- In the fall semester of their senior year, before registering for their senior-year spring classes, students must submit a copy of their internship agreement to the Program Director or Program Manager in the Department of Accounting.
- By the fall semester of their senior year, students must have applied for admission to the graduate program and submitted their verification deposit to pursue a Master of Accounting or Master of Science in Taxation degree in the fall semester immediately following their senior year.
- The GMAT will be waived for students admitted into the program.

M.H.A. in Health Sector Management and Policy

Overview

The MHA program helps students understand business principles and their application to the health care sector. Students enrolled in the Master in Health Administration (MHA) program hone skills in business fundamentals such as finance, accounting, human resources, and process improvement, and gain knowledge in health care specific areas including the structure, organization, policy, and delivery of health care; health economics; and information technology; among others. Students also gain a comprehensive lens through which they can approach solutions in their careers through first-hand experience of daily operations and opportunities to improve processes. Students have access to C-suite leaders in the classroom and other venues. Each student will also have the opportunity to participate in an off-site internship experience. Graduates of the program are prepared to be leaders in the management and administration of health care systems, physician groups, insurance companies, medical device companies and health care facilities.

Non-Degree Programs

Graduate Non Degree Programs

The School offers open enrollment certificate programs in general business as well as accounting and finance (online) which enable professionals to add basic business courses to their portfolios.

To obtain specific program information please visit:

- Certificate in Accounting Practice (online) (p. 1027)
- Certificate in Business (p. 1028)
- Certificate in Corporate Finance (online) (p. 1028)
- Certificate in Financial Decision Making (online) (p. 1029)
- Certificate in Leadership (p. 1030)

Certificate in Accounting Practice (online)

Certificate in Accounting Practice

Intended for candidates with no prior accounting credits, the Certificate of Professional Accounting program will provide the fundamental knowledge of financial and managerial accounting, as well as taxation and accounting information systems sufficient to equip students for entry-level jobs in public or corporate accounting.

The Certificate of Professional Accounting program strives to conform to the strategic priorities of the Miami Business School in the following ways:

1. Integrate knowledge from the latest field-based research into classroom discussion so that students better understand financial and managerial decision making in practice and can take a professional leadership role in assessing the pros and cons of standard quantitative tools used in accounting.
2. Recognize the context and implications of the conflicts of interest inherent in the accounting industry in both classroom discussion and extracurricular interaction with local leaders, in order to create principled leaders in the field of accounting.
3. Expose students to the global aspect of the field of accounting through both coursework and interaction with masters-level students in one of the most culturally diverse graduate business schools in the United States.

The specific CPA program objectives are to address the growing demand for a masters-level business certificate focused in accounting by accomplishing the following goals:

- Provide focused, graduate level education to those wishing to pursue a professional career in accounting
- Develop communication skills critical to long-term success in the accounting profession
- Provide participants with an understanding of the day-to-day work environment accounting professionals face, and career guidance, through periodic interaction with other professionals

To obtain detailed program admission and curricula information please visit website (<http://welcome.miami.edu/online/programs/masters-in-professional-accounting/certificate>).

Certificate in Business

Certificate in Business

The Certificate in Business program provides professional and graduate students an opportunity to obtain valuable, fundamental business education and enhance their analytical skills, as well as soft skills. The program consists of seven courses in business covering all fundamental functions central to any business operation. Students can take one or more courses for credit, but must satisfactorily complete all seven courses to be awarded the certificate. One or more of these courses may also serve as part of the specialized master's degrees. The Graduate Admissions Committee welcomes applications from individuals whose undergraduate degrees are from accredited colleges or universities. The GMAT and GRE are not required except from students seeking admission to the specialized master's programs.

To obtain detailed program admission information, please contact the Office of Recruiting and Admissions at 305-284-2510 or visit our website. (<http://www.bus.miami.edu/graduate-programs/business-certificate>)

Certificate in Corporate Finance (online)

This certificate is designed for students who are seeking a career change to corporate finance, or students wishing to advance in the corporate Treasurer's office or similar structure. The certificate begins with a common core of financial tools. The core classes include an integrated foundation

of finance, economics and accounting, as well as an integrated course on domestic and international corporate valuation, covering both financial and accounting problems. The certificate finishes with a course in applied corporate finance, which focuses on financial decision making from a corporation's perspective. Issues addressed include management of corporate liabilities, leasing and other asset-based financing techniques, short-term and long-term financing, capital budgeting decisions (CAPEX), corporate valuation, hedging with options and futures, dividend policy and share repurchases, corporate financial strategy, and other current issues in corporate finance.

Students completing the online Master of Science in Finance have the option of earning a certificate in either Corporate Finance or Financial Decision-Making to supplement their degree. Additionally, an individual certificate in each track can be earned online for those students who do not wish to complete the full degree at this time. The combined Certificate in Finance Decisions and Corporate Finance requires 20 credits, while the Certificate in Corporate

FIN 616	Advanced Corporate Finance	4
Total Credit Hours		16

Certificate in Financial Decision Making (online)

This certificate is designed for students who wish to either become financial managers or who wish to advance their financial careers. The certificate begins with a common core of financial tools and finishes with a course in financial decision-making. The core classes include an integrated foundation of finance, economics and accounting, as well as an integrated course on domestic and international corporate valuation, covering both finance and accounting problems. The financial decision making course, and the certificate will help managers use decision-making theory to better understand why investors, money managers, and corporate managers often make sub optimal economic and financial decisions. The course includes basic techniques and models that a manager or an investor should know. The certificate will provide students with a template for thinking through a variety of financial issues.

Students completing the master's in finance have the option of earning a certificate in either Corporate Finance or Financial Decision Making to supplement their degree. Additionally, an individual certificate in each track can be earned online for those students who do not wish to complete the full degree at this time. The combined Certificate in Finance Decisions and Corporate Finance requires 20 credits, while the Certificate in Financial Decision Making requires 16 credits.

Communication

<http://www.com.miami.edu>

Departments

The School of Communication offers:

- the Master of Arts in the Department of Communication Studies (M.A. in Communication Studies), and
- the Master of Arts in the Department of Journalism and Media Management (M.A. in Journalism), and
- the Master of Arts in the Department of Strategic Communication (M.A. in Public Relations), and
- the Master of Science in the Department of Journalism and Media Management (M.S. in Media Management), and
- the Master of Fine Arts in the Department of Cinema and Interactive Media (M.F.A. in Motion Pictures and M.F.A. in Interactive Media).

The School also offers a Ph.D. in Communication.

Admission Requirements

Admission to Graduate Studies at the Master's Level

The following is a list of the required conditions as well as the required documents/fees for your application for admission to the Master of Arts, Master of Science, or Master of Fine Arts degree in Communication:

- A baccalaureate degree from an accredited institution
- The School's official application
- A \$85.00 non-refundable application fee
- Three letters of recommendation
- 500 word typed statement of academic and professional goals.
 - Note: for the Interactive Media M.F.A., please visit this web site (<http://com.miami.edu/interactive-media-mfa>) for specific instructions about the statement
- Official transcripts of all college work, both undergraduate and graduate
 - Note: In addition, international applicants must send an official copy of your diploma for all degrees earned, and all documentation that confers your degree, with English translation for all degrees earned.
 - Note: All transcripts must be the original document, forwarded directly from the university; Xerox copies, true copies, notarized copies and other types of copies are not acceptable.
- Official TOEFL or IELTS scores
 - Note: Only for international applicants
- Copy of current passport
 - Note: Only for international applicants. The name entered on the graduate application must exactly match your name as it appears on your passport.
- Official Graduate Record Examination (GRE) scores
 - Note: Required for M.A. applicants in Communication Studies and Public Relations.
 - Note: Journalism M.A. and Interactive Media M.F.A. applicants may send GRE scores or a portfolio

- Note: Journalism M.S. applicants may send the official Graduate Record Examination (GRE) or Graduate Management Admission Test (GMAT) scores. Those applicants with at least three years of relevant professional media or business work experience (by the time they apply) may be eligible for a waiver. Eligibility for a waiver depends on the quality and type of professional experience and remains at the discretion of the Department of Journalism and Media Management Chairperson.
- Portfolio
 - Note: Required for Motion Pictures M.F.A. applicants

Contact the Office of Graduate Studies, call 305-284-5236 or email (socgrad@miami.edu), for information.

Admission to Graduate Studies for the Juris Doctor/Master of Arts in Communication Joint Degree

Requirements for admission to graduate studies for the Juris Doctor/Master of Arts in Communication joint degree are:

- Students must be admitted to the Law School first, prior to enrollment in the School of Communication, checking a box on their application indicating their interest in the joint degree program. Once accepted to the Law School, the student's law school application including LSAT score, undergraduate transcript, and letters of recommendation (two of them required for the J.D. program) will be sent to the School of Communication for review. The student will then receive notification from the School of Communication regarding his/her admission to the joint degree program.
- The LSAT score may be submitted in lieu of the GRE score.

General notes

- Students will be admitted to the Law School J.D. program and the School of Communication (SoC) master's program separately.
- Students in this joint degree program must commence law study first.
- Students who have already commenced work on the SoC MA are not eligible for the joint program.

Admission to Graduate Studies at the Doctoral Level

The following is a list of the required conditions as well as the required documents/fees for your application for admission to the Doctor of Philosophy in Communication program:

- A master's degree in communication or another appropriate field. The degree must be in addition to a bachelor's degree. All degrees must be from accredited institutions.
- The School's official application
- A \$85.00 non-refundable application fee
- Three letters of recommendation
- Official transcripts of all college work, both undergraduate and graduate
 - Note: In addition, international applicants must send an official copy of your diploma for all degrees earned, and all documentation that confers your degree, with English translation for all degrees earned.
 - Note: All transcripts must be the original document, forwarded directly from the university; Xerox copies, true copies, notarized copies and other types of copies are not acceptable.
- Official TOEFL or IELTS scores
 - Note: Only for international applicants
- Copy of current passport
 - Note: Only for international applicants. The name entered on the graduate application must exactly match your name as it appears on your passport.
- Official Graduate Record Examination (GRE) scores
- Current Curriculum Vitae (CV)
- 500-word typed statement of your academic and professional goals, research area you want to pursue and why, and how your background has prepared you for this. A copy of the completed master's thesis if it has been completed. If the master's thesis is in progress, submit completed chapters. If a thesis is not required by your master's program, submit comparable scholarly work.

Degree Programs

The School of Communication offers graduate programs leading to the Master of Arts, Master of Science, Master of Fine Arts, and the Doctor of Philosophy degrees.

Communication Studies (M.A.)

COMMUNICATION STUDIES (M.A.) is a program designed to provide students with a rigorous educational experience, to develop an advanced understanding of the human communication process, to increase awareness of the interdisciplinary nature of the communication field, and to develop oral, written, critical thinking, and research skills. The 30 credit hour thesis track program emphasizes the student's development of research skills. The 36 credit hour non-thesis track program focuses on a theoretical foundation with emphasis on applied communication. Students have the option to concentrate in Communication Studies, Health Communication, Intercultural Communication, or Organizational Communication.

Journalism (M.A.)

JOURNALISM (M.A.) is an intensive program of academic study and hands-on practice designed to develop competitive, high-level, cross-platform digital media skills appropriate for today's media landscape. Students take a common core of courses designed to provide a foundation in all aspects of contemporary journalism (e.g., writing, reporting, multimedia, data visualization, broadcasting, media law and ethics). In addition, students have the opportunity to focus their work in various areas of study, including broadcast journalism, news and feature writing and various aspects of multimedia journalism. Through a combination of journalism courses and related courses offered by other programs, students may also concentrate some of their work in particular areas of interest (e.g., sports reporting, travel and features). The program begins in the fall semester and lasts for 18 months. No prior training or experience in journalism is required.

Public Relations (M.A.)

PUBLIC RELATIONS (M.A.) offers two tracks. The 30 credit hour thesis track program provides an opportunity to supplement a working foundation and knowledge with pertinent theory and research methodologies. A second 36 credit hour, coursework-only non-thesis track program builds from a foundation of public relations and communication courses.

Media Management (M.S.)

Media Management (M.S.) is a 32-credit interdisciplinary graduate program designed for students who seek new or advanced opportunities in the various and expanding areas of the media industry, such as content distribution, news and entertainment programming, research, and analytics. Students complete courses in the Business School to learn or strengthen their knowledge about business fundamentals, including managerial strategy, economics, accounting, and marketing. At the same time, students take courses in the Department of Journalism and Media Management to apply business principles to media situations and evaluate critically how technological and regulatory trends, changing business models, emergent content applications, and new audience measurement techniques influence decision-making in media operations. Students can also customize their coursework by selecting electives in the School of Communication that best match their personal or career interests.

Required classes are held on Saturdays and weekday evenings to provide flexibility for working professionals. Students can study full-time or part-time. The program begins every fall and lasts one year for full-time students or two years for part-time students. No prior business or media management experience or education is required.

Joint Degree Juris Doctor (J.D.)/M.A. in Communication

JOINT DEGREE JURIS DOCTOR (J.D.)/M.A. IN COMMUNICATION. A powerful background in law and in communication can be a launching pad for a career in law, business, entertainment or government. For this reason, the University of Miami School of Law and School of Communication have brought together these two dynamic fields to offer a joint degree program. Through this joint program, students can acquire a law degree and a master's degree in communication in less time (3 to 3½ years). The joint degree program is intended for students with a variety of goals including students who plan to practice professionally in a communication field such as journalism or strategic communication with a law-related emphasis. Graduates of these programs may also work as in-house counsel for new communication technology companies, or serve with government agencies concerned with communication law or with law firms practicing in that field. This program also provides a solid foundation for future journalists who wish to report on legal affairs, and offers ideal preparation for the rapidly growing field of public affairs management, in which practitioners work in business, government and non-profits to communicate with key audiences.

The School of Communication M.A. degree programs participating in the joint J.D. program are:

- Communication Studies (Communication Studies, Health Communication, Intercultural Communication, Organizational Communication)
- Public Relations
- Journalism

Motion Pictures (M.F.A.)

MOTION PICTURES (M.F.A.) The Motion Picture graduate program provides a student-centered learning experience within a globally diverse moving image context. The M.F.A. curriculum emphasizes the relationship between theory and practice and encourages both creative collaboration and independent thinking as it prepares motion picture professionals and artists. M.F.A. candidates are expected to follow a set sequence of courses during the first two semesters of their studies. During the second year of studies, candidates are strongly encouraged to explore not only a primary but also a secondary area of specialization in the program and develop a minimum of two creative projects consistent with their areas of primary interest and secondary specialization. A minimum of 6 credit hours in each area of specialization is required. Under faculty committee supervision, students will develop one or two creative projects in the third year of their studies. This three-year program culminates with a thesis portfolio that demonstrates, not only skillful execution of craft, but strong conceptual development rooted in collaborative work and innovative uses of technology.

Graduate students are encouraged to pursue independent and critical thinking, research and creative work as appropriate to the fulfillment of the requirements of their degree. In addition, the graduate program seeks to support innovative approaches and ideas and to aid in the pursuit of relevant scholarly and creative endeavors.

Interactive Media (M.F.A.)

INTERACTIVE MEDIA (M.F.A.) The Interactive Media graduate program aims to prepare a new generation of innovators and leaders in the field of interaction design. The M.F.A. curriculum emphasizes exploration of the use of technology, design, and human behavior, to impact, augment, and influence how people communicate. The multidisciplinary curriculum brings together students from different backgrounds to learn about interaction

design, gaming, mobile, data visualization, human computer interaction, and other emerging technologies. The program trains students to research, prototype, design, and build projects in business, social, academic, and cultural contexts.

Communication

COMMUNICATION (Ph.D.) provides students with the theory and research skills required to use communication to make positive change in society, community, and individuals. Possible areas of specialization, within this overarching framework of social and behavioral change, include health communication (broadly defined), intercultural communication, organizational communication, international communication, advocacy, and journalism studies and accompanying new/digital media foundations and skills.

Cinema and Interactive Media

The Cinema and Interactive Media Department offers a complete curricular experience in critical understanding and effective creation of contemporary moving image media and interactive design. With two programs, the M.F.A. in Motion Pictures and the M.F.A. in Interactive Media, our mission is to explore the creative uses of narrative, documentary, technology, design and human behavior in order to entertain, impact, augment, and influence how people communicate. We prepare a new generation of innovators, storytellers and leaders in the fields of cinema, transmedia and interaction design.

The M.F.A. in Motion Pictures program requires that students complete a minimum of 66 credit hours. At least 24 of these credit hours must be at or above the 700-level. At least 12 credit hours must be earned at the 800-level for thesis work. Motion Picture students must maintain an overall minimum GPA of 3.0 or above for all courses. By the end of the second year, students are required to achieve a minimum 3.0 score on the program's film and television literacy test.

Students in the Motion Picture program are strongly encouraged to explore not only a primary but also a secondary area of specialization and develop a minimum of 2 creative projects in consultation with their faculty advisory committee. The 3 year program culminates in a thesis portfolio. Students need to work closely with their primary advisor and committee to ensure they are fulfilling their degree expectations, which typically include a short motion picture project abroad and a summer internship.

The M.F.A. in Interactive Media program requires that students complete a minimum of 45 credit hours at the graduate level with an average of "B" and no grade lower than a "C-". Prior written approval is required from both the chair of the CIM department and the director of graduate studies for transfer of credit hours, for course substitutions, as well as for taking a course at another university.

Interactive Media students are required to register for a capstone project seminar. To register for this course, students must complete all courses with a standing of 3.0 GPA. The capstone course is designed to help students define and execute their final projects. To graduate, students must complete and present a fully articulated capstone project and related documentation. Students must complete all degree requirements within 6 years.

Masters Programs in Cinema and Interactive Media

Students will be able to take 12 elective credits (four classes) of their choice under guidance of their advisor.		
Total Credit Hours		45

- 1 Students must complete a minimum of 45 credit hours at the graduate level with an average of B and no grade lower than a C-. Prior written approval is required from both the chair of the interactive media program and the director of graduate studies for transfer credit hours, for course substitutions as well as for taking a course at another university.
- 2 Students are required to register for a capstone project seminar. To register for this course, students must complete all courses with a standing 3.0 GPA. The capstone course is designed to help students define and execute their final projects. To graduate, students must complete and present a fully articulated capstone project and related documentation.
- 3 Students must complete all master's degree requirements within 6 years.
- 4 Specializations are recommended, but students have the flexibility to design their own specialization.

M.F.A. in Motion Pictures

Students must complete a minimum of 66 credit hours with the approval of the faculty advisor. At least 24 must be at or above the 700-level and at least 12 must be earned for thesis. Motion Picture students must maintain an overall minimum GPA of 3.0 for all courses.

M.F.A. candidates are expected to follow a set sequence of courses during the first two semesters of their studies. Several courses are required during the second year of studies. Candidates are strongly encouraged to explore not only a primary but also a secondary area of specialization in the program and develop a minimum of two creative projects consistent with their areas of primary interest and secondary specialization. A minimum of 6 credit hours in each area of specialization is required. Under faculty committee supervision, students will develop one or two creative projects in the third year of their studies.

All M.F.A. students must demonstrate deeper, critical understanding of motion picture practice in diverse social and cultural contexts. To this end, students are encouraged to take advantage of available study abroad programs. Students are also encouraged to participate in an internship during the summer of the first year or second year of studies.

By the end of the second year, students must complete a film and television literacy test, based on a list of 150 culturally and historically significant titles compiled by the faculty. The list is circulated to each student upon entrance into the program. The test is administered annually in the spring semester. Students are required to earn 85/100% on the test in order to complete the degree.

This three-year program culminates with a thesis portfolio that demonstrates, not only skillful execution of craft, but strong conceptual development rooted in collaborative work and innovative uses of technology.

No more than 9 credit hours will be allowed for graduate internships and advanced projects and directed research. Courses may be taken, with program director approval, from other programs or departments within the University of Miami.

Communication Studies

Two programs are offered in Communication Studies.

- The thesis program emphasizes the student's development of research skills under faculty supervision (30 credit hours).
- The non-thesis program focuses on a theoretical foundation with emphasis on applied communication (36 credit hours).

Students will be prepared for leadership positions in public or private organizations at the national or international level, or pursue advanced degrees.

Thesis students must complete a minimum of 30 credit hours at the graduate level with the approval of a faculty advisor or department chair. Non-thesis students must complete a minimum of 36 credit hours at the graduate level with the approval of a faculty advisor or department chair. Communication Studies students must maintain an overall minimum GPA of 3.0 for all courses. Core courses must be completed during the first year of study, or by completion of 18 credit hours. No more than 6 credit hours will be allowed for advanced projects and directed research. Only one intercession course (3 credit hours) can be counted towards the degree. Electives credits must be chosen with prior approval of a Communication Studies advisor.

Masters Programs in Communication Studies

- M.A. in Communication Studies - Communication Studies Track (p. 1037)
- M.A. in Communication Studies - Health Communication Track (p. 1038)
- M.A. in Communication Studies - Intercultural Communication Track (p. 1040)
- M.A. in Communication Studies - Organizational Communication Track (p. 1041)

M.A. in Communication Studies - Communication Studies Track

The goals of the Master of Arts program in Communication Studies are to provide students with a rigorous educational experience, to develop an advanced understanding of the human communication process, to increase awareness of the interdisciplinary nature of the communication field, and to develop oral, written, critical thinking, and research skills. Students may complete coursework in persuasion, and interpersonal, intercultural, organizational, and health communication together with research methods applicable to these areas. Two programs are offered. The thesis track emphasizes student development of research skills under faculty supervision (30 credit hours). The non-thesis track emphasizes a theoretical foundation based on application of communication courses (36 credit hours).

M.A. in Communication Studies - Health Communication Track

Health Communication is an emerging specialty in the field of communication. This graduate program is designed to provide a broad introduction to human communication in a health-care context. Career opportunities in this area include public health leaders, practitioners, and researchers who design, evaluate, and disseminate health communication messages for private and governmental organizations, advertising, public relations and marketing agencies, and journalists. Students will explore the roles of patients and caregivers, social and cultural issues, communication in health organizations, and the role of mass media. Two programs are offered. The thesis track emphasizes student development of research skills under faculty supervision (30 credit hours). The non-thesis track emphasizes a theoretical foundation based on application of communication courses (36 credit hours).

M.A. in Communication Studies - Intercultural Communication Track

The Intercultural Communication Track is designed to provide students with an understanding of the way communication functions in intercultural settings, how culture affects the communication process, and the reciprocal effects of intercultural perceptions on policy in the history of Eastern-Western relations. Career opportunities in this field include corporate diversity trainer, communication director, human resource manager, international service representative, negotiator, and foreign correspondent with government and business organizations. Two programs are offered. The thesis track emphasizes student development of research skills under faculty supervision (30 credit hours). The non-thesis track emphasizes a theoretical foundation based on application of communication courses (36 credit hours).

M.A. in Communication Studies - Organizational Communication Track

Organizational Communication is designed to provide students with a comprehensive and advanced understanding of communication in the organizational environment. Courses are designed to extend oral, written, and critical thinking skills through application of concepts using practical challenges in organizations. Students have the opportunity to explore essential areas of organizational communication, presentational skills, leadership styles, interpersonal and small group interaction, decision making, persuasion, conflict management, and diversity training. Two programs are offered. The thesis track emphasizes student development of research skills under faculty supervision (30 credits). The non-thesis track emphasizes a theoretical foundation based on application of communication courses (36 credits).

Doctor of Philosophy in Communication

The doctoral program is designed to provide students with the requisite foundation in theory as well as research skills for using communication to make positive change at the societal, community, and individual levels. The program allows learning across content and creative areas, methodological orientations, and platforms of expression for engaged scholarship and immersive experience, globally and locally. You will engage with communication theory, research, and practice using advocacy and storytelling, with particular attention to new and social media for social and behavioral change. This will be your niche: conducting research, engaging in immersive experience, and translating these into evaluation-based practice for the well being of community, society and the world.

The program includes field research experience and the teaching, writing, and media skills necessary for a career in higher education, research institutions, non-profits, government organizations, media, business, and industry. You may choose from health, environmental, international, intercultural and organizational communication as well as from journalism studies and media development to create an appropriate combination for your career goals.

Curriculum Requirements

For the doctoral program, students must complete 57 credit hours of course work beyond the master's degree; 12 of the 57 credit hours must be dissertation credit hours. Doctoral students cannot take intersession courses.

Code	Title	Credit Hours
Required Core Courses		
COM 601	Theories of Communication	3
COM 602	Methods of Communication Research	3
COM 603	Qualitative Research Methodologies	3
COM 604	Advanced Communication Research Methods and Statistics	3
COM 609	Special Topics in Communication ¹	3

COM 695	Directed Readings ¹	3
COM 698	Independent Research ¹	3
School of Communication Electives		9-12
Courses outside the School of Communication		12-15
Dissertation ²		
COM 830	Doctoral Dissertation	1-12
Oral Qualifying Examinations ³		
Total Credit Hours		57

¹ Students must take a minimum of 9 credit hours in COM 609 and/or COM 695/COM 698 or any combination of the three. Students are allowed to take up to 6 credit hours of Directed Readings/Independent Research in total.

² The dissertation committee may be the same as the student's qualifying exams committee. The guidelines for the composition of the dissertation committee are the same as those for the qualifying exams committee. Students must complete 12 dissertation credit hours. These credit hours begin after students have successfully completed their qualifying exams. Students are required to defend a dissertation proposal to the dissertation committee. Students may proceed with the dissertation once the proposal has been approved by the committee and accepted by the director of graduate studies. The dissertation must be an investigation of a substantial scholarly topic and must be defended orally in the presence of the dissertation committee. Students should note that they cannot conduct human subjects research without approval from the University of Miami's Institutional Review Board.

³ All School of Communication Ph.D. students will take written and oral qualifying examinations following the conclusion of all course work prior to being admitted to candidacy for the Ph.D. degree. A student who fails the exam is given one opportunity to retake it with the permission of the exam committee and must pass it within one calendar year of failing the first exam. Any student who fails to be admitted to candidacy for the degree within this one-year period will be dismissed from the program. To be admitted to candidacy, students must have successfully completed qualifying exams and received approval from the department chair, have a minimum GPA of 3.0, and have submitted all original transcripts and standardized test results. A qualifying exams committee consists of a minimum of four members including the chair.

J.D./M.A. in School of Communication

This program allows students to earn a J.D. and an M.A. in Communication in 3 to 3½ years. The three School of Communication programs participating in the joint J.D./M.A. program are Communication Studies, Journalism, and Public Relations. This joint degree program will allow 9 J.D. credit hours to be applied to the M.A. degree and 6 M.A. credit hours to be applied to the J.D. degree, saving the student 15 credit hours between the two programs.

In the J.D. program, students will complete 82 credit hours in the School of Law. Additionally, 6 credit hours from the School of Communication program will be applied to their Law School transcript, for a total of 88 required J.D. credit hours. In the M.A. program, students will complete 27 credit hours in the School of Communication. Additionally, 9 law school credit hours will be applied toward their master's degree, for a total of 36 required M.A. credit hours. As defined above, 15 credit hours will be counted toward both degrees: 6 credit hours from the School of Law and 9 credit hours from the School of Communication. During the first year of the joint program, students will be required to attend the J.D. program full-time. Students will be able to take courses in the School of Communication beginning in the fall of their 2L year. Students must complete all J.D. requirements and all M.A. requirements as defined by their programs. Participants in the joint J.D./M.A. program are not required to complete the M.A. capstone project. The thesis-track is not open to students in the J.D./M.A. joint program without specific approval of the School of Communication. Students may take summer law courses, which may reduce the length of the joint degree program by up to one semester. Students may not take more than 16 credit hours each semester, excluding summer sessions. 17 credit hours per semester may be taken with permission from the Associate Dean, Academic Affairs, School of Law.

Law School Requirements

9 Law School credit hours should come from the following courses:

- Administrative Law
- Communications law
- Constitutional Law II
- Copyright Law
- First amendment Law
- Intellectual Property Law
- Internet Law
- Mass Media Law

Additional law courses to be considered (depending on the student's particular area of interest) are: Antitrust, Art and the Law, Bankruptcy Law, BA, Civil Procedure, Commercial Law, Consumer Law, Corporate Finance, Criminal Law, Cultural Property & Heritage, Elder Law, Election Law, Employment Law, Environmental Law, EU Law, Evidence, Family Law, Financial Regulation, Florida Con Law, Florida Criminal Procedure, Immigration

Law, International Finance, International Human Rights, International Law, Latin American Law, Law & Economics, Law & Medicine, Legal Research Techniques, Media & the Law, Mortgage Law, National Security Law, Press Freedoms in the Americas, Public Education Law, Race and the Constitution, Securities Regulation, Sports Law, State & Local Government, Substantive Criminal Law, and Trademark Law.

The Law School will accept 6 credit hours from School of Communication courses: (the courses selected will depend on the specific program, e.g., Communication Studies, Journalism, or Public Relations, though following consultation with, and approval by, a faculty advisor, substitutions may be allowed). Examples include:

Code	Title	Credit Hours

J.D./M.A. in Communication Studies

Communication Studies (M.A.)

The program has four tracks, each with 9 credits of required courses and 27 credits of elective courses but students in the joint program take 18 credits of electives and transfer 9 credit from the School of Law to make 27 credits. Communication Studies students must receive a "B" or higher in core courses (COM 601, COM 602, and COM 603), as well as maintain an overall minimum GPA of 3.0 for all courses. Core courses must be completed during the first year of study, or by completion of 18 credits.

Communication Studies Track - Non-Thesis

This program focuses on developing a theoretical foundation with emphasis on applied communication.

Journalism and Media Management

Journalism (M.A.)

Journalism is an intensive program of academic study and hands-on practice designed to develop competitive, high-level, cross-platform digital media skills appropriate for today's media landscape. Students take a common core of courses designed to provide a foundation in all aspects of contemporary journalism (e.g., writing, reporting, multimedia, data visualization, broadcasting, media law and ethics). In addition, students have the opportunity to focus their work in various areas of study, including broadcast journalism, news and feature writing and various aspects of multimedia journalism. Through a combination of journalism courses and related courses offered by other programs, students may also concentrate some of their

work in particular areas of interest (e.g., sports reporting and, travel and features). The program begins in the fall semester and lasts 18 months. No prior training or experience in journalism is required.

Media Management (M.S.)

This 32-credit interdisciplinary graduate program is designed for students who seek new or advanced opportunities in the various and expanding areas of the media industry, such as content distribution, news and entertainment programming, research, and analytics. Students complete courses in the Business School to learn, or strengthen their knowledge of business fundamentals, including managerial strategy, economics, accounting, and marketing. At the same time, students take courses in the Department of Journalism and Media Management to apply business principles to media situations and evaluate critically how technological and regulatory trends, changing business models, emergent content applications, and new audience measurement techniques influence decision-making in media operations. Students can also customize their coursework by selecting electives in the School of Communication that best match their personal and career interests.

Students can study full time or part time. The program begins every fall and lasts one year for full-time students or two years for part-time students. No prior business or media management experience or education is required.

Masters Program in Journalism and Media Management

- M.A. in Journalism (p. 1048)
- M.S. in Media Management (p. 1049)

M.A. in Journalism

The Journalism M.A. program is designed to prepare students for professional participation in a number of digital and multimedia news environments, including television, online, mobile, magazine, and newspaper. Coursework stresses journalistic values, critical thinking, and storytelling, combined with the digital and technical skills to create content in the context of today's dynamic and evolving media landscape. In consultation with faculty advisors, students are strongly encouraged to develop areas of special interest, and are required to complete an individually produced, in-depth Qualifying Project.

Journalism M.A. students must complete a minimum of 36 credit hours at the graduate level with the approval of the Chair of the Department of Journalism and Media Management or Director of the Graduate Program in Journalism. Of the 36 credit hours, all must be at or above the 600 level. Students with strong prior experience in a particular area may request a written waiver of a required course from the department chair, upon the demonstration of sufficient expertise in that subject. The program begins in the fall semester with a mandatory bootcamp one week before classes begin and the program typically lasts 18 months, unless the student is attending on a part-time basis. Prior training or experience in journalism is preferred, but not required or necessary. As journalism evolves, the core and list of electives will evolve as well.

Curriculum Requirements

Code	Title	Credit Hours
Required Communication and Journalism Core Courses		
COM 605	Theories and Methods for Mass Communication Research	3
JMM 614	Law and Ethics in Journalism and Media Management	3
JMM 615	Writing and Reporting Across Platforms	3
JMM 628	Seminar in Visual Storytelling	3
JMM 692	Special Topics in Journalism and Media Management (ONLINE JOURNALISM)	3
Electives		18
Electives are chosen with the approval of a faculty advisor. These courses may come from either within or outside the School of Communication. It is highly recommended that students consider pursuing a professional internship for one of these electives.		
Select six of the following:		
JMM 610	Comparative Media Systems	
JMM 617	Television News Reporting	
JMM 619	Interactive Storytelling	
JMM 620	Reporting and the Internet	
JMM 622	Infographics and Data Visualization	
JMM 623	Sports Reporting	
JMM 627	Television News Producing	
JMM 630	Programming for Interactivity	
JMM 631	Database Journalism	
JMM 633	Social Media

M.S. in Media Management

Created in partnership with the Miami Business School, the Master of Science in Media Management is designed to prepare students for careers on the business side of the industry, such as content distribution and audience research. Students will acquire a solid background to understand and operate in the different segments of the rapidly changing media industry by being exposed to both business principles and key aspects of media management, technology, economics, programming, distribution, measurement, and law. The program allows students to cultivate their own topical interests in required media management courses and electives.

Strategic Communication

Public Relations (M.A.)

The program offers two tracks. The 30-credit thesis track program provides an opportunity to supplement a working foundation and knowledge with pertinent theory and research methodologies. A second 36-credit, coursework-only non-thesis track program builds from a foundation of public relations and communication courses.

Departments

- Educational and Psychological Studies (EPS)
- Kinesiology and Sport Sciences (KIN)
- Teaching and Learning (TAL)

Degree Programs

Doctor of Philosophy in Education (Ph.D.)

The Doctor of Philosophy degree with a major in education is designed to develop personnel competent to conduct research in a particular field of education or behavioral sciences. Concentrations are offered in:

- Community Well-Being (EPS)
- Counseling Psychology (EPS)
- Exercise Physiology (KIN)
- Research, Measurement, and Evaluation (EPS)
- Teaching and Learning (TAL)

Doctor of Education (Ed.D.)

The Doctor of Education degree is designed to develop personnel in education competent to utilize the results of research in practical situations. Concentrations are offered in:

- Applied Learning Sciences (TAL)
- Higher Education Leadership (EPS)

Specialist in Education (Ed.S.)

The Specialist in Education degree is an advanced terminal, practice-oriented degree that is designed to prepare recipients to assume positions of leadership within educational and affiliated settings. Concentrations are offered in:

- Early Childhood Special Education (TAL)

Master of Science in Education (M.S.Ed.)

The Master of Science in Education degree is a practice-oriented degree that is designed to prepare its recipients to assume professional positions that require advanced course work and post-graduate degrees. Concentrations are offered in:

- Applied Learning Sciences (TAL)
- Community and Social Changes (EPS)
- Counseling: Marriage and Family Therapy (EPS)
- Counseling: Mental Health (EPS)
- Early Childhood Special Education (TAL)
- Education and Social Change (TAL)
- Exercise Physiology: Clinical and Applied Exercise Physiology (KIN)
- Exercise Physiology: Nutrition for Health and Human Performance (KIN)
- Exercise Physiology: Strength and Conditioning/Fitness Entrepreneurship (KIN)
- Higher Education: Enrollment Management (EPS)

- Higher Education: Student Life and Development (EPS)
- Research, Measurement and Evaluation (EPS)
- Special Education (TAL)
- Sport Administration (KIN)
- STEM Education (TAL)
- TESOL (TAL)

NOTE: The School of Education and Human Development's graduate programs are governed by the rules, regulations and policies of the larger University and Graduate School. In places where what appears in the following is judged to be in conflict with these other policies, the University and/or Graduate School's policies will take precedence.

Application Requirements

Admission to all graduate-degree concentrations in the School of Education and Human Development is based on the recommendation of the faculty. Admissions decisions are based on faculty review of the following general requirements that apply to **all** Graduate Programs in the School as well as specific documents listed under each concentration. Applicants must:

- achieve acceptable scores on the Graduate Record Exam (GRE) taken within the past five years. International applicants whose native language is not English or applicants whose degrees are from a non-U.S. University must pass the Test of English as a Foreign Language (TOEFL) and the GRE;
- provide official transcripts showing completion of a bachelor's degree from an accredited institution and an acceptable undergraduate grade point average. A minimum of 3.0 undergraduate GPA is required. Official transcripts from every institution attended by an applicant, whether or not the applicant completed a degree program at the institution, are required;
- provide three letters of recommendation that address the issues and meet the criteria established by the program being applied to;
- provide a personal statement that addresses the mission and purpose of the program being applied to;
- resume;
- take part in an admissions interview (required by some programs); and
- exhibit personal and professional experiences and characteristics that are relevant to the profession and/or field and/or degree program for which the application is being submitted.

Doctor of Philosophy (Ph.D.)

In addition to the factors listed as general requirements for all applications to the SEHD's graduate programs, consideration for admission to the Ph.D. program will include the following:

- letters of recommendation should address the applicant's *academic* potential;
- available student space in program;
- For TAL: availability of faculty advisor willing to mentor the student.
- For EPS: Counseling: receipt of completed applications by predetermined cut-off date. Please reference the SEHD web site, as doctoral applications are reviewed once each year.

Doctor of Education (Ed.D.)

In addition to the factors listed as general requirements for all applications to the SEHD's graduate programs, consideration for admission to the Ed.D. program will include the following:

- letters of recommendation should address the applicant's academic potential;
- available student space in program; and
- admissions interview.

Specialist in Education (Ed.S.)

In addition to the factors listed as general requirements for all applications to the SEHD's graduate programs, consideration for admission to the Ed.D. program will include the following:

- completion of a master's degree with an outstanding record from an accredited institution;
- adequacy of previous study in the field for which the Ed.S. is being requested;
- an appropriate period of successful teaching experience (TAL only);
- acceptable scores on the Graduate Record Examination (GRE); or in the case of TAL only, approval of a GRE waiver. Applicants who seek a GRE waiver must have taught for a minimum of three years in a full-time capacity, fill out and submit a GRE waiver form, and submit a 3-page essay on an important educational.

Master of Science in Education (M.S.Ed.)

In addition to the factors listed as general requirements for all applications to the SEHD's graduate programs, consideration for admission to the M.S.Ed. program will include the following:

- For some M.S.Ed. programs in TAL: Teachers with **at least** three years full-time teaching experience may apply for a GRE waiver for programs in the Department of Teaching and Learning. An application for waiver of the GRE requirement may be found on the SEHD web site. Teachers who apply for a GRE waiver must submit a 3-page essay on an important topic in education.
- For Community and Social Change (EPS): Professionals who have worked full-time for at least three years in a not-for-profit setting may apply for a waiver of the GRE requirement. Please contact the program directly for conditions governing this waiver.

- For Sport Administration (KIN): Applicants with 3-years of professional work experience may apply for a GRE waiver. Please contact the program directly for specific waiver criteria.

International Applications

All international applications must provide additional information and meet additional requirements as required by the UM Graduate School and the UM Office of International Admissions. For an appropriate link to these requirements, please visit the Graduate School website.

Admission Decision

Once an applicant has been admitted to graduate study, that individual should meet with the faculty advisor who was appointed to serve in that capacity and whose name appears in the admissions letter. This advisor will help the student enroll in courses that are appropriate to the program; to develop and to refine a Program of Study or Course Sequence Plan that must be on file in the Senior Associate Dean's Office by the end of the first semester of study.

Honor Code/Handbook of Policies and Procedures

The School of Education and Human Development follows the Graduate School's Honor Code. All students are required to submit a signed Acknowledgement of Receipt and the Graduate Student Honor Code by the end of their first semester of enrollment.

Continuous Enrollment

The School of Education and Human Development adheres to the Graduate School's continuous enrollment requirement.

Financial Assistance

In addition to University-wide fellowships and the availability of student loans, the School of Education and Human Development provides many forms of financial assistance for students enrolled in its graduate programs. These include tuition-based scholarships (including federally funded scholarships), teacher-tuition scholarships, training fellowships, graduate student assistantships, and other forms of help.

Notwithstanding a student's time to completion, the SEHD limits a student's eligibility for scholarships and other financial assistance that is under its control to five years from the time of initial enrollment.

Scholarship-based financial assistance is to be used only for courses that define each student's program of study. Students who enroll in courses outside of their programs of study will be charged full tuition for those courses.

Teacher Tuition Scholarships do not apply to doctoral (Ph.D. and Ed.D.) programs.

Tuition scholarship assistance may not be applied to the retaking of courses for any reason whatsoever.

Financial assistance whose sources of funding are outside of the School of Education and Human Development, for example, Federal loans provided by the University of Miami, shall be governed by all applicable rules, regulations, and policies. Specifically, many federal loans and grants have conditions limiting the programs and/or courses to which they may be applied. Some federal loans are restricted to graduate courses only; some fellowships, grants or traineeships may entail post-graduation employment commitments. Alternatively, private scholarships or fellowships may have their own conditions. Before accepting any form of financial assistance, please be sure to ask about and to fully understand the conditions that govern whatever type of financial assistance you are offered.

Degree Requirements

In addition to the formal academic requirements (as outlined below), the School of Education and Human Development requires its students to demonstrate personal qualities that, in the judgment of the faculty, would permit them to function effectively in their professional roles. The School of Education and Human Development reserves the right to dismiss any students who are academically or personally unwilling or unable to carry out the professional responsibilities of the respective profession for which they are being trained. Conduct which may be considered unprofessional may include, but is not limited to, research or professional misconduct; dishonesty, cheating, plagiarism; exercise of professionally poor judgment; sexual harassment, discrimination on the basis of race, ethnicity, religion, or sexual orientation; and inappropriate interpersonal behavior. It is up to all students to fulfill their responsibilities in a timely and professional manner, to represent themselves and the University with honesty, and to treat others with dignity and respect.

Doctor of Philosophy (Ph.D.)

Upon admission to graduate study, a supervisory committee, consisting of at least four members (composed as per UM Graduate School regulations), will be appointed by the School of Education and Human Development.

The student will meet with the chairperson of this committee to design a Program of Study/Residency Plan.

The Program of Study/Residency Plan must be approved by the supervisory committee, the department chairperson, and the Senior Associate Dean of Graduate Studies in the School of Education and Human Development.

The Program of Study/Residency Plan must be filed with both the Graduate School and the School of Education and Human Development by the end of the second semester of enrollment or future registration will not be permitted.

All students are required to submit a signed Student Responsibility Checklist and the Graduate Student Honor Code by the end of their first semester of enrollment.

The residence requirement is two full-time consecutive semesters of coursework at the University of Miami.

The minimum total credit hours required beyond the Bachelor's are 60, plus a minimum of 12 dissertation-research credit hours.

15 credit hours of statistics and research methods are required as prescribed by the supervisory committee.

A student must pass a Qualifying exam before being admitted to candidacy for a doctorate. The content and conditions for administering the Qualifying examination are defined by the program area in which a student is enrolled.

A student's score on the Qualifying Examination is the professional judgment of the committee that was appointed to score that examination. As such, no academic appeals of scores on qualifying examination are possible.

If a student fails an initial attempt at passing a program's Qualifying examination, the student's advisory committee may allow a student a second opportunity to pass a new qualifying examination that is administered within a year of the original, *at its sole discretion*.

A student who fails a program's qualifying examination may not proceed any farther in the program and is, instead, dismissed at the end of then-current term. Beyond the then-current term in which a student's qualifying examination is scored, no additional financial assistance will be provided to a student who is scheduled to be dismissed from the program for failure in the qualifying examination.

Students are required to complete all Ph.D. requirements within eight years of initial enrollment.

Doctor of Education (Ed.D.)

Upon admission to graduate study, a supervisory committee, consisting of at least four members (composed as per UM Graduate School regulations), will be appointed by the School of Education and Human Development.

The student will meet with the chairperson of this committee to design a Program of Study/Residency Plan.

The Program of Study/Residency Plan must be approved by the supervisory committee, the department chairperson, and the Senior Associate Dean of Academic Studies in the School of Education and Human Development.

The Program of Study/Residency Plan must be filed with both the Graduate School and the School of Education and Human Development by the end of the second semester of enrollment or future registration will not be permitted.

All students are required to submit a signed Student Responsibility Checklist and the Graduate Student Honor Code by the end of their first semester of enrollment.

The minimum total credit hours required beyond the bachelors are 60, including a minimum of 12 dissertation credit hours.

A supporting area consisting of at least 12 credit hours is required; the student must be qualified for admission to graduate status in this area, and receive approval for enrollment from the appropriate department and from the School of Education and Human Development.

A minimum of 12 credit hours of statistics and research methods are required as prescribed by the supervisory committee.

Students are required to complete all Ed.D. requirements within eight years of initial enrollment.

Specialist in Education (Ed.S.)

The Specialist in Education is a terminal degree that is independent of both doctoral degrees (Ph.D. and Ed.D.) that are offered by the SEHD. Although there is normally some overlap in coursework, admission to a specialist program does not imply that the student has been or will be admitted to a doctoral program.

A supervisory committee consisting of three faculty members in the student's area of study will be appointed by the School of Education and Human Development.

Upon admission to the specialist program, a formal program of study is approved by the Supervisory Committee.

A minimum of 60 graduate credit hours, (or 30 credit hours after completion of the Master's program) is required. The program must include at least 30 graduate credit hours earned at the University of Miami and at least 18 graduate credit hours earned following admission to the specialist program. The specialist program of study is developed in consultation with the Supervisory Committee that consists of 3 faculty members (a chairperson and 2 other members).

Students must pass a comprehensive written examination, portfolio (with an oral examination as a possible additional requirement), capstone course, project, thesis, or requirement specified by the program. When a thesis is chosen, a maximum of 6 credit hours may be counted toward the total

degree requirements, and an oral examination in defense of the thesis will be required. The written comprehensive examination will cover the student's program of study. The examination must be taken during or after the final semester in which the student is enrolled for coursework in the program. The project will be directed by the Chairperson of the Specialist Supervisory Committee.

All specialist students must engage in teaching and/or research appropriate to their degree program.

All work for the degree of Specialist in Education must be completed within six years of initial enrollment.

Master of Science in Education (M.S.Ed.)

A minimum of 30 graduate credit hours is required.

TAL: Students enrolled in any certification program that has been approved by Florida Department of Education (e.g., the Professional Training Option) must fulfill any and all additional requirements (e.g., passing state teacher tests) that are specified by the program approval.

EPS: Students enrolled in any counseling program must complete the required "Personal Growth Experience" form.

Students must pass a comprehensive written examination, portfolio (with an oral examination as a possible additional requirement), capstone course, project, thesis, or requirement specified by the program. When a thesis is chosen (in the KIN Dept. or EPS Dept.), a maximum of 6 credit hours may be counted toward the total degree requirements, and an oral examination in defense of the thesis will be required. The written comprehensive examination will cover the student's program of study. The examination must be taken during or after the final semester in which the student is enrolled for coursework in the program. The project will be directed by the student's advisor.

All work towards the Master's degree must be completed within six years of initial enrollment.

Certificate in Higher Education Administration/Enrollment Management

<http://sites.education.miami.edu/higher-education-administrationenrollment-management-cert/>

College and universities are complex institutions that constantly need skilled administrators who understand all aspects of the ever-shifting higher education environment. The certificate in enrollment management is a 12-credit minimum program designed for working professionals who already have master's degrees and seek career-enhancing skills and credentials.

The certificate can be integrated into the Master of Science in Higher Education Administration Program (for a total of 39 credits). It can be completed in addition to or after completion of a master's program in higher education administration or related field.

Certificate in Higher Education Administration/Student Life and Development

<http://sites.education.miami.edu/higher-education-administrationstudent-life-development-cert/>

The certificate in student life and development is a 12-credit minimum program designed for working professionals who already have master's degrees and seek career-enhancing insights, skills, and credentials. The program is focused on students' transition and adjustment to college and on elements of the college environment that enhance their academic achievement and personal development and well-being.

The certificate can be integrated into the Master of Science in Higher Education Administration Program (for a total of 39 credits). It can be completed in addition to or after completion of a master's program in higher education administration or related field.

Curriculum Requirements

Executive Ed.D. in Higher Education Leadership

<http://sites.education.miami.edu/higher-education-leadership-et-ed-d/>

The Higher Education Leadership program, which offers a Doctor of Education degree (Ed.D.), is committed to preparing students for senior leadership positions in colleges and universities, state and federal agencies, and other educational organizations. The Executive Ed.D. program is guided by a practitioner-scholar model that combines theoretical offerings with application to practical higher education problems. Students focus on areas of special interest and choose dissertation projects that address issues confronting the contemporary higher education workplace.

The Executive Ed.D. is designed to meet the needs of working professionals. Courses are offered on weekends, and a cohort design allows students to develop meaningful relationships, support one another, and learn from the diverse experiences of fellow educators.

The curriculum emphasizes the impact of theory and empirical evidence on administrative, organizational, and policy contexts in postsecondary education. Unique to the University of Miami's Executive Ed.D. program is its component in enrollment management, a comprehensive strategy that promotes the seamless integration of administrative responsibilities to efficiently and effectively meet institutional needs and promotes student success.

M.S.Ed. in Community and Social Change

<http://sites.education.miami.edu/community-and-social-change-m-s-ed/>

The Community and Social Change Master's program is designed to prepare a new generation of creative leaders for the not-for-profit sector who are knowledgeable in the research, theories, and practice of individual and social well-being. The vision of the program is to be a hub for innovative and applied leadership in community well-being and social change. The mission of the program is to prepare globally aware leaders, researchers, and agents of change who create, inspire, and engage community organizations to foster well-being in diverse community settings. The program is designed to develop community leaders who can help understand and address the real challenges faced by local communities in a multi-cultural and global context. The program is designed to accommodate a variety of students by offering courses in a unique format that incorporates the following domains;

1. Core theory and skill-building coursework,
2. Core research coursework,
3. Experiential field experience (practicum), and
4. Capstone requirement (Independent project or Master's Thesis).

Curriculum Requirements

M.S.Ed. in Higher Education Administration - Enrollment Management

<http://sites.education.miami.edu/higher-education-administration-enrollment-management-m-s-ed/>

The Higher Education Administration Program, which offers a Master of Science in Education with concentrations in Enrollment Management, Student Life and Development, and Institutional Research and Policy Analysis, is designed to produce skilled and versatile higher education administrators who understand all aspects of their professional environment. Our graduates enter a variety of roles in college and university administration with the ability to consider today's challenges from a broad-based, highly informed perspective.

Also offered is a Certificate Program for working professionals who already have master's degrees and seek career-furthering credentials and skills.

Curriculum Requirement

The Enrollment Management concentration (33 credit hours), the product of a unique collaboration between the School of Education and Human Development and the Division of Enrollment Management, integrates theory, research, teamwork, and effective communication. It is an interdisciplinary program, with courses also required in the Miami Business School. Opportunities abound for integrating research and theory in daily practice.

M.S.Ed. in Higher Education Administration - Institutional Research and Policy Analysis

<http://sites.education.miami.edu/higher-education-administration-institutional-research-and-policy-analysis-m-s-ed/>

The Higher Education Administration Program, which offers a Master of Science in Education with concentrations in Enrollment Management, Student Life and Development, and Institutional Research and Policy Analysis, is designed to produce skilled and versatile higher education administrators who understand all aspects of their professional environment.

Our graduates enter a variety of roles in college and university administration with the ability to consider today's challenges from a broad-based, highly informed perspective.

Curriculum Requirements

The Institutional Research and Policy Analysis concentration (33 credits) focuses on the skills necessary to conduct applied research that supports the effective functioning of postsecondary institutions. Areas of study extend beyond integrating research into effective administrative and policy initiatives to include understanding state and federal policies, higher education foundations, statistics, and data analytics.

M.S.Ed. in Research, Measurement and Evaluation

<http://sites.education.miami.edu/research-measurement-evaluation-m-s-ed/>

The curriculum of the M.S. Ed. in RME is structured around three components: (A) a core set of 24 credits (8 courses of 3 credits each) of required coursework covering the fundamentals of research design, measurement, and statistical analysis; (B) 6 credits of elective course-work; and (C) a comprehensive exam occurring upon the completion of the 24 credits of required coursework. The specific details of the curriculum are given below.

Curriculum Requirements

Code	Title	Credit Hours
Core Courses		24
EPS 700	Quantitative Methods I	
EPS 701	Introduction to Research Methods	
EPS 702	Quantitative Methods II	
EPS 703	Applied Multivariate Statistics	
EPS 704	Computer Applications in Educational and Behavioral Science Research	
EPS 705	Measurement and Psychometric Theory	
EPS 706	Categorical Data Analysis	
EPS 708	An Introduction to Structural Equation Modeling for Multivariable Data	
Electives ^{1,2}		6
Select 2 courses from the following for a total of 6 credit hours:		
EPS 699	Advanced Individual Study	
EPS 707	Item Response Theory	
EPS 709	Introduction to Multilevel Modeling	
EPS 710	Meta-analytic methods for research synthesis.	
EPS 711	Advanced Topics in Research, Measurement, and Evaluation	
EPS 712	Field Experience in Educational Research	
EPS 714	Qualitative Methods I	

EPS 715	Qualitative Methods II: Case Studies and Grounded Theory
EPS 716	Qualitative Methods II: Interviews and Content Analysis
Comprehensive Exam	
Each student must successfully pass a comprehensive exam that covers the content of the core 24 credits. This exam assesses the student's competency in these core areas of research methodology and use of statistical software, and is based on content that is aligned with the material covered in the core 24 credits.	
Total Credit Hours	30

¹ Students work with faculty member(s) to select from a large number of graduate courses relevant to the students' interests and professional goals. Appropriate courses may be related to advanced statistical modeling or other content areas.

² Upon the approval of your academic advisor, you can take the classes from other departments.

Ph.D. in Community Well-Being

<http://sites.education.miami.edu/community-well-being-ph-d/>

The program in Community Well-Being trains community-engaged action-researchers committed to promoting social justice through rigorous theoretical analysis and community-based research. The program is grounded in the discipline of community psychology and focuses on community-engaged scholarship that involves the researcher in a mutually beneficial partnership with the community. The program prepares scholars for careers in academia, research, and public policy.

Ph.D. in Counseling Psychology

<http://sites.education.miami.edu/counseling-psychology/>

The Counseling Psychology Program has been fully accredited by The American Psychological Association since 1989 and has a proud tradition of preparing students as scholars, clinicians. The program is firmly committed to the foundational values of the discipline of counseling psychology, including its emphasis on prevention, optimal human development, and the promotion of individual, family, and community well-being. The program strives to prepare students who will make a difference in the world through research, scholarship, and reflective practice. The mission of the program is to nurture the development of counseling psychology graduate students and faculty as reflective researchers and scientist-practitioners committed to promoting psychological well-being in a multicultural complex world.

Ph.D. in Research, Measurement, and Evaluation

<http://sites.education.miami.edu/research-measurement-evaluation-ph-d/>

The curriculum of the Ph.D. in RME is structured around six components: (A) a core set of 36 credits (12 courses of 3 credits each) of required coursework covering the fundamentals of research design, measurement, and statistical analysis; (B) 6 credits of a research apprenticeship, in which students conduct mentored research under the supervision of RME faculty members; (C) 6 credits of field experience in educational research, in which students play active roles in the design and analysis of an applied research or evaluation projects; (D) the doctoral qualifying exam; (E) 12 credits of the doctoral dissertation and (F) 6 credits of electives (12 credits of electives for students who do not hold a master degree).

Curriculum Requirements

Code	Title	Credit Hours
Core Courses		36
EPS 700	Quantitative Methods I	
EPS 701	Introduction to Research Methods	
EPS 702	Quantitative Methods II	
EPS 703	Applied Multivariate Statistics	
EPS 704	Computer Applications in Educational and Behavioral Science Research	
EPS 705	Measurement and Psychometric Theory	
EPS 706	Categorical Data Analysis	
EPS 707	Item Response Theory	
EPS 708	An Introduction to Structural Equation Modeling for Multivariable Data	
EPS 709	Introduction to Multilevel Modeling	
EPS 710	Meta-analytic methods for research synthesis.	
EPS 711	Advanced Topics in Research, Measurement, and Evaluation	
Research Apprenticeship		6
EPS 799	Advanced Individual Study ¹	
For a minimum of 6 research apprenticeship credits, students work under the mentorship of RME faculty members (or approved faculty members outside of RME) on original studies pertinent to research, measurement, and evaluation. It is expected that the work completed during the apprenticeship culminates in a manuscript that is suitable for publication in an academic journal. The 6 credits of apprenticeship are documented as two 3-credit blocks of EPS799 (Advanced Individual Study, Form for registering for EPS799 can be found on the SEHD website under the resource tab; and the research apprenticeship must be completed prior to the commencement of dissertation hours (EPS830).		
Field Experience in Educational Research		6
EPS 712	Field Experience in Educational Research ¹	
Students must complete a minimum of 6 credits in field experience related to educational research. The field experience involves providing methodological assistance to a research or evaluation project at the University of Miami or other approved organization (e.g., the evaluation division of Miami-Dade County Public Schools). The nature of the field experience must be approved by the student's advisor prior to commencing the credit hours. The field experience credits are currently documented as EPS712.		
Doctoral Qualifying Exam		
Students must successfully pass the doctoral qualifying exam prior to the commencement of the doctoral dissertation.		
Dissertation Hours		12
EPS 830	Pre-Candidacy Dissertation Research	
EPS 840	Post-Candidacy Dissertation Research	
Electives ^{1 2 3 4}		6-12
Upon the approval of academic advisor, courses outside program may be taken for a minimum of 6 credit hours (course examples are shown below).		
EPS 712	Field Experience in Educational Research	
EPS 714	Qualitative Methods I	
EPS 715	Qualitative Methods II: Case Studies and Grounded Theory	
EPS 716	Qualitative Methods II: Interviews and Content Analysis	
EPS 799	Advanced Individual Study	
Total Credit Hours		66-72

¹ EPS 799 (Advanced Individual Study) and EPS 712 (Field Experience in Educational Research) can be repeated over and above the credits fulfilling a student's apprenticeship (6 credits) and field experience (6 credits) requirements.

- 2 6 credits for students with a Master degree; 12 credits for students without a Master degree
- 3 Upon the approval of your academic advisor, you can take the classes from other departments.
- 4 Additional courses may be substituted upon approval from a student's academic advisor. These options include a variety of graduate courses in the fields of computer science, psychology, education, and other areas of interest.

KIN 784	Energetics of Obesity	3
Choose 3 Courses (9 Credits) From the Following Electives		9
KIN 623	Food Science and Management Principles ¹	
KIN 655	Medical Nutrition Therapy ¹	
KIN 698	Professional Training and Counseling for Integrative Health ¹	
KIN 699	Advanced Programming for Endurance Athletes	
KIN 785	Neurological Mechanisms of Weight Regulation	
KIN 800	Kinesiology Practicum ²	
Total Credit Hours		36

¹ Required for Florida Licensed Dietitian/Nutritionist eligibility. Additionally, the State requires 900 hours of practicum experience, which can be taken outside the program.

² KIN 800 can be taken for additional practicum credit, ranging from 1-3 credits depending on the activity, research, or practicum experience.

Students can transfer up to 9 graduate credits into the 36-credit hour program. University of Miami Exercise Physiology bachelor degree students can transfer 6 graduate credits (taken their senior year) and can waive KIN 645 and KIN 677, to complete the program in 1 year.

M.S.Ed. in Sport Administration

<http://sites.education.miami.edu/sport-administration-m-s-ed/>

This is a 30-credit program for persons interested in sport administration or recreation and leisure sports administration.

Curriculum Requirements

Code	Title	Credit Hours
Core Courses (24 credits)		
KIN 602	Fiscal Management in Sport Administration	3
KIN 603	Principles of Sport Marketing	3
KIN 604	Essential Leadership Skills in Sport	3
KIN 605	Sport Sponsorship and Promotion	3
KIN 606	Ethical Decision Making in Sports	3
KIN 607	Legal Aspects of Sports	3
KIN 609	Advanced Sport Information Management	3
KIN 620	Contemporary Issues in Sport	3

EPS 7XX	Graduate Research Competency Elective	3
Dissertation		
Select 12 credit hours of Dissertation		
KIN 830	Pre-Candidacy to Dissertation Research	6
KIN 840	Post-Candidacy Dissertation Research	6
Total Credit Hours		72

¹ For further information, please contact the Graduate Program Director.

² For guidance, please contact the Graduate Program Director.

* Coursework specialization is available in this program for persons interested in clinical and research orientation in the area of exercise physiology.

** 2/3 of all coursework must be at or above the 700 level. Students entering with a Master's degree in Exercise Physiology or a related degree must take a minimum of 30-credit hours of graduate coursework at the University of Miami in addition to 12-credit hours of dissertation.

Teaching and Learning

<http://sites.education.miami.edu/tal/>

Dept. Code: TAL

Programs

Doctor of Philosophy (Ph.D.)

- Teaching and Learning

This individually-tailored program is designed to help students achieve their professional research-based career goals. A central component of the doctoral program in Teaching and Learning includes work on research projects that support collaboration with faculty and the application of course work as students develop their own research ideas. TAL's Ph.D. program emphasizes an understanding of theory in scholarly inquiry; the intellectual framing and conduct of empirical research; the placement of research within cultural contexts and policy settings; designing, implementing and testing of transformative learning-environments that promote deep learning; and critical analysis of policy, research and practice.

Doctor of Education (Ed.D.)

- Applied Learning Sciences

Master of Science in Education (M.S.Ed.)

- Applied Learning Sciences
- Education and Social Change
- Early Childhood Special Education
- Special Education
- TESOL

Specialist in Education (Ed.S.)

- Early Childhood Special Education

The Ed.S. degree is a terminal degree, for educators who already have a relevant Master's degree and who wish to increase their proficiency in their chosen field. The program requires 30 additional credit hours beyond the Master's Degree (minimum) and is individually designed after admission. Some programs for cohorts of teachers feature lock-step curricula. These programs typically combine students pursuing M.S.Ed. degrees with those pursuing Ed.S. degrees. While all students in these programs follow the same curriculum, students pursuing Ed.S. degrees receive additional or different assignments. Please contact the Department of Teaching and Learning for a program sheet and course listings for the above programs.

Certificates (Non-Degree Programs)

- Applied Learning Sciences

Masters Programs in Teaching and Learning

- M.S.Ed. in Applied Learning Sciences (p. 1077)
- M.S.Ed. in Education and Social Change (p. 1078)
- M.S.Ed. in Early Childhood Special Education (p. 1078)
- M.S.Ed. in Special Education (p. 1080)
- M.S.Ed. in TESOL (p. 1080)

Specialist Programs in Teaching and Learning

- Ed.S. (p. 1077) Early Childhood Special Education (p. 1077)

Doctoral Programs in Teaching and Learning

- Ed.D. in Applied Learning Sciences (p. 1076)
- Ph.D. in Teaching and Learning (p. 1081)

Certificate in Applied Learning Sciences

- Applied Learning Sciences (p. 1075)

Certificate in Applied Learning Sciences

The non-degree Certificate in Applied Learning Sciences is a 15-credit hour graduate program and is focused on human learning, whether alone or social settings. The program's three specific foci, which students are expected to integrate in a culminating applied project, are:

- **Learning:** how people, as individuals, groups, or parts of an organization, learn;
- **Design:** the design, implementation, and revision of learning environments that enhance human learning; and

- **Assessment:** the assessment of learning and the evaluation of individual, social, technological, and design factors that advance or impede learning.

Curriculum Requirements

Code	Title	Credit Hours
Cross-Cutting Courses		6
The following courses can be taken under any area because of their cross-cutting nature but will be completed just once.		
TAL 704	Introduction to the Learning Sciences	
TAL 709	Applied Research and Development in Learning Sciences - Seminar I	
Learning		3
TAL 600	Human Learning	
Design		3
Select 1 course from the following:		
TAL 705	Design of online learning environments	
TAL 706	Design of Formal Learning Environments	
TAL 707	Design for workplace related learning	
TAL 708	Design of Out-of-School, Informal Learning	
Assessment		3
TAL 652	Assessment of Human and Organizational Learning	
Total Credit Hours		15

Ed.D. in Applied Learning Sciences

The 45-credit post-Master's EDD in Applied Learning Sciences prepares students for careers that require expertise in multiple facets of human learning. The program's three specific foci, which students are expected to integrate in a culminating applied project, are:

- **Learning:** how people, as individuals, groups, or parts of an organization, learn;
- **Design:** the design, implementation, and revision of learning environments that enhance human learning; and
- **Assessment:** the assessment of learning and the evaluation of individual, social, technological, and design factors that advance or impede learning.

Ed.S. Early Childhood Special Education

<http://sites.education.miami.edu/early-childhood-special-education-ed-s/>

The Specialist in Education (Ed. S.) degree program with a concentration in Early Childhood Special Education includes coursework and practicum experiences that could lead to endorsement in Pre-Kindergarten Disabilities. Please contact the Florida Department of Education's Bureau of Educator Certificate for any questions regarding endorsement.

In addition to the required 30 credits listed below, students in this program (a) may be assigned advanced level assignments within courses; (b) may be required to complete additional graduate level coursework; (c) will be required to increase the level of implementation of the capstone project; and (d) will be required to write a publishable paper based on the advocacy project and submit it a practitioner special education journal.

Curriculum Requirements

Code	Title	Credit Hours
Core Courses		
TAL 640	Typical and Atypical Child Development	3
TAL 641	Working with Families of Young Children with Disabilities: Strategies and Medical Issues	3

M.S.Ed. in Early Childhood Special Education

<http://sites.education.miami.edu/early-childhood-special-education-m-s-ed/>

Early Childhood Special Education prepares students to work with young children with disabilities and their families in inclusive, collaborative, and natural environments. As part of the 30 credits of coursework, students complete 6 credits of practicum experiences in high-need urban settings involving collaborative partners within the UM as well as community agencies. The program culminates in the presentation of an Advocacy Capstone project. Coursework, practicum experiences and Capstone projects start scholars on a pathway to advocacy for high-need children and their families.

The program includes coursework and practicum experiences that could lead to endorsement in Pre-Kindergarten Disabilities. Please contact the Florida Department of Education's Bureau of Educator Certificate for any questions regarding endorsement.

M.S.Ed. in Education and Social Change

<http://sites.education.miami.edu/education-social-change-m-s-ed/>

The Education and Social Change program's conceptual framework focuses on the world of education beyond classroom walls, the classroom context of teaching, and the students in classrooms, comprising a holistic, developmental approach across the three areas. Overall, the goals of the program

track are to improve instruction for diverse populations, to prepare teachers for leadership roles within their schools, and to develop capacity to lead future change efforts in support of public education.

There are two tracks with three possible program plans: 1) Teaching Track and 2) Social Change Track. The Teaching Track includes a teaching methods course in the area of certification, the core classes, and two electives for those with or wishing to pursue a Florida Temporary or Full Teaching Certificate. There is also the Professional Training Option leading to a Florida Temporary Teaching Certificate (see below for required courses) upon completion of program requirements. The Social Change Track is made up of an additional Social Change course, the Core Classes, and two electives.

Curriculum Requirements

Code	Title	Credit Hours
Teaching Track or Social Change Track - 30 credit hours required		
Core Courses:		
TAL 601	Educational Assessment and Accountability	
TAL 627	Understanding Culture in the Classroom	
TAL 629	Educating Exceptional Students	
TAL 634	Language and Reading Instruction (or TAL 647 Language and Early Reading Instruction)	
TAL 666	Introduction to the Politics of Education, Teaching, and Learning	
TAL 668	Human Development, Learning and Schooling	
TAL 669	Teacher and Student Well-Being in Education	
Choose one of the following Tracks:		
Social Change Track		
TAL 667	Education Reform, Policy, and the Social Organization of Schooling	
Teaching Track		
Select one of the following:		
TAL 661	Instruction in Secondary English.	
TAL 662	Instruction in Secondary Mathematics	
TAL 663	Instruction in Secondary Science	
TAL 664	Instruction in Secondary Social Studies	
TAL 665	Methods of Teaching in the Elementary School	
Electives		
Electives (6 credits): With advisor approval, students may select up to 6 credits (2 courses) to be included in their program plans. -or- Professional Teaching Option: Leading to FL DOE Temporary Teaching Certification upon successful completion of the Teaching Track, along with: ¹		
Professional Teaching Option - 30 to 36 credit hours required		
Core Courses:		
A minimum of 18 credit hours (6 courses) to a maximum of 24 credit hours (8 courses) from among the following:		
TAL 601	Educational Assessment and Accountability	
TAL 606	Issues and Strategies for ESOL	
TAL 612	Building Positive Relationships with Diverse Learners	
TAL 627	Understanding Culture in the Classroom	
TAL 629	Educating Exceptional Students	
TAL 666	Introduction to the Politics of Education, Teaching, and Learning	
TAL 668	Human Development, Learning and Schooling	
TAL 669	Teacher and Student Well-Being in Education	
Select one of the following:		
TAL 660	Instruction and Assessment in the Secondary School.	
TAL 665	Methods of Teaching in the Elementary School	
Select one of the following:		
TAL 610	Literacy and Learning Strategies in the Content Area	
TAL 634	Language and Reading Instruction	
TAL 647	Language and Early Reading Instruction	
Electives		

Select 6 credits (2 courses) from the following:

TAL 616	Mathematics in the Elementary School
TAL 617	Science in the Elementary School
TAL 625	Online Teaching and Leadership
TAL 650	Early Reading Instruction and Literature for Young Children

¹ See Graduate Program Advisor for guidance.

M.S.Ed. in Special Education

<http://sites.education.miami.edu/special-education-m-s-ed/>

This degree prepares individuals to work with students with disabilities in collaborative school environments. The course of study consists of 30-36 credits over six terms (one year that includes two summers). The program accommodates both working teachers and individuals seeking initial teacher certification in special education.

The initial certification option includes 6-credit hours of student teaching. The State approved program provides competencies for initial certification in K-12 special education with reading and ESOL endorsement.

There is 70% scholarship opportunity sponsored by the School of Education and Human Development. The School makes these awards at the same time as final admissions decisions are made.

Curriculum Requirements

Code	Title	Credit Hours
TAL 606	Issues and Strategies for ESOL	3
or TAL 683 Introduction to Theories and Practice of TESOL		
TAL 608	Language Development for Linguistically and Culturally Diverse Students	3
or TAL 686 Principles of First and Second Language Acquisition		
TAL 614	Assessment in Special Education	3
TAL 629	Educating Exceptional Students	3
TAL 634	Language and Reading Instruction	3
or TAL 647 Language and Early Reading Instruction		
TAL 635	Inclusive Models of Teaching	3

TAL 654	STEM Methods for Diverse Learners	3
TAL 668	Human Development, Learning and Schooling	3
TAL 677	Applied Research in Education	3
Total Credit Hours		30
Students seeking initial teacher certification in Special Education		
TAL 621	Student Teaching in the Elementary School	6
or TAL 622		Student Teaching in the Secondary School.
Total Credit Hours		36

M.S.Ed. in TESOL

<http://sites.education.miami.edu/teaching-english-to-speakers-of-other-languages-tesol-m-s-ed/>

This program is for is teachers in Pre-K-16 contexts—English as a Second Language (ESL) specialists or mainstream content area teachers who work with emergent bilinguals or English language learners (ELLs) in the U.S. The Florida Department of Education ESOL Endorsement requirements are embedded within the program's courses. This is a hybrid program with face-to-face meetings for locals; those not able to join the local meetings would be able to join virtually.

Curriculum Requirements

Code	Title	Credit Hours
Core Courses		

TAL 627	Understanding Culture in the Classroom	3
TAL 655	Applied Linguistics	3

TAL 682	Methods of Teaching Content Areas in TESOL	3
TAL 683	Introduction to Theories and Practice of TESOL	3
TAL 684	Advances Techniques in TESOL	3
TAL 685	Language Assessment	3
TAL 686	Principles of First and Second Language Acquisition	3
Total Credit Hours		30

Concentration in Bilingual Education

<http://sites.education.miami.edu/bilingual-biliteracy-development-in-spanish-m-s-ed/>

This program is for U.S. teachers in Pre-K-12 settings who wish to boost their proficiency in Spanish and/or teach in dual language learning (DLL) or ESOL contexts. Typically DLL had ended in 5th or 6th grade; however, there is a recent and progressive push for biliteracy and bilingualism, which requires biliteracy in middle and high school grades, across content areas. Some Spanish language courses may be required, depending on proficiency. This is an hybrid program with face-to-face meetings for locals; those not able to join the local meetings would be able to join virtually.

Ph.D. in Teaching and Learning

The Ph.D. Program in the Department of Teaching and Learning prepares highly qualified individuals to serve as educational leaders, researchers, and teacher educators whose work will contribute to improving teaching and learning both in and out of schools. The program has a strong focus on diversity and equity and supports faculty and student research in areas such as early development, instructional interventions, multilingualism, teacher preparation, family engagement, disability, education policy, and science, technology and mathematics learning. Incoming students are assigned a Supervisory Committee to advise them in developing their Program of Study. With the approval of their Supervisory Committee, doctoral students may apply up to 30 credits from an earned Master's degree towards the 60 required credits of coursework. Students must also enroll in 12 dissertation credits.

Core Courses in the Area of Specialization ¹		12
TAL 655	Applied Linguistics	
TAL 731	Language Policy and Planning (K-12)	
TAL 734	Theory and Research in Reading	
TAL 735	Theory and Research in Writing	
TAL 752	Seminar in Reading/Learning Disabilities	
TAL 753	Cognitive Psychology in Special Education	
TAL 754	Disability and Diversity: Critical Views	
TAL 755	Current Issues in Special Education	
TAL 756	Research in Special Education	
TAL 772	Instructional Design and Technology in STEM Education	
TAL 773	STEM Teaching and Teacher Education	
TAL 774	STEM Learning	
TAL 775	STEM Curriculum and Policy	
TAL 776	Assessment in STEM Education	
TAL 777	STEM-Education Research Practicum	
TAL 778	Diversity and Equity in STEM Education	
Research Methods		15
TAL 710	Introduction to Research ²	
Select 12 additional credit hours of coursework in research methods. ³		
Diversity		6
Select 6 credit hours of coursework focusing on dimensions of diversity. ³		
Electives		15
These credits may be taken within or outside the Department of Teaching and Learning. ³		
Professional Seminar		3
TAL 700	Professional Seminar	
Dissertation		12
TAL 830	Pre-Candidacy Dissertation Research.	
TAL 840	Post-Candidacy Dissertation Research.	
Total Credit Hours		72

¹ Some core courses may also be counted towards fulfillment of the diversity requirement. See Academic Advisor.

² Required.

³ See Academic Advisor for course options.

Engineering

<http://www.miami.edu/engineering>

Degree Programs

The College of Engineering offers courses of graduate study leading to the degrees of:

- Master of Science (Environmental Health and Safety)
- Master of Science (Occupational Ergonomics and Safety)
- Master of Science (Construction Management)
- Master of Science (Management of Technology)
- Master of Science in Architectural Engineering
- Master of Science in Biomedical Engineering
- Master of Science in Biomedical Engineering (Medical Physics)
- Master of Science in Civil Engineering
- Master of Science in Electrical and Computer Engineering
- Master of Science in Industrial Engineering
- Master of Science in Mechanical Engineering

- Master of Science in Ocean Engineering

Ph.D. degrees are offered in the areas of:

- Biomedical Engineering
- Biomedical Engineering (Medical Physics)
- Civil Engineering
- Civil Engineering (Architectural or Environmental Emphasis)
- Electrical and Computer Engineering
- Industrial Engineering
- Mechanical Engineering

Admission Requirements

Students with an appropriate B.S. degree may seek direct entry to either the M.S. track or Ph.D. track. Admission guidelines for the various tracks are as follows. Please refer to program specific sections of the bulletin for more information with respect to admission and degree requirements or visit coe.miami.edu/apply

B.S. to M.S.

In engineering, the master's – not the bachelor's – degree is the first professional degree, so all engineers should seek to obtain an M. S. degree. In order to facilitate the obtainment of an M.S. degree, the University of Miami (UM) College of Engineering (CoE) offers the M.S. degree through a number of possible venues or entry points, as summarized below. Every one of our M.S. degree programs requires 10 courses or 30 credit hours to complete; this can be typically undertaken in one, 9-month academic year (i.e., by enrolling in 15 credit hours per semester).

General Admission Requirements

1. A B.S. degree from an accredited program.
2. Typically a cumulative grade point average of 3.0 on a 4.0 scale.
3. Typically a GRE score of 300 or higher (verbal + quantitative).
4. Most international students must provide a TOEFL iBT score of 80 or higher, or an IELTS score of 6.5 or higher to demonstrate English proficiency.

B.S. to Ph.D.

Direct admission to the Ph.D. track by students holding B.S. degrees is limited to students with exceptional credentials. These credentials typically include a minimum GPA of 3.5 on a 4.0 scale and a minimum GRE of 308 (verbal plus quantitative). After completion of the Departmental M.S. requirements, students enrolled in the direct B.S. to Ph.D. track may apply for an M.S. degree.

M.S. to Ph.D.

Criteria for admission into the Ph.D. program for students with an appropriate M.S. degree include a minimum GPA of 3.5 on a 4.0 scale within their M.S. degree program and a minimum GRE of 302 (verbal plus quantitative).

The College offers graduate programs leading to degrees in both traditional and interdisciplinary areas of study. The primary focus of the College lies in those areas and problems that cross traditional lines. Given the interdisciplinary nature of programs, flexibility is provided in course selection which allows each student to pursue a program especially tailored to the goals of the individual. Given the strengths of the University, graduate programs are offered in conjunction with other schools or units. These programs include:

- Biomedical Engineering in conjunction with the School of Medicine
- Engineering Management
Dual M.S. in Industrial Engineering and M.B.A. in conjunction with the Miami Business School
- M.S. program in Management of Technology in conjunction with the Miami Business School
- M.S. in Environmental Health and Safety in conjunction with the School of Medicine.

The M.S. and Ph.D. programs in Interdepartmental Graduate Studies permit, with approval of the Graduate Council, highly qualified students to pursue a privileged individualized program which cuts across disciplinary lines.

Further details on the various College of Engineering areas of specialization are given under the Departmental and Program headings that follow this section.

Students applying for graduate admission to the College must submit three letters of recommendation from individuals familiar with the applicant's abilities and background.

Students who hold a bachelor's degree in a field other than their proposed major may be admitted to the graduate program and to candidacy upon completion of appropriate undergraduate deficiency courses, in addition to the regular requirements for the graduate degree.

A student's overall program is planned by the student and the student's advisory committee. Requirements for the M.S. thesis and non-thesis options (not available in all areas of specialization) are shown below.

Accepted M.S. applicants can apply and be considered on a competitive basis for partial tuition scholarships. Need based aid also can be awarded, as determined through the financial aid process. A minimum graduate GPA of 3.0 must be maintained in order to maintain satisfactory progress.

Accepted Ph.D. applicants financial assistance is available in the form of fellowships, partial tuition scholarships, teaching and research assistantships, and graduate cooperative assistantships combining study and work assignments with private engineering and architectural firms and government agencies. A minimum graduate GPA of 3.3 must be maintained in order to maintain satisfactory progress.

Financial support is provided predominantly to students pursuing Ph.D. degrees.

For further information, contact Office of Admission, College of Engineering at gradadm.eng@miami.edu (dtpoole@miami.edu) or 305-284-2404, option 2.

Degree Requirements

Requirements for the Master of Science Degree (Thesis Option)

- An approved integrated program with a minimum of 30 credit hours with an average grade of B or better and no grade below C.
- At least 6 course credit hours must be at the 700-level.
- 6 credit hours of the required 30 must be earned in thesis work.
- An oral examination in defense of the thesis.

Requirements for the Master of Science Degree (Non-Thesis Option)

- An approved integrated program with a minimum of 30 credit hours with an average grade of B or better and no grade below C.
- At least 12 of the course credit hours must be at the 700 level.
- In most departments a 3 credit hour graduating project is required.

Requirements for the Doctor of Philosophy Degree

- The programs leading to the degree of Doctor of Philosophy comply in full with the regulations of the Graduate School concerning admission, residence requirements, qualifying and final examinations and dissertation.
- Applicants for admission to the Ph.D. program will be expected to have superior records in their M.S. and B.S. degree programs, well above average scores on the Graduate Record Examination, and strong letters of recommendation.
- At least 18 credit hours in courses must be taken beyond the requirements for the M.S. degree of which 6 credit hours must be at the 700 level.
- All candidates for the doctorate are expected to complete an appropriate integrated program of studies in preparation for the comprehensive Qualifying Examination.
- Students are expected to take their qualifying exams during the first year of enrollment. Admission to candidacy across College of Engineering Departments includes passing the qualifying exam and successful defense of a proposal for research.
- Minimum of one year beyond admission to candidacy is usually necessary for the completion of an acceptable dissertation (12 credit hours or more), whereupon the student is then expected to defend their Ph.D. thesis during the Final Oral Examination.
- Departments may have requirements in addition to the above general requirements for their own graduate programs.

For further information, contact Office of Admission, College of Engineering at gradadm.eng@miami.edu (dtpoole@miami.edu) or 305-284-2404, option 2.

Postgraduate Certificate Program

- A Postgraduate Certificate Program is available requiring the completion of a minimum of 15 credit hours of individually planned advanced course work in an area of engineering specialization, or interdisciplinary study.
- Course sequences culminate at an advanced level, but may begin at a basic level if a new area of specialization is to be undertaken.
- The Program must be completed with a grade average of at least C, within a period of five calendar years from the date of enrollment.
- No transfer credit hours will be accepted. International students requiring a student visa must be in a degree program, and cannot obtain a student visa for the Certificate Program; but international students with certain other types of visas may enroll in the Program.
- Basic admission requirement for the Program is a bachelor's degree in a recognized field of engineering or registration as a Professional Engineer by examination.
- Students demonstrating marked ability in the Program may be encouraged to apply for admission to study for the Master's Degree, and may apply up to 6 credit hours toward the M.S. degree.

Ph.D. Course Exchange with Florida International University

University of Miami Ph.D. students are eligible to enroll in courses at Florida International University for a maximum of 6 credit hours. Enrollment in FIU courses requires approval through the student's program of study committee. See FIU/UM Ph.D. exchange section of the Graduate School section of the bulletin for more details.

Biomedical Engineering

Dept. Code: BME

Degree Programs

The Department of Biomedical Engineering offers three different programs of graduate study leading to the degrees of Master of Science (MS) and Doctor of Philosophy (PhD) in Biomedical Engineering:

- BS/MS in Biomedical Engineering
- MS in Biomedical Engineering
- PhD in Biomedical Engineering (including MD/PhD).

The Bachelor of Science / Master of Science (BS/MS) program is available only to qualified undergraduate students enrolled within the Department of Biomedical Engineering. This program gives qualified internal undergraduate students the opportunity to receive a BS and MS degree in five years.

The graduate program in biomedical engineering includes a **medical physics program** accredited by the Commission on Accreditation of Medical Physics Educational Programs (CAMPEP). This program is coordinated by the Department of Biomedical Engineering and the Department of Radiation Oncology at the School of Medicine.

The graduate programs in Biomedical Engineering at the University of Miami provide a diverse interdisciplinary training experience through collaboration with clinical programs at the University of Miami School of Medicine.

Areas of Research

The broad areas of research in Biomedical Engineering include:

- Imaging, optics and lasers, diagnostic and surgical instrumentation
- Biomechanics, microfluidics, biomaterials and tissue engineering
- Neural engineering, brain-computer-interfaces
- Medical physics

Graduate students receive training and conduct research at the Department of Biomedical Engineering and at clinical departments and research centers at the School of Medicine, including the Bascom Palmer Eye Institute, the Miami Project to Cure Paralysis, the Diabetes Research Institute, the University of Miami Ear Institute, Biomedical Nanotechnology Institute, the Departments of Pathology, Radiology, Radiation Oncology, Otolaryngology, and Surgery, and the Miami Veterans Administration Research Service. Most of our graduate students work closely with physicians to develop and investigate new therapies, devices, and technologies that address real-world clinical problems.

Masters Programs in Biomedical Engineering

- B.S./M.S. Five-Year Program in Biomedical Engineering (p. 1085)
- M.S. in Biomedical Engineering (p. 1088)

Doctoral Program in Biomedical Engineering

- Ph.D. in Biomedical Engineering (p. 1095)

Certificate Program

- Medical Physics (p. 1087)

B.S./M.S. Five-Year Program in Biomedical Engineering

The Department of Biomedical Engineering offers a dual-degree program that culminates with students receiving both Bachelor of Science and Master of Science (BS/MS) in Biomedical Engineering concurrently. This program is available only to qualified students enrolled in the undergraduate program in Biomedical Engineering at the University of Miami. This program is intended to give qualified Biomedical Engineering students the opportunity to acquire both a baccalaureate degree (BSBE) and a Master of Science (MSBE) degree in five years rather than the 4 plus 2 years (approximately) that is traditionally expected. The two degrees are awarded simultaneously when the combined requirements have been met for both degrees.

Admission Requirements

The dual BS/MS program is available only to qualified undergraduate students enrolled in the Department of Biomedical Engineering, in any of the four Concentrations (Electrical, Mechanical, Biomaterials and Tissue, PreMed). Typically, students must have undergraduate student status and a cumulative G.P.A. of at least 3.0 at the time of application.

Undergraduate students must take the Graduate Record Examination (GRE) before the end of their classification as a senior and attain a combined score of more than 300 on the verbal and quantitative portions. Students must meet all other pertinent graduate school and College of Engineering requirements.

Qualified students must apply prior to the beginning of final exams in the second semester of their junior year. Students are strongly advised to apply to the BS/MS program as early as possible in their junior year to facilitate academic advising and course selection in the second semester of their junior year. Before submitting an application, interested students should discuss the program and the possibility of entering the program with an academic advisor.

The College of Engineering Office of Admission will carefully review academic credentials for admission into the program and will notify students of their acceptance into the program. All admitted students will have a special advising appointment with Dr. Narasimhan, Assistant Dean for Undergraduate Studies, to discuss academic issues specific to the BS/MS program.

Curriculum Guidelines

In the dual-degree BS/MS program in the Department of Biomedical Engineering, the first four years of the curriculum are altered as follows:

- The 3 credits of Senior Design Project (BME 402/BME 403) are eliminated.
- In Semester I of the senior year, one 3-credit Undergraduate Technical Elective is replaced with one 3-credit Graduate Technical Elective.
- In Semester II of the senior year, one 3-credit Undergraduate Technical Elective is replaced with BME 705 (MS Design Project I), or alternatively, one 3-credit Graduate Technical Elective.

Graduate Technical Electives taken in the senior year must be chosen from the BME graduate course offerings, with the approval of their academic advisor. The credits of Graduate Technical Electives completed in the fourth year are counted toward the 30 credits required for the MS degree.

Students admitted in the dual degree BS/MS program can take a maximum of six (6) graduate credits per semester in their senior year, for a maximum of twelve (12) graduate credits per year, without incurring additional costs if they are full-time undergraduate students during this period. Students should register for courses towards their graduate degree as "G" credits and not as "U" credits. These registrations must be completed prior to taking courses. Retroactive add/drops will not be processed.

To register for graduate credits during their senior year, students must be in senior status and must complete and submit the Graduate School's "Application for Undergraduates to Take Graduate Coursework (http://bulletin.miami.edu/graduate-academic-programs/engineering/biomedical-engineering/five-year-program-biomedical-engineering-bs-ms/undergrad_take_grad_course.pdf)" form. This form must accompany the Add/Drop and/or Course Request form to ensure that students are registered with the correct registration status.

In the Senior year, students must be registered for a minimum of 12 undergraduate credits each semester to maintain full-time status as an undergraduate student. After completing the senior year, students must register as graduate students.

BS/MS Design Project (BME 705/706)

General Description

In lieu of the 3-credit senior design project (BME 402/BME 403) students enrolled in the dual-degree BS/MS program register for 6 credits of Master Design Project (BME 705/BME 706). The 6 credits of BME 705/BME 706 satisfy the undergraduate senior design project requirements and the non-thesis Master's project requirement. The BME705/706 project must therefore include a significant capstone design component.

Project Mentor

The BME 705/BME 706 design project is monitored by one project mentor and one project coordinator. Students are encouraged to select a mentor and project topic as early as possible, preferably during the first semester of their senior year. The project mentor is generally a primary faculty member of the Department of Biomedical Engineering. The role of the project mentor is to help the student identify a suitable project, to monitor the progress of the student, to provide guidance and training in the relevant topics, and to review the final report and presentation.

Students may complete their project under the supervision of a faculty member from another Department at the University of Miami, or from the local biomedical industry, under the following conditions:

- The student must receive the approval of the Department Chairman and Graduate Program Director
- The student must identify a co-mentor who must be a primary faculty member of the Department of Biomedical Engineering. The co-mentor must be familiar with the topic of the proposed project. The role of the co-mentor will be to monitor the student progress and ensure that the Master's project report and presentation satisfy all of the relevant requirements.

Project Coordinator

The project coordinator is a member of the primary faculty of the Department of Biomedical Engineering who is responsible for teaching the BME705/706 course. The role of the project coordinator is to help students identify a project and mentor; ensure that the projects satisfy the program objectives; provide general guidance and biomedical design and graduate scholarship training; and ensure that the students are making suitable progress towards the project goals.

Project Report

Students will receive a grade for their project only after submission and acceptance of a detailed written report. The report must satisfy the requirements of the Senior Design Project report, and additionally satisfy the requirements of the non-thesis MS project report (See section titled, "Non-thesis MS project" (p. 1088)). The report must be reviewed and approved by the project mentor(s) and the project coordinator. Once the report is approved by the mentor(s), one printed copy and one electronic version in PDF format must be submitted to the Project Coordinator by the specified deadline. The final report must be approved and signed by the Project Mentor(s), Project Coordinator and Graduate Program Director or Department Chairman (Template signature page (http://bulletin.miami.edu/graduate-academic-programs/engineering/biomedical-engineering/five-year-program-biomedical-engineering-bs-ms/Signature_Page_Template.pdf)).

Project Presentation

Students must give an oral presentation of their project. The oral presentation is generally scheduled during the scheduled final examination time of BME 705 or BME 706 in the semester of graduation.

Project Grade

The final grade for the project is given by the Project Coordinator. The final grade is a combination of a grade submitted by the Project Mentor(s) assessing the overall performance of the student on the project, and a grade given by the Project Coordinator assessing the quality of the oral presentation and report.

Graduation Requirements

Students accepted into the dual degree program must maintain at least a 3.0 Cumulative GPA, and meet all other pertinent Graduate School requirements, including a minimum of 3.0 GPA in the credits applied toward the MS degree.

Curriculum Requirements

- B.S./M.S.- Biomaterials and Tissue Concentration (p. 614)
- B.S./M.S. - Electrical Concentration (p. 616)
- B.S./M.S.- Mechanical Concentration (p. 619)
- B.S./M.S.- Premed Concentration (p. 622)
- B.S./M.S.- Medical Physics

Certificate Program in Medical Physics

Associated with the Department of Biomedical Engineering's graduate program in Medical Physics, the University of Miami offers a Certificate Program in Medical Physics. The Certificate Program is accredited by CAMPEP (Commission on Accreditation of Medical Physics Educational Programs) and is a non-degree granting program. The objective of this two-semester program is to allow qualified individuals who have obtained PhD degrees in Physics, Engineering or a related field with a physics-minor-equivalent background to transition into a career in medical physics.

Curriculum Requirements

Code	Title	Credit Hours
BME 602	Unified Medical Sciences II	3
Select one of the following courses:		3
BME 620	Medical Imaging System	
BME 729	Advanced Medical Imaging	
BME 681	Radiation Biology and Physics	3
BME 682	Radiation Therapy Physics	3
BME 683	Radiation Protection	3
BME 781	Radiation Dosimetry and Physics	3
Optional Course		0-3
BME 783	Radiation Therapy Physics Clinical Rotation	
Total Credit Hours		18-21

¹ Credit hours completed by students enrolled in the certificate program are not eligible for degree application.

M.S. in Biomedical Engineering

Masters Program Objectives

The goal of the MS program in Biomedical Engineering at the University of Miami is to prepare students for successful careers in the biomedical industry, academia, or government (FDA, US Patent Office), or for further study in doctoral or health-related programs.

The educational objective of the program is to provide students with the technical and intellectual skills required to solve complex technical or scientific problems at the interface of engineering and medicine or biology.

Admission requirements

The qualifications and documentation required for admission to the MS program in Biomedical Engineering are the same as for the College of Engineering.

The Department of Biomedical Engineering admits four types of students to its MS program:

1. Graduates of BS programs in Biomedical Engineering or related engineering disciplines.
2. Graduates of BS or MS programs in other engineering disciplines.
3. Graduates of BS or MS programs in Physics, Mathematics, Computer Science, Chemistry, Biology or other fields of natural or health science.
4. Graduates of medical schools or other health-related professional schools.

Students in the last two groups are generally given conditional admission and required to take additional undergraduate courses in engineering, physics, and/or mathematics depending on their previous course work, as specified in the admission letter. The requisite courses will be prescribed by the Department Chair or Graduate Program Director during the first advising session.

Curriculum

The curriculum combines advanced coursework which provides depth in a specific area of concentration and advanced problem-solving skills, with supervised research or design in one of the laboratories of the faculty from the Department of Biomedical Engineering or the School of Medicine, or in the local biomedical industry.

Except for the Medical Physics program there are no formalized graduate curricular tracks in the MS program. Master's students select a course of study together with the graduate advisor and/or with their mentor and the thesis committee (for the thesis option) based on their own needs or interests. Students can choose from any of the graduate course offerings, as long as they satisfy the general course requirements and the course prerequisites.

Required Core Courses

All students enrolled in the MS program in Biomedical Engineering are required to complete the following core graduate courses:

- Unified Medical Sciences I/II/III (BME 601/BME 602/BME 603, 3 credits each). Students enrolled in the BS/MS program must take exactly two of these three courses, no more and no less. Other students can choose to complete all three courses.
- Regulatory Control of Biomedical Devices (BME 612, 3 credits)

The three courses of the Unified Medical Sciences sequence are designed to provide a basic understanding of human physiology and anatomy and cellular and molecular biology. Students with an MD from a medical school accredited by the World Health Organization are exempted from taking these courses. Students holding advanced degrees in the life sciences, or equivalent experience in the field, may also be exempt. Each such exception requires the approval of the Department Chairperson and Faculty member responsible for the course of concern.

Students with a background in an engineering or scientific field with no prior exposure to biology/medicine are required to complete all three Unified Medical Sciences courses.

Non-Thesis MS Program

The MS non-thesis option is intended for students with an undergraduate degree in biomedical engineering or related disciplines who seek advanced training or specialization in a specific area of biomedical engineering; for professional engineers with undergraduate degrees in other disciplines who want to enter the field of biomedical engineering; and for students who want to prepare for admission to advanced health-related or other professional programs.

Graduation Requirements

Graduation requirements for the MS Non-Thesis Option include:

Code	Title	Credit Hours
24 Graduate-Level Course Credits Including: †		24
BME 612	Regulatory Control of Biomedical Devices	3
At least 2 of the following 3:		
BME 601	Unified Medical Sciences I (Cellular/Molecular)	
BME 602	Unified Medical Sciences II (Human physiology)	
BME 603	Unified Medical Science III (Neuroscience)	
A minimum of 9 course credits at the 700 level		
MS Project		3
BME 706	Master's Design Project II	
Total Credit Hours		30

† Graduate-level courses are courses that are 600 and above.

Curriculum

A typical curriculum for the MS non-thesis option is shown in the following table. The course sequence and timeline can be adjusted based on individual needs. The minimum residence requirement for the MS degree is two semesters in full-time study or the equivalent in part-time work.

Course	Title	Credit Hours
First Semester		
Course Credits		12
Identify Mentor		
Submit Project Abstract		
	Credit Hours	12
Second Semester		
Course Credits		6
BME 706	Master's Design Project II	3
	Credit Hours	9
Third Semester		
Course Credits		9
	Credit Hours	9
	Total Credit Hours	30

Non-Thesis MS Project

General description

All students enrolled in the MS non-thesis program must complete a 3 credit Master's project (BME 706), under the supervision of a project mentor and departmental project coordinator. The project must demonstrate the candidate's ability to solve complex scientific or technical problems at the interface of engineering and medicine or biology.

The MS project can be a research or design project. The project must include a significant research or design component contributed by the M.S. student, including, but not limited to, the design of an experiment or process; the development of a device, instrument, or system; the development of a computer program; the analysis of experimental data. **Projects cannot be limited solely to the review of literature, the development of research or design proposals, or the collection of experimental data.**

At the completion of their project, students must submit a written project report and complete a public oral defense of their project.

Project Mentor

Students who select the MS non-thesis track must identify a project mentor and select a project before they register for their second semester of full-time study. The project mentor is generally a primary faculty member of the Department of Biomedical Engineering. The role of the project mentor is to help the student identify a suitable project, to monitor the progress of the student, to provide guidance and training in the relevant topics, and to review the final report and presentation.

Students may complete their project under the supervision of a faculty member from another Department at the University of Miami, or from the local biomedical industry, under the following conditions:

- The student must receive the approval of the Department Chairman and Graduate Program Director.

- The student must identify a co-mentor who must be a primary faculty member of the Department of Biomedical Engineering. The co-mentor must be familiar with the topic of the proposed project. The role of the co-mentor will be to monitor the student progress and ensure that the Master's project report and presentation satisfy all of the relevant requirements.

Project Coordinator

The project coordinator is a member of the primary faculty of the Department of Biomedical Engineering who is responsible for teaching the BME 706 course. The role of the project coordinator is to:

- Help students identify a project and mentor.
- Ensure that the projects satisfy the program objectives.
- Provide general guidance and graduate scholarship training.
- Ensure that the students are making suitable progress towards the project goals.

Project Abstract

Non-Thesis MS students must submit a one-page project abstract to the Department Chairman or Graduate Program Director and to the MS Project Coordinator at the time when they register for BME 706. The abstract must include the name of the project mentor (and co-mentor, if any), the title of the proposed project, and a brief description of the goals of the project and proposed methods. The abstract must be approved by the mentor, MS Project Coordinator, and Department Chairman or Graduate Program Director before the student can start work on the project. (Project Abstract Template (http://bulletin.miami.edu/graduate-academic-programs/engineering/biomedical-engineering/biomedical-engineering-ms/Abstract_Template.pdf))

Project Report

Non-thesis MS students must submit a detailed report describing the work completed during the project. The report must describe the objectives and significance of the work, and summarize the activities completed by the student as part of the MS project. The report must demonstrate that the work performed by the student satisfies the general project criteria. The typical length of non-thesis M.S. project reports is 20 to 30 pages. If the project resulted in the submission of a full-length peer-reviewed scientific article, the article can be submitted in lieu of a report, as long as the following conditions are satisfied:

- The student must be the first author of the article.
- The article must reflect the work performed by the student as part of the project.
- The article must be submitted for publication in a peer-reviewed journal or conference proceedings volume.
- A one to two page introduction must be submitted to summarize the project goals and main outcomes.

The report must be reviewed and approved by the project mentor (and co-mentor, if any). Once the report is approved by the mentor(s), one printed copy and one electronic version in PDF format must be submitted to the Project Coordinator by the specified deadline. The final report must be approved and signed by the Project Mentor(s), Project Coordinator and Graduate Program Director or Department Chairman. (Signature Page Template (http://bulletin.miami.edu/graduate-academic-programs/engineering/biomedical-engineering/biomedical-engineering-ms/Signature_Page_Template.pdf))

Project presentation

Non-thesis MS students must give an oral presentation of their project. The oral presentation is generally scheduled during the scheduled final examination time of BME 706 in the semester of graduation.

Project grade

The final grade for the project is given by the Project Coordinator. The final grade is a combination of a grade submitted by the Project Mentor(s) assessing the overall performance of the student on the project, and a grade given by the Project Coordinator assessing the quality of the oral presentation and report.

MS Thesis Program

The thesis option is typically selected by students who are oriented towards a career in academic or industrial research and development, or students who want to acquire an initial independent biomedical research experience before seeking admission to doctoral programs.

Graduation Requirements

Graduation requirements for the MS Thesis Option include:

Code	Title	Credit Hours
21 Graduate-Level Course Credits Including: †		21
BME 612	Regulatory Control of Biomedical Devices	3
At least 2 of the following 3:		
BME 601	Unified Medical Sciences I (Cellular/Molecular)	
BME 602	Unified Medical Sciences II (Human physiology)	

BME 603	Unified Medical Science III (Neuroscience)	
A minimum of 6 course credits at the 700 level		
Thesis Work		6
BME 810	Master's Thesis	
Total Credit Hours		30

† Graduate-level courses are courses that are 600 and above.

Curriculum

A typical curriculum for the MS thesis option is shown in the following table. The course sequence and timeline can be adjusted based on individual needs. The minimum residence requirement for the MS degree is two semesters in full-time study or the equivalent in part-time work.

Course	Title	Credit Hours
First Semester		
Course Credits		12
Identify Mentor & Project		
	Credit Hours	12
Second Semester		
Course Credits		9
BME 810	Master's Thesis	3
	Credit Hours	12
Third Semester		
Course Credits		3
BME 810	Master's Thesis	3
	Credit Hours	6
	Total Credit Hours	30

Students who are not able to complete their thesis during the 3rd semester and have completed all 30 required credits of graduate work, must enroll in 0 credits of Research in Residence (BME 820) to maintain full-time student status.

MS Thesis

General Description

The Master's thesis is a research monograph which describes the significance of the research and summarizes the research activities completed as part of the MS degree requirements. The objective of the thesis is to evaluate the candidate's competence in the area of the MS research. The thesis must demonstrate that the research is original and that the candidate has the ability to solve complex scientific and/or technical problems at the interface of engineering and medicine or biology.

Thesis Mentor

Students who select the MS thesis track must identify a thesis mentor before they register for their second semester of full-time study. The thesis mentor must hold a primary or secondary faculty appointment in the Department of Biomedical Engineering. Exceptions can be made only with approval of the Graduate Program Director and Department Chairman.

The thesis mentor supervises the research work of the student and provides training and guidance in the relevant research topics, including design of experiments, experimental techniques, and scholarship activities. The mentor helps the student select a thesis topic and develop a plan, and chairs or co-chairs the thesis committee. The mentor works closely with the student to ensure that there is satisfactory progress towards the thesis goals.

Thesis Committee

The thesis must be approved by a thesis committee. The duties of the thesis committee are:

- to consult with and to advise students on their research;
- to meet, at intervals, to review progress and expected results;
- to read and comment upon the draft thesis;
- to meet, when the thesis is completed, to conduct the final oral examination and to satisfy itself that the thesis work is original; that it demonstrates the candidate's ability to solve complex scientific and/or technical problems at the interface of engineering and medicine or biology; that it is written in lucid and correct English; and that it is submitted in approved format.

The thesis committee will consist of not less than three members, with the following requirements:

- The committee chair shall be a Primary Faculty member of the Department of Biomedical Engineering, as well as a regular member of the Graduate Faculty. The Committee Chair is generally also the thesis mentor.
- A thesis mentor who is not a member of the Primary Faculty of the Department of Biomedical Engineering, can serve as Co-Chair of the Thesis Committee, together with a second Co-Chair who shall be a member of the primary faculty of the Department of Biomedical Engineering.
- It is an additional requirement of the Department of Biomedical Engineering that at least two committee members should be primary Faculty members from the Department.
- One committee member must be from outside the Department. Outside members of the thesis committee can include part-time faculty that teach within the Department.
- At least one committee member must be a regular member of the Graduate Faculty of the University of Miami.

The committee is nominated by the Graduate Program Director. Usually, the student consults with his/her research mentor and with the Chairperson or Graduate Program Director to select the Committee members.

Thesis Format and Deadlines

It is the duty of the student to ensure that the thesis defense is scheduled and that a final version of the thesis approved by the Dissertation Editor is submitted to the Dissertation Editor by the required deadlines set by the Graduate School. All information pertaining to the formatting and electronic guidelines for electronic thesis submission can be found on the Graduate School website (<https://grad.miami.edu>).

Each thesis must be accompanied by a Certificate of Defense Approval for Master's Thesis (<https://grad.miami.edu/policies-and-forms/forms>) signed by all members of the Committee. Forms can be downloaded from the Graduate School website.

Evaluation Forms

The student is responsible for distributing dissertation evaluation forms (http://bulletin.miami.edu/graduate-academic-programs/engineering/biomedical-engineering/biomedical-engineering-ms/SACS_Graduate_Rating_Grid_Rubric_2016.pdf) to the members of the Thesis Committee for the final oral examination. The evaluation forms are used to assess the overall quality of the graduate program at the Department, College, and University level. The evaluation forms are available on the Graduate School and Department of Biomedical Engineering websites. The completed forms must be collected by the Thesis Mentor and forwarded to the Office Manager at the Department of Biomedical Engineering.

Transfer to MS Non-Thesis Program

Students enrolled in the MS thesis program who do not wish to complete their thesis can transfer to the MS non-thesis program and graduate from the MS program under the following conditions:

- The transfer must be approved by the Department Chair or Graduate Program Director.
- All requirements of the MS non-thesis option must be satisfied, including completion of a 3 credit MS project (BME 706), submission of a project report, and oral defense of project. Completed thesis credits may count towards the three credit MS project requirement.

MS in Medical Physics

The Department of Biomedical Engineering at the University of Miami offers a special MS program in Medical Physics. The objective of the Medical Physics program is to provide advanced knowledge in the field of therapeutic medical physics, and to provide the training required for students to become licensed medical physicists. This program is coordinated by the Department of Biomedical Engineering and the Department of Radiation Oncology at the School of Medicine.

The program is opened to students enrolled in the regular MS program, as well as the dual degree (BS/MS) program. Candidates are required to have completed a 3 credit course in Modern Physics (PHY 360 or equivalent) and a 3 credit course covering the physical foundations of medical imaging (BME 330 or equivalent) before they start their course work in the Medical Physics program.

Students in the Medical Physics Program must complete Unified Medical Sciences II (BME 602) and one of the remaining two courses from the Unified Medical Sciences (BME 601 or BME 603) course series, and the following 22-credit core curriculum in the area of medical physics:

Code	Title	Credit Hours
BME 620	Medical Imaging System	3
BME 681	Radiation Biology and Physics	3
BME 682	Radiation Therapy Physics	3
BME 683	Radiation Protection	3
BME 729	Advanced Medical Imaging	3
BME 781	Radiation Dosimetry and Physics	3
BME 783	Radiation Therapy Physics Clinical Rotation	3
BME 784	Medical Physics Journal Club	1
Total Credit Hours		22

Any remaining credits required to complete the degree must satisfy the general requirements of the MS program. Students enrolled in the MS program in Medical Physics may require a total of 31 credits (non-thesis option) or 34 credits (BS/MS and thesis option) to complete the program requirements.

The topic of the BS/MS project (BME 705/BME 706), MS project (BME 706, non-thesis option), or MS thesis must be related to medical physics. In general, the project is co-supervised by Faculty from the Department of Biomedical Engineering and the Department of Radiation Oncology.

Curriculum

Typical curricula for each option of the MS program in Medical Physics are shown in the following tables. The curriculum for the BS/MS in Medical Physics can be found in the BS/MS section of the bulletin. The course sequence and timeline can be adjusted based on individual needs. The minimum residence requirement for the MS degree is two semesters in full-time study or the equivalent in part-time work.

MS without Thesis

Course	Title	Credit Hours

Ph.D. in Biomedical Engineering

Program Objectives

The goal of the PhD program in Biomedical Engineering at the University of Miami is to train students for independent research and innovation in biomedical engineering. The program is designed to prepare graduates for careers in academia, industrial research and development, or government (FDA, US Patent Office).

PhD students conduct research at the Department of Biomedical Engineering and at clinical departments and research centers at the School of Medicine, including the Bascom Palmer Eye Institute, the Miami Project to Cure Paralysis, the Diabetes Research Institute, the University of Miami Ear Institute, Biomedical Nanotechnology Institute, the Departments of Pathology, Radiology, Radiation Oncology, Otolaryngology, and Surgery, and the Miami Veterans Administration Research Service. Many of our doctoral students work closely with physicians to develop and investigate new therapies, devices, and technologies that address real-world clinical problems.

Admission Requirements

The qualifications and documentation required for admission to the PhD program in Biomedical Engineering are the same as for the College of Engineering.

In general, the Department admits three types of students to its PhD program:

- Students with MS degrees in Biomedical Engineering or related science and engineering fields.
- Students with MD degrees with undergraduate degrees in sciences or engineering.
- Highly qualified students with BS degrees in engineering or sciences.

Students admitted with non-engineering degrees are generally given conditional admission and required to take additional undergraduate courses in engineering, physics, and/or mathematics depending on their previous course work, as specified in the admission letter. The requisite courses will be prescribed by the Department Chair or Graduate Program Director during the first advising session.

The PhD program in biomedical engineering is also a degree-granting program of the University of Miami's MD-PhD program.

Internal M.S. students (thesis or non-thesis) who wish to pursue a doctoral degree can transfer from the MS program to the doctoral degree program under the following general requirements:

- Submission of an application for admission to the PhD program. The application must be submitted on paper to the BME Department Chair.
- Submission of a letter of support by a faculty member who agrees to serve as the student's Ph.D. dissertation advisor.
- Approval of the application by the Department's Graduate Admissions Committee.

Graduation requirements

The general requirements for award of the Doctor of Philosophy include:

- Completion of a minimum of 60 course credits beyond the BS degree.
- Satisfactory completion of a written qualifying examination.
- The submission, oral defense, and approval of a dissertation proposal.
- The submission, oral defense and approval of a dissertation.
- Completion of the publication requirements.

All work, including credit transferred from other institutions, must be completed within 8 years of the time of admission to graduate work, and/or within four years of approval of the dissertation proposal. An average of B (3.0) is required for a graduate degree, and no "D" credit may be counted toward the degree. A C- is the lowest passing grade for graduate students.

Curriculum

The PhD curriculum was designed to provide the technical and intellectual skills required to identify and solve complex scientific or technical problems at the interface of engineering and medicine or biology. The curriculum combines advanced coursework which provides depth in a specific area of concentration, with independent original research in one of the laboratories of the faculty from the Department of Biomedical Engineering or the School of Medicine.

Except for the Medical Physics program there are no formalized graduate curricular tracks in the PhD program. The student's mentor and supervisory committee work with the student to develop a personalized course plan, based on the student's own needs and interests. The personalized course plan is designed to ensure that the student is prepared for advanced independent research and technical innovation in biomedical engineering. The course plan can include any of the graduate course offerings, as long as the student satisfies the course pre-requisites.

The proposed individualized course curriculum must be submitted to the Graduate Program Director for final approval or to the Department Chairperson when the Graduate Program Director is the student's mentor.

Required Core Courses

There are four core graduate courses: Unified Medical Sciences I/II/III (BME 601/BME 602/BME 603, 3 credits each) and a Graduate Scholarship course (BME 780, 3 credits).

The three courses of the Unified Medical Sciences sequence are designed to provide a basic understanding of human physiology and anatomy and cellular and molecular biology. Students admitted to the PhD program with a BS degree are required to take all three courses. Students admitted to the PhD program with an MS degree only need to complete 2 of the 3 courses. Students enrolled in the MD-PhD program and students with an MD from a medical school accredited by the World Health Organization are exempted from taking these 3 courses. With the permission of the graduate advisor, students who have completed these courses or similar coursework in a previous graduate course of study may substitute technical electives for this requirement.

The Graduate Scholarship course provides training in grant proposal writing, manuscript preparation and other doctoral-level research and professional skills. The Graduate Seminars course is a seminar series on research and professional topics in Biomedical Engineering. To receive credit for the Biomedical Engineering Seminars course, students must attend a minimum of 4 seminars each semester during their first 4 semesters.

MD-PhD program

Students enrolled in the MD-PhD program start the PhD program after completion of the first two years of medical school.

MD-PhD students who choose BME as their degree-granting program can count up to 15 credits of work completed during the first two years of medical school towards their PhD degree requirements (See: Credit Requirements). To receive credit, students enroll in the following courses:

- BME 711- Accelerated Basic Science Medical Curriculum (9 credits). BME 711 satisfies the Unified Medical Sciences (9 credits) requirement.
- PIB 731 - Laboratory Research (1-6 credits). Students receive up to 3 credits for each research rotation that they complete during their first two years of medical school, up to a maximum total of 6 credits. To receive credit, students must submit a report for each rotation, following the guidelines for BME Independent Study reports.

All MD PhD students must complete a 3-credit biostatistics course. Students who have successfully completed equivalent coursework in a previous course of study can be exempted from this requirement.

Medical Physics Program

The Department of Biomedical Engineering at the University of Miami offers a special PhD program in Medical Physics accredited by CAMPER. The objective of the Medical Physics program is to provide advanced knowledge in the field of therapeutic medical physics, and to provide the training required for students to become licensed medical physicists. This program is coordinated by the Department of Biomedical Engineering and the Department of Radiation Oncology at the School of Medicine.

Candidates are required to have completed a 3 credit course in Modern Physics (PHY 360 or equivalent) and a 3 credit course covering the physical foundations of medical imaging (BME 330 or equivalent) before they start their course work in the Medical Physics program.

Students enrolled in the Medical Physics Program must follow the general requirements of the PhD program and must complete the following courses:

Code	Title	Credit Hours
BME 602	Unified Medical Sciences II	3
BME 620	Medical Imaging System	3
BME 681	Radiation Biology and Physics	3
BME 682	Radiation Therapy Physics	3
BME 683	Radiation Protection	3
BME 729	Advanced Medical Imaging	3
BME 781	Radiation Dosimetry and Physics	3
BME 783	Radiation Therapy Physics Clinical Rotation	3
BME 784	Medical Physics Journal Club	1

Students enrolled in the Medical Physics program must complete their PhD dissertation project on a topic related to medical physics. In general, the project is co-supervised by Faculty from the Department of Biomedical Engineering and the Department of Radiation Oncology.

Students enrolled in the Medical Physics program must also complete an additional separate qualifying examination focused on the medical physics curriculum (see below section on qualifying examination).

Credit Requirements

The credit requirements are summarized below. Students admitted with non-engineering degrees are generally accepted conditionally, with the requirement to complete a set of undergraduate courses in engineering and/or mathematics before gaining full admission into the PhD program. The list of pre-requisite courses is defined before the start of the first semester of study by the Graduate Program Director and Department Chairperson, in consultation with the student mentor. Course pre-requisites are not counted towards the degree requirements.

Direct BS to PhD Track

Total of 60 Course & Dissertation Credits

Code	Title	Credit Hours
Course Credits		27-48
The following three courses: ¹		9
BME 601	Unified Medical Sciences I (Cellular/Molecular)	
BME 602	Unified Medical Sciences II (Human physiology)	
BME 603	Unified Medical Science III (Neuroscience)	
Graduate Scholarship Course		3
A minimum of 15 credits of additional courses ²		15+
Responsible Conduct of Research Training ³		0
RST 611	Responsible Conduct of Research	
RST 612	Responsible Conduct of Research	
Dissertation Work ⁴		12+
BME 830	Pre-candidacy Doctoral Dissertation	
BME 840	Post-Candidacy Doctoral Dissertation	
Total Credits		60

¹ If the student has completed equivalent coursework, this requirement can be waived. However, these courses must be substituted with another 9 credits of coursework.

² A minimum of 15 credits of additional courses to be selected by the student in consultation with his/her mentor and the supervisory committee. Beyond the minimum requirement of 24 course credits, the supervisory committee shall decide which additional courses, if any, will be required to ensure that the student is prepared for advanced independent research and technical innovation in biomedical engineering. A three credit advanced biostatistics course is strongly recommended.

³ More information about these courses can be found on the CoE website (<http://www.coe.miami.edu>) and the UM RCR website. (<http://www.coe.miami.edu/research-2/responsible-conduct-of-research>)

⁴ A minimum of 12 credits of dissertation work must be completed. Students should enroll into BME 830 before admission to candidacy and BME 840 after admission to candidacy.

MS to PhD Track

RST 612	Responsible Conduct of Research	
Dissertation Work ⁴		12+
BME 830	Pre-candidacy Doctoral Dissertation	
BME 840	Post-Candidacy Doctoral Dissertation	
Total Credits		60

- ¹ A minimum of 15 credits of additional courses to be selected by the student in consultation with his/her mentor and the supervisory committee. Of these credits, up to 6 credits can be satisfied by PIB 731. Beyond the minimum requirement of 24 course credits, the supervisory committee shall decide which additional courses, if any, will be required to ensure that the student is prepared for advanced independent research and technical innovation in biomedical engineering.
- ² This course is not counted towards the minimum of 21 course credit requirement.
- ³ More information about these courses can be found on the CoE website (<http://www.coe.miami.edu>) and the UM RCR website (<http://www.coe.miami.edu/research-2/responsible-conduct-of-research>).
- ⁴ A minimum of 12 credits of dissertation work must be completed. Students should enroll into BME 830 before admission to candidacy and BME 840 after admission to candidacy.

Medical Physics Program

Students enrolled in the Medical Physics Program must follow the general requirements of the PhD program and must complete the following classes as part of their course curriculum:

Code	Title	Credit Hours
BME 602	Unified Medical Sciences II	3
BME 620	Medical Imaging System	3
BME 681	Radiation Biology and Physics	3
BME 682	Radiation Therapy Physics	3
BME 683	Radiation Protection	3
BME 729	Advanced Medical Imaging	3
BME 781	Radiation Dosimetry and Physics	3
BME 783	Radiation Therapy Physics Clinical Rotation	3
BME 784	Medical Physics Journal Club	1

Research in Residence

Once a student has completed all required course and dissertation credits, he or she must enroll in Research in Residence status (BME 850, 0 credit) until the degree has been granted. Research in Residence status is considered full time enrollment. Credit is not granted for research in residence, but a fee is charged for each enrollment.

Qualifying Examination

General Description

All students in the PhD program must pass a Comprehensive Qualifying Examination, which consists of two parts:

- A written examination which serves to assess proficiency in the core disciplines.
- The defense of a dissertation proposal

Upon completion of the examination process, the Supervisory Committee shall notify the Graduate School and the department that the student has passed or failed the examination.

Written Qualifying Examination

Format

The written examination is administered once a year (August) over a period of 1.5 days. The examination consists of three written tests on the topics of basic engineering, applied mathematics and computer science, and applied physiology and medical science. Each test lasts 2.5 hours and consists of a minimum of 12 independent questions or problems assigned by the primary faculty of the BME Department. In each test, students must select and satisfactorily answer 6 problems. Students enrolled in the MD-PhD program are exempt from taking the applied physiology and medical science section of the qualifying examination.

Schedule:

The examination must be taken the first time it is scheduled after completion of the first two semesters. The Graduate School will not, ordinarily, approve the taking of the qualifying examination until the student has had a minimum of one continuous academic year of graduate work in courses, seminars, and directed or tutorial study. In the Department of Biomedical Engineering, a student in good academic standing may take the examination after completing only one full semester of classes, with approval of his/her mentor, Graduate Program Director and Department Chairperson.

Repeat:

A student who fails the examination might be given the opportunity to repeat any or all parts of the examination once. Permission to retake the examination is not automatic. It requires approval of the program faculty. Under exceptional conditions, students may be allowed to repeat a single section a second time. Students who fail the qualifying examination are dropped from the program. Students admitted to the doctoral program with a BS degree that do not pass the qualifying examination may complete the MS degree.

Medical Physics Qualifying Examination

Students enrolled in the Medical Physics program must pass an additional written examination focused on topics covered in the Medical Physics curriculum. The examination is typically scheduled the semester following the regular BME screening examination, and consists of 6 separate written tests on the following topics, corresponding to courses in the curriculum: Anatomy/Radiobiology (BME 602/BME 681); Medical Imaging (BME 620/BME 729); Radiation Therapy Physics (BME 682); Radiation Protection (BME 683); Radiation Dosimetry (BME 781); Medical Physics Clinical Rotation (BME 783). The entire examination is scheduled in a single day, with each test lasting 55 minutes. The minimum passing score for each test is 70%. Students who fail one or more of the tests must retake the test(s) before the end of the semester. Students who fail the same test twice are dropped from the Medical Physics program.

Supervisory Committee

In the Department of Biomedical Engineering, the PhD Supervisory Committee is appointed by the Chairperson during the first year of enrollment, in consultation with the student and his/her research mentor.

The role of the Supervisory Committee is to identify any additional courses required beyond the minimum course requirements, to oversee program milestones, and to administer any additional written or oral examination deemed necessary to complete the qualifying examination.

In the Department of Biomedical Engineering, the Supervisory Committee must be comprised of at least five members. The five members include the committee chair, who shall be a Primary Faculty member of the Department of Biomedical Engineering, as well as a regular member of the Graduate Faculty. Of the remaining members, it is also required that two shall be from Graduate Faculty and one from outside the department. It is an additional requirement of the Department of Biomedical Engineering that two of the remaining members shall be primary Faculty members from the Department. A research mentor who is not a Primary Faculty member of the Department of Biomedical Engineering, can serve as Co-Chair of the Supervisory Committee, together with a second Co-Chair who shall be a member of the primary faculty of the Department of Biomedical Engineering.

Dissertation Proposal

Format

Each student must submit an original written proposal describing the goals of the dissertation research project, the significance of the work, preliminary studies, and the research plan. The proposal must be submitted to the Supervisory Committee and orally defended before the end of the fourth semester for students admitted with an MS degree and before the end of the first semester of the third year for students admitted with a BS degree. The student's knowledge of the proposed research topic will be tested during the oral defense. If any deficiencies are discovered during the defense of the proposal, an additional written or oral examination may be required by the Ph.D. Supervisory Committee.

Evaluation Forms

The candidate is responsible for distributing dissertation proposal evaluation forms (http://bulletin.miami.edu/graduate-academic-programs/engineering/biomedical-engineering/biomedical-engineering-phd/SACS_Graduate_Rating_Grid_Rubric_2016.pdf) to the members of the Supervisory Committee. The evaluation forms are used to assess the overall quality of the graduate program at the Department, College, and University level. The evaluation forms are available on the Graduate School and Department of Biomedical Engineering websites. The forms must be completed by the Committee members after the dissertation defense. The completed forms must be collected by the Dissertation mentor and forwarded to the Office Manager at the Department of Biomedical Engineering.

Admission to Candidacy

A student who has passed the written qualifying examination, and successfully defended the dissertation proposal must:

- submit a signed "Approval of the Dissertation Proposal (http://bulletin.miami.edu/graduate-academic-programs/engineering/biomedical-engineering/biomedical-engineering-phd/Department_Dissertation_Proposal_Approval.pdf)" form to the Graduate Program Director of the Department of Biomedical Engineering.
- form a Dissertation Committee (see below)
- submit an Application for Admission to Candidacy (<https://grad.miami.edu/policies-and-forms/forms>) for the Ph.D./Ed.D./D.M.A. to the Graduate School to be granted admission to candidacy.

Admission to candidacy recognizes the fact that a student enrolled in the PhD program has completed all doctoral degree requirements except completion of an acceptable dissertation project and defense of the dissertation. Completion of the required course credits and dissertation credits (BME 830 and/or BME 840) is not a requirement for admission to candidacy in the Department of Biomedical Engineering.

No student may receive the degree in the same semester or summer session in which he or she is admitted to candidacy. The student must be admitted to candidacy before the dissertation defense is scheduled.

Dissertation Committee

In the Department of Biomedical Engineering, the Dissertation Committee is generally the same as the Supervisory Committee, but it may also be a committee formed anew to undertake the duties of advising and passing upon the dissertation. The Dissertation Committee is nominated by the Department, and is approved and appointed by the Dean of the Graduate School.

As with the Supervisory Committee, the Dissertation Committee must be comprised of at least five members, including the committee chair. The committee chair shall be a Primary Faculty member of the Department of Biomedical Engineering, as well as a regular member of the Graduate Faculty. Of the remaining members, it is also required that two shall be from Graduate Faculty and one from outside the department. It is an additional requirement of the Department of Biomedical Engineering that of the remaining members, at least two should be primary Faculty members from the Department. A research mentor who is not a member of the Primary Faculty of the Department of Biomedical Engineering, can serve as Co-Chair of the Dissertation Committee, together with a second Co-Chair who shall be a member of the primary faculty of the Department of Biomedical Engineering. One additional requirement is that the Dissertation Committee of students enrolled in the MD-PhD program must include one member of the MD-PhD program committee.

The duties of the Dissertation Committee are:

- to consult with and to advise students on their research;
- to meet, at least once per year, to review progress and expected results (see below);
- to read and comment upon the draft dissertation;
- to meet, when the dissertation is completed, to conduct the final oral examination and to satisfy itself that the dissertation is a contribution to knowledge and that it is written in lucid and correct English and submitted in approved format.

Yearly Progress Review

The student must schedule a yearly meeting with the dissertation committee. The purpose of the meeting is to give the student an opportunity to present his/her doctoral research progress to the committee and to receive the committee's feedback and recommendations. The student must submit a brief progress report to the dissertation committee at least seven days before the meeting. During the meeting, the student will present his/her doctoral research progress to the committee. The presentation will be followed by a discussion session. At the end of the discussion session, the committee will meet alone to discuss the student's progress and provide recommendations to the mentor. The mentor will provide a written summary of the discussion and committee recommendations to the student and to the Graduate Program Director. Students who are not making adequate progress may be terminated from the program.

Doctoral Dissertation

General Description

The doctoral dissertation is a monograph which describes the significance of the research and summarizes the research activities completed as part of the doctoral degree requirements. The objective of the dissertation is to evaluate the candidate's competence in the area of the Ph.D. research. The dissertation must demonstrate that the research is original and that it makes a significant contribution to the field of study.

A final public oral defense of the dissertation is required. However, none but the members of the dissertation committee may interrogate the candidate. The defense must be held before the deadline published on the Graduate School website (<https://grad.miami.edu>), generally at least two weeks prior to the last day of class in the semester the student wishes to graduate. The student must submit the Defense Notice Form (<https://grad.miami.edu/policies-and-forms/forms>) available on the Graduate School website (<https://grad.miami.edu>) and provide a copy to the Department of Biomedical Engineering.

The candidate is well advised to have a final, acceptable typescript of the dissertation in the hands of each member of his/her committee at a time reasonably in advance of the final defense of the work a minimum of two weeks prior to the defense.

Dissertation Format and Deadlines

It is the duty of the student to ensure that the dissertation defense is scheduled and that a final version of the dissertation approved by the Dissertation Editor is submitted to the Dissertation Editor by the required deadlines set by the Graduate School. All information pertaining to the formatting and electronic guidelines for electronic thesis and dissertation submission can be found on the Graduate School website (<https://grad.miami.edu>). The Graduate School also encourages students to contact the Dissertation Editor at the Graduate School when they start preparing their dissertation.

Students must inform the Department of Biomedical Engineering of their intent to defend at least 2 weeks in advance of the defense date, by email to the Department staff. The email must include the dissertation title and the date, time and location of the defense. The information will be posted in the Department's physical and online bulletin boards.

Each dissertation must be accompanied by Certificate of Defense Approval for Doctoral Dissertation signed by all members of the Committee. Forms can be downloaded from the Graduate School (https://grad.miami.edu/_assets/pdf/Graduate-School-Student-Handbook-2017-2018.pdf) website (<https://grad.miami.edu>).

Evaluation Forms

The candidate is responsible for distributing dissertation evaluation forms (http://bulletin.miami.edu/graduate-academic-programs/engineering/biomedical-engineering/biomedical-engineering-phd/SACS_Graduate_Rating_Grid_Rubric_2016.pdf) to the members of the Dissertation Committee. The evaluation forms are used to assess the overall quality of the graduate program at the Department, College, and University level. The evaluation forms are available on the Graduate School and Department of Biomedical Engineering websites. The forms must be completed by the Committee members after the dissertation defense. The completed forms must be collected by the Dissertation mentor and forwarded to the Office Manager at the Department of Biomedical Engineering.

Publication Requirements

As a requirement for graduation, all PhD Candidates at the University of Miami Department of Biomedical Engineering are expected to have published, or have in press (i.e., the manuscript must have received final acceptance), in high quality peer-reviewed journals, a minimum of 2 publications describing work related to the dissertation. The candidate must be the first author on at least one of these two publications. In addition, the candidate must have been the presenting author of at least 2 oral or poster presentations describing the dissertation work at major peer-reviewed international conferences.

Teaching Requirements

Students enrolled in the PhD program in Biomedical Engineering who passed their qualifying examination are required to participate in undergraduate teaching activities. The minimum requirement will be to teach one undergraduate classroom lecture per academic year, under the supervision of the primary or secondary mentor, and/or the faculty responsible for the course and to help supervise at least one undergraduate student research project per academic year. For each classroom lecture, the mentor will provide feedback to the student and complete and sign a teaching evaluation form (http://bulletin.miami.edu/graduate-academic-programs/engineering/biomedical-engineering/biomedical-engineering-phd/Grad_Teaching_Eval.pdf) which must be returned to the Graduate Program Director.

Civil, Architectural and Environmental Engineering

<http://cae.miami.edu>

Dept. Code: CAE

Mission Statement

The mission of the Department of Civil, Architectural, and Environmental Engineering is to:

- Provide high-quality undergraduate and graduate education in civil, architectural, and environmental engineering that will prepare graduates for professional careers and a lifetime of learning.
- Conduct high-quality research that will advance the body of knowledge and improve the quality of human life.
- Serve the engineering profession and society through active involvement in professional organizations and contribution of professional expertise.

Disciplines

Civil engineers are leaders in the planning, design, construction, and operation of systems that are essential to modern life. These systems include: buildings, highways, airports, pipelines, bridges, dams, irrigation systems, drainage systems, water-supply and distribution systems, and wastewater collection and treatment works. Civil engineers are employed by government agencies, public utility companies, private consulting firms, construction companies, architectural firms, and universities.

Architectural engineers are leaders in the planning, design, construction, and operation of engineered systems for commercial, industrial, and institutional buildings and other facilities. These engineered systems include electrical, communications and control, lighting, heating, ventilating, air conditioning, fire protection, plumbing, acoustic, and structural components. Architectural engineers are employed by consulting firms, construction companies, facility management companies, HVAC equipment manufacturers, architectural firms, government agencies, and universities.

Environmental engineers are leaders in the application of engineering principles to improve and maintain the environment for the protection of human health, for the protection of nature's beneficial ecosystems, and for environment-related enhancement of the quality of human life. Environmental engineers are employed by government agencies, consulting firms, and universities.

Degree Programs

The Department of Civil, Architectural, and Environmental Engineering offers graduate programs leading to the degrees of:

- Master of Science in Architectural Engineering
- Master of Science in Civil Engineering
- Master of Science in Civil Engineering - Environmental Engineering emphasis
- Doctor of Philosophy in Civil Engineering
- Doctor of Philosophy in Civil Engineering - Architectural Engineering emphasis
- Doctor of Philosophy in Civil Engineering - Environmental Engineering emphasis

The specialty areas of study in Civil Engineering include:

- Structural Engineering and Structural Materials
- Environmental Engineering
- Water-Resources Engineering

The specialty areas of study in Architectural Engineering include:

- Integrated Building Systems
- MEP Systems

Admission Requirements

All applicants to the graduate program are required to submit official academic transcripts, GRE scores, and a minimum of three letters of recommendation. Specific admission criteria are described in this Bulletin under Engineering (p. 1082) - General Admission Requirements.

Applicants who hold a bachelor's degree in a field other than civil, architectural, or environmental engineering may be admitted to the graduate program (and to candidacy, if applicable) upon completion of (a) the regular graduate degree requirements, and (b) undergraduate deficiency courses, which include:

1. Calculus (10 credits)
2. Advanced Mathematics (6 credits)
3. General Chemistry (4 credits)
4. Calculus-based Physics (8 credits)
5. Statics (3 credits)

6. Engineering Science related to area of study (3 credits)
7. Engineering Design related to area of study (6 credits)

In general, items 1 through 7 apply to students without an undergraduate degree in engineering, and items 6 and 7 apply to students with an undergraduate degree in engineering. The student's Program of Study committee will select courses for items 6 and 7 on an individual basis.

Research Opportunities

Civil Engineering: Current research activities include properties of concrete materials, composite structural systems, fiber-reinforced concrete, modeling and simulation of engineering materials, multi-scale modeling of materials, fracture mechanics, structural steel behavior, structural health monitoring, structural repair and rehabilitation.

Architectural Engineering: Current research activities include energy, indoor air quality, heating, ventilating and air conditioning (HVAC), environmentally compatible construction materials and systems, life-cycle building systems integration, and sustainable affordable housing.

Environmental Engineering: Current research activities include development of new physicochemical water and wastewater treatment processes, potable wastewater reuse, solid and hazardous waste management, health and environmental risks analysis, environmental/economic planning for sustainable development, hazardous waste remediation, environmental health studies, water quality studies, ground-water, surface-water, and contaminant-transport processes, hydrologic processes, water resources planning and management, and water policy.

Graduate Academic Standing

A student enrolled in any CAE graduate program is required to make adequate progress towards graduation, maintain a minimum Grade Point Average (GPA), and achieve acceptable course grades. Throughout their graduate study, a student's graduate academic standing will either be *Good Standing*, or *Probation*.

Good Standing: A student's status is considered Good Standing if he/she is:

- (i) making adequate progress towards graduation,
- (ii) maintaining an overall cumulative GPA greater than or equal to 3.000,
- (iii) achieving a term GPA greater than or equal to 3.000 in every semester, and
- (iv) achieving grades of "C" or better in all coursework.

A student who does not satisfy all of the above requirements will be placed on Probation or dismissed from the program.

Probation: A student that does not meet all of the requirements for being in Good Standing must consult with his/her Advisor and/or Supervisory Committee to review his/her progress and develop a plan to rectify the performance problems. A student will be given one semester to improve his/her performance and satisfy the requirements of Good Standing. Otherwise, the student will be dismissed from the program.

To be eligible for graduation, a student must have a minimum cumulative GPA of 3.000 and no grade below "C" in all courses in the student's approved Program of Study. In accordance with university policy, all course grades are included in the GPA and the Graduate School's Repeat Rule applies to courses with grades lower than "C".

Masters Programs in Civil, Architectural and Environmental Engineering

- M.S. (p. 1106) (p. 1104) Civil Engineering (p. 1106)
- M.S. (p. 1104) (p. 1106) Architectural Engineering (p. 1104)
- B.S./M.S. Civil Engineering Program (p. 1103)
- Dual M.S. in Civil Engineering with the University of Bologna (p. 1110)

Doctoral Program in Civil, Architectural and Environmental Engineering

- Ph.D. in Civil Engineering Program (p. 1116)

B.S./M.S. in Civil Engineering

Admission Requirements

Undergraduate students of the department having a GPA of 3.0 or better are encouraged to apply to the 5-year BS/MS program during their junior year. Applicants are required to submit official transcripts, official GRE scores, and three letters of recommendation. Admission criteria are described under Colleges of Engineering – Graduate Admission Requirements.

Graduation

Requirements for graduation are:

- Minimum of 30 graduate-level credits with a GPA of at least 3.0, and no grade lower than C

Of the 30 graduate-level credits:

- At least 24 credits of lecture-based courses
- At least 15 credits in CAE
- At least 12 credits of courses at the 700 level
- At least 6 credits of lecture-based CAE courses at the 700 level (not Independent Study / Special Problems)
- Up to 6 credits can be Independent Study (Special Problems and/or Master's Design Project)

Thesis research (CAE 810) will not count towards the degree.

Transfer of credits from other institutions

- A total of 6 credits of transfer and/or exchange coursework not counted towards the student's BS may be taken at another institution and used to satisfy requirements for the M.S. The number of eligible credits for transfer is 9, when pre-approved coursework is taken as part of a semester abroad experience.

Curriculum

The program of study is tailored to the student's background and goals by their advisor, and must be approved as constituting an MS in Civil or Architectural Engineering by the student's Program of Study Committee. The committee comprises a minimum of 3 members, as follows:

- The CAE Committee Chair (Advisor) shall be a full-time faculty member from the CAE Department, one member must be from outside the Department and hold a Ph.D., and one member other than the CAE Committee Chair (Advisor) must be either a full-time or part-time member of the Department; and
- In addition to the Committee Chair, at least one of the members must be tenured/tenure-earning, or a member of the Graduate Faculty.

M.S. in Architectural Engineering

Overview

The Department of Civil, Architectural, and Environmental Engineering (CAE) offers a Master of Science degree in Architectural Engineering (MSAE).

The educational objectives of the Master of Science program in Architectural Engineering are to produce graduates whom:

1. Have advanced technical knowledge in at least one specialty area of Architectural Engineering
2. Have advanced capability to apply knowledge to engineering problems

The degree program has the following options:

- Thesis option
- Non-Thesis option
- 5-Year B.S./M.S. option available for qualified undergraduate students enrolled within the CAE Department

For all options, a minimum of 30 graduate-level credits are required with an average of "B" or better and no grade below "C". A total of 6 credits of transfer and/or exchange coursework (not counted towards the B.S. degree, and with grades of "B" or above) may be taken at another institution (with pre-approval) to satisfy the requirements for the M.S. degree. The M.S. degree can be typically completed within one calendar year.

The Program of Study is the student's specific set of coursework that defines the course requirements for graduation and must be approved by an advisory committee (known as the Supervisory Committee).

Curriculum Requirements - Thesis Option

A minimum of 30 graduate-level credits are required with an average of "B" or better and no grade below "C". Of the 30 credits:

- At least 24 credits of lecture-based courses
- At least 15 credits in CAE courses
- At least 6 credits of lecture-based CAE courses at the 700 level (not Independent Study)

- 6 credits of Master's Thesis (CAE 810) and an oral examination in defense of the thesis

The table presents an overview of the course selection:

Code	Title	Credit Hours
CAE 810	Master's Thesis	6
2 CAE 700 Level Lecture-Based Courses		6
1 CAE Elective Course		3
5 Elective Courses		15
Total Credit Hours		30

- Notes:
1. All courses are 3 credit hours unless otherwise indicated
 2. Independent Study/Special Problems (CAE 595, CAE 695, CAE 795) *will not* count towards the degree requirements
 3. Master's Design Project (CAE 604) *will not* count towards the degree requirements

The M.S. thesis must be defended to, approved by, and signed by the student's Thesis Committee, which is typically the same as the student's Supervisory Committee or, if not, has a composition that is equivalent to the Supervisory Committee.

Refer to the Additional Details section (below) for additional options and restrictions.

Curriculum Requirements - Non-Thesis Option

Code	Title	Credit Hours
2 CAE 700 Level Lecture-Based Courses		6
2 Courses 700 Level		6
3 CAE Elective Courses		9
3 Elective Course		9
Total Credit Hours		30

- Notes:
1. All courses are 3 credit hours unless otherwise indicated
 2. Up to 6 credits can be Independent Study/Special Problems (CAE 595, CAE 695, CAE 795)
 3. Master's Design Project (CAE 604) *will not* count towards the degree requirements
 4. Master's Thesis (CAE 810) *will not* count towards the degree requirements

Refer to the Additional Details section (below) for additional options and restrictions.

Additional Details

- There is also a 5-Year B.S./M.S. option available for qualified undergraduate students enrolled within the CAE Department. For this combined degree programs only, students are allowed to transfer up to 9 credit hours of graduate coursework from a semester spent abroad. The coursework resulting in the 9-credit hour transfer is to be approved by the student's M.S. Supervisory Committee **prior** to initiating a study abroad program. With the exception of the dual M.S. program with UniBo (<http://www.coe.miami.edu/departments/cae-engineering/graduate/dual-ms>), transferred credits cannot be used to satisfy the requirements of an external degree.
- Admissions requirements for the M.S. degree are listed in this Bulletin under Engineering (p. 1082) and under Master's Degree.
- A total of 6 credits of transfer and/or exchange coursework (not counted towards the B.S. degree, and with grades of "B" or above) may be taken at another institution (with pre-approval) to satisfy the requirements for the M.S. degree.
- Internships, Practical Training, workshops, or other types of practicum are neither required nor optional credit-earning components in the established graduate curriculum (Program of Study). Credit earned through these experiences (such as UMI 605) *will not* count towards any CAE degree requirement.
- The Supervisory Committee must have a minimum of 3 members, including:
 1. Committee Chair (Advisor) shall be full-time CAE faculty and a member of the Graduate Faculty.
 2. Full-Time or Part-Time CAE Faculty
 3. Non-CAE member with an earned Ph.D.

In addition to the Committee Chair, at least one member must be tenured/tenure-earning or a member of the Graduate Faculty.

M.S. in Civil Engineering

Overview

The Department of Civil, Architectural, and Environmental Engineering (CAE) offers a Master of Science degree in Civil Engineering (MSCE) with three areas of specialty:

- Structural Engineering and Structural Materials
- Environmental Engineering
- Water-Resources Engineering

The educational objectives of the Master of Science program in Civil Engineering are to produce graduates whom:

1. Have advanced technical knowledge in at least one specialty area of civil engineering
2. Have advanced capability to apply knowledge to engineering problems.

In each of the specialty areas, several options are available:

- Thesis option
- Non-Thesis option
- 5-Year B.S./M.S. option available for qualified undergraduate students enrolled within the CAE Department
- 5-Year B.S./Dual M.S. option available for qualified undergraduate students enrolled within the CAE Department; students earn a B.S. and two M.S. degrees (one at the University of Miami and one at the University of Bologna, Italy) by spending their 5th year studying abroad.

For all options, a minimum of 30 graduate-level credits are required with an average of "B" or better and no grade below "C". A total of 6 credits of transfer and/or exchange coursework (not counted towards the B.S. degree, and with grades of "B" or above) may be taken at another institution (with pre-approval) to satisfy the requirements of the M.S. degree. The M.S. degree can be typically completed within one calendar year.

The Program of Study is the student's specific set of coursework that defines the course requirements for graduation and must be approved by an advisory committee (known as the Supervisory Committee).

Curriculum Requirements - Thesis Option

A minimum of 30 graduate-level credits are required with an average of "B" or better and no grade below "C". Of the 30 credits:

- At least 24 credits of lecture-based courses
- At least 15 credits in CAE courses
- At least 6 credits of lecture-based CAE courses at the 700 level (not Independent Study)
- 6 credits of Master's Thesis (CAE 810) and an oral examination in defense of the thesis

The table presents an overview of the course selection:

Code	Title	Credit Hours
CAE 810	Master's Thesis	6
2 CAE 700 Level Lecture-Based Courses		6
1 CAE Elective Course		3
5 Elective Courses		15
Total Credit Hours		30

* NOTES

1. All courses are 3 credit hours unless otherwise indicated.
2. Independent Study/Special Problems (CAE 595, CAE 695, CAE 795) *will not* count towards the degree requirements.
3. Master's Design Project (CAE 604) *will not* count towards the degree requirements.

The M.S. thesis must be defended to, approved by, and signed by the student's Thesis Committee, which is typically the same as the student's Supervisory Committee or, if not, has a composition that is equivalent to the Supervisory Committee. Refer to the Additional Details section (below) for additional options and restrictions.

Curriculum Requirements - Non-Thesis Option

A minimum of 30 graduate-level credits are required with an average of "B" or better and no grade below "C". Of the 30 credits:

- At least 24 credits of lecture-based courses
- At least 15 credits in CAE courses
- At least 12 credits of courses at the 700 level
- At least 6 credits of lecture-based CAE courses at the 700 level (not Independent Study)
- Up to 6 credits can be Independent Study (Special Problems)

The table presents an overview of the course selection:

Code	Title	Credit Hours
2 CAE 700 Level Lecture-Based Courses		6
2 Courses 700 Level		6
3 CAE Elective Courses		9
3 Elective Courses		9
Total Credit Hours		30

* NOTES

1. All courses are 3 credit hours unless otherwise indicated
2. Up to 6 credits can be Independent Study/Special Problems (CAE 595, CAE 695, CAE 795)
3. Master's Design Project (CAE 604) *will not* count towards the degree requirements
4. Master's Thesis (CAE 810) *will not* count towards the degree requirements

Refer to Additional Details section (below) for additional options and restrictions.

Additional Details

- There is also a 5-Year B.S./M.S. option available for qualified undergraduate students enrolled within the CAE Department. For this combined degree program only, students are allowed to transfer up to 9 credit hours of graduate coursework from a semester spent abroad. The coursework resulting in the 9-credit hour transfer is to be approved by the student's M.S. Supervisory Committee prior to initiating a study abroad program. With the exception of the dual M.S. program with UniBo (<http://www.coe.miami.edu/departments/cae-engineering/graduate/dual-ms>), transferred credits cannot be used to satisfy the requirements of an external degree.
- Admissions requirements for the M.S. degree are listed in this Bulletin under Engineering (p. 1082) and under Master's Degree.
- A total of 6 credits of transfer and/or exchange coursework (not counted towards the B.S. degree, and with grades of "B" or above) may be taken at another institution (with pre-approval) to satisfy the requirements for the M.S. Degree.
- Internships, Practical Training, workshops, or other types of practicum are neither required nor optional credit-earning components in the established graduate curriculum (Program of Study). Credit earned through these experiences (such as UMI 605) *will not* count towards any CAE degree requirements.
- The Supervisory Committee must have a minimum of 3 members, including:
 1. Committee Chair (Advisor) shall be full-time CAE faculty and a member of the Graduate Faculty
 2. Full-time or part-time CAE faculty
 3. Non-CAE member with an earned Ph.D.

In addition to the Committee Chair, at least one member must be tenured/tenure-earning or a member of the Graduate Faculty.

M.S. in Construction Management

Situational Background

The U.S. Census Bureau puts the total annual value of construction in the United States at approximately \$900 billion (8% of the U.S. gross national product), making the construction industry one of the most important sectors of the nation's economy.

The University of Miami's MS in Construction Management program is a practice-oriented advanced graduate degree that offers a blend of construction and business management courses. This degree program is designed to develop leaders and managers for complex building projects, with mastery in best practices related to resiliency, sustainability, building information modeling, project delivery and decision-making. The University is uniquely situated in a booming metropolis where commercial and residential construction is a large and important industry.

The Construction Management Program

- Offers an interdisciplinary approach with the participation of other graduate programs at the University of Miami.
- Prepares graduates for a variety of employment opportunities. Potential employers include general contractors, real estate developers, sub-contractors, construction management firms and architectural engineering firms.

Objective

The MS in Construction Management provides a foundation for those who want to effectively lead a construction project or business.

Who Is the MS Program For?

The program is open to both entry-level graduate students who want to pursue a career in construction management and professionals who have responsibilities in engineering, architecture, business and law fields, and want to further their knowledge and skills.

Industry Advisory Board

One of the differentiators of the MS program is that it is informed by an industrial advisory board with significant experience in construction management. The advisory board currently consists of:

- *Henry E. Adams, Kiewit Corporation*
- *Rodney Barreto, Floridian Partners, LLC; Chairman - Fish & Wildlife Foundation of Florida*
- *Scott Desharnais, Moss Construction*
- *Kobi Karp, Kobi Karp Architecture and Interior Design*
- *Thomas Koulouris, AECOM / Jackson Health Systems*
- *Ana Veiga Milton, President of Jose Milton Foundation*
- *John L. Murphy, DLA Piper LLP (US)*
- *Ari Pearl, South Florida Developer*
- *Jaime S. Saavedra, Turner Construction*
- *Victor Sanchez, Goldman Properties*

Description

Graduates of the program obtain the technical proficiency, financial knowledge, entrepreneurial skills, and business acumen needed for success in this continuously evolving industry.

Graduates of the program will learn how to integrate multiple professional requirements for bringing construction projects to successful completion, including estimating, cost control, risk, new technologies, project planning, scheduling, negotiation and labor relations. Coursework also examines how to manage the various types of contractual relationships governing the owner, the contractor, subcontractors, consultants and architects, as well as the essential skills of bidding, negotiating, handling disputes and claims, devising and implementing strategic business plans, and leadership.

Through consultations with industry leaders, advisory board members, faculty members, and colleagues in the construction industry, the curriculum for the University of Miami's MS-CM is continually evaluated against current best practices and the highest standards. Participants have immediate access to knowledge and skills that address current issues and developments in the industry.

Curriculum Requirements

Dual M.S. in Civil Engineering with the University of Bologna

The Department of Civil, Architectural, and Environmental Engineering (CAE) at the University of Miami (UM) has partnered with the University of Bologna (UNIBO) in Italy to offer a dual Master of Science degree program in Civil Engineering (Dual MSCE). Each dual degree program is structured in four semesters and consists of courses and research with two semesters to be completed at UM, and two semesters to be completed abroad at UNIBO. The degrees conferred by each institution are as follows:

Dual Degree Program Area of Emphasis

Civil Engineering

Environmental Engineering

Academic Degree Obtained at UNIBO

Laurea Magistrale in Civil Engineering (Classe LM) - *Taught in English*

Laurea Magistrale in Ingegneria per l'Ambiente ed il Territorio (Classe LM 35) - *"Earth Resources Engineering" International Curriculum taught in English*

Academic Degree Obtained at UM

MS in Civil Engineering

MS in Civil Engineering (*Environmental Emphasis*)

Upon Completion of the Dual Degree Program requirements, the students will be awarded two separate and distinct Master's of Science degrees.

This program is open to students who are admitted to the graduate program at the end of their junior year as part of the 4+1 (BS + MS) program. Students applying for this program must have a minimum grade point average of 3.0, and score more than 300 on the Graduate Record Examination (GRE).

Once enrolled in the 4+1 (BS+MS) program, students are eligible to apply to the dual MS degree program. The five-year program leading to a B.S. and dual M.S. degrees (BS/2MS) can be completed in 10 semesters as long as the student makes satisfactory progress.

Admission to the 4+1 (BS+MS) program and the BS + dual M.S. program is conducted through the College of Engineering Admissions Office. Any student interested in applying should contact the Director of Admissions in the College of Engineering and their academic advisor in the CAE Department. Both should conduct an overview and feasibility study based on the student's current program of study, and discuss the application requirements and timeline.

The curriculum for the dual M.S. degree program consists of courses that are required for the MS-UM degree, courses for the MS-UNIBO degree, and common courses shared between the programs. In general, students will enroll in the following program of study during their 4th year (Senior Year), and 5th year (at UNIBO). The table is shown in UM credit equivalents:

Course	Title	Credit Hours
Senior Year		
Fall Semester I		
Take PS/HA Cognate Course in Freshman Semester; Add the following courses:		
Graduate Level Course		3
Graduate Level Course		3
	Credit Hours	6
Spring Semester II		
CAE 604	Master's Design Project	3

Graduate Level Course	3
Credit Hours	6
Total Credit Hours	12

Course	Title	Credit Hours
Fifth Year (Graduate)		
First Semester		
Transfer Graduate Level Course		3
Transfer Graduate Level Course		2
Transfer Graduate Level Course		2
Graduate Course for UNIBO MS		
Graduate Course for UNIBO MS		
CAE 795	Special Problems	2
	Credit Hours	9
Second Semester		
Transfer Graduate Level Course		3
Transfer Graduate Level Course		2
Transfer Graduate Level Course		2
Graduate Course for UNIBO MS		
Graduate Course for UNIBO MS		
CAE 795	Special Problems	2
	Credit Hours	9
	Total Credit Hours	18

Students shall submit an individual Program of Study to select courses as part of the program. The individual study program must be approved by both institution's Academic Coordinators. A thesis is required as part of the program and will be completed at UNIBO while working with an advisor at UM. Students must defend their Master's Thesis according to the rules and modalities of UNIBO to obtain the Laurea Magistrale degree.

Program credits are reported using two systems: the European Credit Transfer System (ECTS) and the United States College Credit System (US). The transfer rate between the systems is 2 ECTS credits = 1 US credit. The credit requirements for each MS program are based on the transfer credits between the institutions.

Any deviation from the designated course lists requires pre-approval by the student's UM supervisory committee, the UM CAE Graduate Program Director, and the UNIBO Academic Advisor prior to course registration.

5 YEAR BS/DUAL MS COURSE SCHEDULE FOR CIVIL ENGINEERING

4TH Year (Senior Year at UM): All courses in Table A (24 U.S., 48 ECTS) + 2 courses in Table B (6 U.S., 12 ECTS)

5th Year (at UNIBO): The remaining courses in Tables B and C (24 U.S., 48 ECTS) + Civil Engineering Research (6 U.S., 12 ECTS) + CAE 795: Special Problems (4 U.S., 8 ECTS). Courses in Table C consist of Curriculum courses and Elective courses which can be chosen by the student, depending on the study area they are interested. They are shown in Tables E, F, and G.

Additional Details

- Each Student is required to complete a Program of Study and have it approved by their Supervisory Committee and the Graduate Program Director prior to entering the program.
- Internships, Practical Training, Workshops, or other types of practicum are neither required nor optional credit-earning components in the established graduate curriculum (Program of Study). Credit earned through these experiences (such as UMI 605) will not count towards any CAE degree requirements.

• The Supervisory Committee at the University of Miami must have a minimum of 3 members, including:

1. Committee Chair (Advisor) shall be full-time CAE Faculty and a member of the Graduate Faculty
2. Full-time or Part-time CAE Faculty
3. Non-CAE member with an earned Ph.D.

In addition to the Committee Chair, at least one member must be tenured/tenure-earning or a member of the Graduate Faculty.

Ph.D. in Civil Engineering

Overview

The Department of Civil, Architectural, and Environmental Engineering (CAE) offers a Doctor of Philosophy (Ph.D.) degree in Civil Engineering with the following areas of emphasis:

- Civil Engineering
- Architectural Engineering
- Environmental Engineering

The educational objectives of the Doctor of Philosophy program in Civil Engineering are to produce graduates whom:

1. Have advanced technical knowledge in at least one specialty area of civil engineering
2. Have advanced capability to apply advanced knowledge to engineering problems
3. Have made significant contributions in at least one specialty area of civil engineering

The specialty areas of study for the Ph.D. include:

- Structural Engineering and Structural Materials
- Environmental Engineering
- Water Resources Engineering
- Integrated Building Systems
- Mechanical, Electrical, and Plumbing (MEP) Systems

For students who already have an earned Master of Science (in either civil, architectural, or environmental engineering), 30 graduate-level credits are required beyond the M.S. degree. For students who do not have an M.S. (in civil, architectural, or environmental engineering), a minimum of 60 graduate-level credits are required beyond the B.S. degree. All students are required to engage in supervised research and defend a dissertation.

The Program of Study is the student's specific set of coursework that defines the course requirements for graduation and must be approved by an advisory committee (known as the Supervisory Committee). Depending on whether the student already has an earned M.S. degree, the Ph.D. degree can typically be completed within two to five years.

Curriculum Requirements

For a Ph.D. following an M.S.

For students who already have an earned M.S. (in civil, architectural, or environmental engineering), a minimum of 30 graduate-level credits are required beyond the B.S. degree with an average of "B" or better and no grade below a "C". Of the credits:

- At least 18 credits in CAE
- At least 18 credits of lecture-based and/or Independent Study courses
- At least 6 credits of lecture-based CAE courses at the 700 level (not Independent Study)
- 12 credits of Doctoral Dissertation (CAE 830 and/or CAE 840)
- A total of 6 credits of transfer and/or exchange coursework (not counted towards the B.S. or M.S. degrees) may be taken at another institution and used to satisfy the requirements for the Ph.D. degree.

The table presents an overview of the courses selection:

Code	Title	Credit Hours
CAE 830 and/or CAE 840		12
2 CAE 700 Level Lecture-Based Courses		6

4 Elective Courses	12
Total Credit Hours	30

Note: All courses, except Dissertation, are 3 credit hours unless otherwise indicated. Refer to the Additional Details section (below) for additional options and restrictions.

For a Ph.D. without prior M.S.

For students who do not have an M.S. (in civil, architectural, or environmental engineering), a minimum of 60 graduate-level credits are required beyond the B.S. degree with an average of "B" or better and no grade below "C". Of the 60 credits:

- At least 42 credits of lecture-based and/or Independent Study courses
- At least 12 credits of lecture-based CAE courses at the 700 level (not Independent Study)
- At least 30 credits in CAE
- 18 credits of Doctoral Dissertation (CAE 830 and/or CAE 840)
- A total of 12 credits of transfer and/or exchange coursework (not counted towards the B.S. or M.S. degrees) may be taken at another institution and used to satisfy the requirements for the Ph.D. degree.

The table presents an overview of the course selection:

Code	Title	Credit Hours
CAE 830 and/or CAE 840		18
4 CAE 700 Level Lecture-Based Courses		12
10 Elective Courses		30
Total Credit Hours		60

Note: All courses, except Dissertation, are 3 credit hours unless otherwise indicated. Refer to the Additional Details section (below) for additional options and restrictions.

Qualifying Examination

A Ph.D. student must pass a Qualifying Examination, generally taken at the end of the first year of study, before being allowed to defend a dissertation proposal. The examination, administered by the student's Supervisory Committee, must consist of a written component, and may also include an oral component if deemed appropriate by the Supervisory Committee. Three outcomes of the examination are possible: *Pass*, *Fail*, and *Fail with option to re-take once*. For students retaking the exam, the Committee will determine a suitable time frame, but not to exceed 6 months.

Dissertation Proposal Defense

Subsequent to passage of the Qualifying Examination, the student can defend his/her Dissertation Proposal to their Dissertation Committee, which is typically the same as the student's Supervisory Committee or, if not, has makeup equivalent to the Supervisory Committee. All Committee members must approve the Proposal.

Admission to Candidacy

Admission of the student to Candidacy is subject to passage of the Qualifying Examination and passage of the oral Dissertation Proposal Defense.

Dissertation Defense

The Ph.D. thesis must be defended to, approved by, and signed by the student's Dissertation Committee, which is typically the same as the student's Supervisory Committee or, if not, has a composition that is equivalent to the Supervisory Committee.

Additional Details

- Master's Design Project (CAE 604) *will not* count towards the Ph.D. degree requirements.
- Internships, Practical Training, workshops, or other types of practicum are neither required nor optional credit-earning components in the established graduate curriculum (Program of Study). Credit earned through these experiences (such as UMI 605) *will not* count towards any CAE degree requirements.
- At a minimum, a qualifying exam and a final public oral examination in defense of the thesis are required.
- The Supervisory Committee (and Dissertation Committee) must have a minimum of 4 members, including:
 1. Committee Chair (Advisor) shall be full-time CAE faculty and a member of the Graduate Faculty.
 2. CAE faculty and a member of the Graduate Faculty
 3. CAE faculty and a member of the Graduate Faculty

4. Non-CAE member with an earned Ph.D.

Electrical and Computer Engineering

<http://www.coe.miami.edu/dept-eec/>

The Department of Electrical and Computer Engineering offers graduate programs leading to the degrees of Master of Science (thesis or non-thesis option) and Doctor of Philosophy in Electrical and Computer Engineering. Five-year BS and MS dual degree programs are available for qualified undergraduate students enrolled within the Department.

Current research interests of the faculty include:

- Statistical signal processing.
- Image and video processing, pattern recognition, computer vision, automation of visual tasks.
- Machine learning and big data analytics.
- Bioinformatics, computational biology, and genomics.
- Nano-photonics, plasmonics, micro/nano-electronic devices, nano-materials and structures.
- Fusion and learning in networks.
- Data mining, multimedia information systems, multimedia networking and security.
- Intelligent sensor microchips and MEMS, BioMEMS, implantable medical devices, VLSI, ASICs, system-on-a-chip, FPGAs.
- Integrated optics, holography, lithography, spectral imaging, optical coherence tomography.
- Game theory, multi-agent systems.

Master of Science in Electrical and Computer Engineering (MSECE)

Must complete either a thesis option (consisting 24 course credits + 06 thesis credits) or a non-thesis option (30 course credits). Thesis option requirements include the submission and oral defense of a thesis supervised by a Research Supervisor.

Doctor of Philosophy (PhD)

Must complete 30 credits (18 course credits + 12 dissertation credits). Requirements include successful completion of a Qualifying Examination, an oral defense of a research proposal, and submission and oral defense of a dissertation supervised by a Research Supervisor. An MS degree in Electrical and/or Computer Engineering, or related area, is required for students pursuing a PhD degree.

Masters Programs in Electrical and Computer Engineering

- M.S. in Electrical and Computer Engineering (p. 1118)
- Five-Year B.S.E.E.-M.S.E.C.E. Dual Degree - Electrical Engineering Option (p. 670)
- Five-Year B.S.E.E.-M.S.E.C.E. Dual Degree - Audio Engineering Option (p. 667)
- Five-Year B.S.Cp.E.-M.S.E.C.E. Dual Degree - Computer Engineering Option (p. 660)
- Five-Year B.S.Cp.E.-M.S.E.C.E. Dual Degree - Software Engineering Option (p. 663)

Doctoral Program in Electrical and Computer Engineering

- Ph.D. in Electrical and Computer Engineering (p. 1120)

M.S. in Electrical and Computer Engineering

The Electrical and Computer Engineering Department offers the Degree of Master of Science in Electrical and Computer Engineering (M.S.E.C.E.) with a thesis option (24 course credit hours and 6 thesis credit hours) or a non-thesis option (30 course credit hours and no thesis credit hours). The M.S.E.C.E. program offers five tracks: audio engineering, data analytics, Microdevices and Photonics, cybersecurity, and a general ECE track.

Admissions Requirements

Admission to MS degree programs in the College of Engineering (CoE) at the University of Miami is competitive. A qualified applicant needs a strong academic record, as evidenced by their grades in relevant coursework (traditionally a cumulative gpa of 3.0 or higher). Additionally, prospective students should have a 300 or higher on the GRE General Test (verbal plus quantitative), acceptable scores on TOEFL or ILETS exams (English proficiency exams for international students only), as well as comprehensive letters of recommendation. Transfer of credits from other institutes complies with the rules of the graduate school. Many of our applicants have research experiences that have resulted in publication.

Traditionally a BS degree in engineering is required for admission into one of our MS programs. Students who do not have a degree in an Engineering field can still apply and will be considered by the admission committee, but if admitted pre-requisite coursework is traditionally required before being fully admitted into MS studies with us.

Graduation Requirements

The M.S.E.C.E. program with the non-thesis option complies in full with the CoE degree requirements

- An approved integrated program with a minimum of 30 credit hours with an average grade of B or better and no grade below C.
- At least 12 course credit hours must be at the 700-level.
- In addition, the **cybersecurity track** requires a 3-credit-hour graduating project.

The M.S.E.C.E. program with the thesis option, complies with the following CoE degree requirements

- An approved integrated program with a minimum of 30 credit hours with an average grade of B or better and no grade below C.
- At least 6 of the course credit hours must be at the 700 level
- 6 credit hours of the required 30 must be earned in thesis work.

In addition to the CoE degree requirements, the M.S.E.C.E. program with the thesis option requires the following:

- Appointment of a Thesis Defense Committee comprised of at least 3 members: the Chair of the committee is the Research Advisor who must have RF/GF status within ECE; at least one other member (excluding the Research Advisor) must have RF/GF status within ECE; at least one member must be from outside ECE.

Curriculum Requirements**General ECE Option**

Any 600-level and 700-level ECE courses and courses in other departments with the approval of the academic advisor.

Audio Engineering Option

Code	Title	Credit Hours
Suggested Courses		
ECE 602	Engineering Acoustics	3
ECE 633	Random Signals and Noise	3
ECE 636	Adaptive Filters and Signal Processing	3
ECE 638	Introduction to Digital Image Processing	3
ECE 640	Digital Speech and Audio Processing	3
ECE 648	Machine Learning	3
Remaining credits may be taken from 600/700 level courses in ECE, CS, MTH, or any other department in consultation with the academic advisor.		

Data Analytics Option

Code	Title	Credit Hours
Suggested Courses		
ECE 600	Engineering Analytical Techniques	3
ECE 633	Random Signals and Noise	3
ECE 648	Machine Learning	3
ECE 672	Object-Oriented and Distributed Database Management Systems	3
ECE 676	Internet and Intranet Security	3
ECE 677	Data Mining	3
CSC 632	Introduction to Parallel Computing	3
CSC 640	Algorithm Design and Analysis	3
Remaining credits may be taken from 600/700 level courses in ECE, CS, MTH, or any other department in consultation with the academic advisor.		

Microdevices and Photonics Option

Code	Title	Credit Hours
Suggested Courses		
ECE 603	Laser Communications	3
ECE 604	Fundamentals of Optical	3
ECE 605	Semiconductor Photonic Devices	3

ECE 606	Microfabrication	3
ECE 632	VLSI Systems	3
ECE 643	BioNanotechnology	3
Remaining credits may be taken from 600/700 level courses in ECE, CS, MTH, or any other department in consultation with the academic advisor.		

Cybersecurity Option

Code	Title	Credit Hours
Required Courses		
ECE 676	Internet and Intranet Security	3
CSC 609	Data Security and Cryptography	3
ECE 673	Information Assurance	3
ECE 785	Advanced Problems in CyberSecurity	3
Electives (Select a minimum of 9 credit hours) ^{1,2}		
ECE 633	Random Signals and Noise	
ECE 634	Communication Networks	
ECE 674	Agent Technology	
ECE 675	Digital Forensics	
ECE 677	Data Mining	
ECE 678	Network Security	
ECE 753	Pattern Recognition and Neural Networks	
CSC 632	Introduction to Parallel Computing	
CSC 732	Parallel Algorithms	
Total Credit Hours		21

1 Remaining credits may be taken from 600/700 level courses in ECE, CS, MTH, or any other department in consultation with the academic advisor.

2 Additional Elective Course Areas: Legal Issues (Digital Evidence and Analysis, Privacy, Legal Response/Responsibilities, Policies)

Ph.D. in Electrical and Computer Engineering

The Ph.D. degree is designed so that it

- offers students the theoretical, practical, and professional knowledge that will enable them to pursue discovery of new knowledge;
- allows students to conduct visible high-quality research that will advance the state of knowledge; and
- serves to train, motivate, and inspire our graduates to become leaders in their fields.

Admission Requirements

The minimum GRE requirement is 310 (verbal plus quantitative) for the B.S. to Ph.D. track, and 305 for the M.S. to Ph.D. track. Other requirements are identical to the CoE requirements. The transfer policy complies with the rules of the graduate school.

Graduation Requirements

The average grade of course works should be B or better, and no grade can be below C. Other requirements are identical to the CoE requirements.

Qualifying Examination

The Ph.D. Qualifying Examination is held twice a year, one week prior to the beginning of the Fall and Spring semesters. The applicant must select four subject areas listed in the following:

Computer Engineering (CE) Program
 CE1 Programming Languages and Algorithms
 CE2 Computer Networks
 CE3 Computer Architecture and Digital Systems
 CE4 Database and Distributed Systems
 CE5 Analytical Techniques

Electrical Engineering (EE) Program
 EE1 Signals and Systems

EE2 Communications
EE3 Circuits and Electronics
EE4 Solid-State Physics and Devices
EE5 Analytical Techniques

The criteria for subject selection are as follows:

- Select the PROGRAM (CE or EE) (in consultation with Research Advisor).
- Select FOUR subjects as follows:
 - THREE from the selected PROGRAM
 - ONE from the other PROGRAM

Subject matter in CE5 and EE5 are identical, and both CE5 and EE5 cannot be selected in one sitting.

Requirements for satisfactory completion of the Ph.D. qualifying examination are:

- Taking the Ph.D. Qualifying Examination:
 - The first attempt must be within two semesters (summers excluded) of initial enrollment in the Ph.D. program.
 - Any student failing to pass the examination during the first attempt, can retake the examination a second time during its immediate next offering (see Passing the Ph.D. Qualifying Examination section below).
 - Any student failing to pass the examination a second time will have his/her Ph.D. status terminated.
- Passing the Ph.D. Qualifying Examination: To pass the examination, a student's grades must satisfy the following criteria:
 - Criterion 1: Average grade of "B" (3.000) or better for the entire 4-subject examination: a student failing to meet this criterion will be required to repeat the whole examination during its immediate next offering. The student may change the subject areas selected.
 - Criterion 2: Grade of "C" (2.000) or better for each subject: each subject failing to meet this criterion will have to be repeated during the immediate next offering of the Ph.D. Qualifying Examination. No change in the subject area is allowed and the average grade computed with the re-taken subject together with the remaining subject areas previously taken must satisfy Criteria 1 and 2 to successfully pass the examination.

Dissertation Committee

The dissertation committee should comprise at least 5 members: the Chair of the committee is the Research Advisor who must have research faculty (RF) or graduate faculty (GF) status within ECE; at least two other members (excluding the Research Advisor) must have RF/GF status within ECE; at least one member must be from outside ECE.

Dissertation Proposal Defense

An oral defense of a dissertation proposal on an original research topic before the dissertation committee is required.

Admission to Candidacy

Requirements are identical to the CoE requirements.

Industrial Engineering

Department Mission Statement

The Department of Industrial Engineering mission is to provide contemporary and relevant industrial and systems engineering education and research; impart knowledge and skills necessary to design and to improve a variety of manufacturing and service processes; promote life-long learning; and contribute to emerging societal needs.

Degree Programs

The Department of Industrial Engineering offers graduate programs leading to the:

- Master of Science in Industrial Engineering
- Master of Science in Environmental Health and Safety
- Master of Science in Occupational Ergonomics and Safety
- MSIE/MBA Weekend Executive Program (in conjunction with the School of Business)
- Master of Science in Management of Technology (in conjunction with the School of Business)

The Department also offers:

- a Ph.D. program in Ergonomics and Human Factors

- a Ph.D. in Industrial Engineering.

Masters Program in Industrial Engineering

- M.S. in Industrial Engineering (p. 1122)
- M.S. in Environmental Health and Safety (p. 1122)
- M.S. in Management of Technology (p. 1124)
- M.S. in Occupational and Ergonomics Safety (p. 1124)
- M.S.I.E./M.B.A. Executive Program (p. 1124)

Doctoral Program in Industrial Engineering

- Ph.D. in Industrial Engineering (p. 1126)
- Ph.D. in Ergonomics and Human Factors (p. 1125)

M.S. in Environmental Health and Safety

Master of Science in Environmental Health and Safety

An interdisciplinary **M.S. degree program in Environmental Health and Safety** is offered through the Department of Industrial Engineering in collaboration with the School of Medicine. These programs of study are individually structured to fit the student's interests and career objectives.

The program will consist of a 36 credit hours in the areas of environmental health and safety.

Curriculum Requirements

Code	Title	Credit Hours
Core Courses		
EPH 601	Medical Biostatistics I	3
EPH 602	Biostatistics II	3
EPH 621	Fundamentals of Epidemiology	3
EPH 641	Aspects of Environmental Health	3
IEN 651	Accident Prevention Systems	3
IEN 657	Ergonomics and Human Factors Engineering	3
IEN 757	Ergonomics and Occupational Biomechanics	3
IEN 794	Master's Project	3
Electives (12 Credits)		12
Total Credit Hours		36

M.S. in Industrial Engineering

- The Master of Science degree in Industrial Engineering includes the following areas of concentration:
 - Engineering Management
 - Ergonomics and Human Factors
 - Health Care Systems
 - Management of Technology
 - Manufacturing Engineering
 - Occupational Health and Safety
 - Operations Research
 - Productivity Engineering
 - Quality
- Students (other than University of Miami graduates) applying for graduate admission to the College should submit three letters of recommendation from individuals familiar with the applicant's abilities and background. Students who hold a bachelor's degree in a field other than Industrial Engineering may be admitted to the graduate program and to candidacy upon completion of appropriate undergraduate deficiency courses, in addition to the regular requirements for the graduate degree. A student's overall program is planned by the student and the Graduate Advisor.
- Requirements for the Master of Science Degree (both thesis and non-thesis option):
 - An approved integrated program with a minimum of 30 credit hours with a 3.0 average or better on all credit hours attempted and no single grade below "C" at the University of Miami while a graduate student.

- b. At least 12 course credit hours must be at the 700 level.

Code	Title	Credit Hours
Thesis Option ¹		
5 Common Core Courses		
IEN 712	Design of Experiments	3
IEN 742	Linear Programming and Extensions	3
IEN 757	Ergonomics and Occupational Biomechanics	3
IEN 761	Engineering Cost Management	3
or IEN 763	Project Management Techniques	
or IEN 764	Supply Chain Management	
IEN 765	Advanced Production Systems	3
3 Elective Courses		
IEN 810	Master's Thesis	6
Total Credit Hours		30

Code	Title	Credit Hours
Non-Thesis Option ¹		
5 Common Core Courses		
IEN 712	Design of Experiments	3
IEN 742	Linear Programming and Extensions	3
IEN 757	Ergonomics and Occupational Biomechanics	3
IEN 761	Engineering Cost Management	3
or IEN 763	Project Management Techniques	
or IEN 764	Supply Chain Management	
IEN 765	Advanced Production Systems	3
4 Elective Courses		
IEN 794	Master's Project	3
Total Credit Hours		30

¹ Note: All courses are 3 credit hours unless otherwise indicated

Notes:

- i In addition to the above required courses, the student will have to take other graduate level elective courses to fulfill the degree requirements. A list of approved electives is maintained by the Graduate Advisor in the Department of Industrial Engineering. Substitution of courses is allowed, but must be approved by the Graduate Advisor and the Department Chairman.
 - ii 500-level courses are open to advanced undergraduates and to graduate students; 600-level courses are open only to graduate students.
 - iii 500-level and 600-level courses are also open to qualified graduate students majoring in other disciplines.
4. The Department of Industrial Engineering offers a 5-Year Bachelor of Science in Industrial Engineering and Master of Science in Industrial Engineering Program (BSIE/MSIE Program).
- a. This program is specifically designed for those students who want to pursue their graduate study as soon as they complete their undergraduate study in Industrial Engineering.
 - b. The special conditions for this 5-Year BSIE/MSIE Program are as follows:
 - i The student must declare his/her intent to participate before the end of their Junior year by submitting an official application to the department graduate committee for admission into the MSIE portion of the program. Exceptions to this rule must be approved by the department faculty.
 - ii A student wishing to withdraw from the 5-Year Program without the MSIE degree must complete all the requirements for the BSIE program, including the IEN 694 in order to get his/her BSIE degree.
 - iii To qualify for the MSIE degree, the student must meet all the pertinent Graduate School requirements, including an acceptable score on the GRE (Graduate Record Examination) and a minimum of 3.0 GPA.
 - iv The student is awarded both the BSIE and MSIE degrees at the end of the fifth year when all requirements are satisfied.
 - c. More details can be found in the Undergraduate bulletin (p. 678).

M.S. in Management of Technology

Master of Science in Management of Technology is an academically challenging program that allows you to gain significant training in both technology and management.

It is a 36 credit hour curriculum with 12 credits in Technology oriented courses and 12 credits in Management topics

A bachelor's degree from a regionally accredited university with a GRE or GMAT score that is acceptable.

Curriculum Requirements

Code	Title	Credit Hours
Industrial Engineering Core Courses		
IEN 672	Management of Technological Innovation	3
IEN 712	Design of Experiments	3
IEN 763	Project Management Techniques	3
Management Core Courses		
BUS 632	Introduction to Strategy, Market, and Management	4
MGT 621	High Performance Leadership	2
MGT 623	Human Resource Systems	2
Industrial Engineering Electives (9 credits) - 600 or 700 level		9
Management Electives (10 credits) - 600 or 700 level		10
Total Credit Hours		36

M.S. in Occupational and Ergonomics Safety

Master of Science in Occupational Ergonomics and Safety

An interdisciplinary **M.S. degree program in Occupational Ergonomics and Safety** is offered through the Department of Industrial Engineering in collaboration with the School of Medicine. These programs of study are individually structured to fit the student's interests and career objectives.

The program will consist of a 36 hour Master's degree program in Occupational Ergonomics and Safety in the Department of Industrial Engineering. The program will include 33 hours of course work in the areas of ergonomics and safety and 3 hours on internship in an industrial or health care related facility. Research areas will include musculoskeletal injuries, occupational stress, automation and design for older workers and special populations.

Curriculum Requirements

Course List

Code	Title	Credit Hours
Common Core Courses		
IEN 651	Accident Prevention Systems	3
IEN 657	Ergonomics And Human Factors Engineering	3
IEN 658	Industrial Hygiene I	3
IEN 712	Design of Experiments	3
IEN 757	Ergonomics and Occupational Biomechanics	3
IEN 758	Ergonomics and Special Populations	3
IEN 794	Master's Project	3
EPH 621	Fundamentals of Epidemiology	3
Electives (12 credits)		12
Total Credit Hours		36

M.S.I.E./M.B.A. Executive Program

Dual **MSIE/MBA** Weekend Executive program makes it possible to earn two separate degrees at the same time, a Master of Business Administration Degree (MBA) and a Master of Science in Industrial Engineering (MSIE).

It is a 57 credit hour program that starts every January and is completed in two years and one semester. Classes are held on Saturdays and during intersessions.

A bachelor's degree in any engineering discipline, an acceptable GRE score, and at least 3 years of work experience is required.

Curriculum Requirements

Code	Title	Credit Hours
MSIE Courses		
IEN 672	Management of Technological Innovation	3
IEN 712	Design of Experiments	3
IEN 742	Linear Programming and Extensions	3
IEN 757	Ergonomics and Occupational Biomechanics	3
IEN 763	Project Management Techniques	3
IEN 765	Advanced Production Systems	3
IEN 794	Master's Project	3
MBA Courses		
ACC 607	Financial Accounting and Reporting	3
ACC 608	Managerial Accounting	3
BSL 695	Legal Implications in Executive Decision Making	3
BTE 621	Management Information Systems	3
ECO 690	Essentials of Economic Theory	3
FIN 602	Fundamentals of Finance	3
MGT 600	Managing Responsible Behavior in Organizations	3
MGT 653	Operations Management	3
MGT 658	Strategic Management	3
MKT 660	Foundations of Marketing Management	3
Electives (6 Credits)		6
Total Credit Hours		57

Ph.D. in Ergonomics and Human Factors

Policies and Important Details

1. The Ph.D. in Ergonomics and Human Factors for students with a background in engineering and/or related sciences.
2. To maintain status as a graduate student, registration in each fall and spring semester is required. Otherwise, admission lapses and permission to re-enter must be granted.
3. Once a student has completed all course and required research credit hours, he or she must enroll in "Research in Residence" status until the degree has been granted. "Research in Residence" status is considered full time enrollment. Time restrictions on obtaining degrees will be strictly enforced and can be waived only by the Dean of the Graduate School.
4. Upon completing the course requirements, passing the qualifying exams, and successfully defending the Ph.D. proposal, the student is eligible for admission to the Ph.D. candidacy.
5. Upon passing the qualifying exams, the student in consultation with his/her selected Ph.D. Dissertation committee chair will decide on the dissertation committee members. The Dissertation committee will consist of not less than four members, three from the Department's graduate faculty, one from outside the Department. The chairman has to be a member of the graduate faculty. The duties of the Dissertation Committee are:
 - a. To consult with and to advise students on their research.
 - b. To meet, at intervals, to review progress and expected results.
 - c. To read and comment upon the draft dissertation.
 - d. To meet, when the dissertation is completed, to conduct the final oral examination and to satisfy itself that the dissertation is a contribution to knowledge and that it is written in lucid and correct English and submitted in approved form.
 - e. The candidate is well advised to have a final acceptable typescript of the dissertation in the hands of each member of his/her committee at a time reasonably in advance of the final defense of the work.
6. There are no foreign language requirements for the Ph.D. degree.

Course work requirements depend on the student's background, and are established by the Graduate Advisor and the Department Chairman. 60 credit hours beyond the baccalaureate degree are the minimum requirement for the Ph.D. Students with a Master's degree may take the minimum hours listed below, while students without a master's must take the maximum hours.

Curriculum Requirements

Code	Title	Credit Hours
Individualize Student Plan		
6 to 10 courses at 600 or 700 level		18 - 30
4 to 6 courses at 700 level		12 - 18
Dissertation (12 credits)		12
Required Exams		
Written Qualifying Exams ¹		
Ergonomics and Human Factors Qualifying Exam		
Industrial Hygiene Qualifying Exam		
Safety Engineering Qualifying Exam		
Biomechanics Qualifying Exam		
Statistics & Regression analysis Qualifying Exam		
Total Credit Hours		42-60

¹ A written qualifying examination is to be taken by each doctoral degree candidate during the first year of graduate work. The department may specify that the student must take an oral examination as well. In those cases, normally, the student shall pass the written examination before the oral examination is conducted. Upon completion of the examination process, the Graduate Advisor notifies the Department Chairman that the student has passed or failed the examination. A student who fails the examination may be permitted to retake it, with the permission of the Graduate Advisor and the Chairman. Qualifying examinations normally will not be given during the summer months. The applicant must hold a 3.0 average on all credit hours attempted with no single grade below "C" at the University of Miami while a graduate student.

* At least 24 must have been taken in residence at the University of Miami. A minimum of 12 dissertation credit hours must be taken.

Ph.D. in Industrial Engineering

Policies and Important Details

- The Department offers a Ph.D. in Industrial Engineering for students with a background in engineering.
- To maintain status as a graduate student, registration in each fall and spring semester is required. Otherwise, admission lapses and permission to re-enter must be granted.
- Once a student has completed all course and required research credit hours, he or she must enroll in "Research in Residence" status until the degree has been granted. "Research in Residence" status is considered full time enrollment. Time restrictions on obtaining degrees will be strictly enforced and can be waived only by the Dean of the Graduate School.
- Upon completing the course requirements, passing the qualifying exams, and successfully defending the Ph.D. proposal, the student is eligible for admission to the Ph.D. candidacy.
- Upon passing the qualifying exams, the student in consultation with his/her selected Ph.D. Dissertation committee chair will decide on the dissertation committee members. The Dissertation committee will consist of not less than four members, three from the Department's graduate faculty, one from outside the Department. The chairman has to be a member of the graduate faculty. The duties of the Dissertation Committee are:

* At least 24 credits must be taken in residence at the University of Miami.

Mechanical and Aerospace Engineering

<http://www.coe.miami.edu/dept-mac/>

Dept. Code: MAE

Degree Programs

The Department of Mechanical and Aerospace Engineering offers courses and provides facilities for two programs of graduate study and research in Mechanical Engineering, leading to the degrees of:

1. Master of Science (p. 1128)
2. Doctor of Philosophy (<http://bulletin.miami.edu/graduate-academic-programs/engineering/mechanical-aerospace-engineering/mechanical-engineering-phd>)

The program of study must reflect the importance of underlying principles of the physical sciences and mathematical analysis to all phases of modern mechanical engineering.

Areas of Research

- Fluid Mechanics
- Biomechanics
- Solid Mechanics
- Composite Materials
- Optimization and Reliability
- Nano Mechanics
- Heat Transfer
- Hydrogen Energy
- Materials Science
- Internal Combustion Engines
- Controls and Design
- Aerodynamics and CFD
- Nano-Bio-Systems
- Fuel Cells

It is expected that each graduate student will indicate early in his/her graduate work (within the first year), the particular area in which he/she intends to concentrate his/her efforts as well as the faculty advisor for dissertation.

500 level courses are open to advanced undergraduates and to graduate students; 600 level courses are open only to graduate students.

Clean Energy Research Institute

1. The Clean Energy Research Institute in the Department of Mechanical and Aerospace Engineering acts as the focal point of energy and environment related activities in the College of Engineering.
2. Its goals are:
 - to conduct research and to generate research proposals to investigate energy and environmental problems;
 - to organize seminars, workshops and conferences using researchers within and without the University;
 - to assemble, compile, publish and disseminate information on every aspect of energy and environmental problems; and
 - to cooperate with other organs of the University, other academic institutions, government and private organizations in connection with the above listed activities.
3. The current activities of the Institute include research into hydrogen as a clean, inexhaustible synthetic fuel, environmental damage caused by fossil fuels, global warming and its remediation, instabilities in boiling systems, solar cooling and heating, hybrid solar collectors, remote sensing applied to energy related problems and solar energy, system optimization and reliability of solar and wind energy systems, and organization of national and international conferences and symposia on energy and environmental problems.

Research Laboratories

- Advanced Nano Systems Laboratory
- Aerospace Materials Simulation Laboratory
- Center for Advanced Multi-Scale Studies
- Computational Fluid Dynamics Laboratory
- Fuel Cells Laboratory
- Integrated Nano-Bio-Systems Laboratory
- Internal Combustion Laboratory
- Materials Laboratory
- Measurements Laboratory
- Multi-Functional Composite Materials Laboratory
- Optimization and Reliability Laboratory
- Robotics and Intelligent Systems Engineering Laboratory
- Thermo-Fluid Mechanics Laboratory
- Tissue Biomechanics Laboratory
- Wind Tunnel Laboratory

Masters Programs in Mechanical and Aerospace Engineering

1. M.S. in Mechanical Engineering (p. 1128)
 - a. non-thesis option
 - b. thesis option
2. B.S./M.S. in Mechanical Engineering (<http://bulletin.miami.edu/undergraduate-academic-programs/engineering/mechanical-aerospace-engineering/mechanical-engineering-bs-ms>)

The five-year BS/MS program leads to both the B.S. degree and the M.S. degree in Mechanical Engineering in five years. The program is intended for exceptional students who are admitted to the graduate program in their junior year. Students applying for this program must have a grade point average of at least 3.0 and must attain a score of 300 or more on the Graduate Record Examination (taken before the fifth year).

Doctoral Program in Mechanical and Aerospace Engineering

- Ph.D. in Mechanical Engineering (p. 1129)

M.S. in Mechanical Engineering

<http://www.coe.miami.edu/dept-mac/>

Admission Requirements

Students applying for acceptance to degree status must comply with the general requirements of the Graduate School. General requirements for the M.S. degree are listed under the Engineering heading of this section and in the general information of this Bulletin.

1. One academic year, or equivalent, spent in full time graduate study will be the minimum time necessary for a student to fulfill the requirements for the degree of Master of Science in Mechanical Engineering.
2. Both a 30 credit hour thesis option and a 30 credit hour non-thesis option are available.

- a. The student taking the Thesis Option must take an oral examination in defense of the thesis.
- b. The student taking the Non-Thesis Option must complete a 3 credit hour Graduation Project at the end of the course program.
- c. The Master of Science Degree in Mechanical Engineering (Management Option) can only be taken under the Non-Thesis Option.
 - i This degree specialization combines 15 credit hours selected from graduate business courses with 15 credit hours in a graduate engineering area of concentration.
 - ii An undergraduate degree in engineering is required.

Graduation Requirements

General requirements for the M.S. degree are listed under the Engineering heading of this section and in the general information of this Bulletin.

Ph.D. in Mechanical Engineering

<http://www.coe.miami.edu/dept-mac/>

Admission Requirements

The program leading to the degree of Doctor of Philosophy in the Department of Mechanical and Aerospace Engineering complies in full with the regulations of the Graduate School concerning admission, residence requirements, qualifying and final examinations and the dissertation.

1. All candidates for the Ph.D. degree are expected to complete an integrated program of studies in mechanical engineering, mathematics, physics and/or chemistry in preparation for the Qualifying Examination.
2. A qualifying examination is to be taken by each doctoral degree student within the first year. In the qualifying examination, the student is expected to demonstrate his/her competence in certain basic courses appropriate to modern mechanical engineering to the satisfaction of the department. A Ph.D. student will be admitted to candidacy after passing the qualifying examination as well as the defense of dissertation proposal.
3. There is no foreign language requirement.
4. One or two years beyond admittance to candidacy will usually be found necessary for the completion of an acceptable dissertation, whereupon the student will be required to pass the Final Oral Defense of the Dissertation.
5. The candidate may, if he/she so desires, pursue for his/her dissertation an investigation in connection with any of the research projects in progress in the Mechanical and Aerospace Engineering Department or, in the case of interdisciplinary programs, in other Colleges/Schools such as the School of Marine and Atmospheric Science or the Medical School.

Course Requirements

For students who joined the program in Spring 2009 or after:

For students with a M.S. degree in Engineering:

- Minimum 18 credits of course work + 12 credits of dissertation.
- At least 6 credits must be at the 700 level.
- Expected duration of the program: 3 years.

For students with only a B.S. degree in Engineering:

- Minimum 36 credits of course work + 12 credits (or more) of dissertation.
- At least 12 credits must be at the 700 level.
- Expected duration of the program is 4 years.

For Ph.D. students with a non-engineering degree:

- Required credits and the expected duration of the program as specified in the assistantship offer letter.

In order to register for courses and/or dissertation in each semester, students are required to select the courses and/or dissertation credits by consulting their respective dissertation (research) advisors. They must also see the Graduate Advisor of the Department (Chair of the Department) for *approval and signature*.

Please note that the number of credits to be taken in various semesters is stated in each student's Ph.D. assistantship offer letter.

For Dissertation Credits

- Register as MAE 830 before passing both parts of the Qualifying Exam

- Register as MAE 840 after becoming a PhD candidate (usually after PhD proposal is passed)
- Register as MAE 850 Research in residence (after completing the required 12 credits of dissertation through MAE 830 and MAE 840).

Qualifying Exam

Ph.D. students are required to pass a 2-part Qualifying Exam.

Part 1 of the Qualifying Exam:

It consists of a written examination (no oral exam). Each student is required to select three areas, including Methods of Analysis, out of the following six areas:

- **Methods of Analysis (Level of MAE 601) – compulsory for all students**
- **Mechanics of Solids (Undergraduate level)**
- **Fluid Mechanics (Undergraduate level)**
- **Heat Transfer (Undergraduate level)**
- **Materials (Undergraduate level)**
- **Control and dynamics (Undergraduate level)**

A list of topics in each course will be given to the student at least one month before the Exam. All three areas will be covered in one exam of 6-hour duration (2 hours for each of the three areas) with a 30-minute break. It is expected that each student passes Part 1 of Qualifying Exam within the first year. If a student fails in one or more areas, a second chance may be given (within 3 months of the first exam).

Part 2 of the Qualifying Exam:

It consists of an oral exam before the student's Dissertation Committee.

- The student presents a research proposal (in the form of a written report) to the Dissertation Committee after completing some preliminary research work including the Literature Review.
- Part 2 of the Qualifying Exam is to be taken within 2 years if the student has a Master's degree in Engineering and 2.5 years if the student has only a B.S. degree in Engineering.

Ocean Engineering

About the Program

The University of Miami has a long history in Ocean Engineering. The University of Miami's College of Engineering together with the Rosenstiel School of Marine and Atmospheric Science offered a Master of Science degree in Ocean Engineering. The program and others of its kind in the nation, were popular in the 1970s and 1980s.

In the past decade, several major incidents – the 2010 Deep Water oil spill in the Gulf of Mexico, a series of devastating hurricanes in 2003-2005 and 2017, and the Japan Tsunami have turned our collective attention to the vulnerability of the nation's coastal infrastructure. Furthermore there have been significant demands for an increased emphasis on port and harbor security since September 11, 2001. These events have led to a renewed interest in the field of Ocean Engineering, albeit with a new focus and broader scope. Our program offers an MS degree for students not interested in a research based education but rather a practical skills-based training in real world applications of engineering theory.

Ocean Engineering

Ocean Engineering concentrates on problems associated with human interaction with the ocean.

- The ocean engineer combines competence as an engineer with both a practical experience in and theoretical understanding of the ocean.
- The Ocean Engineering program, offered jointly with the Rosenstiel School of Marine and Atmospheric Science, is intended to lay the foundation of this competence, experience and understanding.
- The areas of faculty specialization in this program include coastal engineering, off-shore engineering, structures, turbulence, computer modeling of fluids, acoustics, remote sensing and maritime security.
- Tracks offered in the program include Coastal Engineering and Remote Sensing

Additional Information

For additional information on this program, including curriculum requirements, please visit: <https://graduate.rsmas.miami.edu/graduate-programs/ocean-engineering/>

Environmental / Interdisciplinary

Environmental / Interdisciplinary Degrees

M.A. in Environment, Culture, & Media (p. 1132)

M.P.S. in Environment, Culture, & Media (p. 1133)

M.P.S. in Exploration Science (p. 1137)

Ph.D. in Environmental Science Policy (p. 1138)

M.A. in Environment, Culture, & Media

The **Abess Center's MA in Environment, Culture, & Media** enables students to tap into synergistic research networks across a range of schools and colleges at the University of Miami, including the College of Arts and Sciences, the Rosenstiel School of Marine and Atmospheric Science, the Miller School of Medicine, the School of Law, School of Education, School of Communication, School of Architecture, and the College of Engineering. This graduate programs draw upon existing interdisciplinary collaborations that have been created by the Abess Center. **For more information:** <http://abess.miami.edu/cesp/academics/ecm/>

The **Master of Arts in Environment, Culture, and Media (ECM)** integrates the study of the environment with emerging screen technologies, digital culture, cultural theory, and ethics. For new scientists, the defining creative and intellectual challenge of the 21st century exists in the use and design of digital content aimed at engaging an increasingly participatory media culture. Comparable in its cultural complexity and historical significance to the invention of the book, interactive digital content has become the dominant means of contemporary communication. In today's leading 21st century career fields, theoretical proficiency with digital and visual culture has become a necessary skill. The proliferation of screen technologies has opened new opportunities and challenges for communicating environmental information. Governmental, non-profit and private sector organizations that deal with a range of scientific issues are scrambling to develop an effective digital presence. Responding to this demand, the ECM program has been designed to address the practical and theoretical aspects of this new environmental culture, preparing students for an expanded and innovative sector of employment opportunities.

This innovative program is the first and only graduate degree of its kind intersecting environmental studies, emerging screen technology, and cultural studies. Surveying public perspectives of the environment across cultures, the ECM program will investigate how societies have perceived natural phenomena in differing ways, and the implications this has had on popular thought and the comprehension of scientific issues. Students in the program will benefit from the Abess Center's affiliated faculty across UM's schools, in disciplines such as biology, geology, marine conservation, computer science, archaeology, ecology, and communication.

Students will examine the ways in which various forms of visual media such as Internet blogging, ethnographic film, television, social media, documentary video, user generated content [YouTube], reality TV and so forth affect the reception of scientific media messages in popular culture, international politics, education, and law. The goal of the program is to advance and innovate societal engagement through understanding visual forms of scientific communication, research strategies, public outreach, and education concerning ecosystem science and issues of sustainability.

Practical aspects will vary based on personal goals, but may include: negotiating problems in representation of cultures and environments through media, digital media curation, understanding the political economy shaping the production and distribution of environmental media worldwide, designing innovative forms of science communication, research into the social practice of screen use across cultures (from western iPhone addiction to viral videos in South Korea), and analyzing the practical consequences of the media's representation of specific scientific issues.

This unique program is aimed at a diverse range of students, offering scientific insights to those with social science or humanities backgrounds, and anthropological perspectives to those with science backgrounds. This graduate program will provide students with a foundation in the science that underlies environmental issues, and the ability to integrate media theory with practical use. Students will evaluate the histories and limitations of both analog and digital visual culture as tools of research and communication. By investigating various media forms, students will explore emerging theoretical debates around digital culture and the role of visual artifacts in shaping societal values and perceptions of the environment. Students will be exposed to ethical issues through an anthropological lens that examines and contextualizes how knowledge and culture are created, transmitted, and maintained through visual culture.

Employment opportunities in this field require an advanced degree. **Students in the MA track will be required to complete a research thesis, they are not required to complete an internship, but may also pursue an internship during their studies.** The program is designed to prepare graduates of the MA for a range of careers, including for example: environmental media consultant (Google), digital content curator (U.S. National Parks), climate and energy campaigner (Greenpeace), and director of green initiatives campaigns (Toyota). **Graduates of the MA program will be prepared to go on to doctoral studies and other research related employment.**

One of the central challenges we face as a society is an array of complex, large scale environmental problems. The ECM program will train students with diverse backgrounds in the use and conceptual design of visual and digital content for engaging an increasingly participatory media culture to address these challenges.

Curriculum

For more info : <http://abess.miami.edu/cesp/academics/ecm/degree-program-requirements/>

Degree Requirements for the ECM MA

Completion of the MA will take 18 months (three semesters).

Prerequisite: students admitted into the program must have earned a Bachelor's degree with a minimum 3.0 GPA.

Core Courses and Credit Requirements

Students must complete 18 credits worth of coursework in the following core courses:

ECS 609 Contemporary Media Representations of the Environment

ECS 610 Technology and Human Behavior

ECS 611 Nature, the Anthropocene, and Visual Anthropology

ECS 612 Environmental Communication, New Media & Policy

6 credits Research Thesis (MA) or Internship Report (MPS)

The 12 remaining credits are chosen electives that align with each student's interest.

M.P.S. in Environment, Culture, & Media

The Abess Center's MPS in Environment, Culture, & Media enables students to tap into synergistic research networks across a range of schools and colleges at the University of Miami, including the College of Arts and Sciences, the Rosenstiel School of Marine and Atmospheric Science, the Miller School of Medicine, the School of Law, School of Education, School of Communication, School of Architecture, and the College of Engineering. This graduate programs draw upon existing interdisciplinary collaborations that have been created by the Abess Center. **For more information:** <http://abess.miami.edu/cesp/academics/ecm/>

The Master of Professional Science in Environment, Culture, and Media (ECM) integrates the study of the environment with emerging screen technologies, digital culture, cultural theory, and ethics. For new scientists, the defining creative and intellectual challenge of the 21st century exists in the use and design of digital content aimed at engaging an increasingly participatory media culture. Comparable in its cultural complexity and historical significance to the invention of the book, interactive digital content has become the dominant means of contemporary communication. In today's leading 21st century career fields, theoretical proficiency with digital and visual culture has become a necessary skill. The proliferation of screen technologies has opened new opportunities and challenges for communicating environmental information. Governmental, non-profit and private sector organizations that deal with a range of scientific issues are scrambling to develop an effective digital presence. Responding to this demand, the ECM program has been designed to address the practical and theoretical aspects of this new environmental culture, preparing students for an expanded and innovative sector of employment opportunities.

This innovative program is the first and only graduate degree of its kind intersecting environmental studies, emerging screen technology, and cultural studies. Surveying public perspectives of the environment across cultures, the ECM program will investigate how societies have perceived natural phenomena in differing ways, and the implications this has had on popular thought and the comprehension of scientific issues. Students in the program will benefit from the Abess Center's affiliated faculty across UM's schools, in disciplines such as biology, geology, marine conservation, computer science, archaeology, ecology, and communication.

Students will examine the ways in which various forms of visual media such as Internet blogging, ethnographic film, television, social media, documentary video, user generated content [YouTube], reality TV and so forth affect the reception of scientific media messages in popular culture, international politics, education, and law. The goal of the program is to advance and innovate societal engagement through understanding visual forms of scientific communication, research strategies, public outreach, and education concerning ecosystem science and issues of sustainability.

Practical aspects will vary based on personal goals, but may include: negotiating problems in representation of cultures and environments through media, digital media curation, understanding the political economy shaping the production and distribution of environmental media worldwide, designing innovative forms of science communication, research into the social practice of screen use across cultures (from western iPhone addiction to viral videos in South Korea), and analyzing the practical consequences of the media's representation of specific scientific issues.

This unique program is aimed at a diverse range of students, offering scientific insights to those with social science or humanities backgrounds, and anthropological perspectives to those with science backgrounds. This graduate program will provide students with a foundation in the science that underlies environmental issues, and the ability to integrate media theory with practical use. Students will evaluate the histories and limitations of both analog and digital visual culture as tools of research and communication. By investigating various media forms, students will explore emerging theoretical debates around digital culture and the role of visual artifacts in shaping societal values and perceptions of the environment. Students will be exposed to ethical issues through an anthropological lens that examines and contextualizes how knowledge and culture are created, transmitted, and maintained through visual culture.

Employment opportunities in this field require an advanced degree, and most require participatory field experience in the form of an internship.

Students in the MPS track will be required to complete an internship and submit an internship report. The program is designed to prepare graduates of the MPS for a range of careers, including for example: environmental media consultant (Google), digital content curator (U.S. National Parks), climate and energy campaigner (Greenpeace), and director of green initiatives campaigns (Toyota).

One of the central challenges we face as a society is an array of complex, large scale environmental problems. The ECM program will train students with diverse backgrounds in the use and conceptual design of visual and digital content for engaging an increasingly participatory media culture to address these challenges.

Curriculum

Degree Requirements for the ECM MPS

Completion of the MPS/MA will take 18 months (three semesters).

Core Courses and Credit Requirements

Students must complete 18 credits worth of coursework in the following core courses:

ECS 609 Contemporary Media Representations of the Environment
 ECS 610 Technology and Human Behavior
 ECS 611 Nature, the Anthropocene, and Visual Anthropology
 ECS 612 Environmental Communication, New Media & Policy
 6 credits Research Thesis (MA) or Internship Report (MPS)

The 12 remaining credits are chosen electives that align with each student's interest.

ECS 601. Interdisciplinary Environmental Theory. 3 Credit Hours.

Theoretical approaches in environmental and social science fields, including conservation biology, ecology, geography, economics, sociology, anthropology, philosophy, and interdisciplinary approaches. Themes include human ecology, historical ecology, landscape ecology, environmental law and ethics, perception of risk and uncertainty, vulnerability and adaptation, and environmental valuation.

Requisite: Plan of Ecosystem Science and Policy.

Components: DIS.

Grading: GRD.

Typically Offered: Fall.

ECS 603. Interdisciplinary Environmental Methods. 3 Credit Hours.

Environmental methods related to core programmatic themes of Urban Ecology, Global Public Health, Climate and Society, Environment and the Media, Integrated Marine and Terrestrial Management, and Regulatory Regimes. The course focuses on the application of Interdisciplinary approaches and methods for addressing complex environmental problems. Students will learn to design and employ interdisciplinary approaches, using qualitative and quantitative methods and analysis, through lectures, reading assignments, discussion sessions, and assignments.

Requisite: Plan of Ecosystem Science and Policy.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

ECS 605. Interdisciplinary Environmental Law and Policy. 3 Credit Hours.

Analysis of science-based environmental decision-making and policy implementation at the federal and state levels in the United States, with comparative international perspectives, and an introduction to international institutions that fashion and carry out environmental policy. Case studies will cover authorization, appropriations and oversight functions of Congress and state legislatures; the role of the executive, federal and state, in initiating and implementing statutes by regulation and other means; and the role of negotiation, litigation, mediation and consensus-building in resolving disputes and advancing or thwarting environmental policy.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECS 607. Interdisciplinary Environmental Decision Analysis. 3 Credit Hours.

Approaches to studying and interpreting human behavior related to a range of decision making at the level of individual, group, and firm.

Multidisciplinary theories and methods informing work in the decision sciences will be covered from fields of psychology, business, economics, political science, and anthropology.

Requisite: Plan of Ecosystem Science and Policy.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECS 608. Interdisciplinary ECS Seminar. 2 Credit Hours.

Seminar centering on research and case studies illustrating cutting edge human- environment research, and including both qualitative and quantitative methods. Intensive reading and writing related to relevant topics in the field.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

ECS 609. Contemporary Representations of the Environment. 3 Credit Hours.

This course will combine media studies, environmental studies, and critical theory to give students a broad introduction to ways in which screen media are used today to represent both the natural world and also environmental issues such as climate change, animal extinction, and natural resource use. From more conventional media such as feature fiction films (e.g. Wall-e, The Day After Tomorrow, Avatar), documentary films (e.g. An Inconvenient Truth, HBO's Gasland), and television news coverage, to more niche formats like Google Earth's global mapping and in-dash monitors that depict miles-per-gallon, screen technology has long been and is increasingly used to mediate our relationship with surrounding ecosystems. Students will look at mainstream television channels (e.g. Discover, National Geographic, and the Weather Channel) alongside the digital campaigns of agencies and institutions directly aimed at conservation efforts, including the ecotourism industry, non-profit environmental groups, and governmental bodies such as the National Parks Service. In addition, this course will investigate the increasing role of interactive media in museums and science centers, as well as the rising power of social media in disseminating news regarding environmental issues.

Components: RSC.

Grading: GRD.

Typically Offered: Fall.

ECS 610. Technology and Human Behavior. 3 Credit Hours.

This course will explore the social aspects of technology use and cultural adaptation through cross-cultural ethnographic research on science and traditional beliefs. From the adoption of chainsaws in Amazonian forestry to the use of smart watches in Japanese cities, technological choice will be examined through psychological theories of behavior, socio-cultural perspectives, and institutional and economic forces. Reflecting the rising social, cultural, scientific, and political importance of emerging digital culture (e.g. virtual reality, smart devices, artificial intelligence), a key focus of the second half of the course will focus on philosophical notions of post-human cyborgism. Students will be introduced to recent research on the cognitive issues of social media use and consumption, including social media addiction and other neurological impacts of chronic screen use. Coursework will connect historical understandings and larger social analysis of digital media use and encourage students to participate in an ongoing exploration of their own technological choices and media practices. Students will also be exposed to multidisciplinary theories and research on risk perception and the psychology and effectiveness of environmental messaging in order to address how various media technologies impact individual and collective thinking and action.

Components: RSC.

Grading: GRD.

Typically Offered: Fall.

ECS 611. Nature, the Anthropocene, and Visual Culture. 3 Credit Hours.

Different cultural and historical contexts have conceived of humanity's relationship to the natural world in vastly different ways, from 'sacred and part of' to 'separate from' and 'steward over.' A culture's techniques of representation, use of imagery, and ways of seeing are a key part of the shaping of its worldview and cognitive framework of shared ideas and beliefs. This course is an opportunity for students to use an anthropologist's eye to actively engage with the human production of knowledge about the natural world through visual culture. Rather than approaching visual anthropology with its usual divide between 'anthropological content' and 'aesthetic composition,' this course will foster both approaches as it examines human perceptions of the environment from prehistoric cave paintings to modern day street art. Key elements of visual anthropology will be introduced, including symbols and symbolism, reflexivity, visual data of everyday life, art analysis, ethics, society-as-text paradigm, urban visual data, and ways of conceiving systems of visual representation. Representations of Other will be analyzed through theories of the exotic, gender, race, post-colonialism, nationalism, and heritage studies.

Components: RSC.

Grading: GRD.

Typically Offered: Spring.

ECS 612. Environmental Communication, New Media, and Policy. 3 Credit Hours.

Facebook and Twitter to the rhetorical film essay documentaries that have waged ideological wars over the past twenty years, screen and new media are an increasingly powerful force in the shaping of policy, political awareness, and popular ideological views of the environment. This course will draw on critical approaches of media theory, rhetoric, and political science to study and interpret the political use of visual media. Just as FDR's WPA used film to propagandize the agricultural importance of public works, and Hollywood has been harnessed for ecological causes from natural conservation to climate change, today screen and digital media (e.g. television commercials, podcasts, social media blasts) are the driving force of PR campaigns for both governmental bodies and private companies that greatly impact environmental understanding and policy. From information to misinformation, viral content streams constantly onto screens across the world, whose apps are also used for activism and citizen science—students will look at what strategies of circulation and rhetoric are used to wage digital campaigns to communicate and shape ecological values and policy.

Components: RSC.

Grading: GRD.

Typically Offered: Spring.

ECS 614. Environment, Culture, and Media Thesis. 3-6 Credit Hours.

This course is for research culminating in a Master's thesis. Students will enroll in 3-6 credits while researching and writing their final project for the ECM Masters of Arts.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

ECS 615. Environment, Culture, and Media Internship. 3-6 Credit Hours.

This course is for hands-on experience and research culminating in a final Master's internship report. Students will enroll in 3-6 credits while completing their internship and researching their final project for the ECM Masters of Professional Science.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

ECS 672. Special Topics in ECS. 3.00 Credit Hours.

Content varies by semester and is indicated in parentheses following course number and title in class schedule.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECS 680. Field Studies. 1-4 Credit Hours.

This course will provide participants with the opportunity for intensive field research geared toward an interdisciplinary understanding of environmental issues and conservation concerns.

Components: LEC.

Grading: GRD.

Typically Offered: Spring & Summer.

ECS 725. Problems in Environmental Science and Policy. 1-6 Credit Hours.

Content and prerequisites announced when offered. Course may be repeated for credit if content varies.

Requisite: Plan of Ecosystem Science and Policy.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECS 790. Directed Readings. 1-3 Credit Hours.

Individually supervised readings on special topics. Offered by arrangement with the instructor. May be retaken for credit.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ECS 820. Master's Research. 9.00 Credit Hours.

Individual study for students exiting the doctoral program without a successful dissertation proposal.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

ECS 830. Pre-Candidacy Research. 1-9 Credit Hours.

Research for ECS Ph.D. students who have not attained candidacy.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECS 840. Doctoral Dissertation. 1-12 Credit Hours.

Required for all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 13 credits total. No more than 12 hours of ECS 730 may be taken in a regular semester, nor more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

ECS 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

M.P.S. in Exploration Science

Exploration Science (ESC) (<http://mps.rsmas.miami.edu/degree-program/exploration-science>)

Exploration Science is the applied practice and study of field research using a variety of methods, technologies, and approaches to drive question-based scientific endeavors.

This track is being offered at RSMAS in partnership with UM's Abess Center for Ecosystem Science and Policy (<http://www.cesp.miami.edu>). The Abess Center fosters innovative, interdisciplinary initiatives that bridge the gap between science and environmental policy.

For More Information Please Visit: <http://exploration.miami.edu>

Course	Title	Credit Hours
Year One		
Fall		
RSM 600	Research Diving Techniques ((or ELECTIVE))	3
RSM 667	Motorboat Operator Certificate Course	1-2
MES 664	Citizen and Participatory Science	3
MES 674	From Gold to Glory: History and Ethics of Exploration	3
MES 660 & MES 661	Introduction to Marine Geographic Information Systems and Introduction to Marine Geographic Information Systems - Laboratory	3
	Credit Hours	13-14
Spring		
MES 665	Exploration Technology and Media	3
MBE 621	Field Techniques and Instrumentation in Tropical Marine Ecology ((or ELECTIVE))	3
MES 627	Exploration Science Field Studies (or ELECTIVE)	3
MES 662	Spatial Analysis: Intermediate Course in Marine GIS (or ELECTIVE)	3
	Credit Hours	12
Summer		
MES 805	MPS Internship	6
	Credit Hours	6
	Total Credit Hours	31-32

Elective Options

Students may take any elective on the RSMAS campus with the consent of their faculty advisor. Below are a few examples of courses past students in this program used as electives.

Code	Title	Credit Hours
MES 606	Advanced Fieldwork in Coastal Cultures	3
MES 612	Aquaculture I	3
MBE 604	Biology of Marine Mammals	3
RSM 620	Climate and Society	3
MES 720	Coastal Law and Policy	3
MES 618	Coastal Zone Management	3
MES 620	Environmental Law	3
MES 604	Fieldwork in Coastal Management: Tourism, Conservation, and Development	3
MES 625	Fisheries Socioeconomics and Management	3
MES 671	Marine Conservation Biology	3
MBE 642	Oceans and Human Health	3
MES 601	Political Ecology of Marine Management	3
RSM 612	Statistics for Environmental Management	3
MBE 615	Tropical Marine Ecology	3

Ph.D. in Environmental Science Policy

Dept. Code: ECSD

Through the Graduate School, The Abess Center for Ecosystem Science and Policy offers an interdisciplinary course of study leading to a Ph.D. Details regarding areas of specialization can be found at the Abess Center website (<http://www.cesp.miami.edu>). Doctoral students are supported by research assistantships which include tuition remission and a monthly stipend. All students are also required to serve satisfactorily for two terms as teaching assistants in the Abess Center undergraduate program.

Prerequisite

Students admitted to the program must have earned a bachelor's or master's degree and should display a strong interest in the interdisciplinary study of ecosystem science and policy.

Curriculum Requirements

Code	Title	Credit Hours
Core Courses		
ECS 601	Interdisciplinary Environmental Theory	3
ECS 603	Interdisciplinary Environmental Methods	3
ECS 605	Interdisciplinary Environmental Law and Policy	3
ECS 607	Interdisciplinary Environmental Decision Analysis	3
ECS 840	Doctoral Dissertation	12
Proposed Additional Courses ¹		18
Additional Courses to get to 60 Credits		18
Examinations ²		
Dissertation ³		
Total Credit Hours		60

¹ By the end of their second semester, students must submit a proposed group of additional courses, totaling at least 18 hours, related to their research interest and intended dissertation research area. This group of courses requires approval of both the student's advisor and the Director of Graduate Studies.

² All Ph.D. students will be given comprehensive examinations following the conclusion of the core series of courses. A majority of the examination committee must be members of the graduate faculty of the University. In the event of failing to pass an examination, students are required to retake and pass the examination within one calendar year. By the end of their second year, students must present and defend a research proposal. Following successful completion of the comprehensive examination and research proposal defense, the student may apply to candidacy for the degree. Any student who fails to be admitted to candidacy for the degree within this two-year period can be dismissed from the program.

³ By the beginning of the second year, students should form a four-member dissertation committee; by the end of the second, write and defend a research proposal. Students may proceed with the dissertation after the dissertation committee has been appointed and the Director of Graduate Studies and the Graduate School have accepted the dissertation proposal. The dissertation must be an investigation of a substantial scholarly topic and bridge both scientific and policy aspects of the topic area. A final oral defense of the dissertation is required.

* To attain the Ph.D., students must take a minimum of 60 credits, of which at least 24 must be for coursework taken while in residence at the University of Miami. (Students entering the program with a master's degree in a related field may be given credit for up to 24 course credits.) Students must accrue at least 12 credits worth of dissertation research.

Marine and Atmospheric Science

The Rosenstiel School of Marine and Atmospheric Science (RSMAS) was established in 1943 as the Marine Laboratory of the University of Miami. It has grown from its modest beginnings in a boathouse to be one of the nation's leading institutions for oceanographic and atmospheric research and education.

Originally a tropical marine biological facility, the Marine Laboratory initiated a program of studies leading to the Master of Science degree in 1949. In 1953, laboratory and classroom buildings were constructed on the School's present campus on Virginia Key, and in the late fifties, the Marine Laboratory expanded its staff and developed its oceanographic capabilities in response to the increased interest in scientific research in the United States. It became the Institute of Marine Science in 1961. Ocean-going research vessels were acquired, and additional buildings were constructed to accommodate new wide-ranging projects. In 1969 the Institute, now a School, was named for Dorothy H. and Lewis Rosenstiel in recognition of a major contribution made through the Rosenstiel Foundation to encourage progress in the marine and atmospheric sciences at the University of Miami.

Today, RSMAS has a faculty of 70 scientists who conduct sponsored research while offering graduate studies leading to the Master of Professional Science, Master of Science, and Doctor of Philosophy degrees. The School offers graduate programs in Atmospheric Sciences, Marine Ecosystems

and Society, Marine Biology and Ecology, Marine Geosciences, Meteorology and Physical Oceanography, Ocean Engineering, and Ocean Sciences. Undergraduate programs leading to a Bachelor of Science in Marine and Atmospheric Science (with majors in Marine Science, and Meteorology), and a Bachelor of Arts in Marine Affairs are also offered.

RSMAS uses multiple laboratory and high-performance computing facilities and a state-of-the art catamaran. The Marine Technology and Life Sciences Seawater Complex (MTLSSC), opened in 2014, houses studies that rely on seawater for observing air-sea interactions in a controlled environment and for holding, spawning and rearing marine organisms. This complex is the centerpiece of an updated RSMAS campus. The catamaran, named the F. G. Walton Smith, in honor of the founder of the Rosenstiel School has been in service since 2000. The 96-foot-long catamaran is able to explore the deep ocean as well as normally inaccessible shallow environments such as reefs, mangroves and grassbeds.

Academic Programs

The Rosenstiel School is made up of seven academic programs:

- Atmospheric Sciences (p. 1145)
- Marine Biology and Ecology (p. 1154)
- Marine Ecosystems and Society (p. 1159)
- Marine Geosciences (p. 1168)
- Meteorology and Physical Oceanography (p. 1171)
- Ocean Engineering (p. 1130)
 - The College of Engineering and the Rosenstiel School offer a joint program that leads to a non-thesis M.S. degree in Ocean Engineering.
- Ocean Sciences (p. 1175)

General Degree Requirements

Master of Professional Science (M.P.S.) Program

The Master of Professional Science (M.P.S.) degree offers many tracks within the departments of Atmospheric Sciences, Marine Biology and Ecology, Marine Ecosystems and Society, and Ocean Sciences. The curriculum is structured to allow students to complete their degree in as little as 12 months (for select tracks), with the training and real-world experience necessary to prepare them for careers in today's professional science job market.

Checklist

All M.P.S. students should follow the M.P.S. Checklist, (<http://mps.rsmas.miami.edu/form>) which indicates all the milestones that must be completed in order to graduate from the Rosenstiel School.

Credit Hour Requirements

M.P.S. students must complete 30 credits of graduate coursework, with a minimum, cumulative GPA of 3.0 to graduate with the M.P.S. degree. These credits are typically distributed as follows: 24 course credits and 6 internship credits. All RSMAS students are required to complete the Research Ethics course (RSM 700).

Academic Advisor and Faculty Mentor/Committee Chair

Students will be assigned an Academic Advisor during their first semester in residence. The advisor must hold an appointment in the program representing each student's track selection. This individual will offer guidance regarding University expectations, coursework, registration, program details, and graduation requirements. At the beginning of the first semester, the student and the Academic Advisor will establish the curriculum to be followed, based on the student's personal and professional goals and M.P.S. track enrollment. Each student will also identify and request the involvement of a Faculty Mentor, who will act as the Committee Chair and as a resource to the student regarding career guidance and the selection of an appropriate internship. Track Coordinators typically act as Faculty Mentors/Committee Chairs, but exceptions are permitted. Students should identify their mentor/chair no later than one week after the start of internship.

Committee

All M.P.S. students must have a graduate committee of at least 3 members. This committee will include a Committee Chair, who is usually the faculty mentor, an additional faculty member from UM, and one outside committee member, who is usually the direct supervisor at the student's internship. Each member should be an expert in the student's chosen track, and more specifically, the topic of their final report. Though deviations from these guidelines are possible, they must be approved by the M.P.S. Dean and Program Director. The Appointment to Student's Committee (<http://mps.rsmas.miami.edu/form>) form solidifies the committee and is due no later than one week after the start of internship.

Comprehensive Examination

A comprehensive examination is required of all M.P.S. students prior to beginning an internship. The exam will be written and will typically be based on core course content. Each program determines the content and form of the examination in a given year-class, according to general school guidelines. In the event of a failure, a student may be re-examined once, upon the advice of the student's advisor and at the discretion of the graduate faculty of the program. If granted, the re-examination must be given before the end of the following semester. The M.P.S. Office

should receive written notification of the results through the Comprehensive Exam (<http://mps.rsmas.miami.edu/form>) form. Students who fail the re-examination are subject to dismissal from the school.

Internship

Each student will be required to complete an internship with an organization engaged in some activity associated with marine and/or atmospheric science and identify an Internship Supervisor. Such organizations can be faculty or researchers from accredited universities and laboratories, national or international agencies, private corporations, or foreign governments with clearly defined marine-oriented programs or activities. Internships can be either paid or unpaid by the organization, or interns can complete the internship by formal participation in a university sponsored program or research in some area of marine science. All internships MUST be approved by the student's committee chair/faculty mentor. The Internship Commitment Form (<http://mps.rsmas.miami.edu/form>) is due no later than 2 weeks before internship start date. Additionally, a detailed synopsis of a proposed contribution to the hosting organization is required as a formal proposal, due no later than 1 month after internship start date. The internship proposal will include: an introduction to the topic (i.e. a literature review), a statement of the problem, the purpose of the study, methods and materials (i.e. the proposed activities and analyses), a timeline, and plans for disseminating the information. The internship proposal template and guidelines are available on the M.P.S. (<http://mps.rsmas.miami.edu/form>) website (<http://mps.rsmas.miami.edu/form>). Requirements to engage with an internship host organization:

- Submit the Appointment to Committee (<http://mps.rsmas.miami.edu/form>) form
- Submit the Internship Commitment Form (<http://mps.rsmas.miami.edu/form>) and a one-page summary of the proposed project, highlighting the timeline, goals, expectations, and objectives of your internship
- Complete at least 12 course credits, with a minimum grade point average of 3.0
- Remove all incomplete grades or deficiencies

Internship Report

The final grade (Pass/Fail) will be based on a written report and an oral presentation. The internship report is not a summary of involvement but rather a contributory assessment of the experience, including developmental insight and a summary of any research performed. This is the final tangible product of the degree, akin to a M.S. thesis, and should be a coherent, polished document of publishable quality. Copies of the final, approved report should be distributed as follows:

- One electronic copy to each member of your committee
- One copy for the representative agency, institution, or business (electronic and/or hard copy, at their request)
- One electronic copy via e-mail to the M.P.S. Office; signed title sheet may be submitted as a PDF file.

Oral Presentation

A strict requirement for the completion of the M.P.S. degree is an oral presentation, preferably offered to the hosting organization. Oral presentations should be no longer than 30 minutes in length, should include a visual component (e.g. PowerPoint), and may not be scheduled until all committee members have edited at least one draft of the internship report. Additionally, the PowerPoint (or equivalent) must be reviewed and edited by your Committee Chair, and all committee members are expected to attend the presentation, either in person or virtually. If you plan to present at RSMAS, please coordinate with your committee to identify a mutually agreeable time and date, and then schedule your presentation with the M.P.S. Office. In order to graduate, you must submit a PDF copy of your presentation to the M.P.S. Office via email.

Conference Attendance

Though not mandatory, M.P.S. students are strongly encouraged to attend a scientific conference during their academic residency at RSMAS.

Graduation

All M.P.S. students, including joint J.D./M.P.S. students, must submit a graduation request using CaneLink during the semester in which they plan to graduate. All required forms, including the Clearance Form (<http://mps.rsmas.miami.edu/form>) and the final internship report (Certificate of Approval (<http://mps.rsmas.miami.edu/form>) and cover page signed by all committee members), must be submitted to the M.P.S. Office no later than the Graduate School Deadline for Completion of Dissertation/Thesis, which will be communicated via e-mail and is indicated on the UM Academic Calendar. (<https://registrar.miami.edu/dates-and-deadlines/academic-calendars>)

Master of Science (M.S.) Program

The Master of Science (M.S.) degree is offered in Atmospheric Sciences, Marine Biology and Ecology, Marine Ecosystems and Society, Marine Geosciences, Meteorology and Physical Oceanography, and Ocean Sciences. The expected time to completion for the M.S. degree is two years of full-time study.

Checklist and Academic Plan

Each student should follow the *RSMAS Checklist for Defense and Graduation*, which will guide the student through all the milestones required in order to graduate from the Rosenstiel School. This begins with an *Academic Plan* that identifies the number of courses a student must complete to be eligible for graduation according to program requirements. Part I should be reviewed and completed by the student and Program Director during the first semester; Part II must be completed at least one semester before expected graduation.

Credit Hour Requirements

M.S. students are required to take a minimum of 30 credit hours, which consists of 24 graduate course credits (of which 18 must be taken at UM) and 6 research credits, PGM 810 ("PGM" is the program abbreviation). All RSMAS students are required to complete the Research Ethics course (RSM 700).

M.S. students with prior graduate coursework may transfer up to 6 course credits from another accredited institution with the approval of his/her Committee. Students must submit the completed Petition for Transfer of Credit (<https://grad.miami.edu/policies-and-forms/forms>) form to the RSMAS Graduate Studies Office (GSO) for processing. In no case will credit be transferred until the student has completed an equivalent number of course credits (with grades of "B" or above) at UM.

Any student whose cumulative Grade Point Average (GPA) falls below 3.0 will receive written notice from his/her program with copies to the RSMAS GSO stating that he/she is on academic probation. Any graduate student who receives this warning letter must meet the full standards of academic progress set forth by the University by the end of the subsequent semester. Students who fail to meet the cumulative GPA requirement have failed to meet the satisfactory academic progress standards established by the university and are no longer eligible to receive any graduate assistantship, fellowship or tuition scholarship and are subject to dismissal from the school.

Committee

The "Thesis Committee" described in the UM Graduate Student Handbook (<https://grad.miami.edu/policies-and-forms>) is commonly known as the student's "Committee" at RSMAS. Specific requirements for committee formation are provided in the UM Graduate School Handbook (<http://grad.miami.edu/policies-and-forms>); individual programs may have additional requirements.

Per the UM Graduate School Handbook:

"The committee chair must be Regular Faculty from the student's program of concentration (this includes secondary appointments). In addition to the chair, one member must be Regular Faculty or have Graduate Faculty (<http://grad.miami.edu/graduate-education/graduate-faculty/rsmas>) status in the student's program of concentration. The third member must be an outside member. "Regular Faculty" are faculty having tenured or tenure-earning appointments of a program or department".

Once the Committee is formed (typically by the end of the first year), the *Appointment to Student's Committee* form should be completed, signed by all members and the Program Director, then submitted to GSO. The Committee should meet regularly to review the student's progress, and prepare a short report on progress and research directions with the student. Proposed changes to the membership of a committee must be approved by the Committee Chair and must carry the endorsement of the Program Director. Approved changes to the Committee must be forwarded to GSO using the *Change to Student's Committee* form.

Comprehensive Examination

A comprehensive examination may be required by the end of the first year. Whether or not to host the exam, as well as the required content and format, is at the discretion of each program. The *Comprehensive Exam* form notifying GSO of the outcome must be submitted by the Committee Chair and approved by the Program Director. In the event of a failure, a student may be re-examined once, upon the advice of the student's advisor and/or Committee, and at the discretion of the Program Academic Committee with advice from the Comprehensive Exam Committee. If granted, the re-examination must be given before the end of the following semester.

Thesis Proposal and Proposal Defense

The thesis proposal, containing the items listed below, must be defended and approved by the student's Committee. The purpose of the proposal defense is to certify the readiness of the student to conduct thesis research, as well as facilitate an open discussion regarding the objectives of the thesis and the relevant experimental approach.

1. Tentative title
2. Statement of the problem and objectives
3. Methodology, including equipment and facilities required
4. Timetable

The *Thesis Proposal* form must be approved and signed by the members of the student's Committee and Program Director. The completed form must be submitted to GSO with the approved copy of the proposal.

Thesis Defense

Before scheduling the defense, a student must fulfill the following requirements:

- Have an approved Committee on file
- Pass the comprehensive exam (if applicable)
- Submit and successfully defend the thesis proposal
- Have a 3.0 average in all credits earned
- Remove all incomplete grades or deficiencies

Students must be registered for research credits during the semester of defense. The *Announcement of Defense* form must be submitted to GSO at least 14 days prior to the defense date. The student is responsible for reserving the room and obtaining approvals from all Committee members and Program Director. Each member must be given no less than 14 days to review material prior to approving the *Announcement of Defense*. Thus, the student must provide the Committee with a complete version of the thesis at least 1 month prior to the desired defense date. If a student is receiving a stipend, the *Student Payroll End Date* form should accompany the *Announcement of Defense* form. The Committee Chair should notify GSO, in writing, of the outcome of the defense via the *Completion of Defense* form and *SACS Assessment Rubric*.

Thesis Submission

In addition to the regulations in the UM Graduate Student Handbook (<https://grad.miami.edu/policies-and-forms>) on submitting the final thesis and the Graduate School guidelines for the ETD Process (<https://grad.miami.edu/electronic-thesis-and-dissertation/formatting-the-etc>), the *RSMAS Certificate of Approval* form must be signed by all members of the student's Committee then submitted by the student to GSO at least one day prior to the end of the semester. The Associate Dean of Graduate Studies will sign it prior to delivery to the UM Graduate School.

Defense and Submission Deadlines

The defense and submission deadlines (<http://grad.miami.edu/electronic-thesis-and-dissertation/defense-and-submission-deadlines>) are set by the Graduate School. The defense, formatting review, and completion of final materials must be done by the last day of the semester. If any requirements are not met by the Deadline for Completion (<http://grad.miami.edu/electronic-thesis-and-dissertation/defense-and-submission-deadlines>), the student is not guaranteed to graduate in that semester and graduation may be deferred to the following semester.

Graduation Clearance

In order to be cleared for graduation, the student must satisfy the minimum degree requirements set by the program, and the Graduate School; fulfill all milestones noted on the *RSMAS Checklist for Defense and Graduation*; and complete the ETD Process (<https://grad.miami.edu/electronic-thesis-and-dissertation/etd-process>) by the identified deadlines. The *RSMAS Student Clearance Form* must be completed by the student then returned to GSO prior to the last day of the semester.

It is the student's responsibility to complete the graduation application through CaneLink (<https://canelink.miami.edu>) before deadlines specified on the University Academic Calendar (<http://www.miami.edu/index.php/registrar/calendar>) and the UM Graduate School (<http://grad.miami.edu/electronic-thesis-and-dissertation/defense-and-submission-deadlines>). Students who previously applied for graduation but did not receive the degree must repeat the application process.

Doctor of Philosophy (Ph.D.) Program

The Doctor of Philosophy (Ph.D.) degree is offered in Atmospheric Sciences, Marine Biology and Ecology, Marine Ecosystems and Society, Marine Geosciences, Meteorology and Physical Oceanography, and Ocean Sciences. The expected time to completion for a Ph.D. degree is five years. A student in residence in the program beyond 8 years requires approval by the Program Director and Associate Dean.

Checklist and Academic Plan

Each student should follow the *RSMAS Checklist for Defense and Graduation*, which will guide the student through all the milestones required in order to graduate from the Rosenstiel School. This begins with an *Academic Plan* that identifies the number of courses a student must complete to be eligible for graduation according to program requirements. Part I should be reviewed and completed by the student and Program Director during the first semester; Part II must be completed at least one semester before expected graduation.

Credit Hour Requirements

Each program sets their own requirements with regard to course and research credits, PGM 830 (where "PGM" is the program abbreviation), as stated in the Program Handbook, as long as a minimum of 60 total credits are taken. All RSMAS students are required to complete the Research Ethics course (RSM 700).

It is up to each program to determine, upon admission, whether a transfer student requires more course credits to fulfill the Ph.D. requirements. Ph.D. students entering with a Master's Degree from another university may transfer up to 24 course credits. Individual programs may require more course credits to remove deficiencies. Of the 36 remaining credits needed for the Ph.D., a minimum of 12 must be taken as research credits (PGM 830). Ph.D. students with prior graduate coursework may transfer up to 9 course credits from another accredited institution with the approval of his/her committee. Students must submit the completed Petition for Transfer of Credit (<https://grad.miami.edu/policies-and-forms>) form to the RSMAS Graduate Studies Office (GSO) for processing. In no case will credit be transferred until the student has completed an equivalent number of course credits (with grades of "B" or above) at UM. In either case, students must complete the *Academic Plan* form in the first semester in residence if they wish to transfer prior credit.

Any student whose cumulative Grade Point Average (GPA) falls below 3.0 will receive written notice from his/her program with copies to GSO stating that he/she is on academic probation. Any graduate student who receives this warning letter must meet the full standards of academic progress set forth by the University by the end of the subsequent semester. Students who fail to meet the cumulative GPA requirement have failed to meet the satisfactory academic progress standards established by the university and are no longer eligible to receive any graduate assistantship, fellowship or tuition scholarship and are subject to dismissal from the school.

Committee

The "Supervisory Committee" and "Dissertation Committee" described in the UM Graduate Student Handbook (http://www.miami.edu/gs/index.php/graduate_school/helpful_links_resources) are commonly known as the student's "Committee" at RSMAS, and are normally the same

committee. Specific requirements for committee formation are provided in the UM Graduate School Handbook (http://www.miami.edu/gs/index.php/graduate_school/helpful_links_resources); individual programs may have additional requirements.

Per the UM Graduate School Handbook:

“The committee chair must be Regular Faculty from the student’s program of concentration (this includes secondary appointments). In addition to the chair, two members must be Regular Faculty or have Graduate Faculty (<http://grad.miami.edu/graduate-education/graduate-faculty/rsmas>) status in the student’s program of concentration. The fourth member must be an outside member. “Regular Faculty” are faculty having tenured or tenure-earning appointments of a program or department”.

Once the Committee is formed (typically in the second year), the *Appointment to Student’s Committee* form should be completed, signed by all members and the Program Director, then submitted to GSO. The Committee should meet regularly to review the student’s progress, and prepare a short report on progress and research directions with the student. Proposed changes to the membership of a committee must be approved by the Committee Chair and must carry the endorsement of the Program Director. Approved changes to the Committee must be forwarded to GSO using the *Change to Student’s Committee* form.

Comprehensive Examination

A comprehensive examination may be required by the end of the first year. Whether or not to host the exam, as well as the required content and format, is at the discretion of each program. The *Comprehensive Exam* form notifying GSO of the outcome must be submitted by the Committee Chair and approved by the Program Director. In the event of a failure, a student may be re-examined once, upon the advice of the student’s advisor and/or Committee, and at the discretion of the Program Academic Committee with advice from the Comprehensive Exam Committee. If granted, the re-examination must be given before the end of the following semester.

Dissertation Proposal and Proposal Defense

The dissertation proposal, containing the items listed below, must be defended and approved by the student’s Committee. The purpose of the proposal defense is to certify the readiness of the student to conduct dissertation research, as well as facilitate an open discussion regarding the objectives of the dissertation and the relevant experimental approach.

1. Tentative title
2. Statement of the problem and objectives
3. Methodology, including equipment and facilities required
4. Timetable

The *Dissertation Proposal* form must be approved and signed by the members of the student’s Committee and Program Director. The completed form must be submitted to GSO with the approved copy of the proposal.

Qualifying Examination

The written qualifying examination is normally administered around the time of the proposal defense. In addition, an oral qualifying examination may be required by the program or the student’s Committee. The Committee will prepare and administer the written examination (and oral examination, if required) within the program guidelines. The *Qualifying Exam* form notifying GSO of the outcome must be submitted by the Committee Chair and approved by the Program Director.

Admission to Candidacy

Before being admitted to candidacy, a student must fulfill the following requirements:

- Have an approved Committee on file
- Pass the comprehensive exam (if applicable)
- Submit and successfully defend the dissertation proposal
- Pass the qualifying exam
- Have a 3.0 average in all credits earned
- Remove all incomplete grades or deficiencies

The application for *Admission to Candidacy* must be completed with the approval of the Program Director and submitted to GSO at least one semester prior to the expected semester of graduation.

Dissertation Defense

Students must be registered for research credits during the semester of defense. The *Announcement of Defense* form must be submitted to GSO at least 14 days prior to the defense date. The student is responsible for reserving the room and obtaining approvals from all Committee members and Program Director. Each member must be given no less than 14 days to review material prior to approving the *Announcement of Defense*. Thus, the student must provide the Committee with a complete version of the dissertation at least 1 month prior to the desired defense date. If a student is receiving a stipend, the *Student Payroll End Date* form should accompany the *Announcement of Defense* form. The Committee Chair should notify GSO, in writing, of the outcome of the defense via the *Completion of Defense* form and *SACS Assessment Rubric*.

Dissertation Submission

In addition to the regulations in the UM Graduate Student Handbook (<https://grad.miami.edu/policies-and-forms>) on submitting the final dissertation and the Graduate School guidelines for the ETD Process (<https://grad.miami.edu/electronic-thesis-and-dissertation/formatting-the-etc>), the *RSMAS Certificate of Approval* form must be signed by all members of the student's Committee then submitted by the student to GSO at least one day prior to the end of the semester. The Associate Dean of Graduate Studies will sign it prior to delivery to the UM Graduate School.

Defense and Submission Deadlines

The defense and submission deadlines (<http://grad.miami.edu/electronic-thesis-and-dissertation/defense-and-submission-deadlines>) are set by the Graduate School. The defense, formatting review, and completion of final materials must be done by the last day of the semester. If any requirements are not met by the Deadline for Completion (<http://grad.miami.edu/electronic-thesis-and-dissertation/defense-and-submission-deadlines>), the student is not guaranteed to graduate in that semester and graduation may be deferred to the following semester.

Graduation Clearance

In order to be cleared for graduation, the student must satisfy the minimum degree requirements set by the program, and the Graduate School; fulfill all milestones noted on the *RSMAS Checklist for Defense and Graduation*; and complete the ETD Process (<https://grad.miami.edu/electronic-thesis-and-dissertation/etd-process>) by the identified deadlines. The *RSMAS Student Clearance Form* must be completed by the student then returned to GSO prior to the last day of the semester.

It is the student's responsibility to complete the graduation application through CaneLink (<https://canelink.miami.edu>) before deadlines specified on the University Academic Calendar (<http://www.miami.edu/index.php/registrar/calendar>) and the UM Graduate School (<http://grad.miami.edu/electronic-thesis-and-dissertation/defense-and-submission-deadlines>). Students who previously applied for graduation but did not receive the degree must repeat the application process.

Educational Training Program (Teaching Assistants)

RSMAS Ph.D. students are expected to be a Teaching Assistant (TA) for two courses while pursuing their degree. A training session and two teaching opportunities are offered as courses in educational training (RSM 771, RSM 772, RSM 773). The mandatory TA program will include training of new TAs, evaluation of their performance, and recognition of excellence. Faculty nominations for the RSMAS TA Excellence Awards are solicited each semester, and will be given at the end of the academic year.

The goal of the TA program goal is to make the experience as valuable as possible for the TA, the faculty, and the students taking our courses. RSMAS TAs must comply with the following requirements:

- Register for and complete the RSMAS TA training workshop, RSM 771
- Review the TA Resources posted on Blackboard
- Register for the Educational Training courses: RSM 772 and RSM 773
- Refer to the guidelines and course documentation provided with the TA appointment letters

Master of Professional Science (M.P.S.) Programs

The M.P.S. degree prepares students for science careers in industry, government, and non-profit organizations, where employment demands are growing. M.P.S. degrees were developed and implemented nationally in response to employer demands for well-rounded, highly trained employees with a breadth of knowledge and practical skills to address emerging environmental issues and improve the management of natural and cultural resources. The curriculum is structured to allow students to complete their degree in as little as 12 months (for select tracks), with the training and real-world experience necessary to prepare them for careers in today's professional science job market.

- M.P.S. in Broadcast Meteorology (BME) (p. 1146)
- M.P.S. in Weather Forecasting (WFC) (p. 1147)
- M.P.S. in Weather, Climate, and Society (WCS) (p. 1148)
- M.P.S. in Marine Mammal Science (MMS) (p. 1155)
- M.P.S. in Tropical Marine Ecosystem Management (TME) (p. 1156)
- M.P.S. in Aquaculture (AQU) (p. 1161)
- M.P.S. in Coastal Zone Management (CZM) (p. 1162)
- M.P.S. in Exploration Science (ESC) (p. 1163)
- M.P.S. in Fisheries Management and Conservation (FMC) (p. 1164)
- M.P.S. in Marine Conservation (MCO) (p. 1165)
- M.P.S. in Underwater Archaeology (UA) (p. 1166)
- M.P.S. in Applied Remote Sensing (ARS) (p. 1176)
- M.P.S. in Natural Hazards and Catastrophes (NHC) (p. 1177)
- B.A./M.P.S. in Marine Ecosystems and Society (MES) (p. 1160)
- J.D./M.P.S. in Marine Ecosystems and Society (MES) (p. 1160)

Master of Science (M.S.) Programs

- M.S. in Atmospheric Sciences (ATM) (p. 1149)
- M.S. in Marine Biology and Ecology (MBE) (p. 1157)
- M.S. in Marine Ecosystems and Society (MES) (p. 1167)
- M.S. in Marine Geosciences (MGS) (p. 1169)
- M.S. in Meteorology and Physical Oceanography (MPO) (p. 1172)
- M.S. in Ocean Engineering (p. 1130)
- M.S. in Ocean Sciences (OCE) (p. 1179)

Doctor of Philosophy (Ph.D.) Programs

- Ph.D. in Atmospheric Sciences (ATM) (p. 1151)
- Ph.D. in Marine Biology and Ecology (MBE) (p. 1158)
- Ph.D. in Marine Ecosystems and Society (MES) (p. 1167)
- Ph.D. in Marine Geosciences (MGS) (p. 1170)
- Ph.D. in Meteorology and Physical Oceanography (MPO) (p. 1173)
- Ph.D. in in Ocean Sciences (OCE) (p. 1182)

Atmospheric Sciences

Dept. Code: ATM

The Atmospheric Sciences (ATM) program is designed to prepare students with the tools, training, and education necessary to tackle critical research problems in the atmospheric sciences today. Our faculty are experts in a wide range of research areas, including tropical meteorology, climate dynamics, cloud and aerosol processes, and atmospheric chemistry. Their expertise and guidance and our world-class facilities prepare our students for successful careers in the atmospheric sciences and related fields.

Degree Programs

- Master of Professional Science (M.P.S.) (p. 1146)
 - (p. 1146) Requires 30 credit hours, including 24 course credit hours and 6 internship credit hours.
- Master of Science (M.S.) (p. 1146)
 - Requires 30 credit hours, including 24 course credit hours and 6 research credit hours.
- Doctor of Philosophy (Ph.D.) (p. 1146)
 - Requires 60 credit hours, including a minimum of 26 course credit hours and a minimum of 12 research credit hours.

Research Areas

Atmospheric Chemistry

The atmospheric chemistry group in ATM is interested in understanding the atmospheric emissions, transport, and fate of gases and particles that influence air quality and climate. These interests are explored through laboratory studies and fieldwork. Using state-of-the-art instrumentation and techniques, ATM scientists take measurements in tropical and high-latitude oceans, in forests and urban centers, and at the critical air-sea and troposphere-stratosphere interfaces. These measurements are used in models to predict the impact of atmospheric chemistry on human health and climate.

Climate Dynamics & Prediction

Climate research in ATM includes numerical climate modeling at both regional and global scales, and analysis of satellite data, global data products, and observations. There is a large focus on the diagnosis and modeling of climate variability on interannual, decadal, and millennial timescales, the prediction and modeling of El Niño, and the observation and modeling of anthropogenic climate change.

Cloud & Aerosol Processes

Scientists in ATM study aerosols, clouds, their interactions with each other, with radiation, and with the larger-scale environment. We strive for a better understanding of the cloudy boundary layer structure, its processes, and the effects of atmospheric transport of aerosols such as dust, smoke, and air pollutants, upon both air quality and climate. A focus on marine aerosols and south Florida's Cloud-Aerosol-Rain-Observatory (CAROb) takes advantage of Miami's unique location on the edge of the Atlantic basin.

Tropical Meteorology & Hurricanes

One broad area of research in ATM is aimed at improving our understanding and prediction of tropical weather and hurricanes. Through a combination of field observations, modeling, and theory, faculty and students study the dynamics of hurricanes: their formation, rapid intensification, and how their behavior might change in a warming climate. Other research foci include the advancement of computer model forecasts of tropical cyclones, data assimilation schemes, and observation strategies. Other weather phenomena in the tropics are also investigated in ATM and through the Rosenstiel School, such as monsoons, the intertropical convergence zone, and the Madden-Julian Oscillation.

Other Research Areas

Researchers in ATM also perform research in a number of other areas including:

- Geophysical Fluid Dynamics
- Tornado Dynamics
- Atmospheric Boundary Layer
- Atmospheric Convection
- Model Parameterizations

Master of Professional Science (M.P.S.) Programs

There are three ATM tracks for the M.P.S. degree:

- M.P.S. in Broadcast Meteorology (BME) (p. 1146)
- M.P.S. in Weather Forecasting (WFC) (p. 1147)
- M.P.S. in Weather, Climate, and Society (WCS) (p. 1148)

Master of Science (M.S.) Programs

- M.S. in Atmospheric Sciences (ATM) (p. 1149)

Doctor of Philosophy (Ph.D.) Programs

- Ph.D. in Atmospheric Sciences (ATM) (p. 1151)

M.P.S in Broadcast Meteorology

Broadcast Meteorology (BME) (<http://mps.rsmas.miami.edu/degree-program/broadcast-meteorology>)

The M.P.S. in Broadcast Meteorology prepares students for both on-camera and behind-the-scenes careers in broadcast meteorology, as well as the opportunity to develop the knowledge and training necessary to enter the broader field of science journalism.

Course	Title	Credit Hours
Year One		
Fall		
ATM 651 or 614	Introduction to Atmospheric Science or Introduction to Weather and Climate	3
ATM 662	Advanced Weather Forecasting	3
JMM 615	Writing and Reporting Across Platforms	3
JMM 605 or 627	News Technologies or Television News Producing	3
Credit Hours		12
Spring		
ATM 532	Broadcast Meteorology	3
JMM 617	Television News Reporting	3

ATM 765	General Circulation of the Atmosphere ((Or Elective))	3
RSM 620	Climate and Society	3
	Credit Hours	12
Summer		
ATM 805	MPS Internship	6
	Credit Hours	6
	Total Credit Hours	30

Elective Options

Students may take any elective on the RSMAS campus with the consent of their faculty advisor. Below are a few examples of courses past students in this program used as electives.

Code	Title	Credit Hours
RSM 620	Climate and Society	3
ATM 731	Air-Sea Interaction	3
ATM 732	Climate Dynamics	3
ATM 663	Mesoscale Meteorology and Severe Storms	3
ATM 765	General Circulation of the Atmosphere	3
ATM 611	Geophysical Fluid Dynamics I	3
ATM 633	Atmospheric Boundary Layer	3
ATM 661	Tropical Atmosphere and Ocean	3
ATM 660	Tropospheric Chemistry I	3
JMM 633	Social Media	3

M.P.S. in Weather Forecasting

Weather Forecasting (WFC) (<http://mps.rsmas.miami.edu/degree-program/weather-forecasting>)

The MPS in Weather Forecasting is designed for students who have an undergraduate degree in meteorology and seek graduate level training and experience in applied weather forecasting.

Course	Title	Credit Hours
Year One		
Fall		
ATM 651	Introduction to Atmospheric Science	3
ATM 662	Advanced Weather Forecasting	3
MES 660 & MES 661	Introduction to Marine Geographic Information Systems and Introduction to Marine Geographic Information Systems - Laboratory (Can be taken in the Fall or Spring)	3
ATM 220	Climate and Global Change	3
	Credit Hours	12
Spring		
ATM 765	General Circulation of the Atmosphere (or ELECTIVE)	3
ATM 661	Tropical Atmosphere and Ocean	3
RSM 620	Climate and Society (or ELECTIVE)	3
ELECTIVE		3
	Credit Hours	12
Summer		
ATM 805	MPS Internship	6
	Credit Hours	6
	Total Credit Hours	30

Elective Options

Students may take any elective on the RSMAS campus with the consent of their faculty advisor. Below are a few examples of courses past students in this program used as electives.

Code	Title	Credit Hours
ATM 731	Air-Sea Interaction	3
ATM 532	Broadcast Meteorology	3
RSM 670	Carbon and Climate	3
ATM 762	Computer Models in Fluid Dynamics	3
ATM 636	Hurricanes	3
ATM 624	Applied Data Analysis	3
ATM 553	Climate Change	3
ATM 663	Mesoscale Meteorology and Severe Storms	3
ATM 611	Geophysical Fluid Dynamics I	3
ATM 633	Atmospheric Boundary Layer	3
OCE 602	Oceanography II (Physical)	2
ATM 660	Tropospheric Chemistry I	3

M.P.S. in Climate and Society

Climate and Society (CS (<http://mps.rsmas.miami.edu/climate-and-society>))

The MPS in Climate and Society emphasizes the relationship between weather, climate and societal impacts.

Course	Title	Credit Hours
Year One		
Fall		
ATM 651 or 614	Introduction to Atmospheric Science or Introduction to Weather and Climate	3

M.S. in Atmospheric Sciences

Program Requirements

The applicable requirements will be those in effect during that academic year when the student first registered in the Program, unless stated otherwise in this Handbook or by the Program Director.

All RSMAS courses are listed on the GSO website. All courses taken by students should be approved by their advisors. Students are recommended to consult with their advisors and the ATM Program Director regarding their choices of courses. Deviations from the requirements must be approved by the advisor and the ATM Program Director.

ATM students follow one of two concentrations: **Physical Sciences** or **Chemical Sciences**.

Physical Sciences Concentration

Code	Title	Credit Hours
The ATM M.S. degree requires 30 total credits. ¹		
Core Courses		9
ATM 651	Introduction to Atmospheric Science [*]	
Physical Sciences Concentration		
Students concentrating on Physical Sciences are required to take the following courses:		
ATM 611	Geophysical Fluid Dynamics I	
ATM 765	General Circulation of the Atmosphere	
Electives ²		15
Thesis Research		6
ATM 810	Master Thesis	
Additional Requirements		
RSM 700	Research Ethics	
Comprehensive Examination ³		
ATM Seminar ⁴		
ATM 701	Seminar in Atmospheric Sciences	
Total Credit Hours		30

¹ Minimum of 24 course credits and 6 thesis credits.

^{*} Required course for all ATM students.

² The remaining course credits can be obtained by taking other graduate courses offered by ATM, RSMAS, or UM.

- 3
- Material from the required core courses will appear on the Comprehensive Examination (along with material from other courses from the first year).
 - Grade of **Master's Pass**, **Pass** or **High Pass** needed to fulfill requirement.
 - For full-time students, the Comprehensive Examination should be taken near the end of their first year of graduate studies at RSMAS. This examination will be arranged by a Comprehensive Examination Committee which comprises the ATM Graduate Program Director and the instructors (or assignees) of the first year courses taken by the students.
 - The purpose of this examination is to evaluate students' understanding of materials in the courses completed up to the time of the examination and their capability of integrating these materials, and to determine whether the students are permitted to proceed in the program.
 - The Comprehensive Examination will consist of an oral part and a written part. The written part, which lasts no longer than 8 hours, consists of closed-book questions in the courses taken in the first year by each individual student. Each student must choose to answer four questions from those submitted, with a minimum of 1 question per course (up to the maximum of 4 questions). The oral part is administered by the ATM Graduate Program Director and one or more of the course instructors (or assignees), and may include questions from all the courses taken by the student. The oral exam lasts no longer than 2 hours for each student. The GPA comprises 20% of the Comprehensive Exam grade, and the written and oral parts of the Comprehensive Exams comprise 40% each.
 - A student's performance in this examination, together with his/her cumulative grade point average, will determine whether the grade of **High Pass**, **Pass**, **Master's Pass** or **Fail** is given by the Comprehensive Exam Committee. The examining board consists of faculty whose questions are answered by the student and any other RSMAS faculty who wish to participate.
 - **High Pass:** For students with no identifiable relevant weaknesses.
 - **Pass:** Students and advisors will receive feedback from the Comprehensive Exam committee on the strengths and weaknesses of the student, and possible recommendations of how to address those. This information can be used to help plan the next steps in the student's academic career.
 - **Master's Pass:** Students with this result will be required to defend a Master's thesis before considering whether to pursue a Ph.D. Students and advisors will receive feedback from the Comprehensive Exam committee on the strengths and weaknesses of the student, and possible recommendations of how to address those.
 - **Fail:** Students with this result will have an opportunity to re-take the exam once.
- 4
- Attendance to the ATM seminars is required every semester.
 - ATM M.S. students must give at least one 15-minute presentation each year after the Comprehensive Examination.

Chemical Sciences Concentration

Code	Title	Credit Hours
The ATM M.S. degree requires 30 total credits. ¹		
Core Courses		6

 - **High Pass:** For students with no identifiable relevant weaknesses.
 - **Pass:** Students and advisors will receive feedback from the Comprehensive Exam committee on the strengths and weaknesses of the student, and possible recommendations of how to address those. This information can be used to help plan the next steps in the student's academic career.
 - **Master's Pass:** Students with this result will be required to defend a Master's thesis before considering whether to pursue a Ph.D. Students and advisors will receive feedback from the Comprehensive Exam committee on the strengths and weaknesses of the student, and possible recommendations of how to address those.
 - **Fail:** Students with this result will have an opportunity to re-take the exam once.
- 4
 - These guidelines complement those given in the UM Graduate Student Handbook.
 - All students are expected to take the Qualifying Exam and Proposal Defense by the end of their third year in the program. If the student needs to take the Exam in their fourth year, s/he will need to write a petition to the ATM Faculty with an explanation. A second extension after the end of the fourth year will not be permitted, unless there are exceptional circumstances.
 - While the exact format is left to the discretion of the Ph.D. Committee, a typical Oral Qualifying Exam comprises an hour of questions from the written Qualifying Exam and other related questions, and a second hour in which the student presents his/her Dissertation Proposal. It is recommended that the presentation emphasizes future work and is not a review of previous results, which are in the written Proposal.
 - Expectations of the Qualifying Exam
 - a. **Dissertation Proposal:** Written by the student in clear English befitting the standard of writing in a peer-reviewed journal. The proposal should demonstrate the capability of the student to produce and present research that is of the quality suitable for a journal article. Emphasis needs to be placed on the proposed research: the questions and hypotheses to be tested, the data and methodology used to test the hypotheses, and some anticipated results (which may or may not be realized). A student is encouraged to discuss the proposal with the advisor, but the writing must be his/her own.
 - b. **Oral Exam:** Demonstration of oral communication skills in responding satisfactorily to questions raised by the Committee in relation to the written questions, and any other questions asked by the Committee members.
 - c. **Written Exam:** Written answers judged by each Committee member to demonstrate that the student has the ability to understand and investigate the concept asked in the question. The questions are usually related to the research described in the dissertation proposal.
- 5
 - Attendance to the ATM seminars is required every semester.
 - ATM Ph.D. students must give at least one 15-minute presentation each year after completing the Comprehensive Exam and a one-hour presentation after advancing to Ph.D. candidacy, and at least 6 months before the dissertation defense.
- 6
 - Ph.D. students are expected to be a Teaching Assistant (TA) for two courses while pursuing their degree.
 - The mandatory TA program will include training of new TAs, evaluation of their performance, and recognition of excellence. The goal is to make the experience as valuable as possible for the TA, the faculty, and the students taking our courses.
 - A training session and two teaching opportunities are offered as courses in educational training (RSM 771, RSM 772, RSM 773). Students will be registered accordingly.
 - Specific requirements for TAs are outlined in the RSMAS Student Handbook.

Chemical Sciences Concentration

Code	Title	Credit Hours
The ATM Ph.D. degree requires 60 total credits. ¹		
Core Courses		
ATM 651	Introduction to Atmospheric Science *	6

Chemical Sciences Concentration	
Students concentrating on Chemical Sciences are required to take the following course:	
ATM 634	Atmospheric Chemistry
Electives ²	20
Dissertation Research	34
ATM 830	Doctoral Dissertation
Required Examinations	
Comprehensive Examination ³	
Qualifying Examination ⁴	
Additional Requirements	
RSM 700	Research Ethics
ATM Seminar ⁵	
ATM 701	Seminar in Atmospheric Sciences
Educational Training Program (TA) ⁶	
RSM 771	Educational Training 1
RSM 772	Educational Training 2
RSM 773	Educational Training 3
Total Credit Hours	60

- ¹
- Minimum of 26 course credits and 12 dissertation credits.
 - Minimum of 9 course credits should be taken from 700 level courses if available in the student's area of study.
 - The credit transfer and waiver of required courses should be done during the first year of graduate study at RSMAS with approval from the graduate advisor and the ATM Academic Committee.

* Required course for all ATM students.

² The remaining course credits can be obtained by taking other graduate courses offered by ATM, RSMAS, or UM.

- ³
- Material from the required core courses will appear on the Comprehensive Examination (along with material from other courses from the first year).
 - Grade of **Pass** or **High Pass** needed to fulfill requirement.
 - For full-time students, the Comprehensive Examination should be taken near the end of their first year of graduate studies at RSMAS. This examination will be arranged by a Comprehensive Examination Committee which comprises the ATM Graduate Program Director and the instructors (or assignees) of the first year courses taken by the students.
 - The purpose of this examination is to evaluate students' understanding of materials in the courses completed up to the time of the examination and their capability of integrating these materials, and to determine whether the students are permitted to proceed in the program.
 - The Comprehensive Examination will consist of an oral part and a written part. The written part, which lasts no longer than 8 hours, consists of closed-book questions in the courses taken in the first year by each individual student. Each student must choose to answer four questions from those submitted, with a minimum of 1 question per course (up to the maximum of 4 questions). The oral part is administered by the ATM Graduate Program Director and one or more of the course instructors (or assignees), and may include questions from all the courses taken by the student. The oral exam lasts no longer than 2 hours for each student. The GPA comprises 20% of the Comprehensive Exam grade, and the written and oral parts of the Comprehensive Exams comprise 40% each.
 - A student's performance in this examination, together with his/her cumulative grade point average, will determine whether the grade of **High Pass**, **Pass**, **Master's Pass** or **Fail** is given by the Comprehensive Exam Committee. The examining board consists of faculty whose questions are answered by the student and any other RSMAS faculty who wish to participate.
 - **High Pass:** For students with no identifiable relevant weaknesses.
 - **Pass:** Students and advisors will receive feedback from the Comprehensive Exam committee on the strengths and weaknesses of the student, and possible recommendations of how to address those. This information can be used to help plan the next steps in the student's academic career.
 - **Master's Pass:** Students with this result will be required to defend a Master's thesis before considering whether to pursue a Ph.D. Students and advisors will receive feedback from the Comprehensive Exam committee on the strengths and weaknesses of the student, and possible recommendations of how to address those.
 - **Fail:** Students with this result will have an opportunity to re-take the exam once.

- 4
- These guidelines complement those given in the UM Graduate Student Handbook.
 - All students are expected to take the Qualifying Exam and Proposal Defense by the end of their third year in the program. If the student needs to take the Exam in their fourth year, s/he will need to write a petition to the ATM Faculty with an explanation. A second extension after the end of the fourth year will not be permitted, unless there are exceptional circumstances.
 - While the exact format is left to the discretion of the Ph.D. Committee, a typical Oral Qualifying Exam comprises an hour of questions from the written Qualifying Exam and other related questions, and a second hour in which the student presents his/her Dissertation Proposal. It is recommended that the presentation emphasizes future work and is not a review of previous results, which are in the written Proposal.
 - Expectations of the Qualifying Exam
 - a. **Dissertation Proposal:** Written by the student in clear English befitting the standard of writing in a peer-reviewed journal. The proposal should demonstrate the capability of the student to produce and present research that is of the quality suitable for a journal article. Emphasis needs to be placed on the proposed research: the questions and hypotheses to be tested, the data and methodology used to test the hypotheses, and some anticipated results (which may or may not be realized). A student is encouraged to discuss the proposal with the advisor, but the writing must be his/her own.
 - b. **Oral Exam:** Demonstration of oral communication skills in responding satisfactorily to questions raised by the Committee in relation to the written questions, and any other questions asked by the Committee members.
 - c. **Written Exam:** Written answers judged by each Committee member to demonstrate that the student has the ability to understand and investigate the concept asked in the question. The questions are usually related to the research described in the dissertation proposal.
- 5
- Attendance to the ATM seminars is required every semester.
 - ATM Ph.D. students must give at least one 15-minute presentation each year after completing the Comprehensive Exam and a one-hour presentation after advancing to Ph.D. candidacy, and at least 6 months before the dissertation defense.
- 6
- Ph.D. students are expected to be a Teaching Assistant (TA) for two courses while pursuing their degree.
 - The mandatory TA program will include training of new TAs, evaluation of their performance, and recognition of excellence. The goal is to make the experience as valuable as possible for the TA, the faculty, and the students taking our courses.
 - A training session and two teaching opportunities are offered as courses in educational training (RSM 771, RSM 772, RSM 773). Students will be registered accordingly.
 - Specific requirements for TAs are outlined in the RSMAS Student Handbook.

Marine Biology and Ecology

Dept. Code: MBE

The Marine Biology and Ecology (MBE) academic program focuses on a wide range of field, laboratory, and theoretical coursework in a range of research areas, such as coral reef studies, biological oceanography and marine biology, fisheries biology, and the biology and behavior of marine animals.

MBE faculty, students, and their many international collaborators participate in multi-institutional, multi-disciplinary research programs. The UM Rosenstiel School hosts many research centers and groups, such as the experimental hatchery, The National Center for Coral Reef Research, the Rescue-a-Reef citizen science initiative, and the world-renowned NIH/University of Miami National Resource for Aplysia.

Graduate students can choose from a diversity of research areas and coursework taught by internationally recognized scientists studying corals and climate change, fisheries biology, and conducting biomedical research.

Degree Programs

- Master of Professional Science (M.P.S.) (p. 1155)
 - Requires 30 credit hours, including 24 course credit hours and 6 internship credit hours.
- Master of Science (M.S.) (p. 1155)
 - Requires 30 credit hours, including 24 course credit hours and 6 research credit hours.
- Doctor of Philosophy (Ph.D.) (p. 1155)
 - Requires 60 credit hours, including a minimum of 24 course credit hours and a minimum of 12 research credit hours.

Research Areas

Coral Reef and Coastal Ecology

Employs ecological, physiological and molecular approaches to understand, conserve, manage, and restore coral reefs, seagrasses, mangroves and their associated biota.

Marine Organismal and Biomedical Science

Focuses on how marine organisms respond to their environment on physiological and evolutionary time scales. This research integrates whole animal and cellular studies of physiology, biochemistry, neurobiology, genomics, molecular biology, aging, pathology and toxicology to understand factors controlling these responses and to develop these systems as models for human health.

Biological Oceanography

Focuses on adaptations, ecological interactions, food webs, and biogeochemical cycles of the ocean.

Fisheries Science

Studies the direct and indirect impacts of living marine resource exploitation on marine populations, communities and habitats and investigates solutions to the problems of unsustainable, habitat-damaging and/or inefficient fishing, including the minimization of bycatch and food web disruption.

Master of Professional Science (M.P.S.) Programs

There are two MBE tracks for the M.P.S degree:

- M.P.S. in Marine Mammal Science (MMS) (p. 1155)
- M.P.S. in Tropical Marine Ecosystem Management (TME) (p. 1156)

Master of Science (M.S.) Programs

- M.S. in Marine Biology and Ecology (MBE) (p. 1157)

Doctor of Philosophy (Ph.D.) Programs

- Ph.D. in Marine Biology and Ecology (MBE) (p. 1158)

M.P.S. in Marine Mammal Science

Marine Mammal Science (MMS (<http://mps.rsmas.miami.edu/marine-mammal-science>))

Students in this program will prepare for employment in marine mammal management (including associated ecosystems), population assessments, acoustics, and care. Please see our track web site (<http://mps.rsmas.miami.edu/degree-program/marine-mammal-science>) for more information about this program.

Course	Title	Credit Hours
Year One		
Fall		
MBE 604	Biology of Marine Mammals	3
RSM 612 or MES 608	Statistics for Environmental Management or Biometrics in Marine Science	3
MES 670	Conservation and Management of Marine Mammals	3
MES 660 & MES 661	Introduction to Marine Geographic Information Systems and Introduction to Marine Geographic Information Systems - Laboratory	3
	Credit Hours	12
Spring		
MBE 605	Marine Mammal Disease and Medicine	3
MES 645 or 646	Marine Population Assessment Surveys and Analysis or Marine Population Biology Processes and Modeling	3
OCE 651	Applied Ocean Acoustics and Marine Mammals (Applied Marine Mammal Acoustics)	3
MBE 632	Marine Mammal Research Techniques ((or ELECTIVE))	3
	Credit Hours	12
Summer		
MBE 805	MPS Internship	6
MBE 507	Marine Mammal Applied Behavior Analysis and Managed Care (MBE 607 is graduate level)	3
	Credit Hours	9
	Total Credit Hours	33

Elective Options

Students may take any elective on the RSMAS campus with the consent of their faculty advisor. Below are a few examples of courses past students in this program used as electives.

Code	Title	Credit Hours
MBE 716	Bayesian Statistics for Marine Scientists	3
MES 720	Coastal Law and Policy	3
MES 620	Environmental Law	3
MBE 678	Evolutionary Genetics	3
POL 631	Global Environment Politics	3
MES 710	International Ocean Law and Governance	3
MES 616	Ocean Policy and Development and Analysis	3
RSM 710	The Physical Environment of Marine Organisms	3
MES 601	Political Ecology of Marine Management	3

M.P.S. in Tropical Marine Ecosystem Management

Tropical Marine Ecosystem Management (TME (<http://mps.rsmas.miami.edu/tropical-marine-ecosystem-management>))

The MPS in Tropical Marine Ecosystem Management provides students with advanced training in the theoretical aspects of tropical marine ecology, as well as the practical aspects needed to begin a career in this field. Please see our departmental web site (<http://mps.rsmas.miami.edu/degree-program/tropical-marine-ecosystem>) for more information about this program.

Course	Title	Credit Hours
Year One		
Fall		
MBE 615	Tropical Marine Ecology	3
RSM 600	Research Diving Techniques ((Can be taken in Fall or Spring) Or ELECTIVE)	3
RSM 667	Motorboat Operator Certificate Course	1-2
RSM 612 or MES 608	Statistics for Environmental Management or Biometrics in Marine Science	3
MES 620, 720, or 616	Environmental Law ((or ELECTIVE)) or Coastal Law and Policy or Ocean Policy and Development and Analysis	3
	Credit Hours	13-14
Spring		
MBE 621	Field Techniques and Instrumentation in Tropical Marine Ecology	3
MES 660 & MES 661	Introduction to Marine Geographic Information Systems and Introduction to Marine Geographic Information Systems - Laboratory	3
MES 610	Environmental Planning and the Environmental Impact Statement ((or ELECTIVE))	3
MES 646	Marine Population Biology Processes and Modeling ((or ELECTIVE))	3
	Credit Hours	12
Summer		
MBE 805	MPS Internship	6
	Credit Hours	6
	Total Credit Hours	31-32

Elective Options

Students may take any elective on the RSMAS campus with the consent of their faculty advisor. Below are a few examples of courses past students in this program used as electives.

Code	Title	Credit Hours
BIL 623	Advanced Biology of Marine Invertebrates	4

MES 606	Advanced Fieldwork in Coastal Cultures	3
MBE 716	Bayesian Statistics for Marine Scientists	3
MBE 704	Biological Oceanography	3
MES 720	Coastal Law and Policy	3
MES 602	Economics of Natural Resources	3
MES 620	Environmental Law	3
MES 610	Environmental Planning and the Environmental Impact Statement	3
MBE 678	Evolutionary Genetics	3
MES 614	Underwater Archaeology Field Techniques	3
MES 604	Fieldwork in Coastal Management: Tourism, Conservation, and Development	3
MES 605	Fieldwork in Coastal Cultures	3
MES 625	Fisheries Socioeconomics and Management	3
POL 631	Global Environment Politics	3
MES 710	International Ocean Law and Governance	3
MES 626	Submerged Cultural Resource Management	3
MES 616	Ocean Policy and Development and Analysis	3
RSM 710	The Physical Environment of Marine Organisms	3
MES 601	Political Ecology of Marine Management	3
MES 662	Spatial Analysis: Intermediate Course in Marine GIS	3
MBE 614	Tropical Marine Biology: A Field Course	3

M.S. in Marine Biology and Ecology

Program Requirements

Code	Title	Credit Hours
The MBE M.S. degree requires 30 total credits. ¹		
Core Courses		9
Choose 3 courses from the following:		
MES 608	Biometrics in Marine Science	
or RSM 612	Statistics for Environmental Management	
MBE 615	Tropical Marine Ecology	
MBE 704	Biological Oceanography	
RSM 710	The Physical Environment of Marine Organisms	
Electives ²		15
Thesis Research		6
MBE 810	Master's Thesis	
Additional Requirements		
RSM 700	Research Ethics	
MBE Seminar ³		
MBE 702	Biological Oceanography Seminar	
Total Credit Hours		30

¹ Minimum of 24 course credits and 6 thesis credits.

² MBE students are not required to take a course outside the program.

³

- Attendance to the MBE seminars is required every semester.
- All MBE students must give a talk in the series annually after the first year.

Ph.D. in Marine Biology and Ecology

Program Requirements

Code	Title	Credit Hours
The MBE Ph.D. degree requires 60 total credits. ¹		
Core Courses		9
Choose 3 courses from the following:		
MES 608 or RSM 612	Biometrics in Marine Science Statistics for Environmental Management	
MBE 615	Tropical Marine Ecology	
MBE 704	Biological Oceanography	
RSM 710	The Physical Environment of Marine Organisms	
Electives ²		21
Dissertation Research		30
MBE 830	Doctoral Dissertation	
Additional Requirements		
RSM 700	Research Ethics	
Qualifying Examination ³		
MBE Seminar ⁴		
MBE 702	Biological Oceanography Seminar	
Educational Training Program (TA) ⁵		
RSM 771	Educational Training 1	
RSM 772	Educational Training 2	
RSM 773	Educational Training 3	
Total Credit Hours		60

¹ Minimum of 24 course credits and 12 dissertation credits.

² MBE students are not required to take a course outside the program.

- ³
- At the end of the second year, a written qualifying examination is required of all Ph.D. students that focuses on the subject matter needed to complete the research proposed for the dissertation.
 - The purpose of the qualifying examination is to demonstrate that the MBE doctoral student has the necessary understanding and expertise in research and related fields to complete the dissertation research. The topic areas should be agreed upon by the student, chair, and the dissertation committee soon after the proposal defense. The student is strongly encouraged to discuss the specific topics with each member of the dissertation committee, well in advance of the examination, to clarify the expected questions. The committee is encouraged to provide specific reading or areas of knowledge they will test the student on.
 - The qualifying exam is 4 - 5 partial days (4 hours per day) on questions written by their committee. It is the advisor's responsibility to provide the test and to have the student's committee grade it in a timely manner. The scheduling of the exam sessions is the responsibility of the student's advisor, but in all cases the written portion of the examination shall be completed within one week.
 - An additional oral qualifying examination may be required by the student's committee, but may not serve as a substitute for the written examination, which is a Graduate School requirement.
 - The decision of passing or failing the qualifying examination rests with the dissertation committee. The qualifying examination (written and, if required, oral) must be successfully completed, as documented by the dissertation committee, before the student can be admitted to candidacy.
 - In the event of a failure, a student may be re-examined once upon the recommendation of the student's committee in consultation with the academic committee. If permitted, the reexamination must be given before the end of the following semester.

- ⁴
- Attendance to the MBE seminars is required every semester.
 - All MBE students must give a talk in the series annually after the first year.
 - Students entering the MBE Ph.D. program with a Master's degree begin to give seminars in their first year.

- ⁵
- Ph.D. students are expected to be a Teaching Assistant (TA) for two courses while pursuing their degree.
 - The mandatory TA program will include training of new TAs, evaluation of their performance, and recognition of excellence. The goal is to make the experience as valuable as possible for the TA, the faculty, and the students taking our courses.
 - A training session and two teaching opportunities are offered as courses in educational training (RSM 771, RSM 772, RSM 773). Students will be registered accordingly.
 - Specific requirements for TAs are outlined in the RSMAS Student Handbook.

Marine Ecosystems and Society

Dept. Code: MES

Students enrolled in the Marine Ecosystems and Society (MES) program work at the intersection of science and society, committed to assessing, managing, and conserving marine resources through innovation and research. Although course selections are tailored to match individual research and career objectives, our graduates acquire knowledge and expertise critical to ensuring the sustainability of natural resources.

MES faculty expertise spans quantitative and qualitative disciplines that integrate the biological, ecological, economic, and social dimensions of marine resources and how they are shaped by policy and regulatory frameworks. The essence of the MES program lies in the diversity of our faculty and curriculum, fostering the cross- and interdisciplinary collaborations necessary to solve some of the world's most challenging ocean conservation issues. The goal of our Ph.D. and M.S. program is to prepare students as future leaders in the fields of marine fisheries science, ecosystem modeling, aquaculture, conservation, ecosystem science, coastal geography, socioeconomics, cultural and natural resource management, climate change, environmental law, and marine policy.

Degree Programs

- Master of Professional Science (M.P.S.)
 - Requires 30 credit hours, including 24 course credit hours and 6 internship credit hours.
- Master of Science (M.S.) (p. 1159)
 - Requires 30 credit hours, including 24 course credit hours and 6 research credit hours.
- Doctor of Philosophy (Ph.D.)
 - Requires 60 credit hours, including a minimum of 24 course credit hours and a minimum of 12 research credit hours.

Program Concentrations

- Aquaculture and Fisheries Science
- Coastal Zone Management
- Ecosystem Modeling and Sustainability
- Exploration Science
- Fisheries Management Science
- Marine Mammal Science
- Marine Population Dynamics
- Marine Resource Economics
- Ocean Law and Policy
- Shark Ecology and Conservation
- Underwater Archaeology

Master of Professional Science (M.P.S.) Programs

There are eight MES tracks for the M.P.S. degree:

- B.A./M.P.S. in Marine Ecosystems and Society (MES) (p. 1160)
- J.D./M.P.S. in Marine Ecosystems and Society (MES) (p. 1160)
 - The School of Law and the Rosenstiel School offer a joint degree program (<https://www.law.miami.edu/academics/jd-mps-marine-ecosystems-and-society>) in law and marine ecosystems and society. Upon completion of this program, a student earns a Juris Doctor degree from the School of Law and M.P.S. degree in Marine Ecosystems and Society from RSMAS.
- M.P.S. in Aquaculture (AQU) (p. 1161)
- M.P.S. in Coastal Zone Management (CZM) (p. 1162)
- M.P.S. in Exploration Science (ESC) (p. 1163)
- M.P.S. in Fisheries Management and Conservation (FMC) (p. 1164)
- M.P.S. in Marine Conservation (MCO) (p. 1165)
- M.P.S. in Underwater Archaeology (UA) (p. 1166)

Master of Science (M.S.) Programs

- M.S. in Marine Ecosystems and Society (MES) (p. 1167)

Doctor of Philosophy (Ph.D.) Programs

- Ph.D. in Marine Ecosystems and Society (MES) (p. 1167)

B.A./M.P.S. in Marine Ecosystems and Society

B.A. / M.P.S.

Marine Ecosystems and Society, in cooperation with the Undergraduate Marine and Atmospheric Science Program, also offers a five-year B.A./M.P.S. Program in Marine Affairs. This program enables qualified students to earn a B.A. in Marine Affairs in four years with the opportunity to earn an M.P.S. with only one additional year. Conditional acceptance to the MPS program is based on the student's GPA at the end of their sophomore year. Students must then take GRE exams and apply for acceptance to the graduate program at Rosenstiel during their junior year.

J.D./M.P.S. in Marine Ecosystems and Society

The University of Miami School of Law and the Rosenstiel School of Marine and Atmospheric Science (RSMAS) offer a joint degree program in law and marine ecosystems and society. Upon completion of this program, a student earns the Juris Doctor degree from the School of Law and a Master of Professional Science in Marine Ecosystems and Society (<https://www.law.miami.edu/academics/jd-mps-marine-ecosystems-and-society>) (<https://www.law.miami.edu/academics/jd-mps-marine-ecosystems-and-society>) from RSMAS, ranked as one of the top five geoscience institutions in the United States.

The M.P.S. degree allows students to focus their coursework in one of four areas:

1. **Aquaculture Track:** Focuses on the environmental, technological, social, economic, legal and political aspects of sustainable aquaculture.
2. **Coastal Zone Management Track:** Gain exposure to the legal and governance frameworks associated with the management of near-shore waters. These areas present unique challenges to resource managers in the shipping, tourism, development, fisheries, aquaculture and oil industry.
3. **Marine Conservation Track:** Design a curriculum around personal career goals while focusing on innovative solutions to current marine ecosystem threats. This track combines science, law, economics, and policy to foster the conservation awareness of marine ecosystems.
4. **Underwater Archeology:** Focuses on the theory, field techniques, and management practices necessary to work within the field of archaeology and the broader general field of marine sciences. Coursework integrates topics such as site mapping and documentation, interpretation of shipwrecks and submerged sites, best management practices, marine protected areas, and marine survey technology. UARCH students receive training as AAUS Science Divers during their first semester. Students will have opportunities to work side-by-side with professional archaeologists through internships and field projects with private, public, or non-governmental agencies, both nationally and internationally, and conduct relevant fieldwork.

Admissions

Students who apply for the joint J.D./M.P.S. program must apply to both the School of Law and to RSMAS, Department of Marine Ecosystems and Society. Prospective students must achieve a qualifying score on the Law School Admissions Test (LSAT) and on the General Graduate Record Examination (GRE) for admission to the respective schools. A minimum, combined score of 297 (Verbal + Quantitative only) is required to be considered for MPS. An applicant must notify both schools that he or she is applying for the joint J.D./M.P.S. program and, in order to remain in the joint program, must meet the minimum standards of both schools.

Credits

A student may complete requirements for both degrees within seven regular semesters or, subject to course availability, in an intensive program of six regular semesters and two full summers. The joint degree program saves a student 12 credits over earning the degrees separately. An individual would essentially complete 82 credits (rather than the normal 88) in law courses and 24 credits (rather than the normal 30) in marine and atmospheric science courses for a total of 106 credits in order to receive the J.D. and the M.P.S. degrees. A maximum of 6 credits from the law school must be petitioned and approved for transfer to the student's graduate record in order to meet the 30-credit minimum for a master's degree.

Curriculum

The student's work in the joint degree program, whether connected with a course, seminar or individual research project at the School of Law or the Rosenstiel School, must result in a substantial research project of publishable quality in marine law or policy or related scientific issues. Students may use their required upper-class research paper at the School of Law to fulfill this requirement.

Requirements: Juris Doctor (J.D.)

Students must complete at least 12 credits from among the following courses or seminars:

Requirements: RSMAS Courses are identified and organized by each MPS Track (<http://mps.rsmas.miami.edu/degree-tracks>)

A student must complete 24 credits of courses from RSMAS:

Courses (<https://graduate.rsmas.miami.edu/students/course-schedules>) will be updated from time to time and students should consult with a faculty advisor, or other designated person, prior to registering for any course not specifically listed above, or to ensure a course not listed will be credited toward this degree. RSMAS, Department of Marine Ecosystems and Society makes no representation that all of the above courses will be available to any given student at all times during the course of his or her studies.

M.P.S. in Aquaculture

Aquaculture (AQU) (<http://mps.rsmas.miami.edu/degree-program/aquaculture>)

The MPS in Aquaculture focuses on the environmental, technological, social, economic, legal, and political aspects of sustainable aquaculture. The program covers all stages of planning and development, from site and species selection to feasibility studies, resource evaluation, hatchery and grow-out technology, and commercialization.

Course	Title	Credit Hours
Year One		
Fall		
MES 612	Aquaculture I	3
MES 660 & MES 661	Introduction to Marine Geographic Information Systems and Introduction to Marine Geographic Information Systems - Laboratory ((or ELECTIVE))	3
MES 602 or 625	Economics of Natural Resources or Fisheries Socioeconomics and Management	3
MES 617	Legal Environment and Business Planning in Aquaculture ^{NEW TITLE:} Aquaculture IV: Aquaculture Business, Regulatory, & Environmental Considerations	3
	Credit Hours	12
Spring		
MES 613	Aquaculture II Lab ^{NEW TITLE Aquaculture II: Advanced Techniques in Sustainable} Aquaculture (Lab Course)	3
MES 628	Seafood Market and Marketing	3
MBE 686 or MES 629	Fish Physiology ((or ELECTIVE)) or Biology, Ecology, and Management of Mangrove Ecosystems	3
MES 619	Aquaculture III (Field Course)	3
	Credit Hours	12

Summer		
MES 805	MPS Internship	6
	Credit Hours	6
	Total Credit Hours	30

Elective Options

Students may take any elective on the RSMAS campus with the consent of their faculty advisor. Below are a few examples of courses past students in this program used as electives.

Code	Title	Credit Hours
Business School electives are applicable, with approval from Academic Advisor		
BIL 623	Advanced Biology of Marine Invertebrates	4
MES 720	Coastal Law and Policy	3
MBE 676	Diseases of Marine Organisms	3
MES 620	Environmental Law	3
MES 710	International Ocean Law and Governance	3
MES 671	Marine Conservation Biology	3
MBE 642	Oceans and Human Health	3
MES 616	Ocean Policy and Development and Analysis	3
RSM 612	Statistics for Environmental Management	3
MBE 614	Tropical Marine Biology: A Field Course	3

M.P.S. in Coastal Zone Management

Coastal Zone Management (CZM (<http://mps.rsmas.miami.edu/coastal-zone-management>))

Students will be introduced to the legal and governance frameworks on topics such as coastal fisheries management, marine protected areas, port management, tourism development, environmental impact assessment, and oil exploration.

Code	Title	Credit Hours
Courses for this program are selected on a case by case basis during academic advisement.		30
Potential Courses		
MES 601	Political Ecology of Marine Management	
MES 602	Economics of Natural Resources	
MES 604	Fieldwork in Coastal Management: Tourism, Conservation, and Development	
MES 606	Advanced Fieldwork in Coastal Cultures	
MES 610	Environmental Planning and the Environmental Impact Statement	
MES 612	Aquaculture I	
MES 613	Aquaculture II Lab	
MES 619	Aquaculture III	
MES 618	Coastal Zone Management	
MES 620	Environmental Law	
MES 625	Fisheries Socioeconomics and Management	
MES 626	Submerged Cultural Resource Management	
MES 630	Port Operations and Policy	
MES 660 & MES 661	Introduction to Marine Geographic Information Systems and Introduction to Marine Geographic Information Systems - Laboratory	
MES 662	Spatial Analysis: Intermediate Course in Marine GIS	
MES 671	Marine Conservation Biology	
MES 616	Ocean Policy and Development and Analysis	
MES 617	Legal Environment and Business Planning in Aquaculture	
MES 664	Citizen and Participatory Science	

MES 670	Conservation and Management of Marine Mammals	
MES 608	Biometrics in Marine Science	
MES 673	Marine Conservation Outreach	
MES 677	Management and Conservation of Marine Ecosystems	
MES 710	International Ocean Law and Governance	
MBE 615	Tropical Marine Ecology	
MBE 618	Reef Coral Biology, Ecology, and Conservation	
MBE 621	Field Techniques and Instrumentation in Tropical Marine Ecology	
RSM 612	Statistics for Environmental Management	
RSM 667	Motorboat Operator Certificate Course	
RSM 600	Research Diving Techniques	
RSM 620	Climate and Society	
MES 805	MPS Internship (* Required)	
Total Credit Hours		30

M.P.S. in Exploration Science

Exploration Science (ESC) (<http://mps.rsmas.miami.edu/degree-program/exploration-science>)

Exploration Science is the applied practice and study of field research using a variety of methods, technologies, and approaches to drive question-based scientific endeavors.

This track is being offered at RSMAS in partnership with UM's Abess Center for Ecosystem Science and Policy (<http://www.cesp.miami.edu>). The Abess Center fosters innovative, interdisciplinary initiatives that bridge the gap between science and environmental policy.

M.P.S. in Marine Conservation

Marine Conservation (MCO) (<http://mps.rsmas.miami.edu/degree-program/marine-conservation>)

The goal of the track is to advance conservation efforts, scientific literacy and communication, public outreach and integration, and education within the marine realm. Practical aspects of the program will vary between individuals but may include exposure to field methods and techniques, GIS and remote sensing of shallow water marine environments, shark behavioral ecology and conservation, the development of environmental impact statements, coastal law, the development of social media, scientific communication, and statistics for environmental management.

M.P.S. in Underwater Archaeology

Underwater Archaeology (UA (<http://mps.rsmas.miami.edu/underwater-archeology>)) (<http://mps.rsmas.miami.edu/degree-program/underwater-archaeology>))

The MPS Underwater Archaeology track (UARCH) is a two-year program that focuses on the theory, field techniques, and management practices necessary to work within the field of archaeology and the broader general field of marine sciences. Coursework integrates topics such as site mapping and documentation, interpretation of shipwrecks and submerged sites, best management practices, marine protected areas, and marine survey technology. UARCH students receive training as AAUS Science Divers during their first semester. Students will have opportunities to work side-by-side with professional archaeologists through internships and field projects with private, public, or non-governmental agencies, both nationally and internationally, and conduct relevant fieldwork.

M.S. in Marine Ecosystems and Society

Program Requirements

Code	Title	Credit Hours
The MES M.S. degree requires 30 total credits. ¹		
Core Courses		3
MES M.S. students are required to complete one (1) of the following:		
MES 608	Biometrics in Marine Science	
or RSM 612	Statistics for Environmental Management	
Electives ²		21
Thesis Research		6
MES 810	Master's Thesis	
Additional Requirements		
RSM 700	Research Ethics	
Proposal Defense ³		
MES Seminar ⁴		
Total Credit Hours		30

¹ Minimum of 24 course credits and 6 thesis credits.

² The remaining course schedule will be developed by the student in consultation with the Chair of the thesis Committee.

³ Refer to the MES Program Handbook for specific guidelines.

⁴

- MES M.S. and Ph.D. students are required to attend all MES student seminars.
- Students will give one student seminar at the beginning of their third semester at RSMAS (not counting summers) and every year after, with the exception of the semester in which when they defend their thesis.

Ph.D. in Marine Ecosystems and Society

Program Requirements

Code	Title	Credit Hours
The MES Ph.D. degree requires 60 total credits. ¹		
Core Courses		6
MES 608	Biometrics in Marine Science	
MES 715	Advanced Biometrics in Marine Science	
Electives ²		24
Dissertation Research		30
MES 830	Doctoral Dissertation	
Required Examinations		
Comprehensive Examination ³		
Qualifying Examination ⁴		
Additional Requirements		
RSM 700	Research Ethics	

MES Seminar ⁵	
Educational Training Program (TA) ⁶	
RSM 771	Educational Training 1
RSM 772	Educational Training 2
RSM 773	Educational Training 3
Total Credit Hours	60

- 1 Minimum of 24 course credits and 12 dissertation credits.
- 2 The remaining course schedule will be developed by the student in consultation with the Chair of the Dissertation Committee.
- 3
 - MES Ph.D. students must pass a comprehensive exam no later than their third semester in residence, including summers.
 - The exam's format will be defined by the student's Committee Chair in consultation with the Committee.
- 4
 - At the end of the second year, a written qualifying examination is required of all Ph.D. students that focuses on the subject matter relevant to the successful execution of the proposed dissertation research.
 - The purpose of the qualifying examination is to demonstrate that the MES doctoral student has the necessary understanding and expertise in research and related fields to complete the dissertation research. The topic areas should be agreed upon by the student, Chair, and the dissertation Committee soon after the proposal defense. The student is strongly encouraged to discuss the specific topics with each member of the dissertation Committee well in advance of the examination, to clarify the expectations regarding content. The Committee is encouraged to provide specific readings or areas of knowledge they will test the student on. The format of the qualifying exam is decided by the dissertation Committee. It is the Chair's responsibility to provide the test and to have the student's Committee grade it in a timely manner.
 - The decision of passing or failing the qualifying examination rests with the dissertation Committee. The qualifying examination (written and, if required by the Committee, oral) must be successfully completed, as documented by the dissertation Committee, before the student can be admitted to candidacy.
 - In the event of a failure, a student may be reexamined once upon the recommendation of the student's Committee in consultation with the Academic Committee. If permitted, the reexamination must be hosted before the end of the following semester. An additional oral qualifying examination may be required by the student's Committee but may not serve as a substitute for the written examination, which is a Graduate School requirement.
- 5
 - MES M.S. and Ph.D. students are required to attend all MES student seminars.
 - Students will give one student seminar at the beginning of their third semester at RSMAS (not counting summers) and every year after, with the exception of the semester in which they defend their dissertation.
- 6
 - Ph.D. students are expected to be a Teaching Assistant (TA) for two courses while pursuing their degree.
 - The mandatory TA program will include training of new TAs, evaluation of their performance, and recognition of excellence. The goal is to make the experience as valuable as possible for the TA, the faculty, and the students taking our courses.
 - A training session and two teaching opportunities are offered as courses in educational training (RSM 771, RSM 772, RSM 773). Students will be registered accordingly.
 - Specific requirements for TAs are outlined in the RSMAS Student Handbook.

Marine Geosciences

Dept. Code: MGS

The Marine Geosciences (MGS) graduate program is focused on studying the geology, geophysics, and geochemistry of the earth system, beneath, within, and above the oceans.

Students work closely with faculty at the forefront of research on earthquakes, volcanoes, plate tectonics, hydrothermal seafloor vents, and paleoclimate. MGS faculty and students also emphasize interdisciplinary study where geological phenomena interact with or are influenced by processes generally studied in other disciplines, such as ocean currents, climate, and biological evolution.

MGS research uses pioneering remote sensing techniques to assess the earth's crustal movement and sedimentation in coastal zones. MGS degree programs are at the forefront of understanding carbonate deposit systems, and paleoclimate researchers are using stromatolites and reefs to learn more about past climate change by studying the interaction between biological and geological processes. Ocean observing systems, such as hydrological observatories, are playing prominently in research efforts as well.

Degree Programs

- Post-Bachelor's Certificate (p. 1169)
 - Offered for working professionals who seek specialization in Applied Carbonate Geology.
 - Requires 16 course credit hours for successful completion.
- Master of Science (M.S.)
 - Requires 30 credit hours, including 24 course credit hours and 6 research credit hours.
 - Interdisciplinary studies with expertise in physics, chemistry, mathematics, and/or biology are encouraged.
- Doctor of Philosophy (Ph.D.) (p. 1169)

- Requires 60 credit hours, including a minimum of 30 course credit hours and a minimum of 12 research credit hours.
- Interdisciplinary studies with expertise in physics, chemistry, mathematics, and/or biology are encouraged.

Post-Bachelor's Certificate Program

The goal of the certificate program is to provide first-rate continuing education to professionals or geology students who want to become experts in carbonate geology. To reach this goal courses are offered in carbonate sedimentology, seismic stratigraphy, petrophysics, and geochemistry for an advanced knowledge and understanding in carbonate systems. A successful completion of the program will require 16 course credits to be taken. There are ten electable 2-credit or 3-credit courses in the program. Participants will not write a thesis but the courses are structured in a way that classroom knowledge is directly used in subsequent laboratory classes and projects.

- Post-Bachelor's Certificate in Applied Carbonate Geology (<http://www.rsmas.miami.edu/assets/CertificateProgramFlyer-2017.pdf>)

Master of Science (M.S.) Programs

- M.S. in Marine Geosciences (MGS) (p. 1169)

Doctor of Philosophy (Ph.D.) Programs

- Ph.D. in Marine Geosciences (MGS) (p. 1170)

M.S. in Marine Geosciences Program Requirements

Code	Title	Credit Hours
The MGS M.S. degree requires 30 total credits. ¹		
Course Requirements ²		6
All MGS students must complete any two (2) courses in the MGS 610 Series:		
MGS 611	Earth Surface Processes	
MGS 613	Introductory Geochemistry *	
MGS 614	Geophysics	
Electives		18
Thesis Research		6
MGS 810	Master's Thesis	
Additional Requirements		
RSM 700	Research Ethics	
Comprehensive Examination ³		
MGS Seminar (MGS 701) ⁴		
Geotopics Lecture Series ⁵		
Total Credit Hours		30

¹ Minimum of 24 course credits and 6 thesis credits.

²

- The intent of these course requirements is to ensure preparation across the range of subfields within MGS. These requirements may be waived by permission of the MGS Program Academic Committee.
- If a student does not follow the above requirements and performs poorly in one of these subfields on the comprehensive exam, it may trigger a requirement to enroll in the respective course as a condition for further advancement in the MGS program.

* MGS 771 may substitute MGS 613.

- ³
- All students enrolled in the MGS academic program are required to take a comprehensive examination by the end of their third semester of graduate studies at RSMAS.
 - The purpose of the comprehensive examination is to evaluate the student's understanding of fundamental principles, reasoning skills, and to determine if any basic deficiencies are present in the student's background after two semesters of classes.
 - The examination will consist of a written part, which usually lasts about 6-8 hours, and an oral part, which lasts about 1 hour. The results of the written portion of the exam and performance of the oral exam determine the grade given by the examining board.
 - For the M.S. degree candidate, possible grades include **PASS** or **FAIL**.
 - A grade of **FAIL** indicates gaps in understanding or knowledge of basic geological, geochemical, or geophysical principles. The student can retake the exam a second time in order to achieve a passing grade. If failure occurs on the second attempt, the student can be dismissed from the MGS program.
 - A grade of **PASS** indicates acceptable comprehension of basic principles and allows the student to complete the M.S. degree. Following completion of the M.S. degree at UM, the student may apply for the Ph.D. program and is not required to retake the comprehensive examination, unless a period of more than four years has elapsed.
- ⁴ All MGS students are required to register for MGS 701 at least once and attend all meetings of the course throughout their tenure in the MGS program. Students are required to give presentations and actively participate in the course.
- ⁵ All MGS students are expected to attend the department weekly seminar Geotopics. The diverse lecture series presents recent and ongoing research by RSMAS faculty and visiting scientists. These presentations help provide a broad, well-rounded view of research topics in the earth sciences.

Ph.D. in Marine Geosciences

Program Requirements

Code	Title	Credit Hours
The MGS Ph.D. degree requires 60 total credits. ¹		
Course Requirements ²		6
All MGS students must complete any two (2) courses in the MGS 610 Series:		
MGS 611	Earth Surface Processes	
MGS 613	Introductory Geochemistry [*]	
MGS 614	Geophysics	
Electives		24
Dissertation Research		30
MGS 830	Doctoral Dissertation	
Required Examinations		
Comprehensive Examination ³		
Qualifying Examination ⁴		
Additional Requirements		
RSM 700	Research Ethics	
MGS Seminar (MGS 701) ⁵		
Geotopics Lecture Series ⁶		
Educational Training Program (TA) ⁷		
RSM 771	Educational Training 1	
RSM 772	Educational Training 2	
RSM 773	Educational Training 3	
Total Credit Hours		60

¹ Minimum of 30 course credits and 12 dissertation credits.

²

- The intent of these course requirements is to ensure preparation across the range of subfields within MGS. These requirements may be waived by permission of the MGS Program Academic Committee.
- If a student does not follow the above requirements and performs poorly in one of these subfields on the comprehensive exam, it may trigger a requirement to enroll in the respective course as a condition for further advancement in the MGS program.

^{*} MGS 771 may substitute MGS 613.

- 3
- All students enrolled in the MGS academic program are required to take a comprehensive examination by the end of their third semester of graduate studies at RSMAS.
 - The purpose of the comprehensive examination is to evaluate the student's understanding of fundamental principles, reasoning skills, and to determine if any basic deficiencies are present in the student's background after two semesters of classes.
 - The examination will consist of a written part, which usually lasts about 6-8 hours, and an oral part, which lasts about 1 hour. The results of the written portion of the exam and performance of the oral exam determine the grade given by the examining board.
 - For a Ph.D. student, a grade of either **PASS** or **FAIL** is given.
 - A **PASS** indicates that the student may proceed with additional course work, research proposal development, and preparation to take the qualifying examination.
 - Failure of the exam will require the student to retake the exam at a time to be determined by the Exam Committee and the MGS Academic Committee. This retake is usually scheduled no later than the end of the following semester. If failure occurs on the second attempt, the student can be dismissed from the MGS program.
- 4
- The qualifying examination should be taken by the end of the third year. The scheduling of the exam should be discussed with the Committee Chairperson and Dissertation Committee. A completed dissertation proposal demonstrating the ability to formulate and test a hypothesis must be submitted at least two weeks before the exam.
 - The purpose of the exam is to determine knowledge of (a) general principles of geology, geochemistry, and geophysics, (b) knowledge of the student's individual specialty, and (c) peripheral and supporting disciplines.
 - The Dissertation Committee administers a written examination on the subjects outlined above. An oral examination may follow the written exam if necessary to clarify answers, as judged by the Dissertation Committee.
 - Upon satisfactory completion of the qualifying exam, the student enters into candidacy for the Ph.D., provided all other requirements have been met.
 - If the qualifying exam is failed, the student may, at the discretion of the Dissertation Committee, be allowed one opportunity to be re-examined, but in this case no later than the end of the following semester.
 - No "partial passes" of the qualifying exam are allowed.
- 5
- All MGS students are required to register for MGS 701 at least once and attend all meetings of the course throughout their tenure in the MGS program. Students are required to give presentations and actively participate in the course.
- 6
- All MGS students are expected to attend the department weekly seminar Geotopics. The diverse lecture series presents recent and ongoing research by RSMAS faculty and visiting scientists. These presentations help provide a broad, well-rounded view of research topics in the earth sciences.
- 7
- Ph.D. students are expected to be a Teaching Assistant (TA) for two courses while pursuing their degree.
 - The mandatory TA program will include training of new TAs, evaluation of their performance, and recognition of excellence. The goal is to make the experience as valuable as possible for the TA, the faculty, and the students taking our courses.
 - A training session and two teaching opportunities are offered as courses in educational training (RSM 771, RSM 772, RSM 773). Students will be registered accordingly.
 - Specific requirements for TAs are outlined in the RSMAS Student Handbook.

Meteorology and Physical Oceanography

Dept. Code: MPO

The Meteorology and Physical Oceanography (MPO) graduate program was founded on the premise that oceanic and atmospheric dynamics are governed by a set of similar physical principles, and that much insight can be gained by studying their dynamics from a common perspective.

The MPO program requires students to develop expertise in both systems, and prepares students to conduct leading-edge research using a complementary set of theoretical, observational, and modeling approaches.

The MPO curriculum forms a strong foundation for research on a broad spectrum of topics that include air-sea interaction, the global thermohaline circulation, tropical cyclones, El Niño, the Madden-Julian Oscillations, and the evolution of the Earth's climate.

Degree Programs

- Master of Science (M.S.) (p. 1172)
 - Requires 30 credit hours, including 24 course credit hours and 6 research credit hours.
- Doctor of Philosophy (Ph.D.)
 - Requires 60 credit hours, including a minimum of 30 course credit hours and a minimum of 12 research credit hours.

Research Areas

The MPO program has a strong foundation in several areas in atmospheric and ocean sciences, including those presented below. Research is conducted using a variety of techniques from direct observation to theoretical and numerical modeling. Students come from a diverse range of educational backgrounds, including marine science, meteorology, physics, mathematics, and engineering.

Climate Variability and Change

Research covers a wide range of topics, both global and regional. We study climate variations on time scales from sub-seasonal to interannual to decadal, as well as ancient (paleo) climates and future climate changes. Efforts include analysis of satellite data, field observations and global data products, and a large focus on numerical climate modeling.

Large-Scale Ocean Circulation

Research covers a variety of topics, highlighting the ocean's role in climate, including dynamics and variability of boundary currents, meridional overturning and tropical circulations, as well interaction between large-scale, mesoscale and submesoscale circulations. Particular strengths include experimental oceanography, numerical modeling with a variety of comprehensive and conceptual models, data analysis and assimilation, and theoretical studies.

Tropical Dynamics

The tropics have global impacts, from weather effects and hurricanes to El Niño and other climate variations. Research involves the myriad interactions of water vapor and clouds with air and wind and the underlying tropical oceans and landscapes.

Hurricanes

RSMAS/MPO is ideally situated for the study of hurricanes through its location in Miami and its proximity to the NOAA Hurricane Research Division and National Hurricane Center. The research includes high-resolution coupled atmosphere-wave-ocean modeling, hurricane dynamics, and novel adaptive observing and data assimilation methods.

Regional and Coastal Oceanography

Studies focus on key processes in coastal and shelf areas, with special interest in regional seas around South Florida, the Gulf of Mexico and the Caribbean. Particular projects address events following the Deepwater Horizon oil spill, air-sea interaction associated with hurricanes, shelf dynamics, mixing, submesoscale variability, biological-physical interactions in ecosystems, coral reef studies and the Everglades Restoration. The research involves high-resolution numerical modeling, experimental studies and data assimilation.

Clouds, Aerosol, Precipitation, and Radiation Interactions (CAPRI)

The cloud microphysical processes important to the global energy balance occur at spatial and time scales of seconds and meters. MPO studies such processes with aircraft and surface-based remote sensing, in situ field measurements, and large-eddy simulations, and reconciles them with analyses done at the larger scales of satellites and regional climate models.

Satellite Remote Sensing

RSMAS hosts a real-time satellite reception and analysis facility. MPO is involved with retrieval algorithm development, validation and analysis of sea surface temperature, ocean color, sea surface topography and surface winds. These are analyzed in the context of climate research.

Master of Science (M.S.) Programs

- M.S. in Meteorology and Physical Oceanography (MPO) (p. 1172)

Doctor of Philosophy (Ph.D.) Programs

- Ph.D. in Meteorology and Physical Oceanography (MPO) (p. 1173)

M.S. in Meteorology and Physical Oceanography

Program Requirements

The applicable requirements will be those in effect during that academic year when the student first registered in the Program, unless stated otherwise in Handbook or by the Program Director.

All RSMAS courses are listed on the GSO website. All courses taken by students should be approved by their advisors. Students are recommended to consult with their advisors and the MPO Program Director regarding their choices of courses. Deviations from the requirements must be approved by the advisor and the MPO Academic Committee.

Code	Title	Credit Hours
The MPO M.S. degree requires 30 total credits. ¹		
Core Courses		12
All MPO M.S. students are required to take the following courses:		
MPO 603	Physical Oceanography	
MPO 611	Geophysical Fluid Dynamics I	
MPO 651	Introduction to Atmospheric Science	

MPO 712 or MPO 765	Large Scale Ocean Circulation: Models and Observations General Circulation of the Atmosphere	
Electives ²		12
Thesis Research		6
MPO 810	Master's Thesis	
Additional Requirements		
RSM 700	Research Ethics	
Comprehensive Examination ³		
MPO Seminar ⁴		
Total Credit Hours		30

¹ Minimum of 24 course credits and 6 thesis credits.

- ²
- The remaining course credits can be obtained by taking other graduate courses offered by MPO, RSMAS, or UM.
 - MPO M.S. candidates are not required to take a class outside MPO.

- ³
- Material from the required core courses will appear on the Comprehensive Examination (along with material from other courses from the first year).
 - Grade of **Master's Pass**, **Pass** or **High Pass** needed to fulfill requirement.
 - All M.S. and Ph.D. students are required to take the Comprehensive Examination. For full-time students, the Comprehensive Examination should be before the end of their first year of graduate studies at RSMAS. This examination will be arranged by a Comprehensive Examination Committee which comprises the MPO Graduate Program Director and the instructors (or their assignees) of the first year courses taken by the students.
 - The purpose of this examination is to evaluate students' understanding of materials in the courses completed up to the time of the examination and their capability of integrating these materials, and to determine whether the students are permitted to proceed to the M.S. or Ph.D. program.
 - The Comprehensive Examination will consist of an oral part and a written part.
 - The written part, which lasts no longer than 8 hours, consists of closed-book questions in the courses taken in the first year by each individual student. Each student must choose to answer four questions; at least one of the questions from GFD I and II must be answered.
 - The oral part, which lasts no longer than 2 hours for each student, may include questions from all the courses taken by the student.
 - The GPA comprises 20% of the Comprehensive Exam grade, and the written and oral parts of the Comprehensive Exams comprise 40% each.
 - A student's performance in this examination, together with his/her cumulative grade point average, will determine whether the grade of **High Pass**, **Pass**, **Master's Pass** or **Fail** is given by the Comprehensive Exam Committee. The examining board consists of faculty whose questions are answered by the student and any other RSMAS faculty who wish to participate.
 - **High Pass:** for students with no identifiable relevant weaknesses.
 - **Pass:** Students and advisors will receive feedback from the Comprehensive Exam committee on the strengths and weaknesses of the student, and possible recommendations of how to address those. This information can be used to help plan the next steps in the student's academic career.
 - *NOTE: This is a new category where a student is NOT required to defend a Master's thesis as was the case previously, but the student and advisor may of course still decide that a Masters in the appropriate next step.*
 - **Master's Pass:** Students with this result will be required to defend a Master's thesis before considering whether to pursue a Ph.D. Students and advisors will receive feedback from the Comprehensive Exam committee on the strengths and weaknesses of the student, and possible recommendations of how to address those.
 - **Fail:** Students with this result will have an opportunity to re-take the exam once.

- ⁴
- Attendance to the MPO seminars is required every semester.
 - MPO M.S. students must give at least one 15- minute presentation each year after the Comprehensive Examination.

Ph.D. in Meteorology and Physical Oceanography

Program Requirements

The applicable requirements will be those in effect during that academic year when the student first registered in the Program, unless stated otherwise in Handbook or by the Program Director.

All RSMAS courses are listed on the GSO website. All courses taken by students should be approved by their advisors. Students are recommended to consult with their advisors and the MPO Program Director regarding their choices of courses. Deviations from the requirements must be approved by the advisor and the MPO Academic Committee.

Code	Title	Credit Hours
The MPO Ph.D. degree requires 60 total credits. ¹		
Core Courses		15
All MPO Ph.D. students are required to take the following courses:		
MPO 603	Physical Oceanography	
MPO 611	Geophysical Fluid Dynamics I	
MPO 651	Introduction to Atmospheric Science	

MPO 711	Geophysical Fluid Dynamics II	
MPO 712 or MPO 765	Large Scale Ocean Circulation: Models and Observations General Circulation of the Atmosphere	
Electives ²		15
Dissertation Research		30
MPO 830	Doctoral Dissertation	
Required Examinations		
Comprehensive Examination ³		
Qualifying Examination ⁴		
Additional Requirements		
RSM 700	Research Ethics	
MPO Seminar ⁵		
Educational Training Program (TA) ⁶		
RSM 771	Educational Training 1	
RSM 772	Educational Training 2	
RSM 773	Educational Training 3	
Total Credit Hours		60

- ¹
- Minimum of 30 course credits and 12 dissertation credits.
 - Minimum 9 course credits should be taken from 700 level courses.
 - The credit transfer and waiver of required courses should be done during the first year of graduate study at RSMAS with approval from the graduate advisor and the MPO Academic Committee.
- ²
- The remaining course credits can be obtained by taking other graduate courses offered by MPO, RSMAS, or UM.
 - MPO Ph.D. students are required to take at least one 3-credit course outside the MPO program, unless they have arrived with an M.S. degree from another institution.
 - Courses with the 'RSM' designation count as an outside course.
- ³
- Material from the required core courses will appear on the Comprehensive Examination (along with material from other courses from the first year).
 - Grade of **Pass** or **High Pass** needed to fulfill requirement.
 - All M.S. and Ph.D. students are required to take the Comprehensive Examination. For full-time students, the Comprehensive Examination should be before the end of their first year of graduate studies at RSMAS. This examination will be arranged by a Comprehensive Examination Committee which comprises the MPO Graduate Program Director and the instructors (or their assignees) of the first year courses taken by the students.
 - The purpose of this examination is to evaluate students' understanding of materials in the courses completed up to the time of the examination and their capability of integrating these materials, and to determine whether the students are permitted to proceed to the M.S. or Ph.D. program.
 - The Comprehensive Examination will consist of an oral part and a written part.
 - The written part, which lasts no longer than 8 hours, consists of closed-book questions in the courses taken in the first year by each individual student. Each student must choose to answer four questions; at least one of the questions from GFD I and II must be answered.
 - The oral part, which lasts no longer than 2 hours for each student, may include questions from all the courses taken by the student.
 - The GPA comprises 20% of the Comprehensive Exam grade, and the written and oral parts of the Comprehensive Exams comprise 40% each.
 - A student's performance in this examination, together with his/her cumulative grade point average, will determine whether the grade of **High Pass**, **Pass**, **Master's Pass** or **Fail** is given by the Comprehensive Exam Committee. The examining board consists of faculty whose questions are answered by the student and any other RSMAS faculty who wish to participate.
 - **High Pass:** for students with no identifiable relevant weaknesses.
 - **Pass:** Students and advisors will receive feedback from the Comprehensive Exam committee on the strengths and weaknesses of the student, and possible recommendations of how to address those. This information can be used to help plan the next steps in the student's academic career.
 - *NOTE: This is a new category where a student is NOT required to defend a Master's thesis as was the case previously, but the student and advisor may of course still decide that a Masters in the appropriate next step.*
 - **Master's Pass:** Students with this result will be required to defend a Master's thesis before considering whether to pursue a Ph.D. Students and advisors will receive feedback from the Comprehensive Exam committee on the strengths and weaknesses of the student, and possible recommendations of how to address those.
 - **Fail:** Students with this result will have an opportunity to re-take the exam once.

- 4
- These guidelines complement those given in the UM Graduate Student Handbook.
 - All students are expected to take the Qualifying Exam and Proposal Defense by the end of their third year in the program. If the student needs to take the Exam in their fourth year, s/he will need to write a petition to the MPO Academic Committee with an explanation. A second extension after the end of the fourth year will not be permitted, unless there are exceptional circumstances.
 - While the exact format is left to the discretion of the Ph.D. Committee, a typical Oral Qualifying Exam comprises an hour of questions from the written Qualifying Exam and other related questions, and a second hour in which the student presents their Dissertation Proposal. It is recommended that the presentation emphasizes future work and is not a review of previous results, which are in the written Proposal.
 - Expectations of the Qualifying Exam
1. **Written Exam:** Written answers judged by each Committee member to demonstrate that the student has the ability to understand and investigate the concept asked in the question. The questions are usually related to the research described in the dissertation proposal.
 2. **Oral Exam:** Demonstration of oral communication skills in responding satisfactorily to questions raised by the Committee in relation to the written questions, and any other questions asked by the Committee members.
 3. **Dissertation Proposal:** Written by the student in clear English befitting the standard of writing in a peer-reviewed journal. The proposal should demonstrate the capability of the student to produce and present research that is of the quality suitable for a journal Article. Emphasis needs to be placed on the proposed research: the questions and hypotheses to be tested, the data and methodology used to test the hypotheses, and some anticipated results (which may or may not be realized). A student is encouraged to discuss the proposal with the advisor, but the writing must be his/her own.
- 5
- Attendance to the MPO seminars is required every semester.
 - MPO Ph.D. students must give at least one 15- minute presentation each year after completing the Comprehensive Exam, and a one-hour presentation after advancing to Ph.D. candidacy, and at least 6 months before the dissertation defense.
- 6
- Ph.D. students are expected to be a Teaching Assistant (TA) for two courses while pursuing their degree.
 - The mandatory TA program will include training of new TAs, evaluation of their performance, and recognition of excellence. The goal is to make the experience as valuable as possible for the TA, the faculty, and the students taking our courses.
 - A training session and two teaching opportunities are offered as courses in educational training (RSM 771, RSM 772, RSM 773). Students will be registered accordingly.
 - Specific requirements for TAs are outlined in the RSMAS Student Handbook.

Ocean Sciences

Dept. Code: OCE

The mission of the Ocean Sciences (OCE) graduate program is to provide our students with specialized knowledge in important ocean science sub-disciplines as well as a broad understanding of the ocean as a key component of the Earth System. Our students advance the understanding of physical, chemical, and biological processes in the ocean and their interactions. Students learn first-hand about instrumentation and methods to measure the ocean using both in-situ and space-based sensors, and about laboratory, analytical, and numerical models to understand oceanic processes. Our graduates develop into international leaders of ocean research, into teachers and communicators of ocean sciences, and into leaders and advisors of marine education, policy, and conservation.

OCE offers opportunities for students to participate in research cruises and join field campaigns aboard our Research Vessel Walton Smith and aboard other vessels around the world, to perform experiments in our state-of-the-art wind-wave-storm surge simulator (SUSTAIN), and to run ocean and climate model simulations using our supercomputer facility. The OCE faculty excels in a wide range of topics including ocean circulation and climate, ocean carbon cycle, air-sea interaction, remote sensing, and marine ecosystem dynamics.

Degree Programs

- Master of Professional Science (M.P.S.) (p. 1176)
 - Requires 30 credit hours, including 24 course credit hours and 6 internship credit hours.
- Master of Science (M.S.) (p. 1176)
 - Requires 30 credit hours, including 24 course credit hours and 6 research credit hours.
- Doctor of Philosophy (Ph.D.) (p. 1176)
 - Requires 60 credit hours, including a minimum of 27 course credit hours and a minimum of 12 research credit hours.

Research Areas

When admitted to the OCE graduate program, students will choose a research concentration based on their research interests.

Ocean Dynamics

This concentration covers the study of how the ocean moves on all scales, from turbulence and eddies to ocean gyres and the global thermohaline circulation, and how these motions impact and interact with Earth's climate. Scientists in OCE approach studies of Ocean Dynamics through sea-going experimentation and data analysis, development of conceptual modeling tools, data assimilation, numerical simulations, ocean prediction, and forecasting. Research topics include the dynamics and variability of boundary currents like the Gulf Stream,

basin-wide meridional overturning and heat transport, mesoscale and submesoscale dynamics and stirring, turbulence, water mass formation and ventilation, oil spills, and coastal and continental shelf processes.

Marine Biogeochemistry

Studies in this concentration focus on the physical, chemical, biological, and geological processes controlling the oceanic cycling of carbon, macronutrients (nitrogen, phosphorus, and silicon), and trace elements (e.g., iron). We conduct our work throughout the global ocean using advanced analytical and modeling techniques to assess the dynamics of these elements. Research topics include ocean acidification, nutrient limitation of productivity, global distributions of biogeochemical variables, tracers for time scales of water mass formation and circulation, air-sea exchange of materials, carbon fluxes, microbial processes, and speciation, distribution, and isotopic ratio of dissolved trace metals.

Air-Sea Interaction & Remote Sensing

The focus of this concentration is on sub-millimeter to mesoscale processes at and across the air-sea interface, from the oceanic thermocline to the atmospheric boundary layer. Research topics include surface fluxes and turbulent mixing events, wind-wave-current interactions, hurricane intensity changes, storm surge predictions, coupled tropical dynamics, underwater acoustics, internal and surface gravity waves, and coastal processes. OCE faculty, research staff, and students approach these studies using our unique wind-wave laboratory (SUSTAIN) and satellite-data facilities (CSTARS), and through field experimentation using ship-, buoy-, land-, and aircraft-based instrumentation. Coupled ocean-atmosphere modeling studies provide a framework to understand these observations, where one of the foci is tropical weather and hurricanes. Many of our research efforts have societal relevance in areas such as severe weather and wave forecasting, disaster monitoring and mitigation response, climate change, renewable energy developments, marine transportation and ship tracking, search and rescue, and pollutant dispersion.

Biophysical Interactions

This concentration addresses the study of ocean productivity, the distribution, transport, and behavior of planktonic organisms, and their complex interactions with higher trophic levels. Researchers in OCE take a multi-prong approach, coupling the development of biophysical models with experimental field and laboratory work. OCE scientists develop new techniques and instrumentation to observe and model planktonic organism behavior and their responses to environmental signals. Research topics include the study of harmful algal blooms, plankton distribution and patchiness, trophic interactions, larval dispersal and population connectivity, biological control of physical constraints, microbial dynamics, bioacoustics, and animal navigation.

Master of Professional Science (M.P.S.) Programs

There are two OCE tracks for the M.P.S. degree:

- M.P.S. in Applied Remote Sensing (ARS) (p. 1176)
- M.P.S. in Natural Hazards and Catastrophes (NHC) (p. 1177)

Master of Science (M.S.) Programs

- M.S. in Ocean Sciences (OCE) (p. 1179)

Doctor of Philosophy (Ph.D.) Programs

- Ph.D. in in Ocean Sciences (OCE) (p. 1182)

M.P.S. in Applied Remote Sensing

Applied Remote Sensing (ARS)

The MPS in "Applied Remote Sensing" (<http://mps.rsmas.miami.edu/degree-program/applied-remote-sensing>) offered by the University of Miami's Rosenstiel School of Marine and Atmospheric Science (RSMAS) and Center for Southeastern Tropical Advanced Remote Sensing (CSTARS) is tailored to the needs of students who seek to gain theoretical knowledge and practical, real-world experiences geared towards a successful career in the field of remote sensing in both public and private sectors. This program is also appropriate for those already in the workforce who require additional training or are looking to expand upon their knowledge and skills.

Course	Title	Credit Hours
Year One		
Fall		
OCE 642	Physics of Remote Sensing I - Passive Systems	3
OCE 686	Applied Remote Sensing	3
RSM 612	Statistics for Environmental Management (Or Elective)	3
MGS 686	Special Topics (Natural Hazards: Solid Earth & Oceans (Or Elective)	3
	Credit Hours	12

Spring		
OCE 643	Physics of Remote Sensing II - Active Systems	3
OCE 624	Applied Data Analysis (Or Elective)	3
MES 660 & MES 661	Introduction to Marine Geographic Information Systems and Introduction to Marine Geographic Information Systems - Laboratory (Can be taken in Fall or Spring) Or Elective	3
OCE 687	Applied Radar Remote Sensing	3
	Credit Hours	12
Summer		
OCE 805	MPS Internship	6
	Credit Hours	6
	Total Credit Hours	30

Elective Options

Students may take any elective on the RSMAS campus with the consent of their faculty advisor. Below are a few examples of courses past students in this program used as electives.

Code	Title	Credit Hours
ATM 731	Air-Sea Interaction	3
OCE 705	Chemical Oceanography	3
MES 720	Coastal Law and Policy	3
MES 602	Economics of Natural Resources	3
MES 620	Environmental Law	3
MES 610	Environmental Planning and the Environmental Impact Statement	3
ATM 651	Introduction to Atmospheric Science	3
MES 616	Ocean Policy and Development and Analysis	3
MES 630	Port Operations and Policy	3
OCE 603	Physical Oceanography	3
MBE 615	Tropical Marine Ecology	3
MES 677	Management and Conservation of Marine Ecosystems	3
ATM 662	Advanced Weather Forecasting	3
OCE 651	Applied Ocean Acoustics and Marine Mammals (Applied Ocean Acoustics and Marine Mammals)	3
OCE 676	Wave Propagation in the Ocean Environment	3
OCE 790	Mechanics and Thermodynamics of the Air-Sea Interface	3
MES 633	Decision Analysis: Natural Hazards and Catastrophes	3
MGS 634	Hydrological Hazards	3
OCE 637	Natural Hazards: Atmosphere and Ocean	3

M.P.S. in Natural Hazards and Catastrophes

Natural Hazards and Catastrophes (NHC (<http://mps.rsmas.miami.edu/natural-hazard-and-catastrophes>))

The University of Miami's Rosenstiel School of Marine and Atmospheric Science conducts world-class research on the earth systems responsible for these disasters, including the atmosphere, the ocean and solid earth. To meet society's need for a skilled workforce, the Natural Hazards and Catastrophes program (<http://mps.rsmas.miami.edu/natural-hazard-and-catastrophes>) offers an educational opportunity for students seeking to fill positions offered by the private and civil sectors to assess risks and exposures associated with natural hazards. The goal is to provide students with the skills and knowledge necessary to understand earth system natural hazards (atmospheric, oceanic, geological and hydrological) and the data analytics tools required to assess the associated risks (e.g. statistics, data management, programming, GIS, and remote sensing).

Course	Title	Credit Hours
Year One		
Fall		
RSM 612 or MES 608	Statistics for Environmental Management or Biometrics in Marine Science	3
MES 620	Environmental Law (or ELECTIVE)	3
MES 633	Decision Analysis: Natural Hazards and Catastrophes	3
MGS 635	Geological Hazards	3
	Credit Hours	12
Spring		
OCE 637	Natural Hazards: Atmosphere and Ocean	3
MGS 634	Hydrological Hazards	3
MES 660 & MES 661	Introduction to Marine Geographic Information Systems and Introduction to Marine Geographic Information Systems - Laboratory (Can be taken in Fall or Spring)	3
RSM 613	Statistical Modeling of Extreme and Rare Events (or ELECTIVE)	3
	Credit Hours	12
Summer		
OCE 805	MPS Internship	6
	Credit Hours	6
	Total Credit Hours	30

Elective Options

Students may take any elective on the RSMAS campus with the consent of their faculty advisor. Below are a few examples of courses past students in this program used as electives.

Code	Title	Credit Hours
OCE 676	Wave Propagation in the Ocean Environment	3
ATM 765	General Circulation of the Atmosphere	3
OCE 661	Tropical Atmosphere and Ocean	3
ATM 731	Air-Sea Interaction	3
MES 720	Coastal Law and Policy	3
MES 618	Coastal Zone Management	3
MES 620	Environmental Law	3
MES 610	Environmental Planning and the Environmental Impact Statement	3
MGS 614	Geophysics	3
EPH 612	Global Health	3
EPH 600	Introduction to Public Health	3
ATM 651	Introduction to Atmospheric Science	3
MES 630	Port Operations and Policy	3
OCE 642	Physics of Remote Sensing I - Passive Systems	3
OCE 643	Physics of Remote Sensing II - Active Systems	3
MGS 679	Plate Tectonics	3
MSC 321	Scientific Programming in the Atmospheric Sciences	3
CAE 660	Sustainable Construction	3
EPH 640	Urban Environment and Public Health	3
CAE 630	Water Resources Engineering II	3
OCE 721	Waves and Tides I	3
OCE 624	Applied Data Analysis	3

M.S. in Ocean Sciences

Program Requirements

The applicable requirements will be those in effect during that academic year when the student first registered in the Program, unless stated otherwise in Handbook or by the Program Director.

All RSMAS courses are listed on the GSO website. All courses taken by students should be approved by their advisors. Students are recommended to consult with their advisors and the OCE Program Director regarding their choices of courses. Deviations from the requirements must be approved by the advisor and the OCE Academic Committee.

OCE students follow one of four academic tracks: **Ocean Dynamics**, **Air-Sea Interaction and Remote Sensing**, **Marine Biogeochemistry**, or **Biophysical Interactions**.

Ocean Dynamics Track

Code	Title	Credit Hours
The OCE M.S. degree requires 30 total credits. ¹		
Core Courses		6
Choose 2 courses from the following:		
OCE 610	Ocean Biogeochemistry	
OCE 603	Physical Oceanography	
OCE 701	Mathematical Methods in Marine Physics	
Ocean Dynamics Track		6
OCE 611	Geophysical Fluid Dynamics I	
OCE 711	Geophysical Fluid Dynamics II	
Electives ²		12
Thesis Research		6
OCE 810	Master's Thesis	
Additional Requirements		
RSM 700	Research Ethics	
Comprehensive Examination ³		
OCE Seminar ⁴		
Total Credit Hours		30

¹ Minimum of 24 course credits and 6 thesis credits.

²

- The remaining course credits can be obtained by taking other graduate courses offered by OCE, RSMAS, or UM.
- OCE M.S. candidates are not required to take a class outside OCE.

³

- Material from the required core courses will appear on the Comprehensive Examination (along with material from other courses from the first year).
- Grade of **PhD-Pass** or **MS-Pass**.
 - A student receiving a grade of **PhD-Pass** has the option of bypassing the M.S. degree, but may choose to complete the M.S. degree.
- All M.S. and Ph.D. students are required to take the comprehensive examination. For full-time students, the comprehensive examination should be taken before the end of their first full year of graduate studies at RSMAS (beginning in the fall semester). This examination will be arranged by a comprehensive examination committee comprised of the OCE graduate program director and the instructors (or their assignees) of the required courses taken by the students.
- The purpose of this examination is to evaluate students' understanding of materials in the required courses, and their ability to integrate and apply these materials. The outcome of the comprehensive examination determines whether students are permitted to proceed to the M.S. or Ph.D. program.
- The comprehensive examination consists of oral and written components.
 - The written component, which lasts no longer than 8 hours, consists of a combination of open- and closed book questions on the material covered in the required courses taken by each student.
 - The oral component, which lasts no longer than 2 hours for each student, may include questions from all the courses taken by the student.
- Students and advisors will receive feedback from the comprehensive exam committee on the strengths and weaknesses of the student, and possible recommendations on how to address those.
- The outcome of the exam, which is determined by the comprehensive examination committee, is based on the student's performance on this examination, together with consideration of the student's first year academic record. Possible exam outcomes are:
 - PhD-Pass:** Students with this result may bypass the M.S. degree and start working toward earning a Ph.D. If the student chooses to, he/she may complete a M.S. degree before pursuing a Ph.D.
 - MS-Pass:** Students with this result are required to defend a master's thesis and get approval from his/her M.S. thesis committee before pursuing a Ph.D.
 - Fail:** Students with this result will have an opportunity to re-take the exam once.

- 4
- Attendance to the OCE, MPO or AMP seminars is required every semester.
 - In the same seminar series, each student is expected to give at least one 15-minute presentation each year after the student passes the comprehensive examination.

 - The written component, which lasts no longer than 8 hours, consists of a combination of open- and closed book questions on the material covered in the required courses taken by each student.
 - The oral component, which lasts no longer than 2 hours for each student, may include questions from all the courses taken by the student.
 - Students and advisors will receive feedback from the comprehensive exam committee on the strengths and weaknesses of the student, and possible recommendations on how to address those.
 - The outcome of the exam, which is determined by the comprehensive examination committee, is based on the student's performance on this examination, together with consideration of the student's first year academic record. Possible exam outcomes are:
 - **PhD-Pass:** Students with this result may bypass the M.S. degree and start working toward earning a Ph.D. If the student chooses to, he/she may complete a M.S. degree before pursuing a Ph.D.
 - **MS-Pass:** Students with this result are required to defend a master's thesis and get approval from his/her M.S. thesis committee before pursuing a Ph.D.
 - **Fail:** Students with this result will have an opportunity to re-take the exam once.
- ⁴
- Attendance to the OCE, MPO or AMP seminars is required every semester.
 - In the same seminar series, each student is expected to give at least one 15-minute presentation each year after the student passes the comprehensive examination.

Biophysical Interactions Track

Code	Title	Credit Hours
The OCE M.S. degree requires 30 total credits. ¹		
Core Courses		6
Choose 2 courses from the following:		
OCE 610	Ocean Biogeochemistry	
OCE 603	Physical Oceanography	
OCE 701	Mathematical Methods in Marine Physics	
Biophysical Interactions Track		6
MBE 704	Biological Oceanography	
OCE 6XX - Math for Biophysical Interactions		
Electives²		12

Thesis Research	6
OCE 810	Master's Thesis
Additional Requirements	
RSM 700	Research Ethics
Comprehensive Examination ³	
OCE Seminar ⁴	
Total Credit Hours	30

- ¹ Minimum of 24 course credits and 6 thesis credits.
- ²
- The remaining course credits can be obtained by taking other graduate courses offered by OCE, RSMAS, or UM.
 - OCE M.S. candidates are not required to take a class outside OCE.
- ³
- Material from the required core courses will appear on the Comprehensive Examination (along with material from other courses from the first year).
 - Grade of **PhD-Pass** or **MS-Pass**.
 - A student receiving a grade of **PhD-Pass** has the option of bypassing the M.S. degree, but may choose to complete the M.S. degree.
 - All M.S. and Ph.D. students are required to take the comprehensive examination. For full-time students, the comprehensive examination should be taken before the end of their first full year of graduate studies at RSMAS (beginning in the fall semester). This examination will be arranged by a comprehensive examination committee comprised of the OCE graduate program director and the instructors (or their assignees) of the required courses taken by the students.
 - The purpose of this examination is to evaluate students' understanding of materials in the required courses, and their ability to integrate and apply these materials. The outcome of the comprehensive examination determines whether students are permitted to proceed to the M.S. or Ph.D. program.
 - The comprehensive examination consists of oral and written components.
 - The written component, which lasts no longer than 8 hours, consists of a combination of open- and closed book questions on the material covered in the required courses taken by each student.
 - The oral component, which lasts no longer than 2 hours for each student, may include questions from all the courses taken by the student.
 - Students and advisors will receive feedback from the comprehensive exam committee on the strengths and weaknesses of the student, and possible recommendations on how to address those.
 - The outcome of the exam, which is determined by the comprehensive examination committee, is based on the student's performance on this examination, together with consideration of the student's first year academic record. Possible exam outcomes are:
 - **PhD-Pass:** Students with this result may bypass the M.S. degree and start working toward earning a Ph.D. If the student chooses to, he/she may complete a M.S. degree before pursuing a Ph.D.
 - **MS-Pass:** Students with this result are required to defend a master's thesis and get approval from his/her M.S. thesis committee before pursuing a Ph.D.
 - **Fail:** Students with this result will have an opportunity to re-take the exam once.
- ⁴
- Attendance to the OCE, MPO or AMP seminars is required every semester.
 - In the same seminar series, each student is expected to give at least one 15-minute presentation each year after the student passes the comprehensive examination.

Ph.D. in Ocean Sciences

Program Requirements

The applicable requirements will be those in effect during that academic year when the student first registered in the Program, unless stated otherwise in Handbook or by the Program Director.

All RSMAS courses are listed on the GSO website. All courses taken by students should be approved by their advisors. Students are recommended to consult with their advisors and the OCE Program Director regarding their choices of courses. Deviations from the requirements must be approved by the advisor and the OCE Academic Committee.

OCE students follow one of four academic tracks: **Ocean Dynamics**, **Air-Sea Interaction and Remote Sensing**, **Marine Biogeochemistry**, or **Biophysical Interactions**.

Ocean Dynamics Track

Code	Title	Credit Hours
The OCE Ph.D. degree requires 60 total credits. ¹		
Core Courses		6
Choose 2 courses from the following:

Dallas Murphy Writing Workshop or Writing Skills Course (RSM 780)		
RSM 700	Research Ethics	
OCE Seminar ⁵		
Educational Training Program (TA) ⁶		
RSM 771	Educational Training 1	
RSM 772	Educational Training 2	
RSM 773	Educational Training 3	
Total Credit Hours		60

- ¹
- Minimum of 27 course credits and 12 dissertation credits.
 - Minimum of 9 course credits should be taken from 700 level courses.
- ²
- At least one 3-credit course must be taken outside the OCE program, unless the student came to RSMAS with an M.S. degree from another institution.
 - Courses with the 'RSM' designation count as outside courses.
 - The remaining course credits can be obtained by taking other graduate courses offered by OCE, RSMAS, or UM.
- ³
- Material from the required core courses will appear on the Comprehensive Examination (along with material from other courses from the first year).
 - A grade of **PhD-Pass** is required to bypass the M.S. degree and begin working towards the Ph.D.
 - Students earning a grade of **MS-Pass** may pursue a Ph.D. after completing the M.S. degree, subject to approval from their M.S. thesis committee.
 - All M.S. and Ph.D. students are required to take the comprehensive examination. For full-time students, the comprehensive examination should be taken before the end of their first full year of graduate studies at RSMAS (beginning in the fall semester). This examination will be arranged by a comprehensive examination committee comprised of the OCE graduate program director and the instructors (or their assignees) of the required courses taken by the students.
 - The purpose of this examination is to evaluate students' understanding of materials in the required courses, and their ability to integrate and apply these materials. The outcome of the comprehensive examination determines whether students are permitted to proceed to the M.S. or Ph.D. program.
 - The comprehensive examination consists of oral and written components.
 - The written component, which lasts no longer than 8 hours, consists of a combination of open- and closed book questions on the material covered in the required courses taken by each student.
 - The oral component, which lasts no longer than 2 hours for each student, may include questions from all the courses taken by the student.
 - Students and advisors will receive feedback from the comprehensive exam committee on the strengths and weaknesses of the student, and possible recommendations on how to address those.
 - The outcome of the exam, which is determined by the comprehensive examination committee, is based on the student's performance on this examination, together with consideration of the student's first year academic record. Possible exam outcomes are:
 - **PhD-Pass:** Students with this result may bypass the M.S. degree and start working toward earning a Ph.D. If the student chooses to, he/she may complete a M.S. degree before pursuing a Ph.D.
 - **MS-Pass:** Students with this result are required to defend a master's thesis and get approval from his/her M.S. thesis committee before pursuing a Ph.D.
 - **Fail:** Students with this result will have an opportunity to re-take the exam once.
- ⁴
- These guidelines complement those given in the UM Graduate Student Handbook.
 - Ph.D. students are expected to take the qualifying exam and proposal defense by the end of their third full year in the program (beginning in the fall semester). If a student needs to take the exam after that time, he/she will need to provide a written explanation to, and get approval from, the OCE academic committee.
 - While the exact format is left to the discretion of the Ph.D. committee, a typical oral qualifying exam consists of an hour of questions based on the written qualifying exam and other related questions, and a second hour in which the student presents his/her dissertation proposal. It is recommended that the presentation emphasizes future work, rather than a review of previous results, which are in the written proposal.
 - Expectations of the Qualifying Exam
1. **Written Exam.** The student's written answers should be judged by committee members to demonstrate that the student has adequately addressed each question on the exam. The questions are usually related to the research described in the dissertation proposal.
 2. **Oral Exam.** The student should demonstrate the ability to express him/herself clearly while providing satisfactory responses to questions raised by the committee that relate to the written qualifying exam questions, and any other questions asked by the committee members.
 3. **Dissertation Proposal.** The proposal should be written by the student in clear English. The proposal should demonstrate the capability of the student to produce and present research of a quality that, when completed, is suitable for submission to a peer-reviewed journal. Emphasis should be placed on the proposed research: the questions and hypotheses to be tested, the data and methodology used to test the hypotheses, and some anticipated results (which may or may not be realized). A student is encouraged to discuss the proposal with the advisor.

- 5
- Attendance to the OCE, MPO or AMP seminars is required every semester.
 - In the same seminar series, each student is expected to give at least one 15-minute presentation each year after the student passes the comprehensive examination.
- 6
- Ph.D. students are expected to be a Teaching Assistant (TA) for two courses while pursuing their degree.
 - The mandatory TA program will include training of new TAs, evaluation of their performance, and recognition of excellence. The goal is to make the experience as valuable as possible for the TA, the faculty, and the students taking our courses.
 - A training session and two teaching opportunities are offered as courses in educational training (RSM 771, RSM 772, RSM 773). Students will be registered accordingly.
 - Specific requirements for TAs are outlined in the RSMAS Student Handbook.

Medicine

Biochemistry and Molecular Biology

<http://bm.med.miami.edu>

Overview

Biochemistry and Molecular Biology are sciences at the epicenter of modern biomedical research. Understanding basic biochemical pathways is key to gaining new knowledge for the prevention and combating of disease, allowing for the expansion of current boundaries in medicine and science. In addition to medical applications, molecular biology is indispensable for the development of tools implemented for environmental and bionanotechnology problems. The Department of Biochemistry and Molecular Biology (BMB) at the University of Miami is committed to maintaining our discipline as a central science and strives for excellence by sustaining the current areas of strength, fostering interdisciplinary and clinical translational research, and expanding the research portfolio to evolving areas of inquiry and discovery. Our expertise in RNA biology, understanding DNA stability and repair, studying the biophysical nature of biomolecules, and gaining insight into cellular signaling pathways has been recently expanded by the arrival of researchers specialized in the design of natural and semi-synthetic biomolecules, as well as molecular-based devices that can be employed in translational medicine and other bionanotechnology applications. The commitment of the Miller School to increase growth in the basic sciences will continue to provide our department with new and exciting opportunities to enhance our prominence in biomedical research.

A chief mission of our department is to educate future generations of investigators and medical students to become critical thinkers and the leaders in their fields. The diverse composition of our department in regards to research interests creates a unique and intellectually stimulating learning environment for students at the undergraduate, graduate, and postgraduate levels. We offer a host of courses to fulfill the curriculum to obtain a BS in Biochemistry, a MS and a PhD in Biochemistry, as well as the basic science requirements for MD and MD / PhD students. Our courses address the basic principles of biochemistry and molecular biology as well as the emerging science and future of the fields.

The department serves the worldwide scientific community through leadership roles and active participation in national and international conferences, serving in study sections and on federal agency panels. Additionally, our department's faculty roster encompasses editors of journals and members of editorial boards, as well as board members of national and international governmental centers and members of advisory boards of companies in the private sector. Moreover, the Department is committed to serve the community by participating in a variety of outreach events to promote awareness of the importance of science and technology in relation to public health and the environment.

Our department is also unique for hosting the internationally recognized annual Miami Winter Symposium, created by Professor William Whelan, the first leader and Chair of the Department. The Miami Winter Symposium is currently managed by Nature Publishing and features world-renowned speakers in emerging areas of science and technology. This event cements our department's goal of furthering education and discovery in biochemistry and molecular biology on an international level.

eileen.bello@med.miami.edu

Admission Requirements

Applicants to biomedical programs should have a bachelor degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no prerequisite requirements, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged. Applications are generally accepted from September to December for fall entry only. Select applicants will be offered an interview.

Competitive Candidates Will Have the Following:

- Excellent academic record
- Competitive GRE exam scores
- Research experience in a laboratory setting
- Publications of abstract and / or papers
- Co-authorship in a peer-reviewed journal is recommended

- Strong letters of recommendation from research scientists who know the candidate well
- Motivation to pursue state-of-the-art biomedical research

Applicants Must Submit the Following:

- Online Application
- Application Fee
- Official Academic Transcripts
- GRE General Test
- English Proficiency Exam (non-native speakers)
- Statement of Purpose
- Resume / CV

Full application instructions can be found online (<http://biomed.med.miami.edu/apply>).

Doctoral Programs

- Ph.D. in Biochemistry and Molecular Biology (p. 1190)
- Executive Ph.D. in Biochemistry and Molecular Biology (p. 1194)

Ph.D. in Biochemistry and Molecular Biology

Overview

There are three different tracks in which students may enter and progress towards award of the PhD in Biochemistry and Molecular Biology. The first track involves admission through the Program in Biomedical Sciences (PIBS). Alternatively, students may apply and be directly admitted to the PhD program. Finally, the Executive PhD allows students to complete coursework and perform research at their place of work. In all cases, students are assisted in tailoring a program to match his or her interests. In general, students complete courses offered in a variety of formats, e.g., formal lectures, seminars, and workshops. Each BMB graduate program's curriculum is designed to provide broad knowledge in the various aspects of molecular biology and biochemistry in addition to intensive training in certain specialized areas of research according to the student's interests.

Biomedical Sciences

biomed.med.miami.edu

Overview

The University of Miami's Miller School of Medicine is a research powerhouse, achieving international recognition for breakthroughs and advanced knowledge in diabetes, cancer, spinal cord injury, AIDS, marine science, and many other areas. Our centers of excellence are continually ranked among the nation's best, including Bascom Palmer Eye Institute, The Miami Project to Cure Paralysis, and the Diabetes Research Institute. And our new institutes such as Interdisciplinary Stem Cell Institute, Miami Institute for Human Genomics, and the Center for Computational Sciences will further enhance research. The research conducted here continues to enrich the quality of life for people worldwide.

Master of Science in Biomedical Sciences

MiBS is a full-time program that packs a core curriculum in biochemistry, molecular biology, cell biology and physiology, along with several optional courses in three customized tracks – Medicine, Research or Drug Discovery. Our courses are taught by the same faculty that teach our medical and graduate students and will be tailored to meet your needs. In addition, students participate in physician and clinical shadowing or directed research to prepare you for a career in the biomedical sciences.

PhD Programs in Biomedical Sciences

The University of Miami Miller's School of Medicine (UMMSM) provides students a wide variety of research opportunities in the biological sciences across many disciplines and departments.

- Biochemistry & Molecular Biology (<http://biomed.med.miami.edu/graduate-programs/biochemistry-and-molecular-biology>)
- Cancer Biology (<http://biomed.med.miami.edu/graduate-programs/cancer-biology>)
- Human Genetics & Genomics (<http://biomed.med.miami.edu/graduate-programs/human-genetics-and-genomics>)
- Microbiology & Immunology (<http://biomed.med.miami.edu/graduate-programs/microbiology-and-immunology>)
- Molecular & Cellular Pharmacology (<http://biomed.med.miami.edu/graduate-programs/molecular-and-cellular-pharmacology>)
- Molecular Cell & Developmental Biology (<http://biomed.med.miami.edu/graduate-programs/molecular-cell-and-developmental-biology>)
- Neuroscience (<http://biomed.med.miami.edu/graduate-programs/neuroscience>)
- Physiology & Biophysics (<http://biomed.med.miami.edu/graduate-programs/physiology-and-biophysics>)

Masters Program

M.S. in Biomedical Sciences (p. 1197)

Doctoral Program

PhD Program in Biomedical Sciences (p. 1199)

M.S. IN BIOMEDICAL SCIENCES

Overview

Our Master of Science in Biomedical Sciences (MiBS) program is a full-time program that packs a core curriculum in biochemistry, molecular biology, cell biology and physiology, along with several optional courses in three customized tracks – Medicine, Research or Drug Discovery. Our courses are taught by the same faculty that teach our medical and graduate students and will be tailored to meet your needs. In addition, students participate in physician and clinical shadowing or directed research to prepare you for a career in the biomedical sciences.

MiBS prepares recent undergraduates for medical or graduate school or a career in the biomedical industry. Our master's degree is an ideal way to use your gap year to build credentials and experience to propel yourself to any advanced degree. Students will have access to include hands-on faculty advising and mentoring to help you do your best and submit compelling applications. Students can begin our gap year program after their spring graduation and finish in time to start medical or graduate school the following August.

PHD PROGRAM IN BIOMEDICAL SCIENCES

<http://biomed.med.miami.edu/graduate-programs/programs-in-biomedical-sciences-pibs>

Overview

Programs in Biomedical Sciences (PIBS) at the University of Miami Miller's School of Medicine (UMMSM) provides students a wide variety of research opportunities in the biological sciences across many disciplines and departments.

First-year students take a core curriculum that builds a solid foundation in the biomedical sciences. The common coursework in the first semester ranges from molecules to cells to systems of human physiology. Lectures are balanced by breakout sessions, in which faculty members discuss the primary literature with students in small groups. Students have the flexibility to select breakout sessions that match their interests. The core curriculum also offers critical learning opportunities in biostatistics, genomic and analytical tools. In the second semester, students select individual modular courses offered in our eight disciplines. These courses cover topics of specific relevance to graduate programs or research topics. Students also complete a course in Biostatistics and a workshop in Bioinformatics.

PhD Program Selection

During their first year in the umbrella program, students complete three to four laboratory rotations in various disciplines. This opportunity allows students to explore their interests before selecting a program and dissertation mentor. Students match with mentors in specific programs and achieve program affiliation at the end of their first year in one of the following programs (for years two through five):

- Biochemistry & Molecular Biology (<http://biomed.med.miami.edu/graduate-programs/biochemistry-and-molecular-biology>)
- Cancer Biology (<http://biomed.med.miami.edu/graduate-programs/cancer-biology>)
- Human Genetics & Genomics (<http://biomed.med.miami.edu/graduate-programs/human-genetics-and-genomics>)
- Microbiology & Immunology (<http://biomed.med.miami.edu/graduate-programs/microbiology-and-immunology>)
- Molecular & Cellular Pharmacology (<http://biomed.med.miami.edu/graduate-programs/molecular-and-cellular-pharmacology>)
- Molecular Cell & Developmental Biology (<http://biomed.med.miami.edu/graduate-programs/molecular-cell-and-developmental-biology>)
- Neuroscience (<http://biomed.med.miami.edu/graduate-programs/neuroscience>)
- Physiology & Biophysics (<http://biomed.med.miami.edu/graduate-programs/physiology-and-biophysics>)

Program Electives: Select from List Below		
	Credit Hours	6-7
Summer		
PIB 830	Doctoral Dissertation	1
	Credit Hours	1
	Total Credit Hours	20-21

Program Elective Courses

The following program courses are available to first year students in their spring semester. It is generally recommended that students only take courses in the program they wish to enter. This will put students on a timely path to graduation. Your options will be discussed in your spring course advising appointment.

Code	Title	Credit Hours
BMB 714	Molecular Genetics	4
BMB 715	Structural Biology and Applications to Drug Discovery	2
CAB 710	Cancer Biochemistry and Molecular Biology	3
CAB 720	Dialogues with Cancer Clinicians (PIBS Module)	1
HGG 630	Variation and Disease	2
HGG 640	Family Studies and Genetic Analysis	2
MCP 704	Mechanisms of Drug Action	3
MCP 752	Systems Biology and Approaches in Pharmacology	3
MCP 753	Computational Pharmacology and Fundamentals of Drug Design	3
MDB 751	Advanced Cell Biology Approaches to Molecular Medicine	2-3
MDB 752	Current Topics in Mammalian Development	2-3
MDB 753	Histology	1
MIC 623	Mechanisms of Microbial Virulence	2
MIC 728	Principles of Immunology	3
NEU 721	Principles of Membrane Physiology and Biophysics I	2
NEU 722	Principles of Membrane Physiology and Biophysics II	2
PHS 610	Cell Physiology Biophysics	2
PHS 620	Neurophysiology	3
PHS 612	Systemic Physiology	4
PHS 741	Principles of Membrane Physiology and Biophysics I	2
PHS 742	Principles of Membrane Physiology and Biophysics II	2

Biostatistics

Masters Program in Biostatistics

- M.S. in Biostatistics (p. 1201)

Doctoral Program in Biostatistics

- Ph.D. in Biostatistics (p. 1202)

M.S. in Biostatistics

<http://www.biostat.med.miami.edu/academics/ms-in-biostatistics/>

The Master of Science (MS) in Biostatistics is an applied one year program intended for quantitative students seeking training in applied biostatistics. The program emphasizes applications and understanding of statistical concepts rather than theoretical and mathematical principles. The program is meant to be a terminal degree providing students with the necessary background for applying good biostatistical practices in real world settings. Students will gain practical skills that can be applied immediately to a variety of data settings, which includes, but is not limited to, the biological life sciences public health, medical studies, and health services research.

The degree consists of 33 credits covering introductory probability, biostatistics, introductory epidemiology and public health, computing, clinical trials, introductory survival analysis, and introductory mathematical statistics. Enrichment will be provided by a statistical practicum and a seminar course.

Pre-requisites include:

1. Introductory calculus
2. Introductory linear algebra
3. Introductory computing

Curriculum Requirements

Code	Title	Credit Hours
BST 605	Statistical Principles of Clinical Trials	3
BST 610	Introduction to Statistical Collaboration	3
BST 625	Survey of Statistical Computing	3

Ph.D. in Biostatistics

The PhD in Biostatistics, offered through the Division of Biostatistics in the Department of Public Health Sciences at the Miller School of Medicine, provides a flexible curriculum to cover the basics.

Admitted PhD students are expected to take a full suite of courses including several iterations of the seminar course, a consulting practicum (or advanced computing course), and a series of four to six courses that ensure the candidate has studied a subject matter discipline within biomedical research. PhD students are also expected to take high-level courses in statistical theory, survival analysis, and high-dimensional and complex data not generally taken by MS students. A sample program can be found here. (<http://www.biostat.med.miami.edu/academics/phd-in-biostatistics.html>)

PhD students are expected to pass a first-year written diagnostic exam at the end of their first year of study. A second oral and written exam will be administered at the end of the third year.

To obtain detailed program curricula on the PhD in Biostatistics, please contact our offices at the address below or visit our website. (<http://www.biostat.med.miami.edu>)

Cancer Biology

<http://biomed.med.miami.edu/>

Overview

The Sheila and David Fuente Graduate Program in Cancer Biology is a University-wide interdisciplinary training program that involves faculty from the basic science and clinical departments of the University of Miami. The objective of this program is to provide a unique multidisciplinary training environment for highly qualified individuals that will prepare them for independent research and teaching careers. The overall philosophy of the program is to integrate basic and clinical research. The scientific focus is on the biology of cancer and the development of novel diagnostic and therapeutic approaches.

The program emphasizes a multidisciplinary approach which incorporates concepts and state-of-the-art techniques from molecular biology, biochemistry, cell biology, biostatistics, genetics, genomics, immunology, proteomics, structural biology, clinical oncology, and translational research programs at the Sylvester Comprehensive Cancer Center. An important goal of the program is to provide students with a strong background in basic biomedical research coupled with an understanding of clinical aspects of cancer including diagnostic, prognostic, and therapeutic intervention. To achieve this goal, the program utilizes a unique program of study that includes lectures from both basic and clinical researchers. In addition, the program has a two-tier mentoring system in which students receive guidance from both a research mentor and a physician mentor. The research mentor is the dissertation advisor, while the physician mentor will provide the student with a clinical perspective in oncology. Through this dual mentorship, students conduct their doctoral research and obtain clinical knowledge in their area of study. The program aims to instill in students the ability to design multidisciplinary research programs in which scientific research is driven by unmet clinical challenges.

The core course in Cancer Biochemistry and Molecular Biology is a prerequisite for all CAB courses. Other required courses include Tumor Biology, Translational to Clinical Research, Student Seminars, Special Topics in Cancer Research, Dialogues with Cancer Clinicians, and Logic and Reasoning in Translational Cancer Research. (Students can also choose electives in cancer epidemiology, cellular and molecular biology, immunology, pharmacology, and microbiology with permission of the CAB Director. After joining the program and choosing a research mentor, students formulate a proposal and take a qualifying exam. Their subsequent research is guided by an individually tailored dissertation committee, including the research advisor and physician mentor.)

Admission Requirements

Applicants to biomedical programs should have a bachelor degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no prerequisite requirements, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged. Applications are generally accepted from September to December for fall entry only.

Select applicants will be offered an interview.

COMPETITIVE CANDIDATES WILL HAVE THE FOLLOWING:

- Excellent academic record
- Competitive GRE exam scores
- Research experience in a laboratory setting
- Publications of abstract and / or papers
- Co-authorship in a peer-reviewed journal is recommended
- Strong letters of recommendation from research scientists who know the candidate well
- Motivation to pursue state-of-the-art biomedical research

APPLICANTS MUST SUBMIT THE FOLLOWING:

- Online Application
- Application Fee
- Official Academic Transcripts
- GRE General Test
- English Proficiency Exam (non-native speakers)
- Statement of Purpose
- Resume / CV

Full application instructions can be found online (<http://biomed.med.miami.edu/apply>).

	Total Credit Hours	64-66

Students are encouraged to take pertinent elective courses under guidance of their Dissertation Committee and research mentor. Electives must be approved by CAB graduate program director.

- Required course credits: 36 cr. [700 level courses (required or elective)]
- Dissertation research: 24 cr.

Clinical and Translational Investigation

<http://miamictsi.org/education/masters-program>

Overview

The Master of Science in Clinical and Translational Investigation (MSCTI) at the University of Miami offers a structured educational program that trains students in the principles and practice of translational science and clinical research. Our multidisciplinary program has been designed to prepare practitioners and researchers to adapt to translational science and to overcome the perceived bottlenecks that inhibit translational research. We equip our students with the tools to navigate the complexities of translational research design, methodology, regulatory and ethical challenges.

Drawing upon the University of Miami Miller School of Medicine's mission to educate the next generation of medical leaders and to lead life-changing discoveries that transform patient care through innovative research, the Master of Science in Clinical and Translational Investigation (MSCTI)

degree program's mission is to educate the next generation of investigators who demonstrate the ability to review, design, and conduct high-quality, multidisciplinary clinical and translational research independently.

Our educational objective is to provide an instructor-led educational curriculum that introduces students to key areas of clinical and translational research, and to produce graduates who demonstrate core competencies in clinical and translational research. Students will learn how to design independent and collaborative research projects and become well-versed in key aspects of clinical and translational investigation.

Course of Study

The Masters in Clinical and Translational Investigation can typically be completed in 4-6 consecutive terms (Fall, Spring, Summer) depending on the goals and professional responsibilities of the student. The 30 credit-hour program includes completion of structured taught courses and completion of a master's thesis which may take the form of a completed research grant proposal or publishable manuscript. Successful completion of the MSCTI requires students to maintain a GPA of 3.0 or greater with no grade below C in any courses and successful completion of the master's thesis.

Students who intend to complete the MSCTI program part-time must discuss their plan with their employer and make adjustments as needed to attend course lectures. Students who are studying with an F1 visa must enroll in a minimum of nine credits per semester.

Admissions Requirements

Admission Requirements

We accept applications from individuals who meet any of the following criteria:

- Individuals who have completed terminal healthcare degrees (e.g., MD, PhD, DO, RN) who are interested in pursuing additional formal didactic training to become independent investigators in clinical and/or translational science;
- Individuals who have completed terminal scientific degrees (e.g., Ph.D., DSci) who are interested in pursuing additional formal didactic training to improve knowledge and skills related to translation of basic to clinical applications; and
- Individuals who are currently enrolled in a terminal degree program (e.g., MD, PhD) who are interested in adding a year to their program to obtain a MCTSI concurrent with their terminal degree.
- Students who have completed a Bachelor's degree who have outstanding academic credentials and an interest in obtaining a MS prior to a career in clinical translational research or a graduate program will also be eligible.

Detailed information about the application package requirements can be found here (<http://biomed.miami.edu/apply/apply-mscti>).

Dermatology

Overview

The Department of Dermatology and Cutaneous Surgery (<http://dermatology.med.miami.edu/master-of-science-in-skin-biology>) offers a unique Masters of Science in Skin Biology and Dermatological Science (MS-SBDS) program. The program prepares students for careers and leadership in skin science and industry. The curriculum covers basic science and laboratory techniques, as well as management skills, grant & regulatory issues, enterprise issues, and clinical problems.

The Master of Science in Skin Biology and Dermatological Sciences program (MS in SBDS) is unique in its depth and breadth because it covers basic science research and laboratory techniques. In addition, the degree considers a variety of additional skills to help you succeed in industry and academia, for it considers management skills, grant writing, regulatory issues, enterprise formation issues, and clinical problems.

Skin biology includes many biological processes: development, perpetual differentiation and barrier maintenance, stem cell biology, tissue repair and regeneration, neogenesis, native and adapted immunity, and genetic disorders just to name a few. The areas represented in our research base include aging, microbiology, inflammation, immunology, genomics, pharmacology, biochemistry, cell and stem cell biology as well as clinical research using areas of a variety of skin disorders, aging, aesthetics, cancer, and wounds as a clinical touchpoint.

Training in all these aspects is currently not provided by any single program in the United States. Thus, a Master's degree in Skin Biology and Dermatological Sciences will impart a unique skill set and research background. There is a growing need for knowledgeable health care professionals. Health care providers, policy makers, research scientists, academic practices in the US and in the rest of the world, as well as makers of skin and skin care products from devices, drugs and cosmeceuticals and their workers need trained personnel. The coursework in this degree program will offer essential scientific knowledge, management, and administrative skills that will be helpful for individuals desiring a skin sciences oriented career.

Program Options

Master of Science (MSc.) in Skin Biology and Dermatological Sciences (MS in SBDS), offers a Thesis path and Non-Thesis path.

- Thesis Path: The MSc. with thesis path requires completion of a laboratory research project and thesis. This option is tailored for students interested in doing research or contemplating work for a Ph.D. degree or academic career.
- Non-Thesis Path: The MSc. without thesis option is designed for students who wish to improve their knowledge in Skin Biology and related sciences through a rigorous series of courses. The program may fit for people from industries or organizations.

Both thesis and non-thesis options are also helpful for students seeking to apply to medical school or a dermatology residency program.

Human Genetics and Genomics

<http://biomed.med.miami.edu/graduate-programs/human-genetics-and-genomics>

Overview

The Interdepartmental PhD Program in Human Genetics and Genomics is a multi-disciplinary program aimed at training scientists broadly in areas of human genetics and genomics relevant to human health and disease. The emerging practice of “precision medicine,” whereby clinical treatment decisions are based in part on an individual’s genomic profile, depends on “genomic literacy” among practitioners, researchers and patients. Human Genetics and Genomics is a multidisciplinary field that requires training in three core competencies: clinical, molecular, and statistical genetics. Individuals earning PhDs in Human Genetics and Genomics will have various career options, including clinical laboratory (after fellowship training and board certification), research laboratory or computational research in academia, healthcare, and the biotechnology industry.

During the first year PIBS curriculum, students will have the opportunity to take two introductory short courses: Variation & Disease and Family Studies & Genetic Analysis. Rotations through faculty laboratories provide students with hands-on experience in various research areas. The rotations also provide the student the background necessary to select a dissertation advisor and area of research.

During the second year, the curriculum focuses on core coursework in molecular and computational genetics, biostatistics, and seminars and journal clubs.

Also, during the second year, students choose to pursue one of two tracks within the program: molecular genetics or computational genetics. Course requirements differ slightly between these two paths: students in the molecular genetics track will take Advanced Topics in Molecular Genetics while the Computational Genetics track students take Design and Analysis of Human Genomic Studies and a second course in biostatistics.

During the second and third years of study, students formulate and defend a dissertation proposal. All students participate in a 1-credit hour clinical rotation and complete a teaching practicum any time after passing the Qualifying Examination.

Applying to the Program

Admission Requirements

Applicants to biomedical programs should have a bachelor degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no prerequisite requirements, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged. Applications are generally accepted from September to December for fall entry only. Select applicants will be offered an interview.

Competitive candidates will have the following:

- Excellent academic record
- Competitive GRE exam scores
- Research experience in a laboratory setting
- Publications of abstracts and / or papers
- Co-authorship in a peer-reviewed journal is recommended
- Strong letters of recommendation from research scientists who know the candidate well
- Motivation to pursue state-of-the-art biomedical research

Applicants must submit the following:

- Online Application
- Application Fee
- Official Academic Transcripts
- GRE General Test
- English Proficiency Exam (non-native speakers)
- Statement of Purpose
- Resume / CV

HGG 850	Research in Residence	
Total Credit Hours		62-82

¹ HGG 601 is required for all HGG students - 1 semester credit each fall and spring semester.

² All students must complete course requirements for either Computational or Molecular track.

³ HGG 621 / EPH 602: Required for Computational Track students only (may be taken as elective otherwise).

⁴ HGG 650: Required for Molecular Track students only (may be taken as elective otherwise)..

* The molecular track requires a minimum of 62 credits. The computational track requires a minimum of 65 credits.

Program Plan

The PhD in Human Genetics and Genomics (HGG) curriculum allows candidates to pursue a track in *molecular* or *computational* genetics by their second year of training; however, all students complete a core curriculum in the first three years of graduate study. Students will also participate in seminars and journal clubs in the fall and spring semesters, through all years of study.

First-year students interested in Human Genetics and Genomics are strongly encouraged to take two introductory HGG short courses in the spring semester: HGG 630 – Variation and Disease and HGG 640 – Family Studies and Genetic Analysis which are requirements for completing the HGG degree. Courses in computational / quantitative skills, including biostatistics and bioinformatics will also form part of the first year PIBS curriculum. Each PIBS student completes at least three lab rotations of nine weeks each and chooses a dissertation laboratory (and graduate program) during the latter half of the spring semester. If necessary a fourth rotation may be possible, and in this case a laboratory choice may be deferred until June. All first year students will make short presentations to a group of faculty after each lab rotation. For these presentations the students will be divided into four groups with related research interests.

After choosing a mentor and laboratory at the end of the first year, a student becomes a member of the HGG Program. Students select and follow a track in *molecular* genetics or *computational* genetics in the first semester of year 2. At this point course requirements differ slightly between these two paths: Students in the *molecular* genetics track take Advanced Topics in Molecular Genetics (HGG 650) in the second semester, while the *computational* genetics track students take a second course in biostatistics (EPH 602) and a course in Design and Analysis of Human Genomic Studies (HGG 621).

In addition to the required core courses, all students participate in a clinical rotation and serve one semester as a teaching assistant for a core course any time after passing the Qualifying Examination.

It is expected that on average, students will complete the program in five years. Please review the complete course descriptions on the COURSE tab above. The general core curriculum is shown in the Plan of Study below:

Plan of Study - Molecular Track

Course	Title	Credit Hours
Year One		
Fall		
PIB 701	Introduction to Biomedical Sciences	5
PIB 702	Scientific Reasoning	3

PIB 731	Laboratory Research ((1 credit per lab rotation))	2
PIB 700	Journal Club	1
PIB 780	Research Ethics	1
PIB 782	Professional Development: Skills for Success I	1
	Credit Hours	13
Spring		
PIB 700	Journal Club	1
PIB 705	Biostatistics for the Biosciences	3
PIB 731	Laboratory Research	1-2
PIB 783	Professional Development: Skills for Success II	1
HGG 630	Variation and Disease (HGG program short course - Spring I)	2
HGG 640	Family Studies and Genetic Analysis (HGG program short course - Spring II)	2
	Credit Hours	10-11
Summer		
PIB 830	Doctoral Dissertation	1
	Credit Hours	1
Year Two		
Fall		
HGG 601	Seminar/Journal Club	1
HGG 631	Genes in Populations	3
HGG 830	Doctoral Dissertation - Pre-Candidacy	1
	Credit Hours	5
Spring		
HGG 601	Seminar/Journal Club	1
HGG 650	Advanced Topics in Molecular Genetics (Molecular Track Requirement)	3
HGG 660	Bioinformatics Theory and Practice	3
HGG 830	Doctoral Dissertation - Pre-Candidacy	1
	Credit Hours	8
Summer		
HGG 680	Genome Ethics and Public Policy	3
HGG 830	Doctoral Dissertation - Pre-Candidacy	1
	Credit Hours	4
Year Three		
Fall		
HGG 601	Seminar/Journal Club	1
HGG 830	Doctoral Dissertation - Pre-Candidacy	1
	Credit Hours	2
Spring		
HGG 601	Seminar/Journal Club	1
HGG 840	Doctoral Dissertation - Post Candidacy	1
	Credit Hours	2
Summer		
HGG 840	Doctoral Dissertation - Post Candidacy	1
	Credit Hours	1
Year Four		
Fall		
HGG 601	Seminar/Journal Club	1
HGG 681	Human Genetics Clinical Rotation (Can be completed anytime after passing QE and Admission to Candidacy is achieved (Year 3, 4, or 5))	1
HGG 840	Doctoral Dissertation - Post Candidacy	2
	Credit Hours	4

Spring		
HGG 601	Seminar/Journal Club	1
HGG 689	Human Genetics and Genomics Teaching Practicum (Can be completed anytime after passing QE and Admission to Candidacy is achieved (Year 3, 4, or 5))	1
HGG 840	Doctoral Dissertation - Post Candidacy	2
	Credit Hours	4
Summer		
HGG 840	Doctoral Dissertation - Post Candidacy	1
	Credit Hours	1
Year Five		
Fall		
HGG 601	Seminar/Journal Club	1
HGG 840	Doctoral Dissertation - Post Candidacy	2
	Credit Hours	3
Spring		
HGG 601	Seminar/Journal Club	1
HGG 840	Doctoral Dissertation - Post Candidacy	2
HGG 850	Research in Residence (Final Semester)	1
	Credit Hours	4
	Total Credit Hours	62-63

Plan of Study - Computational Track

	Total Credit Hours	65-66

MD Program

General Information

The University of Miami Miller School of Medicine enrolls approximately 198 students each year. One-hundred and fifty will be in the MD program and 48 in the 4-year, combined degree, MD-MPH Program. It has been a long-standing policy of the School of Medicine to admit students with diverse backgrounds. Therefore, qualified non-traditional students, women, socio-economically disadvantaged students, and minorities underrepresented in medicine, are especially encouraged to apply.

U.S. Citizenship

All applicants must be US citizens or permanent residents of the United States with an alien registration receipt (green) card in their possession at the time they complete the AMCAS application. Applicants who apply as permanent residents will be required to submit a photocopy of their alien registration receipt card.

Florida Residents

Since the School of Medicine is no longer subsidized by the State of Florida, Florida residents are not given preference in admissions decisions. For tuition purposes, a Florida resident is one whose parents or guardians (or the applicant, if independent) have established legal residence in, and resided permanently in, the State of Florida for twelve consecutive months immediately prior to the first day of classes. Applicants can not claim Florida residency simply on the fact that they lived in Florida coincident with attending a college or university. To receive initial consideration as a Florida resident, applicants must declare Florida as their state of residence on their AMCAS application. Exceptions to this requirement will not be granted.

Residents of Other States

The Miller School of Medicine has made a significant commitment to enroll more students from outside the state of Florida. This departure from previous policy reflects the growing national prominence of the School of Medicine and the national and international reputation of our clinical facilities and specialty centers, and our outstanding research programs.

Financial Assistance Information

The University of Miami Miller School of Medicine is a private medical school. It has been a priority of the medical school to keep the tuition and fees very reasonable. Please visit our Financial Assistance Website. (<http://mededu.med.miami.edu/contact-us/student-financial-assistance>)

MD/JD Program

The University of Miami School of Law (<http://www.law.miami.edu>) in partnership with the University's Miller School of Medicine propose to offer a joint MD/JD degree program. The law curriculum prepares medical students for careers in health sector law, leadership and policy. It also prepares future physicians for legal aspects of running a private medical practice or heading a group practice.

This joint program allows students to obtain both MD and JD degrees in six years.

The first two years are spent in the MD program. Years three and four are focused on the JD degree and the final two years are spent completing the MD degree and the final JD credits.

In the third year, students will complete the standard first year J.D. curriculum at the School of Law for a total of 32 credits. During the fourth year, it is expected that students will complete a total of 33 credits. There are an additional 12 credits of coursework to be completed in the School of Law which will take the form of summer courses and/or intersession courses. The total number of credits to be completed through coursework at the Law School for the JD degree is 77. The remaining 11 of the 88 required JD credits will be transferred from the Medical School course work and will be double-counted toward both degrees. These credits may include co-listed courses, such as the Idea of a Hospital, an interdisciplinary course co-listed in both the Law School and Medical School (as well as other UM Schools). Students will be able to take co-listed courses and register in the program where the student would like the credits to apply. Of course, co-listed courses are particularly suitable to double-counting for the J.D. degree when taken as a Medical School course.

The Law School expects the list of recommended courses to expand in the future. Opportunities for practicums and externships will be developed as part of this program. Students will receive their J.D. degree during the May graduation of their sixth year of the joint program because some of the credits to be transferred from the School of Medicine will be taken their 6th year when electives are built into the medical school curriculum. An elective course offering which will be required for this joint degree is the Medical Legal Clinic (offered as either a 2-credit or 4-credit course) sponsored by the Law School and offered through the School of Medicine. Students who have completed all but the last five credits may walk at Law School graduation with their law school cohort. (Please note that the 11 credits from the Medical School to be transferred to the J.D. program may not be from any Medical School courses taken prior to matriculation in the Law School.)

MD/MBA Program

The University of Miami Business School (<http://bus.miami.edu>) offers a joint M.D./M.B.A. degree program in partnership with the Miller School of Medicine. The business curriculum prepares future physicians for the business complexities related to running a private medical practice or heading a group practice, as well as prepare medical students for careers in health sector management, leadership and policy.

The M.D./M.B.A. program adds an additional year to the four-year medical school curriculum. The M.B.A. coursework ranges from financial reporting and corporate strategy to the legal aspects of health administration.

MD/MBA candidates have the option of choosing a Research Track (project based which provides practical hands on experience) or an Elective Track (provides business electives). Please refer to the curriculum for details.

Questions about the M.D. portion of the program should be directed to Senior Associate Dean Alex Mechaber, M.D., at the Miller School of Medicine, AMechabe@med.miami.edu (MOConnell@med.miami.edu), while questions about the MBA portion should be directed to Admission Advisors at the Miami Business School, 305-284-2510 or mba@miami.edu.

M.D. students are required to submit a Full-Time (<https://www.applyweb.com/apply/miamibus>)MBA online application to be considered for the M.D./M.B.A. Program.

The application deadline for this program is April 1st of each year.

MD/MPH Program

The educational mission of the University of Miami Miller School of Medicine interdisciplinary MD/MPH dual degree program is to graduate physicians with the ability and desire to improve the health of all populations, especially those most vulnerable and underserved, by alleviating suffering and eliminating healthcare disparities through their leadership in patient care, research, education, health care administration and the community.

Four-Year MD-MPH Program:

The University of Miami Miller School of Medicine (UMMSM) MD/MPH program is unique in several ways. There are very few four-year MD/MPH dual degree programs offered at medical schools in the United States. Our program integrates significant components of the MPH coursework into the curriculum beginning in the first year and culminating in a required four-week clerkship in Public Health in the fourth year. In addition, the medical school has partnered with the Palm Beach County Health Department <http://www.pbchd.com>. This partnership provides opportunities to work with public health professionals in one of the country's most academic and comprehensive public health departments.

The program is designed to provide graduates with the clinical and research skills required to approach health problems from a population and prevention perspective by integrating the roles of the biological sciences and clinical practice into the broader sets of knowledge and practices used in public health. We will graduate physicians who are provided the academic knowledge and skills, as well as the clinical experience to improve the health of all populations, especially those most vulnerable and underserved.

The MD/MPH dual degree program is an educational track at the UMMSM that will provide:

- Both degrees in four years
- Integrated and innovative training in both clinical medicine and public health
- In depth training in public health that provides the skills needed to reduce death and disability at the population level
- Two years of study at the Miami campus followed by two years at our regional medical campus in Palm Beach and Broward Counties working in our community teaching hospitals and clinics and with Department of Health professionals and faculty physicians in community settings
- Sustainable partnerships that provide opportunities to assess and improve public health, working with Public Health physicians in clinical and public health activities during clinical rotations

- Opportunities for community-based research to complete the required special project for the MPH degree (capstone)

MEDICAL SCIENTIST TRAINING PROGRAM (MD/PHD)

<http://mdphd.med.miami.edu/>

Overview

The Miller School of Medicine Medical Science Training Program (MD-PhD Program) provides a unique training environment for exceptionally qualified individuals who want to pursue careers in academic medicine and research. The curriculum comprises the school's outstanding preclinical and clinical training, rigorous PhD graduate training and several elements, including professional development workshops and other activities, specifically designed to enhance the MSTP training experience. There has been a long tradition of research excellence and physician scientist training at the Miller School of Medicine. With the opportunities for basic and clinical research here, Miami's diverse population and access to Latin America and the Caribbean, the backdrop of a vibrant city, make the Miller School a unique place for MSTP training.

PhD Programs

The following doctoral programs, described elsewhere in this bulletin, participate in the MSTP. The MSTP office can provide you with further information about these programs and the research interests of their faculty.

- Biochemistry & Molecular Biology (<http://biomed.med.miami.edu/graduate-programs/biochemistry-and-molecular-biology>)
- Biomedical Engineering (p. 1095)
- Biostatistics (<http://www.biostat.med.miami.edu/academics/phd-in-biostatistics>)
- Cancer Biology (<http://biomed.med.miami.edu/graduate-programs/cancer-biology>)
- Epidemiology (<http://publichealth.med.miami.edu/graduate/academic-programs/phd-in-epidemiology>)
- Human Genetics & Genomics (<http://biomed.med.miami.edu/graduate-programs/human-genetics-and-genomics>)
- Microbiology and Immunology (<http://biomed.med.miami.edu/graduate-programs/microbiology-and-immunology>)
- Molecular Cell & Developmental Biology (<http://biomed.med.miami.edu/graduate-programs/molecular-cell-and-developmental-biology>)
- Molecular and Cellular Pharmacology (<http://biomed.med.miami.edu/graduate-programs/molecular-and-cellular-pharmacology>)
- Neuroscience (<http://biomed.med.miami.edu/graduate-programs/neuroscience>)
- Physiology and Biophysics (<http://biomed.med.miami.edu/graduate-programs/physiology-and-biophysics>)
- Prevention Science & Community Health (<http://publichealth.med.miami.edu/graduate/academic-programs/phd-in-prevention-science>)

Admission Requirements

Admission to the MSTP is highly competitive, and interested applicants are advised to apply early in the fall. AMCAS applications must be received by the Medical Admissions Office no later than December 15. Applicants must complete the minimum course requirements (<http://admissions.med.miami.edu/md-programs/general-md/prerequisites>) of the MD Program to be considered for the MSTP. The Graduate Record Examination (GRE) is not required for matriculation into the MSTP.

Competitive applicants will have the following:

- Completed AMCAS & Secondary Application for MSTP
- Excellent academic record
- Strong MCAT scores
- Significant research experience
- Co-authorship on abstracts and / or peer-reviewed papers is desirable
- Strong letters of recommendation from research mentors and other scientists who can specifically address the applicant's potential as a physician scientist

- Motivation to pursue a career as a physician scientist

Applications from under-represented groups, including minorities, individuals with disabilities and women, are encouraged.

All MSTP applicants are reviewed by both the MD Program Admissions Committee and the MSTP Program Admissions Committee. These evaluations proceed independently, and a student will still be considered for the MD program even after an unfavorable review by the MSTP. A successful applicant is granted admission to both the MD Program and the MSTP.

Full application instructions can be found here (<http://mdphd.med.miami.edu/Admissions>).

- Prevention Science & Community Health (<http://bulletin.miami.edu/graduate-academic-programs/medicine/public-health/prevention-science-community-health-phd/#curriculumtext>)

Suggested Plan of Study

The University of Miami, Miller School of Medicine's MSTP Program is designed to be a 7-8 year path with components that allow for an integrated experience throughout the training period. The program combines training through the well-known medical education offered at the UMMSM and its diverse biomedical doctoral programs. Students are able to select among ten PhD graduate training programs (<http://biomed.miami.edu/graduate-programs/mstp/requirements/biomedical-curriculum>), including traditional basic sciences and interdisciplinary graduate programs, as well as Epidemiology and Biomedical Engineering.

MD/MS in Genomic Medicine

Be a part of the future of genomic and personalized medicine!

This 4-year concurrent master's degree in Genomic Medicine will provide you with the background, knowledge, and understanding to integrate the ever expanding field of genomics into your practice. No matter which medical specialty you choose, genomic medicine is increasingly becoming an integral part of patient care with the use of predictive clinical sequencing, pharmacogenetics, and whole genome analysis.

Educational Mission of the MD/MS Program in Genomic Medicine

The educational mission of the program is to graduate clinicians with the ability to integrate genomic knowledge into their clinical practice. In collaboration with the Hussman Institute for Human Genomics, graduates will be trained in human genetics, family history, diagnostic genomic tests, high throughput sequencing, pharmacogenomics and the newest genomic concepts and approaches. The MD/MS degree will prepare students to be leaders in the adoption and integration of these methods in routine clinical care.

The MD/MS degree program in Genomic Medicine will provide:

- Both degrees obtained during 4 year MD degree
- Integrated and innovative training in both clinical and human genomics
- Online coursework coupled with small group learning sessions for smooth integration into your schedule
- Hands-on experience analyzing and interpreting genome sequence data
- Capstone experience featuring clinical case descriptions, journal club, and individual research projects

Applying for the MD/MS Program in Genomic Medicine: Online application (<http://biomed.med.miami.edu/apply/apply-md-ms-in-genomic-medicine>)

- Applicants must be accepted first-year medical students in the UM Miller School of Medicine. The first block of MS courses begin in the 2nd academic semester (spring) of the first year.
- Applications are due by November 1st of each year.
- The academic prerequisites are the same as those for the regular MD program.
- Graduate Record Exam (GRE) test scores are not required to apply to the program.
- Applicants will be notified of their acceptance status in late November or early December for coursework that will begin in the Spring semester of the first year of medical school.
- Acceptance is contingent upon successful completion of first semester coursework.
- Tuition is equal to UM Miller School of Medicine dual degree tuition.

For additional information (<http://medgen.med.miami.edu/education/msgm>), please contact Dori McLean, Manager of Programs, DMclean@med.miami.edu . (dmclean@med.miami.edu)

Curriculum Requirements

The curriculum below outlines the additional course work required to earn the Master's in Genomic Medicine (MSGM). These courses are completed concurrently with the traditional MD curriculum which is outlined under the MD Program curriculum tab (p. 1218). Please review additional information under the Plan of Study tab (p. 1237)

Code	Title	Credit Hours
GNM 602	Clinical Applications of Genomic Medicine II	3
GNM 605	Research Ethics	1
GNM 610	Clinical Applications of Genomic Medicine I	3
GNM 630	Clinical Applications of Genomic Medicine III	4
GNM 631	Genomic Medicine Laboratory	3
GNM 660	Computational Methods for Genomic Medicine	3
GNM 680	Genomic Ethics and Public Policy	3
GNM 690	MSGM Capstone	6-12
MDR 890	Genetics and Metabolic Diseases (two 2-week rotations are required for a total of 4 credits)	2-4

Plan of Study

The Master's in Genomic Medicine (MSGM) coursework is concurrent with the UM Miller School of Medicine MD Program beginning in Spring semester of the first year and ending upon completion of the MD program in the 4th year. Each course is made up of self-guided online instruction and reading and in-person small group work. In the first two years, self-guided instruction is expected to require approximately 3 hours per week of

time commitment. Small group work is an additional 3-hour block of time per week that will be determined upon the MD program schedule for that semester. Up to 3 additional hours per week may be required for assignments, projects, and review. Years 3 and 4 contain a clinical clerkship elective and the MSGM Capstone that will culminate in a written portfolio and public presentation of the Capstone experience.

MD/MPH Program

The educational mission of the University of Miami Miller School of Medicine interdisciplinary MD/MPH dual degree program is to graduate physicians with the ability and desire to improve the health of all populations, especially those most vulnerable and underserved, by alleviating suffering and eliminating healthcare disparities through their leadership in patient care, research, education, health care administration and the community.

Four-Year MD-MPH Program:

The University of Miami Miller School of Medicine (UMMSM) MD/MPH program is unique in several ways. There are very few four-year MD/MPH dual degree programs offered at medical schools in the United States. Our program integrates significant components of the MPH coursework into the curriculum beginning in the first year and culminating in a required four-week clerkship in Public Health in the fourth year. In addition, the medical school has partnered with the Palm Beach County Health Department <http://www.pbchd.com>. This partnership provides opportunities to work with public health professionals in one of the country's most academic and comprehensive public health departments.

The program is designed to provide graduates with the clinical and research skills required to approach health problems from a population and prevention perspective by integrating the roles of the biological sciences and clinical practice into the broader sets of knowledge and practices used in public health. We will graduate physicians who are provided the academic knowledge and skills, as well as the clinical experience to improve the health of all populations, especially those most vulnerable and underserved.

The MD/MPH dual degree program is an educational track at the UMMSM that will provide:

- Both degrees in four years

- Integrated and innovative training in both clinical medicine and public health
- In depth training in public health that provides the skills needed to reduce death and disability at the population level
- Two years of study at the Miami campus followed by two years at our regional medical campus in Palm Beach and Broward Counties working in our community teaching hospitals and clinics and with Department of Health professionals and faculty physicians in community settings
- Sustainable partnerships that provide opportunities to assess and improve public health, working with Public Health physicians in clinical and public health activities during clinical rotations
- Opportunities for community-based research to complete the required special project for the MPH degree (capstone)

Microbiology and Immunology

<http://biomed.med.miami.edu>

Overview

Microbiology and Immunology is a multidisciplinary program encompassing the areas of cellular and molecular immunology, virology, microbial genetics, and pathogenic bacteriology.

The goals of the department's graduate program are to provide each student with the opportunity to acquire the theoretical background and conceptual framework with the technical research skills necessary to attain a PhD. During the first year of study, a broad educational base in all disciplines together with laboratory rotations introduce students to the diverse array of research topics. Students then choose one area of concentration for their research. The varied interests of the faculty provide numerous opportunities for student participation and a broad choice in dissertation research.

Active research in immunology includes the areas of cytotoxicity, programmed cell death, cytokine receptor signaling, clinical and experimental bone marrow transplantation, stem cell biology, gene therapy for cancer treatment, antigen recognition, cell differentiation and communication, aging of the immune system, interleukins, genetic control of immunoglobulin production, gene activation, and evolution of the immune response. Research in other areas includes molecular biology of virus-host interaction in both animal and human systems, control and regulation of bacterial pathogenesis, selective tumor chemotherapy and radiation therapy, and therapy of parasitic infections.

Goals

The goals of the MIC Graduate Program include training and acquisition of:

- A broad scientific reasoning ability and knowledge base in Microbiology and Immunology
- Technical skills required for experiments in the area of specialization
- Presentation skills required for teaching, scientific talks, manuscripts, and grants
- A preparation for a scientific career in academia, industry, or teaching within 5 ½ years

Contact Information

Enrique Mesri, PhD (EMesri@med.miami.edu), Graduate Program Director
Santos I. Cayetano (s.cayetano@med.miami.edu), Senior Program Coordinator

Office of Graduate and Postdoctoral Studies
Rosenstiel Medical Sciences Building, Suite 1128-A
1600 NW 10th Avenue, M857
Miami, FL 33136
305 243 2478

Admission Requirements

Applicants to biomedical programs should have a bachelor degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no prerequisite requirements, courses in general biology, cell/molecular biology, calculus, general physics, organic

chemistry, physical chemistry, and biochemistry are encouraged. Applications are generally accepted from September to December for fall entry only. Select applicants will be offered an interview.

Competitive Candidates will have the following:

- Excellent academic record
- Competitive GRE exam scores
- Research experience in a laboratory setting
- Publications of abstract and / or papers
- Co-authorship in a peer-reviewed journal is recommended
- Strong letters of recommendation from research scientists who know the candidate well
- Motivation to pursue state-of-the-art biomedical research

Applicants must submit the following:

- Online Application
- Application Fee
- Official Academic Transcripts
- GRE General Test
- English Proficiency Exam (non-native speakers)
- Statement of Purpose
- Resume / CV

Full application instructions can be found here (<http://biomed.med.miami.edu/apply>).

Molecular Cell and Developmental Biology

<http://biomed.med.miami.edu/graduate-programs/molecular-cell-and-developmental-biology>

Overview

The graduate program in Molecular Cell and Developmental Biology offers graduate training towards the PhD degree in the fields of molecular cell biology, cell biology, developmental biology and cancer biology. In order to provide a wide range of current research opportunities, this program is interdisciplinary, comprised primarily of faculty from the department of Cell Biology and includes additional faculty from several other Departments and Centers at the Miller School of Medicine. These include: the Departments of Microbiology & Immunology, Molecular & Cellular Pharmacology, Medicine, Ophthalmology, Urology, Surgery, Neurosurgery and Neurology, the Sylvester Comprehensive Cancer Center, and the Miami Project to Cure Paralysis.

Students have the opportunity to do research in the many areas of modern cell, molecular and developmental biology. Research topics including the cytoskeleton, cell surface molecular biology, stem cells, lens, corneal and retinal biology, protein processing and sorting, signal transduction, airway biology, regulation of gene expression in development, podocyte biology, cancer biology, neuromuscular development, malignant transformation, growth factors, epithelial cell biology, organogenesis and tissue repair, pattern formation in early development, RNA localization, mitochondrial molecular biology and cancer therapeutics.

The primary objective of this interdisciplinary graduate program is to prepare students for careers as independent, PhD level researchers and educators, in both academic institutions and in the biotechnology industry and other venues.

- 1 Throughout the program the students are expected to attend department seminars (Tuesdays at noon), journal club (once a month, Wednesday at noon), and student presentations (once a month, Wednesday at noon).
- 2 may be replaced by any graduate level course in human disease or neuronal cell biology
- 3 The student should be working in the laboratory where he/she intends to do his/her thesis research by the summer, first year. Nearly all of the student's time is spent on original laboratory research – with a minimum total of 24 credit hours of research for graduation.

Plan of Study

The program's Graduate Studies Committee assists each entering student in tailoring a program to match his/her interests. First year students take courses in a core curriculum taught by faculty from the medical basic science departments. Courses are taught not only by formal lectures, but also as seminars and informal discussions. The curriculum is designed to provide broad knowledge in the various aspects of modern cell biology, developmental biology, molecular biology and biochemistry in addition to intensive training in certain specialized areas of research according to the student's interests. In the remaining years of student, nearly all of the student's time is spent on original laboratory research. Students are usually admitted in the Fall semester.

Minimum credit requirements for the PhD degree are set by the University at 36 course credits (including specific required courses) and 24 credit hours of research (for a total of 60 credits). The course credits must be earned in graduate level (600 and above) courses. Students may elect to take any of the graduate courses offered by the MDB program, in addition to the mandatory courses, or choose from a large variety of advanced courses offered by other basic science programs at the University of Miami Miller School of Medicine.

Mandatory courses for the program include Biostatistics (PIB 705), Advanced Cell Biology: Approaches to Molecular Medicine (MDB 751), Current Topics in Mammalian Development (MDB 752), Histology (MDB 753), and *Tumor Biology (MDB 765). The latter may be replaced by any graduate level course in human disease or neuronal cell biology. **These courses are electives for MD/PhD students.*

Throughout the program the students are expected to attend department seminars (Tuesdays at noon), journal club (once a month, Wednesday at noon), and student presentations (once a month, Wednesday at noon).

The student should be working in the laboratory where he/she intends to do his/her thesis research by the summer, first year. At the end of the Fall semester of the second year, students are required to take the Qualifying Exam (QE). The goals of the QE are (1) to assess the scientific proficiency of the student, especially his/her ability to design experiments and to write a competitive grant application; and (2) to aid the student and mentor in the process of obtaining extramural funds to support the student's stipend.

The thesis proposal is expected to be passed during the second year, Summer semester. It is important to note that in the MDB program this is not the Qualifying Exam. Rather, it is a collegial meeting with the thesis committee where the student discusses his/her preliminary data and plans for the thesis. Students normally meet with the committee for progress meetings every 6-9 months.

The thesis is defended in front of the entire program and also in a meeting with the committee. The average time-to-completion is 5.5 years.

Please note that the following is a sample curriculum plan. Current students must discuss their plan with their program coordinator to make adjustments as needed.

Molecular and Cellular Pharmacology

<http://biomed.med.miami.edu/graduate-programs/molecular-and-cellular-pharmacology>

Overview

Scientists in the Molecular and Cellular Pharmacology Program make use of the knowledge and techniques of biology, chemistry and physics to study the action of drugs, hormones and neurotransmitters on living systems and, more generally, the mechanisms through which signals are recognized and transduced by cells.

The goals of the research in this department are:

- to identify new targets and pathways for development of pharmaceuticals
- to use drugs as tools in the study of basic biological processes
- to develop and study agents that may be beneficial in the treatment of disease

A variety of technical approaches is used, including genetics, molecular biology, protein biochemistry and biophysics, fluorescence microscopy, immunology, computer modeling, cell culture, imaging, gene expression profiling, proteomics and whole animal studies including transgenic and genetically engineered mouse models. The faculty are a mixture of senior scientists who are recognized leaders in their respective fields and more junior faculty with recent training in state-of-the-art approaches to important biomedical problems.

Research interests of the faculty include:

Cardiovascular Pharmacology / Signaling / Muscle Contraction

Investigators in this area study transcriptional regulation of gene expression and intracellular signals associated with the growth and function of the heart. They study ion channels, membrane events, blood vessels, etc. Studies of cardiac muscle contraction and the effect of disease causing mutations in the contractile apparatus of the heart on heart performance and morphology are also being pursued.

Current research areas include structure/function relationships in the proteins of the thin (troponin complex) and thick (myosin) filaments in health and disease, the role of specific ion channels in ventricular hypertrophy and its alleviation, excitation-contraction coupling in skeletal and cardiac muscle, proto-oncogene regulation of cardiac-specific genes, signaling in cardiac myocytes including the characterization of multimolecular enzyme complexes, apoptosis during myocardial ischemia, the role of microRNAs in cholesterol biosynthesis and smooth muscle cell plasticity, and the potential of stem cell based therapy for cardiac disease. A new study has been launched to investigate the effect of bone marrow stem cells in cardiac repair.

Neuropharmacology / Neuroscience

Investigators in this area study the development, function, pharmacology, and diseases of the nervous system.

Current research interests include neuronal signaling through G-proteins, Ca²⁺, and cyclic nucleotides, growth and guidance of axons during development and regeneration after injury, molecular control of dendrite development, control of physiological functions by the nervous system; molecular mechanisms and cell biology of olfaction and phototransduction; the genetic and cellular basis of neural development and degeneration using the fruit fly *Drosophila melanogaster* as a model system.

Cell Biology / Cancer

Investigators in this area study cell cycle control and cancer, gene expression, mechanisms of hormone action, signal transduction, cytoskeleton, membrane transport, stem cells, and novel therapeutics.

Current research interests include steroid hormone regulation of gene expression and cell proliferation; cell cycle checkpoints during DNA replication; protein trafficking including endocytosis and exocytosis; control of cell polarity and morphogenesis; cilia in pulmonary function; molecular basis

of human lymphoma; endocrine-related cancers including prostate and breast; stem cell maintenance and therapy; stem cell differentiation in hematopoiesis and physiochemical and metabolic aspects of drug design.

Model Systems

Many investigators are using model organisms for their studies. These include transgenic and knock-out/knock-in mouse models *Xenopus*, *Drosophila* and yeast models. Yeast and *Drosophila* are important models because of the powerful molecular and genetic approaches and tools available. *Xenopus* provides a unique system for studying development and for protein expression and analysis. These systems are being used to study fundamental processes such as apoptosis, cell cycle, signal transduction, membrane dynamics, cytoskeleton, cell polarity, olfaction, development of the cardiovascular system, neurogenesis and neuronal degeneration. All of these processes are conserved in humans, so these systems serve as important models of human diseases. Investigators are also using these systems to screen for therapeutic agents and to identify targets of toxins and other natural, synthetic or pharmacologically relevant compounds.

Admission Requirements

Applicants to biomedical programs should have a bachelor degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no prerequisite requirements, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged. Applications are generally accepted from September to December for fall entry only. Select applicants will be offered an interview.

COMPETITIVE CANDIDATES WILL HAVE THE FOLLOWING:

- Excellent academic record
- Competitive GRE exam scores
- Research experience in a laboratory setting
- Publications of abstract and / or papers
- Co-authorship in a peer-reviewed journal is recommended
- Strong letters of recommendation from research scientists who know the candidate well
- Motivation to pursue state-of-the-art biomedical research

APPLICANTS MUST SUBMIT THE FOLLOWING:

- Online Application
- Application Fee
- Official Academic Transcripts
- GRE General Test
- English Proficiency Exam (non-native speakers)
- Statement of Purpose
- Resume / CV

Full application instructions can be found here (<http://biomed.med.miami.edu/apply>).

MCP 850	Research in Residence ¹	
Total Credit Hours		67-69

¹ The student should be working in the laboratory where he/she intends to do his/her thesis research by the summer, first year. Nearly all of the student's time is spent on original laboratory research – with a minimum total of 24 credit hours of research for graduation

Plan of Study

In the first year, students receive a solid foundation in biomedical science. The core coursework ranges from molecules to cells to systems of human physiology. Lectures are balanced by breakout sessions, in which faculty members discuss the primary literature with students in small groups. The core curriculum also offers critical learning opportunities in biostatistics and in using genomic and other databases, as well as education in ethics. Students also meet several times in small groups with experienced faculty mentors to discuss important issues of student development. In subsequent semesters, students take core courses encompassing Mechanisms of Drug Action MCP 704, Neuropharmacology MCP 768, Cardiovascular Pharmacology MCP 732, Systems Biology and Approaches in Pharmacology MCP 752, and Computational Pharmacology and Fundamentals of Drug Design MCP 753. A variety of elective courses are offered by this program and other basic science programs at the Miller School of Medicine.

Minimum credit requirements for the PhD degree are set by the University at 36 course credits (including specific required courses) and 24 credit hours of research (for a total of 60 credits). The course credits must be earned in graduate level (600 and above) courses. Students may elect to take any of the graduate courses offered by the MCP program, in addition to the mandatory courses, or choose from a large variety of advanced courses offered by other basic science programs at the University of Miami Miller School of Medicine.

The student should be working in the laboratory where he/she intends to do his/her thesis research by the summer, first year. At the end of the Fall semester of the second year, students are required to take the Qualifying Exam (QE). The goals of the QE are (1) to assess the scientific proficiency of the student, especially his/her ability to design experiments and to write a competitive grant application; and (2) to aid the student and mentor in the process of obtaining extramural funds to support the student's stipend.

The thesis proposal is expected to be passed during the third year, Fall semester. It is important to note that in the MCP program this is not the Qualifying Exam. Rather, it is a collegial meeting with the thesis committee where the student discusses his/her preliminary data and plans for the thesis. Students normally meet with the committee for progress meetings every 9 months.

The thesis is defended in front of the entire program and also in a meeting with the committee. The average time-to-completion is 5.5 years.

Please note that the following is a sample curriculum plan. Current students must discuss their plan with their program coordinator to make adjustments as needed.

Neuroscience

<http://biomed.med.miami.edu/graduate-programs/neuroscience>

Overview

The Neuroscience Graduate Program, established in 1992, is an interdisciplinary / interdepartmental PhD program designed to guide trainees through the process of acquiring the research skills and the intellectual rigor needed to become independent professional neuroscientists. The program achieves these goals through coursework, journal clubs, dissertation research committee guidance, and outstanding faculty mentorship. The program also provides multiple annual forums for students to showcase their own research and learn from international research leaders.

More than 80 participating faculty are located in several departments and schools on three UM campuses including Biochemistry, Cell Biology and Anatomy, Molecular and Cellular Pharmacology, Physiology and Biophysics, and Genetics on the Medical campus. From the Coral Gables campus, we have faculty from Biology, Biomedical Engineering and Psychology, as well as several clinical departments such as Medicine, Neurological Surgery, Neurology, Ophthalmology, Otolaryngology, Pathology, Physical Therapy, and Psychiatry. In addition, we have faculty from the Rosenstiel School of Marine and Atmospheric Sciences.

Neuroscience faculty pursue a wide variety of research interests, including cellular and molecular mechanisms involved in signal transduction, gene expression in electrically excitable cells, synapse formation, neuronal growth and survival, integrative neuroscience, neuroimmunology, stroke, neuronal regeneration, autonomic control, brain metabolism and cerebral blood flow, spinal cord and brain injuries, degenerative changes within specific neural pathways in Parkinson's and Alzheimer's diseases, ALS, and genetic analysis of neurological disorders.

Admission Requirements

Admission to the Neuroscience Program is through the common umbrella of Programs in the Biomedical Sciences (PIBS), for all biomedical PhD programs.

For more information, please visit this website (<http://biomed.med.miami.edu/graduate-programs/programs-in-biomedical-sciences-pibs>).

Curriculum Requirements

Graduate training is the major goal of the program, with emphasis on cellular, molecular, and genetic approaches to Neuroscience. A single core curriculum provides the didactic scaffold of the program. This curriculum consists of courses in Developmental Neuroscience, Membrane Biophysics, Introductory Neuroscience, Neural Systems, and Neuroanatomy. The core courses are supplemented with a variety of Special Topics Short Courses.

Students also attend research seminars and a scientific journal club. The Neuroscience Steering Committee guides the students, overseeing their coursework, until they have passed their qualifying exams. From then on, their progress is supervised by individually tailored dissertation committees.

Ophthalmology

<http://biomed.miami.edu/graduate-programs/ms-in-vision-science-and-investigative-ophthalmology>

Overview

Bascom Palmer Eye Institute is pleased to offer a unique graduate degree, the **Master of Science in Vision Science and Investigative Ophthalmology (MVSIO)**. This innovative program, the first of its kind in the world, offers comprehensive training in ophthalmic translational research, problem-based learning, management and a skill set available only at Bascom Palmer Eye Institute.

The MVSIO program focuses on science and laboratory research, including the disciplines of electrophysiology, biochemistry and molecular biology, as well as exposure to ocular clinical details and ocular pathology. It will prepare students for a planned Ph.D. graduate program in vision science and investigative ophthalmology as well as for industry jobs and future residency training.

In addition, the multidisciplinary program builds management, administrative, and entrepreneurial skills for professionals desiring a vision science-oriented career in startup companies, management of non-profit organizations, academic practices, government regulatory agencies, and medical device and pharmaceutical companies.

Led by Bascom Palmer Eye Institute's world-class faculty and supported by leading-edge technology, the MVSIO program opens the door to new career opportunities for medical school graduates, clinicians and other professionals.

OPH 610. Anatomy and Physiology of the Eye. 1 Credit Hour.

This course introduces the major anatomical and physiological regions of the eye, including cornea, lens, retina, optic nerve, cranial nerves and extraocular tissues. Emphasis is placed on the relationship between the eye and others systems. Demonstrations include eye dissection, visual testing and visual perception experimentation.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

OPH 615. Pathology of Eye Diseases. 1 Credit Hour.

This course covers in detail the major pathologies of the eye, including congenital diseases and syndromes, infectious diseases, tumors and adult-onset degenerations. Emphasis is placed on pathophysiological mechanisms contributing to pathology, and also covers examination of the eye, diagnostic features, and management of major eye diseases. Demonstrations include histological sections, OCT, visual field and angiogram, and associated diagnostic criteria.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

OPH 620. Ocular Pharmacology, Epidemiology, and Biostatistics. 1 Credit Hour.

Course will teach local anesthetics, anti-infectious, anti-allergic agents, control of ocular pain, adverse ocular and systemic reactions caused by therapeutic agents will be part of the course. Ocular therapeutic principles (pharmacokinetics and pharmacodynamics, toxicity), sources of drug information, new drug development, drug regulations as applicable to different areas of operation including prescription writing will be discussed. An introductory course in epidemiologic and biostatistics methodology covering study design for investigation of both infectious and chronic diseases of the eye; screening programs and health services research will also be discussed. Outbreak investigation, natural history of infectious diseases, validity of clinical tests, survival analysis, and clinical trial and etiologic studies will be discussed. Methods of biostatistician evaluation of experiment design and analyses of data to decipher significant from non-significant results and general tools for statistical analyses will be reviewed.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

OPH 625. Microbiology and Immunology of the Eye. 1 Credit Hour.

Students will learn concepts and terminologies of immunology, bacteriology, virology, parasitology and mycology with an emphasis on mechanisms of microbial disease transmission and host defense mechanisms. Students become familiar with the types of organisms responsible for human disease, the mechanisms by which they produce disease, and the application of this knowledge to the treatment of patients. This course integrates the biomedical disciplines of immunology and medical microbiology. Infectious and immunological diseases with relevance to the clinical setting and pharmacological approaches will be presented. A basic understanding of the classification and characteristics of infectious microorganisms, the mechanisms by which infectious agents cause disease, and methods of both prevention and treatment are highlighted. Causes and treatment of immune diseases will also be presented. Concepts of inflammation, sepsis, cell injury, tissue repair, hemodynamic disorders, genetic disorders, environmental and nutritional pathology, immunodeficiency diseases, autoimmune and metabolic diseases will be presented. Throughout the course, small group tutorials and interactive clinical correlations based on clinical cases linking basic science concepts to clinical medicine will be presented. Tutorials, clinic-pathological correlations and laboratories emphasize problem-solving skills, integration of knowledge and independent learning.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

OPH 630. Ophthalmic Genetics. 1 Credit Hour.

This course provides an overview of the influence of genetics in ophthalmology with respect to understanding pathogenic mechanisms of eye diseases, and the development of novel therapeutic strategies. The course will provide an introduction to complex and Mendelian genetics, and research strategies involved in identifying disease-associated genetic changes. Specific topics include hereditary retinal diseases, genetic associations in age related macular degeneration and glaucoma, genetics of myopia and optic nerve diseases, and mitochondrial disorders affecting the eye. Additional discussions include current gene therapy clinical trials.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

OPH 635. Electrophysiology of the eye. 1 Credit Hour.

This course will introduce the basic principles of electrophysiology of the eye, identify neural signals, neurotransmitters, molecular signaling within neurons. Additionally, the sensation and sensory systems. Emphasis is placed on the relationship between the eye and other signals and senses.

Corequisite: OPH 663.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

OPH 640. Vision and Optics. 2 Credit Hours.

This course will provide an introduction to the principles of geometrical optics and its application to the study and assessment of the visual system. Topic covered will include fundamental of geometrical optics, principles of optical system components (lenses, mirrors, prisms, light sources), optics of the eye and vision correction, basic principles of visual optical instruments (loupe, microscopes, telescopes), and principles and applications of ophthalmic diagnostic and imaging systems, including ophthalmoscopes, retinoscopes, slit-lamp, keratometers, corneal topography systems, aberrometers and optical coherence tomography.

Corequisite: OPH 662.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

OPH 645. Biochemistry, Cellular and Molecular Ophthalmology. 2 Credit Hours.

An introduction to biochemistry with emphasis on ocular clinical applications. Topics will include nutrition, cellular biology, biochemistry of tears, conjunctiva, and cornea. The structure and functions of proteins and enzymes as well as metabolism of carbohydrates and lipids will be discussed. Case studies and journal articles will be used to demonstrate the useful applications of these principles to ocular health-related issues.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

OPH 661. LAB: Basic Biochemistry, Microbiology, and Pathology. 3 Credit Hours.

Experiments related to molecular biology (includes PCR, DNA cloning, hybridization analysis, restriction mapping, and DNA sequence analysis), protein purification and analysis (salt fractionation, ion exchange chromatography, affinity chromatography, SDS-PAGE, and immuno-blotting), and determination of enzyme kinetic parameters.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

OPH 662. Lab: Basic and Applied Optics and Statistics. 1 Credit Hour.

This laboratory course serves as a companion to the Vision and Optics course. It will include practical hands-on examples of the application of geometrical optical theory to the design and calculation of optical systems, provide an initial hands-on experience with basic optical system setup on an optical bench, and provide basic hand-on training or demonstration of ophthalmic diagnostic techniques and instruments, including refraction, ophthalmoscopy, retinoscopy, slit-lamp examination, aberrometry, corneal topography and optical coherence tomography.

Corequisite: OPH 640.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

OPH 663. Lab: Electrophysiology, Clinical Testing and Applications. 1 Credit Hour.

This laboratory work will introduce the students to novel clinical recording techniques, electrophysiologic tests, and clinical applications of ERG, EOG, and VEP. Emphasis is placed on novel and specialized clinical applications and recordings. The course will be divided in two sections. Section one ends with focus on the effects of maturation, aging, and testing in infants. Section two will conclude with electrophysiologic findings of many clinical conditions and clinical applications of ERG, EOG, and VEP of various eye disorders/diseases.

Corequisite: OPH 635.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

OPH 691. Clinical Ophthalmology Update. 2 Credit Hours.

Society, Science and Medicine. History and evolution of medicine, Seminars on different aspects of medicine including a broad spectrum view of career options. The emphasis will be how medicine has been developed historically, its efficacy, and the future outlook. For example, antibiotic resistant bacteria was discovered in 12,000 year old underground caves that makes us realize that antibiotic resistance is an old problem and we need to have an outlook bearing that in mind. .

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

OPH 771. PBL: Advanced and High Throughput Approaches in Science. 2 Credit Hours.

The Problem-Based Learning Method (PBL) was designed to teach students in small groups to identify specific techniques that will yield the answers to the problems. Content will include the underlying norms and principles that shaped these concepts. The courses also include plenary session presentations by experts on relevant topics and their use in preparing manuscripts and grant applications and policies regarding conduct of experiments using these techniques.

Components: ENS.

Grading: GRD.

Typically Offered: Fall.

OPH 772. PBL: Management skills and Tools for Academia and Enterprises. 2 Credit Hours.

This Problem-Based learning course will introduce grant writing, pre-award preparation, post-award management and will be taught using problem-based modules. Federal and non-federal extramural grants will be used as modules specific aspects of different segmental grants will be presented. Major research grant, training and fellowships, grants-in-aid will be taught. In addition, small business innovation research (SBIR) or STTR will be covered. Students will learn techniques to analyze markets, identify optimal opportunities, develop plans to sell their vision in order to attract talent and stakeholders. A series of problem-based lectures integrates modern business concepts from an entrepreneurial approach.

Components: ENS.

Grading: GRD.

Typically Offered: Spring.

OPH 773. PBL: Animal Models, Regulatory issues, and Research Methods. 2 Credit Hours.

Part I: The aim of this Problem-Based learning course is to provide students the basic understanding and expertise pertaining to generation and implementation of preclinical research IACUC protocol. This course consists of a problem based learning module with a focus on developing students' understanding of various animal models in preclinical research and how to refine animal research models that meet the requirement of IACUC regulation. Part II: The purpose of this course is to provide clinical research regulatory expertise with an aim to create future leaders in the drug development industry. This regulatory science course uses a multidisciplinary approach and encompasses course work in regulatory writing techniques, quality systems, and medical device and pharmaceutical regulation. The concentration is designed to develop the student's understanding of how to meet regulatory oversight requirements as they relate to the conduct of clinical studies. This course will prepare students to play critical roles throughout the lifecycle of pharmaceuticals, medical devices, and biologics. They provide strategic, tactical and operational direction, and support for working within regulations to expedite the development and delivery of safe and effective healthcare products to individuals around the world. The regulatory professional's services can be utilized in research and development, clinical trials, extension of premarket approvals, manufacturing, labeling and advertising, and post-market surveillance. Knowledge of clinical research conduct and management which involves the design, execution and management of clinical trials as well as quality assurance and compliance principles are important to regulatory professionals. Course also provides highlight on how to effectively partner with experts such as writers drafting pre- and post- approval regulatory FDA submission documentation (INDs, NDAs, PMAs etc.) for product clearance or licensure, IRB reviewers and investigational Pharmacists to enhance the development of healthcare products.

Components: ENS.

Grading: GRD.

Typically Offered: Spring.

OPH 810. Ophthalmology Research Thesis. 1-7 Credit Hours.

The course allows the student to work full-time on a research project of interest under the supervision of research/clinical faculty or a team of faculty members.

Components: THE.

Grading: SUS.

Typically Offered: Fall.

PhD/MBA Program

The growing potential to make life-saving discoveries in an ever-changing global economy make this an exciting time to enhance your biomedical science PhD with an MBA! Many ambitious students are now looking to an MBA as a useful enhancement to their biomedical research experience and expand their career options.

An MBA is an investment in the future careers of biomedical graduate students. We know our alums will be future college presidents, department chairs, entrepreneurs, government officials, patent holders and CEOs of biomedical companies. This program will ensure they leave us not only as cutting-edge scientists, but also prepared for the leadership challenges they will face regardless of what lies ahead.

Regardless of career trajectory, PhDs can benefit from pursuing a business education. From a practical standpoint, the managerial skills, business acumen and financial literacy one develops from an MBA program are useful for managing labs, staff, grants or even starting a business. The biomedical industry and higher education are increasingly influenced by legal issues and shifting healthcare policy, both of which are covered by the MBA curriculum. Students will expand their networks by taking classes alongside CEO's and business leaders enrolled in the Executive MBA program.

The immediate financial advantages of a PhD / MBA option at UM are substantial. Not only will accepted students receive 100% tuition waivers for the doctoral portion of their studies, they will receive shared credit savings and a 50% scholarship from the School of Business Administration for their MBA. In the long-term, students with MBA's can expect to have greater earnings over the lifetime of their careers.

Curriculum Requirements

PhD students in the Biomedical Sciences at the Miller School of Medicine may choose to pursue a Master of Business Administration degree immediately following their doctoral studies. The MBA portion of the sequential degree may be completed in one year and consists of 44 MBA credits. The degrees must be obtained sequentially.

Physical Therapy

<http://www.pt.med.miami.edu>

Dept. Code: PTS

The Department of Physical Therapy is committed to providing quality educational experiences that enable its graduates to effectively carry out the expanding responsibilities of physical therapists as autonomous health care providers practicing in preventive, evaluative, maintenance, acute care, rehabilitation, outpatient settings, and in educational and research environments.

The individual and collective efforts of the members of the Physical Therapy faculty are directed toward attaining specific goals and objectives as expressed in the philosophic statement of the American Physical Therapy Association.

The *Mission of the Department of Physical Therapy* (revised in December, 2000; re-affirmed in 2012) in accordance with the Mission of the Miller School of Medicine is to provide excellence in physical therapist education, to expand evidence-based practice of physical therapy through research, to provide high quality care to all who need it, and to be a community partner.

Admission Requirements

Doctor of Physical Therapy (entry level DPT)

Applicants should have a baccalaureate degree in a related field and 3.0, or "B" average or better in the following courses:

Code	Title	Credit Hours
English Composition/ Writing intensive course	(5 quarter hours)	3
Introduction to Statistics	(5 quarter hours)	3
Psychology	(5 quarter hours)	3
General Biology	(5 quarter hours)	3
General Chemistry I and II each with Lab	(12 quarter hours)	8
General Physics I and II each with Lab	(12 quarter hours)	8
Human Anatomy	(5 quarter hours)	3
Human Physiology	(5 quarter hours)	3
OR		
Combined Anatomy and Physiology I & II	(10 quarter hours)	

Application Procedure

We are accepting applications through Physical Therapist Centralized Application Service (PTCAS). Click here (<http://www.ptcas.org>) to apply.

The next application cycle will open on July 1. The application deadline is October 15; we encourage you to apply early. Classes begin in May of each year. Application requirements consist of the following:

1. Submission of all application materials to PTCAS. Completion of prerequisites or plan to complete by time of matriculation, with a minimum GPA of 3.0 on a 4.0 scale.
2. Demonstration of knowledge concerning the physical therapy profession by submitting:
 - A minimum of 100 hours of first-hand observation and/or work experience related to the practice of physical therapy.
 - This experience must be substantiated in writing by a registered/licensed physical therapist. The name and email of the physical therapist(s) is required for verification.
3. Submission of three to four (3-4) letters of recommendation from people who can address both the applicant's moral character and potential as a physical therapist.
 - At least one letter must be written by a registered/licensed physical therapist, and one or more from faculty.
4. An on-site interview is required and will be offered to those applicants who have met the admission criteria.
5. Graduate Record Exam (GRE). Applicants who took the GRE before July 31, 2011 must score a minimum of 1000 on the verbal and quantitative sections combined. As of August 2011 the GRE exam and its scoring scale have changed significantly. Please visit the ETS website (http://www.ets.org/s/gre/pdf/concordance_information.pdf) for the official ETS Concordance Table. Applicants must score a minimum of 147 on the quantitative section and 149 on the verbal section. A minimum score of 3.0 on the analytical section is also required.

6. International students are to complete the PTCAS application and submit official transcripts to the DPT program instead of PTCAS. Transcripts that are not in English must include an official translation. International applicants must have all transcripts evaluated by the University of Miami's Office of International Admissions before they can be considered for graduate study. Any transcript not in English must be submitted with an official translation. International applicants must meet ALL the necessary requirements to qualify for a student visa.

For more information contact:

Admissions Office
Department of Physical Therapy
5915 Ponce de Leon Blvd., 5th Floor
Coral Gables, FL 33146
Phone 305-284-4535
Email: physicaltherapy@miami.edu
Website: www.pt.med.miami.edu (<http://www.pt.med.miami.edu>)

Doctor of Philosophy in Physical Therapy (PhD)

Application Requirements

Applicants to the Physical Therapy PhD Studies Program must have a clinical degree in physical therapy from an accredited physical therapy program and be eligible for licensure to practice physical therapy in the United States. Students enrolled in the PhD in Physical Therapy program at the University of Miami work closely with a faculty mentor from their first days in the program. As a first step in the application process, the applicant must identify an area of interest and contact a faculty mentor involved in that area. Students are admitted to the program upon endorsement of a faculty mentor and completion of all admission requirements, with final selection made by the PhD Studies Committee. Stipend and tuition support is potentially available for qualified applicants.

The applicant must meet all the general admissions requirements of the University of Miami Graduate School. Additionally, stipulations include:

- Direct entry into the PhD program is dependent upon having any of the degrees below:
 - An entry-level Master's Degree in Physical Therapy
 - An advanced Master's Degree with a Bachelor's Degree in Physical Therapy
 - A Bachelor's Degree in Physical Therapy.
- An applicant with a Bachelor's Degree in Physical Therapy, though able to commence course work in the PhD Program, will be required to complete additional credit hours before final admission to the PhD Program.
- Official Transcripts of all college work.
- Three completed recommendation forms with at least one form completed by a physical therapist.
- A letter indicating career goals and objectives.
- Licensure or eligibility for licensure, as a physical therapist in the State of Florida (must be licensed within 1 year of admission).
- GRE scores current within the past 5 years (see minimum requirements below)

Applicants who took the GRE before July 31, 2011 must score a minimum of 1000 on the verbal and quantitative sections combined. As of August 2011 the GRE exam and its scoring scale have changed significantly. Please visit the ETS website (http://www.ets.org/s/gre/pdf/concordance_information.pdf) for the official ETS Concordance Table. Graduate Admissions will be using this concordance table when reviewing exam scores. Applicants must score a minimum of 147 on the quantitative section and 149 on the verbal section. A minimum score of 4.0 on the analytical section is also required. International applicants must submit a complete application and have all transcripts evaluated by the University of Miami's Office of International Admissions before they can be considered for graduate study. Any transcript not in English must be submitted with an official translation.

The research areas of the faculty are diverse, reflecting the clinical and scientific emphasizes areas of the faculty. Please refer to the Faculty Section for specifics.

For more information on the PhD degree contact:

Kathryn E. Roach, PhD, PT, Graduate Program Director
Department of Physical Therapy
5915 Ponce de Leon Blvd., 5th Floor
Coral Gables, FL 33146
phone: 305-284-4535
email: keroach@miami.edu

Degree Programs

Doctor of Physical Therapy (entry level DPT)

The Department offers the clinical Doctor of Physical Therapy (DPT). The DPT program recognizes the importance of in-depth basic and applied science knowledge and the humanities. As such, the curriculum is carefully sequenced to allow students to develop skills in both classroom and clinical settings.

Faculty also understand the importance of presenting problem-solving skills in conjunction with fundamental physical therapy concepts so that students will develop the professional attitudes and insights required for sustained and continued growth throughout their careers.

The entry-level doctoral program (DPT) is offered under the auspices of the Department of Physical Therapy, University of Miami Miller School of Medicine.

Doctor of Philosophy in Physical Therapy (PhD)

The University of Miami Doctor of Philosophy in Physical Therapy program develops physical therapist students for leadership positions in academic and research settings. Along with guiding students in the development of requisite knowledge and skills, the program promotes professional socialization into the role of academic faculty. We believe preparation to teach and undertake research in a physical therapy curriculum at the university level requires excellence in three dimensions:

1. Expertise in a specified content area;
2. Advanced knowledge and skill in research methods, design, and implementation of analysis and communication of results; and
3. Proficiency in instructional design, teaching methods, and evaluation.

The successful integration of these three dimensions, each complex in its own right, provides the means for the student to develop expertise in testing, analyzing, researching, and teaching about disorders that interfere with function. Unifying these three core areas is the process of socialization to the role of a faculty member, including an awareness of academic responsibilities and sensitivity to the needs of the adult learner.

In keeping with this philosophy, students develop breadth of knowledge through completion of coursework from three basic core areas:

- Concentration Core
- Research Core
- Education Core

They develop depth by completing elective courses with the intent to build expertise in their respective areas of concentration. The successful graduate of this program will have the requisite knowledge and skills to integrate research findings and scientific theory with clinical observations. On this basis, the graduate will be prepared to perform original research aimed at developing new knowledge to enhance the scientific basis of clinical practice and theoretical principles that will advance the profession of physical therapy. The program offers opportunities for the student to gain skill in communicating theories, concepts and research findings and to experience the roles and responsibilities of an academic faculty member. Students complete a dissertation project in which they develop and conduct a unique and significant research investigation with the guidance of a Physical Therapy faculty member as research advisor.

Doctoral Programs in Physical Therapy

- D.P.T. Doctor of Physical Therapy (Entry Level) (p. 1265)
- Ph.D. in Physical Therapy (p. 1268)

D.P.T. Doctor of Physical Therapy (Entry Level)

To receive the Doctor of Physical Therapy degree, the candidate must:

1. Complete all coursework (103 credit hours) as required with an overall GPA of 3.0 or better.
2. Complete at least 3 credit hours of Elective coursework, in addition to the 103 credit hours.

3. Successfully complete the clinical internships (I-IV) required.

	Total Credit Hours	103

¹ Students are required to complete a minimum of 3 elective credits in addition to the required courses. For a list of elective courses, please visit <http://pt.med.miami.edu/Documents/ELECTIVES.pdf>.

² The University of Miami, Department of Physical Therapy has affiliations with 350 clinical sites locally and throughout the country. Distant internships may incur additional expenses for the student.

Ph.D. in Physical Therapy

The Doctor of Philosophy in Physical Therapy prepares physical therapists for leadership positions in academic and research settings. To accomplish this, students are required to complete coursework and structured experiences in "Teaching and Faculty Leadership" and "Research." Students develop expertise in a specific area of concentration under the guidance of their faculty mentor by developing an individual plan of study that may include both coursework and independent study and by completing their dissertation research.

Prior to admission to the PhD in Physical Therapy program, prospective students are required to identify a faculty member with research interests compatible with those of the applicant. This faculty member must agree to mentor the potential student before the PhD Committee will make a decision to admit the applicant. For applicants accepted to the program, the faculty member who agreed to mentor the student will serve as the Chair of the student's Supervisory Committee. The Supervisory Committee Chair and the student are responsible for creating an individualized plan of study for each student. The plan of study includes mandatory coursework in:

Preparation for Teaching and Faculty Leadership

- PTS774 Role of Academic Faculty in PT (3 credits)
- PTS777 Instructional Methods in Physical Therapy Education (3 credits)
- PTS778 Teaching Practicum (3 credits)
- PTS790 Theoretical Models in Physical Therapy (3 credits)

Preparation for Research

- PTS795 Clinical Research Methods I (3 credits)
- PTS796 Applied Statistics in Physical Therapy (3 credits)
- PTS798 Research Practicum (3 credits)
- PTS843 Measuring Health Outcomes (3 credits)
- Two graduate level courses in statistics (6 credits)

Preparation in Individual Area of Concentration:

- Students typically take 18 credits of coursework in this area. This may include coursework offered by the Department of Physical Therapy, coursework offered outside the Department, and Independent Study.

Qualifying Examination

Every PhD student must take a written qualifying examination at the time that the student and the Chair of the student's Supervisory Committee deem appropriate. Students can sit for the qualifying examination when they have completed their research practicum and all courses with the exception of an elective. The student must have a 3.0 GPA for all courses taken in the PhD program. The qualifying examination includes questions in four content areas: 1) Area of Concentration, 2) Teaching and Leadership, 3) Research, 4) Dissertation Specific Content.

Dissertation

After passing the qualifying examination, students form a dissertation committee and enter candidacy. The program requires PhD students to submit a written dissertation proposal and orally defend the proposal within 4 months of admission to candidacy. Students are required to take a minimum of 15 Dissertation credits. The program requires students to submit at least one article from their dissertation research for publication in a peer reviewed journal prior to the final public oral defense of the dissertation. Immediately following the public defense of the dissertation, the members of the dissertation committee excuse all non-committee members and further interrogate the candidate. The committee then deliberates in private to determine whether the candidate has successfully defended the dissertation. The typical time to complete a PhD in Physical Therapy is 5 years.

Cellular Physiology and Molecular Biophysics

biomed.med.miami.edu

Overview

Cellular Physiology and Molecular Biophysics is focused on how human organism function by applying principles of physics to the underlying molecules and cells. The training and research emphasis in the Graduate Program in Cellular Physiology and Molecular Biophysics at the University of Miami School of Medicine is directed at determining the molecular mechanisms underlying physiological functions, such as how does the heartbeat, how does the brain work, and how do we see, smell, and taste, using biophysical techniques and analyses. More specifically, research facilities and guidance for graduate work are available in developmental neurobiology, sensory receptor mechanisms, axonal electrophysiology, ionic mechanism of the nerve impulse, electrophysiological and molecular aspects of synaptic and neuromuscular transmission, mechanisms of ion channel gating, selectivity and conductance, metabolic aspects of nervous function, molecular neuroscience, neuroimmunology, protein structure-function studies, molecular recognition, ligand-receptor interactions, axonal growth, neurotrophic factors, cytokines, gene targeting, neuronal apoptosis, nerve regeneration, molecular adhesion, and regulation of muscle contraction.

The Graduate Program in Cellular Physiology and Molecular Biophysics trains its students to use and develop state-of-the-art biophysical techniques that address fundamental questions related to molecular and cellular physiology and biophysics and developmental and molecular neuroscience. In addition, the students receive training in related biological disciplines and also in systemic physiology in order to obtain a broad viewpoint. This training prepares the students for future careers in research and teaching in academic institutions and also for careers in industry.

physiology@miami.edu

Admission Requirements

Applicants to biomedical programs should have a bachelor degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no prerequisite requirements, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged. Applications are generally accepted from September to December for fall entry only. Select applicants will be offered an interview.

COMPETITIVE CANDIDATES WILL HAVE THE FOLLOWING:

- Excellent academic record
- Competitive GRE exam scores
- Research experience in a laboratory setting
- Publications of abstract and / or papers
- Co-authorship in a peer-reviewed journal is recommended
- Strong letters of recommendation from research scientists who know the candidate well
- Motivation to pursue state-of-the-art biomedical research

APPLICANTS MUST SUBMIT THE FOLLOWING:

- Online Application
- Application Fee
- Official Academic Transcripts
- GRE General Test
- English Proficiency Exam (non-native speakers)
- Statement of Purpose
- Resume / CV

Full application instructions can be found here (<http://biomed.med.miami.edu/apply>).

Doctoral Programs

Ph.D. in Cellular Physiology and Molecular Biophysics (p. 1271)

Ph.D. in Cellular Physiology and Molecular Biophysics

During their first two years, the students take advanced courses in membrane physiology and biophysics, cellular physiology, neurophysiology and systemic physiology, as well as a core course in cell molecular biology and interdisciplinary biomedical sciences.

During the first year, the students choose several laboratories in which to do brief, introductory research projects (rotations). After the student's selection of a faculty mentor the main emphasis of training shifts to the design and proposal of a dissertation research project, and, with its approval, laboratory research. Students report periodically on their research in discussions with other students and the faculty.

Since the Department aims to prepare its graduates for careers in research and teaching, all students in the Department are expected to participate in teaching; these teaching activities typically require no more than 1-2 weeks per year.

Curriculum Requirements

Program Plan

The Department of Cellular Physiology and Molecular Biophysics' PhD program trains highly qualified students for successful careers in research, teaching and industry. A high faculty to student ratio assures that each student receives individualized help from the faculty together with access to the latest scientific instrumentation.

Student training is enhanced by research seminars and student-oriented discussions presented by world-renowned visiting scientists, as well as by participation in research seminars and research discussion groups. We seek to provide a congenial and supportive environment in which each student develops to the fullest their abilities to reason critically, design and conduct incisive experiments, and communicate research results effectively in both written and oral formats. Our faculty's wide collective experience as successful researchers, teachers, journal editors, and peer reviewers is available to help graduates prepare for and attain research and teaching positions in academia and industry.

Please note that the following is only a sample curriculum plan. Current students must discuss their plan with their program director to make adjustments as needed. It is the student's responsibility to contact the program to verify the information.

Public Health

<http://publichealth.med.miami.edu/>

Dept. Code: EPH

Degree Programs

- Accelerated MPH
- Certificate in Public Health
- Master of Public Health (MPH)
- Master of Science in Public Health (MSPH)
- Doctor of Philosophy in Epidemiology (PhD)
- Doctor of Philosophy in Prevention Science and Community Health (PhD)

The Graduate Programs in the Department of Public Health Sciences at the University of Miami Miller School of Medicine are at the forefront of public health science with emphasis on research, education, and evidence based public health service. The Graduate Programs promote an environment of learning and inquiry, stressing the scientific method as a way of generating knowledge about common pathways in health and illness. The mission of the Graduate Programs in Public Health Sciences is to develop leaders who can expand and translate knowledge into policy and practice to promote health and prevent disease in human populations.

Joint Degree Programs

Joint degree programs (<http://publichealth.med.miami.edu/graduate/academic-programs>) are also offered in conjunction with the School of Medicine (MD/MPH, MD/PhD), School of Law (JD/MPH), College of Arts and Sciences (MPA/MPH), (MAIA/MPH), (MALAS/MPH), and School of Nursing and Health Studies (4+1 BSPH/MPH).

- Bachelor of Science in Public Health/Master of Public Health (4+1 BSPH/MPH)
- Juris Doctorate/Master of Public Health (JD/MPH)
- Master of Arts in International Administration/Master of Public Health (MAIA/MPH)
- Master of Latin American Studies/Master of Public Health (MALAS/MPH)
- Master of Public Administration/Master of Public Health (MPA/MPH)
- Medical Doctorate/Master of Public Health (MD/MPH)
- Medical Doctorate/Doctorate of Philosophy (MD/PhD)

Admission Requirements

- **Application** - Applicants must submit their application online through SOPHAS (<https://sophas.org>), the centralized application service of the Association of Schools and Programs of Public Health (ASPPH) (<https://www.aspph.org>). All application materials, including transcripts, test scores, statement of purpose, resume, and letters of reference, must be submitted directly through SOPHAS.

- **Transcripts** – Applicants must submit official transcripts from all previously attended colleges and universities. All foreign transcripts must be official and submitted in the original language. If the original language is not English, an official translation must be submitted along with the transcript. We do not accept evaluations from foreign credentialing service organizations. All non-U.S. transcripts must be evaluated by the World Education Service (<https://www.wes.org>) (WES) using ICAP Course-by-course evaluation service.
- **Official GRE Test Scores** - Applicants are required to submit GRE general exam scores (http://www.ets.org/gre/revised_general/about) taken within the last five years. Alternatively, MCAT, LSAT, GMAT, and DAT scores are accepted for the MPH/MSPH degree programs only. Applicants to the MPH and MSPH program who hold advanced degrees (MD, PhD, and JD) are encouraged, but not required to submit test scores.
- **English Proficiency Exam** - International students whose native language is not English and/or did not graduate from an English-teaching institution are required to submit TOEFL (<https://www.ets.org/toefl>) or IELTS (<https://www.ielts.org/en-us>) scores.
- **Resume/Curriculum Vitae** – Applicants must include a detailed resume including employment, public health experiences, community service, research, and academic or professional honors.
- **Statement of Purpose** – Applicants are required to submit a statement of purpose that details their academic interest in the program. The statement should discuss any experience in public health including field experience, training, education or other related qualifications. Applicants should discuss how earning the degree will contribute to their future professional and career goals, as well as to the future of public health. Applicants should also address any academic deficiencies, if applicable.
- **Letters of Reference** – Applicants must provide three letters of recommendation from individuals who are best able to assess their ability to be successful in a public health degree program. Ideally, recommenders are recent professors, researchers or employers in a related field. Applicants will be asked to include the contact information of their recommenders on the SOPHAS application and recommenders will be sent an online form to complete via email.

To obtain detailed curricula on all our program offerings, please visit our website (<http://publichealth.med.miami.edu>).

Masters Programs in Public Health

- M.P.H. Master of Public Health (p. 1275)
- M.S.P.H. Master of Science in Public Health (p. 1279)

Doctoral Programs in Public Health

- Ph.D. in Epidemiology (p. 1279)
- Ph.D. in Prevention Science and Community Health (p. 1280)

Joint Degrees

- M.P.H./M.P.A. in Public Health and Public Administration (p. 1278)
- M.P.H./M.A. Master of Arts in International Administration Joint Degree (p. 1276)
- M.P.H./MALAS Master of Arts in Latin American Studies (p. 1277)
- M.D./M.P.H. Master of Public Health Joint Degree (p. 1238)

Certificate in Public Health

<http://publichealth.med.miami.edu/graduate/academic-programs/public-health-graduate-certificate>

The Public Health Certificate Program is offered through the Graduate Programs in Epidemiology and Public Health. The Public Health Certificate Program covers the core content of the Master of Public Health degree program in the areas of epidemiology, biostatistics, environmental health, administration and health education and behavior. The Public Health certificate program provides a foundation in public health training for interested students in other disciplines, and earned certificate credit may be used towards completion of the MPH or MSPH degree programs at the University of Miami.

The curriculum includes 5 courses (16 credits)

Curriculum Requirements

Code	Title	Credit Hours
EPH 601	Medical Biostatistics I	4
EPH 617 or EPH 620	Disease Prevention and Health Promotion Health Education and Behavior	3
EPH 621	Fundamentals of Epidemiology	3
EPH 631 or EPH 632	Public Health Administration U.S. Health Systems	3
EPH 641	Aspects of Environmental Health	3
Total Credit Hours		16

M.P.H. Master of Public Health

The MPH degree is a professional degree for students who require a broad general academic experience in public health. Students will acquire competency in the fundamental public health disciplines. This includes research design and conduct, data analysis and policy analysis, communications, program planning and administration, public health systems and the organization of health services in the United States and Latin America, recognition and analysis of ethical issues in public health and professional practice, the needs of special populations, and the integration of these core disciplines in public health decision making. The MPH degree is a 45 credit hour program that is accredited by the Council on Education for Public Health.

Full-time students can expect to complete the MPH degree requirements within 2 years. An elective credit waiver may be available for students who enter the MPH degree program with an earned advanced degree (e.g., MD, DDS, DVM, JD).

Curriculum Requirements

EPH 641	Aspects of Environmental Health	3
Capstone ¹		
EPH 680	Practical Field Experience	3
EPH 681	Capstone Experience Project	3
Electives Courses		
Choose 20 credits of coursework in one or more of the following areas:		20
Biostatistics		
Environmental and Public Health (not already listed)		
Epidemiology and Population Health Sciences		
Health Services Policy and Research		
Prevention Science and Community Health		
Total Credit Hours		45

¹ The Capstone Field Experience and the Capstone Project are both vital components of the MPH program, and together form the Capstone Program. The Capstone Field Experience is designed to provide students with real world work experience in the field of public health. This experience places students in health-related settings (local, national, and international) to work on projects of mutual interest to both the field organization and the student. The Capstone Project is intended to build upon this fieldwork and is geared toward providing the student with an opportunity to apply public health academic theory and acquired skills to community health problems. Students are encouraged to build their Capstone Program in such a way that supports their academic and professional interests as they advance in their careers as public health professionals.

M.P.H. /J.D. Master of Public Health / Juris Doctorate Dual Degree

The University of Miami School of Law and the Miller School of Medicine's Department of Public Health Sciences offer a joint degree program in law and public health. Upon completion of the programs, a student earns the Juris Doctor degree from the School of Law and a Master of Public Health degree from the School of Medicine. The average length of this joint program is 3.5 years (seven semesters plus 2 summer sessions). Law students begin MPH classes after completing the first year of law school.

Students who apply for the joint JD/MPH program must apply both to the School of Law and to the Graduate Programs in Public Health Sciences.

JD/MPH Dual Degree Curriculum

Code	Title	Credit Hours
PUBLIC HEALTH CURRICULUM (33 credits)		
EPH 600	Introduction to Public Health	3
EPH 601	Medical Biostatistics I	4

¹ Students must complete three specific health law courses (9 credits)

² Students must complete four law courses (12 credits) from a specified set of offerings in the School of Law

M.P.H./M.A. Master of Arts in International Administration Joint Degree

The Master of Arts in International Administration/Master of Public Health (MAIA/MPH) degree is offered jointly by the University of Miami College of Arts and Sciences and the Miller School of Medicine's Department of Public Health Sciences. The MPH degree with a second master's degree in international administration is designed for students who seek an in-depth knowledge of public health with a broader emphasis in globalization and health, international health, international health policy and international development.

M.P.H/MALAS Master of Arts in Latin American Studies

Miami is the gateway to Latin America. As such we recognize an urgent need for public health professionals with the training and expertise needed to meet the growing public health challenges both in Latin America and the Caribbean. This dual degree program is offered jointly by the University of Miami College of Arts and Sciences and the Miller School of Medicine's Department of Public Health Sciences. It is designed to train students for a career in public health with a focus on social policy, health management and health care in Latin America and the Caribbean as well as expatriate communities in the United States.

M.P.H./M.P.A. Master of Public Administration Joint Degree

The Master of Public Administration/Master of Public Health (<http://publichealth.med.miami.edu/graduate/academic-programs/dual-degree-programs/mpa-mpm>)MPA/MPH) joint degree program is designed for students who seek an in-depth knowledge of public health with training in management and public policy administration. Students may complete the requirements for the MPH and MPA degrees simultaneously or in succession. It is possible for full-time students to complete both degree requirements within two and one-half academic years. Joint MPA/MPH students complete a total of 66 credits to earn both degrees.

Curriculum Requirements - MPH

M.S.P.H. Master of Science in Public Health

The MSPH is an academic research degree designed for students who wish to prepare for further study at the doctoral level, or to prepare for research or technical positions in government, industry, academia, or private institutions. Studies will include many of the core disciplines included in the MPH degree with an additional emphasis on advanced research methods and quantitative analysis skills. The MSPH program is a 45 credit hour program that is accredited by the Council on Education for Public Health.

Full-time students can expect to complete the MSPH degree requirements within 2 years. An elective credit waiver may be available for students who enter the MSPH degree program with an earned advanced degree (e.g., MD, DDS, DVM, JD).

Curriculum Requirements

Code	Title	Credit Hours
Core Courses		
EPH 600	Introduction to Public Health	3

EPH 602	Biostatistics II	3
EPH 617 or EPH 620	Disease Prevention and Health Promotion Health Education and Behavior	3
EPH 621	Fundamentals of Epidemiology	3
EPH 631 or EPH 632	Public Health Administration U.S. Health Systems	3
EPH 641	Aspects of Environmental Health	3
Methods Courses		
Choose two courses from the following:		6
EPH 604	Clinical Trials	
EPH 644	Fundamentals of Program Evaluation	
EPH 647	Community Based Participatory Research	
EPH 651	Research Methods	
EPH 656	Qualitative Research Methods	
BST 625	Survey of Statistical Computing	
Research Thesis Project		
EPH 698	MSPH Thesis Proposal	3
EPH 699	MSPH Thesis ²	3
Elective Courses ¹		11
EPH-600, 700 level courses not already listed		
BST-600, 700 level courses not already listed		
Total Credit Hours		45

¹ After completion of the core courses, the student may select courses to fit his/her own area of interest. This allows for personal tailoring of the academic program to fit the student's individual needs and career goals.

² The MSPH Thesis project requires an individual investigation of a current public health problem and allows the student to demonstrate competency in the development and implementation of a research question. Students will work closely with a faculty advisor and thesis project committee during their investigation.

Ph.D. in Epidemiology

The Doctor of Philosophy (PhD) in Epidemiology is an intensive research training program for students with prior training in Epidemiology or related disciplines. It provides advanced education and training for students seeking a professional career in medical and health-related research, as well as for physicians and other persons who have attained professional degrees and are seeking to integrate epidemiological research and methods into their ongoing careers.

As a research-focused degree, students are given the skills necessary to approach health problems to generate consequential research questions and use the most appropriate epidemiological methods to address them. The methodologically rigorous training comprises both formal classroom education and guided research with faculty mentors. Key research areas include: chronic disease epidemiology, including cancer, diabetes, and obesity; behavioral epidemiology relating to substance abuse and HIV/AIDS, occupational disease epidemiology; and health disparities.

Pre-requisites: The program is primarily designed for persons who have completed an MPH degree, as well as for physicians and others who have a master or doctoral degree in a related discipline. At a minimum, students should have successfully completed a graduate-level, foundation of epidemiology course as well as two biostatistical courses.

All PhD in Epidemiology students are required to complete 64 credit hours. These include:

- core courses in epidemiology and biostatistics
- elective coursework
- the dissertation

Please visit our website (<http://publichealth.med.miami.edu/graduate/academic-programs/phd-in-epidemiology>) for additional information.

Curriculum Requirements

Code	Title	Credit Hours
BST 625	Survey of Statistical Computing	3
BST 630	Longitudinal and Multilevel Data	3
EPH 604	Clinical Trials	3
EPH 625	Ethical Issues in Epidemiology	3
EPH 651 or EPH 752	Research Methods Advanced Research Methods	3
EPH 703	Advanced Statistical Methods I	4
EPH 705	Advanced Statistical Methods II	3
EPH 740	Basic Pathology and Patho-physiology	3
EPH 751	Survival Analysis in Clinical Trials	3
EPH 774	Epidemiologic Methods and Reasonings	3
EPH 776	Methods in Epidemiology	3
Professional Development Seminars ¹		3
EPH 700	Professional Development Seminar (Course should be taken 3 times for 1 credit each)	
Dissertation		12
EPH 830	Doctoral Dissertation	
EPH 840	Doctoral Dissertation- Post Candidacy	
Electives		15
EPH-600, 700, 800 level courses not already listed		
BST-600, 700, 800 level courses not already listed		
Total Credit Hours		64

¹ Students complete the Professional Development/Research Seminar multiple semesters (each Spring semester), minimum of three times; some students will complete it more than 3 times.

Ph.D. in Prevention Science and Community Health

The PhD in Prevention Science and Community Health will prepare students with the necessary expertise and interdisciplinary background to contribute to 21st century prevention and community health research. Students will be trained in both traditional and innovative areas of prevention science. These include etiology, intervention design and evaluation, innovative data collection and analyses, and implementation science.

The Prevention Science program offers students the unique opportunity to interact with faculty who specialize in all stages of the intervention development and evaluation process, as well as in various methodologies such as community-based participatory research and mixed-methods research. Program faculty are experts in cultural diversity and health disparities. They are focused on acculturation; cultural predictors of health disparities; and efficacious methods, strategies, and programs for reducing health disparities locally, nationally, and internationally. Key research areas include: substance use, HIV, cancer, diabetes, obesity, delinquency and depression.

All PhD in Prevention Science students are required to complete 75 credit hours. These include:

- course courses in intervention design, implementation science and statistics
- elective coursework
- the dissertation

Please visit our website (<http://publichealth.med.miami.edu/graduate/academic-programs/phd-in-prevention-science>) for additional information.

Curriculum Requirements

Departments

- DEPARTMENT OF INSTRUMENTAL PERFORMANCE - Dept. Code: MIP
- DEPARTMENT OF KEYBOARD PERFORMANCE - Dept. Code: MKP
- DEPARTMENT OF MUSIC EDUCATION AND MUSIC THERAPY - Dept. Code: MED
- DEPARTMENT OF MUSIC MEDIA AND INDUSTRY - Dept. Code: MMI
- DEPARTMENT OF MUSIC THEORY-COMPOSITION - Dept. Code: MTC
- DEPARTMENT OF MUSICOLOGY - Dept. Code: MCY
- DEPARTMENT OF STUDIO MUSIC AND JAZZ - Dept. Code: MSJ
- DEPARTMENT OF VOCAL PERFORMANCE - Dept. Code: MVP

Admission Requirements

Please consult the general section of the Graduate Bulletin for the Graduate School admission requirements.

For additional information on the Frost School of Music Graduate Admission Requirements, please visit our Graduate Admissions website (<https://admissions.frost.miami.edu/graduate>).

Degree Programs

1. Doctor of Philosophy – Deg. Code: PhD
 - a. Music Education – Conc. Code: MEDU
2. Doctor of Musical Arts – Deg. Code: DMA
 - a. Choral Conducting – Conc. Code: MCDC
 - b. Composition – Conc. Code: MTCP
 - c. Instrumental Conducting – Conc. Code: MCDI
 - d. Instrumental Performance – Conc. Code: MIPF
 - e. Jazz Composition – Conc. Code: MSJC
 - f. Jazz Performance (Instrumental – Conc. Code: MSJI or Vocal – Conc. Code: MSJV)
 - g. Keyboard Performance and Pedagogy – Conc. Code: KPED
 - h. Multiple Woodwinds – Conc. Code: MIPW
 - i. Keyboard Performance – Conc. Code: MKPF
 - j. Vocal Pedagogy and Performance – Conc. Code: VPED
 - k. Vocal Performance – Conc. Code: MVPF
3. Master of Arts – Deg. Code: MA
 - a. Arts Presenting & Live Entertainment Management – Conc. Code: MPRS
 - b. Arts Presenting & Live Entertainment Management Online
 - c. Juris Doctorate & Master of Arts in Arts Presenting & Live Entertainment Management- Conc. Code: JDMA
4. Master of Music – Deg. Code: MM
 - a. Choral Conducting – Conc. Code: MCDC
 - b. Composition – Conc. Code: MTCP
 - c. Instrumental Conducting – Conc. Code: MCDI
 - d. Instrumental Performance – Conc. Code: MIPF
 - e. Jazz Pedagogy – Conc. Code: JPED
 - f. Jazz Performance (Instrumental – Conc. Code: MSJI or Vocal – Conc. Code: MSJV)

- g. Keyboard Performance and Pedagogy – Conc. Code: KPED
- h. Media Writing and Production – Conc. Code: MWPD
- i. Multiple Woodwinds – Conc. Code: MIPW
- j. Music Business and Entertainment Industries – Conc. Code: MBEI
- k. Music Business and Entertainment Industries Online Degree
- l. Juris Doctorate & Master of Music in Music Business and Entertainment Industries - Conc. Code: JDMM
- m. Music Education – Conc. Code: MEDU
 - i. Music Education with Certification – Conc. Code: MEDC
- n. Music Therapy – Conc. Code: MTYP
 - i. Music Therapy with Undergraduate Equivalency – Conc. Code: MTYE
- o. Musicology – Conc. Code: MUSY
- p. Keyboard Performance – Conc. Code: MKPF
- q. Studio Jazz Writing – Conc. Code: MSJW
- r. Vocal Performance – Conc. Code: MVPF
- 5. Master of Science – Deg. Code: MSMET
 - a. Music Engineering – Conc. Code: MUEE
- 6. Artist Diploma in Performance – Deg. Code: AD
 - a. Instrumental Conducting – Conc. Code: MCDI
 - b. Instrumental Performance – Conc. Code: MIPF
 - c. Keyboard Performance – Conc. Code: MKPF
 - d. Vocal Performance – Conc. Code: MVPF

Entrance Exams

The Frost School of Music requires certain incoming graduate students to take an entrance exam in Music Theory. Graduate students are expected to be well-prepared for this exam. Masters students who do not pass this exam must fulfill a remediation requirement prior to completion of the final project as required for the degree. Doctoral students who do not pass the entrance exam must fulfill a remediation requirement prior to applying for Doctoral Committee Approval. Please access [this link](#) for more information.

Degree Requirements: Doctoral Degrees

Doctor of Musical Arts (DMA)

The purpose of the Doctor of Musical Arts is to train the most promising musicians at the highest musical and intellectual level for prominent careers in their field. The degree stresses excellence in performance, composition, scholarship, and teaching. By its nature, the Doctor of Musical Arts provides opportunities for students with proven accomplishment to prepare themselves for the professorship.

For the Doctor of Musical Arts in Performance, Keyboard Performance and Pedagogy, Composition, Jazz Composition, Jazz Performance, Vocal Pedagogy and Performance, and Conducting, the candidate must meet all the general requirements for the PhD degree with respect to residence, total minimum credit hours, and qualifying examinations. The main distinction between the two degrees pertains to the required creative activity. The DMA emphasizes performance ability, as well as performance-related research. These creative efforts replace the dissertation requirements traditionally found in the PhD. In addition to specific courses and credit hours listed in the following pages, students pursuing the DMA must meet the requirements listed below.

Doctoral Committee for the DMA

This committee can be the same or different from the student's recital committee. The committee should consist of four members, including three members from the student's major area (one of whom is the committee chair), and one member from another department of the Frost School. The committee chair will be Regular Faculty and/or hold a doctoral degree (i.e., DMA or PhD) as well as graduate faculty status. Two other committee members will be Regular Faculty or members of the Graduate Faculty. At least one member of the committee must hold a doctoral degree (i.e., DMA or PhD). Committees are first approved by the committee chair and then the Associate Dean of Graduate Studies in the Frost School before students apply for candidacy. Requests for exceptions to these committee requirements can be submitted in writing for consideration by the Associate Dean of Graduate Studies in the Frost School.

Responsibilities of the committee shall include the following:

- Overseeing the doctoral essay or lecture recital, including approval of the topic and proposal, supervision of the writing of the essay or lecture recital, assessment of the quality of the final essay or lecture recital, and the quality of the final defense. In cases where special faculty expertise is needed for a particular essay topic, changes in membership of the doctoral committee may be made. Membership of the doctoral committee is approved first by the Associate Dean of Graduate Studies in the Frost School and subsequently by the Dean of the Graduate School.

Doctoral Cognates

Within the 60 credit hours required for the degree, DMA students may select a formal area of study known as the cognate. A total of 12 credit hours are devoted to the cognate. If a cognate is not selected, the student should work with the advisor to select a meaningful collection of elective music courses that complement the student's discipline.

The cognate allows the student to obtain specialized knowledge and skill in an additional area of music. For example, a student pursuing the DMA in instrumental performance may wish to obtain a cognate in musicology or music business. Completion of a cognate should give the student a heightened level of understanding in this topic area, and could give the student a competitive advantage when pursuing post-graduation opportunities. When completed, cognates are listed on the student's official transcript.

Cognates are offered in a number of Departments within the Frost School. Students must apply to the cognate Department for acceptance. This process may include an audition, interview, portfolio, or testing as determined by the cognate Department. Students must complete all requirements specified for a cognate to be recognized as having completed the cognate. Otherwise, the credits will be considered electives and the cognate will not be granted. In order to ensure completion of the cognate in a timely manner, students should decide on a cognate no later than the end of their second semester of full-time study.

No credits that are otherwise required in the DMA program can apply to the cognate. Any overlap will require approved course substitutions within either the DMA program or the cognate as determined to be most appropriate by the Faculty In-Charge of the selected cognate, as well as the Associate Dean of Graduate Studies. One course substitution is allowed per cognate.

Procedures for Completing a Doctoral Cognate

See Procedures for Completing a Cognate on this website (<https://admissions.frost.miami.edu/graduate/current-students/doctoral-cognates>):

1. Contact the Office of Graduate Studies to obtain a complete listing of required courses in a selected cognate.
2. Contact the faculty in-charge for the desired cognate.
3. Complete the application process for that cognate.
4. The designated faculty member must then complete and sign a Doctoral Cognate Acceptance Form and submit it to the Frost School Office of Graduate Studies.
5. Complete all required courses in the cognate with a grade of C- or higher. The cognate can then be listed on the student's official transcript at time of degree conferral.

List of Cognates, Respective Departments, and Faculty in Charge:

Arts Presenting and Live Entertainment Management, Department of Music Media and Industry, Gary Wood

Collaborative Piano, Department of Keyboard Performance, Santiago Rodriguez

Conducting: Choral, Department of Vocal Performance, Corin Overland

Conducting: Instrumental, Department of Instrumental Performance, Robert Carnochan

Instrumental Performance, Department of Instrumental Performance, Margaret Donaghue, Ross Harbaugh, Richard Todd, Svet Stoyanov

Jazz Performance, Department of Studio Music and Jazz, John Daversa

Keyboard Pedagogy, Department of Keyboard Performance, Naoko Takao

Music Business, Department of Music Media and Industry, Serona Elton

Music Education, Department of Music Education and Music Therapy, Stephen Zdzinski

Music Technology, Department of Music Theory and Composition, Will Pirkle

Music Theory, Department of Music Theory and Composition, Charles Mason

Musicology, Department of Musicology, David Ake

Vocal Accompanying, Department of Vocal Performance, Alan Johnson

DMA Qualifying Examinations

Qualifying examinations represent a significant milestone in the doctoral degree. All students pursuing the Doctor of Musical Arts degree must pass Doctoral Qualifying Examinations prior to proposing the DMA Essay, and prior to applying for candidacy. These exams represent a comprehensive and in-depth assessment of graduate student knowledge and skill level in the major discipline as acquired over a lifetime of academic and practical experience. Depending on the degree program, qualifying examinations may consist of timed written exams, take-home projects, performance-based examinations of musical skill, and oral exams.

Students who fail a qualifying exam (or a portion of the exam) can re-take the exam one time with Departmental approval. A student who fails a qualifying examination (or portion of the exam) for a second time will be dismissed from his/her respective degree program.

Discipline-specific qualifying exam procedures for each DMA degree can be found on our Graduate Studies website (<https://admissions.frost.miami.edu/graduate/current-students>). All DMA students are strongly encouraged to contact their advisors and Department Chairs to obtain more information on exam scheduling, expectations, and preparation.

Admission to Candidacy

Doctoral students may apply for candidacy after successfully defending the Doctoral Essay or Lecture Recital proposal. No student may receive the degree in the same semester or summer session in which he or she is admitted to candidacy.

Performance and Creative Requirements

DMA students in performance, jazz performance, or keyboard performance and pedagogy may present one recital before the qualifying examination (provided they have passed their qualifying recital). Before the second or third recital, depending upon program, students must have passed the Qualifying Examinations. All recitals are to be presented during either Fall or Spring semesters when classes are in session.

Performance Majors

Students accepted into the program must present three full-length (60 minute) doctoral recitals, and may choose from these options as decided in consultation with their studio teacher:

1. Three solo recitals
2. Two solo recitals and one chamber recital
3. Solo recitals may also include some chamber music which features the student's instrument or voice
4. One doctoral recital may consist of an Orchestral Mock Audition

Vocalists are expected to execute one or more substantial roles in a large scale work, e.g., opera or oratorio in addition to the solo recitals. Students majoring in accompanying and chamber music will present one solo recital, one chamber music recital, and three accompanying recitals. For Keyboard Performance and Pedagogy, an approved combination of recitals and pedagogy presentations is required.

Jazz Performance Majors

Students must present three full-length recitals.

Conducting Majors: Choral

No less than two approved full recitals shall be presented by each candidate.

Conducting Majors: Instrumental

Three approved public recitals (or the equivalent) with suitable performing groups must be given during the period of residency and prior to the oral examination.

Composition Majors

1. The candidate will be required to compose a piece of substantial proportions.
2. The candidate will be required to write a doctoral essay. The text will either detail the doctoral composition or discuss another topic as approved by the doctoral committee chair.
3. A public presentation of the candidate's compositions will be required. A series of smaller performances presented each semester on- or off-campus, a larger festival performance(s), or a cumulative solo recital at the terminal stages of the degree exemplify how this requirement can be fulfilled. Other options are possible with faculty approval.

DMA Final Project

By means of a written Doctoral Essay or Lecture Recital, all DMA candidates are expected to demonstrate their ability to conduct an original scholarly investigation and present its results in an articulate manner. All DMA students must pass a public oral defense of the Doctoral Essay or Lecture Recital. Detailed information on these projects and defense procedures is provided in the Frost School of Music Graduate Student Handbook (<https://admissions.frost.miami.edu/graduate/current-students>).

Doctor of Philosophy (PhD)

The Doctor of Philosophy degree is offered in Music Education, and Music Education with Music Therapy Emphasis. This rigorous curriculum prepares students to become innovative researchers, scholars, and outstanding leaders in these disciplines. Graduates are uniquely-prepared for careers in higher education, research, and administration. Candidates must meet all general requirements for the PhD degree as defined by the Graduate School of the University of Miami with respect to residence, total minimum credit hours, and qualifying examinations. In addition to specific courses and credit hours listed in the following pages, students pursuing the PhD must meet the requirements listed below.

PhD Qualifying Examination

All PhD students must complete a qualifying examination that includes two components. The first component consists of writing three scholarly papers that are independent of or significant extensions of documents written as part of other coursework. The second component consists of a one-hour, oral examination focusing on the written papers. After successfully completing this exam, students can apply for Doctoral Committee Approval, defend the dissertation proposal, and apply for Doctoral Candidacy. Students who fail a qualifying exam (or a portion of the exam) can re-take the exam, with committee approval. A student who fails a qualifying examination (or portion of the exam) twice will be dismissed from the degree program.

Qualifying exam procedures for the PhD degree can be found on our Graduate Studies website (<https://admissions.frost.miami.edu/graduate/current-students>). PhD students are strongly encouraged to contact their advisors and Department Chairs to obtain more information on exam scheduling, expectations, and preparation.

Doctoral Committee for the PhD

All students pursuing the Doctor of Philosophy degree must establish a Doctoral Committee to oversee the dissertation. The committee should consist of five members, including three members from the student's major area (one of whom is the committee chair), and one other member from another department within the Frost School, and one faculty member from outside the Frost School. The committee chair and two other members must be members of the Graduate Faculty. Requests for exceptions to these committee requirements can be submitted in writing for consideration by the Associate Dean of Graduate Studies in the Frost School.

Admission to Candidacy

Doctoral students may apply for candidacy after successful completion of all qualifying examinations as well as a successful defense of the dissertation proposal. No student may receive the degree in the same semester or summer session in which he or she is admitted to candidacy.

PhD Final Project: the Dissertation

The culminating project for the PhD is the Doctoral Dissertation. A PhD is traditionally considered a research-oriented academic degree, thus the dissertation should consist of independent, original research that demonstrates the candidate's mastery of both subject matter and scholarly method. All PhD students must pass a public oral defense of the Dissertation. Detailed information, including defense procedures, is provided in the Frost School of Music Graduate Student Handbook (<https://admissions.frost.miami.edu/graduate/current-students>).

Degree Requirements: Masters Degrees

Credit Hours and Grades

All masters degrees require a minimum of 30 credit hours. However, many masters degrees in the Frost School require more than 30 credit hours. Students are therefore advised to carefully read the respective bulletin pages for their chosen degree program. To graduate, students must have a cumulative GPA of 3.0 (B average). Grades below C- are not considered passing.

Master of Music Degree (MM) in:

- **Conducting, Choral or Instrumental**
- **Instrumental Performance**
- **Keyboard Performance**
- **Jazz Performance**
- **Vocal Performance**

In addition to specific courses and credit hours listed in the following pages, students pursuing these Master of Music degrees must meet all requirements listed below.

Ensemble Requirements

The curricula for Master of Music degrees in performance and conducting include participation in one ensemble during each semester that a student is registered for 7 credit hours or more. Certain performance degrees have additional ensemble requirements as found on the respective bulletin pages.

Conducting Recital Guidelines

Master's Recital

A compilation on DVD of conducting single or multiple works of live performances of major ensembles spread across the Masters' experience. These performances are arranged in consultation with the major professor who assists in the preparation of the performances.

Master's Advanced Recital

A full-length conducting recital is prepared and presented. The ensemble(s) and repertoire will be selected in close consultation with the major professor who will assist in the preparation process. All aspects of performance preparation including scheduling, venue arrangements, program notes, and the like will be carried out by the student under the guidance of the major professor.

Performance Recital Guidelines

Master's Recital

A full-length recital performed publicly by the student that may include chamber music in which the student's instrument plays a prominent role. Selection of repertoire is determined in consultation with the major professor who assists in the preparation of the performances.

Master's Second Recital

With advisor approval, masters students in performance may give a second recital. In the Department of Instrumental Performance, this second recital may take the form of an Orchestral Mock Audition.

Final Projects

All masters degrees in performance and conducting require the successful completion of a final, culminating project. For example, in some performance degrees, students must perform and defend an extended comprehensive jury. In other performance degrees, students must complete a scholarly document in the form of either a Recital Paper or Extended Program Notes which must be defended before the masters recital committee.

Detailed information on these documents and defense procedures are provided in the Frost School of Music Graduate Student Handbook (<https://admissions.frost.miami.edu/graduate/current-students>).

Students are advised to carefully read the respective bulletin pages and consult with their assigned advisor to obtain more information on the required final project for their degree program.

Master of Music Degree (MM) in:

- **Composition**
- **Jazz Pedagogy**
- **Keyboard Performance and Pedagogy**
- **Media Writing and Production**
- **Musicology**
- **Music Education**
- **Music Therapy**
- **Studio Jazz Writing**

In addition to specific courses and credit hours listed in the following pages, students pursuing these Master of Music degrees must meet all requirements listed below.

Masters Thesis or Masters Project

Students in these Master of Music degree programs must complete either a thesis or masters project and must pass a public, oral defense of their work. Detailed information on these documents and defense procedures are provided in the Frost School of Music Graduate Student Handbook (<https://admissions.frost.miami.edu/graduate/current-students>).

Comprehensive Examinations

Certain masters degree programs also require students to take written Comprehensive Examinations. Students should contact their advisors to obtain specific details regarding comprehensive examination requirements. The exam is typically written and evaluated by a committee of faculty members in the student's department who are familiar with the student's discipline.

Per Graduate School policy, students who fail the comprehensive exam may be given one opportunity to retake the exam, with the committee's approval. The re-take of the comprehensive exam may not be taken during the same semester as the original exam, or during a summer session. Additionally, the re-take must be completed within one calendar year of the original exam.

Master of Music Degree (MM) in:

- **Music Business and Entertainment Industries**

In addition to specific courses and credit hours listed in the following pages, students pursuing these Master of Music degrees must meet all requirements listed below.

Cumulative Exit Exam

Students must pass a cumulative exit exam as part of the Master of Music degree in Music Business and Entertainment Industries or Jazz Pedagogy.

Master of Arts Degree (MA) in:

- **Arts Presenting and Live Entertainment Management**

In addition to specific courses and credit hours listed in the following pages, students pursuing this Master of Arts degree must meet all requirements listed below.

Cumulative Exit Exam

Students must pass a cumulative exit exam as part of the Master of Arts degree in Arts Presenting and Live Entertainment Management.

Master of Science Degree (MS) in:

- **Music Engineering Technology**

In addition to specific courses and credit hours listed in the following pages, students pursuing this Master of Science degree must meet all requirements listed below.

Masters Research Project

Students pursuing the Master of Science degree in Music Engineering Technology must complete a substantial final project in the form of independent research that is defended before a faculty committee. Detailed information on this project and defense procedures are provided in the Frost School of Music Graduate Student Handbook (<https://admissions.frost.miami.edu/graduate/current-students>).

Degree Requirements: Artist Diploma

Artist Diploma (AD) in:

- **Instrumental Conducting**
- **Instrumental Performance**
- **Keyboard Performance**
- **Vocal Performance**

The Artist Diploma is an intensive, one-year immersion in performance or conducting study for candidates with highly-developed skills. In addition to specific courses and credit hours listed in the following pages, students pursuing the AD program must also complete two, full-length (60 minute) recitals. In the Department of Instrumental Performance, one of the Artist Diploma recitals may take the form of an Orchestral Mock Audition.

Instrumental Performance

http://www.miami.edu/frost/index.php/instrumental_performance/

The Frost School of Music's Department of Instrumental Performance has programs tailored to meet the needs and interests of students – like you – who aspire to performance careers. Graduates of these programs often pursue careers as symphony musicians, university professors, concert soloists, or band or orchestra conductors. Many graduates pursue advanced study and graduate degrees for further career preparation.

As an instrumental performance major, you will focus on developing and honing your performance skills on a selected brass, percussion, string, or woodwind instrument with assistance from faculty who have distinguished themselves as outstanding teachers and performing musicians. While the curriculum emphasizes development of tone and musicianship, as well as technical mastery of the instrument, it also includes music theory, music history and literature, orchestral literature and teaching methods. In addition, you will develop expertise in contemporary literature and chamber music performance. For more information, please visit the website for the department of Instrumental Performance (http://www.miami.edu/frost/index.php/instrumental_performance).

Doctoral Programs in Instrumental Performance

- D.M.A. in Instrumental Conducting (p. 1289)
- D.M.A. in Instrumental Performance (p. 1290)
- D.M.A. in Multiple Woodwinds (p. 1290)

Masters Programs in Instrumental Performance

- M.M. in Instrumental Conducting (p. 1291)
- M.M. in Instrumental Performance (p. 1291)
- M.M. in Multiple Woodwinds (p. 1292)

Artist Diploma in Instrumental Performance

- A.D. in Instrumental performance (p. 1288)

A.D. in Instrumental Conducting or Performance

Mission Statement

The mission of the **Artist Diploma in Instrumental Performance** is to:

- To stimulate the student's awareness and artistic creativity in the field of instrumental performance
- To provide students public performance opportunities in a supportive and encouraging environment
- To provide students with the performance skills necessary to allow them to pursue professional orchestra auditions, chamber music careers, national/international competitions, continued graduate study, and any other performance objectives necessary for a career as a classical instrumentalist.

The mission of the **Artist Diploma in Instrumental Conducting** program is:

- To provide students with the highest quality training possible to bridge academic training with technical preparation (score reading, rehearsal technique, and physical technique) that is necessary for an entry-level career as a professional artist;
- To provide students with performance opportunities that develop and demonstrate their ability to integrate musicianship and performance practice with limited academic requirements;
- To assist students with identifying opportunities and preparation for competitions, internships, apprenticeships, and other professional venues for the classical artist including contact strategies and specific competition preparation strategies.

Admission

Entrance to the program is limited to those individuals who have demonstrated exceptional skills in performance or conducting by audition. A fully enrolled student can complete the 18 credit hour program in one year.

M.M. in Instrumental Conducting

Mission Statement

The mission of the Master of Music Degree in Instrumental Conducting is to prepare musicians to enter the music conducting profession and/or pursue doctoral studies. The Master of Music degree program in Instrumental Conducting provides students with opportunities for advanced instrumental study, analysis of style, development of technique and musicianship demonstrated through the ability to conduct ensembles. Our principal focus is on the development of high-level performance skills that will enable a student to pursue a career as a professional conductor/musician.

The program objectives are:

- To provide students with the highest quality training possible to bridge academic training into entry-level careers as professional artists;
- To provide students with performance opportunities that develop and demonstrate the integration of musicianship and performance practice;
- To assist students with identifying opportunities and preparation for competitions, internships, apprenticeships and other professional venues for the classical artist.

Candidates must possess and demonstrate an unquestioned gift of musical leadership based upon broad experience with instrumental ensembles.

Advanced orchestration must be included in the program. Admission requirements include a baccalaureate degree in conducting or performance, accumulated practical experience with instrumental ensembles, and experience equivalent to an undergraduate requirement in orchestration.

Enrollment in this major is only by special permission.

Keyboard Performance

http://www.miami.edu/frost/index.php/keyboard_performance/

The Department of Keyboard Performance at the Frost School of Music is a dynamic center for music scholarship. Regardless if a student is more versed in classical or contemporary repertoire, the performance and academic opportunities are exceptional and for all areas of keyboard study. A degree from the Frost School will ensure broad comprehensive training for a student in a performance-intensive environment. Degree programs incorporate performance, music research, pedagogy, and professional skills to cultivate students for a professional life in music. Graduates may seek careers as concert performers, collaborative pianists/accompanists, and/or as artist teachers. For more information, please visit the website for the department of Keyboard Performance (http://www.miami.edu/frost/index.php/keyboard_performance/).

Doctoral Programs in Keyboard Performance

- D.M.A. in Keyboard Performance and Pedagogy (p. 1293)
- D.M.A. in Keyboard Performance (p. 1294)

Masters Programs in Keyboard Performance

- M.M. in Keyboard Performance and Pedagogy (p. 1295)
- M.M. in Keyboard Performance (p. 1296)

Artist Diploma in Keyboard Performance

- A.D. in Keyboard performance (p. 1293)

A.D. in Keyboard Performance

Mission Statement

The mission of the **Artist Diploma** (a one-year program) in Keyboard Performance is to:

- Provide students the highest quality of education available in the areas of piano performance and musicianship that will provide the foundation for continued academic work, and which could also lead toward a professional performance career as a classical pianist.
- To stimulate the student's awareness and artistic creativity in the field of piano performance
- To provide students public performance performance opportunities in a supportive and encouraging environment
- To provide students performance skills necessary for graduate degree auditions and national/international piano competitions.

Admission

Entrance to the program is limited to those individuals who have demonstrated exceptional performance skills by audition. A fully enrolled student can complete the 18 credit hour program in one year.

D.M.A. in Keyboard Performance and Pedagogy

Mission Statement

The mission of the Doctor of Musical Arts degree in Keyboard Performance and Pedagogy is to educate students in:

- Teaching strategies for all levels of piano students

- Knowledge of methods, materials, and standard teaching repertoire for all levels of piano students
- Career preparations for college-level teaching as a pianist including professional development and use of technology
- The performance of piano, building musicianship and technical ability to an advanced level
- Research skills on original topics in the field of keyboard pedagogy

Graduates of the program are prepared for careers as college or university faculty, performers, and teachers/proprietors of private and group teaching studios.

M.M. in Keyboard Performance and Pedagogy

Mission Statement

The mission of Master of Music degree in Keyboard Performance and Pedagogy is to educate students in:

- Teaching strategies for private and group piano lessons
- Knowledge of methods, materials, and standard teaching repertoire for beginning and intermediate students
- The use of music technology available for use in teaching
- The performance of piano, building musicianship, technical ability, and the ability to assimilate a large cross-section of recital repertoire
- Research skills on original topics in the field of keyboard pedagogy.

The Master of Music degree will prepare students for careers as performers, private music teachers, entry-level positions in community colleges and some four-year institutions, and to pursue advanced degrees in music-related fields.

Music Education and Music Therapy

The Department of Music Education and Music Therapy boasts two of the most innovative programs in the country and is committed to the preparation of outstanding music educators, therapists and scholars at all degree levels. The department faculty members are cutting edge scholars and researchers, holding leadership positions in internationally prominent organizations. Their contributions to research, scholarship, and pedagogy consistently inspire their students while informing the profession at large.

The music education program seeks to transcend all areas of music teaching and learning, from birth to older adulthood, and from public schools to community programs, allowing the principles of pedagogy to be applied broadly in a wide variety of contexts.

Music Education

A basic premise of the Music Education program is that music teachers must be both musicians and teachers; thus, competency as a musician is equally as important as having a strong theoretical and practical foundation in music education. Carefully coordinated courses emphasize sequencing of instruction in terms of student's musical development and incorporate ideas drawn from theory, research, and the practical experiences of the faculty and other successful practitioners. For more information, please visit the website (http://www.miami.edu/frost/index.php/department_of_music_education) for the department of Music Education.

Music Therapy

Music therapy involves using music as a tool to help people regain or develop important life skills, such as communication, physical movement, attention and memory, emotional growth or social skills. Therapeutic techniques are based on scientific knowledge regarding how the human brain and body respond to and utilize musical stimuli.

Music therapists work with individuals of all ages who require treatment due to deficits in physical, cognitive or social/emotional functioning.

Potential employment sites include medical or psychiatric hospitals, clinics, nursing homes, rehabilitation centers, special education or early intervention school settings, hospices, or correctional settings. Music therapy can be a rewarding career for the individual who has a strong musical background and who is interested in a health care profession. For more information, please visit the website (http://www.miami.edu/frost/index.php/music_therapy) for the department of Music Therapy.

Comprehensive Review#	
Total Credit Hours	45

- * One Elementary and one Secondary Methods course required for certification
- ** May substitute for Secondary Methods course
- *** A student holding a B.M. degree in music may work toward certification in Music Education concurrently with the M.M. degree in Music Education. The B.M. degree must have included at least 14 credit hours of music performance, 12 credit hours of music theory, 3 credit hours of conducting, 6 credit hours of music history, and credit hours in performance ensembles. The culminating project for this degree takes place within MED 775. This program is approved by the Florida Department of Education and leads to initial certification as a music teacher for grades K-12.
- # For the Comprehensive Review, students will (1) design a curriculum unit for a K-12 classroom during their student teaching semester, (2) implement this unit during their student teaching semester, and (3) measure the impact of instruction on their students' learning. Students will write a full report and give an oral presentation to an MED committee.

M.M. in Music Therapy

Mission Statement

The mission of the Master of Music degree program in Music Therapy at the Frost School of Music is to prepare students to develop:

- advanced and comprehensive musicianship
- independent research skill
- advanced level clinical knowledge and skill for the music therapy profession.

The preparation of students' academic, professional, and interpersonal therapeutic abilities will satisfy the required standards of practice of an advanced level practitioner as approved by the American Music Therapy Association. The Frost program seeks to recruit and retain highly qualified students to study and gain advanced level clinical skill for music therapy practice and employment, and to prepare them for further graduate study.

Music Media and Industry

Music Business and Entertainment Industries

In today's fast changing, multi-billion dollar international music and entertainment industries, there are more record labels, publishers, media companies, distributors, retailers, and product manufacturers actively promoting the sale and use of music than ever before. As the market for music shifts away from physical products and traditional methods to digital online and mobile, a greater number of competent, highly-skilled executives and entrepreneurs will be needed to meet the specialized demands of the new music industry. Since 1964, the Music Business and Entertainment Industries program has been at the forefront of music business education. The MBEI program has been carefully designed to prepare qualified music business students for these emerging opportunities.

Our graduate program, where students earn a Master of Music, focuses primarily on music business courses, with the opportunity to pursue additional coursework in both the School of Business and School of Communications. We also offer the only joint degree Juris Doctor (J.D.) and Master of Music in Music Business and Entertainment Industries (M.M.). For more information, please visit the website for the department of Music Business (http://www.miami.edu/frost/index.php/music_business).

Music Engineering Technology

Since 1975, the Music Engineering Technology program at the University of Miami Frost School of Music has pioneered education in music and technology, setting the standard by which the National Association of Schools of Music (NASM) accredits other such programs around the United States. Alumni of the program have contributed significantly to the music and audio industries and upon graduation pursue careers ranging from recording engineer to software designer.

The Music Engineering Technology program offers a two-year Master of Science graduate degree for students who have completed an undergraduate degree in electrical engineering or computer science. These students study the software and hardware design of audio systems and perform independent research that culminates in a thesis project. Upon graduation, these students are widely placed in top corporations that span the audio industry. For more information, please visit the website for the department of Music Engineering (http://www.miami.edu/frost/index.php/music_engineering).

Arts Presenting and Live Entertainment Management

Arts Presenting (AP Live) is a Live Entertainment Management Program with an emphasis on the performing arts and commercial music industries. AP Live offers a curriculum that's distinctly tailored to provide a thorough understanding of marketing, promotion, management, legal aspects, risks and finance of a diversity of live entertainment endeavors. AP Live students gain hands on experience producing events, marketing and promoting concerts and working with venues on all aspects of a live entertainment performance. For more information, please visit the website for the Arts Presenting Program (http://www.miami.edu/frost/index.php/arts_presenting).

Masters Programs in Music Media and Industry

- M.A. in Arts Presenting (p. 1303)
- M.M. in Music Business and Entertainment Industries (p. 1304)
- M.M. in Media Writing and Production (p. 1307)
- M.S. in Music Engineering Technology (p. 1306)

J.D./M.M. in Music Business and Entertainment Industries

The University of Miami School of Law and the Frost School of Music offer the first ever joint degree program in law and music business. Upon completion of this program, a student earns the Juris Doctor degree from the School of Law and a Master of Music in Music Business and Entertainment Industries degree from the School of Music.

In this specialization, students not only learn the essentials of law, but also the common practices of the music business – essential skills for becoming a successful attorney in the music industry. Through this joint program, students can complete both degrees in less time (3 to 4 years) while studying at a top law school and one of the best music schools in the country. And, as one of the four major music cities in the U.S. and as the music center for the Latin American Divisions of all major music companies, Miami offers exceptional internship and work opportunities. For more information, please visit our website (<http://www.law.miami.edu/academics/jd-music.php?op=0>).

J.D./M.A. – Master in Arts Presenting & Live Entertainment Management

The University of Miami School of Law in partnership with the University of Miami's esteemed Frost School of Music, Department of Music Business and Entertainment Industries, now offers a joint J.D./M.A. in Law and Arts Presenting & Live Entertainment Management.

This combination of degrees is ideal for Law School students looking to:

- Prepare for a career in entertainment law
- Develop a focus on the presentation of concerts, exhibitions, performances, and events

- Apply legal knowledge in the areas of contracts, risk management, marketing, and finance to the live entertainment/performance fields.

This program is similar to the J.D./M.M. program in Music Business and Entertainment Industries, but has a focus on the concert/performance arena.

Certificate Programs

- Certificate in Arts Leadership (p. 1304)
- Certificate in Arts Management (p. 1304)
- Certificate in Arts Presenting Fundamentals (p. 1305)
- Certificates in Legal Aspects of Music Business (p. 1305)
- Certificate in Music Business Fundamentals (p. 1305)
- Certificate in Music Entrepreneurship (p. 1305)
- Certificate in Music Rights Administration and Licensing (p. 1305)
- Certificate in Tour and Live Entertainment Administration (p. 1306)

M.A. in Arts Presenting and Live Entertainment Management

Mission Statement

The Arts Presenting and Live Entertainment Management (AP LIVE) masters degree program makes possible specialized, comprehensive and experiential learning in the multifaceted field of live arts presentations. Keen attention to leadership, project management, operations, personnel, finances and for-profit and non-profit arts business models serves as the foundation of the curricular learning, research and activity. With greater-Miami and arts connection to professional across the U.S. and beyond, students graduating from the University Miami and the Frost School of Music are fully prepared to enter the workforce as dynamic professionals poised to step in successfully to wide-varieties of arts settings around the world.

The program has three primary objectives:

- Each student is fully engaged in the entirety of Arts Presenting and Live Entertainment Management subject matter, with exposure to all of the professional-level issues of the field. To that end, courses are designed with syllabi that ensures a sequence of learning filled with each of the best-practice topics and tactics necessary for gaining professional level skills and wherewithal.
- Each student is engaged in research designed to capture far-reaching information formed from intense study and field experiences. Such research will result in (at least) two formal papers and presentations that exemplify exceptional effort and provide lasting value for the learner. Such research includes, but is not limited to creating and managing projects of various sizes, business models and implementation strategies, industry-related statistical analysis such as environmental scans, demographics and so forth, as well as the exploration of arts-based subjects that go to the heart of the arts presenting reason d'être.
- Each student is introduced to professionals in the field—across the U.S. and beyond—such that they have developed a meaningful and useful network of mentors and contacts offering insights into arts presenting management issues, best practices and opportunities for further learning. The network of contacts is compelled into existence by way of course-work throughout the degree program that relies upon expert input as part of the assignments objectives, as well as professionals introduced by faculty.

Music Theory - Composition

<https://composition.frost.miami.edu/index.html>

Degree Programs

Known for its aesthetic diversity and openness to the ever-changing and progressive world of composition, the Frost School of Music's Department of Music Theory and Composition has a long tradition of distinguished faculty and students. When today's post-baccalaureate composers decide to pursue a Master's Degree in Composition, they look to Frost faculty composers for inspiration and mentoring. At Frost, graduate students are well coached to take the next steps toward their professional maturation. They work one-on-one with our dedicated faculty to expand their music portfolios, enter competitions, apply for commissions and network in the music profession. Candidates for the Doctor of Musical Arts in Composition (D.M.A.) develop advanced research and teaching skills that are applicable to careers in higher education.

Doctoral Program in Music Theory - Composition

- D.M.A. in Composition (p. 1307)

Masters Programs in Music Theory - Composition

- M.M. in Music Composition (p. 1308)

D.M.A. in Composition

Mission Statement

The mission of the Doctor of Musical Arts program in Composition is to provide students with advanced preparation in the field of composition. The goals of the program are:

- To enable students to develop advanced compositional skills beyond the level of the Master of Music degree in Composition;
- To help students consider or choose their compositional directions or options in the 21st century;
- To help students get their music performed or realized;
- To help students develop a strong profile or identity as a composer.

M.M. in Media Writing and Production

Mission Statement

The mission of the Media Writing and Production Masters of Music degree program is to provide the student with the skills necessary to pursue a career as a creator and producer of commercial music. The purpose of the Media Writing and Production program is to provide advanced competency as a composer, arranger and producer of commercial music. In contrast with other departments, the Media Writing and Production department culminates with the writing and defense of a thesis conforming to graduate school guidelines. The program emphasizes the following objectives:

- Students will graduate in a timely manner from the program
- Students will be highly satisfied with their understanding of craft of creating music for media.
- Students will be prepared to find success in the media industry.

M.M. in Music Composition

Mission Statement

The mission of the Master of Music in Composition is:

- To provide the highest quality and most educational and creative environment for work relating to the creation and understanding of music;
- To foster advancement in composition;
- To provide students with advanced work in the field of composition and thus enabling a career in professional or scholarly pursuit of music;
- To substantially contribute to the Frost School of Music's role as a regional, national, and international nexus for the creation and understanding of music.

The objectives of the program are:

- To provide training for students to develop advanced compositional skills;
- To prepare students to meet the needs and challenges of the musician in the 21st century;
- To provide students with the skills, knowledge, and experience to complete independent and original work in the field;
- To give students an advanced knowledge of music as performers, composers, or listeners, enlarging and enhancing their musical interests and abilities.

Musicology

Degree Programs

Graduate students seeking the M.M. in Musicology at the Frost School of Music enjoy a balanced curriculum of study in music literature, analysis, performance, and research methods.

Our stellar faculty and extensive library resources help students fulfill their musical and academic goals while preparing for advanced study. Musicology majors interact and collaborate with others in a variety of musical disciplines, gaining insight into the role their own specialization plays in a thriving musical environment.

Masters Program in Musicology

- M.M. in Musicology (p. 1309)

M.M. in Musicology

Mission Statement

Faculty and students of the Department of Musicology (MCY) in the Frost School of Music at the University of Miami advance the interdisciplinary study of music by examining how, when, where, and why people create, experience, and understand music. Coursework in the program is designed to enable students to acquire in-depth knowledge of musicology and to develop students' abilities to write and talk effectively about relevant issues within musicology and related disciplines.

Curriculum Requirements

Code	Title	Credit Hours

Non-MCY Elective, In or Beyond Music		
Language Proficiency ¹		
Total Credit Hours		30

¹ Musicology students are expected to demonstrate proficiency in a language other than English, normally German, French, or Spanish. Proficiency examinations will be administered by the Department of Modern Languages and will consist of 1-2 passages from representative scholarly readings. Alternatively, enrolling in ITA 625, FRE 625, or an equivalent course at the graduate level may fulfill the requirement. This requirement should be completed by the beginning of the second year to facilitate research on the master's thesis.

Studio Music and Jazz

http://www.miami.edu/frost/index.php/studio_music_and_jazz/

Degree Programs

The mission of the Studio Music and Jazz Instrumental Degree Programs is to: (1) prepare jazz instrumentalists to enter the music profession or further jazz studies; (2) identify, recruit, and retain high quality students who seek to pursue studio/jazz performance as a career; (3) foster faculty creativity and performance which serves as a role model for students; (4) develop, and revise courses in jazz improvisation, jazz arranging/ composition and provide on and off campus performance opportunities; (5) produce in our on campus facility, recordings for the Down Beat Student Music Awards, compact discs, radio and Internet broadcast; and (6) provide a platform of learning that includes performance, composition/arranging, technology, conducting, scholarship and production.

Doctoral Programs in Studio Music and Jazz

- M.M. in Studio Jazz Writing (p. 1314)

D.M.A. in Jazz Composition

Mission Statement

The mission of the Doctor of Musical Arts program in Jazz Composition is to facilitate advanced composers/arrangers in developing their unique voice in jazz composition and to guide them in their continuing music career. With an emphasis on compositional originality, the Jazz Composition Program intends to provide students with opportunities for advanced study in jazz composition and orchestration to develop the jazz composition skills beyond that developed in their undergraduate and master's programs.

The program objectives are to:

- Identify, recruit, and retain high quality students who are seeking to develop their jazz and studio writing skills beyond that developed in their undergraduate and master's programs;
- Evaluate, revise, and develop curricular offerings to continue to meet the challenges facing professional musicians today;
- Maintain, present, and develop performance and outreach programs that will enable the jazz department to serve as a cultural resource in South Florida;
- Provide a creative, challenging, and nurturing educational experience that respects jazz tradition, reflects current professional trends, fosters innovation, and stimulates growth among students and faculty alike.

D.M.A. in Jazz Performance Instrumental/Vocal

Mission Statement

The mission of the Doctor of Musical Arts Degree in Jazz Performance is to:

- Provide the terminal degree through advanced, in-depth study in the areas of musicianship and performance practice that will support a professional performance career as a jazz artist;
- Provide performance opportunities that integrate the skills learned in both performance and academic classes, foster creativity and research, demonstrate advanced musical techniques and a thorough understanding of historical style and performance practice;
- Continue to develop the skills for analyzing and articulating thoughts about music in a scholarly written format;
- Provide requisite skills to manage the non-performance aspects of a career.

M.M. in Jazz Pedagogy

Mission Statement

The mission of the Master of Music degree in Jazz Pedagogy is to prepare students for careers in advanced level performance, private music teaching, or entry-level jazz teaching positions in community colleges and four-year institutions of higher learning. It will also provide a foundation for further advanced graduate work at the doctoral level. The underlying philosophy is that the best teachers are also skilled performers.

M.M. in Jazz Performance, Instrumental

Mission Statement

The mission of the Master of Music Degree program in Studio Music and Jazz Performance is to prepare jazz musicians to enter the music profession and/or pursue doctoral studies. The Master of Music Program in Jazz Performance provides students with opportunities for advanced instrumental or vocal study, jazz improvisation and interaction development, and both small and large group ensemble experience. Our principle focus is on the development of high-level performance skills that will enable a student to pursue a career as a professional studio/jazz musician.

The specific objectives are:

- Provide students with advanced jazz performance expertise beyond that developed in the bachelor's degree;
- To prepare students to meet the challenges facing professional musicians today;
- Provide students with an understanding of jazz tradition, current professional trends and an ability to innovate.

This program strives to identify, recruit, and retain high quality students who are seeking to develop jazz performance expertise beyond that developed in the bachelor's degree. We maintain, present, and develop performance and outreach programs that enable the jazz department to serve as a cultural resource in South Florida. We strive to provide a creative, challenging, and nurturing environment that respects tradition, reflects current professional trends, fosters innovation, and stimulates growth among students and faculty alike.

D.M.A. in Choral Conducting

Mission Statement

The mission of the Doctor of Musical Arts in Choral Conducting is:

- To provide a specifically music performance-based education and to train conductors to firmly establish and demonstrate professional level conducting skills;
- To provide a platform of learning that includes performance, creativity, scholarship, and significant research;
- To foster a sense of community involvement of the arts and in the arts.

Because choral conducting students are working with an "instrument" comprised of human singers, the variables with which they must work (as opposed to a solo instrument) are various. After graduation, they are prepared to work in any number of venues, including academia, sacred music setting (church music), professional choir, community choir, and more.

Mission Statement

The mission of the Master of Music Degree in Vocal Performance is to:

- Provide students the highest quality of education available in the areas of vocal performance and musicianship that will provide them the skills required to lead to professional performance careers as classical singers;
- Stimulate the student's awareness and artistic creativity in the field of vocal performance;
- Provide students public performance opportunities in a supportive and encouraging environment;
- Provide students the writing and research skills needed in order to adequately prepare them for study at the doctoral level;
- Provide career development opportunities through direct connections with professionals in the field, including directors, conductors, coaches, and other relevant individuals as chosen by the voice faculty.

Admission Requirements

The candidate must demonstrate the ability to sing in English, French, German, and Italian; be knowledgeable of the more difficult arias of opera and oratorio and of recitative in both the free and measured forms; have a thorough acquaintance with the general song literature; and be able to present a creditable recital.

Languages: If Italian (1 year), German and French (1 year of each or one semester of each) have not been completed upon entering the Master of Music in Vocal Performance degree, language courses can be taken at UM, but at the undergraduate level only. These courses/credits will not count toward the MM degree requirements. The student must show equivalent credit hours before graduation:

- Two semesters of college-level Italian
- Two semesters of college-level French
- Two semesters of college-level German

Curriculum Requirements

Code	Title	Credit Hours
Major Area		
Applied Lessons		8
Performance Ensembles ¹		4
MVP 652	Vocal Prfrm Prep	4
MVP 738	Advanced Vocal Pedagogy	3
or MVP 736	Voice Disorders	
MVP 812	Master's Recital	1
MVP 805	Masters Project	1
Artist Development Courses		3
MED 755	The Teaching Artist	

MMI 632	Arts Leadership	
MMI 735	World of the Working Musician	
MUS 735	Media Creation	
MUS 745	Peak Performance Strategies for Musicians	
MUS 755	Communication, Marketing, and Publicity for the Musical Artist	
Approved Electives		6
MCY 600 or higher elective		
MTC 600 or higher elective		
Other Music Electives		
Artist Development Courses		
MVP 788 Opera Theatre		
MVP 710 - 714 Vocal Literature for Teaching		
MVP 813 Masters Second Recital ²		
Total Credit Hours		30

¹ Students are required to participate in MVP 680 Opera Production or MVP 788 Opera Theater for every semester of study

² Student must have approval of the studio voice teacher

Nursing and Health Studies

<http://www.miami.edu/sonhs>

The University of Miami (UM) School of Nursing and Health Studies (SONHS) is committed to academic excellence, the advancement of healthcare, and service to society. Opportunities are available for students to study and earn course credit in a variety of local and international settings.

Mission

The mission of the SONHS is to educate students and support faculty committed to excellence in nursing and health science. Through research, education and practice, the school will create and disseminate health knowledge and prepare culturally competent leaders to provide safe service to our community, the nation and the world.

Nursing Accreditation

The MSN and DNP programs in the SONHS are accredited by the following:

Commission of Collegiate Nursing Education (CCNE)
One DuPont Circle NW, Suite 530
Washington, DC 20036
(202) 887-6791

The anesthesia program is accredited by the following:

Council on Accreditation of Nurse Anesthesia Education Programs (COA)
222 South Prospect Avenue
Park Ridge, IL 60068-4001
(847) 692-7050 (ext. 1154)

Graduate Degrees and Academic Programs

The SONHS offers a variety of academic programs across six graduate degrees:

1. **Doctor of Philosophy (PhD) in Nursing Science**
 - a. BSN-to-PhD
 - b. MSN-to-PhD
2. **Doctor of Nursing Practice (DNP)**
 - a. BSN-to-DNP, Nurse Anesthesia Track
 - b. MSN-to-DNP (*1 Year, 1 Year Plus, and 2 Year*)
3. **Master of Science in Nursing (MSN)**
 - a. Adult-Gerontology Acute Care Nurse Practitioner (*Full-time and Part-time*)
 - b. Adult-Gerontology Primary Care Nurse Practitioner (*Full-time and Part-time*)
 - c. Family Nursing Practitioner (*Full-time and Part-time*)
4. **Master of Science (MS)**
 - a. Health Informatics (*online*)
5. **Post-Master's Certificate**
 - a. Adult-Gerontology Acute Care Nurse Practitioner
 - b. Adult-Gerontology Primary Care Nurse Practitioner
 - c. Family Nursing Practitioner
 - d. Psychiatric Mental Health Nurse Practitioner
6. **Post-Bachelor's Certificate**
 - a. Health Informatics (*online*)

Admission

Admission to graduate programs in the SONHS is subject to the rules, regulations, and procedures as set forth in the Academic Bulletin, the Student Handbook (<http://www.sonhs.miami.edu/academics/student-handbooks>), and the SONHS website (<http://www.miami.edu/sonhs/index.php/sonhs/admissions>), and as determined by each graduate nursing program, the Graduate School, and the Office of International Admission. Applicants must meet specific admission requirements (<http://www.miami.edu/sonhs/index.php/sonhs/admissions>) before they may be evaluated for admission to the SONHS' graduate programs. Applications for the SONHS' graduate programs, except for the online Informatics programs, are submitted through NursingCAS (<http://www.nursingcas.org>). Applications for the online Informatics programs are submitted through UOnline (<http://www.miami.edu/online/admissions>).

Degree Requirements

The degree requirements for each SONHS graduate program are outlined under the "MASTERS" and "DOCTORAL" tabs above. All graduate programs are lock-step, meaning students must follow the Plan of Study under which they were admitted as listed in the Academic Bulletin and the Student Handbook (<http://www.sonhs.miami.edu/academics/student-handbooks>), and they must successfully complete the courses in each semester to progress to the next. Students should contact their appropriate Associate Dean or Program Director, or a staff member in the OSS (<http://oss.sonhs.miami.edu>) to discuss any questions related to their degree requirements.

Doctor of Philosophy (PhD) in Nursing Science

The principal goal of the PhD with a major in Nursing Science is to prepare scholars and researchers who will contribute to the growth of science in nursing through recognized methods of scholarly inquiry. Admission to the doctoral program is competitive.

Doctor of Nursing Practice (DNP)

The DNP degree is a practice-focused doctorate designed for nurses seeking a terminal degree in nursing practice. The program is offered in two formats: the MSN-to-DNP and the BSN-to-DNP, Nurse Anesthesia track. The BSN-to-DNP, Nurse Anesthesia program is available as an entry into practice degree, meaning it is available to post-baccalaureate nurses with or without a master's degree in nursing.

The outcome objectives for graduates of the DNP program are to:

- Integrate knowledge, theories, and concepts from the biophysical, psychosocial, analytical, and organization sciences to develop ethical health care systems and new frontiers for nursing practice that address health care disparities
- Evaluate research methods and findings to create an evidence base for nursing practice and health care delivery systems that reflect best practices and alleviate health care disparities
- Synthesize knowledge gained from traditional and innovative learning methods to lead quality, cost-effective health care collaborations addressing health care disparities
- Demonstrate expert clinical judgment and knowledge of health care systems to design, deliver and evaluate evidence-based care interventions to reduce health care disparities
- Model expert nursing practice and serve as mentors to nursing colleagues in their efforts to improve nursing practice and health care systems
- Employ knowledge of health care policy and economics to develop and evaluate programs to address health care disparities

Master of Science in Nursing (MSN)

The MSN degree is designed for professional nurses holding a Bachelor of Science in Nursing (BSN) degree. Registered nurses with baccalaureate degrees in other fields are also eligible to apply for admission. The following specialty tracks available in the SONHS focus on selected areas of advanced practice nursing and nursing education:

- Adult-Gerontology Acute Care Nurse Practitioner
- Adult-Gerontology Primary Care Nurse Practitioner
- Family Nurse Practitioner

Degree requirements may be completed in three semesters of full-time study or five semester of part-time study.

Master of Science (MS)

The MS in Health Informatics online program is designed to prepare graduates for rewarding informatics careers in a wide range of industries within healthcare. With the ongoing implementation of the Affordable Care Act, these roles will be essential as more organizations begin moving to electronic healthcare record systems.

Post-Master's Certificate

Post-Master's Certificate options are available in each of the following areas to students who possess a MSN degree and who wish to focus on selected areas of advanced practice nursing and nursing education:

- Adult-Gerontology Acute Care Nurse Practitioner
- Adult-Gerontology Primary Care Nurse Practitioner
- Family Nurse Practitioner
- Psychiatric Mental Health Nurse Practitioner

All students are required to complete core courses for their selected area of study and may be required to take additional courses at the graduate level based on their gap analysis.

Post-Bachelor's Certificate

The Post-Bachelor's Certificate program is designed to prepare graduates for rewarding informatics careers in a wide range of industries within healthcare. UOnline's flexible Informatics programs give students the option to complete their MS in Health Informatics while earning a Post-

Bachelor's Certificate in Health Informatics along the way or to focus on just earning the Post-Bachelor's Certificate itself. The 15 credit Post-Bachelor's Certificate is made up of the first 5 classes of the MS program. Credits completed for the Post-Bachelor's Certificate can be applied toward the MS degree.

Academic Policies

Student Responsibilities

Students in the SONHS are responsible for fulfilling their degree requirements. Students are also responsible for complying with all provisions outlined in the Academic Bulletin and the Student Handbook (<http://www.sonhs.miami.edu/academics/student-handbooks>), as well as all written changes to the plan of study.

Students are provided assistance by faculty advisors and other faculty members. Requests for deviation from the Plan of Study or SONHS requirements are granted only by written approval from the Associate Dean or Dean. Students who are in violation of the provisions of this Academic Bulletin may be withdrawn from classes unilaterally or have a stop placed upon their future enrollment by appropriate SONHS officials. The SONHS reserves the right to change academic requirements to include course offerings that ensure students receive the highest-quality and most-current education. Classes may be held on weekdays or weekends and will be listed as such in the course schedule. Any programmatic changes are transmitted by written notice in the Student Handbook (<http://www.sonhs.miami.edu/academics/student-handbooks>) or by an official in the SONHS.

Academic Bulletin and Student Handbook

In addition to the material listed in the Academic Bulletin, all SONHS students are held to the policies, procedures, and requirements listed in the most current Student Handbook (<http://www.sonhs.miami.edu/academics/student-handbooks>) for their respective degree program. Please note the material included in the Student Handbook is subject to change throughout the academic year and may not be reflected in the Academic Bulletin. The Student Handbook contains the most current information. Consult the appropriate Associate Dean or Program Director or reach out to a staff member in the Office of Student Services (OSS) (<http://oss.sonhs.miami.edu>) to discuss questions related to academic requirements and opportunities.

Technical Standards

Nursing education requires that the accumulation of scientific knowledge be accompanied by the simultaneous acquisition of skills and professional attitudes and behaviors. The nursing degrees awarded by the UM SONHS at the completion of the educational process certifies that the individual has acquired a base of knowledge and skills required for the practice of nursing at the respective undergraduate or graduate level. To this end, all courses in the curriculum must be completed successfully. In order to acquire the knowledge and skills to function in a variety of clinical situations and to render a wide spectrum of patient care, candidates for the undergraduate and graduate degrees in nursing must have abilities and skills in five areas:

1. Observation
2. Communication
3. Motor
4. Conceptual-Integrative
5. Behavioral-Social

Technological compensation can be made for some disabilities in certain of these areas, but a candidate should be able to perform in a reasonably independent manner and exercise independent judgment. Reasonable accommodations will be considered on a case by case basis for individuals who meet eligibility under applicable statutes. Any person expecting to need accommodations should request them prior to beginning the program, as some accommodations may not be considered reasonable and may impact an applicant's ability to complete all components of the program.

Observation

The candidate must be able to observe demonstrations and participate in didactic courses and simulated learning opportunities. A candidate must be able to observe a patient accurately at a distance and close at hand. Observation requires the use of common sense, as well as the functional use of the senses of vision, audition, olfaction, and palpation.

Communication

Candidates must communicate effectively using English in clinical and classroom settings. A candidate must be able to elicit information from patients, describe changes in mood, activity and posture, and perceive nonverbal communications. A candidate must be able to communicate effectively and sensitively with patients. Communication includes not only speech, but reading and writing. The candidate must be able to communicate effectively and efficiently with all members of the health care team in both immediate and recorded modes.

Motor

Candidates should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion and other assessment techniques. A candidate should be able to perform nursing skills requiring the use of gross and fine motor skills (e.g. IV insertion, venous blood draw, urinary catheter insertion). A candidate should be able to execute motor movements reasonably required to provide nursing care and emergency response to patients. Examples of emergency responses reasonably required of nurses are cardiopulmonary resuscitation, medication administration, and application of pressure to stop bleeding. Candidates must perform actions which require the use of both gross and fine muscular movements, equilibrium, and functional use of the senses of touch and vision. Candidates should also be able to assist and/or participate in various lifting activities.

Conceptual-Integrative

These abilities include measurement, calculation, reasoning, analysis, synthesis, and retention of complex information. Critical thinking requires all of these intellectual abilities in order to provide optimal nursing care. In addition, the candidate should be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures.

Behavioral-Social

Candidates must possess the emotional health required for the full use of their intellectual abilities, the exercise of good judgment, the prompt completion of all responsibilities attendant to the care of patients, and the development of mature, sensitive and effective relationships with patients. Candidates must be able to tolerate physically taxing workloads and to function effectively under stress in the classroom and clinical area. They must be able to adapt to changing environments, display flexibility and learn to function in the face of uncertainties inherent in the clinical environment. Compassion, integrity, concern for others, interpersonal skills, interest and motivation are all personal qualities that are assessed during the admissions and educational process.

Clinical Clearance

Before students can enter the SONHS' graduate nursing programs, they must successfully complete a drug test and a background check. Students must have a background report without any infractions, regardless of how they were resolved or adjudicated. Accordingly, if a student's background report contains any infractions, regardless of how they were resolved or adjudicated, he/she will not be able to successfully complete the background check and he/she will be withdrawn from the nursing program.

Students must also provide current immunizations as outlined by the SONHS and obtain a Basic Life Support (BLS) for Healthcare Providers certification from the American Heart Association prior to entry into clinical coursework. The BLS certification must include content on Automated External Defibrillators (AEDs). Additional certifications may be required for specific graduate programs.

Refer to the Student Handbook (<http://www.sonhs.miami.edu/academics/student-handbooks>) or speak with a representative in the OSS (<http://oss.sonhs.miami.edu>) for more information.

Grades

Students should refer to the Student Handbook (<http://www.sonhs.miami.edu/academics/student-handbooks>) for more detailed information on the SONHS' policies related to grades, progression, and dismissal.

Graduate nursing students must earn a B or higher in each course to progress. Any graduate student who receives a "C" or lower in a nursing course will be dismissed from his or her program. A grade of "B-" or "C+" for a course is below graduate standards, and the student must repeat that course. However, a student may only repeat one course, one time. The student will be dismissed if he/she fails a second course even if he/she retook and passed the previous failed course. A passing grade in all clinical experiences is required to pass a course having a clinical component (generally listed as a "lab section" by UM). Students who are not making satisfactory progress may also receive an academic alert at mid-semester or mid-course. All grades are included in the computation of the UM overall grade point average including those that are failed or repeated.

A grade of B or higher is considered a passing grade for the MS Health Informatics program, which includes all courses completed as part of the Post-Bachelor's Certificate Health Informatics program (if applicable).

When a course must be repeated, progression in the graduate program will be altered in order for prerequisites to be met. Such alteration will lengthen the time required to complete the graduate program.

Grade Point Averages (GPAs)

Students should refer to the Student Handbook (<http://www.sonhs.miami.edu/academics/student-handbooks>) for more detailed information on the SONHS' policies related to GPAs, progression, and dismissal.

Requirements to Continue

Students who are enrolled in SONHS' graduate programs must maintain a 3.0 GPA to progress.

Requirements to Graduate

Students who are enrolled in SONHS' graduate programs must maintain a 3.0 GPA to graduate.

Prerequisites and Corequisites

Students must successfully complete all specified prerequisites with a B or higher. Students must also register for all required corequisites at the time of enrollment. If students enroll in a course without the proper prerequisite or corequisite, they may be dropped from the course at the discretion of the course instructor, OSS, Program Director, Associate Dean, or Dean. Students should contact their appropriate Associate Dean or Program Director, or a staff member in the OSS (<http://oss.sonhs.miami.edu>) to discuss any questions related to course enrollment.

Transfer Credit

SONHS graduate students may, depending on their program, transfer up to 9 credits toward their graduate degree at the discretion of their Associate Dean. Detailed course descriptions or syllabi are required for transfer equivalency reviews.

Pre-immersion Course

Prior to enrollment in any SONHS graduate program, except for the Informatics programs, students must complete a mandatory online pre-immersion, orientation, and/or writing express course. These courses are listed in students' first term of enrollment but it does not affect students' GPAs. Failure to complete these courses may delay entry into the clinical nursing courses. Information about these courses will be provided to eligible students by the SONHS.

Research Experience

Students may participate in research experiences through the SONHS (<http://www.miami.edu/sonhs/index.php/sonhs/research>) during their time at the UM. Students should speak with their appropriate Associate Dean or Program Director to learn more about the research opportunities available to them at the UM.

Accommodations Policy for Students with Disabilities

The SONHS adheres to standards of the Americans with Disabilities Act. Any student needing special accommodations should seek assistance through the Office of Disability Services (ODS) (<http://umarc.miami.edu/arc/ODS.html>), which is the primary on-campus resource responsible for the coordination of services for students with disabilities. Students must follow ODS' policies, procedures, and timelines to request assistance. Please note ODS has strict deadlines to apply for accommodations; only students who are officially registered with ODS may be granted accommodations.

Financial Assistance

Students interested in obtaining financial assistance in the form of student loans, grants, etc. should contact the Office of Financial Assistance (<http://www.miami.edu/admission/index.php/ofas>).

The SONHS also offers limited merit-based and need-based scholarships to continuing students. The types of scholarships available and the qualifications for them vary by semester. Continuing students who wish to be considered for SONHS scholarships must apply for such scholarships through the SONHS General Scholarship Application. Calls for applications are e-mailed to continuing students once each semester to prompt students to apply who wish to be considered for a scholarship for the next term. Additional information on SONHS scholarships as well as health science-, nursing-, and public health-related outside scholarships can be found on the SONHS Scholarships website (<http://www.sonhs.miami.edu/admissions-and-financial-aid/financial-aid-and-community-scholarships>).

Full-time PhD students are considered for financial support, which may include:

1. **Tuition Scholarships:** These awards vary in amount and are intended to assist the recipient in pursuit of study and research as required by the degree. These scholarships are awarded on a competitive basis.
2. **Graduate Stipends:** These cash awards, paid monthly, are intended as part of an educational assistance program for PhD degree students. The stipends require service in the form of teaching, research assistance, or other appropriate educational activities that may be designated by the supervisor of the recipient.

Students may speak with a representative in the OSS (<http://oss.sonhs.miami.edu>) if they have any questions.

Facilities

The SONHS is located on the Coral Gables Campus. The four-story, Jerusalem-stone and stucco M. Christine Schwartz Center for Nursing and Health Studies opened in Fall 2006. The building features classrooms and clinical practice labs, conference rooms, a computer lab, and a simulation academy, all equipped with the latest technology. The spacious 53,000 square foot facility supports the work of more than 40 nurse-scientists and clinical educators and approximately 1,100 undergraduate and graduate students enrolled in the SONHS' health science, nursing, and public health programs.

In Fall 2017, the SONHS opened the new, state-of-the-art, 41,000 square foot, 5 story Simulation Hospital (http://www.miami.edu/sonhs/index.php/simulation_hospital). The Simulation Hospital is a one-of-a-kind facility, as it is one of the first education-dedicated simulation facilities located on a college campus. This new facility uses the latest simulation technology to provide SONHS students with the highest-quality healthcare education through a variety of simulated clinical environments. It also provides opportunities for public health-related simulation experiences and creates ample opportunities for inter-professional education (IPE).

Library resources for SONHS students are available at the Otto G. Richter Library (<http://library.miami.edu>) on the Coral Gables Campus and the Louis Calder Memorial Library (<http://calder.med.miami.edu>) on the Medical Campus.

Clinical experiences are offered in a variety of hospitals and health-related agencies in the community, including the University of Miami Hospital, Jackson Health System, Sylvester Comprehensive Cancer Center, Nicklaus Children's Hospital, and approximately 170 other community partners.

Master of Science in Nursing (MSN) Programs

- MSN, Adult-Gerontology Acute Care Nurse Practitioner (p. 1328)
- MSN, Adult-Gerontology Primary Care Nurse Practitioner (p. 1330)

- MSN, Family Nurse Practitioner (p. 1332)

Master of Science (MS) Programs

- MS, Health Informatics (online) (p. 1327)

Post-Master's Certificate Programs

- Post-Master's Certificate, Adult-Gerontology Acute Care Nurse Practitioner (p. 1342)
- Post-Master's Certificate, Adult-Gerontology Primary Care Nurse Practitioner (p. 1343)
- Post-Master's Certificate, Family Nurse Practitioner (p. 1343)
- Post-Master's Certificate, Psychiatric Mental Health Nurse Practitioner (p. 1344)

Post-Bachelor's Certificate Programs

- Post-Bachelor's Certificate, Health Informatics (online) (p. 1345)

Doctor of Philosophy (PhD) in Nursing Science Programs

- BSN-to-PhD (p. 1338)
- MSN-to-PhD (p. 1338)

Doctor of Nursing Practice (DNP) Programs

- BSN-to-DNP, Nurse Anesthesia Track (p. 1325)
- MSN-to-DNP (p. 1334)

BSN to DNP - Nurse Anesthesia Track

BSN-to-DNP, Nurse Anesthesia Track Degree Requirements

The BSN-to-DNP program is a lock-step program. Students must complete the coursework as specified in the Plan of Study for the specific track under which they were admitted and as listed in the Academic Bulletin and the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks). Students must also successfully complete the courses in each semester to progress to the next. Questions related to degree requirements should be directed to the appropriate Associate Dean or Program Director, or staff member in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services).

To receive the BSN-to-DNP, students must:

1. Complete all course work as required with an overall GPA of 3.0 or better
2. Complete all required clinical and practice immersion hours
3. Successfully complete the DNP scholarly project before graduation
4. Successfully complete annual benchmark exams, before progressing into next phase of the program
5. Successfully pass the DNP comprehensive examination, which is an integrative experience to demonstrate students' mastery of the outcome objectives of the program
6. Pass a comprehensive clinical nurse anesthesia oral board examination

BSN-to-DNP, Nurse Anesthesia Track Plan of Study

The BSN-to-DNP program is a lock-step program. Students must complete the coursework as specified in the Plan of Study below and in the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks) for the specific track under which they were admitted. Students must also successfully complete the courses in each semester to progress to the next. Questions related to degree requirements should be directed to the appropriate Associate Dean or Program Director, or staff member in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services).

¹ SIM (1 credit=2 lab hours)

* Note: This course is completed online via Blackboard prior to matriculation. Students are registered for the course in their first semester.

MS - Health Informatics (online)

Degree Requirements

The health informatics field is growing. The Bureau of Labor Statistics projects that employment in the field of health informatics increases 23% by 2022, much faster than average of 11% for all occupations nationwide. The UM's online Health Informatics program is designed to prepare graduates for rewarding informatics careers in a wide range of industries within health care, including hospitals, government, health insurance providers, medical vendors, pharmaceutical and biotechnology companies, and consulting firms. With the ongoing implementation of the Affordable Care Act, these roles will be essential as more organizations begin moving to electronic health care record systems.

The Health Informatics program prepares graduates to enter or excel in this field by offering rigorous courses, which cover:

- Information security
- Data analytics
- Project management
- Public health informatics
- Health information exchange
- Database design

The program includes a 3 credit capstone practicum, which allows students to apply the informatics knowledge they have gained to real-world situations and problems.

The Health Informatics program is a lock-step program. Students must complete the coursework as specified in the Plan of Study for the specific track under which they were admitted and as listed in the Academic Bulletin and the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks). Students must also successfully complete the courses in each semester to progress to the next. Questions related to degree requirements should be directed to the UOnline Academic Advisors (<http://www.miami.edu/online/student-services>).

Admission

For information on admission to the program please click here (<http://www.miami.edu/online/online-degrees/masters-health-informatics>).

Plan of Study

The Health Informatics program is a lock-step program. Students must complete the coursework in the order specified in the Plan of Study below, and they must successfully complete each course to progress to the next. Students are admitted to begin the program in the fall, spring, or summer. Questions related to degree requirements should be directed to the UOnline Academic Advisors (<http://www.miami.edu/online/student-services>).

MSN - Adult-Gerontology Acute Care Nurse Practitioner

Degree Requirements

The Adult-Gerontology Acute Care Nurse Practitioner program may be completed by finishing one of the following tracks:

- Full-time (3 Semesters)
- Part-time (5 Semesters)

The Adult-Gerontology Acute Care Nurse Practitioner program is a lock-step program. Students must complete the coursework as specified in the Plan of Study for the specific track under which they were admitted and as listed in the Academic Bulletin and the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks). Students must also successfully complete the courses in each semester to progress to the next. Questions related to degree requirements should be directed to the appropriate Associate Dean or Program Director, or staff member in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services).

Plan of Study (listed by track)

The Adult-Gerontology Acute Care Nurse Practitioner program is a lock-step program. Students must complete the coursework as specified in the Plan of Study below and in the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks) for the specific track under which they were admitted. Students must also successfully complete the courses in each semester to progress to the next.

Questions related to degree requirements should be directed to the appropriate Associate Dean or Program Director, or staff member in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services).

MSN to DNP

MSN-to-DNP Degree Requirements

The MSN-to-DNP program may be completed by finishing one of the following tracks:

- 1 Year
- 1 Year Plus
- 2 Year (Fall Entry)
- 2 Year (Spring Entry)

The MSN-to-DNP program is a lock-step program. Students must complete the coursework as specified in the Plan of Study for the specific track under which they were admitted and as listed in the Academic Bulletin and the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks). Students must also successfully complete the courses in each semester to progress to the next. Questions related to degree requirements should be directed to the appropriate Associate Dean or Program Director, or staff member in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services).

To receive the MSN-to-DNP, students must:

1. Complete all coursework as required with an overall GPA of 3.0 or better
2. Complete all required clinical hours

3. Successfully complete the DNP scholarly project
4. Successfully pass a comprehensive examination, which is an integrative experience to demonstrate students' mastery of the outcome objectives of the program

MSN-to-DNP Plan of Study (listed by track)

The MSN-to-DNP program is a lock-step program. Students must complete the coursework as specified in the Plan of Study below and in the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks) for the specific track under which they were admitted. PhD - Nursing Science

PhD, Nursing Science Degree Requirements

The PhD in Nursing Science program may be completed by finishing one of the following tracks:

- BSN-to-PhD
- MSN-to-PhD

The PhD in Nursing Science program is a lock-step program. Students must complete the coursework as specified in the Plan of Study for the specific track under which they were admitted and as listed in the Academic Bulletin and the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks). Students must also successfully complete the courses in each semester to progress to the next.

Questions related to degree requirements should be directed to the appropriate Associate Dean or Program Director, or staff member in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services).

To receive the PhD degree, the candidate must meet all the general requirements for the PhD degree with respect to course work, residency, the qualifying examination, 12 credit hours of dissertation, and successful defense of the dissertation.

Students in the SONHS are responsible for meeting their degree requirements. It is the student's responsibility to understand fully and comply with all the provisions of the Academic Bulletin and written changes to their Plan of Study. Students are provided assistance by faculty advisors and other faculty members. Requests for deviation from the Plan of Study or SONHS requirements are granted only by written approval from the Associate Dean or Dean. Students who are in violation of the provisions of this Academic Bulletin may be withdrawn from classes unilaterally or have a stop placed upon their future enrollment by appropriate SONHS officials. The SONHS reserves the right to change academic requirements to include course offerings that ensure students receive the highest-quality and most-current education. Classes may be held on weekdays or weekends and will be listed as such in the course schedule. Any programmatic changes are transmitted by written notice in the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks) or by an official in the SONHS.

PhD, Nursing Science Plan of Study

The PhD in Nursing Science program is a lock-step program. Students must complete the coursework as specified in the Plan of Study below and in the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks) for the specific track under which they were admitted. Students must also successfully complete the courses in each semester to progress to the next. Note: All summer semesters follow the Summer C Academic Calendar. Students in the MSN-to-DNP program must successfully complete 12 dissertation credits to complete their degree.

Post Masters Certificate - Adult Gerontology Acute Care Nurse Practitioner Degree Requirements

A Post-Master's Certificate in Adult-Gerontology Acute Care Nurse Practitioner is available to students who possess a MSN degree and who wish to focus in this specific area of advanced practice nursing and nursing education. All students are required to complete core courses for their selected area of study and may be required to take additional courses at the graduate level based on their gap analysis.

Once the gap analysis is complete, students will be issued a Plan of Study specific to their level of preparation. The Post-Master's Certificate program is then lock-step, which means students must complete the coursework as specified in their Plan of Study and must successfully complete the courses in each semester to progress to the next. Questions related to degree requirements should be directed to the appropriate Associate Dean or Program Director, or staff member in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services).

Post-Bachelors Certificate - Health Informatics (online)

Degree Requirements

UOnline's flexible Informatics programs give students the option to complete their MS in Health Informatics while earning a Post-Bachelor's Certificate in Health Informatics along the way or to focus on just earning the Post-Bachelor's Certificate itself. The 15 credit Post-Bachelor's Certificate is made up of the first 5 classes of the MS program. Credits completed for the Post-Bachelor's Certificate can be applied toward the MS degree.

The health informatics field is growing. The Bureau of Labor Statistics projects that employment in the field of health informatics increases 23% by 2022, much faster than average of 11% for all occupations nationwide. The UM's online Post-Bachelor's Certificate program is designed to prepare graduates for rewarding informatics careers in a wide range of industries within health care, including hospitals, government, health insurance providers, medical vendors, pharmaceutical and biotechnology companies, and consulting firms. With the ongoing implementation of the Affordable Care Act, these roles will be essential as more organizations begin moving to electronic health care record systems.

The Post-Bachelor's Certificate program is a lock-step program. Students must complete the coursework as specified in the Plan of Study for the specific track under which they were admitted and as listed in the Academic Bulletin and the Student Handbook (<http://www.sonhs.miami.edu/academics/student-handbooks>). Students must also successfully complete the courses in each semester to progress to the next. Questions related to degree requirements should be directed to the UOnline Academic Advisors (<http://www.miami.edu/online/student-experience/student-support>).

Admission

For information on admission to the program please click here (<http://www.miami.edu/online/online-degrees/masters-health-informatics>).

Plan of Study

The Post-Bachelor's Certificate program is a lock-step program. Students must complete the coursework in the order specified in the Plan of Study below, and they must successfully complete each course to progress to the next. Students are admitted to begin the program in the fall, spring, or summer. Questions related to degree requirements should be directed to the UOnline Academic Advisors (<http://www.miami.edu/online/student-services>).

GRADUATE STUDENT HANDBOOK FOR ONLINE STUDENTS

Message from the Dean

Graduate school at the University of Miami is a place where students gain proficiency in a specialty with the guidance of dedicated faculty in the presence of a community of world-class scholars. UM students are thought leaders and innovators whose accomplishments are showcased on a global stage. Our students represent the best and the brightest and their engagement with our faculty continues to elevate the University.

The Graduate Student Handbook for Online Students

The *Graduate Student Handbook for Online Students* is an excellent resource for graduate online students at the University of Miami. The Handbook contains all applicable policies and valuable information for graduate online students compiled into one comprehensive manual. Online graduate student enrollment is governed by this Handbook. This handbook describes policies and procedures pertaining to the Graduate School and online graduate study at the University of Miami. Policies or procedures for online graduate students may vary from policies or procedures of campus-based graduate students. **This Graduate Student Handbook is applicable to UOnline Students only.** In the event of a conflict between this handbook for online graduate students and any other applicable University policies or procedures, the terms of this handbook shall control. It is the student's responsibility to be aware of and comply with all policies, procedures and deadlines. Although the Handbook contains general information, students should be aware of regulations and policies that directly pertain to individual graduate programs, as many programs have additional requirements of their own, as well as a program handbook.

Policies Modification

This is the official University of Miami source for the enrollment, business, and financial policies associated with the University's UOnline programs. The University reserves the right to amend and update these policies at any point in the future. Amendments to these policies will be published on the University Registrar's website.

Additional University of Miami Policies

Please also consult these policies:

- Our privacy statement (http://www.miami.edu/index.php/privacy_statement) for our privacy and data collection policies.
- Technology policies
 - Acceptable Use of Information Technology Resources (http://www.miami.edu/it/index.php/a060_acceptable_use_of_info_tech_resources_by_students)
 - Use of University Computing Facilities (http://www.miami.edu/it/index.php/a046_use_of_university_computing_facilities)

About the Graduate School

The Graduate School is the administrative body overseeing all master's and doctoral programs.

Mission and Goal Statement

The mission of the Graduate School is to promote graduate education, scholarship and research; to support individuals, departments and programs in the pursuit of excellence; to foster innovative, multidisciplinary, and interdisciplinary activities; and to maintain high ethical and academic standards in graduate studies.

The standards of study and conduct in the Graduate School are high. They are not set and maintained by the Graduate School but rather by the faculty who determine the standards for their individual program. The Graduate School through its Council sets no course requirements for a degree. It does set certain general residence, grade and examination standards. Fundamentally, the Graduate School delegates responsibility to the student and his/her program. Within this broad responsibility, the recommendation for the degree rests with the faculty.

Academic Calendar

Please visit the Office of the University Registrar (<http://www.miami.edu/index.php/registrar/calendar>) website for the most recent academic calendar for UOnline programs.

Definitions

New Student

A new student is a student who has been admitted to a program and paid the enrollment deposit but not yet completed the first 7 days of the first program course.

Continuing Student

A continuing student is a student who has completed **at least** the first 7 days of the first course in their program and not yet graduated from the program.

Course

A course is an educational component made up of academic content, assignments and activities, the successful completion of which earns a student credit hours toward completion of a program. A course is delivered and accessed online via a learning management system (LMS). A course is 7 weeks long.

Academic Plan/Program of Study

A series of courses that make up a full degree or certificate program. All courses in a program must be successfully completed for a student to be considered for graduation.

Academic Year

The academic year is August through July and consists of 3 terms (Fall, Spring, Summer).

Term

A term is the discrete length of time in which courses are offered. A term is 15-weeks long and encompasses two 7-week sessions with a 1-week break in between them.

- Fall Term is August – December
- Spring Term is January – April
- Summer Term is May – July

Session

A session is the discrete length of time during which a single course is completed. A session is 7-weeks long.

General Academic Requirements and Regulations

All graduate work (except for the master's degree in Law, J.D. in Law, and M.D. degree) at the University of Miami is under the direction of the Dean of the Graduate School and the Graduate Council.

All graduate students at the University of Miami are subject to the general standards and requirements of their programs in regard to attendance, examinations, payment of fees and conduct, as well as to the specific requirements of the Graduate School. The graduate student is expected to assume the initiative in completing all requirements in the time specified.

Prospective students should note that "graduate study" means an integrated program of advanced, specialized study, based on an undergraduate major and/or adequate background, presupposing academic and personal maturity, and making much more than average demand upon the industry, initiative and scholarship of the student. The term must be distinguished from "post-graduation study" which means merely that courses, not necessarily of graduate level, are taken after the student has received a bachelor's degree.

To preserve its ideals of scholarship, conduct, and character, the Graduate School reserves the right and the student by his/her registration concedes the right, to require the withdrawal of any student for any reason deemed sufficient by the Graduate School at any time.

Time to Completion

Time to completion starts when a student begins any program in the Graduate School. All work must be completed within **three (3) years** of the start date to the graduate program, for those studying for the various master's degrees. Individual programs may set a shorter time period. Exceptions may be granted by the Dean of the Graduate School at the request of the Graduate Program Director. Course availability may vary by program and term; therefore students who may need to withdraw or take a break from their program should work directly with their Academic Advisor (<https://myonlinesupport.miami.edu/advising>) to ensure timely completion within the three (3) year window.

A student is ineligible for financial aid when it becomes mathematically impossible for him/her to complete the program within 150% of the length of the program. The length of the program is the amount of time necessary for a student to complete all requirements for a degree or certificate.

Each online degree program has a *minimum* time within which a student may complete the degree if the student takes the courses on a continually enrolled basis. Online degrees are flexible, and the actual time to completion, within the three-year limit, can vary by student. However, **if a student is not continuously enrolled for a period greater than one year, he or she must reapply to the program and will lose any tuition discounts previously applied to their account.** A student may be eligible for any tuition discounts available to new students at the time of the student's re-admission, and should contact the Online Enrollment Office to see if they qualify.

Graduate Transfer Credits

- Transfer credits from an outside institution may not be applied toward any online degree in the School of Business.
- A maximum of 6 credit hours may, with the permission of Program Director, be applied to the M.S. Ed. in Sport Administration degree online.
- Certain UOnline business courses may be transferable to other UOnline business programs. Students should contact their Academic Advisor (<https://myonlinesupport.miami.edu/advising>) to see if their courses are eligible to transfer.
- Graduate credit hours transferred from another university may not be applied toward a graduate degree at the University of Miami if their age at the time of acceptance into the University of Miami program **exceeds six years**. On an individual basis, students may be permitted to validate over-aged credit hours by examination, with program approval.
- Students in the UOnline degree programs may not transfer or transfer credit hours from the online degree version of these programs to the campus based versions of the programs without the permission of the Program Director and the Dean of the school. Should a student obtain permission for such a transfer, they will not be admissible back to their original program once transferred.
- Students may not transfer any credits from any campus-based program to any of the UOnline programs without the permission of the Program Director and the Dean of the school.
- Students may not take any individual UOnline course and transfer into an existing campus program using the online course as an elective course option.
- Transfer credit hours grades will not be factored into a student's cumulative grade point average at the University. Transfer credit hours only impact the number of credit hours earned.

Online Program Course Information

Students should review their school's program page for more information on course descriptions, pre-requisite requirements, and other program specifics. Course sequencing is subject to change each term and does not align with campus sequencing. For additional information on course sequencing or specific online student requirements, please contact Academic Advising (<https://www.tfaforms.com/433870>).

NURSING

MS Health Informatics (p. 1328)

Registration

Registration and Online Course Access

Registration starts about **4 weeks** before each term. Each term contains two 7-week sessions with about a 1-week break in between each session. Students will have access to their online course via Blackboard approximately four (4) days before the first day of class. **New and continuing students will be automatically registered by their advisor**, and are only registered for classes at the beginning of each semester. Students may take time off from their program, but run the risk of exceeding the time to completion requirements depending on available course sequencing. Students who wish to take time off should contact their Academic Advisor (<https://myonlinesupport.miami.edu/advising>) prior to their withdrawal to ensure appropriate course availability and to determine their ability to complete their degree program in the required time frame upon the student's return. **All UOnline students will have an Academic Advising hold showing in their CaneLink account throughout the remainder of their program.** This hold *will not* be removed and is used for registration purposes only. Students should pay close attention to the Academic Calendar for important registration deadlines.

New Student Registration

Students will be eligible for registration once the University has received their enrollment deposit, paid in full, and once students have **completed and passed** their required Student Readiness Orientation (SRO) no later than their given deadline. Students will be registered into courses for the entire first term, both first and second sessions (2 courses per term), by the Registrar's Office. In some cases, students may be registered for their Session I course prior to the start of the term and registered for their Session II course up to 10 days after Session I begins. If this occurs, a student may request to have their Session II course added prior to the start of the term by contacting Academic Advising (<https://www.tfaforms.com/433870>). Students will have access to the online course approximately **4 days before** each session start date. New students enrolled in a Certificate program, but plan on applying to a Master's program upon completion, are encouraged to contact Academic Advising (<https://www.tfaforms.com/433870>) immediately to discuss the most optimal registration options available.

Continuing Student Registration

Students will be eligible for registration provided they have **no financial or other holds on their account or are not withdrawn**. If a student has previously withdrawn from their UOnline program, and it has been less than one year since they have been enrolled, the student should contact their Academic Advisor (<https://www.tfaforms.com/433870>) to be re-enrolled for the upcoming term no later than the Readmission Deadline for their desired term. Please refer to the UOnline Academic Calendar (<http://www.miami.edu/index.php/registrar/calendar>) for important deadlines regarding registration for continuing students. Students will be registered into courses for the entire term, both first and second sessions (2 courses per term), by the Registrar's Office. Students will have access to their course approximately **4 days before** each session start date.

Financial, Academic and Other Holds

If students have any financial or other holds, they will **not** be registered into a course until they have met the requirements to remove the hold. Please refer to the UOnline Academic Calendar (<http://www.miami.edu/index.php/registrar/calendar>) for important dates regarding registration for continuing students and readmission. Students will not be registered past the deadline due to delayed payments on the students account. Tuition for each term must be paid in full and can not be deferred to a future term.

Full-Time Study

All online programs are designed for students to attend full time. Students are considered full time pending they meet the credit requirements posted by the Office of the Registrar. Students should contact their Academic Advisor (<https://www.tfaforms.com/433870>) for further information on part time status.

In all cases, determination as to whether or not a student is in full-time study is the privilege of the Dean of the Graduate School and the Registrar's Office.

No full-time faculty member may be a full-time online student, whether or not working toward a degree. Nor may a full-time online student be a full-time faculty member.

No full-time online student will be a principal investigator on any grant or contract, whether in name or fact. And no principal investigator will be a full-time online student.

Admissions

Applying to the Online Programs

In addition to holding the baccalaureate degree from an institution accredited by SACS or another regional accrediting body, the applicant for admission to the Graduate School should have the prerequisite coursework/work experience required by the program to which he/she is applying. In general, those applying for graduate admission should have achieved an overall average grade of "B" or better (3.0 G.P.A. on a 4.0 scale). International students will be required to give evidence of adequate knowledge of English through a TOEFL or IELTS test score.

Admission of a student to the University of Miami for any semester does not imply that such student will be re-enrolled in any succeeding academic semesters.

If students would like to apply to a UOnline program, they will need to create a profile and apply online via our on line application portal found here (<https://myonline.miami.edu/SignIn>). Here students will be assigned a personal Enrollment Advisor who will help guide them as the student submits all the components and required documents for their application. Students' Enrollment Advisors will also guide them through the onboarding process and be available to answer any questions. Students will then transition to their UOnline Student Advocate who will work with them through their first year, then transition to their designated Academic Advisor for important Graduation and completion requirements throughout the remainder of their program.

International Students (who attended college/university outside of the United States)

All graduate applicants who have attended a college or university outside the United States must submit official transcripts and diplomas (if available) from all colleges and universities attended to one of the **three approved evaluation services** listed below. Follow the specific instructions of the selected evaluation service to **request a course-by-course evaluation with degree equivalency and grade point average (gpa) calculation**. We do not issue any student Visa's for International UOnline students.

All online international students who have been admitted to an online program at the University of Miami are **not** eligible for an F-1 visa.

The evaluation report and copy of all the official documents used in the evaluation must be sent directly from one of the three approved evaluation services to the address below. It is the responsibility of the student to ensure their evaluation is sent to the correct address. Evaluations sent to other addresses on campus will **not** be received and will delay the admissions process.

University of Miami Online Enrollment Office 1320 South Dixie Highway Gables One Tower –Suite 902, **Locator Code: 2991**
Miami, FL 33146

The evaluation report and supporting documents are *required* before the Admissions Committee can review the application. Any documents received by the University will become the property of the University and will not be returned to the applicant or sent to a third party including the evaluation services.

Approved Evaluation Services

- Educational Credential Evaluators, Inc. (ECE) (<https://www.ece.org>)
- World Education Services (WES) (<http://www.wes.org/students>)
- Josef Silny & Associates (JS&A) (<http://www.jsilny.org/html/documents/universityofMIAMI-graduate.pdf>)

TOEFL (Test of English as a Foreign Language)

If students do not hold a U.S. undergraduate degree, they may be required to take the TOEFL exam. If they are required to submit a TOEFL score, students should visit this web page (<http://www.ets.org/toefl>) to arrange to take the test. The TOEFL and IELTS scores are valid for 2 years after the test date. The TOEFL code for the University of Miami is **5815**.

The University will consider candidates with these minimum TOEFL scores; however, TOEFL score requirements may vary by program:

TOEFL Internet Minimum Score	94
TOEFL Computer Minimum Score	240
TOEFL Paper Minimum Score	600

TOEFL Waiver

The TOEFL requirement may be waived for non-native English speakers provided they meet one of the following criteria:

- Students earned their undergraduate degree in a country where the official language is English (this does not include degrees from just English-speaking institutions or just a country where English is spoken).
- Students studied in the United States at an undergraduate level for at least one year or the equivalent of 30 consecutive credit hours.
- Students have lived **and** worked in an English-speaking country for the past two or more years.

Letters of Recommendation

Students will input their recommender's information directly into the online application which will generate an email with a unique link sent directly to the recommender. Letters of Recommendations must be submitted directly by the student's recommender using the unique link provided to them via email. Letters of Recommendation received in a Word document, body of an email, or any other format **will not** be accepted. The student's Enrollment Advisor may provide guidance to the recommender if they have technical trouble or questions regarding the process.

Admissions & Admissions Decisions

Once the University receives the student's **complete** application with all required documents, the admissions review process will start.

Regular Admit (with Official Transcripts)

If the application meets the standard admissions requirements and the University has received all official transcripts, the student will receive an offer of full admission **in approximately 48 business hours** after the University has received the completed application. The student will receive an official email from the Enrollment Advisor and be able to view the admissions decision via their Online Application portal.

Conditional Admit (with Unofficial Transcripts and/or Test Scores)

If the application fully meets the standard admissions requirements, the student may be conditionally admitted if the University has received and accepted the unofficial transcripts for all institutions attended and/or the student's unofficial test scores (if required). Unofficial transcripts may be considered acceptable **ONLY IF** the document is in a pdf format and **ALL** of the following items are legible on the transcript document:

- Name of the institution
- Student name
- Cumulative Grade Point Average (preferred)
- Course numbers
- Course names
- Credit hours earned
- Grades earned
- Degree conferred with date (if applicable)
- No other documents will be accepted

Students receive notification typically **within 48 business hours** after the University has received a complete application (including other required documentation) that the student has been Conditionally Admitted. The notification of Conditional Admission will also address the requirements the student will have to satisfy in order to be officially admitted. The failure to meet any of these conditions will be grounds for the withdrawal of the Conditional Admission and/or the withdrawal from all programs. The student will receive an official email from his/her Enrollment Advisor and be able to view the admissions decision via your Online Application portal.

Students **MUST** pay their tuition bill or have accepted their Financial Aid Award, no later than by the payment due date. Once students are fully admitted and have paid their non-refundable enrollment deposit, and successfully passed the Student Readiness Orientation (SRO), they may be eligible to receive financial aid within the same term, provided the University has granted the student full admission during the same academic year. Students may start their course and continue through the term as long as they have been awarded Financial Aid, and have accepted their Financial Aid award no later than the first day of class. Student's Financial Aid funds *will not be disbursed* until the student has participated in their first course and all official admissions documents and all required Financial Aid documents have been received. Students are responsible for checking CaneLink to ensure that their funding is ready for disbursement.

Students will not be registered for the next term until their current balance is paid in full. In the event the student's financial aid award is delayed, students should work directly with their Student Advocate or Academic Advisor to determine the appropriate next steps and ensure they meet the appropriate payment deadlines. Students should refer to the Academic Calendar (<http://www.miami.edu/index.php/registrar/calendar>) for important deadlines regarding Financial Aid Application due dates. Students may submit their FAFSA after the Financial Aid application priority consideration due date, but may have to use an alternative form of payment if their Financial Aid is not processed by the required payment deadlines.

Students should review the Monthly Payment Plan (MPP) (p. 1356) section for guidance on setting up a monthly payment plan, as well as the Payment Policies section for payment options and consequences for non-payment. Monthly payment plans are available for students at the beginning of each term. Fall and Spring MPP consist of four (4) payments; however, Summer MPP consist of three (3) payment options and is *only available to online students* at this time. **UM Employees are not eligible for Monthly Payment Plans at this time.**

Students should review the Transcripts section for official transcripts deadlines and consequences if the University has not received all official transcripts. Students should also review the UOnline (<http://www.miami.edu/index.php/registrar/calendar>) Academic Calendar (<http://www.miami.edu/index.php/registrar/calendar>) for official transcript deadlines.

Accepting Admission

When a student's admission decision has been made, the student will receive an official Admissions decision email from the Enrollment Advisor which includes next steps (<https://myonlinesupport.miami.edu/recently-admitted>) for accepting their offer. Students can also view the admissions decision the online application portal found here (<https://myonline.miami.edu>).

A student's Enrollment Advisor will guide him/her through the next steps (<https://myonlinesupport.miami.edu/recently-admitted>) to accept their offer of admission and pay their non-refundable enrollment deposit. A student's offer of admission has not been accepted until their non-refundable enrollment deposit has been paid.

Students will have **fourteen (14) calendar days to accept their offer of admission** by paying their non-refundable \$300 Enrollment Deposit. If a student fails to accept their offer of admission within the fourteen (14) calendar day timeframe according to the Deposit Date on the official Admission letter, the student's application will be withdrawn. Students who apply late will forfeit the full (14) calendar day acceptance policy and will be required to accept their offer no later than the last official Deposit Deadline as set on the UOnline Academic Calendar (<http://www.miami.edu/index.php/registrar/calendar>), which may be less than (14) calendar days. Students should refer to their official Admissions letter for their exact deposit deadline. If a student chooses to reapply, they will need to wait one (1) additional term before reapplying. Deferrals are not permitted unless the student has been approved for a Deferral Exception (<https://qafederation.ngwebsolutions.com/sp/startSSO.ping?PartnerIdId=https://caneid.miami.edu/idp/shibboleth&TargetResource=https://dynamicforms.ngwebsolutions.com/ShowForm.aspx?RequestedDynamicFormTemplate=2688d0b9-6031-4812-8f79-84fe37812020>).

Deferral Exception Appeal

In extenuating circumstances, students may choose to apply for a Deferral Exception (<https://qafederation.ngwebsolutions.com/sp/startSSO.ping?PartnerIdId=https://caneid.miami.edu/idp/shibboleth&TargetResource=https://dynamicforms.ngwebsolutions.com/ShowForm.aspx?RequestedDynamicFormTemplate=2688d0b9-6031-4812-8f79-84fe37812020>). Students who choose not to accept their offer of admission must apply for a Deferral Exception no later than their Deposit Deadline as specified by the Admissions letter, or will be withdrawn and will need to wait one (1) additional term before reapplying. Deferral Exception Requests are only eligible for the next immediate term. Students who would like to wait to start in future terms will need to reapply and should contact their Enrollment Advisor for additional information regarding documents required for admission.

Any student who has already accepted their offer of admissions must apply for a Deferral Exception no later than the official Completed Enrollment Application Deadline for their current term as per the Academic Calendar. (<http://www.miami.edu/index.php/registrar/calendar>) Deferral requests submitted after the deadline will not be reviewed. Any student who has already been withdrawn due to missing their deposit deadline, failing their SRO requirement, or by voluntarily submitting a Withdrawal request will not be eligible to defer and must reapply.

- If a student's Deferral Exception application is **denied**, the student's offer of admission will be withdrawn and they must wait one (1) additional term before reapplying.
- If a student's Deferral Exception is **approved**, the student's start date will be updated to **the next immediate term** and the student will be sent a new admissions letter indicating the approval and updated start date.
 - If a student **has not accepted their offer of admission**, and is approved for a deferral exception, the student will have fourteen (14) calendar days to accept their offer from the date of the deferral approval as per their deferral approval letter. If a student does not accept their offer of admission within the fourteen (14) calendar day time frame, the student's application will be withdrawn and the student must sit out (1) one additional term before reapplying.
 - If a student **has already accepted their offer of admission**, and has been approved for a deferral exception, the student's start date will be updated and a new admissions letter will be sent with the updated term and approval. If a student chooses to withdraw before the census date or is administratively withdrawn for any reason, the student must sit out one (1) additional term before reapplying to the program.

Any student who chooses to reapply for a future term is **not guaranteed admission** and will be subject to any changes in tuition, scholarships, and/or admissions requirements for that term.

Offer of Admission Expiration

Offers of Admission are **valid for one term only unless a Deferral Exception has been granted**. To officially accept the offer of admission, a student must log into Canelink (<https://myonlinesupport.miami.edu/recently-admitted>) and pay their non-refundable enrollment deposit. If a student has not accepted an offer of admission within the fourteen (14) day time frame/deadline on their official Admissions Letter, he/she must reapply to the University and program after sitting out one additional term. Student should contact the Online Enrollment Office to verify what documents must be submitted for consideration.

Reapplying/Readmission

There are a few situations in which students have to reapply to a program. Students will have to reapply to a program if:

- A student's original Offer of Admission has expired and he/she never started the online program.
- A student requests to change to a different program.
- A student has been withdrawn from his/her program for more than 1 calendar year (3 consecutive terms).
- A student failed to meet the requirements of a Conditional Admission.
- A student failed or did not complete the Student Readiness Orientation (SRO)

- A student's Deferral Exception Appeal was denied

To reapply, students can login and start the Online Application (<https://myonline.miami.edu/signup>) using their previous log-in credentials. A student should contact the Online Enrollment Office at 1-800-411-2290 if they have questions regarding the application.

Not Admitted

If a student's application does NOT meet the standard admissions requirements, he/she will receive a notification that he/she has not been admitted into the program typically **within 48 business hours** after the University received the student's completed application. Students will receive an email from their Enrollment Advisor and be able to view their admissions decision via their Online Application portal (<https://myonline.miami.edu/signup>).

If a student is not admitted into a program, he/she will receive an explanatory email from the Enrollment Advisor and will be able to view their admissions decision via their Online Application portal. Students may be eligible to reapply once they have met the admission requirements or choose to apply to a new program. A student's Enrollment Advisor will contact a student to discuss their options.

Transcripts for Admissions

Official Transcripts

- **MUST** Arrive in a sealed envelope with the school's stamp/seal across the back or on the institution's official envelope
- Be opened only by a member of the University of Miami admission staff
- Have a Registrar's signature and/or watermark and/or indented seal which appears on the transcript

Mailing Address for submission of transcripts:

University of Miami Online Enrollment Office 1320 South Dixie Highway Gables One Tower –Suite 902, **Locator Code: 2991**
Miami, FL 33146

Please ensure that the locator code is included in the address. Transcripts may not be received if address is missing the locator code or sent to another address on campus. **Students are responsible for ensuring that they have their transcripts sent to the address above** and are subject to all deadlines as per the Academic Calendar (<http://www.miami.edu/index.php/registrar/calendar>).

Electronic Transcripts

Electronic transcripts will be considered official **only** if they are sent directly from the accredited institution and received directly by the Online Enrollment Office at etranscripts@miami.edu. A transcript sent directly to the student's Enrollment Advisor will be considered as **unofficial** and will need to be re-sent to the official etranscripts address.

Official Transcripts, Scores & Conditional Admission

The University must receive official transcripts for all institutions attended before any student can be considered fully admitted into the University.

Official Transcripts/International Evaluations Due Date

If a student was Conditionally Admitted into a program with unofficial transcripts, the University **MUST receive the student's official transcripts from all institutions attended**, as entered on their online application, **or International Evaluations from an approved evaluation service, by the date listed on the UOnline Academic Calendar**. A student's Admissions letter will provide the exact due date for the official transcript(s) and he/she may check Canelink to verify that the University has received the student's official transcripts. Students should refer to the Academic Calendar (<http://www.miami.edu/index.php/registrar/calendar>) for important due dates.

Official Test Scores Due Date

If a student was Conditionally Admitted into a program with unofficial test scores and is required to submit official GRE, GMAT or TOEFL official test scores, the University **MUST receive their official test scores by the the date listed on the UOnline Academic Calendar**. A student's Admissions letter will provide the exact due date for the student's official test score(s) and he/she may check Canelink to verify that the University has received the student's official test scores. Students should refer to the Academic Calendar (<http://www.miami.edu/index.php/registrar/calendar>) for important due dates.

Financial Aid & Tuition Payment

If students apply for Financial Aid, Financial Aid will be NOT be awarded until the University has received the official transcripts from all institutions attended and/or test scores, if required.

Because Financial Aid will not be awarded until official transcripts from all institutions attended and test scores are received, a student **MUST** pay the tuition bill by the payment due date. Students should review the Payment policies for payment options and consequences for non-payment.

Official Transcripts and Test Scores Not Received

If Official Transcripts and/or Test Scores (if required) are NOT received by the due date:

- A student will be removed from the next course
- A student will be administratively withdrawn and may be reinstated if the University receives the student's official transcripts.
- A student may owe a tuition balance from being withdrawn and must have their tuition bill paid in full before being eligible for reinstatement

Enrollment Deposit

Once students have received their offer of admission or conditional admission, they will pay a **non-refundable** enrollment deposit in order to accept their offer of admission. Once the deposit in full has been received, students will be required to complete and pass their Student Readiness Orientation (SRO) within (4) four weeks or by the deadline provided, in order to be eligible for their first term registration.

What the Enrollment Deposit Is

The enrollment deposit payment is:

- Paid one time per UOnline program
- **Non-refundable** including if the student's Offer of Admission has expired, he/she failed the Student Readiness Orientation (SRO), and he/she never started the program or if they were conditionally admitted and did not meet the conditions for full admission.
- Due no later than **the date listed on the academic calendar**.
- Applied against a student's 1st tuition bill
- Valid for as long as the Offer of Admission is valid:
 - If a student's Offer of Admission for their UOnline program has **expired** and he/she reapplies to any program (campus-based or online), a student will be required to pay the deposit again and any applicable fees.
- Transferrable to a new UOnline program: if a student applies to a new UOnline program while the existing Offer of Admission is still valid, the student will not have to pay the deposit again.
- **Not transferrable** to any campus-based program.

Paying the Enrollment Deposit

After a student has received the Offer of Admission, the student will be provided access to Canelink (<https://canelink.miami.edu>) to pay the student's enrollment deposit with the following payment options:

- Online Credit Card payment:
 - MasterCard
 - Visa
 - American Express
 - Discover
- E-check (drawn on a US bank only)
 - Bank-to-Bank, Exchange Bureau or Wire Transfer.
 - Students are responsible for any fees or currency exchange processing charged by their bank or exchange bureau when transferring funds and should account for this when sending tuition payments.
- International Payments with Flywire (http://www.miami.edu/finance/index.php/student_account_services/cashier_services-1/international_student_payments)

New Students

Student Readiness Orientation

Once a student has been admitted and paid the non-refundable enrollment deposit, a student can start the Student Readiness Orientation. (<https://myonline.miami.edu/signup>) The Student Readiness Orientation (SRO) is an interactive series of **required** activities in the University's social media environment. and will be accessed by students through their UOnline student portal (<https://myonline.miami.edu/signup>). During the SRO, students will meet other students, prepare for online learning at the University of Miami and familiarize themselves with their support structures and University academic policies.

Students will **have (4) four weeks** to complete and pass the SRO and will receive an email with their official SRO completion deadline via email from their Enrollment Advisor. For students to be fully prepared for their courses, completion of the SRO is **mandatory** and must be passed within (4) four weeks of submitting the enrollment deposit. Students who submit their enrollment deposit **late** may have **less than (4) four weeks to complete the required activities** and should refer to their official SRO email for their deadline. **There are no extensions or exceptions allowed when completing the SRO.**

Students who fail to complete or do not pass the SRO by the deadline will be administratively withdrawn and will need to wait (1) one additional term before being eligible to reapply. Additional activities, such as the New Student Checklist, (<https://myonlinesupport.miami.edu/2015/08/13/new->

student-checklist) may also be required in order for students to be prepared for class. Student should work closely with their Enrollment Advisor and Student Advocate to receive guidance on completion of these additional activities.

Successful Completion

Once students have **successfully completed and passed all required activities** in the Student Readiness environment, they will be eligible to register for their first term's courses. Students should review the Syllabus to ensure that they complete the required activities with a passing grade.

Program Change

If a student **changes his/her program**, the student may be required to complete some program-specific portions of the Student Readiness Orientation (<https://myonline.miami.edu/signup>) or New Student Checklist (<https://myonlinesupport.miami.edu/2015/08/13/new-student-checklist>). If so, the student's Enrollment Advisor will inform the student and provide access to the relevant Student Readiness Orientation activities.

Offer of Admission Expiration

If a student's **Offer of Admission has expired** and he/she has not started a program, the student will be required to retake the Student Readiness Orientation (<https://myonline.miami.edu/signup>) once he/she has been re-admitted into the program.

Technical Requirements

To help ensure success, students should be proficient using e-mail, the Internet, and common desktop productivity software. During the course of the program, requirements (either hardware or software) may change from the original technology recommendation. Students should consult the software/hardware requirements within the program or with the faculty member or Student Support Team (<https://www.emailreform.com/builder/form/ift36G870a5UABMY>) for any technology recommendations that may have changed since the original recommendation mentioned below or within the program of study. Below are some **initial** recommendations. **Please note that these recommendations and requirements may change as technology changes and may also vary from course to course. Also please note that specific programs of study may have other specific requirements:**

Recommended Setup

- Internet access required; 6-10 Mbps speed or higher recommended; Broadband is recommended as students with dial-up may experience degraded performance
- Windows Vista/7 or Mac OS X with virtualization software (like Parallels with Windows OS)
- 2GB of RAM minimum
- 40GB hard drive
- speakers, and headphone connected to the computer
- Inkjet or laser printer
- Scanner or Scanning Application for mobile devices
- Portable media (thumb drive)

Software Requirements

- Recommended Web browser—current version of Chrome
- Other Web browsers (Internet Explorer ver. 9.0 or higher or Firefox's current and next most recent releases).
- Microsoft Office
- Adobe Reader ver. 10.1 or higher
- Adobe Flash Player ver. 11.7 or higher
- Apple QuickTime ver. 7.7 or higher
- Windows Media Player ver. 11 or higher
- Antivirus software (e.g., McAfee or Norton) installed, running, and kept current by promptly installing the upgrades and patches made available by the software manufacturer

Tablet/Laptop Recommendation

Students enrolled in programs that require participation in academic residencies are encouraged to use a laptop or tablet computer for their work. Some coursework may not be fully compatible with use of a tablet or mobile device; therefore, it is recommended that students have a desktop/laptop available if needed.

Additional Technology Requirements

Some programs may require additional technology requirements that are not mentioned above. Please refer to the program course(s) syllabi or course materials list in the UOnline Support Center (<https://myonlinesupport.miami.edu>) to review any special technology requirements for the program of study.

Cost, Fees, Billing and Payment

Tuition Includes

- Online learning environment and courses
- Application processing
- **Non-refundable** Enrollment Deposit (paid separately and deducted from 1st tuition bill)
- Technology fee
- Access to the online library, career center, and disability services
- Student and Technical Support

Tuition Does NOT Include

- Course Materials, Books and e-books
- Late Payment Fees, if assessed
- Graduation related fees

Your Tuition Invoice and Payment

Immediately after students have been registered into class, their tuition bill will be available in their student center through Canelink (<https://canelink.miami.edu>). Payment in full is due or arrangements to pay finalized **by the 1st day of the 1st class of each term**. If the University does not receive payment in full by this date, students will be removed from the online classes. **Students are responsible for ensuring their payments are made on time regardless of whether they are utilizing a third party for payment.** Students who are utilizing a third party for payment may need to find alternative payment arrangements to ensure they meet the payment deadlines as per the Academic Calendar. (<http://www.miami.edu/index.php/registrar/calendar>)

Payment Currencies

A student invoice is in **United States Dollars (USD)** and the University accepts payment only in **United States Dollar, USD**.

Payment Methods

The University offers several payment methods, described below. A student's tuition invoice will contain instructions for using these payment methods.

Credit Card

A student may pay by credit card via the University's partner, Elavon. A student can pay with:

- MasterCard
- Visa
- American Express
- Discover

Students will be charged a processing fee of 2.5% to pay by credit card.

eCheck (ACH)

Students may pay their tuition by E-check (ACH) online through your Canelink account:

- Click on the "Student Home" tab
- Navigate to Finances section
- Click on "Account Inquiry"
- Click on "Payment" and follow the instructions.

Students will not be charged any additional fee if they pay by e-Check. For additional help, contact the Student Support Team (<https://www.emailmeform.com/builder/form/ift36G870a5UABMY>).

Wire Transfer

Students may pay their tuition by wire transfer. The wire transfer instructions can be obtained through CaneLink.

How to obtain wire transfer instructions:

1. Log into CaneLink and go to Student Center, click on the Account Inquiry button under the Finances.
2. Click on Make a Payment to pay your tuition and select Wire Transfer Payment (USA & International).

3. Select the country from the “What country are you paying from” dropdown list. For domestic wire instructions, select the US wire transfer payment option.
4. Create a Flywire account, to track your wire payment, and enter basic identification information for the University to identify your payment.
5. The bank account wire instructions will be provided.
6. An email will be sent with a unique wire identification number.

Students should make sure their full name, student ID number, and unique wire ID number are included with the wire transfer to ensure the funds are applied correctly.

Wire/Bank Transfer Fees

Students are responsible for any fees or currency exchange processing charged by their bank or exchange bureau when transferring funds and should account for this when sending tuition payment. The University is not responsible for any fees students may incur during the transfer process.

Payment by a Third Party

A “third party sponsor” refers to any organization which formalizes a contract with the University and provides a guarantee letter assuming financial responsibility for a student’s, or group of student’s, tuition and fees, in full or portion thereof. Employers are **not** considered third party sponsors since sponsorship cannot be dependent upon the student’s continued employment with the organization. Students who plan on using their employers tuition reimbursement benefits are responsible for their tuition by the due date. Students with this type of assistance must inform the Financial Aid Office to ensure that financial aid is awarded appropriately and that funds are applied appropriately.

If a student’s tuition is paid via Third Party Sponsorship, **the student will still remain subject to all policies, including due dates, late payment fees and financial hold rules** and consequences.

Monthly Payment Plan (MPP)

Through the Monthly Payment Plan, term tuition payment is divided into 4 monthly payments for the Fall and Spring terms. The Summer term payment schedule is divided into 3 monthly payments and is only available to online students at this time. Each monthly payment is due on the 1st of the month and is **not** directly debited from the student’s account. **UM Employees are not currently eligible to enroll in the Monthly Payment Plan at this time.** UM Employees are encouraged to reach out to the Enrollment Advisor for other payment options.

- Students must pay each term in full before they will be registered for the next term (see payment methods section). This chart details the Monthly Payment Plan option available during the Fall and Spring Terms only.

Payment #	Reminder Sent	Payment Due By
1	1 week before	No later than 1st day of class
2	1 week before	1st of the next consecutive month
3	1 week before	1st of the next consecutive month
4	1 week before	1st of the next consecutive month

Late Payment

- If payment is not received by payment due date, a registration hold will be placed on a student’s account the next business day.
- Once payment has been received, the registration hold issued for late payment will be removed.

Tuition Reductions, Scholarships, Special Offers

During the Enrollment and Admissions process and at the University’s discretion, tuition reductions and scholarships may be offered to incoming students. Existing students will not be eligible for any **new** tuition reductions offered to incoming students. A tuition reduction will remain on a student’s account for the duration of the online program for which they received the reduction provided the student remains academically eligible and does not withdraw from the program for longer than one-year. Any student who is not enrolled in their program for greater than one year, will no longer be eligible for their initial tuition reduction and must reapply for admission to a program. A student may be eligible for any new tuition reductions being offered upon reapplication to a UOnline program. Students should contact an Enrollment Advisor for current offerings and qualifying criteria.

If students qualify for a tuition reduction, their Enrollment Advisor will provide them, in writing, the formal terms and conditions specific to that tuition reduction. The reduction will be included in a student’s tuition statement/note in Financial Aid package if applicable and deducted from tuition accordingly. If financial aid is awarded prior to the tuition reduction being applied to a student’s bill, the financial aid award will be adjusted accordingly. Student should contact (gradprof.finaid@miami.edu) the Financial Aid Office if they have questions regarding this adjustment.

UM Tuition Remission

As with other special Master’s degree programs and doctorate programs, UOnline programs are **not** available for University of Miami Tuition Remission. Please refer to the Tuition Remission policies on the University of Miami’s Human Resources website for additional details on the benefit program.

Tuition Increase

The University reviews tuition rates each year and reserves the right to increase tuition for existing students.

If the University does increase tuition:

- The increase will be implemented at the beginning of the Fall term and will apply forward to any future unbilled tuition.
- Students' tuition invoices moving forward will be adjusted to reflect the increase.

Change Payment Plan

Students may request to change payment plans. Currently the options are:

- Payment in Full to Monthly Payment Plan.
- Monthly Payment Plan to Payment in Full.

Payment Plan changes will be implemented **only at the beginning of the next term**. Students must complete any payments due for the current term as agreed under their current payment plan before they can request a new payment plan.

Students should contact the Student Support Team for more information about changing their payment plan. Formal requests must be in writing/online form

Billing Support

The student's Enrollment Advisor and Student Support Team will be able to answer questions or provide information about a student's invoice.

Graduate Grading Scale/Quality Points

An average of B (3.0) is required for a graduate degree, and no "D" credit hour may be counted toward the degree. All work leading to the graduate degree and taken as a graduate student will be counted in computing the quality point average, including courses graded "D".

No transferred credit hours are calculated into the University of Miami G.P.A.

Grade Interpretations

A	Excellent accomplishment.
B	Good accomplishment.
C	Fair, but below that expected of graduate students (C- is the lowest passing grade. Some programs may require higher standards.).
S	Symbol used for acceptable (U-unacceptable) thesis, dissertation, practicum and internship credit hour. It may be used for regular courses under special circumstances with the prior approval of the instructor, department chairman, and the Dean of the Graduate School. The Graduate School considers a grade of "S" to indicate a minimum of a 3.0 GPA in a graduate course if a student has taken no prior coursework on the graduate level. A grade of "S" reflects that a student is in good academic standing.
D	Poor (not acceptable for credit hour toward the advanced degree).
F	Failure.
W	Course dropped prior to the last day for withdrawing from classes as published in the official calendar of the University. Courses dropped after last date must have approval of Dean of Graduate School. Credit hour can be earned only by successful repetition of the course.
I	Incomplete work in passing status with the instructor's permission to complete the course. (Not to be used for thesis or dissertation credit hours). Student may request an incomplete from the professor if: • they have completed at least 75% of the course and • have a C or better in the course at the time of the request. The "I" should be changed to a letter grade within one (1) calendar year after it is given, unless the Academic Dean of the student's primary school or college and the Dean of the Graduate School approve the delay. If the "I" is not changed within one year, credit hour can be earned only by successful repetition of the course. (Note: Fellowships and financial aid may be withdrawn if there is an excess accumulation of "I"s on a student's transcript.).
NG	Symbol assigned by the Office of the University Registrar indicating that the instructor has not yet reported the student's grade. For a student to receive credit hour for the course, the instructor must report a passing grade prior to the student's graduation. ¹

¹

Quality Points

A+	4.00
A	4.00
A-	3.70
B+	3.30
B	3.00
B-	2.70
C+	2.30
C	2.00
C-	1.70
D+	1.30
D	1.00
F	0.00

The quality point average is then determined by dividing the total of quality points earned by the total of credit hours attempted. The symbols "S", "W", and "I" are not counted as credit hour attempted.

Repeating Courses & Academic Progression

A student may repeat a course in which a failing grade was earned, but the repetition of the course will not eliminate the previous grade from the record and the student is responsible for tuition and other costs related to the repeated course. A course may be repeated only once unless written authorization is provided by the Program Director, Dean of the School and Dean of the Graduate School. All grades are included in the computation of the quality point average. If a course in which an unsatisfactory grade (as determined by the program advisor) was earned is repeated and the repeat grade is a "C-" or higher, the number of credit hours required for graduation will be increased by the number of credit hours repeated. If a student attempts to retake a passed course, taking the same course to obtain a better grade, financial aid may be affected.

Registrations which involve repeating a course in which a grade of "A" or "B" has already been earned may not earn quality points or credit hours, nor count as credit hours attempted.

UOnline Business Students

Graduate students in the Miami Business School who fall below the 3.0 GPA may be placed on academic probation. Within one semester after their GPA falling below 3.0, Master's students wishing to repeat a course may petition their program director to do so. If the petition is approved by the graduate program director, the grade obtained in their second attempt will replace the original grade for purposes of calculating their GPA for clearance for graduation only. Authorization to repeat a course is limited to courses in which an unsatisfactory grade was earned (as determined by the graduate program director).

Additionally, a course may be repeated only **once** and students may not repeat more than two courses. The student's transcript will continue to show all attempts and the GPA computation will include all grades earned for purposes other than computing the GPA for clearance for graduation. If a course in which an unsatisfactory grade of lower than a "B-" was earned is repeated and the repeat grade is "C-" or higher, the number of credits required for graduation will be increased by the number of credits repeated. Registrations which involved repeating course in which a grade of "A" or "B" has already been earned may not earn quality points or credit hours, nor count as credits attempted.

UOnline MEd Sport Administration

UOnline students must earn a grade of "C" or better in KIN 601 before taking KIN 602 or KIN 603. Should a student earn below a "C" in KIN 601, the student will be automatically withdrawn from their Session 2 course for that term and rescheduled for the immediate next term in KIN 601 to repeat. Students failing to earn the required pre-requisite grade will be responsible for tuition for both attempts.

UOnline MS Health Informatics

The minimum passing grade for each course is a B. An overall average of B (3.0) is required for the graduate degree and certificate.

A student may receive only **one** (1) grade below a B while they are enrolled in the program. If that grade is below a C, the course must be repeated and a grade of B or better achieved on the retake. The repetition of the course will **not** eliminate the previous grade from the record and the student is responsible for tuition and other costs related to the repeated course. All grades are included in the computation of the quality point average.

Students receiving a second grade below B will be **dismissed** from the program

Attendance

Military Withdrawal

Tuition refunds of 100% are granted to students who withdraw due to military service, provided they do not receive credit hour for the course (see below). A student should contact their Academic Advisor if they need to request a military withdrawal (<https://qafederation.ngwebsolutions.com/sp/startSSO.ping?PartnerIdpld=https://caneid.miami.edu/idp/shibboleth&TargetResource=https://dynamicforms.ngwebsolutions.com>).

If a student receives federal financial aid and withdraws before they complete 60% of the term, a pro rated calculation will determine the amount of financial aid the student has earned. It is based on the amount of time the student was enrolled. This calculation is independent of any charges incurred at the University.

1. On recommendation of the Dean of the school, students who withdraw after the 5th week of the session because of official orders to active duty with the Armed Forces of the United States may be awarded credit hour in any course in which they have achieved a C or better up to the time of withdrawal. Instructors must certify that the student had achieved satisfactory accomplishment on the basis of previous work in the course by awarding an appropriate grade. Accomplishment of less than C should be entered on the permanent record as a withdrawal without prejudice (W).
2. Credit hour granted for a course under this policy should count toward graduation.
3. There should be no refund of tuition for courses for which credit hour has been granted. Refunds of courses not awarded credit hour should be on the same basis as complete withdrawals for military service.
4. The above recommendations are procedures for determining the awarding of credit hour and do not release the student from the usual withdrawal procedures.

Attendance and Participation, 1st Week (new and continuing students)

Online courses are **not** independent study courses. They involve a mixture of independent work outside the online course environment and presence within the course room. Authentic student engagement includes activities such as doing assigned readings, preparing and presenting quality assignments and participating substantively in online discussion. **Logging into the online course alone does not demonstrate adequate engagement or participation.**

Attendance during the first week of each course ensures you are on the right path to successfully completing your course and helps ensure that all students are assigned to groups with active participants to support quality group work. Participation in an online course is defined as the submission of a gradable assignment and/or discussion post about academic matters.

Students are required to attend, engage and participate in each of their online course(s) in an active and timely fashion. For each course, a student must participate by submitting their Week 1 assignments/discussion(s) during the first 7 calendar days from the course start date. This policy is the same for both New and Continuing students. If a new or continuing student logs in, but does not participate in any Week 1 activities by the end of day 7 (Eastern Standard Time) of a course, they will be administratively withdrawn from the program and must contact their Enrollment Advisor or Academic Advisor regarding eligibility for readmission. If a student's instructor has approved submission of late work in Week 1, **the student is still responsible for submitting the work no later than day 7 of the course or they will still be administratively withdrawn due to lack of participation regardless of any extensions made by their instructor.**

Attendance by Day 7

By the **end of the Day 7** (Eastern Standard Time) of each Course, a student must log into the Blackboard classroom to actively indicate his/her intention to participate in and complete that course. If by Day 7 the student has logged in and submitted an assignment and has not formally rescheduled his/her start date or withdrawn from the program the student will:

- Be considered as attending the course.
- Be obligated to pay for the course in full or make all payments in accordance with the monthly payment plan.
- Be responsible for adhering to all University policies and course policies

No Attendance by Day 7

Starting on the first day of each course the Enrollment Advisor or Academic Advisor will contact the student if the student has not yet logged in to the Blackboard classroom, and remind the student to do so. If the student does **not** log into the Blackboard classroom the **end of Day 7** (Eastern Standard Time), the student will be removed from the current course and will no longer be able to attend class. The student will be administratively withdrawn from the term and will need to contact their Enrollment Advisor or Academic Advisor to discuss their options for returning the following term.

If a student is a **new student** and has been administratively withdrawn for lack of participation, the student will need to sit out one (1) term before being eligible to reapply in the future. A student who chooses to remain in the course will be subject to all applicable deadlines as stated in the course syllabus.

If a student is a **continuing student** and the Academic Advisor has been able to contact the student, the student will be encouraged to submit a withdrawal request (<https://qafederation.ngwebsolutions.com/sp/startSSO.ping?PartnerIdpld=https://caneid.miami.edu/idp/>)

shibboleth&TargetResource=https://dynamicforms.ngwebsolutions.com) with a return date to ensure he/she is not withdrawn from the program. A student who chooses to remain in the program will be subject to all applicable deadlines as stated in the course syllabus.

The Enrollment Deposit will remain on the student's account and remains non-refundable. If the student has a tuition balance, it will be voided and reissued on the 1st day of the next course for which the student is registered should the student choose to change their start date.

Removed from Course Erroneously

If a student believes he/she has been **removed from the course erroneously**, the student should contact his/her Academic Advisor (<https://www.tfaforms.com/433870>) to discuss options.

No Contact or Response by Day 7

A student will be designated as a non-starter and will be administratively withdrawn, if a student has not logged into the Blackboard classroom by Day 7 and the Enrollment Advisor or Academic Advising Team has not been able to contact the student.

New Students

If an Enrollment Advisor cannot reach the student, or does not receive a withdrawal form (<https://qafederation.ngwebsolutions.com/sp/startSSO.ping?PartnerIdpId=https://caneid.miami.edu/idp/shibboleth&TargetResource=https://dynamicforms.ngwebsolutions.com>) from the student by Day 7 of the term, the student will be administratively withdrawn from the term. If the Offer of Admission expires, the student will be required to reapply to the program.

Continuing Students

If the Academic Advising Team cannot reach or does not receive a withdrawal form (<https://qafederation.ngwebsolutions.com/sp/startSSO.ping?PartnerIdpId=https://caneid.miami.edu/idp/shibboleth&TargetResource=https://dynamicforms.ngwebsolutions.com>) from the student by Day 7 of the term, the student will be administratively withdrawn from the program. The student should contact the Academic Advising Team (<https://www.tfaforms.com/433870>) if they intend to return in the future and should review the Academic Calendar for all applicable deadlines regarding readmission.

On-going Attendance

Students should continue to login and attend class every week. Students who do not participate in their courses as indicated by course requirements, or fail to notify the University that they are no longer attending will be administratively withdrawn. This may result in the requirement for the return of previously awarded federal financial aid. If the University is required to return federal student aid funds, the student will be required to pay any outstanding balance owed the University.

If a student receives federal financial aid and withdraws before they complete 60% of the term, a pro rated calculation will determine the amount of financial aid the student has earned. It is based on the amount of time the student was enrolled. This calculation is independent of any charges incurred at the University. This Federal Financial Aid calculation is separate and in addition to the Refund Policy and Schedule. If a student has questions pertaining to either policy, they should contact their Academic Advisor (<https://www.tfaforms.com/433870>).

Student Change Requests

Reschedule Start Date, Student Initiated

A new student may not reschedule his/her start date once the offer of admission has been accepted unless a Deferral Exception Appeal Request (p. 1350) has been approved.

Students must submit their Deferral Exception Appeal form (<https://qafederation.ngwebsolutions.com/sp/startSSO.ping?PartnerIdpId=https://caneid.miami.edu/idp/shibboleth&TargetResource=https://dynamicforms.ngwebsolutions.com/ShowForm.aspx?RequestedDynamicFormTemplate=2688d0b9-6031-4812-8f79-84fe37812020>) to their Enrollment Advisor and discuss the options and any financial and academic consequences no later than the approved deferral deadline. In extraordinary circumstances, such as a serious illness or accident, students may request to appeal their withdrawal date by contacting their Academic Advisor for more information regarding the UOnline Student Appeal process.

Choosing to Remain in the Course

If after discussing with their Enrollment Advisor students decide to **remain** in the course, students' Enrollment Advisors will confirm this verbal decision with the students formally, in writing via email, reiterating the financial and academic obligations. Students should reply to the email and confirm their wish to remain in the course. Otherwise, the original written request to withdrawn will be honored.

Choosing to Reschedule

If after discussing with their Enrollment Advisors students are approved to **defer** their start date, the Enrollment Advisors will process the formal request and:

- Students will be removed from any courses currently enrolled.
- Students will be enrolled into the courses for the term of the requested start date.
- Students may lose any associated tuition reductions (please see tuition reduction's terms and conditions).

The Enrollment Advisor should confirm formally within 1-2 business days that the start date change has been completed. The student may also view their start date change in Canelink.

The Enrollment Deposit will remain on the student's account. If a student has received the 1st tuition balance, it will be voided and reissued before the 1st day of the new start date.

Financial Obligations After Day 7

If a student does **not** contact his/her Enrollment Advisor and submit the Withdrawal Request form (<https://qafederation.ngwebsolutions.com/sp/startSSO.ping?PartnerIdId=https://caneid.miami.edu/idp/shibboleth&TargetResource=https://dynamicforms.ngwebsolutions.com>) by the end of Day 7, after Day 7 the student will be obligated to pay for the course in accordance with the refund policy and schedule and is not eligible for a credit of tuition towards the rescheduled terms.

Offer of Admission Expired

If a student's **Offer of Admissions has expired**, he/she will not be able to reschedule the start date and must reapply to the Program.

Add a Course

Each active student will be registered at least **14 days before each term start** into the appropriate course(s) according to the sequence and rules of the program. Any student requested changes will be implemented by **1 day before the course start** to ensure proper section and group assignments. New students must contact their UOnline Student Advocate to discuss any changes or concerns about course registration. Continuing students should contact their Academic Advisor to discuss any changes or concerns about course registration.

Drop a Course

A student may drop a course only **before or by the end of Day 7** (Eastern Standard Time) in order to avoid financial or academic (grading) consequences as per the refund policy and course syllabus.

If a student is a new student, he/she must contact the Enrollment Advisor to discuss the need to drop a course and potentially reschedule the start date. Due to the scheduling and sequence of courses, new students may need to be dropped from all courses in the term and may need to wait to be rescheduled at the beginning of the next available term for their program.

If the student is a continuing student he/she must contact the Academic Advisor to discuss the need to drop a course and withdraw from the program. In some cases, due to course scheduling and sequence, a student may need to drop all courses from the term and wait to enroll in a future term. Continuing students should work closely with their Academic Advisor to discuss all rescheduling options and ensure they are meeting the required times-to-completion for their program.

If a student receives federal financial aid and withdraws before he/she completes 60% of the term, a pro rated calculation will determine the amount of financial aid the student has earned. It is based on the amount of time the student was enrolled. This calculation is independent of any charges incurred at the University. If a student plans to drop a course or to withdraw from their program, they should consult both the Financial Aid withdrawal policy as well as the Refund Policy for UOnline programs to determine their financial responsibilities.

Retaking the Entire Course

If a student is required to retake an entire failed course and/or has achieved a grade lower than the required in a pre-requisite :

- The student will be re-registered for the failed course the next time it is offered or in the next session
- If the student has already been registered into the next course in the program sequence, the registration will be adjusted.
- The student will be billed the full course tuition.
- The student can receive Financial Aid to pay for the second course retake, but if the student fails and takes the course a THIRD time, Financial Aid will not be available and the student must pay for the course tuition out-of-pocket. A student may contact their Academic Advisor for more information on payment options.

Change of Program

Students may request to change from their current program to another online program. The student must apply to the new program and provide information necessary for admission into that program. The student's Enrollment Advisor will work with the student and the admissions staff to determine if the student is qualified to apply for a new program. Please note that program changes will be implemented as per the University's Online academic calendar.

If the student is still a new student (has not completed the 1st 7 days from the start date) the student should contact their Enrollment Advisor. If the student is a continuing student he/she should contact the Academic Advisor to discuss all of the options and the new program admissions

requirements. Tuition and any applicable tuition discounts that were previously applied to a new or continuing student's balance will be subject to change upon changing the program.

Certificate to Master's Students

Certificate students who are interested in completing the remaining half of the Master's courses must formally apply and get admitted to the Master's program in order to continue. Students should reach out to their Enrollment Advisor after their third Certificate course in order to allow enough time to apply for the Master's degree. There is no guarantee that students will be admitted into the Master's degree and are subject to the same admissions requirements as a new applicant. It is the student's responsibility to reach out to the UOnline Enrollment Department for further details on what is needed to apply.

Non-Standard Change of Program

If a student is eligible to change into a new program, he/she will be registered into the appropriate course and start the new program in the next available term. Approved completed courses will be transferred into the new program. Students will not be charged another enrollment deposit.

If a student does not meet the admissions requirements, the student should continue to work with the Enrollment Advisor or Academic Advising on other options available.

Withdraw from Course but Not Program

If a student needs to withdraw from a course but does not wish to withdraw from the program, the student should contact their Academic Advisor to discuss the academic and financial implications. The student should also review the academic calendar for important dates regarding withdrawal from a course and how the withdrawal will be reflected on the transcript. In some cases, due to course scheduling and sequencing, a student may need to drop all courses from the term and may have to wait longer than one term to be rescheduled. Continuing student should work closely with their Academic Advisor to discuss all rescheduling options and ensure they meet time-to-completion requirements for their program.

If after discussions with their Academic Advisor the student decides to withdraw from a course, the deadlines for withdrawal, as they appear on the academic calendar, will apply. Additionally, if students withdraw from the course after the "**last day to drop without a W**" as per the Academic Calendar, they will:

- Be required to pay for the course in accordance with the refund policy and schedule for online programs.
- Receive a Withdrawn (W) grade for that course and, for this reason, will remain registered in that course until the course end date so the final grade can be posted to the student's official record.

Students must submit their Withdrawal Request (<https://qafederation.ngwebsolutions.com/sp/startSSO.ping?PartnerIdpld=https://caneid.miami.edu/idp/shibboleth&TargetResource=https://dynamicforms.ngwebsolutions.com>) no later than the "**last day to drop With a W**" as per the Academic Calendar. Any Withdrawal requests submitted after this date will not be processed for the current session. The student will remain in their current course and must be resubmit the Withdrawal form (<https://qafederation.ngwebsolutions.com/sp/startSSO.ping?PartnerIdpld=https://caneid.miami.edu/idp/shibboleth&TargetResource=https://dynamicforms.ngwebsolutions.com>) after the course ends in order to be formally withdrawn.

Withdraw from Program

If students are withdrawn from the program this means they are permanently suspended from continuing with their studies. Therefore, students will not be registered for future courses or have access to the online student community, the academic environment or other related program privileges.

If a student is considering withdrawing from the program, he/she should be aware of the financial and academic consequences for doing so. There are different consequences for withdrawing **before and after Day 7**.

If a student receives federal financial aid and withdraws before he/she completes 60% of the term, a pro rated calculation will determine the amount of financial aid the student has earned. It is based on the amount of time the student was enrolled. This calculation is independent of any charges incurred at the University as per the refund policy and schedule. Students should contact their Academic Advisor before withdrawing to fully understand their financial obligations upon withdrawal.

Student-Initiated Withdraw from Program BEFORE Day 7

Should a student wish to withdraw from the program **before, or by the end of Day 7** (Eastern Standard Time) of their first course, students must submit a Withdrawal Form (<https://qafederation.ngwebsolutions.com/sp/startSSO.ping?PartnerIdpld=https://caneid.miami.edu/idp/shibboleth&TargetResource=https://dynamicforms.ngwebsolutions.com>) by the end of Day 7 (Eastern Standard Time) of their current course to make the request. If the student decides to withdraw from the program by end of Day 7 of the current course:

- The student will be removed from their course(s).
- The student will be refunded for the course(s) in accordance with the refund policy for online programs (minus the enrollment deposit).
- The course(s) will **not** appear on the student's record.

The effective program withdrawal date will be the date/time the Withdrawal Form was submitted and should be processed within 3-4 business days by the Office of the University Registrar. Should the student's withdrawal need to be reviewed by other departments, such as Financial Aid, processing time may be extended to 14 business days.

The Enrollment Deposit remains non-refundable. If the student received a tuition invoice, it will be recalculated or cancelled in accordance with the refund policy and schedule and effective date of program withdrawal.

Student-Initiated Withdraw from Program AFTER Day 7

If the student would like to withdraw from the program **after Day 7** (Eastern Standard Time) of the course start, students must submit a Withdrawal Form (<https://qafederation.ngwebsolutions.com/sp/startSSO.ping?PartnerIdpId=https://caneid.miami.edu/idp/shibboleth&TargetResource=https://dynamicforms.ngwebsolutions.com>) by the end of Day 7 (Eastern Standard Time) of their current course to make the request. If the student decides to withdraw from the program or their current course:

- The student will be removed from any course currently enrolled.
- The student will receive a **Withdrawal (W)** on the student's record for their course.
- The effective program withdrawal date will be the date/time the Withdrawal Form was submitted and should be processed within 3-4 business days by the Office of the University Registrar. Should the student's withdrawal need to be reviewed by other departments, such as Financial Aid, processing time may be extended to 14 business days.

The enrollment deposit remains non-refundable. Any tuition payments made by the student for the course through the time of withdrawal will not be applied or credited towards any future courses the student may enroll into. If a student is using Financial Aid, a recalculation of financial aid may be required to determine if any funds need to be returned to Title IV. In this case, the calculation may take up to 45 days from the effective date of withdrawal to appear on the student's account. Students may check Canelink to review their account and balance.

Students must submit their Withdrawal Request (<https://qafederation.ngwebsolutions.com/sp/startSSO.ping?PartnerIdpId=https://caneid.miami.edu/idp/shibboleth&TargetResource=https://dynamicforms.ngwebsolutions.com>) no later than the **"last day to drop With a W"** as per the Academic Calendar. Any Withdrawal requests submitted after this date will not be processed for the current session. The student will remain in their current course and must be resubmit the Withdrawal form (<https://qafederation.ngwebsolutions.com/sp/startSSO.ping?PartnerIdpId=https://caneid.miami.edu/idp/shibboleth&TargetResource=https://dynamicforms.ngwebsolutions.com>) after the course ends in order to be formally withdrawn.

Administration-Initiated Withdraw from Program

The student may be withdrawn from the program for academic progress issues, academic integrity, non-payment or other administrative issues. In this event, the student will receive formal notification that he/she will be withdrawn from the program.

The student will still be responsible for completing payment on any previously taken courses and will be subject to all billing, payment and collections policies.

Withdraw from Institution

If the student requested to withdraw from the program, he/she will be formally withdrawn from the Institution within 1-calendar year/365 days of the effective withdrawal date on record. Until this time, the student may still request to be reinstated to the program under certain circumstances. A student should contact Academic Advising for next steps on reinstatement if they choose to return after that time.

If the student is withdrawn from the program he/she will be withdraw from the Institution immediately and may not be reinstated either to the program or Institution.

Withdrawal Appeal Process

In extraordinary circumstances, such as a serious illness or accident, students may request to appeal their withdrawal date by contacting their Academic Advisor (<https://www.emailmeform.com/builder/form/u0FnTh276J4GycEdxz7>) for more information on the UOnline Withdrawal Appeal process. The appeal form must be submitted within 30 calendar days from the date of withdrawal from the University or if the appeal is being submitted for a semester that is completed, the form must be submitted within 30 calendar days of the last day of the end of the semester in question. Students must adhere to the specific documentation requirements as stated on the Appeal Form and submit all required documentation, along with the completed form to registrar@miami.edu. A decision will be sent electronically to the email address provided on the Appeal Form within a months time from the date it was received.

Reinstatement to Program

If a student has been withdrawn from the program, he/she may be reinstated to the program if:

- The student was **not** withdrawn from the program for academic progress or misconduct reasons.
- The student was **not** withdrawn from the Institution or is not in the process of being withdrawn from the Institution.
- The student has no unpaid tuition balance.

- The student has been withdrawn from the program for **less than 1 calendar year** (365 calendar days). If the student is withdrawn for **more than 1 calendar year**, he/she must reapply to the program.

Students may not credit any previously paid tuition to courses they register into once reinstated and should contact their Academic Advisor (<https://www.emailmeform.com/builder/form/u0FnTh276J4GycEdxz7>) to discuss the reinstatement process and requirements.

Late Payments, Holds, Collections and Refunds

Late Payment Fees

A payment is considered late if it has **not been paid by 1 day after** the payment due date. Late fees may be assessed to the student's account.

Financial Hold

Students are expected to pay tuition on time. Paying on time ensures timely registration into subsequent courses so that a student can continue to advance toward completing the program. Students must pay for each term in full before they can continue on to the next term.

If a student is **15 or more days past due on 1 or more invoices**, he/she will be placed on Student Account/Financial Hold.

If a Student Account/Financial hold is placed, students:

- will be able to complete the current course
- will **not** be registered into future courses until all outstanding invoices have been paid.
- will **not** be able to receive transcripts or a diploma

Placement on Student Account Hold

Students will receive a reminder that payment is due as well as overdue. Students will also be notified once a Student Accounts Hold is placed on their account.

Removal From Student Account Hold

Once students have made their overdue payment, the Student Accounts Hold will be removed within 24 hours and students will be registered into the next course in the next available term.

Third Party Collections

The University utilizes third party collections services to collect on unpaid balances.

Refund Schedule

A student who withdraws or is withdrawn from the program may be entitled to a refund according to the rules outlined below.

By or Before Day 7 (Week 1) of Each Course

If a student withdraws from the program **by, or before Day 7** (Eastern Standard Time) of a course, he/she will be refunded 100% of tuition paid for that course, excluding the enrollment deposit. If the student withdraws during the refund period and has not yet paid any tuition owed for that course, the Student Accounts Office will cancel the balance for that course.

Day 8-14 (Week 2) of Each Course

If a student withdraws from the program **after Day 7, but not later than Day 14**, he/she will receive a **50% refund**.

Day 15-49 (Week 3-Week 7) of Each Course

If a student withdraws from the program on or **after Day 15**, he/she will receive **no refund** and will be obligated to pay for the **entire course they are currently enrolled**.

The effective withdraw date is:

- If initiated by the student, it is the date the student formally submitted the withdrawal form (<https://qafederation.ngwebsolutions.com/sp/startSSO.ping?PartnerIdpId=https://caneid.miami.edu/idp/shibboleth&TargetResource=https://dynamicforms.ngwebsolutions.com>)
- If initiated by the Administration, it is the date the administration formally entered/processed the withdrawal.

Overpaid Tuition

After students have withdrawn, if they paid more than what they owed on a course, they will be refunded the difference between what they paid and the amount due as determined by the refund schedule and effective withdraw date. Overpayment tuition refunds are typically processed on or about

14 days after the start of each term; however, in certain circumstances this time frame may be delayed. Students may check their Canelink account to view when refunds have been processed.

Refund Policy and Schedule - Timeline and Methods

All refunds will be paid via the payment method paid and within 30 days of the effective withdrawal date on record.

Day Formally Withdrawn from Program	Day 0-7 (Week 1)	Day 8-14 (Week 2)	Day 15-49 (Week 3-7)
Enrollment Deposit	No refund	No refund	No refund
Tuition Refund (minus the enrollment deposit)	100% refund	50% refund	No refund

Ethics, Student Rights and Responsibilities

Students agree to abide by the Graduate Student Honor Code.

The University of Miami expects all graduate students to adhere to the highest standards of ethics and academic integrity. All forms of academic fraud are strictly prohibited. These include, but are not limited to, plagiarism, cheating, collusion, falsification, violation of professional ethics, or misrepresentation of research data. Students certify that all work (whether an examination, dissertation, thesis, research paper, research project, form of creative expression, experimental data, or any other academic undertaking) submitted for evaluation, presentation, or publication meets these standards. Additionally, graduate students are expected to respect and appreciate the diversity of the community and to respect the rights of others, be they property, privacy, opinion, or expression. Students found to be in violation of these standards are subject to disciplinary actions by the student's program and/or the Graduate School. All graduate students are bound by the rules and regulations of the University of Miami that apply to them. The **Graduate Honor Code** can be reviewed on the Dean of Students (p. 1367) website.

Disciplinary and Grievance Procedures for Graduate Students

Two types of procedures exist:

- Academic and
- Nonacademic.

Procedures for handling disciplinary and grievance matters are handled by the Graduate Student Appeals Committee. Contact the Graduate School for details about the appeals process. The Graduate School expects an appeal to have gone through the program or department and then the School's Academic Dean prior to its being heard by the Graduate School. The University Ombudsperson may also be consulted. For more information, please refer to the Academic Policies page.

Honors and Awards

Award of Academic Merit

Students who obtain a 3.8 G.P.A. or better will receive an Award of Academic Merit from the Graduate School. The Award is posted on the transcript.

Who's Who Among Students in American Universities and Colleges

The Graduate School solicits nominations for this award annually. Nominations are provided by Graduate Program Directors at the beginning of the spring term.

- Graduate Student Awards
- Graduate Student Organization Award
- GSA Executive Award
- Senate Award
- Academic Award
- Graduate Student Award

Requirements for Commencement

It is the responsibility of the student to apply for graduation through Canelink during the student's final term prior to the deadline for the next commencement ceremony.

Both the dates for commencement and the deadline to apply for graduation are published in the online academic calendar (<http://www.miami.edu/index.php/registrar/calendar>). Students who previously applied for graduation but did not receive the degree must repeat the application procedure. Deadlines for the commencement program are firm. Students will be degree candidates until they have been cleared by the Graduate School.

Participation in the commencement ceremony or the listing of a student's name in the commencement book in no way implies or ensures graduation. A student's graduation is contingent upon successful completion of the degree requirements and approval by the academic school or college.

Commencement ceremonies are held in May and December only. Those students completing degree requirements during the fall, spring, or summer sessions may, if they wish, participate in the graduation ceremonies of the previous or following May or December. Students receiving a Ph.D., D.M.A., D.N.P., D.P.T., or Ed.D. degree and plan to participate in the hooding ceremony and all master's students marching in the graduation ceremony must have the approval of the graduate advisor, director, or appropriate person in the department/school to participate in the ceremonies.

Participation in commencement for students in all graduate programs is contingent upon the following:

1. The student must have met the requirements for the program.
2. The student must have a minimum of 3.00 cumulative grade point average;
3. The student may not have any outstanding debt including, but not limited to, tuition, fines, and fees. Tuition for the last term of study must be paid in full by the beginning of the final term.

Clearance for Degree Conferral

For the Graduate School to clear a student for graduation:

1. All original documents (transcripts from previous degrees, GRE scores, etc.) must be on record in the Graduate School (except for MBA students).
2. The Admission to Candidacy form must have been completed by the program at least one term before graduation. The Graduate School does not require application to candidacy for master's, D.P.T., nor D.N.P. degrees.
3. The student must defend his/her thesis or dissertation (if applicable) no later than two weeks before the last day of class in the term he/she wishes to graduate.
4. The student must submit his/her final, Dissertation Editor-approved thesis or dissertation with all corrections completed and final paperwork turned in to the Graduate School by the last day of exams in the term he/she wishes to graduate for their clearance to be processed in time.

Graduate Student Association

The primary function of the GSA is to promote effective graduate student participation in University affairs. The GSA serves as a liaison between graduate students, faculty, and the administration. In addition, the GSA exists as a forum to support and improve the quality of the graduate student environment at the University of Miami. The University of Miami Graduate Student Association is an active member of the National Association of Graduate-Professional Students. All graduate students at the University of Miami are members of the GSA.

Graduate Council

The mission of the Graduate Council is to promote graduate education, scholarship, and research; to support individuals, departments and programs in the pursuit of excellence; to foster innovative, multidisciplinary, and interdisciplinary activities and to maintain high ethical and academic standards in graduate studies.

Student Resources

Dean of Students Office

The mission of the Dean of Students Office is to foster the personal development of students by providing a range of programs and services that create an optimal learning and living environment. The Graduate Honor Code (https://doso.studentaffairs.miami.edu/_assets/pdf/policies/student_rights_and_responsibilities_handbook.pdf#page=10) and the Student Rights and Responsibilities Handbook (p. 1346) are two methods in which the University encourages ethical behavior in all its students. The Graduate Honor Council is a student organization which investigates violations of the Graduate Honor Code and decides appropriate action. The Dean of Students Office also oversees the University Chaplains Association, which consists of various campus ministries to serve the spiritual needs of students. For more information on these and other services offered by the Dean of Students Office, call 305-284-5353 or visit our website (<https://doso.studentaffairs.miami.edu>).

Career Development

The Toppel Career Center assists undergraduate students, graduate students, and alumni in formulating their career plans and in pursuing internship opportunities.

It is the intent and desire of the University of Miami and the Toppel Career Center to provide equal employment opportunities for students and graduates regardless of race, color, national origin, religion, gender, sexual orientation, age or disabilities.

HireACane.com is a management system where students can access internships, jobs, on-campus recruiting information, career programs, and companies/organizations attending Careers Expos and Fairs. Students can only access these additional online resources by activating and logging into their HireACane.com account.

Student Disability

The Academic Resource Center (ARC) provides academic resources and support to ensure that students with documented disabilities are able to access and participate in the opportunities available at the University of Miami.

All students seeking accommodations for a disability **must register** with the Office of Disability Services. **Students should disclose that they are a UOnline student for fastest processing times.** Students should register as soon as possible so that the office has sufficient time to receive and review the necessary documentation and coordinate reasonable accommodations. To register, schedule an appointment with the ARC at 305-284-2374 or e-mail us (disabilityservices@miami.edu).

Before a determination is made regarding a request for accommodations, the student must complete the proper forms and submit current, appropriate, and full documentation of the disability as required by ARC.

SPECIAL PROGRAMS

Miami Semester

<http://www.miami.edu/miamisemester>

The Miami Semester – Visiting Student Program provides the opportunity for degree-seeking students attending other colleges to spend one or two semesters living, studying and doing research at the University of Miami. Domestic and international students may enroll in this program, taking advantage of our diverse academic community, renowned faculty, and beautiful South-Florida landscape.

The Miami Semester – Visiting Student Program is limited to degree-seeking undergraduates in good standing attending other universities and colleges. Participating students will be required to take a minimum of twelve credits.

If an academic area of study is not listed below, please contact the Miami Semester Program office to inquire if your program of interest is available.

Course offerings are subject to change depending on availability.

American Studies

American Studies allows students to select three courses from the American Studies (AMS) Program's course offerings, and additional classes from other departments based on availability and interests. It is an interdisciplinary approach for students to reflect on the interrelated nature of subjects like, but not limited to, Sociology, Geography, History, and Anthropology, and topics that are relevant to today's society such as cultural diversity, the global economy, regional and geographical norms, and popular culture. The goal of this program is to assist in students' understanding of the world around them by analyzing events, policies, societal norms and cultures, and historical events. Students may take any combination of courses that equal at least 12 credit hours.

Code	Title	Credit Hours
Core Courses ¹		
Select a minimum of one of the following:		3-6
AMS 101	Introduction to American Studies	
AMS 310	The United States in the World	
AMS 350	History and Culture of South Florida	
Additional Course		
AMS 401	Seminar in American Studies	
Elective		6
Total Credit Hours		9-12

¹ Core courses are selected in conjunction with an advisor.

Architecture: New Urbanism

The Architecture program allows for students currently majoring in architecture at other colleges and universities to gain perspective of the field in South Florida. Students enroll in six credits of Architectural Design and six to nine credits of related electives or courses in Urban Studies. Students will also have opportunities to participate in study abroad programs in London, Venice, and/or Spain during intersession and spring breaks as an additional enrollment option (additional tuition and program fees apply). Students are required to maintain a standard full-load of credits for the spring semester of 12-15 UM credits.

Code	Title	Credit Hours
Core Courses ¹		
Students must submit a design portfolio prior to enrolling in courses		
Select one of the following:		6
ARC 407	Architecture Design VII	
ARC 408	Architecture Design VIII	
ARC 509	Architecture Design IX	
ARC 510	Architecture Design X	
Choose one or two of the following		3-6
ARC 323	On Site Study of Selected Architecture and Urbanism	
ARC 452	Management of Professional Practice	
ARC 512	Advanced Visual Analysis	

PHY 103	General Physics	
URB 301	Cities in Time and Space	
Other Architecture elective course offerings (Interior Design, Landscape, and Historic Preservation)		3
Total Credit Hours		12-15

¹ Core courses are selected in conjunction with an advisor.

Audio Engineering

Audio Engineering allows for students currently majoring in electrical engineering to study areas such as circuit theory, electronics, signal processing and multimedia with audio studies in acoustics, digital audio, recording and post production. Students enroll in three Electrical Engineering courses; and add courses from other areas of interest based on availability.

Code	Title	Credit Hours
Core Courses ¹		
Choose two of the following:		4-6
ECE 436	Digital Signal Processing	
ECE 437	Real-Time Digital Signal Processing Laboratory	
ECE 502	Engineering Acoustics	
ECE 540	Digital Speech and Audio Processing	
Additional Courses		
ECE 595	Special Topics in Computer Engineering	
ECE 596	Special Topics in Computer Engineering	
Courses Available through the Frost School of Music		
MMI 141	Experiential Musicianship II	
MMI 501	Transducer Theory	
Total Credit Hours		4-6

¹ Core courses are selected in conjunction with an advisor.

Ecosystem Science and Policy

Ecosystem Science and Policy provides an opportunity for students from other universities to explore the South Florida environment, ecology and culture via interdisciplinary courses and experiential learning.

Students must take at least two core courses in Ecosystem Science and Policy. Miami Semester students will complete their schedules with courses chosen from among the interdisciplinary ECS courses and from other departments based on availability and interests.

Code	Title	Credit Hours
Core Courses ¹		
ECS 112	Field Problems in Ecosystem Science and Policy	
ECS 202	Seminar Series in Contemporary Environmental Issues II	
ECS 302	Perspectives on Environmental Decision Making	
ECS 403	Interdisciplinary Approaches	
Elective		3
Total Credit Hours		3

¹ Core courses are selected in conjunction with an advisor.

International Finance and Marketing

The International Finance and Marketing program is designed for business students from other universities who want to add an international dimension to their studies. This program allows students to select from a limited set of courses offered by the School of Business. The program focuses on the international aspects of business. The program is open to students with at least a junior standing who have met the course prerequisites. Students must take at least two courses below, but may take all four.

Code	Title	Credit Hours
Core Courses ¹		
FIN 330	International Finance	

MKT 360	International Marketing	
ECO 442	International Monetary Economics	
BSL 412	International Business Law	
Total Credit Hours		0

¹ Core courses are selected in conjunction with an advisor.

Marine Science

Marine Science is a hands-on study opportunity for those interested in marine science, oceanography, geology and marine physics. Students must enroll in a minimum of three Marine Science courses. In addition, highly qualified students may be eligible for an independent study research project. Students may also opt to add courses in other areas based on availability and interests.

Code	Title	Credit Hours
MSC Courses ¹		
Elective		
Total Credit Hours		0

¹ MSC courses should be selected in consultation with your advisor. See the courses page (p. 1965) for a list of MSC courses.

Sport Administration

Sport Administration is an opportunity for students who are interested in the ethics, leadership, and business of managing athletic organizations. Students will have the opportunity to participate in an internship that fits their interest area as well taking hands-on courses in the Department of Exercise & Sport Sciences. Internships may take place within the UM Athletic Department or local professional sport franchises. Students make take any combination of courses that equal at least 12 credit hours.

Code	Title	Credit Hours
Core Courses ¹		12
KIN 206	Sport Facilities and Event Management	
KIN 302	Sport Marketing	
KIN 306	Essential Leadership in Sports and the Professions	
KIN 308	Ethical Decision Making in Sport and the Professions	
KIN 401	Legal Aspects of Sport	
KIN 403	Sport Information Management	
KIN 405	Finance and Budget in Sport Administration	
KIN 498	Seminar in Sport Administration (internship)	
Total Credit Hours		12

¹ Core courses are chosen in conjunction with an advisor.

Office of Professional Advancement - Non Credit Courses

www.continue.miami.edu/opa

Dedicated to providing the highest quality, competency-based, continuing professional education, the Office of Professional Advancement offers seminars, courses and certificate programs to meet the training and professional development needs of both corporations and individuals.

For more information, specific curriculum descriptions and a listing of current seminars, courses and workshops, contact the:

Office of Professional Advancement, Division of Continuing and International Education

University of Miami

111 Allen Hall

Coral Gables, Florida 33146-1610

305-284-4000 or

email opa@miami.edu.

Additional information on the web (<http://www.continue.miami.edu>).

Electronic Medical Records Specialist Certificate

Manage electronic medical records and gain the professional knowledge to become an essential member of the healthcare team. Learn through hands-on practice sessions using PrimeSUITE®, electronic medical records software. The Program prepares students to sit for the Certified Electronic Health Records Specialist (CEHRS) examination through the National Health Career Association.

For detailed course description, calendar and prices, please visit our website (<https://www.continue.miami.edu/default.aspx>).

Medical Billing and Coding Certificate

The Medical Billing & Coding Program begins with a standard block of courses necessary to obtain the foundation knowledge needed for certification in billing and coding. Essential sciences are covered in the medical terminology, anatomy & physiology, diagnostic coding, and disease pathology modules. Once these core medical topics are covered, the Program provides the learner with the knowledge and skills needed to perform diagnostic coding, using the ICD-9 and ICD-10 coding systems, and procedural coding. Students will participate in a module specific focusing on CPC® examination preparation.

For detailed course description, current schedule and prices, please visit our website. (<http://www.continue.miami.edu/en/packagedetail.aspx?p=182>)

Business and Leadership Certificate Programs

The Business Program offerings provide a range of certificates focused on enhancing skills and improving organizational performance. The development of core skills in cutting edge disciplines, with application based learning, will prepare Program participants for profit and non-profit sectors across a broad spectrum of disciplines, including Leadership and Management, Business and Communication Skills, Consulting, Human Resources, Nonprofit, and Meeting and Event Planning.

Leadership Development and Management offerings include Executive Leadership, Fundamentals of Leadership, Managing Cross-Functional Teams, Management and Supervision, Organizational Leadership, and Strategies for successful negotiation. These Programs emphasizes the development and enhancement of vital leadership skills for those tasked with leading organizations, or have the desire to enter into one in the near future.

Business offerings include Ethical Business Decision Making, Alternative Methods of Problem Solving, Group Facilitation, Problem Solving and Decision-Making Strategies. These Programs prepare participants for the skilled, ethical decision-making, problem solving, and critical thinking skills necessary to make informed decisions that create and maintain an ethical work environment.

Human Resources offerings include Managing Organizational Change, Fundamentals of Delivering Training, and Conflict Resolution. These programs emphasize the development and enhancement of key skills for those who have the need and desire to learn how to effectively manage change, present effective training, and resolve workplace conflict to increase employee engagement, productivity, and teamwork.

The Nonprofit Programs are designed to develop and cultivate necessary skills that nonprofit managers to effectively manage challenges often associated with the nonprofit sector. Participants who currently hold a management role, or have the desire to move into a management role within a non-profit organization of any type will elevate skills in Nonprofit Operational Management, Nonprofit Fundraising, Grant Writing, and Fundamentals of Philanthropy.

Meeting and Event Planning Program participants are those tasked with or looking to engage in designing and coordinating any type of organizational meeting or event. Program areas include Fundamentals of Meeting Planning and Event Development and Negotiation Skills for Event Planners. Emphasis is placed on gaining an in-depth understanding of skills that will enable participants to help clients and/or internal organizational departments design and coordinate an effective, multifaceted meeting and/or event that will accomplish the client's or organizational goals and objectives.

Additional Programs include Innovation and Organizational Consulting. The Innovation Program emphasizes key roles of individual entrepreneurs and organizational innovation in private and public services, design thinking as a problem-solving tool, and understanding communication approaches, leadership practices, and the relationship between the marketing and sales functions in the workplace. The Organizational Consulting Program provides the knowledge needed to think critically and solve problems creatively for an organization based on assessment of the client's needs

For a full list of business certificate programs offered, please visit our website (<https://www.continue.miami.edu/default.aspx>).

Certified Professional Coach Program

This Coach Certificate Training Program is designed to support you in becoming a professional coach or in using coaching skills to enhance your leadership, management, and/or communication skills. This program has been written by master coaches and aligns with the International Coach Federation (ICF) Core Coaching Competencies. The University of Miami has designed a thorough program that will allow you to make a powerful leap into using coaching skills and becoming a professional coach. The Certified Professional Coach Program is a 140 hour, eleven month program designed for those interested in a career in coaching, who also want outstanding training in order to serve clients at the highest level. Additionally, it is designed for leaders, managers, human resource professionals, teachers, or service professionals (doctors, lawyers, counselors, consultants, etc.) who want to dramatically improve their ability to communicate, motivate, inspire, and empower others.

For more detailed course descriptions, current schedule and prices, please visit our website (<https://www.continue.miami.edu/default.aspx>).

Human Resources Management Certificate Program

This certificate provides the latest in proven techniques and strategies to effectively manage organizational challenges. The curriculum covers the following topics: Strategic Management, Legal and Regulatory Issues; Employment, Planning, and Placement; Benefits and Compensations; Development and Administration; Training and Development and Employee and Labor Relations. The HR Program is recognized by the Greater Miami Society for Human Resource Management. The comprehensive curriculum works for the newcomer as well as the seasoned professional and is especially useful to small and medium-size business owners. (6 months)

For more detailed course descriptions, current schedule and prices, please visit our website (<https://www.continue.miami.edu/default.aspx>).

SHRM® Certification Course (SHRM-CP™/SHRM-SCP™)

Establish yourself as a globally-recognized human resource expert by earning the new standard in HR Certification: SHRM Certified Professional (SHRM-CPT®) and SHRM Senior Certified Professional (SHRM-SCP™). Designed for SHRM credential candidates, this course will expand and test your knowledge of practical, real-life competencies in areas critical for HR career success. Combining expert instruction with the SHRM Learning System® for SHRM-CP™/SHRM-SCP™, you will learn faster, retain more knowledge, and stay on track for success on the exam.

For more detailed course descriptions, current schedule and prices, please visit our website (<https://www.continue.miami.edu/default.aspx>).

Interior Design Certificate Program

If you have always had an eye for design, and have a knack for taking an ordinary space and making it feel extraordinary, then the University of Miami Certificate in Interior Design is for you. The Certificate in Interior Design Program offers non-credit courses to those who want to enrich their cultural experiences or who are interested in improving their professional or occupational skills. Taught by industry professionals, our Certificate in Interior Design program focuses on the important fundamentals to enter the design field. A hands-on program, students will learn history of interiors, principles and elements of design, Color Theory, freehand and computer drafting, specification and materials, professional practice, and building a portfolio.

For more detailed course descriptions, current schedule and prices, please visit our website (<https://www.continue.miami.edu/default.aspx>).

Paralegal Studies Certificate Program

The UM Paralegal Studies program is an intense four-month course of study which certifies the successful student as a qualified professional ready to start an exciting new career as a paralegal. Classes are taught by prominent local attorneys, Judges and Magistrates. The Paralegal Program classes are offered on the weekends or weekday evenings at the Coral Gables campus and on weekday evenings in Broward. This program is also available as a fully online program.

For more detailed course descriptions, current schedule and prices, please visit our website (<https://www.continue.miami.edu/default.aspx>).

Paralegal Concentration Certificates

The Paralegal Concentration Certificates provide both beginning and experienced paralegals with expansive educational and professional opportunities. These Practice Area Concentration certificate programs allow paralegals to augment current skills and focus on virtually any area of the law. Choose to specialize in one of the following areas of concentration: Contract law, Business law, Criminal law and Procedures, Bankruptcy law, Intellectual Property, Immigration law, Wills and Trust, Employment law, Real Estate law, and Litigation. Give yourself an edge in today's competitive job market. All Paralegal Concentration courses are available online so students are able to enroll at any time.

For more detailed course descriptions, current schedule and prices, please visit our website (<https://www.continue.miami.edu/default.aspx>).

Personal Financial Planning Certificate Program

Designed for students preparing for professional examinations and professional practice in personal financial planning.

Our program consists of providing the highest quality CFP education through Dalton Education, a leading provider of innovative education solutions in financial planning. The founders of Dalton Education have helped thousands of financial professionals earn the CFP® certification marks with their leading CFP review course, THE DALTON REVIEW®. Students can choose from an independent, self-paced, online education program or a live, instructor – led, internet delivered program.

For more detailed course descriptions, current schedule and prices, please visit our website (<https://www.continue.miami.edu/default.aspx>).

Social Media Management Education Program

University of Miami is proud to offer a Social Media Professional Certificate and Social Media Strategist Certificate through Dalton Education. This is a cutting edge program, designed to teach the business applications of social media communications. This self-paced online program is convenient, practical, and affordable with the flexibility to begin at a time that works best for you.

For more detailed course descriptions, current schedule and prices, please visit our website (<https://www.continue.miami.edu/default.aspx>).

Project Management Professional Certificate (PMP®)

This program satisfies the educational requirement needed to qualify to take the Project Management Professional (PMP®) exam.

Learn the core competencies of project management, following the Project Management Institute's A Guide to the Project Management Body of Knowledge, (PMBOK®- Guide). Become proficient in the knowledge areas, process groups, skills and techniques delineated in the PMBOK® Guide to execute projects effectively and efficiently through all stages.

For more detailed course descriptions, current schedule and prices, please visit our website (<https://www.continue.miami.edu/default.aspx>).

Coding Boot Camp Certificate

University of Miami (UM) Coding Boot Camp is a 24-week, part-time web development course offered on our Coral Gables campus. The full-stack curriculum includes HTML5, CSS3, JavaScript, jQuery, Node.js, Java, Database Theory, MongoDB, Heroku, Git, and more.

For more detailed course descriptions, current schedule and prices, please visit our website. (<http://www.continue.miami.edu/en/package/detail.aspx?p=198>)

Cyber Security Certificates

University of Miami Division of Continuing and International Education in collaboration with HackerUSA, offers unique hands-on skill based programs in Cyber security. HackerUSA has over 20 years of experience and is a leading educational provider for cyber security training. They bring a wealth of expertise that allows our cyber security programs to be innovative and high quality. Our students will be exposed to the most advanced technologies used today and will gain real practical experience.

For more detailed course descriptions, current schedule and prices, please visit our website. (<http://www.continue.miami.edu/en/subcategory.aspx?sc=108>)

IT Training Certificates

The University of Miami, Division of Continuing and International Education has partnered with IT Training Solutions to offer database and informational technology non-credit certificate programs. IT Training Solution is an international training provider specializing in comprehensive IT Technical and Certification courses. Together we are empowering students to learn complex material and review concepts in an easy to use online, interactive course. We are continually updating the content in these courses to stay current with the trends and new developments in the industry. Each quarter 3-5 new titles are released.

For more detailed course descriptions, current schedule and prices, please visit our website (<http://umiamicatalog.ittrainingsolutions.com>).

Post Baccalaureate Certificate in Computer Sciences

The Post Baccalaureate Certificate in Computer Science (PBC) is a non-credit program designed for people with a Bachelor of Science degree in another discipline, who wish to learn the core skills of Computer Science. Completion of the PBC will provide opportunities to apply computational techniques in other areas, to change career paths towards computing, or to continue on to graduate student in Computer Science.

The PBC includes courses in programming, computer architecture and systems, some mathematics, and an elective chosen from the many courses available in the Department of Computer Science. By completing this one-year non-credit program, students will obtain the knowledge and skills at the heart of Computer Science, opening the doors to new and exciting opportunities. Students will be able to:

- Write efficient computer programs using appropriate data structures.
- Use their understanding of computer organization and architecture to select and utilize computer systems effectively.
- Use UNIX-based computer systems, and write programs that make use of the UNIX operating system.
- Characterize the underlying theory of computational systems.
- Discuss and write about a range of topics in Computer Science (as presented in seminars).
- Use basic mathematics in the development of computer software.

Pre-requisites for the PBC program are a Bachelors Degree, Calculus I, and Computer Programming I (or equivalent). Credit can be given for prior study. At least 15 credits of PBC courses must be completed at the University of Miami.

For more detailed course descriptions, current schedule and prices, please visit our website (<http://www.continue.miami.edu/en/package/detail.aspx?p=196>).

Study Abroad

www.studyabroad.miami.edu

Dept. Code: SAP

With over 80 unique opportunities overseas, students have many options to study abroad on UM programs that align with their interests. Students can live and learn abroad through short term and long term programs with UM faculty or at UM partner universities overseas. Programs with UM faculty are unique in their emphasis on experiential learning, pre-arranged group housing, excursions, and courses taught by UM professors and overseas academic experts. Examples of these programs include UM semester-on-locations in Prague, Shanghai, Paris, Buenos Aires, Cape Town, India, the Galapagos, and Rome, as well as short term faculty-led programs during the summer, January intersession, and spring break in Europe, Asia, Africa, and South America.

Students can also receive UM credit hours and grades while studying at any one of UM's partner universities overseas. These programs can be undertaken for a semester, year, and/or during the summer. Among a multitude of other options, students can study Aboriginal studies at University of Sydney, be immersed in Spanish culture in Seville, explore Iceland's unspoiled nature while studying earth sciences at the University of Iceland, immerse themselves in Japanese culture and business practices at Sophia University in Tokyo, or become acquainted with the changing panorama of international relations at University of San Andres in Argentina. Many of these programs are delivered in English so foreign language proficiency is not required for most study abroad opportunities.

Students who participate in UM Study Abroad programs will receive UM grades and credits and are able to use their existing financial aid towards semester program costs. With careful planning and academic department approval, students can apply their courses abroad to their majors, minors, cognates, or elective credits. Programs are open to sophomores, juniors, and seniors who meet posted eligibility requirements for admission such as minimum cumulative GPA.

The Schools and Colleges at UM encourage study abroad options for their students. With the assistance of the Study Abroad Office and the guidance of academic advisors, students can select a study abroad program to fit almost any major. Additionally, UM financial aid will apply to the costs of the UM programs. Students are advised to plan as early as their freshman year so studying abroad can be incorporated into their academic plan.

The cost of studying abroad varies depending on the type, length, and location of the program. Students are often surprised at how affordable studying abroad can be. Students participating in a UM study abroad program will be able to use their financial aid abroad. Participants are charged full tuition for the term abroad and the financial aid package will be adjusted based on the estimated expenses of the program.

As studying abroad is seen as such an important aspect of a college career, many national and institutional scholarships are available. Interested students should begin to research scholarship opportunities early. The most prestigious study abroad scholarships, which grant up to \$10,000 per semester, have applications with deadlines up to 18 months before the study abroad program begins. Several other scholarships, with deadlines similar to program application deadlines, are also available and grant up to \$5,000. Learn more about finances and scholarships by visiting the Study Abroad website, speaking with the advisors in the Study Abroad Office and the Office of Financial Assistance Services.

Students enrolled in any study abroad program at a partner institution may not earn 25 percent or more of their credits toward any UM degree program (credit requirements may vary by major/level), including courses taught by UM faculty. A student who anticipates earning 25 percent or more of his/her degree credits while participating in a study abroad program must immediately inform his/her advisor or program chair, who will be responsible for notifying the appropriate parties so that advance approval can be obtained from the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC).

For additional information, contact:

Office of Study Abroad
Dooly Memorial Classroom Building, Suite 125
Coral Gables, FL 33146
Tel: 305-284-3434

Summer Scholars Program

<http://www.miami.edu/ssp>

The Summer Scholars Program (SSP) provides a unique opportunity for high school students to study at the University of Miami for three weeks during the Summer Session B and earn 6 credit hours. Students will either live on campus or participate as a commuter. SSP is designed to expose high school students to university academics and campus life before commencing undergraduate studies. Interested high school students should seek further information and application requirements (<http://www.miami.edu/ssp>).

Summer Sessions and InterSessions

<http://www.miami.edu/summersessions>

Summer Sessions

The Summer Sessions program at the University of Miami is an exceptional opportunity for students to enhance their educational goals in a concentrated time period and for the South Florida community to take part in some of the innovative and unusual courses taught by outstanding faculty and well-known guest lecturers.

InterSession - Special Academic Programs

- January (First) and Spring Break (Second) InterSessions (<http://www.miami.edu/intersession>)
- Summer A (First) and Summer B (second) InterSessions (<https://www.dcie.miami.edu/credit-degree-programs/summer-credit-sessions/summer-intersession-classes>)

January, Spring Break, Summer A (May), and Summer B (June) InterSession are short term credit hour courses designed so you can concentrate fully on topics not normally offered during regular semesters; getting individual quality time with distinguished faculty members; and sharing knowledge with other students.

Tuition charges for January and Spring Break InterSession are separate from and in addition to your spring tuition charges (ARE NOT included in the full time 12-20 credit hours "Flat Rate" of Spring Semester).

Due to the intense format of the InterSession courses, there are special drop and refund policies.

COURSE LISTING

Accounting Business Administration (ACC)

ACC 211. Principles of Financial Accounting. 3 Credit Hours.

Course explores the role of accounting in providing financial information about an enterprise to decision-makers. Emphasis is placed on understanding financial accounting from a user perspective. Course covers the reporting of financial position including coverage of assets, liabilities, equity accounts, the results of operations, and cash flows.

Requisite: Sophomore Standing or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ACC 212. Managerial Accounting. 3 Credit Hours.

Introduction to managerial accounting. Topics include various product costing techniques, analysis of cost behavior patterns, budgeting, and the use of accounting information to solve problems. The course is taught from a managerial perspective.

Prerequisite: ACC 211 or ACC 221.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ACC 221. Accelerated Principles of Financial Accounting. 3 Credit Hours.

This course explores the role of accounting in providing financial information about an enterprise to decision-makers. Emphasis is placed on understanding financial accounting from a user perspective. Course covers the reporting of financial position including coverage of assets, liabilities, equity accounts, the results of operations, and cash flows. This course is not open to students with credit for ACC 211.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ACC 222. Accelerated Managerial Accounting. 3 Credit Hours.

This course provides an introduction to managerial/cost accounting. Topics include various product costing techniques, analysis of cost behavior patterns, budgeting, and the use of accounting information to solve problems. The course is taught from a managerial perspective. This course is not open to students with credit in ACC 212.

Prerequisite: ACC 221.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 301. Cost Accounting. 3 Credit Hours.

Topics include basic cost concepts, product costing techniques including job-order and process costing, in-depth studies of techniques and issues surrounding cost allocation methods, basic approaches to solving complex accounting problems, standard cost systems and variance analysis, and variable costing. Additionally, activity-based costing concepts and methodology are introduced. Course is designed to provide students with the necessary skills to perform basic cost accounting.

Prerequisite: ACC 212 or 222.

Components: LEC.

Grading: GRD.

Typically Offered: Spring & Summer.

ACC 311. Intermediate Accounting I. 3 Credit Hours.

The accounting principles which shape the financial reporting practices followed by entities that prepare financial statements in accordance with generally accepted accounting principles are discussed. Course also includes the determination of income components and balance sheet elements with brief coverage of the statement of cash flows.

Prerequisite: ACC 212 Or Pre/Corequisite: ACC 222.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Summer.

ACC 312. Intermediate Accounting II. 3 Credit Hours.

A continuation of ACC 311. Course focuses on more complex accounting applications such as leases, postretirement benefits, accounting for income taxes, and other topics. Additionally, the course includes coverage of the statement of cash flows.

Prerequisite: ACC 311.

Components: LEC.

Grading: GRD.

Typically Offered: Spring & Summer.

ACC 315. Accounting for Health Care Organizations.. 3 Credit Hours.

This course develops a working knowledge of the financial accounting and reporting processes in health care, services industry, and governmental organizations. Focus is on accounting in health care, service industry and for-profit organizations. This will not count as an accounting course for accounting majors and will not satisfy any accounting requirements needed to sit for the CPA exam in Florida.

Prerequisite: ACC 212 or 222 and Requisite: HSMP major.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 402. Auditing. 3 Credit Hours.

Course provides an introduction to the field of auditing. It concentrates on conducting an audit of financial statements in accordance with generally accepted auditing standards. Course covers accounting information systems, audit planning, audit risk and materiality assessments, evaluation of internal control, audit evidence, documentation, and audit reports.

Prerequisite: ACC 311.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ACC 403. Fundamentals of Taxation. 3 Credit Hours.

Basic concepts of federal income taxation applicable to all taxpayers. The principles of individual income taxation, the tax consequences of property transactions, and an introduction to the impact of income taxes on corporations and partnerships are discussed. Emphasis is placed on study of the basic income tax formula including income exclusion, inclusions, statutory deductions, exemptions, and credits. The fundamentals of tax research are also introduced.

Prerequisite or Corequisite: ACC 311.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ACC 404. Advanced Taxation. 3 Credit Hours.

Study of Federal income tax laws and regulations as they affect corporations, partnerships, their owners, and employees. Emphasis is placed on tax planning aspects of formation, operation, reorganization, distribution, and liquidation of corporations and partnerships. Also includes an introduction to estate and gift taxation.

Prerequisite: ACC 403.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ACC 406. Accounting Systems. 3 Credit Hours.

Contemporary accounting systems are computer based. Course covers the nature, design, implementation, and controls in computerized systems as well as manual systems. Micro computers are used as a learning tool.

Prerequisite: ACC 311.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ACC 411. Advanced Accounting. 3 Credit Hours.

The primary focus of the course is on business combinations and preparing consolidated financial statements. Additionally, there is coverage of the accounting principles and practices applied to foreign operations and partnerships.

Prerequisite or Corequisite: ACC 312 AND Requisite: Junior Standing or higher.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 496. Directed Studies in Accounting. 1-3 Credit Hours.

Supervised readings, individual research project, or independent investigation of selected non-STEM related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ACC 497. Directed Studies in Accounting. 1-3 Credit Hours.

Supervised readings, individual research project or independent investigation of selected STEM-related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ACC 498. Special Topics in Accounting. 3 Credit Hours.

Special topics in selected non-STEM areas of Accounting.

Requisite: Business School And Junior Or Senior Status.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ACC 499. Special Topics in Accounting. 3 Credit Hours.

Special topics in selected STEM areas of Accounting.

Requisite: Business School And Junior Or Senior Status.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ACC 506. Internal Auditing. 2 Credit Hours.

Course explores the unique issues associated with the internal audit function. Additionally, the ethical code applicable to internal auditors is discussed.

Prerequisite: ACC 402. And Requisite: Accepted into the Accelerated Program.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 522. Advanced Issues in Auditing. 3 Credit Hours.

Course covers advanced issues which arise in audit practice including audit reporting issues, fraud detection and reporting, attestation engagements, special reporting issues, compilation and review engagements, scope of services issues, and other new issues which have a significant impact on audit practice.

Prerequisite: ACC 402. And Requisite: Accepted into the Accelerated Program.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ACC 524. Accounting for Governmental and Not-for-Profit Entities. 2 Credit Hours.

The course introduces accounting within the environment of modern government and not-for-profit organizations. Emphasis is placed on financial accounting and reporting, current accounting issues, and managerial activities.

Prerequisite: ACC 312 and Requisite: Accepted into the Accounting Accelerated Program.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 530. International Financial Reporting Standards. 1 Credit Hour.

This course provides an overview of International Financial Reporting Standards (IFRS). The course will begin with a study of IFRS Framework and will then examine a number of the major topics covered in the Intermediate Accounting courses. The perspective will be a comparison between IFRS and U.S. generally accepted accounting principles (U.S. GAAP).

Prerequisite: ACC 312 and Requisite: Accepted into the Accounting Accelerated Program.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 550. Accounting Internship. 1-3 Credit Hours.

Student is individually assigned to operating business firm or other organization to gain insight into management practice in area of career interest. Periodic reports and conferences are required. Approval of chairman is required at time of registration.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ACC 555. Accounting Departmental Honors Research Project. 3 Credit Hours.

Research project to fulfill requirements for Departmental Honors Accounting.

Components: THI.

Grading: SUS.

Typically Offered: Offered by Announcement Only.

ACC 572. Advanced Financial Analysis. 2 Credit Hours.

This course builds on the analytical techniques developed in the prerequisite financial accounting courses to augment your understanding of more complex financial reporting issues and to introduce you to the valuation of equity investments. The view point is that of the user of financial statements, particularly from the standpoint of an equity investor or purchaser of a business. We discuss each financial reporting issue in terms of its effect on assessments of a firm's profitability and risk. This course is designed primarily for students who expect to be intensive users of financial statements as part of their professional responsibilities.

Prerequisite: ACC 312. And Requisite: Accepted into the Accounting Accelerated Program.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ACC 600. Accounting for Decision-Making and Control. 3 Credit Hours.

The course focuses on the use and understanding of basic financial and managerial accounting reports. The course is oriented to the user of financial data rather than the preparer of the data. Coverage of basic accounting assumptions and current issues affecting accounting processes and reporting are included, but detailed accounting procedures are not emphasized. Completion of the course should permit students to understand accounting information and to communicate with professional accountants. Does not satisfy any accounting requirements needed to sit for the CPA exam in Florida.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ACC 601. Trends in Present Day Accounting. 2 Credit Hours.

Recent developments in accounting thought and advanced accounting theory. The analysis of trends as disclosed by recent releases of the Securities and Exchange Commission, the American Institute of Certified Public Accountants, and the Financial Accounting Standards Board are discussed. Other topics include terminology, current trends in the measurement, presentation of third financial data to meet the needs of third parties, and surveys accounting literature.

Prerequisite: ACC 312. Or ACC 633.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ACC 602. Analysis of Financial Statements. 1-3 Credit Hours.

Course emphasizes the fundamental techniques of financial statement analysis. Building upon core accounting and investment concepts, the course covers the analysis (including ratio analysis) and interpretation of financial accounting information including the balance sheet, income statement, and statement of cash flows. The course also examines the use of accounting information in investment and credit decisions.

Prerequisite: ACC 312. Or ACC 633.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ACC 603. Studies in Financial Reporting Issues. 2 Credit Hours.

An exploration of complex financial reporting issues using the case method.

Prerequisite: ACC 312. Or ACC 633.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ACC 604. Seminar in Cost Accounting. 2 Credit Hours.

Course covers four major segments. First, it reviews the basic concepts and tools associated with management control systems. Second, it underscores the importance of decentralization and the impact it has on decision making. Third, it examines the strategic place for cost management. Examples include the adoption of the balanced score card, quality control, productivity, and environmental cost management. Fourth, the course brings costing and control tools into the discussion of decision making.

Prerequisite: ACC 301. Or ACC 634.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ACC 606. Internal Auditing. 2 Credit Hours.

Course explores the unique issues associated with the internal audit function. Additionally, the ethical code applicable to internal auditors is discussed.

Prerequisite: ACC 312. Or ACC 633. And ACC 402. Or ACC 635.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ACC 607. Financial Accounting and Reporting. 3 Credit Hours.

Basic concepts of accounting designed to increase understanding of the function of accounting statements and their limitations. The generally accepted principles governing the preparation of financial reports and the use of accounting information in investment and credit decisions. Does not satisfy any accounting requirement needed to sit for the CPA Exam in Florida. Limited to Executive MBA students only.

Components: LEC.

Grading: GRD.

Typically Offered: Spring & Summer.

ACC 608. Managerial Accounting. 3 Credit Hours.

Current managerial accounting techniques and theories. Topics include the use of accounting data in making decisions and planning and control systems for implementation of decisions. Does not satisfy any accounting requirements needed to sit for the CPA Exam in Florida. Limited to Executive MBA students only.

Prerequisite: ACC 607.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ACC 610. Financial Reporting Research. 2 Credit Hours.

The objective of the course is to familiarize students with researching financial information of publicly traded companies and to provide an introduction to accounting research related to the content and presentation in SEC filings. The course will emphasize searching and accessing as well as understanding and interpretation of financial information presented in SEC filings (e.g., 10-K, 10-Q, Proxy Statements). Accounting topics covered will include accounting information and the capital markets, earnings management, earnings quality, effect of recognition vs. disclosure in accounting reports and the role of the SEC in regulating financial reporting.

Prerequisite: ACC 312. Or ACC 633.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 611. Auditing Seminar. 2 Credit Hours.

Practical applications of auditing and research into audit matters. Emphasis of the course is placed on cases involving audit failures, appropriate auditing procedures, reporting, and exercise of audit judgment.

Prerequisite: ACC 402. Or ACC 635.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 616. CPA Review I. 3 Credit Hours.

The CPA Review is an essential ingredient of the accounting accelerated accounting track. Students must provide proof of satisfactory completion of an approved course of study for two parts of the CPA exam (Regulation and Financial Accounting and Reporting). This course cannot be used to meet the State of Florida's educational requirements for taking the CPA exam.

Prerequisite: ACC 411.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ACC 617. CPA Review II. 3 Credit Hours.

The CPA Review is an essential ingredient of the accounting accelerated accounting track. Students must provide proof of satisfactory completion of an approved course of study for two parts of the CPA Exam (Business Environment and Concepts, and Auditing and Attestation). This course cannot be used to meet the State of Florida's educational requirements for taking the CPA exam.

Prerequisite: ACC 411.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ACC 620. Accounting Controls in Information Technology. 2 Credit Hours.

Course develops students' understanding of the theory and practice of relational database management systems in the accounting view of enterprise-wide databases. With a focus on controls, students build accounting systems elements related to main accounting transaction cycles, the revenue cycle, and the purchase cycle.

Prerequisite: ACC 406. Or ACC 636.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Summer.

ACC 622. Advanced Issues in Auditing. 3 Credit Hours.

Course covers advanced issues which arise in audit practice including audit reporting issues, fraud detection and reporting, attestation engagements, special reporting issues, compilation and review engagements, scope of services issues, and other new issues which have a significant impact in audit practice. Not open to students with credit in ACC 522.

Prerequisite: ACC 402. Or ACC 635.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 623. International Accounting and Taxation. 2 Credit Hours.

Course covers tax accounting and business considerations in the global business environment. U.S. tax issues involved in international transactions, working across national borders, the Foreign Corrupt Practices Act, money laundering and uses of accounting information in managing an international business. Not open to students with credit for ACC 523.

Prerequisite: ACC 211. Or ACC 600. Or ACC 607. Or ACC 670.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ACC 624. Accounting for Governmental and Not-for-Profit Entities. 2 Credit Hours.

The course introduces accounting within the environment of modern government and not-for-profit organizations. Emphasis is placed on financial accounting and reporting, current accounting issues, and managerial activities. Not open to students with credit for ACC 524.

Prerequisite: ACC 312. Or ACC 633.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ACC 626. Introduction to Forensic Accounting and Litigation Support Services. 2 Credit Hours.

This course provides an overview of fraud perpetrated against an organization, including employee theft, vendor fraud, customer fraud, and management fraud. Students will learn about different investigative techniques for quantifying fraud, and how fraud can be detected and prevented as well as the accountants' role in litigation, such as acting as expert witness.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ACC 627. Accounting Regulations and Compliance. 2 Credit Hours.

This course is designed to expose and educate students in a number of rules and regulations faced by the accounting profession, with an emphasis on the financial industry. This course will cover in moderate depth, regulatory agencies and the compliance of the regulations the agencies are charged with upholding. Students will also be exposed to regulatory and compliance programs, bribery and corruption acts such as the Foreign Corrupt Practices Act and the UK Bribery Act, and various anti-money laundering provisions.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ACC 628. Introduction to Accounting Analytics. 2 Credit Hours.

This course introduces students to applications of data analytics techniques in accounting which includes: financial reporting, managerial accounting, taxation, and auditing.

Prerequisite: ACC 301. And ACC 402. And ACC 403.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ACC 630. International Financial Reporting Standards. 1 Credit Hour.

This course provides an overview of International Financial Reporting Standards (IFRS). The course will begin with a study of IFRS Framework and will then examine a number of the major topics covered in the Intermediate Accounting courses. The perspective will be a comparison between IFRS and U.S. generally accepted accounting principles (U.S. GAAP).

Prerequisite: ACC 312. Or ACC 633.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ACC 631. Advanced Financial Accounting Topics. 2 Credit Hours.

Coverage of the Generally Accepted Accounting Principles governing business combinations, the preparation of consolidated financial statement including local and foreign subsidiaries, and other financial reporting topics.

Prerequisite: ACC 312. Or ACC 633.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 632. Intermediate Accounting I. 2 Credit Hours.

The accounting principles which shape the financial reporting practices followed by entities that prepare financial statements in accordance with generally accepted accounting principles are discussed. Course also includes the determination of income components and balance sheet elements with brief coverage of the statement of cash flows. Does not count towards the credits needed to graduate.

Prerequisite: ACC 211. And ACC 212.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ACC 633. Intermediate Accounting II. 2 Credit Hours.

The accounting principles which shape the financial reporting practices followed by entities that prepare financial statements in accordance with generally accepted accounting principles are discussed. Course also includes the determination of income components and balance sheet elements with brief coverage of the statement of cash flows. Does not count towards the credits needed to graduate.

Prerequisite: ACC 311. Or ACC 632.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ACC 634. Cost Accounting. 2 Credit Hours.

Topics include basic cost concepts, product costing techniques including job-order and process costing, in-depth studies of techniques and issues surrounding cost allocation methods, basic approaches to solving complex accounting problems, standard cost systems and variance analysis, and variable costing. Additionally, activity-based costing concepts and methodology are introduced. This course does not count towards the credits needed to graduate.

Prerequisite: ACC 212.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ACC 635. Auditing. 2 Credit Hours.

Course provides an introduction to the field of auditing. It concentrates on conducting an audit of financial statements in accordance with generally accepted auditing standards. Course covers accounting information systems, audit planning, audit risk and materiality assessments, evaluation of internal control, audit evidence, documentation, and audit reports. This course does not count towards the credits needed to graduate.

Prerequisite: ACC 311. Or ACC 632. And ACC 312. Or ACC 633.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ACC 636. Accounting Systems. 2 Credit Hours.

Contemporary accounting systems are computer based. Course covers the nature, design, implementation, and controls in computerized systems as well as manual systems. Micro computers are used as a learning tool. This course does not count towards the credits needed to graduate.

Prerequisite: ACC 211. And ACC 212.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ACC 639. Income Taxation and Business Entitles. 2 Credit Hours.

This course is designed to be the second tax course students who are interested in the business applications of federal income tax laws, as they affect corporations, partnerships, and their owners. Emphasis is placed on tax planning aspects of formation, operation, liquidation, and distributions of corporations and partnerships. Not open to students with credit in ACC 404 or equivalent.

Prerequisite: ACC 403. Or ACC 673.

Components: LEC.

Grading: GRD.

Typically Offered: Spring & Summer.

ACC 640. Corporate Taxation I. 2 Credit Hours.

Course covers treatment of the corporate form of organization, its related opportunities, and problem areas, including formation, tax formula, non-liquidating and liquidating distributions, capital structure, redemptions, alternative minimum tax.

Prerequisite: ACC 404. Or ACC 639.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 641. Corporate Taxation II. 2 Credit Hours.

An in-depth study of taxable and nontaxable corporate reorganizations. An introduction to affiliated corporations, requirements for consolidated returns, and their associated problems and opportunities are discussed.

Prerequisite: ACC 640.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 642. Seminar in Taxation. 2 Credit Hours.

Investigation of current topical areas in taxation.

Prerequisite: ACC 404. Or ACC 639.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ACC 643. Tax Research. 2 Credit Hours.

Study of the tax practice environment including the Treasury Department, the Courts, and the legislative history of the Internal Revenue Code. Ethics in tax practice are also examined. Course includes training in the use of tax services such as RIA Checkpoint and LEXIS, in performing tax research. A research methodology for solving tax problem cases is studied and cases to be researched are assigned.

Prerequisite: ACC 404. Or ACC 639.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 645. Partnership Taxation. 2 Credit Hours.

Taxation of partners and other flow-through entities. Partnership formation, termination, distribution, liquidation, and sales of partnership interests are covered. Limited partnerships in conjunction with their use as tax shelters are discussed as well as family partnerships, limited liability companies, and LLPs.

Prerequisite: ACC 404. Or ACC 639.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 647. Estates and Gift Taxes. 2 Credit Hours.

Estate and gift planning for shifting wealth from one individual to another by death, gift, or by the use of trusts. Property included in the decedent's gross estate valuation methods, gifts in contemplation of death, jointly held property, life insurance, transfers with retained life estates, bequests, revocable transfers, the marital deduction, powers of appointment, gifts of present and future interest, and gifts to minors are covered.

Prerequisite: ACC 404. Or ACC 639.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ACC 648. Financial Reporting Implications of Income Taxes.. 2 Credit Hours.

This course is designed to provide the foundation necessary to understand the financial accounting and reporting of book-tax differences. The course will cover the preparation of the income tax provision and related financial statement disclosures in conformity with U.S. GAAP (FASB ASC 740)

Prerequisite: ACC 312. Or ACC 633. And ACC 404. Or ACC 639.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ACC 649. Issues in Tax Policy. 2 Credit Hours.

This course looks at the process through which our tax laws are created and the important policy issues inherent in individual and corporate income taxes, consumption taxes, and wealth transfer taxes. Topics in this course are not limited to U.S. taxation and include an examination of systems used in other countries (such as the VAT) as possible alternatives to our current tax.

Prerequisite: ACC 403. Or ACC 673.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ACC 650. Accounting Internship. 1-3 Credit Hours.

Student is individually assigned to operating business firm or other organization to gain insight into management practice in area of career interest. Periodic reports and conferences required.

Prerequisite: ACC 312. Or ACC 633.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ACC 660. Managerial Accounting in Healthcare Organizational. 3 Credit Hours.

This course covers Managerial Accounting concepts applied to healthcare organizations. Topics include cost allocation and management control systems.

Prerequisite: ACC 212. Or ACC 608. Or ACC 671.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ACC 662. Taxation of Multinational Corporations. 2 Credit Hours.

This course introduces the fundamental tax concepts underlying U.S. taxation of international transactions. Topics include the taxation of U.S. corporations with income from foreign sources, intercompany pricing, anti-tax avoidance provisions, and tax treaties.

Prerequisite: ACC 640.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 664. Global Mergers and Acquisitions: Accounting and Related Issues. 2 Credit Hours.

This course focuses on the financial, cultural, and strategic aspects of international mergers and acquisitions (M&A) activity and has a global, cross-cultural perspective. It presents a strategic view of the M&A process, examining managerial decision making in the planning, execution, and post-merger phases.

Prerequisite: ACC 312. Or ACC 633.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ACC 665. Health Care Financial and Managerial Accounting. 2-3 Credit Hours.

This course covers managerial and financial accounting concepts applied to health care organizations. Topics include cost allocation and management control systems.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 670. Financial Reporting and Analysis. 2 Credit Hours.

The course focuses on the analysis and use of financial accounting information in the evaluation of corporate performance. The course initially demonstrates the accounting process and resulting generation of financial statements. Building on these core accounting concepts, the course emphasizes the understanding of financial statements prepared under U.S. and International Accounting Standards and the analysis of these financial statements including common size analysis, ratio analysis, the impact of taxes, and credit analysis. Completion of the course enhances the student's ability to read, interpret, and analyze financial statements for making investment, credit, acquisition, and other evaluation decisions. Limited to MBA students and Executive MBA students. Does not satisfy any accounting requirements needed to sit for the CPA Exam in Florida.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ACC 671. Accounting for Decision Making. 2 Credit Hours.

The course focuses on the use of accounting information in reporting managerial performance and making business decisions. The course covers the preparation and use of managerial accounting information for use in planning, budgeting, control, break-even analysis and pricing, including the impact of taxes. Completion of the course will enhance the student's ability to understand managerial accounting reports and use this information in making business decisions. Limited to MBA students and Executive MBA students. Does not satisfy any accounting requirement needed to sit for the CPA Exam in Florida.

Prerequisite: ACC 670.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ACC 672. Advanced Financial Analysis. 2 Credit Hours.

Advanced Financial Analysis and Valuation builds on the analytical techniques developed in the basic financial statement analysis course, Accounting 670: Financial Reporting and Analysis, to augment your understanding of more complex financial reporting issues and to introduce you to the valuation of equity investments. The viewpoint is that of the user of financial statements, particularly from the standpoint of an equity investor or purchaser of a business. We discuss each financial reporting issue in terms of its effect on assessments of a firm's profitability and risk. This course is designed primarily for students who expect to be intensive users of financial statements as part of their professional responsibilities.

Prerequisite: ACC 211. Or ACC 607. Or ACC 670.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ACC 673. Taxation for Business and Investment Decisions. 2 Credit Hours.

This course is designed to be the first tax course for students who are interested in acquiring the basic knowledge that all executives and investors should have about our federal income tax system. It studies basic concepts of federal income taxation applicable to all taxpayers. The basic income tax formula is studied including income exclusions, inclusions, statutory deductions, exemptions, and credits as well as property transactions. Completion of this course will enhance the students' appreciation of the role of taxation in making investment, employment-related, and business decisions. Not open to students with credit in ACC 403 or equivalent.

Prerequisite: ACC 312. Or ACC 633.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ACC 675. Compensation, Incentives and Strategic Control. 2 Credit Hours.

Internal control is the process by which owners influence manager's of organization to implement the organization's strategies. The key idea is that different organizations typically have different strategies which in turn require different control systems for effective implementation. Internal control involves both formal systems and informal processes. Accounting 675 will begin by describing the formal aspects of management control such as the design of responsibility centers, budgets and standards, performance reports and management compensation. We will then explore the economic and financial reporting consequences (perhaps unintended) of various performance measurement mechanisms. In particular, we will focus on issues of short-termism, earnings, management, and attendant control failures that plague Corporate America today. Finally, we will discuss some of the regulatory changes brought about in recent times (e.g., Sarbanes Oxley) to address the apparent widespread control system failures.

Prerequisite: ACC 301. Or ACC 634.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 677. Forensic Accounting. 2 Credit Hours.

This course provides an overview of fraud perpetrated against an organization, including employee theft, vendor fraud, customer fraud, and management fraud. You will learn how to investigate and quantify fraud, and how it can be detected and prevented as well as the accountants' role in litigation, such as acting as expert witness.

Prerequisite: ACC 312. Or ACC 633. And ACC 402. Or ACC 635.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ACC 681. Introduction to Financial and Managerial Accounting. 4 Credit Hours.

The first half of the course explores the role of accounting in providing financial information about an enterprise to decision-makers. Emphasis is placed on understanding financial accounting from both a preparer as well as user perspective. Course covers the reporting of financial position including coverage of assets, liabilities, equity accounts, the results of operations, and cash flows. Topics covered in the second half include various product costing techniques, analysis of cost behavior patterns, budgeting, and the use of accounting information in decision making from a managerial perspective.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 682. Intermediate Accounting. 4 Credit Hours.

The accounting principles guiding the financial reporting practices of entities that prepare financial statements in accordance with generally accepted accounting principles are discussed. The course begins with a detailed discussion of the components of the income statement as well as the balance sheet followed by more complex accounting applications such as leases, post retirement benefits, accounting for income taxes, and other topics. Additionally, the course includes coverage of the statement of cash flows.

Prerequisite: ACC 681.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 683. Taxation. 4 Credit Hours.

The course begins with a discussion of basic concepts of federal income taxation applicable to all taxpayers. The principles of individual income taxation, the tax consequences of property transactions, and an introduction to the impact of income taxes on corporations and partnerships are discussed. Emphasis is placed on study of the basic income tax formula including income exclusions, inclusions, statutory deductions, exemptions, and credits. This is followed by a study of Federal income tax laws and regulations as they affect corporations, partnerships, their owners, and employees. Emphasis is placed on tax planning aspects of formation, operation, distribution, and liquidation of corporations and partnerships.

Prerequisite: ACC 682.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 684. Accounting Information Systems. 4 Credit Hours.

Course covers the nature, design, and implementation of accounting information systems. The objective of the course is to develop students' understanding of the theory and practice of relational database management systems in the accounting view of enterprise-wide databases. With a focus on controls, students build accounting system elements related to main accounting transaction cycles, the revenue cycle, and the purchase cycle.

Prerequisite: ACC 682.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 685. Financial Statement Analysis and Valuation. 4 Credit Hours.

This course emphasizes the fundamental techniques of financial statement analysis. Building upon core accounting and investment concepts, the course covers the analysis and interpretation of financial accounting information including the balance sheet, income statement, and statement of cash flows. The course also examines the use of accounting information in investment and credit decisions including the valuation of equity investments. The viewpoint is that of the user of financial statements, particularly from the standpoint of an equity investor or purchaser of a business.

Prerequisite: ACC 682.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 686. Auditing. 4 Credit Hours.

Course focuses on conducting an audit of financial statements in accordance with generally accepted auditing standards. Course covers accounting information systems, audit planning, audit risk and materiality assessments, evaluation of internal control, audit evidence, documentation, and audit reports. This is followed by discussion of advanced issues which arise in audit practice including audit reporting issues, fraud detection and reporting, attestation engagements, special reporting issues, compilation and review engagements, scope of services issues, and other new issues which have a significant impact on audit practice.

Prerequisite: ACC 682.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 687. Advanced Cost Accounting. 4 Credit Hours.

The course focuses on the use of accounting information in reporting managerial performance and making business decisions. The course covers the preparation and use of managerial accounting information for use in planning, budgeting, control, pricing, and in making other business decisions. Topics include in-depth studies of techniques and issues surrounding cost allocation methods, approaches to solving complex accounting problems, standard cost systems and variance analysis, and variable costing. Additionally, the formal aspects of management control such as the design of responsibility centers, budgets and standards, performance reports and management compensation will be discussed.

Prerequisite: ACC 682.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 688. Advanced Accounting and Financial Reporting. 4 Credit Hours.

The primary focus of the course is on business combinations and preparing consolidated financial statements. Additionally, the accounting principles and practices applied to foreign operations and partnerships will be discussed along with foreign currency translation issues. This will be followed by an exploration of complex financial reporting issues of contemporaneous interest.

Prerequisite: ACC 682.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 689. Current Issues in Accounting. 4 Credit Hours.

Current issues in accounting focuses on international financial reporting standards and accounting for governmental and not-for-profit organizations. This course introduces core concepts and tools of accounting and financial reporting for managers of global, governmental, and not-for-profit organizations.

Prerequisite: ACC 682.

Components: DIL.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ACC 690. Fraud and Forensic Accounting: Ethics and Legal Environment. 4 Credit Hours.

This course focuses on conducting fraud examinations and includes discussion of procedures used in forensic accounting examinations -and the rationale supporting such procedures.

Prerequisite: ACC 682 And ACC 685.

Components: DIL.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ACC 698. Selected Topics. 3 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ACC 699. Directed Readings. 1-3 Credit Hours.

Individually supervised research projects in selected fields. Approval of supervising professor as to topic and evaluation of project required at time of registration.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ACC 701. Empirical Accounting Research I. 3 Credit Hours.

This is the first course in Empirical Accounting Research for Ph.D. students. The course introduces students to the data sources; current techniques for accessing and analyzing accounting data; research methods employed in hypothesis testing; and the literature on positive accounting theory, accounting anomalies, institutional accounting, and disclosure. The emphasis will be on current research with a historical perspective.

Components: THI.

Grading: GRD.

Typically Offered: Fall.

ACC 702. Empirical Accounting Research II. 3.00 Credit Hours.

This is the second course in Empirical Accounting Research for Ph.D. students. In this course, students will explore research on analyst estimates and stock recommendations, industry research in accounting, and empirical research on compensation. The course will critically evaluate the theory, research design, and methodology employed in these studies. Prerequisite: ACC 701 or permission from the instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ACC 823. Topics in Empirical Accounting Research I. 3 Credit Hours.

This is the first course in Empirical Accounting Research for Ph.D. students. The course introduces students to the data sources; current techniques for accessing and analyzing accounting data; research methods employed in hypothesis testing; and the literature on positive accounting theory, accounting anomalies, institutional accounting, and disclosure. The emphasis will be on current research with a historical perspective.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

ACC 824. Topics in Empirical Accounting Research II. 3 Credit Hours.

This is the second course in Empirical Accounting Research for Ph.D. students. In this course, students will explore research on analyst estimates and stock recommendations, industry research in accounting, an empirical research on compensation. The course will critically evaluate the theory, research design, and methodology employed in these studies.

Components: SEM.

Grading: GRD.

Typically Offered: Spring.

ACC 825. Comprehensive Test Preparation. 1-3 Credit Hours.

Doctoral students who are preparing for their qualifying examinations may use this course designation. Enrolled students must develop, with the approval of their advisor, a "Plan of Study" for these credits.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

ACC 826. Introduction to Textual Analysis in Accounting Research. 3 Credit Hours.

This course will provide students with essential practical skills to apply popular textual analysis methods and help develop understanding of the key concepts and challenges associated with textual analysis and data analysis.

Components: SEM.

Grading: GRD.

Typically Offered: Spring.

ACC 830. Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the PhD. The student will enroll for credit as determined by their advisor, but not for less than a total of 24. Not more than 12 hours of ACC 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed their qualifying examinations they may take the maximum allowable credit stated above.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Aerospace Studies (AIS)

AIS 101. The Foundations of the United States Air Force I. 1 Credit Hour.

Survey course designed to introduce students to the United States Air Force and Air Force Reserve Officer Training Corps. Featured topics include: Air Force heritage, military customs and courtesies, career opportunities, Air Force Core Values, interpersonal communications, and team building. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

Corequisite: AIS 150.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

AIS 102. The Foundations of the United States Air Force II. 1 Credit Hour.

Survey and follow on course to AIS101, designed to introduce students to the United States Air Force and Air Force Reserve Officer Training Corps. Featured topics include: Air Force heritage, military customs and courtesies, career opportunities, Air Force Core Values, interpersonal communications, and team building. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

Corequisite: AIS 150.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

AIS 150. Leadership Laboratory. 0 Credit Hours.

Leadership Laboratory (LLAB) is a dynamic and integrated grouping of leadership developmental activities designed to meet the needs and expectations of prospective Air Force second lieutenants and complement the AFROTC academic program. It is a student planned, organized, and executed practicum conducted under the supervision of the Detachment 155 Commander and Operations Flight Commander.

Components: LAB.

Grading: CNC.

Typically Offered: Fall & Spring.

AIS 201. The Evolution of USAF Air and Space Power I. 1 Credit Hour.

Survey and follow-on course to AIS 101/102 designed to examine general aspects of the employment of air and space power through a historical perspective. Historical examples assist in understanding the development of Air Force distinctive capabilities and missions. In addition, the students continue discussing the importance of the Air Force Core Values with the use of operational examples and historical Air Force leaders. Students also continue to develop communication skills. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

Corequisite: AIS 150.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

AIS 202. The Evolution of USAF Air and Space Power II. 1 Credit Hour.

Continuation of AIS 201 which provides students with knowledge level understanding for general element and employment of air and space power. Discusses the importance of Air Force Core Values with use of operational examples and historical Air Force leaders. Continues to develop communication skills. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

Corequisite: AIS 150.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

AIS 301. Air Force Leadership Studies I. 3 Credit Hours.

Aerospace Studies 301 teaches cadets advanced skills and knowledge in management and leadership. Special emphasis is placed on enhancing leadership skills. Case studies are used to examine Air Force leadership and management situations as a means of demonstrating and exercising practical application of the concepts being studied. A mandatory Leadership Laboratory complements this course by providing advanced leadership experiences in officer-type activities, giving students the opportunity to apply leadership and management principles.

Corequisite: AIS 150.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

AIS 302. Air Force Leadership Studies II. 3 Credit Hours.

Continuation of AIS 301 and is a study of Air Force personnel and evaluation systems, leadership ethics, and communication skills required of Air Force junior officers. Case studies are used to examine Air Force leadership and management situations. Mandatory Leadership Laboratory complements this course by providing advanced leadership experiences in officer-type activities.

Corequisite: AIS 150.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

AIS 401. National Security Affairs/Preparation for Active Duty I. 3 Credit Hours.

Aerospace Studies 401 is designed to examine national security process, regional studies, advanced leadership ethics, and Air Force Doctrine. Special topics of interest focus on the military as a profession, officership, military justice, civilian control of the military, preparation for active duty, and current issues affecting military professionalism with a continuing emphasis on the refinement of communication skills. A mandatory Leadership Laboratory complements this course by providing advanced leadership experiences in officer-type activities, giving students the opportunity to apply leadership and management principles.

Corequisite: AIS 150.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

AIS 402. National Security Affairs/Preparation for Active Duty II. 3 Credit Hours.

Continuation of AIS 401 which examines regional studies and advanced leadership ethics. Special topics of interest focus on the military as a profession, officership, military justice, preparation for active duty, and current issues affecting military professionalism. Continued emphasis is given to refining communication skills. Mandatory Leadership Laboratory complements this course by providing students advanced leadership experiences.

Corequisite: AIS 150.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

Africana Studies (AAS)

AAS 150. Introduction to Africana Studies. 3 Credit Hours.

Experiences of African American and other African-descended peoples with emphases on social, cultural, political, etc.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

AAS 260. History of Slavery in the Atlantic. 3 Credit Hours.

The emergence and eventual abolition of the Trans-Atlantic slave trade and its effects on both old and new world.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

AAS 290. Special Topics. 3 Credit Hours.

Content varies by semester.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

AAS 350. Black Leadership in the U.S.. 3 Credit Hours.

Black leaders and leadership organizations. Emphasis on their role in overcoming oppression and barriers to advancement.

Prerequisite: 3 Credits in AAS.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

AAS 390. Special Topics. 3 Credit Hours.

Content varies by semester.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

AAS 490. Senior Seminar in Africana Studies. 3 Credit Hours.

Content varies by semester.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

American Studies (AMS)

AMS 101. Introduction to American Studies. 3 Credit Hours.

An interdisciplinary approach to American Studies with attention to a particular theme or period.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

AMS 301. Topics in American Studies. 3.00 Credit Hours.

Content varies by semester.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

AMS 310. The United States in the World. 3 Credit Hours.

The culture and history of the United States in a global framework.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

AMS 321. Topics in American Studies: History. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

AMS 322. Topics in American Studies: Literature. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

AMS 323. Topics in American Studies: Politics. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

AMS 324. Topics in American Studies: Religion. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

AMS 325. Topics in American Studies: Law. 3 Credit Hours.**Components:** LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**AMS 326. Topics in American Studies: Education. 3 Credit Hours.****Components:** LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**AMS 327. Topics in American Studies: Film. 3 Credit Hours.****Components:** LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**AMS 328. Topics in American Studies: Music. 3 Credit Hours.****Components:** LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**AMS 329. Topics in American Studies: Art. 3 Credit Hours.****Components:** LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**AMS 330. Topics in American Studies: Sociology. 3 Credit Hours.****Components:** LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**AMS 331. AMS 339. Topics in American Studies: Urban Studies. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

AMS 350. History and Culture of South Florida. 3 Credit Hours.

The history and culture of South Florida from a multidisciplinary perspective.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

AMS 399. Independent Study. 1-3 Credit Hours.

By arrangement with instructor; content varies.

Components: LEC.

Grading: CNC.

Typically Offered: Offered by Announcement Only.

AMS 401. Seminar in American Studies. 3 Credit Hours.

Content varies by semester.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

AMS 499. Independent Study. 3 Credit Hours.

By arrangement with instructor; content varies.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Summer.

AMS 501. Senior Project. 3 Credit Hours.

All majors must complete either an individual research project or an internship at a local cultural or civic institution. Either option must be approved by the program director.

Components: THI.

Grading: GRD.

Typically Offered: Spring.

AMS 505. Honors Thesis. 3 Credit Hours.

American Studies majors with a cumulative GPA of at least 3.5 in AMS courses and an overall GPA of at least 3.0 may earn departmental honors by completing AMS 505 : honors thesis. Candidates for departmental honors are responsible for finding a faculty member to serve as the thesis advisor. Students would take AMS 501 in the fall semester or the senior year and AMS 505 in the spring to complete the honors thesis.

Components: THI.

Grading: GRD.

Typically Offered: Spring.

Anthropology (APY)

APY 100. Introduction to Forensic Investigation (EXP). 3 Credit Hours.

Students will go into the field to gain an introductory understanding about skeletal identification and crime lab processes.

Requisite: Plan of Summer Scholar Program.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

APY 101. Introduction to Anthropology. 3 Credit Hours.

A broad overview of archaeology, cultural anthropology, biological anthropology, and linguistics.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

APY 105. HIV: Sex, Science, and Society. 3 Credit Hours.

The important role that science plays and has played in ameliorating suffering for mankind. We will include an analysis of the scientific, human, and policy-related issues associated with HIV/AIDS.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

APY 109. Anthropology of Religion. 3 Credit Hours.

Through themes such as myth, word and text, symbol, gender, pilgrimage, embodiment, and ritual, students learn about lived religion through anthropological research and field methods. The course also exposes introductory-level students to diverse world religious traditions: Korean folk religion, Indonesian Islam, Hinduism in diaspora, Judaism across cultures, Japanese temple Shinto traditions, and more.

Components: LEC.

Grading: GRD.

APY 200. Introduction to Forensic Anthropology (EXP). 3 Credit Hours.

Students will learn the basics of the human bone structure and how it relates to anthropology and forensic studies.

Requisite: Plan of Summer Scholar Program.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

APY 201. Principles of Archaeology. 3 Credit Hours.

History, methods, and theory of archaeology with an outline of the main characteristics of the prehistoric record throughout the world.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

APY 202. Principles of Cultural Anthropology. 3 Credit Hours.

Cultural anthropology, including such topics as economics, politics, kinship and families, health systems, religion, and personality.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

APY 203. Principles of Physical Anthropology. 3 Credit Hours.

The origin and biological development of the human species; human evolution explored by means of the fossil record of prehistoric population; differentiation and adaptation of contemporary populations in various world environments; the comparison of humans and other primates with respect to biological and behavioral variability.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

APY 204. Principles of Linguistic Anthropology. 3 Credit Hours.

Human linguistic principles of phonology, morphology, and grammar to construct a framework for understanding the operation of language in cultural context. The functions of human language in structuring ideological, economic, and political realms.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

APY 205. Medicine and Health Care in Society. 3 Credit Hours.

A sociohistorical analysis of the intersection between medicine, health care and society, using examples throughout the world. It will reflect on 'taking-for-granted' concepts such as the 'body, risk, illness and healing' and their relationships to culture, power, and society, as well as the plurality of narratives and discourses on health and healing practices.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

APY 208. Short-Changed in the City. 3 Credit Hours.

Marginalization plagues sub-populations in almost every large city. An anthropological view of this problem and its origins, presented through readings, discussions, lectures and field trips.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

APY 230. The Sounds of the World's Languages. 3 Credit Hours.

The range of sounds produced by the speakers of the world's languages. An introduction to phonetics, with a focus on acoustically-oriented methods used in contemporary phonetics.

Prerequisite: APY 204.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

APY 301. World Prehistory. 3 Credit Hours.

The global prehistoric record, with emphasis on the development of social complexity and ancient states.

Prerequisite: APY 201.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

APY 302. Ethnographies of Black Life. 3 Credit Hours.

Themes that have shaped Anthropology's engagement with Black Life. Critique between Black Studies and the social Sciences with particular focus on the discipline of anthropology, interrogation of the methods and theoretical frameworks employed to empirically distill the social conditions and political formations of black diasporic peoples.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

APY 306. Human Evolution. 3 Credit Hours.

The macroevolution of humans using the fossil record of vertebrates, including the development of uniquely human behavioral and anatomical adaptations, and of diversity in living populations.

Prerequisite: APY 201 or APY 203.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

APY 307. Human Adaptation. 3 Credit Hours.

Human biological adaptation to different environments and stress is examined anthropologically within an evolutionary framework. Mechanisms of adaptation to temperature extremes and other climatic variables, high altitude, disease, nutritional stress, urbanization, extraterrestrial conditions, and other environmental challenges are described in relation to biological and behavioral variations among human populations. The limits of human performance and human adaptive potential in the present and future are explored.

Prerequisite: APY 201 and APY 202 and APY 203 and BIL 101 and BIL 109.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

APY 309. Evolution of Human Behavior. 3 Credit Hours.

Origins and evolution of human behaviors as determined by fossil and archaeological evidence, primate research, and the cross-cultural analysis of behavioral variations in contemporary societies. The interaction of human biological and behavioral evolution.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

APY 310. Primate Behavior and Adaptation. 3 Credit Hours.

The taxonomy, distribution, anatomy, social behavior and adaptations to habitats of human and non-human primates as seen from an evolutionary perspective.

Prerequisite: APY 203 and BIL 150.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

APY 315. Folk and Alternative Medicine. 3 Credit Hours.

Historical and cultural backgrounds of health therapies, including theoretical bases of traditional ethnomedical, nonwestern, and complementary medical systems.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

APY 320. The Evolution of Language. 3 Credit Hours.

Popular contemporary hypotheses on the origins and development of language.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

APY 340. Marine Archaeology. 3 Credit Hours.

Location, excavation, and study of submerged sites.

Prerequisite: APY 201.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

APY 345. Blood and Chocolate: Ancient Civilizations of Mesoamerica. 3 Credit Hours.

An archaeological approach to understanding the major pre-Columbian cultures of Mesoamerica, from Olmec to Aztec periods, with emphasis on the ancient Maya. The particular accomplishments of this area such as the domestication of chocolate and corn, hieroglyphic writing, and elaborate sacrificial rituals will be explored.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

APY 356. Florida Archaeology. 3 Credit Hours.

Archaeological remains of ancient cultures in the Florida peninsula, from initial occupation to the Colonial Period.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

APY 360. Anthropology of Food. 3 Credit Hours.

Evolution of human diet, basic nutrition, food taboos, effects of domestication, effects of diet on skeletal remains, analysis of your own food habits, and the impact of certain foods on the biocultural evolution of our species.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

APY 361. Gender and Language. 3 Credit Hours.

The ways in which language is used in the constitution of gender from a cross-cultural perspective. Course is co-listed with WGS 361.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

APY 362. The Languages of the World. 3 Credit Hours.

The world's languages. The primary focus is on major differences and similarities among the structural properties of languages from diverse regions and linguistic families. In short, an introduction to linguistic typology.

Prerequisite: APY 204.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

APY 376. Economic Anthropology. 3 Credit Hours.

The structure and operation of the small-scale economy in the social system is examined. The interrelationship between social and economic systems, and the formation of non-market economies.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

APY 377. Anthropology of Political Systems and Discourse. 3 Credit Hours.

Political systems and processes in tribal societies, with special emphasis on dispute settlement, the organization of political control, and the use of oratory. Case studies from Latin American and African examples.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

APY 384. Caribbean Archaeology. 3 Credit Hours.

An examination of human lifeways in the Antillean archipelago from first settlement through the development of complex socio-political structures in the Late Ceramic Age and ultimately the arrival of European and African migrants.

Prerequisite: APY 201.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

APY 385. Caribbean Cultures. 3 Credit Hours.

Caribbean societies, including ethnic diversity, production and exchange, domestic organization, and belief systems.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

APY 391. Gender in Ancient Cultures. 3 Credit Hours.

A cross-cultural examination of the role gender played in ancient complex culture areas, such as Mesoamerica, Mesopotamia, and the Mediterranean, with emphasis on using the archaeological record to reconstruct social roles.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

APY 392. Sex and Culture. 3 Credit Hours.

A cross-cultural examination of sex roles and sexuality; gender identity, division of labor, functions of marriage, sexual practices, reproductive control, and political relationships between the sexes.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

APY 393. Drugs and Culture. 3 Credit Hours.

Cross cultural review of human drug use with special attention to the use of drugs in cultural context.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

APY 394. Comparative Religion. 3 Credit Hours.

A cross-cultural investigation of differing levels of religious belief systems examined from both etic and emic points of view.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

APY 395. Gender, Race, and Class. 3 Credit Hours.

To explore human differences, we will interrogate common sense as: thinking about gender, race, and class. Certain queries will be addressed. What roles do scientific practice, political systems, and popular media play in shaping our thinking about differences? Where do we draw the line between biological fact and social construction? How do these facets of identity intersect and inform individuals' everyday experiences? How might knowledge allow us to speak truth to power when institutional oppression occurs? An anthropological perspective will provide the central frame, though feminism, history, medicine, biology, psychology, and law will inform our considerations.

Prerequisite: APY 202 or WGS 201.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

APY 396. Youth Culture, Identity, and Globalization. 3 Credit Hours.

Youth cultural practices and experiences in various urban contexts in the world. Particular emphasis is placed on marginalization, identity and commodification of violent practices as embedded in the globalization processes.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

APY 397. Violence and Ritual. 3 Credit Hours.

Various theories of ritual and violence with reference to ethnographically-based topics. It will explore the role of symbols, rituals and ideologies in shaping and contesting power within nations and other political communities.

Prerequisite: APY 202.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

APY 398. Coastal Cultures. 3 Credit Hours.

Fishermen and their special relations to the environment, from Thailand and Sri Lanka to Alaska and the West Indies. Decision-making processes among fishermen, business concepts, responses to technology and myths of the sea.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

APY 399. The Anthropology of Kinship and Family in America. 3 Credit Hours.

Theories of kinship and the family. It will examine emergence of new patterns of kinship networks and construction of individuals. Ethnographic materials will be drawn from the Americas and the Caribbean, particularly Brazil, Cuba, Haiti, Jamaica and the United States.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

APY 405. Readings in Anthropology. 1-3 Credit Hours.

Supervised readings on special topics in Anthropology.

Components: THI.

Grading: GRD.

Typically Offered: Fall.

APY 406. Readings in Anthropology. 1-3 Credit Hours.

Supervised readings on special topics in Anthropology.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

APY 413. Medical Anthropology. 3 Credit Hours.

Cross-cultural and historical perspectives on health and illness in human evolution. Effects of heredity, environment, and culture upon human disease ecology. Biological and behavioral adaptations to disease.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

APY 414. Human Osteology. 3 Credit Hours.

Identification and interpretation of the human skeleton, including age, sex, hard tissue pathology and traumas.

Prerequisite: APY 203.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

APY 415. Forensic Anthropology II: Fieldwork. 3 Credit Hours.

The investigation, analyses, and legal aspects of human remains recovered from crime scenes and mass disasters.

Prerequisite: APY 203 or APY 414.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

APY 416. Bioarchaeology-Peopling the past. 3 Credit Hours.

Contextualization of bodies in space, cultural milieu and time are the primary focus of this course. Students will explore bioarchaeology's history, development and major topical concerns.

Prerequisite: APY 201 or APY 203.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

APY 417. Archaeometry: The Science of Material Culture. 3 Credit Hours.

The archaeological application of a physical science (physics, chemistry, geology, etc.) techniques to answer pertinent anthropological questions about past societies.

Prerequisite: APY 201.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

APY 418. Seminar in Anthropology. 3 Credit Hours.

Consideration of special topics in physical anthropology, linguistics, archaeology and ethnology and their interrelationships.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

APY 419. Politics of the Past. 3 Credit Hours.

The intersection of archaeology, politics, capitalism, and discrimination to consider the presentation, misconstrual, revision, and reclamation of the past. Lecturing will be kept to a minimum, as the bulk of the class will be devoted to discussion and debate.

Prerequisite: APY 201.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

APY 420. Archaeology, Architecture, and the City. 3 Credit Hours.

Ancient architectural remains in the global anthropological perspective, emphasizing the role of architecture in shaping the evolution of social and political interactions.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

APY 421. Interpreting Bodies. 3 Credit Hours.

Perceptions, representations, and regulation of the physical body as a gendered and sexual site, as a source of pleasure, as a means of social validation, and as an object of coercion. Writing Credit. Lecturing will be kept to a minimum, as the bulk of the class will be devoted to discussion and debate.

Prerequisite: APY 202 and WGS 201.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

APY 422. Pseudoscience in Archaeology. 3 Credit Hours.

Reconstructions of how people lived in the past that claim scientific validity, use the terminology of science, but are unsupported by evidence, can be called pseudoscientific. This course critically evaluates the field of pseudoscientific archaeology by applying the scientific method, logic, and common sense.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

APY 423. Paleopathology: Health and disease in ancient peoples. 3 Credit Hours.

Paleopathology aims to familiarize students with the range of health conditions that present in preserved human remains and to explain the linkages between disease prevalence and culture, economics, and politics.

Prerequisite: APY 414 and APY 416.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

APY 435. Anthropology of Nature and Environment. 3 Credit Hours.

This course is an introduction to the anthropological investigation of nature, biology, and environment. Taking examples from cultural anthropology and the subfields of environmental anthropology, political ecology, and the anthropology of science, the course builds an understanding of the various ways in which ideas about nature and human nature and nature making practices shape our contemporary world: its places, spaces, life forms, and forms of life.

Prerequisite: APY 202.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

APY 480. Undergrad Internship Anthrology. 3-9 Credit Hours.

The purpose of the undergraduate internship is practical application of coursework to hands-on learning with field and laboratory research conducted in partnership with an academic, governmental, non-profit and/or private sector business entity. The goal is to acquire and practice skill sets required for advancement in professional careers. Students may elect to participate in more than one internship because of the four-field approach of the discipline of Anthropology.

Prerequisite: APY 201 or APY 202 or APY 203 or APY 204.

Components: DIL.

Grading: GRD.

Typically Offered: Summer.

APY 484. Anthropological Theory. 3 Credit Hours.

Theoretical frameworks directing data collection and research methodology in anthropology.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

APY 485. Archeological Theory and Technique. 3 Credit Hours.

Theoretical traditions that shape modern archaeological research design and interpretation.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

APY 486. Advanced Colloquy in Black Feminist Theory and Praxis: Major Works of 7 Black Feminist Thinkers. 3 Credit Hours.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

APY 501. Methods of Anthropological Research. 3-6 Credit Hours.

Concentration on research methods for Cultural, Archaeological, Linguistic, and/or Biological Anthropology.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

APY 502. Field Studies in Anthropology. 3-6 Credit Hours.

Field research in advanced topics in Cultural, Archaeological, Linguistic and/or Biological Anthropology. Preparation of data for professional presentation and publication is stressed.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

APY 505. Museum Internship. 3 Credit Hours.

Field work and on-site experience in museum studies conducted in conjunction with the major museums in Miami. Training and research in methods and techniques in museology.

Prerequisite: APY 201.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

APY 506. Workshop in Anthropology. 3-6 Credit Hours.

This course is designed for upper level and graduate students to participate in special topics in Anthropology and related fields.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

APY 511. Artlab At Lowe. 3 Credit Hours.

Organizing an art exhibition at the Lowe Art Museum. Taught by a different faculty member each year.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

APY 512. Advanced Medical Anthropology. 3 Credit Hours.

Applications of theories and methods of medical anthropology to problems in human health and disease.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

APY 518. Advanced Seminar in Anthropology. 3 Credit Hours.

Specialized topics in Anthropology to involve students into current research specializations.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

APY 601. Advanced Seminar in Archaeology, Theory and Practice. 3 Credit Hours.

History and theoretical foundation of modern archaeology; ethics, professional standards, and best practices in archaeology; cultural heritage management with special emphasis on NAGPRA; compliance with Secretary of the Interior standards, Section 106 regulatory knowledge and skills for compliance with government regulations, and current topical literature on archaeology.

Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

APY 602. Advanced Seminar in Cultural Anthropology. 3 Credit Hours.

The application of the anthropological perspective, data collection and analyses methods, and theoretical foundations of traditional cultural anthropology to understanding and working on solving human problems in the modern world. Topics include the design, conduct, and application of modern ethnological methods to research venues in business, governmental/NGO agencies, conflict studies, natural disasters, medical, globalization and financial organizations.

Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

APY 603. Advanced Seminar in Biological Anthropology. 3 Credit Hours.

The historical and theoretical foundations of modern biological anthropology. Topics include ethics and standards for human subjects; applied bioarchaeology, biological anthropology in medical/legal settings, primatology, Human biology and adaptive diversity, modern perspectives on race, and skeletal biology of modern peoples. The development of professional research and writing skills for the discipline is integral to course goals.

Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

APY 604. Advanced Seminar in Linguistic Anthropology. 3 Credit Hours.

Core aspects of linguistics theory, and consider the ways in which modern linguistic techniques can be applied in the investigation of both common and uncommon typological patterns in the world's 7000+ languages. Requisite: Graduate Status or Permission of Instructor. Requisite: Graduate Status or Permission of Instructor. Typically Offered: Fall & Spring.

Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

APY 605. Museum Internship. 3 Credit Hours.

Field work and on-site experience in museum studies conducted in conjunction with the major museums in Miami. Training and research in methods and techniques in museology.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

APY 611. Methods of Anthropological Research. 3-6 Credit Hours.

Concentration on research methods for Cultural, Archaeological, Linguistic, and/or Biological Anthropology.

Components: RSC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

APY 612. Advanced Medical Anthropology. 3 Credit Hours.

Applications of theories and methods of medical anthropology to problems in human health and disease.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

APY 615. Advanced Museum Internship. 3 Credit Hours.

Components: SEM.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

APY 616. Advanced Workshop in Anthropology. 3-6 Credit Hours.

This course is designed for graduate students to participate in special topics in Anthropology and related fields.

Components: SEM.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

APY 628. Advanced Graduate Seminar. 3 Credit Hours.

Specialized topics in Anthropology to involve students into current research specializations.

Components: SEM.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

APY 690. Teaching Practicum in Anthropology. 3 Credit Hours.

Logistics and pedagogical issues of teaching anthropology, including skill set and materials suitable for employment in settings for which the master's is the required, e.g., two-year schools. The student will evaluate texts, create teaching materials for a given subfield, master commonly-available electronic teaching and learning tools, and teach one class as directed.

Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

APY 696. Advanced & Graduate Colloquy in Black Feminist Theory and Praxis: Major of 7 Black Feminist Thinkers. 3 Credit Hours.

Black feminist theory, produced primarily by Black women scholars, artist and activists, throughout the diaspora, constitutes a distinctive and influential body of politics and thought. Black feminist's uninvited interventions in Black politics arts and letters— produced at the interstices of violence, silence, invisibility, or forgetting— exposes and makes available a wider horizon of possibilities than had been proposed before its emergence. The central theoretical innovation of this praxis (later claimed by theorists of various stripes), is the multiple-'interlocking', 'intersectional', 'compounded' –constitution of "identity," oppression, aesthetic sensibilities, for example, and therefore of roads toward freedom. This distinctive body of work is not only interdisciplinary, multilingual; but also constitutive to specific geographies, politics, experiences, and particular intellectual and political streams.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

APY 702. Field Studies in Anthropology. 3-6 Credit Hours.

Field research in advanced topics in Cultural, Archaeological, Linguistic and/or Biological Anthropology. Preparation of data for professional presentation and publication is stressed.

Components: SEM.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

APY 805. Graduate Internship: Professional Practice of Anthropology. 1-9 Credit Hours.

An internship designed to provide valuable career-related work experience in a real - world setting, e.g., institutions, organizations and/or businesses. Students will identify an opportunity, supervisor, and write a proposal as to the relevancy to their goals. The Internship may be paid or unpaid. This course may be repeated.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

APY 810. Master's Degree Thesis Preparation and Writing. 1-9 Credit Hours.

Preparation/completion of a written thesis for the master's degree when the student has completed the thesis research, is engaged in writing the thesis, and expects to use the facilities and resources of the Anthropology department and the university; enrollment is required when the completed thesis is defended and approved. This course may be repeated

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

Applied Marine Physics (AMP)

AMP 536. Modeling of Physical-Biological Interactions. 3 Credit Hours.

The course is designed to teach students the basics components for building coupled physical biological models. Students will be able to understand the processes affecting from low- to high-trophic level organisms in the planktonic environment. Emphasis will be given on numerical simulations of mechanisms involved in: Plankton distribution and patchiness; Trophic interactions (NPZD); Larval behavior and transport; Marine population connectivity.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

Applied Music (MAP)

MAP 264. Vocal Techniques. 2 Credit Hours.

Components: LEC.

Grading: GRD.

Arabic (ARB)

ARB 101. Elementary Arabic I. 4 Credit Hours.

Fundamental writing and grammar principles; pronunciation; simple reading and translation. Closed to native speakers.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARB 102. Elementary Arabic II. 4 Credit Hours.

Modern Standard Arabic; oral and written exercises. Closed to native speakers.

Prerequisite: ARB 101.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARB 201. Intermediate Arabic I. 4 Credit Hours.

Modern Standard Arabic; oral and written exercises. Closed to native speakers.

Prerequisite: ARB 102.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARB 202. Intermediate Arabic II. 3 Credit Hours.

Readings designed to integrate listening comprehension, speaking, reading, and writing skills in Modern Standard Arabic. Discussion of Arab society, history and culture. Closed to native speakers.

Prerequisite: ARB 201.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARB 203. Advanced Arabic. 3 Credit Hours.

5th semester course in Modern Standard Arabic. Continued development of all four language skills (listening, speaking, reading, and writing) together with study of cultural aspects of the Arab world. Conducted in Arabic. Closed to students who graduated from a high school in which the primary language of instruction was Arabic.

Prerequisite: ARB 202.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARB 204. Arabic 204: Advanced Arabic II. 3 Credit Hours.

The sixth course of the Modern Standard Arabic sequence within the Arabic Studies Program. The three primary goals of the Arabic language sequence are: (1) developing oral and written communicative abilities in Arabic; (2) understanding the rich culture of the Arabic-speaking world through engaging with texts and cultural artifacts; (3) studying and understanding the Arabic language, from grammar and spelling to writing with coherence, cohesion and accuracy.

Prerequisite: ARB 203.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARB 207. Arabic for Heritage Learners. 3 Credit Hours.

Arabic for Heritage Learners is a 200 level course specifically designed for students of Arab descent who fulfilled the equivalent of ARB 201. The course will hone students' ability in critical reading, writing, debate, and discussion of pertinent topics in Arab culture. The course material will focus on the history of Arab culture, literature, film, and music. By the end of the semester students will develop their ability in critical reading and writing in MSA.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARB 208. Arabic for Heritage Learners II. 3 Credit Hours.

Arabic 208 is combined with the sixth course of the Modern Standard Arabic sequence within the Arabic Studies Program. The three primary goals of the Arabic language sequence are: (1) developing oral and written communicative abilities in Arabic; (2) understanding the rich culture of the Arabic-speaking world through engaging with texts and cultural artifacts; (3) studying and understanding the Arabic language, from grammar and spelling to writing with coherence, cohesion and accuracy.

Prerequisite: ARB 202 or ARB 207.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARB 251. Levantine Colloquial Arabic I. 3 Credit Hours.

This course will enable students to converse in the colloquial Arabic dialects of the Levant (Jordan, Lebanon, Palestine, and Syria). Development of communicative abilities in speaking and comprehension, as well as reading and writing (as used in social media, theater, etc.) of colloquial Levantine Arabic. Closed to native speakers (students educated in schools where Arabic was the language of instruction); heritage learners at the beginning level may be accommodated.

Prerequisite: ARB 201.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARB 310. Topics in Arabic Literature and Culture in Translation. 3 Credit Hours.

Specific topics within the literature and cultures of the Arabic-speaking world, including literary, cinematic, and artistic representations of central themes or issues, and the cultural production of particular historical periods or national or immigrant groups. This course is taught in English and does not fulfill the CAS foreign language requirement. May be repeated for credit if topics vary.

Prerequisite: ENG 106 or ENG 107.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARB 312. Arab Cultures: A Cultural History of the Arab World. 3 Credit Hours.

Study of the main points of Arab cultural history, from Pre-Islamic times to the period following European colonization with an emphasis on intellectual history and literary and visual arts. This course is taught in English and does not fulfill the CAS foreign language requirement.

Prerequisite: ENG 106 or ENG 107.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARB 315. Topics in Gender and Sexuality in Translation. 3 Credit Hours.

Topics in gender and sexuality in the context of the Arab world, through literary and/or cultural studies. This course is taught in English and does not fulfill the CAS foreign language requirement. May be repeated for credit if topics vary.

Prerequisite: ENG 106 or ENG 107.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARB 394. Arabic Internship. 1-3 Credit Hours.

The internship is intended to provide the student with an opportunity to apply analytical, interpretive, expressive, and creative skills developed in coursework. Internships ordinarily take place outside the University. They involve UM-faculty supervision as well as supervised on-site experience in an Arabic-speaking cultural, business, or not-for-profit organization. Student needs to fill out the internship application form. Normally 40 internship hours are required per credit earned (the host will supply documentary evidence of hours worked).

Components: PRA.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARB 410. Language and Power in the Arab World. 3 Credit Hours.

The multiple languages and linguistic registers present in the Arab world and, through materials from linguistics, anthropology, political science, music, art, and literature, leads them into an exploration of the main socio-linguistic features of Arabic and their broader cultural ramifications. This course is conducted in English. It does not fulfill the College of Arts & Sciences language requirement.

Prerequisite: ENG 106 or ENG 107.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARB 591. Directed Readings. 1-3 Credit Hours.

Directed readings (Independent study) in Arabic Studies.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARB 625. Arabic for Graduate Students. 0 Credit Hours.

The Arabic language through a communicative approach implementing the use of new vocabulary and applied use of grammatical theories thereby advancing reading comprehension as well as writing skills. The main focus of this class is on communication in Arabic where we aim for maximum use of the language in the classroom. The instructor will strive to speak exclusively in Arabic during class, and students will be expected to do the same with their instructor and classmates

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARB 641. Elementary ARB I for Graduate Students. 0 Credit Hours.

Designed to develop graduate students' communicative abilities in speaking, reading, writing, and comprehending Arabic, as well as to provide an introduction to the Arabic-speaking world.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARB 642. Elementary ARB II for Graduate Students. 0 Credit Hours.

Continuation of ARB641. Designed to develop graduate students' communicative abilities in speaking, reading, writing, and comprehending Arabic, and continued study of the Arabic-speaking world.

Prerequisite: ARB 641.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARB 651. Intermediate ARB I for Graduate Research. 0 Credit Hours.

For graduate students with previous study of elementary-level Arabic. Designed to enhance graduate students' communication skills at the intermediate level. Intended principally for students who will carry out research in areas related to the Arabic-speaking world.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARB 652. Intermediate ARB II for Graduate Research. 0 Credit Hours.

Prerequisite: ARB 651.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARB 653. Advanced ARB I for Graduate Research. 0 Credit Hours.

Designed to enhance graduate students' communication skills in the Arabic language at the advanced-low level. Intended principally for students who will carry out research related to the Arabic-speaking world.

Prerequisite: ARB 651.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARB 654. Advanced ARB II for Graduate Research. 0 Credit Hours.

Designed to enhance graduate students' communication skills in the Arabic language at the advanced-intermediate level. Intended principally for students who will carry out research related to the Arabic-speaking world.

Prerequisite: ARB 653.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARB 657. Intermediate Arabic - Graduate Heritage. 0 Credit Hours.

Designed to enhance graduate students' communication skills in the Arabic language at the high-intermediate level. Intended principally for heritage learners who will carry out research related to the Arabic-speaking world.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARB 658. Advanced ARB for Graduate Heritage Learners. 1 Credit Hour.

Designed to enhance graduate students' communication skill in the Arabic language at the advanced-low level. Intended principally for heritage learners who will carry out research related to the Arabic-speaking world.

Prerequisite: ARB 657.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARB 691. Directed Readings. 1-3 Credit Hours.

Directed readings (Independent study) in Arabic Studies.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARB 692. Directed Readings. 1-3 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

Architecture (ARC)

ARC 101. Architecture Design I. 6 Credit Hours.

Introduction to architectural design as an intellectual and aesthetic discipline directed at the analysis, interpretation, synthesis and transformation of the physical environment. Topics include concept, site, form, analysis, use of precedents, technique and the ability to communicate design ideas.

Components: STU.

Grading: GRD.

Typically Offered: Fall.

ARC 102. Architecture Design II. 6 Credit Hours.

Architectural response to shelter, space and setting requirements. Topics include design thinking skills, programming, site analysis, use of precedents and anthropometrics and human behavior.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 109. Introduction to Architecture. 3 Credit Hours.

(Includes Design & History) Introduction to architectural ideas and principles including composition, space, form, function, history and methods of exploring architectural and urban design problems. Students will learn the relationship between two dimensional and 3 dimensional spaces through analytical drawing and model making. Course pedagogy includes weekly lectures in history and theory to better inform the design process. This course will encourage intuitive action, rapid visual analysis and interpretation.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ARC 110. Visual Studies. 3 Credit Hours.

Concurrent with the ARC 109 course, the visual studies course explores Architectural drawing as a means of discovery, exploration, analysis and representation. Coursework begins with freehand drawing, in which students explore and refine their observation and representational skills, followed by an introduction to digital drawing and 3-d fabrication used in the profession today. The students will develop a portfolio in book format that illustrates the body of work produced during the three- week program.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ARC 111. Visual Representation I. 3 Credit Hours.

An introduction to architectural representation as exploration, selection coordination and acquisition of visual knowledge including analog and digital techniques. Topics include: orthographic and oblique projections, geometric constructions, sketching, shade and shadow, and basic knowledge of digital tools.

Components: STU.

Grading: GRD.

Typically Offered: Fall.

ARC 112. Visual Representation II. 3 Credit Hours.

An intermediate course that continues methods integration introduced in Visual Representation I with an increased focus on three dimensional projections.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 121. Architecture and Culture. 1 Credit Hour.

Architecture as an intellectual and aesthetic discipline. Focus on design theory, language, typology, image, form, context, and case studies.

Corequisite: ARC 101, 111.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 122. Architecture and Behavior. 1 Credit Hour.

The course focuses on the study of human behavior and its relationship to the design process. Topics include: cultural diversity, social equity and the application of psychological factors in the design of buildings and their environment.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 141. On-Site Survey of European Architecture and Urbanism. 3-6 Credit Hours.

On site introduction to architecture and the city with a historical review of European architecture and urban form from the classical to the contemporary. Students travel with faculty to survey selected European architectural and urbanistic precedents at specific locations. Elective course open to all majors; lecture and seminar format.

Components: LEC.

Grading: GRD.

Typically Offered: Spring & Summer.

ARC 203. Architecture Design III. 6 Credit Hours.

The course focuses on the design of urban form and its relationship to the natural environment. Topics include: site analysis and design, context, climate, access and circulation and landscape.

Components: STU.

Grading: GRD.

Typically Offered: Fall.

ARC 204. Architecture Design IV. 6 Credit Hours.

The design course focuses on building materials, techniques and structure as active constituents of architecture design. Focus on orientation, enclosure, low-energy responses, selection and assembly of construction materials, short and intermediate span structural systems.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 213. Visual Representation III. 3 Credit Hours.

An advanced representation course that builds on the tools and methods of visual Representation I & II while introducing students to more advanced techniques of three dimensional modeling that integrates analog and digital techniques. Topics covered include; composition, diagramming, research and analytical drawing, perspective, and the integration of digital tools.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 223. Architecture and the Environment. 1 Credit Hour.

Architectural response to natural environmental requirements. Focus on climate, control, natural energy use, ecosystems, energy flow, environmental intervention, case studies of vernacular building techniques.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 230. Building Technology I: Materials and Methods. 3 Credit Hours.

Material characteristics of enclosure and structural systems, case studies in traditional and modern building construction. Topics include properties of building materials: wood, masonry concrete, steel and glass construction techniques; on-site and off-site processes; exterior finishes; assemblies, detailing and basic building code concepts.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 231. Building Technology: Structural Systems. 3 Credit Hours.

Structural systems: the tectonics, patterns and behavior of the elements of building structures. Topics: Equilibrium, stability, vertical and lateral building envelope and financial considerations.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 267. History of Architecture I: Ancient, Medieval and Renaissance. 3 Credit Hours.

Studies of the history of architecture and urban design. Focus on religious and secular monuments and their settings, domestic architecture and infrastructure, regional constructional and compositional traditions from prehistory to the end of the sixteenth century. Corequisite: ARC 203.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 268. History of Architecture II: Baroque through Contemporary. 3 Credit Hours.

Studies of the history of architecture and urban design. Focus on religious and secular monuments and their settings, domestic architecture and infrastructure, regional constructional and compositional traditions from the end of the sixteenth century through to the present. Corequisite: ARC 204.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 292. Introduction to Architecture Design I. 3 Credit Hours.

Survey of the architecture profession and introduction to architecture design for non-architecture majors. Role, opportunities, vocabulary, visual awareness, techniques and procedures of design.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 293. Introduction to Architecture Design II. 3 Credit Hours.

Continuation of ARC 292 and an introduction to the interactions between architecture and the engineering disciplines for non-architecture majors. Theories of building and site design, technology as an integral component of design, program, site, climate and methodology.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 294. Introduction to the Development of Architecture. 3 Credit Hours.

Introduction to architecture for non-architecture majors. Vocabulary, themes, principles and processes of design, cultural, social, economic and technological influences demonstrated through historic examples.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 301. Architecture Design. 3 Credit Hours.

Comprehensive building and site design for students transferring into the architecture program at third year level. Topics include human, environmental, cultural and technological factors.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 305. Architecture Design V. 6 Credit Hours.

The design course focuses on the analysis and design of housing typologies within the context of the city. Topics include: programming, research and the integrated evaluation and design making in the design process.

Components: STU.

Grading: GRD.

Typically Offered: Fall.

ARC 306. Architecture Design VI. 6 Credit Hours.

The design course focuses on the ability to demonstrate skills associated with making integrated architectural design decisions across multiple systems. Students must display an ability to make design decisions within a complex architectural project while demonstrating broad integration and consideration of environmental stewardship, technical documentation, accessibility, site conditions, life safety, environmental systems, structural systems, and building envelope systems and assemblies.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 323. On Site Study of Selected Architecture and Urbanism. 3-6 Credit Hours.

On site study of specific architectural and/or urbanistic precedents at selected locations. Focus on specific period(s) and/or architect(s). Elective course open to all majors.

Components: LEC.

Grading: GRD.

Typically Offered: Spring & Summer.

ARC 324. On Site Graphic Analysis of Selected Architecture and Urbanism. 3 Credit Hours.

On site analysis and illustration of specific architectural and/or urbanistic precedents at selected locations. Diagrams, sketches, and drawings recording, analyzing and evaluating buildings and places. Focus on specific period(s) and/or architect(s). Elective course open to all majors.

Components: LEC.

Grading: GRD.

Typically Offered: Spring & Summer.

ARC 362. Environmental Building Systems I. 3 Credit Hours.

Environmental and Safety Systems. Topics include mechanical - HVAC and conveyors; building envelope and assemblies, plumbing - fixtures and pipes; safety systems - fire safety and emergency and signal systems.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 363. Environmental Building Systems II. 3 Credit Hours.

Principles and applications of light and acoustics. Topics include natural and artificial light - planning for sunlight, problems and solutions for interior and exterior illumination; sound - properties, problems and solutions in new and existing spaces. Principles and applications of electrical equipment and wiring design.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 371. Ancient Architecture. 3 Credit Hours.

History of architecture and human settlements. Western European prehistory, Egypt, Mesopotamia, Persia, Aegean and Mediterranean, Greece, Rome.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 373. Early Christian, Byzantine, and Medieval Architecture. 3 Credit Hours.

History of architecture and human settlements. Early Christian and Byzantine architecture in Italy, the Near East, Greece, North Africa, Eastern Europe, Medieval architecture in Western Europe.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 382. Architecture and Culture in Italy. 3 Credit Hours.

A cultural and historical framework in preparation for participation in the Rome program. A range of topics, including architecture, art, history, cinema, literature and politics presented by University faculty from a variety of disciplines. Required for participation in the Rome Program.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 390. History of Cities. 3 Credit Hours.

Historical overview of the origin of cities and the development of cities in the East, West, and New World. Focus on the nature of the industrial revolution and the development of the industrial city and contemporary urban settlements.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 407. Architecture Design VII. 3-6 Credit Hours.

Elective design studio course: student and faculty select areas of in-depth study. Topics are broadly defined and vary from semester to semester.

Components: STU.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 408. Architecture Design VIII. 3-6 Credit Hours.

Elective component: student and faculty select areas of in-depth study. Topics are broadly defined and vary from semester to semester.

Components: STU.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 452. Management of Professional Practice. 3 Credit Hours.

Overview of the practice and the profession, legal and ethical concerns, business types and management practices, traditional and non-traditional practices and services, contracts and contractual relationships.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 475. Colonial Architecture. 3 Credit Hours.

History of architecture and human settlements. Colonial Architecture from the 16th through the 19th centuries in North and South America, the Caribbean, India and Africa.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 476. 19th and 20th Century Architecture. 3 Credit Hours.

History of architecture and human settlements. America and Europe during the 19th and 20th centuries; cultural, technological and theoretical development.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 481. Special Problems. 3 Credit Hours.

Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 482. Special Problems. 3 Credit Hours.

Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 483. Special Problems. 3 Credit Hours.

Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 500. Architecture Theory. 3 Credit Hours.

Architecture and Culture/Architecture and the Environment Survey of primary texts in theory of architecture. Part 1: Focus on design theory, language, identity, tectonics and context. Part 2: Focus on environmental theory, sustainability, and ecosystems.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 501. Architecture Design and Theory I. 6 Credit Hours.

Cultural, human and environment component and architectural responses to these: Social and aesthetic concepts, architectural psychology, climatic principles, programming analysis and design.

Components: STU.

Grading: GRD.

Typically Offered: Fall.

ARC 502. Architecture Design and Theory II. 6 Credit Hours.

Technology component; materials, structure, and environmental control systems as a framework for architectural design. Construction materials and methods, structural systems, mechanical systems.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 503. Architectural Design and Theory III. 6 Credit Hours.

Legal and economic component; government and finances as active constituents of architecture design. Zoning regulations, building codes, principles of public health, safety and welfare, market and feasibility studies.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 504. Architecture Design and Theory I. 6 Credit Hours.

Cultural, human and environment component and architectural responses to these: Social and aesthetic concepts, architectural psychology, climatic principles, programming analysis and design.

Components: STU.

Grading: GRD.

Typically Offered: Fall.

ARC 507. Architecture Design. 6 Credit Hours.

Elective component: student and faculty select areas of in-depth study. Topics include building types, environment, energy, community design, etc.

Components: STU.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 509. Architecture Design IX. 3-6 Credit Hours.

Elective component: student and faculty select areas of in-depth study. Topics include building types, environment, energy, community design, etc.

Components: STU.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 510. Architecture Design X. 3-6 Credit Hours.

Elective component: student and faculty select areas of in-depth study. Topics include building types, environment, energy, community design, etc.

Components: STU.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 511. Visual Representation I. 3 Credit Hours.

Issues covered in the course will deal with the illustration of ideas in architectural manner. Students are to use the skill of drawing and model-making, either by hand or on the computer, as their new language. Topics will include how to read, understand, and create design drawings, to draw from observations and analyze their subject matter, to be able to distinguish the relevance of a particular drawing and to structure how they present their information. Students will be instructed to properly craft their work in and outside of studio in an effort to see their work evolve and improve.

Components: STU.

Grading: GRD.

Typically Offered: Fall.

ARC 512. Advanced Visual Analysis. 3 Credit Hours.

Drawing as a means of analyzing and recording visual experience. Composition, form, light, color and drawing as a primary device in the mental registration of visual experience.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 513. Advanced Visual Representation. 3 Credit Hours.

Students will learn to carefully evaluate space, color, depth, hierarchy, balance and scale in all architectural visual representation. The assignments will explore different media as it is used in the profession including but not limited to: diagrams, renderings, plans, elevations, sections, and axonometric. Through lectures and workshops, the course will provide a combination of both theoretical and practical lessons encompassing the fundamentals of architectural visual representation. The course will also include parallel lectures on typography, architectural graphic design, and verbal presentation. The lectures will be given by highly regarded industry professionals who will address the way that students can be aware of and understand typography, verbal presentation, and graphic design fundamentals as it relates to architecture. The class will consist of three parts. Part I introduces students to the fundamentals of 3d modeling and drafting as part of a representation workflow. The exercise will include both urban and building scales. Part II concentrates on understanding and dissecting more complex geometries through advance use of digital parametric software such as Grasshopper. Part III focuses on visual representation based on a studio project with emphasis on graphic techniques for final presentations.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 514. Michelangelo. 3 Credit Hours.

Drawing as a form of research across mediums to understand historical research and interpretation of Michelangelo's work.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 515. Computer Modeling. 3 Credit Hours.

Three-dimensional, computer modeling, and rendering. Lecture, problem solving exercises and laboratory.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 516. Architectural Watercolor Renderings. 3 Credit Hours.

This course will use freehand drawing and watercolor painting as a vehicle to study and record the urban and architectural conditions of Coral Gables and other South Florida sites. Particular emphasis will be placed on the analytical potential of sketches (recording space, light, surfaces and color).

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 517. Construction Documents. 3 Credit Hours.

Working drawings and specifications. Form, content and role of constituent parts of working drawings and specifications by using case studies.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 518. Documentation of Historic Architecture. 3 Credit Hours.

Principles of preservation and restoration, research methods, measured drawings, surveying methods, and case studies.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ARC 519. Architecture and Color. 3 Credit Hours.

This course focuses on the theory and practice of color and its application to architectural design. Topics include color history from Newton through Albrecht, the relationship between color practice in science versus art, and the discipline of color in architecture from the Neoclassical movement through the Modern Movement.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ARC 523. Interior Architecture Design. 3 Credit Hours.

Principles and technical components of interior design. Topics include activity, analysis, finishes, furniture, fixture, lighting, and acoustics.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 524. Selected Topics in Interior Architecture Design. 3 Credit Hours.

Principles and technical components of interior design. Topics include interior volumetrics, finishes, furnishings and lighting.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 525. Landscape Arch Design I. 3 Credit Hours.

Analysis and design of landscape spaces. Studies in historical precedent, gardens, parks, plazas, squares and response to architectural context.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 526. Landscape Arch Design II. 3 Credit Hours.

Analysis and design of landscape spaces. Topics include ecological principles, landforms and plant materials.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 527. Architecture Photography. 3 Credit Hours.

Photography with emphasis on architectural subjects. Introduction to visual principles, photographic equipment, materials, and techniques.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 528. Historic Preservation. 3 Credit Hours.

Basic design principles for the rehabilitation of historic buildings. Evaluating character-defining details; significance analysis; context of setting issues within historic districts; applying the Secretary of the Interior's Standards for rehabilitation.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 529. Research in Design-Methods and Procedures. 3 Credit Hours.

Application of research methods and procedures to design issues. Historical, descriptive, analytic, experimental research methods; tools for data manipulation and communication.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 531. Building Technology II: Structural Systems. 3 Credit Hours.

Structural systems: The tectonics, patterns and behavior of the elements of building structures. Topics: Equilibrium, stability, vertical and lateral loads, building envelope and financial considerations.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 532. Building Structures I. 3 Credit Hours.

The structural behavior of simple frame structures. Topics include techniques to determine basic system layout and preliminary dimensioning of key subsystems and members.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ARC 533. Building Structures II. 3 Credit Hours.

The structural behavior of complex structures. Topics include prestressed systems, waffle and space trusses, curved structures and longspan buildings.

Prerequisite: ARC 532.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Summer.

ARC 534. The Palazzo in Italian Architecture. 3 Credit Hours.

Study of the development of the Renaissance and Baroque palazzo in Rome and other important centers of art and culture. Emphasis on the socio-political context.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 535. Historic Italian Urbanism. 3 Credit Hours.

Study of Italian cities and towns from medieval to contemporary times, including a comparative analysis of history and form.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 536. Italian Gardens. 3 Credit Hours.

Study of Italian garden design during the Renaissance, Baroque and Mannerist periods. Emphasis on historical and political context.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 537. Research in Rome. 3 Credit Hours.

An exploration of Roman history, architecture and urban form through lectures, on site study and drawing assignments. Emphasis on chronological and spatial sequence of development.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 538. Interior Architecture Design. 3 Credit Hours.

Principles and technical components of interior design. Topics include activity, analysis, finishes, furniture, fixture, lighting, and acoustics.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 539. Adaptation to Climate Change. 3 Credit Hours.

The course is an elective seminar that introduces students to the phenomena and the related discussion on the topic of climate change. With an emphasis on human response, the course reviews current scientific evidence, and the potential mitigation of emissions and other causal actions, followed by study of the adaptation required by changing conditions.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 540. Tropical Architecture. 3 Credit Hours.

The course will comprise a discussion of tropical architecture and the theme of tropicalism. Course work will include research and documentation in drawings of selected case studies.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 541. Seminar on Town Design. 3 Credit Hours.

Introduction to the lexicon of urbanism; analytical presentations of the concepts of: region, town, neighborhood, corridor, district, and building type; inter disciplinary presentations, review, and criticism of current town and urban design projects.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 542. Seminar on Housing. 3 Credit Hours.

Introduction to domestic building typology; exploration of the concepts of low, medium, and high density housing with attention to social, environmental, and economic issues; presentations of current case studies.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 543. Seminar on Retrofit of Suburbia. 3 Credit Hours.

Introduction to the critical reconstitution of the city; theory and history of the concepts of revitalization and redevelopment; presentations, review, and criticism of current case studies.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 544. Architecture of Palladio. 3 Credit Hours.

On site study of the architecture and urbanism of Andrea Palladio. Emphasis on the artistic precedents of the Veneto Region.

Components: LEC.

Grading: GRD.

ARC 545. Urban Composition. 3 Credit Hours.

Survey and analytical review of urban rooms as the vessel of human activity in urban culture. Study of proportional and compositional aspects of urban rooms together with economic, social, and cultural factors. Readings and discussion format.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 546. Studies of Havana. 3 Credit Hours.

Analysis of the physical structure of a major city and its environments including an exploration of its history and iconographic themes, mapping and building studies.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 547. Architecture and Urban Identity. 3 Credit Hours.

Study of the relationship between architecture and urbanism focusing on the ways by which architecture provides urban identity and image of place. Case studies relating monuments, fabric and urban plans to their culture, time and place. Lecture and seminar format.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 548. Seminar in Community Development. 3 Credit Hours.

Study of the contemporary context for the development of the physical environment. Examination of public, private and third sector implementation of building and community design. Format: guest speakers, readings, discussions, and seminars.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 549. Construction and Project Management. 3 Credit Hours.

Management of construction projects including legal considerations and techniques of management science applied to construction. Includes engineering methods of cost and time estimating, and exercises in applications of engineering economics, flow charts, tracking progress, construction contracts, indemnity agreements, and network planning techniques including CPM and PERT.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 550. Professional Lecture Series. 3 Credit Hours.

Exposure to the various professional disciplines in South Florida that make contributions to the design process. Case study analysis and evaluation of current building project, from time of initial formulation through completion, including research, diagrammatic studies, site visits and lectures.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 551. Contemporary Theories of Architecture. 3 Credit Hours.

Theoretical basis of modern architecture and different present currents and movements. Agrarianism, technism, orthodoxy, brutalism, scientism, revivalism, consumerism, rationalism, classicism.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 553. Structural Design Theory. 3 Credit Hours.

Relationship of structural systems to architectural design. Case studies in theories of structure, form and construction.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 554. Architecture of South Florida. 3 Credit Hours.

History of architecture and human settlements. Studies of significant architectural landmarks and urban design of the South Florida Region, chronological growth of Miami, Miami Beach, Coral Gables, Key West and Palm Beach.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 555. 18th and 19th Century American Architecture and Architects. 3 Credit Hours.

The course concentrates on the development of early American architecture, Architects and Urbanism, primarily but not exclusively to 17th, 18th and 19th centuries with particular emphasis on theoretical, technological and cultural developments in America.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 556. Contemporary Latin American Architecture. 3 Credit Hours.

The course seeks to examine the ways in which architecture and the built environment are shaped by, and shape, globalization. It examines the meaning of contextual modernism in the sphere of architecture and urbanism. It will discuss how acquired influences, design culture and economic dependency become the defining elements of contemporary Latin American Architecture today.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 557. Design and Fabrication Techniques: Carved Panels. 3 Credit Hours.

Design, construction and detailing of wood as applied to furnishings and interiors. Focus: low and high relief carved wood panels. Workshop based course including research, exercises, measuring, documentation and a final project.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ARC 558. Theories of Landscape Architecture. 3 Credit Hours.

Leading theories of landscape architecture which have influenced current considerations of nature, landscape and design.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 568. History of Architecture II: Baroque through Contemporary. 3 Credit Hours.

Studies of the history of architecture and urban design. Focus on religious and secular monuments and their settings, domestic architecture and infrastructure, regional constructional and compositional traditions from the end sixteenth century through to the present. Corequisite: ARC502.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 569. Directed Readings. 3 Credit Hours.

A structured program of readings and essays organized by the student and his/her graduate supervisor constituting a preparation for graduate research in the student's chosen area of interest.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 570. Modern Architecture. 3 Credit Hours.

History of architecture, landscape, and city design in the modern era.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 572. Selected Topics in World Architecture. 3 Credit Hours.

History of architecture and human settlements. Islamic Near East, North Africa, Hindu and Buddhist India, Nepal, S. E. Asia, China, Japan, Pre-Columbian America.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 574. Renaissance Architecture. 3 Credit Hours.

History of architecture and human settlements. Renaissance and Baroque architecture in Italy, France, Spain and Portugal, Great Britain, Austria, Germany, and neighboring countries.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 577. The Architecture of Alvar Aalto. 3 Credit Hours.

An examination of the architecture of Alvar Aalto through the analysis of selected buildings.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 578. Italian Rationalist Architecture. 3 Credit Hours.

History of Italian architecture and urban design between 1914 and 1950: cultural, technological, and theoretical developments; relationship between architecture, politics and propaganda; related survey of the period in other countries (France, Germany, Soviet Union).

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 579. Furniture Design and Fabrication. 6 Credit Hours.

The course is a hands-on introduction to furniture design and fabrication. The student's individual design process involves sketching modeling, mock-ups, reviews, and critiques. Students will learn the hand skills and machinery techniques involved in wood joinery while building a piece of furniture of their own design. Through lectures and demonstrations, the principles of design, material selection, construction methods, and finishing options will be explored.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 580. Professional Advancement, Internship + Research (PAIR). 1-3 Credit Hours.

Research Component of PAIR program. Student, host office and faculty collaboratively develop a focused, in-depth research project related to the tasks the student is completing as part of the Internship Component of the PAIR program. Application and PAIR committee acceptance required prior to enrollment.

Components: RSC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 581. Special Problems. 1-3 Credit Hours.

Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 582. Special Problems. 3-6 Credit Hours.

Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 583. Special Problems. 3 Credit Hours.

Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 584. Special Problems. 3 Credit Hours.

Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 585. Special Problems. 3 Credit Hours.

Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 586. Special Problems. 3 Credit Hours.

Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 590. History of Cities. 3 Credit Hours.

Historical overview of the origin of cities and the development of cities in the East, West, and New World. Focus on the nature of the industrial revolution and the development of the industrial city and contemporary urban settlements.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 592. Cinema and Architecture. 3 Credit Hours.

The class studies the relationship between architecture and cinema. Lectures, film screenings, and readings, explore the origin and development of filmic space with an emphasis on its relation to the real and poetic image of the city. The class analyzes selected films as they relate to, comment, criticize, and anticipate the development of contemporary concepts of space, urban space, interior space, etc.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 593. Computer Animation. 3 Credit Hours.

Explores the use of computer animation and advanced visualization techniques in architecture with emphasis on texture and lighting, spatial choreography and story-boarding.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 594. Geographic Information Systems in Urban Design. 3 Credit Hours.

Exploration of Geographic Information Systems (GIS) in urban design. Principles of GIS and their application to spatial analysis, data management and visualization.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 596. Interactive Multimedia in Design. 3 Credit Hours.

Integration of text, video, sound, and computer graphics to create an interactive electronic information medium.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 597. Designing for the Internet of Things. 3 Credit Hours.

This course examines how current research and development in embedded computation bears on architecture, landscape, and urbanism. Students will explore the implications and impact of ubiquitous computing in its potential to change the way we conceive, construct, inhabit and interact with our buildings, landscapes, and cities.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 598. Introduction to Programming for Architects. 3 Credit Hours.

As digital tools continue to play an increasing role in the Architect's toolkit, it is becoming increasingly important that Architects not only understand how to use and navigate these tools but to customize and adapt them to their specific needs. Learning how to program allows Architects to start to fully utilize the potential in digital tools by maximizing the possibilities in not only 3D modeling and digital fabrication but in responsive architecture, embedded computation and animating spaces contributing to a more dynamic and potentially inter-connected built environment.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 601. Urban Design Studio I. 6 Credit Hours.

Introduction to urban principles, documentation, lexicon of urbanism, urban codes, and architectural guidelines (Studio Format - Rome Program).

Components: STU.

Grading: GRD.

Typically Offered: Fall.

ARC 602. Urban Design Studio II. 6 Credit Hours.

Studio projects focusing on urban retrofit and the repair of suburbia. Design topics may include typo-morphological studies, sustainable development, down-town redevelopment, neighborhood retrofit, urban agriculture, etc.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 603. Urban Design Studio III. 6 Credit Hours.

Studio projects focusing on regional design, everyday urbanism, informalities and other urbanisms. Design topics may include open space and rural design, informal communities, affordable and manufactured housing, etc.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ARC 604. Architecture Design and Theory I. 6 Credit Hours.

The inaugural design studio focuses on the role of architectural design as an integrative discipline. Using Miami as a laboratory and drawing from natural specimens, the studio will examine the relationship between nature, landscape and the built environment. It will use research and analysis, design thinking skills, ordering systems, site design, materials, methods, structure, light, space, and tectonics as a means of developing a meaningful design process. **Components:** STU.

Components: STU.

Grading: GRD.

Typically Offered: Fall.

ARC 605. Architecture Design and Theory II. 6 Credit Hours.

This introductory design studio focuses on the role of architectural design as a responsive discipline. The studio will look at how architectural form is informed by thoughtful consideration of materials and methods of construction, as well as programming and context. Situated in an urban environment rich in material, stylistic and typological history, the studio will challenge students to develop a careful reading of place while responding to urban context, topography, and other site requirements. By considering issues of precedent, composition, display, and identity, it will examine the production of meaning in architecture.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 606. Architectural Design and Theory III. 6 Credit Hours.

The Rome Design Studio operates as a form of design-based critical inquiry into issues of urban design, architecture, and the adaptive reuse and transformation of buildings and spaces. Drawing will be explored as a means of analysis, in order to observe and record the urban and architectural conditions of Rome. Students will discover the layers of Rome, combining archaeology with architecture and urban history. Coursework emphasizes a critical reassessment of the historic urban sites relative to questions of program, infrastructure, and cultural changes.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 607. Architecture Design and Theory IV. 6 Credit Hours.

Advanced Design Studio based course addressing more complex and ambitious topics related with the built environment, the ability to prepare and solve a program through design, materials, technique, technology, social human centered aspects of architecture, structure, architecture as light and space, site and context and environmental issues.

Components: STU.

Grading: GRD.

Typically Offered: Fall.

ARC 608. Architecture Design. 3-6 Credit Hours.

Advanced Design Studio focusing on skills associated with making integrated architectural design decisions across multiple systems. Design decisions within a complex architectural project will focus on the consideration and broad integration of environmental stewardship, technical documentation, accessibility, site conditions, life safety, environmental systems, structural systems, and building envelope systems and assemblies.

Components: STU.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 609. Architecture Design. 3-6 Credit Hours.

Specialization component: student and faculty select areas of in-depth study in housing, resiliency, healthcare, urban design, housing and hospitality, historic preservation etc.

Components: STU.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 610. Architecture Design Degree Project. 6 Credit Hours.

The Architecture Design Degree Project studio offers two options: 1) an independent design research project (design thesis) on a topic selected and developed by the student, or 2) a graduate research studio. Design Thesis is an opportunity for each student, working with a faculty advisor, to define an individual position with regard to the discipline of Architecture. The graduate research studio, led by a faculty member, will investigate relevant or thematic issues of architecture. All graduating students will be required to present their Degree Project, comprising research, analysis and creative work, as a book.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 611. Visual Representation. 3 Credit Hours.

Issues covered in the course will deal with the illustration of ideas in architectural manner. Students are to use the skill of drawing and model-making, either by hand or on the computer, as their new language. Topics will include how to read, understand, and create design drawings, to draw from observations and analyze their subject matter, to be able to distinguish the relevance of a particular drawing and to structure how they present their information. Students will be instructed to properly craft their work in and outside of studio in an effort to see their work evolve and improve.

Components: STU.

Grading: GRD.

Typically Offered: Fall.

ARC 612. Advanced Visual Analysis. 3 Credit Hours.

Drawing as a means of analyzing and recording visual experience. Composition, form, light, color and drawing as a primary device in the mental registration of visual experience.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 613. Advanced Visual Representation. 3 Credit Hours.

Students will learn to carefully evaluate space, color, depth, hierarchy, balance and scale in all architectural visual representation. The assignments will explore different media as it is used in the profession including but not limited to: diagrams, renderings, plans, elevations, sections, and axonometric. Through lectures and workshops, the course will provide a combination of both theoretical and practical lessons encompassing the fundamentals of architectural visual representation. The course will also include parallel lectures on typography, architectural graphic design, and verbal presentation. The lectures will be given by highly regarded industry professionals who will address the way that students can be aware of and understand typography, verbal presentation, and graphic design fundamentals as it relates to architecture. The class will consist of three parts. Part I introduces students to the fundamentals of 3d modeling and drafting as part of a representation workflow. The exercise will include both urban and building scales. Part II concentrates on understanding and dissecting more complex geometries through advance use of digital parametric software such as Grasshopper. Part III focuses on visual representation based on a studio project with emphasis on graphic techniques for final presentations.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 614. Michelangelo. 3 Credit Hours.

Drawing as a form of research across mediums to understand historical research and interpretation of Michelangelo's work.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 615. Advanced Visualization Techniques. 3 Credit Hours.

Beginning at the urban scale, students will engage with the concept of mapping and the graphical representation of an urban environment. This will be done through site analysis and investigation of existing conditions for the neighborhood of Miami Beach, Fl. After the urban analysis, students will transition into the building scale and analyze a "Lifeguard House" in Miami Beach. Students will be asked to rethink and redesign the lifeguard house using Rhino 30. Each student will produce drawings including elevations, plans, sections, and exploded axonometric of their new design. Lastly, students will create a physical model using the laser cutter.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 616. Architectural Watercolor Renderings. 3 Credit Hours.

This course will use freehand drawing and watercolor painting as a vehicle to study and record the urban and architectural conditions of Coral Gables and other South Florida sites. Particular emphasis will be placed on the analytical potential of sketches (recording space, light, surfaces and color).

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 617. Construction Documents. 3 Credit Hours.

Working drawings and specifications. Form, content and role of constituent parts of working drawings and specifications by using case studies.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 618. Documentation of Historic Architecture. 3 Credit Hours.

Principles of preservation and restoration, research methods, measured drawings, surveying methods, and case studies.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ARC 619. Architecture and Color. 3 Credit Hours.

This course focuses on the theory and practice of color and its application to architectural design. Topics include color history from Newton through Albrecht, the relationship between color practice in science versus art, and the discipline of color in architecture from the Neoclassical movement through the Modern Movement.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ARC 620. Responsible Architecture. 3 Credit Hours.

A responsible architecture is one that takes into consideration aesthetics, ecology, sustainability, history, context (urban or otherwise), as well as the health, welfare, and joy of the people who occupy it. This course will address architecture from a distinctly humanist viewpoint, keeping in mind how man is inextricably connected to his environment, both architectural and natural. To focus on sustainability, typology, urbanism, or aesthetics alone would be to negate architecture's interconnectedness. The creation of a responsible architecture requires this multi-layered approach.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 621. Urban Design History and Theory. 3 Credit Hours.

Part I: Survey of housing theories and projects with emphasis on morphological context, typology and composition - focus on topics of modernity. Part II: Introduction to thoroughfare design and walkability principles; description of urban, suburban, rural and regional infrastructure.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 622. Housing and Infrastructure. 3 Credit Hours.

Advanced survey of urban design theories in print and practice - emphasis on issues of modernity. (Seminar format)

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 623. Urban Design and Development Charrette. 3 Credit Hours.

Introduction to planning and public participation methods. Design workshop in collaboration with students in the master in Real Estate and Urbanism program. (Some travel may be required.)

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 624. Select Topics in Interior Architecture Design. 3 Credit Hours.

Principles and technical components of interior design. Topics include interior volumetrics, finishes, furnishings and lighting.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 625. Roman Architecture and Urbanism I. 3 Credit Hours.

Historical overview of architecture and town planning in ancient Rome, from the Etruscan period through the Imperial period.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 626. Landscape Arch Design II. 3 Credit Hours.

Analysis and design of landscape spaces. Topics include ecological principles, landforms and plant materials.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 627. Architecture Photography. 3 Credit Hours.

Photography with emphasis on architectural subjects. Introduction to visual principles, photographic equipment, materials, and techniques.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 628. Historic Preservation. 3 Credit Hours.

Basic design principles for the rehabilitation of historic buildings. Evaluating character-defining details; significance analysis; context of setting issues within historic districts; applying the Secretary of the Interior's Standards for rehabilitation.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 629. Research in Design-Methods and Procedures. 3 Credit Hours.

Application of research methods and procedures to design issues. Historical, descriptive, analytic, experimental research methods; tools for data manipulation and communication.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 630. Building Technology I: Materials and Methods. 3 Credit Hours.

Material characteristics of enclosure and structural systems, case studies in traditional and modern building construction; Topics include properties of building materials: wood, masonry concrete, steel and glass construction techniques; on-site and off-site processes; exterior finishes, assemblies, detailing and basic building code concepts.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 631. Building Technology II: Structural Systems. 3 Credit Hours.

Structural systems: The tectonics, patterns and behavior of the elements of building structures. Topics: Equilibrium, stability, vertical and lateral loads, building envelope and financial considerations.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 632. Building Structures I. 3 Credit Hours.

The structural behavior of simple frame structures. Topics include techniques to determine basic system layout and preliminary dimensioning of key subsystems and members.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ARC 633. Building Structures II. 3 Credit Hours.

The structural behavior of complex structures. Topics include prestressed systems, waffle and space trusses, curved structures and longspan buildings.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Summer.

ARC 634. The Palazzo in Italian Architecture. 3 Credit Hours.

Study of the development of the Renaissance and Baroque palazzo in Rome and other important centers of art and culture. Emphasis on the socio-political context.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 635. Historic Italian Urbanism. 3 Credit Hours.

Study of Italian cities and towns from medieval to contemporary times, including a comparative analysis of history and form.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 636. Italian Gardens. 3 Credit Hours.

Study of Italian garden design during the Renaissance, Baroque and Mannerist periods. Emphasis on historical and political context.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 637. Research in Rome. 3 Credit Hours.

An exploration of Roman history, architecture and urban form through lectures, on site study and drawing assignments. Emphasis on chronological and spatial sequence of development.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 638. Interior Architecture Design. 3 Credit Hours.

Principles and technical components of interior design. Topics include activity, analysis, finishes, furniture, fixture, lighting, and acoustics.

Components: LEC.

Grading: GRD.

ARC 639. Adaptation to Climate Change. 3 Credit Hours.

The course is an elective seminar that introduces students to the phenomena and the related discussion on the topic of climate change. With an emphasis on human response, the course reviews current scientific evidence, and the potential mitigation of emissions and other causal actions, followed by study of the adaptation required by changing conditions.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 640. Tropical Architecture. 3 Credit Hours.

The course will comprise a discussion of tropical architecture and the theme of tropicalism. Course work will include research and documentation in drawings of selected case studies.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 641. Seminar on Town Design. 3 Credit Hours.

Introduction to the lexicon of urbanism; analytical presentations of the concepts of: region, town, neighborhood, corridor, district, and building type; interdisciplinary presentations, review, and criticism of current town and urban design projects.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 642. Seminar on Housing. 3 Credit Hours.

Introduction to domestic building typology; exploration of the concepts of low, medium, and high density housing with attention to social, environmental, and economic issues; presentations of current case studies.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 643. Seminar on Retrofit of Suburbia. 3 Credit Hours.

Introduction to the critical reconstitution of the city; theory and history of the concepts of revitalization and redevelopment; presentations, review, and criticism of current case studies.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 644. The Architecture of Palladio. 3 Credit Hours.

On site study of the architecture and urbanism of Andrea Palladio. Emphasis on the artistic precedents of the Veneto Region.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 645. Urban Composition. 3 Credit Hours.

Survey and analytical review of urban rooms as the vessel of human activity in urban culture. Study of proportional and compositional aspects of urban rooms together with economic, social, and cultural factors. Readings and discussion format.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 646. Studies of Havana. 3 Credit Hours.

Analysis of the physical structure of a major city and its environments including an exploration of its history and iconographic themes, mapping and building studies.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 647. Architecture and Urban Identity. 3 Credit Hours.

Study of the relationship between architecture and urbanism focusing on the ways by which architecture provides urban identity and image of place. Case studies relating monuments, fabric and urban plans to their culture, time and place. Lecture and seminar format.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 648. Seminar in Community Development. 3 Credit Hours.

Study of the contemporary context for the development of the physical environment. Examination of public, private and third sector implementation of building and community design. Format: guest speakers, readings, discussions, and seminar.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 649. Advanced Visual Analysis. 1-3 Credit Hours.

Survey of digital and analogue representation techniques for urban designers.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ARC 650. Professional Lecture Series. 3 Credit Hours.

Real estate transactions and deal structuring from the development perspective. Using the case study method, the course explores the key components and the disciplines needed for successful real estate transactions and projects.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 651. Contemporary Theories of Architecture. 3 Credit Hours.

Theoretical basis of modern architecture and different present currents and movements. Agrarianism, technism, orthodoxy, brutalism, scientism, revivalism, consumerism, rationalism, classicism.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 652. Management of Professional Practice. 3 Credit Hours.

Overview of the practice and the profession, legal and ethical concerns, business types and management practices, traditional and non-traditional practices and services, contracts and contractual relationships, disputes and risk management.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 653. Structural Design Theory. 3 Credit Hours.

Relationship of structural systems to architectural design. Case studies in the ories of structure, form and construction.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 654. Architecture of South Florida. 3 Credit Hours.

History of architecture and human settlements. Studies of significant architectural landmarks and urban design of the South Florida Region, chronological growth of Miami, Miami Beach, Coral Gables, Key West and Palm Beach.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 655. 18th and 19th Century American Architecture and Architects. 3 Credit Hours.

The course concentrates on the development of early American architecture, Architects and Urbanism primarily but not exclusively to 17th, 18th and 19th centuries with particular emphasis on theoretical, technological and cultural developments in America.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 656. Contemporary Latin American Architecture. 3 Credit Hours.

The course seeks to examine the ways in which architecture and the built environment are shaped by, and shape, globalization. It examines the meaning of contextual modernism in the sphere of architecture and urbanism. It will discuss how acquired influences, design culture and economic dependency become the defining elements of contemporary Latin American Architecture today.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 657. Design and Fabrication Techniques: Carved Panels. 3 Credit Hours.

Design, construction and detailing of wood as applied to furnishings and interiors. Focus: low and high relief carved wood panels. Workshop based course including research, exercises, measuring, documentation and a final project.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ARC 658. Theories of Landscape Architecture. 3 Credit Hours.

Leading theories of landscape architecture which have influenced current considerations of nature, landscape and design

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 661. Building Technology I: Materials and Methods.. 3 Credit Hours.

Material characteristics of enclosure and structural systems, case studies in traditional and modern building construction. Topics include properties of building materials: wood, masonry concrete, steel and glass construction techniques; on-site and off-site processes; exterior finishes; assemblies, detailing and basic building code concepts.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 662. Environmental Building Systems I. 3 Credit Hours.

Environmental and Safety Systems. Topics include mechanical - HVAC and conveyors; plumbing - fixtures and pipes; electrical - equipment and wiring design; safety systems - fire safety and emergency and signal systems.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ARC 663. Environmental Building Systems II. 3 Credit Hours.

Principles and applications of light and acoustics. Topics include natural and artificial light - planning for sunlight, problems and solutions for interior and exterior illumination; sound - properties, problems and solutions in new and existing spaces electrical equipment and wiring design.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 664. Landscape Arch Design I. 3 Credit Hours.

Analysis and design of landscape spaces. Studies in historical precedent, gardens, parks, plazas, squares and response to architectural context.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 665. Computer Modeling. 3 Credit Hours.

Three-dimensional, computer modeling, and rendering. Lecture, problem solving exercises and laboratory.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 667. History of Architecture I. 3 Credit Hours.

Studies of the history of architecture and urban design. Focus on religious and secular monuments and their settings, domestic architecture and infrastructure, regional constructional and compositional traditions from prehistory to the end of the sixteenth century.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 668. History of Architecture II. 3 Credit Hours.

Studies of the history of architecture and urban design. Focus on religious and secular monuments and their settings, domestic architecture and infrastructure, regional constructional and compositional traditions from the end of the sixteenth century through to the present.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 669. Directed Readings. 3 Credit Hours.

A structured program of readings and essays organized by the student and his/her graduate supervisor constituting a preparation for graduate research in the student's chosen area of interest.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 670. Modern Architecture. 3 Credit Hours.

History of architecture, landscape, and city design in the modern era.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 671. Ancient Architecture. 3 Credit Hours.

History of architecture and human settlements. Western European prehistory, Egypt, Mesopotamia, Persia, Aegean and Mediterranean, Greece, Rome.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 672. Selected Topics in World Architecture. 3 Credit Hours.

History of architecture and human settlements. Islamic Near East, North Africa, Hindu and Buddhist India, Nepal, S. E. Asia, China, Japan, Pre-Columbian America.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 673. Early Christian, Byzantine, and Medieval Architecture. 3 Credit Hours.

History of architecture and human settlements. Early Christian and Byzantine architecture in Italy, the Near East, Greece, North Africa, Eastern Europe, Medieval architecture in Western Europe.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 674. Renaissance Architecture. 3 Credit Hours.

History of architecture and human settlements. Renaissance and Baroque architecture in Italy, France, Spain and Portugal, Great Britain, Austria, Germany, and neighboring countries.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 675. Colonial Architecture. 3 Credit Hours.

History of architecture and human settlements. Iberian and British Colonies from the 16th through the 19th centuries: North and South America, Caribbean, India and Africa.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 676. 19th and 20th Century Architecture. 3 Credit Hours.

History of architecture and human settlements. America and Europe during the 19th and 20th centuries; cultural, technological and theoretical development.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 677. The Architecture of Alvar Aalto. 3 Credit Hours.

An examination of the architecture of Alvar Aalto through the analysis of selected buildings.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 678. Italian Rationalist Architecture. 3 Credit Hours.

History of Italian architecture and urban design between 1914 and 1950: cultural, technological, and theoretical developments; relationship between architecture, politics and propaganda; related survey of the period in other countries (France, Germany, Soviet Union).

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 679. Furniture Design and Fabrication. 6 Credit Hours.

The course is a hands-on introduction to furniture design and fabrication. The student's individual design process involves sketching, modeling, mock-ups, reviews, and critiques. Students will learn the hand skills and machinery techniques involved in wood joinery while building a piece of furniture of their own design. Through lectures and demonstrations, the principles of design, material selection, construction methods, and finishing options will be explored.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 680. Professional Advancement, Internship + Research (PAIR). 1-3 Credit Hours.

Research Component of PAIR program. Student, host office and faculty collaboratively develop a focused, in-depth research project related to the tasks the student is completing as part of the Internship Component of the PAIR program. Application and PAIR committee acceptance required prior to enrollment.

Components: RSC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 681. Special Problems. 1-3 Credit Hours.

Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: STU.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 682. Special Problems. 3-6 Credit Hours.

Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 683. Special Problems. 3 Credit Hours.

Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 684. Special Problems. 3 Credit Hours.

Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 685. Special Problems. 3 Credit Hours.

Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 686. Special Problems. 3 Credit Hours.

Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 690. History of Cities. 3 Credit Hours.

Historical overview of the origin of cities and the development of cities in the East, West, and New World. Focus on the nature of the industrial revolution and the development of the industrial city and contemporary urban settlement

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 692. Cinema and Architecture. 3 Credit Hours.

The class studies the relationship between architecture and cinema. Lectures, film screenings, and readings, explore the origin and development of filmic space with an emphasis on its relation to the real and poetic image of the city. The class analyzes selected films as they relate to, comment, criticize, and anticipate the development of contemporary concepts of space, urban space, interior space, etc.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 693. Computer Animation. 3 Credit Hours.

Explores the use of computer animation and advanced visualization techniques in architecture with emphasis on texture and lighting, spatial choreography and story-boarding.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 694. Geographic Information Systems in Urban Design. 3.00 Credit Hours.

Exploration of Geographic Information Systems (GIS) in urban design. Principles of GIS and their application to spatial analysis, data management and visualization.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 695. Interactive Multimedia in Design. 3 Credit Hours.

Integration of text, video, sound, and computer graphics to create an interactive electronic information medium.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 696. Advanced Topics. 3 Credit Hours.

Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics will be shown in the printed class schedule, following the title "Advanced Topics".

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 697. Designing for the Internet of Things. 3 Credit Hours.

This course examines how current research and development in embedded computation bears on architecture, landscape, and urbanism. Students will explore the implications and impact of ubiquitous computing in its potential to change the way we conceive, construct, inhabit and interact with our buildings, landscapes, and cities.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 698. Introduction to Programming for Architects. 3 Credit Hours.

As digital tools continue to play an increasing role in the Architect's toolkit, it is becoming increasingly important that Architects not only understand how to use and navigate these tools but to customize and adapt them to their specific needs. Learning how to program allows Architects to start to fully utilize the potential in digital tools by maximizing the possibilities in not only 3D modeling and digital fabrication but in responsive architecture, embedded computation and animating spaces contributing to a more dynamic and potentially inter-connected built environment.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 699. Directed Research. 1-6 Credit Hours.

The course addresses the issues of design as research and pre-design. Students will develop research, write a thesis statement, select a site, prepare a site documentation and site analysis, and develop an architectural program for the thesis project, select pertinent case studies and diagram them. This work will be collected and presented as both a presentation and in book form. In addition, the course prepares students for an independent design project through thoughtful development of a thesis question, site and program. The preparation of the thesis question will require the development of basic research strategies and methods, and understanding of how to find and evaluate sources, the analysis and synthesis of information, the development of a research plan and a design method, and the written and oral presentation of these skills to an outside audience.

Components: RSC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 701. Masters Final Project. 6 Credit Hours.

Individually supervised projects. Required as a 6 credit course for all Master of Architecture in Computing students electing a final project.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 720. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the thesis or final project for the master's degree after the student has enrolled for the permissible cumulative total in ARC 699 or ARC 710 (usually six credits). Credit not granted. May be regarded as full-time residence.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 810. Master's Thesis. 1-6 Credit Hours.

The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: LEC.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Art (ART)

ART 101. Introduction to Drawing I. 3 Credit Hours.

Contour, cross-contour, perspective, proportion, chiaroscuro, and gesture in pictorial composition.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ART 102. Introduction to Drawing II. 3 Credit Hours.

Experimentation, chance, exaggeration, movement, texture, and color in pictorial composition.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 103. Two-Dimensional Design. 3 Credit Hours.

Line, rhythm, shape, pattern, value, and color in pictorial composition.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ART 104. Intro to 3D Design. 3 Credit Hours.

A background in the elements of three-dimensional aesthetics that will broaden students' understanding and creativity in making sculptural objects. This course is the foundation for further study in sculpture, glass, and ceramics courses.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 105. Figure Drawing. 3 Credit Hours.

Drawing the human figure: proportion, anatomy, perspective, gesture, and expressive line.

Prerequisite: ART 101.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 107. Introduction to Drawing III. 3 Credit Hours.

Continuation of ART 101 with emphasis on Renaissance perspective and alternative systems of spatial representation. Survey of materials and methods. Introduction of color.

Prerequisite: ART 101.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ART 109. Introduction to Electronic Media. 3 Credit Hours.

Computer skills for desktop publishing and digital imaging.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 180. Studies in Studio Art. 1-3 Credit Hours.

Studio studies taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ART 202. Introduction to Painting. 3 Credit Hours.

Materials and techniques of easel painting.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 206. Special Topics in Studio Art for Undergraduate Students. 3 Credit Hours.

Course devoted to exploring new topics in studio art practice and theory, including media specific and/or inter-disciplinary approaches. Course content to be determined by Instructor.

Components: STU.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 210. Introduction to Digital Photography. 3 Credit Hours.

DSLR Camera and Lens Techniques and Adobe LightRoom Processing In Digital Photography.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ART 217. Introduction to Sculpture. 3 Credit Hours.

Integrated approach to concept development, craftsmanship and appropriate use of materials.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 251. Introduction to Printmaking. 3 Credit Hours.

Drypoint, engraving, etching, aquatint, and softground; relief and intaglio printed collographs; relief printing from linoleum.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 253. Silkscreen I. 3 Credit Hours.

Beginning silkscreen: monotyping with screens, reduction printing, multiple run silkscreen printing and beginning photo silkscreen.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 254. Computer Applications for Printmaking. 3 Credit Hours.

Software programs used as printmaking manipulation tools to aid in the planning of prints.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 260. Special topics in Ceramics. 3 Credit Hours.

Rotating topics course with a focus on developing modeling skills with clay through various forming methods.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 261. Hand-Built Ceramics I. 3 Credit Hours.

Beginning hand-building techniques: pinching, coiling, slab construction; introduction to glazing and firing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 262. Wheel Thrown Ceramics I. 3 Credit Hours.

Introduction to wheel throwing, glazing and firing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 263. Introduction to Glass Blowing. 3 Credit Hours.

Forming shapes and vessels from molten glass by the use of a blow pipe and glass tools.

Prerequisite: ART 104.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 268. Figure in Clay I. 3 Credit Hours.

Introduction to modeling the human figure in clay with emphasis on form, volume, proportion, basic anatomy, and gesture.

Prerequisite: ART 104 or ART 261.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 291. Graphic Design I. 3 Credit Hours.

A comprehensive approach to understanding design fundamentals and the practice of graphic communications.

Prerequisite: ART 109.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 292. Multimedia I/ Web Design. 3 Credit Hours.

Introduction to web design using several current time-based media.

Prerequisite: ART 109.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 293. Typography. 3 Credit Hours.

Type and image compositions, history, arrangement, style, aesthetics of printed communications, type software and calligraphy.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 294. Multimedia II/ Animation. 3 Credit Hours.

Animation using time-based media.

Prerequisite: ART 109.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 301. Intermediate Painting I. 3 Credit Hours.

Painting in oil and acrylic. Emphasis on experimentation and creative expression.

Prerequisite: ART 202.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 302. Intermediate Painting II. 3 Credit Hours.

Continuation of ART 301.

Prerequisite: ART 202.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 305. Intermediate Figure Drawing. 3 Credit Hours.

Continuation of ART 105.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 306. Special Topics in Studio Art for Undergraduate Students. 3 Credit Hours.

Course devoted to exploring new topics in studio art practice and theory, including media specific and/or inter-disciplinary approaches. Course content to be determined by Instructor.

Components: STU.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 310. Intermediate Digital Photography. 3 Credit Hours.

Fine Art Digital Photography (DSLR). Continuation of Art 210, Emphasis on experimentation and creative expression. Adobe LightRoom.

Prerequisite: ART 210.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 311. Color Digital Photography. 3 Credit Hours.

Fine Art Digital Photography exploring Advanced Color Theory. Emphasis on craftsmanship and creative expression. Adobe Photoshop and Fine Art Digital Printing.

Prerequisite: ART 310.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 312. Alternative Processes Photography. 3 Credit Hours.

Nineteenth Century Photographic Processes. From the Cyanotype to the Collodion Print, all in the service of creative expression.

Prerequisite: ART 311.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 315. Socially Engaged Art. 3 Credit Hours.

Contemporary art practices and the role of visual arts in creating social change, through lectures, group discussions, Individual art projects and a collaborative, hands-on community-based art project. Note: This is a new course implemented as part of the Engaged Faculty Fellows program to provide students with the opportunity for civic engagement within the context of art-making.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ART 317. Intermediate Sculpture I. 3 Credit Hours.

Incorporation of symbol and metaphor to achieve meaning, use of additional materials and technical processes.

Prerequisite: ART 217.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 318. Intermediate Sculpture II. 3 Credit Hours.

Continuation of ART 317.

Prerequisite: ART 317.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 330. Art of Egypt and Mesopotamia. 3 Credit Hours.

Components: LEC.

Grading: GRD.

ART 339. Archaeology Survey. 6 Credit Hours.

Components: LEC.

Grading: GRD.

ART 351. Intaglio/Relief II. 3 Credit Hours.

Continuation of ART 251. Additional processes such as mezzotint, relief printing from woodblocks, multiple block printing, photographic xerox transfers and photo etching.

Prerequisite: ART 251.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 352. Lithography II. 3 Credit Hours.

Continuation of ART 252. Color printing from stones, aluminum plates and photo litho plates. Combination of lithography with other print media.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 353. Silkscreen II. 3 Credit Hours.

Continuation of ART 253, including silkscreening on canvas, larger format work, and advanced photo silkscreen techniques.

Prerequisite: ART 253.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 354. Computer Assisted Printmaking: Lithography and Silkscreen. 3 Credit Hours.

The use of inkjet and laser printers to make positives for black and white and process color work in photo lithography; custom color separations for multiple screen printing.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 355. History of Philosophy of Art. 3 Credit Hours.

An examination of the history of philosophical work on the arts (including literature, visual art, and music) from ancient times through the mid twentieth century.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 361. Hand-Built Ceramics II. 3 Credit Hours.

Continuation of ART 261.

Prerequisite: ART 261.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 362. Wheel Thrown Ceramics II. 3 Credit Hours.

Continuation of ART 262.

Prerequisite: ART 262.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 363. Cast Glass Processes. 3 Credit Hours.

The art of cast glass including sand casting and lost wax techniques.

Prerequisite: ART 263 or ART 104.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 364. Intermediate Glass Blowing. 3 Credit Hours.

Exploration of glass working techniques.

Prerequisite: ART 263.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 368. Figure in Clay II. 3 Credit Hours.

As continuation of ART 268, this intermediate course will focus on modeling The human figure in clay with emphasis on form, volume, proportion, anatomy, and gesture.

Prerequisite: ART 268.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 391. Graphic Design II. 3 Credit Hours.

Development of form and conceptual design. Contemporary visual rhetorical strategies such as metaphors, puns, irony and methonymy.

Prerequisite: ART 291.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 392. Multimedia III. 3 Credit Hours.

Video art, multimedia, installation art and interactive animation.

Prerequisite: ART 109.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 401. Advanced Painting I. 3 Credit Hours.

Development of a personal style in painting.

Prerequisite: ART 301 and ART 302.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 402. Advanced Painting II. 3 Credit Hours.

Continuation of ART 401.

Prerequisite: ART 401.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 405. Advanced Figure Drawing. 3 Credit Hours.

Continuation of ART 305.

Prerequisite: ART 305.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 406. Special Topics in Studio Art for Undergraduate Students. 3 Credit Hours.

Course devoted to exploring new topics in studio art practice and theory, including media specific and/or inter-disciplinary approaches. Course content to be determined by Instructor.

Components: STU.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 407. Special Topics: Renaissance and Baroque Art. 3 Credit Hours.

Seminar on changing topics in Renaissance and Baroque Art.

Prerequisite: ARH 132.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 410. Advanced Digital Photography I. 3 Credit Hours.

Development of a personal style in digital imaging. Course is designed for students to pursue a semester long thematic project.

Prerequisite: ART 311.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 411. Experimental Photography. 3 Credit Hours.

Course content determined by faculty member teaching it from studio lighting class to the Artist Book Project. May be repeated for credit.

Prerequisite: ART 311.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 417. Advanced Sculpture I. 3 Credit Hours.

Individual and collaborative installation and site-specific art.

Prerequisite: ART 317.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 418. Advanced Sculpture II. 3 Credit Hours.

Development of a personal visual vocabulary.

Prerequisite: ART 417.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 451. Intaglio/Relief III. 3 Credit Hours.

Continuation of ART 351.

Prerequisite: ART 351.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 452. Lithography III. 3 Credit Hours.

Continuation of ART 352.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 453. Silkscreen III. 3 Credit Hours.

Continuation of ART 353.

Prerequisite: ART 353.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 454. Computer Assisted Printmaking: Intaglio and Relief. 3 Credit Hours.

Continuation of ART 354, photo etching and relief processes.

Prerequisite: ART 354.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 462. Advanced Ceramics. 3 Credit Hours.

Development of expressive skills in either handbuilding or wheel throwing techniques.

Prerequisite: ART 361 or ART 362.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 468. Figure in Clay III. 3 Credit Hours.

As continuation of ART 368, this advanced course will focus on modeling The human figure in clay with emphasis on form, volume, proportion, anatomy, gesture and expressive handling of clay.

Prerequisite: ART 368.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 491. Graphic Design III. 3 Credit Hours.

Advanced page layout coupled with extensive use of typography with applications in page design for advertising and collateral projects.

Prerequisite: ART 391.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 493. Illustration. 3 Credit Hours.

Contemporary illustration for print, new media, portfolio and exhibition.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 499. Honors Thesis. 3-6 Credit Hours.

Formal thesis and project including an exhibition supervised by member of the department faculty.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 501. Advanced Painting III. 1-6 Credit Hours.

Course content decided between student and professor.

Prerequisite: ART 402.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 502. Advanced Painting IV. 1-6 Credit Hours.

Continuation of ART 501.

Prerequisite: ART 501.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 503. Advanced Painting V. 1-6 Credit Hours.

Course content decided between student and professor. An independent study course may be repeated.

Prerequisite: ART 502.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 504. Advanced Painting VI. 1-6 Credit Hours.

Course content decided between student and professor. An Independent Study course may be repeated.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 505. Advanced Painting VII. 1-6 Credit Hours.

Current readings and/or technical concerns not covered in the regular curriculum. Course content will vary each semester.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 506. Special Topics in Studio Art for Undergraduate Students. 3 Credit Hours.

Course devoted to exploring new topics in studio art practice and theory, including media specific and/or inter-disciplinary approaches. Course content to be determined by Instructor.

Components: STU.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 509. Independent Study in Other Media. 1-6 Credit Hours.

Course content decided between student and professor. Independent study course may be repeated.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 510. Advanced Digital Photography 2. 3 Credit Hours.

Course content decided between student and professor. May NOT be repeated for credit.

Prerequisite: ART 410.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 511. Advanced Digital Photography 3. 3 Credit Hours.

Continuation of ART 510. May NOT be repeated for credit.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 512. Independent Study in Photography. 1-6 Credit Hours.

Course content decided between student and professor. An independent study course may be repeated.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 517. Advanced Sculpture III. 3 Credit Hours.

Examination of ongoing work in relationship to historical and contemporary interpretations issues.

Prerequisite: ART 418.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 518. Advanced Sculpture IV. 3 Credit Hours.

Continuation of ART 517.

Prerequisite: ART 517.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 551. Intaglio/Relief IV. 3 Credit Hours.

Advanced work in intaglio/relief processes: course requirements decided between student and professor.

Prerequisite: ART 451.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 552. Lithography IV. 3 Credit Hours.

Advanced work in lithography: course requirements decided between student and professor.

Prerequisite: ART 452.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 553. Silkscreen IV. 3 Credit Hours.

Advanced work in silkscreen.

Prerequisite: ART 453.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 554. Computer Assisted Printmaking. 3 Credit Hours.

Advanced work in computer assisted printmaking; course requirements decided between student and professor.

Prerequisite: ART 454.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 555. Topics in Printmaking. 1-6 Credit Hours.

Current readings and/or technical concerns not covered in the regular curriculum. Course content will vary each semester.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 562. Contemporary Ceramic Art. 3 Credit Hours.

Development of artistic style and technical abilities in relation to contemporary trends in ceramic art.

Prerequisite: ART 462.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 563. Independent Study in Ceramics/Glass. 1-6 Credit Hours.

Course content decided between student and professor. An independent study course may be repeated.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 564. Directed Research and Projects in Ceramics/Glass. 3 Credit Hours.

Historical to contemporary approach to ceramics; furthering of the technical ability, and development of artistic style.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 591. Portfolio/Business of Design. 3 Credit Hours.

Individually supervised graphic design portfolio. Professional practices in design.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 592. Special Projects/Multimedia/Portfolio. 3 Credit Hours.

Video Art, print design, illustration or multimedia portfolio preparation.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 593. Seminar in Professional Practices. 1-6 Credit Hours.

Advanced course with a required placement in a professional design or multimedia setting. Classroom sessions on professional topics and issues. Portfolio required.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 599. Exhibition Preparation. 3 Credit Hours.

A seminar class devoted to the preparatory work needed to plan and promote a solo exhibition, including installation/lighting concerns. Preliminary written assignments will also be given in preparation for ART 710 Thesis.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 602. Advanced Painting ix. 1-6 Credit Hours.

Continuation of ART 601.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 603. Problems in Studio Art. 1-6 Credit Hours.

Course content will be decided in conference between candidate and instructor. This course may be repeated for credit.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 604. Seminar in Studio Art. 3 Credit Hours.

Special topics in selected area of studio art.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ART 606. Special Topics in Studio Art for Graduate Students. 3 Credit Hours.

Course devoted to exploring new topics in studio art practice and theory, including media specific and/or inter-disciplinary approaches. Course content to be determined by Instructor.

Components: STU.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 609. Independent Study in Other Media. 1-6 Credit Hours.

Course content decided between student and professor. Independent study course may be repeated.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 630. Graduate Digital Photography I. 1-6 Credit Hours.

Advance Digital Photography Course: Content decided between student and professor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 631. Graduate Digital Photography II. 1-6 Credit Hours.

Advance Digital Course: Content decided between student and professor-Lecture

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 632. Graduate Independent Study in Photography. 1-6 Credit Hours.

Independent Study in Photography: Content decided between student and professor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 633. Graduate Digital Photography III. 1-6 Credit Hours.

Content decided in conference between candidate and instructor.

Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 634. Graduate Digital Photography IV. 1-6 Credit Hours.

Continuation of ART 610.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 641. Graduate Painting I. 1-6 Credit Hours.

Self-directed study in consultation with instructor.

Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 642. Graduate Painting II. 1-6 Credit Hours.

Self-directed study in consultation with instructor.

Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 643. Graduate Painting III. 1-6 Credit Hours.

Self-directed study in consultation with instructor.

Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 644. Graduate Painting IV. 1-6 Credit Hours.

Self-directed study in consultation with instructor.

Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 645. Graduate Painting V. 1-6 Credit Hours.

Self-directed study in consultation with instructor.

Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 646. Advanced Painting VIII. 1-6 Credit Hours.

Professional and concentrated experiences in media and subject matter decided in conference between candidate and instructor.

Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 651. Intaglio/Relief. 1-6 Credit Hours.

Advanced intaglio/relief processes: course requirements decided between candidate and professor.

Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 652. Lithography. 1-6 Credit Hours.

Advanced lithography. Course requirements decided between candidate and professor.

Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 653. Silkscreen. 1-6 Credit Hours.

Advanced work in silkscreen.

Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 655. Topics in Printmaking. 1-6 Credit Hours.

Current readings and/or technical concerns not covered in the regular curriculum.

Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 663. Portfolio/Business of Design. 3 Credit Hours.

Individually supervised graphic design portfolio. Professional practices in design.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 664. Special Projects/Multimedia/Portfolio. 1-6 Credit Hours.

Video Art, print design, illustration or multimedia portfolio preparation.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 665. Graphic Design. 3 Credit Hours.

Advanced graduate projects in graphic design.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 666. Multimedia. 3 Credit Hours.

Advanced graduate projects in multimedia.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 667. Experimental Illustration for Print and Interactive Media. 3 Credit Hours.

Exploration and innovation of contemporary illustration and digital publishing. Research and practice of new styles of international illustration for print and interactive media.

Prerequisite: ART 663 or ART 665.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 671. Graduate Sculpture I. 1-6 Credit Hours.

Examination of ongoing work in relationship to historical and contemporary interpretations issues.

Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 672. Graduate Sculpture II. 1-6 Credit Hours.

Continuation of ART 517

Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 673. Graduate Sculpture III. 1-6 Credit Hours.

Content decided in conference between candidate and instructor.

Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 674. Graduate Sculpture IV. 1-6 Credit Hours.

Continuation of ART 673. Content decided in conference between candidate and instructor.

Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 675. Graduate Sculpture V. 1-6 Credit Hours.

Content decided in conference between candidate and instructor.

Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 676. Graduate Sculpture VI. 1-6 Credit Hours.

Content decided in conference between candidate and instructor.

Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 681. Writing About Art. 3 Credit Hours.

Writing about art on a professional level.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ART 682. Contemporary Ceramic Art I. 1-6 Credit Hours.

Development of artistic style and technical abilities in relation to contemporary trends in ceramic art.

Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 683. Contemporary Ceramic Art II. 1-6 Credit Hours.

Development of artistic style and technical abilities in relation to contemporary trends in ceramic art.

Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 684. Contemporary Ceramics Art III. 1-6 Credit Hours.

Content to be decided in conference between candidate and instructor.

Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 685. Contemporary Ceramics Art IV. 1-6 Credit Hours.

Continuation of ART 661.

Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 686. Contemporary Ceramic Art V. 1-6 Credit Hours.

Continuation of ART 685: Contemporary Ceramic ART IV
Prerequisite: ART 685.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 687. Contemporary Ceramic Art VI. 1-6 Credit Hours.

Continuation of ART 686: Contemporary Ceramic Art V
Prerequisite: ART 686.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 688. Independent Study in Ceramics/Glass. 1-6 Credit Hours.

Theory, history and practice of Video Art and contemporary documentary film and their various manifestations. Creation of conceptual videos for exhibition, web and interactive media.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 689. Directed Research and Projects in Ceramics/Glass. 3 Credit Hours.

Historical to contemporary approach to ceramics; furthering of the technical ability, and development of artistic style.
Requisite: Graduate Standing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 693. Seminar in Professional Practices. 1-6 Credit Hours.

Advanced course with a required placement in a professional design or multimedia setting. Classroom sessions on professional topics and issues.
Portfolio required.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 699. Exhibition Preparation. 3 Credit Hours.

A seminar class devoted to the preparatory work needed to plan and promote a solo exhibition, including installation/lighting concerns. Preliminary written assignments will also be given in preparation for ART 710 Thesis.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 810. Master's Thesis. 1-6 Credit Hours.

The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

ART 820. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in ART 710 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

Art History (ARH)

ARH 131. Survey of Western Art I. 3 Credit Hours.

The art of western cultures from pre-history through the Middle Ages.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARH 132. Survey of Western Art II. 3 Credit Hours.

The art of western cultures from the Renaissance through the 20th century.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARH 207. History of Photography. 3 Credit Hours.

A study of photography as a visual medium of expression and communication: a chronological examination of its origins, styles and uses.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARH 220. Student Docent Practicum at the Lowe Art Museum. 1 Credit Hour.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARH 225. Introduction to Museum Studies. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 250. Special Topics in Non-European Art. 3 Credit Hours.

Special topics in Non-European art.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 260. Islamic Art. 3 Credit Hours.

Islamic art from the 7th to the 17th century including architecture, manuscript illumination, textiles, ceramics, and small-scale luxury objects. Study of Islam as a religious and political entity showing how the Islamic world defined itself in cultural creation.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARH 270. Spanish Art. 3 Credit Hours.

A chronological study from prehistory to the present, addressing significant periods in Spanish art history, and establishing the unique characteristics of this art. How the effects of historical conditions (Islamic presence on the peninsula, American colonies, Franco) have defined Spain as distinct from its European neighbors.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 321. Andean Art. 3 Credit Hours.

South American art from formative times through the Incan empire and the Spanish conquest (A.D. 1521).

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 325. Museum Studies Internship. 3 Credit Hours.

The Museum Studies internship is an independent study course in which the student works on educational projects or programs in a museum.

Components: FLD.

Grading: GRD.

Typically Offered: Fall & Spring.

ARH 326. Art of Japan. 3 Credit Hours.

The Arts of South Asia with selections from India and Thailand.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARH 327. Art of China. 3 Credit Hours.

The Art of East Asia with selections from China, Korea, and Japan.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARH 332. Greek Art. 3 Credit Hours.

The art of ancient Greek civilization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 333. Roman Art. 3 Credit Hours.

Roman art from the 1st century B.C. through the 4th century A.D.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 335. Early Christian and Byzantine Art. 3 Credit Hours.

Christian art from the second through the fifteenth centuries in Rome and the Byzantine Empire.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 336. Medieval Art. 3 Credit Hours.

Western European art from the 4th through the 12th century.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 337. Italian Renaissance Art. 3 Credit Hours.

The painting, sculpture, and architecture of Florence in the 15th century.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 338. Sixteenth Century Italian Art. 3 Credit Hours.

The painting, sculpture, and architecture of Italy in the 16th century.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 339. Northern Renaissance Art. 3 Credit Hours.

The painting of France and the Netherlands in the 14th and 15th centuries.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 340. Baroque Art. 3 Credit Hours.

Art and architecture of the seventeenth century, focusing on major cultural centers in Europe and the Americas.

Prerequisite: ARH 132.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 341. Eighteenth-Century European Art. 3 Credit Hours.

European art from 1700-1820, including Rococo and Neoclassicism, ending with Goya in Spain.

Prerequisite: ARH 132.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 342. Nineteenth-Century European Art. 3 Credit Hours.

Neo-Classicism, Romanticism, Realism, Impressionism, 1760-1900.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARH 343. Modern Art. 3 Credit Hours.

Cezanne to Surrealism. Primarily European Art c. 1880-1940 in the context of the development of Modernism and its aesthetic theories.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARH 344. Contemporary Art. 3 Credit Hours.

American and European Art from the Second World War to the present in its social, political, and theoretical contexts.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARH 345. Contemporary Art in American Culture. 3 Credit Hours.

A critical survey of visual art practices from the 1950s to the present within the United States. By analyzing the multiple legacies of the early avant-garde, the role of nationalism, and the development of the global art market, this course will consider the social, political, and philosophical questions raised by postmodernism and its formative influence on American art after WWII.

Prerequisite: ARH 131 or ARH 132.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARH 346. History of Graphic Design. 3 Credit Hours.

Evolution of Graphic Design from the invention of writing through the twentieth century concentrating on contemporary themes and technical innovations.

Prerequisite: ARH 131 or ARH 132.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 347. Special Topics in Art History. 3 Credit Hours.

Prerequisite: ARH 131 or ARH 132.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 349. Special Topics in Art and the Law. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 357. Critical Issues in the History Photography. 3 Credit Hours.

The history and theory of photography in visual culture and an exploration of debates regarding how this medium of mass communication has transformed our perceptions and conceptions of art, society, and culture over the past two centuries.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 360. Art and Cinema. 3 Credit Hours.

Exploration of the relationship between art, art history, and cinema.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 365. Latin American Modernism. 3 Credit Hours.

The art and theories of Latin American Modernism.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 385. Studies in Art History. 1-3 Credit Hours.

Art History studies taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ARH 405. Special Topics in Medieval Art. 3 Credit Hours.

Changing topics in Medieval Art.

Prerequisite: ARH 131.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 408. Special Topics in Modern Art. 3 Credit Hours.

Seminar on changing topics in Modern Art.

Prerequisite: ARH 132.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 409. Special Topics in Contemporary Art. 3 Credit Hours.

Seminar on changing topics in contemporary art.

Prerequisite: ARH 132.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 411. Special Topics: Museum Studies. 3 Credit Hours.

Seminar on changing topics in Museum studies.

Prerequisite: ARH 225. Requisite: Two additional art history courses.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 505. Problems in Art History. 3 Credit Hours.

A means by which the student of advanced standing may investigate areas of a specialized nature, or those which are not offered as a regular part of the curriculum. Course content will be decided in joint conference between student and instructor.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ARH 506. Problems in Art History. 3 Credit Hours.

A means by which the student of advanced standing may investigate areas of a specialized nature, or those which are not offered as a regular part of the curriculum. Course content will be decided in joint conference between student and instructor.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ARH 507. Museum Studies Seminar. 3 Credit Hours.

The museum as an institution and as a site for the construction of knowledge. Students will also explore the relationship between museums and academia.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 508. Museum Exhibition. 3 Credit Hours.

Organizing an art museum exhibition, and participating in the installation. Writing and composing the catalogue.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 509. Museum Internship. 1-3 Credit Hours.

UM sponsored internship with Miami-area museum.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ARH 510. Arts Administration Internship. 1-3 Credit Hours.

UM sponsored internship with Miami-area arts institution.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ARH 511. Artlab @ the Lowe. 3 Credit Hours.

Organizing an art exhibition at the Lowe Art Museum. Taught by a different faculty member each year.

Prerequisite: ARH 131 and ARH 132.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARH 530. Seminar in Art History. 3 Credit Hours.

Special topics in western and nonwestern art. Semester's topic will be announced.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 540. History of Museums and Collecting. 3 Credit Hours.

History of museums and collecting practices in western Europe and the United States from the sixteenth to the twentieth century.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 550. Seminar in Theory and Methodology in the History of Art. 3 Credit Hours.

Basic methodologies that inform the discipline of art history and an introduction to the key authors and ideas that have shaped and continue to shape how critics and art historians write about art.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 560. Seminar in Nineteenth and Twentieth Century Art. 3 Credit Hours.

Special topics including museum practices and theory, women's art and contemporary issues.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 570. Seminar in Non-European Art. 3 Credit Hours.

Special Topics in Non-European Art.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 598. Seminar in Contemporary American Art. 3 Credit Hours.

Issues in Art since 1960: Aesthetic theories and ideological issues generated in contemporary art as expressed in the writing of artists and art critics.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

ARH 605. Problems in Art History. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARH 606. Problems in Art History. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARH 607. Museum Studies Seminar. 3 Credit Hours.

The museum as an institution and as a site for the construction of knowledge. Students will also explore the relationship between museums and academia.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 608. Museum Exhibition. 3 Credit Hours.

Organizing an art museum exhibition, and participating in the installation. Writing and composing the catalogue.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 609. Museum Internship. 3 Credit Hours.

UM sponsored internship with Miami-area museum.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ARH 610. Arts Administration Internship. 1-3 Credit Hours.

UM sponsored internship with Miami-area arts institution.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ARH 611. Artlab @ the Lowe. 3 Credit Hours.

Organizing an art exhibition at the Lowe Art Museum. Taught by a different faculty member each year.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARH 630. Seminar in Art History. 3 Credit Hours.

Special topics in western and nonwestern art. Semester's topic will be announced.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 640. History of Museums and Collecting. 3 Credit Hours.

History of museums and collecting practices in western Europe and the United States from the sixteenth to the twentieth century.

Components: SEM.

Grading: GRD.

ARH 650. Seminar in Theory and Methodology in the History of Art. 3 Credit Hours.

Basic methodologies that inform the discipline of art history and an introduction to the key authors and ideas that have shaped and continue to shape how critics and art historians write about art.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 660. Seminar in Nineteenth and Twentieth Century Art. 3 Credit Hours.

Special topics including museum practices and theory, women's art and contemporary issues.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 670. Seminar in Non-European Art. 3 Credit Hours.

Special Topics in Non-European Art.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 698. Seminar in Contemporary Art. 3 Credit Hours.

Issues in Art since 1960: Aesthetic theories and ideological issues generated in contemporary art as expressed in the writing of artists and art critics.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

ARH 810. Master's Thesis. 1-6 Credit Hours.

The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

ARH 820. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in ARH 710 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

Atmospheric Science (ATM)

ATM 102. Introduction to Weather and Climate. 3 Credit Hours.

The structure, physics, dynamics and thermodynamics of the atmosphere. Weather, weather forecasting, climate and climate change.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ATM 103. Survey of Modern Meteorology. 3 Credit Hours.

Dynamics and thermodynamics of the atmosphere as they relate to contemporary issues in meteorology. Overview of numerical weather prediction techniques and new technologies for monitoring weather and climate. Open to majors or minors with permission of instructor.

Pre/Corequisite: MTH 108. Or MTH 113. Or MTH 140. Or MTH 141. Or MTH 161. Or MTH 171.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ATM 220. Climate and Global Change. 3 Credit Hours.

The Earth's climate system and the role of natural and anthropogenic processes in shaping climate change.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ATM 243. Weather Forecasting. 3 Credit Hours.

Application of physical principals to weather forecasting. Use interpretation of computer-generated forecast guidance products of the U.S. Weather Service.

Prerequisite: ATM 103 or MSC 103 and MTH 108 or higher.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ATM 244. Tropical Weather and Forecasting. 3 Credit Hours.

Introduction to tropical weather systems, with an emphasis on hurricanes, and syntheses of observational data and numerical model predictions to create forecasts

Prerequisite: ATM 103 and ATM 243.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ATM 265. Atmospheric Chemistry. 3 Credit Hours.

ATM 265 is focused on those aspects of environmental chemistry of most relevance to meteorology students. The class fulfills the American Meteorological Society (AMS) chemistry expectations for a Bachelor's Degree in Meteorology, and in addition, addresses further recommendations from the AMS. AMS expects knowledge of atomic structure and chemical bonding, and, of the properties of gases. Recommended 'beyond the basics' goals include air quality and environmental science applications. ATM 265 fulfills the chemistry requirement for the undergraduate meteorology program. Students interested in pursuing upper-level chemistry courses, including MSC 215 (Chemical Oceanography), and pre-med majors, are recommended to take CHM 111 to meet requirements for the Meteorology B.S. Degree.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ATM 303. Meteorological Instrumentation and Observation. 3 Credit Hours.

Techniques for measuring meteorological variables at the ground and in the free atmosphere.

Prerequisite: ATM 103, and PHY 101 or PHY 205 or PHY 201.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ATM 305. Atmospheric Thermodynamics. 3 Credit Hours.

Equation of state; water vapor and moist air thermodynamics; phase changes and latent heat; buoyancy and atmospheric convection; thermodynamic diagrams.

Prerequisite: PHY 201 or PHY 205.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ATM 306. Advanced Principles in Broadcasting Meteorology. 3 Credit Hours.

Broadcast meteorology including the production of professional weather briefings and weather news for on camera delivery. Emphasis on accurately communicating complex meteorological concepts, use of computer graphics, and on-camera delivery.

Prerequisite: ATM 103.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ATM 307. Introduction to the Physics of Climate. 3 Credit Hours.

The Physical mechanisms which govern the earth's climate and climate variability.

Prerequisite: ATM 305 or MSC 305.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ATM 321. Scientific Programming in the Atmospheric Sciences. 3 Credit Hours.

An introduction to scientific programming in a linux environment using the FORTRAN 90/95 language with specific applications to Meteorology.

Prerequisites: CSC 120.

Prerequisite: CSC 120.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ATM 371. Readings in Atmospheric Science. 1-2 Credit Hours.

Library research with faculty supervision. Bibliography to be submitted in preparation for laboratory and/or field research project.

Components: DIS.

Grading: GRD.

Typically Offered: Fall & Spring.

ATM 405. Atmospheric Dynamics I. 3 Credit Hours.

Derivation and scaling of the equations of atmospheric motion; hydrostatic and geostrophic balance; circulation and vorticity.

Prerequisite: MSC 305 Or ATM 305 and MTH 310 Or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ATM 406. Atmospheric Dynamics II. 3 Credit Hours.

Baroclinic and barotropic instability; boundary layer dynamics; mathematical principles of numerical weather prediction; maintenance of the general circulation.

Prerequisite: MSC 405 or ATM 405.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ATM 407. Weather Analysis. 4 Credit Hours.

Three-dimensional analysis of synoptic-scale weather systems; application of the fundamental laws of atmospheric dynamics to observed weather patterns; practical questions of worldwide data exchange and display.

Prerequisite: ATM 305 or MSC 305.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ATM 409. Cloud Physics, Radiation, and Remote Sensing. 3 Credit Hours.

Atmospheric radiation; absorption and scattering principles of remote sensing of the atmosphere; cloud microphysics; nucleation, coalescence, ice crystal growth, atmospheric electricity and lightning.

Prerequisite: ATM 305.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ATM 411. Projects in Atmospheric Science. 1-3 Credit Hours.

Individual, independent research projects with faculty supervision. A formal written report is required that satisfies signed contract with faculty supervisor.

Requisite: Junior or Senior Standing.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

ATM 412. Undergraduate Thesis in Atmospheric Science. 1 Credit Hour.

Students will write a formal thesis summarizing the results of independent research carried out under faculty supervision.

ATM 411 AND Senior Standing.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ATM 511. Geophysical Fluid Dynamics I. 3 Credit Hours.

The basic equations of state, continuity, and motion. Topics include wave motions, group velocity, theory of stratified fluids and internal waves turbulence.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ATM 532. Broadcast Meteorology. 3 Credit Hours.

Students will learn the proper techniques involved in preparing and presenting a complete and professional weathercast with a heavy emphasis on communication skills, computer graphics, and on-camera delivery.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ATM 533. Atmospheric Boundary Layer. 3 Credit Hours.

The boundary layer is the lowest 1-2 km of the atmosphere, where we live. It is necessary to understand boundary layer processes to pursue research in clouds and radiation, weather and climate, air/sea/land interaction, and chemistry of the lower atmosphere. In this course, students will learn the basic physical concepts, from observational, theoretical and modeling perspectives.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ATM 534. Atmospheric Chemistry. 3 Credit Hours.

This course is an introduction to Atmospheric Chemistry for students in Atmospheric Science and Ocean Science. The course will discuss major topic areas of atmospheric chemistry with an emphasis on providing links between atmospheric chemistry, meteorology, ocean science, and climate. Background in General Chemistry and Mathematics (through Calculus) is recommended; or permission of instructor is required.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ATM 536. Hurricanes. 3 Credit Hours.

This course is intended to provide a broad overview of tropical cyclones, starting from the basic structure, dynamics and thermodynamics, then expanding through to observations, modeling, forecasting and impacts.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ATM 537. Natural Hazards: Atmosphere and Ocean. 3 Credit Hours.

This course is designed to provide students with an understanding of natural hazards in both the atmosphere and ocean. In the atmosphere, we will explore both weather events such as storms and hurricanes and tornadoes as well as longer term phenomena such as monsoons and excess rainfall in the tropics. Oceanographically, the course will address hazards such as storm surge and flooding, rogue waves, rip currents, and tsunamis that occur on short time scales as well as the longer term effects such as sea level rise and the impacts of El Niño and La Niña oceanographic conditions on weather conditions. Thus, the course focus is on hazards and their impacts around the globe.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ATM 551. Introduction to Atmospheric Science. 3 Credit Hours.

Thermodynamics of dry and moist processes; elementary dynamical meteorology; description of weather systems and phenomena on all scales; structure and mechanics of the general circulation.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ATM 553. Climate Change. 3 Credit Hours.

Overview of the physical processes which regulate the earth's climate and response to forcing.

1 year of Calculus 1 year Physics.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ATM 554. Climate Variability. 3 Credit Hours.

This class will cover the physical mechanisms that govern the earth's climate and climate variability. It is intended for beginning graduate students in marine and atmospheric science, and upper-level undergraduate physical science students.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ATM 560. Tropospheric Chemistry I. 3 Credit Hours.

Process-Oriented lower atmospheric chemistry. Topics include photochemical oxidant formation, nighttime chemistry, air-sea exchange, cloud droplet and aerosol reactions, physical properties of aerosols, and transport properties of the troposphere.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ATM 561. Tropical Atmosphere and Ocean. 3 Credit Hours.

Observed structure of large-scale tropical circulations, including the Trades, the intertropical Convergence Zone, the Walker circulation, and equatorial wave disturbances. An overview of tropical climate, including El Niño/Southern Oscillation, and tropical monsoons is included as well as the formation, structure, and dynamics of tropical cyclone interactions between tropical convection and large-scale circulations, equatorial waves, and flow instabilities.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ATM 562. Advanced Weather Forecasting. 3 Credit Hours.

Students will learn the skills needed in researching and preparing a professional weather forecast. There is a plethora of forecast resources available online. Students will learn about using these forecast resources and share resources of their own. Specifically, we will cover topics such as the basics of atmospheric meteorology, large and small scale weather forecasting, operational weather forecasting, tropical weather, severe weather, nor'easters, lake effect snow, oscillations and various other weather phenomena. During the course of the semester a couple of Guest speakers in various parts of the field will visit to discuss relevant topics.

Prerequisite: ATM 243 and ATM 305 and ATM 405.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ATM 563. Mesoscale Meteorology and Severe Storms. 3 Credit Hours.

Course topics include the structure and dynamics of clouds, thunderstorms, and mesoscale convective systems, radar and satellite observations of clouds and precipitation, severe storm forecasting, mesoscale disturbances, frontal and orographic clouds, and precipitation.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ATM 581. Special Topics. 1-4 Credit Hours.

Lectures, research projects or directed readings in special topics related to Atmospheric Sciences.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ATM 582. Special Topics. 3 Credit Hours.

Lectures, research projects or directed readings in special topics related to Atmospheric Sciences.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ATM 583. Special Topics. 1-4 Credit Hours.

Lectures, research projects or directed readings in special topics related to Atmospheric Sciences.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ATM 584. Special Topics. 1-4 Credit Hours.

Lectures, research projects or directed readings in special topics related to Atmospheric Sciences.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ATM 585. Special Topics. 1-4 Credit Hours.

Lectures, research projects or directed readings in special topics related to Atmospheric Sciences.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ATM 611. Geophysical Fluid Dynamics I. 3 Credit Hours.

The basic equations of state, continuity, and motion. Topics include wave motions, group velocity, theory of stratified fluids and internal waves turbulence.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ATM 614. Introduction to Weather and Climate. 3 Credit Hours.

This course will cover the structure, physics, dynamics and thermodynamics of the atmosphere; including weather analysis, weather forecasting, climate and climate change. Contemporary topics covered in this class will include global warming, the ozone hole, hurricanes, thunderstorms and other severe weather phenomena.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ATM 615. Numerical Weather Prediction. 3 Credit Hours.

Review of fundamental equations and principal wave solutions. Course topics include finite differences, the filtering problem, the equivalent-barotropic model, multi-level primitive equation models, model initialization and verification, and models currently used by the weather service.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ATM 624. Applied Data Analysis. 3 Credit Hours.

The course is intended to jump-start students in strategies for fruitful computer interaction practices for careers in MPO areas of science. Academic topics include key concepts in probability & statistics, issues of graphical evidence and inference, linear models and regression, spectral analysis, and matrix decomposition. Practical topics include hands-on exercises in data analysis and the sharing of code+results and interpretation. Students do projects on data from their research or interests.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ATM 633. Atmospheric Boundary Layer. 3 Credit Hours.

The boundary layer is the lowest 1-2 km of the atmosphere, where we live. It is necessary to understand boundary layer processes to pursue research in clouds and radiation, weather and climate, air/sea/land interaction, and chemistry of the lower atmosphere. In this course, students will learn the basic physical concepts, from observational, theoretical and modeling perspectives.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ATM 634. Atmospheric Chemistry. 3 Credit Hours.

This course is an introduction to Atmospheric Chemistry for students in Atmospheric Science and Ocean Science. The course will discuss major topic areas of atmospheric chemistry with an emphasis on providing links between atmospheric chemistry, meteorology, ocean science, and climate. Background in General Chemistry and Mathematics (through Calculus) is recommended;

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ATM 636. Hurricanes. 3 Credit Hours.

This course is intended to provide a broad overview of tropical cyclones, starting from the basic structure, dynamics and thermodynamics, then expanding through to observations, modeling, forecasting and impacts.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ATM 637. Natural Hazards: Atmosphere and Ocean. 3 Credit Hours.

This course is designed to provide students with an understanding of natural hazards in both the atmosphere and ocean. In the atmosphere, we will explore both weather events such as storms and hurricanes and tornadoes as well as longer term phenomena such as monsoons and excess rainfall in the tropics. Oceanographically, the course will address hazards such as storm surge and flooding, rogue waves, rip currents, and tsunamis that occur on short time scales as well as the longer term effects such as sea level rise and the impacts of El Niño and La Niña oceanographic conditions on weather conditions. Thus, the course focus is on hazards and their impacts around the globe.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ATM 651. Introduction to Atmospheric Science. 3 Credit Hours.

Thermodynamics of dry and moist processes; elementary dynamical meteorology; description of weather systems and phenomena on all scales; structure and mechanics of the general circulation.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ATM 653. Climate Change. 3 Credit Hours.

Overview of the physical processes which regulate the earth's climate and response to forcing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ATM 654. Climate Variability. 3 Credit Hours.

This class will cover the physical mechanisms that govern the earth's climate and climate variability. It is intended for beginning graduate students in marine and atmospheric science, and upper-level undergraduate physical science students.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ATM 660. Tropospheric Chemistry I. 3 Credit Hours.

Process-Oriented lower atmospheric chemistry. Topics include photochemical oxidant formation, nighttime chemistry, air-sea exchange, cloud droplet and aerosol reactions, physical properties of aerosols, and transport properties of the troposphere.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ATM 661. Tropical Atmosphere and Ocean. 3 Credit Hours.

Observed structure of large-scale tropical circulations, including the Trades, the intertropical Convergence Zone, the Walker circulation, and equatorial wave disturbances. An overview of tropical climate, including El Niño/Southern Oscillation, and tropical monsoons is included as well as the formation, structure, and dynamics of tropical cyclone interactions between tropical convection and large-scale circulations, equatorial waves, and flow instabilities.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ATM 662. Advanced Weather Forecasting. 3 Credit Hours.

Students will learn the skills needed in researching and preparing a professional weather forecast. There is a plethora of forecast resources available online. Students will learn about using these forecast resources and share resources of their own. Specifically, we will cover topics such as the basics of atmospheric meteorology, large and small scale weather forecasting, operational weather forecasting, tropical weather, severe weather, nor'easters, lake effect snow, oscillations and various other weather phenomena. During the course of the semester a couple of Guest speakers in various parts of the field will visit to discuss relevant topics.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ATM 663. Mesoscale Meteorology and Severe Storms. 3 Credit Hours.

Course topics include the structure and dynamics of clouds, thunderstorms, and mesoscale convective systems, radar and satellite observations of clouds and precipitation, severe storm forecasting, mesoscale disturbances, frontal and orographic clouds, and precipitation.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ATM 681. Special Topics. 1-4 Credit Hours.

Lectures, research projects or directed readings in special topics related to Atmospheric Sciences.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ATM 682. Special Topics. 3 Credit Hours.

Lectures, research projects or directed readings in special topics related to Atmospheric Sciences.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ATM 683. Special Topics. 1-4 Credit Hours.

Lectures, special projects or directed readings in special topics related to Atmospheric Sciences.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ATM 684. Special Topics. 1-4 Credit Hours.

Lectures, special projects or directed readings in special topics related to Atmospheric Sciences.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ATM 685. Special Topics. 1-4 Credit Hours.

Lectures, research projects or directed readings in special topics related to Atmospheric Sciences.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ATM 701. Seminar in Atmospheric Sciences. 1 Credit Hour.

Oral presentation of research and special topics by students, faculty, and visiting scientists.

Components: SEM.

Grading: SUS.

Typically Offered: Fall & Spring.

ATM 711. Geophysical Fluid Dynamics II. 3 Credit Hours.

The focus of this course is on the effects of stratification, on time variable phenomena, and on the interaction between large-scale circulation and mesoscale eddies. Course topics include quasi-geostrophic scale analysis, Rossby waves, barotropic and baroclinic instability, wave-mean flow interaction and non-geostrophic waves.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ATM 713. Predictability. 3 Credit Hours.

Introduction to concepts of predictability and error growth, beginning from the seminal papers of Ed Lorenz, and expanding into state estimation, data assimilation, forecast sensitivity and ensemble prediction.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ATM 731. Air-Sea Interaction. 3 Credit Hours.

Oceanic and atmospheric mixed layers including fluxes of heat, momentum, moisture and salt between the ocean and atmosphere; vertical distribution of energy sources and sinks at the interface including the importance of surface currents; forced upper ocean dynamics, the role of surface waves on the air-sea exchange processes and ocean mixed layer processes.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ATM 732. Climate Dynamics. 3 Credit Hours.

Basic understanding of the Earth's Climate System and its variability on time scales ranging from weeks to millennia. Topics include internal atmospheric variability, coupled ocean-atmosphere interactions, and the theory, observations and modeling of climate change.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ATM 734. Cloud Physics and Radiative Transfer. 3 Credit Hours.

This class provides a modern update to what has traditionally been labeled as "Physical Meteorology": the fundamental physical processes that can occur in one day or less, and within one 1km or less. Such small-scale processes include aerosol, cloud and precipitation physics, and the radiative transfer through the atmosphere. We add to this a consideration of the interactions of aerosols and clouds with the larger meteorological field, as only through understanding the covariations between the aerosol and cloud physics and the larger-scale dynamical/thermodynamical fields can each influence be identified. Current issues pertinent to climate and to weather will be explored, and modeling approaches treated. The radiative transfer unit will develop a deeper appreciation of the concepts and mathematical tools, with exposure to radiative transfer codes. The course is split into 2 halves: the first half covers cloud physics, the 2nd half covers atmospheric radiation. Spring break provides a neat division of the two halves. The course assumes knowledge at the Wallace and Hobbs level. The course work will include computer programming, and some computer literacy is assumed.

Prerequisite: MPO 551.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ATM 750. Reaction Kinetics and Molecular Dynamics. 3 Credit Hours.

Theories and experimental techniques for studying kinetics in the gas-phase, association, unimolecular and bimolecular reactions, chain reactions, flames, statistical theories, potential energy surfaces, collision dynamics, kinetics in solution and the solid-state, experimental methods, diffusion-controlled processes, transition state theory, thermal decomposition, and nucleation are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ATM 752. Vortex Dynamics. 3 Credit Hours.

This course will cover fundamental to advanced topics in vortex dynamics. A review of fluid dynamics and vorticity in two dimensions will be followed by studies of vortex dynamics in three-dimensional, incompressible flow and in three-dimensional, stratified flow.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ATM 761. Atmospheric Chemistry II. 3 Credit Hours.

Advanced atmospheric chemistry.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ATM 762. Computer Models in Fluid Dynamics. 3 Credit Hours.

Course topics include numerical techniques of dealing with dynamic problems in meteorology and oceanography. Dynamic prediction models, initial data conditioning, computational stability, and error estimates are also included.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ATM 764. Atmospheric and Oceanic Turbulence. 3 Credit Hours.

Structure and dynamics of planetary boundary layers, turbulent transport processes, Fickian and statistical theories of turbulence, influence of stratification, and rotation on turbulent motion are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ATM 765. General Circulation of the Atmosphere. 3 Credit Hours.

Course topics include structure and behavior of planetary scale motions, energy, momentum, and moisture budgets of the general circulation, and models of the general circulation and climatic change.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ATM 767. Spectral and Finite Element Methods in Computational Fluid Dynamics. 3 Credit Hours.

The simulation of fluid flows in geometrically complex domains (like ocean basins) and/or with high fidelity requires the adoption of new discretization techniques that can simultaneously handle the complicated geometry and permit high accuracy solution. The finite element method has traditionally been used to tackle the geometric complexity while spectral methods have been developed to handle high accuracy in simple geometries. Here we present an approach to handle both complexity within a single framework, namely the spectral element method. The course starts by describing the weak formulation common to all finite element methods which, by design, are geometrically flexible. The second part of the course describe how high order polynomial can be implemented within the finite element framework to achieve high accuracy rates.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ATM 768. ENSO Dynamics, Prediction, and Predictability. 3 Credit Hours.

This course will provide students with a comprehensive observational and mechanistic understanding of the El Niño and the Southern Oscillation (ENSO) phenomenon and how ENSO impacts the natural variability of the global climate system. Topics will include: Observations and theories of the seasonal and interannual changes in the ocean circulation and temperature, and interactions with the atmosphere; equations of motion and theories of tropical ocean and atmosphere circulation; tropical wave dynamics; large scale air-sea coupling; mechanisms for ENSO: delayed oscillator theory, recharge oscillator theory, slow SST modes; ENSO prediction and predictability; ENSO-monsoon-Indian Ocean interactions; Global climate response to ENSO; decadal ENSO variability; ENSO in a changing climate. This course has a phenomenological focus, which complements current MPO course offerings. In particular, students who have taken dynamic and physical meteorology, ocean general circulation or geophysical fluid dynamics will be exposed to how general theory (e.g., wave dynamics) relates to particular phenomena and current research foci. In addition, student will have the opportunity to design and implement numerical hypothesis testing experiments.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ATM 774. Advanced Studies. 1-4 Credit Hours.

Supervised study of special interest to graduate students.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ATM 805. MPS Internship. 1-6 Credit Hours.

The MPS internship is an approved, supervised internship project with an organization engaged in activities associated with the student's degree track. The internship results in a collaborative project, written report, and oral presentation on a topic approved by the student's advisory committee. Up to 6 credits are necessary for graduation.

Components: PRA.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

ATM 810. Master Thesis. 1-6 Credit Hours.

The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

ATM 830. Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 12. Not more than 12 hours of ATM 830 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Biochemistry and Molecular Biology (BMB)

BMB 110. Scientific Basis of Forensic Analysis. 3 Credit Hours.

Basic science topics including mathematics, physics, chemistry, and biology are introduced and related to understanding specific topics in forensic analysis such as fingerprint and blood type analyses. Heavy emphasis is given to hands on, in class projects in which students learn to analyze and interpret experimental observations and outcomes.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BMB 145. Introduction to BMB Research. 2 Credit Hours.

Students will collaborate on a research project and learn valuable laboratory skills. The goal for this course is to make students "research-ready" through an active, inquiry-based, platform for developing core competencies in biology, genetics, BMB (biochemistry & molecular biology), bioinformatics, scientific discourse and ethics.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

BMB 245. Foundations in BMB Research. 2 Credit Hours.

Students shadow a research assistant in the lab of a BMB faculty member and learn about the research projects and techniques used by the group. Students will assist in preparing reagents, conducting experiments, analyzing data and generating brief reports. Attendance in lab group meetings is expected. Students maintain a weekly online journal and will write a paper describing the research in the lab and proposing a research problem and approach to solve in BMB545.

Components: LAB.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BMB 251. Contemporary Topics in BMB. 1 Credit Hour.

Contemporary topics in Biochemistry and Molecular Biology (BMB). Using primary research articles that underlie scientific news in popular press, students participate in weekly discussions and give at least one group presentation. Students learn and develop practical skills in critical reading and presentation of primary research findings.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BMB 260. Introduction to Biochemistry and Nutrition. 3 Credit Hours.

The composition of food and the composition and functioning of a typical cell are described in chemical terms, leading to an understanding of how life processes such as digestion, and metabolism occur and are regulated at the level of individual molecule and reactions. Applications of biochemistry and nutrition are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BMB 401. Biochemistry for the Biomedical Sciences. 4 Credit Hours.

The biochemical composition, structure, and cellular metabolism of proteins, carbohydrates, lipids, and nucleic acids are rigorously described, emphasizing problem solving strategies required of biomedical field applications.

Prerequisite: CHM 201 or CHM 222.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BMB 402. Principles of Experimental BMB. 2 Credit Hours.

An active, inquiry-based, platform for developing core competencies in biochemistry & molecular biology, making students "research ready".

Corequisite or Prerequisite: BMB 401.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BMB 411. Readings in BMB. 1 Credit Hour.

Students read and discuss one BMB primary research article each week and answer a set of questions meant to provoke critical evaluation of the work. The course introduces students to critical reading of the primary literature in BMB and is open to students at any level. Peer-mentoring and informal student-led instruction is central to the course.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BMB 417. Nutrients, Enzymes, and Metabolic Flux. 3 Credit Hours.

How macronutrients (carbohydrates, protein, and lipids) and (ii) micronutrients (vitamins and minerals) are obtained in the diet, digested, absorbed, and processed. Then, students learn to "formulate" mechanisms of enzyme catalysis and inhibition, further applying to graphical analysis of authentic enzyme kinetic and binding data. Last, such analytical skills are used to more rigorously examine metabolic flux control points. Students finish this course with thorough mechanistic understanding of (i) macronutrient composition, intake, and energy production and (ii) requirements of micronutrients in controlling enzyme-catalyzed reactions that produce energy.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BMB 501. Senior Seminars. 1 Credit Hour.

Students attend seminars of their own choice, presented by either visiting/residing faculty or graduate/postdoctoral students on recent research topics in BMB or any other discipline in the basic biomedical sciences. Students write short reports on these seminars and critically evaluate the presentations. This course can be taken more than once.

Prerequisite: BMB 401.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

BMB 506. Biomedical Case Studies. 1 Credit Hour.

Students explore topics in BMB in the context of solving problems presented in a clinical/biomedical framework. Students work in small groups and independently to acquire, critically evaluate, synthesize and present information.

Corequisite or Prerequisite: BMB 401.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BMB 507. Protein Structure, Function and Biology. 3 Credit Hours.

The physical characteristics and behavior of proteins are described, including structure, folding, dynamics, modifications, and interactions. In addition, experimental approaches to protein structure and function are addressed. Readings include both textbook assignments and current research articles, and a term paper is written and submitted for writing credit.

Prerequisite: BMB 401.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BMB 509. Molecular Biology of the Gene. 3 Credit Hours.

Biochemical processes involved in the flow of genetic information in both prokaryotes and eukaryotes are described, including DNA replication, repair, genetic recombination, RNA transcription and processing, protein synthesis, control of gene expression, cell differentiation, and recombinant DNA technology. Extensive classroom discussion is mandatory. Reading includes BMB primary research papers, course notes and a textbook.

Prerequisite: BMB 401.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BMB 511. Topics in BMB. 3 Credit Hours.

Students independently explore the literature in BMB with guidance by a BMB Faculty mentor. BMB primary research literature in an area of mutual interest to the student and the Faculty mentor (usually a content expert in that area) is discussed. Students prepare a paper or other appropriate product (e.g. computer software, a structural model, a dynamic simulation) for evaluation. Writing credit is available for papers.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BMB 514. Genetics and Genomics: Principles, Mechanisms, and Use. 3 Credit Hours.

The quantitative and analytical problem solving, as well as spatial reasoning in genetics. The course will propose genetic hypotheses, identify genetic predictions, create genetic systems for challenging these predictions, and analyze genetic data to solve practical problems.

Prerequisite: BMB 401.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BMB 519. Epigenetics and Nutrition. 3 Credit Hours.

How epigenetic mechanisms control gene expression and (ii) how epigenetic modifications are propagated. Then, students explore how such epigenetic control and inheritance can be modulated through diet and nutrition. Class participation and attendance are required, since in class discussion will be largely based on emerging and late-breaking topics from recent literature.

Prerequisite: BMB 401.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BMB 545. Research Problems in BMB. 3-12 Credit Hours.

Participation in the research laboratory of a faculty mentor to work on an independent research project. Students develop abilities to formulate good questions and sound hypotheses, design practical experiments, collect and analyze useful data, and make justifiable conclusions. Students maintain a weekly online journal, write a paper, and present their research in the lab. Two semesters of BMB 545 are required to write a thesis (pre-requisite for graduating with honors in BMB).

Components: LAB.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BMB 555. Cellular Structure, Function, and Biology. 3 Credit Hours.

Students learn composition and function of cellular organelles, and closely examine their biogenic and degradative pathways. Next, students learn cell signaling pathways and mechanisms controlling mitosis, meiosis, and cytokinesis that account for inherited traits. Studies of the molecular basis of cell-cell and cell-matrix interactions provide students with better understanding of tissue stability and function. Modern perspectives regarding stem and cancer cell biology are explored, along with new cell-based therapeutic strategies.

Prerequisite: BMB 401.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BMB 617. Readings in Molecular Biology. 1 Credit Hour.

Discussion of classical papers in molecular biology beginning with the concept of the gene and continuing into modern studies. Format consists of student presentations and group discussions.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BMB 645. Research Problems in Biochemistry, Cell and Molecular Biology. 2-3 Credit Hours.

Laboratory research problems in various areas of biochemistry, cell biology, and molecular biology, including literature search, experimental design, data gathering, and evaluation of results. This course is the mechanism by which graduate laboratory rotations are done in preparation for selection of Ph.D. mentor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BMB 680. Research Ethics. 0 Credit Hours.

The NIH Guide for Grants and Contracts stipulates that Institutions receiving support for National Research Service Award Training Grants are required to develop a program in the principles of Scientific Integrity. This program should be an integral part of the proposed training effort. The University of Miami School of Medicine has chosen to respond to this requirement with this course. This course must be taken during the first semester in the Department or Program. This is a six-hour course and will be given in two sessions of three hours each.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BMB 701. Research Journal Club.. 1 Credit Hour.

All registered BMB students must participate in the Journal Club/Seminar. Students are required to critically review published paper(s) of their choice and describe in detail the findings described therein. Senior students will present their own research.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BMB 702. Biochemical Science Seminar. 1 Credit Hour.

The Biochemistry and Molecular Biology (BMB) department has an active seminar program that meets on every Friday at noon. In this program seminars are presented by the BMB faculty (primary and secondary), invited speakers within the University of Miami and from other universities, government agencies, and industry. All BMB Graduate Students enrolled in this course will be required to attend this seminar and will have informal interactions with speaker, and exchange ideas at lunch on the seminar day.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BMB 705. Principles of Biochemistry and Molecular Biology. 3 Credit Hours.

This course is divided into three parts. In Part 1, you will examine the biochemical composition and structure of the four basic types of biological macromolecules: (i) carbohydrates, (ii) nucleic acids, (iii) proteins, and (iv) lipids. In addition, you will learn the composition and function of dietary nutrients and vitamins. Most important, you will be introduced to nature's catalytic substances termed "enzymes", paying special attention to their mechanisms of action and regulation. In Part 2, you will study how genetic information flows from its storage as DNA sequence to its expression as functional RNA and protein molecules. Here, you will give particular emphasis towards understanding control of gene expression by various epigenetic and signaling mechanisms. In Part 3, you will learn how metabolic pathways are used to convert food molecules into energy and chemical intermediates used for biosynthesis of our own cellular materials. You are expected to finish this course with rigorous understanding of the biochemical composition, structure, and cellular metabolism of proteins, carbohydrates, lipids, and nucleic acids. This will enable you to read and understand advancing topics and applications in a vast array of biomedical specialties.

Components: DIL.

Grading: GRD.

Typically Offered: Fall & Spring.

BMB 709. Advanced Biochemistry and Molecular Biology. 3 Credit Hours.
